Mr. THOMAS. Gentlemen, will the committee please come to order.

We have with us this morning the Selective Service System. It is always inspiring to have with us our distinguished friend, Lieutenant General Hershey, the Director; his assistant, Colonel Iliff; and the Chief Legislative and Liaison Officer, Colonel Franck.

General, do you and your staff have any statements you want to make? You might tell us generally how you are doing and we will go into your financial requirements later.

NATIONAL ADVISORY COMMITTEE ON THE SELECTION OF PHYSICIANS, DENTISTS, AND ALLIED SPECIALISTS

I was just wondering how important it is to you now to have this National Advisory Committee on the Selection of Physicians, Dentists, and Allied Specialists? I wonder why we do not set up a special board or committee for the lawyers and chemists and physicists? They are getting scarce too. How do the doctors work? In the final analysis is their say-so final, or does it go back to the board?

General HERSHEY. Mr. Chairman and members of the committee, on that particular subject we have always tried very hard to keep our jaws set. We take advice from everybody, but we make the decision. That is a little easier said than done.

Mr. THOMAS. Who is "we"?

General HERSHEY. Selective Service. The local boards handle most of this. It is only the troublesome ones that we hear about. The great

majority of things are settled at the local board or at the State level. We do get what the artillery used to call the overs. There are two or three ways that comes up. One way that comes up, not that it has any particular virtue, but it is just that somebody far away has to support the local board because they are living too close to it. Secondly, some people always take their appeals just as far as they can take them regardless of the virtue of it. We get some of those. And undoubtedly some have some grounds because at a time when you are taking very few and you are deferring very many there are differences of opinion as to what constitutes national interest.

Mr. THOMAS. We have no complaint to make with that statement. It makes good common horsesense. But why not defer lawyers and engineers and physicists and biochemists? Thev are scarce too.

General HERSHEY. This year there will be some people on the Hill before another committee talking about equating service not military in terms of military. I do not want to be a Drew Pearson, but I would prophesy it will not sell this year because I do not think we have enough experience to know how to equate hundreds of things being done in the national interest which are being done by civilians.

But back to the doctors, dentists, lawyers, scientists, schoolteachers, engineers, and whatnot. In the first place, you can say we are ducking the problem at the present time by the process of deferring the individuals who compare professionally with the doctors. We are attempting to avoid facing up to it. When they get to be 32 or 33 years old they might have to serve, but if they do not have to serve they get all the benefits of not going, and they miss the benefits the veterans get by going. That is one of the things the engineers and scientists kick about. They say: "We work in the national interest, but we do not get credit for it. We get deferred, but in time of crisis we will get dragged in after doing this other." There is some truth in it; but I do not believe the Congress is prepared at this time to say 3 years working as an engineer for Boeing is as good as 3 or 4 years soldiering. You cannot blame the Congress for not legislating when people are getting deferred and yet kick about it.

Mr. JONAS. There is a slight difference in pay, too.

General HERSHEY. When they get to be 32 years old they are still liable and that person who served is no longer liable, and they might get brought in.

Another thing is the question of prestige. The doctors get caught two ways. They get deferred but a certain number get forced in because we have to have doctors and we have to apply pressures to them until they volunteer.

Mr. THOMAS. We are familiar with everything you say, but the question we are concerned with is why give them special treatment over and above the lawyers and chemists and physicists by setting up a special board for them. You have $38,000 for this special board for the doctors. $38,000 is not a whole lot of money as money goes, but it is that much. Why set them up over and above everybody else?

General HERSHEY. I suppose I am in a peculiar position defending them because I was the person, when it was set up, that said I did not need advice and the only way I would go along with it—of course it would make no difference if I did or not—was that they would be advisers solely and not make the decisions.

I guess I had better say it off the record, but I do not think any group is better organized. I told this to Walter Reuther.

Mr. THOMAS. I think that ought to be on the record. The tightest group is the AMA and I think they taught Reuther, Lewis, and all of them a few things.

General HERSHEY. Nobody will worry that I said it, but it is true. That is one of the things I think the engineers and scientists have been trying very hard to get, the same solidarity. But the doctor is a very definite person because no matter how long he has been a doctor if he is not licensed he is not a doctor.

Mr. THOMAS. How much is it worth to you? You make the decisions and they are advisers. What are you paying $38,000 a year for?

General HERSHEY. I think what you are paying it for is to placate them and keep them quiet. If we get them off our hands somebody else will be after the money.

OEP MEDICAL ADVISORY COMMITTEE

When the last committee was appointed it did not have the blessing and therefore the people who were interested immediately began to move around until now we have another committee that advises OEP. The Rusk committee which served both of us has two descendants, the one I have got and the one they have. They have a committee organized by Executive order while the one I have has statutory background.

Mr. THOMAS. When you refer to OEP, that is——

General HERSHEY. The Office of Emergency Planning.

Mr. THOMAS. How does that fit in with the American Medical Association?

General HERSHEY. They have the committee and were pretty well advised who would be on it.

Mr. THOMAS. You mean who will be drafted or not drafted?

General HERSHEY. No; who will be on that committee. That committee will look at the broad picture.

Mr. THOMAS. What is that?

General HERSHEY. Manpower, war, peace, love, hate, everything.

Mr. THOMAS. That is the American Medical Association?

General HERSHEY. No; it is a Federal committee but they did agitate for it.

Mr. THOMAS. Who?

General HERSHEY. The American Medical Association. I do not know whether OEP comes before this committee or not. They do? Well, you will probably hear about it. They probably will cost a little more than mine because there are more of them.

Shall I proceed?

Mr. THOMAS. Yes. We are always glad to listen to you.

UNIVERSAL MILITARY TRAINING AND SERVICE ACT

General HERSHEY. I would like to bother you a little bit about some things I am sure you know, but this year is the year that the legislation that has to do with the Selective Service System is up before the Congress.

Mr. THOMAS. If my memory serves me, it expires June 30, 1963?

General HERSHEY. Yes. There is one thing being said I know you are familiar with. People talk about this act terminating. This act does not terminate. This act is a permanent act. The obligation that the young man has is permanent. The only thing that is not permanent is the power of the executive branch of the Government to induct anybody who becomes 18½ after June 30 this year or who has never been deferred.

Mr. THOMAS. The only thing that expires is the registration of those becoming 18?

General HERSHEY. No, they must register. They are liable but there would be no power to induct them. The registration will have to continue and the calls will have to be made from people under 35 years of age who have been deferred, and we have several millions of them. The scientific societies will not oppose the extension of this act because the inductions would be immediately on the people who had been heretofore deferred.

Mr. THOMAS. So for all practical purposes the only thing that expires is the President's authority to call so many to the colors?

General HERSHEY. He can call them but——

Mr. THOMAS. We are talking about the new registrants?

General HERSHEY. That is right.

Mr. THOMAS. That is the only thing that expires?

General HERSHEY. That is right. All the rest of them until they are 35 years—and that means for 17 years, about—you have the people from 18½ to 35 who can be called if they have ever been deferred, and we have millions of them.

PREPAREDNESS OF THE SELECTIVE SERVICE SYSTEM

The second thing I would like to say—I do not want to bore you particularly—here we have spoken this morning about things that we hope will have a turn for the better. But Selective Service finds itself in a position where it has to be able to induct nobody, or 2,000 or 3,000 a month, and yet within 60 days it should be able to induct, if called upon, a quarter of a million. No one believes we should hire all the time individuals needed to induct a quarter of a million. I am not worrying too much about rapidly hiring clerical help. The thing that worries me is keeping the local boards believing that what they are prepared to do, rather than what they do, is a challenging and significant thing they must do for their country rather than saying, "It isn't much of a job and I am through."

Mr. THOMAS. Well, the local boards are more than cooperative with you.

General HERSHEY. Yes, but it is the continuing process of keeping them believing that the countries who are likely to be our enemies are less likely to attack us if they know we can mobilize within 60 days a quarter of a million or a half million people. The people who are likely to be our enemies are more aware of the importance of this than many of our citizens are. One of the tests of how rough a country can be is their ability to mobilize. We did not do anything spectacular this fall but we would have faced quite a job this last fall if things had just happened a little differently than they did.

That is our problem. We are trying to stay small enough so that you can afford to keep us alive and try to keep 30,000 or 40,000 people who work for nothing believing there is a work they have to do. As Milton said, "They also serve who stand and wait."

NUMBER OF INDUCTIONS

Mr. THOMAS. What is the figure you estimated for inductions for the last 3 years and what is it for this year?

Colonel ILIFF. For the current year, 140,000. Last year it was 160,000.

Mr. THOMAS. And for fiscal 1964?

Colonel ILIFF. 129,000.

Mr. THOMAS. Against how many last year?

Colonel ILIFF. 160,000 last year.

General HERSHEY. That is one of the difficulties we are in all the time. Fortunately in some ways, we will not induct as many this year as we have money for and I believe we are going to avoid—I want the staff to check me on this—the necessity of a supplemental in order to meet additional postage and pay because we have more travel pay than we are using.

UNEXPENDED AND UNOBLIGATED BALANCES

Mr. THOMAS. What will be your unexpended balance this year by reason of your overestimation of some 40,000 inductees? Your big expense there is travel pay. We will follow that question up with how much was your pay increase and how much did you absorb?

Colonel ILIFF. On the basis of our request here?

Mr. THOMAS. On the basis of your appropriation last year what was your unexpended balance?

General HERSHEY. You want to know what we would have if nothing had happened?

Mr. THOMAS. Without the pay increase.

General HERSHEY. And increased postage?

Mr. THOMAS. And increased postage, that is right.

Colonel ILIFF. We would have had about $1.5 million.

Mr. THOMAS. Will you have any left with your pay increase and increased postage?

Colonel ILIFF. Yes, I think we will.

Mr. THOMAS. How much?

Colonel ILIFF. We cannot ever avoid getting in the neighborhood of $500,000 unexpended balance because we obligate in so many places. There is something between $500,000 and $1 million unexpended balance.

Mr. THOMAS. What was your unobligated balance for fiscal year 1962?

Colonel ILIFF. I cannot put my finger on the figure for 1962.

Mr. THOMAS. Give us a "horseback opinion" and you can straighten it out when you revise your remarks.

Colonel ILIFF. I would say it was about $1,100,000.

Mr. THOMAS. Go ahead, General.

General HERSHEY. I think I am ready for questions. I tried to sketch the situations very briefly overall. If there are any questions I would be glad to try to answer them. I wanted to point out we are like a fellow sitting around a firehouse waiting and hoping the fire will never come.

Mr. THOMAS. We all enjoy listening to you and your staff and I imagine the members of the committee have some broad general questions. Mr. Evins.

MAINTAINING LOCAL BOARD INTEREST

Mr. EVINS. What is the Director and State headquarters doing with reference to advising the local boards of the situation and trying to keep them in the proper attitude? They work uncompensated and I have thought a lot of the local boards are deteriorating, they are dissolving. What are you doing to keep local interest and enthusiasm up?

General HERSHEY. One of the things we worry about—we have two problems. First of all, you have to make the local boards believe there is a job that is worth doing and that they can do. We have tried to get some luncheon club that would be willing to let us give a 10- or 15-year service certificate at a luncheon, a recognition locally. The press has been very good locally about coming out and taking a picture of so-and-so. We try to get board meetings.

You have to do technical work keeping the clerks abreast too.

I have attended within the last 10 days three meetings of local boards. We had 70 in Tampa and about one-half that many in Lakeland on last Tuesday and Wednesday.

Mr. THOMAS. Off the record.

(Discussion off the record.)

General HERSHEY. It is true we lose some local board members but we have a lot of boys who went in in 1940 and most of them are getting old. Our people, I think, have been pretty persistent. It is not easy to get people to take their places. It is a thankless job and we do not have the enthusiasm in times like this that we have when we are under attack.

But I would not agree we have suffered much deterioration. I have not seen all the boards in this country but I expect to see thousands of them in a year.

One of the things I try to do, I have a policy that many people may not understand, but it is more important to be on the road when you are doing nothing; you do not have to worry about being on the road when you are working. When the call is 4,000, that is when you have to be on the road saying there is a potential having to do with the safety of the country. States vary some, as human nature does. Some directors and some of the staff people can do a better job than others. We have clerical organizations that get together, and one of the ways to keep the board together is by having good clerks.

PERMANENT NATURE OF SELECTIVE SERVICE SYSTEM

Mr. EVINS. General, you look upon Selective Service as a permanent Government agency?

General HERSHEY. Yes. We have universal service. The armed services have never been sold on training enough people for short periods of time that they have gone to Congress. That is one thing I do not agree with the way the people across the river operate. There is no secret about it. I do not believe in a country like ours we will ever have enough professionals to insure our survival. One of the worst things you can do for civilians is to have them believe that somebody else is looking out for them. You do not want the civilians to forget they may have to save themselves.

Mr. THOMAS. Is that one of the things on which the Reserves and National Guards rest?

General HERSHEY. It is the basic and fundamental thing.

Mr. THOMAS. They certainly keep the home fires burning, do they not?

General HERSHEY. Any time anybody thinks somebody has taken over their vital functions, we are lost as a country. I think the professionals do an ill-service when they say, "Give us the money and we will protect you." They cannot. They are the edge of the blade but the back of the blade has to be the citizenry.

AID OF THE SELECTIVE SERVICE SYSTEM TO RECRUITING

Mr. EVINS. Do not the Army and Air Force get all they want?

General HERSHEY. They do when we chase them in. In a month you will have them coming in and telling another committee of the House they want Selective Service because they cannot get them unless they have Selective Service. A recruiter is told to get a quota.

If anybody wants to look into something, look at the number of people who do not finish basic training.

Mr. EVINS. Recruiters make it appear very attractive.

General HERSHEY. That is their job. They are told to get a quota. I have been trying to sell for years the idea that if everybody would take what they need from our pool they could enlist them after they get in, after they found if they want them. The thing that worries me is to go out in the highways and byways and take hungry upset youngsters when they could wait until they had their basic training and then go back to the Reserves and stay there. But I cannot sell it. I am like the fellow who identified 28 flavors of liquor and he identified them correctly and then they gave him water and he said, "I don't know what it is but you can't sell it."

MILITARY PERSONNEL IN THE SYSTEM

Mr. EVINS. General, you have a sum set up for military personnel assigned to the boards and so on. Cannot the Army take care of that?

General HERSHEY. You mean in the State headquarters?

Mr. EVINS. All over in your organization.

General HERSHEY. They run this reservist system. If the Armed Forces are to run the Selective Service too, they can. But I think—of course this is a matter of opinion—but I think for the area I cover I do not believe you can find many organizations that have only around 150 persons in Washington with 50,000 people and 25 million registrants, and when you go out in the States if you do not have some-

body selling the people that they should stay in as local board members, the people doing it are Reserve officers. In the first place, we do not get caught except at the State director level, we do not get caught with changes at the State level. Our military people on active duty do not get caught in the changes.

Mr. EVINS. Mr. Chairman, I want to tell the General my colleagues a little experience in this field. I know a particular individual about to be drafted who tried to get a farm deferment. It was denied. He tried to get a deferment to go to college. It was denied. He then got married and finally he was sent in service. He took 6 months of basic training and when he came back he said, "It is not as bad as I thought it would be. I thought it would be drilling and shooting. I was going to school and getting paid for it."

I think that is all.

Mr. THOMAS. Mr. Boland.

NUMBER OF BOARDS AND MEMBERS

Mr. BOLAND. What is the total number of people serving on Selective Service boards?

General HERSHEY. We have 4,000 boards and 3 members are the minimum on each board. Some have five members. So with 4,000 boards you will have at least 12,000. I would put it near 15,000 or 14,000.

Mr. BOLAND. How great is the turnover? Is it considerable?

General HERSHEY. I would think on a percentage basis I doubt it is 5 percent in a year. We will have it greater, though, because we are getting a lot of people who are old. They have been a persistent lot of people and they do not quit. They die.

Mr. BOLAND. They have done a tremendous patriotic job. The whole backbone of this system rests on the local boards.

APPEALS

How many cases reach the appeal boards? Are these registrants that appeal to the President or appeals by Members of Congress, for instance?

General HERSHEY. There are three ways to get there. In the first place I believe, and I think most people do, in a very elastic appeals system so that, even if a person does not have too much reason, he feels better if he is told by more than one person.

Anybody can appeal to the appeal board in the State. He does not have to have any reason, he just has to say he wants to appeal. He should say it within 10 days. If one member of a five-member appeal board in the State votes differently from the other four, then he has a complete right to appeal to the President's Appeal Board. If five are against him he can go to the State director, who has the power to appeal for him to the Presidential Board, or he can come to the National Director. This is not just something on paper. We take a great many appeals to the Presidential Board. Our local boards obviously do not like to have anyone disagree with them, but on the other hand the Congress or the regulations set up two places for the man to go and in these days if there is the slightest doubt we would appeal because, first of all, time is no great object. We have our whole

system attuned to being very, very careful, and yet if new calls go up to 50,000 or 100,000 you cannot spend all this time. But your local boards get accustomed to being sure they are right and it is a very bad practice to be training for 100,000 calls, but that is just one of the things we have to worry about. I think I take more appeals than any State director. We generally, in case of doubt, have somebody else look at it on the assumption that if Willie has to go he would be a little less unwilling to go if three boards tell him he has to go.

NUMBER AND NATURE OF REJECTS

Mr. EVINS. General, how many rejects annually are there because of educational deficiencies?

General HERSHEY. I cannot give you the numbers. If you want to think in broad terms of the people that have been rejected over the years, you can figure that about 40 percent of them will be rejected for mental reasons, 40 percent for physical reasons, and about 20 percent for both reasons. This past year our rejection rate was very, very high. In the preinduction examinations it was 50 percent, and about 20 percent at the induction stations.

Do you have any idea how many we examined last year?

Colonel ILIFF. About 700,000.

Mr. THOMAS. You turn down 15 or 20 percent. The armed services turn down 40 percent for physical reasons, 40 percent for mental reasons, and 20 percent for both. Break that down in numbers.

General HERSHEY. If I might give it "off the cuff."

Mr. THOMAS. Yes.

General HERSHEY. First of all, of the 700,000 there was 10 or 12 percent that were taken out because we rejected them as obviously unfit.

Mr. THOMAS. Twelve percent?

General HERSHEY. Twelve percent. That is pretty close. Then let us state 50 percent of those who went up are rejected.

Mr. THOMAS. Is it clear that of the total number you sent up, 50 percent were rejected?

General HERSHEY. 350,000 were rejected.

Mr. THOMAS. Out of how many?

General HERSHEY. 700,000.

The next one is not easy because there are two things in it. If I told you that a quarter of these, which would be from the 350,000, it would not be quite accurate, although the percentage is right. Some of the people rejected were volunteers and are coming up for only the first time, and that tends to make the percentage at the induction station a little wrong. However, in the old days that used to be——

Mr. THOMAS. What is the 25 percent for?

General HERSHEY. That is the number rejected at the induction station.

Mr. THOMAS. For what; mental, physical, or both?

General HERSHEY. Both. If we can get the totals together I can give you numbers. Break down the 350,000. About 40 percent of those would be about 140,000, and that is mental; 140,000 are physical only, and about 70,000 have both physical and mental. Therefore, if you go back to mental, you asked that question, it would be 210,000 which have something wrong mentally.

MENTAL REQUIREMENTS

Mr. THOMAS. What is a mental defect and what is a physical defect? The figures up to now are clear.

General HERSHEY. A mental defect in this case is an educational one. It does not include psychiatric or emotional behavior. They are all physical. Mental is used to mean something else in our case. We have a place where a man marks different places—if he marks the wrong ones or not enough of the right ones, that is mental.

Mr. THOMAS. Spell out the mental requirements a little clearer. Is a fifth grade education required?

General HERSHEY. It is higher than that. Congress at one time said they could not reject anybody who scored 10 percent; that is, if they scored greater than 10 percent of the people scored, that was it.

That law was changed 3 years ago because the President could control the standards for enlistment. He was allowed to set it for inductions and it is now set at 31 percent.

Mr. THOMAS. What amount of schooling qualifies him to pass that examination?

General HERSHEY. I am afraid you have me in water too deep for me.

Mr. THOMAS. Give us your best guess. Does it mean a fifth grade education? Is it third grade?

General HERSHEY. There is little possibility of acceptance unless you have had seventh grade or higher, and I think your chances of getting in unless you are high school are not good. We have a great many high school graduates who get rejected.

Mr. THOMAS. Purely on account of lack of education?

General HERSHEY. At least they didn't have the right kind to pass the examination, which is almost unbelievable.

I don't want to get into what has happened. We have had trouble with people with master's degrees getting turned down, but——

Mr. THOMAS. That doesn't make sense.

Mr. JONAS. They have to put the right block in the right place.

General HERSHEY. They accept some people who do not pass the mental by giving them some sort of occupational test. If they show good sense they take them.

Mr. THOMAS. The classification work does not amount to much, then?

General HERSHEY. That is right.

Mr. THOMAS. It is misleading to say your function is induction classification. That is done by the armed services after you send them there.

General HERSHEY. We classify for availability. They classify for acceptability.

Mr. THOMAS. That is a play on words.

General HERSHEY. It is not.

ORIGIN OF REJECTEES

Mr. THOMAS. Where do these rejectees come from? Is there any particular section of the country? Is it broad, general, does it follow the same pattern in each of the 50 States?

General HERSHEY. If you take a map which shows the lowland generally in green, and a great deal of it is southeast——

Mr. THOMAS. Map put out by whom?

General HERSHEY. Geological Survey. They put the green on to show low country. However, it just happens——

Mr. THOMAS. What do you mean by low country?

General HERSHEY. Low altitude. You start and draw a line at about the Mason-Dixon line, and turn it south eventually, that is it. Your State has some problems which they do not have in Alabama or Mississippi or some of those. You have a great deal of Spanish-speaking population. Wherever you have a second language you have high rejections because the man must take the examination in English, unless he is a Cuban refugee, and that is a separate thing. I don't know whether you want to get into that.

Any time you have multiple language—Texas, Arizona, New Mexico, southern California, they all have rejection problems which have to do with language.

There is a little in New England, infiltration of French-Canadians.

Any place in the South where you have multiple races you have high rejection. Some people say because there is a little difference in schooling. I don't pretend to know. I just know wherever the Negro population is large the rejection rate is large.

Perhaps you have heard overtones of some of my activities lately. We did some studying here in the District. The curve has a lot to do with the race so far as standing in schools is concerned.

Mr. EVINS. The population census shows more than 50 percent of the colored population is north of the Mason-Dixon line.

General HERSHEY. That is right. There is no question of the South Chicago rejection rate, Philadelphia, and New York City. New York City has a lot of problems. They have a Puerto Rican problem and the Cuban problem to some extent, not like Miami, but they have it. As long as you put the examination in English in those places you will have a lot of people who do not pass it. Maybe some don't want to pass it; that is debatable.

Mr. RHODES. Is there any chance a lot of people fail this test voluntarily? I could fail it if I wanted to. Do you think there is a great incidence of this?

General HERSHEY. Yes, but I don't think that is as great as some other factors. There is no question about the fact that when you herd kids up at 3 or 4 in the morning, get them where they have never been, get them on a bus and push them around, obviously the testing arrangements are not good.

Not only that, but I majored in education, though many people don't believe it. I say we are not yet able to test the things we want to test. The things you test are the obvious things. Many of the things we test are not of as much importance as those things we cannot test. The things we cannot test we ignore scientifically. I am more interested in whether you can trust a man than in whether his feet are formed in a particular way.

MANPOWER UTILIZATION

Mr. THOMAS. Mr. Jonas, you have been close to this activity for many years. I hear more people say that more square pegs are put

in round holes in the armed services than any place on earth, and there is one of our biggest national losses. You get the young fellows in the service and get people in spots where they are least qualified to serve.

Does the committee hear that?

Mr. EVINS. Yes.

Mr. BOLAND. Yes.

Mr. JONAS. I get many complaints on that line, but that is not the responsibility of Selective Service.

General HERSHEY. That is right. You hear from vocal people. You hear from people who have gone to school long enough to know better and yet have not found out a great many things, and therefore it is hard to find something that is appropriate for them to do. The Armed Forces have the problem, but so did the companies.

I had a kid come into my office a year ago, a fine lad. He tried to sneak a little bit by asking me questions that showed what he was interested in. He was asking about an organization being organized at that time.

I said it was all right. He asked whether he could go to it.

Then he asked, "When I come back what will happen to me?"

I said, "Same thing as if you stay here."

He asked, "Then why do I go to this place?"

I asked, "What do you have in mind?"

Then he said what they all say—"I wouldn't mind joining the Armed Forces if they gave me something appropriate to do."

He just graduated from a fine college. I said, "What would that be?"

He thought and said, "I don't know." The kid was perfectly honest. He thought somebody should turn something over to him.

Mr. THOMAS. What you are saying is that the military is different from civilian life, and the military is not too much akin to a civilian job, but that is not exactly true. There are many things the military does which fit into civilian life.

General HERSHEY. There is no question about that. There are many things in civilian life, too. I am engaged in things this morning which I don't care to do, for example, but I have been doing them every morning.

Mr. JONAS. You cannot get around the fact that occasionally they put a boy driving a truck who has worked for years in the electrical business. He may not be an electrical engineer but he has plenty of skill in that field and he cannot understand why there is not something in the Army for him in the field where he is experienced rather than wasting his time driving a truck. A lot of that criticism is justified but I do not think it is properly directed against Selective Service because you have nothing to do with it.

General HERSHEY. That is right.

Mr. THOMAS. Here is the startling point right here, Selective Service. It seems to me they should have greater influence with the armed services on how they will use this manpower because it is this group which originates them. Doesn't that make sense? You may have to have some law.

General HERSHEY. It does to me.

Mr. JONAS. You are right, but it takes a stout leader.

General HERSHEY. The acceptance of my opinion in the Armed Forces has not been very high and from my observations it is growing less.

RECLASSIFICATION OF INDUCTEES

Mr. JONAS. Changing the subject, I don't know whether there is anything you can do about it, but one point of criticism that comes to my attention is based on these facts:

A local board registers a person in 1–A. If he doesn't appeal in 10 days he has lost his appeal rights. They don't call him up for induction or examination until years have passed.

Meantime he has changed his job or he has become more important in the job he had, or circumstances have changed. He asks the board to reopen his classification and they will not do it. He has lost his right of appeal.

Is there any way you can correct that?

General HERSHEY. We have worked at it. One of the things we are up against is the fact we are supposed to classify people rather early. The law we have was written during Korean times.

I have not hesitated to permit the States to delay classification, whenever they cared to—they didn't ignore the law—but I don't think it is always true that a young man who can't find a job is because he is in 1–A. He is likely to pick the most obvious reason as to why nobody will hire him. Realizing that may happen we figure he is in better shape to get a job if he is not classified than he is if he has 1–A, although, as a matter of fact, he is just as vulnerable if anything happens. However, the man hiring him doesn't think about that one, so therefore we have delayed classification with the hope that the man will be classified initially sometime near the time he was going.

Some of the States didn't want to violate the law and we are not in a position to tell them to violate the law. If they ignore it, that is different.

Let us see what we can do about the fellow who gets classified at age 18½ at 1–A and we will not take him until he is 22½, which puts him in a rather awkward position. He has no reason at 18½ to have an appeal, and we have no business handling it, anyway, because we are not fooling with him.

I realize it is not much of an answer to say that everybody who has ever come to national headquarters with that situation has had his rights restored. I hope most of my State headquarters and I hope most of my local boards will take care of this. In some local boards it is difficult for them to get over World War II. That is the way which they have been doing it. That is not the majority, however.

We restore most of the appeal rights.

Mr. JONAS. I have advised most of those who have come to me to take it up with the State director.

General HERSHEY. Or with us if they fail there by all means. I understand your relationship. When a person elects someone to Congress they expect he will run their errands for them. I understand that thoroughly.

Not only that, I have always welcomed you people calling on us. That is how I keep Colonel Franck in business.

Mr. JONAS. I wondered if there was some possibility of creating a pool of availables without actually putting them into 1–A until you are ready to induct them.

General HERSHEY. One of the things we have to go a little easy on is the law. The law says they are to be classified as soon as they are 18½. That goes back partially to the situation in New York City at the time the Korean war broke out. The person not in 1–A does not get in. The quota is placed on the 1–A's. It is an awkward situation to have so many people in 1–A.

The only thing I would say is to go to the State director and if you get nothing from him come to us.

Mr. JONAS. By your regulations you can let the local boards know there is no objection to reopening classifications.

General HERSHEY. Yes, we can let them know. Sometimes they have pretty firm ideas. They claim they have not done it for somebody else.

POLICY TOWARD COLLEGE STUDENTS

Mr. JONAS. What are you planning to do about college students?

General HERSHEY. At the present time if the situation remains as it is we will continue very liberally. They have to show they are actually going to college, genuinely, full time, and seriously, and that they are acceptable to the college.

Mr. JONAS. Does that apply to graduate work or work at a professional school? Do you let a boy go through college now and then to professional school?

General HERSHEY. Yes, he can. There we have some boards where you have to appeal. We have not inducted an engineering student in quite a long time. That is the area we have to intercede because I think there is some difference of opinion.

Local boards do not like to have individuals go to school until they are 26 and then pass into 1–A. I accept that as one of the situations where we find ourselves at the present time.

ENLISTMENT DURING THE INDUCTION PROCESS

Mr. JONAS. At what point in the selective service process is it to late for a young man to try to enlist?

General HERSHEY. As far as I am concerned when he holds up his hand and is sworn in it is too late.

The local boards are powerless because the heat gets on them. After issuing an order for induction they are not supposed to change. The State director has the power and exercises it and if you do not get it there I will let people enlist because I go under the assumption——

Mr. JONAS. If they get into the service, that is it.

General HERSHEY. We have what we call the 5 o'clock jobs. It is a little late the next morning. We have pulled them out of line but that is a little late.

This includes not only the Regular Forces but the reservists. The Regular Forces are quite happy to have us terminate an order.

Congress said you cannot enlist after you have an order for induction. All we do is to terminate the order for induction and then he can enlist. Sometimes the local boards get angry because they chase

a fellow around quite a while and feel they ought to have gotten in a little earlier.

I have read the Bible and it says the 11th hour and the 59th minute.

EMERGENCY OPERATIONS OF THE SYSTEM

Mr. RHODES. The structure with which you now operate has two functions: One is to do the job you have to do today, and the other is to prepare to do a job you might have to do tomorrow.

What is your force objective for the latter function, the standby function which you have?

General HERSHEY. First of all we have to do something about expansion. In the expansion field we have about 1,400, and that counts those on actual duty. You have approximately 1,300 officers who are either in the National Guard, or in one of the organized reserves which we call earmarked. We furnish the trainers to train those people although they are paid by the service to which they belong. They are the people who will furnish us the expansion. If we should happen to get into a catastrophe, we have to think of a time when we might tell people to do any kind of thing that had to be done, military or otherwise, because in those days what is military and what is civilian ceases to exist. They are all just people trying to live.

We think this 1,300 is a rather modest amount because when you figure 56 States and territories, we can easily lose several headquarters completely becaues they might get hit. These 1,300 people are organized in two ways—to go out as individuals and fill in, and they are also organized so we can send a whole headquarters out.

Mr. RHODES. Is the pay they receive for training periods charged against Selective Service?

General HERSHEY. The Armed Forces pay that.

We did have a bit of a go-round on that and I don't suppose we would have one were it not for the fact Congress decides the number of drills the National Guard trains. We figured it was not fair to put one on one system and the others on the other system.

In several States we have local board people, people who have agreed to accept appointments as local board members, and we circulate material to them. We have tried to tell our local board members that they might find themselves completely isolated and they have to get their calls for people from the Governor of the State. It might be from the mayors of the city. It might be from the captain of the National Guard or Reserve units, but from whoever they got the orders who was running the thing at that time, to deliver them, and don't worry about what you delivered them for.

NUMBER OF INDUCTIONS

Mr. RHODES. Three years ago you were inducting over 200,000 people a year. Last year you inducted 160,000. Your production is not as high as it has been. As I read the justifications your personnel are about the same.

General HERSHEY. Yes.

Mr. RHODES. It appears to me that if this is true, that production is going down, with personnel about the same, some of the personnel

must be on standby basis at the present time. In other words, you have kept more people than you now need, anticipating possible sudden increases in workload.

General HERSHEY. In the first place, if you go back to the start of fiscal year 1962, which was the fall of calendar year 1961, we put some people into the service; that tended to increase our inductions.

If you back to fiscal years 1961, 1960, 1959, and 1958, I think you will find that those years were smaller than in 1962 and smaller than the projection for fiscal years 1963 and 1964. In fiscal year 1958, there were 126,000 inductions; in 1959, there were 111,000; in 1960, 60,000; in 1961, 61,000; and in 1962 there were 159,000.

RELATION OF INDUCTIONS TO TOTAL WORKLOAD

I would like to point out first that 85 percent of our work has nothing to do with the numbers we induct. The numbers we have to register, classify, process, the numbers of people we have to defer—for instance, the college load, it is around 300,000. It takes a lot more time for a local board clerk to take care of 300,000 deferments than it does 150,000 inductions. After you have the deduction, that is it. These kids going in and out of school are with you all the time.

We have about 80,000 people who are deferred in industry, and many are engineers and scientists. They change jobs often and there is a lot of paperwork involved there.

The next thing is that I don't know just how you cut back to the place where you can get along for the moment and have any anchor to windward.

You can go to the Armed Forces and ask how much money they used in Vietnam. They will tell you, and that is it.

Then you ask about Germany and they can take care of that. That is the logic.

Mr. RHODES. How many people can you induct without increasing your personnel?

General HERSHEY. We had no trouble in 1961. I don't know whether we could have kept it up. It is one thing to take local board clerks and hammer them hard for 2 or 3 months and get by, but if it had continued 2 or 3 months more I think we would have had to make increases.

Several things were involved. First, you have a lot of lads that don't let you know anything about them. As soon as there is a crisis, immediately you get a slug of mail. The local board clerks get snowed under.

We got those calls out, and then when we got around to it they found out who had children in the last 3 or 4 years.

If we had had 3 or 4 more months of calls we would have had to increase 35 or 40 percent at least. There would also be difficulty there. Just getting people will not do the job unless we get people especially scattered around.

USE OF MILITARY PERSONNEL

Mr. RHODES. You have a number of military personnel permanently on duty with Selective Service. Why do you have a force part civilian and part military? Is this a good thing? What is the history of it?

General HERSHEY. I happen to believe—and I am perhaps prejudiced—that one of the reasons they have military in the first place is that it was the only way before 1940 that you could train people and find them. If you had no Selective Service and the Armed Forces tried to expand, even as they did in 1961, they would have been in a great deal of difficulty.

If you had anything approaching a mobilization, they are not the ones who train them. Therefore, up to date they have been willing to invest some money in training some people.

The military services paid all our military personnel in the Selective Service System all during World War II, but after money got tighter they wanted somebody else to pay it.

I think in the first place you have to interpret the Armed Forces to the public when you are in the selective service business because many people, no matter what they don't like about the Armed Forces, they go to the local board.

While the local board is civilian, it is true you have people who have had experience in the military.

If we got up into the higher levels we would lose people everytime there was a State election. Up to the present time we have lost one at the most, and many times we didn't lose him because fortunately many places are standardized, and I think there is more confidence in the fellow who is sort of a neutral.

I have several States, even when I meet the local boards, where my State director says they have more respect for a uniform. In some places that is not so.

I have not had the other experience, but I have had times where it helped both the Governor and me to be able to get out from under pressure by saying "I cannot do much with these people here."

Mr. THOMAS. You didn't give Mr. Rhodes a good answer.

Mr. RHODES. Where do you use these people?

General HERSHEY. State headquarters, national headquarters, regional headquarters.

Mr. RHODES. Do they do contact work?

General HERSHEY. They run the system. The State headquarters has primarily the job of procuring the people, training them, and supervising them. They have the job of taking——

Mr. THOMAS. Procuring and training the local board.

General HERSHEY. And clerks.

Mr. THOMAS. The authority is in the people they have trained.

General HERSHEY. The doctors we have who do our examining, and the advisers to the local boards, those people have to be procured. We don't get into the procurement business.

Mr. THOMAS. What special qualifications does a military man have to have? Mr. Rhodes was not criticizing.

General HERSHEY. I don't know what a military mind is. I perhaps never had one.

Mr. THOMAS. You are a lieutenant general.

General HERSHEY. Thank you. Many people don't recognize that. I don't like to detract, but I want to tell you briefly about the fellow who was a doctor and lawyer. The lawyers called him doctor and the doctors called him judge.

I am in very much the same situation. When I go among civilians I wear a uniform and tell them what I should. When I go to the military I wear a civilian uniform and say "Listen, you birds," and so forth, and so forth.

ADVANTAGES OF HAVING MILITARY PERSONNEL IN THE SYSTEM

First of all it is the way these people have been trained. When people are in uniform they are not subject to many stresses as are people who are not in uniform. I can try them for far more things than you can try civilians.

Mr. RHODES. You mean if the State director wants Colonel So-and-So, who is on active duty with Selective Service, fired, he cannot fire him?

General HERSHEY. He has to have a reason so he can prefer charges, that is right. He has to establish this man has done something wrong or he is completely inefficient.

I have a problem now. There is a fellow where they will recommend we appoint a deputy director in the State and we are not going to do it.

We have a new governor and he will get a new director, there is no doubt about it. After he gets the new director he is like the girl where a boy asked whether he can have the last dance. The girl said, "You have had it."

We can always take on one man.

Mr. THOMAS. You never fire any of the military personnel. You merely transfer them, don't you?

General HERSHEY. These military personnel that you have in the States are all from the States. They know the people down there and have lived with them. But there is some detachment there which you could not otherwise have. The Armed Forces are the ones mostly interested. If they have somebody who understands their problem they will get a lot better treatment than if they go to other departments of government I can name.

Mr. JONAS. You would not save money if you got competent civilians. You would have to pay them more on the average than you do military personnel.

General HERSHEY. I am afraid so now. I don't have to worry about overtime with any of these people, either.

You wouldn't believe it, gentlemen, but I could have a lieutenant or a captain driving me cheaper than I can have a civilian because I keep rather bad hours.

Mr. RHODES. What kinds of charges would you have to prefer? Are they military charges or under the Civil Service Act?

General HERSHEY. Comparable to Civil Service.

Mr. RHODES. If such charges were preferred and substantiated you would ask the military services to terminate the active duty of the officer?

General HERSHEY. Yes.

Mr. RHODES. I would like to say that I am very much in favor of the system now being operated.

I used to be one of the 1,300 officers earmarked for Selective Service.

General HERSHEY. I never forget my boys.

Mr. RHODES. At that time I knew a little about Selective Service. In my State every officer who has been called on active duty to work on active duty is an old National Guardsman or reservist. They do a whale of a job.

Mr. JONAS. Off the record.

(Discussion held off the record.)

FEDERAL-STATE RELATIONSHIP

General HERSHEY. We operate an impossible system. We have a system in which the State director works for two directors. Nobody can work for two masters, but we have to. The place where we coordinate the Governor and the National Director is through our State director. I have known pretty nearly 300 Governors. If I ever had time to write a tribute to them I would like to do it. It has been a great experience.

Mr. THOMAS. Actually, what authority does a Governor have?

General HERSHEY. He is head of the system in his State.

Mr. THOMAS. Other than being a titular head and appointing a State director. He does not make the decision.

General HERSHEY. He recommends them. He also recommends local board members and other uncompensated local board people.

Mr. THOMAS. But he still doesn't have the authority. He doesn't attempt to exercise it. He appoints them.

General HERSHEY. That is another story. What you try to do is to have the prestige which goes with the head of the State and then try to see that he never has to do anything about it if you possibly can.

You have to protect him. After all, he has his problems. It has been a marvelous job. I could name some Governors that you would think didn't amount to much and I will say they have backed me to the limit under very difficult circumstances. They didn't always come out and say so, because that is something else. But they didn't want their States to fall behind. This has been a great experience.

Mr. THOMAS. Spell it out. How could they back you? They can put pressure on the local draft board they appointed?

General HERSHEY. Let us say we have a State where there is some turmoil and six or eight boards resign in protest, as has happened. We have a Governor who, fortunately, perhaps for him, was not in agreement with everybody up here in Washington—not me but some of the others.

He would say "I don't blame the board members for resigning but I hope no other board member does."

Then he says "Let this simmer and I will give you some recommendations for new board members."

It is a very sensitive, and yet a very successful, relationship. That State director has to have one thing. He has to have the confidence of his Governor.

Mr. EVINS. If a new Governor comes in and he doesn't like the present State director, you will remove him?

General HERSHEY. The answer is "Yes," obviously, but I will not remove the deputy director, nor the rest of them. Congress said he has the right to recommend the director and we have played it that way.

Mr. EVINS. When a new Governor recommends a State director, do you approve him?

General HERSHEY. Yes. Unfortunately, now I have to run a security test which I didn't used to do. In the old days the day he was recommended he got appointed.

At the present time I have to run a security test, unless he has had one. Sometimes he has had one. You will be surprised at how few times they appoint somebody that we didn't happen to know because they were some of the boys who took training.

Mr. EVINS. You mean a fellow like Mr. Rhodes?

General HERSHEY. Yes. They might recommend him for director out there and we would be glad to have him.

JUSTIFICATION OF THE ESTIMATES

Mr. THOMAS. Gentlemen, this has been very instructive and I think we have made a good record.

Insert the first five pages of the justifications into the record.

(The material referred to follows:)

SELECTIVE SERVICE SYSTEM, FISCAL YEAR 1964

There is presented herewith justification for the request of $38,140,000 with which to operate the Selective Service System, the National Advisory Committee on the Selection of Physicians, Dentists, and Allied Specialists, and the National Selective Service Appeal Board during the fiscal year 1964.

The Selective Service System is organized to carry out the primary functions of registration, classification, selection, and presentation for induction in the Armed Forces of the men necessary for maintenance of those forces at the determined strength and by means of deferment, urges men into those occupations and activities necessary to the maintenance of the national health, safety, or interest. It also determines the availability of men for a selective callup from the Standby Reserve. The collateral functions of administration, planning, training, and records management are also performed by this agency.

The use by the Selective Service System of the services of over 48,000 uncompensated officials is unique in Government. These patriotic citizens give the strength to the Selective Service System. It is inevitable that these uncompensated citizens will become less enthusiastic in their giving of service unless adequate clerical personnel is provided. The request for fiscal year 1964 includes the provision for such services in project 30.

The Selective Service System, which is decentralized, is organized on a pyramidical structure, the broad base of which is the local and appeal board structure where the contact is maintained with over 26 million registrants by the uncompensated members of the System and the local and appeal board clerks who staff the 4,046 local boards and the 93 appeal boards. The next largest group is composed of the 56 State headquarters; the relatively small group which comprises the national headquarters is the apex.

The strength of the Selective Service System lies in the fact that classification is the responsibility of those uncompensated civilians living in the communities with the registrants. They have no pecuniary interest in their position but perform their tasks as a patriotic service.

The size of the calls or the number of inductions in any given period directly affects only one cost factor—namely, selectee travel. This estimate for fiscal year 1964 is based on the induction of 129,000 registrants.

Executive Orders Nos. 10166 and 10185 created the National Advisory Committee on the Selection of Physicians, Dentists, and Allied Specialists. Pursuant to these orders, the Selective Service System is required to furnish funds for its operation and provision is included herein.

Executive Order No. 9988 created the National Selective Service Appeal Board. The Selective Service System is required to pay the members of the board and "to furnish suitable office space and other necessary facilities and service." This requires more personnel in national headquarters to the extent necessary to

meet this requirement. This budget includes a request for funds to accomplish this purpose.

The principal factors in this request for an increase in 1964 over 1963 are: (1) statutory pay increases for the full year period including a 6 months additional increase. A similar raise for local board clerks not covered by the statute for civilian raises; and (2) increase in postal rates for a full year in 1964 as against half a year in 1963.

The following 10-year table shows the experience and projection of the number of new registrations in future years:

Fiscal year	Age 18—year of birth	Census estimate (in thousands)	Selective Service registration
1962	1944	1,402	[1] 1,512,980
1963	1945	1,397	[2] 1,504,848
1964	1946	1,414	[2] 1,525,847
1965	1947	1,955	[2] 2,109,836
1936	1948	1,811	[2] 1,954,431
1967	1949	1,813	[2] 1,956,590
1968	1950	1,857	[2] 1,980,305
1969	1951	1,902	[2] 2,027,832
1970	1952	1,768	[2] 1,885,395
1971	1953	1,850	[2] 1,972,840

[1] Actual.
[2] Estimated.

The figures in this justification are based on congressional action to up-date the expiration of the general authority to induct registrants which, under the present statute, will expire June 30, 1963. There are available sufficient numbers of registrants who, by reason of deferment, have had their liability extended and would be inductable after June 30th to more than meet the estimated requirements of 129,000 inductions in fiscal year 1964. However, the use of these registrants to fill calls would increase the workload in order to bring them up for induction.

A request is included for the replacement of motor vehicles. In fiscal year 1963, 17 vehicles are being replaced. For 1964, another 22 are being requested for the amount of $43,250. These are: (1) the replacement of the 1961 sedan assigned to the director. This vehicle is now well over the 60,000 mile replacement requirement; (2) 6 automobiles to replace those which have passed both the age and mileage requirements; and (3) 15 stations wagons, all of which have met the age requirement. Nine have already met the mileage requirement. It is anticipated that the other six will meet the mileage requirement in fiscal year 1964.

Our fleet consists of 1 heavy sedan replaced in 1961, 44 other automobiles, 27 station wagons and 13 trucks: one of which is 1½ tons, the balance 1 ton or less. The heavy sedan is located in Washington, D.C., assigned to the director of Selective Service. The balance of the equipment is in areas where there are no General Services motor pools available. They are principally used by the State directors and the officials of State headquarters for contact with local boards within their respective States. The station wagons are used also to deliver light equipment and supplies to local boards.

Selective service system consolidated summary of objective classification

	1962 actual	1963 estimate	1964 estimate
11 Personnel compensation:			
Permanent positions:			
Civilian	$21,482,146	$22,968,452	$23,206,604
Military	2,787,829	2,828,127	2,910,576
Positions other than permanent	3,280,214	4,081,660	4,038,612
Other personnel compensation	183,239	62,871	222,758
Total personnel compensation	27,733,428	29,941,110	30,378,550
12 Personnel benefits:			
Civil service retirement contributions	1,463,773	1,565,993	1,599,330
Group life insurance contributions	80,951	87,201	89,740
Federal insurance contributions act taxes	65,228	68,937	76,075
Health benefits contributions	197,417	209,422	215,255
Employee suggestion awards	14,792	4,500	4,500
21 Travel and transportation of persons:			
Administrative travel	645,533	703,000	707,000
Travel of selectees	2,887,825	2,700,000	2,479,000
Rental of passenger vehicles	39,638	44,580	43,200
22 Transportation of things:			
Freight, express, and drayage	102,470	124,500	80,500
Rental of trucks	1,898	1,900	1,900
Parcel post (penalty indicia)	49,000	49,000	49,000
23 Rent, communications, and utilities:			
Communication services	602,634	651,920	681,700
Rents and utilities	70,657	87,787	245,000
Penalty mail	617,800	694,925	772,050
24 Printing and reproduction	212,039	182,300	201,300
25 Other services	113,052	162,285	138,000
26 Supplies and materials	283,338	237,740	254,900
31 Equipment	792,332	50,600	123,000
Total obligations	35,973,805	37,567,700	38,140,000

Mr. THOMAS. You show $38,140,000 for 1964; $37,567,700 for 1963 and $35,973,805 for 1962. It is going up all the time. The number of inductees over 5 years will average out about the same but as the General is quick to point out, only 15 percent of his total work is actually seeing that the manpower gets into the Army. It is the handling of the people after that which counts. Getting them in involves only about 15 percent.

FUTURE REGISTRANTS

The table on page 3 is worth looking at.

The following 10-year table shows the experience and projection of the number of new registrants in future years.

In 1962 it was 1,402,000. In 1963 it falls off. Why?

Colonel ILIFF. After we mobilized many people in the early 1940's the birth rate fell off and then it came back up.

Mr. THOMAS. But 1944 was still a shooting war year. In half of 1945 you were not in a shooting war.

General HERSHEY. 1945 is a little better. This is the fiscal year 1945.

Mr. THOMAS. When was the armistice in Europe, April of 1945? This is an interesting table.

General HERSHEY. That is right.

Mr. THOMAS. Pages 4 and 5 give the narrative on your entire program. Page 5 is the breakdown of your personnel and other objects.

MOTOR VEHICLES

Page 4 is a pretty good breakdown on your automobiles. Put your finger on that table showing motor vehicles. I think I located the table last night, but it did not quite give us the cost on it. I will read this into the record.

In fiscal year 1963, 17 vehicles are being replaced.

That is the present fiscal year.

For 1964—

the year we are now looking at—

another 22 are being replaced for the amount of $43,250. These are: (1) The replacement of a 1961 sedan assigned to the Director.

Is it not too early to turn that car in, General?

Colonel ILIFF. It has nearly 80,000 miles on it right now.

Mr. THOMAS. In 2 years' time? Where have you been driving it?

General HERSHEY. I have been to the west coast two or three times. An automobile is necessary, after all, if you are going around visiting headquarters.

Mr. THOMAS. Off the record.

(Discussion off the record.)

Mr. THOMAS (reading):

This vehicle is now well over the 60,000-mile replacement requirement.

You have six automobiles to replace those which have passed both the age and mileage requirements.

What I am getting at is, I do not know where you go to put 40,000 miles on your car in a year. Your chauffeur must drive it after you finish the day. He must drive it all night.

General HERSHEY. Are we talking about the other cars or the one I am driving?

Off the record.

Mr. THOMAS. You request 15 station wagons. Where is the table showing the number of cars you have all together and where is the table showing the overall costs of your automobiles? You set out here under "Supplies and materials" a cost of $283,000 for 1962, $237,000 for 1963, and then you jump up to $254,900. I wonder if some of your automobile expense is in here. You have "Rents, communications, and utilities"; "Transportation of things." You have rental of trucks, $1,900. Up here under "Travel" you have rental of passenger vehicles, $39,638 for 1962, $44,580 for 1963, and then $43,200 for 1964.

Pull together for us right quick in one place what your automobiles are costing, what you are paying the General Services Administration, what you are getting for your trade-ins, what you are paying for your new ones, what you are paying for your gasoline and oil, what you are paying for your storage, and so forth. At no point is it broken down and wrapped up in one figure. Can you do that for us right quick?

Colonel ILIFF. I will have to dig up those records, sir. I do not have the gas and oil separated out, nor do I have the cost of the equipment.

Mr. THOMAS. You can figure it out right quick from your records, can you not? Where is your budget officer? We want to get that information.

Colonel ILIFF. We can do that.

Mr. THOMAS. Where is your table showing all the automobiles?

Colonel ILIFF. We were instructed that that would not be a part of the budget this year.

Mr. THOMAS. What law changed that?

The CLERK. There was an amendment to the law last year which said that automobiles should not be shown in the budget.

Mr. THOMAS. What committee did that come from?

The CLERK. Government Operations.

Mr. THOMAS. We want it to show in your justifications. I found a long table in here, but it was not quite clear.

General HERSHEY. These three here, but it has mostly dashes in it.

Colonel ILIFF. We can reproduce the old table which will supply that.

Mr. THOMAS. These tables on pages 18, 19, and 20 are supposed to give some information, but very little. The general beat me to it by saying it is mostly dashes.

The cost of vehicle rental is here. For station wagons you have nothing. For automobiles other than limousines and heavy sedans, as the cost of vehicles rented you have $53,200 for 1964 against $44,580 in 1963. For limousines and heavy sedans, cost of vehicles rented, you have nothing.

Colonel ILIFF. We have only the one car in that class, and that is one we own.

Mr. THOMAS. Is that the one you have 80,000 miles on in 2 years?

Colonel ILIFF. Yes, sir.

COST OF SEDAN OPERATION

Mr. THOMAS. I cannot own and operate my old Ford, pay gas and oil and insurance for less than $125 a month. What does that Cadillac cost you?

General HERSHEY. It is not a Cadillac, sir. It is a Lincoln that they do not make any more.

(Off the record.)

General HERSHEY. They quit making our Premiere.

Mr. THOMAS. What does it cost you to operate it with the chauffeur and everything else—gasoline, oil, maintenance, repairs, and operation? It is bound to be $1,000 a month, is it not?

General HERSHEY. That sounds awfully high.

Mr. THOMAS. How far would that miss it?

General HERSHEY. I do not have enough information to dispute it. I suppose this month we have been 3,000 miles.

Mr. THOMAS. You said a while ago you could get a first lieutenant cheaper. You pay your chauffeur around $5,000 and other objects?

General HERSHEY. Overtime is what brings it up. When you go out meeting local boards and reserve officers, it is only at night. You do not work daytime. You go to the State headquarters at nights when you are out on the road.

Mr. THOMAS. Can you provide that information?

Colonel ILIFF. Yes, sir.

(The information supplied follows:)

1962 costs on heavy sedan assigned to the Director of Selective Service—Lincoln Premiere purchased August 1960 for $3,601.05

Fiscal year 1962 costs:	
Gas, oil, and tires	$1,338.39
Repairs and maintenance	827.36
Operating costs	2,165.75
Salary to driver (regular)	4,680.00
Salary to driver (overtime)	4,046.54
Total driver compensation	8,726.54
Car costs	10,892.29
Mileage:	
June 30, 1962	59,500
July 1, 1961	26,669
Miles used	32,831
Operating costs per mile (cents)	6.6
Gasoline used (gallons)	2,491
Average miles per gallon	13.2

FINANCIAL INFORMATION REQUESTED

Mr. THOMAS. Where are your green sheets on your personnel costs in the local boards? You have here salaries and expenses on pages 15 and 16. You have the green sheets there, but what does this cover? Which program is it?

Colonel ILIFF. That is the whole thing, sir.

Mr. THOMAS. We would like to have some specific information on your State headquarters. How many personnel do you have in your State headquarters and how many do you have in your local headquarters? Then how many do you have in your local boards? The information on your local boards is all right, but do you have civil service employees in your local boards? The answer is "No." Where are your civil service employees located? In the Washington office?

Colonel ILIFF. And the State headquarters.

Mr. THOMAS. Where are your green sheets on the Washington office and State headquarters?

Colonel ILIFF. Page 14, I think, will give you the breakdown by positions. That happens to be an orange sheet this year. They changed the color of the sheets.

Mr. THOMAS. You have total number of permanent positions, 5,430.

Colonel ILIFF. Down below, you find the average grade, and the full-time equivalent of other positions are part-time positions.

Mr. THOMAS. We are familiar with this table, but the table does not give the information we are looking for. We are trying to see the green sheet classification in your State headquarters and in the national headquarters.

Colonel ILIFF. It is all combined, sir. It was combined several years ago, and the Bureau of the Budget told us not to break it down any more. I can give you the numbers, if you like. Of course, up about grade 14——

Mr. THOMAS. You had better go to the Bureau of the Budget, Colonel, and let them apply for this money for you because, after all, these justifications are not for the use and benefit of the Bureau of the Budget, but are for the use and benefit of the Congress. You have given us very little usable information here. You go back to the Bureau of the Budget and tell them to get your money for you.

General HERSHEY. If we knew what kind of sheet you wanted made up, we would make it up.

Mr. THOMAS. We ask time and time again, every year, and every year we do not get it. You listen to the Bureau of the Budget rather than the committee on the information we want. We do not object to the Bureau of the Budget having the information they want, but we want what we want, rather than what they want us to have.

Colonel ILIFF. We want to give you what you want, sir.

Mr. THOMAS. We went into this last year, and you have not made any change from last year.

Colonel ILIFF. Last year, you asked for the number of people, not a breakdown by grade.

Mr. THOMAS. Let us adjourn the hearing, and you fix up your budget. When you get it fixed up, we will go into it again. You have given us very little information in here that we need. We went into this with you last year. Your budget is no improvement over the one last year. So you go back and spell out the information that the Congress wants, not what the Bureau of the Budget wants. We do not object to your giving them whatever they want, but we want you to give us what we want, and you have not given it to us.

General HERSHEY. Would it be unfair for us to get some understanding now of what——

Mr. THOMAS. If you will read last year's hearing and the hearing of the year before last, you will find out exactly what we want. We have asked you to break this down so we can use it. You give us a performance budget, which does not mean anything to us. It is the details we want.

General HERSHEY. We have a little problem of knowing what clothes to bring to get through the checkpoint. If we haven't the clothes to get us through there, we do not have a chance to go to the party. Do you see what I mean? I have always had difficulty with the Budget on my local board people. I generally have had difficulty with the Congress on the people above the local board. So, I got in through the first door by losing a lot of my local board people, and then I got over here and lost above my local board. So, I got nicked both places. It is perfectly all right. I like our Government. I do not move anyplace else. I am just pointing out some of the difficulties of some of us down here who are serving a couple of masters. I am perfectly willing to have the Budget be mammon over here.

Mr. THOMAS. We do not mind your serving the Bureau of the Budget, for that is their function, but we do not want the Bureau of the Budget to keep the committee and the Congress from getting the information we want.

General HERSHEY. That I perfectly well understand. I have no doubt about who represents the people of the United States as far as I am concerned, and never have. I know just exactly who represents the people of the United States.

Mr. THOMAS. Let us go back and try to strengthen the budget and spell out the details. We want to know about your travel. We want your personnel. We want your carryover. We appropriate so much money for so much travel. If you do not use it, we want to know what has happened to it. We want to know why your other objects have increased, and so forth and so on. Spell it out. You have a lot of categories there. We want to know about your automobiles, what they cost you, and what they cost to operate. You can strengthen that.

We will be in touch with you.

General HERSHEY. May I say, sir, that we not only have one pleasure, but apparently we are going to have a second one.

Mr. THOMAS. General, you are most convincing.

(After the hearing the following information was supplied for the record and no additional hearing was held.)

Passenger motor vehicles—Fiscal year 1962 costs

SEDANS

	Amount	Per mile
		Cents
45 at cost of	$57,529	
Less depreciation at end of 1961	34,866	
Value at start of year 1962	22,663	
Less depreciation 1962	11,224	
Value at end of 1962	11,439	
Costs, 1962—mileage, 526,792:		
Direct operating expense	12,598	2.39
Maintenance expense	4,019	.76
Total expense	16,617	3.15
Add depreciation 1962	11,224	2.13
Total cost	27,841	5.28

STATION WAGONS

		Cents
27 at cost of	$44,635	
Less depreciation at end of 1961	30,040	
Value at end of year 1961	14,595	
Less depreciation 1962	7,026	
Value at end of year 1962	7,569	
Costs, 1962—mileage, 220,085:		
Direct operating expense	5,973	2.71
Maintenance expense	1,922	.87
Total expense	7,895	3.59
Add depreciation 1962	7,026	3.19
Total cost	14,921	6.78

NOTE.—Depreciation is calculated on a flat 20 percent of original cost resulting in 5-year total depreciation. This is not an expense item in the budget but is furnished to show total costs. The costs on the heavy sedan are not included as this has been shown separately. (See page 77 of transcript.)

Pay raise cost and financing, fiscal year 1963, by project

Mr. THOMAS. Gentlemen, will the committee please come to order.

We have with us this afternoon our friends from the Renegotiation Board. It is certainly a pleasure to have with us the distinguished chairman, Mr. Hartwig; Governor Loveless, Board member; our former colleague, Mr. D'Alesandro, Board member; Mr. Burkhalter, Board member; Mr. Fensterstock, general counsel. Where is Mr. Fensterstock?

Mr. FENSTERSTOCK. Here, Mr. Chairman.

Mr. THOMAS. We are delighted to have you. We have Mr. Prentice, the assistant general counsel; and Mr. Haggerty, the Director of Administration. We are delighted to have you, Mr. Haggerty.

Also we have Mr. Semple, the Director of Assignments; and Miss Egbert, the budget analyst.

I notice you have a very fine budget here.

Mr. Chairman, do you or any of your staff have a prepared statement?

Mr. HARTWIG. Yes, Mr. Chairman.

Mr. THOMAS. Is anybody absent?

Mr. HARTWIG. We have a vacancy on the Board.

Mr. THOMAS. Who is not here this year?

Mr. HARTWIG. Mr. Stuart.

Mr. THOMAS. How long have you had the vacancy?

Mr. HARTWIG. Since December 31. Mr. Beaty of New Mexico has been nominated for the position.

In that connection, Mr. Chairman, I would like to exercise the privilege of introducing Mr. Burkhalter of Tennessee. This is his first appearance. He is a new member of the Board.

Mr. THOMAS. We are delighted to have you. What part of Tennessee are you from?

Mr. BURKHALTER. The northwestern part.

Mr. EVINS. He is an outstanding citizen of our State.

Mr. THOMAS. What did you do before you came here?

Mr. BURKHALTER. I was practicing law here for several years. I used to work for the Tennessee Valley Authority.

Mr. THOMAS. What age man are you?

Mr. BURKHALTER. 48.

Mr. THOMAS. Well, we are delighted to have you. We like to work with the Board. Our hearings are not too rigid. We like people to say what they think and give all the help they can give us. We think you folks do a tremendous job. Your functions are quite necessary and highly advisable.

When does the present act expire?

Mr. HARTWIG. June 30, 1964.

Mr. THOMAS. You have another year to go?

Mr. HARTWIG. Yes.

Mr. THOMAS. We note your workload is falling off a little bit. You use round figures of 8,000 cases and your carryover has been around 400. You certainly are disposing of your work.

In the last few years you have eliminated some of your regional offices. You have only two now.

Tell us about your activities, your headaches, your plans, and so on, generally.

Mr. JONAS. Mr. Chairman, will you yield?

Mr. THOMAS. Yes, Mr. Jonas.

Mr. JONAS. Is Mr. Loveless here?

Mr. LOVELESS. Yes.

Mr. THOMAS. What is your home State?

Mr. LOVELESS. Iowa.

Mr. THOMAS. What part of Iowa?

Mr. LOVELESS. Southeast Iowa.

Mr. THOMAS. Off the record.

(Discussion off the record.)

Mr. JONAS. He is a former Governor.

Mr. THOMAS. We are delighted to have you with us, Governor.

Go ahead, Mr. Chairman.

Mr. HARTWIG. I have a short opening statement, if I may read it.

Mr. THOMAS. Go ahead.

GENERAL STATEMENT

Mr. HARTWIG. Mr. Chairman and members of the subcommittee, it is my privilege, as Chairman of the Renegotiation Board, to appear before the subcommittee in behalf of the Board in support of its budget estimate for the fiscal year 1964.

Before summarizing the Board's 1964 financial requirements, I believe it may be well to review the renegotiation process briefly.

Under the Renegotiation Act, the Board does not conduct renegotiation on an individual contract basis, but reviews the profits realized by a defense contractor under all his renegotiable contracts and subcontracts during his entire fiscal year.

All defense contractors and subcontractors whose renegotiable sales exceed the statutory $1 million in a fiscal year must, for each fiscal year, file a detailed report with the Board which contains factual information and financial data. Because there is no penalty for nonfiling or delinquent filing, unless willful, the Board must take steps to insure that contractors discharge their filing responsibilities.

The reports received by the Board are examined by the headquarters Board in Washington. Because the statute exempts certain defense contracts and subcontracts from renegotiation, a careful evaluation of a contractor's exemption claims is made at headquarters to be certain that the claims have been properly asserted. If the examination or screening at headquarters shows that the profits are obviously not excessive, a clearance notice is issued to the contractor. When it appears that excessive profits may be present, the cases are assigned for renegotiation proceedings to one of the two regional boards, the eastern board in Washington or the western board in Los Angeles.

After the regional board has commenced renegotiation and obtained such additional information as is required, the regional board holds meetings with the contractor, after which it determines whether excessive profits have been realized and, if so, in what amount. The regional boards, by delegation, have final authority to conclude cases by agreement when the renegotiable profits are $800,000 or less. If in such a case the contractor does not accept a determination of excessive profits, he has a right to appeal to the headquarters Board. In cases where the renegotiable profits are more than $800,000, the regional boards do not have final authority but make recommendations which are reviewed by the headquarters Board.

Mr. THOMAS. That has been your procedure for several years, has it not?

Mr. HARTWIG. Yes, sir.

The Renegotiation Board, at headquarters, establishes policies for all operations and insures that they are carried out. The Board itself is responsible for the final decision in all cases not concluded at the regional board level. It reviews regional board determinations, secures further information, holds meetings with contractors and reaches final determinations of amounts of excessive profits by agreement or by order.

If a contractor does not agree with any final order of the Board he may seek a redetermination of the amount of his excessive profits in the Tax Court of the United States.

The Board's appropriation for fiscal 1963 was $2,450,000. Our request for 1964 is $2,650,000. The increase is due in part to the 10 additional positions budgeted for fiscal 1964 and in part due to the pay increases enacted last year by the Congress.

INCREASED WORKLOAD

The number of cases assigned to the regional boards will increase from 390 in fiscal 1962 to an estimated 550 in fiscal 1963. Current experience indicates that this estimate for 1963 will prove reasonably accurate. The Board estimates that the cases assigned to the regional boards for fiscal 1964 will increase to 600.

Mr. THOMAS. Are you anticipating that $2.5 billion increase in national defense spending?

Mr. HARTWIG. Yes, sir.

Mr. THOMAS. You will not get the flow back for 18 months. Excuse me, go right ahead.

Mr. HARTWIG. Yes. But, the projected increase in the Board's workload reflects the anticipated effect of increased expenditures already made out of prior appropriations for defense and space activities.

To perform effectively, the Board and the regional boards must maintain competent, balanced staffs. The staffs include a high ratio of trained and experienced personnel including business analysts, accountants, lawyers, and procurement specialists. Horeover, the Board must maintain its staff to cope with an increasing workload. This is what we are asking in requesting an appropriation of $2,650,000.

EXCESS PROFITS DETERMINED

From its organization under the 1951 act through the end of fiscal 1962, the Board made agreements or orders determining excessive profits in the total amount of $861,565,494 before Federal tax credit. Agreements and orders in process as of that date amounted to $3,937,359.

CASES APPEALED TO TAX COURT

Mr. THOMAS. How many cases were appealed to the Tax Court last year from your decisions?

Mr. HARTWIG. One determination made last year was appealed.

Mr. THOMAS. How much money was involved in that?

Mr. HARTWIG. $250,000.

Mr. THOMAS. Has the Tax Court heard the case yet?

Mr. HARTWIG. Oh, no. It may take years.

Mr. THOMAS. I thought under their new reorganization they were pretty current where each judge can decide a case.

How many cases did you have appealed the year before? That will be 1961.

Mr. HARTWIG. Ten determinations of the year before, 1961, have been appealed.

Mr. THOMAS. Where are you reading that from?

Mr. HARTWIG. From the annual report to Congress.

Mr. THOMAS. Tell your budget officer to include that in your justifications next year. There is more information in that than in your justifications. Go ahead.

Mr. HARTWIG. To follow out your question, since the Board has been in existence——

Mr. THOMAS. How many appeals did you have in 1961?

Mr. HARTWIG. Ten of the fiscal 1961 determinations.

Mr. THOMAS. And 1962?

Mr. HARTWIG. One.

Mr. THOMAS. Have the cases appealed in 1961 been adjudicated yet?

Mr. HARTWIG. Only one. There are cases pending involving fiscal year 1953.

Mr. EVINS. Ten years.

Mr. THOMAS. They try them de novo. How do you account for that long period, trial de novo?

Mr. FENSTERSTOCK. The 1953 year would not have been renegotiated by the board until a couple years after that and then the procedure in the Tax Court in any sizable case has been known to take as much as 4 or 5 years in the preparation and ultimate trial and disposition of the case.

Mr. THOMAS. How long does it take to try one of these cases appealed to the Tax Court?

Mr. FENSTERSTOCK. The trial itself may take several weeks but the preparation for the trial involves a great deal of time and effort.

Mr. THOMAS. Do you go back to the district for trial or are the trials held here in the District of Columbia? Where does the Tax Court sit?

Mr. FENSTERSTOCK. All over the country, in the various districts.

Mr. THOMAS. I assume the contractor wants to be heard in the district where he is located?

Mr. FENSTERSTOCK. Yes.

Mr. THOMAS. Excuse me, Mr. Chairman. Go ahead.

Mr. HARTWIG. To round out the answer to your question, 118 cases were taken to the Tax Court in the 11-year period and of the 118 the Court had disposed of 57 as of June 30, 1962, leaving 61 pending on that date.

In the 57 cases which the Tax Court decided the board's determinations were upheld in 35, in four cases the determinations were increased, and in 18 cases they were decreased.

Mr. THOMAS. That is certainly an outstanding record.

Mr. HARTWIG. These 118 cases litigated compares with 3,560 determinations of excessive profits made by this board. Only 118 of those 3,560 were litigated.

Mr. THOMAS. Go ahead.

FUNDS RESTORED TO THE U.S. TREASURY

Mr. HARTWIG. In addition, renegotiation proceedings with assigned contractors during that 11-year period disclosed voluntary refunds and price reductions to the Government amounting to $1,161,006,894. Thus, the purpose of the Renegotiation Act as defined by Congress—the elimination of excessive profits—is accomplished both by board proceedings and by voluntary actions of contractors. The total amount restored to the Treasury by these three methods, from the inception of the board through June 30, 1962, aggregated $2,026,509,837.

Mr. Chairman, the Renegotiation Board has endeavored over the years to discharge its trust efficiently and economically. The record will also show that it has presented its budgetary requests to the appropriations committees of the Congress with faithful regard for these objectives.

I shall be pleased, of course, to the best of my ability, to answer any questions or supply any other information relating to the activities of the board which the subcommittee may desire.

Mr. THOMAS. That is a very excellent statement. We are always delighted to have you folks here.

Do any of your colleagues care to give us the benefit of their thinking? What about you, Governor Loveless, and our distinguished former colleague, Mr. D'Alesandro? Governor Loveless?

Mr. LOVELESS. I have been with the Board now almost 2 years, in another 3 or 4 weeks. I have the feeling we have as economical an operation as you can devise. I have been with Government for some period of time at other levels. While I was Governor I thought some of my agencies were not operating as economically as they might,

but it does take some pretty qualified people to sit across the table from and work with industry controllers and other company executives. I feel as though this budget is pretty sound. I think all things being equal this is an activity that is pretty necessary for the Government.

Mr. THOMAS. That is well said. What about you, Mr. D'Alesandro?

Mr. D'ALESANDRO. I substantiate what the chairman said. It is an economical budget. As you will recall, last year we voluntarily asked for a reduction of $400,000 in our budget. I think we have made some changes that help us expedite our cases rather than having a lot of cases on the shelf.

REDUCTION IN NUMBER OF FIELD OFFICES

Mr. THOMAS. You have two field offices, one in Washington, D.C., and one in Los Angeles. You formerly had five. Do you find you do your work as expeditiously with the two as you formerly did?

Mr. D'ALESANDRO. I think so.

Mr. THOMAS. Mr. Burkhalter, what about you?

Mr. BURKHALTER. I have not been around as long as the others but what impresses me about the Board's procedure is the fact we have been screening out a lot of cases that used to take a lot of time from the more important cases. I have studied the budget request and voted on it and share the opinion of the chairman, the Governor and Mr. D'Alesandro.

Mr. THOMAS. Mr. Evins, will you please work out this budget?

RECENT OPERATIONS OF THE BOARD

Mr. EVINS. Mr. Chairman, this agency has been noted in the past by the enemies it has made. A lot of people do not like the Renegotiation Board and they want to see it abolished. Are you being as vigorous in your work as you might be, in view of the enormous budgets we have? Are you really doing all you should do? Do you care to comment along these lines?

Mr. HARTWIG. I think the decline in the refunds, as we pointed out in the Annual Report to Congress, is due to a combination of factors. It has been a continuing trend since Korea. Cost-type contracts, as you know, in recent years have formed an increasing amount in the total picture, and cost type contracts show a smaller profit than other types that were prevalent during the Korean period. This increasing use of cost type contracts evidences the transition from airframe production to R. & D. on missiles. Generally contractors make more money on repetitive production contracts than on R. & D. contracts. This has a bearing on the 10-year picture.

In addition to that, we started out with an act of broad coverage in 1951. Since 1951 the jurisdiction of the Board has been curtailed by quite a number of exemptions and by the elimination of a number of agencies.

AGENCIES SUBJECT TO RENEGOTIATION ACT

Mr. EVINS. Will you detail the agencies that have been eliminated from your original jurisdiction. Will you read them into the record. I have on occasion introduced a bill or two to increase your jurisdiction.

These are agencies where formerly the contractors reported to the Renegotiation Board but do not at the present time?

Mr. HARTWIG. That is right. The year in which these agencies were eliminated by the Congress was 1956. The termination date of the coverage of the act insofar as these agencies are concerned was December 31, 1956. At that time the Department of Commerce was taken out of the act except for the Maritime Administration and the Federal Maritime Board, which are still subject to the act.

The Reconstruction and Finance Corporation was eliminated as well as the following:

Canal Zone Government, Panama Canal Company, Housing and Home Finance Agency, Federal Civil Defense Administration, National Advisory Committee for Aeronautics, Tennessee Valley Authority, U.S. Coast Guard, Defense Materials Procurement Agency, Bureau of Mines, U.S. Geological Survey, Bonneville Power Administration, Bureau of Reclamation, and the Federal Facilities Corporation.

Mr. EVINS. Now will you list the agencies presently subject to the act?

Mr. HARTWIG. The Department of Defense, the Department of the Army, the Department of the Navy, the Department of the Air Force, the General Services Administration, the Atomic Energy Commission, the National Aeronautics and Space Administration, the Maritime Administration, and the Federal Maritime Board.

Mr. OSTERTAG. You have enumerated the agencies not covered by the act and the agencies covered by the act, yet there is a broad area of agencies not mentioned in one category or the other.

Mr. HARTWIG. If I have not mentioned the agency, it is not covered. These are the only agencies covered.

Mr. FENSTERSTOCK. Mr. Ostertag, the first list was a list of those formerly subject to the act that are no longer subject to the act.

Mr. OSTERTAG. The agencies that have not been mentioned in one category or another were never under the act?

Mr. HARTWIG. That is right.

INCREASE IN WORKLOAD FROM SPACE AGENCY

Mr. EVINS. What is the percentage of contracts coming before the Board from these agencies? For instance, the Space Agency, what has been your activity in this field? It has a tremendous appropriation.

Mr. HARTWIG. We have yet to see the full impact of this appropriation because the contracts must be let and certain leadtimes are involved. I anticipate 1964 will be the year when we will see a more substantial impact from the increased space budget. As yet we have not seen too much of it but we are seeing some of it. The assignments to the field this year will be approximately 550. These are the hard cases. That is, 550 this year compared to 390 last year. The trend is upward. This is why we absolutely need this increase.

FIELD WORKLOAD

Mr. THOMAS. Let me see if I read your table correctly. The assigned cases for 1963 number 550?

Mr. HARTWIG. Yes.

Mr. OSTERTAG. From 390?

Mr. HARTWIG. Yes.

Mr. THOMAS. You will complete this year 550 cases and you are carrying over 460 next year?

Mr. HARTWIG. The workload is to be looked at this way——

Mr. THOMAS. So your hard cases cannot exceed 460, can they?

Mr. HARTWIG. The input to the field this year is estimated at 550. Our forecast is very accurate because in the first 6 months of this year——

Mr. THOMAS. Your table says a carryover of 460.

Mr. HARTWIG. Assuming we will complete 550 this year.

Mr. THOMAS. You will have completed 550?

Mr. HARTWIG. That is what we estimate this year.

Mr. THOMAS. Carried over to next year, 460. That is your total uncompleted workload of every type?

Mr. HARTWIG. Well, in the field, that is right.

Mr. THOMAS. You do not limit this to the field alone. Is this your entire workload?

Mr. HARTWIG. No.

Mr. THOMAS. This is a table of "Filings and Disposition."

Mr. HARTWIG. We also estimate that we will screen out at headquarters 3,450 out of 4,000 filings.

Mr. THOMAS. Is that with your carryover?

Mr. HARTWIG. At the beginning of this current fiscal year, July 1, 1962, we had a backlog of 456 in the field. We estimate that 550 new cases will be assigned to the field this year compared to 390 in fiscal year 1962 which indicates that the number of hard cases is increasing.

Mr. THOMAS. You project these figures in here for 1964, the same figures.

Mr. HARTWIG. Our work will increase in the field and that is why we ask for these additional people.

At this point I would like to point out that, while our forecast of 550 new cases going into the field is substantially accurate (because in the first 6 months of this year 271 were assigned to the field), the completions were only 196. This means that the field organization has fallen behind in disposing of this workload. Many new cases involve questions which require more thoroughgoing investigation.

PERSONNEL INCREASES REQUESTED

Mr. EVINS. Your work is of a nature which requires very skilled and competent personnel. You want to put one of these additional people in the headquarters office and nine in the field?

Mr. HARTWIG. The estimate is that all 10 will go in the field. We do not estimate we will add any at headquarters.

Mr. EVINS. I thought I saw in your justifications an increase of one in headquarters.

Mr. HARTWIG. Page 21.

Mr. EVINS. What about page 13?

Mr. HARTWIG. Page 13 shows 48 in 1963 and 48 in 1964, no increase.

Mr. EVINS. Positions actual column shows 149 for 1962, the estimate for 1963 is 96, and the estimate for 1964 is 106.

What is the average grade of the new employees you put on your staff?

Mr. HARTWIG. The average grade of the 10 new employees in 1964 will be GS–13 and GS–14.

Mr. EVINS. Are most of these accountants or lawyers?

Mr. HARTWIG. Most of them are accountants and business analysts, what we call renegotiators.

Mr. EVINS. Mr. Jonas, do you have any questions?

GUIDELINES FOR NEGOTIATIONS

Mr. JONAS. What kind of guidelines do you give your negotiators? Do you have a fixed profit you allow these contractors to make? What standards do you go by?

Mr. HARTWIG. There are no specific standards set forth in the act.

Mr. JONAS. I know there are none set forth in the act, but you must have some.

Mr. HARTWIG. No, I think if we devised a formula for any particular industry——

Mr. THOMAS. Why do you not put in the record the elements you are concerned with?

Mr. HARTWIG. The so-called statutory factors start out requiring that the Board give favorable recognition to the efficiency of the contractor; to the reasonableness of costs and profits——

Mr. JONAS. Stop right there. Elaborate on what you consider reasonable costs and profits.

Mr. HARTWIG. The reasonableness of costs and profits is best determined by making comparisons, comparisons of one company with another, comparisons of one company with a subindustry group of which that company is a member, comparisons of a company's costs and profits in the year under review with its past experience. Taking all of these into account you arrive at an informed judgment as to whether the cost or profit is reasonable.

Mr. JONAS. It is a matter of judgment, then?

Mr. HARTWIG. It is a matter of judgment, but more than that it is a judgment based to the best of our ability on comparisons.

Mr. OSTERTAG. In other words, circumstances alter cases?

Mr. HARTWIG. That is right, and it is very difficult to find two cases that are much alike.

Mr. THOMAS. Give the other elements involved.

Mr. HARTWIG. Net worth and capital employed. That factor, as you know, has been an important factor in the renegotiation of the airframe industry which has operated substantially in Government-owned plants. This was an important feature in the *Boeing* case decided by the Tax Court last year. So that factor is another factor to be taken into account.

Another factor is the extent of risk assumed. Many kinds of risk must be considered, of course, but the statute points to one risk in particular, the "risk incident to reasonable pricing policies." In that connection the Board maintains a liaison with the Defense Department, and we check with them to ascertain whether the prices under particular contracts were reasonable or whether the competition was effective, and so on. This enters into our judgment as to risk.

MEASURES OF PROFIT

Mr. OSTERTAG. Would you define profit for us?

Mr. HARTWIG. Do you want me to define the function of profit?

Mr. OSTERTAG. Profit, no doubt, is that ratio of return which is over and above the cost of production, or whatever expense incurred for that production.

Mr. HARTWIG. There are two or three, perhaps three, main measurements of profit. One is the sales ratio. One is profit in relation to net worth or investment, and still another is profit in relation to capital. These are ratios with which businessmen are familiar. Since we are applying a businessman's act, we look at these in renegotiation.

The procurement agencies are concerned with sales margins in the negotiation and pricing of contracts. The Board, in evaluating the reasonableness of a company's profit in a fiscal year, must also consider these other ratios.

Mr. OSTERTAG. But there is another factor, and that is excess profit. That is really the crux of what you are responsible for; is that it?

Mr. HARTWIG. Yes, sir.

Mr. OSTERTAG. So you determine what a reasonable profit happens to be before you determine what the excess might be.

Mr. HARTWIG. That is a very logical way to approach the problem. The renegotiation statute does not set forth a formula as to what is a reasonable profit. In fact the Board may not use a formula because this would be contrary to the intent of the act. Congress has decided that profit limitation by formula is too repressive.

DECELERATION OF PROFIT RATE

Mr. EVINS. You pointed out earlier that the percentages of profits have been lessening over the years. Yet the amount of Government projects and contracts has been increasing, and reports to you indicate the percentage of profit is lessening. What are the factors which bring this about? Is it increased labor costs? Is it the cost of materials? What are the factors?

Mr. HARTWIG. Another factor in recent years, as we pointed out in the annual report, was the effect of recessionary conditions prevailing during parts of 1957, 1958, and 1960. When those conditions prevail the situation becomes more competitive and prices become more reasonable.

Mr. EVINS. This board is not in a position to render judgment on whether or not there is a drag on the economy?

Mr. HARTWIG. That we are a drag?

Mr. EVINS. No, whether or not there should be a tax reduction.

Mr. HARTWIG. I would rather not express an opinion on that.

Mr. LOVELESS. I might say, if I may interject, and again to reiterate what Mr. Hartwig has said, the deceleration of profit rate has been brought about by risk-free type of contract which has been in effect, the cost-plus type of contract, with a stipulated type of fee, relatively risk free from industries' standpoint, with the cost guarantee feature. As a result there is a lower profit.

TYPES OF CONTRACTS

Mr. THOMAS. You mean by that, Governor, that a negotiated contract, not on a cost-plus basis, but one with a fee and the reverse of cost-plus, namely the lesser the cost the bigger the fee, is more desirable than competitive bidding and holding down costs?

Mr. LOVELESS. No.

Mr. THOMAS. Which type of contract do you look on with favor?

Mr. LOVELESS. The cost-type of contract we have experienced carried with it a lighter rate of fee than a risk-type of contract with penalties attached thereto.

Mr. THOMAS. The Board is in a better position to be an accurate judge of what type is the best type of contract for the use and benefit of the taxpayers, a negotiated contract or one where the brothers sharpen pencils and have open and competitive bidding. The Board has expressed a very decided opinion. I, for one, agree with it. The Board always has taken the position that it is far more economical to have open and competitive bidding. Is that the general concensus of the Board now?

Mr. HARTWIG. That is right.

Mr. LOVELESS. Yes, sir.

Mr. THOMAS. The majority of the contracts dollar-wise in the armed services are still negotiated.

Mr. D'ALESANDRO. That is right.

Mr. OSTERTAG. There are two types, either negotiated or cost-plus. Negotiated is competitive, is it not?

Mr. HARTWIG. Either negotiated or let in accordance with advertised procedures.

Mr. OSTERTAG. Do you deal with anything other than negotiated contracts?

Mr. HARTWIG. We deal with all contracts that are subject to the act. The line is not drawn between negotiated contracts and those which are let in accordance with formal advertising procedures except for construction contracts.

Mr. OSTERTAG. Then getting down to terms, the Renegotiation Board renegotiates what?

Mr. THOMAS. Any contract offered by these six agencies.

Mr. OSTERTAG. In other words, if it is something outside the category of a negotiated contract it is not a renegotiation, is it?

Mr. HARTWIG. It could be. As I said before, the exemption line in our act is not drawn between a negotiated contract and a contract let in acordance with advertised procedure, except in the case of construction contracts.

EXEMPTION OF CONSTRUCTION CONTRACTS

Construction contracts which are let in accordance with formal advertising are exempt from our act.

Mr. LOVELESS. The Corps of Engineers.

Mr. HARTWIG. This exemption applies only to construction contracts.

My general observation on this whole subject is that there is no substitute for effective competition, whether you have a negotiated contract or——

Mr. THOMAS. I don't want to put words in Mr. Jonas' mouth but he may object to letting the Corps of Engineers be excused on the basis of competitive bids. I know I would.

You deal with that subject often, Mr. Jonas. What is your opinion on it?

Mr. JONAS. Most of their contracts are let on a competitive bid basis. They occasionally will let a negotiated contract. We are of the opinion, however, there is no substitute for real competition.

PROFIT RANGES AND RATIOS

Mr. EVINS. What would be the average that the board has allowed as a reasonable profit? I know where there is a lot of risk you allow a larger profit. In other cases where there is a lesser amount of capital with less risk perhaps the profit percentage is less.

Would you care to tell the committee the ranges within which you make these allowances?

Mr. HARTWIG. It is very difficult to speak of ranges, Mr. Evins, when you appreciate that we deal with a vast variety of businesses in the first place; and, secondly, with a vast variety of different products and types of contracts.

Mr. EVINS. Off the record.

(Discussion held off the record.)

Mr. EVINS. You are a pretty liberal-minded board. There was one case where you found an excess of only $10 million and the Tax Court $13 million.

Mr. HARTWIG. Perhaps this would be more responsive to your question. I refer you to the information which the Board supplied the Joint Committee on Internal Revenue Taxation, which sets forth the various types of businesses which were renegotiated and the fiscal years involved, the sales and profits, and so on.

Mr. EVINS. Give us some examples for the record.

Mr. HARTWIG. All right. Here is primary metal industry, 1954; Board's determination of excessive profits $107,000, in a case where sales were $788,000 and profits $249,000.

After the Board's determination the sales were adjusted to $671,000 and the profit to $141,000, adjusting the sales percentage before renegotiation from 32 percent to 21 percent and the percentage of return on net worth from 355.7 percent to 202.9 percent. That is a case where you can see approximately one-half of the profit dollarwise was determined to be excessive.

Some of these figures must be taken with a certain amount of caution, because, as you know——

Mr. EVINS. Do you have the figures of the Boeing case there? You mentioned that off the record. Give us an example or two in the aircraft industry.

Mr. HARTWIG. Let us take something at random here. There is a company listed as No. 67. In the year 1955 sales as found by the Board amounted to $876,904,000 of renegotiable sales, $63,707,000 of profit. The Board's determination for excessive profits amounted to $6,520,000, leaving adjusted sales of $870 million and profits of $57 million. The sales margin before the refund was 7.3 percent, and the Board left the contractor with 6.6 percent.

The effect of the refund was to reduce the return on net worth from 57.6 percent to 51.7 percent.

I shall just pick out another one here, No. 70.

Mr. EVINS. Are each of these airframe manufacturers to which you refer now, these number-designated companies?

Mr. HARTWIG. Yes.

Mr. EVINS. Is that a device to set up separate corporations for bookkeeping purposes?

Mr. HARTWIG. No; these were numbered by us so that the names of the companies would not be disclosed.

Mr. OSTERTAG. Does that indicate 7 percent is excessive profit?

Mr. HARTWIG. That was the effect of the refund in that case.

Mr. JONAS. That was the effect of your decision?

Mr. HARTWIG. That was the effect on that ratio. Of course, the effect on the net worth ratio is to say 57 percent was excessive, if that is the conclusion you wish to draw.

When you take into account these other factors which cannot be set forth statistically——

Mr. EVINS. Let us have one more example in the record and then go ahead.

Mr. HARTWIG. Here is No. 72. In 1955 the sales were $282,579,000, profit $22,236,000. The Board's determination of excessive profits amounted to $2,979,000, which left the contractor with 6.9 percent of sales as against 7.9 percent prior to renegotiation, and which reduced the percentage of return on net worth from 47 percent to 41 percent. You understand that this is before taxes.

Mr. OSTERTAG. This "before taxes" is a good point because, after all is said and done, if this profit had remained there the Government would reap a certain portion of that in any event in corporate taxes.

Mr. HARTWIG. 52 percent.

REDUCTION OF PROFITS

Mr. OSTERTAG. Mr. Chairman, the psychological, or the actual effect, is this: When a corporation or a contractor has to face the knowledge that his profit, when it extends beyond a reasonable point, will be subject to a renegotiation, has he any means by which he might reduce that profit to keep it within a reasonable point and yet gain the benefit of it through one form or another?

Mr. HARTWIG. He can make voluntary refunds and reduce his prices. As a matter of fact, that was the figure that I recited in my opening statement. We have noticed in filings with the Board through the 11-year period refunds to the Government, voluntary refunds, of over $1 billion.

Mr. OSTERTAG. I didn't mean refunds or in the form of return to the Government, but in the form of absorbing it in some way to their benefit, say, for example, employees, or other means which would raise the expense.

Mr. EVINS. They do that already. They have that pretty fat in the first place.

Mr. JONAS. Bonuses, and so forth?

Mr. OSTERTAG. Anything.

Mr. HARTWIG. If we saw any profligate expenditures we would take that into account. A high-cost producer does not fare as well with the Board as a low-cost producer. In fact, the statute requires that we take this into account.

Mr. OSTERTAG. The big part of your business comes in the field of defense?

Mr. HARTWIG. Yes, entirely within the field of defense and space.

Mr. OSTERRTAG. You mentioned that the statute exempts certain defense contracts or subcontracts. Where is the line of statutory exemption? Is that the size of the contract? Is that the only exemption?

Mr. HARTWIG. No, first of all we must remember that this Board reviews the overall renegotiable sales and profits during a fiscal year of a company. Some of these companies may have 100 contracts running along contemporaneously. We pick up the receipts and accruals on a fiscal year basis as they are reported for tax purposes. We allow those costs which are deductible for tax purposes. We do not renegotiate individual contracts. This must be understood very clearly at the start.

Then the statute provides for a $1 million floor. In other words, if renegotiable receipts and accruals in a fiscal year are $1 million or less the Board cannot renegotiate. We can only renegotiate those companies which, in a fiscal year, have more than $1 million of business with the Government subject to the act.

There is quite a variety of exemptions which serve to reduce the contractor's renegotiable business subject to the act.

Mr. OSTERTAG. What percentage is exempt out of the total?

Mr. HARTWIG. This is a very difficult figure to compute. Our act covers not only prime contracts but subcontracts. These exemptions apply not only to prime contracts but to subcontractors down the line, down the contract chain.

I have tried myself to find out what that figure is and it is very difficult to pin down.

RELATION TO GAO ACTIVITY

Mr. OSTERTAG. Is there any relationship between the General Accounting Office and the Renegotiation Board as to operations and determinations of contract figures?

Mr. HARTWIG. We are generally familiar with what the General Accounting Office is doing, and in those cases where, as you know, the General Accounting Office alerts the Congress in its reports, cases of overpricing and other cases where they have objection, we have a procedure set up whereby we flag copies of those reports for consideration in connection with the renegotiation of the contractor.

JUSTIFICATION OF THE ESTIMATE

Mr. EVINS. Let us place some of this material in the record. Insert pages 4 and 5, the table on page 6, program review on pages 8, 9, and 10, and the general statement on monetary results on page 12. Also insert pages 13 through 15, the field operations on pages 21 and 22, and the other objects on page 23.

(The pages referred to follow:)

PURPOSE OF APPROPRIATION

The general purpose of the appropriation "Salaries and expenses, Renegotiation Board" is to provide funds for salaries and all other expenses of the Renegotiation Board, created by the Renegotiation Act of 1951 (Public Law 9, 82d Cong.), approved March 23, 1951, and as amended September 1, 1954, August 3, 1955, August 1, 1956, September 6, 1958, July 13, 1959, and July 3, 1962, with authority for the determination and elimination of excessive profits realized by contractors and subcontractors in connection with procurement under the national defense program.

OPERATION UNDER THE ACT

The Renegotiation Board reviews the overall profits of a contractor on his defense contracts during the contractor's fiscal year. Renegotiation is conducted on the basis of total receipts or accruals from all defense contracts and subcontracts and not on a contract-by-contract basis. By statute a contractor or subcontractor having a total of $1 million or less of receipts or accruals on defense contracts and subcontracts during any fiscal year ending after June 30, 1956, is not subject to renegotiation. A contractor having more than such amount of renegotiable business is subject to renegotiation. In those cases requiring renegotiation proceedings, the Board secures as much information as it deems necessary to determine whether the contractor has made excessive profits. In each case the Board's determination is based on the contractor's efficiency and the application of the other factors set forth in the act, which are (1) reasonableness of costs and profits, (2) net worth and capital employed, (3) extent of risk assumed, (4) nature and extent of contribution to the defense effort, and (5) character of business.

Estimate of obligations by activity

	1962 actual	1963 estimate	1964 estimate
1. Executive direction	$534,814	$539,000	$567,000
2. Staff operations	748,801	789,000	830,000
3. Renegotiation operations (field)	1,327,583	1,038,274	1,253,000
Total obligations	2,611,198	[1] 2,366,274	2,650,000

[1] Reflects transfer of $3,726 to GSA for additional Los Angeles rental costs.

Summary of man-year requirements

	1962 actual	1963 estimate	1964 estimate
1. Executive direction	48.1	46.6	47.0
2. Staff operations	68.0	70.4	72.0
3. Renegotiation operations (field)	118.0	84.0	98.6
Total man-year requirements	234.1	201.0	217.6

PROGRAM REVIEW

Workload

The Renegotiation Board administers the Renegotiation Act of 1948, the Renegotiation Act of 1951, as amended and extended through June 30, 1964, and in addition, has some responsibilities in connection with the Renegotiation Act of 1943. During the 6 fiscal years from 1957 through 1962 the volume of renegotiable sales contained in above the floor filings averaged $27 billion a year.

A contractor having renegotiable business in excess of the statutory minimum during his fiscal year must file a report with the Washington headquarters of the Board. Such reports are required to be filed no later than the first day of the fifth month after the close of each contractor's fiscal year and must include financial statements and such other information as the Board requires. Since

there is no penalty for delinquent filings, except in cases of willful failure or refusal, the Board must maintain a constant followup program.

The Board maintains a card index of Government prime contractors and their subcontractors. At appropriate periods, principally at the end of the calendar year (70 percent of contractors' fiscal years end with the calendar year), it sends letters of preliminary inquiry apprising contractors of their responsibilities under the statute. For fiscal years ending after June 30, 1956, a contractor may make a filing if his renegotiable receipts or accruals are below the respective statutory minimums but such filing is not required. A considerable number of such contractors elect to file in order to obtain the advantage of a final settlement of their renegotiation status.

A detailed breakdown of the Board's workload by fiscal years is presented in the following two tables: Table I summarizes the estimated filings by contractors' fiscal years and table II indicates the estimated receipt and disposition of such filings by the Renegotiation Board in Government fiscal years.

TABLE I.—*Estimated filings by contractors with fiscal year ending in—*

	Years under prior acts	1951 through 1956	1957	1958	1959	1960	1961	1962	1963	1964	1965	1966	Total
Floor	297	150,080	16,000	16,000	13,100	11,100	10,000	8,000	8,000	8,000	8,000	8,000	256,577
Above floor	1,763	51,485	4,000	4,000	4,000	4,000	4,000	4,000	4,000	4,000	4,000	4,000	93,248
Total	2,060	201,565	20,000	20,000	17,100	15,100	14,000	12,000	12,000	12,000	12,000	12,000	349,825

These figures represent the number of contractors who will file reports on renegotiable business they transacted in these fiscal years, but do not indicate the number of filings received in headquarters in these fiscal years. The number of filings received in headquarters in the various Government fiscal years is indicated in table II on the following page. Contractors are not required by the act to file reports with the Board until the first day of the fifth month after the close of their fiscal years, causing a timelag of 4 months. For example, a contractor whose fiscal year ends December 31, 1962, will have until May 1, 1963, to file his report with the Board.

TABLE II.—*Filings and dispositions, by Government fiscal years*

	Actual						Estimate					Total
	Fiscal years 1952–57	Fiscal year 1958	Fiscal year 1959	Fiscal year 1960	Fiscal year 1961	Fiscal year 1962	Fiscal year 1963	Fiscal year 1964	Fiscal year 1965	Fiscal year 1966	Fiscal year 1967	
Floor	143,167	16,704	18,363	13,445	9,344	8,106	8,000	8,000	8,000	8,000	8,000	249,129
Above floor	50,297	4,471	4,005	3,974	3,717	3,862	4,000	4,000	4,000	4,000	4,000	90,326
Total	193,464	21,175	22,368	17,419	13,061	11,968	12,000	12,000	12,000	12,000	12,000	339,455
Screened out	32,001	3,288	2,786	2,977	2,786	3,228	3,450	3,400	3,400	3,400	3,400	64,116
Assigned	21,118	1,136	1,161	1,103	926	390	550	600	600	600	600	28,784
Backlog	0	[1] 2,039	1,598	1,359	1,112	739	460	460	460	460	460	
	21,118	3,175	2,759	2,462	2,038	1,129	1,010	1,060	1,060	1,060	1,060	
Completed	18,922	1,577	1,400	1,350	1,299	669	550	600	600	600	600	28,167
Forwarded to next year	[1] 2,196	1,598	1,359	1,112	739	460	460	460	460	460	460	

[1] Discrepancy between these figures (of 157) is due to reporting, in earlier years, of completions on a case basis (often combining 2 or more assignments) instead of an assignment basis.

Refund determinations.—As of June 30, 1962, the regional boards had completed 25,217 assignments out of a total of 25,834. From the date of its establishment in 1951 through June 30, 1962, the Board determined excessive profits in a total amount of $861,565,494. In addition, agreements and orders to process as of June 30, 1962, amounted to $3,937,359. Further, as of the same date, contractors assigned for renegotiation had made voluntary refunds and price reductions in the amount of $1,161,006,984, which action can be attributed to the existence of the Renegotiatinn Acts. No figures of voluntary refunds or price reductions are available for contractors below the floor. In tabular form the monetary results of renegotiation are presented below:

Monetary results of renegotiation activity under the Renegotiation Acts of 1948 and 1951

Agreements and orders completed:	
1943 act	$2,610,000
1948 act	30,575,470
1951 act	828,380,024
Subtotal	861,565,494
Interim prepayments and agreements and orders in process	3,937,359
Total agreements and orders	865,502,853
Add: Voluntary refunds and price reductions disclosed in renegotiation proceedings	1,161,006,984
Total	2,026,509,837

The total of refund determinations made through June 30, 1962, amounted to $861,565,494, while through the same date the Board obligated $38,049,878 for administrative expenses.

PERSONNEL COMPENSATION EXPENSES

1. Executive direction

	1962 actual		1963 estimate		1964 estimate	
	Positions	Average employment	Positions	Average employment	Positions	Average employment
Office of the Board	21	20.5	21	20.5	21	21.0
Office of the Secretary	4	3.6	3	3.0	3	3.0
Office of the Economic Adviser	3	1.6	3	2.6	3	2.6
Office of Administration	25	22.4	21	20.5	21	20.4
Total	53	48.1	48	46.6	48	47.0

The Renegotiation Board, a statutory board of five members, is responsible for the general administration of the Renegotiation Act. The Board establishes policies for all renegotiation operations, and is responsible for the final action in all renegotiation cases. The Secretary serves as an assistant to the Board, develops and schedules agenda for Board meetings, advises contractors of Board decisions, and acts as recording officer for formal meetings. The Economic Adviser conducts economic studies, analyses, and surveys, and assists the Board in the formulation and development of policies. The Director of the Office of Administration is responsible for the internal administration and management functions of the Board, including security, budget, personnel and fiscal operations, reports and forms control, travel, procedures, dissemination of information, and office services.

2. Staff operations

	1962 actual		1963 estimate		1964 estimate	
	Positions	Average employment	Positions	Average employment	Positions	Average employment
Office of Assignments	32	25.9	30	28.1	30	28.0
Office of Accounting	11	10.7	11	10.0	11	10.8
Office of Review	23	20.1	23	21.5	23	21.4
Office of General Counsel	13	11.3	12	10.8	12	11.8
Total	79	68.0	76	70.4	76	72.0

The headquarters staff assists the Board in the formulation of policy, gives technical guidance to and helps coordinate the activities of the field organization, and performs certain steps in the processing of cases. Reports made by contractors are received in Board headquarters for examination and possible assignment for processing in the field.

Office of assignments

	1962 actual	1963 estimate	1964 estimate
Positions	32.0	30.0	30
Average employment (man-years)	25.9	28.1	28

The Office of Assignments maintains a mailing list of contractor and subcontractor names which it has obtained through procurement lists from the agencies named in the act, through answers to questions included, at the request of the Board, in both the Federal corporation income tax returns and Federal partnership information returns and through miscellaneous sources. This list includes some 15,000 names of companies and persons to whom the Board annually sends letters of preliminary inquiry transmitting instructions, information, and reporting forms. The contractors' reports are received by the Office of Assignments where they are examined for acceptability, searched for subsidiary, affiliated or controlled companies, recorded, and reviewed to separate those indicating a total of renegotiable business below the statutory minimum from those above such figure. Reports which indicate renegotiable business in excess of the applicable "floor" are examined for completeness by the Office of Assignments and when ready for further processing are forwarded through the Office of Accounting to the Office of Review for screening. Appropriate examination is also made of below-the-floor filings.

In addition to its responsibility for the securing and examination of filings, the Office of Assignments acts as the control point for all assignments which are made to the regional boards for processing and acts as liaison with the Internal Revenue Service in obtaining tax information used in the administration of the act.

3. Renegotiation operations (field)

	1962 actual	1963 estimate	1964 estimate
Positions	149.0	96.0	106.0
Average employment	118.0	84.0	98.6

Field activities are divided between two regional boards. The Board has set a field production goal of 600 completed assignments for fiscal year 1964. Estimated figures on our field workload for the fiscal year 1964 are as follows:

New assignments to be received during fiscal year	600
Backlog carried over from previous year	460
Workload	1,060
Estimated completions during fiscal year	600
Forwarded to next year	460

While all assignments handled in the field do not involve excessive profits, nevertheless, since the headquarters screening process eliminates the obvious cases of nonexcessive profits, the majority of assignments handled in the field require detailed analysis and represent the hard cases.

The regional boards develop accounting, financial, and performance data concerning the contractors' business, make plant visits and conduct special studies where necessary, and confer with the contractors' representatives to secure additional data. The regional boards have been delegated authority to determine excessive profits and make final agreements in those cases where the renegotiable profit of the contractor, before taxes, does not exceed $800,000. In other assigned cases, the regional boards make preliminary determinations and recommend disposition of the cases to the statutory board.

Regional boards also perform various other functions on behalf of the statutory board. These include acting as liaison in their respective regions by assisting in securing and completing statutory filings required by the act, preparing special accounting agreements, developing information for the processing of exemptions, and securing other information and data as instructed by the Board on these and other matters in which decisions are made by the Board. Regional boards also consult with and advise contractors and subcontractors regarding accounting requirements, legal matters, and compliance with the act and regulations.

EXPLANATION OF ESTIMATES FOR OTHER OBJECT CLASSES OF EXPENDITURES

12 Personal benefits:

1962 actual	$154,440
1963 estimate	153,000
1964 estimate	164,000

This object class includes employer's share of contributions as required by law to several employee benefit programs. The fiscal year 1964 estimate of $164,000 is composed of these items: Employees' life insurance, $8,000; health benefits, $11,000; retirement, $144,000; and FICA, $1,000.

21 Travel and transportation of persons:

1962 actual	$36,042
1963 estimate	50,000
1964 estimate	50,000

It is estimated that $50,000 will be required in fiscal year 1964 to provide for necessary trips to the plants and offices of contractors by operating personnel, travel by members of the field organization to headquarters in connection with renegotiation hearings and appeals, and for staff supervision.

The Board maintains a tight control over the use of travel funds. All requests for travel are reviewed by a central authority in each region and in the headquarters. A system of scheduling is followed to insure the mose efficient use of the Board's travel funds and manpower.

An estimate of $1,000 is included to cover GSA motor pool charges to the agency.

22 Transportation of things:

1962 actual	$23,561
1963 estimate	3,000
1964 estimate	3,000

This estimate of $3,000 provides for express shipments and for movement of household goods.

23 Rent, communications, and utilities:

1962 actual	$58,926
1963 estimate	50,000
1964 estimate	50,000

This estimate of $50,000 for fiscal year 1964 covers communications services, which consist of telephone, teletype, and telegraph services, and cost of postage. In addition to local telephone services in each of the regional boards, extensive communications services are required to tie together the field organization with its wide geographical distribution and the Washington headquarters. Wherever possible, savings in travel funds are made by communicating with contractors by letter, telegram, or telephone, in that order of precedence.

24 Printing and reproduction:

1962 actual	$9,210
1963 estimate	9,000
1964 estimate	9,000

Included in this estimate of $9,000 for 1964 are provisions for the printing of forms, reports, administrative manuals, and guides and the purchase of regulations, business reports, and special financial data. All duplicating work for the agency is also included under this classification.

25 Other services:

1962 actual	$33,820
1963 estimate	20,000
1964 estimate	17,000

The estimate of $17,000 for 1964 includes $7,700 for 20 security or loyalty investigations. The remainder is required for such expenses as repair and maintenance of equipment, reporting services, moves, relocations, and building alterations.

26 Supplies and materials:

1962 actual	$14,346
1963 estimate	14,000
1964 estimate	14,000

The request of $14,000 covers necessary office supplies at all locations of the board.

31 Equipment:

1962 actual	$33,438
1963 estimate	8,000
1964 estimate	8,000

An estimated $8,000 is required for 1964 to provide for essential replacement of such items as office machines, typewriters, and furniture.

41 Grants, subsidies, and contributions:

1962 actual	$1,000
1963 estimate	-----
1964 estimate	-----

This amount was payable to the Council of the Administrative Conference, established under Executive Order 10934.

Mr. EVINS. Travel expenses are estimated to be about the same. Personal benefits are up.

COMPUTER SERVICES

Do the IBM people try to sell you all this expensive machinery at all times?

Mr. HARTWIG. We are instituting a statistical program, and are availing ourselves of the services of the Veterans' Administration which has large computers. Our operation does not justify our spending money to install our own computers.

Mr. EVINS. My objection to the machinery is that after you buy it you have to pay them a royalty to maintain it.

If you bought it outright it would be yours, and that should be it. I don't like to put them on the payroll after you buy the machinery.

Anything else, Mr. Chairman?

VOLUNTARY REFUNDS

Mr. THOMAS. I have two or three minor questions. For the fiscal years 1961–62–63 what was the amount voluntarily returned?

Mr. HARTWIG. In 1961 the amount of voluntary price reductions and refunds approximated $31.5 million.

Mr. THOMAS. What was the figure for 1962 and what is it to date for 1963?

Mr. HARTWIG. For 1962 the amount was——

Mr. THOMAS. Was it in your statement?

Mr. HARTWIG. $17,800,000.

In 1963 to date, and we are in the first 6 months of 1963, it was $15,038,231.

PERSONNEL AND SALARY INCREASES

Mr. THOMAS. Your personnel level increases from 220 to about 230, an increase of 10. That is in anticipation of some national defense business which may or may not materialize, but if it does materialize it certainly will not affect you in less than 18 months, and a better guess would be 2 years.

What was your cost for increase in pay?

Mr. HARTWIG. Pay increase cost was $109,000.

Mr. THOMAS. How much of that did you absorb?

Mr. HARTWIG. All of that.

Mr. THOMAS. What is your estimated unexpended balance for this year?

Mr. HARTWIG. $80,000 as of this moment.

At the rate we are recruiting we may have to tap that balance. Mr. Chairman, we have to stay current and we have to meet this increase—I wish to emphasize that—in the number of hard cases that are beginning to come in at this time.

Mr. THOMAS. Normally I follow everything you say but I cannot follow you on your hard cases.

I understand what you are talking about but your tables don't bear it out.

Mr. HARTWIG. For example, last year, when we were able to have this very substantial reduction in the field workload, as you recall, which enabled us to come in voluntarily and ask for a cut, the screening process——

Mr. THOMAS. You had an unexpended balance of around $100,000 on top of that, then. You anticipate only $80,000 this year. You run an economical shop and we want to commend you. We are not fussing with you.

Mr. JONAS. We don't understand why you need these 10 extra people though.

Mr. HARTWIG. I am trying to state it in different ways as clearly as I can.

The difference between the $2,450,000 allowed this year and the $2,650,000 for which we are asking next year in large part is due to the pay increase over which we have no control.

Let us put it this way——

Mr. THOMAS. You absorbed it, the pay increase this year?

Mr. HARTWIG. That is right, $109,000. But next year that same pay increase will be in effect for the full fiscal period. It will cost, rather than $109,000, $168,000.

Then on top of that, as of January 4 next year, there will be another pay increase of $58,000.

Mr. THOMAS. What is the total, around $220,000?

Mr. HARTWIG. $226,000.

Mr. THOMAS. This does not include the executive pay raise does it?

Mr. HARTWIG. No, sir. This is the two-step civil service increase.

Mr. THOMAS. We are in favor of all of it. We are in favor of the executive pay increase, too, and I speak for myself. I don't refer to Members of Congress but the executive pay increase. This is the biggest Government on earth. In private industry people are doing the same jobs that our top people here are doing. The salary is way out of line. We cannot expect people in Government to do the same thing, and with more responsibility, at less than half the salary. This applies to agency heads, Cabinet heads, and in your 16, 17, and 18 supergrades.

We would save money by increasing those salaries, but that is immaterial here.

USE OF ADDITIONAL PERSONNEL

Mr. BOLAND. Where do increases in personnel come? In what shop do they occur?

Mr. HARTWIG. Accounting and renegotiation in the field. On the average these have to be highly trained people, GS–13's and GS–14's.

Mr. BOLAND. What are you going to do with the additional 10 employees?

Mr. JONAS. They are all in the field.

Mr. HARTWIG. That is right, and they are needed in the field. We already see an increase in the number of cases assigned to the field this year. It will increase from 390 to 550, and in 1964 there will be at least 50 more.

Mr. JONAS. I don't recall your saying where they would go, Washington or Los Angeles.

Mr. HARTWIG. It is difficult to forecast the region.

Mr. JONAS. You have not decided the region they would be in?

Mr. HARTWIG. The additional personnel?

Mr. JONAS. Yes.

Mr. HARTWIG. Some in California and some in the eastern board.

TRAVEL AND TRANSPORTATION

Mr. THOMAS. What about your travel? That was $36,000 in 1962, $60,000 this year, and $50,000 next year.

How much have you spent this year to date?

Mr. HARTWIG. We have been spending an average of about $4,000 a month.

Mr. THOMAS. That is with the increased per diem allowance?

Mr. HARTWIG. Yes.

Mr. THOMAS. How many automobiles do you have?

Mr. HARTWIG. Two automobiles.
Mr. THOMAS. Do you have any Cadillacs?
Mr. D'ALESANDRO. No. A station wagon.
Mr. HARTWIG. And a Plymouth.
Mr. THOMAS. Off the record.
(Discussion held off the record.)

TOTAL APPROPRIATIONS AND RESTORATIONS

Mr. EVINS. Do you have the total figure appropriated by your board since it was started?
Mr. HARTWIG. $38 million.
Mr. EVINS. You say you have received $861,565,494 in the way of mandatory refunds, plus $1,161 million in price reductions, a total of $2,026 million as compared with the $38 million appropriation cost of your agency?
Mr. HARTWIG. That is right.
Mr. EVINS. I have always been impressed with the importance of this Board.
Mr. THOMAS. Further questions, gentlemen?
(No response.)
Mr. THOMAS. It is always nice to have you here. We are proud of all of you. You do a very excellent job.

TUESDAY, JANUARY 22, 1963.

Mr. THOMAS. We have before us today our friends from the Federal Trade Commission.

We have our genial Chairman, Mr. Dixon, Commissioner Anderson, Commissioner Elman, a new Commissioner, Mr. Higginbotham—who is absent?

Mr. DIXON. Mr. MacIntyre, who is in New York. He is sorry he could not be here.

Mr. THOMAS. Off the record.

(Discussion held off the record.)

Mr. THOMAS. We have Mr. Buffington with us; Mr. Wheelock, the Executive Director; Mr. Frank Hale; Mr. Glendening; Mr. Delaney; Mr. Henderson, the General Counsel; Mr. Miles, Assistant Director, Bureau of Restraint of Trade; Mr. Gotschall; Mr. Stringer; Mr. Williams; Mr. Jacques, Bureau of Industry Guidance.

How is your group doing?

Mr. JACQUES. Very fine, sir.

Mr. THOMAS. Off the record.

(Discussion held off the record.)

Mr. DIXON. If we go to the problem of giving notice that we are going to have a hearing for the purpose of issuing a general trade rule, we wouldn't do that until we have a pretty good case.

Mr. THOMAS. Suppose they come in and allege that this is duress, a threat of prosecution. There is an assumption of guilt and it was under those conditions that they entered into an agreement? I am just thinking out loud. We are on your side but there may be some problems before you get through.

Mr. DIXON. All we are doing is shifting the burden. If someone violates one of these rules, all of these hearings we have had——

Mr. THOMAS. How are you going to shift the burden?

Mr. DIXON. In the complaint we will tell the parties that they have not only violated the law but the rule. We will give notice to them that we are going to take notice of these proceedings and they must show cause why the rule does not apply to them or why the rule is arbitrary.

Mr. THOMAS. Where does the burden start originally?

Mr. DIXON. With us.

Mr. THOMAS. How are you going to shift it?

Mr. DIXON. It is all in this work we have done in taking this evidence under oath and listening to everyone who has had his day in court.

Mr. THOMAS. Well, good luck.

We have Dr. Mueller, Director, Bureau of Economics. I see he wants a small increase.

We have Mr. Gercke, Chief, Division of Compliance, Bureau of Restraint of Trade.

We have Mr. Frederick Irish, Chief, Division of Scientific Opinions, Bureau of Deceptive Practices. We also have Mr. Snyder, Assistant Comptroller.

BIOGRAPHY OF COMMISSIONER HIGGINBOTHAM

We have the pleasure of having with us this morning our new Commissioner. We are delighted and happy to have you.

Tell us something about your background and experience. You look younger than I do.

Mr. HIGGINBOTHAM. I am much older now. I will be 35 in February.

Mr. THOMAS. How I envy you.

Mr. HIGGINBOTHAM. In the 4 months I have been in the Commission I think I have aged considerably.

Briefly, I am a graduate of Yale University Law School with honors. I worked as chief of the appellate division in Philadelphia, was special deputy attorney general for the State of Pennsylvania, and I got a substantial amount of litigation representing more frequently than not small corporations, small independent radio stations, people who basically would be considered within the smaller corporate community.

Mr. THOMAS. You are a trial lawyer, then?

Mr. HIGGINBOTHAM. Fundamentally.

Mr. THOMAS. Good luck to you. We are delighted to have you.

Mr. HIGGINBOTHAM. I am pleased to be here.

Mr. THOMAS. Mr. Chairman, have you and your fellow Commissioners any statement for us? If so we shall be delighted to listen to

You have had a pay increase this year. You have another one coming up next year.

You have had an increase in your postage. We would like to know what all this is costing. It may be hidden in there somewhere but I cannot find it.

When you get down to "Other objects" your information is quite meager. We don't want to put an undue burden on you, but if we are going to work over these budgets we want something to work with.

For your information, we all work them over pretty carefully.

Mr. DIXON. We recognize this. This is new to me, but I recognized the deficiency earlier. We will come to you next year with a completely new format. We have that underway now. What I picked up here is a continuation of what has been going on.

I agree with you that we should be able to put it in more concrete and specific form, why we are doing it, what we plan to do, and why we need what we asked you for.

Mr. THOMAS. Go ahead and give us your statement. We shall be delighted to hear from all of you. Say what you want to. We want you to feel at home and be free to say what you have in mind.

GENERAL STATEMENT

Mr. DIXON. The best way is to start with the summary statement of the budget.

The Federal Trade Commission's new methods of law enforcement will be on trial with businessmen and the consuming public during fiscal 1964.

With very little fanfare and not a few difficulties, the Commission has veered course sharply—away from prosecuting scattered violators of the law in the vain hope of frightening other trespassers—toward the more sensible goal of illuminating illegal pitfalls, guiding businessmen around them, and concentrating all remaining funds and manpower on bringing willful violators into line.

The significance of the policy change lies not so much in the novelty of its instruments—some of them have been employed to a limited extent in the past—but in the emphasis being given to the guidance principle. Never before has the Commission so concentrated and co-

ordinated efforts to provide dependable guidance to a businessman on how to avoid violating trade restraint laws; never has it made a more earnest effort to enforce these laws equitably to the end that business evils be eradicated. The new policy offers an opportunity for unprecedented effectiveness.

On the other hand, this new emphasis on persuasion in law compliance, be it voluntary or by grouped consent orders, is disastrously undermined if a few thumb their noses at the Commission and the law and continue to compete unfairly or dupe consumers. When this is allowed to happen, law-abiding businessmen who have been persuaded to trust the Commission's assurances are quite justly disillusioned. And the tremendous potential of their support would be extremely difficult ever to enlist again.

Thus, the Commission is at a crucial juncture. Its already overloaded staff is confronted by a steadily rising volume of work engendered by the growth of our economy; it can hope for neither money nor manpower to attempt universal enforcement of the laws, but it can, with the cooperation of private industry, serve an invaluable guidance role, provided the few who deliberately flout the law are quickly made to cease and desist. Also, in the use of the Commission's new advisory opinions, based as they must be on fact and law, no good purpose is served if they are not received in advance of businessmen's decisions. Guidance too long delayed is no guidance at all. In short, if the Commission is to get and hold the confidence of reputable businessmen and win them as indispensable allies, it cannot afford to let them down by failing in its own responsibilities.

To succeed in this effort will require more money and more manpower in fiscal 1964. This budget provides a total of $13,028,000, an increase of $1,441,500 over the amount allocated for fiscal 1963. Of this increase, a total of $378,000 must be used to meet the added cost of the pay raise voted by the Congress in 1962.

COST AND ABSORPTION OF PAY INCREASES

Mr. THOMAS. How much did the first increment of the Pay Act cost? Did it average 7 percent?

Mr. GLENDENING. Roughly that.

The next one was between 5½ to 6.

Mr. THOMAS. It cost in the neighborhood of $375,000. Did you absorb the first one?

Mr. GLENDENING. We absorbed $154,000 out of this year's.

Mr. JONAS. The next sentence says you absorbed only $96,000.

Mr. GLENDENING. $96,000 in personnel, and $58,000 in other operating expenses. We will correct that statement.

Mr. DIXON. A total of $154,000 already has been absorbed for this purpose out of 1963 funds. Then, after meeting increased costs for promotions, $100,000, and for operating costs such as travel, rents, supplies, etc., there remains $609,000 of the requested increase which would be available for expanded law enforcement. These funds would make possible the expansion of the Commission's staff from 1,178 to 1,268, an increase of 90 employees.

The increased appropriation sought will fall far short of matching the anticipated workload, so the difference is going to have to be made

up by developing more and faster production from the present staff. Buttressing this determination are two hopeful factors: One, the young attorneys hired with additional funds this year have gained considerable experience and can be expected to handle casework faster and with less supervisory time required from veteran staffers; and, second, the procedural changes introduced by the Commission during fiscal 1962 (particularly the new consent order speedup) are no longer unfamiliar to the staff and the business world and hence can be expected to produce even better results. Nevertheless, the Commission's backlog threatens to climb even higher.

WORKLOAD LEVELS

All apart from the casework engendered by expanding investigations to include enough equally culpable competitors to make corrective action really effective, there continues to pour into the Commission an ever-heavier volume of pleas for help. Applications for complaint last year reached an alltime high of 6,970, which is 41 percent more than the 4,886 in 1961 and more than double the number received even 4 years ago. And no lessening is in sight. Furthermore, there does not now exist any acceptable way of diverting any application for complaint that may have merit and plainly comes under FTC jurisdiction. It must be investigated with sufficient thoroughness to protect the public interest and at the same time safeguard against the bringing of unwarranted charges.

This underlines the magnitude of the investigational workload which, despite 18 percent faster handling in fiscal 1962, continued to mount. A total of 1,677 investigations was completed, compared to 1,427 in fiscal 1961. At the end of last June 2,699 investigations were pending, about a 2-year backlog.

Nowhere is the workload more crucial than in the Commission's intensified attack on monopolistic practices. Counting complaints authorized pending consent settlement, there were 234 issued during the last fiscal year, down slightly from the 240 in 1961; however, only about 100 orders to cease and desist were handed down in each of the 2 years. This means that more than twice as many formal actions in this field are being started as are being completed. Moreover, now in process are several large-scale investigations designed to clean up industrywide violations of the Robinson-Patman Act which will—barring near unanimous acquiescence in consent orders by the proposed respondents—result in unprecedented jamming of the casework pipeline.

Admittedly, the broad-scale attacks on monopoly are somewhat unusual, but if successful they can accomplish a genuine cleanup of industry evils whose abolishment never has been or could be achieved by culling out and restraining several violators as examples to their delighted competitors. Actually there is an element of unfairness in restraining a few while failing to halt others equally culpable.

INVESTIGATION OF PRICE DISCRIMINATION CASES

Illustrative of the complexity and volume of work being invited by broad-scale enforcement attempts are the recently announced actions to halt some millions of dollars of discriminatory allowances

annually in the garment industry. This inquiry started in 1960 with questionnaires sent to 234 department stores asking for information on promotional allowances given in connection with special sales such as back-to-school days, anniversary sales, and Christmas catalog sales. From these stores came information that their suppliers had been giving large discriminatory allowances, whereupon the Commission demanded by questionnaire detailed information from 310 suppliers who did business in at least 5 cities. Early this January, the Commission announced that 248 of these suppliers have been offered the opportunity to negotiate consent orders halting the illegal practice.

Mr. THOMAS. I read the news release you had on that subject. Is not every major industry engaged in the same practice? Take the building materials industry, for example. I can think of instances when a supplier will go into a big city where there is a large outlet for a particular product, and the supplier will put on an advertising campaign for this particular product and at the same time so will the lumber yard or hardware store.

It is my understanding that the supplier of the particular item will pay 15, 25, or 50 percent of the advertising bill. That is a widespread practice, is it not?

Mr. DIXON. It certainly is. No action that we have taken is to be interpreted by anyone as meaning we are striking out blindly at the advertising of products. We are obligated to enforce section 2(d) of the Clayton Act, among other things, which makes absolute a law violation where a seller, in granting a promotional allowance, does not make it on an equal and proportionate basis to competitors.

What we have found here by these mandatory questionnaires is that certain of the large department stores, with tremendous buying power, have apparently just said, "I sold $2 million of your dresses last year. If you want me to keep selling I want 10 percent."

We held a hearing at this Commission after we first started this procedure, and we were personally attacked and many accusations were being made, and we afforded both sides the opportunity to come and tell us and to advise us.

We had about an 8-hour day and I never heard as many law violators come up and compliment us for what we were doing because they said, "Thank God, finally somebody has enough sense to move into an industry, not one at a time but toward a substantial number."

No one of them could afford to withstand the pressure of one large big department store.

Mr. THOMAS. Does the Clayton Act refer specifically to any particular type of operation or does it deal purely with shaving of the price from one competitor against another?

Mr. DIXON. The Robinson-Patman Act as amended, section 2 of the Clayton Act, deals with discrimination; 2(a) deals with price discrimination; 2(c) is aimed specifically at a price discrimination through brokers; 2(d) deals with promotional allowances; 2(e) deals with discriminatory allowances in the form of services.

Mr. THOMAS. Say some large chainstore with a tremendous volume outlet goes to a manufacturer, and I understand this is almost common practice, and says, "We will buy 1,000 dozen pair of shoes from you. Here are our plans and specifications, and this is what we want."

Mr. DIXON. It is common practice.

Mr. THOMAS. "We don't care what you charge X but we want to know what you will charge us."

How are you going to get around that? The manufacturer eliminates his sales cost, promotional cost, he has a big order here, mass production. Can't he afford to do that and make money by giving him a cheaper price than he gives a merchant who buys 10 dozen?

Mr. DIXON. Congress was wise when it passed 2(a) of the Clayton Act. They provided a cost justification discount, sir. This is efficiency and no one should do anything to impair efficiency.

If this seller, by selling to Sears, Roebuck in large quantity, and cutting out a lot of sales expenses and a lot of handling expenses, can save money, he is entitled to pass that on to Sears, Roebuck.

Mr. THOMAS. Where is your case, then?

Mr. DIXON. My case is that Sears, Roebuck usually, and I don't want to use that word, I say a buyer, a large buyer doesn't care a hoot and holler whether it is justified or not. He usually says "Give it to me or I will get it from somebody else."

When this Commission found that man giving it to him, the Commission has sued that one party.

This man has said, and you perhaps have heard it, "I may be a law violator, but if he doesn't sue my competitor I will be the only law complier and I will be out of business."

What we are trying to do is this: The instant we find out this is a common practice we want to use the tools Congress gave us and find out if it is common in the industry, and if they are all commonly violating the law, and to move equitably against the group.

Mr. THOMAS. Where is the violation?

Mr. DIXON. If you grant a price discrimination to one competitor that you do not give to another, that can be proven to show there is a lessening of competition or a tendency toward monopoly, that is a law violation.

Mr. THOMAS. Suppose the company says they will buy 1,000 dozen, and the other says 500,000 dozen. It is still a large quantity. Where is your case?

Mr. DIXON. If we investigated this and we asked them to submit to us their cost justification, and we found that that cost justification could not explain this defference, and then we found a competitor who was not getting this, competing with this buyer, one who was being harmed, we would sue them, and that would constitute the proof.

Mr. THOMAS. What was the nature of that famous A. & P. case you had some 5 years ago? Was it along the same line?

Mr. DIXON. This was a brokerage case, I think. It was some time ago.

Perhaps the one you refer to was obtaining a price discrimination through a brokerage pass-through. They had what they called a broker but technically he was nothing in the world except their buying agent. This was just a good way to get an extra 5 or 10 percent. The law covers that and makes it a per se law violation without necessity of showing injury.

This is one that is a per se law violation.

The law is sound. The law here says that in effect a seller who goes into the market to deal with a buyer must in effect treat all buyers fairly. He must not harm competition in satisfying his own desire to obtain an inequitable share of the market.

If you allowed that to happen there would be only three or five Sears, Roebucks and you wouldn't have these other small business people.

I am sure Congressman Evins has heard a lot about this and he will hear more about it as he goes along. This is where the mass of complaints come from. They come from all types of industry.

They say to the Federal Trade Commission, "Look, Commission, my seller apparently is selling to my competitor across the street, a large chain, at a price which is so low that I cannot even resell my product.

"For instance, that large chainstore is selling milk, poultry, bread, or some other item cheaper to the public than I pay for it."

He says, "Something is wrong."

Mr. THOMAS. That is the obvious case.

Mr. DIXON. That is right. We hear these by the thousands. They are not isolated. This is usual.

And it is not unnatural to expect because buyers and sellers meet in the market and they use their power.

If the buyer has more power than the seller, he will turn it on to the seller.

The seller has a law which says to him "You cannot grant him a better price except for cost justification than you do his competing competitor."

The law says in section 2(f) that the big purchaser cannot seek this price, but the courts have pretty well taken care of that law because they have said in order to prove this you have to have enough proof to show that not only was it a price discrimination but that the purchaser knew it, or should have had reason to know it.

A purchaser doesn't know what is in the seller's books. He says, "You must be offering this to somebody else."

He says, "I am."

Then he says, "You have to do it to me."

What these people are interested in is getting this special price. They don't care how they get it. They want it.

SUPREME COURT DECISION IN "SUN OIL" CASE

Mr. THOMAS. What was the recent oil case you had?

Mr. DIXON. Sun Oil. Thank God the Supreme Court underwrote Robinson-Patman.

Mr. THOMAS. Go into detail on that.

Mr. DIXON. It was a rather simple case, the facts of the case being simple. Sun Oil Co. in the city of Jacksonville had several outlets.

Across the street from one of these outlets an independent, one of the new animals in the oil retail field, a so-called independent which traditionally does not have a national brand gasoline established but he just sells gasoline, put a station across the street.

Mr. THOMAS. It all came from the same still?

Mr. DIXON. Yes, and often are delivered in the same truck, but the public doesn't know this.

This station traditionally sells 2 cents under the established brand.

Apparently to seek more volume the new independent cut his price and was taking so much away from this independent leaseholder of Sun Oil—this is an independent businessman running that station—that he went to Sun and he said he needed help.

Sun said "I will help you in this amount. I will absorb part of this cut, this tank wagon price, and you must absorb part of it, and you go and get within 1 cent of that man."

When this happened the little station went down again and then went down again, and the price war broke out.

When Sun gave this to this one station they did not give it to the station 11 blocks up the street or stations in the same area. We got the complaint.

We looked and this was resulting in injury to these other Sun Oil dealers. We sued them.

They interjected what is called the good faith defense, which is recognized in section 2(b) of the act. Since the Supreme Court's decision in the *Standard Oil* case of 1951 where they held that a good faith defense was an absolute defense, the lawyers came in and interjected this.

The Commission took the position that a seller of gasoline could not use, as a good faith, his customer's competition of the little station here. This was the narrow point in the law.

The Court upheld that point and said, "This is not the competition of Sun Oil."

In considering this case, however, many arguments were made, the economic argument, the argument which has been repeatedly made in this country that Robinson-Patman is not consistent nor compatible with the Sherman Act.

The Court dealt with that. They dealt with it very clearly in my opinion.

They took each of these economic arguments and dealt with them one at a time. This in my opinion is long overdue in this law which we have because these laws are not inconsistent to me, not at all.

One law says we will honor the theory of free competition in America, that we must have competition.

The other law says that in addition to that a seller has the responsibility of being fair to his customers. That is all it says.

Mr. THOMAS. When was this case originated?

Mr. DIXON. About 1956.

Mr. THOMAS. The stations involved had long ceased to cut prices, more than likely. Perhaps they have had three price wars in between this time. What is the net result of the decision? How will it affect other areas and other stations? Chances are both of these stations are out of business by now.

What is the sum and substance of all the litigation and decision?

Mr. DIXON. I am glad you asked that, sir. I will tell you this—the order applies to Sun wherever they do business. This one place cannot do this again.

OIL PRICE DISCRIMINATION CASES

We have other cases. We have had a case decided against the American Oil Co. and against Shell Oil Co., and Atlantic, and many others. They are on the way. A new problem is before us. I cannot talk about the problem but the Commission charged them with violating the law when they moved from this direct price discrimination to one of consignment. That is before us today.

We have moved in this field, and it has been long and tedious because they have good counsel and they have very sharp businessmen.

The sum and substance of this is that in the end they will be given a burden, as the law should require of these big national refiners and integrated companies. When they have a multitude of station operators, they have leased to these men these stations, they sell the gasoline to these stations. These men are independently small businessmen. They cannot come along and pick out one of them and give a special privilege and not give it to the others if it hurts them.

In other words, this law merely says "You must not discriminate in price where it will harm these competing customers."

There is a problem of figuring out a market area.

Mr. JONAS. How far away from the place where the discrimination occurred did the complainant's business lie?

Mr. DIXON. There was one within 11 blocks of it. There were about five stations in the general trade area. There were four or five other Sunoco stations in this area.

The Court here talked about a feathering process, about how far you go.

Throughout the case they said to the Supreme Court "This is an impossible law. If we have to give it to the next one this thing will be a chain reaction and it goes all around and it will result rather than in price competition, price rigidity."

The courts dealt with that on the point and said it is the exact opposite. The only competition you will find in the oil business today is coming from the fact that some of these small independents have to meet competition. If you don't recognize that you will have price rigidity the exact opposite and price maintenance rather than any chance of competition.

The only competition that has come into this business at all has come as a result of some of these independents, and these independents are getting this gasoline from the same spring. They are coming from the same tanks. They sell to these same people.

Then this little independent cannot call it Sunoco Gas. He cannot call it Esso Extra, Gulf Pride, or anything else. He must call it Panther Gas, or something. The public doesn't know that is the same gas.

For him to sell it he has to sell it at a lower price.

The instant he puts his price lower than this and it begins to cut into one of their dealers, then they have a problem.

What they have been doing and what we found and what we alleged here is that they want the little man to suffer along with them because of the same problem they created.

Mr. THOMAS. How far will that decision go—3 miles, a half mile, five counties? The next time they go out of the city limits do you have to start over again?

Mr. DIXON. No, sir. I think nobody in America is quite as wise as a business organization. They know the market better than we do. If they will take a reasonable step I am quite sure they will find the enforcement agency being reasonable with them.

A feathering process doesn't mean that if in this little town there is a price war you have to move into the town 15 or 25 miles away, but it does mean, sir, a realistic appraisal of the situation.

We are not playing dominoes. We are talking about proven facts.

It was proven in this case that these four or five stations, when this happened in this one station, that they lost gallonage. It went down month after month and some of them are not in business today.

SALES BENEATH COST

Mr. THOMAS. Let us take the reverse of it. I see these places in communities where price wars are going on. They can give away baby rattlers and all-day suckers. Before you know it, he is selling that gasoline at 3 or 4 cents below what it cost him. He has a special sale on that day.

What are you going to do about him?

Using that old rule of reasonableness and good faith he cannot last 60 days or 90 days because he will be broke.

Is he going to force everybody within a reasonable distance to come down to that price and they all go broke together? What is that side of the coin?

Mr. DIXON. The side of the coin where a seller engages in sales beneath cost, this is not a per se law violation. It can be a violation only if we can find enough injury to show it violates section 5 of the Federal Trade Commission Act.

How many sales beneath cost you have to make before you are injured is one of fact.

We are chasing all over these United States in the fluid milk business. They are coming from each of your States. There is one in Texas, one in Michigan, Colorado, South Carolina, Tennessee, Missouri, Ohio, Kentucky, and New York. We are having hearings and investigations in these areas.

The allegation there is from the small independent dairyman that "In my markets milk is being sold x number of cents a gallon under my cost."

We know that no matter what we have done, we have stepped up our investigation and we are doing everything we can, that this small man cannot stand too much of that. They are going broke by the thousands in America. This is one of the reasons we asked for the temporary authority to issue a cease and desist order.

No matter how fast we may proceed in a litigable case, due process demands that they have due process, and years will pass before the Supreme Court finally rules on it. Where will that man be?

The sales beneath cost can be engaged in only by a party that has enough economic power to make it up somewhere else.

It is difficult for one little independent gasoline station to do this because we find the independent gasoline station has an investment of $4,000 to $7,000.

He is living on a lease that can be cancelable on notice of 30 days. We find that they are canceled on any kind of pretext. They say you did not keep your bathrooms clean and you are not doing a good job for me, or your credit is bad, you insulted a customer, or something. Some of this can be legitimate. Certainly the seller must have the right to pick his outlets. He must have some rights, too. Nevertheless, none of these little people have the ability and economic resources to engage in 1-day sales beneath costs. I assure you of that.

But a national chain has that ability. They can give it away for a long time, sir, until the market suits their pleasure.

Mr. THOMAS. Of course, that is the danger of economic strength.

Mr. RHODES. Of course, you said that in Arizona the milk situation was only as a result of a fight between supermarkets.

Mr. DIXON. It could be, sir. You understand that about a year ago we realized that the trouble could not only come from the large national seller of the milk, but could come from the buyer, who has 100,000 items in his store, to decide this milk shall be the loss leader. We are there right now, sir.

Mr. RHODES. Was this fight between supermarkets out of your jurisdiction?

Mr. DIXON. No, sir; not at all. We have jurisdiction. It is no problem to have this if it is a large national chain. Sometimes we have the problem that a supermarket can be a one-store operation. It gets a little bit more difficult. Very often we can find the milk flowing across the line in commerce, in the stream.

Mr. RHODES. You signed a letter about a week ago in which you washed your hands of the whole thing because you said it was competition between supermarkets.

Mr. DIXON. In certain localities we find our problem is insurmountable on jurisdiction, where the milkshed was entirely in the local area and where the businessman did business only in this one State. He can be troublesome.

Mr. RHODES. I assure you that is not our situation.

Mr. DIXON. If it is not, we will take another look at it, sir.

Mr. RHODES. All right. I wish you would. We have small milk producers going broke every day.

Mr. DIXON. I would say they are going broke pretty nearly everywhere in the United States. This is not any monopoly for any one State. This is going on all over the United States.

Mr. EVINS. Mr. Chairman, I am glad you diverted the Chairman of the FTC from his prepared text to his oral presentation.

Mr. THOMAS. He is doing all right.

Mr. EVINS. Was this Justice Goldberg's first opinion?

Mr. DIXON. I think it is his second, but it certainly is a fine opinion.

Mr. EVINS. You agree with it?

Mr. DIXON. I could not have written it myself as well as he wrote it. I certainly think he interpreted well the philosophy and the underlying congressional intent when they passed the law. So many people seem to have lost sight that this is what Congress had in mind. We have some geniuses writing about this in the country. They are pretty good at striking at this thing. It is a problem. It is a tough problem, sir. It is pretty hard to follow the dream of having competition. A lot of people have said we ought to have only one type of competition in America, rugged competition between the buyer and seller. Let them butt heads and that will take care of everything else.

EUROPEAN MARKET CONDITIONS

Mr. THOMAS. How does competition exist in England, France, and Germany? Those countries were in a small way 2 or 3 years ago with cartel systems, and so forth. How are they getting along?

Mr. DIXON. I tell you, maybe by accident or design, some great things are happening in Europe. I have been there now two times at the request of the Secretary of State and sat on a committee which they call the Committee of Experts on Restrictive Practices in OECD, whatever all this means. While we are good and affluent in America, I think they got suspicious and started looking. They have turned to our way now, and by the Treaty of Rome and by setting up the European Common Market, they have pretty well established a Federal Trade Commission in Europe. They have pretty well patterned it after some of the powers that Congress gave us, and they have given them a few extra powers.

Mr. THOMAS. When did they do all this? They still have the trade association. In some of these countries you have to get the permission of the trade association even to go into business. Where is that competition?

Mr. DIXON. You bet your boots, sir. In England they have absolute monopoly and cartels, and they still have these problems there.

Mr. THOMAS. They still have it. How are they doing so well? I understand their national gross product has been expanding in England, France, and Germany more rapidly than ours. How does that all jibe with all the "fuss and feathers" we create here at home?

Mr. EVINS. Is it the foreign aid situation, Mr. Chairman?

Mr. DIXON. I could talk for 2 hours on my ideas about that.

Mr. THOMAS. Do not talk for 2 hours, but talk for 5 minutes and tell us. They have not been getting any foreign aid in the last 4 or 5 years in those countries.

Mr. DIXON. These people did not have any way to go but up after World War II, sir. We sent them our aid, assistance, brains, and manpower, and then they started. I think they began to introduce some things that America had been preaching, a new form of credit, a new form of mass production.

Mr. THOMAS. Let us go to something even more important than that. They bought new machinery. The old machinery had gone to pieces. They bought new machinery and have a more efficient operation. Let us get fundamentals first.

Mr. DIXON. I agree this is quite true. Another thing can be said with certainty. I think some of it is overstated, but their costs of labor are cheaper than our costs of labor. When you add fringe benefits to them, their cost is a little bit more than one might think. Nevertheless, the costs of operation there are less than our costs. Their social structure is not as high as ours. Yet, their market had not been tapped, Mr. Chairman. You walk around in the city of Paris and you are beginning to see television. They are beginning to buy stoves and Frigidaires. They are beginning to buy automobiles. They are beginning to buy tires. They are beginning to build roads. There is a bonanza of a market sitting in Europe. The laboring men also have found out, I think, what Mr. Henry Ford taught this great country, that it would promote full employment and increase our gross national product to pay the laboring man a little bit more than peon wages. Today, labor over there is crossing the line. He can move freely around. There is not a labor surplus in Europe to speak of, but they are catching up quickly. I was talking to the German people, and their costs are coming up.

Mr. THOMAS. We are directing our question to the monopoly which they had and which they still have. How does that affect our economy compared to our efforts to prevent it in this country?

Mr. DIXON. Let us take France. I was talking to the French delegate. They have monopoly there. Let us take the chemical industry, the drug industry, as one example. I was inquiring about it. "You have monopoly. Let us concede it." They said, "Yes, we have monopoly, but we have another law." Since the Prime Minister, De Gaulle, has come to power, they are not troubled much with legislation. Just whatever he says happens. With his power, they go down to the retail druggist and they tell him what he can sell it for. So, they are controlling prices, you might say, through government agencies. I do not like this. To my way of thinking, that sacrifices freedom. The only thing we have to regulate prices in America is competition.

Mr. THOMAS. Do they have price control?

Mr. DIXON. They have a form of it.

Mr. THOMAS. In Germany and England?

Mr. DIXON. I do not know about Germany and England. I think the control there is the ability to buy.

Mr. THOMAS. I thought they had price control, allocation, rationing, and everything. The last one to throw it out was England, but England threw it out 4 or 5 years ago.

Mr. OSTERTAG. Are you limiting your comments to that of drugs?

Mr. DIXON. That is correct. There may be other examples. Of course, most of their heavy industries are cartelized or nationalized. This is where they differ from ours. Their ability to control prices there obviously is the product mix and what they can charge for it, the ability to charge. There is a great need for these products. There is a tremendous growth going on in housing and everything else. You see that everywhere you turn there.

I think without doubt some 200 million people are sitting there who are probably 20 or 30 years behind us in the things that the common man in America considers as just an ordinary item. These things are still to be sold in Europe. I would not subscribe to the idea that an economy in the long pull will ever be any good if you are going to have state-blessed monopoly, sir. This was true of Germany. This was true of Italy and has been true of many of those other European countries. They have had their troubles, too. We have had some wars, too. It seems to me that somebody over there is on the right track because he is pursuing freedom.

Mr. THOMAS. Continue with your statement. I see you do not know any more about it than I do.

Mr. EVINS. I believe he does, Mr. Chairman, although I do not wish to disagree with the chairman.

Mr. THOMAS. Go ahead, Mr. Chairman. We are all trying to learn something.

Mr. DIXON. I do not pretend to be an expert on Europe.

INDUSTRYWIDE APPROACH ON CONSENT ORDERS

Certainly there will be less resistance to acceptance of these consent orders I was talking about if the industry is convinced that all of its competing members will simultaneously agree to abandon these unlawful practices.

Mr. EVINS. May I inquire there, Mr. Chairman? How long have you been pursuing this wholesale consent practice? You initiated this. It is an innovation of the FTC under your regime.

Mr. THOMAS. No, that started 6 or 8 years ago. We encouraged it.

Mr. EVINS. It is on a larger scale.

Mr. DIXON. This was first being done when I came to the Commission. The first time we tried it was in some citrus cases down in Florida. As a matter of course, we have instituted it at the Commission down at the building level to see if we can move a substantial group.

Mr. EVINS. How successful has it been and how widespread is it being accepted?

Mr. DIXON. We shall find out on February 15 whether this is going to work or not, because we have mailed out 248 of these proffered settlements with an order to this industry.

Mr. EVINS. There is a report that the Budget Bureau is holding you up and will not let you send these questionnaires out.

Mr. DIXON. No, this is something else. This is where we are seeking what I would call vital information as to our 1,000 largest corporations in America.

Mr. THOMAS. You can give special attention to that when you have concluded your statement.

Mr. DIXON. I have had members of this very industry come to my office.

Mr. EVINS. All I am inquiring about is how successful it has been. Are you going to have to go back to the one-case proposition, or are you succeeding with your wholesale methods?

Mr. DIXON. We shall find out, Mr. Evins, this way. The businessman has said, "Don't single me out. I would be willing to stop this if you will get everybody else. I do not like to give away money." I am going to find out whether they have been telling me a lie or not. I am going to find that out. If it does not work, then we will have a whole lot of cases in this pipeline. But this time, I assure you we are ready.

Mr. EVINS. You have been in business long enough to know the answer to that.

Mr. DIXON. We had 50 of these things already signed when we plowed them back up to get a larger number. They were coming. Out of the 248, I would not be surprised if we did not have to try 75.

Mr. EVINS. You had 50 when you came aboard, and you have had 275 more.

Mr. DIXON. We started out with 146, and before we voluntarily pulled them back to expand the number, we had about 50 of those signed at the moment. Then we expanded a little bit to 248.

Also—and this is tremendously important—the industry members willing to halt the illegality must be convinced that the Commission will bring immediate action against any who continue to violate the law. Indeed, if the Commission fails to do so, future efforts at industrywide cleanups will encounter far more resistance.

All apart from such broadscale enforcement efforts, the remaining workload finds the Bureau of Restraint of Trade straining at the seams. Despite completing more than twice as many antimonopoly investigations as during the previous year, the number pending last June 30 had risen during the year from 1,484 to 1,516.

Mr. THOMAS. When we get over to your workload table in the Bureau of Restraint of Trade, you left blank two or three very significant figures. We just wonder why you left those blanks for 1960 and 1961 compared with 1962. We will go into that later. You might be looking at it and come up with an answer.

Mr. DIXON. I want to tell you, I am not hiding any secrets.

At the same time the Bureau is faced with a 2-year backlog of cases for litigation, and when to this is added the increasing number of pending antimonopoly investigations, the caseload represents a potential 4-year backlog. And looming large in the complexity of this workload are 22 merger cases in various stages of litigation, with 73 others under formal investigation.

This budget justification does not provide for any program increase in the Commission's antitrust work, but this does not mean there will be any leveling off in this effort.

Mr. THOMAS. With the exception of the Bureau of Restraint of Trade, with 202 employees, all the rest of the bureaus have gone up a little. We were just wondering about that. We thought perhaps that was one of the most important functions you have.

Mr. DIXON. We have asked for some increases here. We think so, too.

Mr. THOMAS. You have had a tremendous increase in the last few years. Anyway, you are not leveling off or curtailing your activities.

Mr. DIXON. If we had stood still, if we had taken this animal just as she was standing there then, I guess we would be in very good shape, sir. That is one way to say it.

Mr. EVINS. May I make an observation, Mr. Chairman?

Mr. THOMAS. Surely.

Mr. EVINS. I have read some of this text, and I was impressed that in the text you are appealing for more help, more attorneys, more assistants, but when you get over to the table, you justify what the Bureau of the Budget recommends.

Mr. DIXON. This I must do, sir.

Mr. EVINS. You asked the Budget Bureau for more and they denied it?

Mr. DIXON. That is correct, sir. I come here within the framework of the complete budget presented by the President.

Mr. EVINS. You did not revise the text, but you left the figures the same as the Bureau of the Budget.

Mr. DIXON. My obligation is to tell you what our problem is, sir, and tell you how we are going to try to meet it. In this field, as I said to you, all we can do here is to intensify such enforcement. We are going to do the best we can.

Mr. THOMAS. No complaint.

Mr. DIXON. On the contrary, intensification of such enforcement is demanded not only for the rescue of sick and dying victims of unfair

methods of competition but also for the building of long-needed business confidence in the Commission's capacity to deal with scofflaw predators. It is difficult indeed to induce the members of any industry to comply with the antitrust laws (voluntarily or through acceptance of consent orders) as long as some of their number violate them with impunity and profit. Certainly intensified antimonopoly enforcement is a must if the Commission's new broad-scale efforts to clean up competitive evils are to supplant the whipping boy type of case selection.

BUREAU OF INDUSTRY GUIDANCE

Considering now those areas of Commission work for which this budget would provide increases in fiscal 1964, none is more important than the $184,000 increase for expanding industry guidance. This program is now operating at a cost of only $446,000 annually, substantially less than for any other major Commission activity. Moreover, money spent on this endeavor not only serves the direct purpose of guiding businessmen away from law violations that damage competition and bilk consumers, but indirectly serves to reduce the number of cases on which enforcement funds would otherwise have to be spent.

This, too, is the field where the Commission has recently launched an unprecedented effort to forestall law violations. To its long established trade practice conferences and its program for the issuance of industry guides have been added two innovations: binding advisory opinions by the Commission itself and promulgation of trade regulation rules. The new procedures went into effect last June 1, after we had been here.

The giving of advisory opinions on the legality of proposed actions by businessmen shows promise of becoming very effective indeed. Already 116 requests for such opinions have been deemed worthy of consideration, and 25 have been issued. Another 11 are being processed. The others will be processed as soon as the newly created Division of Advisory Opinions can find time and manpower to evaluate the proposals submitted and do the legal research needed by the Commission in reaching its determinations. Heretofore, advisory opinions were given only by the FTC's staff and in no way were binding on the Commission. This, of course, greatly limited their persuasiveness. The new procedure is being welcomed enthusiastically by businessmen, and the guidance already provided has steered expenditures of many millions of dollars into legally safe channels. However, the success of this new instrument is being threatened by the FTC's most ancient enemy—delay. Without the additional funds requested, the needed guidance would be proffered too late to achieve its purpose.

The second innovation, trade regulation rules, will identify practices which the Commission believes to be unlawful. These rules may cover all applications of a particular statutory provision, whether nationwide or limited to particular products, industries, or areas. Such rules will be relied on by the Commission's trial lawyers who heretofore have had to prove over and over again that a particular timeworn practice is illegal. The rules thus will serve both to advise businessmen and to speed the prosecution of cases. Under consideration now are rules for a dozen different industries.

Industry guidance work also contemplates expanded activity in the longer established guides and trade practice conference programs. Here the problem is two-fold; not only are there cogent reasons for issuing guides to cope with new areas of illegality, principally deception, but the guides already in force must be administered. Thus, as the total number of guides increases, so does the job of administering them. For example, at the same time the Commission is developing guides to counter deception in the sale of room air conditioners, radiation detection instruments, and goods of foreign origin, it is shouldering a new administrative burden resulting from the recent issuance of guides for shoe content labeling and advertising. The same cumulative workload problem is encountered in the issuance and administration of trade practice rules.

BUREAU OF TEXTILE AND FURS

The largest increase, $294,000, for any area of Commission work is requested for the policing of four separate and important pieces of consumer legislation designed to protect the public from being misled in its purchases of textile fiber products, woolens, furs, and wearing apparel which might be dangerously flammable. Unlike other laws enforced by the Commission, these statutes (and the rules issued under them) contain affirmative requirements that must be continuously policed.

And a momumental task it is, considering the size and distribution of the industries involved and the competitive pressures generated within them. Each year more than 100 different industries make textile products covered by the acts with sales running into the billions of dollars, second only to food and shelter, while in the sale of woolens both sellers and buyers are beset by improper labeling invoicing not only of domestic but of imported products. When to this policing job is added that of assuring that 175,000 distributors of fur products are labeling and advertising them truthfully, it should come as no surprise that the present allocation of $766,000 for enforcement is inadequate.

BUREAU OF DECEPTIVE PRACTICES

Turning to the broader field of general deceptive practices, here again the workload is pulling dangerously ahead of the Commission's capacity to cope with it. Complaints from the public and from reputable merchants jumped 48 percent in fiscal 1962 over 1961, reflecting either harsher competition or increased awareness of the Commission's purpose, perhaps both. Whatever their cause, these applications for complaint contained enough justification to warrant opening 897 new investigations during the year while only 788 were completed, thereby bringing the backlog up to 1,183 as of last June 30. As the backlog grows, so must delay in bringing relief; indeed, if relief is delayed too long, it can come too late.

FOOD AND DRUG ADVERTISING

Particularly pertinent here is the situation in the policing of food and drug advertising. False claims for the efficacy of these products not only drain money out of legitimate channels but they mislead

consumers in their most important expenditures—where dollars buy sustenance and health. While it would be overdramatization to cite spurious cancer cures as representative, it certainly is no exaggeration to point to many examples of mere palliatives being offered as the "at long last" answers to many human ailments. Not only are such claims more sophisticated than in former times, but many of the products are genuinely efficacious for some few or might bring temporary relief to many. Where the problem lies is in limiting advertising claims to what is true—finding and defending the factual line beyond which consumers are being victimized.

Because of the limited value of scattered actions in this field, the Commission is striving for industry-wide correction of unlawful claims. Now under way are multiple investigations of such products as cough and cold treatments, reducing devices, analgesics, and air filtering devices. Other similar broad-scale efforts are long overdue, but insufficient professional manpower to develop necessary scientific evidence is delaying the effort. Such evidence would have to be conclusive indeed to resist the well financed attacks that would be made upon it, particularly in the fields of dietary foods and drugs, germicides, skin disease preparations, and mineral and vitamin supplements.

DISTINCTION BETWEEN FDA AND FTC FUNCTIONS

Mr. THOMAS. Is there any overlapping between your activities and that of the Food and Drug Administration in this particular field?

Mr. DIXON. In theory, there could be lots, but in practice little or none. This is because of our liaison and understanding with them. Now, thank God, we are beginning to move parallel, to use both tools as effectively as possible. Our law, section 5, always covered false and misleading advertising. This would include where it appeared on the label as well as in the advertising copy itself. With the passage of the Food and Drug Act, Food and Drug was charged with the responsibility, among other things, of misbranding and misleading statements on the label in the fields of food, drugs, cosmetics, and devices. This is the only thing they can touch. We must touch not only what they can touch there, but everything beyond there. We have an arrangement with them whereby we daily check and stay out of the strict labeling of it unless we have the better tool.

Many times on the label you will see an economic claim like two for one or three for one, or something which goes beyond safety or health or something in that field. We have very little overlap. The job there, in my opinion, is bigger than both of us. We have plenty to do here, and we have no right, and should never have, to go out and both be harassing, you might say, the same businessman on the same question.

Mr. EVINS. The Food and Drug may be investigating a case for false labeling. Would the FTC simultaneously be investigating the case for false advertising?

Mr. DIXON. It could certainly do this. This is what we should be doing. In other words, if they are going to seize something, we should go as fast as we can to clean something up. We are beginning to get in line to do this, sir. In other words, the hope that if we took one case and pursued and finished it and this would be a lesson not only to this party but to everybody else, has been a dream.

FALSE LABELING VERSUS FALSE ADVERTISING

Mr. THOMAS. What is the difference, strictly speaking, between false labeling and false advertising?

Mr. DIXON. Very little.

Mr. THOMAS. Take aspirin as an example. In those two fields there is room for 100 percent duplication of effort, is there not?

Mr. DIXON. I think the Congress' fundamental distinction is very limited.

Mr. THOMAS. The area of activity covers four or five different fields.

Mr. DIXON. You remember, you here in Congress have always thrust them into the area of health and safety. We were thrust into the field of economics. This is the real and sensible division and dividing line between the two. You have special acts, such as the Harrison Act requiring affirmative disclosures, which they enforce. These are things that must be on the label, else it will be considered mislabeled in accordance with another section of the law. This would not be mislabeling to us. Perhaps it would not be false advertising. We are talking now about a statement which says, "Take Granny's old liver pills and it will cure cancer." If that is on the label, that is a labeling problem; but if this is in a book or ad or a magazine, it is our problem.

Mr. OSTERTAG. Is it your problem if it appears on television?

Mr. DIXON. It is our problem entirely. They cannot touch it with a 40-foot pole, sir, they have such restrictions.

ADVERTISING OF COUGH AND COLD REMEDIES

Mr. EVINS. I wish you would look into the cold tablets. I have been taking a lot of them here lately, and they do not do any good.

Mr. DIXON. I have just read that we have an industrywide look at these cough and cold remedies.

Mr. EVINS. I have not been able to find anything that cures me.

Mr. DIXON. We would have a lot more complaints than we have right today if we had followed the traditional thing of taking one of those in coughs and one of them in piles and one in something else and sued them. It takes time to stop when you have one and find out if there are others doing the same thing, and you step back and then you move against this group. We think this is the good old American way to enforce the law. We think we can do our job and do it more effectively and fairly. That is what we are trying to do.

Mr. THOMAS. I turned on the radio the other night and heard that one aspirin was claimed to be three times as effective as any other nationaly known brand. All right, suppose you spend x number of dollars combating the falsity of that statement, what have you accomplished? Who is misled? I take aspirins all the time. I know there is no difference between them. Anybody else who does the same thing knows that.

Mr. DIXON. Mr. Chairman, you are highly intelligent and probably known about aspirin. I have listened to a lot of medical testimony in my day, and I think that aspirin today is still the best product on the market. I think they pretty nearly all agree. They do not

know why or how it works, but they just know it works. They know that aspirin is pretty well aspirin. Nevertheless, these people who spend these millions of dollars saying what you say can prove to you on the sales chart that it is affecting somebody.

Mr. THOMAS. Are you not going to the good old asset—I think it is an asset—old Yankee ingenuity? A man is going to puff his wares. How are you going to stay out of it? This man says, "My aspirin is three times as good as yours." They are all aspirin.

Mr. EVINS. The one I got said four ways. It went further.

Mr. THOMAS. Does anybody buy it because he thinks it is three times as good as the other, or does he just go in and say, "Give me some aspirin?"

Mr. DIXON. We make a very conscious effort to stay out of what you have described as puffing. Advertising says this automobile is better than another automobile, and all of these things. This is salesmanship. Nevertheless, when Congress passed the Federal Trade Commission Act in 1914 and buttressed it in 1938, it buried that old doctrine of caveat emptor, you know, "Let the buyer beware." That was a good old Yankee custom that we put out to pasture. We are the only country in the world, mind you, that has this code, you might say, of doing business. If you think that it has not been effective, just go abroad and pick up one of the newspapers and look at the "bamboozling" that is going on.

Mr. THOMAS. Caveat emptor still applies in most Government agencies. Take the field of housing, which we take a look at quite often in here. The Federal Government will insure a mortgage and may make a direct loan. Regardless of which agency is involved, the Federal Government does not guarantee, even though 90 percent of the purchase price is guaranteed, that the particular house is worth the money. After all, we expect you to go around and use your own judgment, look at it and pick the one you want, jump up and down in the middle of the floor and see if it rocks. If folks come back and say, "The floor is warped, and it is not worth the money," the FHA or no one else that I know of makes a guarantee on it. So, the old rule of caveat emptor applies right in Government operations, does it not? After all, we cannot put little diapers on everybody, can we?

Mr. DIXON. We surely cannot. I do not think what we try to do is put diapers on anybody. You charged us in the law to control unfair methods of competition, which will improve this, but then you added to it unfair and deceptive acts and practices, and then you added to it in 1938 some special responsibilities for false and misleading advertising on food, drugs, cosmetics, and devices.

We have a responsibility, we say, for housing. If a seller got to talking about his house being the absolute something, an absolute statement that was false, we have a responsibilty or else we call it to the attention of Housing or somebody else, but we have a responsibility there. I think I know what you are talking about. The Government does a whole lot of things.

Mr. ELMAN. If I might make a comment on your aspirin problem, the fact is that aspirin is aspirin, and they all work pretty much the same way. If a particular manufacturer of aspirin advertises falsely that his aspirin works four times as fast and is gentler on your stomach than other types of aspirin, and if he charges, let us say, a dollar

a hundred for his apirin, whereas his honest competitor who is not making these false claims sells his aspirin at 10 cents a hundred and makes a reasonable profit, that honest competitor is hurt, and also the consumer is hurt, if he is induced to buy that more expensive brand of aspirin which really is not any better for him. That is where the unfairness to competitors and unfairness to the public may come in.

Mr. THOMAS. Does not competion take care of those items, though? After all, is there anything out of line in the prices? I thought it was advertised as three times as good, but Mr. Evins says he heard on his radio some aspirin was four times as good. Does not competition take care of the price? Is the price differential large enough to amount to anything?

Mr. DIXON. In the realm of quackery, which you are getting over into, this is one of the prime examples, taking a common product like aspirin and saying elaborate things it will do, giving it another name or something, and instead of charging a minor price, charging a very high price. Then a person thinks it might cure a very harmful disease and he is in worse shape for having fallen for it. It is a terrible thing, Mr. Chairman, too. For instance, if you were selling aspirin and were to tell an outright falsehood about your aspirin, you would interject a competitive factor into the area. If you were not stopped, your competitor would have to sink to your level in order to protect his share of the market. If you cannot stop it, I have to say the same thing to protect myself.

PROTECTION OF CONSUMER INTEREST

Mr. OSTERTAG. This whole problem under discussion is predicated on fair competition or protecting business from other business. On the other hand, there is also this question of protecting the public, the consumer.

Mr. DIXON. That is the other end of the problem.

Mr. OSTERTAG. Which is it? Is it a dual purpose?

Mr. DIXON. Dual purpose properly describes it, sir. Yes, sir. This is certainly true. An unfair competition or an unfair practice is dual in its form.

Mr. OSTERTAG. Is there not a conflict in a case where the competitive aspect might be for the best interests of the public, say, for example, pricewise?

Mr. DIXON. I can take you back to one of the very fundamental reasons of the Wheeler-Lea amendment. Originally Congress passed the Federal Trade Commission Act in 1914 and said unfair methods of competition are hereby declared unlawful. You could be bamboozling the consumer and be the only person who had the product and it could not be unfair to competition, but still it would be harmful to the consumer.

So, the Congress came along and added to our statute, to the words "unfair competition in commerce," the words "unfair or deceptive acts or practices in commerce." This took care of the consumer. When that was brought in, that was the duality which we now have as our tool.

Mr. BOLAND. Getting back to the aspirin problem, you did not determine that three or four compounds other than aspirin were not as effective as the claims indicated. This was done, as I understand it, in Baltimore by some hospital. Did you spend money to investigate this?

Mr. DIXON. Let me recite this little occurrence. We observed at the Commission many claims being made that were questionable in the analgesic area generally. The Commission issued some complaints, I think three or four complaints.

Mr. BOLAND. How long ago?

Mr. DIXON. These were a year or so ago. In March 1961. What happened was this: For us just to question the thing was not enough sir. We have the burden to prove this by competent medical testimony, which usually includes clinical tests as well as opinion testimony. This means the necessity of having to obtain this type of evidence. To obtain the evidence, we contracted with two reputable doctors over in Baltimore, Dr. Lasagna and Dr. DeKornfeld.

Then the Commission observed another thing, that this was a little broader. We placed those four complaints on suspense. Then we sought other clinical evidence. We contracted with other doctors. We obtained the second one. This still was not enough, because we anticipated that we were going to have quite a battle here and we had to have evidence properly evaluated. We contracted for the third group. Not only is it difficult for a Goverment agency to obtain outside competent clinical evaluation, but doctors when they make these things for you, Congressman, want to publish. They not only want to be paid for them, but they are very proud of them and want to publish them.

These doctors in Baltimore started pressing to have this published and, as we turned to broaden this thing, our bureau director down there gave permission for them to publish this. It was a mistake for this to have been done. It was a mistake in judgment. But there are many things that can be said for it, because we have to live with doctors, too, on the outside. We have to get them to do other work with us. They published an article and report on their study in the AMA Journal.

Then Sterling Drug Co., the Bayer Aspirin people, seized upon this very report and they started hitting the television and newspapers with a crash campaign. Two weeks after that started, last Tuesday, we served a complaint upon Bayer Aspirin for the misrepresentation they had made, two weeks after they did it, and served notice on them we are on the way to the district courts to seek an injunction to stop it right now.

We are right in on this one. In other words, what is going on would appear to be a little game, you might say. One guy is over here saying something that apparently was taking something away from the Bayer Aspirin people, and when this study came out they turned around and took this. We have charged them with misrepresenting actually what that study said.

Mr. BOLAND. How did the complaints originate?

Mr. DIXON. It originated from the Federal Trade Commission against Bayer.

Mr. BOLAND. I mean the original complaint. Was there a complaint within the industry by people producing aspirin that their competitors said their compounds were more effective?

Mr. DIXON. To my knowledge, the original actions came from competitors.

Mr. BOLAND. How long have the doctors been looking into this? You hired the doctors to do the research. I commend the Federal Trade Commission for doing it. You cannot move unless you know the facts, and that is the way to do it. What did it cost to get this done?

Mr. DIXON. This one we are talking about cost $5,750. These things are difficult to come by.

(Off the record.)

Mr. THOMAS. Mr. Chairman, this is all very interesting. We will not rush you, we will stay all week if necessary, but then we want to look into your reorganization you put in effect 2 years ago, and we want to talk about the questionnaires you are going to send to the 1,000 large manufacturers, and so forth.

Mr. DIXON. All right, sir.

NATIONAL VOLUME AND COST OF ADVERTISING

When it is realized that advertising in the food and drug fields constitutes only a small part of the advertising for whose honesty and fairness the Commission is responsible, the problem of volume appears overwhelming. For example, the Commission has jurisdiction over the advertising of the Nation's largest advertisers, and there are 97 advertisers who spend more than 6 times as much for advertising as the Commission has funds to regulate—not just advertising but every other form of interstate selling where unfair or deceptive methods might be employed. Simply to spotcheck radio and television—419,265 scripts were scrutinized in fiscal 1962—and newspapers and magazines—278,741 pages—is a staggering job, and when to this must be added the investigation of more than 5,000 complaints from angry consumers and injured competitors, plus broad-scale corrective actions launched by the Commission on its own initiative, plus the checking of compliance on orders already issued, it is not difficult to understand why the Commission's Bureau of Deceptive Practices is hard put to be effective on its present budget of $1,249,500. Certainly an increase of $158,000 is warranted.

The plain truth is that the Commission will never be staffed sufficiently to assure that no deception will be practiced on the public. This obviously is a practical impossibility. However, reputable businesses, conscientious media, trade and better business organizations, and better informed consumers can exert really effective pressure against cheaters and tellers of half truths. What is needed from the FTC is more backstopping to halt the defiant and thereby encourage the self-policing efforts of private industry.

RESPONSIBILITY OF ADVERTISING AGENCIES

Mr. THOMAS. There is just one thing wrong with your statement, if I might interrupt. You have not brought in the Madison Avenue crowd.

Mr. DIXON. We were checking the other day and we now have outstanding an order or proposed order against every one of these gentlemen. We have pursued this course. Where we can find them responsible, we are holding them responsible. Of course, the court is holding us to a test. We have to show some initiative came from the agency itself. Where we find that, we move.

Mr. THOMAS. Go ahead.

INCREASED ECONOMIC REPORTING PROGRAM

Mr. DIXON. This budget also would provide a $145,000 increase for the Bureau of Economics, principally to make possible a long-needed strengthening of the Commission's economic reporting function. Historically, these reports have provided the basis for significant legislation as well as having brought into clear focus uneconomic or otherwise objectionable trade practices. They also have led to voluntary changes in the conduct of business which have benefited both industry and the public. Perhaps even more important they have proved to be reliable instruments in the measurement of monopolistic trends and their extent. And, unlike most other analyses available to businessmen, legislators, and the public, the Commission's reports are not only impartial but are based on factual information whose production can be compelled by law. How important it is to Congress and the business world to have solid information about business conditions, where the facts are free of partisan selection and interpretation, would be hard to overestimate.

COLLECTION OF DATA FROM 1,000 LARGEST CORPORATIONS

Plans also are now underway to expand the reporting program to permit the collection of detailed financial and product information from the 1,000 largest manufacturing and merchandising corporations. The collection of this data will permit the Bureau to classify and rank these largest companies by profit rates, by volume and type of products produced and sold, and by asset size. The project also calls for the annual collection of data on mergers and acquisitions made by each of these large corporations.

Mr. THOMAS. Where is your authority for that?

Mr. DIXON. Section 6(b) of the Federal Trade Commission Act, which was in the old Bureau of Corporations authority and was continued in the Federal Trade Commission Act. This was the authority to call on any corporation in interstate commerce to make to the Federal Trade Commission an annual report or a special report. We have the right to ask for this.

Mr. THOMAS. Does not the Department of Commerce have the same statute?

Mr. DIXON. I do not believe you would find in any other statute of any agency this power, because you must understand Congress gave this Commission some of its legislative authority.

Mr. THOMAS. What is the penalty for failure to comply under that statute?

Mr. DIXON. If there is a default, $100 a day until it is produced. This is the ultimate for a failure there.

Mr. THOMAS. What will be the purpose of this inquiry?

Mr. DIXON. Well, sir——

Mr. THOMAS. Everybody at this table, I am sure, gets ample letters every week complaining that the profit margin of all businesses is being squeezed to practically nothing, and one of the reasons for it, among other things, is the paperwork corporations have to do, fill out this questionnaire, fill out that questionnaire, and they say when they get through 10 percent of their overhead goes to filling out questionnaires sent out by the Government.

What do you hope to gain by this?

Mr. DIXON. I would think the benefits would come in three ways.

DUPLICATION OF REQUEST WITH OTHER AGENCIES

Mr. THOMAS. Is there any conflict with the Department of Commerce?

Mr. DIXON. No. Most of the information that Commerce and other departments receive—you mean the Census Bureau?

Mr. THOMAS. We call that Commerce.

Mr. DIXON. That is corrrect, but they obtain it under a very strict arrangement that they cannot tell anybody anything about it. It is not meaningful. You could not tell heads or tails. When somebody gives you something on a confidential basis, he will tell you to suit himself. Many of these corporations have many divisions of operation.

Mr. THOMAS. Do you mean your statute is broad enough to make it a violation of law if they comply with the filling out of the questionnaire and give you inaccurate information?

Mr. DIXON. Yes, sir.

Mr. THOMAS. There is a penalty for that too?

Mr. DIXON. Yes, sir. If we had reason to believe that was the case, we could put another hat on, so to speak, and we would have an investigation. We would issue an order for the right to inspect and if that was turned down we would go to court and ask the court to support us and give us an order. Congress has given us plenty of tools to use.

Mr. EVINS. The Bureau of the Census obtained a lot of information in the last decennial census that is available and can be obtained.

Mr. DIXON. Yes, but the Bureau of the Census does not tell you how they rate. The Census Bureau gave to the Senate Antitrust Committee some information but they said they had to break it down.

PRIOR COLLECTION OF SIMILAR INFORMATION

Mr. EVINS. Did you ever use this authority before on these same corporations?

Mr. DIXON. Yes, sir. The last time we did it was about 1950. That is when we made a report.

Mr. EVINS. In other words, this questionnaire is not unusual or novel and it is not a precedent in your Commission?

Mr. DIXON. No, sir. We had a Federal Reporting Act in 1942 and when we went for this information before we went through the same procedure.

Mr. RHODES. Will the gentleman yield?

Mr. EVINS. Yes, sir.

Mr. RHODES. Is the questionnaire under oath?

Mr. DIXON. The questionnaire must be affirmed under oath. In other words, we call it a special report.

Mr. RHODES. Is it admissible as evidence in a later hearing?

Mr. DIXON. We would offer it, sir. It is all under oath.

Mr. EVINS. Do you have statutory authority to seek it?

Mr. DIXON. We have statutory authority to seek it with only two reservations, that no names of customers or trade secrets can be made public. We can use it in a trial but the names of customers and trade secrets would be in camera. But we will write an economic report and make it public to Congress and the business community and the executive branch.

The purpose here is to understand, if you please, what is happening in our 1,000 largest corporations. We are charged, along with the Department of Justice, with the responsibility of enforcing section 7 of the Clayton Act, the antimerger section. We are asking to be advised of the number of mergers, the number of joint ventures, these corporations are in. We either have to have this information now or we have to obtain it if a merger takes place. If in any important industry in America a merger would take place, the Congress would have many problems before it, the executive branch would have many problems before it, as would your enforcement branches. You should not have to go to a rack and buy a Fortune magazine and pay a dollar for it to find out what are the biggest 500 corporations. That is what we have to do today.

Mr. EVINS. We thought you had that information in your economics division now.

Mr. DIXON. We do not have it current.

Mr. EVINS. Mr. Rhodes.

Mr. RHODES. Mr. Dixon, I would like to question you further about the use of the questionnaire. You say you would offer it in court. Would you offer it for truth of the matter asserted or as a matter of impeachment of a witness?

Mr. DIXON. We would offer it if it was pertinent to what was charged, and if it was under oath we would offer it for the purpose of proof, not to impeach.

It has been written in the paper that all we want this information for is for antitrust enforcement. If we had a particular case in mind of a law violation, we would there be investigating somebody for a law violation. The information we are seeking here is for a broader purpose than that. It may be it will lead to a law violation, but what we are seeking is information to draw an economic report to the Congress.

Mr. RHODES. The questionnaire I had in mind was the questionnaire you mentioned you had sent out to people in the merchandising business through which you ascertained that certain sales at Christmastime were effected by undue pressure on retailers. That is the kind of questionnaire I am talking about.

Mr. DIXON. It is the same basic power of section 6(b). We sought that information under section 6(b) for law-enforcement purposes.

Mr. RHODES. If you send me a questionnaire and I do not answer it, can you put me in jail?

Mr. DIXON. You are fined $100 a day until you comply.

Mr. RHODES. Suppose there is one question I do not answer. Do I have to answer the whole thing or be subject to fine?

Mr. DIXON. You have to answer the whole thing.

Mr. RHODES. Why do you not go to the law of deposition and discovery as a procedural matter and have the man come before you with his counsel and have the counsel object to the questions, if necessary, and handle this as a quasi-judicial tribunal should? This seems to me to be unduly oppressive.

Mr. DIXON. We have the right to seek information by deposition and discovery. But you have charged the Federal Trade Commission with an additional duty to not only bring charges against parties for law violation but to make the investigation upon which a determination of public interest can be made. It is this field we are talking about. There is a lot of difference between an investigation and an adversary proceeding.

Mr. RHODES. Do you think any questions you might have asked in your questionnaires might be a violation of constitutional rights against self-incrimination?

Mr. DIXON. Many people think so but the only law we have to administer is a civil law, and if we charge you with such an admission you are immediately immunized so you have all the constitutional protection written in the law. We may do a lot of people favors by asking a question and putting it in, but we are careful not to immunize people.

Mr. RHODES. Mr. Chairman, do you think it might be relevant to have one of those questionnaires submitted for the record at this point?

Mr. THOMAS. Yes. We shall insert it in the record at this point.

(The following draft of the questionnaire was submitted for the record:)

DRAFT QUESTIONNAIRE ON INTERCORPORATE RELATIONS

This is a copy of a draft questionnaire submitted to the Budget Bureau, December 6, 1962. Comments on this "draft" subsequently were solicited from the industry advisory council on Federal reports and various Government agencies. On January 16, 1963, staff members of the Federal Trade Commission and the Budget Bureau discussed the draft questionnaire with about 25 industry representatives. It is anticipated that many of the constructive suggestions made on the draft questionnaire will be incorporated in the final questionnaire approved by the Bureau of the Budget.

WILLARD F. MUELLER,
Director, Bureau of Economics, Federal Trade Commission.

Budget Bureau
No._____

Federal Trade Commission
Washington 25, D. C.

Report on Intercorporate Relations

This Report Is Required By Law. It is mandatory under authority of the Federal Trade Commission Act.

Complete and return one copy of this report form within _____ days to:

Federal Trade Commission
Bureau of Economics
Division of Economic Reports

Instructions:

a. Report all monetary amounts in United States dollars.

b. The data to be reported in Question 4, 5 and 6 should include information for the reporting company and its wholly-owned domestic subsidiaries.

c. An FTC Form B should be filled out for each company listed in Column 1 in answer to Question 8 and 9.

d. The answer for each item should be filled in on the form following the item. Additional blank forms, if needed for a complete response to this Report, may be reproduced by the company or obtained by writing to the FTC Bureau of Economics.

e. Reporting Company is the company to which this form is addressed and its wholly-owned domestic subsidiaries.

f. A foundation is any non-profit institution, corporation or fund established by reporting company and its wholly-owned subsidiaries, which is engaging in charitable, scientific or educational activities.

FTC Form A

FTC Code No._____

1. The company for which this report is submitted is (print or type):

_____
(Exact corporate name)

_____
(Street address)

_____
(City, postal zone, state)

2. The legal form of organization of the reporting company is (check one):

☐ Corporation chartered on _____ (month, day, year) in _____ (State)

☐ Other (specify) _____

Its operations began _____ (Date).

3. Since January 1, 1951, the reporting company (check and complete where applicable).

a. ☐ has operated without change in corporate name

b. ☐ was formed as a successor on _____ (Date) to _____ (Name and address of previously existing business)

c. ☐ was succeeded on _____ (Date) by _____ (Name and address of successor company).

d. ☐ sold its assets on _____ (Date) to _____ (Name and address of purchaser).

e. ☐ was merged on _____ (Date) into _____ (Name and address of continuing company).

f. ☐ made other changes in corporate name or corporate structure (Specify and give dates of changes):

_____

_____

4. Report below for each year indicated, on a consolidated basis, total gross receipts and total assets of reporting company and its wholly-owned domestic subsidiaries. (Data on a fiscal year basis will be accepted when books and records are not kept on a calendar year basis).

	1950	1951	1952	1953	1954	1955	1956	1957	1958	1959	1960	1961	1962
a. Total gross receipts ($000)													
b. Total assets ($000) at year end													
c. Fiscal year ending (month, day, year)													

5a. List in the appropriate column below, for the year 1962, using the five-digit census product code (Standard Industrial Classification Code), the ten principal classes of products of the reporting company and its wholly-owned domestic subsidiaries based on dollar gross receipts.

b. Report for 1962 the dollar gross receipts of each such class of product by the reporting company and its wholly-owned domestic subsidiaries.

c. Show the percent of total dollar gross receipts of said company accounted for by each such class of product.

Class of product	5-digit Census product code (SIC)	Dollar gross receipts ($000) of class of product, 1962	Percent of total gross receipts of reporting co.	Class of product	5-digit Census product code (SIC)	Dollar gross receipts ($000) of class of product, 1962	Percent of total gross receipts of reporting co
						Co. total: $	100.0%

6. The reporting company (check and complete where applicable):

☐ has no shareholder or beneficial owner of five percent or more of any class of outstanding securities of reporting co.

☐ has the following shareholders or beneficial owners, including corporations, pension funds, mutual funds, foundations, or other beneficial owners, of five percent or more of any class of outstanding securities of the reporting company:

Name of shareholder or beneficial owner	Mailing address	Securities of reporting company owned or held on 12-31-62				
		Class	Has voting rights (yes or no)	Convertible to voting stock (yes or no)	Number of securities owned or held in each class as a % of total securities outstanding in such class	Percent of voting stock

7. Report below exact corporate name and mailing address of each of reporting company's wholly-owned domestic and foreign subsidiaries as of December 31, 1962; and specify the particular type of operation which most clearly describes the primary business activity of each such subsidiary (for example; manufacturer of hydraulic turbines).

Corporate name	Mailing address	Primary Business Activity	Were its operations consolidated in reply to Question 4?	
			Yes	No

8. Report the information requested for all companies, domestic and foreign, of which reporting company, including its wholly-owned domestic subsidiaries, pension funds, or any other fund, foundations, corporations or institutions of the company, owned 50 percent or more of the voting stock on December 31, 1962. Do not include companies reported in answer to Question 7 above. List domestic and foreign companies separately. If reporting company did not own said shares in any company, check here /__/.

Complete an FTC Form B for each company you list in Column 1 below.

Col. 1 Name of company (Domestic)	Col. 2 Mailing address	Col. 3 Name of pension fund or any other fund, foundation, corporation or institution of the reporting company owning or holding stock of company listed in Col. 1	Col. 4 Percent of voting stock	Col. 5 State or country of incorporation
(Foreign)				

9. Report the information requested below for all companies, domestic and foreign, of which reporting company, including its wholly-owned domestic subsidiaries, pension funds, or any other fund, foundations, corporations or institutions of the company, owned 5 percent or more, but less than 50 percent, of the voting stock on Dec. 31, 1962. List domestic and foreign companies separately. If reporting company did not own said shares in any company, check here /__/

Submit an FTC Form B and the information requested in Questions 1 through 7 thereon, for each company you list in Col.1 below.

Col. 1 Name of company (Domestic)	Col. 2 Mailing address	Col. 3 Name of pension fund or any other fund, foundation, corporation, or institution of the reporting company owning or holding stock of company listed in Col. 1	Col. 4 Percent of voting stock	Col. 5 State or country of incorporation
(Foreign)				

If additional space is needed for any question attach separate continuation sheets. Each attached sheet should identify the question to which it refers.

Budget Bureau No._____ FTC Code No._____

FTC Form B Federal Trade Commission
Washington 25, D. C.

REPORT ON INTERCORPORATE RELATIONS

Name of Company Submitting Report (Reporting Company) is

Instructions:

a. Complete one copy of this form (FTC Form B) for each company listed by reporting company in Col. 1 of Question 8 of FTC Form A.

b. Submit one copy of this form (FTC Form B) for each company listed in Col. 1 of Question 9 of FTC Form A, and for each such company furnish only the information indicated in Question 1 to 7 inclusive of FTC Form B.

c. Subject company in Form B refers to company named in reply to Question 1 of Form B.

d. Instructions given in Form A are applicable to Form B. (For example, report all monetary amounts in United States dollars).

1. Give the corporate name and mailing address of the foreign or domestic company of which reporting company (including corporations, pension funds, foundations or other beneficial owners) owned 5 percent or more of the voting stock as of December 31, 1962 (excluding wholly-owned subsidiaries).

Corporate name_____

Mailing address_____

2. If any shareholder or beneficial owner is other than the reporting company, that is, a pension fund, foundation, or other shareholder or beneficial owner with which the reporting company has an ownership relation, list for each such shareholder or beneficial owner its name and ownership relation to the reporting company. Name_____

Ownership relation_____

3. Report in appropriate columns below the dollar amount of investment of the reporting company in the subject company at the time of initial investment and on Dec. 31, 1962; state the number of shares of stock, the percent of class of stock, and the percent of voting stock held or owned by the reporting company in subject company at the time of the initial investment and on Dec. 31, 1962

	Initial investment of reporting company in subject company. Date of initial investment _____ (month, year)				Investment of reporting company in subject company as of Dec. 31, 1962			
	Dollar amount	Number of shares of stock	Percent of class of stock	Percent of voting stock	Dollar amount	Number of shares of stock	Percent of class of stock	Percent of voting stock
a. Total investment in common and preferred stock (1 plus 2)								
1. Common stock								
a. Voting								
b. Nonvoting								
2. Preferred stock								
a. Voting								
b. Nonvoting								
b. Other investment (Specify types of investment) _____								
c. Total investment (a plus b)								

4. Specify the particular type of operation which most clearly describes the primary business activity of subject company (for example: manufacturer of machine tool accessories, book publisher, etc.):_____

5a. Did reporting company purchase any products from subject company in 1962? Yes ☐ No ☐

b. If answer to 5a is "yes", report below name of each such product purchased, the five digit census product code, the dollar amount of purchases of each such product by reporting company from subject company during 1962, and total dollar purchases of each such product by the reporting company during 1962.

Product	Census product code (SIC)	Dollar purchases ($000) from subject company, 1962	Total dollar purchases of product by reporting co., 1962

6a. Did reporting company sell any products to subject company in 1962? Yes ☐ No ☐

b. If answer to 6a is "yes", report below name of each such product sold, the five-digit census product code, the dollar amount of sales of each such product by reporting company to subject company during 1962, and total dollar sales of each such product by the reporting company during 1962.

Product	Census product code (SIC)	Dollar sales ($000) to subject company, 1962	Total dollar sales of product by reporting co., 1962.

7. In 1962 did the reporting co. produce any product within the same five-digit census product code (SIC) of any product of the subject company? Yes ☐ No ☐

8. If the answer to Question 7 is "yes", list below each such product, the five-digit census product code, and the dollar gross receipts of each such product for the reporting company and for the subject company for 1962.

Name of Product	Census product code (SIC)	Dollar gross receipts ($000), 1962	
		Reporting company	Subject company

9a. Total assets of subject company as of Dec. 31, 1962 were: $_____

b. Total dollar gross receipts of subject company in 1962 were: $_____

c. Were the total assets and gross receipts of subject company consolidated in total assets and gross receipts of reporting company reported in Question 4 of FTC Form A? (check one) Yes ☐ No ☐

10. Report corporate name and mailing address of each and all other companies that owned 5 percent or more of the voting stock in subject co. as of Dec. 31, 1962, and give percentage of voting stock in subject co. owned by each such co. on said date.

Corporate name	Mailing address	Percent	Corporate name	Mailing address	Percent

11. List below for 1962, using five-digit census product code, the ten principal classes of products of subject company based on its dollar gross receipts; dollar gross receipts for each such class of products by subject company and percent of total gross receipts of subject company accounted for by each such product class.

Class of Product	5-digit Census product code	Dollar gross receipts ($000) of class of product, 1962	Percent of total gross receipts ($000) of subject co.	Class of Product	5-digit Census product code	Dollar gross receipts ($000) of class of product, 1962	Percent of total gross receipts ($000) of subject co.
						Subject co. total:	100.0%

If additional space is needed for any question attach separate continuation sheets. Each attached sheet should identify the question to which it refers.

USE OF INFORMATION OBTAINED

Mr. THOMAS. If I might interrupt, Mr. Rhodes, what is the purpose of seeking all this information? What difference does it make whether Henry Ford does one-half or two-thirds of the business of General Motors?

Mr. DIXON. What would be the purpose of this, sir?

Mr. THOMAS. Yes.

Mr. DIXON. Well, I think this information would be perhaps very interesting to you.

Mr. THOMAS. It is not to furnish entertaining reading?

Mr. DIXON. It is not to furnish entertaining reading. It is to decide what share of the market, in the case of the automobile industry, General Motors has, what share Ford has——

Mr. THOMAS. Is that the purpose of it? You say:

> Plans also are now underway to expand the financial reporting program to permit the collection of detailed financial and product information from the 1,000 largest manufacturing and merchandising corporations. The collection of this data will permit the Bureau to classify and rank these largest companies by profit rates—

Are you going into the ratio of profit to capital invested?

> by volume and type of products produced and sold, and by asset size. The project also calls for the annual collection of data on mergers and acquisitions made by each of these large corporations.

Your last statement is perhaps right up your field.

Mr. OSTERTAG. Do you have jurisdiction over mergers?

Mr. DIXON. We do.

Mr. THOMAS. But you are going on a wild goose chase to find out the financial standing of these corporations. Are you not overstepping your authority? Your last statement, it seems to me, is rather in your jurisdiction, but in addition to that information you want the other information, "annual collection of data on mergers." Suppose the corporation writes back, "I am not figuring on merging." What is the purpose of all of this? The Commerce Department asks them about the capital investment, and the Bureau of the Budget wants information on profits. Are you not duplicating?

Mr. DIXON. We think not, sir. The principal thrust of this questionnaire is to determine in a company——

Mr. THOMAS. There was a committee set up at the White House or somewhere in the executive department about factual information.

Mr. DIXON. They have had such a meeting last week.

Let me clarify the record in this respect: On this questionnaire going to the 1,000 corporations, we are not calling for it to be submitted under oath. We are not asking for this to be affirmed. The only penalty here that would accrue if it was not returned would be the penalty of $100 a day.

DATA OBTAINED PREVIOUSLY

Mr. THOMAS. Is this the first time you have undertaken this activity?

Mr. DIXON. No, sir.

Mr. THOMAS. What have you done in this field before?

Mr. DIXON. Since 1950, we have not attempted to try to evaluate the intercompany relationships, principally of these 1,000 large corporations. We think it would be quite beneficial for us to have this information.

Mr. THOMAS. Twelve years ago you did it?

Mr. DIXON. Yes, sir.

PURPOSE OF QUESTIONNAIRE

Mr. OSTERTAG. The chairman asked what purpose does it serve. I do not know that you have given us a clear-cut picture of what would ultimately be the purpose of these questionnaires.

Mr. DIXON. It could have many purposes. The principal purpose would be, I think, for a study and evaluation of this information as it comes in, and if it is considered pertinent a report could be written on it addressed to the Congress or to the Government at large.

Another purpose would be, when we meet our day-to-day problems in the merger field, we would have this information readily at hand, it would be there for us to use.

I think very often, Mr. Chairman, when the Federal Trade Commission or any other agency comes up here and says to you they want information from the business community, you hear, perhaps with some justification, that this is harrassment by the Government, that it costs them a lot of money to comply, and that they ought to be relieved. I want to tell you it is pretty hard to enforce an antitrust program in a vacuum. I have even seen the charge made that if they give this information it will help the Communist cause. I have seen every kind of statement made.

Mr. THOMAS. Off the record.

(Discussion off the record.)

Mr. BOLAND. How much do you have for this activity?

Mr. DIXON. A measly $145,000. This is for the entire Bureau of Economics. I married it to the antitrust field.

Mr. THOMAS. They were married before and got a divorce.

Mr. BOLAND. May I say this: As I read this paragraph, it emphasizes the fact that you want to "expand the financial reporting program to permit the collection of detailed financial and product information." And you say, "The project also calls for the annual collection of data on mergers and acquisitions made by each of these large corporations." We do not know just what you want to do with it.

Mr. OSTERTAG. I raised the question as to what purpose it serves and I have not learned of any real purpose coming out of this discussion. When it comes to the matter of merger, that is another matter, but every company in America is not merging and therefore when and if a merger is in order, this type of information might serve a purpose.

Mr. DIXON. Doctor Mueller passed this up to me and I think I will let him expound on this when I am through. We do not know who owns whom in the American manufacturing industry. We do not know exactly what corporatiton owns what. We do not know what interest they have in everybody else.

Mr. RHODES. Whose business is it if they are not violating any laws?

Mr. DIXON. They might be breaking all kinds of laws right and left. Let us go to a joint venture. Let us say you and I sell widgets.

We are competitors. We set up Company X. You own 50 percent of it and I own 50 percent of it and we both let Company X sell our products. Is that competition?

Mr. RHODES. You left an important element out. You have to have one selling either higher or lower than the market. If not, whom have they hurt?

Mr. DIXON. We do not know this.

Mr. EVINS. Can you not get some of this information from the Department of Commerce and can you not confine your questionnaire to the question of mergers?

Mr. DIXON. The information submitted to the Department of Commerce is confidential.

Mr. EVINS. It is published.

Mr. DIXON. A lot of it has been published.

Now, Dr. Mueller, will you answer these gentlemen? Maybe you can explain it better than I have.

ITEM NOT ALLOWED BY THE BUREAU OF THE BUDGET

Mr. MUELLER. I will try to clarify several points. First, I must apologize for not having reread this introductory section.

The third complete paragraph on page g discusses a new program which we proposed to the Budget Bureau but for which they did not provide funds. However, the Commission last year, in its budget justification to the Budget Bureau and to this committee, mentioned a proposed study of intercorporate relations and joint ventures, particularly. As part of this study we have before the Budget Bureau a draft questionnaire that would go to the 1,000 largest industrial corporations and would obtain information on their intercorporate financial relations.

The product information will not be very burdensome. The main purpose of the product information is to give us a better idea of the chief products these companies sell. The final format of the product question is not decided because the Industry Advisory Council on Federal Reports and about 12 Government agencies have made suggestions on this and other questions.

SECURITIES AND EXCHANGE COMMISSION REPORTS

Mr. THOMAS. When was the Securities and Exchange Commission created?

Mr. GLENDENING. About 1933.

Mr. THOMAS. Thirty years ago. It is the exception rather than the rule that these big corporations have not met with the Securities and Exchange Commission in those 30 years, so there is some information over there?

Mr. MUELLER. Some information is available. We have used it extensively in our investigations and reports. However, it is extremely inadequate in many respects. About 200 of the 1,000 largest companies are not registered with the Securities and Exchange Commission. And secondly, SEC requires information on affiliated companies which is very fragmentary, and corporations need report nothing on companies which, according to SEC definitions, are not

"significant" subsidiaries, which is defined as companies with assets or sales 15 percent, or less, as great as the parent company. For a large corporation such as General Motors or Standard Oil, this means that they would not have to report on subsidiary companies with assets or sales as large as $1½ billion.

There are a number of other points on which SEC records also are inadequate, in our judgment. They usually report only the names of affiliated companies and report very little information on companies owned or controlled by the parent company but which are domiciled abroad.

In our questionnaire we have scaled it back to the point where we would get primarily information which is not now available from other sources.

I should emphasize further that the burdensomeness of this questionnaire, when it is finally approved by the Budget Bureau, will be considerably less than most questionnaires we send out in connection with economic investigations in connection with particular cases, and also considerably less burdensome than the questionnaires which have been sent out over the past 10 or 12 years in connection with various economic reports such as the food studies, the antibiotic studies, and others.

PRIOR REQUEST OF INFORMATION

Mr. EVINS. You say you have asked for this information before and this is just bringing it up to date? Is that substantially correct?

Mr. MUELLER. We have asked for this type of information before. We have never asked for information as to the intercorporate relations to this extent. We did once ask for more, extensive information for a study entitled, "Industrial Concentration and Product Diversification in the 1,000 Largest Manufacturing Companies." This was essentially a census of product information for the year 1950. This was an extremely large study.

Mr. THOMAS. Your inquiry is pointed in one direction, the financial structure?

Mr. MUELLER. That is the main point.

Mr. THOMAS. We think you are going a little far.

OBTAINING INFORMATION ON MERGERS

Mr. ELMAN. I wonder if I could answer what purpose is served. I would like to say from the standpoint of our responsibility, our law enforcement obligation, we deal not only with mergers, we deal with price discrimination, we deal with exclusive dealing arrangements, and other business practices that come within our jurisdiction, and Congress has not declared all of these things illegal per se automatically. Congress has said to us they are illegal only if they tend to create a monopoly or lessen competition. So we have to look at an arrangement against the particular industry, the organization, the market, and so on.

If we had no information at all except what we read in the paper of a merger between A and B and we wanted to know if it was a significant merger or a pretty one——

Mr. THOMAS. Did you get the authority you have been seeking for 10 or 15 years from the Judiciary Committee to get information in advance of mergers?

Mr. DIXON. No, sir.

Mr. ELMAN. If the Commission wants to get this information we have authority to go after the particular people in industry and ask them to get the information on an ad hoc basis.

Mr. OSTERTAG. Why do you not do that?

Mr. ELMAN. Or we can issue a complaint and proceed with discovery and deposition. But if we did that and operated more or less in the dark there is a danger we would be harassing people needlessly. We would be issuing complaints we would not have needed to issue if we had the information at hand. We want to know what the trend is in the industry, is everybody in the industry merging, or is the merger of no significance. The whole purpose of getting this information is to enable the Commission to determine what is significant and what is not significant and to use our money most effectively.

Mr. DIXON. May I say one thing, sir?

Mr. THOMAS. Of course the most expensive method I could think of would be to go to depositions based on suspicion, but on the other hand writing questionnaires to 1,000 people, you will turn them upside down and have them all writing in here. Is there not some better method? If you have reason to suspect that X Corp. is getting out of line, can you not take it up with him by mail and then by deposition based on some reasonable evidence?

Mr. ELMAN. You get back to the question of regulatory lags.

Mr. THOMAS. You have been delaying 12 years and you have been doing pretty well, have you not?

Mr. ELMAN. We have been doing as much as possible.

Mr. THOMAS. What about these bank mergers? Whose jurisdiction is that?

Mr. EVINS. The Comptroller of the Currency.

Mr. DIXON. Justice has some jurisdiction.

Mr. THOMAS. Justice stepped in on one the other day.

Mr. DIXON. To answer Mr. Rhodes, the Assistant Attorney General in charge of the Antitrust Division, Lee Loevinger, called me the day before this conference was held in the Budget Bureau, and wanted to go with me and make a joint plea that we be allowed to do this. The Department of Agriculture wrote me a letter day before yesterday and requested that the packers be included. Vested in the Federal Trade Commission was the responsibility to have this expertise. For us to have this expertise I know of no better way than for us to seek this information. It is difficult for us to answer Congress or anybody else as to what is the trend in an industry. You have given the responsibility to us to prevent these unlawful mergers and we should know something about the trend to approach the problem. I think the sum and substance of what we are saying here is a feeble attempt to get some of the information at hand that we ought to have, and I do not think it is burdensome on the corporations.

Mr. RHODES. If I were head of the Antitrust Division I would feel that way too, because it is a way to get information without an attorney being present, without any possibility of anyone objecting to the questions asked. It is a beautiful way to secure information in the

most oppressive way I can think of. I would like to see the questionnaires.

Mr. BOLAND. With respect to the questionnaire we are talking about, how often will you send it out, every year?

Mr. DIXON. This questionnaire, to be meaningful, would have, in my opinion, to be followed up to stay abreast of what is happening in these industries. If we do it every 12 years or every 10 years you have a hallmark.

Mr. THOMAS. You start with an annual report and then a semiannual report and a 3-month report.

Gentlemen, let us get something to eat. While you are gone, review your reorganization plan you put in effect 2 years ago. This has been very interesting and very helpful. Come back at 1:15.

AFTERNOON SESSION

Mr. THOMAS. Mr. Chairman, we note that our distinguished friend, Mr. Sheehy, is absent. Is he ill?

Mr. DIXON. During the Christmas holidays Mr. Sheehy was visiting his wife's family in Connecticut and had a minor heart attack. As of yesterday the report was that he was able to get out of bed.

Mr. THOMAS. We are sorry to hear that. We hope you will extend to him our best wishes for an early and speedy recovery. These hearings are not complete without him around.

Tell him we miss him very much.

Mr. DIXON. I shall be glad to transmit that message.

Mr. THOMAS. Mr. Chairman, I think you had not finished your observations.

Will you proceed?

PROMOTION OF EMPLOYEES

Mr. DIXON. I have only two small paragraphs left, Mr. Chairman, in the general summary.

Mr. THOMAS. We are familiar with that material but we will insert it in the record at this point.

(The material referred to follows:)

Still another increase needed is of importance far beyond its amount, $100,000. Most of this will be used to provide for annual promotions of qualified professional people in grades GS–7 through GS–11, but it also would provide for others who are entitled to promotions. Aside from considerations of fairness and recognition of performance, the promotion of young attorneys is a grim necessity lest the most able be pirated away by private law firms and corporations.

As was stated previously, the increased funds provided by this budget are not sufficient to meet the anticipated workload unless the present staff can be made to accomplish more work and faster. Thus, the Commission must emulate the turtle that succeeded in climbing a tree; it couldn't but it had to.

REORGANIZATION OF COMMISSION

Mr. THOMAS. Tell us something about your reorganization. How it is panning out? What are your hopes and expectations?

Mr. DIXON. As we explained last year, what we had done and why we reorganized the Commission, our purpose in doing this was to attempt to do as much as we could within our inherent powers to eliminate this so-called lag.

Basically, as we told you then, we have organized the Commission principally on a functional basis.

Our purpose was to keep from duplicating so far as possible, to have matters which come to the Commission handled principally by one of the enforcement bureaus so that we could use all of the powers we had in the beginning and have a close working relationship with the field and send them those matters we had to have developed in the field and get them back quickly.

Mr. THOMAS. Which bureaus did you reorganize? Recount your steps.

You took the Bureau of Restraint of Trade and the Bureau of Deceptive Practices and the Bureau of Textiles and Furs, and then the Bureau of Field Operations. That was the size of it; was it not?

Mr. DIXON. We had basically a Bureau of Investigations and a Bureau of Litigation. Inside of the Bureau of Litigation were those matters of litigation which encompassed deception, antitrust, and textiles and furs.

Heretofore, when matters came to the Commission they went immediately to the Bureau of Investigation. There it was broken down and those matters which had to be developed were developed by sending it to one of the field offices for complete development and review. It was re-reviewed in the Commission, in the Bureau of Investigation, by what was called a project attorney.

Then if it was felt that the matter was worthy of a complaint it was sent down to litigation, it was reevaluated, and often we found there was a difference of opinion. Work would either be sent back or another type of investigation would occur.

We thought this was taking too much time, so what we have done was to make the Bureau of Field Operations a service bureau, in a sense, to develop a partner of the very development. These men not only participate in the building but as we changed our rules of practice——

Mr. THOMAS. You put your development work in the field and their primary purpose is to serve your three enforcement divisions?

Mr. DIXON. That is right.

Mr. THOMAS. Inside that enforcement division you have a complete unity, and it tends to all of its business, period.

Mr. DIXON. That is correct.

Mr. THOMAS. That is the sum and substance of the reorganization.

Mr. DIXON. That is right.

RESULTS OF REORGANIZATION

Mr. THOMAS. How is it working out?

Mr. DIXON. Working very well. We have great hopes as we enter 1964 that we will begin to see the fruits of the results, to really begin to see that.

Mr. THOMAS. When was the reorganization instituted?

Mr. DIXON. June-July of 1961.

Mr. THOMAS. It has been in operation about 20 months now?

Mr. DIXON. That is correct.

Mr. THOMAS. Twenty months is a long time, you should begin to see what it can do and what the result is.

Mr. DIXON. As we turn and take each of the bureaus, we will find we have investigated more and we have brought more complaints, that is on just sheer numbers.

However, in addition to this reorganization I want to impress you with this—that where we took those cases one at a time, now the bureau itself is under a direction to develop cases on an industry basis.

I knew that when we did this that I must take the responsibility, or the Commission must take the responsibility, for kind of a lag, because more things were in that category and are there right now.

We have a look now at the drug pricing situation. We have a situation which was discussed more fully in the wearing apparel industry. We have on the deceptive side several of these industries in the analgesics, hemorrhoid treatment, and so on. It takes longer to develop a group than it does one item, but we felt as we passed through our new procedure of rule development, where we offer to every party with rare exception the right to enter into consent negotiations, a larger and larger number of our cases being consented to because of this opportunity.

We took away much of the lag when we took this problem away from the hearing examiner. This frees him up for the purely adversary case.

Yesterday we had a very quick check to see how many matters we had heard before the Commission. This is the final appeal, and everything else, compared to the last 5 years. We heard 87 final arguments before the Commission last year. This was about twice as many as there had been in any one of the prior 4 years, so these matters have become unclogged.

EFFECT OF REORGANIZATION ON HEARING EXAMINERS

Mr. THOMAS. What effect did that have on the hearing examiner?

Mr. DIXON. It has freed them. When I came there, there was a load of more than 300 formal cases. It is now more manageable. They are available now when the adversary case comes to get on to the job so they don't have to delay a case for a year and a half before they even start with it.

Under the old procedure the hearing examiner may have 30 cases or more. He might have 1 day on one case, 2 or 3 days on another one. This hit-and-miss procedure dragged the cases out.

Our rules now provide that they are to try to set down these cases at a time, place, and date certain and hear them until they are completed. This is our policy and we are adhering to it pretty well.

A case came to my attention recently which was tried, a very difficult antitrust case, tried completely in 6 or 7 days.

I have seen cases still coming to the Commission which under the new rules might not now involve more than 9 or 10 days but in the old days it took several years.

Mr. THOMAS. I think you have something in the reorganization. Certainly it expedites the movement of a case. Heretofore you had four or five blocks in each one. You had to satisfy this group and that group, and there is always room for differing opinions.

VOLUME OF ENFORCEMENT CASES

Which of the three enforcement bureaus does the largest volume?

Mr. DIXON. In volume I would suppose the Deceptive Practice Bureau comes closest. Antitrust cases do not of nature come as often. They are more complex and more vigorously contested.

Coming up fast is the Bureau of Textiles and Furs. They have done a remarkable job in the last year and a half since I have been there.

Mr. THOMAS. The subject matter is not as complex as in the other?

Mr. DIXON. That is correct. Take the Bureau of Textiles and Furs—they used to be down in the general litigation staff. The general view was "You have a tougher case and a harder case here," so you can——

Mr. THOMAS. Let us look at the green sheets.

Mr. DIXON. Perhaps we put them in the wrong place. The last sheet behind each of those agencies is the green sheet.

Mr. THOMAS. I surely overlooked that sheet.

Mr. GLENDENING. That is also shown on the insert chart of the Commission, Mr. Chairman.

Mr. THOMAS. This sheet is the sheet we want. I overlooked it.

Mr. OSTERTAG. That is the personnel?

Mr. DIXON. As of December 31, 1962.

Mr. THOMAS. Any general questions?

Mr. DIXON. Mr. Chairman, I would be remiss if I did not say this to you:

RATE OF EMPLOYEE TURNOVER

The last two paragraphs in my statement had to do with money requested, $100,000 for promotions.

I had these figures hurriedly handed to me, but during fiscal year 1962 at the Federal Trade Commission I hired 513 employees. We lost 242.

The first half of 1963 we hired 151 and we lost 143.

In the month of January we hired 21 and lost 18.

I know that Congress has certainly taken a step to do something about this in the way of salary adjustments and salary increases. Much of the moneys in here will go toward that.

The personnel for each bureau is set forth in the justifications.

I hired by necessity since I came to the Commission. You will remember we had about 800 employees. This Congress has given us moneys and approved 1,178 as of last year.

A lot of young people have come with us. A lot come, stay a short time, and leave.

Mr. THOMAS. Off the record.

(Discussion held off the record.)

PROJECTED SIZE OF STAFF

Mr. DIXON. I felt all along that an honest appraisal of the tremendous responsibilities that Congress has charged us with requires us to have an adequate personnel. I do not think I am empire building. I don't know whether my other Commissioners feel that way.

I was asked one time by the executive department for a 5-year range of this thing. I said I thought within 5 years the Commission could double itself, which would be 1,600 employees, and over that time we should be adequate to do our job and it ought to come to the Commission gradually, because if we got it all at once we could not absorb it.

With the increased salaries and the ability to charge these young attorneys that come to us with responsibility, I think they are beginning to find the challenge they want. If they do a good job of recognizing this, and with encouragement by raising their salaries, I think we can hold more and more to do their job.

We will never be able to compete with large corporations and law firms on salaries. We know that.

Nevertheless, Congress has been most kind in the way of salary increases. I know this will help us.

The young attorney is coming more and more to the Federal Trade Commission. I am told as they come there that in the law schools now we have a fine reputation. They say they are told if they come there they will get more experience and actually get the work of being an attorney. This is a challenge to them.

I am trying more and more to determine whether they will stay at least 4 years. I would like to have at least 4 years out of them if I can.

One may be quite honest and he says "No, I will look elsewhere."

Of course, if he says he will stay 4 years and then stays only 2, there is nothing we can do about it.

I think if you will allow us to grow gradually, not in leaps and bounds, we should be able to do the job we should do within several years.

EMPLOYEE TURNOVER—ATTORNEYS

Mr. OSTERTAG. In your turnover where do they go? Do they go into private business, private practice, or going with corporations and other outlets?

Mr. DIXON. Corporations and into the larger law firms.

Take the Chief of my Merger Division. After about 10 years he looked behind himself and had 4 or 5 children to educate. He was offered a salary that is more than anybody in the Congress or down in the family of enforcement agencies makes.

I have had men come in with 5 or 6 years' experience and say they will get $18,000 plus stock options to go with corporations.

As these young men oppose these giant corporations, if they make a fine presentation, you can go to no better place to find talent than into the Government. The Government has become the greatest reservoir of talent for the corporations and law firms in America. This is a good training field.

I have thought honestly, and I have said this in several places, that one of the best ways in my mind to solve the problem of taking my young attorneys away, and the problem of the older attorneys, educating his children, would be a scholarship arrangement so we could keep the talent of the Government.

I don't know how we can ever do it, but this seems to be the thing that takes my boys away.

Mr. EVINS. You get far afield when you advocate a tax reduction as well.

Mr. DIXON. The boys say "I have four kids now. They have to go to college several years from now."

I have two. I have to sweat it out some way.

Mr. OSTERTAG. What is your turnover?

Mr. DIXON. Included in these figures we have stenographers, secretries, and so on. I gave a figure that in the complete fiscal year 1962 we hired 513 and lost 242. That is about 50 percent of those hired.

In the fiscal year 1963, I hired 151 and lost 143.

Mr. OSTERTAG. How many were new positions?

Mr. DIXON. I haven't broken that down. They are attorneys, economists, statisticians, and secretarial help.

Mr. JONAS. Your figures don't show whether the losses came from the new hires, though. You have an attrition problem here irrespective of newcomers.

Mr. DIXON. We have a normal attrition problem.

Mr. JONAS. That is 15 percent.

Mr. DIXON. One who was there 5 years ago can walk around the halls of the Federal Trade Commission and he would hardly recognize the faces there today.

Mr. JONAS. You have some here who have been with you 30 years.

Mr. DIXON. Thank God. These are the last of the Mohicans, sir. This group came to this Government during the thirties when the best jobs one might find were in the Government. Many of these attorneys now are leaders here.

I came in in 1938 and I am still in the Government.

The younger attorney coming in now does not have to seek a job in the Government. He can find nearly as good a job starting right off without coming to Government. He comes here to seek a specialized knowledge. Antitrust is the most productive of all the law practice. This is the big pay.

They love to have this experience, as they do in the tax field, for instance.

This is an excellent place to get exposed to it, work at it, and learn it.

Really, a man is of real value to your Government as a lawyer only after he has had about 4 years' experience. Then he is ready, in a sense, to fly and take responsibility.

If you keep him 4, 5, 6, 7, or 8 years, or 10 years, he is getting up in his midthirties, and someone offers him triple the salary, then you may lose him.

Mr. OSTERTAG. Isn't that true in Government generally? That is true in the highly specialized fields, even in the military. Literally thousands of our military officers are leaving the service for private enterprise particularly in the field of defense production. It applies in communications and in all other fields of regulatory matters of Government as well.

I don't believe you are undergoing anything unique in the Federal Trade Commission as compared with a number of other fields.

Mr. DIXON. I do not say we are.

SIZE AND COST OF FTC OPERATIONS

Mr. OSTERTAG. In connection with the overall picture, I have held a strong feeling of respect and admiration for the job that the Federal Trade Commission has carried on over the years. I believe it has been very commendable and it has been a necessary and laudable function.

However, it seems to me that you are expanding and embarking into areas which will take from you some of this good, rather than help it. I just have that feeling that you are developing your responsibilities in such a broad way which might lend itself to the prevention of these abuses and it seems to me that your very existence and operation in and of itself, serves that purpose. As long as you do it effectively and appropriately that would be it.

You said a few moments ago that you are not an empire builder. I am just wondering where we are going to end in the growth and expansion of all these agencies which seem to be starting from scratch but there seems to be no terminal facility as to size, growth, and expansion.

Mr. DIXON. The Federal Trade Commission is charged broadly with policing the free enterprise system and our overall economy, with those exceptions you have mentioned.

In 1938, when I came to the Commission, there were about 600 employees.

The gross national product of this country has increased since that time by about three times. The population has grown tremendously. In other words, this is a fluent country. The problems of our free enterprise system to keep it free are tremendous in perspective.

When I think of the fact we have 1,178 authorized employees to police a competitive society and see that it is fair, I am astounded with the responsibility, what the sum of money you have invested to protect that freedom.

Perhaps the Commission should have been 10,000; I don't know. All I know is that far behind in empire building is this Commission with its responsibilities.

We are using all our ingenuity within this framework, and all around us, and with all these problems someone must enforce the law. We are one of those enforcement arms of the Congress.

With the economic problem which seems to be the "bur under the saddle," we were the orderly successor to the Bureau of Corporations which was purely economic, which had one function, to investigate and to report.

Then in the wisdom of Congress to fill out the field they created the Commission and put that function in.

Operating as an arm of the Congress, think of the acts you have passed in Congress which came from the economic studies of the Commission—Federal Power, SEC, Packers and Stockyards, we can name them for you one after another. This came from that reservoir of knowledge we were talking about here.

I came back to the Commission and found the Economic Bureau somewhat in ill repute. The economists did not want to come back in.

I find a strange thing. I go to the Budget Bureau and ask, "Why don't you build the economic staff? The economic advisers to the

President want this information. Why don't you do what you are supposed to do?"

With that prodding they give me money.

I come to Congress and Congress says "Why don't you forget that?"

I am caught in the switches, gentlemen. One says we are not doing our job here and the other says "Why don't you do it over here?"

We have the responsibility to the Congress, to the executive branch, to the business community, and to law enforcement. We are supposed to be five experts.

I think you have a good Commission now. I came as a boy in 1938. Mr. MacIntyre was a boy in 1930. Mr. Elman was a boy in 1940. Now we have our newest boy in Leon down here.

Mr. OSTERTAG. The size of the Commission is one thing, and the number of people it requires and the cost is something else.

You relate this to the gross national product. Of course, that is a good barometer to some extent as to the amount of business, but this ever-growing Government of ours is something which is a serious problem from the standpoint of costs of operation as well as the servicing and policing.

This year we are faced with a $12 billion deficit. Certainly our economy is not keeping up with the cost of Government or we would not be faced with these deficits.

Taking your own argument, there is an imbalance.

My only point is that it seems the Federal Trade Commission, which I applaud and which I am not condemning—but this question of expansion and growth is something about which we must give serious consideration.

Some agencies within this Government of ours have remained fairly stable and yet they are doing an efficient job—yes, many times they do a much better job compared to the others.

I do not believe your effectiveness or your importance can be measured by your size.

Mr. DIXON. We are charged with deciding what is in the public interest. We are not tied to the mail bag, but we are getting 7,000 pleas.

When you have so few bodies to attend to pleas, you are harder and harder put to attend to the selection.

I find it difficult to say "No" to an honest businessman, whether he is small, middle, or large, who says "This is happening to me. I think it violates the law. Won't you do something about it?"

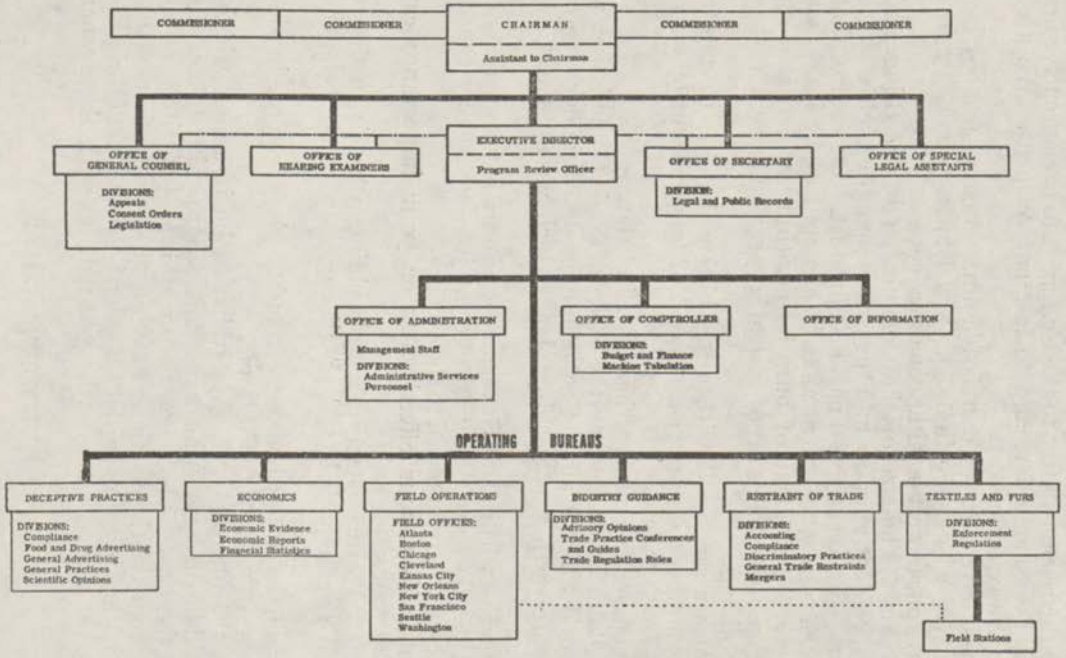
We have to make the election of saying "This is less important than that one." Who is to make that election? It is a tough decision to have to make. I don't know what we will do with those where we cannot elect.

ORGANIZATIONAL CHART

Mr. THOMAS. Let us get down to the estimates and begin by inserting the organization chart in the record.

(The chart referred to follows:)

FEDERAL TRADE COMMISSION



Approved: Paul R. Dixon
Chairman

November, 1962

STATUTORY AUTHORITY AND DUTIES OF THE COMMISSION

Mr. THOMAS. Insert pages 2, 3 and 4 in the record showing the Commission's jurisdiction.

(The pages referred to follow:)

STATUTORY AUTHORITY AND DUTIES OF THE FEDERAL TRADE COMMISSION

STATUTORY AUTHORITY

The Federal Trade Commission, an administrative agency, created by the act of September 26, 1914, is charged with the enforcement of the Federal Trade Commission Act as amended by the Wheeler-Lea Act, approved March 21, 1938 (52 Stat. 111–117); section 2 of the Clayton Act, as amended by the Robinson-Patman Act, approved June 19, 1936 (49 Stat. 1526), and sections 3, 7 as amended and 8 of the Clayton Act of October 15, 1914 (38 Stat. 730); the Export Trade Act, approved April 10, 1918 (40 Stat. 516); the Wool Products Labeling Act, approved October 14, 1940 (54 Stat. 1128); the Insurance Regulation Act, approved March 9, 1945 (59 Stat. 33); the Lanham Trade-Mark Act of 1946, approved July 5, 1946 (60 Stat. 427); the Fur Products Labeling Act, approved August 8, 1951 (65 Stat. 175); the Flammable Fabrics Act, approved June 30, 1953 (67 Stat. 111); amendment to the Packers and Stockyards Act, 1921, approved September 2, 1958 (72 Stat. 1749); and the Textile Fiber Products Identification Act, approved September 2, 1958 (72 Stat. 1717).

DUTIES

The principal duties of the Commission under the above-mentioned statutes are:

(1) *The Federal Trade Commission Act.*—Under this act, the Commission is charged with (a) the prevention of unfair methods of competition in commerce and unfair or deceptive acts or practices in commerce; (b) the conduct of investigations relating to (1) alleged violations of the Antitrust Acts, (2) the manner in which decrees in antitrust suits brought by the United States have been carried out, and (3) the organization, business, conduct, practices and management of corporations engaged in commerce (with certain statutory exemptions) and their relation to other enterprises; (c) the making of reports and recommendations to the Congress with respect to legislation; and (d) the conduct of trade conferences of industries for the elimination of unlawful and unethical business practices.

(2) *Clayton Act.*—Under sections 3, 7, and 8 of this act the Commission is charged with the duty of preventing and eliminating unlawful tying contracts, corporate mergers and acquisitions and interlocking directorates. Under the Clayton Act, as amended by the Robinson-Patman Act, which greatly enlarged and increased the jurisdiction and duties of the Commission in respect to unlawful price discriminations, the Commission is charged with the preventon of certain specific practices; i.e., unlawful price and related discriminations.

(3) *Amendment to Packers and Stockyards Act.*—The provisions of this amendment extend the Commission's jurisdiction to cover certain matters previously subject to the exclusive jurisdiction of the Secretary of Agriculture.

The amendment, in effect, grants the Commission jurisdiction over the activities of packers not related to livestock, meats, meat products, and the like. The Commission is granted additional power and jurisdiction over all transactions in commerce in margarine and oleomargarine and over retail sales of meat and related products. Other matters involving meat and related products are made subject to the Commission's jurisdiction where the Secretary requests the Commission to investigate and report or where, under certain circumstances, action by the Commission is necessary to exercise effectively its power or jurisdiction with respect to retail sales of meat and related products.

(4) *Export Trade Act.*—The Commission is responsible for receiving and filing articles of association or incorporation of "associations" organized under the Export Trade Act; investigating their operations which may adversely affect competition within the United States; making recommendations to the associations for readjustments deemed necessary therein; and, where considered appropriate, making recommendations to the Attorney General for penal action.

(5) *Wool Products Labeling Act.*—Under this statute the manufacture for introduction into commerce, or the introduction, sale, transportation or distribution, in commerce, of misbranded wool products, is unlawful, and constitutes an unfair method of competition and an unfair and deceptive act and practice under the Federal Trade Commission Act. The Commission is authorized to make inspections, analyses, tests, and examinations of all wool products subject to the act and to make such rules and regulations as may be necessary and proper for the administration and enforcement of the act. In addition, the Commission is also empowered under the statute to prevent the movement of misbranded wool products in commerce by injunction and to proceed by libel action in certain cases for condemnation of such products.

(6) *Insurance Regulation Act of 1945.*—The provisions of this act limit the application of the Federal Trade Commission and Clayton Acts, as amended, to practices in the insurance field which have not been regulated by the States. This has imposed upon the Commission the task of not only determining whether any given matter concerning insurance violates any of the acts it administers, but also whether the practices involved have been regulated by the States within the intent and meaning of this act.

(7) *Lanham Trade-Mark Act of 1946.*—Under this statute it is the duty of the Commission to make applications for the cancellation of registered trademarks under certain specified conditions. The Commission, as applicant, must secure the proper evidence on which the application for cancellation is based, prepare the application, stating the grounds relied upon, be represented at the hearing before a Patent Office examiner for the purpose of presenting such evidence and otherwise prosecute the matter to a conclusion.

(8) *Fur Products Labeling Act.*—The Commission is charged with the administration and enforcement of this consumer legislation which requires the mandatory labeling of fur articles of wearing apparel, as well as truthful invoicing and advertising of furs and fur products to show, among other things, the true English name of the animal from which the fur was taken. The Commission is also charged with issuing a fur product name guide and is authorized and directed to cause compliance inspections, analyses, tests and examinations to be made of furs and fur products subject to the act and to prescribe rules and regulations governing the manner and form of disclosing required information under the act. In addition to administrative enforcement, injunctive and condemnation proceedings are also provided for.

(9) *Flammable Fabrics Act.*—Under this act which became effective July 1, 1954, the Commission is directed to prevent the marketing in commerce of all wearing apparel and fabrics intended for use in wearing apparel which when tested under the prescribed standard set forth in the act is so highly flammable as to be dangerous when worn by individuals. Its enforcement is to be carried out through administrative procedures provided for under the Federal Trade Commission Act as well as injunction, condemnation and criminal proceedings in the Federal courts.

(10) *Textile Fiber Products Identification Act.*—This additional truth-in-fabrics legislation takes up where the Wool Products Labeling Act leaves off. It became law September 2, 1958, and covers the broad field of mandatory content disclosue in labeling and advertising of textile fiber products. Under its terms, misbranding as well as false and deceptive advertising of textile fiber products in unlawful.

The Commission is authorized, under the act, to make inspections, analyses, tests, and examinations of all textile fiber products subject to the statute, and further, to make such rules and regulations as may be necessary and proper for administration and enforcement of the act. In addition, the Commission is directed to establish generic names for those manmade fibers which have not as yet attained one.

Its enforcement is to be carried out through administrative procedures provided for under the Federal Trade Commission Act, together with injunction and criminal proceedings in the U.S. district courts.

SUMMARY OF SALARIES AND EXPENSES

Mr. THOMAS. This is an excellent table on page 10 showing a breakdown of bureaus for 1963 and 1964.

(The page referred to follows:)

Comparative summary—Salaries and expenses, fiscal year 1963 with requested funds 1964

	Allotment, fiscal year 1963				Funds requested, fiscal year 1964				Increase requested, fiscal year 1964			
	Positions	Personal services	Travel and other	Total	Positions	Personal services	Travel and other	Total	Positions	Personal services	Travel and other	Total
Commissioners' offices	33	$359,000	$11,000	$370,000	33	$372,000	$11,000	$383,000		$13,000		$13,000
Office of Executive Director	83	561,000	4,000	565,000	87	614,000	4,000	618,000	4	53,000		53,000
Office of Comptroller	30	192,000	46,000	238,000	33	213,000	61,000	274,000	3	21,000	$15,000	36,000
Office of Secretary	48	269,000	1,000	270,000	53	304,000	1,000	305,000	5	35,000		35,000
Office of General Counsel	55	525,000	11,000	536,000	57	574,000	12,000	586,000	2	49,000	1,000	50,000
Hearing examiners	39	431,000	35,000	466,000	39	450,000	43,000	493,000		19,000	8,000	27,000
Bureau Restraint of Trade	202	1,791,000	160,000	1,951,000	202	1,896,000	185,000	2,081,000		105,000	25,000	130,000
Bureau Deceptive Practices	124	1,126,000	123,500	1,249,500	133	1,262,000	145,500	1,407,500	9	136,000	22,000	158,000
Bureau Textiles and Furs	95	709,000	57,000	766,000	130	984,000	76,000	1,060,000	35	275,000	19,000	294,000
Bureau Field Operations	296	2,270,000	295,000	2,565,000	301	2,423,000	300,000	2,723,000	5	153,000	5,000	158,000
Bureau Industry Guidance	47	440,000	6,000	446,000	62	624,000	6,000	630,000	15	184,000		184,000
Bureau Economics	126	900,000	8,000	908,000	138	1,040,000	13,000	1,053,000	12	140,000	5,000	145,000
General operating expenses (not included above)			1,256,000	1,256,000			1,414,500	1,414,500			158,500	158,500
Total	1,178	9,573,000	2,013,500	11,586,500	1,268	10,756,000	2,272,000	13,028,000	90	1,813,000	258,500	1,441,500

Mr. THOMAS. Off the record.
(Discussion held off the record.)

1964 COST OF PAY RAISE

Mr. THOMAS. Is the pay increase included in this first figure?
Mr. GLENDENING. Yes, sir.
Mr. THOMAS. Is the $13,028,000 inclusive of the pay increase?
Mr. GLENDENING. Yes, sir, some $378,000 plus $154,000 we are required to absorb this year.

INCREASES IN EMPLOYMENT

Mr. THOMAS. The record shows employment for 1963 and 1964. We might go back to 1959–60–61 and 62. In 1960 you had 754 jobs. That was an increase of about 35 over 1959, as I recall it.
In 1961 the figure jumped from 754 to 838.
Then the present Commission came in and in 1962 and that figure of 838 was jumped to 1,072.
That year you got the prize of our many headaches, an almost 30 percent increase.
Mr. DIXON. And we appreciated it.
Mr. THOMAS. The next year, in 1963, you went up again, an 11 percent increase, to 1,178.
This year, in 1964, you want to increase that to 1,268, an increase of 90.
You pointed out that perhaps you could have 5,000 people and not do a much better job than you are doing now. You can take an army and go into the labeling industry.

COMPLIANCE INVESTIGATIONS FOR ATTORNEY GENERAL

You have spent about $1 million in the last 2 years on cases referred to the Attorney General up to date. What luck have you had in that?
Mr. GERCKE. Twenty-one field investigations have been completed. Of the 21, 12 of the cases have been referred by the Commission to the Attorney General containing findings and recommendations of the Commission.
The remaining cases are in various stages of review and preparation.
Of the 12 cases that have been referred to the Attorney General, the Commission has recommended affirmative action in 4 of them.
With respect to the cases still pending at staff level, in which field investigation had been completed, the indications are that a similar pattern of noncompliance is detectable. In other words, on the basis of our experience to date with some 20 cases, there seems to be about one-third of the cases in which some affirmative action will be necessary.
All of the cases, save two, have been assigned to the field offices for investigation, and all but seven have been activated. Two of the seven have been specifically reserved at the request of the Attorney General because of a potential interest they might have in otherwise pursuing these investigations.

Insofar as the projection for next year is concerned, I would anticipate from what I can see now that there should be approximately between 12 and 15 additional cases completed.

Mr. THOMAS. How much time does it take for a case? I am sure there is no general rule.

Where are you set out in the table?

Mr. GLENDENING. Bureau of Restraint of Trade. Detail of that is shown on page 45.

Mr. THOMAS. What is the total cost of your Bureau?

Mr. GERCKE. That figure of 33 is not reflective of the personnel that are working on the Attorney General's program.

That figure reflects the personnel assigned to the Division of Compliance, and of that 33, 3 are in a general supervisory and review capacity.

Mr. THOMAS. Where are your activities set out? How many people do you have?

Mr. GERCKE. I would like to point out the bulk of the personnel are in the Bureau of Field Operations and assigned to the investigation of these cases. I would estimate approximately 40 full-time men have been utilized and are being utilized on this work in the field, in addition to the 3 that are assigned to headquarters.

Mr. THOMAS. What is your total personnel regardless of where they are located? Do you have jurisdiction over all of them regardless of where they are located and regardless of the bureau to which they are attached?

Mr. GERCKE. Insofar as these cases are controlled they are controlled by the Division of Compliance, yes. As to the immediate supervisory problem they fall within the cognizance of the individual attorneys in charge of the field offices.

Mr. THOMAS. How much money was allocated to you when you first set this up?

Mr. DIXON. About $1 million.

Mr. THOMAS. How many people were employed?

Mr. GLENDENING. Seventy.

Mr. THOMAS. How many do you have today?

Mr. GLENDENING. The full 70, I am sure.

Mr. THOMAS. And you are spending what today?

Mr. GLENDENING. Approximately $958,000 this year, including the pay raise.

Mr. THOMAS. The entire 70 are engaged in reviewing past decisions of the court? What do you have them doing?

Mr. GERCKE. In that number there are accountants we are using in sizable numbers in some of these cases.

We also have found it necessary to consult the Bureau of Economics on some of these cases. I think the residual manpower, over and above these basic figures, occur in the accounting bureau and in the Bureau of Economics.

Mr. DIXON. A word of explanation is due you, Mr. Chairman.

When we first——

Mr. THOMAS. Our trouble now is that we have had too many words and nothing we can put our teeth into. Let me see if I can summarize it.

You started off with 70 people. You still have the 70. It is costing about $1 million a year. Where are the 70 located and what are the 70 doing?

DECENTRALIZATION OF STAFF TO FIELD OFFICES

Mr. GERCKE. Other than the 3 assigned to headquarters, other than perhaps between 5 and 10 accountants who are generally engaged on this, the rest of them are all in the active field investigation of these cases.

Mr. THOMAS. In the 11 field offices.

Mr. GERCKE. That is correct.

Mr. THOMAS. Under whose jurisdiction do they remain when they are in the field offices?

Mr. GERCKE. The quality control of the case rests with me.

The immediate supervision with respect to the day-to-day operations and investigation of the case rests with the individual attorney in charge of the field office.

As a practical matter, we could not figure out any other feasible way of my supervising a man operating in San Francisco other than placing immediate control over that operation in charge of the attorney in charge of the San Francisco office.

Mr. THOMAS. That makes sense, too.

Mr. DIXON. We did this to save money, Mr. Chairman. We started out with all of them here. Then the situs of these things was where we had a field office.

We stationed the man there rather than putting him on per diem.

Mr. THOMAS. That makes sense. It is the only way you can operate. I never did think a man in Washington can tell a man in the field on a day-to-day basis how to do his job. I don't care where it is, in your agency or in the VA, or any other agency.

Are these people's efforts solely and exclusively to the enforcement of past decisions of the court? Are they out doing the general work of the Bureau in the locality where they are domiciled? If their office has an investigation, if they are investigating 10 or 20 cases, do they help with those cases or do they devote their time in the prior decisions?

LEGAL DELAYS ENCOUNTERED

Mr. GERCKE. In the planning stage they are devoted to the investigation of these judgments. As a practical matter, we have run into delays because of disagreement between opposing counsel and Government counsel.

We have perhaps five men who may be sitting in San Francisco awaiting the outcome of this legal hassle.

We necessarily immediately switch them either on to another judgment matter there or on to Commission work which is in the immediate area, but that is only to the extent——

Mr. THOMAS. What do you mean by a legal hassle? The Bureau says the judgment of the court is not being complied with, and the opposing attorney says it is?

Mr. GERCKE. There is a question of relevancy generally presented in these case. One of the common problems is that a successor cor-

poration is standing in the stead of a named defendant under the judgment. The defense initially always is, "We are not covered by the judgment. Therefore, the Government has no right to investigate us." That necessarily takes some degree of resolution between counsel before we get access to the records that we are interested in. That is but one of the types of situations that we commonly run into.

Another is that our best information may be indicative of the situs of the records that we are interested in, but it turns out that there has been a shift of records over some sizable distance. In that type of situation, we must regroup our men and get them reassigned to the area where we are able effectively to utilize them with the records which are available.

Mr. THOMAS. It appears to me it will take another army to enforce past decisions of the courts.

Mr. DIXON. Mr. Chairman, it took very often 3 or 4 years of preparation before Justice even got ready to sue. In some of those cases it took several years to bring them to a conclusion. It is as hard to investigate and determine whether there is compliance as it is to build a case.

Mr. EVINS. This is the area in which I wanted to inquire, Mr. Chairman. We provided increased funds at the Commission's request to cooperate with the Attorney General to find out how many of the Commission's decisions had been violated. I think most of the——

Mr. DIXON. Justice decisions.

Mr. EVINS. The Justice antitrust decisions. You have not wound this up within 2 years. As the chairman has brought out, the staff is absorbed in other matters, which in effect is an increase in the staff which has permeated throughout the staff of the Commission. Every now and then you can assign them to compliance work, but if they had addressed themselves to the matter at hand full time, they could have wrapped it up, no doubt.

Mr. DIXON. That is not quite correct, I do not believe, Congressman, because of this fact: In the beginning, I believe we told you that these were the most difficult cases Justice had brought in 20 years. They were long, bitterly contested cases. It took years to prepare them and years to try them. You will remember that to determine whether an order was being violated, the same type of preparation is necessary, if not greater effort.

Mr. EVINS. By the Attorney General's letter of request to you to provide information, your staff has been increased by 70 additional expert attorneys. That is true, is it not?

Mr. DIXON. That is correct, sir, and I hope we never lose them, because my plan would be to integrate them in here to check what we are not checking ourselves.

LOCATION OF STAFF WORKING ON ATTORNEY GENERAL CASES

Mr. THOMAS. Where are the green sheets on these?

Mr. DIXON. It would be in the Bureau of Restraint of Trade for those three for headquarters, and in the Bureau of Field Operations for the others, sir. We have not attempted to split them out and to

separate them. Maybe that is what you are asking us to do. I did not try to split out accountants or the General Counsel's staff to cover this.

Mr. THOMAS. On page 64, you give us some information which might help here.

Mr. GLENDENING. Page 99.

Mr. DIXON. Page 99 for the other.

Mr. GLENDENING. On page 99, we deal with field office personnel.

Mr. THOMAS. We have to look all over the lot, and when we finally get it, it is not exactly what we want.

Mr. DIXON. Page 99 has by grades the employees as of December 31 in all of our field operations.

Mr. THOMAS. Which ones of these are doing your compliance work for the Attorney General?

Mr. DIXON. They would be spread generally. We would have to split them out for you. We have teams in Washington, New York, Chicago, Atlanta, New Orleans, and San Francisco.

Mr. THOMAS. You said it was all here. I agree with you. All you have to do is find it.

Mr. DIXON. We have so many grades 15, 14, and 13, and 12 attorneys. Which ones of those are exclusively in this work——

Mr. THOMAS. Which type of personnel do you have on this work? Are these 15's, 14's, 13's, 12's, 11's, 9's, or what?

Mr. DIXON. They would be spread through the grades, sir. The leaders of these teams would be the higher grades. They would have some high-grade people and some young attorneys with them. It would be spread across the board among those grades.

Mr. THOMAS. I notice here in Washington you have three grade 14's, New York three, Boston one, Chicago three, Cleveland one, Atlanta three, Kansas City none, New Orleans four, San Francisco five, Seattle one. What do these people do? Which ones of these are enforcing these judgments of the courts?

Mr. DIXON. In New York, one of those grade 14's, Dougherty, is the team captain of two compliance groups.

Mr. GERCKE. I do not know what grade Sol Grand is, but he also is cochief up there.

Mr. DIXON. He is probably a 14.

Mr. THOMAS. We can avoid all this. Get this table in shape so it provides the information.

TERRITORY OF WASHINGTON FIELD OFFICE

Mr. OSTERTAG. Is Washington a field office and a central office as well?

Mr. DIXON. That is right. We have one field office.

Mr. GLENDENING. The Washington field office is actually in Arlington.

Mr. THOMAS. What is the jurisdiction of the Washington field office?

Mr. WILLIAMS. Territorywide. It covers Virginia, Maryland, and North Carolina. Geographically, it is divided by the eastern part of North Carolina, Virginia, Maryland, and some of Pennsylvania, about half.

Mr. THOMAS. New York comes down how far?

Mr. WILLIAMS. New York comes to Philadelphia and meets it there. Delaware is in there, too, as part of it.

SUMMARY OF FORMAL AND INFORMAL CASES

Mr. THOMAS. Put the table on page 11 in the record. This is a summary of the formal and informal cases, a pretty good table.

(The table referred to follows:)

Summary of formal and informal cases, fiscal years 1958 through 1962

FORMAL CASES

Fiscal year	Complaints issued or approved		Orders to cease and desist		Orders of dismissal, etc.		Pending end of year	Petitions to review filed in courts		
	Monopoly	Deceptive	Monopoly	Deceptive	Monopoly	Deceptive		Filed	Disposed of	Pending end year
1958	86	269	45	228	8	10	326	26	22	18
1959	80	272	69	277	5	36	309	18	19	25
1960	157	348	58	298	5	13	449	24	18	31
1961	121	292	103	272	5	14	473	31	22	40
1962	234	240	92	319	19	10	524	27	21	46

INFORMAL CASES

	Fiscal years				
	1962	1961	1960	1959	1958
Investigations pending first of fiscal year, total.	2,743	2,142	1,336	1,359	1,365
Restraint of trade	1,484	931	450	488	436
Deceptive practices	1,259	1,211	886	871	929
Initiated and reopened during year, total	1,795	2,024	1,946	1,072	1,059
Restraint of trade	741	884	760	213	291
Deceptive practices	1,054	1,140	1,186	859	768
Completed during year, total	1,677	1,427	1,140	1,095	1,065
Restraint of trade	709	336	279	251	239
Deceptive practices	968	1,091	861	844	826
Pending at end of year, total	2,872	2,743	2,142	1,336	1,359
Restraint of trade	1,513	1,484	931	450	488
Deceptive practices	1,359	1,259	1,211	886	871

Office of the Executive Director

Mr. Thomas. Put page 18 and the first paragraph on page 19 in the record.

(The material referred to follows:)

Office of the Executive Director

	Allotment, fiscal year 1963		Requested, fiscal year 1964		Increase, fiscal year 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
Office of Executive Director	6	$64,000	8	$81,000	2	$17,000
Office of Information	5	39,000	5	41,000	----------	2,000
Office of Administration	10	80,000	10	84,000	----------	4,000
Division of Personnel	11	77,000	11	81,000	----------	4,000
Division of Administrative Services	51	301,000	53	327,000	2	26,000
Total, personal services	83	561,000	87	614,000	4	53,000
Travel	----------	4,000	----------	4,000	----------	----------
Total	83	565,000	87	618,000	4	53,000

Office of the Executive Director

The Executive Director, as the Commission's chief operating official, manages the Federal Trade Commission's activities to achieve effective and economical operations. He has responsibility for operational and administrative direction of all the Commission's bureaus and field offices. The Office of the Executive Director also includes the Office of Information.

Since 1960 the Office of Information has reported to the Executive Director and its overall policy advisory and educational functions have been given additional emphasis.

In 1962 the position of program review officer was established for program planning purposes. The program review officer has been charged with the responsibility for continuously reviewing the substantive programs of the Commission, such as, restraint of trade (mergers, price discriminations, etc.) and deceptive practices, and for making recommendations with respect to how and where its functions should be exercised in order to best serve the public interest. The program review officer also acts for the Executive Director in the latter's absence.

An additional $14,000 is requested to provide for a program analyst at GS–12 and a secretary at GS–5, who are needed to assist the program review officer in carrying out his vital functions and $5,000 to provide for the increased pay costs in 1964.

Mr. Thomas. This is the Office of the Executive Director. You have 83 people. You want an increase of four.

The Office of Administration gives policy guidance and general supervision to the management and organization programs, administrative services activities, and personnel programs of the Federal Trade Commission.

Is he the housekeeper?

Mr. Dixon. He is the housekeeper. The Office of Administration, yes, sir, is a kind of housekeeper.

Mr. THOMAS. What is included in his duties?

Mr. DIXON. He does a little bit of everything. That is the best way to say it. He buys. He is our service manager. He runs the personnel program and the printshop. All the administrative services are under him. The library is there.

Mr. THOMAS. Eighty-three people to take care of how many? How many people does he take care of? He does not take care of the regional offices? How many people have you in the regional offices?

Mr. GLENDENING. Yes, he does take care of them.

Mr. THOMAS. Does he not just take care of the Washington headquarters office, or all the regional offices?

Mr. DELANEY. All regions, sir.

Mr. THOMAS. You mean you do not have a duplicate setup in the region? All personnel vouchers, pay checks, and travel orders and social security—all of the administrative services are rendered here.

Mr. GLENDENING. That is correct. All fiscal and administrative functions are performed in Washington by the Office of the Comptroller and the Office of Administration.

Mr. THOMAS. What is the total personnel in the field?

Mr. GLENDENING. 277.

Mr. THOMAS. You figure all together about 300 people, then. You do not do any administrative work in those offices.

Mr. DELANEY. We have about 100.

Mr. WILLIAMS. We have 52 attorneys and about 30 stenographers, and about 16 accountants—about 76, I believe.

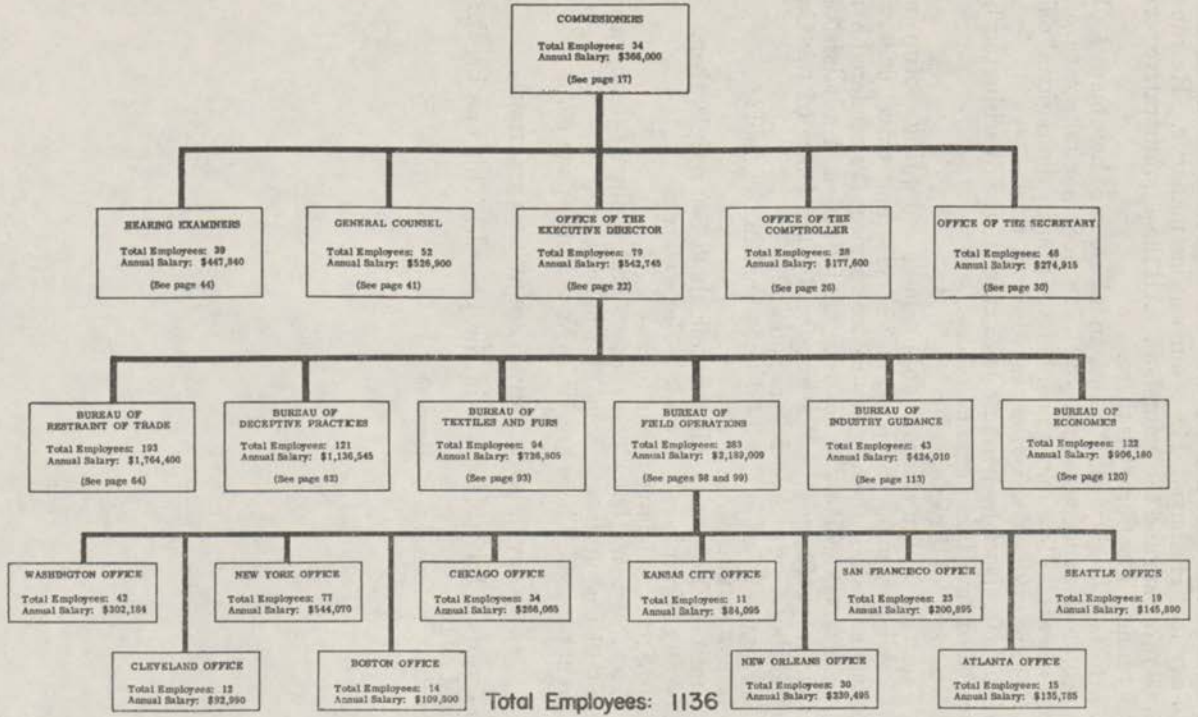
Mr. GLENDENING. There are 77 in New York, page 99.

SUMMARY OF TOTAL EMPLOYEES BY ORGANIZATION

Mr. THOMAS. Put this chart in the record. This one breaks out your field offices.

(The chart referred to follows:)

FEDERAL TRADE COMMISSION



Total Employees: 1136

Annual Salary: $9,482,949

December 31, 1962

Mr. THOMAS. What is the sum total of the field operation?
Mr. DIXON. 277.
Mr. THOMAS. 277, field.
Mr. DIXON. Page 99 has that broken down.
Mr. OSTERTAG. Is that the total number as of the first of the year?
Mr. GLENDENING. Yes, sir.

OFFICE OF THE COMPTROLLER

Mr. THOMAS. What about the Office of the Comptroller? An increase from 30 to 33. Put pages 23, 24 and 25 in the record.
(The pages referred to follow:)

Office of the Comptroller

	Allotment, fiscal year 1963		Requested, fiscal year 1964		Increase, fiscal year 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
Office of the Comptroller	4	$39,000	4	$41,000	----------	$2,000
Division of Budget and Finance	15	96,000	16	105,000	1	9,000
Division of Machine Tabulation	11	57,000	13	67,000	2	10,000
Total personal services	30	192,000	33	213,000	3	21,000
Travel	----------	1,000	----------	1,000	----------	----------
Other expenses	----------	45,000	----------	60,000	----------	15,000
Total	30	238,000	33	274,000	3	36,000

OFFICE OF THE COMPTROLLER

The Office of the Comptroller includes the Division of Budget and Finance and the Division of Machine Tabulation, thus placing all budget, fiscal, and machine tabulation work in one office. The Division of Financial Statistics was transferred to the Bureau of Economics effective June 1, 1962.

DIVISION OF BUDGET AND FINANCE

The Division of Budget and Finance is responsible for the preparation and administration of the Commission's budget and maintains the fiscal records of the Commission. This office maintains salary, savings bonds, tax, social security, retirement, and annual and sick leave records for all employees of the Commission, including the field offices. This Division performs the audit, prior to payment, of all vouchers covering payments for travel expense, communications, and supplies and equipment. The Fiscal Section maintains the various ledgers and records necessary to reflect the financial position of the Commission at all times, and prepares the various financial statements and reports required by the Commission, the Bureau of the Budget, the Treasury Department, the General Accounting Office, and the Congress.

The workload in the Division has shown a marked increase in the last 2 years. In the Payroll Section alone the number of documents handled has increased 200 percent. From 1961 to 1962 the volume of travel advances to Commission employees has increased 54 percent, with a corresponding increase in other fiscal record maintenance. With the increase in Commission employment and expanding programs in 1963 this workload must necessarily increase.

The Commission's budget request for 1964 contemplates the addition of 90 employees. The additional services required by the new employment and compulsory reports to State governments pertaining to income taxes withheld and unemployment compensation will again increase the burden in this Division. To alleviate some of this workload the amount of $4,000 is requested for one GS–5 accounting clerk and the amount of $7,000 is requested for increased pay costs.

DIVISION OF MACHINE TABULATION

This Division is the center for all data processing for the Commission; here volumes of legal and economic evidence are compiled and tabulated for use in the Commission's law-enforcement functions.

In the past 2 years this Division has completed large numbers of tabulations in many cases pertaining to enforcement of section 7 of the Clayton Act and the other antimonopoly statutes. Outstanding in this area was the *National Tea Co.* case in which statistics compiled covered a period of 6 years. Twenty thousand punch cards were made to cover the thousands of computations needed to ascertain the share of the market controlled by this company. This Division also processes and tabulates all data for the corporate financial reports and other reports issued by the Bureau of Economics.

With the increase in everyday use of data-processing systems and the expanding volume of work in the Commission it is requested that additional funds amounting to $15,000 be granted to update the present tabulating system. An increase of $10,000 is also requested to provide for two additional employees and for increased pay costs.

The two employees required are one GS–5 tabulating machine operator and one GS–3 card punch operator.

Mr. THOMAS. Are you combining these two offices? This is housekeeping, too, Budget and Finance. Thirty-three against how many over in the Director's office? Against 83. You have 83 and 33. That is 116 people doing housekeeping work for how many? Twelve hundred.

Mr. DIXON. This is specialized work here in the Office of the Comptroller. We could group them and come out just where we are. I do not think we have any fat there at all, because as we grow, all of these increased functions come back upon this office and upon our personnel office here. We also have here the Division of Machine Tabulation. We perform all of our machine tabulation operations there. Someone must be responsible for this.

Mr. THOMAS. Do you mean IBM machines?

Mr. DIXON. Yes.

Mr. THOMAS. What is the nature of the operation?

Mr. DIXON. We make up the quarterly reports in connection with SEC, the financial reports. They give us raw material which is fed into the machines and processed. We also use them extensively in the preparation of evidence used in the trials of merger and other restraint of trade cases. We use them generally for our own work.

OFFICE OF THE SECRETARY

Mr. THOMAS. Put in the record pages 27, 28, and 29, Office of the Secretary.

(The pages referred to follow:)

Office of the Secretary

	Allotment, fiscal year 1963		Requested, fiscal year 1964		Increase, fiscal year 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
Office of the Secretary	10	$79,000	10	$83,000	----------	$4,000
Legal and public records	38	190,000	43	221,000	5	31,000
Total Personal Services	48	269,000	53	304,000	5	35,000
Travel	----------	1,000	----------	1,000	----------	----------
Total	48	270,000	53	305,000	5	35,000

OFFICE OF THE SECRETARY

The Secretary and his immediate office receive and handle mail on all phases of the Commission's work. He signs all orders and certain other official papers. He also is responsible for liaison with the Congress and Government agencies and for decisions on informal cases not submitted to the Commission.

The Assistant Secretary for Minutes takes the minutes of and records the executive meetings of the Commission, prepares directives for the signature of the Secretary, and keeps the docket of pending matters before the Commission.

During 1962 the Legal Research and Reporting Section, formerly under the Assistant Secretary for Minutes, was transferred to the Office of the General Counsel.

No increase in personnel is requested for 1964 but an additional $4,000 will be requested for increased pay costs of the present staff.

LEGAL AND PUBLIC RECORDS

The Division of Legal and Public Records embraces the Formal Docket, Informal Docket, Correspondence, Public Reference, and Distribution Sections.

The Formal and Informal Docket Sections are responsible for the establishment, management, safety, completeness and accuracy, uses and retirement of the legal and related records of the Commission.

The Correspondence Section receives incoming mail, opens, date stamps, establishes index and tickler when appropriate, conducts history search, and forwards letters to proper office for action.

The Public Reference Section furnishes information and assistance to the public, and to the staff of the Commission in relation to public, legal and court proceedings and in matters of related procedure. The Section is responsible for the custody, location, safety, conditions, etc., of dockets, files, exhibits, etc.

The Distribution Section controls the supply and distribution of all publications issued by the Commission, such as economic reports, annual reports, trade practice rules, etc.

The workload of the several sections of this Division bears a direct relationship to the professional staffs of the operating bureaus. The number of attorneys and hearing examiners on the Commission staff has increased steadily during the past 5 years while the number of employees in this Division has remained the same.

In anticipation of the increase in production of cases by the staff and the new responsibilities concerned with the processing of consent settlement matters, an additional $31,000 will be needed in fiscal 1964 to provide $19,000 for five clerks GS–4, and $12,000 for increased pay costs for the current staff.

Mr. THOMAS.—The Office of the Secretary jumps from 48 to 53. [Reading:]

The Secretary and his immediate office receive and handle mail on all phases of the Commission's work.

It is still a housekeeping activity.

He signs all orders and certain other official papers.

What are the certain other official papers?

Mr. DIXON. By direction of the Commission. He is the clerk of the court. He is custodian of all the official records of the Commission.

Mr. THOMAS (reading):

During 1962 the Legal Research and Reporting Section, formerly under the Assistant Secretary for Minutes, was transferred to the Office of the General Counsel.

Mr. EVINS. Is this the division which publishes your annual decisions?

Mr. GLENDENING. Yes.

Mr. EVINS. Is he current on them, or behind?

Mr. GLENDENING. We are current within a year, yes.

Mr. THOMAS. How much is for publishing the annual report and how much for printing and binding generally? That is in your

"other objects," and we will get to that in a minute. In round figures, this year, $100,000; round figures next year, $100,000. When you see those round figures, it looks like a little guesswork.

Office of the General Counsel

Let's turn to the Office of General Counsel. Insert pages 31, 32, and 33 in the record.

(The pages referred to follow:)

Office of the General Counsel

	Allotment, fiscal year 1963		Requested, fiscal year 1964		Increase, fiscal year 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
Office of General Counsel	16	$151,000	16	$160,200	----------	$9,200
Division of Appeals	29	275,000	31	311,000	2	36,000
Division of Consent Appeals	6	58,000	6	61,000	----------	3,000
Division of Legislation	4	41,000	4	41,800	----------	800
Total, Personal services	55	525,000	57	574,000	2	49,000
Travel	----------	11,000	----------	12,000	----------	1,000
Total	55	536,000	57	586,000	2	50,000

Office of the General Counsel

As the Commission's chief law officer, the General Counsel is principal legal adviser to the Commission and its staff. His office—

Handles the preparation of briefs and oral arguments before the courts of appeals on appeals taken from decisions of the Commission;

Collaborates with the office of the Solicitor General in preparing and presenting Commission cases before the U.S. Supreme Court;

Handles matters before U.S. district courts concerning enforcement of Commission subpenas and seeking injunctions;

Prepares opinions on matters of law for the Commission and the staff;

Analyzes new legislation, prepares the Commission's reports thereon and represents the Commission before congressional committees;

Handles the negotiation of consent orders;

Handles cancellation proceedings of trademarks under Lanham Act;

Advises the Chairman of the Commission on clearance of voluntary industry agreements sponsored by other agencies in carrying out the Defense Production Act and the Small Business Act of 1953, as amended;

Passes upon trade practice rules and trade practice guides;

Examines from the standpoint of enforcibility investigational demands for access, demands for special reports and subpenas duces tecum;

Prepares legal manuals and studies for staff use.

The increase in the work of the appellate division and in the field of legislative activity which has occurred during the recently past fiscal years is expected to continue at an accelerated rate during fiscal 1964. The increased activity of the Commission, the emphasis being given to restraint of trade matters, the initiation of industry-wide-type investigations, and the greatly expanded use of demands for special reports and investigational subpenas, enforceable in the courts, will result in a material increase in the work of this office in the courts.

The recent greater congressional interest in trade regulation, relating both to trade restraints and to deceptive practices, has resulted in an increase in legislative proposals.

The total increase of $50,000 for the General Counsel will provide $13.000 for two additional employees, $5,000 for required staff promotions, $31,000 for increased pay costs in 1964, and $1,000 for additional travel.

The Legal Research and Reporting Section is now located in the Office of the General Counsel. This Section is responsible for the preparation and publication of the volumes of "Federal Trade Commission Decisions" and the "Statutes and Court Decisions relating to the Commission." The latter covers not only

court decisions to which the Commission was a party but also court decisions to which the Commission was not a party but which construe statutes administered by the Commission.

The Section likewise prepares case notes to Commission cease and desist orders for publication in the Federal Register. Such volume of work has virtually doubled under the Commission's expanded program. Because of lack of additional staff, the work has fallen much in arrears.

Besides producing monthly the Inter-Office Reporter of cases in trade regulation and antitrust field, the Section has the further responsibility of preparing and maintaining the cumulative legal digest of Federal Trade Commission Decision. This work is of major importance, not only because of its need by the trial and appellate staff of the Commission, but also because it constitutes source material of the guidance of business itself. Thus far, there are 57 volumes of Commission decisions that are in the program for digesting. Progress of the work, however, is behind schedule because of the serious understaffing of the Section.

The only additional amount requested for 1964 is $9,200 to cover increased pay costs of the current staff.

Mr. THOMAS. In the Office of the General Counsel, with all your work, you are just an appellate division for all the trial work back in the field offices.

Mr. DIXON. They are creating more trouble for our General Counsel than you can shake a stick at.

Mr. THOMAS. He is not General Counsel. He is an appellate lawyer.

Mr. DIXON. The APA Act made our General Counsel an adviser to the Commission, and the Commission's lawyer after the Commission has decided the case.

Mr. THOMAS. You are not on speaking terms half the time, are you?

Mr. DIXON. Our General Counsel has three fundamental divisions there.

Mr. THOMAS. When you have a case under consideration, you are not on speaking terms with him, are you?

Mr. DIXON. This is down in our shop, but when we go to court, after we get through and it is reviewed in the court, he is the Commission.

Mr. EVINS. You render the decision and call in the General Counsel to affirm it.

Mr. DIXON. In our investigatory process, we are having a formal hearing, and it is tending to be quite common to have a refusal and appeal to the court to have us stopped. Our General Counsel has to go there and represent us. I tell you, with all his appellate work that he is getting——

Mr. THOMAS. During the time you are in process or decision stage, he is not on speaking terms with you.

Mr. DIXON. We are on speaking terms up until we start. Then after we issue the complaint, I do not speak to anybody else about it until it comes to me on review.

Mr. THOMAS. I was not wrong when I said half the time you are not on speaking terms.

Mr. DIXON. That is right.

MEETINGS OF THE COMMISSION

Mr. THOMAS. How often does the Commission meet? You meet six days a week, every Saturday morning, too?

Mr. DIXON. We meet three times a week, usually, and we hear an oral argument about three times a week, average. We have one always, sometimes two.

APPELLATE WORK

Mr. THOMAS. The judge wants to increase his office from 55 to 57. His office [reading]—

Handles the preparation of briefs and oral arguments before the courts of appeals on appeals taken from decisions of the Commission.

How many cases have you on appeal, Judge?

Mr. HENDERSON. It varies from day to day. I think we have 54.

Mr. THOMAS. That keeps you on the road. What courts are they in?

Mr. HENDERSON. We have been in every circuit but one, Mr. Chairman, this year.

Mr. DIXON. And a lot of district courts, too.

Mr. THOMAS. Do you do any trial work in the district courts?

Mr. HENDERSON. Yes.

Mr. THOMAS. I thought the Bureau in the field handled that. Do you do that, too?

Mr. HENDERSON. Yes.

Mr. THOMAS. What about this streamlining that we had?

Mr. DIXON. We participate with the U.S. Attorney, Department of Justice, when the district court is resorted to either by us for enforcement or a respondent takes us there.

Mr. THOMAS. I used a loose term there. When you go to the district court, most of the time you are brought there; are you not?

Mr. DIXON. We are brought there; that is correct, sir.

Mr. THOMAS. Who represents you then—the chief counsel or the legal staff nearest the court of jurisdiction?

Mr. DIXON. Our General Counsel does, because he has more expertise in this field. He is our solicitor.

Mr. THOMAS. Outside of the Commission itself.

Mr. DIXON. That is right. He is our solicitor.

Mr. OSTERTAG. Speaking of mergers, a railroad merger would not come under your jurisdiction. That would be under ICC; would it not?

Mr. DIXON. Section 11 of the Clayton Act, the empowering section to us, delineates those areas that are assigned to the various bureaus: Communications, FCC; banks, Federal Reserve; transportation, ICC; airlines, CAB. Everything else is ours.

Mr. OSTERTAG. All others come under the Trade Commission?

Mr. DIXON. Everything else.

CONSENT ORDERS

Mr. THOMAS. What about the negotiation of consent orders?

Mr. DIXON. This is the new Division that we created. As we reported, our purpose here——

Mr. THOMAS. We have not started yet, have we?

Mr. DIXON. Yes, we have.

Mr. THOMAS. How long have we been in business?

Mr. DIXON. Since June 1961. We are very pleased with this, Mr. Chairman, because we are getting better uniformity of orders. You see, this group is really our agent for the negotiation. We have devised a plan whereby the Commission can stay in the matter. We did not want the APA Act to take our hat off. We have placed this group in the General Counsel because he is our adviser to keep us uniform and coherent and up to date in the law. He is properly placed now. We have an Assistant General Counsel in charge of this and answerable to him.

COMMISSION SUBPENAS

Mr. THOMAS (reading):

Examines from the standpoint of enforcibility investigational demands for access, demands for special reports, and subpenas duces tecum.

I imagine if you go into court and get a subpena duces tecum, there is not much argument.

Mr. DIXON. To fill that out and make it meaningful, in our regular administrative processes we may go to an investigational hearing. We find it necessary to issue, for instance, a subpena duces tecum——

Mr. THOMAS. You want access to certain records.

Mr. DIXON. Right. We want them produced. We must anticipate when we make this demand that we will get a refusal and we will have to seek an order of enforcement. We call our General Counsel in at the beginning because——

Mr. THOMAS. I thought that was handled in the field. What is that investigative unit and the lawyers in the field doing?

Mr. DIXON. This is not in the field. This originates down in one of these three enforcement bureaus. Right where our General Counsel is, we want that day-to-day contact and check, because we do not want them drawing a subpena duces tecum that is unreasonable. We want one drawn that can be enforced. We want our General Counsel in when we lay the plank, so if they stop he has the job of going to the court to enforce it.

Mr. THOMAS. The request must be specific and it must be relevant.

Mr. DIXON. These are not court subpenas. These are our own subpenas. We have the authority to issue these subpenas ourselves.

Mr. THOMAS. These are subpenas requested of the Commission and not of the court?

Mr. DIXON. That is correct. Our trial staff in the Bureau of Restraint of Trade will request one down there. We want that checked out with our General Counsel before a Commissioner signs it. Commissioner Higgenbotham is our subpena Commissioner now. These are brought to him. Any one Commissioner can issue them.

Mr. THOMAS. Any one Commissioner can sign the order?

Mr. DIXON. That is right, can sign the subpena. This is a lawful demand upon the party to produce as outlined in the subpena. He can comply, and it is all over with, but very often they will resist. Then we have to go for enforcement or we will have to——

Mr. THOMAS. If they resist, do they resist before the Commission or do they take you into the nearest district court?

Mr. DIXON. They will resist. It can come by just failure to show up and comply. Then we have the burden to go forward. Else they can go themselves to the district court to have it set aside.

Mr. THOMAS. You have to be careful there to show relevancy and accuracy in what you want. You do not want the charge leveled against you that you have a scatter barrel on them.

Mr. DIXON. That is right. We have to draw them within the bounds of relevancy.

Mr. THOMAS (reading):

Prepares legal manuals and studies for staff use.

What does that mean?

Mr. DIXON. We have a great deal of young men coming in, and old men as far as that is concerned. We have an attorneys manual. We try to keep that up to date. It takes quite of bit of work to bring that up to date. It is being prepared now under our new organization and direction, and this is a function of the General Counsel.

DIVISION OF APPEALS

Mr. THOMAS. Put material on the Division of Appeals in the record. (The material referred to follows:)

DIVISION OF APPEALS

The Division's principal function is to represent the Commission in court. It does so both directly and in participation with the Office of the Solicitor General in matters reaching the Supreme Court, and with appropriate divisions of the Department of Justice and with offices of the U.S. attorneys in certain other court cases affecting the Commission. It also is called upon to render advice to the Commission and the staff and to assist in preparing reports to the Congress and the Bureau of the Budget.

WORKLOAD, FISCAL 1962

During fiscal 1962 the Division handled 86 court cases. It completed litigation in 30, 7 of which were antimonopoly proceedings, 15 involved unfair or deceptive practices, 2 concerned the Commission's subpena powers, 4 were injunction suits to restrain Commission actions, 1 was a trademark cancellation proceeding, and 1 concerned enforcement of and collection of penalties for violating an order to file special reports pertaining to a merger being investigated by the Commission.

The Division represented the Commission in 10 of 11 U.S. courts of appeals, and in 6 U.S. district courts. It prepared and filed 45 briefs and memorandums and assisted in the preparation of 16 other briefs filed on the Commission's behalf by the Department of Justice, made 40 arguments and assisted in the presentation of 9 others by the Department, initiated 3 proceedings to obtain court orders enforcing subpenas and 1 prosecution for criminal contempt, and prepared and filed approximately 200 other court papers.

CURRENT WORKLOAD

Since most of the Division's workload results from actions initiated by other parties, the timing of its work is controlled by factors over which it has little control. As in each of the recent prior fiscal years, the load in fiscal 1962 was heavier than in the previous year, and reached a new high. There was a maximum of only 12 attorneys on the staff to handle the work, and as a result much night and weekend overtime was needed.

At the beginning of fiscal 1963 the workload included 58 pending court cases, an increase of 11 over the previous year. These included 7 in the Supreme Court, 46 in courts of appeals, and 5 in district courts. There were 4 merger, 21 other antimonopoly, and 18 deceptive-practice appellate review cases, 6 subpena-enforcement, 8 injunction and miscellaneous suits, and 1 criminal contempt proceeding. They included *Pillsbury Mills*, with 31,000 pages of transcript and 1,000 exhibits; *Union Carbide*, with 11,800 pages of transcript and over 2,100 exhibits; *Firestone Tire & Rubber Co.*, with 8,000 pages of transcript and 700 exhibits;

Goodyear Tire & Rubber Co., with 5,500 pages of transcript and 500 exhibits; *Timken Roller Bearing Co.*, with 3,300 pages of transcript and 350 exhibits; *Foremost Dairies*, with 5,500 pages of transcript and 1,500 exhibits; and *Central Retailer-Owned Groceries*, with 3,000 pages of transcript, 350 exhibits, and 30 parties challenging the Commission's actions.

On January 1, 1963, 54 cases were pending. This drop from the July 1 total is only temporary, occurring almost every year at the same time (because of the courts' disposition of cases in their fall terms, and the seasonal decline in the filing of new cases), and its small size indicates that the general upward trend of the total is continuing.

1. The long-established steady increase in the number of cases processed by the Commission, together with recent increases in the investigational and trial staffs, which forecast further increases in the amount of litigation before the Commission. Since a fairly constant proportion of respondents in routine cases seek appellate review of adverse decisions, their increase is followed by a proportionate increase in the Division's appellate work.

2. The Commssion's increased use of compulsory processes to obtain information, and its emphasis upon their enforcement. In the last 6 months the volume of such work has been more than enough to occupy the full time of five Division attorneys, as well as approximately one-quarter of the time of the Chief of the Division.

3. The steadily increasing number of injunction and declaratory judgment suits brought against the Commission in U.S. district courts, collaterally attacking its interlocutory actions in investigations and formal proceedings. In the past 6 months the Division has had to devote the equivalent of the full time of two attorneys to defend against such attacks.

4. The large number of "big cases" expected to be undergoing court review during fiscal 1964. These cases are distinguished by voluminous records, complex and vigorously disputed legal and factual issues, masses of economic data, conflicting expert opinions, novel questions of law, and great financial importance to the respondents. It is the Division's experience and it is naturally to be expected that, because of the last-mentioned factor, almost every respondent will exhaust appellate review of any adverse decision, no litigation expense will be spared, and review will entail intensive study and reanalysis of the entire record and reargument of every factual conclusion and legal proposition.

While it is not possible to be sure which or what proportion of such cases now before the Commission will be decided against the respondents and appealed to the courts, Division experience indicates that it will be at least 75 percent. Following is a list of "big cases" now before the Commission which the Divison expects to have its appellate docket during fiscal 1964, in addition to its routine work and the carryover of some of the "big cases" listed above. It gives, for each case, the approximate date when the Division anticipates final decision by the Commission will be rendered, the size of the record, and an estimate of the amount of work (stated in man-years) which will be required by attorneys in the Division. Similarly derived estimates made in the past have proved to be conservative.

Mr. THOMAS (reading):

The total increase of $50,000 for the General Counsel will provide $13,000 for two additional employees.

What are they, 12's or 13's?

$5,000 for required staff promotions, $31,000 for increased pay costs in 1964, and $1,000 for additional travel.

PROFESSIONAL STAFF PROMOTIONS

Does not the new Pay Act do a pretty good job on annual promotions?

Mr. DIXON. The only thing it covers is in-grade promotions.

Mr. THOMAS. What is this for?

Mr. DIXON. This is for grade change promotions.

Mr. THOMAS. How much trouble do you have with the Civil Service Commission on that?

KANSAS STATE HISTORICAL SOCIETY LIBRARY OCT 7 1963 TOPEKA, KANSAS

Mr. DIXON. I have none. If a man warrants it and he is doing the work above carrying his responsibility, I have no hesitancy in raising him.

Mr. THOMAS. And the Commission lets you be the judge?

Mr. DIXON. That is correct, sir. This is my obligation. The law makes me the judge, not the Commission. This is the Reorganization Act that Congressman Evins has spoken about, Reorganization Plan No. 8 augmented by Reorganization Plan No. 4.

Mr. THOMAS. That does not apply to other agencies of Government; does it?

Mr. DIXON. No; it applies only to the Federal Trade Commission.

CIVIL SERVICE AUDIT OF PROMOTIONS

Mr. THOMAS. The Civil Service Commission has a Compliance Division. They see if the work he is doing represents actually an increase in duties, and so forth?

Mr. DIXON. They audit us.

Mr. THOMAS. Do they audit you?

Mr. DIXON. They certainly do.

Mr. THOMAS. If it is a matter of right with the Commission, why do they audit?

Mr. DIXON. If I promote a man to grade 13, to see that he is doing grade 13 work and not grade 12 work or grade 7 work. When you go to dealing with a group of attorneys, as you well know, a case is a case, but one case may have more responsibility in it than a dozen other cases. We are having to demand of these young attorneys that they carry a tremendous responsibility. As they come in as young men, I cannot hire them but at a low grade. As fast as they can take this responsibility, I will recognize it. This is the only tool I have, gentlemen, to keep these young men there.

APPELLATE BRIEFS AND REPORTS

Mr. THOMAS (reading):

On January 1, 1963, 54 cases were pending.

At the beginning of fiscal 1963 the workload included 58 pending court cases, an increase of 11 over the previous year. These included 7 in the Supreme Court, 46 in courts of appeals, and 5 in district courts. There were 4 merger, 21 other antimonopoly, and 18 deceptive-practice appellate review cases, 6 subpena-enforcement, 8 injunction and miscellaneous suits, and 1 criminal contempt proceeding. They included *Pillsbury Mills*, with 31,000 pages of transcript and 1,000 exhibits.

Mr. GLENDENING. That is part of the $100,000.

Mr. THOMAS. Do you think the judges read that?

Mr. DIXON. That may cost us about $50,000 to print our part of the record. That is one of those figures that we have to come through with.

Mr. HENDERSON. Our brief alone will cost about $6,500 to print.

Mr. THOMAS. Who is going to read it?

Mr. GLENDENING. Eventually, the Supreme Court.

Mr. DIXON. It is being prepared first for the appellate court, then the Supreme Court. They will read it, sir, if they decide the case. This is the reason it takes them so long to decide one. But these are not simple matters, I assure you.

Mr. THOMAS. You do not think any court is going to read a 31,000-page brief?

Mr. GLENDENING. That is the transcript, Mr. Chairman.

Mr. THOMAS. This is the transcript?

Mr. DIXON. This is the transcript. If anything in these briefs is being relied upon, the record that supports it must be printed and delivered.

Mr. THOMAS. "*Timken Roller Bearing Co.*, with 3,300 pages of transcript." What did you say it cost to get this transcript in shape?

Mr. GLENDENING. We are estimating the cost of printing on *Pillsbury* to be approximately $50,000. The brief alone is over 400 pages, and it will cost $6,500 to print. We got the estimate on that a couple of days ago from the Government Printing Office.

Mr. THOMAS. What did it cost for shorthand reporters to transcribe it?

Mr. GLENDENING. Plenty.

Mr. DIXON. If you want a good rule of thumb, it took the Federal Trade Commission 12 years' time finally to resolve the *Cement* case. I have heard the figure bandied about, $5 million to defend it.

Mr. THOMAS. What does it cost you a page for transcript now?

Mr. DIXON. What is that contract now, the last one?

Mr. GLENDENING. We get regular open hearings free, but for private or investigational hearings it costs us a minimum of 95 cents a page.

Mr. DIXON. What does it cost the respondent to buy it?

Mr. GLENDENING. The same thing.

Mr. DIXON. They do not get anything free. They have to buy it.

Mr. THOMAS. Is that double- or triple-spaced?

Mr. GLENDENING. As to the stated number of lines there are 25 lines to the page.

Mr. THOMAS. Double spaced, then.

Mr. GLENDENING. I think that is standard.

Mr. THOMAS. 95 cents a page.

Mr. JONAS. Why does the Government have to pay for the transcript? Is it because it loses the case below?

Mr. DIXON. If we lose the case?

Mr. GLENDENING. We have to have a record.

Mr. JONAS. The appellant has to prepare the record. If the Government appeals, it must have lost the case below.

Mr. DIXON. The law requires us to certify the record.

Mr. GLENDENING. We have to pay for the transcript the same as the respondent does. They buy the transcript, and so do we.

Mr. DIXON. He is talking about in court, why we have to pay for it.

Mr. GLENDENING. That is our portion of it.

Mr. JONAS. $100,000?

Mr. GLENDENING. Probably more.

Mr. THOMAS. What does the law say? Can you give Mr. Jonas a specific answer? Does the appellant have to pay the cost of the transcript, or is it equally divided by statute?

Mr. HENDERSON. It is divided, Mr. Chairman, sometimes by negotiation. Any part that we send up we have to pay for, unless there is some negotiation. In some of these cases they will pay for 70 percent and the Government pays 30 percent.

Mr. THOMAS. Regardless of who loses?

Mr. HENDERSON. Yes, sir.

Mr. DIXON. We have to maintain our position in the court, Mr. Congressman.

Mr. JONAS. I know, but tell me who lost the *Pillsbury* case—you or the Pillsbury people?

Mr. DIXON. They did.

Mr. JONAS. Who appealed?

Mr. DIXON. They are the appellants.

Mr. JONAS. It appears to me they would have to pay for making up the transcript.

Mr. DIXON. Their portion. They would not pay for that portion of the record they are not relying upon. We must pay for that part we are relying upon and negotiate the part that we both rely upon. That is one way to put it.

EMPLOYMENT IN OFFICE OF GENERAL COUNSEL

Mr. THOMAS. Mr. Reporter, put page 41 in the record.

(The page referred to follows:)

Office of the General Counsel, personnel as of Dec. 31, 1962

	Total	Attorneys	Other professionals	Stenographer and clerical
Professional:				
GS-17	1	1		
GS-16	3	3		
GS-15	16	16		
GS-14	1	1		
GS-13	3	3		
GS-12	2	1	1	
GS-11	1	1		
GS-9	3	2	1	
Stenographic, clerical, etc	22			22
Total	52	28	2	22

NOTE.—Total annual salaries, $526,900.

Mr. THOMAS. Breakdown of the personnel in the Office of General Counsel—1 GS–17, 3 GS–16, 16 GS–15, 1 GS–14. Are these all lawyers?

Mr. DIXON. Yes, sir.

Mr. THOMAS. Where is the clerical help?

Mr. DIXON. The bottom line.

Mr. THOMAS. Total attorneys, 28. If there are 28 attorneys, where are the rest of them? Adding 22 stenographic and clerical and 2 other professional, that is exactly right.

Judge Henderson, all I can say, after listening to all this interesting talk, if you can keep up with all of this with 28 lawyers, you are doing a good job. So you work on the Commission and the Chairman.

Mr. DIXON. And I will work on you.

Mr. HENDERSON. I might say, Mr. Chairman, the chief attorney on the Pillsbury case has put in nearly a thousand hours of overtime this year on that case alone.

Mr. THOMAS. He is a devoted and dedicated public servant. We need more like him.

Hearing Examiners

Let us take a look at the hearing examiners. You have how many?

Mr. Glendening. 22 hearing examiners. This appears on page 44.

Mr. Thomas. Put pages 42 and 43 in the record.

(The pages referred to follow:)

Hearing examiners

	Allotment, fiscal year 1963		Requested, fiscal year 1964		Increase, fiscal year 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
Personal services	39	$431,000	39	$450,000	------	$19,000
Travel	------	35,000	------	43,000	------	8,000
Total	39	466,000	39	493,000	------	27,000

The hearing examiners staff presently consists of 22 hearing examiners. The acceleration of trials provided for by the Commission's rules of practice will result in the assignment of a smaller number of cases to each hearing examiner so that he can hold consecutive hearings and continue to final disposition of the cases.

The requested additions to the investigational and trial staff will produce more litigated cases for immediate disposition. This can be done as there are a sufficient number of hearing examiners available to proceed to completion with these cases as they are instituted.

No increase in staff is requested in fiscal year 1964. However, an additional $27,000 is requested to provide $19,000 for increased pay costs and $8,000 for travel funds, $7,000 of which is a restoration of the 1963 reduction in travel funds required by absorption of 1963 pay raise costs.

Mr. Thomas (reading):

The hearing examiners staff presently consists of 22 hearing examiners. The acceleration of trials provided for by the Commission's rules of practice will result in the assignment of a smaller number of cases to each hearing examiner so that he can hold consecutive hearings and continue to final disposition of the cases.

How does the reorganization plan help out your 22 trial examiners?

No increase in staff is requested in fiscal year 1964. However, an additional $27,000 is requested to provide $19,000 for increased pay costs and $8,000 for travel funds, $7,000 of which is a restoration of the 1963 reduction in travel funds required by absorption of 1963 pay raise costs.

Mr. Dixon. They are grade 15's. Mr. Chairman, some supergrades have been made available through Civil Service. I have been to several meetings on it, and there is a great deal of exploration going as to whether they can at least begin to pay these people one of the higher supergrades.

Workload of Hearing Examiners

Mr. Thomas. How many cases did your 22 hearing examiners handle last year? I do not find it in the justifications. It could be in here someplace. I will not say what is in here and what is not.

Mr. Dixon. I will send it up to you.

Mr. Thomas. Tell us now. Who has that information?

Mr. Dixon. Our Chief of Examiners is not here, and there is no one here for him.

Mr. GLENDENING. There were 51 cases, 51 orders to cease and desist, issued last year by reason of litigation. They would have handled every one of those plus a number that had not cleared the Commission at that point.

Mr. DIXON. Their total docket——

Mr. THOMAS. Let us not take the total docket. Let us have what they actually turned out.

Mr. DIXON. That chart reflects the present fiscal year on page 13.

Mr. THOMAS. Orders to cease and desist.

Mr. DIXON. We had 407 total orders to cease and desist, of which 51 were contested. They were handled by our hearing examiners.

Mr. THOMAS. What else did they handle besides these 51?

Mr. DIXON. They handled nothing else.

Mr. GOTSCHALL. They handled a lot of consent orders in that year.

Mr. JONAS. You had 22 hearing examiners who handled 51 contested cases. How many did you have who handled 58 contested cases in 1960?

Mr. DIXON. In 1960, sir, we had about 15.

Mr. JONAS. How do you account for the fact that 15 could handle more than 22?

Mr. DIXON. I can account for it by two things. They are still working some of the other type cases under the old rules, but they are getting to our new procedure. I can say that what we are doing is leaving to the hearing examiners the much more difficult case. He is spending more and more of his time on the big case. This is what we have aimed for, to get him out of the area where he had to be troubled with anything that we could settle another way.

Mr. JONAS. That is other language, but it is not borne out by the chart. The chart shows 15 examiners handled more contested cases in 1960 than the increased number handled in 1962.

Mr. THOMAS. Look over in another bureau, you will find the same thing. What is the average length of time that one of these contested cases required?

Mr. JONAS. Give us a breakdown of that, Mr. Chairman.

Mr. THOMAS. Maybe the Chief Counsel can shed some light on that.

Mr. HENDERSON. I am sorry, I cannot. I would like to ask the Commission's permission to leave. I have to be in court tomorrow morning in Jackson, Miss., and in New Orleans the following morning.

(Off the record.)

Mr. DIXON. You are asking something that we have not clarified in here. I have here a paper which came from the hearing examiners. I shall try to determine what happened in this year, but let me give you the current figures. The cases on hand as of July 1, 1962, before the hearing examiner were 159. The cases received from July 1962 to December 31, 1962, were 32. The cases reopened or remanded between July and December 31, 1962; 8. The total cases handled for that 6-month period were 199.

As to the disposition: Initial decision issued between July 1962 and December 31, 1962, were 61.

I am looking 6 months back.

Mr. JONAS. You had better dig up some information which will show how much time these examiners put on each one of these cases or we are likely to cut you off to about 7 or 8 hearing examiners, because it looks as if when you had 15 you were turning out more work.

(The following workload statistics for fiscal year 1962 were subsequently furnished:)

Hearing examiners staff, workload, July 1, 1961 to June 30, 1962

Cases received	Deceptive practices	Restraint of trade	Textiles and furs	Total
Cases on hand July 1, 1961	130	203	47	380
Cases received from July 1961 to June 30, 1962	31	29	16	76
Cases reopened or remanded July 1961 to June 30, 1962	4	12	1	17
Cases returned from Consent Agreement Division for trial from July 1961 to June 30, 1962	7	6	2	15
Total cases handled from July 1961 to June 30, 1962	172	250	66	488
Dispositions:				
Initial decisions issued July 1961 to June 30, 1962	95	104	51	250
Cases submitted to Consent Agreement Division from July 1961 to June 30, 1962	26	32	6	64
Cases placed on Commission's calendar	4	2	0	6
Commission's remand order vacated and cases returned to Commission for reargument, January 1962	0	9	0	9
Total disposition from July 1961 to June 30, 1962	125	147	57	329
Total cases on hand June 30, 1962	47	103	9	159

LAG IN EXAMINATION WORKFLOW

Mr. THOMAS. The reorganization accounted for the lag.

Mr. DIXON. I think the main thing for me to say to you is that I take the responsibility for any lag in here, sir, because it was the reorganization that slowed down the flow coming toward the hearing examiners. It is there now. In the past 6 months they have turned out 61, and on February 15 these 278 complaints that we have issued, if everyone says no to us, there are 248 additional cases going to the hearing examiners.

CLASSIFICATION AND SALARIES OF HEARING EXAMINERS

Mr. THOMAS. Put page 44 in the record. The examiners are all 15's and there are 17 stenographic and clerical.

(The page referred to follows:)

Hearing examiners, personnel as of December 31, 1962

	Total	Attorneys	Clerical
Professional: GS-15	22	22	
Stenographic, clerical, etc	17		17
Totals	39	22	17

Note.—Total Annual salaries, $447,840.

Bureau of Restraint of Trade

Mr. Thomas. Let us take a look at Restraint of Trade. We always thought that was your top bureau. Put pages 45 through 49 in the record.

(The pages referred to follow:)

Bureau of Restraint of Trade

	Allotment, fiscal year 1963		Requested, fiscal year 1964		Increase, fiscal year 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
Office of the Director	46	$236,000	46	$244,000	----------	$8,000
Division of Mergers	32	320,000	32	340,000	----------	20,000
Division of General Trade Restraints	31	310,000	31	330,000	----------	20,000

Total	202	1,951,000	202	2,081,000	----------	130,000

Bureau of Restraint of Trade

Created by the Federal Trade Commission in accordance with its reorganization plan of July 1, 1961, the Bureau of Restraint of Trade was a consolidation of the previous antimonopoly trial work of the Bureau of Litigation and of the previously existing antimonopoly activities of the Bureau of Investigation.

In addition to its activities in litigation, this Bureau has the responsibility of all preliminary investigational activity in the antimonopoly field which includes general trade restraints under section 5 of the Federal Trade Commission Act and violations of sections 2, 3, 7, and 8 of the Clayton Act. All correspondence relating to these matters and all preliminary applications for complaint are now received and processed by the Bureau of Restraint of Trade. The decisions are made by this Bureau as to the matters which warrant investigation. Several techniques are used by this Bureau in conducting these investigations: (1) In some instances memoranda are forwarded to the Bureau of Field Operations outlining in detail the scope and area of investigations; (2) Members of the staff of the Bureau of Restraint of Trade conduct field investigations for the purpose of interviewing and ascertaining the availability of prospective witnesses and obtaining documentary material; (3) The staff conducts investigations by informal questionnaires and correspondence; (4) The staff conducts investigations by the use of investigational hearings, under the subpena power of section 9 of the Federal Trade Commission Act and the use of special reports under section 6(b) of that act.

Another function of the Bureau is to secure compliance with orders to cease and desist issued by the Commission. This includes passing upon reports of compliance filed initially and later, followup work to assure the continuance of compliance or to initiate penalty proceedings in appropriate instances.

On March 23, 1961, the Attorney General of the United States forwarded to the Commission a list of 56 cases in which decrees had been obtained by the Department of Justice under the Sherman Act. The Commission was requested to conduct appropriate investigations and report compliance with these decrees. These judgments, in most instances, involved multiple corporate defendants of major size. Field investigation has been initiated in most of these cases. Many of these investigations have been completed and recommendations have been forwarded to the Department of Justice in several of these matters.

ANTIMONOPOLY WORKLOAD, FISCAL YEARS 1962–63

The continuing growth of the Commission's antimonopoly work is shown by the increase in the number of applications received by this Bureau. During the fiscal year ended June 30, 1962, 1,451 complaints were received, compared to 1,159 in fiscal year 1961 and 1,042 in fiscal year 1960.

During the fiscal year 1962, pending restraint of trade investigations have increased from 1,484 as of June 30, 1961, to 1,516 as of June 30, 1962. There was an increase of pending restraint of trade investigations even though a substantial increase in the number of completed restraint of trade investigations was effected. As of June 30, 1962, 709 restraint of trade investigations were completed, as compared to 336 on June 30, 1961.

The formal caseload of the Bureau has increased substantially during the past 3 fiscal years as follows:

	6 Months fiscal year 1963	Fiscal year 1962	Fiscal year 1961	Fiscal year 1960
Complaints issued	52	49	121	157
Complaints authorized pending consent settlement	120	185		
Cease and desist orders issued	78	92	103	58
Pending cases or in process of litigation at end of year exclusive of consent settlement cases shown above	150	182	240	224

At the end of fiscal year 1959, there were 128 antimonopoly complaints pending; this number had increased to 240 pending by the end of fiscal year 1961. From the huge backlog at the beginning of fiscal year 1962 the number of cases actually in process of litigation on June 30, 1962, were 49; however, on that date the Commission had authorized and issued 185 additional antimonopoly complaints which were pending consent action and in previous years would have been considered current workload. Completed antimonopoly cases are seldom settled by consent order and most of these cases are now being forwarded to this Bureau for litigation. Therefore if the workload is to be compared with prior year figures it must be considered to be 234 pending cases. The backlog of pending antimonopoly complaints has not been reduced to the level of pending cases 4 years ago, despite an increase of almost 50 percent in the number of cease and desist orders issued in fiscal year 1961 over the number issued in fiscal year 1960 and continuing at about the same rate in fiscal year 1962. With 253 antimonopoly cases terminated by cease and desist orders in the period 1960–62, the Bureau still finds itself in an exteremly critical condition. On the basis of the 1963 6-month figures, it is expected the Bureau will be faced with a continuing increased workload.

The present staff of 110 attorneys has the equivalent of 2 litigated cases per man, and the equivalent of 16 formal investigations per man and this workload is increasing every day. In addition, there is the never-ending flow of complaints and informal investigational matters. On the basis of the above caseload per man, this is double the caseload which would adequately provide for reasonably expeditious handling.

During the past several years, the never-ending and ever-increasing applications for complaint and the lack of manpower to handle the flow of potential cases have resulted in high selectivity of investigation. Not only does this process result in more complex cases, but also those involving corporations of great financial strength, with capability to resist investigation and litigation, without regard to cost and manpower. In addition, the Commission's new rules provide for complete investigations prior to issuance of complaints, and for the hearings to proceed continuously until concluded. At the same time, these men must be available for completion of hearings, and preparation of findings in those cases being handled under the previous rules.

The increase of $105,000 for personal services in 1964 will provide no additional employees in the Bureau but will provide only $35,000 for necessary promotions of the professional staff and $70,000 for increased pay costs.

It is clear that this Bureau is still faced with a 2-year backlog of litigated cases despite a substantial drop in the cases pending or in process of litigation

as stated above in fiscal year 1962. When the number of pending antimonopoly investigations is considered, the Bureau is faced with at least a 4-year backlog.

On June 30, 1962, 72.5 percent of the pending cases in litigation were less than 2 years old, compared to 73 percent as of June 30, 1961; on June 30, 1962, 26.7 percent of the pending cases were 2 to 6 years old, as compared to 23 percent on June 30, 1961.

The $25,000 increase for travel only restores the travel funds originally allocated in 1963 but reduced by the required absorption of the 1963 pay raise cost.

TABLE A.—*Antimonopoly investigations: statistics, fiscal years 1960, 1961, 1962*

	1962	1961	1960
Pending, beginning of year	1,484	931	449
Initiated and reopened during the year	741	884	753
Completed during year, total [1]	712	331	271
Complaints issued	49	121	157
Complaints authorized pending consent settlement	185		
Closed	478	233	143
Pending, close of year	1,516	1,484	931

WORKLOAD—RESTRAINT OF TRADE

Mr. THOMAS. Mr. Jonas, will you be good enough to turn to page 47, and you and the chairman get into agreement on this. Complaints issued, 6 months fiscal year 1963, 52. I cannot tell whether that is 6 months of fiscal year 1962 or not, but the figure is 49.

Mr. GLENDENING. Full year.

Mr. THOMAS. Fiscal 1961 was 121. That was before the reorganization, was it not? And fiscal year 1960 was 157.

Mr. DIXON. I can answer that one.

Mr. THOMAS. Answer it, then, before we take up the other.

Mr. DIXON. In 1960 and 1961 those complaints were issued that were the result of the net that was dropped on the citrus industry, the 2(c) cases. They were turned out in great quantities. If we wanted to play quantities again, I could have you 500, but I would rather——

Mr. THOMAS. You mean you did something besides that in 1961 and 1960, did you not?

Mr. DIXON. The great mass of them were in there, the great numbers.

Mr. THOMAS. Complaints authorized pending consent settlement, in 1963, 120; 1962, 185; blank for 1961 and 1960. Do we infer from that it was around 200, or what?

Mr. DIXON. The other part of the explanation that you were asking is that all of the cases went there, including consents. After 1961, all of the consents do not go there. So, if you took 185 plus 49, you would have had 234 cases as against 121 in 1962. If you were to take 1962 to explain why we were short over here in 1962 as against 1961, you would have had to add the consent cases to it as a new procedure. All of our consent cases do not go to complaint. Now we serve a complaint.

Mr. THOMAS. You break them down, contested and noncontested.

Mr. DIXON. That is true. The true figures would make us add the two figures together to give you the figure.

Mr. THOMAS. Forty-nine and eighty-five.

Mr. DIXON. And 52 and 120. To compare those years across, that is what you would have to do. The same result, sir.

Mr. THOMAS. Cases pending or in process of litigation at end of year, exclusive of consent settlement cases shown above, 150 in 1963, 182 in 1962, 240 in 1961, 224 in 1960. You were nursing the cases back in 1960 and 1961?

Mr. DIXON. No, sir. We were working on that backlog when I came there, cases 6 and 8 years old. This is the lag you were talking about. They are whittling into that lag. You can see they are.

Mr. JONAS. I do not follow that. You mean they are whittling into it in reverse.

Mr. MILES. Whittled down from 240 in 1961 to 150 in the first 6 months of 1963.

Mr. THOMAS. Let us see if the narrative sheds any light on it.

Mr. THOMAS (reading):

> At the end of fiscal year 1959, there were 128 antimonopoly complaints pending; this number had increased to 240 pending by the end of fiscal year 1961. From the huge backlog at the beginning of fiscal year 1962 the number of cases actually in process of litigation on June 30, 1962, were 49 * * *.

We are not cutting down that backlog very fast, are we?

> * * * however, on that date the Commission had authorized and issued 185 additional antimonopoly complaints which were pending consent action and in previous years would have been considered current workload. Completed antimonopoly cases are seldom settled by consent order * * *. With 253 antimonopoly cases terminated by cease-and-desist orders in the period 1960–62, the Bureau still finds itself is an extremely critical condition. On the basis of the 1963 6-month figures, it is expected the Bureau will be faced with a continuing increased workload.

How many are you going to carry over this year? How many will you complete?

Mr. DIXON. That is a tough question to answer.

Mr. THOMAS. You cannot come up with an accurate figure on that.

Mr. JONAS. You did not read one sentence. You stopped one sentence too early. Let me read the next one.

Mr. THOMAS. Go ahead.

Mr. JONAS (reading):

> Therefore, if the workload is to be compared with prior year figures it must be considered to be 234 pending cases—

instead of 150.

So, your comment does not seem to be in order that you cut down the backlog of pending cases.

Mr. MILES. We are hoping, though, Congressman, that that 185 will be settled and will not go down to litigation.

Mr. THOMAS (reading):

> The backlog of pending antimonopoly complaints has not been reduced to the level of pending cases 4 years ago * * *.

What about that reorganization? In other words, as far as work turned out, you are in worse shape now than you were 4 years ago.

EFFECT OF CONSENT ORDER PROCEDURE

Mr. DIXON. We have issued more cases, sir. The thing that we have you confused on is our change in procedure. Formerly when we came to the complaint stage, it was very simple to have a comparative figure. We just served a complaint and went to the hearing examiner and he took care of the consent or trial. Then we whittled that consent trial out of him and we put it over in a separate group. We hoped to get those settled by consent. If they are not settled by consent, then the formal complaint is issued and it goes to trial.

At the same time, Congressman Jonas, we directed the staff not to single shot, not to sue one man in an industry that is doing the same thing as the industry. So, this of necessity made him hesitate to look again and build. As they built, what is in front of us is a whole group of things which, if not settled, must go to trial—for instance, the 248 wearing apparel cases.

RESTRAINT OF TRADE INCREASES REQUESTED OF BUDGET BUREAU

Mr. EVINS. Mr. Chairman, this is one of your very important bureaus. You have 202 positions and you are asking for 202; you are not asking for an increase?

Mr. DIXON. That is correct. No increase.

Mr. EVINS. How much did you ask the Bureau of the Budget for?

Mr. DIXON. $1.5 million.

Mr. EVINS For this function?

Mr. DIXON. Yes.

Mr. EVINS. And how many additional personnel did you assign to this Bureau?

Mr. GLENDENING. Ninety-six.

BUREAU OF DECEPTIVE PRACTICES

Mr. EVINS. Let us turn to the Bureau of Deceptive Practices. Place pages 65 to 75 in the record.

(The pages referred to follow:)

Bureau of Deceptive Practices

	Allotment, fiscal year 1963		Requested, fiscal year 1964		Increase, fiscal year 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
Office of the Director	33	$183,000	35	$201,000	2	$18,000
Division of Food and Drug Advertising	29	272,000	32	309,000	3	37,000
Division of General Advertising	21	222,000	22	246,000	1	24,000
Division of General Practices	16	155,000	17	174,000	1	19,000
Division of Compliance	13	146,000	14	163,000	1	17,000
Division of Scientific Opinions	12	148,000	13	169,000	1	21,000
Total, personal services	124	1,126,000	133	1,262,000	9	136,000
Travel		34,000		52,000		18,000
Other expenses		89,500		93,500		4,000
Total	124	1,249,500	133	1,407,500	9	158,000

BUREAU OF DECEPTIVE PRACTICES

The Bureau of Deceptive Practices performs the investigative, prosecutive, and compliance functions involved in the enforcement of sections 5 and 12 of the Federal Trade Commission Act, to prevent false advertising, misbranding, and other unfair methods of competition and unfair or deceptive acts or practices. The Bureau's general responsibility to prevent deceptive practices extends to all commercial activities which cross State lines, with few exceptions, and the Bureau has specific responsibility to prevent false advertising of food, drugs, therapeutic devices, and cosmetics. The Bureau also monitors radio, television, and printed advertising.

The Bureau consists of the Office of the Director and five divisions: Division of Food and Drug Advertising, Division of General Advertising, Division of General Practices, Division of Scientific Opinions, and Division of Compliance.

The Bureau's work arises mainly from letters of complaint from members of the public who feel they have been deceived, or businessmen who are aggrieved by practices of their competitors. Many such matters originate through correspondence from Members of Congress, congressional committees, better business bureaus, trade associations, or other governmental agencies. Much of the Bureau's work arises from advertisements observed and set aside as questionable in the Bureau's continuing scrutiny of radio, television, and printed advertising.

The steadily mounting backlog of cases and the increasing demands upon the Bureau for additional work requires an increase in manpower. In order to provide prompt and effective law enforcement and increased consumer protection this Bureau requests an increase of $61,000 to provide nine additional employees in fiscal 1964, $15,000 for necessary promotions of the present staff, and $60,000 for increased pay costs. Additional costs of travel and other expenses will amount to $22,000 making a total Bureau request of $158,000.

OFFICE OF THE DIRECTOR

Increases requested 1964

To provide stenographic and clerical service for the staff attorneys, an increase of two GS–4 clerk-stenographers at a cost of $8,000 and $10,000 for increased pay costs.

INVESTIGATION AND LITIGATION

The investigation and trial work of the Bureau before hearing examiners and the Commission is carried on by three divisions of the Bureau: that is, the Division of Food and Drug Advertising, the Division of General Advertising, and the Division of General Practices. The Division of Food and Drug Advertising handles matters involving food, drugs, devices, cosmetics, economic poisons,

products affecting the public health, and matters involving radio and television advertising; the Division of General Advertising handles matters involving all products advertised or sold in commerce, excepting food, drugs, etc., as mentioned above; and the Division of General Practices handles matters involving alleged deceptive labeling, misrepresentation by house-to-house salesmen, lotteries, and all other deceptive business practices.

New matters appearing to warrant investigation are reviewed by an attorney in one of these divisions, to determine initially whether the requisite elements of jurisdiction, public interest, and probably deception seem to be present. Investigation if decided upon may be conducted by ordinary correspondence, or by demand for a corporation to file special report under section 6(b) of the Federal Trade Commission Act, or by referral to the Bureau of Feld Operations with request for field investigation. The Bureau attorney may, as a result of the investigation, recommend that the file be closed, that an informal assurance of discontinuance be accepted in disposition of the matter, or that formal order to cease and desist be sought. The same attorney is responsible for a matter from its inception until final disposition. A matter may at any stage be referred to the Bureau of Industry Guidance when it appears that the procedures of that Bureau would be appropriate and efficacious.

If issuance of complaint is decided upon, the attorney participates in consent settlement negotiations or pretrial conferences, and engages in trial work to present evidence, proposed findings, briefs, and arguments in support of the complaint before a hearing examiner or the Commission.

Attorneys of the Division of Food and Drug Advertising may perform courtwork in obtaining injunctions to prevent dissemination of false advertisements of food, drugs, devices, and cosmetics under section 13 of the Federal Trade Commission Act, and these attorneys prepare such cases for certification to the Attorney General of the United States for criminal prosecution under section 14 when warranted. All of the investigating and trial attorneys may appear in court to seek enforcement of subpenas.

Deceptive practice applications for complaint received during fiscal year 1962 numbered 5,519 representing a 48 percent increase over the 3,727 received during the previous year, and an increase of 55 percent when compared with the average of 3,557 received during the preceding 5 years. This increase is believed to reflect a growing public awareness of the service which the Commission is prepared to render in the important area of promoting nondeceptive competition.

The Bureau initiated 897 investigations during fiscal year 1962, and completed 788. The number completed compares with 896 in fiscal 1961 and 665 in fiscal 1960. A total of 1,183 were pending on June 30, 1962, as compared to 1,035 a year ago.

The investigations completed in fiscal 1962 included 92 in which complaints issued, plus 40 in which complaints had been approved by the Commission but were pending consent settlement negotiations at the year end. A total of 278 other investigations were disposed of during the year on the basis of informal assurances that questioned practices had been discontinued without intent to resume. Twenty-three of those assurances were in the form of stipulations to cease and desist.

A number of the investigations were referred to the Bureau of Industry Guidance for use in the drafting or administration of rules or guides designed to prevent deceptive practices on a voluntary and industrywide basis. The investigations thus referred included matters of possible deception in regard to manufacturer list prices, foreign origin disclosures, labeling of furniture, and advertising of room air conditioners. The Bureau during the year cooperated with the Bureau of Industry Guidance in the drafting of rules and guides, and aided in the rendering of advisory opinions by that Bureau.

Of the 897 investigations instituted during the year, 204 involved allegedly deceptive advertising of food, drugs, cosmetics, or therapeutic devices in violation of section 12. The remainder were under section 5.

The Berlin crisis and other international disturbances provided the launching pad for the use of "scare" tactics and other methods of false and deceptive advertising to promote the sale of fallout shelters, shelter equipment, and radiation protection devices. Numerous complaints were received as a result of a wide and intensive, although short-lived, advertising program promoting the sale of fallout shelters. As a result of investigations in this field, most of these matters have been settled on an informal basis.

A project involving more than 200 vendors of antibiotics used in the treatment of mastitis in cattle has been concluded. This Bureau's goal, successfully attained, was to obtain informal assurances that advertising for such products would contain warning of possible milk contamination following their use.

Another significant investigation involved the use of an arrangement whereby purchasers of groceries at supermarkets would be given credit in the nature of a bonus or dividend toward the purchase of appliances. It appeared that in some instances the price of the groceries may have been increased to compensate for the value of the bonus appliance, and in other instances the usual or customary price of the appliance may have misrepresented. This method of merchandising was having serious economic impact in several sections of the country, with many imitators threatening to adopt it. The investigation was brought to prompt conclusion, in less than 6 months' time, on the basis of voluntary assurances that the questioned practices had been discontinued.

Of the 132 formal complaints which were issued or approved in deceptive practice cases during fiscal year 1962, 58 were accompanied by simultaneously issued consent orders, pursuant to procedures adopted in July 1962, requiring respondents to cease and desist from use of the acts and practices charged in the complaints to be deceptive. The entry of such an order does not constitute a finding or an admission that respondents have violated the law. Orders in this type of case prohibited the use of such unlawful practices as—

Advertising of a drug preparation as a cure for rheumatism, arthritis, insomnia, constipation, or blindness;

Advertising of vitamin or mineral preparations for tiredness, poor appetite, or weakened resistance without disclosing that most persons who experience such symptoms will not derive benefit from the use of such a preparation;

False advertising as to efficacy of a bed-wetting preventive;

False advertising as to health benefits of children's shoes;

False advertising of tests purporting to show superiority of Crest toothpaste in preventing tooth decay;

Bait advertising and deceptive quality, price and guarantee claims in selling storm windows, house paint, floor tile, and other home improvement products;

False claims as to safety, and failure to disclose potential danger to health of users, in selling plastic metal menders and toys;

Misrepresentation of correspondence courses and vending machines, through false claims of employment and of earnings;

Misrepresentation of the durability of burial vaults;

Misrepresentation of the leather content of shoes, wallets, and briefcases;

Misrepresentation of the savings to be achieved through purchase of food-freezer plans;

Misrepresenting the country of origin and fictitious pricing of perfume;

Deceptive pricing of clothing, electrical appliances, housewares, auto seat covers, and other merchandise;

Misrepresentation of vendor as owner or operator of a "mill" or manufacturing plant:

Deceptive use of term "guaranteed" usually in conjunction with other charges (numerous cases);

Misrepresenting size and usual price of sleeping bags;

Selling previously used lubricating oil or auto parts without disclosing the used or secondhand character thereof.

Formal complaints which were issued during fiscal 1962 in contested cases included such charges as misleading use of term "wholesale" or "wholesale prices" by mail-order houses; misrepresentation of advertiser's own usual price or usual price of goods in the advertiser's trade area; misrepresenting or deceptively concealing the country of origin of merchandise; misrepresenting vendor as manufacturer of product; misrepresenting the usefulness of legal forms in a "do-it-yourself" will kit sold by mail; use of deceptive advertising and threats of legal action against children to sell Cloverine Salve; use of bait advertising and deceptive price, quality, and guarantee claims to sell storm windows, paint, awnings, and other home improvement products; use of deceptive packaging to misrepresent the size of wrapping paper; false advertising as to optical properties of sunglass lenses; and false advertising as to efficacy of a treatment for ingrown toenails.

Cease-and-desist orders were issued during fiscal 1962 in 213 cases as a result of work by attorneys of the Bureau of Deceptive Practices. This included 176 cases under section 5 or 12 of the Federal Trade Commission Act (137 under sec. 5, and 39 under sec. 12), and 37 wool, fur, or textile cases which were pending with this Bureau's attorneys at the time of the reorganization on July 1, 1962. As previously indicated, 58 of the section 5 or 12 orders were under the simultaneous complaint-and-order procedure adopted in July 1962. The Bureau's attorneys also completed supplemental litigation in 20 cases during fiscal 1962, involving matters such as petitions for modification of cease-and-desist orders.

Consent orders obtained during fiscal 1962 under procedures which were applicable to cases pending on July 1, 1962, and orders obtained during the year in contested cases, included the following:

Richardson-Merrell, Inc., formerly known as Vick Chemical Co., consented to an order prohibiting claims that the product designated "Vicks Double-Buffered Cold Tablets" will cure a common cold or shorten its duration.

Zenith Laboratories, Inc., consented to an order prohibiting use of the term "quality control" and misdescription of its laboratory facilities and procedures, in advertising drugs.

False claims respecting savings to be realized through purchase of drugs by mail were prohibited in consent orders accepted from National Drug Plan, Inc., and from Nutri-Health, Inc.

Claims that a drug preparation will cure alcoholism were prohibited in consent order accepted from Soberin Aids Co.

Claim of sedatives being harmless and safe to take were prohibited by consent orders accepted from Thompson Medical Co., Inc., and from Sedaquil, Inc.

Murray Space Shoe Corp., was prohibited from claiming that its shoes will correct, prevent, or relieve arthritis, high blood pressure, indigestion, or stomach ulcers.

Preticketing and other fictitious pricing of merchandise was prohibited by order issued against Rayex Corp., and against George's Radio & Television Co., Inc.

Use of term "Milan," implying Italian manufacture, was prohibited respecting hats made in Japan, by order against Korber Hats, Inc.

Use of deceptive television demonstrations as to the performance of shaving creams was prohibited by orders issued against Colgate-Palmolive Co. and its advertising agency, and against Carter Products, Inc., and its advertising agency.

An order entered against Bakers Franchise Corp., prohibits use of misleading statements to designate the caloric content or weight-reducing properties of bread.

Order against Damar Products, Inc., prohibits claims that a vibratory massage device will be of benefit to effect weight reduction.

Bait advertising and other deceptive practices in the sale of houses and home improvements were prohibited by orders entered against Lifetime, Inc., Pati-Port, Inc., Luxury Industries, Inc., Celtic Construction Co., Inc., and Crawford Industries, Inc.

Misrepresentation of imported clocks as having been made by the old and well-known Waltham Watch Co., of Waltham, Mass., was prohibited by order against Waltham Watch Co., of Chicago.

Work program, fiscal 1964

The 1,183 deceptive practice investigations pending on June 30, 1962, represented an increase of about 15 percent as compared with the 1,030 which were pending a year earlier, or with the 1,035 which were pending 2 years earlier. This growth in the backlog is, we think, attributable to the 50 percent increase in complaint letters received during fiscal 1962, and to the increasing use of industrywide procedures.

Two hundred and thirty-six investigations were more than 2 years old on June 30, 1962, which represents an increase of 45 percent as compared with 163 which were of that age on June 30, 1961. Part of this increase is attributable to the necessary training of new personnel. But mainly it is due to involvement of the available experienced staff on other important matters such as the processing of tremendous numbers of new applications for complaint; the initiating of new investigations, frequently on a multiple-case or industrywide

basis, to meet demands from Congress and the public; and the trial or negotiation for settlement of cases already in litigation. By the year end, substantial progress had been made toward reducing the backlog of investigations over 2 years old. For example, 34 of them were in process of having complaints prepared, 24 were being further investigated through use of section 6(b) orders, and 14 had been referred to the Bureau of Industry Guidance for use in promulgating rules or guides.

The investigations pending on June 30, 1962, included several multiple-case or industrywide projects, as emphasis had been shifted during the year from the individual-case approach to the solving of problems on an industrywide or project basis. The purpose is to effect consistent, simultaneous, and equitable correction of unlawful practices among competing firms when they are engaged in similar unlawful practices, so as to avoid, insofar as practicable, the placing of any individual firm at a competitive disadvantage. In five projects, these investigations are being conducted under the authority of section 6(b) of the Federal Trade Commission Act. The project investigations under section 6(b) involve advertising of cough and cold treatments, reducing devices, analgesics, air-filtering devices, and hemorrhoid treatments. Investigations on an industrywide or project basis were also in progress with regard to possible deception in television demonstrations of toys; practices used in connection with radio and television rating services; survey claims, such as claims that 9 out of 10 doctors recommend a product; questionable therapeutic claims in the advertising of mineral and vitamin preparations; advertising of food-freezer plans; advertising of vegetable oils to reduce cholesterol in the blood; advertisting of products to prevent baldness or grow hair; advertising as to efficacy and safety of insecticides; advertising of fallout shelters and shelter supplies and equipment; advertising of insurance sold by mail; advertising as to health benefits of mattresses; advertising of lots or home sites; advertising of do-it-yourself will kits; possible fictitious pricing and misuse of term "wholesale" by catalog houses; advertising of special subscription prices for magazines; possible deception in labeling plastic metal menders; sale of merchandise through use of gaming devices; possible misrepresentation as to composition of cigars; and possible deceptive practice in charging rental on automobiles.

Other investigations being conducted involved a wide variety of charges and products, such as misrepresentation of correspondence courses, fictitious pricing, use of deceptive guarantees, bait advertising, misrepresentation of home improvement products and seeing previously used goods without disclosing the used or secondhand character thereof.

The backlog of work existing on June 30, 1962, is estimated to constitute more than a year's work for present staff. The increased funds being requested are deemed necessary not only to reduce the backlog of old cases and deal with the press of new matters including treatment of more of the matters on a project basis, but also to reduce substantially the elapsed time between our receipt of a complaint letter and our stopping of the questioned practice, if it is deceptive. Delay in the treatment and disposition of cases is still our main problem. The new rules of practice greatly shorten the time for trial and disposition of a formal action, by requiring that the attorney supporting the complaint be ready to go to trial when he recommends issuance of the complaint. But this only makes more essential the proper development of evidence in an investigation before the matter is presented to the Commission for approval of the draft of complaint. The quick development of that evidence requires careful work and management by an attorney skilled in both the investigational and trial phases of the Commission's deceptive practices work. Recent experience indicates that about two-third of the cases for complaint will be settled by consent orders, and one-third will go to trial, so the attorney preparing a case must be qualified to try it.

It is estimated that about 60 percent of the 1,183 investigations which were pending on June 30, 1962, will result in the issuance of formal complaints or the taking of corrective action by other means, as through acceptance of assurances of discontinuance.

Increased funds are also needed to assure the availability of adequate staff to deal with any matters which warrant seeking of injunctions under section 13 or criminal actions under section 14 in support of formal complaints involving

the advertising of foods, drugs, devices, and cosmetics. A substantial amount of work is required to develop the necessary evidence for presenting and prosecuting such actions before the courts.

Additional staff is needed to make sure that prompt attention is given to matters referred from the Bureau of Industry Guidance involving indicated violations of rules or guides, where voluntary compliance could not be obtained. Failure to take prompt action on such referrals may break down the fabric of compliance throughout an industry.

It is also anticipated that a growing amount of work for attorneys and scientists of the Bureau of Deceptive Practices will be entailed in aiding the Bureau of Industry Guidance to furnish advisory opinions in deceptive practice matters. Additional personnel are needed for this purpose.

The Bureau's responsibility to prevent deceptive practices extends to a tremendous volume of business activity. Total expenditures by business concerns for advertising during the calendar year 1961 were indicated to be nearly $12 billion. According to the most recent data which was published in Advertising Age of August 27, 1962, each of the 100 largest advertisers spends in excess of $6,900,000 per year for advertising, an amount which is more than 6 times greater than the total annual allocation of funds to the Bureau of Deceptive Practices. Of the 100 largest advertisers, only about 14 are subject to regulation of advertising by other Federal agencies. The other 86, including manufacturers of food, drugs, cosmetics, cigarettes, soap, home appliances, automobiles, paper products, floor coverings, gasoline, and tires, are subject to supervision of advertising and other regulation by the Commission. The Bureau's funds must, of course, be used not only for regulation of advertising, but for prevention of deceptive labeling, misrepresentation by house-to-house salesmen, and numerous other forms of deceptive schemes and practices.

MONITORING OF ADVERTISING

One of the functions of the Division of Food and Drug Advertising is to monitor radio and television commercials, newspapers, magazines, and other printed material. In reviewing radio and television scripts, all networks submit commercials disseminated during 1 week of each month and each individual television station submits scripts covering a 24-hour period each 3 months. Individual radio stations are requested to submit scripts covering a broadcast day once, twice, or four times each year, based on coverage of the individual station.

Newspapers are requested according to a schedule permitting a daily sampling typical of those published throughout the Nation, considering geographical location, metropolitan and rural areas and other appropriate factors. Similarly, magazines are obtained on a basis which provides a representative spot checking.

In addition to broadcasting networks, individual stations submit continuities as follows:

Radio stations:	
Group I (4 times yearly)	463
Group II (2 times yearly)	850
Group III (1 time yearly)	3,467
Total radio stations	4,780
Television stations	657

There were reviewed in radio and television advertising the following number of continuities, and in the case of newspapers and magazines, the number of pages:

Radio-television (scripts)	419,265
Newspaper-magazine (pages)	278,741

The monitoring function serves the various bureaus and divisions of the Commission and in some instances, other Government agencies. During the year, approximately 43,880 advertisements were furnished to operating divisions of the Commission. Additionally, 8,828 advertisements for alcoholic beverages were forwarded to the Internal Revenue Service, the Federal agency having primary responsibility for such advertising.

Spot-check monitoring of radio and television commercials disseminated in the Washington and Baltimore areas is maintained. This includes visual monitoring in the case of television commercials. Sound kinescope recordings of television commercials are made when they can be of assistance to the Commission's work.

The quantity and quality of advertising review which can be accomplished is dependent directly on the available staff. Considering the large numbers of letters of complaint which we receive, particularly with regard to television and radio advertising, it appears that our efforts in this area should be intensified. The addition of one advertising examiner is believed necessary for this work.

POSITIONS REQUESTED FOR DECEPTIVE PRACTICES

Mr. EVINS. You have 124 employees against 133 requested, an increase of 9. Who is the Chief of this Bureau?

Mr. DIXON. Mr. Murphy.

Mr. EVINS. Mr. Murphy, why do you need these nine additional employees?

Mr. GOTSCHALL. Mr. Murphy is not here, his wife is ill. He asked me to speak for him. We need these additional personnel to enable us to give prompter action. We have a lot of authority now to protect the consumers and businessmen from these deceptive practices but we need to give them more prompt attention. In the medical area we have these health claims and many products are being advertised in many cases to get you to take a proprietary pill when you might have a serious illness.

Mr. THOMAS. We will not practice medicine over there, will we?

Mr. GOTSCHALL. No, but we want to keep these people from advertising they can cure you of serious illnesses.

Mr. EVINS. Mr. Gotschall has been an able assistant to Mr. Murphy and we are glad to have him here today.

PROGRAM RATING SERVICES

Mr. BOLAND. Is this the Bureau that looks into question of television surveys?

Mr. GOTSCHALL. We do the monitoring.

Mr. BOLAND. I mean surveys by the rating services.

Mr. DIXON. We just issued an order to cease and desist that was consented to against these rating services.

Mr. BOLAND. I think this is important to small-town studios. These services are used by manufacturers and by Madison Avenue houses for the purpose of getting clients and they impress their clients with the watching audience of television and many times it injures small television studios. The FCC is interested in protecting the UHF stations in small towns and I think what you have done in this field is helpful to them.

Mr. DIXON. This was a very important investigation.

BUREAU OF TEXTILES AND FURS

Mr. EVINS. We will now take up the Bureau of Textiles and Furs. Place in the record pages 83 through 93.

(The pages referred to follow:)

Bureau of Textiles and Furs

	Allotment, fiscal year 1963		Requested, fiscal year 1964		Increase, fiscal year 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
Office of the Director	16	$93,000	20	$112,000	4	$19,000
Division of Enforcement	16	137,000	27	235,000	11	98,000

Total, personal services	95	709,000	130	984,000	35	275,000
Travel		51,000		67,000		16,000
Other expenses		6,000		9,000		3,000
Total	95	766,000	130	1,060,000	35	294,000

BUREAU OF TEXTILES AND FURS

The Bureau is charged with the administration and enforcement of four separate and important pieces of consumer legislation: the Wool Products Labeling Act of 1939, the Fur Products Labeling Act of 1951, the Flammable Fabrics Act of 1953, and the Textile Fiber Products Identification Act of 1958. The Wool, Fur, and Textile Acts each require affirmative labeling disclosures. The Fur Act further requires affirmative invoicing, while disclosures made in advertising under the Fur and Textile Acts are regulated. The Flammable Fabrics Act prohibits the introduction or movement in interstate commerce of dangerously flammable wearing apparel and fabrics intended for use therein.

Unlike other statutes administered by the Commission, compliance with the terms of these four laws must be continuously policed by the Bureau to assure that members of industry are living up to their requirements and consumers are afforded the protection intended by Congress.

The task of administering the Wool, Textile, and Flammable Fabrics Acts is reflected by the tremendous size of the textile industry. Over 100 different industries are engaged in the manufacture of textile products subject to the provisions of these statutes. Each year the sales of textile products covered by the acts run into the billions of dollars. Next to food and shelter, textile products, including wearing apparel and household furnishings, constitute the most important segment of our national economy. Additionally, approximately 175,000 distributors of fur products are subject to the Fur Act.

Highly competitive conditions now prevailing in the textile industry are causing many manufacturers to use substitute materials in textile fibers of lower quality and cost in order to maintain established price structures for their products.

For the past few years there has been an ever-increasing volume of imported wool and nonwool fabrics and garments from abroad, and mills and manufacturers in the European and Asiatic countries are not always cognizant of the labeling and invoicing requirements set forth in our laws. Further, the generic names of fibers sometimes have a different meaning outside of the United States. Since foreign manufacturers are beyond the jurisdiction of the Federal Trade Commission so far as inspection of plants and records is concerned, this Bureau must continue to work closely with the Bureau of Customs in maintaining a close check on foreign imports subject to these laws. The Bureau is presently working with customs officials in an examination and sampling program of imported textile products. As a result of this cooperation, the entries of many misbranded items have been stopped and corrected before the merchandise entered the American market.

Inspections under the FTC Act reveal an increasing number of instances of inferior imported mink being passed off as American ranch mink. Also in view of a change in fashion trend looking toward greater market for darker mink, there has been an increasing number of cases involving dyed and tip-dyed mink

being passed off and sold as natural mink. As the darker mink is considerably more valuable, constant policing is necessary to control this practice.

In carrying out its enforcement under the Wool, Fur, Flammable Fabrics, and Textile Acts, the Bureau drafts substantive rules and regulations under each of these statutes. Such rules clarify and interpret the basic laws and provide for exemption of certain products from the provisions of the acts. When necessary, the Bureau drafts amendments to the rules. Under the Textile Act, the Bureau establishes generic names for manmade fibers. Also it maintains a Fur Products Name Guide under the Fur Act.

The Bureau has issued over 35,000 registered identification numbers under the Wool, Fur, and Textile Acts for identification purposes in connection with the required labeling of products subject to these statutes. In addition, it maintains a public register containing thousands of continuing guarantees filed with the Commission under these four acts.

The Bureau plans and supervises large nationwide compliance inspection and industry counseling programs in its administration of these consumer laws. It furnishes expert legal and technical advice regarding the requirements of the laws and their respective rules and regulations. It renders opinions and interpretations to industry and the consuming public under the various statutes. An effective educational and orientation program is carried on by the Bureau in an effort to acquaint industry with the requirements of the laws and with consumers regarding the benefits of the legislation.

The Bureau makes every effort to maintain voluntary compliance with the laws without the expense of costly litigation. However, whenever circumstances indicate voluntary compliance cannot be obtained, or that the violations appear deliberate, the Bureau carries on an effective and firm enforcement program leading toward the issuance by the Commission of cease and desist orders.

In this regard, it carries out the important functions of investigation of the litigative phases of all cases arising under the Wool, Fur, Textile, and Flammable Fabrics Acts. In addition, the Bureau handles the compliance work of all orders to cease and desist issued under these acts. The Commission now has outstanding more than 750 cease and desist orders against concerns charged with violating the Wool, Fur, Flammable Fabrics, and Textile Acts.

These important functions are carried out under the direction of the Bureau Director by two divisions: the Division of Regulation and the Division of Enforcement.

The Textile Fiber Products Identification Act has been in effect since March 3, 1960, and it is most necessary that a highly effective enforcement program of this important legislation be carried on. The scope of the Textile Act is far broader than the combined scope of the other three pieces of consumer legislation administered by the Commission. Generally speaking, the act extends to all textile transactions throughout the United States and its territories. From past experience under the Wool, Fur, and Flammable Fabrics Acts, the first few years are the most difficult in administering an act of this type and this Bureau is still assisting the textile industry to get its house in order.

The Bureau of Textiles and Furs is unquestionably one of the most important operations in the President's program for additional efforts in consumer protection. If proper enforcement of these important consumer protection laws is to be effected additional employees must be made available to perform the necessary inspection, investigation, and litigation duties.

In fiscal year 1964 a total personal services increase of $275,000 is requested which will provide 35 additional employees at a cost of $226,000, $15,000 for promotions for the current staff, and $34,000 for additional pay raise costs. In addition, $19,000 will be required for travel and other expenses, making a total increase of $294,000.

OFFICE OF THE DIRECTOR

Increases requested, fiscal 1964

The only increase requested in the Office of the Director is in the stenographic pool, which section services both the Division of Regulation and the Division of Enforcement. The increased workload of the Bureau requires the services of two additional GS–4 stenographers and two GS–3 typists at an increased cost of $14,000, plus $5,000 for increased cost of the pay raise in 1964, a total of $19,000.

DIVISION OF ENFORCEMENT

This Division is charged with the responsibility of investigation and prosecution of serious violations of the Wool, Fur, Textile, and Flammable Fabrics Acts. Further, in the Bureau of Textiles and Furs, the Division of Enforcement encompasses the Compliance Section, which polices all of the Commission's cease and desist orders under each of these statutes.

The attorneys of this Division analyze complaints of violations of the acts received from the Division of Regulation and from sources outside the Commission. When violations appear to be of a serious nature, an investigation number is assigned to the case, and the matter is forwarded via the Bureau of Field Operations to trained field investigators with a detailed memorandum outlining the evidence required. When the report of investigation is received from the field the files are analyzed by the Division of Enforcement attorneys and a determination is made as to whether there is sufficient evidence to justify a recommendation to the Commission that a complaint issue. If the necessary evidence is lacking, a recommendation is made that the matter be closed.

If a complaint is recommended and issued, the attorney assigned to the case prepares and handles the litigative phases of the matter before the Commission. If a consent order is offered to the respondent, this Division assists the Office of Consent Orders in settlement negotiations. Injunctions and condemnations, where necessary, are recommended to the Commission and the attorneys of the Enforcement Division handle the matters in the U.S. district courts. In addition, if the violations are willful and a criminal prosecution appears to be warranted, the trial attorneys make such recommendations to the Commission. If the Commission concurs and the case is referred to the Department of Justice, the Division of Enforcement attorneys assist the Department of Justice and the U.S. district attorneys in every way possible with the prosecution of the matter.

In fiscal year 1962, the Division of Enforcement had a Chief, one reviewing attorney, and five trial attorneys. Despite this small staff this Division, during the stated period, processed 190 cases, including 118 recommendations for complaint and 72 closings. This figure, broken down, makes an average of 38 cases concluded for each trial attorney.

During fiscal year 1962 the Commission issued 310 deceptive practice cease-and-desist orders which included 26 under the Wool Act, 88 under the Fur Act, 12 under the Flammable Fabrics Act, and 18 under the Textile Act for a total of 144 cases. Therefore, the Bureau of Textiles and Furs accounted for over 46 percent of the deceptive practice orders issued by the Commission during this period.

The compliance section of the Division of Enforcement consists of three attorneys, one of whom joined the staff in November 1961 and another who joined the staff in January 1962. When the Division took over the compliance work formerly assigned to the General Counsel's Office on July 1, 1961, there were 617 orders in effect under the 4 statutes administered by this Bureau. During fiscal year 1962, 144 additional orders were added making a total of 761 cease-and-desist orders administrated by the Division of Enforcement as of June 30, 1962. In addition, this Division also polices over 250 stipulations which were entered by the Commission with respondents throughout the country in previous years. Therefore, it is now the responsibility of this Division to police several thousand corporate and individual respondents under cease-and-desist orders of the Commission for violation of the aforesaid acts.

At the beginning of fiscal year 1962, the Division of Enforcement had 83 active cases in which compliance reports had not been received and filed. In addition, the Division had 51 civil penalty investigations to be analyzed, as well as 47 compliance inspections and civil penalty investigations in the field and 6 civil penalty suits pending with the Department of Justice.

The Division of Enforcement also includes the Commission's testing laboratory which during fiscal year 1962 made 458 fiber content analyses of fabrics and fibers, conducted 173 burning tests under the Flammable Fabrics Act and 594 tests of fur fibers to determine if dye, bleach, or other artificial coloring had been added to the furs. The laboratory ordinarily employs a chemist and a textile technologist; however, for a large part of the year, the laboratory has been without a chemist.

The caseload of the attorneys of the Division of Enforcement is far too heavy for the Division to give the attention to each case that is desirable. As a result, matters that should be investigated have at times been passed over because of lack of personnel. The future caseload will continue to increase as it has over the past few years particularly as to the Textile Act which is still relatively new.

If the enforcement of the textile and fur labeling laws is to be carried out so that businessmen and the consuming public are protected from false and misleading labeling, invoicing, and advertising, it is imperative that additional funds be appropriated for the Division of Enforcement.

Increases requested fiscal 1964

3 GS–13 attorneys, 3 GS–11 attorneys, 3 GS–9 attorneys, 1 GS–7 attorney, 1 GS–9 chemist; total, 11	$88,000

DIVISION OF REGULATION

This Division is responsible for the voluntary compliance work under the Wool, Fur, Textile, and Flammable Fabrics Acts. Among its duties are inspection and industry counseling, rendering interpretations and opinions, maintenance of registers of continuing guaranties filed under the four acts, the issuance of registered identification numbers under the Wool, Fur, and Textile Acts and the maintenance of records pertaining to the Division. This Division also drafts rules and regulations under the said statutes whenever it appears that amendments should be made.

The Division has a staff of field investigators in Boston, Mass.; New York, N.Y.; Philadelphia, Pa.; Washington, D.C.; Atlanta, Ga.; Charlotte, N.C.; Miami, Fla.; New Orleans, La.; Dallas and Houston, Tex.; Kansas City and St. Louis, Mo.; Denver, Colo.; Chicago, Ill.; Cleveland, Ohio; San Francisco and Los Angeles, Calif.; Seattle, Wash.; and Portland, Oreg. During fiscal 1963 it is planned to install an investigator in Minneapolis, Minn.

These investigators, in addition to carrying on inspections and industry counseling in all phases of manufacturing, processing, and distribution of textile and fur products also investigate formal cases leading to complaint under the direction of the Bureau of Field Operations.

The primary purposes of the Wool, Fur, Textile, and Flammable Fabrics Acts are the protection of the consumer against the misbranding, false invoicing, and false advertising of wool, textile, and fur products, and the sale of clothing and fabrics dangerously flammable. These acts are operative in all of the 50 States, the District of Columbia, and the insular possessions of the United States.

To insure that the public receives the protection intended by Congress, it is necessary to police the manufacture and distribution of products subject to these laws. Obviously, 100 percent inspection or compliance investigation of the industries involved would be impossible. Consequently, it is necessary that at least token policing be carried on in strategic areas according to well-organized plans.

The present inspection and investigation staff is grossly inadequate to carry on the tasks required under these four laws; therefore, it is of paramount importance that the staff of investigators and attorneys policing compliance of the aforesaid four acts be substantially increased.

Division of Regulation: Workload statistics, fiscal 1962

	Textile	Wool	Fur	Flammable fabrics
Number of inspections made	3,235	2,025	942	2,967

INCREASES REQUESTED FOR TEXTILES AND FURS

Mr. EVINS. For 1963 you had 95 positions and $766,000. For 1964 you are requesting 130 positions and $1,060,000, an increase of 35 positions and $294,000.

Why do you need 35 more people in this bureau?

Mr. STRINGER. We are asking for 16 additional field investigators, 14 attorneys, 1 chemist, and 4 stenographers. What we are doing

with the present staff is only scratching the surface and I think for the protection of consumers, businessmen, and the domestic textile industries we need to look into the imports of textiles more.

Mr. EVINS. What grades are these investigators in?

Mr. GLENDENING. Grades 7 and 9.

Mr. THOMAS. Off the record.

(Discussion off the record.)

Mr. DIXON. We have the obligation to see that the truth is told, to protect the American manufacturer as well as the consumer.

Mr. EVINS. You are asking for one GS–11 attorney, three GS–9 attorneys, nine GS–9 investigators, and seven GS–7 investigators.

Mr. DIXON. Yes. We are asking for 4 attorneys and 16 investigators. Then on page 88 there is another breakdown.

Mr. EVINS. Mr. Stringer, you convinced the Bureau of the Budget you need these but you have not sold us as to why you need this number.

Mr. STRINGER. We need them for this reason: We are doing a good job insofar as we can with the personnel we have, but, as I said, we are just scratching the surface. A lot of misbranded goods are going to the public that we do not have time to take care of. On the matter of imports, I saw figures on woolens entering the country.

LABELING OF IMPORTED FABRICS

Mr. EVINS. Is there not a law requiring labeling when goods come in the United States?

Mr. STRINGER. It comes under these laws administered by the Commission.

Mr. JONAS. Will you yield there?

Mr. EVINS. Yes.

Mr. JONAS. How do you check the imports? Do you have inspectors at the customs service?

Mr. STRINGER. We go to the importers themselves. At times customs has furnished us with samples, but they have informed us it is a big job and if it is to be done it has to be done by us.

Mr. OSTERTAG. Who does that? Not the attorneys?

Mr. STRINGER. No, these are investigators.

Mr. JONAS. What do you investigate? Say X company imports 1,000 fur jackets, where do you go to investigate?

Mr. STRINGER. We see if they are labeled correctly. Textiles would be a good example. We test it by laboratory analysis to see if the contents are as represented and if not we enter a complaint.

Mr. JONAS. What do you do, just spot check?

Mr. STRINGER. Yes. That is all we can do, obviously.

TEXTILE PRODUCTS INSPECTION

Mr. DIXON. Mr. Congressman, in my prepared summary I tried to impress you with the fact there are 100 different industries engaged in the manufacture of textile products. Mr. Stringer has told you we are just scratching the surface. The four consumer laws Congress passed gave us responsibility not only to enforce but to inspect. We have to inspect the manufacturer, the retail outlet, and all facets to

see that these goods are not only properly labeled as to content but properly invoiced. The only way to do that is by being on the site and spot checking.

Mr. JONAS. You cannot ever do anything more than spot check?

Mr. DIXON. That is right, but we have done a tremendous amount of good. I do not think the industry favored the original Wool Act at first but after it passed the industry is for it. The same is true of the Fur Act.

Mr. OSTERTAG. Are you the only agency responsible under those acts?

Mr. DIXON. Yes. We are charged with the administration and enforcement of four acts: The Wool Products Labeling Act, the Fur Products Labeling Act, the Flammable Fabrics Act, and the Textile Fiber Products Identification Act. On page 91 there is a breakdown. The figures are quite impressive as to what we have inspected and sampled, the number of inspections made, the deficiencies noted, and so on. In fiscal 1962 we inspected over 55 million textile products.

Mr. EVINS. Say one man goes in a big department store in Chicago. How many suits of clothes could he inspect in a day?

Mr. STRINGER. It would run in the hundreds or thousands.

Mr. DIXON. The point is we can only have inspectors in so many stores.

Mr. EVINS. And you only inspect those where there is a suspicion of violation?

Mr. DIXON. And our men do not go and say, "Aha, we have caught you in violation of the law." We catch a repeater doing this before we sue him.

Mr. EVINS. You have been enforcing this law for several years and is not industry complying rather substantially?

Mr. DIXON. I think there is a great deal of compliance in this industry, but I think the number of matters we could straighten out is greatly limited by the number of calls we can make.

Mr. BOLAND. A lot of people do not want guidelines, of course.

Mr. DIXON. I can tell you there is nothing that affects the consumer faster than this. If a person buys a seal coat she does not want a possum coat.

Mr. BOLAND. Do you find many violations in mislabeling on imported fabrics?

Mr. STRINGER. Yes, a great many; particularly on woolen fabrics from Italy, because that is the center of reworked wool of the world. We do not have the manpower to go into it as we should, but we have orders against a number of importers of woolen fabrics from Italy and it is a common complaint in the textile industry as to how the Italian situation is adversely affecting the American textile merchant.

Mr. EVINS. Off the record.

(Discussion off the record.)

BUREAU OF FIELD OPERATIONS

Mr. EVINS. We will turn to the Bureau of Field Operations.

Place in the record pages 94 through 99.

(The pages referred to follow:)

Bureau of Field Operations

	Allotment fiscal year 1963		Requested fiscal year 1964		Increase fiscal year 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
Office of the Director	6	$68,000	6	$71,000	----------	$3,000
Field offices	290	2,202,000	295	2,352,000	5	150,000
Total personal services	296	2,270,000	301	2,423,000	5	153,000
Travel	----------	295,000	----------	300,000	----------	5,000
Total	296	2,565,000	301	2,723,000	5	158,000

BUREAU OF FIELD OPERATIONS

All field investigative work, including the holding of investigational hearings and the taking of depositions, is performed by the Bureau of Field Operations. This work is done by the staffs of attorneys located in the field offices.

For the past several years the Commission has operated 10 field offices with a branch office of San Francisco established in Los Angeles. Within the past year the Commission has established a branch office of New Orleans in Houston, Tex. Effective February 1, 1963, Los Angeles will be converted to a full field office operation making a total of 11 field offices. In addition to investigational work, attorneys in the field offices under Rules of Practice, Procedure and Organization adopted June 1962, are required to negotiate consent settlements with respondents at the investigational stage, participate in the trial of litigated cases under the general supervision of the enforcement bureaus. All matters handled by the Bureau of Field Operations are selected by the Bureau of Restraint of Trade, Bureau of Deceptive Practices, Bureau of Textiles and Furs, or by the Commission itself. In all instances in which field investigations are required the files are submitted to the Bureau of Field Operations for the purpose of developing all facts and evidence necessary to determine whether violations of any of the statutes administered by the Commission appear, and, if so, the exact nature and extent of such violations.

The Bureau of Field Operations not only has the responsibility of conducting the initial investigations discussed in the preceding paragraph, but also conducts investigations to determine whether respondents are complying with orders to cease and desist that have been entered by the Commission, and where violations are discovered this Bureau acquires information and data in suitable form (usually affidavits) for certification to the Attorney General for initiation of civil penalty actions in the U.S. district courts under section 16 of the Federal Trade Commission Act.

WORK PERFORMED, FISCAL YEAR 1962

At the beginning of the fiscal year 1962 there were pending in the field offices 991 cases. During that year, 1,177 additional matters were referred for investigation. Thus, during fiscal year 1962 the 10 field offices had 2,168 numbered matters on their dockets for investigation under the Federal Trade Commission, Clayton, Textile, Wool, Fur, and Flammable Fabrics Acts. Included in this total are 37 cases referred to the Commission by the Attorney General for investigation to determine whether respondents named in these decrees, which were obtained by the Antitrust Division, were complying with the terms of such decrees. These are very extensive and time-consuming investigations. In this period investigations of 1,329 cases were completed, which is an average of 8.4 cases per attorney. Five hundred and thirty of these investigations were in the restraint of trade field, including 5 of those matters submitted by the Attorney General: 749 were in the deceptive practice field; and 50 in the textile, wool, fur, and flammable fabrics field.

At the close of the fiscal year 1962 there were 839 cases pending in the Bureau of Field Operations field offices, 345 of which were restraint of trade cases (including 32 decrees submitted by the Attorney General) ; 373 were deceptive practices cases; and 121 were textile and fur cases.

WORKLOAD IN FISCAL 1963

It is estimated that attorneys in the field offices will be called upon to complete approximately 2,500 investigations during fiscal year 1963, and will have not only the responsibility for negotiating consent settlements at the investigational stage in many of these matters but will be required to draft proposed complaints and orders and participate in the trial of a considerable number of litigated cases. The increase in the number of cases in fiscal years 1963 and 1964 will result from new programs and procedures adopted by the Commission, and from receipt of a larger number of applications for complaints. The number of applications for complaints for fiscal year 1962 increased 42 percent over the number received in fiscal year 1961. Such applications are expected to continue at the same or an increased rate during fiscal years 1963 and 1964.

Under plans and programs now in effect and being initiated, it is anticipated that many of the applications for complaint received will not only result in an investigation of the particular firm or corporation against whom complaint is lodged, but will result in an industrywide inquiry of all competitors which may be engaged in similar practices, particularly since the policy of the Commission at present is to attempt to correct violations of the laws administered by it on an industrywide basis. Industrywide investigations expand the amount of investigative work required in direct proportion to the number of concerns involved. While this procedure is much more time-consuming, it unquestionably provides more equitable treatment to all members of industry and of the general public.

It is hoped and expected that as the recently hired attorneys gain experience the average case production per attorney in the Bureau of Field Operations will be increased during 1963, but even an increase of 10 percent in production will leave a backlog of approximately 1,000 cases at the end of the fiscal year.

INCREASES REQUESTED, 1964

Each of the enforcement bureaue, i.e., Bureau of Restraint of Trade, Bureau of Deceptive Practices, and Bureau of Textiles and Furs, plan extended and intensified programs to effect more efficient, widespread, and uniform treatment under the statutes administered by the Commission, particularly through the initiation of industrywide action. To assist in carrying out these programs, reduce an anticipated backlog of approximately 1,000 cases, conduct expeditious investigations wherever required, negotiate and handle an increased number of consent settlements at the investigational stage, and to participate more fully in the trial of litigated cases, will require an increase in personnel and travel funds.

Also, it is anticipated that an expanded program of enforcement will result in the submission to the Bureau of Field Operations of an increased number of requests for investigation looking to the enforcement of orders to cease and desist. Investigations of this nature are generally more time-consuming than initial investigations, for the reason that evidence is required in the form of documents and affidavits which may be used in court proceedings.

Under rules of practice and procedure adopted June 1962, for litigated cases (sec. 4.14(d)) where respondents are not willing to dispose of the proceeding by entry of a consent order, hearings are promptly commenced and must be held at one place and continue without suspension until concluded. This procedure means that there is no opportunity to delay initiation of or interrupt hearings to develop, through investigation, other information and data for introduction into evidence, but investigations must be complete in all respects before complaint is issued. That is to say that the facts and evidence developed during an investigation must be not only sufficient to give the Commission reason to believe that a violation has occurred, but to fully establish during a continuing trial that a violation did occur and that evidence in the file is sufficient to support any charge which may appear in a complaint. Continuing trial is desirable

to expeditiously conclude hearings. However, this places a greater burden on this Bureau's attorneys in the field offices to fully establish by oral and written evidence violations discovered in all cases except where they are successful in negotiating a consent settlement.

As has been previously stated, the average number of field investigations which were completed by each attorney in the field offices was 8.4 during fiscal year 1962. While it is hoped to increase this average performance in fiscal year 1964, the estimated number of additional attorneys in the field offices and additional travel funds shown in the estimates that follow will be required to carry out the program of the field investigational work of the Commission for that year.

To accomplish the investigational needs of these enforcement programs in fiscal year 1964, it is estimated that the 11 field offices (and 1 branch office at Houston) will require the addition of five attorneys (three GS–9 and two GS–7), at a cost of $28,000, $105,000 for increased pay costs, and $20,000 for the cost of promotions of the current staff, making a total increase of personal services of $153,000. An increase of travel funds in the amount of $5,000 is also requested making a total Bureau increase of $158,000.

Mr. EVINS. Mr. Williams, you are asking for an increase of five personnel to your staff and an increase of $158,000.

This Bureau is really the eyes and ears of the Commission. I imagine you would need five more people all over the country to conduct your investigations.

Mr. WILLIAMS. Yes.

BUREAU OF INDUSTRY GUIDANCE

Mr. EVINS. We will now take up the Bureau of Industry Guidance. Place in the record pages 100 through 113.

(The pages referred to follow:)

Bureau of Industry Guidance

BUREAU OF INDUSTRY GUIDANCE

On June 1, 1962, the Commission assigned to the Bureau of Industry Guidance two new and important functions: (1) The administration of the new trade regulation rule procedure, and (2) the preparation of advisory opinions which are binding on the Commission. These new Bureau responsibilities are in addition to those of conducting the programs for the promulgation and administration of trade practice conference rules and guides, which programs are to be continued in full effect. Administratively, two new Divisions were created—the Division of Trade Regulation Rules and the Division of Advisory Opinions. The guides function was made a responsibility of the Division of Trade Practice Conferences, the name of which Division was changed to the Division of Trade Practice Conferences and Guides.

OFFICE OF THE DIRECTOR

The Office of the Director has general supervision over the work of the three Divisions. It also supervises the work of the Bureau's central record room and stenographic pool. To serve the expanded legal staff requested for the Bureau two additional GS–4 stenographers at a cost of $8,000 and $10,000 for increased pay costs will be necessary.

DIVISION OF TRADE REGULATION RULES

In establishing the trade regulation rule procedure on June 1, 1962, the Commission initiated a new program bringing to bear its voluntary and mandatory procedures in effective combination in an effort to obtain maximum law observance on an industrywide basis; voluntary in that industries may apply for and take part in the rulemaking proceedings, and mandatory in the sense that such rules may be used in any adversary proceedings initiated against recalcitrant members of the industry involving the unlawful practices proscribed by the rules.

Trade regulation rules are basically different from trade practice conference rules as to scope, purpose, and procedure. Trade practice rules apply settled

principles of law to the practices of a given industry and are designed to promote voluntary compliance with the law. They are advisory only. Trade regulation rules, on the other hand, while also informative as to legal requirements, represent conclusions of the Commission as to the illegality of particular practices, the validity of which rules may not thereafter be challenged. The procedure for establishing trade regulation rules as set forth in sections 1.61 through 1.71 of the Rules of Practice also differs materially from the procedure for promulgating trade practice rules.

Purpose of trade regulation rules

Where an unlawful practice besets an industry those who disregard the law, profit at the expense of scrupulous competitors. Many industry members become involved in formal proceedings and are placed under orders to cease and desist certain practices while their competitors, at least for some period of time, continue to engage in the unlawful practice. These businessmen placed under orders complain that they are treated unfairly and insist that their competitors be similarly restrained. A trade regulation rule is a major step in correcting such inequities.

When notice is published of a proposed rulemaking proceeding respecting a particular practice or practices, businessmen know that a few are not being singled out under the mandatory processes. After they are given a fair chance to present their views in the course of the proceedings they will understand their obligations under the law and that the Commission will rely upon the rule in any adversary proceeding. The rule, therefore, acts as a strong deterrent to law violations.

Trade regulation rules serve the further purpose of saving time and the expenditure of funds in litigated proceedings against unlawful practices. Where the rules prohibit an unlawful practice and subsequently formal proceedings are instituted, the Commission staff presents proof that the company has engaged in the banned practice and is not required to present evidence that the practice itself was violative of the law. This leaves to the respondent the defense of showing that it did not engage in the practice or that the rule should be applied in the particular case. Respondent cannot challenge the validity of the rule as such. The rule would save time and expense on the part of both the investigative and trial staffs. In many situations where preliminary investigation reveals that a practice is in general use in the industry it is feasible to stop the investigation and treat the matter on an industrywide basis under trade regulation rule proceedings.

Trade regulation rule proceedings may be used in any area and encompass any practice violative of the Clayton Act or the Federal Trade Commission Act, including corporate mergers, price discriminations, inducing or receiving discriminations in price, discriminations in the furnishing of services and facilities, discriminatory payments for services or facilities and other restraints on competition, as well as any and all forms of deception, including false advertising and deceptive labeling.

Pending proceedings

There are now pending in this Division for consideration the following proposed proceedings for trade regulation rules:

Exploding bottles.—This matter involves bottle manufacturers and the bottling industry. The problem here is the establishment of a rule which would require that bottles be of such composition, design, and construction as to reduce the likelihood of explosion under normal conditions of use. This will entail extensive scientific tests and studies in determining standards for the manufacture of safe bottles.

Leakproof batteries.—The practices involve misrepresentation that dry-cell batteries are "leakproof" and "guaranteed leakproof." Industry members are manufacturers, importers and distributors.

Used oil industry.—The matter involved concerns the failure of distributors and rerefiners of used lubricating oil to disclose that the oil was previously used. A study is now being made to determine whether the problem lends itself to corrective action by trade regulation rule proceedings.

Watch industry.—Industry members involved are manufacturers, importers, and distributors of watches. The proposed rule would be designed to eliminate the use of false and fictitious retail price tags and labels on watches.

Sewing machine industry.—Industry members involved are manufacturers, importers, and distributors of sewing machines. An appropriate rule would prevent misrepresentations that sewing machines are "automatic."

Gift wrapping and tyings industry.—The industry involves manufacturers and distributors of gift wrapping paper and materials, including ribbons and tying facilities. The proceeding would have as its purpose the establishment of a rule to eliminate the practice of placing on such products false and deceptive retail prices.

Sleeping bag industry.—The practices involve misrepresentations as to the size of sleeping bags in advertisements and labeling. Industry members are manufacturers and distributors.

Automotive tire industry.—This Division is presently studying the tire industry with the view to initiating trade regulation rule proceedings. The question here concerns misrepresenting the size of automotive tires, misrepresentation as to the manner of compliance with guarantees offered to consumer purchasers, and the failure to disclose the grade or quality of tires.

Room air conditioner industry.—This Division is now making inquiry into the practices of manufacturers and distributors of room air conditioners with special reference to disclosure of the cooling capacity of air conditioners and tolerances in connection with specified ratings or capacities.

Program for fiscal 1964

As before mentioned, this Division is presently working toward the establishment of rules relating to specific practices used in connection with the sale of exploding bottles, automobile tires, "leakproof" batteries, used oil, watches, room air conditioners, sewing machines, gift wrappings, and sleeping bags. The Commission also has under consideration several matters which, it is expected, will be referred to this Division for the initiation of trade regulation rule proceedings. Since the procedures in formulating and establishing trade regulation rules are new and as yet untested, they must be developed and refined to meet the needs of varying circumstances and situations.

Although this Division has been in existence for several months only, it is already abundantly apparent that in order to develop fully its potential for augmenting other Commission procedures the presently assigned attorney personnel must be substantially increased. The work ahead in developing satisfactory procedures and in establishing rules for the subjects now assigned, to say nothing of expected assignments, will demand more man-hours than can be provided by the present staff.

It is anticipated that the workload of this Division will expand as the program progresses. The conditions are such in many industries at this time that consideration should be given to the initiation of trade regulation rules. In many situations some members of an industry are under investigation where in all fairness it would be appropriate to explore the entire matter on an industrywide basis through this procedure. There are other situations where industry members through formal proceedings have been placed under orders to cease and desist while other competing members of the industry may be engaging in the same practices free from such restraints. Trade regulation rule proceedings would provide a rule applicable to all industry members engaged in such practice, thereby eliminating the present inequities.

The time and expense which these proceedings will save the Government and business and the assurance of equitable treatment of all industry members make this program by its very nature one of unlimited potential. As businessmen realize the benefits of the program we can anticipate more applications from industries for the establishment of trade regulation rules.

Increase requested, fiscal 1964

In order to administer this program effectively the Division will require six new attorneys (three GS–14 and three GS–13) at a cost of $68,000, $3,000 for promotions, and $3,000 for increased pay costs, making a total of $74,000 for personal services.

DIVISION OF ADVISORY OPINIONS

In an effort to give the businessman something "more than the menace of legal process," the Commission on June 1, 1962, initiated the practice of rendering advisory opinions. The function of preparing these opinions was made the responsibility of the Division of Advisory Opinions.

The Commission is of the opinion that businessmen who, in good faith, seek the advice and counsel of the Commission in regard to a proposed course of business conduct are entitled to the benefit of the Commission's views. Whenever it is practicable to do so, the Commission will render its advisory opinion in advance of the proposed course of action, subject only to the right to reconsider its advice should such reconsideration be in the public interest. Information submitted, however, will not be used as the basis for a proceeding against the requesting party without prior notice and opportunity afforded for such party to discontinue the course of action pursued in good faith in reliance upon the Commission's advice.

Understandably, the nature and character of requests for advisory opinions involve highly complex questions concerning interpretations of the various statutes administered by the Commission and the applicability thereof to the particular practices proposed to be adopted. Many of the problems presented are matters of first impression, for which there are no Commission or court decisions or previous rulings which can be relied upon as precedents. Because of the complexity and the novelty of the issues involved, it is imperative that the staff be increased to the extent necessary for prompt, efficient, and accurate processing of all requests for advisory opinions.

Experience to date has conclusively demonstrated that time is of the essence in the consideration of requests for advisory opinions. Generally speaking, by the time that a proposed course of action is presented to the Commission for its consideration, weeks and months of planning, discussion, and negotiation have been devoted by businessmen to the formulation of the plan eventually submitted. Most of the essential groundwork for the implementation and the operation of the plan has therefore been laid and the instances are few and far between in which there is not a request for an early expression of views by the Commission in order that the plan or program may be started immediately. Typical examples are the necessity for immediate advance approval (1) in order to meet a printing deadline, (2) to dispose of seasonal goods, (3) to consummate a sales contract, and (4) in the case of requests for premerger clearances, to effect a sale of assets or stock before the prospective purchaser withdraws its offer or loses interest in the proposed transaction.

In the case of premerger requests alone, voluminous and detailed information must be considered by the Commission before an informed determination can be made concerning the legality of the proposed merger or acquisition.

Problems presented to date encompass the entire spectrum of laws administered by the Commission. For example, we have received requests concerning the legality of advertising copy relating to a myriad of products, quantity discounts, exclusive dealing contracts, payment of advertising allowances, the furnishing of services or facilities, premerger clearances, brokerage payments or payments in lieu of brokerage, and questions involving possible restraints of trade under section 5 of the FTC Act.

Based upon the number of requests received during the several months in which this service was offered to the business community, it can reasonably be anticipated that approximately 300 requests for advisory opinions will be received during fiscal 1964.

Increase requested, fiscal 1964

In order to render prompt and accurate advisory opinions an increase of $56,000 is requested to provide two GS–14 and three GS–13 attorneys, $2,000 for promotions and $3,000 for increased pay costs, making a total of $61,000.

DIVISION OF TRADE PRACTICE CONFERENCES AND GUIDES

This Division is responsible for administering the Commission's trade practice conference and guides programs. While combined in a single Division for administrative purposes, the two are conducted as entrely separate functions.

Trade practice conferences

The primary objective of the trade practice conference program is to obtain expeditious industrywide voluntary compliance with laws administered by the Commission. Its work falls in three main categories: (1) The establishment (and revision) of trade practice rules, (2) furnishing advice and guidance concerning the requirements and applicability of rules, and (3) obtaining through continuous administration of the rules the greatest possible degree of voluntary compliance with the provisions thereof.

The rulemaking work of the Division is concerned primarily with the preparation of reports on applications received, the formulation of rules, and revision and amendment of existing rules when necessary. Its rule compliance work entails the establishment and maintenance of a close working liaison with industry members and their trade associations, furnishing rule interpretations and advice to industry members, issuing warnings on courses of business conduct that would contravene rule provisions, conducting discussions on subjects covered by rules, and effecting voluntary discontinuance of practices found to violate rule requirement.

Accomplishments July 1, 1961–December 31, 1962

Work was completed on, and the Commission approved, new rules for seven industries and revised previously promulgated rules for five industries. These industries, having an estimated aggregate annual volume of sales of several billion dollars, are pleasure boat; residential aluminum siding; stationers; optical products; wall coverings; metallic watch band; rebuilt, reconditioned, and other used automotive parts; tobacco distributing; mirror; luggage and related products; wire rope; and kosher foods.

In addition to its rulemaking work, the Division completed action in 913 matters involving compliance with rules and processed 270 matters involving interpretations of rules.

Concurrently with its regular compliance work, the Division completed several special projects having as their objective the elimination of various widespread unfair trade practices, one of which had to do with effecting discontinuance of false and misleading representations by firms engaged in the purchase of precious metals from the public. In all, 329 firms were contacted, with the result that all known violations were corrected.

An industrywide survey of guarantees and guarantee advertising used by manufacturers of water heaters was conducted, as a result of which needed correction was effected on the part of 32 such manufacturers. This project is not as yet completed.

In another project the Division sent letters to all known manufacturers of television antennas to ascertain whether, as had been indicated, they were misrepresenting the prices of their products. As a result of this survey, approximately 40 rule compliance cases were initiated and voluntary compliance obtained in each instance.

Industrywide action was undertaken to require members of the cosmetic and toilet preparations industry to disclose the domestic manufacture, compounding, mixing, or blending of products compounded or otherwise manufactured in this country and sold under a name suggesting foreign origin. This project has not as yet been completed.

As directed, and after considerable study and research, the Division submitted separate reports to the Commission on other special projects relating to upholstery fabrics, and the sale of products produced from mahogany and Philippine mahogany. A special report was also made on the subject of revising the Commission's standard "push money" rule, which rule was subsequently revised by the Commission.

Program for fiscal 1964

It is contemplated that in addition to rules for the wire rope and kosher foods industries which were promulgated in fiscal 1963, trade practice rules will be promulgated during this fiscal year for at least three other new industries, namely, the $7½ billion fresh fruit and vegetable industry, the $2½ billion household furniture industry, and the mail-order insurance industry. In addition it is contemplated that the existing rules for several industries will be revised, including those for the beauty and barber equipment and supplies industry and the uniform industry.

There are presently 168 industries under rules. The additional new rules to be promulgated in fiscal 1963 will bring the total number of industries under rules to 171. These new rules will add considerably to the rule compliance work of the Division, which is already overburdened. With the present staff, except in a few pressing instances such as those hereinbefore mentioned as special projects, the Division has not been in a position to utilize to its full extent the industrywide approach in obtaining law observance. In fact it had all it could do to keep abreast of complaints and inquiries received through the mails.

94926—63—pt. 1——11

Increase requested for 1964

An increase of $18,000 is requested for two attorneys (one GS–13 and one GS–11), $5,000 for promotions and $8,000 for increased pay costs for fiscal year 1964, a total of $31,000.

Guides

Stated briefly, guides are a restatement of the law in layman's language of formal cases previously decided by the Commission and the courts. They are interpretive rules which serve to—

1. Spell out the legal boundaries of trade practices subject to regulation by the Commission;
2. Aid in obtaining a maximum degree of compliance with the law through administration of the guides on an industrywide basis;
3. Prevent consumers from being deceived and competitors from being injured through preventing unfair trade practices from ever being used in the first instance; and
4. Spotlight persistent violations which warrant the application of the Commission's mandatory processes.

Generally speaking, guides may be issued in one of two forms. First, there are guides which apply to specific practices within a particular industry, such as the cigarette and tire advertising guides. Second, guides which apply to business practices common to many industries, such as deceptive pricing, bait advertising, guarantees, and guides for advertising allowances.

Accomplishments July 1, 1961–December 31, 1962

This period proved to be an extremely active one in obtaining compliance and giving interpretations under the various guides. The following statistical summary indicates the accomplishments under the guide program during the period:

Individual complaints disposed of	1,111
Interpretations of the guides	553
Total	1,664
Number of guides distributed upon request	115,727

During the period three new guides were issued, substantial progress was made in the revision or formulation of four additional guides, and the administration of existing guides continued at a high level. The three new guides approved and issued by the Commission were the guides for shoe content labeling and advertising, the guides for advertising fallout shelters, and the guides for advertising shell homes.

The guides for advertising fallout shelters were prepared at the request of and in close cooperation with the Office of Civil Defense of the Department of Defense. Immediately after their issuance on December 5, 1961, there was considerable activity in their administration. Several months later, however, the construction of fallout shelters declined materially with the result that our activity in the administration of these guides since that time has been on a somewhat limited basis.

On April 25, 1962, the Commission adopted guides for advertising shell homes. Because this is a relatively young industry and because its principal market is the low-income group, the Commission took timely action to move against the deceptive practices which some members of this industry were using. Copies of the guides were sent to all known shell home builders in an effort to acquaint them with the requirements of the guides and to ascertain whether their advertising complied therewith. These guides have also elicited interesting responses from industries faced with problems similar to those covered by the principles enunciated in the guides, such as interest rates, guarantees, and bait advertising. Particular attention is invited to the fact that the Federal Housing Administration has distributed copies of these guides to each of its field offices, requesting that they be used in appraising the accuracy of claims made by conventional homebuilders who use the insured loan facilities of that agency. Also of interest is the fact that approximately 7,755 copies have been distributed to interested parties requesting same.

In October 1962 the Commission issued guides for shoe content labeling and advertising. These guides, which provide for informative labeling of shoes were necessary to prevent deception of the public, represent a significant step

in the Commission's program of consumer protection. The guides became operative at the point of manufacture 90 days after the date of publication.

As usual, the guides against deceptive pricing were responsible for the greater volume of compliance and interpretive work, administration of the tire guides, guarantee guides, and the bait advertising guides also required considerable attention and correspondence during fiscal 1962.

The staff of this Division also continued its active administration of the cigarette advertising guides. Through its voluntary administrative procedures a number of claims involving several brands of cigarettes were modified to bring them into compliance with the guides. The staff also made a careful review of its enforcement responsibilities in the light of recent developments relative to the cigarette-health problem. Such developments are being carefully watched in connection with the Division's continued effort to prevent any deception of the public in this important area.

Anticipated guide program for fiscal 1964

This Division had on hand for disposition the following number of matters as of January 1, 1963:

Complaints pending	300
Requests for interpretations	34
Total pending Jan. 1, 1963	334

Perhaps the heaviest workload in fiscal 1964 will come from the issuance of the revised guides against deceptive pricing, which the Commission expects to issue in fiscal 1963. The promulgation and administration of these guides has evoked more interest than any other set of guides issued by the Commission. Perhaps this is due to the fact that savings claims constitute a very persuasive and compelling factor in the mind of the purchasing public. During the time these guides have been in effect, which is approximately 4 years, we estimate that a total of one-half million copies have been distributed to interested parties by the Commission and by private industry which has reproduced copies at its own expense.

The guides for shoe content labeling and advertising are expected to create a heavy volume of compliance work. Because there are approximately 900 shoe manufacturers representing a $2 billion industry, it is anticipated that much of the administration of these new guides will carry over well into fiscal 1964. It can readily be seen that the job of examining the labeling and advertising of 900 shoe manufacturers is one which will involve considerable time and manpower.

Study and consideration is currently being given to the issuance of guides for advertising and marketing of goods of foreign origin. Rather than continuing to bring formal proceedings against individual companies in this area, the Commission hopes to attack the problem on a wholesale basis through its voluntary procedures, thus lessening the necessity for individual case actions.

Substantial progress has been made on the formulation of guides for advertising radiation detection instruments. Being prepared at the request of, and in close cooperation with, the Office of Civil Defense, these guides will represent an effort to protect the public from the purchase of ineffective radiation detection instruments which do not measure up to the standards established by the Office of Civil Defense.

Guides relating to the cooling capacity of room air conditioners have already been drafted in proposed form and will be presented to the Commission for its consideration unless a decision is made to initiate a trade regulation rule proceeding on this subject.

Further clarification and modification of the guarantee guides is needed in order to bring them into harmony with more recent Commission decisions.

Another problem of immediate concern is the practice of selling refined used oil without disclosing its prior use. It is contemplated that industrywide approach to the problem will be utilized in an effort to bring about simultaneous compliance with the Commission's requirements. This is also a possible subject of a trade regulation rule proceeding.

Finally, the Division plans to attack the use of fictitious prices and failure to observe the guarantee guides by a substantial number of members of the mail order catalog industry. There are approximately 1,200 members of this

industry and the objective would be to effect the necessary correction on an industrywide voluntary basis, thus lessening the possibility of competitive inequities and necessity for using the Commission's adjudicatory processes.

ADVISORY OPINIONS RENDERED BY THE BUREAU OF INDUSTRY GUIDANCE

Mr. EVINS. Formerly some staff member would answer a letter and say, "This is legal and this is illegal," but now the Commission takes it on itself to answer letters?

Mr. DIXON. To render advisory opinions.

Mr. EVINS. How is this working out?

Mr. DIXON. I think it has been accepted more enthusiastically by the business community than anything we have ever done. I hope, as we go along through the years, that we can solve more and more of our problems in this way.

In adopting this rule we said to the business community that where possible and practicable we will, if you will come to us in good faith, render an advisory opinion on proposed courses of action and it will be binding upon the Commission at least until and unless the Commission serves notice on the parties that it has new facts, and then it will afford an opportunity to the parties to come in before further action is taken.

Mr. THOMAS. May I interrupt there? The salvation of this Commission is in this Bureau unless you get an army. You have to do it through cooperation. If you do not, you will have 10,000 employees.

Mr. DIXON. Mr. Chairman, we feel we owe this to the American businessman and I think the American businessman, if he does not seek this advice, is ill put if he says the Commission is harassing him.

Mr. OSTERTAG. Will you give us an example of how this works?

Mr. DIXON. One of the difficult areas is the granting of promotional allowances. The law does not prohibit the granting of promotional allowances but it prohibits the granting of promotional allowances on an unequal basis. Everybody cannot handle the same promotion and the businessman can devise comparable substitutes but at least he must devise a plan that would appear equitable. So we welcome the businessman seeking advice and saying, "This I propose to do. I do not want to do it and then have you sue me." We have gotten requests in this area, sir. I am reminded by Commissioner Elman we had a ques-

tion come from a small casting manufacturer in the Midwest. He did not want to use a system of discounts unless he had clearance. We had quite a problem here but we were able to determine these were engineered things and were not comparable. So we were able to grant this clearance to this man and yet he was proper and correct in coming to us because if he had just done this and we had a complaint, we might have sued this man.

Mr. JONAS. How long does it take you to handle one of these requests for an advisory opinion?

Mr. DIXON. Some of them are difficult and some are not so difficult.

Mr. JONAS. Can anybody handle them except the Commission?

Mr. DIXON. We have a Chief of the Division of Advisory Opinions. This takes a great deal of expertise to do it. We are trying to build this division up.

Mr. EVINS. This is not all done by writing but also by oral conferences?

Mr. DIXON. That is right. There is a great deal of letterwriting and also oral conferences required.

Mr. EVINS. On an average, how long after a man writes in a letter does he get a reply?

Mr. DIXON. Some want it the next day. We have granted about 11 of these things. We have turned down a lot of them. We have granted 11, rendered 27.

Mr. JONAS. How many requests have you had?

Mr. DIXON. 120.

Mr. EVINS. How widespread is this known in the business community?

Mr. DIXON. I have done my best to have it widely known. I have made several speeches and press releases have been issued and there has been a lot of discussion of it.

Mr. OSTERTAG. I notice you anticipate 300 requests next year.

Mr. DIXON. I would be afraid to guess how many we will get next year.

Mr. OSTERTAG. Then, on what basis do you establish that figure?

Mr. DIXON. The worst thing that could happen would be if we got 500 requests and they would say, "When will you get to me?"

Mr. EVINS. You have five members. You write a letter——

Mr. DIXON. By direction of the Commission.

Mr. EVINS. Suppose you have a 3 to 2 opinion. Do you tell the man, "This is a borderline case"?

Mr. DIXON. If any of the dissenters would want to have it noted, we would do that. They have that right. That has not happened yet.

Mr. EVINS. I think our chairman is correct that this is an area that is useful particularly to the small business community.

BUREAU OF ECONOMICS

We will turn to the Bureau of Economics.

Put pages 114 through 120 in the record.

(The pages referred to follow:)

Bureau of Economics

	Allotment, fiscal year 1963		Requested, fiscal year 1964		Increase, fiscal year 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
Office of the Director	42	$239,000	46	$271,000	4	$32,000
Division Economic Evidence	29	262,000	29	281,000	----------	19,000
Division of Economic Reports	16	150,000	24	217,000	8	67,000
Division Financial Statistics	39	249,000	39	271,000	----------	22,000
Total, personal services	126	900,000	138	1,040,000	12	140,000
Travel	----------	5,000	----------	10,000	----------	5,000
Other expenses	----------	3,000	----------	3,000	----------	----------
Total	126	908,000	138	1,053,000	12	145,000

Bureau of Economics

The functions of this Bureau are to give to give economic assistance and advice to the Commission in its investigational and trial work and to conduct economic studies in response to requests by the Congress, the President, or the Commission.

OFFICE OF THE DIRECTOR

This Office exercises general supervision over the Bureau's three divisions. These responsibilities are exercised by the Director, who is also the Commission's Chief Economist, and the Assistant Director.

Also in this Office are the Bureau's Stenographic Section and Statistical Services Section. The latter unit, in addition to providing statistical assistance to the Bureau's Division of Economic Evidence and Division of Economic Reports, provides some statistical and clerical assistance to other divisions in the Commission.

Because the demands of the stenographic and statistical units parallel those of the divisions which they service, it is anticipated that for fiscal 1964 an increase of four employees will be required (two GS–5 statistical clerks and two GS–4 typists) at a cost of $17,000, and $15,000 for increased pay costs.

DIVISION OF ECONOMIC EVIDENCE

The Division of Economic Evidence has primary responsibility for providing economic assistance to the legal bureaus and divisions in connection with the investigation and trial of cases. In addition, the Division is responsible for identifying, recording, and developing information regarding mergers and acquisitions. The Division also reviews section 6 surveys initiated by the legal bureaus and assists with the processing of such surveys.

During fiscal 1962, economists in the Division rendered economic assistance on 86 cases and investigations, 68 of which involved mergers. Twenty-five of these 68 cases and investigations were merger cases where complaint had been issued, while 43 cases were in various stages of investigation. The Division also recorded and assembled the basic available data on 1,360 mergers during fiscal 1962. In addition to economic assistance on mergers, the Division assisted on 4 investigations by the Compliance Division; 12 investigations involving false and deceptive practices; and 7 cases and investigations involving price discriminations or unfair methods of competition.

Further economic assistance on casework was provided to the legal divisions by some economists assigned to the Division of Economic Reports. This was necessary because the relatively small number of economists in the Division of Economic Evidence could not supply even the most urgent demands for assistance by the legal bureaus. During fiscal 1962 about 37 percent ($51,000) of the expenditures of the Division of Economic Reports was devoted to assistance in economic evidence work. Because of the continuing heavy demand for assistance in economic evidence matters, six employees from the Division of Economic Reports have been transferred to the Division of Economic Evidence.

An indication of the demand for economic assistance is shown by the fact that there are presently 90 merger cases and investigations that require economic assistance; 23 of these 90 are in complaint and 67 are under formal investigation. No funds are requested for additional personnel for this Division is fiscal 1964 but the present demands for assistance are such that the Division will be hard pressed to meet its full responsibilities for economic assistance to the legal divisions; however, $19,000 will be necessary to pay the increased pay costs.

DIVISION OF ECONOMIC REPORTS

Because of the demands for economic evidence work during fiscal 1962, about 37 percent of this Division's work was devoted to aiding the Commission's investigative and case work. The economic data and expertise gained as a result of its inquiry into food retailing (published in fiscal 1960) enabled this Division to render valuable assistance in the Commission's three merger cases involving food chains.

The Division of Economic Reports completed all research work on its "Inquiry Into Food Marketing, Part II: Integration and Concentration in the Frozen Fruit and Vegetable Industry." This report has been submitted to the Commission for final approval and will be released to the printer shortly. The Division also continued work on part III of its "Inquiry Into Food Marketing: Integration and Concentration in the Canned Fruit and Vegetable Industry." This phase of the study was not completed during fiscal 1962 because of the pressing demands of other work.

During 1962 the Division initiated preliminary work on several new economic studies which will be continued during fiscal 1963. One of these deals with intercorporate relationships. This study, which was mentioned in last year's budget justification, is being planned in consultation with other Government agencies, including the Department of Justice. The Commission has approved this study and clearance of the questionnaire is now before the Bureau of the Budget.

The Division also initiated a study into the changing structure and organization of the dairy industry. This study, which will be based largely upon information already in the Commission's files, should prove valuable to the Commission and others in developing an adequate understanding of the many complex competitive problems in this industry.

Some preliminary work was done in fiscal 1962 on a study of merger activity since the passage of the Celler-Kefauver amendment to the Clayton Act by the large manufacturing and merchandising corporations. Should this study be given final approval by the Commission, the Division will proceed in fiscal 1963 to collect the necessary data and plan for the preparation of an economic report on this subject. An economic study of the type indicated would be of great assistance to the Commission in screening new mergers and it would give the Congress, the Commission, and the public some insight as to how important mergers have been in promoting the growth of large companies. It would also enable the Commission to make some judgments with respect to changes, if any, in the types of merger activity that have occurred over the period studied.

Finally, the Division has initiated a research program aimed at developing reliable economic information useful in selecting merger and other possible violation of statutes enforced by the Commission. It anticipates that economic studies of particular industries may be conducted without requiring a large number of personnel for each study. As part of this program the Division of Economic Reports has made preliminary studies of several industries, including glass, copper, paper, and polyethylene-polypropylene. By supplementing information already in the Commission's files and available from secondary sources with information from industry, it should be possible to develop a more expeditious and less costly program of economic studies than has been possible in the past.

The Division has underway, at the direction of the Commission, a study of the polyethylene-polypropylene industry. A formal investigation of this industry under section 6(b) of the Federal Trade Commission Act is now in process. The questionnaires have been mailed and the Division expects the data collected on this industry not only to form the basis of an economic report, but to be useful in determining if there have been violations of the Clayton Act and the Federal Trade Commission Act.

To carry on effectively the planned research work of this Division will require additional staff. Since the pressing requirements of casework necessitated the transfer during 1962 of six economists from the Division of Economic Reports to the Division of Economic Evidence, eight additional economists should be added to the Division of Economic Reports. The Division now has 15 professional economists and although the 8 additions to the staff will materially strengthen the Division, this number is still inadequate to make the maximum economic contribution to the Commission's program and policy planning, and is far fewer than were involved in such work during the early decades of the Commission's existence. We believe, however, this number is a realistic estimate in view of the difficulties involved in recruiting qualified research personnel in this area.

An increase of $58,000 is requested for these eight additional economists (two GS–12's, two GS–11's, two GS–9's, and two GS–7's), and $9,000 to cover increased pay costs.

DIVISION OF FINANCIAL STATISTICS

Effective June 1, 1962, the Division of Financial Statistics, formerly in the Office of the Comptroller, was transferred to the Bureau of Economics. The primary function of the Division of Financial Statistics has been to collect and summarize each quarter uniform financial data obtained by a probability sample survey of all enterprises except newspapers, which are classified as manufacturers and are required to file U.S. corporate income tax form 1120. The purpose of the sample survey is to produce an income statement and balance sheet for all manufacturing corporations, classified by industry and asset size.

The Division collects financial data from more than 8,500 nonregistered manufacturing corporations. The Securities and Exchange Commission supplies summarized financial data for all registered manufacturing corporations to the Division, which then combines the data for both the registered and nonregistered corporations and publishes the summaries as a quarterly financial report for manufacturing corporations. These reports, showing profits per dollar of sales and other financial data classified by industry and asset size, have been published quarterly since 1947 and are sold on a subscription basis by the Superintendent of Documents.

The financial reporting program is basically a service function carried on for other Government agencies and for private industry. In addition to Government agencies, there are some 15,000 non-Government subscribers for the quarterly financial report. No additional funds for personnel are requested for this Division for fiscal 1964; however, $22,000 will be necessary to pay the increased pay costs.

In addition to the increases listed for personnel services, $5,000 additional travel funds will be necessary in fiscal 1964 to restore the reduction required in fiscal year 1963 caused by the required absorption of the pay costs.

Expenditures by functional breakdown

	Actual expenditures, fiscal year 1962	Allocated, fiscal year 1963	Total requested, fiscal year 1964	Increases or decreases (–)
Economic reports:				
Food	$89,826	$50,000	$40,000	–$10,000
Polyethylene-propylene	----------	20,000	40,000	20,000
Intercorporate relations	----------	50,000	100,000	50,000
Mergers	----------	20,000	50,000	30,000
Webb Pomerene	----------	20,000	22,000	2,000
New studies	38,976	25,000	25,000	----------
Assistance to other bureaus	312,601	365,000	394,000	29,000
Financial statistics [1]	----------	240,000	262,000	22,000
Other: Supervision	83,645	118,000	120,000	2,000
Total	525,048	908,000	1,053,000	145,000

[1] Effective June 1, 1962, the Division of Financial Statistics, conducting this work, was transferred to the Bureau of Economics.

Bureau of Economics—Personnel as of Dec. 31, 1962

	Total	Economists	Statisticians and accountants	Stenographic and clerical
Professional:				
GS–16	2	2		
GS–15	2	2		
GS–14	7	5	2	
GS–13	13	9	4	
GS–12	8	6	2	
GS–11	3	3		
GS–9	10	5	5	
GS–8	1		1	
GS–7	15	4	11	
Stenographic, clerical, etc	61			61
Total	122	36	25	61

NOTE.—Total annual salaries, $906,180.

Mr. EVINS. You are asking for an increase of 12 on the staff of the Bureau of Economics.

COST OF PROPOSED CORPORATE SURVEY

Mr. DIXON. May I call your attention to page 119. On page 119 you will note of the total amount of increase being asked, $50,000 is being requested for this intercorporate relations matter that we have discussed here. I want to make that clear to you so that you can determine there is only $50,000 of that amount of money for that.

Mr. EVINS. The other funds are for your other statistics and reports?

Mr. DIXON. Yes.

Mr. JONAS. Will the gentleman yield?

Mr. EVINS. Mr. Jonas.

Mr. JONAS. You are spending about 10 percent of your money on this bureau, is that right?

Mr. DIXON. A little short of 10 percent; yes, sir.

DUPLICATION OF ECONOMICS ACTIVITIES

Mr. JONAS. How many agencies of the Government are engaged in duplicating these activities?

Mr. DIXON. I do not know exactly how many economic agencies there are in the Government, but I do not know of any that duplicates our activities.

Mr. JONAS. Does not the Department of Commerce do what you do?

Mr. DIXON. No, sir, they do not.

Mr. JONAS. They have a bureau in the Department that I believe is engaged in identical work.

Mr. DIXON. A great bulk of our work is in the direction of the prosecution or building of so-called antitrust cases. A great deal of our efforts are in the antimerger cases. We cannot find, in any other agency, the type of information it is necessary to have. That is why we had to go to the Bureau of the Budget to get this clearance.

Mr. JONAS. What is the difference between your questionnaire and that of the Department of Commerce?

Mr. DIXON. The Department of Commerce is not interested in the same information necessary for us to have.

Mr. JONAS. What about the Bureau of Census?

Mr. DIXON. The Bureau of the Census, in the business census made every 4 years, would obtain a lot of information we could use. We can find the national universe in their reports. But we cannot whittle it out. We are driven here to a definitive type of thing. They go to the fifth decimal point in the census. We will go as low as seventh.

Mr. JONAS. Is that necessary?

Mr. DIXON. It is absolutely necessary. Say the paper industry can make 100 products and they acquire a company that only makes one of the hundred, they will keep their statistics in a package. You have to have a measure of this line and of this company.

Mr. JONAS. Instead of harassing the business community to death by a multitude of questionnaires, why do you not get together with Census and compile the questions to be asked and ask them all at one time? You would be surprised at the complaints I get from businessmen being harassed for statistics.

Mr. DIXON. May I remind you that in the St. Regis case we attempted, and we asked, by our demand process, for the furnishing to us of a copy of the report sent to the Census from parties. We ran into resistance. We went all the way to the Supreme Court on that question. We got to the Supreme Court with the Bureau of the Budget and the Solicitor General against us, saying this would destroy the gathering of this information. The Supreme Court ruled in favor of the Federal Trade Commission then it took Congress exactly 2 months to pass a law putting it back in the confidential status. We cannot get it.

OPERATING EXPENSES

Mr. EVINS. We will take up Operating expenses, and place pages 121 through 124 in the record.

(The pages referred to follow:)

Operating expenses

	Allotment fiscal year 1963	Requested, fiscal year 1964	Increases, fiscal year 1964
Travel	$601,000	$679,000	$78,000
Transportation of things	22,000	22,000	
Communication services	146,500	162,000	15,500
Rents and utility services	100,000	125,000	25,000
Printing and reproduction	100,000	100,000	
Other contractual services	226,000	241,000	15,000
Supplies and materials	140,000	170,000	30,000
Equipment	65,000	80,000	15,000
Grants, subsidies, and contributions	604,000	684,000	80,000
Taxes and assessments	9,000	9,000	
Total	2,013,500	2,272,000	258,500

There are listed above increases for operating expenses including those charged to operating programs. These increases are based upon estimated requirements for Commission operations for the fiscal year 1964 at the levels set forth in the detailed justification.

TRAVEL

Funds in the amount of $679,000 are requested for travel during fiscal year 1964. This represents an increase of $78,000 over funds available for this purpose in fiscal year 1963 including $50,000 reduced from the 1963 allocation as a part of the required absorption of the 1963 pay raise cost. The increases to the various bureaus are as follows: Office of General Counsel, $1,000; hearing examiners, $8,000; Bureau of Restraint of Trade, $25,000; Bureau of Deceptive Practices, $18,000; Bureau of Textiles and Furs, $16,000; Bureau of Field Operations, $5,000; and Bureau of Economics, $5,000. Details of the travel justifications will be found in the bureau estimates.

TRANSPORTATION OF THINGS

Funds in the amount of $22,000 are requested for this item in 1964. This represents no increase over the allocation for 1963.

COMMUNICATION SERVICES

Funds in the amount of $162,000 are requested for communication services which represents an increase of $15,500 over the allocation for 1963. This represents the additional cost of telephone, telegraph, and postal services which will be required in 1964.

RENTS AND UTILITY SERVICES

Funds in the amount of $125,000 are requested for fiscal year 1964, which represents an increase of $25,000 over the allocation for 1963. Of this increase $5,000 will be required to pay for additional space needed as a result of staff increases; and the remaining $20,000 will be required to pay the additional cost of IBM, Xerox machine rentals and rental of motor pool automobiles in Washington. There is set forth below a summary itemizing the estimated increases in rental costs for the fiscal year 1964.

Commission car—motor pool	$2,000
IBM machine rental	15,000
Haloid Copyflo and Xerox equipment	3,000
Field office rental (to GSA)	5,000
Total	25,000

PRINTING AND REPRODUCTION

Funds in the amount of $100,000 are requested for the printing of the Commission's Volume of Decisions, Statutes, Court Briefs and miscellaneous administrative printing. This represents no increase over the allocation for 1963.

OTHER CONTRACTUAL SERVICES

This account includes all contractual services not otherwise classified. The items included under "other contractual services" are listed on the following page:

	Allotment, fiscal year 1963	Requested, fiscal year 1964	Increases, fiscal year 1964
Building repairs and alterations	$25,500	$25,500	
Stenographic reporting services	16,500	16,500	
Corporate statistics (BOASI)	3,000	3,000	
First-aid services (New York and Kansas City offices)	1,500	1,500	
Witness fees:			
Litigation	8,000	8,000	
Medical witnesses	4,000	4,000	
Purchase of exhibits and testing	80,000	87,000	$7,000
Employee insurance	30,500	33,500	3,000
Employee health program	57,000	62,000	5,000
Total	226,000	241,000	15,000

Details concerning the requested increase of $7,000 for clinical and scientific testing will be found in the justification for the Division of Scientific Opinions, Bureau of Deceptive Practices.

SUPPLIES AND MATERIALS

Funds in the amount of $170,000 are requested for supplies and materials representing an increase of $30,000 over the allocation for 1963. This is the estimated increased cost based upon the new employees requested.

Included in this report is the cost of the annual library order for subscriptions and publications amounting to approximately $28,000 which is no increase over the actual cost for 1963.

EQUIPMENT

Funds in the amount of $80,000 are requested for new equipment in the fiscal year 1964. This represents an increase of $15,000 over the allocation for 1963. The $15,000 consists of the following items:

12 typewriters	$5,300
4 calculators	3,400
14 dictaphones	6,300
Total	15,000

The above equipment estimates are extremely conservative and are dependent on securing a large amount of excess property from other Government sources.

The calculators and adding machines represent a modest program of replacement of obsolete machines over 20 years old.

GRANTS, SUBSIDIES, AND CONTRIBUTIONS

Funds in the amount of $684,000 are requested for the agency's share of employee retirement costs during the fiscal year 1964. This represents an increase of $80,000 which is based upon the increase requested for personal services plus the additional amount required for the pay raise cost in 1964.

TAXES AND ASSESSMENTS

Finds in the amount of $9,000 will be required to pay the Commission's portion of FICA taxes. This represents no increase over funds allocated in 1963.

Mr. EVINS. "Travel" is up $78,000; "Transportation of things," there is no increase; "Communication services" has an increase of $15,500; "Rents and utility services," you have an increase of $25,000; there is no increase in "Printing and reproduction."

You have an increase of $80,000 for "Grants, subsidies, and contributions." What is that?

Mr. GLENDENING. Civil service retirement contributions.

Mr. EVINS. Mr. Chairman, I want to commend you and your staff for a very fine presentation. I think it was an excellent hearing.

Mr. THOMAS. I have one more question.

PRINTING AND REPRODUCTION

You have a $100,000 item for "Printing and reproduction." How many pamphlets are you printing and producing every year outside of your annual report, and what does your annual report cost? We find more and more publications that take up more and more storage space. About half of it is probably wasted.

Mr. GLENDENING. Mr. Chairman, that $100,000 is the cost of the printing of the Federal Trade Commission's decisions, its briefs, its

appellate records, and everything that we pay for being printed at the Government Printing Office or through the direction of the courts.

Mr. THOMAS. Break down your $100,000.

Mr. GLENDENING. Last year our briefs and the court printing ran $58,000. We have approximately $70,000 in this year for that work. The Commission's decisions and the Commission's annual report, plus a couple thousand dollars for standard forms and other items we buy from the Government Printing Office, will amount to $30,000. That is the $100,000. One brief alone we estimate will cost $50,000.

Mr. THOMAS. What is the cost of the Commission's decisions?

Mr. GLENDENING. It was $32,000 last year and it will be not less this year.

Mr. THOMAS. Are there any sales of the Commission's decisions by the Government Printing Office? What do they sell for?

Mr. GLENDENING. Very low. It depends on the size of the volume.

The Superintendent of Documents charges from $3 to $7 a volume for it.

Mr. THOMAS. Any further questions?

Thank you very much, gentlemen.

WEDNESDAY, JANUARY 23, 1963.

U.S. CIVIL SERVICE COMMISSION

WITNESSES

JOHN W. MACY, JR., CHAIRMAN
FREDERICK J. LAWTON, COMMISSIONER
ROBERT E. HAMPTON, COMMISSIONER
WARREN B. IRONS, EXECUTIVE DIRECTOR
ANDREW E. RUDDOCK, DIRECTOR, BUREAU OF RETIREMENT AND INSURANCE
DAVID F. WILLIAMS, DIRECTOR, BUREAU OF MANAGEMENT SERVICES
W. B. UHLENHOP, CHIEF, BUDGET AND FINANCE DIVISION
J. A. HAMILL, CHIEF, BUDGET SECTION

Mr. THOMAS. Gentlemen, the committee will please come to order.

We have with us this morning the Civil Service Commission. We always welcome this group. We feel very close to you. We have with us the very able and distinguished Chairman, Mr. John W. Macy, Jr.; Commissioner Frederick J. Lawton, well and favorably known to the committee; Commissioner Robert E. Hampton, the new Commissioner; Mr. Warren B. Irons, the Executive Director, certainly one of the mainstays of the Commission, most affectionately regarded; Mr. Andrew E. Ruddock, Director of the Bureau of Retirement and Insurance; David F. Williams, Director, Bureau of Management Services; W. B. Uhlenhop, Chief, Budget and Finance Division, an oldtimer and highly regarded; and J. A. Hamill, Chief of the Budget Section, also an oldtimer.

Gentlemen, you are all welcome. We are delighted to have you. Where are your other bureau heads?

Mr. MACY. They are not with us. The other bureau heads are Donald Harvey, Director of the Bureau of Recruiting and Examining; O. Glenn Stahl, Director of the Bureau of Program and Standards; Kimbell Johnson, Director of the Bureau of Personnel Investigations; and Seymour Berlin, Director of the Bureau of Inspections.

Mr. THOMAS. We would like to do business with those distinguished gentlemen. Why did you not bring them along?

Mr. MACY. We did not want to fill your room to overflowing.

Mr. THOMAS. There are vacant seats. We get lost in here without 20 or 30.

Mr. Chairman, have you or any of your fellow Commissioners, Mr. Irons, or any of you a statement for us? We would be delighted to listen to it. You might tell us something about your many accomplishments during the year and your hopes and aspirations for the future. You might advise us, on or off the record, when you hope to get this budget down.

GENERAL STATEMENT

Mr. MACY. Mr. Chairman and members of the committee, I have a brief statement for the committee.

It is a pleasure for us to meet with you again to discuss the program goals and financial requirements of the Civil Service Commission.

A year ago I indicated to you that the Commission was in the process of making several significant changes in its organization. Among these were the closing of our regional office at Cincinnati, Ohio, the establishment of area centers for the processing of national agency check and inquiry investigations, and the combining of the recruiting, examining, and inspection functions in our regional offices. During 1962 we proceeded to complete these reorganizations and I am glad to be able to report, that they are working effectively and efficiently. The savings realized in operations and administrative costs have enabled the Commission to assume new responsibilities and increased workloads without an increase in appropriations. These economies are reflected in reduced unit costs in fiscal years 1963 and 1964 in the budget document before you.

I would like to discuss briefly and highlight the principal changes in the various appropriations and funds for which the Civil Service Commission has responsibility.

SALARIES AND EXPENSES

The President requested all agencies, in the preparation of the 1964 budget estimates, to absorb as much of the increased costs resulting from the Federal Salary Reform Act of 1962, Public Law 87–793, as possible in both fiscal years 1963 and 1964. In accordance with this policy, the Commission expects to absorb in 1963, through increased efficiencies in all programs, $372,000 of these increased costs, and $366,000 in fiscal year 1964 through a continuation of these economies. The cost of Public Law 87–793 to the Commission's salaries and expenses appropriation in 1963 will total $966,000, including salaries and related costs, postage costs, and $100,000 to compute the increases in

annuities and benefits under the civil service retirement system as provided by the act. The Commission will absorb 38½ percent of this cost and request a supplemental appropriation for the balance.

The budget request for fiscal year 1964 for salaries and expenses is $22,180,000, an increase of $237,000 over the amount programed for the current fiscal year which includes a supplemental request for increased pay. This increase is entirely the result of the higher pay scales to be effective during the latter part of fiscal year 1964. At the 1962 salary level, without regard to Public Law 87–793, the amount requested for 1964 is $400,000 less than the 1963 appropriation.

Through greater efficiency of operation, the Commission expects to carry out its responsibilities and maintain its workloads on a current basis in fiscal year 1964 with 48 fewer positions than in 1963, and without any decrease in the level or quality of services to the agencies and the public.

Investigation of U.S. Citizens for Employment by International Organizations

This appropriation is used to finance investigations by the Civil Service Commission and the Federal Bureau of Investigation of U.S. citizens seeking employment by international organizations. The Commission and the FBI are merely the service organizations in this regard and have no control over the workloads received. However, since it is imperative to the national interest that the number of U.S. citizens employed by the various international organizations be commensurate to other factors involved, the prompt investigation of these cases is of vital importance.

During the past year the Commission has experienced rather serious difficulty in this program due to a lack of funds. A total of 136 requests for investigation received during the latter part of fiscal year 1962 had to be held over from 6 weeks to 3 months until the 1963 appropriation became available. This fact together with an increase in receipts in the current fiscal year and the reduction of $82,000 sustained in the 1963 budget request, require that a supplemental appropriation of $200,000 be requested for fiscal year 1963.

RESULTS OF INVESTIGATIONS

Mr. Thomas. Were any of the people involved in those 136 requests held over for 60 to 90 days put on the United Nations payroll until your investigation was completed, do you know?

Mr. Macy. To my knowledge, none of them were placed on the roll until the investigation was completed.

Mr. Thomas. We think this investigative work for those people is important and ought to be done, but in our investigation of the expenditure of these funds through the years, I think the record stands now unchallenged that the persons who have been fired from the United Nations by virtue of your investigation to date have been one.

Mr. Macy. That is, one employee was dismissed because of the information on loyalty grounds. The United Nations and the other international agencies use the information provided by the investigation in making suitability judgments. In many instances they deter-

mine not to select for that particular reason. This means that we are providing additional information.

Mr. THOMAS. Am I correct that only one has been dismissed?

Mr. MACY. Only one in the last 5 years. Prior to 1957, I believe there were five additional cases where there was removal.

Mr. IRONS. We have had one, as a matter of fact, in the last 5 years actually removed from the rolls as a result of the findings of the investigation.

Mr. THOMAS. How does that stack up on a percentage basis with the results of the investigations of our own people for our own governmental agencies?

Mr. IRONS. I do not think we have had to fire anybody from the Federal service for loyalty reasons.

Mr. THOMAS. Fire or fail to put on the payroll. You are supposed to investigate them before they go on the payroll. That is the purpose.

Mr. IRONS. That is right. I am trying to see if I have any figures here on how many applicants were not hired as a result of the investigation.

Mr. WILLIAMS. That information is not available.

Mr. EVINS. It looks as if your investigations are for naught. You make an investigation and do not know the end result.

Mr. MACY. The information is given to the international agency, and it is then their decision as to whether they hire or not. So, as you say, we do not know exactly what judgments are made based on the information.

Mr. THOMAS. Would it not be to the advantage of the investigating agency—in this particular case, the Civil Service Commission—to follow it up as a matter of information? Certainly our Ambassador and our responsible people there, including administrative officers, would furnish that information to you, would they not? It certainly would not be secret, would it, if you do the investigating work?

Mr. MACY. The information could be secured.

Mr. THOMAS. We understand you are purely a service agency, and that is all; but, after all, the taxpayers of the United States are entitled to a little bit more information than they get as to the results of it. There is no criticism of your agency. You do your job and do it expeditiously. We have every reason to believe that you have done well. We have no proof to the contrary. Still, at the same time, what is the net result of the expenditure of the money?

Mr. MACY. In our judgment, this does constitute a very substantial expenditure of funds as measured by the specific results. We are in the process of reviewing this program with the State Department at the present time. This review may well result in some revision.

Mr. THOMAS. Next year, let us have some information which can be published. You can get it. You are not prying into any information in the State Department or the United Nations that you are not entitled to. You made the investigation, and certainly you are entitled to more information than you have.

Mr. MACY. Mr. Chairman, I would believe this is an expenditure which is directly related to the U.S. contribution to international agencies, and should be viewed as such.

Mr. THOMAS. Excuse the interruption. Proceed.
Mr. MACY. I appreciate your underlining the point.

PROGRAM FOR 1964

The budget request for fiscal year 1964 is $670,000, an increase of $40,000 over the amount required for this fiscal year including the supplemental request. Excluding increases brought about by Public Law 87–793, the requirements for 1964 are $608,000. The budget request is based on information received from the Department of State concerning the number of new positions expected to be filled by international organizations in fiscal year 1964.

We are advised that the 1964 budget for the United Nations is expected to be increased by $22 million and the budgets of many international organizations will also be increased appreciably. A total of 1,176 new positions are expected to be created in the United Nations and the major international organizations. At the present time U.S. citizens are employed in 27 percent of United Nations positions and the overall percentage of U.S. citizens employed in international organizations is 17 percent. If the United States is to maintain these percentages, approximately 245 Americans will be placed in new positions next year. The increase of 300 investigations estimated for fiscal year 1964 is, I believe, conservative in the light of these facts.

PROMPT PROCESSING OF INVESTIGATIONS

As I have indicated, the prompt processing of these investigations is of vital importance to this whole program. There is no question but that delays in investigations in the past have reduced the number of U.S. citizens employed by the international organizations. Quite naturally, when delays occur, or appear likely to occur, these organizations tend to employ other nationals who are more readily available. Also, many of our most qualified citizens are reluctant to apply when they learn that several months may elapse before they can report for duty, even after being selected.

Mr. THOMAS. Can you really substantiate that statement? After all, the hiring and the firing is not up to our own State Department, is it?

Mr. MACY. No; but the view in the State Department is that because of the amount of time involved in processing the investigations, the international organizations will frequently consider other nationals for vacancies in international organizations, rather than wait the period of time that is necessary to have the report with respect to the American candidate.

Mr. THOMAS. The report is not binding on the international organization, is it?

Mr. MACY. No; but the understanding has been, since this program went into effect in 1953 under Executive Order 10422, that the Secretary General of the United Nations and the heads of the other international agencies would be guided by the information produced in these investigations on American candidates for positions. So, they

have awaited the receipt of these reports before making final employment decisions.

PERCENT OF U.N. JOBS OCCUPIED BY U.S. CITIZENS

Mr. OSTERTAG. These investigations would be applicable only to U.S. citizens, is that correct?

Mr. MACY. That is correct, sir.

Mr. OSTERTAG. And too, these employees constitute a percentage of the total number employed by the United Nations. Therefore, the purpose of the investigation does not completely cover the whole operation of the United Nations.

Mr. MACY. No. The investigations cover only U.S. citizens. As I have indicated, Americans are in roughly 17 percent of the positions in the international organizations.

Mr. EVINS. Have you any information as to why the United States, which provides the greater proportion of the funds for the United Nations, which pays the lion's share and has voted funds to refinance them when they are in difficulty, which carries the burden of the financial backing of the U.N., has only 17 percent of the employees in the U.N.?

Mr. MACY. I believe the delay in this program is one of the contributing causes. The answer to your question in policy terms, however, would have to come from the Secretary of State. This review that I referred to a moment ago is aimed at examining the existing pactices of our Government with respect to the number of Americans in international organizations. The same concern that you express has been expressed within the executive branch and is under review.

Mr. JONAS. You could establish that beyond speculation by checking into the situation that obtained before this Executive order went into effect. Did we have a higher percentage of employees in international organizations in 1950, for example?

Mr. MACY. This could be done, but the situation has changed so dramatically since that time that I do not think the comparison would be too clear.

Mr. JONAS. Even if we did not have this timelag, I do not think we had a higher percentage of employees then than we have now.

Mr. THOMAS. I think you put your finger on it, Mr. Jonas. The more we see of this program, the less value I would put on it. If we controlled the hiring and the firing, it would be something else, but we do not. It merely begs the question to say you pay 40 percent of the total cost or approximately that figure, and have about 17 percent of the personnel and hope to step it up to 27 percent. You also raise another very serious question. If we are to dominate the personnel, the charge might be hurled at us that it is not a United Nations operation, even though we are paying more than our pro rata part. Some of our unfriendly nations may object to that.

Mr. MACY. I think it can be said that we do not have our fair share of the positions in these organizations.

Mr. JONAS. You said a minute ago that in the last 5 years only one person had been rejected.

Mr. MACY. Had been removed.

Mr. JONAS. Do you have any information or statistics which would indicate how many U.S. citizens have been employed by international organizations despite derogatory information in your reports?

Mr. MACY. No, sir; I do not have that information.

Mr. JONAS. Would it be fair to speculate that you have cleared everybody who has applied?

Mr. MACY. We have sent advisory opinions with respect to the individuals on whom we or the FBI have conducted investigations indicating the derogatory information that is present. Those are turned over to the State Department, and the State Department in turn turns them over to the international agency. We do not have a report back.

Mr. JONAS. Can you tell us why you do not get a report to indicate whether your adverse information has been accepted as fact or whether the international organization has acted contrary to the information that you gave them?

Mr. MACY. It is my impression that where the Commission has presented adverse information, the candidate concerned has not been employed by the international agency. But we do not have verification of that. This is a statement that has been made to me by high level U.S. citizens in the international agencies.

Mr. RHODES. Actually is there not agreement between the United States and the United Nations that no American national will be employed unless the American national has received an OK from our State Department?

Mr. MACY. Yes, that is the general understanding that exists.

Mr. RHODES. So, actually no name goes forward to the international organization unless the State Department has OK'd it; is that not correct?

Mr. IRONS. The Secretary General of the U.N., as I understand it, retains his authority to hire or to fire whomever, in his judgment, should be hired or fired. There is some form of general agreement with the Department of State to accept advisory opinions from the Department of State. Whether they are accepted in whole or in part, we have no information in the Civil Service Commission. We are paid just to make an investigation, and we do not know the final result.

I would like to read some figures into the record which may put this in perspective in view of some of the questions which have been asked as to the volume. Since the beginning of this program in 1953 through January 12 of this year, we have actually received for investigation 12,197 cases. Of that, we have found no derogatory information of any kind in 9,462 cases. We have found some form of derogatory information—it might be a question of loyalty, it might be a question of excessive drinking, it might be a question of perversion, and so on—totaling 2,390. We know in addition there were 322 cases that were discontinued while we had them under investigation. For some reason or other that we know nothing about, the international organization and the candidate discontinued negotiation. That adds up to 12,174, which is just 23 less than the total number we processed, and that 23 we have under investigation now.

So, any way you look at it, the vast majority of the candidates come out with a good, clean bill of health.

Of the 2,390 in which we provided them with some form of derogatory information, we do not know how many they hired and how many they did not hire.

Mr. JONAS. We would pretty nearly have to have that information in order to make an evaluation.

Mr. THOMAS. Does that check with your table on page 119, Mr. Chairman?

Mr. IRONS. This is as of January 12, 1963.

Mr. THOMAS. You gave figures covering a period of 5 years.

Mr. MACY. Ten years. The figures Mr. Irons cited were for the total period.

Mr. THOMAS. I thought you said 5 years. I beg your pardon.

Mr. MACY. This is for the entire program.

INVESTIGATION CASELOAD ON U.S. CITIZENS

Mr. THOMAS. Gentlemen, turn to page 119, and you can check the figures which Mr. Irons gave you.

Mr. MACY. The table on page 119 covers 3 years—the 1962 actual, 1963 program, and the projections for 1964.

Mr. THOMAS. You did not have a shortage of funds in 1962, and for all practical purposes you had the same number of cases. Why do you have this shortage?

Mr. MACY. We were able to handle 899 cases with the funds we had in 1962. We carried over 136 cases.

Mr. THOMAS. But you did not carry over any in 1962 and 1963 which you are talking about now. Your carryover is from 1963 to 1964, is it not?

Mr. MACY. No. The carryover is from 1962 to 1963, because we had inadequate funds in 1962 to meet the entire workload.

Mr. THOMAS. What was your workload in 1960 and 1961? Your table shows it only for 1962.

Mr. MACY. That is right.

Mr. THOMAS. What does your workload show for 1960 and 1961?

Mr. MACY. The workload for 1960 was 772 and for 1961 it was 987.

Mr. THOMAS. I do not recall that in the hearings last year—the members can refresh my memory—anything was said about a stepped-up workload or any appreciable step-up of the workload in 1960, 1961, or 1962.

Mr. MACY. Yes, I believe in our statement at this time last year we asked for more.

PRIOR APPROPRIATIONS FOR INVESTIGATION OF U.S. CITIZENS

Mr. THOMAS. What was your budget estimate for 1962 and 1963, and what were the funds appropriated? Let us turn to the subcommittee print. Do you have your report for 1963? For 1960 and 1961, what was the budget estimate and what was the appropriated fund?

The CLERK. For 1960, the estimate was $412,000; the appropriation, $400,000.

Mr. THOMAS. What about 1961?

The CLERK. For 1961, the estimate was $467,000; the appropriation, $400,000. There was a supplemental request of $67,000, and in the third supplemental they got $62,000.

Mr. THOMAS. You got almost your entire budget estimate in 1961.

The CLERK. In 1962, the figures are $438,000 requested and $430,000 appropriated.

Mr. THOMAS. You got almost your entire budget estimate for 1960, 1961, and 1962. Where is the hiatus, gentlemen?

Mr. MACY. The receipts must have been greater than our estimate, then.

Mr. THOMAS. Again, you are nothing but a service agency, and your estimates are based upon theirs. In truth and in fact, they are not your estimates. They are theirs.

Mr. MACY. They are the estimates of the State Department. We receive an annual letter from the State Department indicating the number of cases they anticipate. What we have included in the budget request for 1964 is the amount necessary to cover what they consider to be the volume of cases coming in that year.

Mr. THOMAS. Excuse us. We got the record straight at least on the appropriations for 1960, 1961, and 1962, that they were just about on the button. If there was any reduction, it would be very slight. You go ahead, Mr. Chairman.

RESULTS OF INVESTIGATIONS

Mr. JONAS. Mr. Chairman, I do not see how we can do any really effective evaluating of the worth of this program unless we get some information from the State Department and the Commission indicating what the results of this program have been, whether these reports are being ignored, or whether some attention is being paid to them.

Mr. THOMAS. I believe Mr. Macy, following your suggestion and the suggestions of the other members of the committee, we will go back to the State Department, certainly, for the next budget, if not this one, and try to get some additional information. It is not secret. You are not asking for anything illegal. You are the workhorse for them. Certainly they ought to be able to give you whatever information you desire. There is nothing private about it.

Mr. MACY. Mr. Chairman, in response to the request, may I file a supplementary statement in response to the questions you have raised here?

Mr. THOMAS. We shall be glad for you to do that.

(The information furnished follows:)

INVESTIGATION OF U.S. CITIZENS FOR EMPLOYMENT BY INTERNATIONAL ORGANIZATIONS

Pursuant to Executive Order 10422 of January 9, 1953, as amended, the Civil Service Commission conducts investigations of all U.S. citizens being considered for employment by international organizations for a period exceeding 90 days. Whenever any question involving loyalty arises, the case is turned over to the Federal Bureau of Investigation for a full field loyalty investigation.

Since 1953, approximately 12,000 investigations have been completed. In 31 of these cases a decision was made that reasonable doubt existed as to the loyalty of the person to the Government of the United States, and the international

organizations concerned were given adverse opinions. Subsequently 7 of these cases were reopened and the initial decision reversed on appeal, leaving 24 cases in which final adverse decisions were made.

Of the 24 adverse cases, 5 involved applicants who are denied employment, and 19 were cases of personnel employed by international organizations at the outset of the program. Of the 19 cases, 11 persons have been terminated while 8 are still employed. In the latter eight cases, the international organizations concerned have decided to retain the personnel in spite of the adverse U.S. recommendation.

The investigations conducted are effective in deterring undesirable persons from applying for positions in international organizations. In addition, information concerning general suitability for employment is turned over to the organization concerned. The international organizations generally require a probationary period of service, and it may be assumed that some number of applicants are rejected on suitability grounds. The Commission receives no information at the present time concerning the disposition of such cases. In view of the interest expressed by the committee, steps will be taken to secure such information.

Mr. THOMAS. You may proceed.

Mr. MACY. To conclude the statement on this particular appropriation: The United States contributes $250 million to the financing of some 51 multilateral international organizations (about 40 percent of the total cost). With this kind of contribution, the United States should be adequately represented on the staffs of these organizations and not be denied representation because of delays in loyalty clearances due to lack of funds. I strongly urge this committee to recommend the full amount of this request.

ANNUITIES UNDER SPECIAL ACTS

The requirements for this item decrease each year due to drops for death from the annuity rolls. The budget request of $1,880,000 for 1964 reflects this decrease and provides for the continuation of annuities authorized.

TOTAL AGENCY JOBS

Mr. THOMAS. I think it would be well to detail for the record right here what activities are included in your big, overall main appropriation of "Salaries and expenses." To be exact, you have three big activities that are not covered in here and which are separately appropriated for in the form of a limitation. Is that correct?

Mr. MACY. That is correct.

Mr. THOMAS. When you say this big appropriation is $22 million plus, that does not cover the entire story as to your financial needs.

Mr. MACY. No, indeed.

Mr. THOMAS. We were not able to figure out how many employees are not covered in the salaries and expenses appropriation. Can you put your finger on that number quickly? We were not able to find that in your justifications.

Mr. MACY. We have a breakdown, Mr. Chairman, which shows the number of employees by different appropriations.

Mr. THOMAS. Give us the sum total of the three activities which are not included in salaries and expenses those employees being in addition to——

Mr. MACY. 2,536 is the number of employees under the "Salaries and expenses" appropriation for fiscal year 1964. In addition to that, the Commission will require 1,535 employees under the revolving fund.

Mr. THOMAS. That figure was 2,494, did you say?

Mr. MACY. 2,536 is estimated for June 30, 1964.

Mr. THOMAS. You set out here 2,494.

Mr. MACY. I beg your pardon.

Mr. THOMAS. That is for fiscal 1964, including your central office and your field offices, 2,494. Now you come up with 2,536.

Mr. MACY. The average employment for 1964 in the "Salaries and expenses" appropriation is 2,494, as you say. The figure for June 30, 1964, is estimated as 2,536.

Mr. THOMAS. What do you mean by average employment? What about specific jobs, appropriated jobs, slots?

Mr. MACY. This is the average number of positions to be filled during the fiscal year.

Mr. THOMAS. What is the number for the three? We will go into that later. What is the overall figure of the 3 activities in the personnel load not covered in this 2,494?

Mr. MACY. In addition to that, under the revolving fund for investigative activities, the figure is 1,535. In addition 282 employees are for activities for which the Commission is reimbursed. This includes the administrative funds for health benefits and life insurance. It includes certain reimbursable activities under the Training Act. It includes Commission personnel on the international organizations activities. This provides a grand total for the Civil Service Commission for fiscal year 1964 of 4,368.

Mr. THOMAS. Quite an agency. That is a little different from 2,494. Excuse me. Go ahead. That clears the record.

Mr. MACY. It is interesting to note, Mr. Chairman, that the number of employees under salaries and expenses has been reduced, whereas the overall total has been increased, largely due to these new activities which have been added.

GOVERNMENT PAYMENT FOR ANNUITANTS, EMPLOYEES HEALTH BENEFITS FUND

This appropriation covers the contribution of the Government toward the health benefits subscription charges for annuitants participating in this program. There were 79,000 annuitants enrolled as of June 30, 1962, and this number will increase each year by approximately 40,000 thereby increasing the amount of contribution required.

The funds appropriated under this head are placed in the employees health benefits fund and used to pay the Government's share of health benefits contracts. The funds are available until expended and may not be used for any other purpose. Due to the substantial reduction made in the 1963 budget request for this item, the funds available are inadequate to meet the needs, and a supplemental appropriation of $977,000 is being requested.

The budget request of $9,530,000 for fiscal year 1964 is based on the Government contribution required to meet subscription charges for the increased number of annuitants who will be participating in the program in that year.

An expense limitation of $1,157,000 is requested to provide for the administration of the employee health benefits program in fiscal year 1964.

KANSAS STATE UNIVERSITY OCT 7 MANHATTAN, KANSAS

GOVERNMENT CONTRIBUTIONS, RETIRED EMPLOYEES HEALTH BENEFITS FUND

The retired employees health benefits program provides health benefit coverage to those annuitants not eligible to participate in the employees' program. At present there are approximately 245,000 participants in this program. This appropriation provides the Government's share of the cost.

The Commission and the carrier of the uniform plan have reached the conclusion that an increase in premium rates of 15 percent will be necessary for the policy year beginning July 1, 1963. The Commission proposes that this increase be shared by the Government and the enrollees. On this basis the contribution of the Government for fiscal year 1964 will require an appropriation of $14,860,000.

LIMITATION ON ADMINISTRATIVE EXPENSES

The basic act provides that not to exceed 2 percent of the Government's contribution shall be available to cover administrative expenses of the program. However, as was the case last year, the Commission finds that the amount available under this limitation will be insufficient to carry out the responsibilities to this program, primarily because of the additional work which the expected premium rate increase will require. Accordingly, the Congress is requested to provide a specific dollar limitation of $392,000 for administrative expenses for fiscal year 1964.

Mr. OSTERTAG. This last point you made about the limitation is not clear to me. The basic act limitation is 2 percent. You intend to ask the Congress to provide a special dollar limitation of $392,000. Are you proposing Congress amend the law?

Mr. MACY. Yes.

Mr. OSTERTAG. Is it your intent to achieve this change by means of this appropriation?

Mr. MACY. Yes.

Mr. OSTERTAG. How can we do that if it is not authorized by law?

Mr. IRONS. We did it last year.

Mr. MACY. The limitation can be established by appropriations. We are concurrently proposing to the substantive committees that the legislative requirement be modified to permit this kind of action on a continuing basis.

Mr. OSTERTAG. That is my point. You are asking the committee to do that first.

Mr. MACY. Yes; as we did last year.

Mr. OSTERTAG. As provided here, it would be subject to a point of order?

Mr. MACY. That is correct.

Mr. IRONS. May I refer to the language of last year, reported by this committee, following this same kind of conversation—

that, without regard to the provisions of any other act, not to exceed $375,000 of the funds in the retired employees health benefits fund, shall be available for reimbursement to the Civil Service Commission for administrative expenses incurred by the Commission during the fiscal year ending June 30, 1963, in the administration of the Retired Federal Employees Health Benefits Act.

At that time we informed the committee we were asking our substantive committee to remove this 2-percent limitation.

The bill got caught up in the legislative logjam of the last day or two of Congress and did not pass, and we have this year asked the substantive committee for relief from this unrealistic 2-percent limitation.

Mr. THOMAS. What was it on, life?

Mr. MACY. You established a limitation. It is fixed annually by the Congress.

Mr. THOMAS. There is a hiatus in the two programs.

Mr. OSTERTAG. What does 2 percent amount to?

Mr. IRONS. $294,300.

Mr. OSTERTAG. About a $100,000 difference between what you need and what you receive under this program?

Mr. IRONS. Yes.

INCREASE DUE TO INCREASED ANNUITY

Mr. MACY. The administrative costs will be greater during this year because of the necessity for processing this expected premium rate increase.

Mr. RHODES. Why would it cost more to process a higher premium?

Mr. MACY. It will necessitate changes in computation and record-keeping, and notices to the participants in the program of the change in premium, so it will be the development of materials, distribution of those materials, advice to all that are covered.

Mr. RHODES. Would that cost $100,000.

Mr. MACY. It will cost at least that.

Mr. IRONS. This is not an increase of $100,000 over our figure of last year. It is actually the difference between $375,000 and $392,000.

Mr. RHODES. This is a one-time increase then?

Mr. IRONS. We will be back again next year asking for something approaching $392,000. That is just about our ongoing costs.

Mr. OSTERTAG. But 2 percent may yield more as time goes on?

Mr. MACY. This is a diminishing program. This includes those who were already retired as of the effective date of the program for active employees on July 1, 1960.

We have found that the 2 percent is too rigid a limitation on the administrative costs of handling this program.

We have found, for example, Mr. Rhodes, there has been a rather substantial volume of correspondence with these people. Many of them are older people and do not have recourse to advice. This program at best is complicated in determining which of the optional programs should be selected. We feel we have an administrative obligation to respond as precisely as we can.

CONTRIBUTIONS OF GOVERNMENT AND RETIREES

Mr. RHODES. How much does this cost each of the individuals who are covered?

Mr. MACY. It will vary from plan to plan.

Mr. RUDDOCK. The retired employee eligible under the present program may participate in the uniform plan, a plan established by

contract between the Commission and the insurance industry with Aetna as the prime contractor. The employee has the choice of taking either basic coverage, in which the premium is $6.50 per month for self only, or $13 a month for self and family.

Mr. RHODES. Is this the cost to the retired employee, or is this the total cost of which the retired employee bears one-half?

Mr. RUDDOCK. This is the total premium, $6.50 single; $13, self and family.

The Government makes a contribution of $3 a month for self only, or $6 a month for self and family. But the individual also has a further choice. Instead of taking basic, he may take the major medical portion of that plan. The premium on that is $6 a month self only, or $12 a month self and family.

If he takes that, instead of basic, he would get the same Government contribution, $3 a month for self only, or $6 a month for self and family. He may choose to take both parts, both basic and major medical, in which event the total premium is due. The Government contribution remains $3 self only, or $6, self and family.

Mr. THOMAS. While we are on this subject, we may as well go into it in more detail.

What is the formula for Government participation for the cost per employee—retired employee?

You have a formula there regardless of which program he elects to take where he gets full protection for himself, or himself and his family. You have a variation of a half dozen plans. You have a general yardstick and it is not quite 50–50, contributions by the employees and the Government.

Mr. RUDDOCK. Let me add to what I have said and I think it will help clarify this point.

The person who is eligible does not have to participate in the uniform plan which is arranged by contract between the Commission and the insurance industry. He may participate in any one of a number of private plans, like Blue Cross-Blue Shield, or plans sponsored by the National Association of Retired Civil Employees, or plans underwritten by large insurance companies. If he chooses to participate in a private plan, he still gets the same Government contribution, $3 a month if his enrollment is for self only, or $6 a month if it is for self and family.

The coverage breaks almost 50–50 between self only and self and family.

Mr. THOMAS. That is the figure we are interested in. Give us that. It is pretty favorable to everyone. By virtue of the fact you have to reshuffle this program, we sold it a little too cheap, did we not?

Mr. RUDDOCK. Of the total enrolled, 243,910, 134,390 are enrolled in the uniform plan and 109,520 are enrolled in these private plans.

Mr. THOMAS. It is almost a 50–50 proposition?

Mr. RUDDOCK. Yes.

Mr. MACY. The reason we hesitate is, it is not exactly 50–50; I think you can generalize by saying approximately it is 50–50.

These are the retired employees. Those employees who retired prior to July 1, 1960. Now, those that have retired subsequently are continued under the other program for active employees. They continue after retirement. That is why this group has a declining population.

Mr. OSTERTAG. Is it not probable that a larger percentage of these people already possess one form of insurance or another, and just elected to have the Government pay the 50 percent of the cost.

Mr. MACY. That is very true.

Mr. OSTERTAG. On whatever plan or policy they had in effect?

Mr. MACY. They were able to do that under the options provided to them. It necessitated going to everybody on the retirement rolls giving them that option, and then administering each one of those ones when they made their election.

Mr. LAWTON. I do not think you want to get the impression the Government pays 50 percent. It does not. It pays slightly less than 50 percent if you take the minimum. If you take both basic coverage and major medical, the Government still pays only $3 for one person, or $6 a family, or the employee pays $12 or $18.

Mr. THOMAS. We will put the tables under each one of the headings in the record later on.

Mr. OSTERTAG. You are budgeting the $392,000 for administrative costs.

Mr. MACY. Yes. This is our estimate of funding requirements to handle the administrative expenses of this program.

Mr. THOMAS. That is the 282 employees we said were not covered in salaries and expenses.

Mr. MACY. This program requires 50 of the 282 employees.

Mr. THOMAS. Proceed.

PAYMENT TO CIVIL SERVICE RETIREMENT AND DISABILITY FUND

Mr. MACY. The next appropriation I would like to refer to is the one relating to the payment to the civil service retirement and disability fund. This is an appropriation on which we have had active discussions in years past.

Public Law 87–793 has significant effect on retirement costs. The higher salaries provided in part II effective in October 1962 and January 1964 will increase prospective retirement benefits based in part on prior service and will result in increases in the deficiency. The increased benefits payable under part III of Public Law 87–793 cannot be paid since that law does not authorize funds for this purpose. We, therefore, are requesting a supplemental appropriation of $30 million to cover these increased benefit payments in fiscal year 1963. Our budget request for fiscal year 1964 includes $62 million, the estimated amount for increases in payments for that year.

As required by section 17(e) of Public Law 84–854, approved July 31, 1956, estimates of the appropriation necessary to finance the fund on a normal cost-plus-interest basis have been computed. The estimated costs developed are included in this submission; however, an appropriation request for this amount is not being made. The Government's contributions have not been sufficient to build up the necessary reserves required for probable future requirements and we are now considering the matter of legislation to correct the financing of this fund. The proposed legislation will be developed with the intent to assure that sufficient funds will be available to pay future benefits, that employees' contributions are maintained unimpaired, and that an appropriate basis of contributions is maintained, without the need for

building up an enormous fund from advance appropriations. We are now in the process of exploring a variety of alternatives and hope to have a specific legislative proposal introduced in the near future.

Mr. THOMAS. Give us a little preview of your thinking there.

Mr. MACY. Mr. Lawton, would you like to pick that one up?

Mr. LAWTON. The idea we have at the moment, and are exploring, is to provide for an annual increment in the agency contributions to this fund which would build up——

DEFICIT IN RETIREMENT FUND

Mr. THOMAS. First, what is the figure of insolvency of the fund?

Mr. MACY. The deficiency at this time is about $38 billion.

Mr. JONAS. That is up how much from last year?

Mr. MACY. It is up approximately $4 billion from last year, due to the salary increases and the lack of any appropriation to the fund.

Mr. THOMAS. Proceed, Mr. Lawton.

PROPOSED FINANCING OF THE RETIREMENT FUND

Mr. LAWTON. The proposal would be to augment, or increase, the agency contribution by a half a percent perhaps per year.

Mr. THOMAS. That makes sense. They can absorb that through attrition, one-half percent.

Mr. LAWTON. Up to about where it would be double the employee contribution.

Mr. THOMAS. Half a percent per year?

Mr. LAWTON. Per year. In 15 years, it would reach about 13 percent.

Mr. THOMAS. What would be the agency contribution for 1965?

Mr. LAWTON. Seven percent.

Mr. THOMAS. How much money over and above what the agencies are putting out?

Mr. MACY. $84 million in 1965.

Mr. THOMAS. So the average increase per agency would be a sum they possibly could absorb?

Mr. MACY. Defense would carry about 50 percent of that.

Mr. LAWTON. It would be one-half of 1 percent of payroll.

Mr. THOMAS. They are making a contribution now of 6.5 percent?

Mr. LAWTON. That is right.

Mr. OSTERTAG. Would it increase?

Mr. LAWTON. About half a percent a year.

Mr. EVINS. For about 15 years?

Mr. LAWTON. For about 14 years. In 1977, it would get up to 13 percent, and would remain at that level for a period of time. Meanwhile, remaining at that level, it would still build up the balance in the fund. The balance would continue to build up until 1988.

Mr. OSTERTAG. What is the theory of an increase of one-half percent per year? As it increases, you are putting a heavier burden on certain years as compared to the first year when you start. In other words, you are starting with a half percent, and next year it is double that and next year it is double that.

Mr. MACY. No. It is somewhat similar to the social security tax progression. Only what we would propose is a one-half-of-1-percent

increment each year so it would in 1965 be 7 percent for the agencies rather than 6½, and in 1966 it would be 7½. This would permit an increase in the fund from its present level up to about $26 billion, which would be roughly two times the employee's equity.

Mr. THOMAS. A $100 million appropriation addition by the agencies in 2 or 3 years. With all of the agencies combined, it would be better than to come back to them in 5 years and say, "We have to have $2 or $3 billion." It would be a painless way of doing it.

Mr. LAWTON. It would be about $70 to $80 million a year.

Mr. OSTERTAG. You say it would be easier or softer in its application than a straight uniform percentage over a period of years.

Mr. MACY. Yes, sir. This would mean the increase in any 1 year on the agency would be relatively minor. The agency would contribute to the fund. By doing this, we would avoid the situation of the fund virtually running out in about 1979, and necessitating a direct appropriation at that time in the neighborhood of $1,300 million.

Mr. JONAS. The accumulative increase is substantial. That is what Mr. Ostertag is talking about. When you go over a period of years, from 6½ to 13 percent, that year when it is 13 percent is a big advance over 6½.

Mr. LAWTON. In actual figures, in 1964, the estimated agency contribution here will be $920 million.

In 1977, it would be $1,865 million.

Mr. MACY. It is approximately double what is presently being contributed by the employees at the point when we reach 13 percent. Then we would sustain it at 13 percent.

Mr. LAWTON. As you build up your fund, your interest also increases at the same time, which contributes, in part, to this total in the fund. Your interest income would go up from $418 to $815 million in the same period.

Mr. RHODES. If I understand you correctly then, beginning at the time the plan goes into effect, there will be sums taken from the annual appropriation of each agency and transferred by the Treasury from that agency to the credit of the employees' retirement fund.

Mr. MACY. That is correct.

Mr. RHODES. So it will not require an appropriation to accomplish this. The appropriation will have been made to the agency itself?

Mr. MACY. That is right. This would be a part of the agency's payroll cost.

Mr. RHODES. Right.

Mr. MACY. And would be, therefore, appropriated in each agency's bill.

Mr. RHODES. And the percentage which will be taken from each agency will increase one-half of 1 percent each year until you arrive at the percentage of 13, which would take how many years?

Mr. MACY. It would take 14 years. We have 6.5 percent now. We would reach 13, according to our present plan, in 1977.

Mr. RHODES. You are at 6.5 now, and it is not adequate to meet the requirements of the fund?

Mr. MACY. In other words, the 6.5 now is not even adequate to cover the normal cost of the plan at the present time. The result is that the deficiency is increasing at a rate of approximately $1 billion a year without any inclusion of liberalized benefits, or pay increases

which further increase the deficiency. By adopting this plan, there would be a greater input into the fund. Therefore, the fund would rise and the interest going into the fund would increase. We would be able to build up the fund because the input would be at a higher rate than the payments that are being made during this period.

Mr. OSTERTAG. The employee's contribution would remain stationary?

Mr. MACY. They remain at 6.5 percent.

Mr. THOMAS. They have been paying and we have not?

Mr. OSTERTAG. That is right.

Mr. MACY. I think it would help further explain that what needs to be done here is to overcome a condition produced by omissions in the past.

Mr. RHODES. That is correct.

The only alternative, I guess, would be to appropriate in this year, or perhaps in the next 2 or 3 years, a sum equal to $38 billion and raise the debt ceiling in order to show this is a part of the national debt, which of course it is anyway. In other words, we are doing it by bits and pieces instead of taking one or two great big bites at it; is that a fair statement?

Mr. THOMAS. Very accurate.

Mr. MACY. That is right. We would never reach the point where we would completely eliminate the deficiency because the deficiency is based on an actuarial formula.

Mr. RHODES. Right.

Mr. MACY. That is computed by determining what you would have to pay if you closed out the entire program at one point which is an unrealistic condition.

Mr. EVINS. Do you agree with Mr. Martin, that deficits can be in some instances beneficial?

Mr. MACY. I will refer that to my fiscal adviser.

FINANCING OF INCREASED ANNUITY BENEFITS

Mr. OSTERTAG. In your statement Mr. Chairman, you point out that the budget includes $62 million. That is for 1964?

Mr. MACY. Yes, sir. Yes, $62 million——

Mr. OSTERTAG. What does that amount specifically cover?

Mr. MACY. That is to cover the liberalization in annuity payments to those presently retired as authorized by part 3 of Public Law 87–793. That is the necessary funding of that increase as long as the appropriation rider continues in effect, which makes it necessary to appropriate directly to cover the cost of further liberalization of the retirement plan.

Now, if the legislative proposal that we have been talking about were introduced, it would be the intent to have that supersede that rider and to absorb this increased cost out of the fund rather than to appropriate directly for it.

Mr. JONAS. That will not take care of future liberalizations, will it?

Mr. MACY. No. This would be only for the liberalization that was authorized last year. The cost in 1963 is still pending. That is $30 million to cover the cost of that liberalization until June 30, 1963.

Mr. OSTERTAG. The $62 million that you are requesting for fiscal year 1964, in the absence of this proposed law, does that amount cover the entire obligation of the Government for this year?

Mr. MACY. The $62 million would cover the obligation of the Government for the liberalization authorized in 1962 for 1964.

Mr. OSTERTAG. Only the liberalization?

Mr. MACY. That is correct.

Mr. OSTERTAG. It would not be a matching of the complete obligation of the Government for the year 1964?

Mr. MACY. No, sir.

This just covers the 5-percent liberalization in annuity rates for those presently retired.

Now, in the absence of any legislation, the only way that new obligations can be financed is through an appropriation of $62 million. Otherwise, it is not possible for the Commission——

NORMAL COST-PLUS-INTEREST FINANCING

Mr. OSTERTAG. If the Government funded its complete obligation for 1964—and I am not referring to past obligations, I have in mind the complete obligation for 1964—what would that amount to?

Mr. RUDDOCK. $1,174,187,000.

The total Government normal cost is roughly $1 billion and the interest on the deficiency, which is merely for the purpose of keeping the unfunded liability from growing, not to amortize any part of it, is another $1 billion, so the total required on a normal cost plus interest basis is $2,094,470,000. Through the process of appropriations made to agencies, and then their turning into the retirement fund 6½ percent of salaries, agency contributions will provide $920,283,000. This leaves the amount of normal cost, plus interest, not met by agency contributions at $1,174,187,000.

Mr. OSTERTAG. Therefore, at the end of this next year, on this basis, the obligation will be increased by $1,174 million.

Mr. MACY. Exactly. This would be the case in succeeding years unless some action is taken.

Mr. THOMAS. It is the painless way to do it. It would tend to cut down this insolvency.

Mr. MACY. May I add a footnote to what Commissioner Lawton and I have said with respect to this plan?

This is one of a number of plans under consideration. Of course, its accomplishment can only take place through action on the substantive side in the Congress.

We feel this approach is a sound one, that it is administratively feasible, and we hope to be able to provide this as a recommendation to the Congress.

TIMETABLE FOR REVISED RETIREMENT FUND FINANCING

Mr. OSTERTAG. You do not anticipate that any such changes will take place which will be applicable to this budget?

Mr. MACY. Applicable to this budget——

Mr. OSTERTAG. For this fiscal year?

Mr. MACY. For fiscal year 1964, it would be our hope this plan for long-term financing could be enacted during the current session of Congress to be applicable in the following fiscal year.

Mr. OSTERTAG. Your fiscal year starts July 1 and appropriations will be made within a short time to cover this year. But it is quite unlikely that the Congress would get around to making such a change in time to be included in this particular fiscal year.

Mr. MACY. Your observation is entirely realistic.

In all likelihood, a legislative proposal of this kind could not be effective prior to the fiscal year 1965.

Mr. THOMAS. Something should be done. This fund is defunct $38 billion, and the employees have been paying their money and Uncle Sam has not been paying his part. The liability is increasing now in round figures at the rate of $1 billion a year—is that correct?

Mr. MACY. $1 billion a year.

Mr. IRONS. May I add one thing so there is no misunderstanding about it? We need the $62 million we are asking for.

Mr. OSTERTAG. There can be no question about that. But it does seem to be appropriate to place this budget item in a proper perspective to the overall picture.

Mr. MACY. The Civil Service Commission supports your view on this completely. This is a high priority item in our program at the present time.

I can conclude my statement very quickly. The final reference is to the limitation on administrative expenses, employee life insurance fund.

LIMITATION ON ADMINISTRATIVE EXPENSES, EMPLOYEES LIFE INSURANCE FUND

A limitation of $279,000 is requested to provide for administration of the Federal employees group life insurance program. This represents an increase of $24,000 over the limitation currently authorized for fiscal year 1963 and results primarily from increased pay costs.

This concludes my opening statement, gentlemen. We shall be glad to answer any questions the committee may have.

All of us here representing the Commission would be pleased to respond to the best of our ability to your questions.

Mr. THOMAS. Off the record.

(Off the record.)

Mr. THOMAS. You have made a very fine statement. We appreciate your courtesy and tolerance here.

TURNOVER IN FEDERAL EMPLOYMENT

Let's talk about Federal employment this year, what it looks like in the future, and what your turnover is.

We have been of the opinion around here that the turnover is around 14 or 15 percent, but you come up here with some jolting figures. It looks like for fiscal year 1962 it is 16.1, and next year it is going to be 18.2

We have a tremendous unemployment load throughout the country. Salaries have been raised to the highest point in the history of the

Government. We always thought there was some connection between general unemployment and desire to get on the Federal payroll. Salaries have been increased.

Why is that turnover figure of 18.2 next year so high?

Mr. MACY. I believe the figure is 16.1; 16.1 is the figure the Commission has been using as the new hire rate.

Mr. THOMAS. The new hire rate is dependent upon your turnover?

Mr. MACY. That is correct.

Mr. THOMAS. You gave a figure of almost 18.1 percent. This year it is 16.2.

Mr. MACY. The new hire rate was 18.2, in 1962. This was largely attributable to the growth of employment that took place during 1962, which meant there was more than a replacement of turnover. There were additional employees placed on the payroll.

TOTAL FEDERAL EMPLOYMENT

Mr. THOMAS. What is your figure now for total employment?

Mr. MACY. 2,514,000 employees.

Mr. THOMAS. What was the total employment figure for the last 5 years?

Mr. MACY. The figure on June 30, 1958, worldwide, was 2,382,000.

In 1959, the same date, 2,383,000.

In 1960, 2,399,000.

In 1961, 2,436,000.

In 1962, 2,514,000.

And the most recent figure I have, Mr. Chairman, is the strength for November 30, 1962, which was 2,516,000.

The projected employment for the next 2 years——

Mr. OSTERTAG. Does that include the military?

Mr. MACY. No, sir. This is civilian employment, worldwide, throughout the Government.

The President's budget includes an estimate for June 30, 1963, of 2,534,000, and for yearend 1964, 2,571,000.

Mr. THOMAS. Does this include Government corporations—TVA and everything?

Mr. MACY. Yes. This includes all Government employees.

Mr. OSTERTAG. How about civilians in the military?

Mr. MACY. Civilians in the Department of Defense would make up approximately 42 percent of this.

Mr. THOMAS. All of these people you mentioned covered in total employment are not under the retirement fund?

Mr. MACY. The vast majority are, about 90 percent. Temporary appointees would not be.

AGENCIES HAVING SEPARATE RETIREMENT SYSTEMS

Mr. THOMAS. You have some agencies that are independent.

Mr. MACY. The State Department has its own retirement system for Foreign Service.

Mr. THOMAS. What agencies have their own retirement systems not covered in this?

Mr. MACY. The State Department's Foreign Service, the TVA. I am unaware of any others.

Mr. RUDDOCK. The Board of Governors of the Federal Reserve and Civilian Lighthouse Keepers, schoolteachers, and policemen and firemen in the District of Columbia government, Coast and Geodetic Survey, and Public Health Service Officers.

Mr. THOMAS. What about the employees of the contractors of the Atomic Energy Commission?

Mr. MACY. They are not included in this total strength I am talking about. They would be outside.

Mr. RHODES. The Export-Import Bank is outside?

Mr. MACY. That is a Government agency.

Mr. THOMAS. Let's detail those agencies, to get the record crystal clear, that are not included in your total figures here of Government employment and which are not included in your retirement system. Name them.

Mr. MACY. The State Department, the Tennessee Valley Authority, the Board of Governors of the Federal Reserve System have separate retirement systems, even though their employee strength is included in the total figure that I gave.

Mr. THOMAS. What about your contractors for the Atomic Energy Commission at their installations?

Mr. MACY. There are no employees of contractors of the Atomic Energy Commission, NASA, or the Defense Department included in these strength figures, or under the Civil Service Retirement Act.

Mr. THOMAS. You say they are only 10 percent.

What is the sum of employment of that half-dozen agencies that you mentioned that are covered in this figure of 2,500,000 Federal employment, and not covered under the civil service retirement fund?

Mr. MACY. I would estimate about 60,000.

In addition, Mr. Chairman, temporary appointees under the civil service are not covered under the Retirement Act.

This would include the State Department, TVA, and the Board of Governors.

As far as contractor employment is concerned, this is outside of our reporting system and I do not believe I would even hazard a guess as to the number of private employees of contractors who receive pay as a result of Government contracts. This would be totally outside our jurisdiction, except insofar as we conduct security investigations of contract employees under the Atomic Energy Commission. That would be our only contact with this.

Mr. THOMAS. That figure of 60,000 would not touch contractor employees.

Mr. MACY. I am not including contractor employees.

I would be unwilling to hazard a guess as to the number of contractor employees who receive compensation through the contract from Government sources. This would run to a very high figure.

Mr. Chairman, in determining the Commission's budget, we utilized the year end strength for 1962, and we then applied the percentage of the total (competitive service) employment that is under civil

service, and we came up with a figure of 2,159,000 as the total number of civil service employees. And then we figured 16.1 percent as the new hire rate, and in that way we computed we would be involved in new hires to the extent of 347,600 during both fiscal 1963 and 1964.

Our estimates in our various activities are based upon that as a planning assumption.

AVERAGE CIVIL SERVICE SALARY

Mr. JONAS. While we are on this, may I get a bit of information? What is the average civil service salary now?

Mr. MACY. The average for the entire service?

Mr. JONAS. Yes.

Mr. THOMAS. For this particular agency, $7,067.

Mr. JONAS. I mean Government-wide. You have given us that information in previous years.

Mr. MACY. The median salary was about $5,500.

Mr. OSTERTAG. It must be higher today than it was a year ago because of the general increases.

Mr. MACY. That is correct.

Mr. JONAS. A year or so ago, you used the figure of $5,000.

Mr. MACY. The median salary for employees under the Classification Act was $5,540 as of June 30, 1962.

Mr. THOMAS. We will insert pages 1 through 6 in the record. (The pages referred to follow:)

"General and special funds:

"SALARIES AND EXPENSES

"For necessary expenses, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); not to exceed $10,000 for medical examinations performed for veterans by private physicians on a fee basis; payment in advance for library membership in societies whose publications are available to members only or to members at a price lower than to the general public; not to exceed [$83,000] *$90,000* for performing the duties imposed upon the Commission by the Act of July 19, 1940 (54 Stat. 767); reimbursement of the General Services Administration for security guard services for protection of confidential files; and not to exceed $5,000 for actuarial services by contract, without regard to section 3709, Revised Statutes, as amended; [$21,349,000] *$22,180,000: Provided*, That no part of this appropriation shall be available for the Career Executive Board established by Executive Order 10758 of March 4, 1958, as amended.

"No part of the appropriations herein made to the Civil Service Commission shall be available for the salaries and expenses of the Legal Examining Unit in the Examining and Personnel Utilization Division of the Commission, established pursuant to Executive Order 9358 of July 1, 1943. *(5 U.S.C. 22–1, 73b–3, 150, 631–642, 645c–645e, 652, 851–869, 901–958, 1010, 1051–1052, 1071–1133, 1151, 1162, 2001–2007, 2061–2066, 2121–2123, 2251–2267, 2281–2288, 2301–2319; 28 U.S.C. 2671–2680; 39 U.S.C. 3311, 3312, 3315, 3502; 40 U.S.C. 42, 491; 50A U.S.C. 459; 2160; 65 Stat. 757; 66 Stat. 122; 68 Stat. 1115; 70 Stat. 721; Executive Orders 9830, Feb. 24, 1947; 10000, Sept. 16, 1948; 10242, May 18, 1951; 10422, Jan. 9, 1953; 10450, Apr. 27, 1953; 10530, May 10, 1954; 10540, June 29, 1954; 10552, Aug. 10, 1954; 10556, Sept. 1, 1954; 10590, Jan. 18, 1955; 10647, Nov. 28, 1955; 10774, July 25, 1958; 10826, June 25, 1959; 10869, Mar. 9, 1960;*

10880, June 7, 1960; 10903, Jan. 9, 1961; 10973, Nov. 3, 1961; 10987, Jan. 17, 1962; 10988, Jan. 17, 1962; Independent Offices Appropriation Act, 1963.)"

No change in appropriation language is requested for fiscal year 1964 other than to indicate the total amount of appropriation requested.

Comparative summary by activity

Activity	1963, authorized	1964, estimate	Changes (+ or −) 1964 compared with 1963
1 Recruiting and examining	$5,159,400 (5,517,500)	$5,350,000	−$167,500
2 Investigation of character and fitness for employment	2,816,000 (2,998,600)	2,873,000	−125,600
3 Inspections and classification audits	2,431,100 (2,610,000)	2,610,000	0
4 Administration of the retirement systems	2,514,100 (2,673,100)	2,580,000	−93,100
5 Developing programs and standards	1,416,800 (1,531,000)	1,531,000	0
6 Appellate functions of the Commission	916,400 (990,000)	990,000	0
7 Executive and administrative services	1,982,900 (2,108,900)	2,084,000	−24,900
Total, personal services	17,236,700 (18,429,100)	18,018,000	−411,100
Other obligations	4,112,300 (4,209,900)	4,162,000	−47,900
Total, program or estimate	[1] 21,349,000 (22,639,000)	22,180,000	−459,000
Average number of positions:			
Central office	1,510	1,478	−32
Regional offices	1,032	1,016	−16
Total	2,542	2,494	−48

[1] Does not include anticipated supplemental appropriation of $594,000 for part of pay raise and related costs resulting from Public Law 87-793.

NOTE.—Figures in parentheses are adjusted to reflect 1964 pay rates for comparability.

Comparative summary by object classification

Object class	1963 authorized	1964 estimate	Fiscal year 1964 over (+) or under (−) fiscal year 1963
11 Personnel compensation	$17,236,700 (18,429,100)	$18,018,000	−$411,100
12 Personnel benefits	1,286,700 (1,384,300)	1,332,700	−51,600
21 Travel and transportation of persons	547,800	547,800	0
22 Transportation of things	143,600	146,600	+3,000
23 Rents, communications, and utility services	901,100	960,200	+59,100
24 Printing and reproduction	507,000	497,000	−10,000
25 Other services	304,500	308,700	+4,200
26 Supplies and materials	257,300	257,300	0
31 Equipment	164,300	111,700	−52,600
Total, obligations	[1] 21,349,000 (22,639,000)	22,180,000	−459,000

[1] Does not include anticipated supplemental appropriation of $594,000 for part of pay raise and related costs resulting from Public Law 87-793.

NOTE.—Figures in parentheses are adjusted to reflect 1964 pay rates for comparability.

GENERAL STATEMENT

Funds appropriated under this heading provide for most of the Commission's normal operating expenses, i.e., salaries, travel, printing, supplies, and equipment. Programs financed from this source are: (1) Recruiting and examining; (2) investigation of character and fitness for employment; (3) inspection and classification audits; (4) administration of the retirement systems; (5) developing programs and standards; and (6) appellate functions of the Commission.

For fiscal year 1964 the Commission requests a "Salaries and expenses" appropriation of $22,180,000 in order to carry out its responsibilities as described under each activity summarization.

Economies achieved in fiscal year 1962

During fiscal year 1962, the Commission achieved substantial economies in its operations and reductions in administration costs through the abolishment of its Cincinnati regional office, the establishment of area centers for processing national agency check and inquiry investigations, and the reorganization of its 10 remaining regional offices. These savings will permit the Commission to assume new responsibilities assigned by Executive order and Presidential directive without any increase in appropriated funds and are reflected in reduced unit costs in the 1963 authorized programs and 1964 budget estimates presented herein.

Effect of Public Law 87-793 on fiscal year 1963 program

Public Law 87-793, approved October 11, 1962, provided a Federal salary reform system, raised postal rates, and increased certain civil service retirement benefits. In addition to the increased costs for basic compensation and postage common to all agencies, the Commission will incur added expense due to part III of the act which provided for increases in retirement annuities effective January 1, 1963. This requires that all annuities be recomputed with the further complication that no funds were appropriated to finance these increased benefits and no authority was granted to pay such moneys from the civil service retirement and disability fund. Therefore, the Commission must recompute all annuities, while continuing to pay at the old rate, and accumulate all increases for retroactive payment to the effective date when funds are made available. This additional expense is estimated at $100,000.

The Executive Office of the President, through the Bureau of the Budget, requested all agencies to absorb as much as possible of the costs of the increases in basic compensation. Pursuant to this request the Commission will absorb 38.5 percent of the total increased cost for salaries and expenses in fiscal year 1963 applicable to Public Law 87-793 as detailed below.

Direct payroll costs	$755,500
Related costs (personnel benefits)	51,600
Payment to other accounts (Executive Order 10450)	3,700
Postage costs	55,200
Cost to recompute annuities	100,000
Total cost of Public Law 87-793	966,000
Amount to be absorbed	372,000
Anticipated supplemental request	594,000

Absorption of the $372,000 will be accomplished through efficiencies to be achieved in all of the Commission's programs and are reflected in the reduced unit costs in each activity summary following. Savings will first be applied to the cost of recomputing annuities, then to increased postage costs and the balance to direct and related payroll costs.

The attached table reflects the distribution among the several Commission activities of the added costs resulting from the passage of Public Law 87-793 as well as the amounts to be absorbed.

Effect of Public Law 87-793 on fiscal year 1964 budget request

Except for the effect of Public Law 87-793, the Commission's budget request for fiscal year 1964 for salaries and expenses is $400,000 less than that authorized in fiscal year 1963, due primarily to nonrecurring workloads. Added costs for fiscal year 1964 resulting from Public Law 87-793 amount to approximately

$1,597,000 of which the Commission will undertake to absorb $366,000 through a continuation of the same economies achieved in fiscal year 1963. The increase requested for fiscal year 1964, therefore, is due solely to the added costs resulting from Public Law 87-793. (See also, attached table for distribution of costs and amounts being absorbed).

Comparability of costs under revised pay scales

In view of the changes in salary rates occurring during both fiscal years 1963 and 1964 the summary tables for each activity under this appropriation reflect comparability through use of amounts in parentheses. These amounts in the 1962 and 1963 columns have been adjusted to reflect 1964 pay rates so that a direct comparison of all 3 fiscal years can be made.

Mr. THOMAS. The record is pretty complete, and I think it is excellent and quite clear as to what salaries and expenses cover. The salaries and expenses item for 1964 will be $22,180,000 against $21,349,000 for 1963, and the latter figure is without the pay increase. This covers:

Recruiting and examining, investigation of character and fitness for employment, inspections and classification audits, administration of the retirement systems, developing programs and standards, appellate functions of the Commission, and executive and administrative services.

There are seven in all.

We went into detail on three other activities, including around 1,800 employees not covered in this amount of money.

Mr. MACY. That is correct.

Mr. THOMAS. The number of employees covered in this amount of money is 2,494, and they are broken down into central office, 1,478, and then the regional offices, 1,016, and we will go into some detail when we get to the regions.

This shows a decrease of 48 employees in these 7 activities.

ABSORPTION OF PAY INCREASE COSTS

This is good information on pages 4 and 5, a general statement, more or less condensing what the Chairman has given us.

You have two supplementals pending for "salaries and expenses" appropriation. As well as I remember—correct me if I am wrong—you will have one in here for $594,000 for pay increase. You absorbed what?

Mr. MACY. 38.5 percent of the pay raise.

Mr. THOMAS. What did your pay raise for fiscal 1963 cost, approximately 8 percent? Was it around $900,000? You absorbed what part?

Mr. MACY. We are absorbing $372,000.

Mr. THOMAS. Your deficiency coming up is how much to take care of that item?

Mr. MACY. $594,000.

1963 SUPPLEMENTAL REQUEST FOR FURNITURE

Mr. THOMAS. You have another deficiency in the neighborhood of $500,000 for furniture. What is the correct figure?

Mr. MACY. $496,000 for furniture.

Mr. THOMAS. Furniture?

Mr. MACY. For the new building that will be completed July 1.

Mr. THOMAS. We just bought new furniture for the Commission and all agencies in the New York office and headquarters here 2 years ago. I want you to come to my office and I will show you some nice furniture I have been using for 26 years. I think my predecessors used it for 20 years before that. It is still pretty good furniture.

What did they spend for that furniture, Brother Lawton, 3 years ago at Civil Service Commission headquarters?

Mr. LAWTON. For headquarters?

Mr. THOMAS. Yes. We bought a lot of furniture.

Mr. MACY. That was for the regional offices.

Mr. THOMAS. We got some here, too. What about it, Mr. Executive Director?

Mr. IRONS. The record shows clearly when we got the new building, the chairman of the Subcommittee on Appropriations, Independent Offices, guaranteed——

Mr. THOMAS. Quit needling us. What was the amount of new furniture? You bought a lot of new furniture. It looked mighty good to me. We are asking what you are going to do with the old stuff. We wanted it.

Mr. MACY. The junkman would not even take the old furniture off our hands.

Mr. THOMAS. Who has that figure?

Mr. MACY. We have been deferring on this for a number of years in anticipation of the completion of the building.

Mr. LAWTON. You are not thinking about the furniture you saw in New York that we got practically for free, are you?

Mr. THOMAS. What about it, Mr. Executive Director? You bought some furniture 3 years ago.

Mr. IRONS. I do not recall any appropriation by this committee to buy furniture for the central office of the Civil Service Commission.

Mr. WILLIAMS. Nothing specifically, Mr. Chairman. We get some furniture and equipment money normally, but this is for replacement.

Mr. THOMAS. We have been replacing it pretty fast. One year we replaced a whole lot.

Mr. WILLIAMS. We have not come up with any specific program for upgrading in the central office in the last 5 years.

Mr. IRONS. We asked for it.

Mr. THOMAS. I know you asked for it, but you got some of it one year. Some years you did not get it.

Mr. WILLIAMS. We were in last year for money for the new building.

Mr. THOMAS. Do you buy it from a General Services Administration schedule?

Mr. MACY. Yes.

Mr. THOMAS. What is the nature of the furniture you are going to buy? You are operating now very comfortably. Why spend that half million dollars for furniture? Tell us what it is all about.

Mr. MACY. This amount is necessary to cover desks, tables, stands, bookcases, filing equipment, shelving.

Mr. THOMAS. You will have 50 people fewer than you have now.

Mr. MACY. That is correct. This is through our efforts to achieve greater efficiency.

Mr. THOMAS. What do you need with a half million dollars more? Why can you not save that?

Mr. MACY. We will be retaining the equipment and furniture we have that is in a state of condition and repair that would justify its continued use. There is a great deal of furniture that has far outlived its usefulness and needs to be replaced—in fact, has needed to be replaced for some time.

In our view, at the time we make the move it would be efficient to have furniture that is adapted to the layout that we are proposing to have within the building. Each year we have deferred this in anticipation of the new building. We feel a very close kinship to this committee because this commitee is responsible for the fact that we will have a new building. We are grateful to the committee.

1963 SUPPLEMENTAL FOR THE RETIREMENT FUND

Mr. THOMAS. You have other supplemental items. What is your third one? Tell us about it.

Mr. MACY. This is $200,000 as a supplemental for the "International organizations" appropriation. There is $30 million to cover the annuitant increases for those already retired, as authorized by the law last year.

There is $977,000 to meet the needs in the health benefits program. These are items that will be coming up in the supplemental bill to be submitted shortly.

Mr. THOMAS. Those last ones you mentioned do not give us too much concern. We know that is more or less to some extent by operation of law. We do not want the retirement fund to become any more insolvent. I do not think the committee will have any trouble supplying the money. Does it average about 5 percent?

Mr. MACY. Yes, sir; about 5 percent.

Mr. THOMAS. For the retired folks.

Mr. MACY. May I say in respect to the furniture that I have been advised the building will be completed about the 1st of July.

Mr. THOMAS. Have those supplementals come over here yet?

Mr. MACY. Not yet.

REASON FOR REQUESTING FURNITURE IN SUPPLEMENTAL BILL

Mr. OSTERTAG. Why do you include the furniture in your supplemental request?

Mr. MACY. If we are going to occupy the building on July 1, the date GSA has given for completion, it would save us money if we could purchase that equipment and have it delivered to the new building rather than moving the existing equipment.

Mr. THOMAS. How are you going to save money? Will you buy it through General Services Administration?

Mr. MACY. Yes, sir.

Mr. THOMAS. They give you 40 or 50 days to pay for it. We always jump on them for that.

Mr. MACY. This would avoid the cost of having to move the old furniture to the new site.

Mr. BOLAND. That would simplify it rather than moving the old furniture.

Mr. RHODES. When will you be in the new building?

Mr. MACY. The date given to me this morning is July 1. The building is 70 percent complete.

PROVISIONS OF FURNITURE SUPPLEMENTAL

Mr. JONAS. How did you arrive at this $500,000 for furniture?

Mr. MACY. $496,000?

Mr. JONAS. Yes.

Mr. MACY. We had an analysis on an item-by-item basis.

Mr. JONAS. How much new furniture does that include?

Mr. MACY. How many items does it include?

Mr. JONAS. Is it all new?

Mr. MACY. No. We have gone through and made an analysis of every item we have. For example, on desks, we have in use at the present time 1,798 desks. We have reached the judgment that we can retain 737 of them. We are asking for the difference at an average cost of $79.17. The surplus desks will be turned over to GSA for reconditioning, distribution, or for disposal, depending upon what their judgment is on each item.

Mr. RHODES. Do you get any credit for that?

Mr. MACY. No; I do not believe we do.

Mr. JONAS. Read some more of the items.

Mr. MACY. On tables, 1,268 tables are presently in use, and we propose to retain 710. This would mean we would have to replace a total of 558. The average unit cost is $37.30. Total cost is $20,800.

On stands, we have 1,020. We will retain 439. The new requirement will be 581 at a unit cost of $26.12, for a total of $15,200.

Mr. JONAS. Would it not be a good idea to have that in the record?

Mr. THOMAS. He has it.

Mr. JONAS. I mean the whole table.

Mr. IRONS. It normally comes in under the supplemental.

Mr. MACY. We would be happy to have it in this record, too.

Mr. JONAS. Do you have wastebaskets there?

Mr. MACY. No; they do not come under this. I have stands, costumers, bookcases, filing equipment. We have the controversial item of rugs. There is sectional shelving. Then we have a number that are listed under "Miscellaneous" which includes printing plant equipment, training room equipment, et cetera.

Mr. JONAS. It all adds up to what?

Mr. MACY. To $496,000. This is the same figure we presented last year as a part of our submission on the budget for 1963.

Mr. OSTERTAG. If there is no objection, we shall include the table at this point in the record.

(The table follows:)

Furniture and equipment requirements—New building (replacements and additional needs)

Item and description	Quantity			Average unit cost	Total cost	Grand total
	In use [1]	Retain	Replacements and/or additional needs			
1. Desks, tables, stands			2,200		$120,000	$120,000
Desks	1,798	737	1,061	$79.17	84,000	
Tables	1,268	710	558	37.30	20,800	
Stands	1,020	439	581	26.12	15,200	
2. Chairs, costumers, valets			2,900		69,000	69,000
Chairs	4,864	2,631	2,633	24.63	65,000	
Costumers, valets	701	434	267	14.45	4,000	
3. Bookcases	1,814	314	1,500	20.00	30,000	30,000
4. Filing equipment			1,200		145,000	145,000
Miscellaneous	972	388	584	189.21	110,500	
Correspondence	3,555	2,179	[2] 616	56.00	34,500	
5. Rugs			75	280.00	21,000	21,000
6. Sectional shelving			400	87.50	35,000	35,000
7. Miscellaneous furnishings					76,000	76,000
Miscellaneous cabinets	274	204	170	52.72	9,000	
Printing plant equipment			5	1,600.00	8,000	
Training room equipment			48	140.38	6,800	
Executive offices					23,200	
Medical equipment			21	80.95	1,700	
Auditorium					1,000	
Library equipment			139		26,300	
Grand total						496,000

[1] Column headed "In use" concerns central office proper (excludes Boyers and Site). Other items not scheduled for replacement are excluded from this table.
[2] A total of 1,376 cabinets (1- and 4-drawer type) will be replaced by 616 cabinets of 5-drawer type.

Mr. JONAS. You did not check this furniture yourself. Somebody did it in the Commission; is that right?

Mr. MACY. This was done by the office services staff in the Commission in collaboration with GSA.

Mr. OSTERTAG. Did GSA give you the prices?

Mr. MACY. GSA gave us the prices.

Mr. JONAS. Did GSA officials go through and help with the inspection?

Mr. MACY. Perhaps I ought to pass this to Mr. Williams. Would you give us some more detail on this?

Mr. WILLIAMS. They have assisted us in the survey, a piece-by-piece survey on every single piece of furniture in the central office of the Commission, and a joint evaluation of the condition of it as to whether or not it should be replaced.

Mr. JONAS. That is all I will ask. I assume we will have this up before the Deficiencies Subcommittee.

Mr. EVINS. This is your anniversary year.

Mr. MACY. Eighty years old this year.

Mr. EVINS. I think after 80 years a great Commission is entitled to a little refurbished quarters and new furniture. I imagine some of your furniture is worn out after 80 years. I have been down there.

I think you need a little refurbishing. It might do a lot for the morale of the employees and for their spirit, and might accelerate the work.

Recruiting and Examining

Mr. Thomas. Let us look at one of your big activities, Recruiting and Examining. We have talked about this for years. Who has this division now?

Mr. Macy. This is headed by Donald Harvey, who is the Director of the Bureau of Recruiting and Examining here in Washington.

Mr. Thomas. Why did you not bring him over? How long has he been with you?

Mr. Macy. He has been with us about 12 years.

Mr. Thomas. Not in this job.

Mr. Macy. No, but he has been with us. He has been head of this activity since 1952, as I recall it. If you would like to have other members of the staff accompany us, we will certainly do that in the future. It has been our feeling you wanted a limited group.

Mr. Thomas. You had 795 people in 1962, 796 for 1963, and you show 770 for 1964.

Mr. Macy. A reduction of 26.

Mr. Thomas. We have had the opinion that this is one of your activities you could cut half in two.

Mr. Reporter, please put in the record pages 9, 10, 11, 12, 13, and 14.

(The pages referred to follow:)

Comparative Summary Statement by Function

Activity 1. Recruiting and examining

Functions	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
C.S.C. examining operations: Conducting examinations	220	$1,371,005 (1,475,000)	217	$1,338,700 (1,392,700)	203	$1,297,200
Maintaining examination records	83	420,889 (449,700)	83	425,900 (436,900)	81	418,400
Referring qualified candidates	98	557,987 (596,600)	94	531,700 (550,200)	90	536,000
Subtotal, C.S.C. examining operations	401	2,349,881 (2,521,300)	394	2,296,300 (2,379,800)	374	2,251,600
Supervising Civil Service Boards of Examiners	134	1,015,008 (1,113,000)	142	1,149,200 (1,185,800)	142	1,185,800
Informing the public of Federal employment opportunities	45	376,508 (413,000)	52	469,500 (484,400)	52	484,400
Answering inquiries	156	921,030 (990,600)	151	912,600 (949,500)	145	910,200
Guidance to agencies on civil service requirements	29	237,995 (260,900)	26	224,100 (231,300)	26	231,300
Providing veterans Federal employment service	24	222,410 (244,500)	21	205,900 (214,500)	21	214,500
Federal employment statistics program	6	45,953 (49,800)	10	69,200 (72,200)	10	72,200
Total, activity 1	795	5,168,785 (5,593,100)	796	[1] 5,326,800 (5,517,500)	770	5,350,000

[1] Includes anticipated supplemental of $167,400 for part of pay increase costs.

Note.—Figures in parentheses are adjusted to reflect 1964 pay rates for comparability.

SUMMARY WORKLOAD TABLE

Activity 1. Recruiting and examining

Workloads	Fiscal year	On hand	Received	Processed	Canceled	Remaining	Unit cost	
Applications processed	1962	62,332	694,616	488,342	208,776	59,830	$2.81	([1] $3.02)
	1963	59,830	676,400	484,500	186,730	65,000	2.76	([1] 2.87)

PERSONNEL REQUIREMENTS

The average number of positions and salary costs for this activity are shown in the following table.

	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
Central office	298	$1,982,380	310	$2,103,300	285	$2,009,000
		(2,145,100)		(2,176,000)		
Regional offices	497	3,186,405	486	3,223,500	485	3,341,000
		(3,448,000)		(3,341,500)		
Total, Activity 1	795	5,168,785	796	[1] 5,326,800	770	5,350,000
		(5,593,100)		(5,517,500)		

[1] Includes anticipated supplemental of $167,400 for part of pay increase costs.

NOTE.—Figures in parentheses are adjusted to reflect 1964 pay rates for comparability.

GENERAL STATEMENT

The Congress by the Civil Service Act and subsequent legislation has given the Commission the responsibility for developing and operating a merit system for filling the broad range of positions in the competitive service of the Federal Government.

The "Recruiting and examining" activity includes the functions of: (1) Conducting examinations in Commission offices; (2) organizing, training, and supervising boards of examiners in carrying out the examining processes that have been decentralized to boards of examiners; (3) drawing up a recruiting program designed to meet the agencies' personnel needs by planning, preparing, and conducting publicity to aid in attracting high-caliber persons, including superior college graduates, into the Federal service; (4) supplying information in response to inquiries from the general public, Members of Congress, and other interested persons concerning employment and employers in the Federal service; (5) guiding and assisting agencies in the administration of civil service requirements delegated to them in the area of recruiting, examining, and placement services; (6) providing general assistance and employment counseling service to veterans and veterans' organizations in connection with preference rights and benefits prescribed by the Veterans' Preference Act of 1944; and (7) operating the Federal employment statistics program.

The objective of the Commission's recruiting and examining program is to meet the employment needs of the Government with the best qualified citizens obtainable through open competitive examinations. The Commission accomplishes this objective through the examining and recruiting personnel of its own offices in Washington, D.C., and its 10 regional offices, and through boards of civil

service examiners located in the various agencies throughout the country. To make the Government's overall recruiting activity effective in attracting the number and quality of persons needed, the Commission also has a major role in working with the agencies to keep the public informed on the kinds and locations of employment opportunities available in the Government and the attractions of work in the Federal service, and in developing and maintaining an effective work force.

Competitive examinations for employment in the Federal service are conducted by the Commission and its boards of examiners under guidelines and criteria established to assure that available manpower is secured effectively and economically when needed. These guidelines provide generally that examinations will be conducted by a Commission office, where the positions involved are common to many agencies and where effective public relations or large-scale recruiting needs require this type of examination. Boards of examiners, on the other hand, are generally assigned responsibility for conducting examinations for occupations peculiar to their agencies or where they are the principal users in the labor market area in which they are located.

Fiscal year 1964 program

Except for adjustments in cost resulting from increased pay rates, a decrease of $157,900 is projected for fiscal year 1964, from the amount authorized for 1963. This decrease is due entirely to the anticipated completion of the increased number of presidential postmaster examinations, resulting from revised qualification standards for these positions adopted by the Commission and the Post Office Department late in fiscal year 1961. Examinations were required for 2,180 vacancies over and above the normal annual replacement needs. To handle this extra workload effectively and economically, the Commission phased it over 2 fiscal years, 1962 and 1963; $157,900 was made available in each fiscal year to process it. In view of the anticipated return of the examination functions of the program to a normal level, appropriation for this amount is not required and, except for pay raise adjustment, the estimate for fiscal year 1964 reflects a decrease of $157,900 from the 1963 authorized program, distributed by function as follows: (1) Conducting examinations, $90,300; (2) maintaining examination records, $17,400; (3) referring qualified candidates, $13,400; and (4) answering inquiries, $36,800.

Accordingly, the fiscal year 1964 request for activity 1 represents a normal Commission examining program that is designed to permit conducting examinations in those areas where there is a constant need for new hires.

Federal employment level

Total Federal employment on June 30, 1962 was 2,514,196, of which 2,158,993, or about 86 percent, were in the competitive service. The Commission's budget estimates assume no increase in total Federal employment, above the June 30, 1962 level, for fiscal years 1963 and 1964.

Hiring needs

New hires in the competitive service result primarily from turnover in the staff engaged on continuing functions of the Government. This turnover is caused by resignations, dismissals, retirements, and deaths. Employees hired as replacements cover a great diversity of occupations and will be located in many thousands of Federal installations throughout the United States and overseas.

It is estimated that the new hire rate for fiscal years 1963 and 1964 will average 16.1 percent per annum. Although a rate of 18.2 was reached in fiscal year 1962, this higher rate was largely attributable to the growth in total employment which took place, and an estimate equivalent to fiscal year 1961 experience represents a more normal picture. Applying this 16.1 rate to the estimated average employment for the competitive service results in the following new hire estimate.

	Fiscal year 1963	Fiscal year 1964
Average employment in competitive service	2,159,000	2,159,000
Average new hire rate	×16.1	×16.1
Total new hires	347,600	347,600

The distribution of estimated new hires to be made in the Federal service is shown by the following table.

	Fiscal year 1962	Fiscal year 1963	Fiscal year 1964
Noncompetitive reinstatements	54, 353	48, 900	48, 900
New hires made by the Commission and its boards of examiners	299, 012	268, 700	268, 700
New hires made directly by agencies	33, 358	30, 000	30, 000
Total new hires	386, 723	347, 600	347, 600

Noncompetitive reinstatements involve former Federal employees who are entitled to reemployment on the basis of previous service.

Mr. THOMAS. You repeated our information here. You say that applying this 16.1 rate to the estimated average employment for the competitive service results in the following new hire estimates. You are going to hire 347,600 for 1964. The figure is the same for 1963. Those are round figures for 2 years. You have a good long-lens vision here, good strong glasses.

NONCOMPETITIVE REINSTATEMENTS

Noncompetitive reinstatements, 48,900 for 1963, 48,900 for 1964. Do you mean that with these salary increases, they go out by virtue of retirement and come back into the service? What is that figure?

Mr. MACY. These reinstatements are for individuals who have acquired status by the competitive process at some earlier time and have resigned and are now available for reemployment. It is our view that when we can reemploy those who have had experience, that this is beneficial to the Government. A significant number of the individuals in this category——

Mr. THOMAS. Have some already taken their retirement and come back in?

Mr. MACY. No, sir; these are for the most part women who were employed previously, have left the service for domestic reasons, and are now interested in being reemployed. Or they include individuals who may have left at some time to take private employment and are now available for rehire.

Mr. OSTERTAG. It is not a question of their rights for reemployment?

Mr. MACY. No; they have a hunting license based upon the fact that they previously acquired status. They call upon the agencies to see if there are employment possibilities for them on a reinstatement basis. We find that roughly 50,000 people each year are rehired to fill vacancies. This means we do not have to reexamine them.

Mr. OSTERTAG. That seems to be an exceptionally large number.

Mr. MACY. Yes; we think it is beneficial.

Mr. THOMAS. Has anybody in the Commission ever heard of rehiring one of your folks?

Mr. OSTERTAG. Are these noncompetitive positions? In other words, not classified civil service.

Mr. MACY. This is classified civil service. The word "noncompetitive" means they do not have to go through a new examination. They have been through the examination. They have established through service eligibility for reinstatement. If they leave on a resignation, they are available for reinstatement without taking a new examination.

Mr. OSTERTAG. How does that work with regard to existing lists of qualified people? Do they supersede the persons that are on the list for appointment?

Mr. MACY. Yes; they can be hired in lieu of the agency calling for a certificate of names off a new register. You will see that the relationship here is roughly five new hires off certificates to one noncompetitive reinstatement. It has been running about that way for the last 10 years.

Mr. THOMAS. May I suggest, gentlemen, that you keep before you two tables, one on page 9 and page 14, dealing with recruitment examination. Conducting examinations, 203 people in 1964 against 217 in 1963. Maintenance of examination records, 81 in 1964, 83 in 1963. Referring qualified candidates—that means to the agencies after you once say they are qualified— 90 jobs in 1964 against 94 in 1963. Supervising civil service boards, 142, 142, the same. Informing public of Federal employment, 52, 52, the same. Answering inquiries, 145, 151, a decrease of 6. Guidance to agencies on civil service requirements, 26, 26. Providing veterans Federal employment service, 21, 21. Federal employment statistics, 10, 10. That comes up with 770 employees in 1964, a total cost of $5,350,000.

RECRUITMENT BY CSC AND AGENCIES

It has been our understanding here that the agencies heretofore have been placing between 80 and 85 percent of all the people under the civil service system. Your tables here are a little bit misleading or ambiguous, or I do not read them correctly.

New hires made directly by the agencies, 30,000 out of your 347,600. Instead of being 10 percent, it ought to be at least 275,000 rather than 30,000.

In your next table, new hires made by the Commission and its Boards of Examiners, the agencies, you have 268,700. Do you not have your tables reversed?

Mr. MACY. No. May I explain this? The 268,700 includes——

Mr. THOMAS. Are you saying the agencies do not do any hiring, it is your Boards of Examiners? Is that it?

Mr. MACY. Yes, the Board of Examiners is an extension of the Commission, operated within the agency with agency personnel under Commission supervision.

Mr. THOMAS. They do not go through the process of taking your examinations, where you do the grading, and all of these, at least five activities set out here on page 9.

Mr. MACY. The first three activities on page 9 are performed by the Commission on the examinations that the Commission announces and conducts itself.

Mr. THOMAS. In the agencies?

Mr. MACY. No. The fourth item, Supervising Civil Service Boards of Examiners, is the staff the Commission uses to work with the 900

Boards of Examiners that are staffed by the agencies but which apply the Commission's rules and regulations and examining techniques.

Mr. THOMAS. Do you conduct examinations for every employee hired by the agencies?

Mr. MACY. Not with Commission personnel.

Mr. THOMAS. That is what I am talking about. You have your figures reversed.

Mr. MACY. No. Let me explain. The new hires made directly by the agencies are hires made where there is no examination available either through the Commission or through the Boards of Examiners. The Commission would examine under this program for about 40,000 appointments.

Mr. THOMAS. That is your figure of 142 employees, supervising Civil Service Board Examiners?

Mr. MACY. The Boards themselves would examine for a total number of appointments of 228,000.

Mr. THOMAS. Let me put it in another way. You have 203 employees for conducting examinations. If all the personnel hired by the agencies were to take these examinations, this figure here would be 800 or 900 rather than 203, would it not?

Mr. MACY. It would be a substantially larger figure if the Commission were doing the examining for all 268,700 that are listed over here on page 14.

The staff of 203 is concerned with conducting examinations that will lead to the appointment of 40,000 people for whom the Commission conducts the examinations with its own resources.

Mr. THOMAS. Do you give examinations for all this 268,700?

Mr. MACY. Yes, sir. These are examinations that are conducted either by the Commission or by the Boards of Examiners. The Commission itself will conduct examinations for approximately 40,000 of this total.

Mr. THOMAS. Of the 268,700?

Mr. MACY. Yes. Two hundred and twenty-eight thousand will be examinations conducted by——

Mr. THOMAS. That is what I say.

Mr. MACY. This says new hires made by the Commission and its Boards of Examiners. We can break this out and insert it in the record if that would be helpful to you, showing that the Commission——

Mr. THOMAS. How many employees will the agencies replace themselves in the fiscal year? What is your estimate for next year?

Mr. MACY. That is this figure of 347,600 at the top of page 14. That is the estimated number of new hires by all agencies under the civil service system in 1964.

Mr. THOMAS. What part of that will they handle themselves?

Mr. MACY. They will handle themselves through a Board of Examiners, supervised by the Commission, approximately 228,000; 40,000——

Mr. THOMAS. You do not have to grade papers and issue examinations for that 240,000?

Mr. MACY. No; we set standards, we supervise, we assure that they are operating in accordance with the Commission's requirements.

Mr. THOMAS. That being true, why cannot this appropriation here be cut in half? You rely upon the agencies to hire under some degree of supervision by the Civil Service Commission, but the onus and burden is on the agency of at least three-fourths of your total replacements for any fiscal year.

Mr. MACY. Two-thirds of the examinations will be conducted by boards of examiners in the agencies.

Mr. THOMAS. If they place two-thirds of them, why can they not place 99 percent or 98 percent under your supervision and do away with all this?

Mr. MACY. Because there are a number of examinations that are applicable to a variety of agencies where it is more economical and appropriate for the Commission to do the examining for the entire Government. The examinations conducted by the boards of examiners are those that are applicable to a particular installation or activity, positions that are unique to that organization.

EXAMINATION FUNCTIONS

Mr. THOMAS. These cost figures here are interesting. Put pages 15, 16, and 17 in the record.

(The pages referred to follow:)

Conducting examinations

	1962	1963	1964
Average positions	220	217	203
Cost	$1,371,005	$1,338,700	$1,297,200
Applications processed	488,342	484,500	493,800
Unit cost	($3.02)	($2.87)	$2.63

This function covers the work of (1) announcing examinations; (2) receiving applications; (3) scheduling and conducting written tests; and (4) all work involved in the review of applications and assignment of ratings to them for examinations conducted on both a competitive and noncompetitive basis.

Excluding effect of pay raise, funds requested for this function in fiscal year 1964 reflect the downward adjustment of $90,300 from that initially programed for 1963, due to expected completion of the extra Presidential postmaster workload in 1963. Increased production and decreased unit cost result from processing of a larger proportion of relatively inexpensive fourth-class postmaster and rural carrier cases, which are expected to accumulate in 1963 because of emphasis placed on completion of the extra Presidential postmaster workload.

Maintaining examination records

	1962	1963	1964
Average positions	83	83	81
Cost	$420,889	$425,900	$418,400

This item covers the work of (1) establishing lists of eligibles from Commission examinations; (2) making additions to lists as required; (3) maintaining the central index files; and (4) keeping up to date necessary information regarding all persons on the eligible lists. This work is dependent upon the number of applications processed by Commission offices and the condition of the eligible lists.

Referring qualified candidates

	1962	1963	1964
Average positions	98	94	90
Cost	$557,987	$531,700	$536,000
Names certified	373,837	357,700	357,100
Unit cost	($1.60)	($1.54)	$1.50

This function includes (1) receiving and controlling requests from appointing officers for lists of eligibles; (2) issuing certificates in response to these requests and (3) reviewing agency action on them to make sure that selections are made in accordance with applicable regulations. A reduction from 1962 expenditures is anticipated for 1963. Other than the downward adjustment required because of the decreased postmaster examinations, and the increase caused by the pay raise, no further change is anticipated in this function between 1963 and 1964.

Supervising Civil Service boards of examiners

	1962	1963	1964
Average positions	134	142	142
Cost	$1,015,008	$1,149,200	$1,185,800

This item covers the work which the Commission performs in training members of boards of examiners, reviewing their operations, and performing such services for them as distributing nationwide announcements, machine scoring written tests, and providing qualification standards for positions under their examining jurisdiction.

Boards of civil service examiners are established by agreement between the agencies concerned and the Civil Service Commission, and the Commission considers them an extension of its own examining organization. These boards, located in the larger departments and agencies, are responsible to the Commission for the work they do, since the Civil Service Act, which authorizes such boards, requires that the Commission retain control over their operations. Members of these boards are agency personnel usually performing board work on a part-time basis. However, they operate under the direction and control of the Commission and are trained and supervised by Commission employees to carry out the recruiting and examining work needed by their agencies.

Funds requested for this function are used to organize new boards and train new board members and, through regular visits, to check closely on the operations of all boards. Commission personnel give positive leadership to boards on a wide variety of day-to-day problems, such as how to plan their examining program, how to apply qualification standards to individual applications, and how to perform the multitude of duties connected with the processing of applications. Without this leadership and help by Commission personnel the board program could not exist.

In addition to the boards of examiners as discussed above, there are over 1,000 examination points in post offices throughout the country. The Commission is responsible for directing, supervising, and servicing their operations. These examination points offer a primary means of publicizing examinations and distributing application forms, and provide accessible locations for conducting written tests.

In recent years, the activity level of boards of examiners has increased substantially. Their application workload, for example, increased from approximately 1,390,000 in fiscal year 1961 to 1,590,000 in fiscal year 1962. At the same time, many of them have moved into the types of examining techniques that are more sophisticated and more complex and, consequently, more demanding in terms of the kind and amount of assistance and supervision required of the Commission's staff.

During fiscal year 1962, funds were shifted from this function to meet pressing recruitment needs and application workloads. As a result, funds were not available to maintain a normal, or adequate, program of supervision and control of this function. Funds programed in 1963, and requested for 1964, represent restoration of these resources to provide a minimally adequate program.

Investigation of Character and Fitness for Employment

Mr. Thomas. Let us take up activity 2, investigations. Put pages 23, 24, 25, 26, 27, and 28 in the record.

(The pages follow:)

Activity 2.—*Investigation of character and fitness for employment*

Functions	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
Conducting national agency check and inquiry cases (N.A.C. & I.)	279	$1,477,016 (1,590,500)	272	$1,358,600 (1,404,200)	272	$1,404,200
Investigating and evaluating suitability cases resulting from N.A.C. & I.	46	363,112 (391,000)	37	298,200 (308,200)	37	308,200
Investigating and evaluating suitability cases resulting from employment applications and arrest records:						
Personally investigated cases	31	235,399 (253,500)	23	172,100 (177,800)	23	177,800
Cases investigated on basis of record and correspondence	30	198,903 (214,200)	28	192,700 (199,200)	28	199,200
Investigating veteran and nonveteran appeal cases	9	69,441 (74,800)	12	94,300 (97,400)	12	97,400
Investigating postmaster candidates	18	144,567 (155,700)	30	237,900 (245,900)	15	120,300
Investigating qualifications of candidates for high-level positions	5	36,977 (39,800)	5	36,100 (37,400)	5	37,400
Operating civil service investigative files	92	478,225 (515,000)	93	485,100 (501,500)	93	501,500
Evaluating agencies' security programs	3	33,468 (36,000)	2	26,400 (27,000)	2	27,000
Total, activity 2	513	3,037,108 (3,270,500)	502	[1] 2,901,400 (2,998,600)	487	2,873,000

[1] Includes anticipated supplemental appropriation of $85,400 for part of pay increase costs.

Note.—Figures in parentheses are adjusted to reflect 1964 pay rates for comparability.

Workload and Unit Costs

Activity 2.—*Investigation of character and fitness for employment*

Workloads	Fiscal year	On hand	Received	Processed	Canceled or converted	Remaining	Unit cost

[1] Adjusted to 1964 pay scale for comparability.

GENERAL STATEMENT

Investigative work under Executive Order 10450, as amended (security requirements for Government employment)

Under Executive Order 10450, the Commission is required to conduct investigations and perform other services which will enable agencies to comply with the provisions of the order. In addition, the information resulting from the investigation required under section 3a of the order provides economical and effective means of determining the suitability of applicants for, and appointees to, Federal positions. These services include the conduct of national agency checks and inquiries, limited suitability investigations when a national agency check and inquiry case develops adverse information, and the maintenance of a security investigations index file. In addition, Executive Order 10550, an amendment to Executive Order 10450, requires the Commission to establish a control to insure prompt evaluation by the agencies with respect to full field investigations.

This workload is not controllable, since it is either specifically required by the Executive order or arises as a byproduct. The national agency check and inquiry cases arise as a result of appointments to positions in the Federal service.

Other personal investigations.—The Commission also conducts personal investigations in several other types of cases as required by title 5, United States Code—Preference of Veterans in Government Employment, section 851, Executive Order 10988, and the Civil Service Rules and Regulations: (1) Appeals from veterans and nonveterans; (2) qualification investigations of applicants for top-

level positions; (3) candidates for postmaster appointments; and (4) other cases arising from applications and arrest records. The workload in these functions, also, is largely uncontrollable.

Effect of management action taken during fiscal year 1962.—During fiscal year 1962 management action was taken which led to noteworthy savings in this activity, and which will continue to produce savings in future years. For example: expenditures during fiscal year 1961 were $3,192,400; in fiscal year 1962, $3,037,100 or a decrease of $155,300 (in addition an increase of 42,500 N.A.C. & I. cases was also financed without additional funds). Further decrease is shown in fiscal years 1963 and 1964. The specific actions taken were:

1. Special attention was given to holding the personal investigations workload to the lowest level possible, consistent with maintaining a quality program. In the two functions "Investigating and evaluating suitability cases resulting from N.A.C. & I." and "Personally investigated cases resulting from employment applications and arrest records" expenditures in fiscal year 1961 amounted to $861,300. In fiscal year 1962 expenditures were reduced to $598,500, a decrease of $262,800, with further decrease estimated for fiscal years 1963 and 1964.

2. Three area centers were established for processing N.A.C. & I. cases, rather than processing them at 11 different geographic locations. This produced some savings in fiscal year 1962, with further savings estimated for fiscal years 1963 and 1964. The 309,400 cases for which $1,404,200 is requested for 1964 would have cost $1,776,000 at the rate experienced during fiscal year 1961.

Reimbursable full field investigations.—The Commission, under existing public laws and Executive orders, conducts full field investigations on a reimbursable basis for all agencies except those which conduct their own by special agreement with the Commission, or by special legislation. A full field investigation consists of inquiries by personal contact concerning the experience, habits, and conduct of an individual to determine his character and reputation, loyalty to the United States, and general fitness for employment in a position of critical importance from the standpoint of the national security. These investigations are clearly distinct from the less extensive national agency check and inquiry investigations of persons appointed to nonsensitive positions. Responsibility for much of the full field investigation work was transferred from the Federal Bureau of Investigation to the Commission in 1952 by title 22, United States Code, section 1661. Since that time the Commission has been made responsible for an increasing number of these investigations, so that at the present time it is the major investigative agency insofar as personnel investigations are concerned. In 1962 the Commission made approximately one-half of all such investigations in the Federal service. No funds are being requested for this work since it is done on a reimbursable basis at the request of the agencies and is financed through a revolving fund.

PERSONNEL REQUIREMENTS

The average number of positions and salary costs for this activity are shown in the following table:

	1962, actual		1963, program		1964, estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
Central office	223	$1,259,112	202	$1,162,600	202	$1,199,000
		(1,355,900)		(1,199,000)		
Regional offices	290	1,777,996	300	1,738,800	285	1,674,000
		(1,914,600)		(1,799,600)		
Total, activity 2	513	3,037,108	502	[1] 2,901,400	487	2,873,000
		(3,270,500)		(2,998,600)		

[1] Includes anticipated supplemental appropriation of $85,400 for cost of pay raise.

NOTE.—Figures in parentheses are adjusted to reflect 1964 pay rates for comparability.

Mr. THOMAS. In this particular activity you are going to have 487 people this year against 502 for 1963, and against 513 for 1962.

INVESTIGATION FINANCED DIRECTLY AND THROUGH REVOLVING FUND

Turn to page 23. Let us take a look at this. Your big personnel load out of your investigation is conducting national agency checks and inquiries, which you abbreviate to N.A.C. & I. You show 279 people for 1962 and 272 for 1963 and 1964. Is this for the use and the benefit of the Civil Service Commission exclusively or is it for all other agencies excluding the Civil Service Commission?

Mr. MACY. This is for all agencies as a requirement under Executive order that there be at least a national agency check on every employee entering the Federal service.

Mr. THOMAS. What part of this 279 is appropriated for out of your funds and what part of it comes out of the revolving fund?

Mr. MACY. This is all out of our funds. The revolving fund operations are separate from what is presented here in activity 2.

Mr. THOMAS. You are sure this is all your funds?

Mr. MACY. These are all our funds.

Mr. THOMAS. Why should it be if it covers all other agencies? Why does this not come out of the revolving fund?

Mr. MACY. The revolving fund was set up only to finance full field investigations.

Mr. THOMAS. This is purely routine?

Mr. MACY. This is routine, mass production investigations. These are all nonsensitive and cover the entire Federal service.

Mr. THOMAS. You get no reimbursement for this whatsoever?

Mr. MACY. That is correct.

Mr. THOMAS. Is that a matter of law?

Mr. MACY. No. This has been financed in this fashion because it is believed to be a part of the Commission's responsibility with respect to the review of applicants.

Mr. THOMAS. You have no legislative authority for this?

Mr. MACY. Executive Order 10450 and the Civil Service Act. The Civil Service Act itself calls for us not only to examine for qualifications but also suitability or fitness. This is a part of the fulfillment of that requirement.

Mr. THOMAS. Why could you not pay for the whole investigation activity of the other agencies?

Mr. MACY. We have unit costs on this. What you are suggesting is we charge them $4.54 a case for this particular service? Is that what you have in mind?

Mr. THOMAS. Is any part of this money reimbursed to you?

Mr. MACY. No, sir.

Mr. THOMAS. Why should not they reimburse you for it?

Mr. MACY. I would argue that this is an appropriate function——

Mr. THOMAS. They reimburse you for the larger cases. Why should they not reimburse you for this one? You are doing their work. This is not exclusively your work. What part of this is your work?

Mr. MACY. A very small percentage of these cases would involve individuals to be employed in the Civil Service Commission. This has been viewed as a part of the Commission's responsibility in as-

suring that appropriately suitable persons entered the Federal service.

Mr. THOMAS. It is your responsibility up to a certain point, and beyond a certain point the agencies pay you. That does not make sense.

Mr. MACY. The agencies pay us for programs based upon sensitive positions which require a complete investigation in advance of appointment.

Mr. THOMAS. You are saying you pay the bill where a man gets drunk once a week and if he gets drunk three times a week, the agency that is looking him over pays for it.

Mr. MACY. No. It depends upon the nature of the position. If the position is one that has an extensive exposure to national security, it is a sensitive position, and the Executive order requires that there be a full field investigation of the individual in advance of employment. On the other hand, if the position is nonsensitive, the extent of the advance review is the national agency check and inquiry To review all of the intelligence and police records concerning the individual and to check his past employment. If we find in the course of that operation there is some seriously derogatory information, it is then converted——

Mr. THOMAS. We understand that. We are talking about a question of accounting here.

Mr. MACY. I hate to argue against your making it possible for the Commission to charge for it.

Mr. THOMAS. We are not arguing, just throwing it out to see what you think about it.

Mr. MACY. I would be only too happy to have this.

Mr. THOMAS. 272 employees are virtually doing the work of not your own agency, investigating, evaluating suitability cases. The same thing applies to the 37 people investigating and evaluating suitability cases resulting from the National Agency checks.

Mr. MACY. Yes.

Mr. THOMAS. Investigating, evaluating suitability cases resulting from employment applications after arrest. That is the same thing.

Mr. MACY. Yes.

Mr. THOMAS. Personally investigated cases, that is the same thing.

Mr. MACY. Correct.

Mr. THOMAS. Cases investigated on the basis of record and correspondence, the same thing.

Mr. MACY. Yes.

Mr. THOMAS. Investigating nonveterans' appeal cases, the same thing.

Mr. MACY. No. There we depart from it. This is the investigation of appeals filed by veterans and nonveterans to adverse actions taken by the agencies against them.

Mr. THOMAS. That covers everybody except your own employees, though?

Mr. MACY. This covers any employee who files such an appeal.

Mr. THOMAS. In the same classification of the other items we just mentioned.

Mr. MACY. In terms that it relates to employees generally.

Mr. THOMAS. Investigating postmaster candidates.

Mr. MACY. This is a part of the examining process for postmasters, a very sensitive examining process.

Mr. THOMAS. That is for the Post Office Department?

Mr. MACY. Yes.

Mr. THOMAS. Investigating qualifications of candidates for high level positions. This is all for other agencies other than yours.

Mr. MACY. Yes.

Mr. THOMAS. Operating civil service investigative files.

Mr. MACY. That is in support of the rest of the activity. This is their basic tool in making these investigations.

Mr. THOMAS. This covers everybody except yours, or including yours?

Mr. MACY. Including ours.

Mr. THOMAS. Evaluating agencies' security programs.

Mr. MACY. This is a responsibility assigned by the President to the Commission to appraise the conduct of security programs in all agencies.

Mr. EVINS. They do not call on you to investigate many candidates for high level positions if you only employ five people.

Mr. MACY. This is a judgment we make with respect to certain high level positions. We then add this as an additional feature to acquire more information on which to rate the individual.

FBI INVESTIGATIONS

Mr. EVINS. Does the FBI move in your field, your jurisdiction in this area? In the high level positions, do they turn it over to the FBI?

Mr. MACY. Yes. Presidential appointees are all investigated by the FBI.

Mr. EVINS. Civil Service is not called upon to investigate any Presidential appointees?

Mr. IRONS. The high level appointees are all Presidential.

Mr. MACY. These are all top career positions below Presidential appointees.

Mr. EVINS. You do not have too many if you just employ five people.

Mr. MACY. This is a relatively limited activity. Most high level positions in the career service are filled by promotion from within.

Mr. EVINS. And they have already had investigation.

Mr. MACY. Yes. They have been investigated previously.

Mr. EVINS. How many people do you know that the FBI uses in this investigative work?

Mr. MACY. We do not have that figure.

Mr. IRONS. They fit it in with their regular investigative program. They do not segregate it for accounting purposes.

Mr. MACY. We do refer to the FBI any case that we investigate where we find some information reflecting on the loyalty of the individual. The case is then turned over to the FBI, and they conduct a full field investigation. This is relating to our revolving fund activity and the work we do for the international agencies.

OPERATION OF THE INVESTIGATIONS REVOLVING FUND

Mr. OSTERTAG. That is what I would like to have cleared up. This revolving fund is a fund wherein the agencies reimburse you and it goes into this fund and then you continue to use that to pay the expenses?

Mr. MACY. That is correct.

Mr. OSTERTAG. In other words, it is a continuing fund. How is that kept in balance so that it really serves the purpose?

Mr. MACY. An initial appropriation was made when it was set up. The Commission determines the cost of conducting these examinations on a unit basis. You will note on page 170 that in 1962 it cost $351, in 1963, $364. We are estimating $377. We charge the agency——

Mr. OSTERTAG. This is per case?

Mr. MACY. Per case. We charge the agency at that rate. We receive sufficient funds through the transfers from the agencies to sustain the level of the revolving fund.

Mr. OSTERTAG. The agency is required to budget for it or contemplate this cost?

Mr. MACY. Yes.

Mr. OSTERTAG. In their respective budgets?

Mr. MACY. Yes.

Mr. OSTERTAG. How do the agencies know what your rate is going to be? Do they have such costs ahead of time?

Mr. MACY. We give them a forecast. It has been running in the neighborhood of $350 to $375 for a number of years. Under this program we conduct a very substantial number of investigations each year. As I recall, last year it was about 40,000. Nearly half of that, 19,500, were for the Atomic Energy Commission for employees of their contractors.

Another large user was NASA. NASA proposes 6,100 such investigations this year.

We have a long list, which covers a full page here, of the other agencies, their estimate of the number of cases they will require us to handle in 1963 and 1964. I would be happy to add this to the record.

PERSONNEL ENGAGED IN INVESTIGATIVE WORK

Mr. EVINS. Your total investigative workload is up, but the number of personnel required to do the work is slightly down.

Mr. MACY. This is true in activity No. 2, the work we perform under our regular program. This is due to the fact that——

Mr. OSTERTAG. This is exclusive of the revolving fund or the reimbursable program?

Mr. MACY. Correct. This is nonreimbursable investigative program. So that the 487 individuals that we estimate will be necessary to staff activity 2 in 1964 must be increased by the number that is necessary in order to conduct the reimbursable program, in order to get the total strength in investigations. Our estimate is designed to support the work to be assigned by the agencies. We will have to have the revolving fund activity staffed to the extent of 1,535 people.

You see, this is a very substantial portion of the Commission's total business. Nearly 2,000 of our roughly 4,000 employees are engaged in the investigative business.

Mr. OSTERTAG. Is this reflected in this budget?

Mr. MACY. The 1,535 are reported on page 170, relating to the revolving fund.

Mr. OSTERTAG. I know, but a revolving fund is money that is not budgeted.

Mr. MACY. There is no appropriation for it.

INSPECTIONS AND CLASSIFICATION AUDITS

Mr. EVINS. If there are no further questions, we will turn to activity 3. Mr. Reporter, place in the record the chart on page 41, and pages 42, 43, and 44.

The pages referred to follow:

ACTIVITY 3.—*Inspections and classification audits*

Functions	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
Inspecting agency personnal operations	231	$2,029,353 (2,206,000)	242	$2,171,900 (2,255,700)	242	$2,255,700
Administering the career development, training, and incentive award programs	24	235,426 (255,900)	33	341,200 (354,300)	33	354,300
Total, activity 3	255	2,264,779 (2,461,900)	275	[1] 2,513,100 (2,610,000)	275	2,610,000

[1] Includes anticipated supplemental of $82,000 for part of pay increase costs.

PERSONNEL REQUIREMENTS

The average number of positions and salary costs for this activity are shown in the following table.

Functions	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
Central office	95	$898,855 (977,098)	101	$977,200 (1,014,880)	101	$1,018,400
Regional offices	160	1,365,924 (1,484,802)	174	1,535,900 (1,595,120)	174	1,591,600
Total, activity 3	255	2,264,779 (2,461,900)	275	[1] 2,513,100 (2,610,000)	275	2,610,000

[1] Includes anticipated supplemental of $82,000 for part of pay increase costs.

NOTE.—Figures in parentheses are adjusted to reflect 1964 pay rates for comparability.

GENERAL STATEMENT

This activity includes the following principal functions: (1) Inspecting to determine the extent of agency compliance with statutory and regulatory provisions, and ordering corrective action in cases of noncompliance; (2) evaluating agency personnel management to assure that it is assisting in the accomplishment of agency mission; (3) assisting agencies in improving their personnel management in light of legislative and executive direction and intent, and in conformance with the objective of attaining a wholly effective personnel system throughout the Government; (4) administering the Government-wide career development, training, and incentive award programs; and (5) classifying positions in the

three highest grades provided for in the Classification Act of 1949, as amended, and at similar salary levels provided by other legislation, and classifying hearing examiner positions under the provisions of the Administrative Procedure Act.

The Civil Service Commission has been designated by Executive Order 9830 as the central source of leadership and guidance for personnel management matters in the Federal Government. As new features are added to the Federal personnel program through legislative or executive action, there is an increase in requests, from agencies and individuals, upon Commission offices for technical advice and assistance and for increased training of agency personnel. For example, there has grown an increasing demand for the Commission to discharge more effectively its responsibilities for the improvement and coordination of Federal training programs as prescribed in the Government Employees Training Act, and to improve career development programs. The Commission's response to these requests is designed to assure that personnel operations are carried out effectively and efficiently.

Beginning with the middle of fiscal year 1962, the Commission has made important revisions in program emphasis. Inspections are more comprehensive and delve into such areas as manpower utilization, equal employment opportunity, employee conduct and ethics, and employee-management cooperation. The promotion and coordination of the joint use on an interagency basis of common training resources to achieve the improvements and economies contemplated by the Congress in training legislation have been emphasized. A staff member in each regional office was assigned during fiscal year 1962 to career development and training activities, requiring increased amounts for that function for fiscal years 1963 and 1964.

So as to be able to accommodate to the changes in program emphasis mentioned above, and to establish an organization able to accomplish this mission more effectively, the Commission reorganized the structure of its regional offices during fiscal year 1962 by (1) combining the separate functions of examining and inspection into a single integrated Personnel Management Division, (2) establishing Civil Service representative stations in 59 locations outside the cities where regional headquarters are located, and (3) assigning an employee development officer in each region to coordinate career development and training activities. In order to accomplish this reorganization effectively, within a relatively short period of time, and to provide for the urgent training and cross-training required for Civil Service representatives and regional technical staff, the Commission had to cut back temporarily on some of its major program goals, particularly in the area of inspections.

With the start of fiscal year 1963, the reorganization and the training of technical staff were nearing completion. For fiscal year 1963 an effort has been made to restore the inspection activity to as normal a level as possible, at the same time providing for the added programs mentioned above, which also are to be emphasized. In order to effectively carry out responsibilities assigned to it by Congress and the President, the Commission has necessarily programed more funds for this activity during fiscal year 1963 than were expended during 1962, with a continuing level of operations being projected for fiscal year 1964. More detailed explanation of the need for these funds is contained in subsequent paragraphs.

Mr. EVINS. This is inspections and classification audits. In 1963, you have 275 employees. You are requesting the same, 275, for the next year. The appropriation is the same. No change there.

Mr. MACY. No change at all.

You will note that in these tables, as in the previous ones, we have included in parentheses what the amount would have been in 1962 and in 1963 in the event the same salary levels existed as will exist in 1964.

Mr. BOLAND. Who is the Director of this activity?

Mr. MACY. This is headed by Mr. Seymour Berlin, who has directed the Bureau of Inspections for the past 18 months. You will notice a significant portion of this work is carried out in the regional offices. Staffs for this activity operate under the direction of our regional directors and work with the agency headquarters and installations in the field.

Administration of the Retirement Systems

Mr. Evins. We shall turn to activity 4, "Administration of the retirement systems." Mr. Reporter insert pages 50, 51, 52, and 53 in the record.

(The pages referred to follow:)

Activity 4.—*Administration of the retirement systems*

Functions	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
Adjudicating annuity and death claims	109	$659,963 (710,700)	113	$705,500 (728,300)	106	$693,200
Adjudicating refund claims	23	119,770 (129,000)	23	124,600 (128,700)	23	127,700
Adjudicating claims for deposit	14	75,636 (81,400)	14	75,900 (78,400)	13	74,200
Answering inquiries	48	280,542 (302,100)	47	289,200 (298,500)	46	292,500
Maintaining the monthly benefit payment roll	41	204,177 (219,900)	65	432,900 (444,100)	69	379,400
Accounting for retirement fund transactions	30	166,097 (178,900)	30	173,800 (179,400)	30	179,400
Maintaining files of retirement records	51	208,146 (224,100)	50	211,300 (218,100)	50	216,900
Conducting actuarial and statistical studies	12	87,718 (94,500)	12	91,600 (94,400)	14	113,500
Performing medical work	62	473,132 (510,600)	60	486,800 (503,200)	60	503,200
Total, activity 4	390	2,275,181 (2,451,200)	414	[1] 2,591,600 (2,673,100)	411	2,580,000

[1] Includes anticipated supplemental appropriation of $77,500 for cost of part of pay raise.

Note.—Figures in parentheses are adjusted to reflect 1964 pay rates for comparability.

Summary workload table

Workloads	Fiscal year	On hand	Received	Processed	Canceled	Remaining	Unit cost	
Annuity and death claims	1962	10,089	95,984	95,231	638	10,204	$6.93	($7.46)*
	1963	10,204	99,800	100,300	504	9,200	7.03	(7.26)*
	1964	9,200	96,000	95,500	500	9,200	7.26

	1964	----------	----------	671,700	----------	----------	.56	

*Adjusted to reflect 1964 pay rates for comparability.

PERSONNEL REQUIREMENTS

The average number of positions and salary costs for this activity are shown in the following table:

	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
Central office	365	$2,070,562 ($2,229,800)	391	$2,385,000 ($2,459,100)	388	$2,366,000
Regional offices	25	204,619 ($221,400)	23	206,600 ($214,000)	23	214,000
Total, activity 4	390	2,275,181 ($2,451,200)	414	[1] 2,591,600 ($2,673,100)	411	2,580,000

[1] Includes anticipated supplemental appropriation of $77,500 for cost of part of pay raise.

NOTE.—Figures in parentheses are adjusted to reflect 1964 pay rates for comparability.

GENERAL STATEMENT

This activity provides for the administration of the Civil Service Retirement Act, the Panama Canal Construction Annuity Act, and the Lighthouse Service Widows' Benefit Act. Workloads are not controllable because they result from the exercise of legal rights by employees, retirees, and other beneficiaries under the retirement laws.

The work performed in administering the Civil Service Retirement Act consists largely of (1) adjudicating annuity and death claims; (2) adjudicating refund claims of former employees for the payment of amounts to their credit in the funds; (3) adjudicating claims for deposit covering creditable service for retirement purposes; (4) answering inquiries relative to these matters; (5) maintaining all necessary accounting and control records to properly administer the fiscal activities of the fund (including receipts from employees and Government contributions, payments to annuitants, survivors, and other claimants, and maintaining individual retirement record accounts); and (6) conducting actuarial and statistical studies.

The administration of the Panama Canal Construction Annuity Act and the Lighthouse Service Widows' Benefit Act requires the Commission to adjudicate and pay claims to persons entitled to benefits under these acts.

Total requirements for this activity in fiscal year 1964 exclusive of pay increase costs represent a net reduction of $6,000 from the amount originally programed in fiscal year 1963 resulting from (*a*) a reduced need of $45,100 based on a decreased workload largely offset by (*b*) additional needs of $39,100.

The additional requirements which must be met are (1) $21,100 to provide for the normal increase in the number of annuitants on the rolls, and (2) $18,000 to provide for conducting a quinquennial valuation of the retirement fund as required by the Civil Service Retirement Act.

Mr. EVINS. You had 414 employees in this work in 1963, and you are asking for 411 for next year, a slight reduction in personnel and also a reduction in comparative cost. Do you wish to make any further statement on this, Mr. Chairman?

Mr. MACY. I do not believe so. I believe the text covers this program. This is a continuation of the activity in the retirement field based upon the existing statutes and the maintenance of the retirement roll. This is growing moderately each year.

NUMBER OF DOCTORS ON STAFF

Mr. THOMAS. How many doctors have you at the Commission? You used to have 12. I remember when we had to search around 7 or 8 years ago to figure out how many doctors. How many do you have now? You had 12 over there then.

(Off the record.)

Mr. MACY. We have 17 doctors at present: 10 in the regional offices, 1 in each region, and 7 on the staff in Washington.

DISABILITY RETIREMENTS

Mr. THOMAS. How many people are retiring with disability?

Mr. MACY. The actual number of actions that were processed for disability retirement in 1962, 29,529. We estimate that in 1963 and 1964 we will process 43,900 actions under the disability retirement program.

Mr. BOLAND. With respect to the 29,529 you processed in 1962, how many actually retired on disability?

Mr. IRONS. That is a totally different question. This is the number of actions.

Mr. MACY. This is the number we acted on. Have we the precise number who were retired on disability?

Mr. IRONS. 33⅓ percent.

Mr. THOMAS. Give us the accurate figures on that.

Mr. IRONS. During fiscal year ended June 30, 1962, there were 16,737 disability claims out of a grand total of 50,524 employee annuitants added to the rolls—33.1 percent of the total number of additions to the rolls.

Mr. MACY. It has been running about that percentage; has it not?

Mr. IRONS. Yes.

Mr. THOMAS. What is the total number processed last year?

Mr. IRONS. The total number of annuity claims processed was 59,906. In addition 35,325 death claims were processed.

TOTAL RETIREMENTS

Mr. MACY. The 671,000 is the average number on the roll, who are paid monthly from the retirement fund.

Mr. OSTERTAG. That is your total, overall employees under the retirement operation?

Mr. MACY. Yes; former employees and survivors covered by the plan. This is the number.

Mr. THOMAS. How many do you have retiring in 1963 and 1964? That has been going up very rapidly for the last 3 years on account of favorable legislation passed 2½ years ago.

Mr. MACY. In 1962, there were 50,000.

Mr. THOMAS. Where is that table?

Mr. MACY. I believe that is outside of the budget presentation. We can give you that figure and the breakdown by categories.

Mr. THOMAS. We ought to have that. Read it into the record.

Mr. MACY. Yes. The total number of retirements——

Mr. THOMAS. Let us go back 5 years and see the effect of that legislation.

Mr. MACY. Do you have that?

Mr. IRONS. I would be very glad to introduce in the record the total report of employee annuitants added to the rolls from the beginning of the act to date. I have it here.

Mr. THOMAS. Let us go back 5 years.

Mr. IRONS. Five years from 1962 would be 1957. All right. In 1957, 44,296; 1958, 51,840; 1959, 44,514; 1960, 45,161; 1961, 50,228.

Mr. THOMAS. When was the liberalizing act passed?

Mr. IRONS. 1956.

Mr. THOMAS. No; it is more recent than that.

Mr. IRONS. You are thinking of annuitants on the rolls. The big difference in annuitants added to the rolls came between 1956 and 1957. In 1956, there were 33,000 people retired. That is the year the act passed. The next year, 44,000, a big jump that year. It has stayed up ever since.

Mr. RUDDOCK. The liberalized act was in effect only from October 1, 1956.

Mr. THOMAS. Go ahead.

Mr. IRONS. 1962, 50,524.

Mr. THOMAS. Is it going up or down now?

Mr. IRONS. In 1961 and 1962, they are relatively about the same.

Mr. THOMAS. The total is around 50,000, in round figures.

Mr. IRONS. Yes.

Mr. THOMAS. Break that figure down.

CATEGORIES OF RETIREES

Mr. IRONS. We had 52 retire for mandatory retirement at age 62.

Mr. THOMAS. Wait a minute.

Mr. IRONS. Yes; mandatorily retired at age 62. They were required to retire.

Mr. THOMAS. Why? What is the basis of that?

Mr. RUDDOCK. These would be people employed either in the Canal Zone or in Alaska who have had at least 15 years of service, either in the tropics or in Alaska.

Mr. THOMAS. Outside the continental United States. Go ahead.

Mr. IRONS. 4,075 retired at age 70 mandatorily.

Mr. THOMAS. That is mandatory.

Mr. IRONS. Yes; 4,075. They die off. Sixteen thousand seven hundred and thirty-seven for disability.

Mr. EVINS. That is the big one.

Mr. IRONS. 2,980 retired after age 55 with at least 30 years of service.

Mr. THOMAS. With a reduction in annuity?

Mr. IRONS. With a reduction in annuity. Six thousand seven hundred and eighty retired because they had acquired age 60 and at least 30 years of service.

Mr. THOMAS. That is the benefit of the recent act.

(Off the record.)

Mr. IRONS. 12,093 retired because they had reached age 62 and had somewhere between 12 and 29 years of service. Three hundred and sixty-nine retired at age 50 with at least 20 years of service. That meant they were involuntarily——

Mr. THOMAS. Your biggest category is those retired with disability.

Mr. IRONS. The single biggest category is disability.

REQUIREMENTS FOR DISABILITY RETIREMENT

Mr. THOMAS. What is the nature of the disability and what are the requirements for retirement with disability?

Mr. RUDDOCK. The definition of total disability in the Retirement Act is "total disability for useful and efficient service in the grade or class of position occupied."

Mr. THOMAS. Do they retire only under one category, and that is total and permanent disability?

Mr. RUDDOCK. Not necessarily permanent, sir, but it must be total disability. There must be a demonstration that the person has a disease or injury which renders him incapable of performing his job in a useful, efficient, and safe manner.

Mr. THOMAS. You retire, then, for occupational trouble, is that it?

Mr. RUDDOCK. The disability need not be caused by his employment. It must interfere with his performance of duties, but it could arise from any cause.

Mr. THOMAS. You can retire either by virtue of a disease, occupational or otherwise, or an injury?

Mr. RUDDOCK. Yes.

Mr. THOMAS. Our disability retirement is very liberal, then, is it not?

COMPENSATION UNDER FEDERAL EMPLOYEES COMPENSATION ACT AND CIVIL SERVICE RETIREMENT

Mr. RUDDOCK. Yes. Where the disability is the result of employment, for example, a job injury or a job-incurred illness—a nurse acquiring tuberculosis, for example, in a hospital—normally these people receive their benefits under the Federal Employees Compensation Act rather than under the Retirement Act. They have a choice. They cannot get both.

Mr. THOMAS. Which is the more liberal?

Mr. RUDDOCK. The Compensation Act, by far. It does not relate the benefit to the length of service of the individual. It relates it only to his salary and the degree of his disability.

Mr. BOLAND. Do you make a determination of whether or not the employee should retire under the Federal Employees Compensation Act?

Mr. RUDDOCK. No, sir. That is done by the Department of Labor.

Mr. BOLAND. How many applications for retirement under the Federal Employees Compensation Act would there be?

Mr. RUDDOCK. Actually, the individual does not apply to retire under that act. He applies for compensation. If they determine that he is unable to work because of a job-incurred condition or injury, then they pay him compensation. It is not considered as a retirement.

Mr. BOLAND. Do a great number of Federal employees who are about to reach age 70 make this effort to retire on compensation rather than on the basis of civil service retirement? Is there a number of Federal employees who do apply for disability compensation, attempting to prove that the disability was caused by the job itself?

Mr. RUDDOCK. I do not know the answer to that. They would have to demonstrate the proximate cause of the disability.

Mr. BOLAND. They would get more money under the Federal Employees Compensation Act than under civil service?

Mr. MACY. They would have clearly to demonstrate the job connection.

Mr. BOLAND. It must be a service-connected disability?

Mr. MACY. That is correct.

Mr. RUDDOCK. It is Federal employees' workmen's compensation in the ordinary sense.

Mr. THOMAS. It is not compensation, though, when they retire under the Civil Service Act for disability. Don't you pay higher annuities for disability?

Mr. RUDDOCK. Only in this respect: The law provides a minimum disability annuity. In other words, he gets either the annuity which he has earned by his length of service and his salary, or he may receive 40 percent of his average salary, provided that figure does not exceed the annuity he would have earned if he had continued working until age 60.

Mr. THOMAS. What if he retires under disability under the civil service retirement, he does not get the full amount of his retirement as it would be if he finished out his service?

Mr. RUDDOCK. No, because normally he would have less service.

Mr. EVINS. The question I want to ask is, how many apply for disability retirement who do not receive it or are not awarded it?

Mr. RUDDOCK. That is approximately 5 percent.

Mr. THOMAS. Out of the 16,000, you mean 15,000 received it?

Mr. RUDDOCK. No.

Mr. IRONS. Five percent more than this number would apply and be rejected.

Mr. RUDDOCK. Most people reach the decision to apply for disability retirement rather reluctantly.

Mr. THOMAS. There is no percentage in it.

Mr. RUDDOCK. No.

Mr. THOMAS. What number of that 16,000 applicants did you grant?

Mr. MACY. That is the number we granted.

Mr. EVINS. They granted 95 percent of the applicants.

Mr. MACY. We rejected something less than 1,000.

Mr. THOMAS. Let us get some lunch and come back at 1:30, gentlemen.

(The subcommittee recessed at 12:30 p.m.)

AFTERNOON SESSION

Mr. THOMAS. Let us come to order, gentlemen.

ABSORPTION OF PAY INCREASES

Mr. EVINS. Earlier this morning, Mr. Chairman, you indicated that your budget would be less for next year except for the automatic increases required as passed by Congress.

Mr. MACY. That is correct. The total increase in dollars requested in the salaries and expenses apropriation is to cover the increase in salary rates required by Public Law 87–793.

Mr. EVINS. That is how much?

Mr. MACY. That comes to $237,000.

Mr. EVINS. Can you not absorb that?

Mr. MACY. We are planning to absorb in fiscal year 1964 a total of $366,000.

Mr. EVINS. We discussed most of these categories under Administration of the Retirement Systems. Do you have anything further under this, Mr. Chairman?

DEVELOPING PROGRAMS AND STANDARDS

Mr. EVINS. Let us turn to Activity No. 5, Developing Programs and Standards. This is a sort of brain trust idea or group. You have 159 employees in 1963, and ask for 159 next year, with no increase in funds. You are not planning on any new ideas? You have them all pretty well formulated?

Mr. MACY. I would not exactly state it that way. Our belief is that with the staff we have in these activities, we can sustain the Commission's responsibility in the development of new programs, the maintenance of our directives and instructions, in the establishment of standards, qualifications and classification and in the development of tests and measures for our examining activities.

Mr. EVINS. Mr. Reporter, place the chart on page 62 and the text on page 63 in the record.

(The material referred to follows:)

ACTIVITY 5.—*Developing programs and standards*

Functions	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
Providing leadership and guidance in strengthening the Federal personnel programs.	35	$328,648 (360,000)	35	$339,000 (353,100)	35	$353,100
Maintaining the Commission's system of directives and instructions.	41	364,295 (399,100)	35	333,300 (347,200)	35	347,200
Establishing and maintaining standards	44	414,835 (454,500)	44	429,600 (447,500)	44	447,500
Providing selection methods and tests to measure qualifications.	44	338,669 (371,000)	45	367,900 (383,200)	45	383,200
Total, activity 5	164	1,446,447 (1,584,600)	159	[1] 1,469,800 (1,531,000)	159	1,531,000

[1] Includes anticipated supplemental appropriation of $53,000 for part of pay increase costs.

NOTE.—Figures in parentheses are adjusted to reflect 1964 pay rates for comparability.

GENERAL STATEMENT

The principal functions of this activity are to provide necessary policy development, standard setting, and research services on all elements of the Federal personnel programs so that the Civil Service Commission can respond to the demands made upon it—demands arising from its statutory responsibilities, from Presidential directives, from court decisions, from legislative proposals, from Federal departments and employee groups, and from other sources. This includes: (1) Providing leadership and guidance in strengthening Federal personnel programs in order to be responsive to changing conditions and to improve Goverment-wide personnel practices; (2) maintaining and initiating improvements in the Commission's system for issuing regulations and instructions by which its programs and policies are carried out; (3) establishing and maintaining standards needed to evaluate candidates for positions and to classify positions under the Classification Act; and (4) conducting studies and prescribing selection methods and tests for measuring the qualifications of individuals and to improve such selection devices.

These are continuing responsibilities which give direction and purpose to the Commission work in improving governmental administration both at home

and abroad. The personnel programs, instructions, tests, and standards developed under this activity are for the use and guidance of administrators and personnel officers throughout the entire governmental personnel system.

The requirements for this activity in fiscal year 1964 are based on continuing all functions at approximately the same level as programed in 1963. This represents a decrease of five positions from the 1962 level, achieved by better manpower utilization.

Mr. EVINS. What are these special projects?

Mr. MACY. As indicated at the bottom of page 67, we have a number of special projects that are handled by this particular staff. I think you will note that we have recited particularly the development of a program for forecasting Government manpower requirements by occupational groups. This is a need that has been felt for some time, but it is particularly acute now in view of the Government's need for scarce skills in science, engineering, medicine, and other technology.

A second project is one of working with the agencies in the development of systems for a greater degree of mobility within the career service, so individuals with the best skills are available for assignment in one agency or another. This also relates to our objective of improving manpower utilization in the Federal Government so we get a maximum return on the individuals who are employed.

There are other projects listed on page 68, but I think these two are representative of the type of continuing work that falls under the category of special projects.

Mr. EVINS. Are there any questions on developing programs and standards?

Mr. BOLAND. I do not know that you have any results yet, but is this study on automation and its effect on personnel continuing?

Mr. MACY. This is going on. We work very closely, particularly with the Internal Revenue Service, on modifications in the personnel system to make it possible for the Federal Government to take advantage of automation and improved technology with the minimum adverse effect on the employees. This will be continuing as new automated systems are installed in the Federal Government.

Mr. BOLAND. Do you expect this to decrease the personnel requirements?

Mr. MACY. The experience has been that in most of the programs where automation has been installed, it has made it possible for the agency to take on an increasing workload without increasing personnel to the same extent, so automation picks up the added workload. There will be some dislocations, however, and our desire there is to anticipate them as much as possible in advance so plans will be in process to retrain and reassign the personnel who may become surplus.

APPELLATE FUNCTIONS OF THE COMMISSION

Mr. EVINS. Mr. Reporter, put pages 82, 83, 84, 85, and 86 in the record.

(The pages referred to follow:)

ACTIVITY 6.—*Appellate functions of the Commission*

Functions	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
Veteran (sec. 14) appeals	38	$313,148 (342,000)	36	$309,100 (323,200)	36	$323,200
Nonveteran (E.O. 10988) appeals			14	116,000 (121,100)	14	121,100

	1963	29	95	95	4	25	264 (276)
	1964	25	95	95	3	22	276
All other appeals	1962	57	621	554	20	104	86 (94)
	1963	104	795	795	17	87	80 (83)
	1964	87	795	795	15	72	83
Prohibited political activity cases.	1962	49	118	124		43	494 (540)
	1963	43	135	140		38	504 (529)
	1964	38	135	140		33	529

[1] Figures in parenthesis are adjusted to reflect 1964 pay rates for comparability.

PERSONNEL REQUIREMENTS

The average number of positions and salary costs for this activity are shown in the following table:

	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost
Central office	58	$491,078 (536,300)	62	$570,000 (577,800)	62	$577,800
Regional offices	48	385,958 (421,500)	49	380,000 (412,200)	49	412,200
Total, activity 6	106	877,036 (957,800)	111	[1] 950,000 (990,000)	111	990,000

[1] Includes anticipated supplemental appropriation of $33,600 for part of pay increase costs.

GENERAL STATEMENT

This activity consists of the following appellate functions: (1) Processing appeals submitted in accordance with laws, rules, and regulations administered by the Commission; (2) administering the political activity statutes; and (3) rendering advice on such matters to agencies, individuals, and their representatives. Workloads in this activity are not controllable since they arise from the exercise of appeal rights granted by law or regulations.

Beginning in fiscal year 1963 a new workload of nonveteran appeals will be received as the result of Executive Order 10988, which extends the same rights of appeal to nonveterans as is available to veterans under the Veterans' Prereference Act. Without benefit of prior experience for forecasting receipts of this type, a conservative estimate with respect to receipts, production, and costs has been programed for fiscal years 1963 and 1964. Funds for processing this new workload in 1963 have been absorbed within the 1963 appropriation through economies achieved in Commission operations.

Reduced unit costs in fiscal years 1963 and 1964 for all appellate functions are the result of regional reorganization and reduction in administrative costs through greater efficiency of operations.

No significant increase is anticipated in receipts for fiscal year 1964.

The funds requested for this activity for fiscal year 1964 provide for the same level of operation as programed for fiscal year 1963.

Narrative justification: Veteran appeals

	1962	1963	1964
Average positions	38	36	36
Cost	$313,148	$309,100	$323,200
Appeals processed	1,948	2,000	2,000
Unit cost	($176)	($161)	$161

Under section 14 of the Veterans' Preference Act of 1944 appeals may arise as a result of veteran preference eligibles being dismissed from the service, suspended for more than 30 days, involuntarily furloughed, or reduced in rank or compensation. Included in the cost of this function is time spent: (1) With the appellants, representatives of appellants, and agencies; (2) in conducting hearings; and (3) in preparing findings and recommendations in individual cases.

For fiscal year 1963, receipts of veteran appeals are estimated at 2,050 cases representing the experience level of fiscal year 1962. Production of 2,000 cases in 1963 will permit workload in this function to remain current.

Receipts for this category of appeal are expected to continue at the same rate in fiscal year 1964 as estimated for fiscal year 1963. By maintaining an annual production rate of 2,000 cases, it is estimated that workload will be maintained at a current level during fiscal year 1964.

Funds requested for fiscal year 1964 provide for the same level of operation as fiscal year 1963.

Mr. EVINS. Appellate functions of the Commission. This year you have 111 in this activity for $950,000; and for 1964 you project 111 employees and $990,000. This involves all your veterans appeals cases, nonveterans, suitability appeals, and types of civil service employee and field cases. In the central office you employ about 62 in the work, and there are about 49 or 50 in the field offices. Are most of these cases settled in the field, Mr. Chairman?

Mr. MACY. The bulk of the cases are resolved at what we term the first level of appeal. This means the regional office or the appeals examining office here in Washington. The second level of appeal, the Board of Appeals and Review, which acts for the Commissioners, receives less than 50 percent of the cases.

Mr. EVINS. You anticipate 2,000 appeals will be processed in the next year?

Mr. MACY. That is the estimate on section 14 appeals. Those are adverse action cases involving employees with veterans' status. This shows that we anticipate a workload at about the same level as we had in 1962.

The second item, relating to nonveteran appeals, is one in which we are still in the process of gaining initial experience. The extension of rights to nonveterans for review of appeals on the merits of the case by the Commission was only applicable July 1, 1962, under Executive Order 10988.

Mr. EVINS. How many of those are projected for this year?

Mr. MACY. We are projecting 750 of those for next year.

TOTAL APPELLATE WORKLOAD

Mr. THOMAS. Give us a round figure. Let us see what the personnel in the division do. What do they all add up to, the total number processed in these classifications?

Mr. MACY. I think we would say 2,000 section 14 appeals and 750 nonveteran appeals. That is 2,750. Roughly 200 under part 22–C.

Mr. THOMAS. Why not give us a fresh table showing the cases received, by classification, for fiscal years 1962 and 1963, received and processed.

Mr. MACY. I believe that is what we have here for 3 years.

Mr. THOMAS. You said it was cumulative for 4 or 5 years. Adding it up, it looks like 13,000 or 14,000 cases.

Mr. MACY. It is about 7,000 or 8,000 for 1962.

Mr. THOMAS. Give us a little table by classification, received and processed, two different columns.

Mr. MACY. We will put it in and show a grand total.

(The information requested follows:)

Appellate workload

Workload items	Fiscal year 1962		Fiscal year 1963		Fiscal year 1964	
	Received	Processed	Received	Processed	Received	Processed
Veteran appeals (sec. 14)	2,054	1,948	2,050	2,000	2,050	2,000
Nonveteran appeals (Executive Order 10988)			900	750	950	750
Adverse actions (pt. 22-C appeals)	992	913	210	190	210	190
Reduction-in-force appeals	1,471	1,324	1,510	1,325	1,510	1,325
Classification appeals	1,538	1,380	1,490	1,370	1,490	1,370
Suitability appeals	1,186	1,182	1,160	1,155	1,160	1,155
Performance rating appeals	104	100	95	95	95	95
All other appeals	621	554	795	795	795	795
Prohibited political activity cases	118	124	135	140	135	140
Total, appellate workloads	8,084	7,525	8,345	7,820	8,395	7,820

PROHIBITED POLITICAL ACTIVITY

Mr. OSTERTAG. Before we leave this subject, may I inquire about your prohibited political activities cases?

Mr. MACY. Yes, sir.

Mr. OSTERTAG. I believe you recently received a problem or complaint along that line. Would this classification cover the raising or solicitation of funds for political benefits and the pressure that was applied on civil service employees to purchase tickets and attend certain functions?

Mr. MACY. If an action was taken with respect to a complaint under the Hatch Act and the individual was dismissed, an appeal would show under this particular category. However, our funds for administration of the Hatch Act are covered under a separate heading. We have a limitation on the amount of money that can be spent for the administration of the Hatch Act. I believe that is $90,000.

Mr. OSTERTAG. In recent days, I believe this matter was referred to you, as the Chairman of the Commission, or to the Commission as a whole, was it not?

Mr. MACY. Let me refer to that particular situation.

Mr. WILLIAMS. It is included in the same workload that you were referring to before, the last item.

Mr. THOMAS. It indicates around 500 cases received. After 1, 2 or 3 years, or what?

Mr. MACY. The estimate is that 140 cases would be processed under the point involved here.

With respect to the situation you describe, Mr. Ostertag, if there were a complaint to the Civil Service Commission that an individual had been subjected to coercion in making a contribution to a political party, the Commisson would investigate such a complaint and form a judgment as to whether the alleged action was in violation of the act or not, and a decision would be made by the three Commissioners. The Commission to date has not received such a complaint, and in view of the newspaper publicity, anticipates there may be some and, if so, will conduct an immediate investigation.

Mr. OSTERTAG. I do not recall the exact language of the story, but if I understood correctly, recent newspaper reports indicated that

you, as Chairman of the Commission, intended to conduct such an investigation.

Mr. MACY. My comment to the press was that in the event there were complaints that fell within the Commission's jurisdiction under the Hatch Act, we would investigate them. Up to the present time, we have not received any. We have had no complaints.

The Commission's jurisdiction under the Hatch Act is limited to employees in the competitive civil service.

Mr. OSTERTAG. Yes.

Mr. MACY. All others in the excepted services are covered for enforcement purposes by the head of the particular agency.

(Off the record.)

EXECUTIVE AND ADMINISTRATIVE SERVICES

Mr. EVINS. We shall turn to "Activity 7, executive and administrative services." Place in the record the chart on page 94 and the statement on 95.

(The material referred to follows:)

ACTIVITY 7.—*Executive and administrative services*

Functions	1962 actual		1963 program		1964 estimate	
	Average positions	Cost	Average positions	Cost	Average positions	Cost

Total, activity 7	285	1,960,879 ($2,131,300)	285	[1] 2,010,000 ($2,108,900)	281	2,084,000

[1] Includes anticipated supplemental appropriation of $57,100 for part of pay increase costs.

NOTE.—Figures in parentheses are adjusted to reflect pay rates for comparability.

GENERAL STATEMENT

This activity consists of the executive and administrative functions of the Commission as performed in its central office and as listed in the table on the preceding page. Included are (1) the overall management and services required to facilitate the performance of the operating activities heretofore presented; (2) the approval of policy in the formulation of civil service rules and regulations; and (3) the recommendation of measures to the President to promote the more effectual accomplishment of the objectives of the civil service laws and rules.

Mr. EVINS. In the "Office of the Commissioners," 23 were on the staff for 1962, and 23 are projected for next year. Executive direction, legal services, director of management services, and the other

services of the executive and administrative branch—there are 285 employees for this activity in 1963; 281 for 1964, a reduction in personnel.

Mr. MACY. A reduction of four employees.

Mr. THOMAS. A mighty small reduction there, gentlemen.

Go ahead, Mr. Evins.

Mr. EVINS. If there are no questions, we will move over to "Other objects."

Mr. BOLAND. A bipartisan commission has been established for the purpose of looking into the overall policy of the Civil Service Commission. Who serves on it?

Mr. MACY. The three Commissioners are Commissioner Lawton, Commissioner Hampton, and myself. The 23 positions listed there are the positions in our immediate office, plus the secretariat for the Commissioners.

OTHER OBJECTS OF EXPENSE

Mr. EVINS. If there are no further questions, we will turn to "Other objects." You are asking for a total of $4,162,000. For travel and transportation, there is no increase. Transportation of things is up slightly. Rent, communications, and utilities are increased. Printing and reproduction are slightly down. Other services are slightly up. Supplies and materials are the same.

Any questions, gentlemen?

Insert the table on page 104 in the record.

(The table referred to follows:)

Comparative summary statement by object class: other objects of expenditure

Object classification	1962 actual	1963 program	1964 estimate
12 Personnel benefits	$1,253,160 (1,363,693)	[1] $1,324,700 (1,384,300)	$1,332,700
21 Travel and transportation of persons	511,437	547,800	547,800
22 Transportation of things	141,731	143,600	146,600
23 Rent, communications, and utilities	846,464	901,100	960,200
24 Printing and reproduction	532,672	507,000	497,000
25 Other services	429,805	304,500	308,700
26 Supplies and materials	257,250	257,300	257,300
31 Equipment	336,247	164,300	111,700
Total, other obligations	4,308,766 (4,419,299)	[1] 4,150,300 (4,209,900)	4,162,000

[1] Includes anticipated supplemental appropriation of $38,000 for part of increased costs resulting from passage of Public Law 87-793.

NOTE.—Although increases are reflected herein for personnel benefits, postage, and other items resulting from the passage of Public Law 87-793, all or part of these increases are being absorbed by the Commission with offsetting decreases elsewhere in this budget. See pages 7 and 8 for explanatory tables. Figures in parentheses are adjusted to reflect costs at 1964 pay rates for comparability.

GENERAL STATEMENT

Executive Order 10422, as amended, sets forth the procedures used for making available, to the Secretary General of the United Nations and the executive heads of other international organizations of which the U.S. Government is a member, certain information concerning U.S. citizens employed, or being considered for employment, by such organizations.

Under the Executive order, investigations are made by the Civil Service Commission and the Federal Bureau of Investigation. The Commission makes (1) background investigations in all cases involving U.S. citizens employed or being considered for employment for a period exceeding 90 days, and (2) checks of specified records (national agency checks) for short-term (90 days or less) appointees or potential appointees. The Federal Bureau of Investigation makes full field loyalty investigations whenever, during the course of investigations by the Civil Service Commission, derogatory information with respect to loyalty is revealed.

The reports of these investigations are forwarded to the International Organizations Employees Loyalty Board of the Civil Service Commission. The Board makes an advisory determination under the standard specified in the order. The standard is "* * * whether or not on all the evidence there is a reasonable doubt as to the loyalty of the person involved to the Government of the United States."

The Board sends its determinations, as advisory opinions, to the Secretary of State for transmission to the executive heads of the international organizations concerned for their use in exercising their responsibility with respect to the integrity of the personnel employed or to be employed by such organizations.

It is not the function of either the Civil Service Commission or the Federal Bureau of Investigation to make decisions as to whether the person investigated shall be retained or given further consideration for employment. That is a matter for decision by the Secretary General of the United Nations or the executive heads of other international organizations.

Based on information received from the Department of State, receipts of cases for investigation in fiscal year 1964 are expected to increase by 300 cases (from 1,035 to 1,335) or approximately 30 percent over the 1962 actual experience. The Department considers the increase of receipts to be a conservative estimate with a strong possibility that the projected increase may be substantially exceeded during the course of the year. The heavy volume of workload is attributed to the expanded programs of the various international organizations with expectation that employment of U.S. citizens will continue at the same ratio in relation to the total employed thus increasing the number of investigations required. In addition to the heavier workload, case costs of investigations conducted by the Federal Bureau of Investigation and the Civil Service Commission have also increased due to the higher personnel compensation rates in fiscal year 1964 as set forth by Public Law 87–793. Application of these increased case costs to the anticipated number of investigations will require an appropriation of $670,000 for fiscal year 1964.

ANTICIPATED SUPPLEMENTAL REQUEST FOR FISCAL YEAR 1963

Due to (1) backlogs of work carried over from fiscal year 1962, (2) an increase in the rate of receipts experienced thus far this fiscal year, and (3) increased costs due to the passage of Public Law 87–793, the Commission will request a supplemental appropriation of $200,000 for fiscal year 1963 in order to process investigations on a current basis.

Annuities Under Special Acts

Program and financing

[In thousands of dollars]

	1962 actual	1963 estimate	1964 estimate
Program by activities:			
1. To employees engaged in construction of the Panama Canal	1,623	1,594	1,480
2. To widows of former employees of the Lighthouse Service	399	406	408
Total program costs, funded—obligations (object class 13)	2,022	2,000	1,888
Financing: Unobligated balance lapsing	226		
New obligational authority (appropriation)	2,248	2,000	1,888

Annuities are paid to persons who were employed on the construction of the Panama Canal, or to their widows; and benefits are paid to widows of former employees of the Lighthouse Service.

	June 30, 1962	June 30, 1963	June 30, 1964
Panama Canal annuitants	1,770	1,624	1,469
Lighthouse Service widows	430	433	431

Mr. EVINS. We shall turn to "Annuities under special acts."

Mr. MACY. These are primarily under two acts. One is the Panama Canal Construction Act, and the Lighthouse Service Act, which provide payments to those who are covered by those acts. This is a decreasing number each year. For that reason, we note the requested amount is less than the amount appropriated in 1963, which in turn was less than in 1962.

Mr. EVINS. Place page 124 in the record and the tables on pages 125 and 126.

(The pages referred to follow:)

APPROPRIATION: ANNUITIES UNDER SPECIAL ACTS

The estimated requirements for fiscal year 1964 for payments under the Panama Canal Construction Act (48 U.S.C. 1373a), May 29, 1944, as amended, and to widows of former employees of the Lighthouse Service as provided in 33 U.S.C. 771–775, August 19, 1950, are as follows:

Appropriated, 1962	$2,248,000
Appropriated, 1963	2,000,000
Requested, 1964	1,888,000
Decrease from 1963	112,000

Funds needed in fiscal year 1964 are for the continuation of annuities authorized. New claims under the Panama Canal Construction Act, which was originally enacted in 1944, and under the Lighthouse Widows' Act of August 19, 1950, continue to be received each year, and are expected in 1964. Under the laws, these claims require retroactive payments to the beginning dates of the acts.

The decrease of $112,000 from the 1963 appropriation is due to drops for death in fiscal years 1963 and 1964 which will more than offset additions to the annuity rolls.

More detailed statements on the following pages indicate the basis of the estimated requirements for this appropriation.

Statement of funds required to finance payments to Panama Canal construction annuitants for the fiscal years 1963 and 1964

	Number	Annual rate	Funds required	
			Fiscal year 1963	Fiscal year 1964
Annuity roll as of July 1, 1962	1,770	[1] $900	$1,593,000	$1,593,000
Anticipated additions fiscal year 1963 retroactive to May 29, 1944 (4 additions times $900 average annuity times 19.08 years)[2]			+68,500	
Funds required to finance these 4 additions in fiscal year 1964	+4	900		+3,600
Total	1,774		1,661,500	1,596,600
Less drops fiscal year 1963 for death [3]	−150	450 / 900	−67,500	−135,000
Funds required for fiscal year 1963	1,624		1,594,000	1,461,600
Anticipated additions fiscal year 1964 retroactive to May 29, 1944 (5 additions times $900 average annuity times 20.08 years)[2]	+5			+90,400
Total	1,629			1,552,000
Less drops fiscal year 1964 for death	−160	450		−72,000
Funds required for fiscal year 1964	1,469			1,480,000

[1] The $900 average annuity is computed from the total annuity roll on July 1, 1962.

[2] The retroactive date refers to the effective date of the act providing such annuities and is the date from which retroactive benefits are computed. The 3d figure in the formula refers to the number of years' retroactive benefits to which new additions to the roll are entitled.

[3] Rate of $450 (annual rate of $900 for ½ year) used in computing amount of reduction in the roll for fiscal year 1963 and full rate of $900 used in reflecting this reduction in the roll for fiscal year 1964 requirements.

Statement of funds required to finance benefit payments to widows of former employees of the Lighthouse Service for the fiscal years 1963 and 1964

	Number	Annual rate	Funds required	
			Fiscal year 1963	Fiscal year 1964
Annuity roll as of July 1, 1962	430	$900	$387,000	$387,000
Anticipated additions fiscal year 1963 retroactive to Sept. 1, 1960 [1] (2 additions times $600 annual rate times 7.583 years plus 2 additions times $900 annual rate times 5.25 years)[2]			+18,500	
Funds required to finance these additions in fiscal year 1964	+2	900		+1,800
Other (those not entitled to retroactive benefits)[3]	+31	450 900	+14,000	+27,900
Total	463		419,500	416,700
Less drops fiscal year 1963 for death [3]	−30	450 900	−13,500	−27,000
Funds required for fiscal year 1963	433		406,000	389,700
Anticipated additions fiscal year 1964 retroactive to Sept. 1, 1960 [1] (2 additions times $600 annual rate times 7.583 years plus 2 additions times $900 annual rate times 6.25 years)[2]	+2			+20,100
Other (those not entitled to retroactive benefits)[3]	+27	450		+12,150
Total	462			421,950
Less drops fiscal year 1964 for death	−31	450		−13,950
Funds required for fiscal year 1964	431			408,000

[1] The retroactive date refers to the effective date of the act providing such annuities and is the date from which retroactive benefits are computed. The 3d figure in the formula refers to the number of years retroactive benefits to which new additions to the roll are entitled.

[2] The annual rate of $600 was applied for the period Sept. 1, 1960, to Mar. 31, 1958, and the annual rate of $900 was applied for the period commencing Apr. 1, 1958, and subsequent thereto in accordance with Public Law 85-351, approved Mar. 28, 1958.

[3] Rate of $470 (annual rate of $900 for ½ year) used in computing amount of increase in roll for fiscal year 1963 and full rate of $900 used in reflecting this increase in roll for fiscal year 1964 requirements.

Employees Health Benefits Fund

Mr. Evins. We will turn to the Employees Health Benefits Fund. Give us a statement as to the status of this fund, Mr. Chairman.

Mr. Macy. This Federal Employees Health Benefits program now covers approximately 1,900,000 employees and approximately 79,000 annuitants. Those covered are participating in a variety of programs that cover benefits for the employee and his family. The request in this section is for an appropriation of $9,530,000 to cover the contribution of the Federal Government for the Government's share of payments for the 79,000 annuitants under this program and a net increase of an additional 79,000 annuitants to be added by June 30, 1964. As we mentioned this morning, there is also a request to provide a dollar limitation for the administrative services under this program.

Mr. Evins. How much have the employees paid into the fund?

Mr. Macy. The employees' contribution to the fund to date.

Mr. Ruddock. For 1962, it was $218.5 million; and for 1963, it will be approximately $227 million and $266.9 million in 1964.

Mr. Evins. With a corresponding increase by the employees and the Government each year. You need $9,530,000.

Mr. Macy. We estimate that in order to sustain this part of the program, namely, the Government's payment for the annuitants, it will involve an increase of approximately $3 million a year.

Mr. EVINS. Mr. Reporter, place in the record the general statement and the table on page 130. You suggested limitations which we have discussed.

(The material referred to follows:)

EMPLOYEES HEALTH BENEFITS FUND

GENERAL STATEMENT

The Federal Employees Health Benefits Act of 1959 (Public Law 86-382, 73 Stat. 713) provides that there shall be created an employees health benefits fund to be administered by the Commission and to be available without fiscal year limitation for all payments to approved health benefits plans. The act further provides that the sums authorized to be contributed by the Government toward the health benefit subscription charge of any annuitant as defined therein (including civil service annuitants and survivors of deceased employees and annuitants, those retired under other Federal civilian retirement systems, and certain individuals in receipt of compensation under the Federal Employees Compensation Act) shall be paid from annual appropriations which the act authorizes to be made for such purposes. The act also provides that the health benefits fund will be available to pay for administrative expenses incurred by the Commission, within such limitations as may be specified annually by the Congress.

Almost 1.9 million employees and approximately 79,000 annuitants are participating in this program. For fiscal year 1962, $218.5 million was withheld from enrolled employees and annuitants and $128.5 million was contributed by the Government as its share of the cost of health benefits. An estimated $226.9 million will be deposited into the fund for fiscal year 1964 from amounts withheld from employees and annuitants and $140.5 million will be contributed by the Government.

The Government contribution to any plan is at the minimum amounts authorized by law including an add-on for administrative expense and a contingency reserve. In no case does the Government contribution exceed 50 percent of the total charge for any plan. The Government's overall share of the program's cost is 37.5 percent leaving 62.5 percent to be contributed by participants. For the 1962 fiscal year $333.4 million was paid from the fund to approved health benefits plans as the cost of providing the health benefits. Approximately $352.2 million will be paid out for fiscal year 1963 and $391.7 million in fiscal year 1964. For each health benefits plan, 3 percent of the contribution toward such plan is set aside in the fund to provide a contingency reserve. The contingency reserve can only be used to defray future increased rates, or to reduce contributions, or to provide increased benefits. In addition, 1 percent of all contributions is set aside for administrative expenses incurred by the Commission in the administration of the act.

All covered employees and annuitants have a choice between two types of Government-wide plans: (1) A service-benefit plan; and (2) an indemnity-benefit type plan. Each of the two Government-wide plans offers a further choice between two options, thus offering two levels of benefits. Many individuals have still a further choice among (1) employee organization plans, (2) a group-practice prpayment plan, or (3) an individual-practice prepayment plan. Contributions by participants are based on the type of enrollment and plan they select, and changes in plan and type of enrollment are permissible at specified periods after initial enrollment. The first "open season" allowing for changes by eligible employees and annuitants was held in October 1961. Funds are required in fiscal year 1964 to conduct another general open season in the fall of calendar year 1963.

Appropriation request, fiscal year 1964, Government payment for annuitants employees health benefits fund

	Appropriated 1962	Appropriated 1963	Estimated 1964	Changes 1964 compared with 1963
Payment to employees health benefits fund on behalf of enrolled annuitants	$4,500,000	$4,200,000	$9,530,000	+$5,330,000

Retired Employees Health Benefits Fund

Mr. Evins. We will turn to the Government contributions to the retired employees health benefits fund which we discussed this morning.

Mr. Macy. This pertains to the retired employees. As I explained this morning, in this instance the number of former employees covered will be reduced. As of June 30, 1962, there were 244,600 participants in the program. Of that number, 183,900 were employee annuitants, and 60,700 were survivors.

Mr. Evins. The amount of the appropriation request is considerably up, an increase of $1,660,000. It is declining, but the fund requirements are increasing.

Mr. Macy. Yes; the fund requirements are increasing in order to reflect the premium rate increase of approximately 15 percent that will be effective at the beginning of fiscal year 1964, an increase which will be shared equally by the participants and the Government.

We are also running into the fact that all of these programs are subjected to increased costs, health and medical programs. These costs must be met in the group program.

Mr. Irons. On the retired health benefits program, on more than one occasion in the future we will be coming before the committee indicating there must be an increase in the premium. They are getting older all the time, and the cost per individual for medical care increases.

Mr. Evins. The estimated increase of the Government contribution due to the rate increase is $2,128,000. The Government's cost for administering the fund is $392,000. There was a net loss in enrollment which is estimated at $252,000. You suggest a number of limitations in this field.

Are there any questions?

Payment to the Civil Service Retirement and Disability Fund

I think we have discussed this fund quite at length. Are there any further questions?

Insert pages 154 through 161 in the record.

(The pages referred to follow:)

	Appropriated, 1962	Appropriated, 1963	Estimate, 1964	Changes, 1964 compared with 1963
Payment to civil service retirement and disability fund	$44,637,000	0	$62,000,000	+$62,000,000

GENERAL STATEMENT

The civil service retirement and disability fund was established in 1920 to furnish retirement benefits to officers and employees of the U.S. Government who become superannuated in governmental service, or incapacitated before attaining old age. The Civil Service Retirement Act directs that the Commission shall be the administering agency and that, "Except as otherwise specifically provided herein, the Commission is hereby authorized and directed to perform, or cause to be performed, any and all acts and to make such rules and regulations as may be necessary and proper for the purpose of carrying the provisions of this Act into full force and effect."

Since passage of the Retirement Act, a number of amendments have served to revise benefits and financing procedures. The more recent amendments are discussed in this submission. During the current session of Congress legislation will be proposed which will provide for permanent financing of the retirement system.

The amount requested for fiscal year 1964 is needed to pay for increased benefits provided in part III of Public Law 87–793, approved October 11, 1962, as explained below.

EFFECT OF PUBLIC LAW 85–465

Public Law 85–465, effective August 1, 1958, increased annuities of retired employees and survivors whose benefits were based on service terminated before October 1, 1956, and provided annuities to certain widows and widowers whose spouses had died, either in service or after retirement, prior to February 29, 1948. This act originally required the termination of annuities and increases in annuities provided therein for each fiscal year beginning on or after July 1, 1960, for which an appropriation shall not have been made to cover the cost of such benefits in that fiscal year. Such appropriations were made for fiscal years 1961 and 1962.

Public Law 87–114, approved July 31, 1961, amends Public Law 85–465 by removing this appropriation requirement. However, the Independent Offices Appropriation Act for 1962 provided $44,637,000 for Public Law 85–465 benefits in that year, and also states that "the Civil Service Commission shall include annually, in its estimates to the Bureau of the Budget, estimates of the appropriations necessary to reimburse the civil service retirement and disability fund for the amounts paid out of the fund by reason of the enactment of Public Law 85–465 and the Bureau of the Budget shall submit such estimates annually to the Congress."

In accordance with the directive in the 1962 Appropriation Act, the Commission estimates that the cost of benefits provided by Public Law 85–465, to be paid out of the fund in fiscal year 1964, will be $40,020,000. However, in view of Public 87–114, an appropriation of this amount is not being requested.

EFFECT OF PUBLIC LAW 87–793

Public Law 87–793, approved October 11, 1962, has significant effect on retirement costs. The higher salaries provided in part II, effective in October 1962 and January 1964, will increase prospective retirement benefits based in part on prior service, and hence the deficiency increases.

Part III of Public Law 87–793 provides for adjustment of annuities, including those already in payment as well as the majority to be awarded in the future. The increased benefits are not now payable, since Public Law 87–793 does not authorize funds for this purpose and there is no exemption from the restriction on use of the retirement fund imposed by the paragraph headed "Civil Service Retirement and Disability Fund" in section 101 of title I of the act of August 28, 1958 (72 Stat. 1064). However, a supplemental appropriation of $30 million is being requested to cover these increased benefit payments in fiscal year 1963. The amount of $62 million included in this request is the estimated amount of such payments in fiscal year 1964. On the assumption that payment in subsequent years of benefits provided by part III of Public Law 87–793 will be contingent on annual appropriations, no increase in the normal cost and deficiency is reflected in the following estimates because of these benefit liberalizations.

ESTIMATES ON A NORMAL COST-PLUS INTEREST BASIS

Section 17(e) of Public Law 84–854, approved July 31, 1956, directs that "The Commission shall submit estimates of the appropriations necessary to finance the fund on a normal cost-plus-interest basis and to continue this act in full force and effect." Employing agencies contribute, from their appropriations, amounts equal to the sums withheld from the salaries of their employees at the deduction rate of 6½ percent of basic salary. These agency contributions are less than the Government's total retirement cost on a normal cost-plus-interest basis. The difference is developed in this submission; however, an appropriation request for this purpose is not being made.

Periodic actuarial valuations are necessary for the determination of the normal cost and the unfunded liability, or deficiency. On June 15, 1959, the board of actuaries of the civil service retirement system submitted a special report sum-

marizing the results of a valuation as of June 30, 1958. Copies of this report were furnished the interested congressional committees and the Bureau of the Budget. The new valuation produced a minor increase in the estimated normal cost, and a significant increase in the estimated deficiency.

Public Law 87–350 (75 stat. 770) approved on October 4, 1961, amends section 17(d) of the Civil Service Retirement Act with respect to interest earnings on special Treasury issues held by the fund. The board's 1958 valuation was based on an interest rate of 3 percent. The effect of Public Law 87–350 on estimated future interest earnings will be assessed by the board of actuaries and the Commission at the time of the next actuarial valuation and any necessary revisions in the normal cost and deficiency estimates will be made at that time. Until such valuation is made, deviations in interest earnings from the 3-percent rate are treated as adjustments of the deficiency. The next actuarial valuation will be as of June 30, 1963. The results, however, are not expected to be available until approximately 1 year later.

COMPUTATION OF NORMAL COST

The board of actuaries estimates that the normal cost of the benefit provisions as amended by Public Law 84–854 is 13.83 percent of the total salaries of employees covered by the Retirement Act. With employees paying 6.50 percent, this leaves a Government normal cost of 7.33 percent. As previously explained, the normal cost is not increased by the enactment of Public Law 87–793.

It is estimated that the annual payroll of covered employees will total $13,973,600,000 after the first phase of salary increases provided by Public Law 87–793, and will total $13,342,800,000 after the second phase, effective January 1, 1964. Covered payroll in fiscal year 1964 is thus estimated at the mean of these amounts, or $14,158,200,000.

The Government's normal cost in fiscal year 1964 is estimated as follows:

(1) Estimated total salaries of covered employees	$14,158,200,000
(2) Government normal cost percentage	7.33
(3) Government normal cost, fiscal year 1964: (1) × (2)	$1,037,796,000

COMPUTATION OF INTEREST ON THE DEFICIENCY

The board of actuaries estimates that the deficiency amounted to $27,451 million as of June 30, 1958. The Commission's budget estimates for fiscal years 1961 and 1962 show how this increased to the estimated amount of $31,142,649,000 at June 30, 1960, primarily because (1) no direct appropriations to the fund were made in fiscal years 1959 and 1960; and (2) Public Law 86–568 increased salaries (and hence prospective retirement benefits based in part on prior service), and also brought under the Retirement Act about 15,000 employees of agricultural stabilization and conservation county committees.

The Commission's budget submission for fiscal year 1963 shows a further increase in the deficiency to an estimated amount of $32,546,939,000 at June 30, 1961. No direct appropriations to the fund were made in fiscal years 1961 and 1962 to cover interest on the deficiency and the excess of the Government's normal cost over contributions by agencies. A further increase in the deficiency resulted from enactment of Public Law 87–114, making Public Law 85–465 benefits payable from the fund without reimbursement through annual appropriations. After allowing for the appropriation in fiscal year 1962, the Commission estimated an increase of $330,363,000 in the deficiency because of this legislation.

Neither were direct appropriations made in fiscal year 1963, so the deficiency will increase by interest thereon and by the excess of the Government's normal cost over contributions by agencies at the rate of 6½ percent of salaries of their covered employees. Interest on this excess must also be included, since the normal cost is assumed to be paid continuously throughout the year, rather than at the end of the year.

The deficiency will also increase during fiscal year 1963 because the fund in that year will earn interest at a rate lower than 3 percent. As previously stated, the board's estimates of the normal cost and the deficiency are predicated on the assumption that the fund will earn 3 percent over the long-term future. Even though Public Law 87–350 changes the basis for future investment of the retirement fund, its effect during fiscal year 1963 will result in average earnings of less than 3 percent of the total fund. This is so because while current receipts into the fund are being invested to yield over 3 percent, the bulk

of the investments are earning less than 3 percent. This deviation from the assumed rate of 3 percent is treated as an adjustment of the deficiency. As more of present investments at coupon rates of less than 3 percent are redeemed and reinvested, along with current receipts, at yield rates greater than 3 percent, any earnings in excess of an average of 3 percent of the total fund will likewise be treated as an adjustment of the deficiency, until the next actuarial valuation is made.

As previously stated, the higher salaries provided by part II of Public Law 87–793 cause an increase in the deficiency, estimated at $2,125 million. On the assumption of annual appropriations to cover the cost of benefits provided by part III, no increase in the deficiency because of this portion of Public Law 87–793 is included in the following table.

The following table shows the factors used in estimating interest on the deficiency for fiscal years 1962 and 1963.

	Fiscal year 1962	Fiscal year 1963
1. Deficiency at—		
June 30, 1961	$32, 546, 939, 000	
June 30, 1962		$33, 660, 020, 000
2. Government's normal cost, 7.33 percent of estimated annual payroll of—		
$13,096,300,000 in 1962	959, 959, 000	
$13,790,700,000 in 1963		1, 010, 858, 000
3. Agency contributions, 6½ percent of estimated annual payroll of—		
$13,096,300,000 in 1962	851, 259, 000	
$13,790,700,000 in 1963		896, 396, 000
4. Excess of item 2 over item 3	108, 700, 000	114, 462, 000
5. Amount by which interest income falls short of income at assumed rate of 3 percent (see detail on following page)	26, 343, 000	23, 566, 000
6. Increase in deficiency due to salary increases provided by Public Law 87–793		2, 125, 000, 000
7. Deficiency at June 30, excluding interest items (1+4+5+6)	32, 681, 982, 000	35, 923, 048, 000
8. Interest at 3 percent on deficiency (3 percent of item 1)	976, 408, 000	1, 009, 801, 000
9. Interest at 2 percent (for ½ year) on excess of Government normal cost over agency contributions (1½ percent of item 4)	1, 630, 000	1, 717, 000
10. Interest at 3 percent (for 8½ months) on item 6		45, 156, 000
11. Total interest (items 8+9+10)	978, 038, 000	1, 056, 674, 000
12. Total deficiency at June 30, 1962 (items 7+11)	33, 660, 020, 000	

Summary of computation on a normal cost plus interest basis, fiscal year 1964

1. Government normal cost	$1, 037, 796, 000
2. Interest on deficiency for 1963	1, 056, 674, 000
3. Total required on normal cost plus interest basis (items 1+2)	2, 094, 470, 000
4. Less contributions by agencies	920, 283, 000
5. Amount on normal cost plus interest basis not met by agency contributions (item 3–4)	1, 174, 187, 000

Detail of item 5

	Fiscal year 1962 actual	Fiscal year 1963 estimate
1. Investments in fund at beginning of year	$11,037,198,000	$12,070,638,000
2. Direct appropriation to fund (Public Law 85-465 benefits 1962; Public Law 87-793 benefits in 1963)	44,637,000	30,000,000
3. Receipts from employee deductions, voluntary contributions, service credit payments, and agency contributions	1,714,772,000	1,804,792,000
4. Benefit disbursements	1,065,702,000	1,219,000,000
5. Excess of item 3 over item 4	649,070,000	585,792,000
6. Computation at 3 percent interest:		
(a) Item 1 for 12 months	331,116,000	362,119,000
(b) Item 2 for 12 months in 1962; for 3 months in 1963	1,339,000	225,000
(c) Item 5 for 6 months	9,736,000	8,787,000
(d) Total interest at 3 percent	342,191,000	371,131,000
7. Interest income	315,848,000	347,565,000
8. Excess of 3 percent over interest income (item 6d—item 7)	26,343,000	23,566,000

Limitation on Administrative Expenses, Employees Life Insurance Fund

Mr. Evins. Administrative expenses of employees life insurance fund.

Mr. Macy. This is the fund from which the employees life insurance program is financed. These are the administrative expenses necessary for the Commission to perform its part of the responsibility. The principal costs, you will recall, come from the fact that the Commission took over the members of the beneficial association. This means that for the employees and former employees covered by those associations, the Commission has to serve as the administrative agent.

Mr. Thomas. It costs more than all the other activities put together.

Mr. Macy. That is correct. There are 115,000 estimated participants in those associations in 1963.

Mr. Evins. I think it is better to have these funds broken down separately as the chairman has suggested. Tell us about the status of the revolving fund.

Investigations Revolving Fund

Mr. Macy. The revolving fund continues to serve an expanding number of full field investigations for about 50 different agencies. The principal customers are the Atomic Energy Commission, NASA, the Peace Corps——

Mr. Thomas. How often do they pay you?

Mr. Macy. They are paying us monthly.

Mr. Thomas. The General Services Administration complain these others do not pay them regularly and they have to carry them.

Mr. Macy. I gather our customers are prompt payers, and in return we have endeavored to keep the per-case cost down. I think it significant that we have kept the cost around $350 to $375 per case. Even with the increase in salaries, we have been able to keep this figure down.

Mr. Evins. You had $15,000 on hand at the beginning of the year, and received $40,000 during the year, a total of $55,000. Average cost per case, $377. You anticipate next year about $49,000.

Mr. MACY. That is correct. You will note in that same table on page 170, Mr. Evins, that we are estimating, in order to handle the revolving fund work, the Commission will have to maintain a staff of 1,535 employees, which is a very significant portion of the Commission's total employment.

Mr. EVINS. Any questions?

Mr. THOMAS. I do not recall, gentlemen—do any of you recall green sheets on those people? What were the green sheets on that investigative group? Give us a little bird's-eye view on your salary schedule.

Mr. MACY. We can give you a breakdown from the chart on the Bureau of Personnel investigations, which shows the 487 positions that are under activity 2.

Mr. THOMAS. Also the revolving fund personnel, about 1,500. Put them in the record for us.

Mr. MACY. We shall be very happy to do that.

Mr. EVINS. Include the grade, the cost, and the salary.

Mr. MACY. We shall be happy to provide that as a supplement.

(The information requested follows):

Revolving fund, average number of positions and cost, fiscal year 1964 budget

Organization	General schedule						Total	
	GS–15	GS–14	GS–13	GS–12	GS–11	GS–9 and below	Average number	Cost
Central office	1	1	1	19	79	213	314	$2,329,200

Total, CSC	1	7	5	53	491	978	1,535	12,131,000

Mr. EVINS. As the Government continues to grow and the budget mounts and with increased personnel, the duties of the Commission are increased and you gentlemen have my personal sympathy.

Mr. MACY. Thank you, sir. I wish to say the three Commissioners are indebted to the efficiency and good management of the Commission's staff in being able to present to you this year a budget that permits the reduction of 48 positions while the Commission is faced with increased workload. We feel this represents good management.

Mr. THOMAS. Next year we respectfully request you bring all your bureau chiefs.

Thank you very much, gentlemen.

Mr. MACY. Thank you, Mr. Chairman.

THURSDAY, JANUARY 24, 1963.

Mr. THOMAS. Gentlemen, will the committee please come to order? We have with us this morning the Federal Home Loan Bank Board.

Certainly we are delighted to have with us such a distinguished group. It is nice to see our Chairman, Mr. McMurray. We were sorry to learn of his accident and regret to see him in such an uncomfortable position. We wish for you a quick shedding of your harness. I know you are uncomfortable.

Is Brother Williams with us this morning, a member of the Board?

Mr. MCMURRAY. No, sir. Mr. Williams is out of the country at the moment. He is down in Lima, Peru, at an international meeting in connection with the Latin American assistance program.

Mr. THOMAS. That is quite an important program. We wish him well in his undertaking and his studies.

BACKGROUND OF MR. DE LAITTRE

We have the privilege and pleasure of having with us Mr. John deLaittre, a new member of the Board. We are delighted to have you, sir. We hope you enjoy your stay. It is a privilege and pleasure to have you with us.

Mr. DELAITTRE. Thank you, sir.

Mr. THOMAS. While we are on the subject, give us a little something about your background, your age and everything. You look about our age, about 32 or 33.

Mr. DELAITTRE. Thank you for the compliment, sir. I would be very happy to remind you that I had the privilege and honor of succeeding the Honorable Ira Dixon as the minority member of this Board last September. I was born and brought up in Minneapolis, Minn., attended schools there and then went to Harvard College, graduating in 1929.

Mr. THOMAS. Do you know my old friend Bill Stevens then, editor of your great paper?

Mr. DELAITTRE. Yes, sir.

Mr. THOMAS. He received a promotion. They sent him down to Houston.

Mr. DELAITTRE. I have known him for many years, very well, in Minneapolis. He was regarded as a very able and imaginative newspaperman.

Mr. THOMAS. He has that reputation in Houston. He is doing a tremendous job there.

Mr. DELAITTRE. I certainly agree. You are very fortunate to have him with you in Houston.

Mr. THOMAS. He is a very superior man by any yardstick you use. I hope he votes the Democratic ticket. Go ahead, please.

Mr. DELAITTRE. After college I was fortunate enough to travel around the world for a year and then attended Harvard Law School, graduating in 1933. I commenced the practice of law in one of the larger law firms in Minneapolis on September 5, 1933, earning $75 a month which they kindly raised to $100 a month when I got married.

Mr. THOMAS. I know what you are talking about.

Mr. DELAITTRE. My early practice gave me quite an insight into the whole matter of foreclosure of mortgages, not only on farms and homes, but on larger properties.

Mr. THOMAS. I imagine you had plenty of experience after 1933, 1934 and 1935.

Mr. DELAITTRE. It gave me quite an insight into lending practices and into what a serious depression can do to people on farms and in homes in the Middle West, at least.

Then, in 1940 I was invited to become an officer of the Farmers & Mechanics Savings Bank of Minneapolis, which is a mutual savings bank, the only one in that community, and I remained there for 22 years, becoming president of the bank during the past 6 years.

I take no credit for it, but I would like to place on the record the fact that the bank was less than $100 million in size when I went there and when I left, it was very close to $400 million.

Mr. THOMAS. Remarkable.

Mr. DELAITTRE. As I say, I take no credit for that. It was due to the thriftiness of the people and also I think inflation had some effect upon this. Then in 1961 I was asked by the Chairman of the Home Loan Bank Board to become a member of his task force. I was 1 of 2 savings bank members, there being 10 savings and loan association members of the 12-man task force.

This group met a few days each month to consider and to discuss and even sometimes to argue out, various matters of policy concerning the regulation and the promotion of the savings and loan industry and the thrift industry in general in this country.

I think perhaps my association with the members of the Board during that period of 1 year is what led to my being asked to become a member of the board, to succeed Ira Dixon last summer.

Since becoming a member of the Board on September 17, I have been very happy to work with my colleagues, the chairman, Joseph McMurray, and the other member, Joseph Williams. I must say, candidly, that I have never seen three men who were expected to accomplish so much work, do so many things, and make so many decisions. However, we have a very able staff, men who are not only capable but who have spent many years in public service and are truly devoted to the task before the Board.

There are, nevertheless, many decisions that cannot be delegated that the Board has to decide, and that lead to a great deal of work—but it is all most interesting. The three members of the Board work together harmoniously. I can truly say that even though I am the minority member, politics do not enter into the important financial decisions that are before us.

Thank you, sir.

Mr. THOMAS. That is very, very nice. We are delighted and honored to have you. We know you are a dedicated public servant. We welcome you aboard.

Gentlemen, we agree unanimously, do we not?

Mr. EVINS. Yes.

Mr. BOLAND. Yes.

Mr. THOMAS. We are honored to have our able and delightful friend with us, Mr. Ira Dixon, former member of the Board. You are filling the shoes of a highly intelligent and dedicated public servant in Mr. Dixon. We wish nothing but the best for him for at least 45 more years.

Where is Judge Creighton? Judge, it is nice to see you this morning. How are you feeling?

Mr. CREIGHTON. Very well, sir.

Mr. THOMAS. Where is Mr. Walters, Director of Examinations? Mr. Walters, welcome aboard.

Mr. WALTERS. Thank you, sir.

Mr. THOMAS. Mr. Torrance is director of operating and analysis division.

Mr. TORRANCE. Thank you, sir.

Mr. THOMAS. Of course, we are always glad to have with us Mr. Corcoran, the budget officer.

May I say, we have the privilege of looking over a good many budgets every year. This is certainly a work of art. We commend you for it.

Mr. CORCORAN. Thank you, sir. We appreciate that.

Mr. THOMAS. It is perfectly done. I wish some of the other agencies would take a page out of your book. I think the committee would appreciate it.

Mr. CORCORAN. Thank you, sir.

Mr. THOMAS. Mr. Chairman, do you and your colleagues have any general observations to make to us? If you do, we will be delighted to listen to you as long as you want to talk.

Mr. MCMURRAY. Yes, sir.

GENERAL STATEMENT

Mr. Chairman and members of the committee: It is always a pleasure to come over here and meet with you and to discuss with you the problems of the Board and to have you help us do our job.

I want to say that while we have a new Board member, John deLaittre, and I know that from the brief remarks he made, you will appreciate the fact that he is——

Mr. THOMAS. Did we mention Mr. Husband?

Mr. CORCORAN. No, sir.

Mr. THOMAS. That was my error. Pardon me. We are delighted to have Mr. Husband here. He is an oldtimer, well and favorably known. He is general manager of the insurance corporation.

Excuse me. Please proceed.

Mr. MCMURRAY. As I was saying, from hearing Mr. deLaittre, you recognize that he is highly qualified and a very able member of the Board who has pitched right in because of his background and his

knowledge. However, we also are having our cake and eating it, so to speak, because we also continue to have Ira Dixon, who has consented to furnish his knowledge and experience to the Board and we are very happy that he agreed to stay with us as a consultant.

As the justifications, recently submitted to the committee in support of the Board's portion of the President's budget, contain rather complete details of our requirements, my remarks will be confined to summarizing the activities of the saving and loan business for fiscal year 1962 and the prospects of business as we see them for fiscal year 1964. I will also comment on the financial requirements of the Board for fiscal year 1964.

INCREASES IN SAVINGS AND LOAN ACTIVITIES

During fiscal year 1962, the savings and loan business continued to expand. All of the activities of the savings and loan industry reached new peaks as indicated by the following statistics: Membership in the Federal Home Loan Bank System increased by 88, reaching 4,866 at June 30, 1962. In the same period, total assets of the membership increased to $86.8 billion, a gain of 15.6 percent.

Mr. EVINS. You are almost up to the President's budget.

Mr. MCMURRAY. That is June 30, 1962. I would guess at the present time it is something about $92 billion.

Mortgage loans made by member savings and loan associations in fiscal 1962 aggregated $18.9 billion. This volume, which established a new record, reflected an increase of approximately 25 percent over the previous peak volume, established last year.

Of the total loans made, 29 percent was for construction, over 41 percent for home purchase, and nearly 30 percent for other purposes such as refinancing, reconditioning, home improvement, et cetera. Such loans made by savings and loan associations represented 43 percent of the Nation's home financing.

In the face of increasing competition for the savings dollar, the gross flow of savings into member associations during fiscal 1962 increased by 12.8 percent to $29 billion. Withdrawals amounted to $20.3 billion, leaving a net inflow of $8.7 billion. This latter figure broke by 6.1 percent the alltime high record established the previous year.

The volume of earnings, new savings, and reserves for losses in member savings and loan associations also reflected substantial increases during fiscal 1962.

Mr. THOMAS. Do you mind an interruption, Mr. Chairman?

Mr. MCMURRAY. No, sir.

Mr. THOMAS. We do not want to impose on you. You have a tremendous burden to carry. We like to work over your budgets and your tables. As we said a while ago, this one is excellent.

Getting back to your estimate of your inflow, you are going at the rate of about a hundred new charters a year. Two-thirds of them are State. One-third of them are Federal. Going to your assets, your State institutions are mostly corporate stockownerships?

Mr. MCMURRAY. The new ones.

Mr. THOMAS. Your Federals are all mutuals?

Mr. MCMURRAY. Yes, sir.

INITIAL 1932 FINANCING

Mr. THOMAS. Back in 1932 when you organized, you went to the Treasury and borrowed $125 million. You would pay it back about 20 years later. The System owes nothing to anybody.

Mr. MCMURRAY. That is correct, sir.

OWNERSHIP OF SYSTEM ASSETS

Mr. THOMAS. You have a tremendous asset in your 11 banks. They borrowed the money. That has been repaid. The assets of the 11 banks belong to all your member banks.

If you were to dissolve the System tomorrow, where do the assets go?

Mr. MCMURRAY. To whom would they go?

Mr. THOMAS. Yes.

Mr. MCMURRAY. In a mutual association to the shareholders.

Mr. THOMAS. Each individual depositor would share in them?

Mr. MCMURRAY. Yes, sir.

Mr. THOMAS. How would you divide that profit? Is there any profit stored up or is it a paper profit?

Mr. MCMURRAY. There are also reserves, sir.

Mr. THOMAS. How would you figure out the reserves? Here is a man who has been a depositor say of a thousand dollars for 10 years. One has been a depositor for 20 years of a thousand dollars. One is a depositor of the same amount of money for a year. Would you figure it out on the basis of time? How would that distribution be made?

Mr. MCMURRAY. Actually, the way you would have to figure it out is every shareholder is equal to each other in terms of the share that they have of the reserves.

Mr. THOMAS. That is the point. What share of the reserves does that individual have? He has been in the System with the same amount of money, 10 years, 20 years, and 1 year.

Mr. MCMURRAY. It would be the same. The idea is these mutual associations will live forever and they serve a perpetual need in the community. This, of course, raises some questions about the conversion from a mutual to a stock association where the present shareholders "divvy" the surplus and the past shareholders do not. That is why some people I have heard argue against the right of associations to convert into stock companies because someone gets something for free.

EXPENSES OF THE BANK SYSTEM

Mr. THOMAS. Here in your budget you have a couple of limitations, $2,470,000 for your administrative expenses and a limitation in your nonadministrative expense of $12,934,000, but where is the rest of your operating expense covered?

Mr. MCMURRAY. I am sorry, sir.

Mr. THOMAS. This is not your entire operating expense of the System by any means, is it?

Mr. MCMURRAY. No, sir.

Mr. THOMAS. Where is that covered?

Mr. CORCORAN. The banks' expense, Mr. Chairman. You will find it on page 26.

Mr. THOMAS. I looked for it carefully. Point it out to me.

Mr. CORCORAN. On page 26 you have the operating expenses. The banks' operating expenses for the year were $74 million; this includes over $68 million in interest charges.

Mr. THOMAS. What is that operating expense?

Mr. CORCORAN. Operating expenses for the 11 banks.

Mr. THOMAS. That is 42?

Mr. CORCORAN. Operating expense was $74 million and the net operating income was $42 million.

GREENSBORO, N.C., BANK EMPLOYMENT

Mr. THOMAS. How many employees do you have? You have about 850 or 860 in your Examining Division assigned to your 11 banks. If you have that many examiners, what is the employment? I noticed your biggest employment in your Examining Division, larger than New York and all of them, is in Greensboro, about 144. If you have that number in the Examining Division, what is the total in the bank exclusive of examiners? Those are some of the things I had to chase all over the lot for last night.

I did not quite find it.

Mr. CORCORAN. The examiners are not attached to the banks; they are in the bank districts.

Mr. THOMAS. They are chargeable here but what is the employment in that bank?

Mr. CORCORAN. There are 25 employees, sir.

Mr. THOMAS. No more than 25?

You mean it takes 144 examiners to keep up and examine with all the member institutions, State and Federal, within the jurisdiction of that bank, which I presume covers 7 or 8 States and you only have 25 people in the big bank itself serving the same area?

Mr. CORCORAN. That is right, sir.

Mr. THOMAS. Is that a correct figure of 25?

Mr. CORCORAN. Approximately, yes, sir.

Mr. DELAITTRE. That figure was given to me yesterday by the chairman of the board of that particular bank.

OVERALL EXPENSES OF SYSTEM

Mr. THOMAS. Where is that $90 million expense covered? That is your big item of expense. That is the grandpapa item.

Mr. CORCORAN. That is as far as the banks are concerned.

Mr. THOMAS. What other expense do you have beside those?

Mr. CORCORAN. In the Insurance Corporation we have nonadministrative expense, which appears in our justification, page 108 gives the expenses for the Insurance Corporation; it includes both administrative and nonadministrative.

Mr. THOMAS. The only thing that is covered in this budget is what for the Insurance Corporation?

Mr. CORCORAN. Administrative expense of the Insurance Corporation.

Mr. THOMAS. Where is it set out as to the nonadministrative expense?

Mr. CORCORAN. It is set out in the statement on page 108, statement B.

Mr. THOMAS. Statement B?

Mr. CORCORAN. Yes, sir, page 108.

Mr. THOMAS. Here is your expense of $15.7 million.

Mr. CORCORAN. That is right.

Mr. THOMAS. What part of that is out from under the limitation?

Mr. CORCORAN. The first item is the limitation, $1,335,000; the rest is nonadministrative.

Mr. THOMAS. All right. What is the total expense of all the operating units, including the big banks, now?

Mr. MCMURRAY. Our total expense is $16,739,000.

Mr. CORCORAN. That is only administrative.

Mr. THOMAS. I am talking about banks, the Insurance Corporation, administrative, nonadministrative. It is in the neighborhood of about $90 million, is it not?

Mr. CORCORAN. It would be nearer a hundred million dollars, sir.

Mr. THOMAS. Where is that set out?

Mr. CORCORAN. It is not set out in any one place, sir; I am figuring it in my mind.

Mr. THOMAS. I could not find it, Mr. Corcoran.

Give us a horseback opinion. The only thing covered in here is the $7.5 and $12.9 million. That is the chickenfeed part of it. You have a total operating expense of around $90 million. You say nearer a hundred than ninety?

Mr. CORCORAN. Seventy-four for the banks; 15 for the Insurance Corporation which amount includes approximately $13 million for interest charges; and the examiners and supervision another $12 million. That would be around $100 million, plus $2.4 million for the administrative expense of the Board. It would be over a hundred million, sir.

COMPENSATION OF PERSONNEL IN THE BANKS

Mr. THOMAS. What about your personnel sheets on those items not covered in the limitation? Are they under civil service?

Mr. CORCORAN. No, sir. The banks' personnel are not under civil service.

Mr. THOMAS. Do you have a comparable pay scale for your banks?

Mr. CORCORAN. I am not at all sure, sir.

Mr. MCMURRAY. No, sir. I would say no. The bank presidents are in the same category as the Federal Reserve bank presidents. The bank presidents' and officers' pay is different than ours. It is higher than the Board members' as a matter of fact.

Mr. THOMAS. What is that salary? What is the salary for the president of the bank?

Mr. MCMURRAY. They vary from $26,000 to $35,000.

OPERATING AUTHORITY

Mr. THOMAS. Where in the basic law do you get that distinction? Where is the operating authority? Where is the chief counsel? Can

you put your finger on that part of the law? In the back of the justification you were very kind. You set up the history of the bank. Might I suggest to the membership they turn to this and read it over. I am sure you have already done it. It is pretty complicated. It gives the history of the organization. Which one of these acts pertains? The last act gives to the Chairman of the Board the authority to do the managing. We are quite familiar with that. Wherein is the authority that sets the pay, et cetera, where you have one scale of pay for the banks, one for the Board, et cetera, and where is the authority, the direction in law to put a certain part of your operation under limitation and the other part not under limitation?

Mr. CREIGHTON. Mr. Chairman, under the Bank Act it provides for the organization of the banks and sets forth that the directors of the bank shall have authority to hire their employees (sec. 12) subject to approval by the Board. These banks are separate independent corporations, the stock of which is owned by the member institutions.

Mr. THOMAS. But they all started out by virtue of a Treasury loan.

Mr. CREIGHTON. That is true. They started out by virtue of a Treasury loan but that loan was repaid. The loan was made under provisions of the act and then it provided for the retirement of that loan.

Mr. THOMAS. That was in the basic act of 1932.

Mr. CREIGHTON. 1932, yes, sir.

Mr. THOMAS. The various reorganization steps that you have gone through, of which there have been a half dozen since then, have not changed the basic principle of the act?

Mr. CREIGHTON. Not with respect to the banks; no, sir.

Mr. THOMAS. We are not complaining. We are just seeking information. I do not quite see the logic of the thinking though for the banks to have one scale of pay and the Board to have another when after all, the responsibility is in the Board.

Mr. CREIGHTON. Mr. Chairman, I think this Board has suggested that many times.

Mr. THOMAS. We have no objection to the part the bank plays. We have no objection to that. That pattern ought to be followed throughout the Government.

Mr. CREIGHTON. I think the Board has taken the position for a long period of time that the Classification Act was not applicable to the Board but the Civil Service Commission ruled to the contrary.

Mr. THOMAS. They are not different from some other organizations I can mention that were created by Federal statute, financed by the taxpayers' money and when they pay off they become separate, independent organizations over and above everybody else.

If they get in trouble they run right back to mama, do they not?

Mr. CREIGHTON. I think that is right.

Mr. THOMAS. Excuse me. Go ahead, Mr. Chairman. We are familiar with your general facts.

INCREASES IN THE HOME LOAN BANKS

Mr. MCMURRAY. Increases were also reflected in the activities of the 11 Federal home loan banks. Total assets during fiscal 1962 increased by 24.1 percent reaching $4.2 billion. Capital stock, held

by members only, increased by 2.2 percent to $1.1 billion. This was a reduction in the rate of increase in capital stock—last year's increase was 12.9 percent—and resulted from the passage of Public Law 87–210 in September 1961 which reduced requirements for stock ownership of members from 2 percent to 1 percent of the aggregate of the unpaid principal of the subscriber's home-mortgage loans. Total capital increased by 3.1 percent reaching $1.2 billion, and legal reserve increased by 15.8 percent to $63.4 million. Net income of the 11 banks for the fiscal year increased by 13.1 percent reaching $43.3 million. Loans or advances to members in fiscal 1962 aggregated $3.6 billion, an increase of $1.4 billion or 63 percent over the peak figure established the previous year. Repayments totaled $2.7 billion, an increase of 28 percent over fiscal 1961. Loans or advances outstanding at June 30, 1962, increased by 48 percent to a peak figure of $2.8 billion. Offerings to the public of consolidated obligations of the 11 banks during fiscal 1962 aggregated $2.4 billion, a peak figure and an increase of 97 percent over fiscal 1961. The balance outstanding at June 30, 1962, reflected an increase of 70 percent over the balance at June 30, 1961.

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Federal Savings and Loan Insurance Corporation membership increased by 107 during fiscal 1962 reaching 4,267. During the same period members' combined assets increased by 15 percent to $83.4 billion. Their reserves and undivided profits increased by 14.7 percent to $5.7 billion.

Mortgage loans made by the membership in fiscal 1962 aggregated $18.6 billion. This figure broke the record made the previous year by 25.2 percent.

The Corporation's assets increased during fiscal 1962 by 53.8 percent reaching $667.2 million at June 30, 1962. Its net income increased by 8.4 percent to $61.1 million at June 30, 1962. Its reserve for insurance losses during the same period increased by 56 percent to $639.5 million; this accelerated increase in the growth of the Corporation's reserve for insurance losses results from the passage of Public Law 87–210 in September 1961 which revised the general reserve requirements of the Corporation from 5 percent to 2 percent of all insured accounts plus all creditor obligations of all insured institutions. In addition, under this law, each insured institution is required to pay to the Corporation annually, an additional premium in the nature of a prepayment at a rate equal to 2 percent of the increase in savings for the previous calendar year less an amount equal to any requirement for the purchase of Federal home loan bank stock during such period. These prepayments will be credited to a secondary reserve. Based on current projections, it is estimated that the combined total of the general and the secondary reserve will reach 2 percent or $3.4 billion by December 31, 1970.

The Corporation's potential liability increased by 14.5 percent in fiscal 1962 reaching $71.8 billion at June 30, 1962; the Corporation's insurance losses in fiscal 1962 were $3.2 million.

94926—63—pt. 1——17

Mr. McMURRAY. The statistics showing the growth of the savings and loan industry and the Bank Board's increasing responsibility you are familiar with. If I may, sir, I would like to get to the budget, itself.

Mr. THOMAS. Do whatever you like.

PROSPECTS FOR 1964

Mr. McMURRAY. In summarizing the overall growth of the industry in spite of the fact that the early part of the year, after regulation Q action by the Federal Reserve Board, there was a good deal of concern about what would happen to savings in the savings and loan associations. Yet the saving and loan associations all had new records of savings and mortgage loans, et cetera, and the commitments for mortgages are at present very good so that the saving and loan industry has had a very properous year and can look forward to a very prosperous year ahead.

The Board's budget assumptions for both the current fiscal year and for fiscal 1964 allow for a continuing upward trend in the total assets, mortgage loans, net savings, and reserves for losses of the member associations of the Federal Home Loan Bank System. The rate of growth is expected to be equal to or greater than that experienced in fiscal 1962.

The Board's 1964 budget estimates are submitted as business-type budgets in three parts, including Board and staff offices, 240 positions, $2,470,000; Division of Examination and Supervision, 1,002 positions, $12,934,000; Federal Savings and Loan Insurance Corporation 127 positions, $1,335,000, for a total of 1,369 positions and $16,739,000.

Mr. THOMAS. What part of the Board's activity is under limitation?

Mr. CORCORAN. The Board and staff offices is all administrative and is under limitation.

Mr. McMURRAY. The estimates are based on the need to keep all workloads in a current status and on the assumption that there will be no basic change in economic conditions during the budget year. They provide for an increase in overall employment over the current fiscal year of 49 positions. Of these 30 are in the Board and staff offices, 8 in the Division of Examination and Supervision and 11 are in the Federal Savings and Loan Insurance Corporation.

STREAMLINING OF EXAMINATION PROCEDURE

At this point I would like to explain the reason for the small increase in the number of positions requested for the Division of Examination and Supervision compared to previous years; last year we requested as you will recall, an increase of 63 positions. Since coming to the Board I have made it a major goal to streamline our examination procedure toward the end that we focus our examiners' attention on matters of importance and consequence rather than on minutia.

The Board has spent a considerable amount of its time studying and discussing these matters with the task force, the Advisory Council, the conference of our bank presidents and the staff. Accordingly, I am glad to report that we have made considerable progress in improving the techniques of examining, reducing routine procedures, and in general speeding up the examination.

We have encouraged in every way we can the utilization of outside auditors and the internal audit system. In accordance with this policy the Office of Examinations has modified many of its procedures to give full credit for the use of these auditors. Review of examining procedures is a continuing project. We are persistently searching for new methods and more efficient performance by the examining staff in order to improve the quality of the examination. We have made considerable progress under the very able direction of Larry Walters, our Director of Examinations. This progress, when applied to our 1964 examining workload will, it is believed, after allowing for an increase averaging about 15 percent in the assets of insured associations, permit the examination of the larger associations with very little increase in the average examination time.

INCREASE IN FUNDS AND POSITIONS REQUESTED

Provision is also made for an increase in funds over the current fiscal year of $1,752,000. Of the increase, $395,000 is in the Board and staff offices, $1,184,000 is in the Division of Examination and Supervision, and $173,000 is in the Federal Savings and Loan Insurance Corporation. In percentage terms there is an overall increase in positions of 3.7 percent, and in funds of 11.7 percent.

All the increases are explained and justified in detail in our submission. They result primarily from the continuing expansion of the savings and loan business. The expansion has its impact on nearly all offices and divisions of the Agency.

I thank you, gentlemen, for the opportunity of making these comments. My associates and I shall be glad to answer any questions you may wish to ask.

STATUS OF EXAMINATIONS

Mr. THOMAS. Mr. Chairman, let's get down to cases. How often do you get around to the banks? Are you giving each an examination under the insurance system? You had it down to 13 months last year.

Mr. MCMURRAY. As I recall the figure, it is within 12 months. We only have a few that go over a year.

Is that correct, Mr. Walters?

Mr. WALTERS. That is correct. We had six Federals that went over 12 months out of the total. We had about 43 State associations that went beyond the 12-month category because of our joint examination arrangements. We actually averaged 11.2 months for Federals last year and 11.9 months for State associations.

Mr. THOMAS. What is the result of your examination, Mr. Walters? How many of them do you find in bad condition? What is the percentage of irregularities you find in your Federals and State if any?

Mr. WALTERS. I would say there is very little difference in the overall percentage between Federal and State operations. We have had some serious problems in the State associations, probably more serious in a few instances than we have in Federals but in the aggregate number I would say there is not too much difference between the two operations.

NATURE OF DEFICIENCIES FOUND IN EXAMINATIONS

Mr. THOMAS. What is the nature of some of the deficiencies you have found?

Mr. WALTERS. The deficiencies primarily in the more serious cases have been in the lending practices of the institution. That is the area in which, of course, we are concentrating more and more and getting away more and more from the technical aspects of examination which we had in the past. That was the chairman's objective and undoubtedly it will continue to be.

In the lending activities, by virtue of the pressures——

Mr. THOMAS. What were some of the defects or practices?

Mr. WALTERS. Overlending, overappraising, making loans for larger than the actual value.

Mr. THOMAS. Does that mean you are spot-checking some of the loans and mortgages, then?

Mr. WALTERS. Actually, under the new program which the Board just adopted we have a test appraisal program which defines the criteria which each institution must meet, having to do with all phases of their operations and if on the basis of the application of those criteria——

Mr. THOMAS. How are you going to lay down a criteria on *a* piece of property in Podunk, Tex., without going looking at the property?

Mr. WALTERS. It is the aggregate of their entire operations. Those properties, if they are overlending, will show up in a number of aspects or phases of the operation. In other words, in these criteria we look at the delinquent loans, the extent of foreclosures and that type of thing. We also look at the reserves of the institution, the losses that the institution has suffered, the dividend rates, pressures which are brought about by competition for savings.

CONTROL OF DIVIDEND RATE

Mr. THOMAS. Do you have any limitations on the amount of interest and dividends they can pay? I notice some go up to 4, 4¼, and maybe 4½. Here is one in the same town which wants to stay at 3½.

Mr. WALTERS. There is no limitation. The Board does not have that authority as I understand it.

Mr. THOMAS. Are you sure about that?

Mr. MCMURRAY. There is no limitation or no authority of the Board to put a ceiling on dividends. It may be unsafe and unsound if they are paying dividends in excess of what they should pay or a condition limiting dividends to that prevailing in a community may be imposed when insurance is granted.

Mr. THOMAS. What is the remedy then as far as the Board and Examination and Insurance Division is concerned?

You have a three-way hitch or a three-way break, have you not?

SPOT APPRAISALS

Mr. MCMURRAY. Of course, if I may say something in answer to your first question and then answer this, all these indications that Mr. Walters has referred to, higher dividends, higher fees, delinquencies, are signs that perhaps an institution is reaching out too far

for risky loans and in that case they might get a local appraiser in the area to which you referred, he would be able to tell within reason if the particular appraisal was a fair appraisal. It is very difficult to be precise in appraising. It is not a science in the same sense that we know science in other fields, but you can certainly know when appraisals are way out of line in the particular area.

I am sure in your own area you can tell for example the value of a house, even as a nonexpert, that is, whether a house is worth approximately $15,000 or $25,000. You do not even have to be an expert but the Board generally finds that when an unsound situation or practice is called to the attention of the Association's Board of Directors, generally it takes such steps as are recommended and which they themselves, from their own knowledge, would take to correct the situation or practice. From my experience anyway and from what I can gather from past experience, when a situation is called to a Board of Directors' attention and the officers it is usually corrected. In some cases they are reluctant. A great deal of persuasion has to be used. Of course, the Board has only the authority really ultimately to take them over, or in the case of an insured association, to terminate insurance, which are very drastic measures and which have been used in only a few cases.

Outside of that we have what we refer to as moral suasion. I think one of the legislative measures we are working on, to amend 5d1 and 5d2, would give the Board authority to issue cease and desist orders to take care of more specific situations. This is one of the problems we are working on.

We have the H-bomb, so to speak, but do not have a shotgun. We need the shotgun.

SUPERVISORY CASES IN 1963

Mr. THOMAS. Dr. Husband, did you take over any sick banks during fiscal year 1963? How many do you have in liquidation this year or in the past 2 years?

Mr. HUSBAND. In the past 2 years we have had two embezzlement cases that were settled by our making the institutions whole.

Mr. THOMAS. You did not have to close them?

Mr. HUSBAND. No, sir. Both the managing officers are now serving time in the penitentiary. Then we had a third case which was where we had a longstanding *Long Beach* case, where we had a loan settlement.

Mr. THOMAS. Did you wind up the *Long Beach* case?

Mr. HUSBAND. We have taken over the assets and we are now in the process of trying to get title to a block of it and work it out.

Mr. THOMAS. It has not been liquidated then?

Mr. HUSBAND. As far as the relationship between Long Beach and the Board is concerned, that part is settled.

Mr. THOMAS. You have not had to liquidate a single institution in the past 2 years?

Mr. HUSBAND. No, sir.

Mr. THOMAS. That is quite a remarkable record.

Mr. Chairman, the FHA and the Veterans Administration have been plagued in the past 2 years with foreclosures. What is your record? What does Mr. Walters have to say about that?

Mr. McMURRAY. The record of foreclosures of the savings and loan associations? I have only general statistics on that.

Mr. TORRANCE. This is for the third quarter of calendar 1962. The series just started; we just started collecting them.

Mr. THOMAS. Is this in your justification?

Mr. McMURRAY. No, sir.

Mr. THOMAS. Read it into the record.

Mr. McMURRAY. This is one of the new statistics we have developed.

Mr. THOMAS. Read it into the record.

Mr. McMURRAY. Yes, sir.

The number of real estate foreclosures by real estate operators for the third quarter of 1962; by Federal home loan bank districts and in our districts we have 11 banks. We have it broken down by number, FHA, VA, and conventional and total.

The total for all districts for FHA, 1,248; VA, 1,460; conventional, 6,252, for a total of 8,960.

Then we have the values for that.

Mr. THOMAS. Let us forget FHA and VA and stay with your own organization.

What is your experience now in foreclosures throughout the system?

Mr. McMURRAY. Since we do not have statistics for the system alone except the first quarterly information which I mentioned——

Mr. THOMAS. Do you have a total figure throughout the system of the number of foreclosures for fiscal years 1961, 1962, and the first 6 months of 1963?

Mr. McMURRAY. No, sir; not within the system. This is the first statistic within the system. We have general statistics on conventional loans, and these would indicate, since we do roughly 43 percent of the conventional financing, what is happening within our system. I have such statistics and I would be glad to furnish them.

Mr. OSTERTAG. For one reason or another I have in mind the figure of 86,000 as the number of foreclosures on small business and residential mortgages for the year of 1962. Is that anywhere near correct? And is it applicable to the calendar or fiscal year?

Mr. TORRANCE. Yes, sir. That is a preliminary figure for calendar year 1962.

Mr. OSTERTAG. I believe that this is the highest record of such foreclosures in 23 years.

Mr. THOMAS. Mr. Ostertag has that figure in the record, but he requests that you insert a table on that in the record at this point. I assume that you have the information available from which you can get this in shape by districts for 1961 and 1962 and the first 6 months of 1963 for the total foreclosures by districts. Can you do that without too much trouble?

Mr. TORRANCE. Not by Federal home loan bank districts. The volume has been too small.

Mr. THOMAS. What shape can you put it in, the total figure for the whole system?

Mr. TORRANCE. We can give the total figure for the third quarter of 1962, the only one we can put in by districts.

Mr. OSTERTAG. Do you have the total figures by years?

Mr. TORRANCE. This is a new series.

Mr. MCMURRAY. All we had before was foreclosures for all over the country, no matter what kind of institution. Up until this time we have not had statistics within——

Mr. THOMAS. You certainly have foreclosures within your own organization?

Mr. MCMURRAY. Yes, we are getting such information now, but did not have it before.

Mr. THOMAS. Give us whatever information you have in table form.

(The following information was supplied for the record:)

Number of real estate foreclosure actions, by insured savings and loan associations, for 3d quarter calendar year 1962,[1] by Federal home loan districts

FHLB district	Number			
	FHA	VA	Conventional	Total
All districts	1,248	1,460	6,252	8,960
Boston	47	83	96	226
New York	225	257	213	695
Pittsburgh	82	188	316	586
Greensboro	170	250	749	1,169
Cincinnati	65	61	602	728
Indianapolis	168	61	271	500
Chicago	45	82	690	817
Des Moines	84	90	240	414
Little Rock	194	95	396	685
Topeka	88	84	191	363
San Francisco	80	209	2,488	2,777

[1] Information not available prior to July 1, 1962.

NOTE.—Includes voluntary deeds of sale.

NONFARM REAL ESTATE FORECLOSURE REPORT, THIRD QUARTER, CALENDAR YEAR 1962

The number of foreclosures on nonfarm properties totaled 21,808 for the third quarter of 1962 calendar year. Although remaining at about the same level as in the previous quarter, the aggregate for July, August, and September was up 18 percent over the same period in 1961.

Estimated number of nonfarm foreclosures

	1st quarter	2d quarter	3d quarter	1st 9 months
1935	60,924	62,499	54,207	177,630
1940	18,695	20,173	18,746	57,614
1945	3,424	3,402	2,893	9,719
1950	5,523	5,758	5,257	16,538
1955	7,089	7,765	6,757	21,611
1958	9,682	10,831	11,112	31,625
1959	11,041	11,663	10,683	33,387
1960	11,245	12,433	13,450	37,128
1961	16,891	18,608	18,508	54,007
1962	20,926	21,665	21,808	64,399
Percent change:				
1961–62	+24	+16	+18	+19
1940–62	+12	+7	+16	+12

For the first 9 months of 1962 foreclosure cases numbered 64,399—19 percent above the total for the same period last year and 12 percent greater than the January–September interval in 1940. According to trends so far this year, nonfarm foreclosures for the year 1962 will approximate 86,000.

Although the number of foreclosures has more than tripled since 1950, the annual rate of foreclosures per 1,000 mortgaged homes has increased from 1.72 to less than 4 per 1,000 mortgaged homes. At the peak of the depression in 1933, the rate of foreclosures was about 35 per thousand, or 9 times the current rate.

ESTIMATED NONFARM REAL ESTATE FORECLOSURES, 1926, 3D QUARTER 1962, ALL TYPES OF LENDERS

Annual totals

Year:	*Number*	Year—Continued	*Number*
1926	68,100	1942	41,997
1927	91,000	1943	25,281
1928	116,000	1944	17,153
1929	134,900	1945	12,706
1930	150,000	1946	10,453
1931	193,800	1947	10,559
1932	248,700	1948	13,052
1933	252,400	1949	17,635
1934	230,350	1950	21,537
1935	228,713	1951	18,141
1936	185,439	1952	18,135
1937	151,366	1953	21,473
1938	118,357	1954	26,211
1939	100,410	1955	28,529
1940	75,556	1956	30,963
1941	58,559		

Monthly data

	1957	1958	1959	1960	1961	1962
Total	34,204	42,367	44,075	51,353	73,074	
January	2,771	3,276	3,801	3,630	5,523	7,103
February	2,473	2,929	3,307	3,470	5,096	6,382
March	2,921	3,477	3,933	4,145	6,272	7,441

August	2,852	3,518	3,494	4,347	6,348	7,568
September	2,979	3,820	3,421	4,814	6,214	7,034
October	3,018	3,881	3,583	4,512	6,352	
November	2,852	3,339	3,378	4,740	6,564	
December	2,877	3,522	3,727	4,973	6,151	

NOTE.—Estimates of number of foreclosures in the United States (except Alaska and Hawaii) in all nonfarm areas are based on data reported from approximately 1,700 counties, cities, townships, or other Government divisions, and measure the number of properties acquired through foreclosure proceedings. Reporting areas include approximately three-fifths of all nonfarm 1-family dwelling units. Voluntary deeds of sale in lieu of foreclosure are not included, nor are defaults on real estate contracts.

COMPARISON OF FORECLOSURES WITH VA AND FHA

Mr. THOMAS. How does your record of foreclosures compare with that of VA and FHA? Do you have any horseback opinion on that?

Mr. MCMURRAY. Let me first explain this because it would appear from the third quarter statistics I read to you that our conventional foreclosures are higher than FHA and VA. These are only the FHA and VA mortgages within the bank system. As you know, most of our institutions make conventional loans, not VA and FHA so the percentage of FHA and VA to the total portfolio is maybe about 17 percent of the total.

If you looked at these figures you would think that the conventional foreclosures were higher than the FHA and VA.

As to the horseback opinion, I thought we had some indication of that in this sheet.

Is there any breakdown of all foreclosures, by the type of foreclosures?

Mr. TORRANCE. We can get a straight deduction of the operating data from FHA and VA. They are not quite comparable with the data we have for the Nation. The national data are compiled from county records and they are not identified in the county records as to type.

STATE AND FEDERAL FORECLOSURES

Mr. THOMAS. Is there any appreciable difference in the number of foreclosures in the hands of Federal institutions and State institutions?

Mr. TORRANCE. We do not have any clearcut evidence; no, sir.

Mr. THOMAS. What about it, Dr. Husband?

Mr. HUSBAND. I know of no evidence bearing on that, Congressman.

Mr. THOMAS. It ought not to be a question of evidence but cold facts.

Mr. OSTERTAG. What does the record show?

Mr. MCMURRAY. In the FHA you had foreclosures and you have some——

Mr. THOMAS. Are there more foreclosures in Federal institutions than there are in State institutions? You have twice as many State institutions as you do Federal institutions but what about the proportion of foreclosures as between the two? Is it higher in the Federal or is it higher in the State, or is it just about the same?

Mr. MCMURRAY. This information is not available.

Mr. TORRANCE. We may be able to break this one-quarter down by Federal and State; we are not sure.

Mr. MCMURRAY. Just looking at which district banks have more State associations than Federal association, I myself would think that there would not be any difference between Federal and State generally because it is pretty much an area problem, to some extent anyway. In some States, like Texas, you probably have more State associations than you have Federal associations. Taking the proportion, that would probably work out in ratio about the same, I would guess. I think in the process we could give the Congressman the specific answer to his question, but we do not really know if there is or is not, as was indicated by Mr. Walters—and from my experience in some of our problems, we have more problem cases with some of the State associations than we have with Federal associations. That does not in any way indicate that the State associations are, generally speaking, less well managed or less soundly run than the Federals. It just happens that you get a relatively few cases, and it would not be fair to generalize from them.

OFFICE OF RESEARCH AND HOME FINANCE

Mr. THOMAS. If you do not mind, we are trying to take a little burden off you, but apparently we are adding to it.

I notice under the Office of Research program going on something that amazed me which was to find perhaps the highest civil service

classification was for research. I notice you have got your Examining Division on a parity but I understand that is quite recent. Your Insurance Division is still underneath it but what is the nature of the research going on and why the high priority?

Mr. McMurray. I have a list of some of our studies. You will recall, Congressman, I guess it was the second time I appeared before this committee, when we specifically requested that authorization and appropriation for the GS–18 Research Director. We also requested a GS–18 for a Director of Examinations and Supervision and your committee generously gave us what we requested. Since January 1962 some of the projects that have been undertaken by the Office of Research and Home Finance have been a study of the liquidity practices of the Federal home loan banks system; a study of branching policy in the savings and loan field; the analysis of borrowing practices of member associations; proposed revision of the liquidity practices of the Federal home loan banks, recommendations growing out of which have been adopted by the Board; a study of the portfolio policy of the Federal Savings and Loan Insurance Corporation; a study of the participation loan program; and evaluation of policies in the requirement of reserve, surplus, and capital stock for stock savings and loan associations.

Then, of course, we have periodic reviews of the economy, mortgage, and housing markets, and revision of liquidity practices of savings and loan associations which is still in the process of being studied.

Some of the things we have in mind for 1963 are the evaluation of the need for, and the impact of, the Federal home loan bank advances on the lending activity of member institutions.

Factors influencing the demand for advances and techniques for estimating requirements for advances; principles and conditions affecting the liquidity of the Federal home loan banks; portfolio practices of the Federal home loan banks and the Federal Savings and Loan Insurance Corporation; flow of funds through the capital market and its impact on mortgage demand and the availability of mortgage funds; evaluation of the adequacy of mortgage data and techniques for refining the collection of data; the influence of general business conditions on demand for housing; investigation of other variables affecting housing need demand; analysis and evaluation of statistics collected by the Board, the Federal Savings and Loan Insurance Corporation, and other agencies and institutions relating to the activity of financial institutions in the mortgage and housing markets; analysis and evaluation of the economic factors influencing the granting of new charters and branches, and the approval of mergers; the influence of changes in interest rates on savings, liquid assets, and home purchase plans, and analysis of factors leading to foreclosures on real estate and changes in the volume of foreclosures.

VALUE OF RESEARCH STUDIES

Mr. Thomas. Do you put a higher priority on those studies than you do on the management of the Inspection Division and your Insurance Corporation?

Mr. McMurray. No, sir. As a matter of fact, I would say we have a high priority on everything. That is what keeps us so busy.

We work in many directions and, of course, this has carried on over the years and goes into the examination, supervision, and management, but there has not been in the past sufficient consideration given to some of the problems that went on as to how things happened. Also there was not sufficient knowledge of why and what the effects were of some of the things that were taking place. In this area, a great deal of judgment is required as to what to do and, although the Board works very hard, it is very hard to do enough studying and enough thinking on these major policy questions to give us sufficient intelligence to make the right judgments.

I would say that the research has been extremely helpful to me, and, I believe, to the other members of the Board, and very helpful to the whole system, and I think it is making the Board much more effective as a body in terms of its overall supervision and management and leadership of the industry. For example, as to the whole question of liquidity, in 1955 a real problem developed because of the way the system was operating: there was a question of whether the banks could meet their responsibilities. I do not think this will ever happen again because we are much more informed of what the problem was then and what the potential problems may be under certain circumstances.

Mr. THOMAS. Are there any general questions?

RATE OF FORECLOSURES

Mr. OSTERTAG. Mr. Chairman, I would like to return to the subject of foreclosures.

Is it fair to state that there has been a rapid increase in the total number of foreclosures?

Mr. MCMURRAY. The total number of nonfarm foreclosures—for all mortgage lenders and not just for our own system—for the first three quarters of 1961 were 54,062; 64,399, and the third quarter, which is the most recent we have, 21,808, as compared with 18,508 in 1961.

If you want to go back to 1955, there were only 6,757 for the third quarter.

Mr. OSTERTAG. In other words, there has been a substantial increase each year?

Mr. MCMURRAY. Yes, sir.

Mr. OSTERTAG. We have now reached the highest number to date?

Mr. MCMURRAY. In recent postwar years. In 1935 we had statistics where, in the third quarter of 1935, there were 54,000 as against 21,000 in 1962. It is a high point in the postwar period; yes, sir.

CAUSES OF FORECLOSURES

Mr. OSTERTAG. Mr. Chairman, to what do you attribute this sharp increase in foreclosures? What do you regard as the real cause?

Mr. MCMURRAY. There are a number of causes, I would guess. First of all, I would think we are catching up with the demand, No. 1.

Mr. OSTERTAG. In other words, there is no shortage of housing?

Mr. MCMURRAY. The supply of housing has increased to the point where you are getting into a buyer's market and up until the last 2

years, I would say you were in a seller's market. The other thing, of course, is that we had inflation and that has ceased, I would say. We do not have a situation where the prices of houses are going up because of general inflation.

The result is that when people had difficulties meeting their finance charges in the past, the value of the house had gone up and they could sell it and get out. Today when the values do not go up and they are in trouble they are not able to sell it at a profit and therefore it goes to foreclosure.

I also want to say we have much more liberal financing, especially in the Federal guarantee and insured programs and therefore there is not as much equity in the houses as there used to be, so that is another contributing factor. However, I must say that while this is a sharp increase and something we are very concerned about and which we watch very carefully, we are trying to carry out such policies as will reduce these kinds of figures. It still has not reached the point where we feel it is an emergency or anything of that nature.

It is something we hope will certainly level off, if not go down. It is not of the proportion where we have to be alarmed, if I may use that adjective. It is something we must be concerned about though, especially in some of the problem areas. We had, for example, foreclosures in the Miami area and that situation has greatly improved. We have some sections of California and there the situation is greatly improved. One of the advantages of statistics of this kind and of research is that this directs attention to these problem areas. In the past, the problem occurred and no one knew about it until it was too late. Here we are watching it and trying to take such measures to change lending practices, caution the institutions, and bring to their attention the problem so as to prevent this very thing from happening.

Mr. OSTERTAG. Your reasoning is very interesting and I believe you have painted a clear picture of what actually exists, but how about small business? Small business foreclosures would not be in line with the description you have given as to the causes applicable to residential foreclosures.

Mr. MCMURRAY. I really hesitate to give you any information on that. I would be surprised, though, that you would not find some increase in business foreclosures for some of the same reasons. There they have a lack of inflation and increasing supply of producers and so on, but I am not an expert nor do I have sufficient knowledge to answer your question intelligently.

HANDLING THE FORECLOSURE PROBLEM

Mr. OSTERTAG. In connection with this overall problem, and it is a problem and one that I would say is growing, even though you point out it has not reached an alarming state, however, it could do so and it is certainly moving in that direction. I wondered if, by virtue of your responsibilities in the financial world, what, if anything, can be done? What is the answer to the problem? How can we meet this problem? Should we stimulate inflation?

Mr. MCMURRAY. No, sir. One thing I think is happening is that in the field of homebuilding, your competition is causing homebuilders to give a lot more value for the money. I think the average lender is a lot more cautious in terms of the kind of property he grants mort-

gages on and I think he looks a lot more carefully at the credit worthiness of the mortgagor. I think all of this will tend to reduce the problem.

I think some of the problems, however, are beyond the control of the individual institution or its officers, or even beyond us. They are, rather, national problems which you in Congress will be dealing with.

The President referred to the reduction in taxes and the effect that would have on the economy and I think a full employment economy, or relatively full employment economy, would solve many of the problems. As you know, much of the foreclosures result from unemployment in some of the areas. This is one of the contributing factors.

However, I myself look to the future, and by that I mean more or less the immediate future, with considerable optimism. I think that this country is expanding at a rate of 35 million new human beings coming on this earth in the next 10 years, and with the great expansion in our industry, shifting to new areas, I think all these indicate we do not have to be concerned if we do our job. I think we will bring ourselves around to where we will have lots less unemployment and better payrolls and that is the thing we have to be concerned about in terms of financing our houses.

These are beyond the control of the Board or an individual industry. Everybody has to do his own job and we are trying to do our job to take care of the problem as we see it; that is one of the questions we are concerned about.

For example, the Home Loan Bank system studies how its advances are used, and so on, to see what it can do to help the economy at the proper time and to what extent; and at times when they are building too much, we ought to cut back. These are difficult decisions and are some of the things to which we are giving a lot of thought.

Mr. THOMAS. We certainly do thank you for your very fine statement and it has been most enlightening and you have given the committee a lot of information that we appreciate.

Mr. MCMURRAY. Thank you very much, Mr. Chairman and members.

Mr. THOMAS. Mr. Evins, will you and Mr. Ostertag build the record?

PROGRAM HIGHLIGHTS

Mr. EVINS. Mr. Reporter, place in the record pages 5 through 11, as well as page 14.

There is a wealth of valuable material here. I do not know how extensive the chairman wishes a lot of this repeated.

Mr. THOMAS. There is some repetition from division to division, but under each separate category they give the volume of work and statistical data. It is all interesting.

(The pages referred to follow:)

FEDERAL HOME LOAN BANK BOARD

Program highlights

[Dollars in millions]

Federal Home Loan Bank System	1962 actual	1963 estimate	1964 estimate
Members (June 30):			
Number	4,866	4,965	5,070
Assets	$86,800	$99,000	$111,900
Savings (shares)	$74,800	$84,600	$95,000
Mortgage loans	$72,900	$83,300	$94,300
Insured	4,267	4,380	4,499
Regional banks: Advances outstanding	$2,770	$2,500	$2,700

Outline of functions

The three agencies under the Federal Home Loan Bank Board—the Federal Home Loan Bank System, the system of Federal savings and loan associations, and the Federal Savings and Loan Insurance Corporation—were created to serve the American public through the media of savings and loan association, cooperative banks, and other financial institutions engaged in the encouragement of thrift and economical homeownership. They were established by Congress in the 1932–34 depression period, when these savings institutions—basic components of the Nation's financial structure—needed additional supports sponsored by the Federal Government on a permanent basis.

For the protection of the home seeker and the small saver and investor, the Federal Home Bank Board carries out three primary obligations, through the following activities which it directs or supervises:

Federal Home Loan Bank System.—The Federal Home Loan Bank System, through its 11 regional Federal home loan banks strategically located throughout the country, provides a permanent system of reserve banks for eligible thrift institutions of the savings and loan type. The Federal home loan banks provide advances to these member instiutions to meet withdrawal demands as well as seasonal and expansionary needs for additional home-mortage funds. Through the use of interbank deposits, the System maintains an adequate flow of home loan funds into every locality. October 15, 1962, marked the 30th anniversary of the opening of the regional banks.

The regional banks, the stock of which is owned by their member institutions, do not deal directly with individuals. The great majority of the members are savings and loan associations, also known sectionally as cooperative banks or building and loan or homestead associations. Included also in the membership of the Federal Home Loan Bank System are a number of mutual savings banks.

The importance of the Federal Home Loan Bank System is indicated by the fact that at June 30, 1962, the combined resources of its member institutions totaled almost $87 billion (the December 31, 1962, figure is estimated at over $93 billion) and that in fiscal year 1962 its savings and loan members made home loans amounting to over $18.9 billion; for calendar year 1962 the figure is estimated at $20.5 billion.

Located in most cities, suburban areas, and towns throughout the United States, the System's member institutions serve nearly 41 million people including savers, investors, and home-loan borrowers.

Federal savings and loan associations.—The creation of Federal associations was authorized by Congress in 1933 to provide additional local thrift institutions for people to place their savings and/or obtain loans to finance their homes. In their charter and form of organization, Federal associations embody the most modern practices developed by savings and home-financing institutions during their 131-year history in this country.

All Federal savings and loan associations are required to be members of the Federal Home Loan Bank System and to carry insurance of their savings or share accounts through the Federal Savings and Loan Insurance Corporation.

At June 30, 1962, there were 1,922 privately owned, local, mutual institutions operating under charter, examination, and supervision by the Federal Home

Loan Bank Board. Included among these are institutions newly organized by local citizens since 1933 and those already established which elected to transfer from State to Federal charter. Their combined resources at June 30, 1962, totaled over $46.6 billion. Federal savings and loan associations are in operation in every State and in the District of Columbia, and Puerto Rico.

Federal Savings and Loan Insurance Corporation.—Created in 1934, the Federal Savings and Loan Insurance Corporation insures, up to $10,000 each, savings or share accounts in approved savings and loan associations and similiar institutions. Insurance of savings has been an important factor in stimulating the flow of savings into thrift and home-financing institutions. These savings are used largely for the financing of homes. The number of insured institutions at June 30, 1962, was 4,267; their combined assets were $83.4 billion.

All insured institutions are members of the Federal Home Loan Bank System.

Introduction

The Federal Home Loan Bank Board is primarily a regulatory and supervisory agency in the savings and home-financing field. It also issues charters for Federal savings and loan asociations, insures savings or share accounts in Federal savings and loan associations, and in approved State-chartered savings and loan or building and loan associations and associations of the savings and loan type.

The 1964 budgets of the Federal Home Loan Board, the Division of Examination and Supervision, and the Federal Savings and Loan Insurance Corporation are based on the need for maintaining all operations in a current status, and on the assumption that there will be no basic change in economic conditions during the budget year.

The number, size, and business activity of the institutions supervised by the Board continue to increase. The following table relating to member savings and loan asociations shows the number, assets, loans made during year, and net inflow of new savings at June 30, 1961, and June 30, 1962; it also shows the increases over 1961 in dollar and percentage terms:

[Dollars in billions]

Description	Fiscal 1961	Fiscal 1962	Increase over 1961	Percent
Member savings and loan associations	4,755	4,838	83	2
Total assets at June 30	$74.6	$85.7	$11.1	15
Loans made during year	$15.2	[1] $18.9	$3.7	24
Net inflow of new savings	$8.2	$8.7	$.5	6

[1] Represents 43 percent of the Nation's home financing.

As indicated, the above figures reflect increases in membership, total assets, loans, and net savings. This level of activity and rate of growth, expected to continue during the current fiscal year, and fiscal 1964, increase the workloads of the Board, the Division of Examination and Supervision, and the Insurance Corporation to the extent that increases in both personal services and other expenses are necessary and are provided for in fiscal 1964.

Summary

The budget programs of the Federal Home Loan Bank Board including the Federal Savings and Loan Insurance Corporation are presented as business-type budgets.

A comparative summary of the budget estimates for 1964, the revised estimates for the current fiscal year, and actual expenses for fiscal 1962 is shown in the following two tables:

Comparative summary of positions and man-years

Unit	1962 actual		1963 estimate		1964 estimate	
	Positions	Man-years	Positions	Man-years	Positions	Man-years
Board and staff offices	190	173.0	210	196.2	240	220.7
Federal Savings and Loan Insurance Corporation	109	89.6	116	108.8	127	122.5
Division of Examination and Supervision	912	875.7	994	931.7	1,002	974.2
Total	1,211	1,138.3	1,320	1,236.7	1,369	1,317.4

Comparative summary of expenses

Unit	1962 actual	1963 estimate	1964 estimate
Administrative expenses:			
Board and staff offices	$1,684,052	[1] $2,075,000	$2,470,000
Federal Savings and Loan Insurance Corporation	945,063	[1] 1,162,000	1,335,000
Total	2,629,115	3,237,000	3,805,000
Nonadministrative expenses: Division of Examination and Supervision	9,948,959	[1] 11,750,000	12,934,000
Grand total	12,578,074	14,987,000	16,739,000

[1] Includes proposed supplemental due to Public Law 87-793 approved Oct. 11, 1962.

BOARD AND STAFF OFFICES

The following comparative summary shows the estimates of administrative expenses of the board and staff offices for 1964, the revised estimates for the current fiscal year, and actual expenses for 1962:

Description	1962 actual	1963 estimate	1964 estimate
Positions	190.0	210.0	240.0
Man-years	173.0	196.2	220.7
Personnel compensation	$1,337,105	$1,571,700	$1,894,500
Personnel benefits	96,542	119,300	143,000
Total personal services and benefits	1,433,647	1,691,000	2,037,500
Contractual services and supplies	332,824	404,000	472,500
Acquisition of capital assets	24,526	60,000	40,000
Total gross expenses	1,790,997	2,155,000	2,550,000
Less reimbursements	106,945	80,000	80,000
Total net expenses	1,684,052	2,075,000	2,470,000
Proposed supplemental due to Public Law 87-793 approved Oct. 11, 1962		−37,500	
Actual, authorization, and estimate	1,684,052	2,037,500	2,470,000

As shown, the Federal Home Loan Bank Board requests authority to expend up to $2,470,000 for administrative expenses of the Board and its staff offices in fiscal 1964. The estimate reflects an increase in personnel of 30 positions or 24.5 man-years, and an increase in funds of $395,000 when compared with the estimated expenses for the current fiscal year; in percentage terms, increases of 14.3 percent in positions and 19 percent in funds are reflected.

Of the increase in funds, $322,800 is in personnel compensation, $23,700 in personnel benefits, $68,500 in contractual services and supplies, less $20,000 in acquisition of capital assets.

Personal services and benefits.—The need for the 30 new positions requested is justified in the departmental justifications of the offices and divisions involved which are: Offices of the Chairman and Board Members, 6; Office of Research and Home Finance, 5; Office of Information, 1; Division of Federal Savings and Loan Operations, 3; Office of the Secretary, 6; Office of the Director of Audits, 1; Division of Personnel, 2; Division of Federal Home Loan Bank Operations, 2, and Office of the General Counsel, 4.

All other expenses.—The major portion of the increase in all other expenses is in the items of rent, communications, and utilities, $51,500; printing and reproduction, $10,000; and supplies and materials, $5,000; there is a decrease in equipment of $20,000. Review and analysis of all the items included in all other expenses together with justification of the need for the increases requested will be found beginning on page 68.

Reimbursements.—A table showing reimbursements to the Board for services rendered, for the 3 years included in the budget, will be found on page 77.

Sources of funds

The funds used to pay the administrative expenses of the Board are derived from the following sources:

Source	1962 actual	1963 estimate	1964 estimate
By assessments upon—			
Federal home loan banks	$808,345	$996,000	$1,185,600
Federal Savings and Loan Insurance Corporation	707,302	871,500	1,037,400
Division of Examination and Supervision (FHLBB)	168,405	207,500	247,000
Total funds	1,684,052	2,075,000	2,470,000

Distribution of the 1964 expenses among the three sources shown is based on the following formula which became effective in fiscal 1952. Of the total, 10 percent is charged to the Division of Examination and Supervision, 42 percent to the Insurance Corporation, and 48 percent to the banks. The percentage for the Division of Examinations and Supervision is based on past experience. The respective percentages for the Insurance Corporation and the banks are based on the ratio of the membership of each one to the combined membership of the Insurance Corporation and the bank system at June 30,1962.

[Dollars in millions]

Members	June 30, 1961		June 30, 1962	
	Number	Assets	Number	Assets
Savings and loan associations:				
Federally chartered	1,885	$40,994	1,922	$46,644
State chartered:				
Insured	2,275	31,462	2,345	36,789
Uninsured	595	2,120	571	2,248
Mutual savings banks	23	573	28	1,113
Total, all members	4,778	75,149	4,866	86,794

Included in the 571 State-chartered uninsured institutions are 146 cooperative banks in the State of Massachusetts with aggregate assets of $1.2 billion. These institutions are members of the Massachusetts Share Insurance Fund of the Cooperative Central Bank.

Mortgage loans.—Loans made by member savings and loan associations for the years indicated are shown in the following table:

Loans made by member savings and loan associations

[In thousands]

Fiscal year	Savings and loan members of FHLB System	All insured associations
1946	$2,636,640	$2,214,731
1950	4,202,461	3,708,755
1955	10,297,586	9,820,255
1956	10,428,550	10,016,647
1957	9,838,118	9,531,973
1958	10,211,808	9,929,531
1959	14,146,648	13,800,093
1960	14,193,016	13,916,162
1961	15,161,982	14,893,578
1962	18,937,180	18,646,917
1963 [1]	20,100,000	19,800,000
1964 [1]	21,100,000	20,800,000

[1] Estimate.

As indicated, total mortgage loans made by member savings and loan associations in fiscal 1962, aggregated $18.9 billion. This figure broke the record set 1 year ago by $3.8 billion or 24.9 percent.

Mr. EVINS. Then we come to operating highlights at the middle of page 20 and loans to members on page 21.

Page 25 is a comparatively condensed statement and that should be included in the record.

(The pages referred to follow:)

CAPITAL STOCK

The U.S. Government provided the original capital of the banks by investing, over a period of years, $124,741,000. This investment was retired by the banks, over the years, at a rate in excess of statutory requirements. As of July 2, 1951, the Government's investment had been fully repaid. Since that time the capital stock of the 11 banks is owned by the member institutions only. Capital stock outstanding at June 30, 1962, was $1,115,678,825, an increase of $24,118,575 or 2.2 percent since last year. This reduction in the increase in capital stock, last year's increase was 12.9 percent, results from passage of Public Law 87-210 approved September 8, 1961, which reduced requirements for stock ownership from 2 percent to 1 percent of the aggregate of the unpaid principal of the subscriber's home mortgage loans.

Operating highlights.—A comparison of the operating highlights of the banks at June 30, 1960, 1961, and 1962, is afforded in the following table:

[In thousands]

Description	June 30, 1960	June 30, 1961	June 30, 1962
Assets	$3,061,381	$3,409,753	$4,231,302
Liabilities	2,014,916	2,227,572	3,012,874
Capital	1,046,465	1,182,181	1,218,427
Legal reserve	47,102	54,759	63,432
Net income for year	33,640	38,284	43,290
Investments (par)	1,179,370	1,454,060	1,340,065

As indicated, assets at June 30, 1962, reflected an increase for the fiscal year of $821.5 million or 24.1 percent; liabilities increased by $785.3 million or 35.2 percent, thus capital increased by $36.2 million or 3.1 percent. Legal reserve increased in the same period, by $8.7 million or 15.8 percent; net income for year increased by $5 million or 13.1 percent, and investments decreased by $113.9 million or 7.8 percent.

LOANS TO MEMBER INSTITUTIONS

The following table shows the trend in loans to member institutions, repayments, and amounts outstanding at June 30 each year for the years indicated:

[In millions]

Fiscal year	Loans	Repayments	Outstanding, June 30
1950	$364.3	$285.0	$442.7
1952	409.6	573.0	652.7
1953	646.9	581.4	718.3
1954	723.7	766.9	675.1
1955	1,058.4	716.6	1,016.9
1956	948.8	792.3	1,173.4
1957	931.9	1,026.0	1,079.4
1958	1,258.6	1,408.5	929.5
1959	1,622.4	1,014.8	1,537.1
1960	2,050.5	1,817.8	1,769.8
1961	2,199.3	2,099.7	1,869.4
1962	3,583.7	2,686.0	2,767.1

Loans or advances to member institutions in fiscal 1962 aggregated $3.6 billion, an increase of $1.4 billion or 63 percent over the peak figure established in fiscal 1961. Repayments aggregated $2.7 billion, an increase over last year of $0.6 billion or 27.9 percent. Loans outstanding at June 30, 1962, aggregated $2.8 billion, an increase over 1961 of $0.9 billion or 48 percent.

[1] Consolidated Federal home loan bank obligations issued by the Federal Home Loan Bank Board and now outstanding are the joint and several obligations of all Federal home loan banks.

Mr. EVINS. You told us how many new institutions had been chartered in the year, did you not, Mr. Chairman?

Mr. MCMURRAY. Yes, sir.

ADMINISTRATIVE EXPENSES

Mr. EVINS. We then come to administrative expenses of the Board, set out on page 35, which will be included in the record.

(The page referred to follows:)

ADMINISTRATIVE EXPENSES

The administrative expenses of the Board are paid from assessments against the banks, the Division of Examination and Supervision, and the Federal Savings and Loan Insurance Corporation.

The continued rapid growth and increase in the level of activity of the savings and loan business is reflected in the following statistics: Total assets of the members of the bank system at June 30, 1962, reached $86.8 billion, an increase of $11.7 billion or 15.6 percent since June 30, 1961. Mortgage loans made by member savings and loan associations in fiscal year 1962 aggregated $18.9 billion. This figure broke the record set 1 year ago by $3.8 billion or 24.9 percent. The gross flow of savings into member associations in fiscal year 1962 was $29 billion, an increase of $3.3 billion or 12.8 percent over fiscal year 1961; withdrawals aggregated $20.3 billion, leaving a net inflow of $8.7 billion. This latter figure broke the record made 1 year ago by $0.5 billion or 6.1 percent. All these activities contribute to the general increase in the workload of the Board and its staff units.

Administrative expenses for fiscal year 1964 are estimated at $2,470,000, an increase of $395,000 or 19 percent over the estimated expenses for the current fiscal year.

The increase is made up of $346,500 in personal services and benefits, and $48,500 in all other expenses. The estimate provides for an increase of 30 positions or 24.5 man-years over the current fiscal year. Departmental justification of all increases in personal services and benefits, and analyses and justification of increases in all other expenses by object classification will be found beginning on page 41.

DIVISION OF EXAMINATION AND SUPERVISION

Mr. EVINS. We next come to page 79 where you have the Divison of Examination and Supervision, with program highlights covered. On page 83 you cover the number of insuring institutions in tables there. Mr. Reporter, we will insert those pages in the record.

(The pages referred to follow:)

DIVISION OF EXAMINATION AND SUPERVISION

Program highlights

[Dollars in millions]

Description	1962 actual	1963 estimate	1964 estimate
Examinations completed or to be completed	4,155	4,457	4,531
Average assets of insured institutions (start of year)	$17.4	$19.6	$21.7
Average volume new loans made by insured institutions during year	$4.4	$4.5	$4.6

Introduction

The budget estimate of the Division for fiscal year 1964 totals $12,934,000. The estimate reflects an increase in personnel of 8 positions or 42.5 man-years and an increase in funds of $1,184,000 when compared with the estimated expenses for the current fiscal year. In percentage terms there is an increase of 4.5 percent in man-years and 10.1 percent in funds.

Of the increase in funds $957,500 is in personnel compensation, $70,500 is in personnel benefits, $168,000 is in contractual services and supplies, and a reduction of $12,000 is in acquisition of capital assets.

The estimate is based on the assumption that the current rate of growth in the number and size of insured institutions will continue through fiscal year 1964; it is also based on the need to maintain examining and supervisory schedules in a current status.

The examining and supervisory programs are designed to protect the financial risk and interests of the Federal Savings and Loan Insurance Corporation, thus carrying out some of the statutory responsibilities vested in the Federal Home Loan Bank Board. Such responsibilities at June 30, 1962 involved 4,267 insured institutions with aggregate assets of $83.4 billion and with reserves and undivided profits of $5.7 billion. The potential liability of the Insurance Corporation at June 30, 1962, was $71.8 billion; it guaranteed financial protection of their savings to more than 31 million savers who carried their savings in insured institutions of the savings and loan type.

Assets	Number of associations		
	1961	1960	1959
At December 31:			
Over $300,000,000	15	10	10
$200,000,000 to $300,000,000	14	14	10
$150,000,000 to $200,000,000	25	15	14
$100,000,000 to $150,000,000	56	50	38
$75,000,000 to $100,000,000	69	49	41
Total	179	138	113

The volume of new loans made by insured institutions during fiscal 1962 was far greater than in any previous year. The total volume of new loans was $18.6 billion in 1962 and $14.9 billion in 1961, an increase of approximately 24.8 percent. The total volume ($33.5 billion) of new loans in this 2-year period exceeded the entire amount of mortgage holdings of these institutions at the beginning of calendar year 1957. It is estimated that the new loan volume of insured institutions will increase to $19.8 billion in fiscal 1963 and $20.8 billion in fiscal 1964, with such institutions making approximately 45 percent of all new loans on one- to four-family homes.

The continuing growth and activity of insured institutions directly affect the workload of the Office. The following table evidences the extent to which the workload has been increasing. The table presents the number and assets of the institutions at the beginning of each fiscal year, the average size of the institutions, and the new loans made during each fiscal year:

Insured institutions	1961 actual	1962 actual	1963 estimate	1964 estimate
Number [1]	4,044	4,160	4,267	4,380
Assets [1]	$63.2 B	$72.5 B	$83.4 B	$95.0 B
Average size	15.6 M	17.4 M	19.6 M	21.7 M
New loans made	14.9 B	18.6 B	19.8 B	20.8 B
Average volume new loans by each institution	3.6 M	4.4 M	4.5 M	4.6 M

[1] Beginning of year.

Key: B—billion; M—million.

FREQUENCY OF EXAMINATIONS

Mr. EVINS. I think you have already said that you have closer supervision and more examinations made each year now than previously?

Mr. MCMURRAY. More examinations; yes, sir.

Mr. EVINS. What is the law and what is the practice for the Board at the present time with respect to examinations?

Mr. McMURRAY. The practice is that we make an examination on the average for each institution, one in one year; at least one every year. Mr. Creighton can cite the law to you.

Mr. CORCORAN. There is a law on making Federal but on States it is a Board regulation.

Mr. CREIGHTON. The statute, section 403(b) of title IV of the National Housing Act, provides that every association that applies for insurance shall agree to examinations by the Insurance Corporation and shall pay the costs of such examinations.

Mr. EVINS. They merely agree to an annual examination?

Mr. CREIGHTON. Such examinations as we may require.

Mr. THOMAS. The word "annual" is not in there, Mr. Evins.

Mr. CREIGHTON. I do not believe the word "annual" is in there.

Mr. THOMAS. Eight or ten years ago the period was 2 to 3 years.

Mr. CREIGHTON. In section 5–A of the HOLC Act it provides that the Board shall provide for the organization, regulation, and examination of Federal associations.

Mr. EVINS. In view of the increasingly large number of institutions and mortgage foreclosures, nevertheless the Chairman said it was not alarming. I believe that is the word he used but we have had reports of tremendous foreclosures in the Veterans' Administration program and FHA. Coupled with these it is my personal view that it is reaching semialarming proportions.

Mr. McMURRAY. Mr. Congressman, I do know the number of foreclosures has increased. I do not know whether the overall percentage of all mortgages outstanding has increased as substantially or not. I do not know if we have that statistic or not.

I understand the percentage has increased but not as much as the number.

Mr. OSTERTAG. I read that there was a total of 86,000 in 1962 related to residential and small business foreclosures.

Mr. EVINS. I believe it has been amply brought out there have been foreclosures, but I wanted to inquire whether or not you are giving more and stricter supervision and more detailed exhaustive examinations or more frequent examinations.

Mr. McMURRAY. We are giving these examinations as Mr. Walters pointed out. This has increased a little bit but I think we are concentrating on the problem that concerns you, the quality of loans which will be brought into force, where as before, relatively speaking, there was a little bit more attention given to such things as the cash situation and other details which the auditor will find. We are concentrating more with the policy kinds of questions which, if they are allowed to continue, will result in foreclosure.

Mr. EVINS. Institutions never know with what frequency your examiners may call?

Mr. McMURRAY. There is always a surprise element that is required in an examination.

Mr. EVINS. Each institute is examined at least once each year?

Mr. McMURRAY. Yes, sir.

Mr. EVINS. I have one or two questions I wanted to ask and I might ask them as we go along.

REORGANIZATION OF THE BOARD

What has been the nature and extent of your reorganization in the last 2 years?

Mr. McMURRAY. Of course, the reorganization plan No. 6 only provided for the transfer to the Chairman of the Board, the budget responsibility, personnel, and management. That transfer has taken place but we have not reorganized internally otherwise.

Mr. EVINS. Not within the Board but as far as the Board functions being added to or attached to, or consolidated with the Federal Housing Administration?

Mr. McMURRAY. No, sir.

Mr. THOMAS. Mr. Evins, may I interrupt just a minute?

I understand that the Bureau of the Budget has asked for a complete study of the organization of the activities of the Board in all of its components. I am not sure whether the study has been completed or whether or not the Board has taken any action.

Perhaps now is not the proper time but I think the record should note that that has been going on at a cost of $50,000; is that correct?

Mr. CORCORAN. $52,000, sir.

RELATION OF ASSETS TO EMPLOYMENT

Mr. EVINS. Mr. Chairman, perhaps you or one of your members could explain to the committee the charts on page 89. Perhaps your budget officer could do that for us.

Mr. CORCORAN. Yes, sir. The intention of this chart, Mr. Congressman, is to show a relationship between examinations and the assets of institutions examined.

Mr. EVINS. Have the assets increased tremendously?

Mr. CORCORAN. Assets go up each year, as you will notice, and the trend of employment seems to go down.

Mr. EVINS. It does not show the number of examinations.

Mr. CORCORAN. No, sir.

Mr. EVINS. It shows your assets are up and your employment down?

M. CORCORAN. That is right. You would expect when you have more assets you would need more employees, but instead of that, the trend is downward.

Mr. EVINS. We know the assets are up.

Mr. McMURRAY. A large association requires a lot more manpower in making an examination than the smaller one. I say this in my statement but I would again like especially to compliment Larry Walters, our Director of Examinations, for doing what I think is a very wonderful job in streamlining the operation and carrying out the Board's desires in concentrating on the important aspects of the examination. I think the industry also is very pleased because, as you know, it is very disrupting when examiners come into an institution. It is our desire to get in and out and get on to more important matters. The institutions have appreciated that; this is what we are trying to do and we have been successful and we have had many compliments.

Mr. EVINS. This is a good chart on page 91 showing the number of insured institutions, mortgages held. Mr. Reporter, insert this page in the record.

(The page referred to follows:)

Selected items related to supervision of insured institutions

[Dollar amounts in billions]

Item	Year ended—		Year ending— [1]	
	June 30, 1961	June 30, 1962	June 30, 1963	June 30, 1964
Number of insured institutions	4,160	4,267	4,380	4,499.
Total assets	$72.5	$83.4	$95.0	$107.1.
First mortgages held	$60.8	$70.3	$80.2	$90.6.
Savings capital	$63.1	$68.4	$77.1	$86.3.
Mortgage loans made in year ended	$14.9	$18.6	$19.8	$20.8 (a).
Loans to finance construction (included in above)	$4.6	$5.4	$6.1	$6.9 (a).
Average assets of insured institutions (in millions)	$17.4	$19.6	$21.7	$23.8.
Number of insured institutions with assets of more than $25,000,000	706	826	951	1,080.
Number of examinations made	4,051	4,078	4,377	4,451.

[1] Estimate based on increase in year ended June 30, 1962, except items (a) which are based on annual average increases over the 6 years ended June 30, 1962.

The average size of institutions and the number of larger institutions continue to increase, as does the great volume of lending. Also evident in recent months are the effects of the labor surplus in numerous areas. These factors make for a greater number of complex cases and an increase in the time required per case, as well as in the time required in assisting and guiding supervisory agents in the field.

The estimate of 59 positions reflects an increase of 2 positions over the current fiscal year. The two positions—one GS–13 financial analyst and one GS–6, clerk-stenographer—are considered, on the basis of the above facts and factors, necessary to the adequate performance of the work of the Office.

On a man-year basis there are 56.7 man-years in fiscal 1964 and 52.2 in 1963, an increase in 1964 of 4.5 man-years. Of the increase, 3.5 man-years represent delay in filling 16 positions in the current fiscal year; the remaining 1 man-year represents the 2 new positions requested.

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Mr. EVINS. We will now turn to page 108 showing a statement of income and expense and insert that page in the record, as well as pages 107, 109, 110, and 111.

(The pages referred to follow:)

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

A. Statement of sources and application of funds

	1962 actual	1963 estimate	1964 estimate
FUNDS APPLIED			
To operations:			
Acquisition of—			
Assets purchased to prevent default of insured institutions	$489,669	$437,000	$432,000
Furniture, fixtures, and equipment	25,195	28,000	31,000
Expenses	2,689,952	9,404,000	15,681,000
Total applied to operations	3,204,816	9,869,000	16,144,000
To financing:			
Increase in investments in U.S. securities held (par)	229,000,000	284,000,000	293,000,000
Increase in cash with Treasury	7,282,970

Net income for the year	61,101,323	73,872,000	84,682,000
ANALYSIS OF RETAINED EARNINGS [1]			
Retained earnings, beginning of year	409,960,188	471,061,511	544,933,511
Retained earnings, end of year	471,061,511	544,933,511	629,615,511

C. Statement of financial condition

	1961 actual	1962 actual	1963 estimate	1964 estimate
ASSETS				
Cash with U.S. Treasury	$4,467,108	$11,750,079	$5,482,079	$4,914,079
Investments in U.S. securities (par)	363,500,000	592,500,000	876,500,000	1,169,500,000
Accounts receivable	14,642,990	18,326,571	18,533,571	22,608,571
Loans to insured institutions	45,000,000			
Deferred charges	1,824	7,431	431	431
Assets purchased to prevent default of insured institutions	6,313,650	44,662,386	35,347,386	29,113,386
Furniture, fixtures, and equipment	127,082	142,308	159,308	178,308
Less portion charged off as depreciation	127,082	142,308	159,308	178,308
Net furniture, fixtures, and equipment				
Total assets	433,925,572	667,246,467	935,863,467	1,226,136,467
LIABILITIES				
Current liabilities	157,842	324,693	365,693	420,693
Deferred credits: Unearned insurance premiums	23,807,543	27,427,622	31,576,622	36,197,622
Total liabilities	23,965,385	27,752,315	31,942,315	36,618,315
INSURANCE RESERVES				
Primary reserve	409,960,187	471,061,511	544,933,511	629,615,511
Secondary reserve (additional premiums)		167,409,192	355,324,641	552,923,641
Reserve for accrued return on additional premiums		391,986	3,663,000	6,979,000
Reserve for unpaid additional premiums—prepayments		631,463		
Total insurance reserves	409,960,187	639,494,152	903,921,152	1,189,518,152
Total liabilities and insurance reserves	433,925,572	667,246,467	935,863,467	1,226,136,467

[1] In addition to retained earnings which are credited to the primary reserve, additional premiums (prepayments) and return on additional premiums are credited to a secondary reserve. See statement C.

Program highlights

[Dollars in millions]

Description	1962 actual	1963 estimate	1964 estimate
Insured institutions (June 30):			
Number	4,267	4,380	4,499
Assets	$83,400	$95,000	$107,100
Potential liability	$71,800	$81,200	$91,000
Reserves and undivided profits	$5,700	$6,400	$7,200
Insurance Corporation: Reserve for insurance losses	$639	$904	$1,190

Introduction

The Federal Savings and Loan Insurance Corporation insures savings accounts up to $10,000 for each saver in Federal savings and loan associations and in approved State-chartered savings and loan or building and loan associations, known in some sections of the country as cooperative banks and homestead associations.

The budget of the Insurance Corporation is based on the need for maintaining its operations in a current status and on the assumption that there will be no basic change in economic conditions during the budget year.

The budget program is designed to permit the Corporation to handle adequately and with dispatch its various insurance activities and to protect the savings of people invested in insured associations of the savings and loan type.

Summary

A comparison of the estimate for 1964 with the estimated expenses for the current fiscal year and with actual expenses for fiscal 1962 is afforded in the following table:

Description	1962 actual	1963 estimate	1964 estimate
Positions	109	116	127
Man-years	89.6	108.8	122.5
Personnel compensation	$693,490	$823,356	$977,416
Personnel benefits	48,731	59,994	70,084
Total, personal services and benefits	742,221	883,350	1,047,500
Contractual services and supplies	202,842	278,650	287,500
Total, administrative expenses	945,063	1,162,000	1,335,000
Proposed supplemental due to Public Law 87-793 approved Oct. 11, 1962		−22,000	
Actual, authorization, and estimate	945,063	1,140,000	1,335,000

As shown, the Corporation requests authority to expend up to $1,335,000 of its corporate funds for administrative expenses in fiscal 1964. The estimate reflects an increase in personnel of 11 positions or 13.7 man-years, and an increase in funds of $173,000 over the estimated expenses for the current fiscal year; in percentage terms increases of 9.5 percent in positions and 14.9 percent in funds are reflected.

Of the increase in funds, $154,060 is in personnel compensation, $10,090 in personnel benefits, and $8,850 in contractual services and supplies.

Personal services and benefits. The need for the 11 new positions is justified in the departmental justifications of the 4 divisions involved which are: Underwriting Division (2), Insurance Settlement and Rehabilitation Division (1), Operating Analysis Division (6), and Comptroller's Divsion (2).

Contractual services and supplies.—The major portion of the increase is in the items of travel and transportation of persons, $2,300; rent, communications, and utilities, $23,100; printing and reproduction, $2,500; there is a decrease in other services of $19,650.

TREND IN ASSETS OF INSURED CORPORATIONS

Mr. EVINS. The chart on page 113 gives the trend in assets, State-chartered and Federal savings and loan associations.

ASSETS OF INSURED AND UNINSURED INSTITUTIONS

Mr. EVINS. Give us a little explanation of the chart on page 115, Mr. Budget Officer—assets of insured and uninsured savings and loan associations. There is a great discrepancy there.

(The chart referred to appears on p. 284.)

Mr. CORCORAN. The assets of uninsured savings and loan associations aggregate about $4.2 billion; percentagewise, insured associations held 95.5 percent of the assets while uninsured associations held 4.5 percent.

Mr. EVINS. You have nothing to do with the uninsured?

Mr. CORCORAN. No, sir.

Mr. MCMURRAY. There are some uninsured that are members of the bank system but those are mainly the ones in Massachusetts insured by another State agency.

Mr. EVINS. The potential liability of the Federal Savings and Loan Insurance Corporation was $5.7 billion in fiscal 1946; in 1963, it is $81.2 billion; and estimated for 1964, $91 billion.

Mr. OSTERTAG. That is an interesting table on page 116.

GROWTH IN SAVINGS AND NUMBER OF INVESTORS

Mr. THOMAS. Mr. Reporter, put page 116 in the record.

(The page referred to follows:)

Investors.—The following table shows the number of insured investors, total savings, and the size of the average insured account each year for the years indicated.

At June 30	Number insured investors	Savings in billions	Size average insured account	At June 30	Number insured investors	Savings in billions	Size average insured account
1946	4,644,000	$5.7	$1,132	1959	23,040,000	$48.1	$2,088
1950	7,663,000	10.6	1,389	1960	25,869,000	54.9	2,122
1955	14,700,000	27.0	1,837	1961	28,502,000	63.1	2,214
1956	16,719,000	31.9	1,908	1962	31,013,000	71.9	2,318
1957	18,806,000	36.7	1,952	1963 [1]	33,650,000	81.1	2,410
1958	20,832,000	41.8	2,007	1964 [1]	36,400,000	90.7	2,492

[1] Estimate.

The number of insured investors at June 30, 1962, reflected an increase of 8.8 percent over the number at June 30, 1961. This figure is expected to increase by 8.5 percent in the current fiscal year, and reach 36,400,000 by June 30, 1964, an increase of 17.4 percent in the 2-year period.

Aggregate savings or investments of investors totaled $71.9 billion at June 30, 1962, an increase of $8.8 billion or 13.9 percent since June 30, 1961; an increase of $9.2 billion or 12.8 percent is expected during the current fiscal year. Aggregate savings are expected to reach $90.7 billion by June 30, 1964, an increase of $18.8 billion or 26.1 percent since June 30, 1962.

The size of the average insured account was $2,318 at June 30, 1962. It is expected to reach $2,492 by June 30, 1964, an increase of 7.5 percent in the 2-year period.

Mr. OSTERTAG. May I ask you, Mr. Chairman, if the comparative table on page 116 indicates the change that has taken place between 1946 and 1964? Does that mean the size of the average insured account ranges from $1,132 to $2,492 during that period?

Mr. CORCORAN. That is right, sir.

Mr. OSTERTAG. In other words, the individual accounts are increasing along with everything else?

Mr. CORCORAN. That is right, sir.

Mr. OSTERTAG. The total number as well?

Mr. MCMURRAY. We expect to have 36,400,000 customers by June 30, 1964.

Mr. CORCORAN. The average size was $1,132 in 1946, and in 1962, $2,318.

Mr. OSTERTAG. Does the value of the dollar have a bearing on this change?

Mr. MCMURRAY. I think so, sir.

Mr. EVINS. Are there any other large potential liabilities?

Mr. MCMURRAY. If I may say so, you mentioned liability——

Mr. EVINS. Potential.

Mr. MCMURRAY. The strength of the institution is also its assets, so liability——

Mr. EVINS. There is a limitation they are requesting in the appropriation. I think the Board has an increasingly responsible role and they are an important agency.

We have no further questions, Mr. Chairman.

Mr. THOMAS. We thank you, gentlemen. You were nice to come over and we wish all of you good health.

Mr. Chairman, we hope your arm heals quickly. You are all doing a fine job and we thank you very much.

Mr. MCMURRAY. Thank you very much.

MONDAY, JANUARY 28, 1963.

NEW COMMITTEE MEMBERS

Mr. THOMAS. Will the committee please come to order. We have with us this morning for the first time two of our very able and distinguished colleagues. We have an oldtimer with us from Illinois over on the majority side, Mr. Shipley. Mr. Shipley, we warmly welcome you. You are an oldtimer on the committee, you just merely transferred your love and affections to this subcommittee. We want to tell you how glad we are to have you and we think you showed good judgment.

We have Mr. Wyman from New Hampshire. He brings to the committee a wealth of experience. He has been over on the Senate side, with one of our lately departed Senators, a very close friend of mine, Styles Bridges. Mr. Wyman has a good, level head. We are pleased beyond words to have you with us. Make yourself at home.

It is a privilege and a pleasure again to have with us our friends from the Federal Power Commission. We have Mr. Swidler, the Chairman. Here is Mr. Ross. It is good to see you. Here is Mr. Morgan. Mr. Morgan looks to be about my age, about 29, young and handsome. Brother O'Connor is certainly an oldtimer. Do we have a vacancy here?

Mr. SWIDLER. Mr. Woodward is out of town and was unable to be here, Chairman Thomas.

Mr. THOMAS. Tell him we miss him. Where is Brother Trainor?

Mr. TRAINOR. Here, sir.

Mr. THOMAS. He is executive director. You are the man who runs the place, are you not?

Mr. TRAINOR. Not quite. I help.

Mr. THOMAS. Mr. Freeman, assistant to the Chairman. Where is Brother Freeman?

Mr. FREEMAN. Right here, sir.

Mr. THOMAS. Nice to have you aboard. Mr. Solomon, General Counsel. Judge, you have your hands full. I notice you do not have but 143 people in your organization. You are doing pretty good. I want to get your formula.

Mr. SOLOMON. We do not have 143 now.

Mr. THOMAS. It will not be long, will it? Where is Mr. Russell, Assistant General Counsel?

Mr. RUSSELL. Here, sir.

Mr. THOMAS. Where are you from, Judge?

Mr. RUSSELL. Kentucky.

Mr. THOMAS. That Kentucky law is always good. We have Mr. Unnevehr, Chief of the Bureau of Natural Gas. It is nice to have you with us. We have Brother Brown, Chief of the Bureau of Power. What is your background?

Mr. BROWN. I have had 31 year's experience with the Corps of Engineers in five or six different locations in the United States and one place outside of the country.

Mr. THOMAS. You are an engineer?

Mr. BROWN. Yes, sir.

Mr. THOMAS. Will you carry on for a few moments, Mr. Ostertag?

Mr. OSTERTAG. I believe the chairman has introduced everyone up to, Mr. Rainwater, the Chief Accountant.

Mr. RAINWATER. Right here, sir.

Mr. OSTERTAG. Mr. Pilcher, Director of Administration; Mr. Cashell, Chief of the Division of Budget and Finance. Are there any other officials of the Power Commission here that we have not presented or placed their names in the record?

Mr. SWIDLER. I think that is all, Mr. Ostertag.

Mr. OSTERTAG. Mr. Chairman, the committee welcomes you and the members of your Commission and your staff today for the purpose of discussing and considering your justifications for your 1964 budget request.

GENERAL STATEMENT

I think you have a prepared statement; do you not?

Mr. SWIDLER. Yes, Mr. Ostertag, I have a prepared statement. I had not thought to read it because it is a fairly long statement. I do not want to take this much of the committee's time. I would like to have it made part of the record, if you please.

Mr. OSTERTAG. Without objection, we will place the Chairman's statement in the record at this point.

(Mr. Swidler's statement follows:)

Mr. Chairman and members of the committee, I am delighted to appear before you today to report on the Federal Power Commission's progress in the past year. We think our progress in reducing our backlog of natural gas cases and in making a positive contribution to the main problems facing the electric power industry demonstrate that the Commission can make prudent and effective

use of the funds we are requesting for 1964 in carrying out our programs under the Natural Gas Act and Federal Power Act.

Let me start with the key figures in our appropriation request in order to have them before us. The Commission is requesting $12,725,000 to carry on all of its programs during fiscal 1964. The amount requested is an increase of $1,699,000 over the total obligations for fiscal 1963 of $11,026,000 (adjusted to include a $400,000 proposed supplemental to provide in part for the congressionally approved salary increases). This is an increase of about 15 percent. Breaking the total down among the component programs, for our natural gas work we are asking $7,106,000, an increase of $1,023,000 over 1963. For electric power we are asking $4,756,000, an increase of $648,000 over 1963. For our administrative work the amount requested is $863,000, an increase of only $28,000 over 1963. The funds for fiscal 1964 will provide an additional 121 positions over fiscal 1963, 75 for natural gas, 46 for power and no increase for administration, an increase from 1,178 to 1,299 positions.

First of all I want to discuss our needs for the coming year in the natural gas field and report on some of our accomplishments in the past year.

At the hearings last year I mentioned that the Commission had a backlog of natural gas pipeline rate cases which amounted to over a billion dollars in rate increases collected by the pipelines but subject to possible refund when the Commission finally decided the case. In the past year the Commission has been working hard to eliminate that backlog, and with a considerable degree of progress.

We have disposed of 85 pipeline rate cases since July 1961, and ordered refunds in these cases of $350 million to customers of the pipelines throughout the country. In these same proceedings we ordered reductions in rates for the future aggregating over $62 million a year. In addition many settlement orders include moratoriums on future rate increases for stipulated periods in the future. The billion-dollar backlog of a year ago has been reduced to $471 million even including the accumulation of additional amounts collected subject to refund in the remaining 41 cases. Most of this remainder is accounted for by a single case.

The benefits to consumers from refunds and rate reductions are obvious. However, the Commission's action in clearing up its backlog of pipeline rate cases has also been of significant benefit to the industry. For the first time in years most pipeline companies have firm rates and a financial status that is not clouded by staggering contingent refund obligations. Pipeline securities can now be valued on a firm financial basis and in light of the rapid growth of the industry as it continues to supply the ever-increasing demand for natural gas by both industrial and domestic consumers.

The Commission's success in clearing up its backlog of pipeline rate cases has reversed the upward trend of natural gas prices which has plagued the industry and its consumers in recent years. Not only were pipeline rates reduced but natural gas prices at the well remained virtually stationary throughout the past year at approximately 16½ cents per thousand cubic feet. The Commission feels that its policies are entitled to much of the credit for this unprecedented price stability in the natural gas industry. The Commission has adhered to its interim price ceilings for producers in the various producing areas of the country with relatively minor downward adjustments in the interim ceilings for initial sales. The stabilizing of prices in the field coupled with pipeline refunds and rate reductions has restored public confidence in the Commission and renewed public reliance on natural gas as a low cost fuel. Natural gas is facing increased competition from other energy sources. Price stabilization is important to the progress and prosperity of this great industry.

Let me now describe in more detail the progress we have made toward mastering our backlog of natural gas work and why we need more people.

In speaking of our natural gas work I am talking about one of the largest and fastest growing industries in this country. I am sure that the average American would be surprised if he knew that natural gas supplies one-third of all of the energy used in this country, including the energy used in automobiles and other forms of transportation and in the home and in industry. It has increased its penetration of the Nation's total energy market from approximately 14 percent in 1945 to 33 percent in 1961. The industry served less than 9 million consumers in 1945 while today it serves almost 35 million consumers. It is now the sixth largest industry in the country and in 1961 spent over $1.6 billion in the construction of new facilities alone. The investment in gas utility plant has grown from less than $5 billion in 1945 to over $22 billion in 1961.

The natural gas industry is necessarily more closely regulated at the Federal level than any other utility because it depends on large capacity, long distance interstate transmission from the natural gas fields to the population and industrial centers throughout the country. A certificate must be obtained from the Federal Power Commission before an interstate pipeline can be built and before a producer can begin delivery of gas from his well to an interstate pipeline. Wholesale prices of natural gas for resale in interstate commerce, both at the wellhead and at the city gate, are subject to FPC regulation. It is a matter of compelling public interest for the FPC to have sufficient staff to process certificate and rate cases promptly if the industry is to grow and supply its share of the Nation's energy needs.

Now to turn to the specifics. Despite our progress thus far the Commission's backlog of pipeline rate cases is still sizable. We must presume that the cases that remain will not be settled and must go through the full hearing route. The Commission needs sufficient staff to continue its aggressive program of catching up and remaining current in its pipeline rate work. New cases continue to be filed. In addition there are many pipelines which do not have rate increases pending but whose rates should be investigated—and would be investigated were staff available.

We are not requesting any increase in the numbers to be assigned to pipeline work, because we are determined to bring our backlog down to a manageable level by the end of fiscal year 1963. However, we must have adequate staff to remain current and avoid the accumulation of another billion dollar pipeline rate suspension backlog, such as the present members of this Commission inherited.

The Commission has taken a close look at its procedures and found much room for improvement. In the past year we have adopted regulations that will be a big help in enabling us to handle our pipeline rate work without any increase in staff. The regulations require pipeline companies to submit their entire case and all supporting data verified by an independent certified public accountant at the time a rate increase is filed. The data supplied by the companies under our new regulations will eliminate the need for extended field investigations as a part of rate cases. It was the field investigations which caused much of the delays in processing rate cases, and piled up the backlog. We shall, of course, need adequate staff to check the books of pipeline companies periodically to assure compliance with the uniform system of accounts. Without such compliance the new system will fail of its purpose. With adequate staff our new procedure will enable us to complete pipeline rate cases in a fraction of the time it has taken in the past.

We have also made more extensive use of prehearing conferences to clarify the issues and, where possible, to eliminate immaterial or peripheral issues, thus simplifying and materially expediting formal hearings.

A significant step in increasing the efficiency of our field operations has been the creation of a field office in Houston, Tex., which we established to strengthen supervision over our personnel in the area and to serve as a clearinghouse for problems of the small independent producers in the southwestern United States.

Another activity in which progress has been made is our pipeline certificate work. The growth of the pipeline industry is, of course, entirely dependent upon prompt handling of certificate applications. In the last 3 months of 1962, the Commission issued certificates for over $230 million of new construction as compared with approximately $71 million for the comparable period in 1961. These projects added a stimulus to the economy, and particularly to the steel industry. Still there are certificate applications for approximately $914 million for pipeline construction pending before the Commission. Not all of these projects will be approved—some conflict with each other—but it is very much in the public interest that they be decided promptly.

The costs of delay in processing certificate applications are great even if the certificates are denied. The least of the expense is the time, effort, and cost to the parties in long-drawn-out cases. An even greater economic waste from delays is the millions of dollars required to hold together the gas supply, equipment, construction and financial commitments, as well as other expenses, much of which are ultimately borne by the gas consumer.

We hope to achieve our goal of current handling of pipeline rate and certificate cases in fiscal 1964 without any increase in staff, by further streamlining our procedures and making more efficient use of our staff.

Let me now discuss the area of our greatest backlog—gas producer cases, both rate and certificate—the activities for which we are requesting 75 additional positions.

The Commission has made significant progress in our program of producer rate and certificate regulation. However, we have had to proceed in the last year largely on the basis of interim ceilings, voluntary setlements, and other devices for buying time while we build up our manpower and put the Commission's own activities on a stable foundation. The budget for natural gas activities which we propose is for the purpose of helping to provide long-term assurance of the Commission's ability to cope with its responsibilities in natural gas regulation.

The Commission's settlement program has helped us reduce our producer rate backlog in this interim period. We have ordered refunds of over $30 million and made some reductions in the annual amount of rate increases under suspension. In the last 6 months we disposed of 289 producer suspension proceedings. We cannot hope to eliminate our backlog of producer rate cases, or even to make a significant reduction, until we obtain more staff but we have reversed the trend and our backlog is now going down rather than up. This is not success but it is porgress.

The Commission has established guidelines which limit the type of evidence necessary to determine the initial price in a producer certificate case. We are now in a position to decide producer certificate cases expeditiously and we have set many hundreds of them for hearing. However our progress is limited by lack of manpower. The increased staff we are requesting for producer work will enable us to continue to make progress.

The major regulatory problem facing the Commission is producer rate regulation. Until late 1960, emphasis in this activity was placed on the individual company approach and very little, if any, progress was made toward discharging that responsibility. Thousands of rate increase cases accumulated. It became increasingly apparent that this procedure was, at best, a very difficult method of producer regulation and would require an army of staff if carried out on a meaningful scale.

As I mentioned last year, the Commission has adopted the area rate approach as the administrative device for solving the new and challenging problem of bringing gas producers within the framework of rate regulation. When the new Commission took office it inherited the area rate proceedings in the Permian Basin and southern Louisiana into which some 750 individual cases had been consolidated but on which practically no progress had been made. The hearings had not begun nor had any definite plans been made for conducting such hearings.

In the past year we decided to make the Permian Basin case the lead case. A key group of the most able and experienced members of the Commission's staff have spent almost their entire time, and a great deal of overtime in a concerted effort to transform the area rate proceedings from a theoretical concept to a legal proceeding based upon solid evidence on which the Commission could arrive at a fair decision. This proceeding will not only decide the rates in the Permian Basin, but will provide guidelines which should enable us to make disposition of the cases for other areas as well.

I am happy to report that these concentrated efforts in the Permian Basin case have moved producer regulation far down the road from abstraction to reality. The Commission sent out questionnaires to the producers in the area and their responses have provided the most comprehensive information on production costs and operating data that has ever been assembled. This data has been compiled—a huge task in itself—and the staff has now presented their evidence based on the results of an analysis of the data. The hundreds of producers in the area have already introduced their direct case. Considering the unprecedented nature of the case and its status a year ago, progress has been satisfactory and I am hopeful the hearing will be concluded this fiscal year.

Pushing the Permian case has almost completely drained staff resources available for producer matters generally. The southern Louisiana area proceeding, affecting the single most important gas producing area, has been delayed because of inadequate staff.

By the time additional funds requested are appropriated and made available the Commission in all likelihood will have decided the Permian Basin proceeding and will have set the guidelines for speedily concluding area rate proceedings for the remainder of the country. Although the people now trying the Permian

case will be available for other proceedings, there are 18 producing areas in the country and even with greatly increased efficiency it will require all of the people we are requesting to bring these proceedings to a speedy conclusion and process the additional filings which continue to be made.

The increased staff we are requesting, an increase of 75 to a total of 750, should be considered in the context of the huge workload which confronts the Commission in the natural gas field. In the last fiscal year, natural gas companies filed almost 2,000 certificate applications and made almost 8,000 rate filings, each one requiring extensive staff consideration. Many involved difficult and extended hearings lasting over a period of weeks or months, or in the past, even years. Producer rate cases have been piling up since 1954, and most of the cases filed since that time are still with us.

We now have a program to decide and dispose of these cases. We are asking for the staff to enable the Commission to discharge its responsibilities for deciding producer rate cases—a responsibility which to date the Federal Government has not carried out. Our requests for increased manpower should not, therefore, be considered in terms of additional people to expand a going activity, but rather manpower which we urgently need to do a vital job which has not been done at all in the past.

When viewed in light of the $350 million of refunds we have ordered for consumers in the past year, or the $62 million of annual reductions in rates for the future, or the size of our remaining backlog and the continued growth of the industry we are regulating, the Commission's total appropriation request of $7,106,000 for natural gas work seems modest indeed. I have no hesitancy in saying that the American taxpayer gets a high return from his investment in the activities of the Federal Power Commission.

In the past year we believe we have domonstrated that we can make effective use of the additional staff which we so clearly need to become current and remain current in our natural gas work.

Let me now turn to the Commission's electric power work. We are requesting $4,756,000, an increase of $648,000 over 1963 to provide for 46 additional positions, primarily for the regulation of wholesale electric rates in interstate commerce.

The Commission's appropriations request for its electric power work reflects the vigorous leadership it is exercising in the electric power field. For the first time in a decade the Commission is in the mainstream of the activity of the industry and in my judgment is making a major contribution toward progress in the industry. Our most important contribution to date has been to stimulate a greater awareness of the economies inherent in interconnections and coordinated operations, under modern technological conditions. In the words of section 202(a) of the Federal Power Act, we are attempting to help assure:

"* * * an abundant supply of electric energy throughout the United States with the greatest possible economy and with regard to the proper utilization and conservation of natural resources * * *"

I refer to the Commission's national power survey now underway, which I described to the committee at our appropriations hearing last year. The survey is the Commission's effort to carry out the responsibility assigned to it in section 202(a) on the basis of a national perspective, and by regional and interregional integration of power system facilities.

The electric power industry, the largest and one of the most rapidly growing of all industries, is at a point in its technical development where forward planning on a national scale can pay big dividends in lower costs and lower rates for the future. Generation by conventional thermal plants has achieved a major breakthrough in recent years with individual units as large as 1 million kilowatts now on order. Such units mean large savings in fixed costs and operating costs, as compared with the unit sizes of the past. Extra-high-voltage transmission lines which can transport bulk power economically for many hundreds of miles are now available, and several at 500,000 volts—higher than any previously built in this country except for experimental purposes—have been announced for early construction. Lines in the 700- to 765-kilovolt range are contemplated in the 1970's.

There are great developments in the offing with respect to the technology of power generation. Perhaps the most important is the indication of a possible breakthrough in economical generation in nuclear plants. The use of pumped storage hydro plants for peaking purposes is a new development made feasible by the reversible pump turbine, which can generate power on peak as water falls from one pond to another, and use offpeak thermal power to pump

the water back into the higher pond. Large capacity can thus be economically installed even where only small amounts of water are available, thus encouraging system interconnections to make use of the full peaking capacity. Prospects for transportation of coal in slurry form by pipelines appear promising. This development will affect the economic relationship between the alternatives of transporting energy as fuel or as electric energy. The Commission's national power survey is formulating suggestions for making maximum use of our new technology.

The survey is filling a vacuum by supplying the means by which the Nation's interest in the effective use of its electric power resources can be exercised in a positive manner. Many thinking people inside and outside the industry have recognized the existence of this vacuum, and I believe this explains the warmth with which the national power survey has been greeted by every segment of the industry—public, private, and cooperative—despite the fact that they are little accustomed to agreeing with each other on most policy matters. I doubt that the various elements of the industry have ever cooperated on such a broad scale in any other project.

As you know, the survey is not intended as a basis for dictating to the various companies in the industry what kind of generating units they should buy, where they should be located, or how they should be integrated for service to the region and Nation. Rather, the purpose is to suggest the general plant location areas and intertie and integration arrangements which the utilities can follow up on their own, with such variations as more particular investigations and changing circumstances may disclose to be necessary. The most important contribution of the survey is that it introduces into every industry decision on building additional generating and transmission facilities the question of the degree to whch the various alternatives will serve the Nation's interests.

I might say that we hear from all sides of new and closer working arrangements among the various enterprises within the industry and of new interconnection agreements, and many industry people have been kind enough to say that the national power survey has already stimulated the industry to think in terms of the broad national interest in planning for expansion. I believe the survey has already paid for itself many times over in this broadening of industry perspective, although these benefits are small compared to those which are yet to come.

The Commission is, of course, working closely with all segments of the industry in carrying on the survey. Over 100 of the leading experts in the electric power field are actively at work on the special technical committees, the regional committees, the General Technical Advisory Committee, and the Executive Advisory Committee. These committees are drawn from every part of the industry and every part of the country. They have prepared numerous reports that will be invaluable to the Commission in its survey report.

We expect to complete the basic work of the survey in this fiscal year and to compile the results and write and publish the report as soon as possible in fiscal 1964.

We are asking for funds to maintain and strengthen the staff of experts which the Commission is building up in the field of power system interconnection and coordination. This staff is required to complete the survey and make the more detailed studies necessary to implement the broad suggestions of the power survey report. They will be needed to continue to work with the industry in shaping a system of power supply for this country which will minimize power costs to the entire country, and insure an energy base for our economy which takes full advantage of our resources and technological opportunities.

The Commission's work in encouraging greater coordination and stronger ties between the Nation's power systems gives added urgency to the need for building up a staff to carry out the Commission's job of regulating the wholesale rates of the interstate electric power companies. We need these staff resources to insure that electric consumers will benefit from the savings that can be achieved through the large flows of electric energy in interstate commerce which the power survey is encouraging.

It is hard to credit the fact that electric rate regulation—the central consumer protection activity under the Federal Power Act—has in recent years for all practical purposes ceased to be an effective function of the Federal Power Commission. When the present members of the Commission took office in 1961 we found the electric rate staff—which consisted of a total of four people—sub-

merged in the natural gas organization. The group was transferred to the Bureau of Power and given the prominent place it deserves in our power work. The situation had so deteriorated that many of the interstate electric power companies subject to FPC jurisdiction did not even have their wholesale rates on file with us.

The deterioration which has taken place in the Commission's electric rate staff becomes clear when we compare our existing staff with the number of people we had in 1949. Fourteen years ago when the industry was about one-third the size to which it has now grown, a staff of about 38 was devoted to electric rate regulation—over 50 percent more than our present staff. The flow of electric power over State lines almost tripled in the last decade from 42 billion kilowatt-hours in 1950 to 113 billion kilowatt-hours in 1961, but while the problems grew and the need increased the FPC rate staff was dissolved.

When the present members of the Commission took office we promptly began to invigorate our electric rate work within the limits of existing manpower.

1. We have built up the staff at least to the point where we have a skeleton organization which can absorb and make effective use of the increased staff we are requesting.

2. We required electric utilities to file their wholesale rate schedules in interstate commerce with the FPC. These rate filings are now pouring in but our manpower is hardly adequate for routine processing much less to investigate the rate sufficiently to determine if they are just and reasonable.

3. We are revising our rules to require electric companies to support these rate filings with cost information to facilitate meaningful Commission review.

4. We are beginning a modest program of test checks of the books of the electric power companies to verify the information filed in support of rate changes.

With these and other actions, the groundwork will be complete for the assumption—or resumption—of our rate regulation responsibilities. The essential ingredient, of course, is the staff to do the work.

The absence of effective Federal rate regulation has had serious and harmful consequences, direct and indirect. Above all, is the fact that the purchasers of electricity in interstate commerce for resale have not received the protection which the Congress intended. The indirect consequences have been almost as serious. Unlike the situation in natural gas, the Commission has not set the basic rates or policies which would be helpful to State commissions in enabling them to perform their part of the regulatory work. This is especially difficult to justify because the Federal Power Act evidences an intention that the Commission's rate work should strengthen and support the exercise of the States responsibilities in the retail field.

The wholesale customers who have had no rate and service protection from the Commission have been in a dilemma. Many of the sellouts of small distributing systems to larger systems may well be attributable to the fact that they had no way of assuring themselves of wholesale service at fair prices. In view of the great economic advantage of large-scale production, construction of small local generating plants was frequently not a feasible solution. Other of the distributing enterprises—public and private—have nevertheless been driven to this solution of their supply problems, although construction of small and relatively inefficient units would be regrettable and unnecessary if the distributors could be assured of the advantages of large-scale generation by purchasing power at fair rates and on reasonable terms from their wholesalers.

The need for effective wholesale electric rate regulation is growing acute as more and more power systems interconnect with their neighbors and the wholesale interstate transactions become a larger and larger part of the total. The trend toward power pooling has devoloped into a headlong rush as the electric power systems in the country, stimulated by the Commission's national power survey, seize the opportunities to reduce the cost of generating electricity by taking advantage of the savings of utilizing larger generating units, reducing reserves, and taking advantage of system diversities, all inherent in interconnections and coordinated operations. The electric power industry is rapidly developing into a single interconnected grid, at least from the Rocky Mountains to the east coast and from Maine to Florida. It will not be many years before all the major power systems of the country will be joined in a single network. It would indeed be an anomaly if the Commission did not follow through with an effective job of wholesale rate regulation to make sure that power from these interstate systems is made available

to wholesale customers at reasonable rates and with assurance of continued supply. This Commission urgently needs additional staff to carry out this important consumer protection activity.

The Commission has also taken action to improve its performance with respect to its other activities in the electric power field.

The Commission is the custodian of the Nation's hydroelectric resources. We have breathed new life into our responsibility for licensing non-Federal hydroelectric projects which, as you know, is a self-supporting activity under the terms of the Federal Power Act.

As an example of the importance of this activity, applications for non-Federal hydroelectric projects pending as of December 31, 1962, involve construction costs approximating $1.8 billion.

We have reviewed the status of all our existing license cases in an effort to move them toward early conclusion and progress has been accelerated. To move a case along and dispose of it, however, requires more manpower than leaving it on the shelf, and as the cases are completed, the number of licensees grows and there is increasing need to supervise compliance with the license provisions.

We have announced a new policy limiting the term of licenses granted to hitherto unlicensed projects constructed before 1935 in order to prevent those who have ignored the licensing provisions of the Federal Power Act from obtaining an unmerited advantage. We are making a concerted effort to bring these projects under license and our efforts are meeting with some success.

We have begun a policy of inserting conditions in new licenses which require annual payments for the amounts due the Federal Government by the owners of non-Federal downstream projects for the benefits they receive from Federal headwater storage projects. We have also announced a rule which, if adopted, will also provide for annual payments to the Federal Treasury in the order of millions of dollars annually from the owners of existing projects which receive headwater benefits from Federal projects. We expect headwater benefit payments in the current year of $1,750,000, three times the aggregate collected in the previous history of the Federal Power Act.

We have proposed a rule requiring all licensees to submit a comprehensive plan for public recreation with their license applications to assure that the general public obtains the full benefits of the recreation potential of non-Federal hydroelectric projects.

In conclusion, I want to call attention to the national defense responsibilities of the Federal Power Commission. Under the Federal Power Act, the Natural Gas Act, various Executive orders and a memorandum of agreement with the Secretary of the Interior, the Commission has certain defense planning responsibilities for the vital electric power and natural gas industries. We are currently engaged in this work using regular staff to a limited degree to the extent they can be diverted from other pressing work. The Office of Emergency Planning is requesting $50,000 to reimburse us for the cost of a modest expansion in this work in 1964. This program, explained in detail in the OEP budget, is of course based upon a preparedness assumption that would not require substantial staff resources. In the event of a defense emergency a large part of our staff would be vitally needed and would be diverted to the mobilization of power and gas resources for national defense.

There are many other important items in both the power and natural gas activities which I have not undertaken to discuss in this statement. The need for these programs is documented in our detailed justifications.

Mr. OSTERTAG. If you will please, Mr. Chairman, give the committee the benefit of any thoughts, or highlights, or issues, or problems you care to present to us at this time.

Mr. SWIDLER. Thank you, Mr. Ostertag. When we were here a year ago, we were all rather new in our jobs. I had been Chairman only 6 months. I think we suffered a bit from lack of an opportunity to familiarize ourselves with the background of the natural gas industry to the extent we should have liked.

We have had another year now to get the feel of our work and to make a record to present to you. We are very glad of this opportunity to put before you the record of what we have done in the last year

and to discuss our problems as well as what we think are some achievements which are creditable.

Mr. OSTERTAG. Mr. Chairman, you mentioned that a year ago, when you came before this committee, you and the several members of your Commission were comparatively new in connection with your responsibilities in the Power Commission. Is it true that the entire Commission, all membership of the Commission, have been appointed since the new administration by President Kennedy?

Mr. SWIDLER. Yes, that is the fact. Mr. Morgan and I are the seniors on the Commission. We were both sworn in on June 28, 1961, so that we have about a year and a half of experience behind us.

Just to get the key figures out before us, we are asking for fiscal 1964 a total of $12,725,000, of which $50,000 would be reimbursed by OEP.

Mr. THOMAS. You have a transfer to General Services for space rental, too.

Mr. SWIDLER. Yes. This is an increase of $1,699,000 over the appropriation for fiscal 1963.

PAY INCREASES

Mr. THOMAS. You have a $400,000 deficiency request pending?

Mr. SWIDLER. Yes.

Mr. THOMAS. To take care of your pay increase?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. What did your pay increase cost you for last year and this year? How much will you absorb this year? Assuming $400,000 is your deficiency for this year, based upon the contemplated increase of about 7 percent this year. What did that cost you last year and how much did you absorb?

Mr. SWIDLER. I will ask Mr. Pilcher and Mr. Cashell to give that information.

Mr. CASHELL. We did not absorb any of the $400,000 for the 1963 cost.

Mr. OSTERTAG. For which you are making a supplemental request.

Mr. THOMAS. What is the 1964 cost?

Mr. CASHELL. $794,000 is our cost of pay increase in 1964.

Mr. THOMAS. You will not absorb any of it this year?

Mr. SWIDLER. No, sir.

Mr. OSTERTAG. Will the chairman yield there?

Mr. THOMAS. Yes.

Mr. OSTERTAG. Right on that point, you have a $1,699,000 increase over that of last year. In other words, part of the increase is due to the $794,000, which is the cost of increased salaries.

Mr. SWIDLER. Yes, sir.

Mr. OSTERTAG. Other increases are the difference between the two figures?

Mr. SWIDLER. That is right.

Mr. OSTERTAG. But you have not absorbed, as the chairman inquired, the $400,000 increase during fiscal year 1963, and you are asking for that money for fiscal year 1963 before the year ends?

Mr. SWIDLER. That is right. We are asking for a supplemental.

Mr. THOMAS. Go ahead.

Mr. SWIDLER. Of the total appropriation for fiscal year 1964, $7,106,000 would be for our work in the natural gas field, an increase

of $1,023,000, and $4,756,000 would be for the various electric power activities of the Commission, an increase of $648,000.

HIGH ADMINISTRATIVE COSTS

For the administration work of the agency we are asking for $863,000, which is a nominal increase of $28,000.

Mr. THOMAS. You have 86 people for administration alone.

Mr. SWIDLER. I believe this is just pay increase.

Mr. THOMAS. For administration it gives you a round total of 86 people, and that is quite a few people for administration. Then that does not take care of the housekeeping activities, either. That is top-side administration, just what it says. When it comes to housekeeping activities, that is another question. This does not include all your administration.

Mr. SWIDLER. For reproduction of opinions and that sort of thing.

Mr. THOMAS. Payroll, budget, personnel and everything else we normally refer to as housekeeping activities.

SUMMARY OF POSITIONS AND FUNDS BY ACTIVITY

Mr. OSTERTAG. Perhaps I am unable to put it together properly, but I understood your figures to mean that there was a $1,700,000 increase over last year. That was your overall increase; is that correct?

Mr. SWIDLER. Yes, sir.

Mr. OSTERTAG. Now you point out that in the natural gas field program you are asking for an increase of $1,023,000?

Mr. SWIDLER. That is right, sir. $1,699,000 is broken down to $1,023,000 for natural gas, $648,000 for electric power, and $28,000 for administration.

Mr. THOMAS. Mr. Ostertag, I think it will simplify everything if you will turn to the table on page A–16, which we will insert in the record.

(The table referred to follows:)

FEDERAL POWER COMMISSION

Statement of positions and activity costs, 1962 actual and 1963 and 1964 estimated

Activity	1962 actual		1963 estimate		1964 estimate		Increase, 1964 over 1963	
	Positions	Amount	Positions	Amount	Positions	Amount	Positions	Amount
Natural gas industry:								
Certificates of convenience and necessity	163	$1,221,989	216	$1,626,600	216	$1,687,800	------	$61,200
Rate filings	68	498,752	70	526,600	70	546,400	------	19,800
Rate cases	269	2,016,199	361	2,695,800	433	3,368,800	72	673,000
Enforcement of uniform accounting	10	76,371	16	124,200	19	152,800	3	28,600
Gathering and analysis of data	8	58,448	10	78,000	10	81,000	------	3,000
Publications	1	5,455	2	11,500	2	11,900	------	400
Total:								
Salaries	519	3,877,214	675	5,062,700	750	5,848,700	75	786,000
Travel	------	217,792	------	290,000	------	290,000	------	----------
Other expenses	------	563,280	------	730,300	------	967,300	------	237,000
Total activity costs	------	4,658,286	------	6,083,000	------	7,106,000	------	1,023,000

FEDERAL POWER COMMISSION

Statement of positions and activity costs, 1962 actual and 1963 and 1964 estimated—Continued

Activity	1962 actual		1963 estimate		1964 estimate		Increase, 1964 over 1963	
	Positions	Amount	Positions	Amount	Positions	Amount	Positions	Amount
Electric power industry:								
Regulation of rates	15	$116,043	25	$186,300	55	$449,100	30	$262,800
Enforcement of uniform accounting	9	69,955	9	70,300	14	113,300	5	43,000
Regulation of finances and operations	15	120,158	14	114,400	14	118,500	------	4,100
Power system analysis	61	477,340	73	579,400	73	600,300	------	20,900
Interconnection and coordination	7	55,960	18	144,000	21	173,100	3	29,100

Grand total, appropriation or estimate	------	8,793,000	------	10,626,000	------	12,675,000	------	2,049,000

Mr. THOMAS. This table tells the complete story. First is the natural gas activity, which gives your employment in dollar figures for 1962, 1963, and 1964. Then you have your electric power industry, non-Federal hydroelectric projects, Federal river development projects and administration. The other objects are broken down in some detail further in the justification. We are going to have to supplement this table to get the complete picture.

REGIONAL EMPLOYMENT

Take the table way in the back of the book, which shows their breakdown. This is about the only time you allude to your regional offices—Atlanta, 26, Chicago, 21, Fort Worth, 20, New York, 21, San Francisco, 34. Including 38 in Houston, you have 160 people in your regional offices.

Your justification is silent as to what the people do in those offices. We know, but we still like to have the justification. Be prepared to break that down when you get under your natural gas and power industry.

Mr. SWIDLER. Very good.

RECENT INCREASES IN EMPLOYMENT

Mr. THOMAS. You have a sizable increase here every year. I read this yesterday and last night. I do not know why, but I read every word of it. I could not turn it off. I never heard such poor-mouthing in my life. I counted 15 or 16 times where they say they have just got to have more staff.

Who runs that Commission over there? Is it the staff or the Commission? My people say they never see the Commission, that it is always the staff. I guess that is the reason they have to have more staff. They say this about 16 times in this justification.

Mr. JONAS. Will the chairman yield?

Mr. THOMAS. Yes.

Mr. JONAS. We increased them so much recently, I thought they would come in with a revision downward this year.

Mr. THOMAS. Fiscal year 1959 they had 844 employees. In 1960 we increased 9 up to 853. Then in 1961 we decreased it 15, to 838. Then here comes 1962, an increase of 125, to 963. Then in 1963—that is when our present friends came in and really went to town, and to show you how timid they are, they wanted 215 more people than they had last year, 1,178. I am afraid they got them. Now in 1964 their appetite is still good, 1,299—just rounded down from 1,300.

Mr. SWIDLER. This is the request we are here to justify.

Mr. THOMAS. Go ahead.

Mr. SWIDLER. This is our opportunity to try to show you that this would be an effective way to use the Government's money.

Mr. THOMAS. How many people do you have in your regional offices? We have already detailed them for the record here.

Mr. SWIDLER. On the power side, roughly 125 people.

ORGANIZATION OF COMMISSION

Mr. THOMAS. This gives the organizational breakdown with the top people enumerated. Office of the General Counsel has 143 jobs. 1 GS–18, 1 GS–17, 1 GS–17—2—4 GS–16, 7 GS–15, 13 GS–14, 113 GS–13 and below, making a total of 143 positions.

To implement that in the Office of the Hearing Examiners, about the only time you mention it is in the chart, you have 19 hearing examiners, and 18 GS–13's and below. What is the total hearing examiners you have? Is that figure of 19 correct?

Mr. SWIDLER. I think that is right. I think we are planning on perhaps 1 more, a total of 19 or 20 hearing examiners.

Mr. THOMAS. How many more attorneys do you have assigned to the hearing examiners? You have 18 GS–13's and below. How many of these are secretarial out of the 18?

Mr. SOLOMON. The GS–15's are the hearing examiners themselves. The other people are mostly secretarial. There are two technical people assigned. With that exception, all——

Mr. THOMAS. What do you mean by "technical people"?

Mr. FREEMAN. One is an accountant and one is an engineer.

Mr. THOMAS. You have 16 secretarial, 19 hearing examiners, 1 engineer, and 1 accountant, making a total of 37.

I can well imagine the hearing examiners need technical assistance in the way of economics, et cetera. I notice the Bureau of Economics has 30 people in it. It has the Chief Economist at 18, 1 GS–16, 3 GS–15's, 4 GS–14's, 21 GS–13's and below. Proceed, Mr. Chairman.

Mr. SWIDLER. Before getting into the justification for these positions and the money involved in hiring these people, let me give you the overall breakdown. We are asking for 121 new positions, 75 for nautral gas, 46 for power and no increase for administration.

Mr. THOMAS. You already have 78-plus for administration.

Mr. SWIDLER. Yes, sir.

LARGE NUMBER OF JOBS FOR ADMINISTRATION

Mr. THOMAS. May I ask the committee to turn again to the chart. Look at administration. There are 5 Commissioners and 23 other other positions in their immediate offices, a total of 28 positions. Office of Special Assistant to the Commission, 13 positions. Office of the Secretary, 11 positions. You say you have 86 positions for administration alone.

Then you have to take up the Office of Personnel, 14; Office of Administration of the Director, Public Information Office, another 10. You have Division of Finance, Division of Management Assistance, Division of General Services. What is General Services?

Mr. SWIDLER. General Services includes reproduction of opinions and other material. Those are the real housekeeping positions, you might say. We have a vast amount of paperwork.

Mr. THOMAS. 24, 26, 45—you have 200 people here outside of the 78 for what you call administration, doing administration and housekeeping here for some 1,300 people. Then I imagine you have small duplicate setups in your 160 people in your 6 regional offices.

Mr. SWIDLER. Mr. Chairman, maybe calling this group the administrative group is a little misleading if you break it down. Of course, the number of Commissioners is fixed by law.

Mr. THOMAS. You have your hearing examiners; the other are purely administration. That is subtracting 37. Office of the Secretary, Office of the Assistant to the Commission——

Mr. SWIDLER. Office of Special Assistants, for example, those are the men who prepare the drafts of the Commission's opinions. This is an opinion-writing group and not an administrative group as you might think, who just supervise other people. These are men who study the records and assist the Commission in analyzing cases, and help us in writing our opinions.

The hearing examiners are, of course, not truly an administrative group, either. They are not a group of supervisors. The Office of the Secretary keeps track of our vast amount of paperwork, and decisions are issued in his name.

COMMISSION MEETINGS

Mr. THOMAS. How often does the Commission sit? Do you have a regular schedule?

Mr. SWIDLER. We have a regular meeting day that we do not always meet on. We normally meet all day on Wednesday, but, suiting the convenience of the members of the Commission, that may be postponed to a Thursday and sometimes Friday.

In addition, of course, we meet on particular cases on other days. I guess we average two meetings a week, one of them an all-day meeting where we handle a very full agenda, which usually runs in the neighborhood of 75 to a hundred or more items. Then if we have particular problems to dispose of, which would hold up the volume of material on our agenda, we would have a special meeting on that matter.

NUMBER OF PROCEEDINGS FILED

This is in addition, of course, to our oral arguments. We spend quite a bit of time listening to oral arguments on various cases on appeal from the decisions of the examiners. We are a decisional agency, Mr. Chairman. We handle a vast amount of litigated cases. Our cases number in the thousands. We have over 10,000 proceedings filed before us, Mr. Chairman. We are responsible for the regulation of two vast industries in this Nation.

Mr. JONAS. Would you permit an interruption?

Mr. SWIDLER. The amount of work is not within our control.

Mr. JONAS. How many of those 10,000 finally come to the Commission, what percentage?

Mr. SWIDLER. I think most of them finally come to the Commission, Mr. Jonas.

RELIANCE ON THE COMMISSION STAFF

Mr. THOMAS. The staff runs the Commission over there, according to the industry. Who wrote this justification? It is very fine. Mr. Cashell, did you write that?

Mr. CASHELL. Not completely; no, sir.

Mr. THOMAS. Who wrote it? It is a work of art. I commend you for it. It is a little skimpy in some parts, but the narration is out of this world.

Mr. SWIDLER. A draft was prepared by Mr. Pilcher and Mr. Cashell, and it was revised in my office by Mr. Freeman and myself.

Mr. THOMAS. It certainly places a lot of emphasis on the staff. Every other word is staff, staff, staff.

You mean this staff runs the Commission and they are under civil service, and nobody has elected them, nobody appoints them, they run the show, opinionmaking, policyforming, and John Public never has a chance at them; is that right?

Mr. SWIDLER. I would not accept quite that statement of it, Mr. Chairman.

Mr. THOMAS. You give us your version of it.

Mr. SWIDLER. It is obvious that in an agency of 1,000 people, the stage we are in now, that the 5 Commissioners cannot do all the work. We have to use our staff.

Mr. THOMAS. You do not run it now; the staff runs it.

Mr. SWIDLER. We have a thousand people to help us. Our problem is one of getting the most effective use of that thousand people, as in other large organizations.

The question is: How effectively do we use staff? Do we rubberstamp what they do, as some people think? Or do they act as the arms of the Commission in carrying out our policies and our programs? In my opinion, we do run our show. You cannot run any large organization without responsible staff people. If I were to tell you that we dictated every decision of every staff member and closely supervised every negotiation they participated in, you would know that we were claiming more than we could perform. It is up to us to try to get good people. It is up to us to try to provide leadership for them, to set sound polices, to see that our policies are observed.

Mr. Chairman, I think we are doing this. I do not claim 100 percent, but I do think, by and large, that our staff is responsive to the leadership and the policies enunciated by the Commission. I will say for myself, and I think for the other members of the Commission, that we put up with no less. We are not a hundred percent successful, but we do not yield knowingly to staff domination.

On the other hand, we trust our staff. We want people on our staff whom we can trust, and we have given them a range of discretion so long as they are following Commission policies, which on the whole they do, and well.

Mr. THOMAS. Is there any disagreement between the staff and the Commission?

Mr. SWIDLER. No; there is no disagreement between the staff and the Commission, Mr. Chairman. There is disagreement between——

Mr. THOMAS. The Commission approves what the staff does, is that right? That is the general thinking of the industry that you regulate, that the staff runs it.

Mr. SWIDLER. I think the industry is not always objective about it. Of course, there is reliance on staff, as there must be. There are differences between individual Commissioners and staff.

PERSONNEL UNDER "SCHEDULE C"

Mr. THOMAS. How many of these people are under schedule C on your staff, your policymaking jobs?

Mr. SWIDLER. Other than the people in our immediate offices, as I recall, at the moment only our General Counsel and the executive director are schedule C.

Mr. THOMAS. The rest of them are policymaking people, you have no control over them, they have a deed of trust on the job for life, so they think.

Mr. SWIDLER. We are discussing with the Civil Service Commission whether or not that group ought not be increased. It may be that it will be. But at the moment there are only two schedule C positions other than the people in the immediate offices of the Commissioners.

POLICY FORMULATION BY THE STAFF

Mr. THOMAS. What part of the decisions, whether they are rubber stamped—call it whatever you want to—by the Commission, what part of the policy is formed by the staff?

Mr. SWIDLER. I do not know how to answer the question in that way. Policy is developed by interaction between staff and the Commission. We cannot sit in an ivory tower and develop a policy without the help of our staff. We work with the staff on the facts. We not only listen to the staff's policy suggestions, we welcome suggestions.

I want to assure you, Mr. Chairman, that we exercise our own judgment on these matters; within the limits of our ability to understand these problems and to arrive at correct decisions, we do so on the basis of our own judgment. So far as I know, when we have done so, the staff carries out our decisions.

We feel free to reject staff advice, and we frequently do, Mr. Chairman. We feel free to reverse examiners. I think if you will read our opinions, you will see that we are a very independent-minded independent agency. But I will not tell you, because it would not be true, that we are independent of staff. We are heavily dependent upon our staff. I regard the job of the Commission not as being independent of our staff but of getting the staff to function on the basis of the policy and the programs of the Commission, and to provide leadership rather than use a club. I think we have achieved a great deal, and we have, in my judgment, a responsive staff on the whole.

There are occasional problems. We try to take care of them as they arise. I think a lot of the complaints are based on disagreement with our conclusions, and perhaps there may be the feeling that a policy adopted by the Commission can be discredited if it is attributed to staff rather than the Commission itself.

We listen to complaints about some of our policies, we look at them, and we find that some of the policies ought to be changed, and they are changed. In others, when we look at our policies, we find them to be sound and we leave them in effect.

I cannot tell you that we could run the agency without staff. The staff is the key to doing our job. The Commission can no more run the Federal Power Commission without help than Mr. Rathbone can run the Standard Oil Co. of New Jersey without a staff.

Mr. THOMAS. We are not objecting to the help of the staff. My point is that the tail wags the dog.

Mr. SWIDLER. I would like to try to persuade you, Mr. Chairman, that I am not a dogtail type. It is a big job running an agency. The staff is there as a career service and you are in for a few years and then you are out. It is true they know lots more about the details of some of these problems than the members of the Commission do, but we try to penetrate these problems and to make decisions on the merits.

When the new Commission came in we invited suggestions on policies and procedures from the whole industry. The Commission looked at every one. We have adopted every change that commended itself to us as being sound.

I think that people who are disappointed tend to blame the staff. Perhaps that is partly our fault. Maybe we don't stand up and defend the policies enough on our own. I try to do this, but perhaps not effectively.

I am here, however, taking responsibility, and the Commission is here taking responsibility for everything we do. If there is something, Mr. Chairman, that you think is not right, we will either try to defend it or we will change it. I am blaming nothing on staff.

Mr. THOMAS. Well, that is a commendable position to take. What are some of your headaches, some of the big problems your staff is wrestling with now?

Mr. SWIDLER. I might say we have now in the Bureau of Natural Gas alone 70 research projects which the Commission has asked the staff to investigate. These are studies to help us reach our conclusions. There are 70 different items where we have said we want a report.

RELATION OF THE COMMISSION TO THE ELECTRIC POWER INDUSTRY

We have a long list of subjects assigned to our economists where we feel we need more information. Our Bureau of Power is engaged in many, many projects intended to illuminate various problems which trouble the Commission.

Mr. THOMAS. Do you think for a minute that the brains of the electric power industry are wrapped up in your staff?

Mr. SWIDLER. No, sir, I certainly do not, but they have a different function than we have. I don't think we can run the electric power industry and I don't think the electric power industry can run the Federal Power Commission. We have two different jobs.

Mr. THOMAS. Is the industry trying to run the Federal Power Commission or is it the other way around, the Federal Power Commission trying to run the industry?

Mr. SWIDLER. We are trying to regulate——

Mr. THOMAS. The industry is very old and has done very well up to now without the assistance of the Federal Power Commission and its very distinguished staff. The country has grown and the industry has grown.

Mr. SWIDLER. I have great admiration for the industry but I think that the Federal Power Act was a wise piece of legislation, and I was appointed to help administer it. I think we have a real contribution to make toward an effective electric power industry and natural gas industry, and we are trying to do our best with the authority and the funds that Congress has provided.

If I were to tell you that I thought that there was nothing that the Federal Power Commission could contribute to the public interest in regulating the electric power industry I should not have taken this job.

Mr. THOMAS. What is the function of the Commission with reference to the electric power industry? Is it your function to go out and tell the industries a plant should be in X spot rather than Y spot?

Mr. SWIDLER. I don't think so.

Mr. THOMAS. Suppose they made a mistake in a particular type of financing and it should have been some other way? You have your Bureau of Economics. How does it get into the picture outside the field of rates? Where do you enter outside of certification?

ELECTRIC POWER FUNCTIONS OF THE COMMISSION AND OTHER AGENCIES

Mr. SWIDLER. Let me list our functions in the electric power field.

Of course, the oldest is the licensing function for hydroelectric projects. The keystone of the conservation movement to conserve the Nation's resources for its people is hydroelectric licensing rather than giving away the right to develop the Nation's rivers without adequate safeguards.

There are 16 million kilowatts of capacity which have been installed on the Nation's rivers under Federal Power Commission license——

Mr. THOMAS. That is Corps of Engineer work. You don't get into the Department of Interior, do you?

Mr. SWIDLER. Yes; we do.

Mr. THOMAS. To what extent?

Mr. SWIDLER. We review all the project proposals of both the Corps of Engineers and the Bureau of Reclamation to assure ourselves and the country that their proposals make adequate and effective use of the irreplacable hydrosite resources of this country.

Mr. THOMAS. You have no veto in either regard; do you?

Mr. SWIDLER. No, sir; advisory.

Mr. THOMAS. You really set the rates, do you not, in the Rivers and Harbors Section, and not Interior?

Mr. SWIDLER. Interior is the marketing agency for Corps of Engineers projects. The rates of Interior must be approved by the Federal Power Commission so that we are, you might say, the agency of Congress to assure the Congress that the rates are high enough. This is a little different responsibility from that which we exercise with respect to rates of private companies where our function is to fix ceilings.

With respect to the Federal rates, I think Congress intended a little different responsibility——

Mr. THOMAS. What do you mean Federal rates?

Mr. SWIDLER. I mean rates at which the Department of the Interior disposes of the power from some of its projects and projects built by the Corps of Engineers.

Mr. THOMAS. You don't set that rate, though ,do you?

Mr. SWIDLER. We approve it.

Mr. THOMAS. Do you set it?

Mr. SWIDLER. We approve it.

Mr. THOMAS. Do you have a veto?

Mr. SWIDLER. Yes, sir.

FEDERAL RATES IN NORTHWEST UNITED STATES

Mr. THOMAS. A lot of people in the country think the Federal rate is not a break-even rate; is that true?

Mr. SWIDLER. Which particular project?

Mr. THOMAS. There are many in the Northwest that I hear some of the Interior people talk about. Whether or not it is true I don't know. We don't take a look at it here.

Mr. SWIDLER. I think that the situation of the Bonneville Power Administration, in particular, is that for the last several years it has not been earning the return on investment that it has set for itself or that Congress has set for it as a standard.

Mr. THOMAS. As a self-liquidating project.

Mr. SWIDLER. That is right, but that past excess earnings over that standard thus far has picked up the deficit.

Within the next few years Bonneville will be in a position where it must either improve its financial performance or raise its rates.

Mr. MORGAN. Or market the seasonal surplus.

Mr. SWIDLER. That is what I mean by improvement in financial performance.

Mr. THOMAS. Regardless of the method it is in a position where it has to raise the rate or do something. Is that right?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. Go ahead.

Mr. SWIDLER. These are some of the functions on the power side. I have mentioned the licensing function with respect to non-Federal projects. These are elaborate cases. Some will become historic, like the *High Mountain Sheep* case which we are now hearing, because they concern whole regions of the country that are vitally interested in whether the river is developed, how it is developed, and by whom.

Then we have our function with respect to reviewing the projects of the construction agencies of the United States, the Corps of Engineers and the Bureau of Reclamation, to be sure that they make adequate use of the Nation's hydro potential.

Of course we must administer the licenses we grant. Licenses are complex documents requiring the companies to conform their operations to navigation and flood control requirements, to avoid nuisances, to maintain fish and wildlife and recreational facilities, and other requirements. These licenses require a great deal of administration and there are now several hundreds of them.

FPC AND FISH AND WILDLIFE JURISDICTION

Mr. THOMAS. Does your jurisdiction overlap with that of Interior's Fish and Wildlife Service?

Mr. SWIDLER. I don't think it overlaps. We don't have a research staff in the fisheries field. The question of effect on fish has become a key question in a number of our license cases. Of course, we decide these cases sitting in a quasi-judicial capacity and making decisions on the record.

RELATION OF FPC TO GROWTH OF THE POWER INDUSTRIES

Mr. THOMAS. Here is the thing that troubles me in reading your justification—more staff. The word "poormouth" comes to mind. I have never heard such crying. Here is an agency 40 or 50 years of age. In the short time you have been there you want an increase in staff of more than 50 percent. How did the country get along before you folks came in? The electric power industry did pretty well before. The gas industry did well. They are serving more people. You set out some 13 trillion units, that it has grown 33 percent, and so on. They got along pretty well and Congress wonders why all this grab for power and empire building.

Mr. SWIDLER. I think you put your finger on a key question. I didn't understand when I took this job that things were quite that rosy, Mr. Chairman. The Federal Power Commission was being held up as an example of the breakdown of Federal regulation. We had a backlog jammed so tight that nothing would move. We had the industry complaining that they couldn't get certificates, that all their revenues were under suspension, that their financial condition was impaired because they didn't have solid books of account. In some pipeline cases suspensions had run on for so many years that there were more rates under suspension than the entire equity capital of the company. It impaired their ability to raise money and the confidence of their security holders in the solvency of the industry.

This was not a product of an adequate staff being well administered. This was a product of too few people. We came to you with what I think is a relatively modest request for enough people to get rid of these backlogs, to get these cases moving, to stop being a barrier in the progress of the industry, and at the same time to be able to assure the consumers——

Mr. THOMAS. Wait a minute. You are making a statement you cannot back up to save your neck. The industry grew and grew and grew, doubled and redoubled before they ever heard of this Commission. Is that not true? If not we will let you insert figures in the record, what they have done for the last 15 years.

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. How can you say everything had gone to pot?

ELECTRIC POWER PRODUCTION DATA

Let us insert at this point in the record the increase in production, production figures for the industry in the last 15 years. I don't know of anything in the country that has grown any more than the electric power industry.

(The information follows:)

Electric utility installed generating capacity and net generation, United States, 1948–62

Year	Total generating capacity (kilowatts)	Net generation (1,000 kilowatt-hours)	Year	Total generating capacity (kilowatts)	Net generation (1,000 kilowatt-hours)
1948	56, 559, 838	282, 698, 214	1956	120, 696, 834	600, 667, 750
1949	63, 100, 334	291, 099, 543	1957	129, 123, 045	631, 507, 224
1950	68, 919, 040	329, 141, 343	1958	142, 596, 605	645, 098, 404
1951	75, 774, 725	370, 672, 814	1959	156, 840, 856	710, 005, 723
1952	82, 226, 444	399, 223, 620	1960	168, 002, 191	753, 350, 271
1953	91, 502, 249	442, 664, 515	1961	180, 667, 553	792, 038, 586
1954	102, 592, 410	471, 686, 354	1962	189, 852, 337	847, 485, 925
1955	114, 471, 868	547, 037, 985			

Mr. SWIDLER. I don't want to overstate. Certainly the industry had grown continuously, but I do think it was recognized that the Commission had become a drag on the progress of the gas industry. It was not contributing to the industry as it should have done.

Mr. THOMAS. If that is true maybe the answer is to cut down your activities if you were a drag on them. The industry didn't go up for the benefit of the Commission.

Mr. SWIDLER. No, sir.

Mr. THOMAS. The Commission is supposed to be for the benefit of the industry and the consuming public. Your statement indicates the industry was set up for the use and benefit of the Commission.

Mr. SWIDLER. No, and if we cannot demonstrate that we have been of some use to the consuming public and the industry I don't think you should give us this money.

Let me mention a few of the things we have done, Mr. Chairman. I have not got to point one of my justification.

Mr. THOMAS. All right.

Mr. SWIDLER. I think point one is a big point, and I am pround of it.

RECENT NATURAL GAS REFUNDS

In the last 18 months this Commission has ordered refunds of rates held in suspension by the interstate natural gas pipeline companies of this country——

Mr. THOMAS. $353 million.

Mr. SWIDLER. Over $350 million, yes, sir.

Mr. THOMAS. And your staff did it. The Commission had nothing to do with it.

Mr. SWIDLER. Well, the staff didn't do it before there was a new Commission. While I do not claim the Commission did it alone, I will say I don't think the staff did it alone.

Mr. THOMAS. The brains of the industry are over in your staff, which Congress does not elect or appoint. John Q. Public doesn't elect them and they thumb their noses at everybody. You cannot fire them and you cannot do anything with them. John Q. Public is helpless.

If I have made misstatements, straighten that out.

Mr. SWIDLER. I am proud of our staff but I will not admit we don't contribute to the agency, either.

Mr. THOMAS. Of course, and they are all fine gentlemen.

Mr. SWIDLER. They are not only fine gentlemen, most of them, but I think on the whole they do an effective job and a constantly improving one. It is the responsibility of the Commission to try to keep improving that performance, and I don't think we are going to do it by mistrusting them. I don't think we will do it by trying to beat them over the head with a baseball bat. I think we are going to do it by trying to strengthen the weak spots and by setting a high level of leadership, by having programs in which they can believe, and by a system of supervision which insures that our policies are being carried out. All of these things we are working on, Mr. Chairman.

Mr. THOMAS. Go ahead, Mr. Chairman. You are most persuasive.

Mr. SWIDLER. That is the nicest thing I have heard today.

NATURAL GAS RATE REDUCTIONS AND REFUNDS

We have not only refunded $350 million, but we have ordered rate reductions for the future of $62 million a year.

Mr. THOMAS. Do you supervise the rates of the various localities in retail rates?

Mr. SWIDLER. No, sir, retail rates are excluded from our jurisdiction. I don't mind telling you we are carrying on a survey to find out what happens to these refunds.

Mr. THOMAS. Whatever the retail rate is, you have no jurisdiction.

Mr. SWIDLER. That is right.

Mr. JONAS. At this point I wish you would put in the record what these returns have amounted to from the standpoint of changes in rates. You speak of $350 million and that sounds like a lot of money, but it involves an awful lot of gas. What was the reduction?

Mr. SWIDLER. Approximately 45 percent.

Mr. JONAS. That still does not give the figure I want. It went from what to what?

Mr. THOMAS. The gas people wanted an increase in rates. I find that true all over the country. What became of the $350 million that was returned? Who got the benefit of it, the people you don't regulate?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. You killed a big hog, didn't you?

Mr. SWIDLER. To answer Mr. Jonas' question, the amount under suspension, which translated itself into $350 million of refunds, was approximately $750 million. Those figures are not precisely comparable because the $350 million includes interest and the $750 million does not.

I would guess that without interest, the $350 million would be somewhere between $300 and $325 million, so we are talking about refunds of something like 40 percent of the rates which were under suspension on the average. This has varied from a few percent in some companies to a much higher percentage in others, but it has averaged out to about 40 percent.

Mr. JONAS. You don't have a figure which would show what the change in rate amounted to?

Mr. SWIDLER. In cents per Mc.f.?

Mr. JONAS. Yes.

Mr. SWIDLER. No, sir, I don't. We will put that in the record.

Mr. JONAS. Will you elaborate on your statement? I would like to see what that amounted to.

(The information referred to follows:)

Refunds ranged between 1.63 and 4.37 cents per Mc.f., or a weighted average of 2.39 cents per Mc.f., based upon the refunds of $297 million by principal pipeline companies representing 85 percent of the total refund of $350 million.

Mr. JONAS. In the amount of gas involved I have an idea the reduction is not substantial. The thing that makes it substantial is the great volume involved. Is that a fair statement?

Mr. SWIDLER. Yes, sir, I think as a percentage of the total price it is small. It would translate into a matter of a couple or three cents per Mc.f.

EFFECT OF REFUNDS ON RETAIL RATE REDUCTIONS

Mr. THOMAS. How much of that $353 million does the local consumer get? I have seen two or three instances where the local companies are increasing rates in the face of your rebate.

Mr. SWIDLER. This is a hard figure to come by.

Mr. THOMAS. Your staff must have known what it was doing.

Mr. SWIDLER. We are now conducting a survey, and it is a very elaborate thing.

Mr. THOMAS. It seems you are getting the cart before the horse.

Mr. SWIDLER. It is difficult to trace what happens to these refunds. With the cooperation of the State commissions we are now undertaking to get some reliable figures. I think these will be the first set of figures that are solid. I hesitate to anticipate the results of the survey, but I will say that in many cases you cannot demonstrate whether or not consumers have received the benefit of these refunds.

The local gas company may say that but for these refunds they would have increased their rates much more than they did, and what you find is not a rate reduction or a rate refund but an actual increase, and you have a judgment question as to whether there would have been an even greater increase but for the refund that the local gas company received.

In the case of some public systems they take the position that this is the public's money, anyway, and they don't make the refunds.

A very substantial part of the refunds do get back into the hands of consumers, Mr. Chairman, and I think this situation presents a real challenge to the State commissions.

Mr. THOMAS. I wish you would accentuate that statement, that a considerable part gets back into the hands of the consumers. You said awhile ago you couldn't say that, and now you say it does.

Mr. SWIDLER. We cannot limit refunds to the actual cash refunds to retail customers. Some companies, for example, put into effect rate reductions which are directly keyed to their refunds. Either way we do know that much of this does get back to the ultimate consumer. I hesitate to tell you what proportions can be demonstrated as going back to the ultimate consumer and what proportions cannot because we have not put all these figures together yet. I have had a briefing on the figures as they come in, and yet I hate to give exaggerated importance to incomplete figures.

PUBLIC AND PRIVATE POWER OWNERSHIP

Mr. THOMAS. Have you any information as to ownership of the various distribution systems throughout the United States? What part of them are publicly owned and what part privately owned?

Mr. SWIDLER. Are you talking about gas?

Mr. THOMAS. Yes.

Mr. SWIDLER. It must be at least 90 percent privately owned throughout the United States; about 93 percent.

Mr. THOMAS. What about electric power?

Mr. SWIDLER. In electric power it is about an 80–20 division, 80 percent private and 20 percent public.

Mr. THOMAS. Go ahead.

Mr. SWIDLER. There is relatively little public gas service, but at that even 7 percent of the industry is considerable, and the municipal systems, of which I believe Memphis, Tenn., is the largest, have recently organized a national trade association with headquarters here in Washington.

INFORMATION ON LOCAL RATES

Mr. JONAS. What are you going to do with this information after you assemble it? You have no authority to regulate the distributor.

Mr. SWIDLER. One of the primary reasons we assemble the information is that so many members of Congress ask us for it.

Mr. JONAS. You are assembling it, then, not with the idea of making official use of it but just to answer inquiries and to have it available for general information?

Mr. SWIDLER. Yes, sir. The purpose of the Natural Gas Act was to aid the consumer, and, of course, Congress left the local part of the job to the State commissions. I think Congress has a very natural interest in knowing how that second half of the job is being carried out.

Mr. JONAS. I just wanted the record to show that you do not contend you have any authority over the rates charged by the local distributor.

Mr. SWIDLER. We make no such claim.

Mr. JONAS. Your jurisdiction applies only to the pipeline operators?

Mr. SWIDLER. Yes, sir; and we are seeking the information through the State commissions.

ADDITIONAL STAFF TO REDUCE BACKLOG

Mr. WYMAN. Mr. Swidler, you have asked for about $1,600,000 for salary increases for staff additions?

Mr. SWIDLER. That is right.

Mr. WYMAN. Is that because, as presently staffed, you cannot meet the pending caseloads satisfactorily or you cannot meet the competition of the staffs of the competing power companies subject to your regulatory jurisdiction?

Mr. SWIDLER. It is because we do not have enough people to do our job properly to avoid the accumulation of new backlogs and to dispose of backlogs we already have, to decide these cases on an adequate record that will enable us to carry out our responsibilities in order to protect the public interest in fields where we have the responsibility.

Mr. WYMAN. You have made certain projections with regard to the reduction in that caseload if these staff additions are made. In other words, with the roughly 121 additional positions you expect substantially to decrease the pending caseload in the next fiscal year?

Mr. SWIDLER. Yes, sir; I think in 1964, if this committee and the Congress will accept our request and give us the tools, that you will see the Commission well launched on catching up with its caseload. This is something which has never been accomplished since the Natural Gas Act was passed.

Mr. WYMAN. Is there such a thing as a dollar value in savings estimated per additional man with respect to this subject?

Mr. SWIDLER. No, sir; but if you look at this $350 million of refunds, just this one figure, and relate our whole natural gas appropriation to it, it is only 2 percent. It seems to me an excellent investment. Of course, you might say this would have happened anyway, but it didn't.

ROLE OF STATE AGENCIES IN EFFECTING CONSUMER SAVINGS

Mr. JONAS. Of course, the chairman's point becomes pertinent there. It is a little different situation if you merely transfer $350 million from two or three big pipeline companies to a number of equally important corporate entities engaged in the distribution of gas than if you see that money ultimately going toward the reduction of gas rates to the consumers. The chairman's inquiry on that particular subject is very pertinent.

Mr. SWIDLER. You need some faith in State regulation, Mr. Jonas. I have faith that the State agencies ultimately will take hold of the job. A good many are doing a very excellent job of it now. This is a problem which has emerged into its present dimensions only recently, and there may be some slippage while they gear themselves up to handle the refund problem, but by and large I think they will do it. I don't think we can expect 100-percent performance from them, particularly since we don't attain 100-percent performance ourselves. However, increasingly over the years I think you will get a high percentage of translation of refunds at the interstate level into refunds to the ultimate consumers.

SIZE OF LEGAL STAFF

Mr. THOMAS. What do you do with a staff of 143 lawyers? Where are they located, all in the District of Columbia?

Mr. SWIDLER. There are not 143 lawyers. They are proposed 143 people on the legal staff.

Mr. THOMAS. And over and above this number do you have any lawyers assigned to regional offices?

Mr. SWIDLER. There are no lawyers assigned to the regional offices.

Mr. THOMAS. The legal department is all located here at headquarters?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. How many lawyers do you have out of the 143 people?

Mr. SWIDLER. The usual ratio is about 60–40. Sixty percent are lawyers and the others are secretaries.

Mr. THOMAS. How many lawyers are assigned to the Commission? You have four GS–15's.

Mr. SWIDLER. They are special assistants.

Mr. THOMAS. Do you have any more lawyers?

Mr. SWIDLER. These are all lawyers except for stenographers. I don't know how many of this total are legal positions. I do know that getting decisions written is a bottleneck. We need more good people to help us write our decisions.

Mr. THOMAS. You have 143 positions in the Office of the General Counsel. In an agency of this size you must have 100 lawyers.

Mr. SWIDLER. We don't now. We have 88 lawyer positions.

Mr. THOMAS. Let me talk to the lawyers here. Mr. Chief Counsel, how many lawyers do you have?

Mr. SOLOMON. Our ceiling as of this moment is 79.

Mr. THOMAS. How many did you have as of January 1 or January 15?

Mr. SOLOMON. Seventy-two, seventy-three, or seventy-four.

FUNCTIONS OF OFFICE OF GENERAL COUNSEL

Mr. THOMAS. What are the duties of the Office of the General Counsel? Break down your personnel and tell us what they do.

Mr. SOLOMON. Well, first of all, we should be clear that unlike most of the other agencies——

Mr. THOMAS. How long have you been with the agency?

Mr. SOLOMON. About 8 months.

Mr. THOMAS. Where are you from?

Mr. SOLOMON. For about 15 years I was with the Federal Communications Commission.

Mr. THOMAS. Go ahead.

Mr. SOLOMON. Three years with the Department of Justice in the Antitrust Division, Chief of their Appellate Section.

In our shop, unlike most of the other agencies which you have before you, all of the legal work——

Mr. THOMAS. That is what they all tell us. Go ahead.

Mr. SOLOMON. Most of those with which I am familiar, and I think I am familiar with most of them——

Mr. THOMAS. Give us a breakdown as to what they do and the number you have assigned to hearing examiners, the number on appellate cases, and so on.

Mr. SOLOMON. About five do strictly appellate work where people appeal from our organization to the courts.

We have about 25 under the Assistant General Counsel doing power work. That includes all electrical work, including hydroelectric licensing.

Mr. THOMAS. Twenty-five lawyers?

Mr. SOLOMON. Approximately. These are people who not only handle the day to day processing but are the Commission counsel in all the litigated cases.

We have about six or seven of them who are basically doing rules and legislative work.

Mr. THOMAS. How many did you say you had there?

Mr. SOLOMON. About six.

KANSAS STATE UNIVERSITY LIBRARY
OCT 7 1963
MANHATTAN, KANSAS

Mr. THOMAS. Have you had any appreciable legislative work in the past 2 or 3 years?

Mr. SOLOMON. I think there were over 140 bills upon which we had to prepare reports for Congress during the last session of Congress alone. This is not only our programs but other people's programs.

We have fairly extensive legislative programs, not always enacted, but programs upon which we work.

We have a great deal of legislative work because we not only have to comment on bills directly related to the Natural Gas and Federal Power Acts but on many bills relating to land and waterways throughout the country in which we have an interest, and where Congress expects us to reply.

Mr. THOMAS. That is six of them. You have another five or six on appellate work. Where are the rest of them?

Mr. SOLOMON. Primarily in one of the three parts of the natural gas work.

Mr. THOMAS. How many are assigned to the hearing examiners?

Mr. SOLOMON. We don't have lawyers assigned to the hearing examiners from the General Counsel's Office. Each of the hearing examiners is a lawyer. Each of the hearing examiners is his own lawyer. We may have a lot of lawyers in the gas and power field assigned in particular cases before them. A case before an examiner will always have at least one lawyer or perhaps two assigned to it.

LAWYERS DOING TRIAL WORK

Mr. THOMAS. Your terminology is better than mine. Just give me the number of lawyers who really do trial work before the hearing examiners.

Mr. SOLOMON. In the gas field I would say about 20 to 25 from time to time. They move in and out. Some of them will be doing hearing work one day and nonhearing work the next day, but there are at least 20 or 25 on the gas side. I would say there are five to eight in hearings on the power side.

Mr. THOMAS. You have two brandnew distinct units, one for gas and one for electric power.

Mr. SOLOMON. There always has been a splitup between gas and electric power. They involve different problems. The laws are different.

Mr. THOMAS. That is not new, then.

SEPARATION OF INDEPENDENT PRODUCER AND PIPELINE LEGAL WORK

Mr. SOLOMON. No. There is a new division. We found about a year ago, before I got there, that problems were just too divergent with pipeline and independent producer legal rate work combined. The Commission more and more saw that the regulation of rates of independent producers of natural gas were different from the problems in pipeline regulation. In the Bureau of Natural Gas these two were split apart and this was a more efficient way of handling it, having people specialize on particular problems.

The same split was made in the office of the General Counsel.

Mr. THOMAS. Our lawyers there are able to figure out rate cases for gas and electric power, are they not? You didn't have to split them up so fine.

You say Mr. Swidler did that before you got there?

Mr. SOLOMON. I don't know whether Mr. Swidler had done that before I got there, but I think there is a much greater similarity between an electrical rate case and a pipeline rate case, than between a pipeline rate case and a producer rate case.

When you get into regulating the rates where gas is sold by independent producers to pipelines you are really dealing with a different type of animal.

ADDITIONAL POSITIONS REQUESTED

Mr. THOMAS. How many additional positions do you have in the legal department?

Mr. SOLOMON. The increase between 1963 and 1964 is 131 to 143.

Mr. THOMAS. If you take all the good lawyers you have over there and some of them do a little rate work on power and electricity, you would not need those 12, would you?

Mr. SOLOMON. We think we do, sir. This is not only lawyers.

Mr. THOMAS. Not only lawyers. It includes secretarial help.

Mr. SOLOMON. I think that is true. Sometimes we think our greatest need is for better secretarial help. It is much more difficult to find.

Mr. THOMAS. A little briefing work on a few points of law helps a little, you know.

Mr. SOLOMON. The point I want to make, sir, if I may, is that a lot of other agencies throughout this Government, instead of having one centralized Office of General Counsel, as the Hoover Commission said they should and as this particular Commission has, have lawyers spread throughout the bureaus; then usually they have a relatively small Office of General Counsel, also.

Mr. THOMAS. Did you ever do any private practice before you came to the Government?

Mr. SOLOMON. No.

Mr. THOMAS. In some of these towns, a lawyer will take more different types of cases than Carter had little pills. He is a specialist in all of them. You want to break yours down between gas and electric rates.

Mr. SOLOMON. We find by doing this we avoid retraining each individual man as he moves into another case. We find we get greater efficiency out of the existing manpower by having relative specialization.

Mr. SWIDLER. I think some of the big law firms specialize some of their people on producer rates, too. You see the same people at the hearings, at any rate.

Mr. JONAS. May I ask a general question, Mr. Chairman?

Mr. THOMAS. Yes.

ADDITIONAL STAFF TO REDUCE NATURAL GAS BACKLOG

Mr. JONAS. I thought you told us last year if we gave you 215 new positions you could get rid of the gas case backlog and would not need any more. Now you come in here wanting 121 more, after you have settled the big gas case. Is that consistent?

Mr. SWIDLER. No, sir. I do not recall saying that the level which we asked for 1963 would take care of all of our backlog problems, but I do want to point out, Mr. Jonas, that the 75 additional positions in the Bureau of Natural Gas are arrived at by transferring 11 positions from Pipeline Rates, where there is a decline, Mr. Jonas, and applying those against 86 additional positions in Producer Rates, Pipeline Rate Investigations, and Uniform Accounting—all a part of Rate Administration. There is a decline in the Pipeline Rate staff itself, for the reasons you mentioned.

That backlog, I think, now is in pretty good shape. Here is one corner of our job where I think we can say to you we are now, after 1 year, in shape to handle our caseload on a substantially current basis from now on. We still have three other parts of the job that are not in as good shape.

Mr. JONAS. Seventy-five of your increase requested is for Natural Gas?

Mr. SWIDLER. Yes, sir; and we are asking for 78 more people in Producer Rates alone.

Mr. JONAS. Why can you not transfer somebody?

Mr. SWIDLER. We are, sir. We are transferring 11 people from Pipeline Rates, but we do not have that many extra people we can transfer out of Pipeline Rates.

In the case of Producer Rates, we still have with us, I regret to say, Mr. Chairman, most of the producer rate cases ever filed with the Commission. We have managed to dispose of a total of 200-odd cases one way or another by deciding on the particular factual situation or mostly by settlement. This has involved a substantial amount of refunds, something on the order of $30 million. We have disposed of 289 producer rate cases, but we have piled up behind us producer rate suspensions equal to $151 million a year——

AREA RATE CASES

Mr. THOMAS. But you have been working on the Permian Basin case now for 18 months, and you have been working on one in the Louisiana area. How many more? When are you going to get it worked out so you can take these things on an area basis rather than on an individual case basis?

Mr. SWIDLER. This is a program for several years, sir. I want to make that clear, because I would not want next year to have it said that I told you we were going to dispose of those cases in fiscal 1964. I do think we will dispose of the lead case, the Permian case, but this will still leave the other areas in which we must establish area rates. As you know, this is an entirely new regulatory approach that we are working out, and it is not going fast, but I think we are building solidly and are making a real contribution to regulatory techniques and to the whole concept of regulation in a very difficult field.

EMPLOYEES FOR NATIONAL POWER SURVEY

Mr. THOMAS. How are you proceeding with your study of electric power interconnecting systems, and so forth? How many employees did you assign to that particular study and when will they finish the study?

Mr. SWIDLER. I will ask Mr. Brown to check on the number of employees and answer the rest of the question and fill in on the number of employees.

Mr. Chairman, I think we can look with great pride at the progress of the national power survey.

Mr. THOMAS. How far is it along? It has been in operation about 14 months, has it not?

Mr. SWIDLER. I do not think quite that long, sir. We are still on our initial schedule of completing the study by the end of the fiscal year and compiling and writing the report in fiscal 1964.

Mr. THOMAS. How many employees have you on that, Mr. Brown?

Mr. BROWN. We have in our Washington office, Mr. Chairman, about 18 people working on the national power survey.

Mr. THOMAS. All your work is done in the field, is it not?

Mr. BROWN. Then we have a representative group in the field working on the national power survey. Much of the basic data are being collected and analyzed in the regional offices.

Mr. THOMAS. How many people have you in the regional offices?

Mr. BROWN. We have 122 total.

Mr. THOMAS. What part of their time is consumed in this national power survey? You have already investigated all the river locations. We have not made any new river findings in the last 40 or 50 years, have we? I assume they have about caught up on that, have they not?

Mr. BROWN. This picture keeps changing quite rapidly.

Mr. THOMAS. You have been having heavy rains?

Mr. BROWN. There are always new possibilities which come into focus and which need further examination.

Mr. THOMAS. What part of your 120 or 125 people are in the regional offices? All the regional offices, outside of one, are assigned purely to power?

Mr. SWIDLER. With the exception of two, sir.

Mr. THOMAS. What is the second one? One is in San Francisco.

Mr. SWIDLER. Yes, sir. We have about 25 accountants in San Francisco, in addition to the natural gas staff in Houston.

Mr. THOMAS. Except for two, then, what part are now engaged in this power survey?

Mr. BROWN. At the present time, I think we have an active force representing about 33 percent, one-third, of our staff, perhaps a little bit more during this current fiscal year, in activities related closely to the survey.

Mr. THOMAS. Thirty-five or forty in the field and eighteen in the District?

Mr. BROWN. Yes, sir.

COST OF THE NATIONAL POWER SURVEY

Mr. THOMAS. What was the overall request for funds for the national power survey?

Mr. BROWN. This is covered in two items, which are not entirely——

Mr. THOMAS. Mr. Budget Officer, can you refer to last year's justifications and give us that figure?

Mr. SWIDLER. I have some overall figures on the cost of the national power survey, sir.

Mr. THOMAS. I was thinking it was around $400,000 or $450,000, but I understand it was around $380,000 or $385,000.

Mr. CASHELL. That was the increase we asked for last year, $380.000.

Mr. THOMAS. When was it first submitted?

Mr. CASHELL. When did we first submit it?

Mr. THOMAS. Last year or the year before?

Mr. CASHELL. 1963.

Mr. THOMAS. What was the overall request, $400,000?

Mr. CASHELL. $380,000 was the increase. The overall amount was about $900,000.

Mr. THOMAS. I am talking about for the national power survey alone. Was it $900,000 or $400,000?

Mr. SWIDLER. May I give you the figures, sir?

Mr. THOMAS. Surely. Anybody.

Mr. SWIDLER. For fiscal 1962, the actual expenditures for the national power survey were $200,000.

Mr. THOMAS. What did you request, though?

Mr. SWIDLER. This was money that was available from the 1962 appropriation. We made no request for it. It was an activity which arose during the year.

Mr. THOMAS. I though it was a separate item.

Mr. SWIDLER. It was a separate item for 1963.

Mr. THOMAS. How much was it then?

Mr. SWIDLER. The additional amount, as you just heard, was $380,000, but the total that we are spending this year is $925,000. Next year we estimate the total that we will spend on the national power survey will be $360,000, and that the total cost of the national power survey will be $1,485,000.

Mr. THOMAS. In your original justifications, did you not set out a wrapup figure of $1 million? I have that in my mind. Can you put your finger on that in the justifications for year before last? Does anybody recall? I have in my mind $1 million as the entire wrapup figure.

Mr. SWIDLER. I do not recall that figure, sir.

Mr. THOMAS. Do you think you will finish it next year?

Mr. SWIDLER. Yes, sir; I think we will.

Mr. O'CONNOR. My memory is we indicated there would be a $600,000 cost for additional people put on the payroll for the entire period for the national power survey, plus whatever people presently on the payroll would be devoted to that.

Mr. THOMAS. So, the overall additional figure was $600,000.

Mr. O'CONNOR. To the best of my memory, that is what we gave you last year for the whole program.

VALUE OF NATIONAL POWER SURVEY

Mr. THOMAS. What will be the value of it when you get it completed?

Mr. SWIDLER. I think the national power survey has already paid for itself many times over, sir. It is hard to put a dollars and cents

value on a substantial improvement in the effectiveness of the No. 1 industry in the country. I think this expenditure is very small for the benefit the country has already obtained, and much smaller in relationship to what I think the country will get in the future.

Mr. THOMAS. Spell that out. Do you not have a lot of associations in the electric industry? I have one in mind, the Edison Electric Institute. Do you not have half a dozen big associations?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. Why did they not do this on their own, for everybody concerned?

Mr. SWIDLER. The reason they did not do it is that we are doing essentially a governmental function which could not be carried on by a private enterprise.

Mr. THOMAS. It could not be done by a trade association which covers everybody in the industry or a large part of the industry?

Mr. SWIDLER. No, sir.

Mr. THOMAS. Why not?

Mr. SWIDLER. Because we have asked the industry to test itself by the standard of national interest. No trade association represents the entire industry. The Edison Electric Institute, which comes closest to it, represents a fraction, a very large fraction I believe, of the private industry, but that is only 80 percent of the country. And no trade association can really be effective in moving its members ahead. It is the agent of its members. To provide leadership, to set new goals, and particularly to coordinate among the various segments of the industry, is beyond the nature or the capability of the organization.

NATURE OF INFORMATION OBTAINED BY THE SURVEY

Mr. THOMAS. What are you acquiring or seeking or correlating here?

Mr. SWIDLER. The information runs the whole gamut of the facts that are required to look at the best way of meeting the country's powerloads in the decade beginning in 1970. You must look at your opportunities in hydroelectric, steam, nuclear, and you must look at them in the light of changing technology in each of these areas, a very rapidly advancing technology.

Mr. THOMAS. You are saying, then, that your employees go to the various localities of the country and are making a prognosis of the economic conditions of the localities 8 or 10 years from now, how many people will be there and how much current they will need by virtue of the increased population and increased industry. You are virtually adding up the economic capability of a thousand and one local communities. Do your people know more about the local conditions in X community than the power people that serve that community?

Mr. SWIDLER. Of course, the Federal Power Commission has always had as one of its responsibilities to attempt to forecast powerloads of the future, and I think ours have proven to be fairly reliable. They are rather the standard for the industry. Everybody is entitled to a guess, but I think the Federal Power Commission's guess has come to be recognized as what you might call the official guess. It does involve

combining the load growth data for all of the various areas of the country, but it is not entirely a matter of addition, because load growth is a function of national productivity. When you are forecasting more than 2 or 3 years ahead, you must have in mind, how big economically will this country be at any given time? What will be its total energy needs? What part of those needs will be met by electric power? This is a constantly increasing percentage. How will the loads be distributed? How can they best be met, looking at your resources as though they were available on a completely free technological basis? How can we make the best use of what we have, the best use of our coal and other fuels, the best use of our hydrosites, the best use of our technology?

This requires new groupings among power companies, groupings that do not now exist. This requires tying regions together by extra high voltage lines that are not now tied together and which might not be tied together were it not for the national power survey.

OBJECTIVES OF THE NATIONAL POWER SURVEY

Mr. THOMAS. Do you have authority to tell two companies, A and B, assuming they are both under your jurisdiction, how to operate their business with reference to the disposition of some excess power? "Lay this highline here for 100 or 150 miles. You are going to sell so much power over in this area." Do you have that jurisdiction?

Mr. SWIDLER. No, sir. We have the jurisdiction that Congress gave us in 202(a) of the Federal Power Act. You did give us some jurisdiction there. We are directed to encourage the interconnection and improvement of power systems on a voluntary basis, and that is what we are doing. This is authority that Congress gave the Commission in 1935, and we think that through the power survey we are giving that authority the most effective possible exercise. The industry is now in a state of great change and ferment. New interconnections and higher voltage interconnections are being announced almost weekly. New units of greater size——

Mr. THOMAS. Is that the result of your survey, or is that the result of old Yankee ingenuity and private enterprise working? All these people are not working for their health, but for profit, and if they can see a profit by extending the high line 150 miles and making a deal with this company over there, they will do it without your prodding, will they not? If they do not think they can make some money, regardless of your prodding they are not going to do it, are they?

Mr. SWIDLER. No, but there are various ways of making money, and I think we have opened up possibilities of making money in a way that is more consistent with the national interest than the way they made their money before.

Mr. THOMAS. What do you mean by that?

Mr. SWIDLER. What I mean is that this movement toward more effective use of fuel and equipment and technological resources has been greatly stimulated by the Federal Power Commission. This is not my opinion alone. This is the opinion of the industry. The industry is working with us very closely, and the leaders of the industry tell me that they think the national power survey has been a great contribution to the industry. We have over 100 industry leaders on

our various committees from all segments of the industry, Mr. Chairman, from the private segment in greater number because they are 80 percent of the industry.

Mr. THOMAS. Are you doing anything for the industry that the industry could not do for itself?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. What?

Mr. SWIDLER. We are bringing together the elements of the industry that could not meet without impartial Government sponsorship. There is no forum, there is no place for the Federals, the municipals, the cooperatives, and the private systems to get together except at the offices of the Federal Power Commission, Mr. Chairman.

Mr. THOMAS. You are getting them all on speaking terms.

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. Good. I thought maybe you were telling them how to run their business and make more money.

Mr. SWIDLER. No, sir.

Mr. THOMAS. You are spending about a million dollars geting them on speaking terms. It may be worth the money.

Go ahead.

FPC ACTIVITY IN THE NATURAL GAS FIELD

Mr. SWIDLER. Shall I go back to the natural gas industry and make a few more large claims in that field before going on with the power matters?

Mr. THOMAS. You can do or say anything you want to in here.

Mr. SWIDLER. I should like to stake out a claim, Mr. Chairman, for some of the credit for stabilizing natural gas prices in the field and at the city gate. The country faced a spiraling escalation in natural gas field prices. In the last year and a half, those prices have been stable in the field as a result of the interim price control of the Commission, and it has been stable or reduced at the city gate. I believe this has been a great contribution to the consumers and to the industry. I think now there is renewed confidence in the Commission. Consumers are no longer troubled, as they were a couple of years ago, by uncertainty as to where the price of gas would go if they committed themselves to new gas appliances. There is now a more solid foundation for the industry than existed some years ago.

The financial situation of the pipelines has improved to the extent that almost all of them, all but a few, now have solid financial statements. They know how much of the money in their treasuries belongs to them, which is to say all of it now, because the consumer's part of it has been repaid. This, I think, has been a great contribution.

Some of the pipeline companies feel that the settlements were severe. I do not say that they enjoyed them, but I do say that they have at least the compensation of security in their figures, in their financial statements.

We have gone a long way, Mr. Chairman, in improving our procedures. We have new regulations with respect to pipeline rate filings, which we are hopeful will enable us to dispose of new filings in the future expeditiously. I do not mean easily. It requires intensive work by the staff in order to meet a reasonable time schedule, but we hope to dispose of these cases in a year or less after filing, some

of them perhaps within the suspension period so it will not be necessary to have rates subject to refund.

We have set up a field office in Houston to help the producers, large and small, in preparing their paperwork and in establishing communication locally between the Commission and the producers.

We have also attempted to improve communication with the industry leaders and consumers by the establishment of the Natural Gas Advisory Council. We have had some meetings where I think we have had a chance to get the views and recommendations of the industry and consumer groups and they have proved helpful.

On pipeline certificate cases, Mr. Chairman, we approved $230 million of new construction in the last 3 months of 1962 as compared with $71 million for the comparable period of 1961. In the last 6 months of 1962, we approved $382 million in pipeline certificates.

Mr. THOMAS. The 15-mile extension of four lines runs into money, but as far as cases are concerned, you did not have too much of a workload, did you? When you lay a mile or 2 miles, it does not run into money, as it does when you have a transcontinental line.

Mr. SWIDLER. I think the figures suggest a considerable improvement over our performance in the past.

Mr. THOMAS. Gentlemen, let's get some lunch and come back at 1 o'clock.

AFTERNOON SESSION

Gentlemen, will the committee please come to order?

Mr. Chairman, did you have any further observations you wanted to make? If you do, we would be glad to listen to you. Otherwise, we will take a look at your budget. It is your pleasure, whatever you want.

NEWSPAPER ARTICLE ON COMMISSIONER MORGAN'S DECISION TO DECLINE REAPPOINTMENT

Mr. SHIPLEY. Mr. Chairman, Mr. Evins is ill today. He gave this short statement to Mr. Boland and asked that it be read into the record. It has a remark or two directed at the chairman. This would probably be the proper time.

Mr. THOMAS. Go ahead.

Mr. SHIPLEY. This is from Mr. Evins and reads as follows:

Mr. Chairman, over the years I have been impressed with the fact that the appropriation of money is not the most important item in order for a Commission or regulatory agency to effectively serve the public.

Our committee has appropriated large amounts to this Commission over the years but, notwithstanding this fact, we are constantly confronted with the question of a big backlog of cases and a slowdown in the regulatory process. Moreover, and more importantly, there seems to be some lessening of a sense of dedication to the public interest. No matter how much money an agency has, it must first be dedicated to the task of serving the public interest and, in the case of the Federal Power Commission, especially the consumer, before it can be a truly effective agency.

Budget increases, additional funds for special studies and funds to provide additional employees for "overworked bureaus" have been provided before, but I regret to say that there does not seem to be a corresponding dedication to serve the public interest.

From reports in the press, there seems to be a lack by some Commissioners, in the Federal Power Commission, of being consumer minded. I hope these press charges are not true.

We have all read with much interest the recently published letter of Federal Power Commissioner Howard Morgan to the President announcing that he is resigning and will not accept reappointment to the Commission. Commissioner Morgan pointed out in his letter to President Kennedy that the reason for his decision to decline reappointment is because of the lack of dedication to the public interest by his fellow Commissioners.

Mr. Chairman, this appears to be a great reflection upon this regulatory agency. What has happened at the Commission? All Americans are affected daily by the actions and decisions of the Federal Power Commission.

Why is not the average electric or gas consumer, who has no powerful lobby to represent him, better served by this regulatory agency?

I believe the issues presented by Commissioner Morgan's letter should be fully spelled out for the record.

In this connection the press has cited the El Paso Natural Gas Co. which has overcharged consumers by some $68 million and when the Commission was called upon to require a refund of this amount there was much hesitation and delay. It is reported that only after much discussion and debate was Commissioner Morgan able to persuade a majority of the Commission to vote with him and to provide this $68 million refund to the purchasing public that had been overcharged.

Why this delay in providing refunds of overcharges?

He would like to have your comment on that, Mr. Chairman.

Mr. MORGAN. I wonder if it would be appropriate for me to say something first, because I have been misquoted to some extent.

Mr. THOMAS. Commissioner, we are delighted to have you say whatever you desire.

Mr. MORGAN. I believe I have been extensively misquoted in the press. I made it very clear in my letter to the President that my remarks concerning the selection of personnel for the regulatory agencies were general in character and applied to all regulatory agencies. I made it specifically plain that those remarks were not intended to depict or describe any persons, including my colleagues and myself.

Mr. THOMAS. Those are your exact words that I read in the paper.

Mr. MORGAN. I do feel, and I have felt for a long time—and my studies and work, although not continuous, cover a period of 25 years in this field—that the selection of the Commissioners is the most crucial and critical area in securing good regulatory work. In my letter to the President I referred to people like Commissioner Eastman, Commissioner Aitchison, Commissioner Splawn, Commissioner Mahaffie of the old Interstate Commerce Commission as examples of what I meant.

I think this matter is at least as important as the administrative and organizational suggestions which people like Dean Landis and Judge Prettyman have made recently with respect to regulatory agencies. But I want to emphasize that it was only in a spirit of wanting to contribute a helpful suggestion with respect to all regulatory commissions that I wrote the letter to the President.

Mr. THOMAS. I thought your statement was very clear. That's the way I read it and the way I interpreted it.

Mr. SWIDLER. I have known Joe Evins, who is from my State, for a great many years. I respect his opinion and am sorry that he should have suffered this loss of confidence in me. I am not aware of any good reason for it.

Mr. O'CONNOR. Could I add one more thing, sir?

Mr. THOMAS. Yes.

Mr. O'CONNOR. I think the figures reported on the El Paso case would indicate a discrepancy within the Commission of as much as $30 million on that refund. Commissioner Woodward and I happened to be dissenting Commissioners, and at no time was the difference much more than $2 million, as I remember. It was a difference as to whether additional incentive should have been given for the producing properties of El Paso. Not additional incentive, but additional rate of return, and the difference in rates we discussed at the time amounted to closer to $2 million for El Paso than the figures cited.

With respect to the rest of that opinion, every other facet of the El Paso case as presented at that time was the unanimous view of all five of the Commissioners.

Mr. THOMAS. I think I speak my own thoughts and perhaps those of the members of the committee. We like the Commission and its staff. At no time do we think for one minute that any of you do anything except what your good conscience and good judgment dictates. I know of a lot of reasonable men who reasonably disagree without creating a revolution.

Mr. JONAS. Mr. Chairman.

Mr. THOMAS. Yes.

Mr. JONAS. May I comment on that? It will end in a question to Chairman Swidler.

Would it not be unusual in a rate case involving such substantial sums of money to have an immediate concurrence to the penny on the part of Commissioners who are supposed to have minds of their own and not operate in grooves? That is not to say that a final decision might not necessarily be unanimous, but would it not be normal to expect there would be differences of opinion in the consideration of such an important case? After all, there were a lot of people who thought that the rates under suspension were proper.

Mr. SWIDLER. The company has appealed, and the courts have yet to decide whether we did not go too far. I think we arrived at the right answer or I would not have agreed to it. You understand, Mr. Jonas, I do not want to discuss what went on within the Commission. I do not think that is appropriate. I do not want to open up the confidences of the meeting room. Mr. Morgan is here. I do not understand that he supports the accuracy of the report that was made. If he does not, there is nothing to rebut. But I think, in general, Mr. Jonas, of course you are right, that a lot of these cases are very difficult, there are many complex issues and many ways of looking at them. We sometimes start out from five different points of view before we get together, and sometimes we wind up and still have two or three different points of view.

Mr. JONAS. Even the Supreme Court sometimes hands down a divided opinion.

Mr. SWIDLER. Yes, sir; but with respect to this particular case, I think Mr. Evins accepted a newspaper report that is based upon disclosures or assumptions as to disclosures of what went on in Commission conference. I do not understand that anyone who was present at that Commission session supports the accuracy of that version. I do not think I need go further.

Mr. THOMAS. I do not think Mr. Evins was trying to be personal with anybody. He was trying to describe in a few short words what was said in the paper. I think it was merely thrown out for suggestion.

Mr. SWIDLER. I hope Mr. Evins will permit me an opportunity——

Mr. THOMAS. I am sure he will. Is there any further discussion? Are there any general topics the Commission or any members of the Commission want to discuss?

Mr. SWIDLER. Mr. Chairman, if your questions will give me an opportunity to make our case—of course, it is made in the written material, and perhaps that is enough—I think there is one program that is very important to the Commission, which I would like to emphasize. That is the program for electric rate regulation, which accounts for the bulk of the people that we are asking for on the power side.

Mr. THOMAS. Bulk of the increase?

Mr. SWIDLER. Yes.

Mr. THOMAS. We will go into that.

Mr. SWIDLER. Other than that, there is nothing that is not adequately covered.

SUMMARY AND HIGHLIGHT STATEMENT

Mr. THOMAS. We do not want to foreclose anybody now. If you think of anything else you want to say, that is what we are here for. Our friend over there is an artist and does a bangup job. This is very interesting and very readable. I want him on my side. We will put pages A–1 through A–12 in the record. I believe some of this is a duplication of our distinguished chairman's remarks, but it is so well stated it does not hurt to put it in this form.

(The material referred to follows:)

SUMMARY AND HIGHLIGHT STATEMENT

INTRODUCTION

The Commission is requesting $12,725,000 to carry on its programs during fiscal 1964. This includes $50,000 being requested by the Office of Emergency Planning for our emergency planning work, and is an increase of $1,699,000 over the fiscal 1963 total obligations of $11,026,000 (adjusted appropriation of $10,626,000 and a $400,000 proposed supplemental to provide for the salary increases resulting from Public Law 87–793, approved October 11, 1962). These funds for fiscal 1964 will provide an additional 121 positions over fiscal 1963, an increase from 1,178 to 1,299 positions.

Of the 121 new positions, 75 are required for the regulation of the rapidly expanding natural gas industry to enable the Commission to accelerate and complete programs which it has already begun for clearing up its backlog of natural gas rate and certificate cases. The increased staff is required primarily for natural gas producer regulation to enable the Commission at long last to handle promptly new applications for service and rate changes, and to lay a foundation for area rate regulation in each of the gas production areas.

The other 46 positions are for our electric power work, primarily to enable the Commission to carry out its responsibilities for the regulation of wholesale rates and service in interstate commerce. Effective regulation of interstate transactions in the electric power field is vital if the consumers of electricity are to receive the benefits of the savings resulting from the interconnections across State lines and pooling arrangements covering large areas of the country which the Commission is encouraging in its national power survey.

Details are shown in the table entitled "Statement of Positions and Activity Costs," which follows this statement. The justification by activities starts with section B.

NATURAL GAS INDUSTRY

The Commission requests $7,106,000 for its natural gas work, an increase of $1,023,000 over 1963, providing for an increase of 75 positions over 1963, from 675 to 750 positions. The steady growth of the industry and the resulting increase in the workload of the Commission, and the steps taken by the Commission in the past year to improve the quality of its services, demonstrate that it will use the funds requested prudently and effectively in the public interest.

The natural gas industry is characterized by a rapid rate of growth as it expands to supply an increasing portion of the Nation's increasing need for energy. The change in the Nation's fuel economy brought about by the increasing penetration of the energy market by natural gas has been little short of revolutionary. The percent of the Nation's total energy usage supplied by natural gas increased from 19.8 percent in 1950 to 33.2 percent in 1961, a two-thirds increase. Thus today natural gas supplies over a third of all the energy used in this country, including the energy used by automobiles and other mobile equipment as well as in the home and in industry. In view of the rapidly increasing importance of natural gas to consumers and to the Nation's economy, it is essential that the Commission have an adequate and competent staff to reduce existing certificate and rate case backlogs to a normal working level, to process applications for certificates for new projects rapidly and to complete rate cases with a minimum of delay.

The Commission has done much in the past year to clean up the backlog of cases the present members of the Commission inherited, to improve the efficiency of our existing staff, and to improve internal procedures to obtain maximum effectiveness from the people we are hiring.

The Commission's major accomplishment in the past year has been the disposal of the greater part of the billion-dollar backlog of pipeline rate cases pending before the Commission at the beginning of fiscal 1962. We have encouraged the use of the conference procedure to secure settlements agreeable to the Commission staff and the parties concerned which are in the public interest, with the result that refunds of $350 million were ordered and new, lower rates were put into effect at once. Many settlements include moratoriums on future rate increases for stipulated periods in the future.

The Commission has reorganized the Bureau of Natural Gas into a pipeline and a producer division to strengthen controls, pinpoint responsibility, and expedite the processing of cases, and has similarly reorganized the Office of the General Counsel to complement the changes made in the Bureau of Natural Gas.

A new field office was established in Houston, Tex., to strengthen supervision over our personnel in the area and to serve as a clearinghouse for problems of the small independent producers in Southwestern United States.

New regulations have been adopted which require a pipeline company to submit a full presentation of its case and all supporting data verified by an independent certified public accountant at the time a rate increase is filed, thus avoiding lengthy delays heretofore experienced for field investigation of the company's books in connection with each rate case. Effectiveness of the new procedure assumes adequate staffing. If adequate staff is made available, we shall periodically check the books of pipeline companies to assure compliance with the uniform system of accounts, eliminating the need for extended field investigations as a part of rate cases. Without such compliance the new system will fail of its purpose. With adequate staff our new procedure will enable us to complete pipeline rate cases in a fraction of the time it has taken in the past.

In this connection, we have also made more extensive use of prehearing conferences to clarify and, where possible, to eliminate immaterial or peripheral issues, thus simplifying and materially expediting formal hearings.

We have outlawed the so-called favored-nation and other indefinite escalation clauses in producer contracts filed after April 1, 1962, and restricted, and will ultimately eliminate, this type of producer rate increase filing which, in a large measure, has been responsible for runaway increases in producer prices in the past.

We have established the Natural Gas Advisory Council, made up of industry and consumer groups, to advise the Commission on current problems.

We have also made significant progress in the area of our greatest backlog—gas producer rate and certificate cases. We have developed a program for regu-

lating the rates of the gas producers on an area basis rather than by an individual proceeding for each producer. Thus we expect to clear up our backlog of thousands of individual producer rate cases by holding a relatively few hearings, one for each of the producing areas of the country. Unfortunately we do not have sufficient staff to hold hearings in each of the areas simultaneously. However, we are forging ahead with the area rate program, and the hearing in the lead case involving the Permian Basin of Texas and New Mexico, covering over 400 producers, is well underway and should be completed in 1963. Work in preparation for a hearing in the area proceeding for southern Louisiana is well along but progress in this proceeding and the initiation of a national proceeding to expedite the hearings for other producing areas is being delayed by lack of staff.

We have increased the use of electronic data processing within the limits of our present appropriations to enable us to tabulate and analyze the huge amount of data on the cost of finding and producing gas, gas reserves, and gas deliverability, which are vital in our area rate proceedings. Regulating producer rates on an area basis involves such enormous masses of data that it would not be feasible without the modern data processing equipment which we have been using. Our 1964 appropriation request includes funds for the use of machines to the maximum extent economically feasible.

With respect to producer certificate cases we have recently established guidelines which limit the type of evidence necessary to determine the initial price, which is the primary issue in most of these cases. Hearings on the thousands of pending cases can now be expedited and we have made progress in reducing the producer certificate backlog. However our progress in disposing of these cases, many of which are already several years old, is still limited by lack of manpower.

It is obvious that despite our best efforts, we cannot expect to eliminate our backlog of producer rate and certificate cases and keep current with the ever-increasing number of cases generated by the growing natural gas industry without additional staff. We believe the industry and its consumers are entitled to a speedy disposition of cases of all types. The 75 additional people we are requesting who will be assigned to producer matters are urgently needed to enable us to keep up with our work.

ELECTRIC POWER INDUSTRY

The sum of $2,191,000 is requested for the Commission's electric power work, an increase of $466,000 over 1963. This will provide for 38 additional positions, 30 of which are for the regulation of electric rates, 5 for enforcement of the Commission's uniform system of accounts and 3 for interconnection and coordination studies.

In the past year the Commission has made an intensive study of its responsibilities under the Federal Power Act and found that electric rate regulation —the central consumer protection activity of the act—had in recent years for all practical purposes ceased to be an effective function of the Federal Power Commission. The four-man rate staff which was found submerged in the natural gas organization when the present members of the Commission took office in 1961 was transferred to the Bureau of Power and given the prominent place it deserves in that organization. The situation had so deteriorated that many of the interstate electric power companies subject to FPC jurisdiction did not even have their wholesale rates on file with us. Federal rate regulation in the electric power field had all but lapsed. These rates are now being filed but our small staff is hardly adequate for routine processing of the filings, much less to investigate the rates sufficiently to determine whether they are just and reasonable. The Commission is determined to make rate regulation under the Federal Power Act effective, but we urgently need more staff in order to do so.

The need for effective wholesale electric rate regulation is growing acute as more and more power systems interconnect with their neighbors and the wholesale interstate transactions become a larger and larger part of the total. The trend toward power pooling has developed into a headlong rush as almost every electric power system in the country seizes the opportunities to reduce the cost of generating electricity by taking advantage of the savings of utilizing larger generating units, reducing reserves, and taking advantage of system diversities, all inherent in interconnections and coordinated operations.

The interest which the electric power companies are commendably showing in looking beyond their State lines for the most economical means of meeting the growing power demands of the country has been stimulated by the Commission's national power survey which is now in progress. It would indeed be

an anomaly if the Commission did not follow through with an effective job of wholesale rate regulation to make sure that power from these interestate systems is made available to wholesale customers at reasonable rates and with an assurance of continued supply. The electric power industry is rapidly developing into a single interconnected grid, at least from the Rocky Mountains to the east coast and from Maine to Florida. Regulation of the wholesale sales from such a system is obviously a Federal responsibility and this Commission urgently needs additional staff to carry out this important consumer protection activity.

A small increase in staff is also needed to expand our program of field audits to assure compliance with the uniform system of accounts. Such audits will materially simplify and expedite the investigations related to electric company rate cases.

The Commission's national power survey is moving full speed ahead, and we are hopeful that virtually all of the engineering and economic studies will be completed during fiscal year 1963. FPC and industry advisers are working together to make the report of this most exhaustive survey in the Nation's history an historic contribution to the shaping of a more efficient power supply for the Nation, with the promise of lower rates for consumers. Completion of the report is expected during fiscal year 1964.

While the report on the survey in itself will prove an invaluable guide to the industry, much of its value will be lost if there is no followup on its recommendations. The 1963 staff level will need to be maintained in order to monitor and encourage the adoption of the national survey recommendations, and to adapt the recommendations to the rapid growth and change in the industry. A very small additional staff will be needed in 1964 for work on regional and local interconnection studies to extend the benefits of the national survey.

The Commission has an important responsibility for collecting and disseminating statistical data on the electric power industry which is of genuine value to the public and the industry, as well as to the Commission itself. We need to revise and expand our statistics to focus on the problems of today and use the valuable and inexpensive tool of public information to stimulate better industry performance. A task force of the Commission staff has been organized to spearhead the strengthening of this program. Significant progress towards improving this function is anticipated in 1963 and 1964.

NONFEDERAL HYDROELECTRIC PROJECTS

The Commission requests $2,061,000 for this activity, an increase of $166,000 over 1963. This will provide for eight additional positions for the investigation of non-Federal hydroelectric projects and the processing of license applications.

The Commission in the past year has attempted to accelerate the pace of license applications pending before us and push them to conclusion so that when non-Federal development of projects is in the public interest the projects can be built and thus stimulate general economic growth as well as add additional capacity to meet the growing demand for electric power.

The Commission is continuing its investigation of projects which are operating without a license under the Federal Power Act. The Commission in the past year has established new guidelines for granting licenses for these projects and is making a determined effort to bring them under our licensing authority. Many applications have been filed, and more are in process of being readied for filing. The anomalous situation of the past, in which hundreds of projects operated without the license required by law is now being gradually eliminated. Additional staff will be required to process the increase in filings. This activity is self-supporting since license fees will cover the licensing service.

The Commission is making progress in its program for determining annual payments to be made to the United States by owners of non-Federal power projects which are benefited by headwater improvements constructed by the United States. A proposed rule has been issued which, if adopted, will provide, for the first time, formulae which will enable us to send out annual bills for headwater benefits and will thus bring into the Federal Treasury substantial sums on a regular basis.

Receipts from license fees alone will amount to $2,190,000 in 1964. It is also estimated that payments to the Federal Government, to be determined by the Federal Power Commission, for benefits derived by non-Federal projects from Federal water resources projects will amount to $1,750,000 in 1963 and $4 million in 1964. Details are given later in this section.

FEDERAL RIVER DEVELOPMENT PROJECTS

The amount requested for this activity is $504,000 and provides for no increase in staff. The amount is $16,000 over that provided for 1963 because of the salary increase.

The number of projects under review by the Corps of Engineers and the Bureau of Reclamation for which the Federal Power Commission must furnish recommendations with respect to power facilities is expected to increase. We expect that with increased efficiency of our present staff that the Commission will keep pace in this coordinated effort to develop sound and well-conceived plans for the multiple-purpose improvement of the Nation's river basins.

ADMINISTRATION

The personnel requirements for administration remain stable at 86 positions, despite the expansion in activities proposed for 1964. The amount requested for this activity is $28,000 over the amount provided for 1963 as a result of the salary increase.

GAS ACTIVITIES

Mr. THOMAS. You say this on page A–4:

The Commission has reorganized the Bureau of Natural Gas into a pipeline and a producer division to strengthen controls, pinpoint responsibility, and expedite the processing of cases, and has similarly reorganized the Office of the General Counsel to complement the changes made in the Bureau of Natural Gas.

Did the judge agree with us this morning that maybe if we let the brothers handle two or three different types of cases, we would eliminate the increase of 13? Did you make that statement, Judge?

Mr. SOLOMON. No, sir.

Mr. THOMAS. You say this at the top of page A–4:

We have encouraged the use of the conference procedure to secure settlements agreeable to the Commission staff and the parties concerned which are in the public interest, with the result that refunds of $350 million were ordered and new, lower rates were put into effect at once. Many settlements include moratoriums on future rate increases for stipulated periods in the future.

That is all good. I notice this language in the middle of page 5:

We have outlawed the so-called favorite-nation and other indefinite escalation clauses in producer contracts filed after April 1, 1962, and restricted, and will ultimately eliminate, this type of producer rate increase filing which, in a large measure, has been responsible for runaway increases in producer prices in the past.

You can get a lot of argument on the factual accuracy of that statement, can you not, on runaway prices?

Mr. SWIDLER. Yes, sir. I do not claim that this is the universal view of the industry.

Mr. THOMAS. If you put it on a B.t.u. basis, they will show you it is about the cheapest fuel on the market at prevailing prices.

Mr. SWIDLER. Yes, sir; it is, on a B.t.u. basis.

Mr. THOMAS. That is what counts in the long run, is it not, what produces the most heat plus handling costs, and so forth?

AREA RATES

You also say on page 5:

We have also made significant progress in the area of our greatest backlog—gas producer rate and certificate cases.

I have a note here. Your predecessor started the area idea; is that right?

Mr. SWIDLER. Yes, sir; the concept of having uniform rates within producer areas was enunciated by the Commission before any of us who are here now were on it. But nothing much was done with the concept. I think all that we can claim for ourselves is having taken the ball and run with it, I hope a considerable way toward the goal-post. We have also, I think, given a little different direction to the concept. I think the original concept was very much along the lines that the area rate would be the so-called field price, which is whatever price was charged in current contracts.

Our own conception is that the area rate will be a regulated rate, and we have introduced a vast amount of cost and economic evidence in the proceedings.

Mr. THOMAS. I think your predecessors had the same idea, did they not?

Mr. SWIDLER. I think they were perhaps moving in that direction. In the original announcement of the area rate proceedings they listed the various kinds of information which would be taken into account in fixing area prices.

One of the steps taken by the Commission when Mr. Morgan and I first came on it, at one of our early meetings, was to approve a cost questionnaire which the staff had prepared before we got there. This must have meant some change in the direction of the Commission's thinking. But they had not made any announcement of the relationship between the cost data called for by the questionnaire and area rates. I think this Commission has indicated clearly that costs are one of the important foundations for area rates.

Mr. THOMAS. I think you are going to need that IBM machine when you go into it. I have in mind, in my old east Texas county where I was born and reared, one of the companies that went in there and decided to do some extra digging. They just went 14,000 feet. I expect that exploratory well cost them a half million dollars or three-quarters of a million dollars. Would you say that is about right?

Mr. O'CONNOR. A half million dollars anyway.

Mr. THOMAS. Tom, Dick, and Harry cannot do that. It did not cost anything like what they spent to get it, but they thought that perhaps they had made an error. They moved over a couple hundred yards and started another one, where they intend to go down another 14,000 feet.

Suppose they did not make an error in the first well and it does not produce any more than the first one produced, which was practically nil. How far are you going to figure out $1.5 million on the cost of that locality when it got virtually nothing?

Here is what you say on your area yardstick:

> Unfortunately, we do not have sufficient staff to hold hearings in each of the areas simultaneously. However, we are forging ahead with the area rate program, and the hearing in the lead case involving the Permian Basin of Texas and New Mexico, covering over 400 producers, is well underway and should be completed in 1963.

I have a longhand note—how long has this been going on? As well as I remember, your investigation now is about 18 months.

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. If you had enough people to cover four or five rate areas at one time, then your people more than likely would be idle for a large part of the time.

Mr. SWIDLER. Of course, Mr. Chairman, not all of the areas would need a separate proceeding. Some could be consolidated. It may be that some of the issues in future proceedings can be heard on a national basis. Some of the economic testimony, for example, would be the same in each of the various areas.

Making allowance for the fact that once we learned the ropes and once we established the guidelines, that these proceedings will move faster, that we will take advantage of opportunities for consolidation, we envisage this program as possibly winding up with the establishment of initial area ceilings within, say 2 years after the Permian case is decided which, to use a guesstimate, would be, say, June 30, 1964.

Once area rates are established in each area, they must, of course, be kept current in order to reflect changes in needs of the companies and the changes in their costs, changes in other conditions upon which the rates would be predicated.

I hope the committee will keep in mind that this is not an expansion of a going activity, at least, as of the period when this new Commission came in. This is work that was just not being done. The Commission was required to regulate producer rates, but nothing had been done on it except to pile up backlogs. We are just starting to establish a system of regulation which will discharge our responsibilities under the Natural Gas Act as interpreted in the *Phillips* case by the Supreme Court.

ELECTRIC POWER ACTIVITIES

Mr. THOMAS. I note this in the middle of page 7:

> Two million one hundred and ninety-one thousand dollars is requested for the Commission's electric power work, an increase of $466,000 over 1963. This will provide for 38 additional positions, 30 of which are for the regulation of electric rates, 5 for enforcement of the Commission's uniform system of accounts and 3 for interconnection and coordination studies.

That is well worded. Reading from the top of page 9:

> The electric power industry is rapidly developing into a single interconnected grid, at least from the Rocky Mountains to the east coast and from Maine to Florida.

In other words, the Pacific coast is a separate entity from Seattle to San Diego?

Mr. SWIDLER. There are no strong interconnections between the systems east and west of the Rockies, but I think the committee may be interested to know that practically all the large systems east of the Rockies now operate in parallel. They are all tied together, and they all are on the same frequency. Clocks in this great half of our country are all regulated by one system now.

Mr. THOMAS. I note your language here:

> The Commission's national power survey is moving full speed ahead, and we are hopeful that virtually all of the engineering and economic studies will be completed during fiscal year 1963. FPC and industry advisers are working together to make the report of this most exhaustive survey in the Nation's history a historic contribution to the shaping of a more efficient power supply for the Nation, with the promise of lower rates for consumers. Completion of the report is expected during fiscal year 1964.

More horsepower to you. If you can pull a Houdini and get the rates down by studying, more horsepower to you.

On non-Federal hydroelectric projects you say that the Commission requests $2,061,000. We will go into that. It is an increase of $166,000, providing for eight additional positions for the investigation of non-Federal hydroelectric projects.

You have Federal river development projects, administration, other activities on page 12. I notice this language:

> An intensive study of whether our gas reserve and deliverability requirements for pipelines are flexible enough to meet the needs of the industry is under study but manpower restrictions are retarding progress. The natural gas statistics program of the Commission must be expanded to meet Commission and industry needs.

That is not too impressive, is it?

We note you have a proposed supplemental, due to pay increase, of $400,000 coming over.

OBLIGATIONS AND EXPENDITURES

Put page A–17 in the record.

(The page referred to follows:)

FEDERAL POWER COMMISSION

Estimated obligational authority related to obligations and expenditures

	Fiscal year 1963	Fiscal year 1964
Current appropriations:		
Appropriated	$10,700,000	----------
Proposed supplemental due to pay increases	400,000	----------
Less transfer to GSA	−74,000	----------
Recommended appropriation	----------	$12,675,000
Reimbursement for emergency preparedness function	----------	50,000
New obligational authority	11,026,000	12,725,000
Permanent appropriations	68,000	67,000
Less reimbursement for emergency preparedness functions	----------	−50,000
Total obligations to be incurred	11,094,000	12,742,000
Obligations outstanding at start of year	743,000	828,000
Obligations to be accounted for	11,837,000	13,570,000
Less obligations outstanding at end of year	828,000	920,000
Gross expenditures in year	11,009,000	12,650,000

COST OF PAY INCREASE

Mr. THOMAS. What will the pay increase cost you in fiscal year 1964 and what figure have you set up in the 1964 budget for the pay increase?

Mr. SWIDLER. $794,000.

Mr. THOMAS. Are you sure?

Mr. CASHELL. $794,000.

Mr. THOMAS. Pay increase for 1964?

Mr. O'CONNOR. That is the total of the two steps.

Mr. THOMAS. The second step is carried in your 1964 budget. You have to pay for that, too; correct?

Mr. SWIDLER. In the middle of the year the second increase goes into effect.

Mr. THOMAS. Whatever it is, it is carried in your 1964 budget for 6 months.

Mr. SWIDLER. Whatever it is, it is in there.

Mr. THOMAS. It went into effect in October of last year?
Mr. CASHELL. October 13.
Mr. JONAS. Will the chairman yield?
Mr. THOMAS. Yes.

1963 COSTS NOT ABSORBED

Mr. JONAS. I do not find that you absorbed any of that first step.
Mr. SWIDLER. No, sir. We are asking for $400,000.
Mr. JONAS. Did not the President direct that you absorb it?
Mr. SWIDLER. The President directed that we review our budget and expenditure proposals, and he determined that, in view of our need to add people to catch up with our work, we should not be required to absorb it.

TOTAL VACANCIES

Mr. JONAS. You filled all vacancies that occurred?
Mr. SWIDLER. No, sir, we have not yet. We have a recruiting program under way.
Mr. THOMAS. They were given 1,178 people for 1963. How many vacancies did you have on January 1?
Mr. SWIDLER. We must have had about 175 vacancies.
Mr. TRAINOR. Mr. Chairman, our recruiting schedule provides that we place these new positions on during the year. That is the way the money was given to us.
Mr. THOMAS. No, it was not. We want it on an annual basis. We questioned that innumerable times. Was that a firm answer as to the number of vacancies you had on January 1? You say 175?
Mr. TRAINOR. We had approximately 150.
Mr. THOMAS. We do not want an approximate figure. You either had it or you did not. What do your records disclose?
Mr. TRAINOR. As of January 1?
Mr. THOMAS. Whatever recent date you have.
Mr. JONAS. Whatever recent period you have your figures complete for.
Mr. TRAINOR. As of January 1, it was 154.
Mr. JONAS. Have you had any add ons since?
Mr. TRAINOR. Yes, sir, we have had approximately 50 this month of January. We also have made commitments and have reporting dates for 40 more.
Mr. JONAS. You still have a hundred vacancies?
Mr. SWIDLER. Yes, sir. Mr. Jonas, you may remember that in fiscal 1962 we came in and asked for a supplemental so that we could make a head start in our recruitment program, but that supplemental got lost in the shuffle. This appropriation did not become available until October, so that instead of starting, as we had hoped, last April 1, or May 1, we did not start to put on people until some time in October. It was the purpose of the supplemental to give us this running start, but instead of a running start we had what you might call a halting start.
This accounts for the fact there are so many vacancies.
Mr. THOMAS. That is not too persuasive, my distinguished friend. I pointed out that you mentioned 17 or 18 times the lack of staff. I quit counting at that. It checks up now, that after 4 months you still have 100 or 150 vacancies. If your work is so important and you are

crying for more people, why have you not put them on? You have had the money.

Mr. SWIDLER. Our recruitment is a problem in these technical positions, getting good people is not the work of a day.

Mr. JONAS. I would like to add that your predecessor, as Chairman of this Commission, told the committee that money was not his sole problem, that it was difficult indeed to recruit the kind of people that you need.

Mr. SWIDLER. That is very true, sir. You cannot recruit them without money, and even with money, it is a real job to get able people.

COMPARISON OF 1963 AND 1964 BUDGETS

Mr. THOMAS. We will put page A–19 in the record.

(The page follows:)

ITEMIZATION OF APPROPRIATION REQUEST

Salaries and expenses, Federal Power Commission

Standard classification	Estimate, 1963	Estimate, 1964	Increase (+) or decrease (−)
ANALYSIS BY OBJECT			
11 Personnel compensation	$9,070,000	$10,395,000	+$1,325,000
12 Personnel benefits	688,400	787,200	+98,800
21 Travel and transportation of persons	520,000	520,000	
22 Transportation of things	28,700	15,000	−13,700
23 Rent, communications, and utilities	217,000	359,600	+142,600
24 Printing and reproduction	117,700	129,000	+11,300
25 Other services	165,000	284,700	+119,700
26 Supplies and materials	97,000	115,600	+18,600
31 Equipment	122,200	118,900	−3,300
Total obligations	11,026,000	12,725,000	+1,699,000
ANALYSIS BY ACTIVITIES			
1. Natural gas industry	6,083,000	7,106,000	+1,023,000
2. Electric power industry	1,725,000	2,191,000	+466,000
3. Non-Federal hydroelectric projects	1,895,000	2,061,000	+166,000
4. Federal river development projects	488,000	504,000	+16,000
5. Administration	835,000	863,000	+28,000
Total	11,026,000	12,725,000	+1,699,000

Mr. THOMAS. Mr. Jonas, we will be working this over later. There are four or five items that need attention. No. 24 is "Printing and reproduction," 25 is "Other services," 26 is "Supplies and materials." They are all showing a sizable increase to the tune of $1,690,000. This is an adjusted figure after a transfer to GSA and your pay supplemental.

Mr. JONAS. Why should your "Rents and utilities" go up?

Mr. THOMAS. Let us put it in the record and look at it later, if you do not mind.

COLLECTIONS

This is all very interesting. Do not let it go unnoticed that the Commission has collected a lot of money in fees this year. Put the tables into the record on pages A–20, A–21, and A–22.

(The tables referred to follow:)

FEDERAL POWER COMMISSION

Collections—General accounts

[In thousands]

Receipt symbol	Receipt title	Actual, 1962	Estimate, 1963	Estimate, 1964
260899	Miscellaneous fees for permits and licenses, not otherwise classified	$1,338	$1,585	$1,636
261040	Fines, penalties and forfeitures, customs, commerce, and antitrust laws	1	1	1
262250	Sale of publications and reproductions	37	39	40
262461	License benefit charges	168	1,750	4,000
262490	Fees and other charges for miscellaneous services	1	1	1
262889	Repayments on miscellaneous recoverable costs, not otherwise classified	6,493	35	35
	Total general receipts	8,038	3,411	5,713

Collections—Special accounts

[In thousands]

Receipt symbol	Receipt title	Actual, 1962	Estimate, 1963	Estimate 1964
265105	Licenses under Federal Power Act from public lands and national forests, payments to States (37½ percent): 0899, Miscellaneous fees for permits and licenses, not otherwise classified	$58	$68	$67
145000	Receipts, reclamation funds, special fund collections, other agencies	78	91	89
265125	Licenses under Federal Power Act, improvements of navigable waters, maintenance and operation of dams, etc	154	154	154
145882	Oregon and California land-grant fund: 0899, Miscellaneous fees for permits and licenses, not otherwise classified	1	1	1
	Total special receipts	291	314	311

Collections—Trust accounts

[In thousands]

Receipt title	Actual, 1962	Estimate, 1963	Estimate, 1964
Licenses under Federal Power Act from Indian reservations (various Indian tribes)	$688	$243	$243

Mr. THOMAS. Miscellaneous fees for permits and licenses, not otherwise classified, this year is $1,585,000.

Sale of publications, $39,000. What did it cost you to print them?

Mr. SWIDLER. I assume at least that much. This is not a profit-making activity.

Mr. THOMAS. License benefit charges, $1,750,000.

Mr. SWIDLER. This is a matter I might say a word on, Mr. Chairman. As you know, last year I told you that I was not proud of the Commission's record in having collected, in its entire history, only approximately the amount of the administrative cost to make the collection. I promised you we would institute new procedures to put the headwater benefits payment on a businesslike basis. This year there

is a considerable improvement. We will bring in $1,750,000. Next year we are estimating $4 million. This $1,750,000 is three times the amount of money taken in in the whole course of the Commission's history before.

We are proceeding in two or three ways to try to put this activity now on a businesslike basis.

HEADWATER BENEFITS

Mr. OSTERTAG. What is a headwater benefit? Will you explain that?

Mr. SWIDLER. Yes, sir. The statutes provide that——

Mr. THOMAS. Benefit of somebody else's expenditure.

Mr. SWIDLER. That is right. The downstream owner of a hydro project is liable to the upstream owner, either the United States or a private licensee, for a share of the benefits which he receives from the regulation of the water by the upstream project. The statutes do not provide that the Federal Government pay for headwater benefits that it receives, but the payments are owing either to the United States or by the lower licensee to the licensee of the upper structure.

In the past what the Commission has done is to take these projects one by one and year by year and try to determine how the water would have flowed were there no upstream projects, how much would have been available above, how much below, what parts of the year or hours of the day the water would have been released, how much was the value of the additional power, and so forth. It has been an endless and controversial determination where the wheels spun without moving ahead.

We are doing two things now, primarily. In the first place, in new licenses we are inserting a formula so that when a person gets a license, he has a contract commitment to pay his fees beginning the first year on an agreed basis.

Mr. THOMAS. How are you collecting on those old cases? You will have authority soon to take them over. What is the period of limitation, 40 years?

Mr. SWIDLER. Fifty years is the recapture period.

Mr. THOMAS. What are you going to do with those 45 years of age? We will put the table on A–23 in there.

(Page A–23 follows:)

Explanation of collections under the Federal Power Act and from other sources

Item	Actual, 1962	Estimate, 1963	Estimate, 1964
Annual fees for licensed projects	$2,317,000	$2,142,000	$2,190,000
Headwater benefits	168,000	1,750,000	4,000,000
Sale of publications and reproductions and miscellaneous services	39,000	41,000	42,000
Repayment to the United States from the Niagara project	6,493,000	35,000	35,000
Total	9,017,000	3,968,000	6,267,000

Section 10(e) of the Federal Power Act provides that licensees shall pay to the United States reasonable annual charges in an amount to be fixed by the Commission to reimburse the United States for the costs of administration of part I of the act and to recompense it for the use, occupancy, and enjoyment of its lands and other property.

The total collections under section 10(e) of the Federal Power Act during the fiscal year 1962 were $2,317,952.60. These collections are anticipated to be $2,142,000 in 1963 and $2,190,000 in 1964. Of the total collected in 1962, $1,164,779.57 was for the purpose of reimbursing the United States for the costs of administering part I of the Federal Power Act and was credited to "Miscellaneous receipts." (Amounts for this purpose are estimated at $1,389,000 in 1963 and $1,460,000 in 1964.)

Mr. THOMAS. Headwater benefits rose from $168,000 in 1962 to $1.7 million in 1963, and he has a good, round, fat figure of $4 million for 1964. Congratulations.

Mr. SWIDLER. Thank you. May I add this one word of explanation? The second thing we are doing is having a uniform rule that we are promulgating, which will provide a formula on which existing projects can make payments.

Mr. THOMAS. Does the statute of limitations run against the Federal Power Commission?

Mr. SWIDLER. No, sir.

Mr. OSTERTAG. May I inquire about collections on A–20 and the relationship between the two figures. You have an explanation of collections under the Federal Power Act and from other sources on A–23, including annual fees for licensed projects, et cetera. What is the difference? Is the table or listing of collections on A–20 associated with this other?

Mr. SWIDLER. I do not believe that this trust account is included in the totals on page A–20.

Mr. THOMAS. We should have a breakdown of who is paid what. How many items are involved here?

Mr. OSTERTAG. Their figures do not jibe. There is no way of telling what part of your general collections on A–20—that is general receipts. Then on A–21 you have special receipts. Then you have your collections, trust accounts, on A–22. Then you have a total summary here, or at least an explanation of collections, FPA, from "Other sources." I think there must be some connection but it is not clear.

Mr. SWIDLER. I don't think this is presented as well as it could be. If you will permit we shall make part of the record a new table which will try to organize these figures a little more understandably.

(The information supplied follows:)

Explanation of Federal Power Commission collections in 1962—General, special, and trust accounts

1. SOURCE OF FUNDS

Annual fees from licensees:	
Cost of administering pt. I of the Federal Power Act	$1,164,780
Collections for use of Federal lands	155,876
Collections for maintenance of navigation	307,455
Collection for use of Indian lands	687,674
Penalties and other	2,168
Subtotal, annual fees from licensees	2,317,953
Headwater benefit payments	168,221
Sale of publications and miscellaneous services	38,247
Repayment to the United States for cost of remedial works at Niagara River	6,492,789
Total collections	9,017,210

2. APPLICATION OF FUNDS

Credited to "Miscellaneous receipts," U.S. Treasury:	
Cost of administering pt. I of the Federal Power Act	$1,164,780
Portion of collection from projects on Federal lands	19,485
Portion of collection for maintenance of navigation	153,727
Penalties and other	2,168
Headwater benefit payments	168,221
Sale of publications and miscellaneous services	38,247
Repayment to the United States for cost of remedial works at Niagara River	6,492,789
Subtotal, miscellaneous receipts	8,039,417
Payment to various States (37½ percent of collections from projects on Federal lands)	58,453
Payment to reclamation fund from collections from projects on Federal lands	77,938
Special fund for Department of the Army to maintain navigation	153,728
Collection for the use of Indian lands	687,674
Total payments	9,017,210

HYDROELECTIC PROJECTS

Mr. THOMAS. What is the average fee for a license project and what is the average amount for headwater benefits? What is the total number of companies involved?

Mr. SWIDLER. There are 49 river basins. We have made a start in only a few so far. We are planning now on the basis of the simplified procedure to make a start in fiscal 1964 on determining headwater benefits in every basin.

Mr. THOMAS. How many installations are there under your jurisdiction for power purposes?

Mr. SWIDLER. My recollection is that there are about 300 major hydro projects.

Mr. THOMAS. I do not think it is set out in the justifications.

Mr. SWIDLER. That is right.

Mr. THOMAS. The total is 300. The major ones number considerably less than that. Can you break it down between the total and major and minor, and also give us an indication of the breaking point?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. Do you have a map showing this?

Mr. SWIDLER. There is a table showing that, table No. 1 in our annual report, which lists all the projects under major license. It runs almost six pages.

Mr. THOMAS. We have it in the justification. We shall get to it in a moment. That never has been put in hearings and it might be well to put it in.

On page D–14, number of river basins 49. Headwater reservoirs, 128 Federal, 57 licensed, total 185. Projects benefited, Federal 40, 282 non-Federal, total of 322.

In the 49 river basins, total number of installations is 322, and out of that there must be less than 75 major projects. Insert your table of projects at this point in the record.

(The table referred to follows:)

TABLE No. 1.—*Projects under major license, June 30, 1962*[1]

Project No.	Licensee	Stream	Installation (horsepower)	
			Present	Ultimate
	Alabama:			
82	*Alabama Power Co.	Coosa River	101,000	101,000
349	*†....do	Tallapoosa River	213,000	213,000
485	†Georgia Power Co.	Chattahoochee River	94,500	94,500
618	*†Alabama Power Co.	Coosa River	144,000	180,000
2102	†Warrior River Electric Coop.	Locust Fork of Black Warrior River.	----------	190,600
2146	*†Alabama Power Co.	Coosa River	189,000	695,100
2165	*†....do	Black Warrior River and Sipsey Fork of Black Warrior River.	111,500	286,000

Mr. SWIDLER. If you look at page D–11 it shows projects requiring inspection at the start of the year. It shows 282 projects.

Mr. THOMAS. Those are numbers.

Mr. SWIDLER. Numbers of projects. I thought you were interested in that. It would increase to 314 by the beginning of fiscal year 1964.

Mr. THOMAS. All of them require some attention. If not the case falls flat on its face. How are you going to justify the expenditure of money unless you are going to work on them?

Mr. SWIDLER. I was trying to supply the totals. I thought you were interested in them.

Mr. THOMAS. We are. The 322 is the figure?

Mr. SWIDLER. Yes.

Mr. THOMAS. How many will you add this year? I do not refer to alterations and additions but new installations.

Mr. SWIDLER. In 1964 there will be 38 additional projects.

Mr. THOMAS. What do you mean by projects? That is not a new installation; is it?

Mr. SWIDLER. Yes, sir; a new project or existing project brought under license.

The number of projects requiring inspection jumps from 284 at the beginning of 1963 to 314 at the beginning of 1964.

Mr. THOMAS. The number of inspections performed shows the total. Projects inspected number 303, total 352.

Projects added during the year are 38.

Mr. SWIDLER. That is right. It is the middle column.

Mr. THOMAS. That does not mean it is a completely new installation. It could be you added a new turbine.

Mr. SWIDLER. These are all individual projects.

Mr. THOMAS. Where are they located, Judge Brown?

Mr. BROWN. I have a list of projects under consideration for license.

Mr. THOMAS. Put your finger on it when we get to it.

COLLECTIONS

Mr. OSTERTAG. Before you leave the subject of collection, I would like to raise one general question in regard to it. Why do you fail to set forth the entire revenue, the entire collections, of the Federal Power Commission under the several acts to which it might have a relationship? There are some forms of income you have shared with the States, also. Is that true?

Mr. SWIDLER. Yes, sir.

Mr. OSTERTAG. It would seem to me that a regular table of receipts and expenditures would be in order in this justification. I have glanced through a number of the activities in this field but I am unable to grasp a clearcut picture of overall revenues.

This money is not revolving in any sense of the word. It goes to the Treasury of the United States; does it not?

Mr. SWIDLER. Yes, sir.

Mr. OSTERTAG. If we have never had it up to now it seems to be time to have it.

Mr. THOMAS. Put it all together for us next year.

He sets out payments to States, $68,000, and so on.

What Mr. Ostertag wants to have is it all tied together on one sheet.

Mr. SWIDLER. We shall be glad to do it. I do want to emphasize, Mr. Ostertag, that we are not like TVA, for example, an agency which attempts to balance income against expenditures.

Even this income we show here for benefits from headwater improvements is not income we earn but a result of the investments made by the Corps of Engineers and the Bureau of Reclamation.

However, I do think we could have a more meaningful table which would show what money does comes in from our various responsibilities.

Mr. OSTERTAG. And the distribution made with regard to allocation to the States, for example?

Mr. SWIDLER. Yes, sir.

Mr. OSTERTAG. I notice, too, that there is one item of repayment to the United States for the Niagara project. That was $6,493,000 in 1962. Now it is down to $35,000. What has happened in this case?

Mr. SWIDLER. This is not an annual payment for headwater benefits but a compensation for a special activity carried on by the United States for the benefit of the State project.

Mr. OSTERTAG. You are budgeting $35,000.

Mr. SWIDLER. I don't know why it is broken up in that way.

Mr. TRAINOR. That will be the annual payment.

Mr. OSTERTAG. There is an annual payment of $35,000?

Mr. TRAINOR. That is right.

Mr. SWIDLER. The big payment is nonrecurring.

NATURAL GAS INDUSTRY

Mr. THOMAS. Insert B–1.

(The page referred to follows:)

SECTION 1. NATURAL GAS INDUSTRY

This activity includes the Commission's entire responsibility for regulation of the natural gas industry. Experience for the past year, positions and salaries approved for the current year, and estimates for the budget year are as follows:

Fiscal year	Positions	Salaries
1962	519	$3,877,214
1963	675	5,062,700
1964	750	5,848,700

Summary tabulations showing workload and/or position requirements in support of the positions estimated for fiscal year 1964 appear later in the budget estimate following the introductory statement for each activity.

All of the total increase of 75 positions requested for fiscal 1964 will be assigned to producer regulation. The accomplishments of the past year afford a reasonable basis for our belief that with the additional staff we are requesting genuinely effective regulation of the natural gas industry can be attained. This natural gas budget estimate is tied, in part, to the planning reflected in the fiscal year 1963 budget which was the first for which the new membership of the Federal Power Commission took responsibility. It translates that planning into programs based upon newly established policies, procedures, organization, and staffing. The conditions for effective regulation are much improved and this budget reflects the Commission's determination to eliminate swollen backlogs and bring order to the dispatch of the Commission's work.

GAS ACTIVITIES

Mr. THOMAS. Let me read page B–2.

To carry out the regulation of the natural gas industry under the act, the Commission requires enough competent people to examine, analyze—

Et cetera.

The staff is responsible for initiating and conducting investigations to test the reasonableness of rates and other aspects of company operations and make recommendations to the Commission to assure that those operations are in the public interest. The staff must also fully develop the facts and evidence needed in formal cases to assure an adequate record upon which the Commission may confidently rely if it is to arrive at sound decisions in the public interest. Adequate staff is the backbone of effective regulation.

I thought it stated "backbone of the Commission," but it states "of effective regulation."

Experience during the past year shows that the responsibilities of the Commission cannot be discharged in the greatest public interest with the staff presently authorized.

This just puts the staff up there in the place of the Commission.

We have made such progress and we are continuing to strive for even greater productivity from our staff, but as the Senate Appropriations Committee stated, in approving the Commission's 1963 appropriation request: "The committee believes that the Commission's present backlog of natural gas cases is a product of its huge workload and limited staff."

This is all nice reading.

May I read a paragraph from B–5.

REBATES TO RETAIL CUSTOMERS

The Commission has made significant strides toward eliminating the backlog of natural gas pipeline rate cases with 85 pipeline rate cases disposed of since July of 1961. As of December 31, 1962, refunds of $349 million in principal and interest have been ordered. For the first time in years, most pipeline companies have firm rates and a financial status unclouded by staggering contingent refund obligations. Consumers may now expect to receive the refunds to which they are entitled for overcharges which they have paid in their gas bills for years.

You have no jurisdiction over the retailer?

Mr. SWIDLER. No, sir.

Mr. THOMAS. You don't know what price he is charging?

Mr. SWIDLER. No, sir.

Mr. THOMAS. It is not your business, is it?

Mr. SWIDLER. I think maybe it is our business and perhaps we should do more about it to find out. It is not our business to try to fix the retail prices but perhaps it is our business to find out what they are.

Mr. THOMAS. Do you follow up the rebate to their customers?

Mr. SWIDLER. We cannot order rebates. Some distributors may be entitled to hold on to them.

Mr. THOMAS. How can you make this flat statement, then:

Consumers may now expect to receive refunds to which they are entitled for overcharges which they have paid in their gas bills for years?

Mr. SWIDLER. We know a lot of it has been repaid, perhaps the bulk of it. I would think it would be the exceptional situation where a distributor could show it was entitled to keep the refund.

I think all you can ask is that the State commissions——

Mr. THOMAS. I thought you gave the answer to that this morning. You said if they had not got back the money the gas rates would have had to be raised higher.

Mr. SWIDLER. They should be sure there is justification in each case where they are not passed along.

Mr. OSTERTAG. Rate to the consumer is regulated by the State.

Mr. SWIDLER. Occasionally not at all. There are some States which do not regulate——

NUMBER OF PIPELINES UNDER FPC JURISDICTION

Mr. THOMAS. How many pipelines are there under your jurisdiction?

Mr. SWIDLER. About 100 under our jurisdiction. About 150 are engaged in interstate commerce but are exempt because they do all their business in one State.

Mr. THOMAS. How many are intercontinental, in excess of 400 to 500 miles in length?

Mr. SWIDLER. Thirty-two major ones. It accounts for 89 percent of the business. They account for that much of the interstate business.

Mr. THOMAS. That is the only jurisdiction you have, is it not?

Mr. SWIDLER. Yes, sir.

CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

Mr. THOMAS. Insert page B–9 and the top of page B–10 in the record.

(The pages referred to follow:)

A. CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

The following table summarizes the pipeline and independent producer certificate workload and positions used in the past year, estimated for the current year, and projected for the budget year.

	On hand, 1st of year	Number received	Workload	Number completed	Positions	On hand, end of year
1962 ACTUAL						
Pipelines	273	313	586	317	105	269
Independent producers	2,927	1,644	4,571	2,051	58	2,520
Total	3,200	1,957	5,157	2,368	163	2,789
1963 ESTIMATE						
Pipelines	269	329	598	408	145	190
Independent producers	2,520	1,850	4,370	2,700	71	1,670
Total	2,789	2,179	4,968	3,108	216	1,860
1964 ESTIMATE						
Pipelines	190	345	535	420	145	115
Independent producers	1,670	1,950	3,620	2,700	71	920
Total	1,860	2,295	4,155	3,120	216	1,035

The certificate activities include all work under sections 1, 3, and 7 of the Natural Gas Act. Of course, just as with all rate and certificate cases the filings are initiated by the companies and the Commission thus has little direct control over the volume of this activity. Anticipated filings of 2,179 certificate applications in 1963 and 2,295 certificate applications in 1964 are based on our experience and the expected growth of the industry. Our estimates of workload completions are premised on a prompt disposition of anticipated filings and disposal of 2,520 independent producer applications and 269 pipeline applications on hand July 1, 1962. The importance of this activity to the consumers and to the Nation's economy requires immediate reduction of the total backlog of 2,789 cases. Given the staff requested in this budget, we expect to become current in our certificate work for both pipelines and producers by the end of fiscal year 1964. The carryover of cases will then approximate one-third of those received in a normal year, which we consider to be a reasonable cases-on-hand goal.

No increase in positions is requested for this activity for fiscal year 1964, despite the projected increase in both receipts and dispositions. However, we must maintain the staff authorized for the current fiscal year if we are to meet the goals we have set for the ensuing year.

Mr. THOMAS. You show pipeline cases at the beginning of the year of 1962, 273 cases. How many pipelines do you have, large pipelines?

Mr. SWIDLER. 32 big ones.

Mr. THOMAS. They account for 89 percent of the workload?

NATURE OF CERTIFICATION WORKLOAD

Mr. UNNEVEHR. Within that 273 certificate cases, some of the big companies have several proceedings. It is not fair to say that there is a case per company.

Mr. THOMAS. It looks from your figures every time one writes you a letter you put it down here in the justification as a case. That is what I am getting at. You anticipate me.

Therefore these figures are not exactly proper. These are all pipelines you have jurisdiction over. If they want to run a spur of a half mile, they have to come in and get a certificate, do they not?

Mr. SWIDLER. No, sir; not necessarily.

Mr. THOMAS. What do you mean, not necessarily?

Mr. SWIDLER. We have initiated a program of granting budget authorizations where for certain kinds of routine expansions we may grant authorization to make any number of expansions as long as they don't total, say, over so many millions of dollars; so long as no one project is over so many dollars; and as long as they do not involve specified kinds of new service or taking gas from an uncertificated producer. We have tried to identify situations which do not require us to go through a separate processing and which allow us to give blanket authorization.

We do not try to make work.

Mr. THOMAS. The table shows you completed in fiscal year 1962, 317 cases. In those 317 how many did the Commission pass on?

Mr. SWIDLER. All of them.

Mr. THOMAS. In what part, if any, of the 317 change or alter either the opinion of the staff or the hearing examiner?

Mr. SWIDLER. Perhaps a small percentage. I would have to guess. I would say perhaps one-half or two-thirds did not require extensive consideration.

A really complicated certificate case is a very wearing and time-consuming thing.

Mr. THOMAS. How many complicated certificate cases did you have? You completed 317 in 1962.

In 1963 you estimate you will complete 408.

Mr. SWIDLER. I can give you a figure on those in controversial hearings.

Mr. THOMAS. It is universal knowledge that in these cases the Commission rubberstamps verbatim at least 90 to 95 percent of the decisions which the staff sends up to you.

Mr. SWIDLER. No, sir; I don't think that is so.

Mr. THOMAS. What is your figure? If my figure is wrong straighten it out.

Mr. SWIDLER. In the great majority of cases the application will raise no particular problem and it will go through routinely. It will go through the staff as well as the Commission as a routine case. This

is good. There is no reason to puff up and make elaborate something which is——

Mr. THOMAS. Do you sit en banc when you make these decisions?

Mr. SWIDLER. Yes, sir. There are standards we set up. If the case meets the standards we try to put it through in an abbreviated proceeding. If there are no interventions and no opposition it goes through in a hurry with little expense, little delay, and with no more attention than the merits justify.

When you get a really complex hearing where you have great competition for valuable service rights—the right to serve southern California, for example, which is perhaps the most celebrated, or serving the St. Louis market with its expanded requirements—you have competing pipelines coming in and all communities which have a stake one way or the other. You also have all the other competing fuels in the picture. You have the coal people, fuel oil people, liquified petroleum gas people, and then you really have a fantastically difficult and involved case.

Mr. THOMAS. How many of those cases did you have in 1963?

Mr. SWIDLER. I will have to supply that figure. (The figure is 30, 10 percent of the total cases disposed of in 1962.)

Mr. THOMAS. You have a figure of the number completed in 1963 which is somewhat of a guess figure. You show 408.

You show 317 for 1962 and 420 for 1964.

Mr. SWIDLER. I don't know that you can get a sharp line there. There is some gradation. There are some cases which were most difficult and complex. Others required very little time at all.

Even on those which we handle on a routine basis, they all come before the Commission and we look at them as they go through——

Mr. THOMAS. Then why do you need 145 people if they are routine?

Mr. SWIDLER. There is a large amount of study which goes into each of these projects.

Mr. THOMAS. You show an increase of about 30 percent from 1962.

Mr. SWIDLER. This is a large nuumber of cases, sir. It will take a lot of processing.

Mr. THOMAS. Eighty to ninety percent are minor additions.

Mr. SWIDLER. You process them, anyway. If you start rubberstamping you don't know what you have stamped. None are rubberstamped.

Mr. THOMAS. But they are routine cases.

Mr. SWIDLER. I can assure you we give no more attention to a case than it deserves. We are just as anxious as the committee is not to waste time——

Mr. THOMAS. That is the point. I don't think you give any attention to 90 percent of the cases. You depend on the staff and rubberstamp what the staff tells you.

Mr. SWIDLER. The only case where that could occur would be in the noncontroversial cases where everybody is agreed. If there are any issues imbedded we would know about them.

I suppose to a degree we have to depend upon the parties to expose the issues. This is certainly not the case, however, Mr. Chairman, where there has been a hearing and the parties have stated conflicting positions.

In such cases the Commission makes the decision. We have our own analysis made by one of the special assistants and we ourselves look at the record to the extent that time permits. We get the help of staff who are not themselves involved in the proceeding, and we make as intensive a study as we possibly can. We do not automatically accept staff recommendations.

CERTIFICATION OF INDEPENDENT PRODUCERS

Mr. THOMAS. You had 2,900 independent producer cases at the beginning of 1962; you completed 2,000, and you carried over about 2,500.

When you get the Permian Basin area proposition straightened out, what others do you expect?

Mr. SWIDLER. Texas Gulf coast perhaps would be the next, and it might be the Anadarko Basin would come after that. I can't list future proceedings because that has not been decided.

Mr. THOMAS. You had 58 people in 1962, and now you have 71. How complicated is this?

Mr. SWIDLER. In the certifications?

Mr. THOMAS. Certifications of independent producers.

Mr. SWIDLER. Some of these cases are the most complicated that any tribunal has to decide.

Mr. THOMAS. I do not refer to rates.

Mr. SWIDLER. I refer to certificates.

Mr. THOMAS. Why is it so complicated?

Mr. SWIDLER. Take, for example, the service to southern California. In that case we had two of the giants in the industry competing, one on the so-called Pemex project where the gas came mostly from Texas, and the pipeline would go south into Mexico and then come up into California, and to be tied almost exclusively to generating plants in southern California.

The other is the Rock Springs project of El Paso, Tex.

Mr. THOMAS. Have you decided the first case?

Mr. SWIDLER. No, sir; it was finally withdrawn after hearings that went on for years, but they are filing a new case now on a little different basis, a new proceeding.

In the *Rock Springs* case the examiner has handed down his decision. We are about to hear oral argument in that case. That also went on for years, with the other pipelines also involved.

In addition to these two there is Trans-Western which serves the southern California area, which is affiliated with the Gulf Oil Co., and it, too, intervened in both proceedings.

I need not say that the communities in California and all the big distributors were in these cases.

Mr. THOMAS. You are talking about a pipeline case, are you not?

Mr. SWIDLER. Yes.

Mr. THOMAS. I am talking about independent producers.

Mr. SWIDLER. Independent producer certificate cases?

Mr. THOMAS. Yes.

Mr. SWIDLER. I am sorry, sir. I think in independent producer certificate cases the rate question——

Mr. THOMAS. We are talking about a certificate here and not rates. What is so complicated about it? You are making a utility out of them and give them a piece of paper stating they are utilities. You have 71 people doing that.

You are not talking about the rate and why you are getting them into the utility business. What is so complicated about that?

If the Chairman of this distinguished Commission has to turn around and ask his staff how complicated they are and why they are complicated we can take that as an answer.

Mr. SWIDLER. I was consulting with Mr. Unnevehr——

RATE FILINGS

Mr. THOMAS. Insert pages B–10 and B–11 in the record, rate filings. (The pages referred to follow:)

RATE FILINGS

The following table shows the total pipeline and producer rate filing workload and positions in the past year, estimated for the current year, and projected for the budget year.

Fiscal year	On hand 1st of year	Number received	Workload	Number completed	Positions	On hand end of year
1962	1,032	7,765	8,797	7,972	68	825
1963	825	8,155	8,980	8,299	70	681
1964	681	8,545	9,226	8,513	70	713

Under the Natural Gas Act, the Commission must either approve or suspend a rate application within 30 days after its receipt; otherwise, the increase becomes effective automatically. It is therefore essential that sufficient staff be available to analyze and report promptly on each rate filing in order that the Commission may have a sound basis on which to decide whether the rate should be suspended. The Commission has been able to meet this 30-day deadline in the past only by subordinating other activities. The initial investigation of a rate increase is but the first step in the orderly disposition of these cases.

Rate filings, pipelines

Fiscal year	On hand 1st of year	Number received	Workload	Number completed	Positions	On hand end of year
1962	31	1,168	1,199	1,102	22	97
1963	97	1,228	1,325	1,222	24	103
1964	103	1,288	1,391	1,283	24	108

Anticipated filings by pipeline companies of 1,228 in 1963 and 1,288 in 1964 are based on the forecasted steady upward trend in industry growth. A slight increase in both the number of new rate filings and completions is projected for the budget year, with increased efficiency expected to handle this work without any increase in the number of positions requested.

Rate filings, independent producers

Fiscal year	On hand 1st of year	Number received	Workload	Number completed	Positions	On hand end of year
1962	1,001	6,597	7,598	6,870	46	728
1963	728	6,927	7,655	7,077	46	578
1964	578	7,257	7,835	7,230	46	605

Based on previous experience and the expected steady industry growth, we anticipated 6,927 filings by independent producers in 1963 and 7,257 filings in 1964. We expect to handle this increased workload with the same number of staff as for the present fiscal year.

Mr. THOMAS. Look at the break between the independent producers and the pipelines. That is on page B–11.

In 1962 at the beginning of the year you had on hand 31 pipeline rate filings. The number received was 1,168. You completed 1,102.

How many of these were of major consequence? How many did the Commission decide? How many were handled by the staff as a routine matter? Let us have these figures mean something.

Mr. SWIDLER. The Commission decided them all.

Mr. THOMAS. Under the law you decide them. We won't argue about that.

Mr. SWIDLER. The question is how many were involved in controversy?

Mr. THOMAS. How many did the Commission see and know about before they were solved?

Mr. SWIDLER. Every one, sir. On our agenda each one of these cases was listed separately and there is an explanation of the substance of the case and the background. We obviously could not get that information ourselves. It is prepared by the staff.

Mr. THOMAS. You have 32 major pipelines and they constitute 89 percent of the total workload, so out of these 1,102 cases you had 18 or 19 companies, each one with a slight addition here and there, and you listed it here as a big item of workload.

Mr. SWIDLER. No, sir. These required a lot of attention on these rate filings.

Mr. THOMAS. How many cases were decided after oral argument, and what not, by the Commission itself?

Mr. SWIDLER. I can't give you a precise figure.

Mr. THOMAS. What is the best guess?

Mr. SWIDLER. On rate filings I would say very few.

Mr. THOMAS. Independent producers, I assume, is the same answer.

NATURAL GAS RATE REGULATION

Insert page B–12 on rate regulation.

(The page referred to follows:)

C. RATE REGULATION

The following tables summarize pipeline and independent producer rate case workload and positions during the past year, estimated for the current year, and projected for the budget year.

1. *Rate cases—Pipelines and independent producers*

Fiscal year	On hand 1st of year	Number received	Workload	Number completed	Positions	On hand end of year
1962	2,668	547	3,215	194	269	3,021
1963	3,021	618	3,639	1,114	361	2,525
1964	2,525	648	3,173	2,292	433	881

2. *Rate cases—Pipelines*

Fiscal year	On hand 1st of year	Number received	Workload	Number completed	Positions	On hand end of year
1962	116	12	128	46	154	82
1963	82	40	122	73	199	49
1964	49	42	91	62	188	29

3. *Rate investigations—Pipelines*

Fiscal year	On hand 1st of year	Number initiated	Workload	Number completed	Positions	On hand end of year
1963		15	15	10	27	5
1964	5	17	22	13	32	9

If a request by a pipeline for a rate change appears to be excessive or might result in undue discrimination or preference the effective date of the increase is suspended for 5 months and a formal rate case is started. The other rate matters which are classified as rate investigations are based on complaints filed by customers or local regulatory bodies or proceedings instituted by the Commission where existing rates appear to be excessive or where rates and practices appear to indicate undue discrimination or preference.

Mr. THOMAS. This gives you the similar type of information. The figures are large but when you analyze them, as in the other two instances, they do not mean quite what they seem on the surface.

ACCOUNTING FUNCTIONS

Insert page B–17, on enforcement of uniform accounting.
(The page referred to follows:)

D. ENFORCEMENT OF UNIFORM ACCOUNTING

Fiscal year:	*Positions*
1962	10
1963	16
1964	19

The formulation and enforcement of accounting systems which will assure the proper accumulation of costs allowable in a rate case is the key to effective rate regulation. The Commission has developed a uniform system of accounts for the pipelines and enforcement is accomplished primarily in two ways. First, through a review of the accounting practices of pipeline companies, and, second, through the review of their annual financial reports.

An increase of three positions is requested for this activity in fiscal year 1964. Details in justification of this increase are discussed in the following paragraphs.

Mr. THOMAS. You want 19 positions. You have 16 and want to increase it to 19. What is the total number of people——

Mr. SWIDLER. In the accounting division? The Division of Accounts will have 76 positions, plus 27 in the San Francisco office. It is 103 positions.

Mr. THOMAS. What is the nature of the employment? What qualifications do the personnel require? You have a GS–18 as a top accountant. Division of Accounts and Statistics has a 15. What is the background, experience, and training of these people? Are they engineers, economists, lawyers?

Mr. SWIDLER. Professional accountants. Senior people are all professional accountants.

Mr. THOMAS. Is there any overlapping with the economists?

Mr. SWIDLER. No, sir. There are a few economists in the Division of Finance and Statistics working on rate of return studies, for example. It is this division which puts in the evidence in rate cases regarding rate of return.

Mr. THOMAS. What is the total increase requested here for the Division of Accounts, Office of Accounting and Finance?

Mr. SWIDLER. Seventeen.

Mr. THOMAS. It all adds up to 17?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. How many positions do you have now?

Mr. PILCHER. 138.

Mr. THOMAS. Does that include the 27 in the San Francisco office?

Mr. PILCHER. Yes, sir.

Mr. THOMAS. You are seeking an increase of 17 to make it 155?

Mr. PILCHER. That is right.

Mr. THOMAS. How many unfilled jobs did you have here on January 1?

Mr. RAINWATER. Twenty-three, I believe.

Mr. THOMAS. Is this your Division, Mr. Rainwater?

Mr. RAINWATER. Yes, sir.

Mr. THOMAS. Our distinguished friend is still with the Commission. He has been there a long time and does a tremendous job.

How many years of service have you had, Mr. Rainwater?

Mr. RAINWATER. I am in my 27th year now.

Mr. THOMAS. What is your home State?

Mr. RAINWATER. Illinois.

Mr. THOMAS. You have had a long and distinguished career. We hope it lasts at least 40 years more. You were here when I came here.

Mr. RAINWATER. I came in 1937.

Mr. THOMAS. We are of the same vintage.

Good luck to you. I hope you stay another 40 years.

Off the record.

(Discussion held off the record.)

ELECTRIC POWER INDUSTRY

Mr. THOMAS. Let us look at the electric power industry. Insert pages C–1 and C–2.

(The pages referred to follow:)

SECTION 2—ELECTRIC POWER INDUSTRY

This activity includes the Commission's responsibility for the regulation of the investor-owned segment of the electric power industry, except for the licensing of non-Federal hydroelectric projects which is discussed in section D.

Experience during the past year, positions and salaries approved for the current year, and estimates for the budget year are as follows:

Fiscal year	Positions	Salaries
1962	144	$1,126,683
1963	178	1,397,700
1964	216	1,768,500

We are requesting 38 additional positions for fiscal year 1964, 30 for the regulation of rates, 5 for the enforcement of uniform accounting, and 3 for interconnection and coordination studies. Summary tabulations showing workload and/or position requirements in support of the positions estimated for fiscal 1964 appear later in the budget estimate following the introductory statement for each activity.

The Commission's budget request reflects the vigorous leadership it is now exercising in encouraging greater economy of operation in the electric power industry and our increased caseload as we begin to exercise our responsibility to regulate interstate wholesale rates and services. It is anticipated that new cases received or started in fiscal 1964 will exceed the current year total by over 15 percent, and that the total workload will increase by about 21.1 percent. Total completions projected for the budget year are up 30.9 percent compared to that estimated for fiscal 1963.

The electric power industry is the largest industry in the Nation and a cornerstone in the economy of the country. Its stimulation and expansion, and the impact the Commission can make on the efficiency of its operations, are a matter of major national concern. Congress looks to the Federal Power Commission to regulate the interstate aspects of the electric power industry and provide information on all aspects of the industry. The Commission's appropriation request is for the funds to carry out this job vigorously and effectively.

INVESTOR AND NON-INVESTOR-OWNED PROJECTS

Mr. THOMAS (reading):

This activity includes the Commission's responsibility for the regulation of the investor-owned segment of the electric power industry, except for the licensing of the non-Federal and hydroelectric projects which is discussed in section (d).

You caused me a lot of uncomfortable jumping around. What did you mean by "investor owned"?

Mr. SWIDLER. This includes interconnection studies, power survey, what we call corporate regulation, security issue jurisdiction, jurisdiction over interlocking directorates.

Mr. THOMAS. It says "except for the licensing of non-Federal hydroelectric projects."

Mr. SWIDLER. I stated what it included.

Mr. THOMAS. What is the exception?

Mr. SWIDLER. The licensing function is discussed separately, the entire licensing function.

Mr. THOMAS. What are the exceptions to the jurisdiction in licensing?

Mr. SWIDLER. It broadly covers the whole private industry.

Mr. THOMAS. There are some instances in the Rivers and Harbors Division and the Interior Department.

Mr. SWIDLER. Non-Federal are all under our jurisdiction.

Mr. THOMAS. It states, "except for the licensing of non-Federal hydroelectric projects." What are they?

Mr. SWIDLER. I think we are not reading it the same way. What we intended to say is that we are discussing in section (d) the subject of licensing of non-Federal hydroelectric projects.

Mr. THOMAS. I am reading from the top of page C–1. That is your opening statement. It gave me a lot of trouble. It is apparently giving you some.

Mr. SWIDLER. I am reading it. We are trying to say that under the next tab, non-Federal projects, we discuss our licensing functions. We are not discussing it under this tab.

Mr. THOMAS. What are those projects?

Mr. SWIDLER. The Nez Perce-High Mountain Sheep type of thing. They are built by private companies, municipal systems, everything except the projects built by the Bureau of Reclamation. We say "non-Federal" because some licensees are public systems. For instance, Seattle is a licensee, and Tacoma is a licensee, and Arizona Power Authority is one.

Mr. THOMAS. Those are Interior projects?

Mr. SWIDLER. No; public agencies of the State or cities. It would be simpler if we could say regulation of private licensee but this would not be accurate.

With respect to licensing we control——

Mr. THOMAS. How about the investor-owned segment of electric power?

Mr. SWIDLER. I don't know whether you could call Seattle investor owned, or the Arizona Power Authority. I don't know how we can better state this.

Mr. THOMAS. The terminology threw me a curve.

Mr. JONAS. Off the record.

(Discussion held off the record.)

Mr. O'CONNOR. Licensing is a separate section. Statistical and rate functions have to do with the noninvestor owned.

Mr. Ross. I think you could have some organizations not investor owned who might become subject to our jurisdiction if they are involved in the resale of power on a wholesale basis.

Mr. THOMAS. A city or a wing of a State?

Mr. Ross. Or a co-op.

Mr. THOMAS (reading):

Experience during the past year, positions and salaries approved for the current year, and estimates for the budget year are as follows—

And then you show 144 jobs in 1962, 178 in 1963, 216 in 1964.

We are requesting 38 additional positions for fiscal year 1964, 30 for the regulation of rates, 5 for the enforcement of uniform accounting, and 3 for interconnection and coordination studies.

We had 70 for that, did we not? We show only three of them here.

I assume when you finish that power study you will not need those 70 people. Is that true?

Mr. SWIDLER. When we finish the power survey we will transfer many of those people to other activities.

Mr. THOMAS. You are going to need them for activities other than the power survey?

Mr. SWIDLER. The power survey should not be regarded as one shot. Conditions will change rapidly and nothing is more certain than that any study, looking to the future, will become obsolete as conditions change.

Mr. THOMAS. That is why the study. You have to keep it current, make plans this year, tear them up, and start over again next year and make other plans.

Mr. SWIDLER. We should keep in touch with the progress and technology of the industry, and I think continue to exert the Commission's leadership, influence, and direction toward a thoroughly integrated power system in this country, producing power as cheaply as it can be done and making as much of a contribution to low-cost energy sources as improved technology permits.

REGULATION OF RATES

Mr. THOMAS. Regulation of rates. This includes rate filing, rate cases, and rate investigations.

In 1962 you had 15 positions. In 1963 you have 25 positions. In 1964 you show 55 positions.

Except for routine rate-filing work, there was little activity in either rate cases or rate investigations in recent years until the present members of the Commission took office in the past 18 months.

Insert pages C–3, C–4, and C–5 in the record.

(The pages referred to follow:)

A. REGULATION OF RATES

This function includes rate filings, rate cases, and rate investigations.

Positions during the past year, estimated for the current year, and requested for the budget year are as follows:

Fiscal year:	*Positions*
1962	15
1963	25
1964	55

Except for routine rate-filing work, there was little activity in either rate cases or rate investigations in recent years until the present members of the Commission took office in the past 18 months. Plans for the effective exercise of our responsibility for electric rate regulation began at once. The first move was to transfer the electric rate staff, which consisted of a total of four people, from the former Bureau of Rates and Gas Certificates where it was submerged within our natural gas organization, to the Bureau of Power where a new Division of Rates and Corporate Regulation was formed. We found that many if not most of the rates subject to our jurisdiction were not even on file with the Commission and the Commission took action to require the electric utilities to file these rate schedules, which are now being received by the hundreds. We are revising our rules to require electric companies to support these rate filings with cost information to facilitate meaningful Commission review. With these and other actions, by 1964 the groundwork will be complete for the beginning of a comprehensive exercise of our rate regulation responsibility. The essential ingredient is of course the staff to do the work. In 1949, when the industry was about one-third the size to which it has now grown, a staff of about 38 was devoted to electric rate regulation (over 50 percent more than our present staff) and the level of activity at that time was in itself totally inadequate to carry out FPC's responsibilities. The flow of power across State lines has almost tripled in the last decade, from 42 billion kilowatt-hour a year in 1950 to 113 billion in 1961. The National Power Survey will accelerate this trend. The electric rate regulation staff must be rebuilt quickly and strongly if the Federal Power Commission is to shoulder its electric rate regulation responsibilities.

The staff of 55 requested for 1964 will take responsibility for regulating in the public interest the interstate wholesale rates of the largest industry in the United States with 211 million kilowatts of capacity, close to $70 billion of assets, and revenues of over a billion dollars a month. A continuation of the failure of the Commission to exercise its rate regulation responsibilities could have serious consequences. We are entering an era in which electric power can be produced abundantly and at reduced cost from interconnected power pools covering many States. It is essential that power from these tools be made available at wholesale at reasonable rates, and with assurance of supply to the many small utilities both publicly and privately owned whose service areas are not large enough to justify large economical generation of their own. We are seeking the staff to perform that essential function. The absence of assurance of such protection by the FPC will encourage the creation of relatively uneconomic sources of power supply for the smaller entities in the industry. This trend already exists and will continue and accelerate in the absence of competent exercise by the FPC of its rate regulatory jurisdiction.

Rate filings

Actual workload for 1962 and anticipated workloads for the current year and budget year, together with projected filing completions, are as follows:

Fiscal year	On hand 1st of year	Number received	Workload	Number completed	On hand end of year
1962	174	477	651	576	75
1963	75	1,300	1,375	1,200	175
1964	175	1,500	1,675	1,600	75

These workload figures show increases in 1964 over the current year of 15.4 percent in new receipts, 21.8 percent in total workload, and 33.3 percent in total filings processed. We believe these workload estimates are conservative since the first half of 1963 we had received more than 1,100 filings.

Many factors underlie the increase in rate filings from 1962 to 1964. The most important of these is the Commission's program to enforce filing requirements under the Federal Power Act. Too, the industry is becoming more interstate in character and thus more rates are subject to our jurisdiction. Of particular importance is the increase in number and capacity of interstate interconnections to form new and expanded power pools which the Commission's national power survey is encouraging and these filings are of course quite complex. Under these conditions, rate filings are not only multiplying in number but require more intensive analysis as well.

Regardless of the size of the filing workload, the Commission must act within 30 days of the receipt of a rate change filing to exercise its suspension power. It is, therefore, essential that sufficient personnel be available to assure timely analysis and recommendations to the Commission. The number of cases on hand at the end of the year should be held to a reasonable level, generally comprising less than 30 days' processing time.

Mr. THOMAS (reading):

Rate filings: Actual workload for 1962 and anticipated workloads for the current year and budget year, together with projected filing completions, are as follows.

On hand the first of the year, you had 174; you received 477; you completed 576, and carried over to the next year 75.

Just how serious is this? How much work does it entail? Of these 576 cases that you completed, how many were decided by the staff and how many went to Commission hearings? How many major companies do you have in this field of electrical power, and what is the total number of companies?

Mr. SWIDLER. That is a more complex question than you might think, Mr. Chairman. The Commission has never made clear to the industry what companies it thinks it has jurisdiction over. The question how far the Commission's jurisdiction extends is a fairly complex question.

Mr. THOMAS. Let us turn to D–2, under "Licensing," and maybe we can figure out from the table the answer to the question.

NON-FEDERAL HYDROELECTRIC PROJECTS

Insert pages D–1, D–2, and D–3 in the record, under "Licensing."

(The pages referred to follow:)

SECTION 3. NON-FEDERAL HYDROELECTRIC PROJECTS

This activity includes work performed under part I of the Federal Power Act, including licensing, supervision of licensed operations, headwater benefit determinations, and licensed project accounting.

Experience for the past year, positions and salaries approved for the current year, and estimates for the budget year are as follows:

Fiscal year	Positions	Salaries
1962	178	$1,384,261
1963	191	1,482,800
1964	199	1,611,300

The increase in staff of eight positions for this activity will be used to implement our program for speeding the disposition of permit and license applications.

The Federal Power Commission is the custodian of the Nation's hydroelectric resources, with an obligation to assure that they are used in the national interest. Every hydroelectric project of substantial size—except those built by the Federal Government—requires a license from the Commission. The Commission must insure that licensed projects fit into a pattern of effective, comprehensive development of the Nation's water resources and must process license applications with dispatch in order that those projects which are in the public interest can stimulate our economy and add needed capacity to our Nation's power supply.

Pending applications for hydroelectric licenses involve construction costs of approximately $1.8 billion. The supervision of existing licenses presents a steadily increasing workload. The determination of headwater benefits by the Commission must be accelerated. The license project accounting workload is at an alltime high of over 400 cases on hand at the start of the current fiscal year.

In order to cope with this growing workload, and to solve the many and varied problems facing the Commission in this area, it is essential that we have the small increase in staff which we are requesting.

A. LICENSING

This work consists of three principal operations: (1) Processing of permit and license applications, involving by far the largest amount of manpower; (2) unlicensed project investigations; and (3) declarations of intention. The last two operations are concerned with the determination of the Commission's jurisdiction over existing and proposed hydroelectric projects, respectively. The licensing activity also includes the processing of power site land matters and the maintenance of current information on existing and potential water power resources.

The workload and positions during the past year, approved for the current year, and anticipated for the budget year are as follows:

Fiscal year	Workload units on hand 1st of year	Workload units received	Total workload	Workload units completed	Positions	Workload units on hand end of year
1962	203	116	319	109	91	210
1963	210	138	348	146	99	202
1964	202	165	367	160	107	207

The increase of eight positions for fiscal year 1964 is required to expedite pending applications and to process an expected increase in filings resulting from the investigation of unlicensed projects discussed in detail later.

The above figures show an increase of 19.6 percent in new cases in fiscal 1964 over the current year. The increase in positions requested amounts to 8.1 percent.

1. Processing of permit and license applications

This activity includes the processing of applications for preliminary permits and licenses for new construction, and amendments, and other changes in existing permits or licenses. Workload experience in the past year and workload

and completions projected for the current year and the budget year are shown in the following table:

Fiscal year	On hand 1st of year	Received during year	Total workload	Completions during year	On hand end of year
1962	154	108	262	102	160
1963	160	126	286	126	160
1964	160	152	312	136	176

During the past 16 fiscal years, the operating capacity under license has increased 4 times from about 4 million to 16 million kilowatts. The ultimate capacity under FPC license has increased more than fourfold from about 5½ to more than 25 million kilowatts. During the past 10 fiscal years, the ultimate capacity applied for has averaged 4.6 million kilowatts per year, varying from 1.9 to 6.5 million kilowatts per year. Some 6.9 million kilowatts are now under construction or will be under construction by June 30, 1963. The projects constructed under FPC license constitute an important and growing development of the Nation's hydroelectric resources.

There were 160 applications pending at the start of the current fiscal year. Fifteen of these were for permits, 59 for major licenses, 69 for amendments, and 17 for other purposes.

Mr. THOMAS. Certainly you will not have any more rate cases than you have licenses, will you?

Mr. SWIDLER. The two are not really related, because there are an awful lot of companies that operate in areas where there are no hydro possibilities. So, actually our licensing work is limited pretty much to areas where there are good power streams, but rate regulation covers all of the interstate power companies.

Mr. THOMAS. It covers them all. It does not matter whether the juice is produced by waterpower, coal, or whatnot. You have jurisdiction if they go into interstate commerce.

Mr. SWIDLER. If they go in interstate commerce, yes, sir.

Mr. THOMAS. They will have to have a license, will they not, regardless?

Mr. SWIDLER. They do not need a license to go into interstate commerce. There is a big difference between our gas statutes and our power statutes. Under the Natural Gas Act, before a pipeline can be built it comes to us to be certificated. This is not true of the power systems. They build the facilities without need for our approval, and you do not always know how the facilities will be used or what companies are involved in interconnections.

Mr. THOMAS. Let us stay with power now. Just what activities of the power companies are certificated?

Mr. SWIDLER. I do not recall that they require any certificates for any of their activities. There is no certificating function.

Mr. THOMAS. Not even for a hydroelectric project?

Mr. SWIDLER. Except on hydro licenses: yes, sir.

Mr. THOMAS. What part of your total is hydro and what part is steam, let us say?

Mr. SWIDLER. The fact that a licensee operates a licensed project does not necessarily make that company subject to our rate regulation.

Mr. THOMAS. What does, then?

Mr. SWIDLER. The sale of the output in interstate commerce.

Mr. THOMAS. That is it, exactly.

Mr. SWIDLER. At wholesale. This is not always easy to determine.

Mr. THOMAS. If a power company is a steampower company and is engaged in interstate commerce, you regulate its rate but you do not have to put it in business with a license. Is that correct?

Mr. SWIDLER. That is right.

Mr. THOMAS. Suppose it is a hydroelectric and it does no interstate commerce. You do not have to certificate it and you do not fool with its rates?

Mr. SWIDLER. We have to license the hydro project.

Mr. THOMAS. Even though he is not engaged in interstate commerce?

Mr. SWIDLER. Yes.

Mr. THOMAS. If it is built upon a stream that can float a log——

Mr. SWIDLER. Which is susceptible of navigation by judicial standards. We have taken the position that if the output is sold in interstate commerce, the use of the site must be certificated; licensed, that is to say.

Mr. THOMAS. Give us a breakdown, which I cannot find in here, of your total number of units or installations—how many hydro, how many steam, and what number you certificate, what number you do not certificate, and then the sum total engaged in interstate commerce where you regulate them. Those are two sets of figures. Can somebody pull those figures out from the figures presented here?

Mr. SWIDLER. May I say to you, Mr. Chairman, we are now engaged in the Bureau of Power in working up a list of companies that we think are under our jurisdiction for rate purposes. This involves some fairly complex questions, and we are not yet ready to release that list. I can give you a round number, if you like.

(Off the record.)

PRIVATE POWER INDUSTRY SUBJECT TO FPC REGULATION

Mr. THOMAS. What part of the total power supply in the United States is not subject to the jurisdiction of the Commission for rate purposes?

Mr. SWIDLER. If I am correct, Mr. Chairman, in my thinking about what constitutes engaging in interstate commerce, I would say that the great bulk of the private industry, perhaps 90 percent of it, is engaged in interstate commerce and is subject to Federal Power Commission regulation.

Mr. THOMAS. Is there a company in Texas subject to the jurisdiction of the Federal Power Commission?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. Which one?

Mr. SWIDLER. Southwestern.

Mr. THOMAS. Where is it located?

Mr. ROSS. New Mexico and Texas.

Mr. THOMAS. Around El Paso?

Mr. O'CONNOR. The panhandle.

Mr. THOMAS. Are there any other Texas utilities under your jurisdiction?

Mr. O'CONNOR. Yes; Gulf States Utilities, which operates near the Texas gulf coast in the Beaumont area.

Mr. THOMAS. Does that go into Louisiana?
Mr. O'CONNOR. Yes.
Mr. THOMAS. What about the Rio Grande Valley?
Mr. O'CONNOR. The Central Power & Light Co.
Mr. THOMAS. Are their rates subject to your jurisdiction?
Mr. O'CONNOR. Their rates for export are.
Mr. THOMAS. That is only the export rate when it crosses the river. What about the Dallas Light & Power?
Mr. SWIDLER. I do not know. I cannot answer that.
Mr. O'CONNOR. No.
Mr. THOMAS. Houston Light & Power?
Mr. O'CONNOR. No.
Mr. ROSS. What has been a public utility is in process of change. In this interconnection program which private utilities are undertaking, what was heretofore not a public utility may well be a public utility.
Mr. THOMAS. Your study does not make them a public utility if they do not join up with the grid?
Mr. SWIDLER. No, sir. It may take a good bit of litigation yet to demonstrate just where this line is. The Commission in the past has not always asserted its jurisdiction, and a good many companies which were clearly subject to its jurisdiction have not filed their rates with the Commission. There are many cases where there was no effort to demonstrate or exercise jurisdiction.

LICENSING NON-FEDERAL HYDROELECTRIC PROJECTS

Mr. THOMAS. Go back to your licenses. In 1962 you started off with 203 cases.
Mr. SWIDLER. On what page are you, sir?
Mr. THOMAS. That is "Licenses," under D–2. You completed 109 in 1962 and carried over 210, with 91 jobs. What part of that workload of completed cases, 109, were handled by the staff? What part of the 109 went to a hearing before the Commission?
Mr. SWIDLER. All were items that required staff work but they were all considered and decided by the Commission. Three required formal hearings before an examiner.
Mr. O'CONNOR. By hearing before the Commission, do you mean an oral hearing or that the Commission participated in a hearing?
Mr. THOMAS. Written, oral, whatever you want to call it.
Mr. SWIDLER. We frequently have informal reports from our staff on the progress of their work. In a number of these situations, we would have directed it in an informal way on the basis of informal reports, without its having been necessarily the subject of a hearing. Here, too, if there are no objections, if the project seems to be a sound project, if the other Federal agencies involved are satisfied that fish and wildlife interests are protected, that other interests are protected, these things are worked out without the necessity of elaborate and expensive hearings.
Mr. THOMAS. On page D–1, non-Federal hydroelectric projects, your big workload, you had 178 positions in 1962, 191 in 1963, and for 1964 you request 199. We have already followed that with D–2, your licensing, and D–3, also.

UNLICENSED PROJECT INVESTIGATIONS

On "Unlicensed project investigations," let us put this table in the record.

(The page referred to follows:)

2. *Licensed project investigations*

Workload experience for the past year, estimated for the current year and projected for the budget year are shown in the following table:

Fiscal year	Cases on hand 1st of year	Cases initiated in year	Total workload	Completions during year	Cases on hand end of year
1962	48	6	54	6	48
1963	48	10	58	17	41
1964	41	12	53	23	30

We are not requesting an increase in the staff for unlicensed project investigations, in the belief that there will be a large measure of voluntary compliance with our new program.

Section 23(b) of the Federal Power Act, as amended August 26, 1935, provides in substance that no non-Federal entity may construct, operate, or maintain any dam or powerhouse for the purpose of developing electric power across any navigable water of the United States or upon lands of the United States or except under a permit or valid existing right-of-way granted prior to June 10, 1920, or a license under the Federal Power Act.

There are many existing hydroelectric projects that are still operating without a Federal Power Commission license in violation of the Federal Power Act. It is the Commission's responsibility to insure that these projects are brought under license in order to achieve the objectives of the statute.

Mr. THOMAS (reading):

Workload experience for the past year, estimated for the current year and projected for the budget year are shown in the following table.

In 1962, cases on hand, 48. You initiated six during the year. You disposed of 6 and carried over 48. You had 17 jobs in 1963. Where are your salaries on this activity?

We are not requesting an increase in the staff * * *

How many people do you have for this activity?

There are many existing hydroelectric projects that are still operating without a Federal Power Commission license in violation of the Federal Power Act. It is the Commission's responsibility to insure that these projects are brought under license in order to achieve the objectives of the statute.

You say some of these projects are now 38 or 39 and even 40 years of age.

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. They never have paid any fees?

Mr. SWIDLER. No, sir.

Mr. THOMAS. What does the company tell you when you have tried to collect a little money from them?

Mr. SWIDLER. They say, "We don't think we are on a navigable river."

Mr. THOMAS. Do you read to them the Supreme Court case that after a flood if it floats a log, they are under your jurisdiction?

Mr. SWIDLER. We try to do that. Sometimes they say they have special statutory authority. They may have some special act of Con-

gress. There are a variety of reasons that they may give to us why they do not think they need to file.

Mr. THOMAS. Do you have a yardstick on fees that you collect?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. Based on what?

Mr. SWIDLER. It is based upon generating capacity, horsepower.

Mr. THOMAS. Does the statute set out the fees?

Mr. SWIDLER. No, sir. We are about to revise the fees now and increase them.

Mr. THOMAS. I notice you are going to collect about $4 million in 1964.

Mr. SWIDLER. This is not fees. The $4 million is headwater benefits.

Mr. THOMAS. Yes, headwater benefits. How much will you collect for this?

Mr. SWIDLER. My recollection is about a million and three-quarters in 1963 and $4 million in 1964.

COLLECTIONS FROM LICENSEES

Mr. THOMAS. Put page D–12 in the record, on collections from licensees.

(The page referred to follows.)

ANNUAL CHARGES COLLECTED FROM LICENSEES

Section 10(e) of the Federal Power Act provides for the collection of annual charges for various purposes from non-Federal hydroelectric projects in operation. Total collections from licensed projects, and the amounts included for the cost of administering part I of the act are shown in the following table.

	Total	Administration of pt. I
Fiscal year 1962, actual	$2,317,000	$1,165,000
Fiscal year 1963, estimated	2,142,000	1,389,000
Fiscal year 1964, estimated	2,190,000	1,460,000

The Commission is acting to increase the assessment of annual charges under licenses (other than State and municipal) for projects of more than 100-horsepower installed capacity to make sure that they completely cover the actual costs of administering part I of the act. In recent years charges for this purpose have not been sufficient to recover the full cost of administering the licensing function. The action now being taken will assure that annual charges hereafter fully cover the appropriate administrative costs as intended by the Congress.

Mr. THOMAS (reading):

Section 10(e) of the Federal Power Act provides for the collection of annual charges for various purposes from non-Federal hydroelectric projects in operation. Total collections from licensed projects, and the amounts included for the cost of administering part I of the act are shown in the following table.

Administration of part I, $1,165,000 in 1962. It looks as if you collect about $1.1 million. Is that correct?

Mr. SWIDLER. As you know, there are many kinds of collections that we make, but for administering part I, we will get almost a million and a half in 1964.

Mr. THOMAS. From licensees?

Mr. SWIDLER. From licensees, $1,460,000. We also collected amounts for the Indian trust fund.

Mr. THOMAS. What part do they get, the same part the State gets?

Mr. CASHELL. No, sir. They get just what is designated for use of Indian lands.

Mr. THOMAS. How much is that? Normally, the States get about a third, do they not?

Mr. TRAINOR. Thirty-seven one-half percent.

FEDERAL RIVER DEVELOPMENT PROJECTS

Mr. THOMAS. Let us take a look at Federal projects, river basin surveys. Put E–1 and E–2 in the record.

(The pages referred to follow:)

SECTION 4—FEDERAL RIVER DEVELOPMENT PROJECTS

This activity relates primarily to the Commission's responsibilities in connection with the power aspects of river developments projects proposed by the Corps of Engineers and the Bureau of Reclamation.

Positions and salaries during the past year, approved for the current year, and requested for the budget year are shown below:

Fiscal year	Positions	Salaries
1962	44	$363,198
1963	48	412,500
1964	48	426,500

No increase in positions for this activity is requested for fiscal year 1964.

Under requirements of the Flood Control and River and Harbor Acts, the Commission cooperates with the Corps of Engineers in studies of proposed projects and makes recommendations to the Secretary of the Army with respect to safeguarding the hydroelectric power potential of such projects. Similarly, the Commission cooperates with the Bureau of Reclamation and makes recommendations, under provisions of section 4 of the Federal Power Act, with respect to reclamation projects.

The Commission also reviews proposals by the Department of the Interior for sale of hydroelectric power for projects constructed by the Corps of Engineers. This review provides the basis for Commission approval of rates called for under the Flood Control Act of 1944 and other acts.

Other related work under this section includes cost allocations, participation in interagency activities, and response to requests for information and assistance from Congress and from other agencies. The allocation work provides a basis for approval of Federal project power rates and cost information needed in making headwater benefit determinations.

COOPERATIVE STUDIES AND RECOMMENDATIONS

The Commission participates in the formulation of Federal reservoir projects by serving, with respect to power features, in the role of power consultant and adviser to the construction agencies which have primary responsibility for detailed investigations and construction of the projects. Based on these cooperative studies, the Commission formulates its recommendations with respect to power facilities in Federal plans for river basin development.

The workload for cooperative studies and recommendations under the Flood Control and River and Harbor Acts and the Federal Power Act is as follows:

Fiscal year	On hand 1st of year	Units received	Workload	Units completed	On hand end of year
1962	73	42	115	57	58
1963	58	62	120	40	80
1964	80	45	125	40	85

A workload unit is defined as an investigation or study undertaken by the Departments of the Army or Interior, in which the Commission cooperates. Thus, the Commission's workload on Federal project investigations is geared primarily to activities of the Corps of Engineers and the Bureau of Reclamation. A workload unit is considered as completed when a report of investigation has been completed by the construction agencies, and transmitted to the Commission and formal comments and recommendations have been made thereon to the reporting departments.

Mr. THOMAS. You had 44 jobs in 1962, against 48 in 1963 and 48 in 1964. This does not include your regional offices?

Mr. SWIDLER. Yes, sir, it does.

Mr. THOMAS. This is the total expense including your regional offices. What part of these 48 jobs are in the District of Columbia and what part are in the field?

Mr. SWIDLER. I think most of them are in the field. This is on a functional basis. The work is divided between the field and the District.

Mr. THOMAS. You have about 160 people in the field. Are they separate and distinct from these?

Mr. SWIDLER. No, sir. They include some of these. Some of the work in the field is on Federal projects, some in connection with licensed projects, some on various other power matters.

BONNEVILLE POWER RATES

Mr. THOMAS. Next to the bottom paragraph on E–1:

The Commission also reviews proposals by the Department of the Interior for sale of hydroelectric power for projects constructed by the Corps of Engineers. This review provides the basis for Commission approval of rates called for under the Flood Control Act of 1944 and other acts.

Does this cover the Bonneville rates?

Mr. SWIDLER. Yes, sir.

Mr. THOMAS. You stated this morning that some of those utilities out in that section of the country had to raise their rates to meet a break-even basis or else they would be in trouble.

Mr. SWIDLER. I said Bonneville either had to get more money or raise its rates; yes, sir.

Mr. THOMAS. Do you mean by that, those utilities out there now are operating on a losing basis?

Mr. SWIDLER. Bonneville is not presently making its costs.

Mr. MORGAN. May I comment on that? Bonneville over a period of years has built up about a $70 or $75 million cushion representing the amount by which they were ahead of their payout requirements for the repayment of the investment.

Mr. THOMAS. What was the total investment cost? It was about 21 or 22 years ago that it was built.

Mr. MORGAN. When I refer to Bonneville, I am not referring to Bonneville Dam. I am referring to the Bonneville Power Administration, which is the marketing agency for all the Federal dams in the Columbia Basin. The original dams were built at depression construction prices or costs. They were very economical, enabling Bonneville to establish a basic rate of $17.50 a kilowatt-year. The more recent dams built around the time of the Korean war, and since, have been much more expensive to build. We have, of course, put a strain on that low kilowatt-year price, with the result that in the last 4 years, I believe, the cushion of $75 million has been depleted and probably will be totally depleted in about 2 more years. Bonneville is not behind schedule on payout and is not operating in the red, but the cushion is disappearing. If a way to secure additional revenues is not found in the next 2 years, they may be faced——

Mr. THOMAS. Have they raised their rates in the last 15 or 20 years?

Mr. MORGAN. The rate has never been changed since it was originally established. If additional revenues are not discovered, they may be forced, not as a result of mismanagement or anything of that kind, but by the high cost of the recent construction, to increase the original rate.

Mr. THOMAS. It is remarkable they have not raised their rates in 25 years.

Mr. JONAS. Can the Commissioner tell me anything else that has not increased in the last 15 years?

Mr. MORGAN. No, sir.

Mr. JONAS. Power continues to be the best bargain the American consumer has. Is that not true?

Mr. MORGAN. I do not know of any better, sir.

Mr. BOLAND. What do you expect?

Mr. MORGAN. There has been quite a controversy about that. There is a great surplus of power that can be produced in the summertime, because of the annual summer runoff of the river. This is not needed or salable in the Pacific Northwest——

Mr. THOMAS. What about the $75 million high-line down the coast?

Mr. MORGAN. The peak demand for power in the Northwest is in the wintertime. The peak demand for power in California is in the summer.

Mr. THOMAS. They are going to get together, are they not?

Mr. MORGAN. A plan to do this on an orderly basis which satisfies the mutual demands of both sections must be worked out before it can be done.

Mr. BOLAND. This is the only way in which we will get additional revenues from Bonneville, apparently.

Mr. MORGAN. It seems to be the only way in sight now.

Mr. THOMAS. You have a fast-growing country out there. You can raise the rates a little bit and keep everybody happy and keep going, too.

Mr. MORGAN. It will make people happier in other regions than in the Northwest, sir.

Mr. BOLAND. Particularly New England.

Mr. O'CONNOR. I would like to add, gasoline has not increased in price in the last 30 years.

Mr. JONAS. Gasoline has not? I pay 37 cents a gallon for it.

Mr. O'CONNOR. The tax has increased, not the price of gasoline.

(Off the record.)

Mr. JONAS. Actually, gasoline is cheaper now than it ever has been, if you eliminate the tax. Is that not true?

Mr. O'CONNOR. It varies, but I would say it is considerably better. On the combination of price and quality, the consumer is paying less.

Mr. JONAS. If you could get rid of that old item of tax, we could really get the cost of living down.

(Off the record.)

Mr. THOMAS. This is all good reading, gentlemen. We have had it year in and year out, but it is changed a little bit. It is still interesting.

COORDINATION IN RIVER BASIN DEVELOPMENT PLANS

Mr. BOLAND. I am looking at the very last page, E–6, "Comprehensive river basin development plans." There is no money in this budget for additional positions in 1965. The Corps of Engineers, as you know, is engaged in this kind of effort also, real comprehensive river basin development plans. You are not expecting to overlap with the corps, are you?

Mr. SWIDLER. We would try not to make this a competitive activity at all, but only to have within our own organization some standard. As it is now, when the license application is filed, we have no plan of development to measure the application against to know whether it fits with a comprehensive development of the river or not. Frequently we do not put in testimony on that ourselves because we do not have the overall basin plans it is related to. Other agencies of the Government do not come in with testimony. So, there are big holes in the record. If we are to plug the holes and be able to find the right answer on the record, we must have greater competence on river basin development within our own organization.

I want to assure you, Mr. Boland, that we will make full use of the studies of the Corps of Engineers as well as of the Bureau of Reclamation and other Federal construction agencies. This is for the most part an office study based upon the work done by the other agencies.

Mr. BOLAND. Do you find their plans are just as comprehensive as yours would be in a particular river basin?

Mr. SWIDLER. I do not know what we will find, but I suspect we will find some inconsistencies among the comprehensive plans prepared by different agencies, depending upon their institutional problems.

Mr. THOMAS. Mr. Boland, you work with this subject all the time. Any way you look at it, by any measurement you want to use, you have Interior, this group, and then the Corps of Engineers doing identically the same thing in the same area, working on the same stream.

Mr. BOLAND. One of the questions is whether or not they do the identical work. I presume they do, because the plans of the Engineers are comprehensive, certainly. They take in the question of the amount of power and the power potential of a river basin. I presume you use their studies?

Mr. SWIDLER. Yes, sir, we will make full use of their studies.

ADMINISTRATION

Mr. BOLAND. Mr. Reporter, put in page F–1, under administration.

(The page referred to follows:)

SECTION 5—ADMINISTRATION

This activity includes the work of the members of the Commission and their immediate staffs, the Office of the Executive Director and the Office of Personnel. Budget and fiscal management; organization and methods studies and management analysis; and library, procurement, property, records, messenger and related administrative services performed by the Office of Administration are also charged to this activity.

The following tabulation shows the staff and salary costs for administration for the past year, the current year and the budget year and their relationship to Commission totals.

Fiscal year	Positions			Salaries		
	Total	Administration	Percent	Total	Administration	Percent
1962	963	78	8.1	$7,332,545	$581,189	7.9
1963	1,178	86	7.3	9,070,000	714,300	7.9
1964	1,299	86	6.6	10,395,000	740,000	7.1

Although there is an increase in the overall Commission positions from 1,178 to 1,299, no increase in positions is proposed for administration for the fiscal year 1964.

Mr. BOLAND (reading):

Although there is an increase in the overall Commission positions from 1,178 to 1,299, no increase in positions, is proposed for administration for the fiscal year 1964.

OTHER OBJECTS OF EXPENSE

Let us turn to G–1, Other Objects. The increase, as you have indicated, in personnel is $1,325,000.

In Rent, Communications, and Utilities, there is an increase of $142,600,

Insert in the record G–1.

(The page referred to follows:)

Summary of other object classes

	Estimate, 1963	Estimate, 1964	Increase (+) or decrease (−)
11 Personnel compensation	$9,070,000	$10,395,000	+$1,325,000
12 Personnel benefits	688,400	787,200	+98,800
21 Travel and transportation of persons	520,000	520,000	----------
22 Transportation of things	28,700	15,000	−13,700
23 Rent, communications, and utilities	217,000	359,600	+142,600
24 Printing and reproduction	117,700	129,000	+11,300
25 Other services	165,000	284,700	+119,700
26 Supplies and materials	97,000	115,600	+18,600
31 Equipment	122,200	118,900	−3,300
Total	11,026,000	12,725,000	+1,699,000

NOTE.—Justification of object classifications are detailed in the following text.

Mr. BOLAND. Why do we have such a large increase in rent and utilities?

Mr. SWIDLER. Of course, with more people, we will need more space. I think the cost of our space is also going up. GSA bills us.

ADP RENTAL

Mr. THOMAS. You have an item, too, for EAM and ADP.

Mr. BOLAND. $160,000 for EAM and ADP.

Mr. PILCHER. We shall find it necessary in 1964 to move a little farther in ADP operations in order to handle the mass of data on the gas industry in connection with the area prices.

Mr. THOMAS. We understand that is the purpose of it. Are you renting it from General Services Administration?

Mr. PILCHER. No, sir. This is rent of automatic data processing equipment.

Mr. THOMAS. General Services will operate it for you, will they not?

Mr. PILCHER. No, sir. We would rent this from whatever supplier meets our bid specifications.

Mr. THOMAS. And you will operate it yourself? You will not use equipment the GSA has?

Mr. PILCHER. No, sir. We will use equipment rented from suppliers, and operate it ourselves.

SPACE RENTAL

Mr. BOLAND. Where is your additional space?

Mr. PILCHER. That is on page G–10.

Mr. BOLAND. Where is the actual physical location of the space?

Mr. PILCHER. Under our procedure, we provide sufficient funds in our budget to pay GSA for whatever space they provide us. It would be in Washington.

Mr. THOMAS. For the first year.

Mr. PILCHER. For the first year. After that, it is included in the GSA budget and we no longer budget for it.

Mr. THOMAS. What are you allowing yourself per square foot for it?

Mr. PILCHER. Six dollars a square foot.

Mr. THOMAS. Which building do you get for this?

Mr. SWIDLER. So far, we have got the cats and dogs on buildings, sir. We are hoping to move most of our staff into the new Federal Building No. 9.

(Off the record.)

Mr. BOLAND. On page G–12, printing and reproduction is up $12,300. The largest increase is in publications. Do you need all these publications?

Mr. SWIDLER. These are the bread and butter of the whole utility and regulatory field, Mr. Boland.

OTHER SERVICES

Mr. BOLAND. Other services are up $119,700. Where is the big jump there? That is the ADP?

Mr. Ross. That is ADP; yes, sir.

Mr. BOLAND. Put in G–15.

(The page referred to follows:)

25—Other services

Item	1962 actual	1963 estimate	1964 estimate
Maintenance and repair of equipment	$7,725	$8,000	$8,000
Construction and alteration	27,276	7,300	7,300
ADP—Consulting and contract service	26,168	118,200	237,200
Service pins and plaques	603	500	500
Security investigations	4,900	11,500	12,500
Health services	6,181	8,300	9,000
Advertising	1,176	1,500	1,500
Hire of laborers	2,145	1,700	1,700
Transfers to other agencies		2,000	
Employees training program	4,637	6,000	6,000
Entertainment expenses			1,000
Total	80,811	165,000	284,700

The amount requested for fiscal year 1964 represents an increase of $119,700 over funds available for fiscal year 1963. The items requiring additional funds are as follows:

An estimated $237,200 will be required in 1964 to meet charges, other than equipment rental, incident to the automatic data processing program. The amount requested will provide the necessary funds to: (a) prepare the physical installation site for an electronic computer, including modification of air conditioning, installation of false flooring, and auxiliary construction ($20,000); and (b) ADP consulting and contract services including the rental of machine time on large electronic computers to process highly involved engineering, geological, and mathematical programs related to the electric power and natural gas areas which are beyond the capacity of the general purpose type computer planned for the Federal Power Commission ($217,200).

EQUIPMENT

Mr. BOLAND. Put pages G–17, 18, 19, and 20 in the record.

(The pages referred to follow:)

31—Equipment

Item	1962 actual	1963 estimate	1964 estimate
Office machines	$21,188	$48,000	$41,000
Office furniture	43,210	31,800	22,900
Filing equipment	6,091	8,900	6,800
Duplicating equipment	8,919	21,000	32,500
Library publications	7,590	7,600	8,100
Miscellaneous	3,932	4,900	7,600
Total	90,930	122,200	118,900

A total of $118,900 is requested for equipment for 1964. This represents a decrease of $3,300 below 1963 requirements. The needs are discussed below in the same order as listed above.

1. OFFICE MACHINES

The sum of $41,000 is requested in 1964 to (a) continue the program of replacing old and wornout typewriters, calculators, and adding machines at

a cost of approximately $22,400 which represents no increase over 1963, and (b) purchase of additional typewriters, calculators, and adding machines, at a cost of approximately $18,600 to meet the needs of the additional staff requested for 1964. Under the established replacement program 43 typewriters, 10 calculators, and 7 adding machines will be purchased as replacements in 1964. To meet the needs of the additional staff for 1964 it will be necessary to purchase an additional 23 typewriters and 15 calculators.

2. OFFICE FURNITURE

A total of $22,900 will be required in 1964 for the purchase of office furniture. This amount will provide for (a) the continuation of the Commission's program for replacement of old and wornout items at a cost of $9,700, and (b) the purchase of furniture for the additional staff in 1964 at a cost of $13,200. Specifically, the amount requested will provide for the purchase of 100 desks ($9,400), and 100 chairs ($3,800).

3. FILING EQUIPMENT

The $6,800 requested for this item in 1964 will provide funds for the purchase and installation of 111 sections of vertical steel filing shelves and constitutes a decrease of $2,100.

The purchase of filing shelves is releasing steel filing cabinets to accommodate the filing of additional material growing out of increased activity both in Washington and in the field, and particularly as relating to rate and licensing matters.

4. DUPLICATING EQUIPMENT

A total of $32,500 is requested for the purchase of duplicating equipment in 1964 and represents an increase of 11,500 over funds available for 1963.

The Commission must have maximum production from its duplicating equipment for the dependable and timely issuance of Commission orders, opinions, rules, notices, briefs, hearing exhibits and decisions, staff recommendations, and required reports. To maintain production schedules, to conserve manpower, and to decrease vital machine "down time" so often costly to the Commission, the public, and the regulated utilities, it is necessary that obsolete duplicating equipment be replaced.

Based on the most urgent need, actual condition, estimated repair costs and the depreciation formula of the Joint Committee on Printing, the following duplicating equipment will be required during the budget year:

(*a*) A small offset duplicator (10½- by 16-inch size) needed to assist with the workload increases assigned to the 14- by 20-inch Little Chief presses ($5,000).

(*b*) A large offset press (17- by 22-inch size) to replace a "Little Chief," 14- by 22-inch size, in continual operation since 1953 ($12,500).

(*c*) A hydraulic lift to handle large skids of paper with a minimum of manpower and less hazard to the plant personnel ($2,000).

(*d*) A small automatic cutter to cut rolls of photostatic prints made on our Reco photocopy machine. This machine will eliminate time-consuming hand cutting ($3,000).

(*e*) A large offset roll film camera (24 by 24 inches) to replace the present camera purchased in 1941, and now in poor operating condition ($10,000).

5. LIBRARY PUBLICATIONS (BOUND VOLUMES)

A total of $8,100 will be required in 1964 to provide for the purchase of bound volumes of timely and essential reference material. This material comprises lawbooks and associated volumes which pertain to such technical subjects as are required in the daily functions of the Commission in supplying information to the Commission and the staff. The amount requested represents an increase of $500 over 1963 requirements and is based on past procurement experience.

6. MISCELLANEOUS

A total of $7,600 will be required for purchase of such miscellaneous items as briefcases, footlockers, wastepaper baskets, bookcases, coatracks; and control panels, wires, separators, bursters, and storage cabinets appurtenant to the additional ADP equipment requested. The amount requested constitutes an increase of $2,700 over funds available for 1963.

OFFICE FURNITURE

Mr. BOLAND. For "Office furniture," you require $22,900. Does this anticipate moving into the new building?

Mr. SWIDLER. Yes, sir. I do not think we contemplate buying ourselves a lot of new furniture. We will move over what we have. We have some expansion.

Mr. THOMAS. You are providing for it in this budget, are you not? How old is your furniture?

Mr. SWIDLER. I do not know. Of course, we are one of the older agencies. Some of it is in pretty bad shape. As far as changing the furniture, that is the least of our problems. Our problem is finding a place to put people and keep them close enough so we can maintain some kind of administrative control. We need to improve our ability to control our staff and, of course, as you all know, it is a much easier thing to do if you have them near you so you can follow up.

Mr. THOMAS. Put your staff over in the new building and leave the Commission over in the old building. Can you do that?

Mr. SWIDLER. You would save 28 positions.

Mr. THOMAS. Leave 78 over in the old building and put the others over there.

Mr. SWIDLER. You would save only 28 positions.

Mr. THOMAS. They are going to do the work, are they not? What about that, Mr. Boland?

Mr. BOLAND. If they agree with it.

Any questions?

Mr. O'CONNOR. Our "Office furniture" budget is down.

Mr. JONAS. That is because you put on all those extra people last year, 215.

Mr. O'CONNOR. The 215 were put on in the 1963 budget.

Mr. JONAS. But 125 went on in 1962.

Mr. O'CONNOR. Yes.

PROGRESS IN HANDLING CASES

Mr. BOLAND. You certainly reduced the workload this year with the additional personnel you received. This was one of the most controversial agencies in the Government. I remember a long article in one of the leading magazines a few years ago about the stacks and stacks of backlog the Commission was faced with, but you are slowly cutting it down, are you not?

Mr. SWIDLER. Yes, sir. I think if you look in a balanced way at what we have done and what is left to do, I hope you will conclude that in the last year we have made reasonable progress for 1 year.

Mr. BOLAND. You cannot do it without staff?

Mr. SWIDLER. We cannot do it without staff. I think on the pipeline side, we are in good shape. I think I told you last year, and I want to tell you now, on the producers side it is a longer haul. We are about midway in it now. It will take us more time to get out of the woods there. I think we are making good progress in a very difficult and new field of regulation, these thousands of independent producers. I think we are not only making progress in ways that show, but I hope also in ways that perhaps are not so apparent. We are deciding cases on a better record. I think we are exploring more of the collateral problems. We have a better feeling for what we are

doing. I hope we will be building better records in the future and be in better command of our performance.

On the power side, I think for the first time, Mr. Chairman and members of the committee, for the first time the Commission is contributing to the power industry and making a contribution to a more effective power system for this country, working in cooperation with the whole industry.

Mr. THOMAS. We have been throwing away a lot of money if you have not made a contribution.

Mr. SWIDLER. Yes, sir. I think when you look back and see what there is to show for it, sometimes you conclude that it is not very much. We started almost from scratch on the matter of jurisdiction over electric power companies on electric rate matters. We started almost from scratch in this whole field of electric rate regulation. I think previously we had accomplished very little under our authority to encourage voluntary interconnections. We are now, I think, laying the foundation for an effective exercise of our functions that will leave something behind us that others can build on.

RECENT INCREASES IN FPC APPROPRIATIONS

Mr. JONAS. I want to read the following figures into the record, from the committee print, which I assume is correct. You have made some progress in getting rid of the workload which had accumulated, but I remind you that this Commission operated in 1954 on a budget of $4,318,000; in 1960 it had $7,218,000; in 1961, $8,163,500; in 1962, $8,793,000; 1963, $10,700,000; 1964, you are asking for $12,675,000. That is moving pretty fast up the ladder.

Mr. SWIDLER. Let me comment on that, Mr. Jonas, because I think maybe there are some important considerations that bear on that which ought to be kept in mind.

In the first place, during a lot of that period, little, if anything, was done on the producer rate problem. There was, until 1954, uncertainty as to whether the Commission had jurisdiction over the producer rates, and the Commission itself disavowed it. Beginning in 1954, this new responsibility was unloaded on the Commission, and I must say it took several years before the Commission girded itself up to discharge that responsibility. We have one entirely new activity that has come into the picture since that time. We are just beginning to put ourselves in position to carry on that activity.

Another thing I think you need to keep in mind is, of course, general inflation and pay increases. These are not comparable figures. They are not people that you have been giving us. They are dollars. As Congress has passed one pay bill after another, the costs have gone up proportionately.

In order to make any kind of showing under the flood of work that came with the passage of the Natural Gas Act, the Commission's power staff was really—decimated is not the word. That is only one-tenth. We were left in some areas of activity with 9 out of 10 people being diverted from power to natural gas work. If we are to discharge the power responsibilities, we must build back that staff.

Mr. JONAS. As Chairman Thomas mentioned this morning, we have given you 335 new people since 1960. That is a substantial number.

Mr. THOMAS. In 5 years, they have an increase of 50 percent in total personnel, which is pretty good. You folks are working at it.

Is there anything further?
We thank you very much. Good luck to you.

WEDNESDAY, JANUARY 30, 1963.

INTERSTATE COMMERCE COMMISSION

WITNESSES

LAURENCE K. WALRATH, CHAIRMAN
ABE McGREGOR GOFF, COMMISSIONER
CHARLES A. WEBB, COMMISSIONER
BERNARD F. SCHMID, MANAGING DIRECTOR
ERNEST WEISS, ASSISTANT TO THE MANAGING DIRECTOR
J. NEIL RYAN, BUDGET AND FISCAL OFFICER
GEORGE J. LOTITO, ASSISTANT BUDGET AND FISCAL OFFICER
HAROLD D. McCOY, SECRETARY
ROBERT W. GINNANE, GENERAL COUNSEL
MATTHEW PAOLO, DIRECTOR, BUREAU OF ACCOUNTS
VERNON V. BAKER, DIRECTOR, BUREAU OF FINANCE
ASA J. MERRILL, DIRECTOR, BUREAU OF INQUIRY AND COMPLIANCE
GEORGE A. MEYER, ASSISTANT DIRECTOR, BUREAU OF MOTOR CARRIERS
B. E. STILLWELL, DIRECTOR, BUREAU OF OPERATING RIGHTS
ALVIN L. CORBIN, DIRECTOR, BUREAU OF RATES AND PRACTICES
CHARLES W. TAYLOR, Jr., DIRECTOR, BUREAU OF SAFETY AND SERVICE
EDWARD H. COX, DIRECTOR, BUREAU OF TRAFFIC
EDWARD MARGOLIN, DIRECTOR, BUREAU OF TRANSPORT ECONOMICS AND STATISTICS
LEE R. NOWELL, DIRECTOR, BUREAU OF WATER CARRIERS AND FREIGHT FORWARDERS
HIRAM H. SPICER III, CONGRESSIONAL LIAISON OFFICER
WYNNE G. ALLEY, CHIEF MOBILIZATION OFFICER

Mr. THOMAS. Gentlemen, the committee will please come to order. We have the pleasure of having with us this morning the Interstate Commerce Commission, one of our most distinguished and able commissions and one with which the committee has worked with many years. We are certainly delighted to have with us all these distinguished gentlemen. First, the able and distinguished Chairman, Laurence K. Walrath. Mr. McPherson is not here?

Mr. WALRATH. He is ill. The doctor would not let him come out.

Mr. THOMAS. We have our former colleague and genial Commissioner, Abe McGregor Goff, and Commissioner Charles A. Webb.

Are these all the Commissioners here?

I have a very nice and thoughtful letter this morning from Commissioner Herring. He says:

> I regret that a prescheduled trip in connection with *Ex parte 230, Substituted Service—Charges and Practices of For-Hire Carriers and Freight Forwarders* * * * will prevent my attendance at your subcommittee hearing on the budget request of the Interstate Commerce Commission, Wednesday, January 30, 1963.
>
> It is important that all Commissioners be familiar with the matters contained in our budget request and be present at the time of your hearing. However, I feel I must be absent because of the great importance of this investigation and rulemaking proceeding to all modes of surface transportation.

We regret the Commissioner cannot be here. If that is more important than this, we don't bame him for putting first matters first.

Mr. WALRATH. May I comment on that, Mr. Chairman?

Mr. THOMAS. It might be well to explain where the others are. We have been told the Commission over there does less work than any commission in the Government. How often do you people meet?

Mr. WALRATH. We meet regularly.

Mr. THOMAS. What is regularly? How often is regularly? Once every 2 weeks, once a week, or what?

Mr. WALRATH. The scheduled meetings are once every 2 weeks.

Mr. THOMAS. Once every 2 weeks is a hard schedule, isn't it? I get to my office in the morning at 8:30 and leave in the evening at 7:30 and then work about 2 hours at night. A lot of people in other agencies do the same thing.

Mr. WALRATH. That is our schedule, sir.

Mr. THOMAS. Every 2 weeks?

Mr. WALRATH. No, sir. That is our regular conference. We meet far more frequently.

Mr. THOMAS. How often?

Mr. WALRATH. It would vary from week to week.

(Off the record.)

Mr. WALRATH. Mr. Chairman, will you permit an explanation?

Mr. THOMAS. We are all friends here. You can do anything you want.

Mr. WALRATH. I understood you also had a communication from Commissioner Tucker in conection with the Ex Parte 230 case. Some months ago, the entire Commission officially referred that matter for administrative handling to Commissioners Herring and Tucker. The meeting which they are attending had been set and——

Mr. THOMAS. Where is the meeting scheduled to be held?

Mr. WALRATH. The present one is being held in upper New York, I believe. That was set sometime ago.

Mr. THOMAS. We don't expect the Commission to discommode itself. Mr. Clerk, why was this hearing set for this particular day? Were you advised that five Commissioners would be out of town? Was any complaint registered?

The CLERK. I didn't hear any.

Mr. THOMAS. Your record of attending the hearings over here is none too good, anyway, so this is no different from last year or year before last. There is always some excuse. That is perfectly all right

with us. We can get along without them, just as you can get along without us. So, everybody is happy. If it is a matter of little importance to you, we will treat it in the same manner. You can depend on that.

Mr. WALRATH. Mr. Chairman, it is of utmost importance to us.

Mr. THOMAS. This shows it, doesn't it?

Mr. WALRATH. No, sir. Commissioner Tuggle, who I think always attends here, is hearing a very important accident case in which a number of people were killed and which, under the provisions of the law, we are required to attend to. He is for that reason necessarily absent.

Commissioner Murphy——

Mr. GOFF. Wait a minute. Commissioner Tuggle is down in Florida on that hearing. I wish you would state where they are. They are not in town.

Mr. WALRATH. The accident happened in Florida, Mr. Chairman, so the hearing had to be held there. A number of people were killed in that accident. It is a very serious thing. He is endeavoring to find, for the benefit of the Congress and the public, what was the cause of the collision between a Seaboard Air Line train and a truck.

Commissioner Murphy, the former chairman, is in Europe at the request of the State Department to assist the Common Market interests to understand our rate filings and rate practices.

All of these things had occurred, as I said, before we heard of the hearing date here.

Mr. THOMAS. This time of year is a mighty bad time to go over there.

Mr. WALRATH. I think he has frozen to death, sir.

Mr. THOMAS. He had better wait until July or August, when there will be just as many headaches over there. Maybe they will have it going then. Let's get the Common Market going first. Don't get the engine behind the caboose.

Mr. WALRATH. May I come back——

Mr. THOMAS. You can do anything in here.

Mr. WALRATH. Concerning the frequency with which we meet, I would say, based on personal experience, we meet either as divisions or as a Commission in some fashion almost daily. We do work those hours.

Mr. THOMAS. You mean everybody goes down to the office at least daily?

Mr. WALRATH. Yes, sir.

Mr. THOMAS. Good.

Mr. WALRATH. Unless they are out on assignment. If I would not have to clutter your record in order to do so, I could explain what my typical day is.

Mr. THOMAS. You say anything you want to.

Mr. WALRATH. It is just as you describe it, sir. I never worked as hard in my life, and I enjoy it.

Mr. THOMAS. And get less for it.

Mr. WALRATH. Yes, sir. Just as an introduction to what I would like to say to the committee in behalf of the Commission, it is a real privilege and pleasure to appear before you. This is my maiden voyage as the new chairman of the Commission.

Mr. THOMAS. I am sure you are doing a fine job, and we wish you well.

Mr. WALRATH. Thank you for the kind words at the outset.

Mr. GOFF. Mr. Chairman, could I interrupt a little bit? The chairman touched on a matter a little, and I choose to take the chairman's remarks in the facetious spirit that he said them, because I don't think he means that he understands the only time we work is when we have a formal conference.

Mr. THOMAS. Did I say that?

Mr. GOFF. That was the inference I took.

Mr. THOMAS. I can't help how you take it.

Mr. GOFF. It was more or less a joke.

Mr. THOMAS. We are not going to object to your taking anything in this room anyway you want.

Mr. GOFF. I do not feel that we should sit silent when the inference is that we don't do any work except when we meet in conference. I have served in this place here. I have served as a county and a State officer. I have served in a Government department. I see no change in going over to the Interstate Commerce Commission in the time I have to get down to the office in the morning and the time I go home at night. Particularly with the heavy load of cases that the Commission has now, some of the greatest importance, I can say that I work just as hard or a little harder down there now than I have ever worked before.

Mr. THOMAS. Judge Abe, you have always been a hard worker. We can testify to it. We give you A plus.

Mr. GOFF. Thank you very much, sir. And the others the same way.

GENERAL STATEMENT

Mr. THOMAS. Mr. Chairman, if you have a statement for us, we will be happy to listen or you may insert it in the record and ad lib.

Mr. WALRATH. I will insert it in the record if I may and proceed from there.

(The statement referred to follows:)

Mr. Chairman and members of the committee, the Commission appreciates the opportunity to come here with our staff to discuss with you our financial requirements for the fiscal year ending June 30, 1964. As you will note, the President's budget for the fiscal year 1964 includes for the Commission a total of $25,450,000 and 2,540 positions. This is a net increase of $1,900,000 and 73 positions over the $23,550,000[1] and 2,467 positions available for the current fiscal year.

It should be emphasized at the outset that approximately two-thirds of the $1,900,000 increase over 1963 as requested for 1964 is to cover costs over which we have no direct control. The major item, $1,006,000, approximating 53 percent of the total results from the application of Public Law 87-793 to the current level of employment. In addition, fiscal year 1964 will embrace two extra compensable days at an estimated cost of $145,028, while within-grade salary advancements will account for an additional $124,815. Thus of the increase we seek, only $624,157 of the total, or less than 33 percent of the net budget increase, is for additional positions, increased costs and to improve operational efficiencies. Of this amount, $449,779 is for personal services, and the remainder of the $174,378, while related in part to new personnel, is for increasing operation efficiency and increased costs, as will be explained at the conclusion of my statement.

[1] The $23,550,000 includes a proposed supplemental of $944,000 needed for the cost of pay increases authorized under Public Law 87-793, approved Oct. 11, 1962, the obligation for which has already been incurred for fiscal year 1963.

The 73 additional positions are of utmost importance to fulfillment of Commission responsibilities, as we will seek to demonstrate in the detailed justification. As we move through this, I would welcome any questions concerning the need for these particular positions.

In requesting the additional positions we have been guided primarily by the following significant factors: (a) continuing increase in our formal casework involving motor carriers; (b) unprecedented number of large rail merger cases; (c) substantial increase in court cases involving enforcement as well as defense of Commission orders; (d) increased demand for more current and additional cost data; (e) need to substantially increase our research activity and to provide economic counsel in major cases; and (f) the increased costs which are uncontrollable.

INTERNAL REORGANIZATION EFFORTS

During the calendar year 1962 the Commission continued to take major steps to improve its organization and procedures. After considerable study of proposals made by our staff and outside groups, changes in the field organization of our Bureaus of Safety and Service, Inquiry and Compliance, and Accounts were approved effective July 1, 1962.

The Bureau of Safety and Service formerly conducted field operations within 9 geographical zones, subdivided into inspection areas or work districts under the direction of 30 zone supervisors. These have been replaced by eight districts, each headed by a district director who will supervise the district field staff. At least two supervisors are assigned to each district staff to assist the district director in providing technical advice and to train inspectors. The district directors double as supervisors in the specialty field in which they are qualified, such as locomotive inspection, railroad safety, car service, or signal and train control.

In the Bureau of Accounts, the three former field areas have been replaced by six districts headed by district auditors with duties similar to those previously assigned the three examiners-in-charge. This revised geographical division will provide field supervisors with more opportunity for contact with subordinates and on-the-job supervision.

The realinement in both bureaus is intended to enable field personnel of each bureau to be of greater assistance to the field staff of other ICC bureaus.

The Bureau of Inquiry and Compliance realined the territorial assignments of its special agents to coincide with the eight new Safety and Service districts, since the efforts of such agents are directed primarily toward investgiation of possible violations in the rail and water carrier and freight forwarder fields. Motor carrier investigation activities will continue to be conducted within the 13 field districts of the Bureau of Motor Carriers.

No changes were considered necessary at this time in the geographical divisions of the field operations of the Bureau of Motor Carriers or Bureau of Water Carriers and Freight Forwarders.

Authority formerly delegated to regional attorneys of the Bureau of Inquiry and Compliance and the district directors of the Bureau of Motor Carriers, when they agree, to approve final investigation and criminal prosecution of motor carrier safety violations was broadened to include prosecution of all types of motor carrier violations under part II of the act, subject to routine review in Washington. A procedure also was instituted requiring compliance checks subsequent to issuance of cease and desist orders by the Commission or successful court action to determine whether unlawful activities have been stopped, continued, or resumed.

During the 1962 fiscal year 3 new employee boards—the Finance Review Board, the Operating Rights Review Board, and the Rates and Practices Review Board—were created, making a total of 19 employee boards now in operation. Unlike other employee boards of the Commission, these new boards handle cases which have involved the taking of testimony at public hearings or the submission of evidence by affidavits, as authorized by amendment of section 17 of the Interstate Commerce Act during 1961. The new boards did not become fully operative until January 1962, but during 1962 these boards had disposed of 523 cases with remarkable success, in that the Board decisions have, in most instances, become the final and unchalleged decision of the Commission.

Additionally, certain special steps have been taken. These include such matters as complete review of our mails and files operation resulting thus far in the installation of a centralized messenger service and a significant reduction in the briefing of incoming mail; revision of procedures for preparing and

reproducing Commission reports more efficiently and economically; progress with comprehensive space realinements providing for maximum utilization of staff and space; improved case status and examiner reporting systems; work by our Staff Committee on the Reduction of Paperwork Burden to reduce nonessential reporting; increased automation of operations; efforts by our Staff Committee on Organization, Operation, and Procedures to develop recommendations for expediting and improving proceedings work; follow through on recent changes in bureau field organization; increased delegations; more effective use of Government-owned automobiles; improved information reporting systems, particularly in the proceedings area; and continued emphasis on reducing the proceedings pending load, its age, and time required for disposition.

While the foregoing summarizes the highlights of internal reorganization during 1962, we are under continuing pressure from the Bureau of the Budget to effect further reorganizational changes wherever possible along general lines outlined in the Booz, Allen and Hamilton report, or be prepared to justify why this has not been carried forward. We are, therefore, continuing actively to restudy this through a Commitee of Senior Commissioners, the vice chairman and appropriate staff. A major problem is how to reorganize further without additional expense.

FORMAL PROCEEDINGS

Although favorable results are beginning to appear, it is too soon to determine conclusively the total effect of the organizational and procedural changes which have been made in recent months. It is worthy to note, however, that 7,902 formal cases were closed during fiscal year 1962, the greatest number for any similar period in the Commission's history. This represents a 3.5 percent increase over the number of cases closed during the prior year and nearly a 5 percent increase over fiscal year 1960. At the same time, our pending case docket was reduced from 5,002 cases pending at the beginning of the year to 4,688 at the close of the year, the lowest yearend level in 4 years. The average time required to close a case and the average age of pending cases were also reduced. Cases closed during the fiscal year 1962 required an average of 7.8 months for disposition, compared with an average of 8.8 months the pervious year. All of the foreging improvements have been made notwithstanding a 5.5 percent increase in our caseload receipts during the past fiscal year. However, based on the current rate of receipts, new legislation and the large number of cases of major transportation importance, our ability to continue to keep the pending caseload from growing and improve our docket is seriously challenged.

CASE FILINGS CONTINUE TO INCREASE

Filings of applications for operating rights have increased in the past 5 years an average of 5 percent per year, and it is estimated that filings will continue to increase at the same rate in 1964. However, during the 1961 fiscal year, probably as a result of the economic recession, the number of applications filed for permanent motor carrier operating authority declined. The reduction was partially offset by the filing of 187 applications resulting from Public Law 86-615, effective July 12, 1960, which provides "grandfather" rights for certain motor and water carriers and freight forwarders transporting persons or property in interstate or foreign commerce, within, from, and to Alaska and Hawaii. Since January 1962, a marked increased rate of filing motor carrier applications has been noted; and during the 11 months ended November 30, 1962, the new filings total 4,214, or an average of 383 per month. If this trend continues, it appears that the percentage of increases in filings during fiscal years 1963 and 1964 may be even greater than those experienced in prior years.

ENFORCEMENT THROUGH FORMAL PROCEEDINGS

Due to the Commission's continued emphasis on carrier fitness and its increasing efforts, together with those of regulated carriers, to eliminate unlawful operations in the so-called gray area and other related transportation fields, the number of enforcement proceedings has increased, with the Commission's Bureau of Inquiry and Compliance participating in many of them. Most of these proceedings entail long and highly contested hearings, with many presenting extremely important and complex issues, and will require many more

examiner workdays for processing to final determination than the ordinary application case. And, with continuing pressure by Congress and other outside interests for increased Commission activity in this enforcement area, the need to divert available manpower for the purpose of obtaining prompt decisions in proceedings of this type may be expected to increase.

NEW WORK AREAS

A new and acute work area affecting the Commission's needs for fiscal year 1964 was created by recently enacted legislation (Public Law 87–805, approved October 15, 1962). This legislation repealed the old second proviso of section 206(a)(1) and added to that subsection two new paragraphs, which (1) provides for the issuance of so-called grandfather certificates of registration to those carriers now operating under that proviso, and (2) establishes a procedure by which single-State motor carriers seeking new or additional intrastate operating authority also may obtain, upon a proper showing, a certificate of registration authorizing comparable interstate and foreign operations. It is estimated that approximately 3,000 grandfather applications and annually 1,000 petitions for review of State actions will be received for processing. The 1964 budget includes seven attorney-advisers to handle this additional workload.

Rail and motor carrier unification applications under sections 5 and 207 constitute a large volume of the work. The number of such motor carrier applications and investigations pending on June 30, 1962, was 304, compared to 378 pending at the end of the 1961 fiscal year. There was a slight increase from 103 to 111 in the number of formal cases pending involving railroads and water carriers under sections 1(18), 5, and 13a.

GREATER COMPLEXITY OF CASES

Regarding this type of proceeding, it should be emphasized that a comparison of the number of cases presently and previously pending is not truly indicative of the increase in workload. Among the pending cases are applications for acquisition of control or merger involving many of the largest railroads of the Nation. It is expected that additional such applications will be filed. Each application of this nature, on the average, requires 20 to 30 times as many hearing-examiner man-hours as other applications handled by hearing examiners. For example, two hearing examiners and the equivalent of 6.5 to 7 man-years of legal and economic staff have been assigned the pending proceeding involving the proposed merger of the Pennsylvania and New York Central Railroads.

As of December 31, 1962, there were 109 rail and motor proceedings awaiting hearings, and there were 93 proceedings pending in which a hearing had been held but an examiner's report had not been served. Included in the latter are cases involving (1) competitive applications of the Southern Pacific and Atchison, Topeka & Santa Fe Railway to acquire control of Western Pacific, (2) merger of the Great Northern, Northern Pacific, and Burlington railroads, (3) merger of the Nickel Plate into Norfolk & Western and lease by the latter of the Wabash, and (4) competitive applications of Missouri Pacific and Illinois Central to acquire control of Chicago & Eastern Illinois.

INQUIRY AND COMPLIANCE

The Commission's enforcement program requires immediate bolstering. The number of administrative cases involving rate matters, rulemaking, and carrier fitness qualifications continues to increase; also, there is increasing emphasis on cases falling within the so-called gray area, such as unlawful leasing, so-called buy-and-sell schemes, fictitious shipper associations, etc. During the past 6 years the number of court cases has increased by more than 100 percent without a commensurate increase in personnel. The number of court proceedings instituted, in which attorneys of the Bureau of Inquiry and Compliance are required to participate, increased from 780 in fiscal year 1961 to 934 in fiscal year 1962, an increased workload of 19.7 percent. Also, during the fiscal year 1962, the number of cases pending in court increased from 554 to 643 notwithstanding that in fiscal year 1962 we disposed of 845 proceedings as compared with 700 in fiscal year 1961. Most of these proceedings require a substantial amount of the time of our attorneys because of the mounting complexity of the issues involved. The 1964 budget provides funds for increasing our staff of attorneys by three to handle the increased workload and to reduce backlogs to a reasonably current level.

COST FINDING AND ACCOUNTING EXAMINATIONS

In past budget requests we have expressed the need for increased appropriations to augment staff engaged in cost-finding activities. Pressure for increased activity in this area steadily becomes more pronounced. The need is now acute. With the intense competition existing in the transportation industry, the carriers persevere in their efforts to obtain changes in rates and the installation of new and novel service features,[2] thus greatly increasing the demand for more current, diversified, and detailed cost data. However, during fiscal year 1962, we were able to make only one motor carrier cost study and three rail studies with the present level of personnel.

Analyses of cost evidence in formal and I. & S. cases should be made promptly to assure that such evidence is available for consideration by the Commission. We have been unable to do this in all cases, and many such analyses have been deferred for long periods causing delays in rate decisions. The additional positions requested will provide more current cost analyses.

There is urgent need to increase the frequency of field examinations of carriers' accounting records and practices. While our reorganization of the field staff of the Bureau of Accounts will improve the efficiency and strengthen the effectiveness and quality of field examinations, the number of examinations will fall short of our needs unless additional personnel can be obtained.

We have not been able to meet our schedule of examinations which requires an audit of the large transportation companies annually and the audit of the smaller companies on a 2- to 6-year interval basis. Frequency of examination is based on the volume of annual business, except that pipeline companies are scheduled annually because of the consent decree restricting dividends to 7 percent of the valuation of the carrier's property as found by this Commission. The 1964 budget provides funds for increasing the frequency of accounting examinations, thus enabling our staff to examine the accounts of a greater number of carriers each year.

OFFICE OF THE GENERAL COUNSEL

During the past fiscal year the Office of the General Counsel has experienced a substantial increase in litigation involving Commission orders. This, too, is an area over which we have no control of the work demands. There were 232 cases in process during fiscal year 1962 as compared with 158 cases in process during fiscal year 1961, an increased workload of 46.8 percent. Cases pending at the end of fiscal year 1962 numbered 149 as compared to 93 pending at the end of fiscal year 1961 or an increase of 60 percent. As a result of this increased workload, we are experiencing serious difficulty in meeting brief and trial dates set by the courts. In many instances, despite night work and weekend efforts of our attorneys, extra printing costs are being incurred in order to meet court deadlines. I am pleased to report to you that the General Counsel's Office has so far continued to enjoy an enviable record of success in defending Commission orders, but the demands upon a limited number of dedicate attorneys now surpass any good lawyer's ability to maintain this proud record of achievement. Furthermore, I cannot emphasize too strongly that the work of the Commission internally will shortly suffer if we fail to provide additional assistance to the General Counsel's staff, in order that this office may not only cope with the increasing volume of litigation but also continue to render essential nonlitigation legal service to the Commission.

Perhaps the most important single factor for the upsurge in court cases is the intense intermodal and intramodal competition in the surface transportation industry. The intermodal competition is reflected in litigation over competitive rate reductions, rail attacks on grants of new motor carrier operating authorities and upon the interpretation of existing certificates and permits. The intramodal competition is reflected in extensive litigation brought by motor carriers challenging the Commission's authorization of new competitive motor carrier services. In a smaller number of cases, railroads challenge extensions of other railroads' tracks to serve new industries. Secondly, the Commission's stepped-up enforcement activity results in cease-and-desist orders which are challenged in court. Third, the shrinking of railroad services, through partial abandonments and

[2] A very clear example of this is the proceeding commonly called the Big John grain case growing out of the Southern Railroad use of new-type grain cars. More than 16,000 pages of testimony were taken, with the issues mainly revolving around costs of the carriers. I. & S. 7656, decided Jan. 21, 1963.

train discontinuances, has been and will continue to be a steady source of litigation. Fourth, the increase in new motor carrier applications presages increased litigation over orders granting or denying such applications. The 1964 budget provides funds for increasing our staff of attorneys by four to handle the increased workload.

ECONOMIC COUNSEL STAFF

As a result of numerous studies made of the Commission's practices, procedures and organization, recommendations were made for a strengthening of our functions with respect to transport policy, analysis, and research activities. There is an urgent need for immediate and substantial enlargement of our activities in the field of transportation research into basic problems and developments as they relate to the responsibilities of the Commission, and to provide economic counsel to appear in a selected number of cases of major importance. We are doing this now, on a limited basis in some of the more complex rail merger cases by diverting key personnel from enforcement work, but this, if continued, will surely deter progress in equally important areas. It is estimated, for example, that participation by attorneys and economists in the New York Central-Pennsylvania Railroad merger case currently being heard will require the equivalent of 6.5 to 7 man-years full time. The 1964 budget includes funds to augment our research staff and to establish an economic counsel staff.

PROTESTED RATE ADJUSTMENTS

The steady increase in number and complexity of protests of proposed rate adjustments continues to be a serious problem. Protested rate adjustments increased from 4,855 in the 1961 fiscal year to 5,170 in 1962, or by 6.5 percent.

Suspension or failure to suspend an adjustment based on a faulty and inadequate analysis of the situation due to lack of time can mean the loss of thousands of dollars to the carriers and the public. To the small motor carrier, it can mean the difference between a profit or loss in its overall operations. Having given the Commission the power to suspend proposals pending investigation as to their lawfulness, the carriers and the public have the right to expect that the Board gives to each proposal careful, objective, and completely adequate consideration.

Not infrequently, a single adjustment involves a hundred or more pages of tariff matter and thousands of rates throughout a rate territory, region or wide scope. Others, while not necessarily territorywide in scope, involve new principles of ratemaking for which there is no guide for the report writer and Board to follow. The majority of the protested adjustments require considerable study and research to develop the factual situation and reach a proper conclusion. A relatively small increase is included in the 1964 budget for the Board of Suspension, which if approved, will not solve, but will alleviate the problem somewhat.

BUREAU OF MOTOR CARRIERS

The continued growth of the motor carrier industry and the increasing number of trucks on the highways has substantially increased the work of our motor carrier field staff. The 1964 budget provides funds for a small increase in our departmental motor carrier safety staff and for additional clerical assistance in the field, the latter principally intended to relieve professional staff of time-consuming clerical detail.

AUTOMATIC DATA PROCESSING STUDY

During the past fiscal year, the Commission established an automatic data processing staff to study the possible extension of this program to various operations of the Commission. Staff work in three priority areas has progressed substantially and accomplishments with respect to cost finding has been highly favorable. The two cost formulas for rail and motor carrier rate determinations, which historically have been applied manually, are now automated for computer processing. After limited experience, these operations have provided proof that we can achieve an increase in our capabilities for providing the timely data that are important in so many facets of the Commission's activities. The automated cost formulas are generally indicative of the type of endeavor we are pursuing in handling specific tasks formerly curtailed by manpower limitations. The 1964 budget provides for an increase in the ADP staff so as to

accelerate intensive studies for determining the areas where the Commission may apply automatic data processing techniques most advantageously.

OFFICE OF THE SECRETARY

The 1964 budget provides for a small increase in the staff of the Section of Reference Services in order to bring index-digesting of Commission reports to a current basis.

OBJECTS OTHER THAN PERSONAL SERVICES AND BENEFITS

I previously identified the figure of $174,378 as being for increased costs and to improve efficiency of operations. For example, the 1964 budget includes a request for an increase of $34,700 for travel expenses, which is related primarily to the requested increase in personnel. As you know, in the performance of its responsibilities, the Commission depends on the adequacy of travel funds. In order for the Commission to handle its hearings, investigations and inspections effectively, it is necessary that sufficient travel funds be provided.

The budget provides $20,000 for service at computer centers for testing program routines in connection with the ADP study.

The budget provides $18,600 in our printing funds which is requested primarily to print an increased number of Commission decisions and to republish the motor carrier safety regulations.

Increases in other items are in proportion to increases requested for additional employees and to provide for the increased cost of materials and services; namely, $24,043 for rental of office space, increased telephone costs for additional employees, and increased cost of official mail; $62,700 for office equipment and purchase of automobiles for replacement of currently operated field automobiles; $14,335 for office supplies and miscellaneous expenses less savings in movement of household goods of transferred employees.

We are convinced that the amount requested in this budget is essential for the Commission to carry out its congressional mandates. We earnestly invite favorable consideration of our budget request for 1964.

Mr. THOMAS. Go ahead.

COMPOSITION OF 1964 INCREASE

Mr. WALRATH. Mr. Chairman, we call attention in our prepared statement, which I understand has been furnished to the members of the committee and to the reporter, at the outset to the fact that it appears on its face that we are asking for a substantial increase. I want to explain that at the outset. The current budget, the 1964 budget, totals $25,450,000, which would provide for 2,540 positions. I call attention to the fact that this is a net increase of $1,900,000 and 73 positions over the 1963 fiscal year plus the supplemental.

Mr. THOMAS. What is your pay act cost and where are you getting the money? How much did you absorb? How much is your supplemental?

Mr. WALRATH. That is the next point I wanted to make.

Mr. THOMAS. We are already familiar with it.

Mr. WALRATH. In the 1964 budget we have done a little computation, and we want to emphasize at the outset that approximately two-thirds of that; namely, $1,275,843 of the $1,900,000, is to cover costs over which we have no direct control. Included is $1,006,000, which relates to the pay increase, under Public Law 87–793. In other words, 53 percent of the total increase results from the pay increases under that law.

Mr. THOMAS. That leaves you about $900,000 for your salaries and expenses.

Mr. WALRATH. No, sir; it is even different from that.

Mr. THOMAS. Go ahead.

Mr. WALRATH. In the 1964 fiscal there will be 2 extra compensable days, at an estimated cost of $145,028; and in addition to that, within-grade salary advancements will require an additional $124,815.

That brings us down to the figure that you were referring to, and that is $624,157 of the total, or less than 33 percent of the increase for the 1964 fiscal year budget, is related to additional positions on the one hand; increased costs that go along with those and related to those positions, such as rent, floor space, and travel allowances; and finally, to improve operational efficiencies.

Boiling it down still further, $449,779 is directly attributable to personal services, and the remainder of $174,378, while related in part to new personnel, also includes some requests and allowances for increased operating efficiency and costs related thereto.

I have an explanation of that at the conclusion of my statement.

Mr. Chairman, we start on the premise—I say this with all the sincerity I can command—that these 73 positions have no water in them that I can see. After study and scrutiny, I see no way to squeeze anything out of them if we are to meet the Commission's responsibilities.

As we move through the details of this, we would welcome any questions.

We set out on page 2 the factors which guided us primarily in seeking this additional money.

INTERNAL REORGANIZATION

Beginning at the bottom of page 2, under the title, "Internal Reorganization Efforts," and running into and through page 5 of the prepared statement, we have given you what may be called a stewardship report of the internal changes, the field changes, the things we have done in the past year in an effort to improve operating efficiencies, in an effort to utilize manpower and facilities in better fashion. We think the facts speak for themselves, which I will touch on in a moment, that we have done just that, but that alone has not been sufficient to keep up with the increased caseloads and the increased demands, over which we feel we have little control.

There are only one or two points there on which I think you may want emphasis.

The first of these is on page 4, where we explain our additional delegations to the field of responsibility for initiating enforcement efforts; that is, court cases and the prosecution of offenders. You may recall in 1958—I believe I am correct as to the year—we delegated out to the field the decision as to whether to prosecute in the courts for safety violations. We used that as a means of determining whether uniformity of enforcement could be obtained by delegation to the field, without the necessity of a lot of paperwork coming back to the Commission and going back out to the field, with the delay which would be involved in that. It worked so well that this year, as of July 1——

SAFETY INSPECTION—MOTOR CARRIERS

Mr. THOMAS. I notice you mention in your justification that you have 99 safety inspectors this year in the Bureau of Motor Carriers. How many did you have last year? The table is excellent, but it covers only the fiscal year 1964.

Mr. SCHMID. It is the same number. We are not requesting any increase in safety personnel.

Mr. THOMAS. When and how did you get those 99? This is a lump-sum appropriation. Only two items are earmarked, and safety has not been one of them as far as highway traffic is concerned. How did you get the 99? How did you build it up and when did you build it up? You have been asked to leave that particular field to the various State highway departments. Of course, I understand there is a lot of pressure on you from railroads, trucks, and buses where they have a mutual understanding that they want to get rid of some of this illegal traffic under the guise of safety. That is understandable. I think you have a point. Don't call it safety. Let us not go overboard on highway safety when every State in the Union has its own safety patrol doing the same thing. You could spend your money, I think, more advantageously.

Mr. WALRATH. That, sir, I think is not the correct impression we want to leave on this. The safety we are talking about, while Mr. Schmid looks for the particular answer——

Mr. THOMAS. I gave the right figure. You don't have to look for that.

Mr. WALRATH. He is looking to find when that number was obtained.

Mr. THOMAS. Look at the last sheet in your justifications, where there is a breakdown of motor carriers which gives the figure of 99 for 1964. The question I ask is, How many did you have last year and year before last for that particular activity, safety for motor carriers, and when did you begin to build this up? I think you have been at it the last 6 or 7 years.

Mr. SCHMID. I might add the big buildup in our safety personnel was in 1956 and 1957. Since that date we have been at approximately the same level of safety personnel.

NATURE OF MOTOR CARRIER SAFETY

Mr. WALRATH. May I explain what that consists of, Mr. Chairman? It is not highway safety control in the sense that you were apparently led to believe by our calling it safety. This consists mainly of our safety inspectors who go into the terminals and conduct road checks and check the vehicles. Those are things the States won't do for us because they are not set up to do that. They are not equipped to do that.

Mr. THOMAS. Your justification in the past has been that it was not road checking but terminal checking.

Mr. WALRATH. That is right, sir.

Mr. THOMAS. Go ahead.

Mr. WALRATH. And also the study of safety training programs that we insist these carriers pursue, because we find from experience

if they do not have safety programs, even management may not be aware of it but the thing gets out of hand. These vehicles go on the highway in those cases as a dangerous instrumentality. We are able to do a great deal of administrative preventive work in safety, and it takes skilled people to do that, to supervise the training programs that the carriers put in.

We have had occasions—I am sure Assistant Director Meyer would support me in this—where a carrier had on paper a very fine and extensive safety training program, but it simply did not work on the working level. Management thought they were spending enough for it, but our experts were able to show them where it was deficient, where it cut right down to the vehicles, down to the records of the drivers that they had employed. Through administrative help we believe sincerely, sir, that we have saved many lives and much damage.

Safety is a subject on which I could make a long speech.

Mr. THOMAS. I have never yet noticed a big bus on the highway get a ticket. If you go 40 miles an hour on the highway and one of these big interstate buses does not pass you, I will pay double. I have never seen one of them stopped yet. Then the next group is these great trucks, about 50 or 60 feet long. It may be plainly written on the highway signs that the speed limit is 55 miles an hour, but they will pass you going 70. I haven't seen one of them picked up, either.

Mr. WALRATH. That is the area where the States have supreme control, Mr. Chairman. We have nothing to do with that.

Mr. THOMAS. That is right. I understand that. But I still never have seen one of them picked up. Every now and then you might see one of the little trucks stopped, but I have not seen a diesel picked up. Have you ever seen a passenger bus picked up?

Mr. WALRATH. No, sir.

Mr. THOMAS. You have had a lot of them pass you, haven't you?

Mr. WALRATH. That is right.

Mr. THOMAS. I don't know what it is. They have a charmed life on the highway. It seems to me every time I get up to 62, I have to look around. I see somebody looking over my shoulder.

Mr. EVINS. You frequently see where they have jackknifed over in a ditch.

Mr. THOMAS. Not the buses. You see trucks, yes.

Mr. WALRATH. One of the last accident reports we issued in the Bureau of Motor Carriers, investigating some deaths and injuries, happened to be a bus, and our finding was that he was exceeding the safe speed limit as well as not having adequate brakes at the time. There were many factors.

About all we can do, sir, is call attention to these things over which the State has control as to speed. I agree with you that it is pretty outrageous the way some of them operate on the highways.

Mr. EVINS. You have control over other items besides speed, Mr. Chairman.

Mr. WALRATH. Yes, sir, we have. We have control over the condition of the brakes, the driving hours, and the hours of service. That is why we need these inspectors to tighten up on these things. That is the justification for it.

Mr. EVINS. After you made this inspection and after you made this report and found out these facts, in this specific instance where people were killed, what did the ICC do?

Mr. WALRATH. I cannot tell you in detail all we have done, and I do not recall whether the driver was killed in that one. In any event, among other things, criminal charges are brought against him in the appropriate court, and civil actions are brought by us. Penalties are imposed. This particular case, Mr. Evins, is very recent. I don't know in detail what may have happened since, but I can find out for you, sir. These are not dropped with our reports.

One of the first things done is a very careful check to determine the facilities, safety program, and things we do have control over as to that particular carrier.

Mr. EVINS. When you notify the transportation company, do you get reassurance from them that this will be prevented in the future.

Mr. WALRATH. We do not accept their assurances, sir. We see to it that they do comply. We go right in and do that. That is why 99 safety inspectors are kept busy. That is part of their job.

Mr. EVINS. Do these investigations show that the same companies are repeaters? After an accident has been called to their attention, are they repeaters, or when another accident occurs is it ordinarily another company?

Mr. WALRATH. I think in 1959 or 1960 we found some five motor carriers of freight turned up at our road checks in bad condition. We brought them in to formal proceedings, threatening their certificates unless they came into compliance. That was a pretty drastic thing. They did quickly get into compliance, as I recall it, but we kept them in suspense for a period of some months until we were certain.

Mr. EVINS. You have a lot of statistics. My point is, Once you have had a case with one of these companies, are they repeaters?

Mr. WALRATH. They are not repeaters for very long, if they are, because that is when we take action through the fitness proceedings. That is what I had reference to, where we actually formally charged them with deficient safety measures. We hold their feet to the fire until they have their program on an acceptable level.

Mr. EVINS. Most of your action is just notifying the company, and you turn over the other facts to the district prosecutor. You don't take criminal action yourself.

Mr. WALRATH. We frequently do, yes, for safety violations. That is what the second paragraph on page 4 covers.

Mr. THOMAS. I don't see how in the world you can police the highways. We have city, county, State, and Governors elections every 3 or 4 years, and of course highways are always one of the issues, whether properly or improperly handled, and so forth. I notice these weigh stations at the side of the highways in various States, where all the trucks come in to be weighed.

Mr. OSTERTAG. Those are State stations.

Mr. THOMAS. Yes. The States are in a position right there to check every one of them not only for weight but for fitness and everything else.

Mr. WALRATH. Not necessarily interstate carriers, Mr. Chairman. They do it as to their own, but if they check ours, once they find it is an interstate carrier, they report that to us and we follow up.

INSPECTION OF INTERSTATE MOTOR CARRIERS

Mr. JONAS. You do not undertake to check all these interstate carriers on the highways, do you?

Mr. WALRATH. Only from time to time, Mr. Jonas. We have the so-called road checks.

Mr. JONAS. Would it not be better to direct your attention to the terminals?

Mr. WALRATH. We do that, sir. The greater emphasis is on the terminals. That is an around-the-clock, day-by-day proposition. With all of the motor carriers to be checked, our forces just are not adequate.

Mr. JONAS. Do you run into any lack of cooperation on the part of carriers?

Mr. WALRATH. Seldom.

Mr. JONAS. It would seem to me they would have an interest higher than yours in providing adequate safety devices and keeping their brakes in repair and other things.

Mr. WALRATH. That is right, sir. That is why I said a moment ago to the chairman that frequently management does not realize that its safety program has gotten out of hand until we have made these checks and called it to their attention.

Mr. JONAS. Do they not all have safety engineers who do nothing but check safety devices?

Mr. WALRATH. The larger ones do have, and then if they become complacent about it, the first thing we know many of their vehicles are below standard and we have to take action.

Mr. JONAS. Ninety is your total number of inspectors, is it not?

Mr. WALRATH. I think 99 is the figure, sir.

Mr. JONAS. You cannot do anything but spot check with that number. You could not check the truck terminals in my district alone with 99.

Mr. WALRATH. That is right. We can do it only on a rotation basis. We try to check them frequently but, as you say, it is a question of spreading the manpower most efficiently.

Mr. OSTERTAG. Is there any coordination in this operation between the State weigh stations and the ICC?

Mr. WALRATH. Yes; but the degree to which that is done varies from State to State. In the case of a road check, if it happens a weighing station is the logical place to have a road check, we have little difficulty in getting the State's cooperation in using that, with their personnel and ours working side by side with the State highway patrols. Recently we had such a check in Virginia.

Mr. OSTERTAG. You are not particularly concerned about the weight, are you?

Mr. WALRATH. No, sir, we are not.

Mr. OSTERTAG. Are these stations involved in inspection of any kind for compliance?

Mr. WALRATH. They are interested in their intrastate trucks, yes, sir, but when they find one that is interstate, they let our man take over at that point.

Mr. OSTERTAG. Trucks operating in interstate traffic are still subject to the weight check, are they not, while they are in a particular State?

Mr. WALRATH. The weight and the length of the unit are entirely within the State's statutory provisions, yes, sir; but as to the commodities carried or the condition of its brakes, driver's logs, his physical condition—those are matters for which we have to take primary responsibility on interstate carriers.

STATE MOTOR INSPECTIONS

Mr. JONAS. How many States have mandatory inspection laws?

Mr. WALRATH. I would have to check that.

Mr. JONAS. Most of them do have.

Mr. WALRATH. Do you know, Mr. Meyer?

Mr. MEYER. I do not have the exact figure on automobile and truck inspections, but approximately one-third of them do have.

Mr. JONAS. What do you find your experience to be in those States that have mandatory inspection laws and those States that do not have such laws?

Mr. MEYER. Sir, it is not greatly different, because the State inspection generally covers a half dozen basic items, like whether the brakes stop the car, whether the lights burn, four or five such items. If they meet the basic safety requirements, a sticker is placed on them. Our inspection goes much beyond that in determining the mechanical condition of the vehicle.

MOTOR CARRIER ACCIDENTS

Mr. JONAS. One other question. Do you have any statistics which would disclose how many accidents last year were caused by faulty equipment? Is it not true that the vast majority of the accidents are caused by negligent driving?

Mr. MEYER. You are correct, sir. A small percentage is caused by mechanical defects. Probably less than 10 percent are directly tied to mechanical failure. The severity, however, is usually much higher where such mechanical defects are involved.

Mr. THOMAS. Gentlemen, maybe the Chairman of the Commission and his colleagues will advise us as to some of their headaches, particularly on some of their merger cases. What about your railroad mergers? What about your railroad loans? What is the general condition of the railroad industry? What about your trucks and buses? What about the conflict, be it great, small, imaginary or real, between the barge lines, the railroads, and the trucks? Tell us generally something about your overall workload. Spell out what your reorganization was and just how it has worked. Let us spend a little time on that.

Mr. WALRATH. Mr. Chairman, I think I will cover much of what you have said in this statement.

Mr. THOMAS. A couple of years ago, even up until last year, you were having some difficulty, shall I say, or some thought about tightening up your regulations on some of your trucks and buses for

the hauling of household furnishings. Tell us about that, too. Go ahead.

Mr. WALRATH. Much of that I have covered here. If we have not, we will certainly provide it to you. May I suggest one thing before we leave the field of safety, on page 106 of our justifications.

Mr. THOMAS. We will get back to that in some detail.

Mr. WALRATH. That covers the work of these safety inspectors.

NEW REVIEW BOARDS

The next item in my prepared statement of which I think the committee would like some brief explanation appears on page 4. You remember part of our reorganization this past year was the setting up of review boards of staff people who would enter the initial decision of heard cases. We were not able to do that until you helped us correct the law.

We delegate those cases to them. We have three such boards now, and I think the figures are dramatic. I think the success in that area has been dramatic, Mr. Chairman. Bearing in mind this is the first year that those boards have operated fully, they handled and disposed of 523 cases. This is not in my prepared statement, and that is why I want to put this in the record. Of those, 426 were accepted by the parties without even a petition.

Mr. THOMAS. What was the nature of the cases?

Mr. WALRATH. These are operating rights cases in some instances, rates and practices, disputes over rates, finance matters within the Bureau of Finance, securities.

Mr. THOMAS. Practically everything except mergers.

Mr. WALRATH. That is right, everything except mergers may fall into that category. Control is exercised by the divisions as to which cases the boards have.

Mr. THOMAS. What is the control? A dollar limitation?

Mr. WALRATH. No, sir, it is the importance of the case.

Mr. THOMAS. I don't see how you could put a dollar limitation on it. How do you figure the importance of it?

Mr. WALRATH. In most instances it is easy to tell.

Mr. THOMAS. It might be unimportant to A, but very important to B.

Mr. WALRATH. I agree with you.

Mr. THOMAS. That is a rather fluid yardstick, too. Anyway, the boards have been doing a good job?

Mr. WALRATH. Excellent. I wanted to give you the breakdown on it. There were 426 not even challenged. The parties, everybody concerned, accepted the decision of the board. Ninety-seven petitions were filed, or less than 20 percent of the total. Of these, 61 were denied by the appellate division, which means they affirmed the board. That left only 10 which were granted. Several are still pending.

Out of the 523 cases that the boards handled——

Mr. THOMAS. How many of the boards do you have?

Mr. WALRATH. Three boards.

Mr. THOMAS. How many appellate divisions have you?

Mr. WALRATH. Three.

Mr. THOMAS. And then the big Commission.

Mr. WALRATH. And then the entire Commission, yes, sir.

NUMBER OF APPELLATE CASES HANDLED

Mr. THOMAS. How many cases did the three appellate divisions handle?

Mr. WALRATH. Overall, including the 523, we have handled approximately 7,900—the total caseload.

Mr. THOMAS. If your 3 boards heard 523 cases and 80 percent of them were acceptable to all the parties, the 3 divisions did not have anything to do with those cases, did they?

Mr. WALRATH. They had the balance of the 7,900 cases.

Mr. THOMAS. What is the sum total that the three divisions handled?

Mr. WALRATH. I am coming to that, sir. On page 6 of the statement we show that we handled 7,902 formal cases during the fiscal year.

Mr. THOMAS. That was the three appellate divisions?

Mr. WALRATH. Yes, sir, and the entire Commission.

Mr. THOMAS. That is what I am trying to break down. How many cases did the Commission handle?

Mr. WALRATH. My attention is called to a fiscal year figure in table 2. 2,975.

I should say, Mr. Chairman, before we leave reorganization——

Mr. THOMAS. Let me get the figures firmly in my mind again. What were the figures? How many cases did the three divisions handle on their own?

Mr. WALRATH. A total of 7,902 cases were handled by the entire Commission.

Mr. THOMAS. Can you break it down?

Mr. WALRATH. We can do it for the record, but I do not know offhand how that is divided.

Mr. THOMAS. You had 523 by the three divisions?

Mr. WALRATH. That is by the three boards.

Mr. THOMAS. That is what I am talking about, the three boards.

Mr. WALRATH. Please bear in mind, sir, this is the first year of operation, and it has worked so well it is my impression we will use it more effectively in the future.

Mr. THOMAS. Mr. Schmid, can you give us a horseback opinion on those figures between the three boards or divisions?

Mr. SCHMID. We have a breakdown on fiscal year 1962. There was a total of 700——

Mr. THOMAS. Your three boards were not set up in 1962, were they?

Mr. SCHMID. Yes; they were.

Mr. THOMAS. Go ahead.

Mr. SCHMID. As someone just said, they were set up for half a year. We had a total of 7,902 cases.

Mr. THOMAS. You mean that is everything that the Commission handled?

Mr. WALRATH. The formal cases.

Mr. SCHMID. The formal cases. Of that number, 2,975 cases were handled at the Commission, division, or board level. Another 2,081 cases were completed upon service of the hearing examiner's recommended report and order.

Mr. THOMAS. If it was completed at the hearing examiner's level, to make it final it had to go up to the Commission, and the Commission approved exactly what the hearing examiner found.

Mr. WALRATH. That is by operation of law, sir, unless exceptions are filed.

Mr. THOMAS. So, the Commission never gets to that.

Mr. WALRATH. The Commissioners individually don't, but of course there is a great deal of processing of those cases up to that point.

Mr. SCHMID. To finish that breakdown, the balance of the cases, 2,846, were disposed of either through dismissal or discontinued prior to the service of the examiner's recommended report and order. That is the breakdown of the total number of cases. It means that 2,975 cases went to the Commission, a division, or a board for decision.

COMMISSION DECISIONS

Mr. THOMAS. What constitutes a decision by the Commission?

Mr. WALRATH. Any one of these 7,902 cases, sir, were Commission decisions, either by operation of law at the hearing examiner level——

Mr. THOMAS. Does the law make one of your board's opinions final unless it is appealed?

Mr. WALRATH. It makes the hearing officer's opinion final by operation of law. Then the board decisions from which no petition is filed become final at that level.

Mr. THOMAS. Is that by operation of law or by order of the Commission through rules and regulations?

Mr. WALRATH. It is prescribed by rules and regulations; yes, sir. We could change it of our own motion. It is seldom done unless something is called to our attention. Then it goes right on up. It goes to the Commission level. All together, that constitutes 7,902 formal cases closed during 1962, which is the largest in our 75-year history, sir.

Mr. THOMAS. What part of those 7,902 were dismissals? You gave a figure on that.

Mr. SCHMID. We had 2,846 cases which were either dismissed or discontinued prior to the service of the examiner's recommended report and order, of the total that I gave you a little bit ago.

APPELLATE CASELOAD—FISCAL YEAR 1962

We have a very short table here, Mr. Chairman, which spells out the whole workload for fiscal year 1962 and breaks it down by category of cases and how they were disposed of, if you would like to have it.

Mr. THOMAS. Where is that table?

Mr. SCHMID. It is not in the justifications. It is one of our management reports. In addition to all this——

Mr. THOMAS. It is of no help to us to have it in your book and not in ours.

Mr. SCHMID. Not in this fashion, but throughout our justifications we have the same figures. They are not condensed just the way these are.

In addition to all this, you have your petition work.

Mr. OSTERTAG. You say they are not condensed. You mean they are not compiled together.

Mr. SCHMID. They are not summarized as in this table.

Mr. WALRATH. Would it be helpful if we offered that table for the record?

Mr. THOMAS. I believe it would be. Will you submit it?

Mr. SCHMID. Yes.

Mr. OSTERTAG. For what period is that?

Mr. WALRATH. Fiscal year 1962.

(The information submitted follows:)

Proceedings cases closed during fiscal year 1962 compared to closings in fiscal years 1960 and 1961—Average time in months from date of filing or date of order to closing at last stage of processing

Mr. THOMAS. What division has jurisdiction over mergers? Finance?

Mr. WALRATH. Division 3, yes, sir. The Bureau of Finance is the bureau related to it, yes, sir.

Mr. THOMAS. How many merger cases have you pending—trucks, barges, railroads, and whatnot?

Mr. WALRATH. I have that in the statement. If you would like it now, I will find it.

Mr. THOMAS. Judge, you go ahead and give us the statement.

REORGANIZATION

Mr. WALRATH. May I say one word on this reorganization, sir, because I believe your committee is entitled to know it. We have tried to summarize the highlights here, but we are under continuing pressure—I don't use that word derogatorily—from the Bureau of the Budget to go further in the reorganization, particularly in our field, and along the lines of the Booz, Allen & Hamilton report. We have not gone as far as they think we should and perhaps not as far as we think we should.

The big problem here, on which we are working, is how to accomplish these management reorganizations without putting another layer on the cake and adding expense to it. Our problem right now is how to get a more direct delegation to the field of operations without putting a top executive manager in each region. That is expensive, sir. I promise you we are studying it. We have a committee of five senior Commissioners, the Managing Director, and the Vice Chairman of the Commission all working diligently on that.

FIELD ORGANIZATION

Mr. THOMAS. What part of the work is organized in the field, and what part of it is finished in the field? Your charts show about 14 regional offices, and how many small stations do you have? There were so many I could not count them. They are not added. You have 14 regional offices?

Mr. WALRATH. Thirteen for motor carriers.

Mr. THOMAS. No, I am talking about for everybody. Are they all for motor carriers?

Mr. WALRATH. No, sir, but there are more regions for motor carriers.

Mr. THOMAS. Turn to the very last chart, the organization chart. Field service, 13; and Anchorage makes 14. In the breakdown I think I saw somewhere the figure 837 for your total field service.

Now turning to the charts on pages 214 and 215, I did not count them all. How many locations are there?

Mr. WALRATH. A large number of those are suboffices rather than regional offices, supervisors that are placed where they are to avoid heavy travel expenses.

Mr. THOMAS. What part of your entire workload is originated by these people? These people are not all in the Bureau of Motor Carriers by any means?

Mr. WALRATH. No, sir.

Mr. THOMAS. You have a Bureau of Motor Carriers, a Bureau of Inquiry and Compliance, a Bureau of Safety and Service—you have all your operating bureaus located in the field?

Mr. WALRATH. And, of course, that is where the work is.

Mr. THOMAS. What about the Bureau of Finance?

Mr. WALRATH. We have no field offices for Finance. We have some auditors in the field for accounting but not for financing as such.

Mr. THOMAS. What about your big bureau where most of your litigation is? You do not have a field office for that, do you?

Mr. WALRATH. Not as such; no sir. Some of the field people develop information for the benefit of investigation into the rates. But to answer your basic question, the operational work is done in the field almost entirely. The administrative office and administrative controls are presently here in the Interstate Commerce Commission.

STUDY OF DISTRIBUTION OF FIELD AND CENTRAL OFFICE EMPLOYMENT

Mr. THOMAS. You have about one-third of your people in the field and about two-thirds of your people in Washington?

Mr. WALRATH. That is right.

Mr. THOMAS. Is that a proper distribution?

Mr. WALRATH. We have up to now believed so. To put more in the field and less here is what we are trying to work out in a manner that would not be more costly.

Mr. THOMAS. My inquiry is whether the Commission is giving proper study to the distribution of people between Washington and the field to see if you are getting the most out of your employees.

Mr. WALRATH. That is our purpose.

Mr. THOMAS. I did not mean to imply there is a shortage on the part of your employees. I just wondered about the distribution.

Mr. WALRATH. That is the very study we are engaged in now, Mr. Chairman. We are moving as quickly as we can.

Mr. THOMAS. Who is making the study for you?

Mr. WALRATH. The five senior Commissioners, with the help of the Vice Chairman as coordinator, and with the aid of our management staff. We have been at this more than 2 years and gradually we have done the things indicated on pages 2 to 5 of my statement.

BUREAU OF THE BUDGET CRITICISM

Mr. THOMAS. What is the criticism of the Bureau of the Budget?

Mr. WALRATH. I think it is fair to say they feel we have not delegated enough authority in the field and have kept too much control here. To accomplish the purpose I think they have in mind, we should have the regions almost self-operating, autonomous, with authority to act and with simply an appellate return to Washington.

Mr. THOMAS. If you were to take that approach and accomplish it, what change would it entail between your present load in Washington and in the field? Would it be reversed and instead of having one-third in the field and two-thirds in Washington you would have two-thirds in the field and one-third in Washington?

Mr. WALRATH. I do not think the change would be to that extent because the decision finality has to stay here to be on a Commission level.

Mr. THOMAS. Could you have a small division for each of your 12 or 13 regions and let them dispose of their cases without coming here?

Mr. WALRATH. That has not been suggested by anyone, sir.

Mr. THOMAS. If it has not been suggested it must be wrong.

Mr. WALRATH. I do not imply that.

Mr. THOMAS. I suppose there is not too much merit to it if it has not been suggested by anyone.

Mr. WALRATH. To divide 11 of us in 13 regions.

Mr. THOMAS. What 11 are you talking about?

Mr. WALRATH. Commissioners.

Mr. THOMAS. I am talking about your boards. Could it be possible to have a board in each regional office and have them dispose of their own cases?

Mr. WALRATH. It is worth thinking about. It would mean we would have to set up additional staff. Many things that sound fine cost more money and we are trying not to do that.

Mr. THOMAS. I thought you would save money, since you disposed of 523 cases of which only a few were appealed.

Mr. WALRATH. Where they can be handled without appeal to the Commission, that is fine, but that is a limited number. If we begin to assign cases of wide importance to those boards, I think we would have an increase in petitions.

BOOZ, ALLEN & HAMILTON REPORT

Mr. EVINS The Booz, Allen & Hamilton report concerned itself more with the functions in Washington and not in the field, did it not?

Mr. WALRATH. It was across the board, Mr. Evins.

Mr. EVINS. You have not done much with regard to the latter in the field?

Mr. WALRATH. They would say we have not done enough, Booz, Allen & Hamilton.

Mr. EVINS. In the field?

Mr. WALRATH. The internal changes in the Commission itself were accomplished principally in 1961 and we find that it has been an improvement because it has stepped up our processing of the cases. In my statement you will find we have cut off a month average handling of the cases. We have handled the greatest number of cases in the history of our Commission, as shown on page 6. And we also point out the tremendous increase in caseload, over which we have no control, and it is continuing.

On page 7 of the prepared statement we point out the areas, beginning on page 7 and continuing on page 8, where we show the new work areas, and on page 9, where we show the cases coming to us now are generally of greater complexity than they were some years ago. That brings us to the case of railroad mergers and other cases pending before us. Never in the history of 75 years of the Commission have there been pending so many cases of national importance before us at any one time. We need mention only a few to illustrate that. It is common knowledge that the entire railroad system of the Northeast is in one form or another before the Commission in consolidation and merger proposals. But that is not confined to the Northeast. It

just happens their financial conditions are more serious than some of the others.

The point of my statement on that is that those cases are not numerically one, two, or three more cases, but in the New York Central-Pennsylvania case it is taking the time of two full-time hearing examiners and the equivalent of 6.5 to 7 man-years in professional handling by counsel, to represent the public interest and the aid of economists.

Mr. THOMAS. That is the joint effort of the Bureau of Transport Economics and Statistics and the Bureau of Finance?

Mr. WALRATH. Bureau of Transport Economics and Statistics and Finance, yes, but that is above and beyond the normal case requirements.

ECONOMIC CONDITION OF RAILROADS

Mr. THOMAS. Will you permit a little interruption and give us a little information along this line in addition to the fine statement you are making? May I say that Members of Congress get letters quite often from various sections of the country saying the plight of the railroads is not nearly as serious as the railroads allege it to be. I wonder if the Bureau of Transport Economics and Statistics has any information, first, as to how many separate railroad lines there are in the country. Do you have a table showing that and what their earnings were at any particular time, and which ones are operating in the red?

Mr. WALRATH. As of yesterday, not for the purpose of this hearing but because I had asked for it——

Mr. THOMAS. You wanted to know too?

Mr. WALRATH. Yes. The Bureau of Transport Economics and Statistics gave me a summary of the 1961 incomes of the major railroads.

NUMBER OF RAILROADS

Mr. THOMAS. How many major railroads do we have?

Mr. WALRATH. I do not know the total offhand.

Mr. MARGOLIN. About 105 first-class line-haul railroads.

Mr. THOMAS. What is the difference between first- and second-class railroads, is it a matter of revenues?

Mr. MARGOLIN. Yes.

Mr. THOMAS. What is the total number of all railroads?

Mr. MARGOLIN. Including class 2 and switching and terminals there are around 600.

Mr. THOMAS. Those are all called railroads, whether they are just switching and terminals?

Mr. MARGOLIN. Yes.

Mr. THOMAS. Do the 105 comprise, as far as revenue and employment is concerned, 50 or 55 percent?

Mr. MARGOLIN. No; 94 or 95 percent.

Mr. THOMAS. In revenue or employment or both?

Mr. MARGOLIN. Both.

Mr. THOMAS. What part of the 105, in your latest information, shows a profit? Will you insert that in the record?

Mr. WALRATH. Yes.

(The following was submitted for the record:)

PERCENTAGE OF CLASS I LINE-HAUL RAILROADS WHICH SHOWED A PROFIT IN 1962

From published reports of the results of operations of 44 class I railroads for the year 1962, and from reports for 9 months operations or 11 months operations, as available, of the remaining roads, it is estimated that 72 percent of the class I line-haul railroads will have a net income credit balance for the year. It is not possible to foresee the effect of the new depreciation allowances and the tax credit law upon the carriers which have not published their final figures. For the districts, the percentages were: Eastern, 50; Southern, 76; and Western, 92.

IMPROVEMENT IN RAILROAD PROFIT

Mr. THOMAS. What else does that table show?

Mr. WALRATH. This is based on the Wall Street Journal report because the reports we require have not yet been filed with us. The publicly reported incomes Mr. Margolin has against the actual 1961 in general show there has been an improvement 1962 over 1961. Am I correct in that?

Mr. MARGOLIN. Yes.

Mr. THOMAS. Are they all making money?

Mr. WALRATH. No. That means improvement. For example, the Erie-Lackawanna had a deficit of $26.5 million in 1961 and it has cut the deficit to $16.5 million this year.

TEN LARGEST RAILROADS

Mr. THOMAS. What are the ten largest lines?

Mr. WALRATH. In employment and revenue?

Mr. THOMAS. Yes.

Mr. WALRATH. Without checking it I think the Pennsylvania is the largest.

Mr. MARGOLIN. Pennsylvania, Union Pacific, Southern Pacific, Santa Fe.

Mr. THOMAS. What about the Southern?

Mr. MARGOLIN. Southern is one of the largest but not at the top of the heap. And the New York Central, of course.

Mr. OSTERTAG. Where do they stand?

Mr. MARGOLIN. Second or third in terms of revenue and employment.

Mr. THOMAS. What about the B. & O.?

Mr. MARGOLIN. The B. & O., I am guessing, but it is sixth, seventh, or eighth.

Mr. THOMAS. It is in the top 10?

Mr. MARGOLIN. I believe it is.

Mr. THOMAS. Give us the top 10 in their proper order when you revise your remarks.

Mr. MARGOLIN. Yes, sir.

Mr. THOMAS. Also, give us some information on the volumes and revenues of your other carriers.

(The information supplied follows:)

Selected 1961 and 1962 data for the 10 largest railroads in the United States, as measured by railway operating revenues in 1961

[Dollars and ton-miles in thousands]

	Railway operating revenues	Average number of employees	Total compensation	Net income	Revenue ton-miles
Pennsylvania RR:

[1] Deficit.
[2] Estimated.
[3] Includes Cincinnati, New Orleans & Texas Pacific Ry. Co., Alabama Great Southern RR. Co., New Orleans & Northeastern RR. Co., Georgia Southern & Florida Ry. Co., and Carolina Northwestern Ry. for the reason that employees of these companies and their compensation are included in report of Southern Railway.
[4] Southern Railway only; excludes other members of system.
[5] Moody's Transportation, Jan. 18, 1963, p. 1794.

Source: Railway operating revenues from 4th quarter reports of carriers to ICC. Employees and compensation from monthly reports of carriers to ICC. Net income from issues of Wall Street Journal, except as shown in footnote 3. Revenue ton-miles for 1961 from Transport Statistics in the United States, pt. I, sec. A-1; 1962 estimated.

Preliminary Estimates of Operating Revenues of ICC-Regulated Carriers and Public and Private Intercity Ton-Miles, 1962

The tables below provide preliminary estimates, based on limited data, of 1962 operating revenues of eight types of carriers regulated by the Interstate Commerce Commission, and of public and private intercity ton-miles in 1962. Data for 1961 are included for purposes of comparison. These tables correspond to those which appear at pages 11 and 12 of the Commission's 76th annual report.

Operating revenues, 1961 and 1962

	Revenue in millions of dollars		Percent increase
	1961	[1] 1962	
Rail [2]	$9,540	$9,793	2.7
Railway Express [3]	257	273	6.2
Pullman Co.	52	50	[4] 3.8
Electric railways	22	21	[4] 4.5
Water carriers [5]	389	401	3.1
Pipelines (oil)	787	812	3.2
Motor carriers of passengers [6]	690	738	7.0
Motor carriers of property	7,463	8,351	11.9
Total	19,200	20,439	6.5

[1] Preliminary.
[2] Includes line-haul and switching and terminal companies; includes Alaskan and Hawaiian.
[3] After deducting payments to others for express privileges.
[4] Decrease.
[5] Includes only revenue from domestic traffic of carriers subject to the jurisdiction of the Interstate Commerce Commission.
[6] Does not include motor-carrier revenues of electric railways, included under "Electric railways."

Volume of intercity ton-miles, public and private, by kinds of transportation, 1961–62

	Ton-miles (billions)		Percentage of grand total	
	1961	1962	1961	1962
1. Rail, including express, mail, and electric railway	570.0	577.2	42.96	42.29
2. Motor transportation of property	[1] 313.1	328.7	23.60	24.08
3. Waterways, including Great Lakes	209.7	214.9	15.80	15.75
4. Pipelines (oil)	233.2	242.9	17.57	17.80
5. Airways, domestic revenue	.895	1.050	.07	.08
Total	1,326.9	1,364.75	100.00	100.00

[1] Revised.

Mr. THOMAS. Where does the Southern Pacific stand, approximately?

Mr. MARGOLIN. It is in the first five or just below that.

Mr. THOMAS. Are they making money?

Mr. MARGOLIN. They are doing quite well.

Mr. OSTERTAG. Is not the total mileage a factor in their size?

Mr. MARGOLIN. Yes, on the physical size. I was dealing primarily with revenue.

Mr. WALRATH. We will supply you with this information.

Mr. THOMAS. Go ahead.

ENFORCEMENT PROGRAM

Mr. WALRATH. The next subject I had included in the prepared statement begins on page 10. It is one I would like to emphasize. Our enforcement program—again a situation over which we have very little control as to workload—the work has been increasing tremendously. This deals primarily with what we call the "gray area," the shady operations that take the form sometimes of phony leases, shipper associations not really within the meaning of the exemptions in the fourth part of the act, and to no small extent the agricultural co-ops.

Mr. THOMAS. Are you directly concerned here with railroads, trucks, bargelines, or all three?

Mr. WALRATH. Not barges. The shippers are primarily land shippers, though not exclusively. There has been a growth of that operation. Some are undoubtedly legitimate but there has been a growth in the area of questionable operations with the advent of the "piggyback." When it is an evasive action we must move promptly. If we do not take care of them promptly it simply encourages other entrepreneurs and schemers to take similar action. It is affecting the railroads, it is affecting the trucks, and to some extent water carriers in the diversion of traffic from the regulated carriers into these schemes and devices.

Mr. THOMAS. What is the economics in these diversions? Is water seeking its own level and can this type of transportation serve the public cheaper than another form of transportation? That is what they allege, and they allege further it is the duty of the Interstate Commerce Commission to let water seek its own level and to give the public the benefit of this form of transportation, which is the cheapest. Then they say the Commission is putting the brakes on and it is costing the shipping and consuming public an undue shipping bill, more than if they would permit the natural competition. How do you answer that?

Mr. WALRATH. If that were the case I could not conscientiously ask what we are asking for here. If we break down or lose our common carrier system, the one obligated to serve small shippers as well as large shippers——

Mr. THOMAS. How long has the Interstate Commerce Commission been in business, Judge?

Mr. GOFF. Seventy-six years.

Mr. THOMAS. Why did it come into existence? what was the basis?

Mr. GOFF. It came into existence in order to protect shippers, generally.

Mr. THOMAS. Of course 75 or 80 years ago each of these forms of transportation were not as well developed as they are now but you had certainly some of the same problems when this agency came into operation.

Mr. OSTERTAG. There were no water carriers at that time.

Mr. THOMAS. If you were to take the bridle off and let everybody do what he was best suited to do, I do not know what the result would be over a period of years but I think you have a good case and you ought to put your best foot forward.

Mr. WALRATH. Mr. Chairman, if this were simply a seeking of its own level and an improvement of service to shippers, I could not justify my position. But this is the type of thing that indicates the very destruction of our system of transportation on which commerce and the stability of commerce depends.

BIG JOHN GRAIN CASE

Mr. THOMAS. Did you not have a very important and difficult case you recently decided having to do with the hauling particularly of agricultural commodities in barges and trucks?

Mr. WALRATH. We did.

Mr. THOMAS. What was the decision and how does that fit in with your thinking, Judge?

Mr. WALRATH. That case is still pending before us, Mr. Chairman. The division entered its report and the other eight of us may have to vote on it. (Investigation and Suspension Docket No. 7656, *Grain in Multiple-car Shipments—River Crossings to the South.*)

Mr. THOMAS. Let us get off the record, then.

(Discussion off the record.)

Mr. JONAS. In the appeal from the division will there be a hearing de novo before the Commission?

Mr. WALRATH. No, sir. An appeal from the division will come up to the entire Commission on the record as made.

Mr. JONAS. With no further arguments?

Mr. WALRATH. Perhaps oral arguments but not a de novo hearing because we have 16,000 pages of record.

Mr. JONAS. That is what I was getting at, whether you have to have hearings before an examiner, and then before the division, and then before the Commission.

Mr. WALRATH. In the normal case once the hearing examiner has completed the record that is the record.

Mr. JONAS. How long would it take the Commission to review this decision and render a final decision?

Mr. WALRATH. To some extent that would depend on the points attacked in the petition. I would judge 3 to 5 months, in that area.

Mr. JONAS. When was the application filed?

Mr. CORBIN. The application was filed last August, or, rather, August 1961. However, the Southern Railroad, which was the chief proponent of these rates, was not only not ready to go to hearing but when we set the hearing in October 1961, they begged us to give them more time. We then set the proceeding for hearing in the first part of January 1962, but they would have preferred us to wait longer.

Mr. JONAS. Then you will have a final decision in a year?

Mr. CORBIN. No, it has been a year now. The application was filed in August 1961, but we set it for hearing in January 1962, and the division itself, Division 2, the rate division, has already rendered their decision so now it is up to the parties whether the parties desire to appeal from that decision, and I am sure one party or another will appeal.

Mr. JONAS. It will be 2 years from the date of the hearing before a final decision is reached?

Mr. CORBIN. At least 2 years from date of filing.

Mr. GOFF. In any big case the hearing examiner cannot go to Memphis and have a single hearing. He has to go where the community is interested and petitions us to have a hearing. That is particularly true in a big merger case. You have maybe 90 cities in a big case that want to put in their testimony. One case we have is the Pennsylvania merger. In that case, the number of communities that want to have their say is amazing. We have to give everybody a chance to get in his view and his position and give his testimony, and it takes a lot of time to do it. If we denied them the right to be heard, the decision would be set aside right away on an appeal. So we have to reach a happy medium and have a place for the hearing to be held where

all the parties can be heard. It is not a quick process but by the very nature of the thing it cannot be a quick process.

When the case is over the hearing examiner or examiners—sometimes there are two—will get out their initial decision in the case and they may have 16,000 or 17,000 pages of testimony and they will analyze this and write an initial decision. The Southern case you referred to went to the Rates and Practices Division. In that case, though, there was no initial decision.

Mr. WALRATH. That was in the interest of time.

Mr. GOFF. In the interest of time.

CASE OF GENERAL TRANSPORTATION IMPORTANCE

Mr. JONAS. What advantage was there in having that interim hearing? Why did it not go straight to the full Commission?

Mr. GOFF. In that case we felt there should be an initial decision to consolidate the issues. We thought we would save time by having the division get out the decision. That has the advantage of consolidating the issues and pinpointing what the real points in dispute are. We have declared that a case of general transportation importance. That means a case of general importance to the country and to the shipping public. Ultimately, either way it is decided, it will be appealed, undoubtedly.

Mr. JONAS. You think you really save time by saving the interim hearing before the division?

Mr. GOFF. It was not a hearing.

Mr. OSTERTAG. You mean the case goes to the Commission only in the case of appeal?

Mr. GOFF. Only in the case of appeal and it has to be a case of general transportation importance in the opinion of the Commission. We could not get through the workload if we heard every case.

Mr. JONAS. But you hear it on briefs and oral arguments?

Mr. GOFF. Briefs but not oral arguments. Undoubtedly we will grant oral argument before the full Commission. That was a rate case. That is not true in a merger because invariably in a merger case we have the examiners get out an examiner's initial decision.

Mr. WALRATH. That is a recommended decision.

Mr. THOMAS. Mr. Wyman, do you have any questions?

SUSPENDED TARIFF

Mr. WYMAN. What happens to the tariff that has been requested to be changed by the carrier pending all this?

Mr. WALRATH. I am glad you asked that because there is a lot of misunderstanding among the lay people. Under the statute we can suspend it and investigate only for the period of 7 months. We are coming closer and closer to doing it in 7 months, but with a 16,000 page record it is a little difficult to do that. Last August the time ran out on suspension and the rates would have been in effect before approval by the operation of the 7 months time limit, but in this particular case, which is a very unique situation, the parties who opposed the reduction in rates were able to get a restraining order keeping the old rates in effect.

Mr. WYMAN. When the requesting carrier eventually prevails, if he does, he gets no retroactive application of this rate structure?

Mr. WALRATH. No.

Mr. WYMAN. If there is an appeal from the decision of the Commission what happens to the rate structure?

Mr. WALRATH. That does not delay the effectiveness of the rates after the 7-month period. Sometimes there will be an agreement between the parties to delay the effectiveness beyond the 7-month period.

REPARATION

Mr. WYMAN. Suppose at the end of 7 months there is no final action on the part of the Commission and the carrier puts its rate increase in effect and after a year or so it is denied, what would happen?

Mr. CORBIN. There would be reparation. The parties probably would not come in a formal proceeding but on an informal complaint and request authority to pay back to the shipper the excess amount over that period of time.

Mr. WALRATH. It could be handled informally.

Mr. GOFF. You say a year later. We get a decision quicker than that. In this particular case where the rate has been stayed by an order of the court, the railroad involved took it to the Supreme Court alleging that once the 7-month period has expired by law it was in effect and the court had no right to enjoin the rate from going into effect. The Supreme Court has it now.

Mr. GINNANE. It has been heard but it has not been decided.

Mr. EVINS. In merger cases there does not seem to be too much rush.

Mr. GOFF. I would not say that. The first major merger case was the B. & O. and C. & O. application for the C. & O. to take over stock control of the B. & O. There was a long series of hearings on that. It was finally orally argued before the full Commission last October 20. I happened to be in on that case too. Mr. Thomas asked something about what we do down there when we are not having conferences. On that case I think we had only two full division conferences but I can assure you that I worked many times overtime, I worked Saturdays and Sundays on that case, because I thought it was important to get a decision.

Mr. THOMAS. Judge, we have already given you A-plus. Is there any higher figure than that?

Mr. GOFF. But we got the decision out on the 31st of December, the last day of the year.

Mr. OSTERTAG. When you refer to mergers, I assume you are not limiting that to railroad mergers but to mergers of all kinds in the field of transportation?

Mr. GOFF. That is right. Now the trucking companies are getting bigger and bigger and though the cases do not arouse the national attention that the big railroad mergers do, it is awfully important to those who want to take control. We have some national carriers that gradually pick up a carrier here and there. We have to consider everything because it is important to those involved.

CHANGES IN THE TRANSPORTATION BUSINESS

Mr. OSTERTAG. I would like to ask the chairman if in his general analysis and economic studies and concern with this whole matter, if you have anything that indicates or shows, first of all, a change in overall transportation of goods and services—I mean volume—as compared with a year ago? Is business expanding? Our gross national product is going up, so therefore I would assume in the field of transportation there is a greater volume.

Mr. WALRATH. Yes, sir.

Mr. OSTERTAG. And, breaking that down, has there been any significant shift or transfer from one field to another? In other words, are railroads carrying their share as compared to the past? What is the general picture?

Mr. WALRATH. I think I can answer that, Mr. Ostertag. There is a tonnage increase in freight being carried by regulated carriers from year to year. The thing that disturbs us and the public generally and the system carriers is that the aggregate increase is not keeping pace with the increase in the gross national product. More and more of the available tonnage is moving in the unregulated channels, some private and perfectly legal, and some in these questionable type operations, and that is why it is important that we keep on top of these so-called gray area cases.

OPERATING REVENUES—FISCAL YEAR 1960 AND FISCAL YEAR 1961

By the way, on page 11 of our annual report we have a breakdown on that by percentages.

Mr. THOMAS. Put it in the record at this point.

(The material referred to follows:)

Trends in revenues among the various types of carriers were mixed for the calendar years 1960 and 1961 and the 12 months ended June 30, 1962, as shown by the following table. The railroads suffered a decline of 3.62 percent in revenue in 1961 below the level of 1960, but in fiscal 1962 their revenues were only 0.62 percent below those of 1960. Rail revenues were slightly augmented by the reclassification of two electric railways which were transferred to the rail category during the period, but as the combined revenues of these two roads in their final year as electric railways were under $200,000, the addition was slight. During the period from January 1, 1960, through June 30, 1962, 10 electric railways were transferred to the rail category, sold, or abandoned, with a consequent effect on the electric railway revenues; hence, the decline shown in the table is somewhat overstated. Waterline revenues decreased 8.90 percent in 1961 under 1960, but the table shows some improvement in fiscal 1962 over calendar 1961. Revenues of motor carriers, both of property and passengers, showed moderate increases in 1961; the increases were substantially larger in fiscal 1962, particularly for property carriers. The long-term upward trend in pipeline (oil) revenues continued throughout the period.

Duplications resulting from intercompany payments are involved in revenues of freight forwarders and private car lines and for this reason revenues of such carriers are excluded from the table. The operating revenues of freight forwarders after payments to carriers were $144 million for the calendar year 1961, as compared to $132 million for 1960. Operating revenues of private carlines were $435 million in 1961 and $426 million in 1960.

Operating revenues [1]

	Year ended Dec. 31, 1960	Year ended Dec. 31, 1961		Year ended June 30, 1962	
		Amount	Percentage change from calendar year 1960	Amount	Percentage change from calendar year 1960
	Thousands	*Thousands*		*Thousands*	
Railroad [2]	$9,898,858	$9,540,266	−3.62	$9,837,382	−0.62
Railway Express [3]	247,985	256,786	+3.55	263,906	+6.42
Pullman Co.	55,877	52,349	−6.31	50,614	−9.42
Electric railways [4]	22,834	22,297	−2.35	22,671	−.71
Water lines [5]	427,408	389,390	−8.90	401,271	−6.12
Pipelines (oil)	770,417	786,718	+2.12	802,449	+4.16
Motor carriers of passengers [6]	667,033	689,509	+3.37	713,679	+6.99
Motor carriers of property	7,213,911	7,462,668	+3.45	8,228,512	+14.06
Grand total	19,304,322	19,199,983	−.54	20,320,484	+5.84

[1] Partly estimated.
[2] Includes line-haul and switching and terminal companies; Alaskan and Hawaiian are included.
[3] After deducting payments to others for express privileges.
[4] Since Dec. 31, 1961, 2 electric railways have been reclassified as class II line-haul railways. 2 have been abandoned, and 2 have been purchased, 1 by a line-haul railway and the other by an electric railway in the same period. The total revenues of the 6 carriers discontinued were less than $320,000 in 1960. The result is an overstatement of the electric railway decline and a very slight understatement of the railroad decrease.
[5] Includes only revenue from domestic traffic of carriers subject to the jurisdiction of the Interstate Commerce Commission.
[6] Does not include motor-carrier revenues of electric railways, included under "Electric railways."

Mr. THOMAS. Read it into the record.

Mr. WALRATH. In the case of railroads—this deals with the year ending December 31, 1960, as compared with the year ending December 31, 1961. So, for a full period of a year, calendar year 1960 against calendar year 1961, the operating revenues of railroads dropped 3.62 percent.

Railway Express had an increase of 3.55 percent in revenues 1961 over 1960.

The Pullman Co. had a decrease of 6.31 percent.

The Electric Railways, which is a small part of our system in the aggregate, had a decrease of 2.35 percent.

The waterlines under our jurisdiction also had a decrease of 8.90 percent.

The pipelines had an increase of 2.12 percent.

Motor carriers of passengers had an increase of 3.37 percent.

Mr. OSTERTAG. Motor carriers of passengers?

Mr. WALRATH. That is right. That is a $22,476,000 increase.

The big increase in freight was in the motor carrier field. I shall put in both dollars and percentages. In 1960 their operating revenues were $7,213,911,000. In the next year ending in 1961——

Mr. THOMAS. Mr. Ostertag, at the proper time will you and Dr. Margolin go into the whole transport economic field in detail? It would help the record.

Mr. WALRATH. In other words, there is a 14.06 percent increase in revenues of motor carriers of property in fiscal year 1962 as compared with calendar year 1960.

VOLUME OF TRAFFIC

Elsewhere there are percentages. Page 12 gives the tonnage figures. We can insert that in the record.

Mr. THOMAS. Yes, we will put that in the record.
(The information referred to follows:)

VOLUME OF TRAFFIC

Volume of intercity traffic, public and private, by kinds of transportation [1]

Agency	Ton-miles				Passenger-miles			
	1960	1961	Percentage of grand total		1960	1961	Percentage of grand total	
			1960	1961			1960	1961
1. Railroads and electric railways, including express and mail	*Millions* 579,130	*Millions* 569,997	43.66	43.24	*Millions* 21,574	*Millions* 20,527	2.84	2.67
2. Motor vehicles: [2]								
Motor carriers of passengers	----------	----------	----------	----------	19,896	19,703	2.62	2.56
Private automobile	----------	----------	----------	----------	680,617	692,000	89.70	89.97
Motor transportation of property	297,662	304,508	22.44	23.10	----------	----------	----------	----------
Total motor vehicle	297,662	304,508	22.44	23.10	700,513	711,703	92.33	92.53
3. Inland waterways, including Great Lakes	220,253	209,706	16.60	15.91	2,688	2,251	0.35	0.29
4. Pipelines (oil) [3]	228,626	233,172	17.24	17.69	----------	----------	----------	----------
5. Airways (domestic revenue and pleasure and business flying, including express and mail)	778	895	0.059	0.068	33,958	34,642	4.48	4.50
Grand total	1,326,449	1,318,278	100.00	100.00	758,733	769,123	100.00	100.00

[1] Some revisions have been made in the 1960 data presented in the 75th Annual Report, and parts of the 1960 and 1961 data are still preliminary.
[2] Schoolbus data are excluded.
[3] Includes refined products and crude oil, with an allowance for gathering lines.

Sources (paragraphs below are numbered to correspond with items in table):
1. Reports to the Interstate Commerce Commission. Electric railway ton-miles and passenger-miles estimated on the basis of revenue. Does not include nonrevenue ton-miles which amounted to 15,725 millions in 1960 and 14,552 millions in 1961, for class I railroads.
2. Highway ton-miles estimated on the basis of Bureau of Public Roads data for main and local rural roads, mileages of routes in urban and rural areas, and on Department of Agriculture data on farm consumption. Alaska and Hawaii are included. Passenger-miles in private automobiles estimated on basis of data from the Bureau of Public Roads on rural and intercity travel and from average load data. Motor carrier passenger-miles based on Public Roads and Interstate Commerce Commission data. As processing of certain data is not complete, highway ton-mile and private automobile passenger-mile estimates herein for 1961 should be regarded as preliminary. Because of changes in base beginning with 1957, estimates for motor carriers of passengers for 1957-60 published in the 73d, 74th, and 75th Annual Reports, the above estimates for 1960 and 1961, and for private automobiles for 1957-58 in the 73d and 74th Annual Reports, are not comparable with estimates published for prior years.
3. Ton-mile data are from Corps of Engineers, U.S. Army. Data for 1961 are preliminary estimates. Does not include most coastwise and intercoastal ton-miles, about 313 billion ton-miles in 1960, as stated in Bureau of Transport Economics and Statistics Statement No. 6204, *Deep-Sea Domestic Waterborne Traffic, 1956–1960*. An estimate for this traffic by the Corps of Engineers for 1961 is 312 billion ton-miles. A small amount of duplication exists between these and the figures in the table. The data presented in the 75th Annual Report has been revised. Figures in the table include Alaskan and Hawaiian but not deep-sea ton-miles.
4. Interstate Commerce Commission, Bureau of Mines, and other data.
5. Based on Civil Aeronautics Board statistics, Federal Aviation Agency surveys, and other data. Covers domestic except movements over international waters or foreign countries. These figures, as they include, for example, Alaskan and Hawaiian, are not comparable with data in annual reports prior to the 75th. In 1959 there were 646 million ton-miles and 32,366 million passenger-miles excluding Alaska and Hawaii and 739 million ton-miles and 32,566 million passenger miles with the new States included.

Mr. THOMAS. How much more do you have on your statement?

Mr. WALRATH. I am passing quickly——

Mr. THOMAS. Don't pass too quickly. Take your time. We want to hear from the Bureau of Motor Carriers, too.

Mr. WALRATH. Beginning at the bottom of page 10 and down through page 12 of my prepared statement, that covers matters which should be of interest to the committee.

OFFICE OF THE GENERAL COUNSEL

I want to talk a moment, if I may, about the Office of the General Counsel. Here we have a very urgent problem.

The work in this area is something——

Mr. THOMAS. You have 22 lawyers in your office, secretaries and lawyers, that is, in 1963 and you want 29. Throughout the Commission you have about 300 to 500, do you not?

Mr. WALRATH. Something in between there, sir.

In any event, the workload in the General Counsel's Office is something over which we have no control. The parties are perfectly free to test our decisions in the courts. Once they are in there we have to defend them or you know the result.

We have had a 46.9-percent increase in work in 1 year's time in the General Counsel's Office. The comparative figures are shown on page 12 of my statement.

We are also having more left at the end of the year than we should have pending, despite the fact——

Mr. THOMAS. Where is the General Counsel?

Mr. WALRATH. Right behind me, Mr. Ginnane.

Mr. THOMAS. Are they working you hard?

Mr. GINNANE. We have the best job in the country in terms of being interesting but it is pretty rough.

Mr. WALRATH. He is a weekend and night worker, too.

Mr. THOMAS. How many lawyers do you have under your jurisdiction?

Mr. GINNANE. Thirteen out of twenty-two, Mr. Chairman.

Mr. THOMAS. You want four or five more?

Mr. GINNANE. Four more, Mr. Chairman.

Mr. THOMAS. Are they all seasoned lawyers? Do you have trouble keeping them?

Mr. GINNANE. We don't have much of a rate of turnover. We are losing one man through retirement, and we are losing another man——

FUNCTION OF THE GENERAL COUNSEL

Mr. THOMAS. What is the function of your lawyers? Do you make any representations before the full Commission or any of the divisions or do you do all appellate work in the courts?

Mr. GINNANE. Two-thirds of our work is appellate work in the courts. The other third is providing nonlitigation legal advice to the Commission on a variety of matters.

Mr. THOMAS. What do you mean by nonlitigation?

Mr. GINNANE. For example, the Commission will frequently, in making a decision, ask us for an opinion on some legal question involved. That may result in a memorandum.

Mr. THOMAS. The Office of the General Counsel does not appear before the Commission as an advocate, then?

Mr. GINNANE. No, with an eye on the Administrative Procedure Act.

Mr. THOMAS. They want to keep you in a position so you can be on speaking terms.

Mr. GINNANE. Exactly.

Mr. WALRATH. Where we can freely seek their advice, Mr. Chairman. I call on him two or three times a day for help on these matters and legal advice and counsel.

Mr. THOMAS. The Administrative Procedures Act puts restrictions on you. His activities in the case must cease if he is to stay on speaking terms. Do you have any jurisdiction over the legal staff of the various divisions and bureaus?

Mr. GINNANE. No.

Mr. THOMAS. You are still on speaking terms, then.

Mr. GINNANE. That is right. They call on us for assistance from time to time, and we are glad to help.

Mr. WALRATH. I am glad you went into that, Mr. Chairman. We are asking for four more attorneys. The workload speaks for itself in the statistics.

ECONOMIC COUNSEL

At the end of page 13 I attempt to explain the reasons in our judgment for this increase in litigation. Beginning on page 14 we are talking about what is relatively a new subject but not entirely a new one, and that is the economic counsel.

There have been carriers, shippers——

Mr. THOMAS. You set that up 2 or 3 years ago. That is not new.

Mr. WALRATH. Relatively new. We have not done a good selling job up to now, Mr. Chairman. We have not had what we are asking for now. We are repeating our request.

The purpose of that in simple terms is this: We would like to get into these more important cases with both economic professional help and legal representation in order to build a complete record so that it cannot be said that we do not have all facets of the public interest reflected in these records which affect vast areas of our economy and the people. It is easy to think in terms of the merger cases.

Mr. THOMAS. We want to cooperate with you. You have authority to the tune of $100 a day for your experts. Wouldn't that take care of your needs?

Mr. WALRATH. We have explored that. The problem is to find those consultants on a high level——

Mr. THOMAS. If you can't find them, how can you set up your own bureau and get them? If $100 a day doesn't find them, how can you find them without it? Are you going to train them?

Mr. WALRATH. That is part of it; yes; sir.

Mr. THOMAS. It is a slow process, is it not?

Mr. WALRATH. For example, in the *Pennsylvania-New York* case, a consultant who has private practice as well simply cannot devote full time to this case for as long as it will take to complete it. Even working at full speed it will take 2 years——

KANSAS STATE UNIVERSITY LIBRARY
OCT 7
MANHATTAN, KANSAS

FUNCTION OF TRANSPORT ECONOMICS AND STATISTICS

Mr. THOMAS. What is the Bureau of Economics doing?

Mr. WALRATH. They are providing us, from their limited staff——

Mr. THOMAS. You have 180 people there.

Mr. WALRATH. When you consider all the other work they have to do it makes it pretty limited.

Mr. THOMAS. What other work do they have to do outside of motor carriers, railroads, and a few steamships?

Mr. WALRATH. Director Margolin had better speak to that. It is set out in detail. He is a busy man, sir. He should have A-plus for effort, too.

Mr. THOMAS. We are for him.

Mr. MARGOLIN. Thank you, sir. First of all, in the matter of the Pennsylvania-New York Central merger, we have a staff of 14 to 16 people so we are using one-third of our staff for just that particular purpose, to try to see that things get into the record that other parties are not bringing into the case.

With respect to the balance of the organization, just as an illustration, we receive reports on an annual, quarterly, and monthly basis dealing with financial, operating, and traffic information. We receive about 100,000 reports a year. All these reports have to be checked to see if the information is correct. There is frequently correspondence to see that we get proper and sufficient information.

From these reports, as well as the compilation, we put out a series of publications used widely by the Commission and used by many parties who appear before the Commission.

In addition we also prepare from a 1-percent sample of all carload traffic terminated, which has to be checked constantly, a series of publications revealing characteristics of railroads, revenues, tonnage, types of equipment used by mileage, States, and so on.

Mr. EVINS. Why don't you just promote Dr. Margolin and you will have your man. You don't have to go outside and seek him.

Do you think you can find one outside better than he is?

Mr. WALRATH. I don't believe it, Mr. Evins. His energies are limited, too. He is going in many directions at the same time.

Mr. EVINS. He can train some of these young men you have here.

LENGTH OF SERVICE OF CONSULTANTS

Mr. WYMAN. What is the limitation on who you can hire in terms of numbers and for how long at $100 a day?

Mr. SCHMID. There is no limitation in dollars. We have authority to hire someone not to exceed $100 a day. As long as we have the money we can hire then. Consultants are not allowed to be employed for more than 1 year on a temporary basis.

Mr. THOMAS. Is there a 6-month limitation?

Mr. SCHMID. It is 1 year.

Mr. WALRATH. And it is a full-time job.

Mr. OSTERTAG. That is within the amount of money you have for that purpose, is it not?

Mr. SCHMID. That is right.

Mr. EVINS. There has been no charge that the Interstate Commerce Commission is not looking after the public interest in these merger matters, is there?

Mr. WALRATH. Yes, sir; unjustified, however. When these commuters suffer as a train goes off, or when a service is combined with another one which bypasses them, they think we have overlooked the public interest.

Then in the labor field, despite our role, they say we failed to help the public interest. We say there is no justification but it is questioned.

Mr. EVINS. You don't have to put in a lot of facts. It is up to the judgment of the Commission to protect the public interest.

Mr. WALRATH. It would vary from case to case. Where there are insufficient parties in a case to develop a complete record, then our economic counsel would provide the function of making certain that had been done.

Where their people claim certain economies without a loss of service, and opponents claim that is not correct, in that event we would make studies to find out the true facts and be sure it is all reflected in the record before us.

Mr. EVINS. Does not your General Counsel represent the public interest?

Mr. WALRATH. Our General Counsel is not in those for the reasons he explained to the chairman. He does not take a partisan position in any event. He is our counsel to advise us.

Up to now we have had to meet this interim emergency situation. We have had to borrow people from enforcement work and ask them to get into the big merger cases.

Mr. EVINS. Two railroads want to merge. They will give their reasons for it and set forth all the facts and information in their behalf.

Mr. WALRATH. That is right.

Mr. EVINS. Who puts in information in behalf of the opposition to the merger?

Mr. WALRATH. Normally from groups of shippers who feel they will be bypassed when the services are combined and the labor interests who claim there will be losses of jobs in order to effect these economies. Each of those groups——

Mr. EVINS. I know they will put in testimony but who pleads their case?

Mr. WALRATH. That is the purpose of the economic counsel, to represent the broad public interest.

Mr. GOFF. If I might interrupt, of course, you must understand that the States appear, the cities appear, and they both have their attorneys. In one of these mergers invariably there is a lot of municipal and State representation.

Mr. EVINS. You feel after having all the States, all the cities, and all the organizations, you still need another man to put something in the record to tell the Commission whether the merger should take place or not?

Mr. GOFF. We don't believe in the ordinary case that that is true, but we want to be sure that no facet of the public interest has been omitted. I will answer unequivocably I don't go for the program of

having a public defender, a public counsel. The history of all those organizations has been that you just have another party in another case. They finish this and have another. You build up a bureaucracy of people who say they represent the public.

It is the job of the Commission to represent the public.

Mr. EVINS. You have Mr. Margolin here to advise you on these matters. I am openminded on the matter. I want to know if you need another man besides Mr. Margolin.

Mr. GOFF. Of necessity Mr. Margolin is doing a research job.

When there is a series of facts which should be before the Commission which has not been put in, that is a lawyer's job to appear in the case.

Mr. THOMAS. How often do you find that the parties in interest overlook any points which are in their best interest? Is that an exception?

Mr. GOFF. Very much so.

Mr. THOMAS. When you get a brief and both parties go at it, usually can you cut out about 50 or 60 percent of the material and save time but still get all the facts?

However, in their desire not to overlook anything you get a big record. You can safely assume 99 times out of 100 when the parties get through each side has put forth its best foot. Is that generally true?

Mr. GOFF. In general, it is true. However, our job is to be careful.

Mr. THOMAS. Could your people be more careful than the parties directly in interest?

Mr. WALRATH. The charge made from outside is that those are partisan views. Sometimes the little fellows, who in the aggregate constitute as much public interest as others, feel they are not represented.

I agree with Brother Goff this is not an approach to public counsel.

Mr. THOMAS. There is some narrow segment overlooked in these particular cases? You have a lot of what we call interpleaders. Everybody has an interest, whether he is large or small. If it is important, he will be there and he will ask the Commission for the privilege of coming in. I imagine they are welcome. That is where you get every angle of the case, and that is where you get the 16,000-page records.

Mr. WALRATH. We have another party in most merger cases now, and that is the Department of Justice. They are active parties, too.

Mr. THOMAS. We are not arguing with you as to whether we think well of it or not. We try to go along with the Commission's desire to do its job. We want to help you.

Go ahead.

Mr. WALRATH. Just to close that subject for the moment, I think I could agree with every question you have asked. We think we are the representatives of the public interest and we think we have done that job in most cases. However, the people outside who view those things and who may suffer some inconvenience as a result of our action, and who were not able to employ counsel to be in there, feel we have fallen short, and have stated so. We don't believe we have.

On the balance of the points I touched on in here, we discussed briefly the increase in workload and in rate adjustments which is put-

ting more than a human strain on the Board of Suspension and their personnel. We are asking for a small increase there.

In the Bureau of Motor Carriers we are asking for a small increase.

ELECTRONIC COMPUTER EQUIPMENT

Mr. THOMAS. How much electronic computing equipment do you use in that division? Can it be used advantageously?

Mr. WALRATH. We are doing that. Mr. Margolin will speak to that. On page 16 of my prepared statement there is an approach to it.

Mr. MARGOLIN. We just recently had installed an RCA–301 computer, a medium-sized computer. We have that now in the process of conversion activities.

Mr. THOMAS. Are you the rate man, too, besides the research man?

Mr. MARGOLIN. Just a research man trying to get the facts and figures before the Commission.

Mr. THOMAS. You are indispensable. Go ahead.

Mr. MARGOLIN. Thank you. With that new equipment we have much greater capacity than we had before. We have this without any additional cost. This means we will be able to provide more efficiently and expeditiously information that we couldn't before.

Mr. THOMAS. Is this on rates and tariff schedules?

Mr. MARGOLIN. I am referring to some of the manual work we have to do in processing reports. Bit by bit we will convert that to the computer. A lot of the output will be coming out in typed form rather than prepared manually.

COMPUTER STUDIES

Mr. SCHMID. I would like to mention one other thing in this regard. We have a staff, and this staff is studying selective operations throughout the Commission in tariff work——

Mr. THOMAS. What have you come up with?

Mr. SCHMID. Good results.

Mr. THOMAS. What activities out there show the most promise of cutting down your backlog, time lag, and so on?

Mr. SCHMID. The best example we have had so far is where we have successfully developed a means where computers can be used in cost work.

Mr. THOMAS. What do you mean by that?

Mr. SCHMID. Cost finding work, cost information generally used in our rate work.

Mr. THOMAS. You have so many schedules and tariff changes, whether it involves railroads or buses or trucks. When you get to that part of the budget you have some very staggering figures. I have doubts about what they mean. Why can't you get some computers to do this for you?

Mr. SCHMID. We are working on it now.

Mr. THOMAS. For how long?

Off the record.

(Discussion held off the record.)

Mr. SCHMID. We think it can be done and we are trying to find out how. The Bureau of Standards is working with our staff.

Mr. THOMAS. How much do you transfer to them in the way of cash for this work?

Mr. SCHMID. About $34,000 last year for personal services and for the use of their equipment.

Mr. THOMAS. What are they doing for you? How long have they been working on it?

Mr. SCHMID. About a year now. They are working under Mr. Ryan.

Mr. THOMAS. Tell us about it, Mr. Ryan.

Incidentally, Mr. Ryan, you do a tremendous job. Your budget is very good. The amount of detail work which goes into these tables shows that you deserve A-plus.

Mr. WALRATH. He writes it so even I can understand it, sir.

Mr. RYAN. In 1961 the Commission approved a plan for setting up a small group of employees trained in automatic data processing systems with the Standards Bureau supplying the guidance to study certain areas where it appeared that automatic data processing would be possible.

The one we thought would be the best field was cost-finding work where the Section of Cost Finding has developed certain cost formulas which it uses in connection with the rail rate cases, motor rate cases, and also they have recently come up with a cost formula for water carriers.

When a rate is filed with the Bureau of Traffic, if it is protested, it goes to the Board of Suspension. This Board looks at that rate as to whether it is a compensible rate. They get information from the cost section——

Mr. THOMAS. If I may interrupt you, the basis of your rates and suspensions all goes back to cost, does it not?

Mr. RYAN. That is right.

Mr. THOMAS. You have to do your original cost work to figure out whether the rate is unreasonable, and so on. Your initial step is in the cost.

Mr. RYAN. At this point, yes, sir.

Mr. THOMAS. What other point is there? That is about most of it, is it not? A carrier's cost has gone up. What else is there to decide?

Mr. RYAN. There are a lot of judgment factors.

Mr. THOMAS. What are the judgment factors?

Mr. RYAN. I would rather the Chairman of the Commission answer that.

Mr. WALRATH. I will say this and then go back to Mr. Ryan.

Mr. THOMAS. Go ahead.

Mr. WALRATH. I am like the agency you mentioned a while ago. We have not found the electric brain to make the decisions for us, but the brain will do what Mr. Ryan explained it will do, the manual work which heretofore had to be done in order to furnish the suspension board and then give us an accurate analysis of the cost factor.

Mr. THOMAS. Can you come up with a black and white figure on cost?

Mr. WALRATH. That is what it amounts to. It comes out with an answer that no one can challenge.

Mr. THOMAS. There is a gray area there, and within that area that is where the Commission has to exercise judgment.

Mr. WALRATH. That is right. When all the facts are before the Board of Suspension or the Division, that is where the brain ends and the human factor comes into play.

Mr. THOMAS. Let us return promptly at 1 o'clock.

AFTERNOON SESSION

Mr. THOMAS. Will the committee please come to order.

Mr. Chairman, had you finished your statement?

Mr. WALRATH. I had substantially finished, Mr. Chairman. We had gotten down to the point of the automatic data processing study, and I believe we gave you answers to that unless you have further questions.

On the Office of the Secretary there is a very short paragraph at the bottom of page 16.

On the last full page, page 17, we break down that figure of $174,378 for you to show at a glance what that consists of.

Then on page 18, Mr. Chairman, I get to the point I wanted to thank you for being so patient up to this point and to offer ourselves for questions.

Mr. THOMAS. You made a very fine statement and we appreciate your frankness and your help and good judgment, you, Judge Goff and all the rest of you.

Mr. Jonas, if you have no general questions take up four or five activities in the justification and I will follow up. I would suggest you put some of these tables in the record particularly the summary tables.

COMPARISON OF 1963 AND 1964 BUDGETS BY OBJECT CLASSIFICATION

Mr. JONAS. Well, there is a very good summary table here at the beginning, page I. I think we should have it in the record.

(The page referred to follows:)

SALARIES AND EXPENSES, INTERSTATE COMMERCE COMMISSION

	1963 estimate	1964 estimate
Appropriation or estimate	[1] $23,550,000	[2] $25,450,000

[1] Includes an estimated supplemental appropriation of $944,000 for cost of pay increases authorized by Public Law 87-793, approved Oct. 11, 1962.

[2] Excludes an estimate of $175,000 and 15 positions for emergency preparedness functions for which reimbursement will be received from the Office of Emergency Planning.

Obligations by objects

Object classification	1963 estimate	1964 estimate
Number of permanent positions:		
Departmental	1,650	1,703
Field	817	837
Total	2,467	2,540
Average number of all employees	2,426	2,481
11 Personnel compensation	$19,647,529	$21,261,207
12 Personnel benefits	1,454,244	1,566,188
21 Travel and transportation of persons	1,310,620	1,345,320
22 Transportation of things	26,700	25,935
23 Rent, communications, and utilities	332,207	356,250
24 Printing and reproduction	213,400	232,000
25 Other services	102,900	125,600
26 Supplies and materials	260,370	272,770
31 Equipment	202,030	264,730
Total obligations	23,550,000	25,450,000

Mr. JONAS. I do not think we can get this big table in page 1, but it is a fine one.

ORGANIZATIONAL CHARTS

Mr. THOMAS. And take a look at the organization chart in the back. It is a very excellent chart. If that can be photostated and compressed, it should be put in the record.

Mr. JONAS. There are two pages to it.

Mr. THOMAS. Yes, one is field operations and one is departmental.

(The charts referred to were filed with the committee.)

COMPARISON OF POSITIONS AND COSTS, 1963 WITH 1964

Mr. JONAS. This table on page 2 also contains a mass of information that would be helpful to those who read the record. I think it should be in also.

(The page referred to follows:)

INTERSTATE COMMERCE COMMISSION

Comparison of estimated number of positions and total obligations by activities for fiscal year 1963 with 1964, including the component bureaus, sections, and offices of each activity

Activity number, title, and component bureaus, sections, and offices	Fiscal year 1963		Fiscal year 1964 [1]		Comparison, 1963 with 1964	
	Positions	Amount	Positions	Amount	Positions	Amount
1. Regulation of carriers' rates, practices, operating authorities, and finance:						
Bureau of Accounts: Section of Cost Finding	45	$360,919	47	$399,047	+2	+$38,128
Bureau of Finance	98	1,179,126	103	1,288,683	+5	+109,557
Bureau of Operating Rights	210	2,264,416	228	2,501,686	+18	+237,270
Bureau of Rates and Practices	107	1,284,367	107	1,357,196	----	+72,829
Bureau of Traffic:						
Board of Suspension	48	415,323	52	467,042	+4	+51,719
Fourth Section Board	11	113,809	11	120,252	----	+6,443
Commissioners and their offices: Adjudicatory activities	79	902,276	79	943,208	----	+40,932
Office of the Managing Director: Section of Administrative Services: Stenographic Branch	35	170,898	35	180,526	----	+9,628
Office of the Secretary: Section of Dockets	100	505,178	100	534,060	----	+28,882
Printing and reproduction	----	80,000	----	113,000	----	+33,000
Total, activity No. 1	733	7,276,312	762	7,904,700	+29	+628,388
2. Compliance:

Total, Interstate Commerce Commission	2,467	23,550,000	2,540	25,450,000	+73	+1,900,000

[1] Excludes reimbursement of $175,000 from Office of Emergency Planning for emergency preparedness functions.
[2] Cost of operation of this office is prorated equally among the three sections of the Bureau of Safety and Service.

SUMMARY OF ESTIMATED OBLIGATIONS FOR 1964 BY BUREAU OR OFFICE

Mr. JONAS. Mr. Chairman, I do not know if you want all these tables in.

Mr. THOMAS. No. They are good, though.

Mr. JONAS. There is an excellent table on page 3. It has virtually the same information but it is broken down more. We will put that in.

(The page referred to follows:)

Summary of estimated obligations for the fiscal year 1964 by objects and functions [1]

Bureau or office	Personal services and benefits		Other objects										Total obligations
	Positions	Amount	Travel and transportation of persons	Transportation of things	Rent, communications, and utilities			Printing and reproduction	Other services	Supplies and materials	Equipment	Total, other objects	
					Rent	Communications	Official mail						
Commissioners and their offices	102	$1,154,648	$15,000			$8,056			$2,402	$10,908	$7,535	$43,901	$1,198,549
Managing director:													
Office	13	141,722	1,100			826			339	1,396	2,272	5,933	147,655

Railroad safety	144	1,596,575	302,550	2,935		1,400	5,490		600	3,240	5,210	321,425	1,918,000
Total, safety and service	348	3,632,336	638,420	7,246		11,537	9,150		3,230	15,262	19,204	704,049	4,336,385
Traffic	259	2,101,150	1,000			14,635			4,166	19,390	15,687	54,878	2,156,028
Transport economics and statistics	188	1,362,540	8,000		$96,188	9,405			3,043	12,768	12,793	142,197	1,504,737
Water carriers and freight forwarders	15	152,531	5,700	48		1,071			301	1,450	1,002	9,572	162,103
Special items:													
Official mail							82,000					82,000	82,000
Payments to other agencies		65,100							20,000			20,000	85,100
Printing and reproduction								$232,000				232,000	232,000
Travel of witnesses			5,000									5,000	5,000
Total Interstate Commerce Commission	2,540	22,827,395	1,345,320	25,935	120,300	144,800	91,150	232,000	125,600	272,770	264,730	2,622,605	25,450,000

[1] Excludes reimbursement of $175,000 from Office of Emergency Planning for emergency preparedness functions.

[2] Cost of operation of this office is prorated equally among the three sections of the Bureau of Safety and Service.

COMMISSIONERS AND THEIR OFFICES

Mr. JONAS. Now we will take up the Commissioners and their offices. There is a slight change there. They are asking for only a small increase of $52,916. Insert page 4 in the record.

(The page referred to follows:)

COMMISSIONERS AND THEIR OFFICES

This function includes the Commissioners, their private secretaries, attorney-advisers and the stenographic and clerical help required in their offices.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	102	102	0
Personnel compensation	$1,025,409	$1,074,909	+$49,500
Personnel benefits	76,323	79,739	+3,416
Total personal services and benefits	1,101,732	1,154,648	+52,916
Travel	15,000	15,000	0
Total	1,116,732	1,169,648	+52,916

The increase of $52,916 for personal services and benefits is for 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87-793.

The 1964 budget provides 102 positions for these offices which is the same as authorized for the current fiscal year, and are separated by categories as follows:

Commissioner	11
Legislative attorney	1
Liaison officer	1
Attorney-adviser	39
Private secretary	11
Secretarial assistant	11
Secretary-stenographer	1
Clerk-stenographer	11
Clerk and typist	16
Total	102

Commissioners have individual responsibility for the preparation of final reports in assigned cases. These cases generally are those which have been the subject of an oral hearing and which require a division or Commission report. The attorney-advisers review reports and memorandums submitted to the Commissioners for their action and perform such other duties as are directed by the Commissioners.

The secretarial assistants take dictation from the Commissioners and maintain the files in their offices. The clerk-stenographers take dictation from the examiners and handle such other work as may be assigned to them by the examiners or by the private secretary.

Mr. THOMAS. They do not have but 102 employees but when you add them all up together there are in excess of 156 people doing all the managerial work.

Mr. JONAS. Is that not an overbalanced condition?

Mr. WALRATH. You are talking about the Commissioners' offices?

Mr. JONAS. Yes. Give us some justification for that.

Mr. WALRATH. I can speak primarily of my office and that is multiplied by 11 with very little variation.

I have three attorney advisers, a secretary, a stenographer, and a typist. I also have a clerk-typist who serves a dual function of messenger and carrying my papers around.

Mr. JONAS. Do you bring those lawyers to advise you in courtwork? You cannot use three? Suppose they give you conflicting advice, which do you follow?

Mr. WALRATH. While they are not specialists, you tend to assign certain kinds of cases to one and other types to another. We have to work on a number of things at the same time and it keeps them busy.

Since I have become Chairman I have one additional typist because the paperwork in the Chairman's office is quite heavy.

My staff, I think, is typical of the 11 Commissioners.

Mr. JONAS. You are not asking for additional people?

Mr. WALRATH. No.

Mr. JONAS. The increase you are asking for is accounted for by the fact there are 2 extra days to be compensated for?

Mr. WALRATH. Plus the increase in salary scale.

Mr. JONAS. How much of that increase did you absorb last year?

Mr. SCHMID. We absorbed $12,000 for the current year.

Mr. JONAS. Did not the President issue a directive calling on you to absorb it?

Mr. SCHMID. Yes, we got the same letter the other agencies received. However, we were able to show the Bureau of the Budget that any absorption of pay increase would seriously impair the Commission's ability to handle the workload.

TOTAL VACANCIES

Mr. JONAS. How many vacancies did you have on your rolls on January 1?

Mr. SCHMID. About 50, which is our normal lapse figure.

Mr. JONAS. Do you have 50 vacancies almost all the time?

Mr. SCHMID. That is correct. These positions are unfinanced.

OFFICE OF THE MANAGING DIRECTOR

Mr. JONAS. The Managing Director has some responsibilities. You say in the justifications he is the chief official in charge of the internal management of the Commission's staff organization. That is really a housekeeping activity; is that correct?

Mr. SCHMID. Yes, sir.

Mr. JONAS. He has a staff of only 13. You have more people than that engaged in the housekeeping activity?

Mr. SCHMID. That is correct, because under the Office of the Managing Director are the Section of Administrative Services, Budget and Fiscal Office, and the Personnel Office. And 6 of those 13 people are engaged in automatic data processing studies.

Mr. JONAS. You are asking for an increase of $32,219 in that Office the next year?

Mr. SCHMID. That is correct.

Mr. JONAS. And 13 of your new positions are allocated to this activity?

Mr. SCHMID. Three. There is an increase of three.

Mr. JONAS. Would that bring it up to 13 or 3 above 13?
Mr. SCHMID. It brings it up to 13.
Mr. JONAS. The 13 figure is a projected figure for 1964?
Mr. SCHMID. That is correct.
Mr. JONAS. Let us put this table on page 5 in the record.
(The page referred to follows:)

OFFICE OF THE MANAGING DIRECTOR—MANAGING DIRECTOR'S OFFICE

The Managing Director is the chief official in charge of the internal management of the Commission's staff organization. Under policies established by the Commission, he administers, plans, manages, directs, and coordinates the administrative activities of all bureaus and offices, and supervises the activities relating to the Commission's budget, personnel, and administrative and central stenographic services. Under the Office of the Managing Director are the Section of Administrative Services, Budget and Fiscal Office, and the Personnel Office.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	10	13	+3
Personnel compensation	$101,917	$130,156	+$28,239
Personnel benefits	7,586	11,566	+3,980
Total personal services and benefits	109,503	141,722	+32,219
Travel	1,100	1,100	0
Total	110,603	142,822	+32,219

The increase of $32,219 for personal services and benefits is primarily for the three additional positions, 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87-793.

The 1964 budget provides 13 positions which is 3 more than authorized for the current fiscal year. These positions are separated by categories as follows:

Managing Director	1
Assistant to Managing Director	1
Special assistant	2
Systems analyst	6
Administrative assistant	2
Clerk-typist	1
Total	13

During the fiscal year 1962 the Commission organized and assigned to a small staff the work involved in extending automatic data processing techniques to its various operations. Arrangements were made with the National Bureau of Standards for the assignment of one full-time and two part-time representatives to work with the Commission's staff. The assistance of the National Bureau of Standards will be required for the entire fiscal year 1964.

The ADP staff commenced immediately to progress three assigned priority areas. As of June 30, 1962, all three areas have had substantial work done but the accomplishments with respect to cost finding activities border on the dramatic. Two cost formulas, one for rail ratemaking matters and the other for motor carrier ratemaking which had historically been applied on a manual basis were automated for a computer. Personnel resources savings are substantial but more important, these routines provide a capability of producing timely data which in turn is vital to the disposition of ratemaking problems.

The 1964 budget provides for payment to the National Bureau of Standards for the detail of three technicians with appropriate backup personnel at a cost of $65,100. It also includes $20,000 for machine testing and runs on equipment in service centers. The three additional positions requested for 1964 are to provide additional expert subject matter support.

Office of the Secretary

Mr. Jonas. What about the Office of the Secretary? Briefly, what are his responsibilities? Are they those set out on page 16 of the justification?

Mr. McCoy. That is correct. That is a very good statement.

Mr. Jonas. You are asking for an increase of $9,346?

Mr. McCoy. That is for new attorneys to do the index digesting of the Commission's reports.

Mr. Jonas. How many attorneys are on your staff now?

Mr. McCoy. Twelve.

Mr. Jonas. We will place page 16 of the justifications in the record, which contains a succinct statement of the duties of the Office of the Secretary. Also include the narrative on the other three activities under the Office of the Secretary.

(The material referred to follows:)

Office of the Secretary

The Office of the Secretary consists of the Commission's Secretary and his office, the Sections of Dockets, Mails and Files and Reference Services. The Section of Reference Services is chiefly responsible for publication of the bound volumes of Commission reports and the Interstate Commerce Act Annotated.

Secretary's Office

All Commission announcements, whether by the entire Commission, divisions, individual Commissioners, boards of employees, or individuals, are made through this office. Information and public relations programs relating to the Commission's quasi-judicial and quasi-legislative functions are planned, coordinated and put into effect by this office.

The Secretary's Office also prepares certification of copies of, or extracts from, any records filed with the Commission, under the Commission's seal, for use in judicial proceedings and/or other purposes. Other duties include preparation of the Commission's official minutes, and a variety of special duties assigned by the Commission as occasions arise from time to time.

The Secretary also serves as a consultant and adviser to the Commission and is personally called upon for advice respecting a wide diversity of legal problems.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	21	21	0
Personnel compensation	$149,852	$158,604	+$8,752
Personnel benefits	10,841	11,435	+594
Total personal services and benefits	160,693	170,039	+9,346
Travel	150	150	0
Total	160,843	170,189	+9,346

The increase of $9,346 for personal services and benefits is for two extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87-793.

Section of Dockets

This section is engaged in examining, docketing, and recording all complaints, answers, petitions, applications, motions, and other formal papers offered for filing with the Commission; conducting correspondence relating to pleading and practice; and preparing oral argument calendars. All service of decisions, rules, orders, notices, and other processes by regular mail, registered mail, or personal

service upon designated agents of carriers, according to the requirements of the law, is performed by this section. Transcript of hearings and arguments, including all exhibits filed in connection therewith, are checked. Applications for admission to practice before the Commission are examined and recorded, and enrollments of practitioners are recorded. The section is also responsible for the recordation of documents evidencing the lease, mortgage, etc., of railroad equipment and for maintaining an index of such documents required to be filed under regulations prescribed by the Commission pursuant to section 20c of the Interstate Commerce Act.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	100	100	0
Personnel compensation	$457,982	$485,000	+$27,018
Personnel benefits	34,003	35,867	+1,864
Total personal services and benefits	491,985	520,867	+28,882
Travel	500	500	0
Total	492,485	521,367	+28,882

The increase of $28,882 for personal services and benefits is for 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87–793.

SECTION OF MAILS AND FILES

This section handles all incoming and outgoing telegrams, mail, and express shipments for the Commission's office in Washington; refers correspondence, pleadings, etc., in formal and informal proceedings and letters pertaining to general administrative matters to the proper bureau or office; records selected correspondence and documents and maintains selected general files.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	30	30	0
Personnel compensation	$126,339	$133,877	+$7,538
Personnel benefits	9,405	9,927	+522
Total personal services and benefits	135,744	143,804	+8,060
Travel	350	350	0
Total	136,094	144,154	+8,060

The increase of $8,060 for personal services and benefits is primarily for two extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87–793.

SECTION OF REFERENCE SERVICES

The major functions of this section are to provide legal reference services, publish bound volumes of Commission reports and the Interstate Commerce Acts Annotated, and maintain the library as a current working collection of books, periodicals, and pamphlets dealing with transportation law, as well as economics, statistics, safety, finance, etc., in the transportation field.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	22	24	2
Personnel compensation	$148,643	$166,380	+$17,737
Personnel benefits	11,033	12,301	+1,268
Total personal services and benefits	159,676	178,681	+19,005

The increase of $19,005 for personal services and benefits is primarily for the two additional positions requested, two extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87-793. The 1964 budget provides 24 positions for this section, which is an increase of two over the 22 positions authorized for the current fiscal year. These positions are separated by categories as follows:

Chief of section	1
Attorney-adviser	4
General attorney	8
Editorial clerk	4
Legal assistant	1
Librarian	2
Library assistant	2
Clerk-stenographer	1
Clerk-typist	1
Total	24

The additional positions requested are two GS-7 general attorneys to bring index-digesting of Commission reports to a current basis.

Mr. JONAS. What is the total number of positions in the Office of the Secretary?

Mr. THOMAS. 175.

Mr. JONAS. Off the record.

(Discussion off the record.)

Mr. MCCOY. I think the difference is in the immediate office of the Secretary and the work that is done under the direction of the Secretary.

Mr. JONAS. You refer now to the section of dockets, section of mails and files, and section of reference services?

Mr. MCCOY. Yes.

Mr. JONAS. Those three services are performed under the jurisdiction and supervision of the Secretary?

Mr. MCCOY. That is correct.

Mr. JONAS. The total, then, in the Secretary's Office in the three sections would be 100 in the section of dockets, plus 30 in the section of mails and files, plus 24 in the section of reference services?

Mr. RYAN. 173 in fiscal 1963 and 175 for fiscal 1964.

Mr. JONAS. You are asking for two additional people in all the sections under the Secretary?

Mr. RYAN. Yes. Those are two attorneys for the Section of Reference Services.

Mr. BOLAND. How many do you have on board as of January 1 in this particular activity in the Secretary's Office and the Section of Mails and Files and the Section of Reference Services?

Mr. RYAN. 166.

Mr. BOLAND. As of January 1?

Mr. RYAN. As of January 19, sir. We have a ceiling of 173.

Mr. BOLAND. You do not need additional personnel there, do you?

Mr. RYAN. There is always a lapse there. These are two lawyers for the Reference Services where we have a ceiling of 22 and the on-board figure is 21.

LEGAL STAFF IN OFFICE OF THE SECRETARY

Mr. JONAS. You really do not need a heavy complement of lawyers in the Office of the Secretary, do you? Nor do you need them in the Section of Mails and Files?

Mr. McCoy. We do not have lawyers there, only in the Section of Reference Services.

Mr. Jonas. How many lawyers do you have in that section now?

Mr. Ryan. Twelve lawyers.

Mr. Jonas. What do they do?

Mr. McCoy. They do the index digesting of the Commission's reports to make that information available to the staff of the Commission.

Mr. Goff. They are not in high civil service grades.

Mr. McCoy. They are in the beginning grades.

Mr. Jonas. They are beginners. You are looking for young law school graduates who have not started practicing?

Mr. Goff. Yes.

Mr. McCoy. And it is a training ground for other jobs in the Commission.

Mr. Jonas. Now you put your finger on it.

Mr. McCoy. If it turns out to be that way.

Office of the General Counsel

Mr. Jonas. We have already talked about the Office of the General Counsel. I do not think we need to go into details with respect to that Office, but I think it should be said in summary or review that you have 29 people on your staff, Mr. General Counsel.

Mr. Walrath. Our General Counsel had a 48-hour notice to go to Detroit on the C. & O.–B. & O. case.

Mr. Ryan. He has 22 and we are requesting an increase of 7 positions.

Mr. Walrath. That Detroit matter was brought about by a suit entered by the railway labor people and our General Counsel had only a 48-hour notice to go and defend it.

Mr. Thomas. That is understandable.

Mr. Jonas. The paragraph beginning at the bottom of page 27 contains some information that I think would be helpful in understanding why you need such a large staff for the General Counsel. That paragraph reads:

> There were 124 cases attacking orders of the Commission instituted in the U.S. district courts during fiscal year 1962 as compared to 64 such cases instituted during fiscal year 1961 or an increase of 94 percent.

How do you account for that increase in the number of people who are questioning your decisions?

Mr. Walrath. That is a good question, Mr. Jonas. It is a matter of judgment on our part but we think we see the reasons. On page 13 of my prepared statement I sought to cover that. There has been, of course, an increase in court cases due to the intense intermodal and intramodal competition in the surface transportation industry.

The second phase is that our stepped-up enforcement activities against these illegal and questionable operators frequently end up in cease-and-desist orders and they do not give up easily, they go in court and we have to defend our actions.

Mr. Jonas. Seriously, I do not see how you can reconcile the advice you get from the various counsel. You have three lawyers on your

staff and you seek the opinion of the General Counsel and you cannot get unanimity of opinion from all of them.

Mr. WALRATH. It is not a matter of unanimity of opinion. The three men on my staff—and I think that is typical of the other Commissioners' offices—help me analyze the records before us and the reports my office receives, and they do an entirely different job than the General Counsel does. The General Counsel passes on technicalities for the entire Commission and then he in turn has to defend the orders of ours which are challenged and go to court.

CASELOAD—GENERAL COUNSEL

Mr. JONAS. Is there any backlog in that office? Is he abreast of his work?

Mr. WALRATH. No, sir. We are having trouble meeting deadlines. In the past few months, particularly, with the many cases pending in court he has had to work overtime to the point we have had extra printing costs on our briefs and pleadings.

Mr. JONAS. I think the table on page 30 would be appropriate to put in the record. It shows the actual figures for 1960, 1961, and 1962 and the estimates for 1963 and 1964 of cases at the beginning of the fiscal year, cases instituted during the year, cases concluded during the year, and cases pending at the end of the year.

(The table referred to follows:)

Office of the General Counsel caseload

	Actual			Estimate	
	1960	1961	1962	1963	1964
Cases at beginning of fiscal year	56	78	93	149	196
U.S. district courts	53	72	82	139	187
U.S. Court of Appeals		4	3	2	1
U.S. Supreme Court	3	2	8	8	8
Cases instituted during year	79	80	139	150	161
U.S. district courts	66	64	124	134	144
U.S. court of appeals	4	3	2	2	2
U.S. Supreme Court	9	13	13	14	15
Total number of cases in process during year	135	158	232	299	357
Cases concluded during year	57	65	83	103	123
U.S. district courts	47	54	67	86	105
U.S. court of appeals		4	3	3	2
U.S. Supreme Court	10	7	13	14	16
Cases pending at end of year	78	93	149	196	234
Opinions prepared on legal questions in Commission proceedings, legislative and advisory	164	214	272	300	325

Mr. JONAS. Are there any questions on the Office of the General Counsel?

Mr. THOMAS. Go to the big bureaus now.

Mr. JONAS. I will yield to Mr. Boland a while.

Bureau of Accounts

Mr. Boland. Bureau of Accounts. Put page 31 in the record.
(The page referred to follows:)

Bureau of Accounts

The principal functions are to (1) formulate and prescribe uniform systems of accounts for all types of carriers subject to the Interstate Commerce Act; (2) police the account of such carriers and ascertain that they conform to prescribe accounting regulations; (3) prescribe specific depreciation rates to be used by railroads, pipelines, and water carriers; (4) prepare studies and analyses of the cost and revenue from transportation services of the various types of carriers subject to the jurisdiction of the Commission and participate in hearings before the Commission; and (5) maintain inventories of carrier property and develop valuation data pertaining to railroads and pipelines.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	178	189	+11
Personnel compensation	$1,476,192	$1,637,616	+$161,424
Personnel benefits	109,198	120,693	+11,495
Total personal services and benefits	1,585,390	1,758,309	+172,919
Travel	125,000	140,600	+15,600
Total	1,710,390	1,898,909	+188,519

The increase of $172,919 for personal services and benefits is primarily for the 11 additional positions requested, 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87–793. The increase of $15,600 for travel expenses is requested to provide sufficient travel funds for the increased number of carriers' accounts to be examined by additional personnel requested for the Section of Field Service.

Mr. Boland. We note an increase of $188,519, mostly occasioned by 11 additional jobs, the pay increase and the 2 extra days in 1964. You had 178 positions in 1963 and are asking for 189 in 1964. That does not square with the number in the large chart on page 216. What is the discrepancy?

Mr. Ryan. This is the Washington staff and you have to add the field staff.

Mr. Boland. Put in pages 33 and 37.
(The pages referred to follow:)

Director's Office, Bureau of Accounts

This office includes the director and his assistants who are engaged principally in the supervision of the various sections of the bureau, and a clerical staff to perform stenographic, typing and routine administrative duties. Functions include planning of general and special work programs; holding staff conferences on policy and technical matters; reviewing legislative recommendations of the Congress to determine adequacy of accounting procedures affected by changes in laws; preparing work progress reports and recommendations to the Commission; developing programs for research involving major accounting issues, industry economic and cost trends and new technological changes; conducting meetings and advising officials. Commissioners, other bureau directors, Government agencies and others regarding accounting, cost finding, rates, legislative matters, field examinations, valuation and various administrative activities.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	11	11	0
Personnel compensation	$104,088	$110,338	+$6,250
Personnel benefits	7,755	8,187	+432
Total personal services and benefits	111,843	118,525	+6,682
Travel	1,000	1,000	0
Total	112,843	119,525	+6,682

The increase of $6,682 for personal services and benefits is for two extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87-793.

The 1964 budget provides 11 positions for this office which is the same as authorized for the current fiscal year. The positions are separated by categories as follows:

Director and assistant	3
Special assistant	1
Assistant to director	1
Administrative assistant	1
Clerks and stenographers	5
Total	11

Phases of work which can be expressed in work units are set forth in the following table:

	Actual			Estimate	
	1960	1961	1962	1963	1964
Review of proposed accounting required by Commission orders in cases covering abandonments of line, purchases, mergers, and consolidations of carriers properties and issuance of securities	448	535	502	575	600
Interpretations of the uniform systems of accounts and other regulations furnished carriers and public	920	1,247	1,201	1,300	1,400
Special accounting authorizations requiring approval of the Commission	29	54	26	65	65

Mr. BOLAND. Where are you putting this group of 11 you are requesting?

Mr. PAOLO. Two have been included in the Office of Cost Finding.

SECTION OF COST FINDING

Mr. BOLAND. Put in page 38 in the record.

(The page referred to follows:)

SECTION OF COST FINDING, BUREAU OF ACCOUNTS

The functions of this section embrace the development of cost formulas, preparation of cost studies, analyses of cost evidence, and related work for use in ratemaking proceedings and for release to the public.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	45	47	+2
Personnel compensation	$326,320	$360,409	+$34,089
Personnel benefits	24,306	26,737	+2,431
Total personal services and benefits	350,626	387,146	+36,520
Travel	1,000	1,000	0
Total	351,626	388,146	+36,520

The increase of $36,520 for personal services and benefits is primarily for the two additional positions requested, two extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87–793.

The 1964 budget provides 47 positions which represents an increase of 2 over the 45 authorized for the current fiscal year. These positions are separated by categories as follows:

Supervisory cost analyst	2
Cost analyst	38
Transportation economist	1
Secretary-stenographer	1
Statistical clerk and clerk	5
Total	47

The two additional positions are requested to enable the Bureau to develop new and revised cost formulas, to furnish more accurate and current cost data, to handle the increased workload anticipated for fiscal year 1964, and to expedite the analysis of costs introduced in Commission proceedings.

Phases of work which can be reflected in work units for the fiscal years 1960, 1961, and 1962 and estimates for the fiscal years 1963 and 1964 are as follows:

	Actual			Estimate	
	1960	1961	1962	1963	1964
1. Analyses of cost evidence in formal and I. & S. cases:					
On hand beginning of year	17	11	26	25	20
Received during year	110	133	134	152	172
Disposed of during year	116	118	135	157	185
On hand close of year	11	26	25	20	7
2. Territorial and special commodity studies:					
On hand beginning of year	6	7	7	9	11
Received during year	9	7	6	9	8
Disposed of during year	6	7	4	7	11
On hand close of year	[1] 9	7	9	11	8
3. Formulas and other special studies:					
On hand beginning of year	10	3	7	8	6
Received during year	18	9	8	6	5
Disposed of during year	24	5	7	8	8
On hand close of year	[2] 4	7	8	6	3
4. Investigation instituted by the Commission: [3]					
On hand beginning of year	-------	3	4	1	2
Received during year	-------	6	1	5	6
Disposed of during year	-------	5	4	4	5
On hand close of year	-------	4	1	2	3
5. Suspension and temporary authorities boards' cases:					
On hand beginning of year	0	0	0	0	0
Received during year	2,687	2,740	3,027	3,200	3,375
Disposed of during year	2,687	2,740	3,027	3,200	3,375
On hand close of year	0	0	0	0	0

[1] Includes docket No. 32385 and docket No. 32912, which are shown under item 4 in subsequent years.
[2] Includes docket No. 33145, which is shown under item 4 in fiscal year 1961 and thereafter.
[3] This relates to cases for which the Cost Finding Section prepares exhibits and testimony.

SECTION OF FIELD SERVICE

Mr. BOLAND. Put page 44 and the table on 46 having to do with the Section of Field Service in the record.

(The material referred to follows:)

SECTION OF FIELD SERVICE, BUREAU OF ACCOUNTS

The functions of this section are to conduct field examinations at scheduled intervals of the various types of transportation companies subject to the jurisdiction of the Interstate Commerce Commission and to perform special investigations requested by the Commission and other bureaus. The field examinations are conducted to (1) assure compliance with prescribed accounting and related regulations; (2) verify from source records that prescribed annual and interim financial reports filed with the Commission fairly and accurately present carriers' earnings and financial conditions; (3) verify the accuracy and completeness of property valuation reports filed by railroad and pipeline companies; (4) assist new carriers in setting up their accounting systems; and (5) ascertain that carriers are not violating regulations and laws pertaining to extension of credit, rebates and concessions, issuances of securities, unauthorized control of other carriers, and the Clayton Anti-Trust Act. Special investigations are made to obtain evidence for use in law-enforcement proceedings, and develop financial data for Commission proceedings involving such matters as issuances of securities, guarantee of loans, and mergers.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	65	74	+9
Personnel compensation	$565,005	$657,740	+$92,735
Personnel benefits	41,560	48,241	+6,681
Total personal services and benefits	606,565	705,981	+99,416
Travel	120,500	136,100	+15,600
Total	727,065	842,081	+115,016

The increase of $99,416 for personal services and benefits is primarily for the nine additional positions requested, 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87–793. The increase of $15,600 for travel is to provide sufficient travel funds for the additional positions requested.

The 1964 budget provides for 2 departmental positions and 72 field positions which represents an increase of 9 positions over the 1963 authorization.

Proposed field examination program

Examination interval by type of carrier	Number of carriers June 30, 1962	Annual target	Estimated man-days required [1]	Examinations completed fiscal year 1962
1-year basis:				
Railroads	67	67	7,296	33
Pipelines	93	93	893	22
Motor carriers	596	596	5,066	266
2-year basis:				
Railroads	73	37	551	26
Motor carriers	419	220	1,276	126
Water carriers	26	13	78	5
3- to 6-year basis:				
Railroads	501	114	593	81
Motor carriers	2,813	638	3,126	543
Water carriers	106	24	120	15
Others	133	33	188	8
Total	4,827	1,835	19,187	1,125

[1] Based on average examination time for 1962.

Mr. WALRATH. I would suggest you might like page 39, analyses of cost.

Mr. BOLAND. Yes, Mr. Reporter, put in page 39 but put it with the justification for the Section of Cost Finding where it belongs.

BUREAU OF FINANCE

Bureau of Finance. You show 103 positions. Are they all in the Washington office?

Mr. SCHMID. Yes.

Mr. BOLAND. Put in pages 51, 52, 53, and 54.

(The pages referred to follow:)

BUREAU OF FINANCE

The principal functions of this Bureau are the handling of proceedings involving rail carriers, motor carriers, water carriers, and freight forwarders under various sections of the Interstate Commerce Act relative to: Authority to construct, extend, acquire, or abandon lines of a railroad or the operation thereof; proposed discontinuances or changes in the operation by railroads of trains or ferries which are subject to prohibitions under State laws; authority for railroads, motor carriers, or water carriers to enter into contracts and agreements for the pooling or division of traffic or earnings; authority to consolidate, merge, transfer ownership, or acquire control of carriers, and when directly related to such authority the granting of certificates or permits to motor carriers in connection therewith; authority to issue securities or to assume obligation and liability with respect to securities of others; authority to sell securities without competitive bidding; authority to alter or modify outstanding securities and obligations; authority to hold position of officer or director of more than one railroad; the guaranty of loans to railroads in financing additions or betterments or other capital expenditures, or expenditures for maintenance of property; and formal investigations concerning possible violations of the act relating to the foregoing subjects; and, under provisions of the Uniform Bankruptcy Act, the approval of plans of reorganization, the submission thereof to creditors and stockholders for acceptance or rejection, the recommendation of formulas for the segregation of earnings, the ratification of trustees, the fixing of maximum limits of allowances to trustees and other parties in interest, and the authorization of persons, including protective committees, to solicit and act under proxies, authorizations, or deposit agreements in connection with railroad reorganization or receivership proceedings.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	98	103	+5
Personnel compensation	$1,048,788	$1,145,212	+$96,424
Personnel benefits	77,612	84,424	+6,812
Total personal services and benefits	1,126,400	1,229,636	+103,236
Travel	23,700	26,000	+2,300
Total	1,150,100	1,255,636	+105,536

The increase of $103,236 for personal services and benefits is primarily for the five additional positions requested, two extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87–793.

The increase of $2,300 for travel is for the additional positions requested.

The 103 positions provided in the 1964 budget for this bureau are separated by categories as follows:

Director	1
Assistant director	1
Transport analyst	1
Hearing examiner	28
Attorney-adviser	33
Loan examiner	2
Financial analyst	5
Administrative officer	1
Administrative assistant	1
Adjudicator	6
Clerk and stenographer	24
Total	103

The following tabulation shows by section the positions authorized for fiscal year 1963 and those requested for fiscal year 1964:

	Authorized 1963	Requested 1964
Director's office	13	13
Hearings	28	33
Loans and financial analysis	11	11
Proceedings	31	31
Transfer Board	15	15
Total	98	103

The additional positions requested in the 1964 budget are as follows:

Title of position	Section	Number
Hearing examiner	Hearings	2
Clerk-stenographer	do	3
Total		5

These positions are requested to handle an increasing workload and to reduce the blacklog of cases awaiting decision, and thereby reduce the time lag between the filing of applications and their disposition. In recent years increasing criticism has been directed by Members of Congress and others toward this Commission and other regulatory agencies because of the "regulatory lag." It is especially important to the transportation industry and the public that finance matters handled by this Bureau be disposed of expeditiously. Delays frequently result in substantial financial losses to applicant carriers.

As part of the rather extensive reorganization of the Commission and revisions of certain of its procedures for handling decisions and enabling legislation, five employee boards were created in the Bureau of Finance. These boards render decisions in formal and informal proceedings by reports and orders. Membership on the boards is limited to certain qualified personnel by the Interstate Commerce Act and in addition to the Assistant Director and Chief of Section of Proceedings, six attorney-advisers are permanent members. The work of these boards occupies a considerable portion of the time of these attorneys which otherwise would be used in writing or reviewing final reports of the Commission.

A summary of the number of finance proceedings, separated between motor carrier and other proceedings, instituted during the last three fiscal years is

given below. Substantially all of the "other proceedings" involve rail carriers; only a few involve water carriers and freight forwarders.

	Motor carrier			Railroad and other		
	1960	1961	1962	1960	1961	1962
Applications and investigations	1,690	1,621	1,407	470	572	574
Petitions	326	336	331	204	96	116
Total	2,016	1,957	1,738	674	668	690

While there was a decrease in 1962 in the total number of motor carrier applications and investigations, the cases handled were more vigorously contested than formerly, and in a substantial proportion, questions of fitness were raised by the Commission's enforcement bureau. These factors add to the records and the man-hours required for processing the cases. Also, so far in the 1963 fiscal year, the number of motor carrier proceedings instituted has been greater than in the corresponding period of the prior fiscal year. The increase in the number and complexity of railroad applications has had a tremendous impact on the work of the bureau. Statistically, this increase is largely accounted for by applications for acquisitions of control, mergers, abandonments, and issuance of securities; more important is the increase in the man-hours required for railroad control and merger applications because of their size, importance, complexity, and adversary character.

DISCONTINUANCE OF RAILROAD SERVICE

Mr. THOMAS. Are very many of the major lines or lesser lines seeking to abandon part of their lines or shorten their hauls?

Mr. WALRATH. Director Baker could answer that, I think.

Mr. BAKER. In the last year or two there has been an increase in applications filed to abandon lines of railroads.

Mr. THOMAS. Spurs or big sections? How many applications do you have where they abandon service to towns that have enjoyed rail service for many, many years? Do you have that type of applications coming to you too?

Mr. BAKER. Yes. Practically all applications involve lines that have been in existence for a number of years.

Mr. THOMAS. Going to established communities?

Mr. BAKER. Normally they are branches that serve relatively small towns. Maybe 6,000 would be the largest.

Mr. THOMAS. What yardstick do you go by in refusing the application? What if they show they lost $2 million or $3 million last year, whether it was lost on that particular section or not? What do you do in a case like that?

Mr. BAKER. It is a judgment matter. The main factors to be considered are the results of operating financially, how much is the railroad losing. Another factor is the need for the service and what other services are available to the towns involved.

Mr. THOMAS. You have a hard problem. If it is clear to you that that particular line is losing money and you tell them to go ahead and operate anyway, you are right up against it, are you not?

Mr. BAKER. Yes, it is a difficult decision.

Mr. WALRATH. On that point, we have a very ticklish legal point pending where we did authorize the abandonment of passenger service

in North Carolina and we were reversed on the ground we looked only to the loss on the passenger operation whereas the particular line as a whole was making money.

Mr. GOFF. And you are talking about a complete abandonment of service. That was passenger abandonment. We have situations where the community has changed, where industry has moved away or where industry has turned to truck transportation for hauling their goods. All those things have to be considered to determine if there is a real need. If the community does not use it any more, it would be unfair to the railroad to have them keep a line going where the tonnage is so small maybe there are only two shipments a week.

Mr. THOMAS. Off the record.

(Discussion off the record.)

ABANDONMENT OF RAIL SERVICE—FISCAL YEAR 1962

Mr. BAKER. Mr. Chairman, I might mention that in the fiscal year ending June 30, 1962, the Commission authorized abandonment of 1,582 miles of rail lines. That was in 95 different cases.

Mr. JONAS. Was that complete abandonment or abandonment of one type of service?

Mr. BAKER. That was complete abandonment.

Mr. JONAS. If you add reduced service that you permitted, it would increase those figures?

Mr. BAKER. Yes. This does not include cases where we merely authorized abandonment of passenger service.

Mr. BOLAND. Do you have the figures on that?

Mr. BAKER. The figures for 1962 are in our annual report.

Mr. BOLAND. Supply that for the record.

(The information supplied follows:)

TRAIN DISCONTINUANCES

The number of proposals under section 13a(1) of the act, involving discontinuances or change in operation or service of trains between States, remained approximately the same as for the prior year. A total of 16 proposals to discontinue 58 trains were filed by 11 railroads. Investigations were instituted in respect of all except 5 proposals involving 29 trains. During the year, 8 railroads were permitted to discontinue operation of 50 passenger trains, and continuance was required of 5 railroads involving 26 passenger trains.

Petitions under section 13a(2), involving discontinuance or change in the operation or service between points in a single State, showed a decline. Three railroads filed 3 petitions proposing to discontinue 12 trains, compared with 4 railroads filing 4 petitions to discontinue 65 trains during the prior year. In cases arising under this paragraph of the section, we permitted 3 railroads to discontinue 15 trains and required 2 railroads to continue operating 51 trains sought to be discontinued. Of the 51 trains required to continue operating, 21 are commuter trains of the Pennsylvania Railroad Co. operating to and from Pittsburgh, Pa., and 30 are Pennsylvania-Reading-Seashore Line trains operating between Camden, N.J., and southern New Jersey points.

DETERMINATION OF PASSENGER TRAIN ABANDONMENT

Mr. JONAS. May I ask another question there? The *Southern Railroad* case is on appeal, is it not?

Mr. WALRATH. Not yet but it doubtless will be. We are certain petitions will come up.

Mr. JONAS. I mean appeal to the Supreme Court.

Mr. WALRATH. I would imagine it is so important to the parties that they might, yes.

Mr. JONAS. If it is not appealed and the decision of the lower court——

Mr. WALRATH. You mean the passenger train abandonment?

Mr. JONAS. Yes.

Mr. WALRATH. We have taken an appeal from that decision so the question is up to the court whether in making a decision to discontinue we must also take into consideration the general health of the line of railroad itself. Our position is that that was not the intent of the Congress when it gave us authority to consider discontinuances.

Mr. BAKER. The Commission does take into consideration the overall health of the railroad involved but the court in this case determined we should take into consideration the profit over this same particular line from freight traffic.

Mr. JONAS. The court held the Commission should have considered the railroad's profit from freight over that same line?

Mr. BAKER. Yes.

Mr. GOFF. Our position was that under the statute they were applying a rule that would apply for the full abandonment of the whole service. We said as we interpret the statute we are authorized, if there was not enough passenger use, to discontinue the passenger service.

BUREAU OF INQUIRY AND COMPLIANCE

Mr. BOLAND. Bureau of Inquiry and Compliance. You are looking for 8 additional positions for a total of 109.

How many do you have on board in the central office?

Mr. RYAN. Ninety-seven aboard and a ceiling of 105.

Mr. BOLAND. Put pages 72, 73, and 74 in the record.

(The pages referred to follow:)

BUREAU OF INQUIRY AND COMPLIANCE

The principal objectives of this Bureau are to enforce the criminal and penal provisions of parts I, II, III, and IV of the Interstate Commerce Act and similar provisions of the Elkins Act; to enforce orders of the Commission; to assist in the enforcement of other statutes affecting transportation and carriers; and to represent the Commission in formal docket investigations instituted by it and specially assigned to the Bureau.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	101	109	+8
Personnel compensation	$936,027	$1,031,318	+$95,291
Personnel benefits	68,947	75,698	+6,751
Total personal services and benefits	1,004,974	1,107,016	+102,042
Travel	70,000	74,200	+4,200
Total	1,074,974	1,181,216	+106,242

The increase of $102,042 for personal services and benefits is primarily for the eight additional positions requested, 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87-793.

The increase of $4,200 for travel is for the additional positions requested.

The 109 positions provided in the 1964 budget are separated as follows:

	Departmental	Field	Total
Director and assistant director	3		3
Assistant to director	1		1
Administrative officer	1		1
Attorney	24	28	52
Investigator		17	17
Clerical staff	17	18	35
Total	46	63	109

The increase of eight positions requested for the fiscal year 1964 represents two clerk-stenographers for the departmental office and three attorneys and three clerk-stenographers for the field.

DEPARTMENTAL

The 1964 budget provides 46 positions or 2 more than the 44 positions authorized for 1963. Two clerk-stenographers are requested for the Director's office.

Director's office

The two additional GS-4 clerk-stenographers are requested to provide clerical and stenographic assistance to the attorneys of the bureau.

Section of rail, water, and forwarder enforcement

This section directs the legal activities of the Commission in the enforcement of the provisions of parts I, III, and IV of the Interstate Commerce Act and related statutes such as the Elkins Act and the Clayton Antitrust Act; and also participates in rulemaking and investigation proceedings before the Commission.

Reports of investigations conducted by investigators of the bureau are analyzed, evaluated, and acted upon by the attorneys of this section. The majority of these investigations involve complicated rebate and concession violations requiring careful analysis of factual data and detailed rate and tariff studies. As of June 30, 1962, there were 225 investigations either in progress or awaiting consideration. Many of these involve operations of alleged shipper associations. Recent decisions of the Commission indicate that the operations of many of the associations may be freight forwarder operations without a certificate and therefore unlawful.

The following table shows the workload for the fiscal years 1960, 1961, and 1962 and estimates for the fiscal years 1963 and 1964:

	Actual			Estimate	
	1960	1961	1962	1963	1964
Investigations:					
On hand at beginning of year	350	244	238	225	225
Instituted during year	188	234	222	250	270
Concluded during year	294	240	235	250	290
Pending at end of year	244	238	225	225	205
Court cases:					
On hand at beginning of year	34	44	66	74	79
Instituted during year	53	70	79	75	85
Concluded during year	43	48	71	70	80
Pending at end of year	44	66	74	79	84
Commission proceedings:					
On hand at beginning of year	8	14	11	16	19
Instituted during year	8	2	9	15	20
Concluded during year	2	5	4	12	15
Pending at end of year	14	11	16	19	24

The tremendous growth in railroad piggyback service has been instrumental in fostering the formation of shipper associations because of the substantial savings in transportation costs. Many of these associations conduct questionable operations and may be characterized as falling within the gray area field. Many of these investigations result in extensive and time-consuming Commission proceedings in which attorneys of this section represent the Commission.

The rapid growth of railroad piggyback service has generated many abuses or unlawful practices, which require attention. The Commission recently instituted a general investigation of all the various piggyback plans of operation, designated Ex parte No. 230, *Substituted Service—Charges and Practices of For-Hire Carriers and Freight Forwarders (Piggyback Service)*. The Commission directed this Bureau to participate, and this proceeding, together with processing investigations in this field, will require the full time of two or three attorneys of this section for an extended period of time.

FIELD SERVICE

A total of 63 positions is requested for 1964 or 6 more than the 57 positions authorized for 1963. The six positions, three attorneys and three clerk-stenographers, will be utilized to process the increased amount of motor carrier enforcement work.

ABUSES OF RAILROAD PIGGYBACK SERVICE

Mr. BOLAND. We note you say:

The rapid growth of railroad piggyback service has generated many abuses or unlawful, which require attention.

Can you give some of the unlawful practices you have found?

Mr. MERRILL. The tremendous growth in railroad piggyback service has brought about the formation of so-called shipper associations that perform a service similar to that performed by freight forwarders. That is requiring a great deal of enforcement work. They contend they are in the area of exemption but frequently it is not an organization of shippers working together, but rather it is one man rendering a forwarder service.

Mr. BOLAND. When you say "one man" what do you really mean?

Mr. MERRILL. Or two or three individuals. They have no investment. They simply know how to move traffic and they allegedly bring the shippers in to them but it is not really a shippers organization; the shippers do not really run the organization; it is an independent man attempting to make a profit for himself.

Mr. BOLAND. And this is unlawful?

Mr. MERRILL. Yes.

Mr. BOLAND. This matter has presented quite a problem to the Commission?

Mr. MERRILL. Yes, sir.

Mr. BOLAND. How many people do you have engaged in this particular activity?

Mr. MERRILL. We have 16 special agents working and probably 4 or 5 concentrating in this area. They are not always the same men but this work is constantly going on.

Mr. BOLAND. You are holding hearings all over the country?

Mr. MERRILL. No. This is not hearings; this is investigations.

Mr. BOLAND. The investigation is not being conducted on the Commission level?

Mr. MERRILL. No.

Mr. THOMAS. Off the record.

(Discussion off the record.)

Mr. BOLAND. Are you holding hearings in regard to Ex parte 230?

Mr. WALRATH. Yes, much is coming in by written statements.

Mr. JONAS. May I ask a question there?

How did these abuses develop so quickly in the piggyback operations?

Mr. WALRATH. It is due principally to the so-called Plan 3 where the railroads began to offer to shippers and to freight forwarders rates under which the shipper loads the trailer-container and brings it to the railhead, and gets a reduced rate. That lent itself to the legitimate freight forwarder but it seemed to be an incentive to the false shipper organizations operating outside the exemption to build up groups——

Mr. JONAS. What is the extent of the exemption?

Mr. WALRATH. The exemption says if two or more shippers associate themselves together to pool their traffic to get volume that they can operate as an organization without the necessity of a permit or approval of the Commission. There are many legitimate organizations but now a great many promoters have taken advantage of it and the profit is to be found in the fellow who promotes and controls the scheme.

Mr. JONAS. Is that inherently wrong?

Mr. WALRATH. It is not inherently wrong, but it is legally wrong because it is not a true association. It is the practice of a promoter who may have no financial investment but who benefits from getting you and me together.

Mr. GOFF. That is the freight forwarder's job and he is classed as a freight forwarder but he comes under the regulations of the Commission.

Mr. JONAS. These exemptions do not arise solely because of the piggyback operations?

Mr. WALRATH. No, sir. That gave them an added incentive to spring up.

Mr. BOLAND. And the shippers per se do not come under those regulations?

Mr. WALRATH. No, sir.

MOTOR CARRIER ENFORCEMENT

Mr. BOLAND. Section of Motor Carrier Enforcement. Insert pages 75, 76, and 77 in the record.

(The pages referred to follow:)

SECTION OF MOTOR CARRIER ENFORCEMENT

The following table compares the actual and estimated workload increase of motor carrier investigation cases and court and Commission proceedings from 1960 to 1964, which are handled by field attorneys:

	Actual			Estimate	
	1960	1961	1962	1963	1964
Investigations:					
On hand at beginning of year	827	802	977	974	998
Instituted during year	975	1,202	1,252	1,274	1,340
Concluded during year	1,000	1,027	1,255	1,250	1,350
Pending at end of year	802	977	974	998	988
Court cases:					
On hand at beginning of year	345	430	488	569	659
Instituted during year	760	710	855	870	900
Concluded during year	675	652	774	780	800
Pending at end of year	430	488	569	659	759
Commission proceedings:					
On hand at beginning of year	196	222	270	237	247
Instituted during year	135	204	116	200	240
Concluded during year	109	156	149	190	200
Pending at end of year	222	270	237	247	287

Three additional attorneys are requested to assist in reducing the backlog of work and to assist with increased workload caused by the increasing emphasis on cases falling within the so-called gray area, such as unlawful leasing, so-called buy-and-sell schemes, fictitious shipper associations, etc., which are difficult and time-consuming.

This increased enforcement activity requires more stenographic assistance. The three clerk-stenographer positions are requested to provide needed stenographic help for field attorneys.

SECTION OF INVESTIGATIONS

The present field staff of investigators totals 17. The principal function of this staff is to conduct investigations of rail, water, and freight forwarder matters; and to conduct selected motor carrier investigations of the more difficult type.

Intensified competition between the various types of carriers have resulted in ingenious schemes and practices to evade regulations, such as unlawful rebate and concessions to shippers, unlawful operations by unauthorized carriers, etc. Investigations have become more complex and time-consuming. There are, under investigation or awaiting investigation, approximately 125 cases which, at the rate of 18 days per investigation (May 1959 study), represents a 7-month workload which is excessive for our present staff.

In recent years there has come into being a large number of so-called shippers' agents and shippers' associations which purport to be exempt under the provisions of section 402(c), but most of which are believed to be unlawful arrangements which conceal unauthorized freight forwarder operations. There are believed to be over 200 of such operations currently in existence and many complaints have been received by the Commission about them. The language of the exemption is not entirely clear and is open to conflicting interpretation which made enforcement difficult.

Statement of actual enforcement workload of the Bureau for fiscal years 1960, 1961, and 1962 and estimates for fiscal years 1963 and 1964

	Actual			Estimate	
	1960	1961	1962	1963	1964
Investigations:					
On hand beginning of year	1,177	1,046	1,215	1,199	1,223
Instituted during year	1,163	1,436	1,474	1,524	1,610
Concluded during year	1,294	1,267	1,490	1,500	1,640
Pending at end of year	1,046	1,215	1,199	1,223	1,193
Court cases:					
On hand beginning of year	379	474	554	643	738
Instituted during year	813	780	934	945	985
Concluded during year	718	700	845	850	880
Pending at end of year	474	554	643	738	843
Commission proceedings:					
On hand beginning of year	204	236	281	253	266
Instituted during year	143	206	125	215	260
Concluded during year	111	161	153	202	215
Pending at end of year	236	281	253	266	311

Bureau of Motor Carriers

Mr. Boland. Bureau of Motor Carriers. You are looking for an increase of $259,494 occasioned by the pay increase, two extra compensable days and seven additional positions.

How many did you have on board as of January 19 in this Bureau?

Mr. Ryan. 517 as against a ceiling of 524.

Mr. Boland. Put in pages 78 through 87 in the record; also the table on page 88; the workload table on page 91; the workload table on page 93; the tables on pages 94, 95, and 96; the table on the statistics branch on page 99; the narrative on page 100; and pages 104 through 114.

(The material referred to follows:)

Bureau of Motor Carriers

The duties of the bureau relate to the regulation of motor carriers under part II and insurance of freight forwarders under part IV of the Interstate Commerce Act. With relation to motor carriers, its duties include handling of complaints of shippers and others against the rates, charges, and practices of motor carriers; administering the Commission's insurance rules and regulations for the protection of the public; investigation of violations of part II; and promoting safety of operation and equipment, and compliance with motor carrier safety regulations.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	524	531	+7
Personnel compensation	$3,680,717	$3,923,401	+$242,684
Personnel benefits	271,625	288,435	+16,810
Total personal services and benefits	3,952,342	4,211,836	+259,494
Travel	270,000	270,000	0
Total	4,222,342	4,481,836	+259,494

The increase of $259,494 for personal services and benefits is primarily for the seven additional positions requested, 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87–793.

The following table shows by sections of the Bureau the number of positions authorized for 1963 and the number requested for 1964:

	Authorized, 1963	Requested, 1964	Increase
Director's Office	10	10	
Interpretations staff	9	9	
Insurance	31	31	
Motor carrier safety	43	45	+2
Field service:			
Departmental	7	7	
Field	424	429	+5
Total, motor carriers	524	531	+7

In addition to general regulation of for-hire motor carriers, Congress has given the Commission the responsibility of prescribing and enforcing regulations to govern safety of operation and hours of service of employees with respect to certain exempt operations of for-hire trucks, buses, and private trucks used for transportation in interstate or foreign commerce, and vehicles used in the transportation of migrant workers. The need for increased safety work becomes more important as the highways become more congested and the amount of explosives and dangerous articles transported over them increases as a result of the defense program. Safeguards to assure the safety of operation of vehicles transporting explosives is a matter of great public concern.

While the number of authorized motor carriers under the Commission's jurisdiction has not changed materially in the last year, the number of vehicles operated and the number of tons of property transported continues to increase steadily. The volume of property being transported by motor carriers, both private and for hire continues at a high level.

The increase in illegal operations in the so-called gray area of transportation has reached serious proportions and emphasizes the need for increased investigation activity in this field to determine a more accurate estimate as to the volume of the transportation industry affected. The Commission's program is underway and plans are to increase the activity in the coming year.

OFFICE OF THE DIRECTOR, BUREAU OF MOTOR CARRIERS

The Director of the Bureau has overall responsibility for the work of the entire Bureau. This Office is responsible for initiating and planning of work projects and the development of proper instructions and directives to carry out these projects; designing efficient and effective programs for training of newly appointed staff members, and for reorientation of present staff members to keep them currently informed of new projects and to broaden their perspective. Administrative duties required in the operation and maintenance of the sections in Washington and the field offices of the Bureau are handled under the jurisdiction of this Office. A volume of significant detail work is necessary to service the staff and this volume increases as personnel are added to the Bureau.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	10	10	0
Personnel compensation	$80,299	$84,967	+$4,668
Personnel benefits	5,919	6,238	+319
Total personal services and benefits	86,218	91,205	+4,987
Travel	4,710	4,710	0
Total	90,928	95,915	+4,987

The increase of $4,987 for personal services and benefits is for 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87-793.

The 1964 budget provides 10 positions for this office which is the same as authorized for the current fiscal year. These positions are separated by categories as follows:

Director and assistant director	2
Administrative officer	1
Administrative assistant	1
Clerk, typist, and stenographer	6
Total	10

INTERPRETATIONS STAFF, BUREAU OF MOTOR CARRIERS

This staff assists the director of the Bureau in handling legal interpretations and opinions and preparing administrative rulings concerning part II of the Interstate Commerce Act and motor carrier regulations and operating authorities issued thereunder; conferring with other Government agencies, carrier trade associations, and the general public regarding motor carrier regulatory problems; preparing and maintaining a manual which digests, correlates, explains, and distinguishes past interpretations and formal decisions to aid the field staff and other Commission personnel; acting as legal adviser and consultant to the Bureau; and performing legal research upon request.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	9	9	0
Personnel compensation	$70,761	$75,082	+$4,321
Personnel benefits	5,270	5,569	+299
Total personal services and benefits	76,031	80,651	4,620

The increase of $4,620 for personal services and benefits is for 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87–793.

The 1964 budget provides nine positions for this office which is the same as authorized for the current fiscal year. These positions are separated by categories as follows:

Attorney-adviser	5
Clerk	3
Secretary-stenographer	1
Total	9

SECTION OF INSURANCE, BUREAU OF MOTOR CARRIERS

The major function of this Section is administering for the Commission its rules and regulations issued pursuant to sections 211(c), 215, and 403 (c) and (d) of the act, governing filing and approval of security for the protection of the public by brokers of transportation, motor carriers, and freight forwarders.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	31	31	0
Personnel compensation	$173,570	$183,874	+$10,304
Personnel benefits	12,737	13,442	+705
Total personal services and benefits	186,307	197,316	+11,009
Travel	1,060	1,060	0
Total	187,367	198,376	+11,009

The increase of $11,009 for personal services and benefits is for 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87-793.

The 1964 budget provides 31 positions for this section which is the same as authorized for the current fiscal year. These positions are separated by categories as follows:

Chief of section	1
Assistant to chief	1
Insurance examiner	22
Secretary-stenographer	1
Clerk and clerk-typist	6
Total	31

The program to effect compliance by all motor carriers with section 221 of the act, which requires designation of process agents in each State in which they operate, has now started. Previously the Section had been able to effect compliance of only those motor carriers which obtain new or extensions of operating authority. The latter was further limited to the States involved in the new or extensions of operating authority.

The following table shows the actual workload for fiscal years 1960, 1961, and 1962 and estimates for fiscal years 1963 and 1964.

Section of Insurance, Bureau of Motor Carriers, Interstate Commerce Commission

	Actual			Estimate	
	1960	1961	1962	1963	1964
1. Certificate of insurance and surety bonds:					
(a) Received	18,581	17,242	16,876	16,500	16,000
(b) Notices of cancellation received	12,618	10,940	10,606	9,500	9,000
2. Orders checked to determine compliance prior to issuance: Initial submission of all proposed authorities by Bureau of Operating Rights and checks of resubmission, and proposed and/or granted authorities under secs. 5 and 219a(b)	20,461	21,883	21,275	22,000	22,500
3. Compliance check prior to enforcement proceedings:					
(a) Initiated in section and reported to field	3,758	3,100	3,652	3,500	3,400
(b) Compliance received as result of (a)	3,287	2,764	3,510	3,200	3,100
4. Correspondence prepared:					
(a) Letters, telegrams, and memorandums prepared in section other than form letters	7,599	10,462	13,089	11,500	11,500
(b) Form letters	21,278	19,875	18,437	18,500	18,500
5. Form BMC-3 (process agent) received	[1] 4,432	9,802	8,559	8,500	7,500

[1] 7 months.

SECTION OF MOTOR CARRIER SAFETY, BUREAU OF MOTOR CARRIERS

This section proposes revisions and additions to the safety regulations and interprets those regulations of the Commission concerning the qualifications and hours of service of drivers, and safety of operation and equipment of motor carriers. Such regulations are prescribed by the Commission pursuant to part II of the Interstate Commerce Act. The section receives and analyzes reports made by the field staff bearing upon compliance with the Commission's safety regulations; receives and analyzes reports of accidents submitted by motor carriers pursuant to the Commission's accident reporting requirements; and hours of service reports submitted by carriers pursuant to the hours of service reporting requirements. It recommends changes bearing upon transportation of explosives by motor vehicle which are prescribed in the explosives and other dangerous articles regulations.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	43	45	+2
Personnel compensation	$255,049	$279,048	+$23,999
Personnel benefits	18,989	20,691	+1,702
Total personal services and benefits	274,038	299,739	+25,701
Travel	4,500	4,500	0
Total	278,538	304,239	+25,701

The increase of $25,701 for personal services and benefits is primarily for the two additional positions requested, 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87–793.

The 45 positions provided in the 1964 budget for this section are separated by categories as follows:

Chief and assistant chief	2
Assistant to chief	1
Mechanical engineer	3
Branch chief	3
Assistant branch chief	2
Accident analyst	2
Special projects assistant	1
Machine operators	1
Statistical clerk	6
Punchcard operator	4
Clerk, typist, stenographer	20
Total	45

The section is the central repository of safety records of 18,587 authorized and 77,670 private and exempt motor carriers. It is estimated that there are an additional 40,000 private and exempt carriers not yet identified. They are being identified and served with the Commission's safety regulations at the rate of about 9,000 per year. There are 218 carriers operating between points in foreign countries through the United States. Pamphlets summarizing the applicable regulations have been furnished to an estimated 5,000 motor carriers of migrant workers. All of the above carriers operate an estimated 2 million motor vehicles.

A continuing review and analysis of the safety records of motor carriers is vital to the Commission's safety activities. These records relating to accidents, qualifications, and hours of service of drivers, condition of equipment, and general safety compliance must be continuously analyzed:

1. To determine the fitness of particular carriers to receive new or extended operating authority.
2. To furnish the field staff with reports of particular carriers or groups of carriers whose safety records are such that particular attention be given to these carriers to obtain compliance with safety regulations and to reduce accidents.
3. To determine causes and means of preventing future similar accidents.
4. To obtain information for needed improvement in motor vehicle designs by manufacturers.
5. To assure uniformity throughout the country in the administration and enforcement of the regulations and the promotion of safety in operations.

This section provides technical advice and assistance to the field staff and the motor transport industry so that there shall be a uniform understanding and application of the regulations. Comprehensive reports are prepared for release on accidents which result in serious consequences. Information developed by this section is used by the Bureau of Public Roads in correcting highway conditions that contribute to accidents. General releases are prepared as to accident trends and frequencies, conditions of motor vehicles, and general compliance with regulations for the purpose of promoting a higher degree of safety consciousness in the motor transport industry.

Two additional positions are requested for 1964. This increase of 2 positions over the 43 positions authorized for 1963 is needed to handle the increased workload which has resulted from an increased number of safety inspectors and district supervisors assigned to the field staff, and to permit better utilization of a great volume of information contained in the various safety surveys, vehicle and driver reports, and accident investigation reports made by the field staff, relating to authorized, private, and "exempt" carriers, and in accident reports submitted by motor carriers.

The additional positions requested for 1963 are one GS–9 mechanical engineer to handle the increased volume of technical work necessary as a result of implementation of new legislation regarding dangerous articles, and to provide technical talent necessary to complete future projects involving vehicle design; and one GS–4 statistical coding clerk for the Statistics Branch to permit current tabulation of accident data, road-check data, accident investigation data, and data from the revised safety compliance report.

OFFICE OF THE CHIEF OF SECTION

This Office is responsible for administering the overall safety program of the Interstate Commerce Commission in motor carrier transportation as prescribed in part II of the Interstate Commerce Act, including regulations, effective August 1, 1958, applicable to carriers of migrant workers by motor vehicle and applications under the Medals of Honor Act, as amended by the 85th Congress. This Office directs, organizes, and plans the work for the Section.

The 1964 budget provides five positions for this Office which is the same as authorized for the fiscal year 1963.

Accident Investigation and Analysis Branch.—This Branch receives, examines, analyzes, and maintains files of accident reports submitted by motor carriers and reports of field investigations of the more serious motor carrier accidents.

The individual accident report is examined for cause, chargeability, type of accident, extent of casualties and property damage, type of cargo, violations of regulations and practices which appear to be unsafe. The accidents are categorized and collectively are the subject of industrywide studies as to type of occurrence, consequences, commodities involved, and driver and vehicle condition. In addition, the reports filed by a carrier are evaluated and compared with records of like carriers, which provides a means for evaluating the carrier's fitness in application proceedings or other type Commission action.

More important these analyses and studies of this Branch, through the use of the motor carrier accident reports and field investigation reports, have been instrumental in leading to recommendations and actions with respect to skidding of buses, structural failures of semitrailers, and loss of cargo from tank vehicles. Recent changes in mechanical equipment and brake requirements were a direct result of accident information. The widespread unauthorized use of amphetamine drugs by drivers was discovered and reported upon by one of our published reports, thus initiating the extensive and continuing enforcement program by other Government agencies and various States. Presently under consideration are studies of accidents involving bus seat failures, ejection of passengers from windows, the need for seat belts, jacknifing of tractor semitrailers, rear end collisions, structural failures of semitrailers, cargo tank failures, spillage of dangerous articles, and the transportation of radioactive materials. Also receiving attention are accidents involving evidence of questionable labor union practices, improper driver selection, instruction or supervision, mechanically defective vehicles, and the many and varied types of driver failure.

It is anticipated that the number of accident reports to be received by this Branch during fiscal years 1963 and 1964 will be increased in each instance by 30 percent over the previous year's receipts. The report and order in *Ex parte MC 40*, dated August 6, 1962, effective January 1, 1963, requires the reporting of accidents occurring in commercial zone operations. The report states that the purpose of requiring such accident reports is to determine the nature of commercial zone accidents and whether or not additional regulation is required.

The 1964 budget provides 10 positions for this Branch which is the same as authorized for the fiscal year 1963.

Workload statement of Accident Investigation and Analysis Branch

	Actual			Estimate	
	1960	1961	1962	1963	1964
Accident reports:					
Classified and examined:					
On hand	3,910	3,012	1,892	4,091	8,319
Received	43,131	30,864	32,467	[1] 42,207	[2] 54,869
Disposed	44,029	31,984	30,268	37,979	56,974
Pending	3,012	1,892	4,091	[3] 8,319	[3] 6,214

Disposed	15	10	5	10	10
Pending	0	0	0	0	0

[1] The number of BMC-50 reports received in 1962 represented a 5-percent increase over receipts in 1961. The number of BMC-50 reports for 1963 represents a 30-percent increase over 1962. This represents the normal expected 5-percent increase due to increased traffic causing more accidents and better reporting, plus 25 percent expected increase due to the change in pt. 194, effective Jan. 1, 1963, requiring the reporting of accidents occurring in commercial zone operations.

[2] This figure represents the normal 5-percent increase over 1963 plus 25 percent (making a total increase of 30 percent) by reason that the commercial zone requirements will be effective throughout the full year.

[3] This figure will represent either the backlog or reports filed without examination. It is expected that the backlog in 1964 can be reduced somewhat in spite of increased receipts.

[4] The number of MCS-12 reports for 1963 is estimated as approximately 15 percent over the 1962 figure.

[5] The use of this form is being restricted to the more serious accident situations, therefore the number was decreased by 57 percent in 1962 from 1961. Projections for 1963 and 1964 represents 10-percent increase over 1962.

[6] In this endeavor, requests are, in a manner, related to our ability to provide the service. We expect to increase our capabilities along this line. Thus, the 1963 figure is projected to show a 25-percent increase over that of 1962.

Fiscal year workload of Engineering Branch

	Actual			Estimate	
	1960	1961	1962	1963	1964
Defective vehicle accident reports examined	1,930	1,679	1,562	1,600	1,800
Fire accident reports examined	719	1,456	651	700	800

Recommendations in response to petitions	[1]	6	7	6	6

[1] Statistics not available.

Safety Compliance Branch.—This Branch maintains a record of all motor carriers known to the Commission. It is charged with the responsibility of determining the degree of safety compliance of such carriers and preparing reports for the field staff, various other bureaus of the Commission, and other Federal agencies.

Upon receipt of request for safety compliance reports, the Branch prepares detailed studies in connection with permanent and temporary authority applications dealing with operating authority. Information compiled by it is used by the Bureaus of Operating Rights and Inquiry and Compliance, and Division 1, pertaining to pending applications.

Requests with respect to the compliance with the Commission's Motor Carrier Safety Regulations are received from the Defense Supply Agency of the Department of Defense and other Government agencies. The Defense Department's requests are in connection with carriers' applications to transport explosives for the Government. The importance of this phase of our work is clearly demonstrated by the fact that during the last fiscal year that Department denied the requests of 11 carriers to haul explosives because of the carrier's noncompliance with the Commission's Safety Regulations.

The Branch also prepares answers to inquiries from the field staff, motor carriers, and the general public pertaining to interpretations of the Motor Carrier Safety Regulations.

The 1964 budget provides 13 positions for this Branch which is the same as authorized for the fiscal year 1963.

The following statement shows the actual workload of the Branch for fiscal years 1960, 1961, and 1962 and estimates for fiscal years 1963 and 1964.

Fiscal year work record of Safety Compliance Branch

	Actual			Estimate	
	1960	1961	1962	1963	1964
BMC–60, excess hours reports:

Pending	0	0	0	0	0

[1] Lack of clerk time for coding, prevented the handling of hours of service reports in 1962. Use of a summary form in 1963 is anticipated. This will enable us to develop useful data with much less expenditure of manpower.

[2] This information is received in connection with a new program initiated on Sept. 6, 1962.

SECTION OF FIELD SERVICE, BUREAU OF MOTOR CARRIERS

The major objectives of this section are (1) to administer and enforce at the field level, the provisions of part II of the act and the rules and regulations of the Commission issued pursuant thereto; (2) to furnish advice and information to motor carriers and the public regarding the act and the rules and regulations; (3) to obtain information concerning general and special conditions throughout the country which affect regulation of motor transportation and service to the shipping public; (4) to assist other bureaus and sections in Washington with respect to the expeditious handling of all matters affecting motor transportation; (5) to maintain liaison with State officials in connection with matters of mutual interest; and (6) to aid the Commission in developing adequate and safe transportation service for the public.

Total personal services and benefits	3,329,748	3,542,925	+213,177
Travel	259,730	259,730	0
Total	3,589,478	3,802,655	+213,177

The increase of $213,177 for personal services and benefits is primarily for the five additional positions requested, 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87–793.

The following statement shows by working titles the positions authorized for 1963 and those requested for 1964:

	Authorized 1963	Requested 1964	Increase
Field:			
District director	13	13	
Assistant district director	2	2	
District supervisor	126	126	
Safety inspector	99	99	
Rate agent	13	13	
Administrative assistant	6	6	
Chief clerk	8	8	
Clerk, stenographer and typist	157	162	5
Total, field	424	429	5

Work items	Actual			Estimate	
	1960	1961	1962	1963	1964
Permanent authority applications investigated	376	334	299	300	325
Temporary authority applications investigated, sec. 210a(a)	3,546	3,803	4,084	4,100	4,100
Proposal to engage in interstate commerce	172	220	373	250	268
Transfer or lease of authority, sec. 212(b)	974	864	813	862	898
Transfer or lease of authority, sec. 5	50	116	66	100	100
Temporary authority to lease, sec. 210a(b)	133	167	108	100	100
Revocation of authority	410	428	470	458	450
Assist Joint Board at hearings	2	1	0	1	1
Staff appearances required at hearings	106	178	129	130	140
Operating authority matters not otherwise described	11,112	13,336	14,044	14,000	14,000

Safety.—The goal of all highway safety programs is the prevention of death and injury to persons and destruction of property. The principal function of the field section is to encourage and assist in the institution of programs by the carriers to insure safe operating and maintenance practices, qualifications and maximum hours-of-service of drivers and to enforce the safety requirements in the operation of truck and bus fleets so as to minimize the danger to passengers and the public being injured or killed upon the highway.

To perform its function, the Commission must encourage the institution of an effective safety program by each commercial fleet operator. This involves strict and continuous planned inspection and maintenance of vehicles by the carrier and observation of all safety rules relating to physical and mental qualifications of drivers which is particularly vital with respect to drivers of commercial vehicles transporting passengers and property on the highways; the reporting

of accidents to the Commission and a careful check on carriers and drivers to assure that all safety regulations are observed.

A decline in safety activity in the 1962 fiscal year was due to relieving district supervisors from safety activity to afford more time for the investigation of unlawful transportation activities.

Work items	Actual			Estimate	
	1960	1961	1962	1963	1964
Motor carriers' safety surveys (authorized carriers)	3,602	[1] 2,734	[1] 2,792	2,900	3,200
Safety inspection of private or exempt carriers	4,332	[1] 3,745	[1] 3,451	3,625	3,800
Action on excess hours report	923	863	1,058	1,000	1,000
Vehicle-driver inspections for safety compliance	61,255	[1] 50,833	[1] 49,269	50,000	55,000
Road observations of vehicles and drivers for safety compliance	5,180	[2] 10,847	[2] 9,439	9,500	10,000
Man-days spent in road checks for safety compliance	5,337	5,753	5,070	5,100	5,400
Unsafe vehicles ordered "out of service"	9,290	[1] 7,481	[1] 7,844	7,500	7,500
Checks for excess hours of service	470	456	445	500	560
Investigation of carriers proposing to transport explosives	55	45	45	58	65
Investigations of accidents involving fatalities and personal injuries	442	[1] 391	[1] 370	375	400
Investigation of compliance with explosives regulations	189	128	137	140	150
Safety and accident prevention meetings conducted	2,014	[1] 1,432	[1] 1,361	1,370	1,380
Private and exempt carriers certified as subject to safety regulations	10,825	9,102	7,972	8,500	9,000
Activities relating to safety matters not otherwise described	10,904	10,342	9,854	10,000	10,000
Drivers declared "out of service"				[3] 500	750

[1] Decline due to district supervisors being excused from these activities to devote more time to enforcement against unlawful transportation.
[2] This activity stepped up to offset lesser number of vehicle-driver inspections.
[3] New activity.

Rates and tariffs.—The rate agents maintain a file of tariffs containing the rates of carriers operating to, from and within the district for the convenience of the public. The rate agents resolve innumerable controversies between shippers and carriers without delay, examine proposed tariffs for compliance and assist small carriers in clarifying their tariffs so that shippers may readily understand the provisions thereof. Because of tariff and rate complexities, the rate agents are essential to the conducting of investigations where rate and tariff violations are involved.

To obtain a better degree of compliance with rate regulations, rate experts are assigned to the field staff to assist investigators in detecting violations which involve rates and tariffs and assist in assembling proper evidence of such violations.

Work items	Actual			Estimate	
	1960	1961	1962	1963	1964
Rate compliance checks	489	404	455	494	494
Special permission applications received and posted for public inspection	559	427	517	566	575
Assistance given carriers and others in preparing tariffs and schedules for filing	849	698	608	650	670
Assistance given to carriers in preparing adoption notices on rate publications	116	108	90	100	100
Assistance given to carriers in concurrence and power of attorney matters	62	184	81	100	100
Revocation notices of filed documents obtained	46	45	32	45	45
Tariffs and schedules examined for rate compliance	1,734	1,655	1,683	1,700	1,700
Interpretations rendered to public on tariffs, rates, and charges	3,129	2,728	2,972	3,000	3,000
Tariff and rate matters handled which are not otherwise described	3,830	4,470	[1] 4,992	4,500	4,500

[1] This increase in activity due to obtaining information as to rates on former exempt commodities.

Accounting.—Certain accounting reports are filed with the field offices by motor carriers. In connection with these and other such reports, the staff assists the proper bureau in the matter of obtaining compliance with the report-filing requirements. This work involves reporting to Washington when the revenues of carriers reach a point which affects the classification of the carrier and in obtaining delinquent accounting reports. In performing this duty the following work items are accomplished:

Work items	Actual			Estimate	
	1960	1961	1962	1963	1964
New class II carriers reported to Washington	36	35	22	30	30
Action to obtain delinquent accounting reports	5,376	3,079	2,878	2,900	3,000
Miscellaneous accounting activities	836	894	[1] 1,368	900	900

[1] Increase due to obtaining special information for Bureau of T.E. & S. on class III property carriers.

Insurance.—The number of work items performed because of carriers' failure to maintain security for the protection of the public increased during fiscal year 1962. The high in 1960 was partly due to noncompliance by applicants for grandfather rights under the Transportation Act of 1958. The maintenance of insurance is vital for the protection of the public; therefore, the extent of this activity depends entirely upon the amount of noncompliance by the carriers.

Work items	Actual			Estimate	
	1960	1961	1962	1963	1964
Investigation of failure to file insurance	3,334	2,699	3,057	2,800	2,800
Investigation of operating without insurance	524	379	393	400	400
Investigation of improper insurance filing	84	100	155	150	150
Miscellaneous insurance matters [1]	2,064	1,986	2,606	2,500	2,500

[1] This item includes checking on carrier difficulties in obtaining insurance, and interpretation of insurance regulations and requirements, and obtaining process agent compliance.

Enforcement.—Because of the loss of substantial traffic by authorized property carriers to unauthorized carriers reported in the Commission's report, "Gray Area of Transportation Opeations," a change was made in geneal field-work program effective January 1, 1960. District supervisors were assigned more time to devote to enforcement investigations by relieving them from safety activity for the last half of the fiscal year. As a result, the number of investigations intended for court action reached an alltime high in 1961 and the enforcement investigations continued at a stepped-up pace in 1962 although the number of complaints received and the number of complaints investigated was less than in 1961. The enforcement work will continue to be stressed in 1963 and 1964. As previously pointed out, the allotment of additional time for enforcement work will not necessarily increase the number of enforcement cases in direct proportion. This is because unlawful operations conducted under the guise of "buy and sell," "leasing vehicles and drivers to shippers," activities of shippers associations described in section 204(c), cooperative associations described in section 203(b)(5) of the Interstate Commerce Act, and instances of two separate entities operating in concert with one furnishing the drivers and the other furnishing the vehicles all to the end of defeating regulation are time consuming and complex. In many of these cases records are not available to the investigators and the modus operandi varies among the different guises requiring careful exploration and development necessary to prove a violation of the act. Moreover, some of these operations become the subject of formal proceeding before the Commission for determination of the issues which requires lengthy testimony of the investigator. Enforcement of the safety regulations will continue but this phase of enforcement will be limited as compared to the past with such investigations made by safety inspectors principally, for reasons explained above.

The general and rate compliance investigations of carriers' operations and practices by the field staff must be continued with rate agents making rate compliance surveys and district supervisors making general compliance surveys. In these investigations, the carriers' records and operations are carefully examined. These investigations are made to determine the degree of compliance with regulations governing collection of rates and charges; preservation of records; claim procedures; identification of vehicles; vehicle leasing practices, insurance compliance; whether unwarranted embargoes are in effect; observations of the scope of the carrier's certificate or permit; whether tariffs are posted and open to public inspection; procedure for handling unclaimed or astray shipments; possible rebates or concessions, etc. If the investigation discloses failure to comply with the regulations, the carrier is warned and administrative efforts are made to bring about compliance with the act and regulations. In selecting the carriers for this type investigation, those carriers against whom complaints have been made and those who otherwise are believed to be violating the act or regulations are first investigated. If the violations are serious and cannot be corrected by administrative action, appropriate court or Commission action is recommended.

Work items	Actual			Estimate	
	1960	1961	1962	1963	1964
Complaints of violations received	4,857	5,110	4,795	5,508	5,670
Complaints investigated and action taken	5,002	5,160	4,957	5,461	5,838
Investigations on which court action expected	997	1,227	1,141	1,232	1,358
Final investigation reports examined	1,034	1,287	1,195	1,280	1,400
Other complaints received and handled [1]	11,617	9,868	9,938	10,000	11,000
Complaint reports reviewed to determine correctness of action taken	5,296	5,719	5,082	5,500	5,850
Court appearances as Government witness	230	261	328	423	464
General investigations of carriers for compliance with regulations	2,505	2,156	1,855	1,855	1,923
Enforcement activities not otherwise described	4,113	6,752	6,578	6,700	6,800
Field reports of suspected unlawful operation [2]	----------	----------	6,122	6,000	6,000

[1] "Other complaints" are those which are not of a substantial nature and may be handled either by telephone or correspondence.
[2] New activity.

Backlog of work.—In order to provide a yardstick for determining the amount of work required for a reasonably effective job for administering and enforcing the rules and regulations of the act the following tabulation is included:

Work items	Actual			Estimate	
	1960	1961	1962	1963	1964
(1) Average number of complaint investigations, safety matters, etc., pending at end of year	5,247	5,663	5,691	5,700	5,700
(2) Number of necessary enforcement investigations	997	1,227	1,141	1,232	1,358
(3) For-hire motor carriers who have not been checked for compliance with safety regulations in over 3 years	7,318	8,524	9,459	10,161	9,425
(4) For-hire motor carriers who have not been checked for compliance with regulations, other than safety, in over 5 years	7,140	7,182	6,050	5,863	6,637
(5) For-hire motor carrier accidents involving fatalities which were not investigated to determine causes and possible preventative measures	1,004	843	959	940	900
(6) Private and exempt motor carriers who have been certified but never checked for compliance with safety regulations	49,152	53,230	50,057	54,932	59,902
(7) Estimated number of private and exempt motor carriers who have never been contacted and notified that they are subject to the Commission's motor carrier safety regulations	44,494	36,562	[1] 40,004	31,504	22,504

[1] Estimate as of June 15, 1962.

Items (1) and (2) above are based on complaints by the public and violations discovered by the staff in the regular performance of duty. Item (3) is based on past experience which indicates that an inspection must be made of each carrier's safety and maintenance practices at least once each 3 or 4 years in order to obtain compliance with the safety regulations. We are unable to do this because of the general workload. For compliance with regulations other than safety, item (4), an inspection of the records and operations of each carrier at least once every 5 or 6 years should be made. The number of for-hire carriers, item (4), that have not been checked for compliance with regulations other than safety in over 5 years is being reduced. Item (5) is based on the number of accidents being currently reported to the Commission by for-hire motor carriers, but not including private carriers. Analyses of the reports of the investigations of accidents form the basis of planning effective preventative measures and justification for many of the safety regulations. At the end of the fiscal year 1962, a total of 50,057 private and exempt carriers, out of the total that had been contacted and notified of their responsibility for compliance with the safety regulations, have not been examined as to their compliance as shown in item (6). In 1963 and 1964 fiscal years, the rate of service of the safety regulations upon private and exempt carriers will continue.

Administrative.—The number of work items performed in 1960, 1961, and 1962, have remained substantially on the same level. The additional personnel requested for 1964 will result in increased work production and consequently, a greater number of items reportable under this section. In order to avoid the necessity of supervisory employees and staff specialists doing their own stenographic or clerical work, it is proposed to increase the stenographic and clerical employees. This will enable a greater amount of productive work by the supervisory employees and specialists. The items listed below represent only a part of the detail work necessary in the accomplishment of the fieldwork. Not listed are the many other necessary but time-consuming details such as filing of correspondence, reports, tariffs, preparing exhibits, photostats, and charts; and maintaining the required office records on such matters as time worked, leave, supplies, etc.

Work items	Actual			Estimate	
	1960	1961	1962	1963	1964
(1) Man-days worked in office [1]	28,631	28,962	35,044	32,785	34,449
Man-days worked in field [1]	34,177	34,199	32,941	35,200	37,696
(2) Overtime hours worked w.o.c. (included in (1))	48,692	44,813	41,400	42,000	45,000
(3) Letters written	188,956	183,023	193,413	193,500	195,000
Memorandums written	117,577	119,980	124,811	125,000	127,000
Reports written	31,674	29,187	27,753	28,000	29,500
(4) Official telephone calls	188,365	185,576	180,983	181,000	190,000
Official interviews in office	41,906	37,973	32,633	33,000	35,000
Official interviews in field	186,203	174,641	170,663	171,000	183,000
(5) Mileage on official business (excluding travel on public carriers)	2,952,520	3,009,326	2,957,739	3,000,000	3,200,000
(6) Annual leave taken by staff (hours)	34,486	35,974	35,390	36,000	37,000
Sick leave taken by staff (hours)	9,693	8,692	12,708	10,000	10,600
(7) Special assignments	1,497	1,423	1,566	1,500	1,500
(8) Miscellaneous administrative activities	3,402	4,047	4,480	4,400	4,400

[1] Excluding clerical employees.

Mr. BOLAND. Any questions on this Bureau?

Mr. WALRATH. I might volunteer that all of that added help is in the field, and I believe most is clerical in nature. It is designed to relieve some of our professional people from detail work.

Bureau of Operating Rights

Mr. Boland. The Bureau of Operating Rights. You are asking for an increase of $222,796 occasioned by pay increases, 2 extra days, and 18 additional positions.

Put pages 115 through 121 in the record.

(The pages referred to follow:)

Bureau of Operating Rights

The Bureau of Operating Rights processes all formal proceedings involving operating rights of motor carriers, brokers, water carriers, and freight forwarders, except those matters involving consolidation and merger of such carriers and the transfer of operating rights and applications for temporary authority to perform water carrier service. The matters handled by the Bureau vary considerably in scope and include applications for new and "grandfather" motor, water, and freight forwarder operating rights, applications under section 5 in a specified class of cases; complaints and investigations which bring in issue the right of the carriers to perform service; and proceedings looking to the prescription of rules governing the carriers' operations, and to the revocation of operating rights.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	210	228	+18
Personnel compensation	$1,945,385	$2,147,776	+$202,391
Personnel benefits	144,669	159,074	+14,405
Total personal services and benefits	2,090,054	2,306,850	+216,796
Travel	121,600	127,600	+6,000
Total	2,211,654	2,434,450	+222,796

The increase of $216,796 for personal services and benefits is primarily for the 18 additional positions requested, 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87–793.

The increase of $6,000 for travel is to provide travel funds for the increased number of hearings to be conducted.

The following table shows the organization sections of the Bureau together with the number of positions authorized for 1963 and the number requested for 1964:

	Authorized, 1963	Requested, 1964	Increase
Director's office	33	33	
Appeals	8	8	
Certificates and captions	27	30	3
Hearings	67	71	4
Proceedings	58	69	11
Temporary Authorities Board	17	17	
Total	210	228	18

The Bureau has no control over the number of cases which it must handle. Carriers have the right to make applications for operating rights at all times, and those who desire to file complaints and other pleadings also have the right to do so.

The greatest portion of the manpower resources available to the Bureau is devoted to the handling of applications by motor carriers for operating rights. Shifts in areas of production, new shipping methods, changes in sources of supply, establishment of new plants, and the desire of motor carriers, water carriers, and freight forwarders to extend their operations and expand their services into new areas have caused a progressive and continuous increase each year in the filing of applications for operating rights. These increases in the past 5 years have averaged 5 percent per year, and it is estimated that filings will continue to increase at the same rate in 1964. However, during the 1961 fiscal year, probably as a result of the economic recession, the number of applications filed for permanent motor carrier operating authority declined. The reduction was partially offset by the filing of 187 applications resulting from Public Law 86–615, effective July 12, 1960, which provides grandfather rights for certain motor and water carriers and freight forwarders transporting persons or property in interstate or foreign commerce, within, from, and to Alaska and Hawaii. Since January 1962, a marked increased rate of filing motor carrier applications has been noted, and during the 11 months ended November 30, 1962, the new filings totaled 4,214, or an average of 383 per month. If this trend continues, it appears that the percentage of increases in filings during fiscal years 1963 and 1964 may be even greater than those experienced in prior years.

Due to the Commission's continued emphasis on carrier "fitness" and its increasing efforts to eliminate unlawful operations in the so-called "gray area" and other related transportation fields, the number of enforcement proceedings has increased, with the Commission's Bureau of Inquiry and Compliance participating in many of them. Most of these proceedings entail long and highly contested hearings, with many presenting extremely important and complex issues, and will require many more examiner workdays for processing to final determination than the ordinary application case. And, with continuing pressure by Congress and other outside interests for increased Commission activity in this enforcement area, the need to divert available manpower for the purpose of obtaining prompt decisions in proceedings of this type may be expected to increase.

As of November 30, 1962, there remained for disposition eight grandfather applications filed under the Transportation Act of 1958 which will be disposed of within the next several months. The Bureau's 4 remaining active work areas, therefore, will embrace (1) applications for operating rights, etc., (2) freight forwarder and water carrier applications and investigation proceedings, (3) rulemaking proceedings, complaints, investigations, and revocation proceedings, and (4) the Alaska-Hawaii grandfather applications, only 10 of which have been disposed of. The first three of these categories contain a number of pending unheard cases which will require substantial amounts of hearing time and examiner workdays for their disposition, and many will still be pending in one processing stage or another on June 30, 1963.

The fourth category, embracing the remaining 177 Alaska-Hawaii grandfather applications, continues to present a number of troublesome processing and decisional problems, including the holding of hearings in Alaska, and the expense of handling cases which must be heard by joint boards composed of Alaska and States such as Washington, Oregon, and Montana. To be handled, if possible, with the grandfather proceedings are approximately 100 directly related so-called new or extension applications covering operations within Alaska which were filed when Alaska became a State and prior to the enactment of the Alaska-Hawaii grandfather legislation. In addition, there are approximately 100 new or extension applications covering proposed motor carrier operations within and between Alaska and points in the continental United States. A number of the latter group of cases must be heard by multiple State joint boards; and some will require hearings in both Alaska and at points in the continental United States. Due to delay and opposition tactics of those involved, the procedural and other difficulties attendant to the processing of all of these cases have continued to increase, and the outlay in processing man-days and money required for their disposition, therefore, will be substantial.

Precedent decisions in grandfather applications involving motor operations solely within Alaska have become finalized and they will be used as a guide in disposing of this class of case. It is expected, therefore, that the Alaska Joint

Board, which has jurisdiction of these matters, can handle the remainder of these applications without further assistance by our examiners. The joint board's reports, however, will be written by our examiners.

Hearings in 19 precedent-making household carrier grandfather applications involving operations between points in the continental United States and Alaska, and in 4 Alaskan grandfather applications seeking certificates based on the same operations as those involved in several of these 19 cases have been completed. Decisions in these proceedings will provide needed precedents for deciding a large number of the pending applications presenting similar issues. Although substantial procedural, travel, and other problems are anticipated, it is estimated that about half of all these grandfather cases will be finally disposed of in fiscal year 1963, and the remainder in 1964.

A new and fifth acute work area affecting the Bureau's needs for fiscal year 1964 was created by recently enacted legislation (Public Law 87–805, approved October 15, 1962). This legislation repealed the old second proviso of section 206(a)(1) and added to that subsection two new paragraphs, which (1) provides for the issuance of so-called grandfather certificates of registration to those carriers now operating under that proviso, and (2) establishes a procedure by which single-State motor carriers seeking new or additional intrastate operating authority also may obtain, upon a proper showing, a certificate of registration authorizing comparable interstate and foreign operations.

Under the grandfather provision, those persons presently engaged in interstate and foreign commerce under the proviso, or those who would have been so engaged but for the pendency of litigation to determine the validity of their intrastate operations—to the extent that such litigation is resolved in their favor, are to be issued a certificate of registration.

In order to obtain a grandfather certificate of registration, an existing second-proviso operator must submit, within the statutory time period, a copy of his State certificate and an appropriate notice of intent to engage in interstate and foreign operations. The Commission must then determine whether the State certificate is an effective, lawfully issued, or acquired one and whether such certificate was on file with the Commission under the old second proviso. Upon finding in the affirmative in both issues, the Commission is required to issue to the applicant a certificate of registration authorizing the same operations in interstate or foreign commerce as are within the scope of operations authorized to be conducted under the State certificate.

This new statute outlines specific procedures under which a single-State carrier seeking new or additional intrastate operating authority may, upon a proper showing, also obtain a certificate of registration from the Commission granting comparable interstate rights. When filing an intrastate application with the State Commission, the applicant must state that he also seeks interstate operating authority. Notice of such desire will be published (by the Interstate Commerce Commission) in the Federal Register. The State commission, after due consideration of the proposed interstate operations, would determine whether the public convenience and necessity require that the applicant be authorized to engage in interstate and foreign commerce within the scope of the granted intrastate certificate. As a condition precedent to receiving a certificate of registration, the Interstate Commerce Commission may impose reasonable rules with respect to the filing of appropriate supporting data and may require compliance with all other applicable requirements established by or under the acts administered by the Commission. In accordance with such reasonable rules as the Interstate Commerce Commission may prescribe, any party in interest, who opposed the interstate portion of the application in the State Commission proceeding, may petition the Interstate Commerce Commission for reconsideration of the decision of the State Commission authorizing operations in interstate or foreign commerce, and upon such reconsideration upon the record made before the State Commission, the Interstate Commerce Commission may affirm, reverse, or modify the State Commission's decision, but only with respect to the authorization of operations in interstate and foreign commerce.

The law further provides that operations authorized to be conducted under either a new or grandfather certificate of registration shall be subject to all other applicable requirements of the Interstate Commerce Act and the regulations prescribed under the statute. Certificates of registration shall be valid only so long as the holder is a single-State carrier, not controlled by, controlling, or under common control with a carrier operating outside the State. Pursuant to rules and regulations which the Commission may prescribe, such certificates

of registration may be transferred but not apart from the transfer of the corresponding State certificate. Transfer of the State certificate without the interstate or foreign rights shall terminate the right to engage in interstate or foreign commerce. A holder of a certificate of registration may continue to engage in interstate or foreign commerce for a period of 6 months following termination or restriction in the scope of the intrastate certificate.

It is estimated that approximately 3,000 grandfather applications and annually 1,000 petitions for review of State actions will be received for processing. The 1964 budget includes seven attorney-advisers to handle this additional workload.

In connection with estimated disposition of cases and petitions for the fiscal years 1963 and 1964, consideration has been given to the new decisional processes of the Commission under which cases are assigned to the personal docket of individual Commissioners, and to the limitation on the right of appeal to the entire Commission from Division action. It should be noted that the new procedural techniques, including the use of decision and orders in lieu of Division or Commission reports, and the elimination of the right to review by the entire Commission except in cases involving issues of general transportation importance, have aided in maintaining the pending caseload at approximately the same level despite increased receipts over the previous year which in the case of motor carrier applications for permanent authority alone number more than 500. The Bureau's employee review board, created pursuant to the 1961 amendment to section 17 of the act, and to which certain types of cases formerly considered by Division 1 are referred for decision, also has proven effective and has provided the members of that Division with additional time for consideration of matters of greater significance.

With respect to the limitation on the right of appeal, it is difficult to estimate the number of petitions which will be filed in fiscal years 1963 and 1964, particularly in view of the recent Commission action permitting the filing of petitions seeking a determination by the entire Commission that a case, otherwise administratively final at the Division level, involves an issue of general transportation importance, and also the filing of petitions for further hearing. The effect of the present limitations in fiscal year 1963 cannot be fully determined at this time and the number of petitions received also will depend on the number of instances in which the Division affirms the hearing officer's recommendations. It is believed that the number of cases in which petitions are filed will decrease slightly in fiscal year 1963 to a point where some of the manpower now employed to process the petitions can be utilized in other work areas.

It is estimated that as of June 30, 1963, there will be pending 3,227 formal cases, other than those resulting from the new regulation, and that 5,042 new proceedings will be instituted during fiscal year 1964, a total workload of 8,269 cases. Taking into consideration the various intangibles and variables involved in the processing of a large volume of cases, the new procedures recently established by the Commission, together with what may normally be expected by way of increased production due to increased efficiency, it is quite possible that the total case inventory could be reduced to around 3,075 as of June 30, 1964.

Eight clerk-stenographer positions to perform secretarial and stenographic duties for both the hearing and nonhearing groups are requested. Four would be allotted to each group, and it is expected that these employees would contribute substantially to the efficiency and overall work performance of the examiners.

CERTIFICATES AND CAPTIONS

Three additional positions are requested in the Section of Certificates and Captions. One is required to handle the estimated increase in the workload and to reduce the pending backlog and two are required to prepare and check consolidated certificates of the larger motor carriers. At present, the section has on hand approximately 18 requests for consolidated certificates from such carriers as Consolidated Freightways and Spector Motor Lines, any of which will require the services of a certificate writer for periods ranging from 1 to 6 months or more.

Mr. WALRATH. Might I say in the Bureau of Operating Rights much of that is due to the new legislation, the amendment of the so-called second proviso section of the act.

Mr. BOLAND. Put in the record pages 122 through 131.

Mr. BOLAND. Any questions on the Bureau of Operating Rights? (No response.)

BUREAU OF RATES AND PRACTICES

Mr. JONAS. For the Bureau of Rates and Practices you are asking for 107 positions. Are you not asking for any increase in positions in that Bureau?

Mr. WALRATH. That is right.

Mr. JONAS. The increase in funds requested of $72,829 is accounted for by increased pay and compensation for 2 extra days?

Mr. WALRATH. That is right.

Mr. OSTERTAG. I notice in all your justifications that you list first the number of positions as between 1963 and 1964 and then you list the total cost of personal services and benefits, which is a plus in each instance; but the increase in compensation not only covers the increased cost of new positions, but it includes the increased cost due to salary raises.

Mr. WALRATH. That is correct.

Mr. OSTERTAG. I want to make clear that this increase in personnel compensation is not limited to new positions.

Mr. WALRATH. That is right. If you will take the Bureau of Rates and Practices, where there is no increase in personnel, the increased pay accounts for practically all of that increase.

Mr. JONAS. I am not opposed to the hiring of lawyers, but I am surprised you could use so many lawyers in this Bureau instead of accountants.

Mr. WALRATH. In the Bureau of Rates and Practices, sir?

Mr. JONAS. Yes.

Mr. WALRATH. I think I know the answer, but I would like Director Corbin to answer that.

Mr. CORBIN. This is the old Bureau of Formal Cases. The name was changed a few years back. We actually hold hearings and handle the proceedings whereby the parties put in their evidence, and we try these particular rate cases. As such we do not need accountants, although sometimes we go to them to get help with cost problems that are in the record.

Mr. JONAS. That is pretty well summarized by the language on page 132. We will put the narrative and the table on that page in the record.

(The page referred to follows:)

BUREAU OF RATES AND PRACTICES

This Bureau conducts hearings on rate matters and railroad and motor carrier accidents, prepares recommended and proposed reports, proposed final drafts of reports (decisions), and makes recommendations upon pleadings and motions in the following types of proceedings: formal investigations, formal complaint and answer proceedings, investigation and suspension proceedings instituted upon protests or on the Commission's own motion, with respect to changes in rates, fares, rules, regulations, or practices proposed by railroads, motor carriers, domestic water carriers, and freight forwarders in their tariffs; consideration of applications for relief from various prohibitions in the acts administered by the Commission, particularly section 4 of the Interstate Commerce Act; and applications under section 5a of the act, from groups of

carriers or freight forwarders for approval of agreements entered into by them to govern methods of considering jointly the initiation and establishment of rates, fares, charges, divisions of revenues on joint traffic, rules and regulations affecting transportation of freight and passengers; applications and investigations arising under section 25 of the act which are subjects of oral hearing; and proceedings under section 1 of the Standard Time Act.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	107	107	0
Personnel compensation	$1,151,981	$1,220,153	+$68,172
Personnel benefits	84,243	88,900	+4,657
Total personal services and benefits	1,236,224	1,309,053	+72,829
Travel	16,500	16,500	0
Total	1,252,724	1,325,553	+72,829

The increase of $72,829 for personal services and benefits is for 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87-793.

The 1964 budget provides 107 positions, which is the same as authorized for the current fiscal year. These positions are separated by categories as follows:

Director	1
Assistant Director	2
Hearing examiner	33
Attorney-adviser	45
Administrative officer	1
Clerks and stenographers	25
Total	107

Mr. JONAS. This table on page 133 gives a summary of hearings and actions taken during the comparable periods 1960 through 1964. It looks to me from this table that you had pending, for example in 1960, 1,328 hearings before this Bureau, and what do you mean by the next column, "Actual 1961"?

Mr. CORBIN. The "Actual" goes over all three columns, 1960, 1961, and 1962, whereas 1963 and 1964 necessarily have to be estimates.

Mr. JONAS. Well, your business is increasing, it seems.

Mr. CORBIN. Yes.

CONSOLIDATION OF BUREAUS

Mr. THOMAS. Why can we not combine two or three of these bureaus? Why can you not combine Rates and Practices with perhaps Bureau of Operating Rights? After all, if you get a tough case you have to pull in help from four or five bureaus.

Mr. WALRATH. That is what our policy and planning committee has under study now.

Mr. THOMAS. Judge, let us quit studying and do something. You have been in business 80 years and you have an accumulation of knowledge over there that is excelled few places in the world.

Mr. WALRATH. Thank you, sir.

Mr. THOMAS. I think you could combine two or three of these bureaus. If you have a tough case you have to bring in people from all your bureaus. Let us try it and see. Maybe some of the bureau chiefs would have to take a No. 2 spot and I do not imagine that would be to their liking. Is there any advantage to a consolidation?

Mr. WALRATH. The accountants still have to do accounting work; the cost-finding people still have to do cost finding.

Mr. THOMAS. It does not make any difference where they are. The Bureau of Economics ought to be combined.

Mr. WALRATH. There are certainly potentialities there. During the past 2 years we have made substantial changes and we are working hard at it.

PROCEEDING AND PETITIONS—RATES AND PRACTICES

Mr. JONAS. The table on page 133, is that a summary of the caseload statistics on the following page?

Mr. CORBIN. Yes.

Mr. JONAS. Put the table on page 133 in the record.

(The table referred to follows:)

The following statement shows the total proceedings and petitions handled by the Bureau for the fiscal years 1960, 1961, and 1962 and estimates for 1963 and 1964:

	Actual			Estimate	
	1960	1961	1962	1963	1964
Pending beginning of year	1,328	864	917	790	768
Received during year	1,672	1,877	2,100	2,357	2,429
Disposed of during year	2,136	1,824	2,227	2,379	2,458
Pending at end of year	864	917	790	768	739
Petitions:					
Pending beginning of year	101	108	87	86	79
Received during year	495	431	418	422	448
Disposed of during year	488	452	419	429	455
Pending at end of year	108	87	86	79	72

Proceedings received during the fiscal year 1962 increased 11.9 percent over 1961. The number of proceedings disposed of during 1962, as compared with 1961, increased 22.1 percent. The number of petitions received in 1962 increased slightly over 1961, but the number of petitions disposed of in 1962 decreased 7.3 percent under 1961. This was due primarily to the increased complexity of the proceedings handled in the Appeals Unit.

BUREAU OF SAFETY AND SERVICE

Mr. JONAS. Next is the Bureau of Safety and Service. That is important. Insert page 146 of the justifications.

(The page referred to follows:)

BUREAU OF SAFETY AND SERVICE

The primary work performed by this bureau includes inspection of safety appliances, signal and train control installation, and locomotives; enforcement of car-service regulations designed to increase the utilization of railroad rolling stock; enforcement of the Hours of Service Act, Power Brake Act, accident

reporting rules, investigation of railroad accidents, and the formulation and administration of regulations for the safe transportation of explosives and other dangerous articles.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	348	348	0
Personnel compensation	$3,173,761	$3,379,172	+$205,411
Personnel benefits	239,845	253,164	+ 13,319
Total personal services and benefits	3,413,606	3,632,336	+ 218,730
Travel	638,420	638,420	0
Other objects	67,374	65,629	− 1,745
Total	4,119,400	4,336,385	+ 216,985

The increase of $216,985 for the Bureau of Safety and Service is explained in detail under the sections of the bureau.

The Bureau of Safety and Service consists of four organizational units. The following statement shows, by units, the number of positions requested for 1964 which is the same as authorized for the current fiscal year:

Director's office	7
Section of car service	92
Section of locomotive inspection	105
Section of railroad safety	144
Total	348

Effective July 1, 1962, the field organization of this bureau was reorganized into eight geographical districts, instead of nine zones, subdivided into inspection areas or work districts.

Each of the new eight districts is under the direct supervision of a district director who is responsible for the supervision of the field staff of the bureau in his district as to the administration and enforcement of the laws, rules, and regulations administered by the bureau; maintenance of an adequate and balanced work program; quality of work, training of new employees; and for promoting a high level of morale and efficiency. To carry out his responsibilities, each district director is assisted by district supervisors who provide him technical advice as well as technical guidance and training to the agents and inspectors domiciled in the district.

Mr. JONAS. General, what is the state of the art in the field of safety? Are you making any progress in that field?

Mr. TAYLOR. We are just trying to hold our own. The car supply situation, the construction of new cars, is at a low ebb. The retirement of old cars is rather high. The change in loading, the high minimums, all tend to increase orders for new, longer, higher capacity cars, which are in short supply. The Commission was required last year to issue service orders covering the loading of 50-foot and 40-foot wide door boxcars because there was an insufficient number to take care of the loading. Therefore, the railroads that had spent large sums to take care of their shippers found themselves short of cars as the carriers who had purchased no new cars started holding onto the cars of others and using them for their own loading.

LOCOMOTIVE INSPECTION

Mr. JONAS. Does this locomotive inspection service still occupy a great deal of your time?

Mr. TAYLOR. Yes.

Mr. JONAS. What do you find wrong with diesel locomotives?

Mr. TAYLOR. The electrical apparatus, mostly.

Mr. JONAS. I was snowbound in Philadelphia a year or two ago and had to sit on the train 4 hours until they could thaw out the motors. You could not help that?

Mr. TAYLOR. No, sir. They claim in all the years of operating those it was the first time the snow had blown in and caused a short.

Mr. OSTERTAG. Do you have many steam engines operating today?

Mr. TAYLOR. Very few.

Mr. OSTERTAG. Is the problem lessened by virtue of diesel locomotives as compared to the steam engines?

Mr. TAYLOR. When a steam boiler blew up that was serious and killed a lot of people. But there are more opportunities for what you might term minor injuries on a diesel locomotive than on a steam locomotive.

Mr. OSTERTAG. I wondered if the problem had lessened by virtue of the diesel locomotive compared to the steam.

Mr. TAYLOR. It did for awhile but the diesel locomotives now are getting old. As the revenues decrease the upkeep is decreased and they are getting older and you have more trouble now on the diesels than when they were new.

EMPLOYMENT

Mr. JONAS. You are not asking for any additional personnel in this Bureau in 1964?

Mr. TAYLOR. No. We would like to add some but we are not asking for any.

Mr. JONAS. You have 348. That is a pretty good little army.

Mr. TAYLOR. We have a lot of area.

Mr. JONAS. How many of these people do you have in the field?

Mr. RYAN. 267.

Mr. JONAS. 267 of the 348?

Mr. RYAN. Yes, sir.

Mr. JONAS. You are asking for $216,985 more than you had last year.

DIRECTOR'S OFFICE

You are requesting seven positions for the Director's Office. Does that include the Director?

Mr. TAYLOR. Yes.

Mr. JONAS. You are pretty well staffed there and you do not need additional people in your office.

Put page 147 in the record.

(The page referred to follows:)

Director's Office, Bureau of Safety and Service

The Director's Office exercises guidance and direction over the entire railroad safety and car service program of the Commission. The Director has specific authority for the coordination of the fieldwork and all administrative activities of the Bureau.

The assignment of work by the Commission to boards of employees resulted in the establishment of two safety and service boards to handle certain proceedings in connection with railroad safety and car service matters and the explosives and other dangerous articles proceedings. This additional volume of work has been absorbed by the present staff.

This Bureau provides technical assistance to the mobilization staff in their activities and assists in the selection and assignment of reservists. Field representatives of the Bureau are used as administrative assistants to provide Commission contact with reservists in the field. With the stepped-up tempo of the program much time is consumed by both departmental and field staffs in carrying out the responsibilities for this activity.

Total personal services and benefits	68,655	72,640	+3,985
Travel	2,394	2,394	0
Total	[1] 71,049	[1] 75,034	[1]+3,985

[1] The cost of operation of this Office is prorated equally among the 3 sections of the Bureau of Safety and Service.

The increase of $3,985 for personal services and benefits is for 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87-793.

SECTION OF CAR SERVICE

Mr. JONAS. Section of Car Service. Does that mean railroad cars particularly?

Mr. TAYLOR. Yes, sir. That section has to do mostly with policing of car supply and distribution, demurrage charges, investigations of discriminations, investigations of piggy-back practices, and mobilization.

Mr. JONAS. Put page 148 in the record.

(The page referred to follows:)

SECTION OF CAR SERVICE, BUREAU OF SAFETY AND SERVICE

This section administers the provisions of section 1, paragraphs 10 to 17(a), inclusive, of the Interstate Commerce Act, which comprise the car service provisions and the emergency powers of the Commission with respect to car service. It prepares regulations and emergency orders regarding the use, control, supply, movement, distribution, interchange, and return of locomotives, cars, and other vehicles used in the transportation of property. The policing of these orders is done by a field force of agents who work directly with individual railroads and industries in handling problems relating to freight car supply and the movement of traffic.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	92	92	0
Personnel compensation	$876,986	$928,407	+$51,421
Personnel benefits	68,070	71,634	+3,564
Total personal services and benefits	945,056	1,000,041	+54,985
Travel	115,000	115,000	0
Other objects	27,344	27,344	0
Total	1,087,400	1,142,385	+54,985

The increase of $54,985 for personal services and benefits is primarily for two extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87-793.

EMERGENCY MOBILIZATION

Mr. JONAS. "Mobilization" is an interesting word. How do we stand with our equipment now?

Mr. WALRATH. Mr. Alley is present. The work takes three general approaches. First of all, I assure you that on the Commission level we are, I think, in good shape and in contact with the emergency planning people on a regular and frequent basis.

When you get down to the working level, in the rail field we have made real progress in the organization of our reservists. I will let Mr. Alley give the details of this. In 40 of the 50 States—and it may have increased in the last few days—we are completely organized in the motor carrier reserve, and that has been done in close cooperation with the Governors and the trucking associations and our own people. Assistant Director Meyer can speak to that in detail.

FREIGHT CAR SUPPLY

Mr. JONAS. How many new freight cars do we have?

Mr. TAYLOR. 36,500 new freight cars were delivered during 1962. That is next to the lowest in some years. The year before it was about 31,000.

Mr. JONAS. How many were taken out of service?

Mr. TAYLOR. 85,000.

Mr. JONAS. Is that a dangerous situation? It is not a healthy situation?

Mr. Taylor. No; it is not a healthy situation.

Mr. JONAS. Is there any shortage in any section of the country of railroad cars?

Mr. TAYLOR. Yes, sir. We had some rather serious shortages right in your State.

Mr. JONAS. Particularly last fall?

Mr. TAYLOR. Yes. The mills were short of 50-foot cars for finished products. We were short in the Pacific Northwest on cars for plywood and lumber loading.

Mr. JONAS. How do you account for that shortage in the Southeast?

Mr. TAYLOR. For the reason that most of the products originating there were destined to points out of the Southeast, and they also have use for some of those large cars in heavy population centers and they keep them instead of sending them back home.

Mr. JONAS. How long can a railroad keep another company's car without getting in trouble?

Mr. TAYLOR. Indefinitely.

Mr. JONAS. By paying how much a day?

Mr. TAYLOR. $2.88 per day.

Mr. JONAS. The Commission does have authority, if you find that is subject to abuse, to correct it?

Mr. TAYLOR. Yes, sir.

Mr. OSTERTAG. You mean they can use it or just hold it?

Mr. TAYLOR. They can hold it. We would check to see if the car is held under load and being sure they pay the demurrage.

Mr. JONAS. Questions on this before we go on?

Mr. WALRATH. I misconstrued the question. I thought you meant the mobilization planning program.

MOBILIZATION OF RAILROADS

Mr. THOMAS. One question, please. Suppose this country got into serious trouble? We hope we don't but we know there is a possibility. What condition would we be in in the transportation field, particularly in railroads?

Mr. TAYLOR. My opinion is that we are in a terrible position.

Mr. THOMAS. One for cargo and one for passengers. Would we close the depots? We would have no equipment or trained labor?

Mr. TAYLOR. Passenger cars are being scrapped. Railroads could possibly handle military personnel and material in case of emergency.

Mr. THOMAS. What about the rolling stock for the freight end of it?

Mr. TAYLOR. We are not in good shape.

Mr. THOMAS. How long has all this been going on? This has been going on proportionately for 3 or 4 years?

Mr. TAYLOR. Five or six years.

Mr. WALRATH. There is a statistical story of that in pages 152 to 155.

Mr. THOMAS. How long can that go on before we really have a problem? We are in a serious condition now, let alone an emergency. We cannot continue that way.

Why is it more cars are not bought by industry?

COST OF FREIGHT CARS

Mr. TAYLOR. The price has gone up. The average 50-foot freight car now costs some $15,000. The big heavy duty flatcars they use in piggyback service run close to $16,000 each.

Mechanical refrigerator cars run close to $30,000 each.

DEPRECIATION OF ROLLING STOCK

Mr. THOMAS. Are not the rates for service commensurate? What is the amortization you grant them on these cars?

Mr. TAYLOR. It has been reduced somewhat. It was reduced to 15 years, I believe.

Mr. PAOLO. Twelve to fifteen years.

Mr. THOMAS. How about the rate of return?

Mr. TAYLOR. That is something the Commission has recommended for the past 5, 6, or 7 years. Recommendation No. 2 in the 76th annual report requests authority for the Commission to determine whether per diem charges shall be computed on the basis of cost of ownership and upon such other bases as will, in its judgment, cover such cost and encourage the acquisition of an adequate national fleet of freight cars.

Mr. THOMAS. The Commission has no authority to advise or regulate the type of equipment that an operating company has?

Mr. TAYLOR. No, sir.

Mr. WALRATH. We have legislation pending in our annual recommendations, Mr. Chairman, which we think would encourage car ownership.

Mr. THOMAS. It looks like a period of 15 years for depreciation on a car is far too long. It is not comparable to an automobile, is it? It should be longer, of course, but what about other comparable equipment, if there is such a thing as comparable equipment?

Mr. JONAS. Will the change in depreciation schedules help this situation?

Mr. TAYLOR. The only thing I have seen on it, Mr. Jonas, is a news release issued by the president of the Santa Fe Railroad saying that the change encouraged his company to purchase additional cars.

RAILROAD CAR DATA

Mr. JONAS. I notice a table on page 153 which shows an alarming set of figures. On June 30, 1959, there were new cars on order, 40,973. On that comparable date in 1962 it had dropped down to 13,274. There was a gradual decline during the 4-year period.

Mr. Chairman, I did not put those in earlier.

Mr. THOMAS. I would put them in.

Mr. JONAS. Insert pages 152 through 155.

LOCOMOTIVE INSPECTION

Mr. JONAS. The Section of Locomotive Inspection, page 156, is next. Insert that page in the record.

(The page referred to follows:)

SECTION OF LOCOMOTIVE INSPECTION, BUREAU OF SAFETY AND SERVICE

The Director of Locomotive Inspection is charged with the administration of the Locomotive Inspection Act enacted to promote safety of employees and travelers upon railroads by making it unlawful for any carrier to use or permit to be used on its line any locomotive unless the locomotive and all parts and appurtenances thereto appertaining have been inspected as required, and are in proper condition, safe to operate, and comply with the approved rules and regulations established under the act. The primary function of this section is to determine that required inspections of locomotives are made by the carriers; that defects disclosed by these inspections are repaired before the defective locomotive is returned to service; that general design, construction and repair practices comply with the requirements and promote maximum safety in order that accidents and casualties be minimized by the elimination of unnecessary hazards.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	105	105	0
Personnel compensation	$908,815	$964,689	+$55,874
Personnel benefits	67,235	71,031	+3,796
Total personal services and benefits	976,050	1,035,720	+59,670
Travel	220,870	220,870	0
Other objects	19,080	19,410	+330
Total	1,216,000	1,276,000	+60,000

The increase of $59,670 for personal services and benefits is for 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87-793.

Mr. JONAS. You ask for the same number of positions in this Bureau that you had in 1963, namely 105, a slight increase due to increased benefits, and the 2 extra days, increase amounting to $60,000. You have an increase there in other objects of $300. What is that for?

Mr. RYAN. Primarily due to increase cost of materials.

Mr. JONAS. I think the narrative on page 157 is important. Insert page 157 in its entirety and the table on page 159.

(The material referred to follows:)

The 1964 budget request provides for 105 positions to carry out the program for the enforcement of the Locomotive Inspection Act. To provide a full safety program with the minimum number of position, a reorganization of the field staff was undertaken as of July 1, 1962. The purpose of the reorganization is to provide closer supervision and better utilization of personnel for all phases of work. The primary duty of the district inspector is to see that the railroads are making proper inspections on all locomotives and to be informed of the condition of motive power in his district by personally inspecting locomotives at various railroad faciilties. Whenever dangerous conditions are found requiring immediate repairs, the locomotive is formally ordered withheld from service until properly repaired. All reports of inspections, regardless of defective conditions found, are transmitted to the chief mechanical officials of the railroads involved for action. Other duties of the district inspector are checking company records for reported defects, observing shop practices and repairs, interviewing company mechanical officials regarding conditions and practices in their

jurisdiction, and when accidents occur which come within the purview of the act, make a complete field investigation and report his findings to the Washington office. These accident reports are analyzed by the section's mechanical engineers and facts found are frequently used to prevent similar accidents.

The railroad industry today is operated almost entirely with diesel-electric locomotives. Diesel-electric locomotives, with their electric generators and traction motors, require the use of a large number of controls, relays, and intricate protective devices. In addition, modern locomtives are used for the hauling of greater tonnage at higher speeds for longer distances than in prior years. To detect defects before they result in accidents and serious casualties, more frequent and detailed inspections are required.

Fiscal year	Accidents	Casualties	Fiscal year	Accidents	Casualties
1946	457	505	1955	83	145
1947	400	523	1956	73	83
1948	382	426	1957	75	90
1949	277	320	1958	72	86
1950	220	244	1959	66	90
1951	221	315	1960	50	81
1952	196	207	1961	71	77
1953	134	162	1962	67	73
1954	105	305			

WORKLOAD STATISTICS

The workload statistics shown in the following table cover the main work of our field forces for the fiscal years 1960, 1961, and 1962, inclusive, and estimates for the fiscal years 1963 and 1964. Years of experience have proven that a full and vigorous program of field inspections is necessary if any improvement in railroads' motive power is to be expected. As noted in the table, the percentage of locomotives inspected and found defective remained the same as in the previous year of 1961. Due to the reduction in size of the inspectional force for the 1962 fiscal year, every effort was required on the part of each inspector to keep the percentage of locomotives inspected and found defective from increasing over the previous year. To continue the enforcement of the locomotive inspection law with a reduced inspection force coupled with the financial problems of the Nation's railroads can only lead to a marked rise in defective equipment with resulting accidents and casualties. Estimated rise in defective motive power for the years 1963 and 1964 is based on two things; first, the increase of the average age of the power, and second, because of the financial situation confronting the railroad industry as a whole.

Mr. THOMAS. The table shows how the incidence of accidents has diminished beginning from 1946 and running through 1962. That would indicate that either your locomotive inspection work is more efficient or that the companies themselves have improved their own inspection services. Which would you say it is?

Mr. TAYLOR. I would say it is a combination of both.

Mr. JONAS. You wouldn't take all the credit?

Mr. TAYLOR. No, sir.

TRAVEL EXPENSES—LOCOMOTIVE INSPECTION

Mr. JONAS. You want just your part of it.

Page 161 contains an explanation of travel expenses. We might insert that in the record.

(The page referred to follows:)

EXPLANATION OF TRAVEL EXPENSE

The amounts requested in the items of travel and per diem which comprise the travel expense of the section represent the amount necessary for compliance with section 6 of the Locomotive Inspection Act, which in part requires that each

inspector visit at frequent intervals the railroad facilities in his district to determine the degree of carrier's compliance with the laws and rules. The efficiency of the section is thus related to the actual time inspectors can devote to the performance of their normal activities at the numerous railroad terminals in their districts. It is necessary that each district inspector have available approximately 176 days to devote to field inspections and related duties in fiscal year 1964 to permit the section to carry out its program. Any curtailment of the minimum time essential to properly police field inspection points will decrease the efficiency of the work of the section and will adversely affect the promotion of safety of employees and travelers upon railroads, the object for which the act was enacted by the Congress.

Mr. JONAS. Now we come to the section of railroad safety, Bureau of Safety and Service, activity No. 5. Insert page 162 and the narrative on 163 in the record.

(The material referred to follows:)

SECTION OF RAILROAD SAFETY—BUREAU OF SAFETY AND SERVICE

The major objectives of this section are the enforcement of the safety appliance laws, which include the power brake law of 1958; the Ash Pan Act; the hours of service law; the Accident Reports Act; the signal inspection law; the Sundry Civil Appropriation Act of 1908, relating to investigation of safety appliances or systems intended to promote the safety of railway operation, and which provides for the inspection of postal mail cars, and/or the examination of the construction of such cars on any railroad in the United States; the transportation of explosives law, which authorizes the Commission to formulate regulations and orders for the packaging and transportation of explosives and other dangerous articles by land or water, and the policing of their movements; and that part of the Medals of Honor Act, which provides for the award of lifesaving medals to persons who shall, by extreme daring, endanger their own lives in saving or endeavoring to save lives upon any railroad within the United States.

Comparison of 1964 budget with 1963 appropriation.

	1963	1964	Change
Positions	144	144	0
Personnel compensation	$1,387,960	$1,486,076	+$98,116
Personnel benefits	104,540	110,499	+5,959
Total personal services and benefits	1,492,500	1,596,575	+104,075
Travel	302,550	302,550	0
Other objects	20,950	18,875	−2,075
Total	1,816,000	1,918,000	+102,000

The increase of $104,075 for personal services and benefits is for 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87–793.

To obtain compliance with the various laws and orders of the Commission promulgated thereunder, a qualified staff of district directors, district supervisors, field supervisors, agents and inspectors is maintained with headquarters strategically located at railroad centers throughout the United States. The effectiveness of the law enforcement activities of the section are directly related to the ability of the field staff to make inspections with uniform frequency. It has been found that where inspections are not made at regular intervals, compliance with the laws and orders administered by the section deteriorates in proportion.

In the past few years and continuing to the present time, a considerable number of new freight classification yards of the electronic-retarder type have been built and placed in service. These new terminals have usually replaced several smaller yards in the same switching district. Agents and inspectors of the section have had some of their work consolidated as a result of the new yards, however, an increased educational task was placed upon them because of the new and different mechanical and organizational setups encountered.

The field headquarters cannot all be located at or near major railroad terminals. Therefore, travel is required in order that each representative of the section might carry out his law enforcement duties.

Mr. JONAS. Here is another activity where you think you can get along without an increase in personnel, but you do have a substantial increase dollarwise, $102,000 for the year. You have a slight reduction there in other objects of $2,000 which is encouraging.

RAILROAD SAFETY STATISTICS

Mr. JONAS. There is some statistical information in the justifications on page 166 and page 167. It might be well to insert that in the record.

(The pages referred to follow:)

The following statements show the work performed by the Section of Railroad Safety during the fiscal years 1960, 1961, 1962, and the estimated workloads for the fiscal years 1963 and 1964:

Safety appliances

Fiscal year	Freight cars inspected	Passenger cars inspected	Locomotives inspected	Total units inspected	Number of prosecutions filed	
					Suits	Counts
1960	1,579,463	34,669	122,151	1,736,283	326	1252
1961	1,524,056	35,396	111,516	1,670,968	234	680
1962	1,416,097	35,963	110,007	1,562,067	252	636
1963 [1]	1,600,000	35,000	125,000	1,760,000	300	1200
1964 [1]	1,600,000	35,000	125,000	1,760,000	300	1200

[1] Estimated.

Hours of service

Fiscal year	Hours of service reports tabulated	Instances of excess service reported	Instances investigated	Number of prosecutions filed	
				Suits	Counts
1960	6,916	3,251	2,320	39	177
1961	1,652	3,201	1,959	39	167
1962	655	2,783	1,767	43	131
1963 [1]	600	2,500	1,800	35	175
1964 [1]	600	2,500	1,800	35	175

[1] Estimated.

Accident investigation

Fiscal year	Number of accidents reported	Number of accidents investigated	Number of prosecutions filed for failure to report	
			Suits	Counts
1960	376	43	19	39
1961	343	32	14	280
1962	348	29	10	130
1963 [1]	400	50	20	300
1964 [1]	400	50	20	300

[1] Estimated.

Signals and train control

The following statement shows the signal and train control applications received, and the signal and train control inspections made for the fiscal years 1960, 1961, 1962 and the estimated workloads for the fiscal years 1963 and 1964:

Fiscal year	Signal and train control applications received	Signal and train control inspections made	Number of prosecutions filed	
			Suits	Counts
1960	331	4,495	5	22
1961	286	4,560	7	21
1962	249	4,507	4	6
1963 [1]	275	4,600	10	30
1964 [1]	300	4,600	10	30

[1] Estimated.

Explosives

Fiscal year	Special permits in effect	Special permits issued	Prosecutions recommended	
			Suits	Counts
1960	426	787	15	45
1961	388	691	34	61
1962	469	832	36	63
1963 [1]	400	750	40	70
1964 [1]	475	850	30	57

[1] Estimated.

Mr. JONAS. These tables do not show much stepup in activity from 1960 to 1964. Is that due to the fact you have fewer cars?

Mr. TAYLOR. Partially. It is due primarily to the passage of the power brake law which has taken a considerable portion of our field agents' time, checking to see that the railroads make proper inspection of the airbrake equipment on the trains before leaving terminals. That would require approximately 20 or 30 percent of the time of the field people, which is a new requirement for the people in the field.

Of course, when they are making airbrake inspections in a terminal they usually have an opportunity to inspect a number of freight cars for defects, but it has reduced the number of our inspections somewhat.

Also in the past year it seems we have had a fairly large number of vacancies due to older employees retiring.

Mr. JONAS. May I inquire if you mean that out of 1,579,000 freight cars inspected in 1960 you filed prosecutions in 326 cases?

Mr. TAYLOR. The prosecutions for the last year would be 252 suits, with 636 counts. That is on the safety appliances.

Mr. JONAS. Does that information you have just given mean that was the total number of violations you found out of 1½ million inspections?

Mr. TAYLOR. No, sir. When on regular inspections work, one inspector will go into a terminal and take an officer of the railroad company with him and make inspections of equipment. They usually find a number of safety appliance defects.

It is not a violation of law on the part of the railroad until they use the defective equipment. If a defective car is standing in the yard there is no violation of law.

Mr. JONAS. I understand that, but you brought 252 suits.

Mr. TAYLOR. Yes, sir; but that was on railroads which were detected moving defective equipment.

Mr. JONAS. You found 252 such cases which were sufficiently damaging to cause you to bring suit?

Mr. TAYLOR. That is right.

Mr. JONAS. That is all we have in that section, Mr. Chairman.

BUREAU OF TRANSPORT ECONOMICS

Mr. THOMAS. Let us take a look at the Bureau of Transport Economics. Insert pages 185 and 186 in the record.

(The pages referred to follow:)

BUREAU OF TRANSPORT ECONOMICS AND STATISTICS

This bureau is the primary source of financial and statistical data necessary to the Commission for the proper performance of its regulatory functions as set forth in the national transportation policy. In this connection, the bureau has three principal functions: (1) make economic and statistical research in the field of transportation, (2) prepare the Commission's official statistics of the financial and operating results of the various classes of carriers subject to its jurisdiction, and (3) make recommendations as to the Commission's policy in connection with these matters.

In the performance of its functions the bureau each year collects, reviews, processes, and tabulates thousands of annual and periodic reports from all classes of carriers, and publishes a series of statements based thereon representing the official statistics of the Commission. These statistical statements and their underlying data constitute the primary source of information for the research and analytical functions of the bureau, as well as for the use of the Commission and interested parties in rate and other Commission proceedings. The work relationship of the bureau extends not only to the Commission but to virtually all of the bureaus. Thus the bureau serves (1) in an advisory capacity to all bureaus with respect to economic effects, and (2) in the supply, explanation, and analysis of statistics.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	180	188	+8
Personnel compensation	$1,143,022	$1,269,159	+$126,137
Personnel benefits	84,399	93,381	+8,982
Total personal services and benefits	1,227,421	1,362,540	+135,119
Travel	4,000	8,000	4,000
Total	1,231,421	1,370,540	+139,119

The increase of $135,119 for personal services and benefits is requested primarily for the eight additional positions, two extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87-793. The increase of $4,000 for travel is primarily to provide adequate travel funds for the economic counsel staff and to provide basic research and analysis for formulation of Commission policy.

Number of positions authorized, 1963 and requested for 1964

Section and Branch	Authorized, 1963	Increase, 1964	Requested, 1964
Director's Office	18	0	18
Economic Counsel	0	3	3
Subtotal	18	3	21
Section of Reports:			
Office of Chief of Section	5	0	5
Annual Reports Branch	43	0	43
Current Reports Branch	16	0	16
Accidents Reports Branch	7	0	7
Subtotal	71	0	71
Section of Research:			
Professional	15	3	18
Clerical	4	2	6
Subtotal	19	5	24
Section of Traffic Statistics:			
Office of Chief of Section	3	0	3
Processing Branch	6	0	6
Review and Analysis Branch	5	0	5
Data Processing Branch	[1] 43	0	43
Milling Branch	1	0	1
Certificates and Permits Branch	14	0	14
Subtotal	72	0	72
Bureau total	180	8	188

[1] The Mechanical Tabulation Branch, Section of Reports was abolished Aug. 17, 1962; the positions were transferred to the Tabulation Branch, Section of Traffic Statistics and renamed the Data Processing Branch.

NOTE.—As shown by the table, 8 additional positions are requested for fiscal year 1964 for this bureau.

Economic Counsel	2
Economist	3
Secretary—stenographer	3
Total	8

POSSIBLE CONSOLIDATION OF BUREAUS

Mr. THOMAS. What is the jurisdiction of this Bureau? Does it overlap with the Bureau of Accounts? We have 188 in this Bureau and you have 189 in the Bureau of Accounts. You have around 450 people right here. Can we save any time and money without hurting anybody by consolidating these bureaus and speeding up matters? This is all high-grade and skilled work.

How many unfilled jobs do you have in your Bureau now?

Mr. MARGOLIN. About eight, which is about normal.

Mr. THOMAS. Is it hard to get the type of personnel you want? Are most of them professional?

Mr. MARGOLIN. Yes to the first and no to the second question, sir.

Mr. THOMAS. Let us turn to the back of the book and see the type of personnel you have. The Bureau of Accounts has six 14's, three 13's, seventeen 12's, thirty 11's. Those are all in the field. What do you have downtown? In the Bureau of Transport Economics you show one 17, one 16, two 15's, nine 14's, ten 13's, eight 12's, three 11's, and 154 grade 9's and below.

The Bureau of Accounts has the Director at 17, which is all right, except it should be more, one 16, four 15's, seven 14's, and so on. What

is the necessary educational background for these two bureaus? What are the qualifications for the top people?

Mr. MARGOLIN. First, Mr. Chairman, the Bureau of Transport Economics and Statistics has a comparatively small proportion of professional people.

Mr. THOMAS. You have made that speech before and I want you to emphasize it good now.

Mr. MARGOLIN. I have not used the same words before, sir.

The professional staff, I would judge right now, without checking the figures, consists of about one-sixth or one-seventh of the organization. These are primarily in the professional area, the economists, most of whom have a master's degree, doctor's degree, and so on. The others are statisticians, mathematical statisticians, all of whom have at least the minimum of a college degree, and some higher.

With regard to your comment with respect to the consolidation of two bureaus, they perform, in practically all instances, functions which are different. We have very little duplication.

Mr. THOMAS. Spell that out.

FUNCTION OF THE BUREAU OF ACCOUNTS

Mr. MARGOLIN. If I may refer to Director Paolo here, in their accounting functions they are concerned primarily with the establishment of the accounting systems for those carriers subject to their jurisdiction, which accounts for about 4,000-plus carriers.

They are also concerned with the compliance with those systems.

On the other hand, the——

Mr. THOMAS. All of them are accountants in his section, and in your section they are economists, statisticians, and so on?

Mr. MARGOLIN. Plus the necessary clerical help.

FUNCTION OF THE BUREAU OF TRANSPORT ECONOMICS

In our Bureau we are concerned with some 19,000 carriers which file reports. We are concerned with proper reporting requirements and the adequacy of reports' data that are submitted by some 19,000 carriers. We are not only concerned with the information required by the accounting people in accordance with the accounting schedules, but we are equally concerned with the matter of traffic information and operating information which the Bureau of Accounts does not have any interest in.

In connection with these 19,000 carriers, we are constantly negotiating with representatives of these groups on various changes they want to make in reporting. This is due partially to technological changes and many other things which the carriers think will lighten their burden, and so on.

If I may cite a specific illustration, there has been some discussion about piggyback traffic. At the present time the Commission does not collect or have any information regarding piggyback movements except that put out by the AAR, which collects the information from the individual railroads.

We have a program underway now at a staff level under which we have been negotiating with carriers—motor carriers, railroads, freight forwarders, and water carriers—and we will present proposals to the Commission when we think it has reached the proper point. We will endeavor to collect those data with respect to piggyback movements which meet the Commission's need and put a minimum burden on the carriers.

This is the type of activity with which we are concerned and the Bureau of Accounts has no interest. That is only one illustration.

Mr. BOLAND. You supply all this information to all the bureaus. Is this true?

Mr. MARGOLIN. All the bureaus and many parties on the outside for a variety of purposes.

Mr. JONAS. Do you sell any of these reports?

Mr. MARGOLIN. Most of our statistical reports are not for sale. They are made available to those who need them.

Mr. JONAS. The industry has access to them?

Mr. MARGOLIN. That is right.

Mr. JONAS. Free of charge?

Mr. MARGOLIN. Except a few, for example, Transport Statistics in the United States, that is right. There has been an increase in demand for these publications.

Mr. JONAS. Page 185 has been inserted in the record, and page 186 has been inserted which shows a breakdown of the positions and your requested increase of 188 for 1964.

We shall insert the narrative beginning on page 187 down to the caption "Director's Office."

(The material referred to follows:)

BUREAU OF TRANSPORT ECONOMICS

The statistical operations as well as research and related analytical work of the Bureau are continuing to undergo substantial expansion and change. The expansion reflects the Commission's action of June 5, 1961, emphasizing the need for increased activity in transport policy analysis and research activities, and for economic counsel participation in selected cases of transportation importance.

Underlying the importance attached by the Commission to these activities is the prevailing high level of interest in existing and emerging transportation problems which have been occasioned by the changing character of our national life and economy. This interest is likely to be sustained indefinitely as evidenced by the President's recent transportation message and implementing legislation as well as by related activities in the legislative branch of the Government.

The Bureau of Transport Economics and Statistics is providing substantial staff resources in support of the Bureau of Inquiry and Compliance in two major railroad merger proceedings pending before the Commission and was recently requested to provide similar assistance in ex parte 230, substituted services—charges and practices for for-hire carriers and freight forwarders (piggyback service)—rulemaking. It is anticipated that the Bureau will be called upon increasingly to provide such services.

The Inventory of Motor Carrier Authorities has reached operational status and its uses are expected to undergo further development throughout fiscal year 1963. The Commission has long been aware of the need for the kind of information now available from IMCA and has devoted substantial resources to its development. The fruits of these efforts are beginning to be realized and will grow during the coming fiscal years.

The Bureau is now in the process of converting its statistical operations to a modern electronic computer (RCA 301) which was installed early in December 1962. Also, the Commission has established under the Office of the Managing Director an ICC study team which is conducting studies directed to the long-range development of means to apply modern electronic data processing systems to the work of the Commission. The character of the Bureau's operations, the increased emphasis on research and analysis, the development of economic counsel functions and underlying requisite staff support, the need to modernize reporting requirements and other factors strongly suggest that the feasibility studies will involve many of the Bureau's operations.

In connection with the administration of the Commission's reporting systems, the Bureau conducts a regular and continuing reports improvement program. Also, the Bureau actively participates in the work of the Commission's staff committee on the reduction of paperwork burden. Despite these efforts, the Commission is of the view that more emphasis and resources should be devoted to the general upgrading of the Bureau's entire reports system. The objective of the Commission's program is to assure the collection of the data essential to the conduct of its regulatory functions, that it is collecting only essential information, and that modern statistical and data-processing techniques are fully utilized. The reporting burdens imposed upon the carriers should be held to the minimum necessary to provide the Commission with data on the regulated carrier industry, consistent with Commission purposes and consistent with the general responsibility of the Commission. Indicative of the need for major emphasis on a complete reexamination of reporting requirements, it was stated in the 1962 report of a House Subcommittee on Census and Government Statistics:

"Every reporting system initiated prior to World War II should be given a special review to determine its usefulness."

The same subcommittee, in a 1961 report, on the other hand, stated:

"A Government agency which collects information from the public has a responsibility to publish the information in useful and timely summaries.

"The increasing complexity of the transportation segment of the Nation's economy will require more, rather than less, statistical data. It is important that efforts be directed toward eliminating existing gaps in transportation data."

A general examination and revision of the Commission's reporting system requires that the Bureau have the means available to take full advantage of the advances made in recent years in statistical reporting techniques and data-processing equipment.

DIRECTOR'S OFFICE

Mr. JONAS. In the Director's Office you want to increase your 18 positions to 21. What are these men to do?

Mr. MARGOLIN. That is in conjunction with the discussion we had this morning with respect to the economic counsel. There is an increase for the Bureau of eight. These will be two economic counsel and a stenographic person, and an increase of five in the research. This would be three economists with two clerical assistants.

Mr. JONAS. So the three positions to be added to the Director's Office includes two economists——

Mr. MARGOLIN. Two counsel, called economic counsel, and one secretary.

Mr. JONAS. Insert the table and narrative on pages 188 and 189 in the record.

(The pages referred to follow:)

DIRECTOR'S OFFICE, BUREAU OF TRANSPORT ECONOMICS AND STATISTICS

This Office directs and supervises the work of the Bureau; coordinates and expedites the work of the various sections of the Bureau; participates with and assists other bureaus in matters of mutual concern; and administers all policy

matters relating to the work of the Bureau. It also handles all personnel and administrative matters of the Bureau, and furnishes typing service to the various sections. The economic counsel staff assists the Commission by assuring the development of an adequate record in selected cases of transportation importance, drawing ecoonmic, technical, advisory, regulatory, and informational services from bureaus and offices of the Commission and other available sources.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	18	21	+3
Personnel compensation	$115,409	$146,114	+$30,705
Personnel benefits	8,599	10,840	+2,241
Total personal services and benefits	124,008	156,954	+32,946
Travel	800	3,000	+2,200
Total	124,808	159,954	+35,146

The increase of $32,946 for personal services and benefits is requested primarily for the three additional positions, two extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87–793. The increase of $2,200 for travel is requested primarily to provide adequate travel funds for economic counsel to participate in Commission proceedings.

The 21 positions provided in the 1964 budget for this Office are separated by categories as follows:

Director	1
Assistant Director	1
Assistant to Director	1
Administrative assistant	1
Attorney	2
Clerk, stenographer, and typist	15
Total	21

The 1964 budget provides two attorney positions and one stenographic position for the economic counsel staff. Economic counsel will appear in a selected or limited number of cases of major importance, drawing economic, technical, advisory, regulatory and informational services from bureaus and offices of the Commission by assuring the development of an adequate record, including proper representation of the public interest, without taking an advocatory position, except as directed by the Commission. There may also be participation in other types of cases where the Commission anticipates, or becomes aware, that the issues are such that the record has not been made complete or probably would not be complete.

SECTION OF REPORTS

Mr. JONAS. In the section of reports you say you can get along with only 71 people next year?

Mr. MARGOLIN. So I have been told, sir.

Mr. JONAS. You mean you would like to have had a few more?

Mr. MARGOLIN. Hypothetically, yes, sir.

Mr. JONAS. That is if you had your way about it. You are not asking for any?

Mr. MARGOLIN. That is right.

Mr. JONAS. At least the Budget Bureau didn't authorize you to ask for any.

Insert the table and narrative on page 190 and the table on 191 in the record.

(The material referred to follows:)

SECTION OF REPORTS, BUREAU OF TRANSPORT ECONOMICS AND STATISTICS

The Section of Reports is engaged in the preparation of the Commission's official statistics regarding the financial and operating conditions of all surface carriers subject to the Interstate Commerce Act; provides basic financial and statistical data used by this and other bureaus of the Commission, the Congress, the transportation indusry, governmental agencies and other interested parties; establishing financial, statistical and accounting reporting requirements, and reporting policies for: (1) Financial returns, (2) operating statistics, (3) railroad accident reporting; enforcing the reporting requirements, policies, and procedures as to the time of submission of reports, accuracy and completeness and conformance with policies, prescribed procedures, and special instructions; and furnishing industry and Government representatives with information regarding reporting regulations and data contents of reports. These carriers aggregate 20,000 in number, report approximately $21 billion of revenue annually, and represent about $46 billion in investment in transportation property.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	71	71	0
Personnel compensation	$437,358	$463,239	+$25,881
Personnel benefits	32,459	34,243	+1,784
Total personal services and benefits	469,817	497,482	+27,665
Travel	600	600	0
Total	470,417	498,082	+27,665

The increase of $27,665 for personal services and benefits is requested primarily for 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87–793.

The 71 positions provided in the 1964 budget for this Section are separated by categories as follows:

Chief and assistant chief of section	2
Statistical officer	2
Economist	1
Accountant and accounting technician	20
Statistical assistant	5
Statistical clerk and clerical	41
Total	71

The Section of Reports comprises three Branches and the Office of Chief of Section. The 71 positions included in the 1964 budget for this Section by units are as follows:

Office of Chief of Section	5
Accident Reports Branch	7
Annual Reports Branch	43
Current Reports Branch	16
Total	71

The number of reports received from carriers during the fiscal years 1960, 1961, and 1962 together with estimates of the number to be received in 1963 and 1964 are shown in the following table:

Type	1960	1961	1962	1963	1964
Annual	17,793	18,792	18,420	18,500	18,500
Monthly and quarterly [1]	45,486	42,840	39,416	37,790	37,220
Rail accident and supplements	30,369	31,756	41,853	42,000	42,000
Total	93,648	93,388	99,689	98,290	97,720

[1] Includes certain annual reports processed by the Current Reports Branch.

SECTION OF RESEARCH

Mr. JONAS. You have a Section of Research, and that is the other Section in which you ask for additional personnel, the five to which you already alluded.

Mr. MARGOLIN. Yes, sir.

Mr. JONAS. Insert the table beginning at the bottom of page 192 down through the table at the top of page 193.

(The material referred to follows:)

SECTION OF RESEARCH, BUREAU OF TRANSPORT ECONOMICS AND STATISTICS

The primary responsibilities of the Section are (1) provide the Commission with special economic or statistical studies, analyses, and information relating to transportation problems; (2) perform basic economic research helpful to the Commission in the performance of its function of regulating transportation in the public interest; (3) provide textual and analytical materials as well as economic and statistical data for various Commission and Bureau publications; and (4) provide statistical and economic staff support in connection with economic counsel and other proceedings support activities.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	19	24	+5
Personnel compensation	$178,329	$223,433	+$45,104
Personnel benefits	13,035	16,315	+3,280
Total personal services and benefits	191,364	239,748	+48,384
Travel	1,400	3,200	+1,800
Total	192,764	242,948	+50,184

The increase of $48,384 for personal services and benefits is requested primarily for the five additional positions, 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87–793. The increase of $1,800 for travel is to provide adequate travel funds for increased emphasis on basic research and analysis.

The 24 positions provided in the 1964 budget for this section are separated by categories as follows:

Transportation economist	17
Economics assistant	1
Statistical assistant and clerk	4
Secretary	2
Total	24

The 1964 budget provides five additional positions for this section, namely three transportation economists and two clerical positions.

SECTION OF TRAFFIC STATISTICS

Mr. JONAS. Section of Traffic Statistics is another section in which you seem to be satisfied with the number of people you had in 1963. Do you think you can get along and do your work with 72 people?

Mr. MARGOLIN. Same comment as heretofore.

Mr. JONAS. Insert the table on page 194 and the table at the top of page 195 in the record at this point.

(The material referred to follows:)

SECTION OF TRAFFIC STATISTICS, BUREAU OF TRANSPORT ECONOMICS AND STATISTICS

The Section of Traffic Statistics prepares the Commission's official statistics on rail carload traffic from a 1-percent waybill sample, uses these data for special and continuing studies such as freight rate indexes and estimates of the revenue effect of rate changes, and issues a continuing series of annual and quarterly publications based on the sample data which analyze carload terminations by various distributions of traffic characteristics. Motor carrier operating authorities are interpreted for statistical purposes, coded by commodity, type of operation, area of operation, and other categories of information and converted to punchcard records for special and recurring analyses. The Section operates both mechanical and electronic data processing equipment for this work as well as other data processing needs of the Bureau and of other bureaus and offices of the Commission.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	72	72	0
Personnel compensation	$411,926	$436,373	+$24,447
Personnel benefits	30,306	31,983	+1,677
Total personal services and benefits	442,232	468,356	+26,124
Travel	1,200	1,200	0
Total	443,432	469,556	+26,124

The increase of $26,124 for personal services and benefits is requested primarily for 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87-793.

The 72 positions provided in the 1964 budget for this section are separated by categories as follows:

Analytical statistician	2
Statistical officer	1
Assistant branch chief	1
Statistician	2
Digital computer programer	4
Transportation specialist	1
Tabulating project planner	1
Statistical assistant, statistical clerk, and clerk	60
Total	72

The Section, in addition to the Chief's Office, has five organizational units included in the 1964 budget as follows:

	Positions
Office of Chief of Section	3
Processing Branch	6
Review and Analysis Branch	5
Data Processing Branch	[1] 43
Miling Branch	1
Certificates and Permits Branch	14
Total	72

[1] The Mechanical Tabulation Branch, Section of Reports, was abolished Aug. 17, 1962; the positions were transferred to the Tabulation Branch, Section of Traffic Statistics, and renamed the Data Processing Branch.

Bureau Of Water Carriers and Freight Forwarders

Mr. Jonas. That takes us to the Bureau of Water Carriers and Freight Forwarders.

Insert pages 197 and 198 in the record.

(The pages referred to follow:)

Bureau of Water Carriers and Freight Forwarders

The principal duties of the Bureau are briefly described as follows:

1. Administrative handling and preparation of formal reports and orders in application cases under section 5a of the act which governs collective ratemaking by carriers.

2. Administrative handling and preparation of reports and orders in exemption application cases filed by water carriers, and the processing of applications of such carriers for temporary authority.

3. Advises the Commission on matters affecting water carriers, freight forwarders, and rate bureaus.

4. Field investigations of water carriers, freight forwarders, and rate bureaus to assure compliance with the requirements of the act and the Commission's orders, rules, and regulations. Field investigations also are made of shipper's associations and agents which claim exemption under part IV of the act, but which may be engaged in activities not exempt from the provisions of the act.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	15	15	0
Personnel compensation	$133,962	$141,996	+$8,034
Personnel benefits	9,981	10,535	+554
Total personal services and benefits	143,943	152,531	+8,588
Travel	5,700	5,700	0
Total	149,643	158,231	+8,588

The increase of $8,588 for personal services and benefits is primarily for 2 extra compensable days in 1964 over 1963 and for pay increases authorized by Public Law 87–793.

The 1964 budget provides 15 positions for this Bureau, which is the same as authorized for the current fiscal year.

The 15 positions included in the 1964 budget are separated by categories as follows:

	Departmental	Field	Total
Director and assistant director	2		2
Field assistant	1		1
Adjudicator	3		3
District supervisor		4	4
Clerk and stenographer	3	2	5
Total	9	6	15

This Bureau has jurisdiction over 63 rate bureaus operating under approved section 5(a) agreements, 266 water carriers and 89 freight forwarders which hold operating authorities; also, the Bureau maintains current files covering 316 shippers' associations and agents claiming exemption under section 402(c) of the act. During the fiscal year 1962, a total of 307 routine and special investigations were made by the 4 district supervisors. Thus, less than one-half of the carriers and organizations within the Bureau's jurisdiction were contacted or investigated last year.

Applications and petitions.—In fiscal year 1962, 61 applications and petitions of water carriers, freight forwarders, and rate bureaus were filed and reopened, and 66 were decided. The workload of the Bureau in connection with application and petition matters during fiscal year 1962 was substantially the same as the previous year. Some increases in this work are expected during the fiscal years 1963 and 1964.

Mr. JONAS. This is a small Bureau, only 15 people. How can you get along with only 15 people to run an entire bureau?

Mr. WALRATH. I would like to make a preliminary statement on that. As you realize, our regulation of water traffic is estimated to be about 10 percent of that which moves. Much of it moves under the bulk exemption. We would like a larger bureau.

Mr. JONAS. All agricultural products?

Mr. WALRATH. It includes grain and grain products, coal, heavy-loading bulk commodities. This is one of the controversial questions right now about rate regulations.

Mr. JONAS. I heard something about that.

Mr. WALRATH. I am afraid we will hear more about it before it is over. That is one factor in it.

On the other hand, let me say that with this small staff that Bureau has been doing a fine job, but their responsibilities are much greater than we have been able to give them help for.

Mr. JONAS. What are they supposed to do? Do these four paragraphs on page 197 set it out completely?

Mr. WALRATH. Director Nowell can speak to that.

Mr. NOWELL. I think it describes it pretty well.

Mr. JONAS. Why do you combine the Bureau of Water Carriers with that of Freight Forwarders?

Mr. NOWELL. That is only half of the areas in which we function. There are two others—Mobilization and the rate bureaus.

Other Objects of Expense

Mr. Jonas. That brings us down to other objects. Insert page 202 in the record.

(The page referred to follows:)

Object classification

		1962	1963	1964 [1]	Increase, 1964 as compared with 1963
21	Travel and transportation of persons	$1,260,802	$1,310,620	$1,345,320	$34,700
22	Transportation of things	19,336	26,700	25,935	−765
23	Rent, communications, and utilities:				
	Rent	106,345	110,000	120,300	10,300
	Communications	140,415	140,400	144,800	4,400
	Official mail	73,700	81,807	91,150	9,343
24	Printing and reproduction	184,204	213,400	232,000	18,600
25	Other services	93,699	102,900	125,600	22,700
26	Supplies and materials	290,253	260,370	272,770	12,400
31	Equipment	220,829	202,030	264,730	62,700
42	Insurance claims and indemnities	370			
	Total	2,395,953	2,448,227	2,622,605	174,378

[1] Excludes reimbursement of $175,000 from Office of Emergency Planning for emergency preparedness functions.

TRAVEL

You are asking for $174,378 increase in 1964 for other objects, $34,700 of the increase being for travel. Why do you have to do so much more travel in 1964 than you did in 1963?

Mr. Schmid. That primarily relates to estimated increased hearings as well as increased investigations and inspections.

Mr. Jonas. That is involved in whether you get new people; is that correct?

Mr. Schmid. That is correct.

Mr. Jonas. You are providing for increased travel for the additional people that you are asking for?

Mr. Schmid. Some of that will be related to the new people.

ADDITIONAL OFFICE SPACE

Mr. Jonas. What is the item of $10,300 increase in rent? Is that for equipment?

Mr. Schmid. Office space in the field.

Mr. Jonas. For new offices?

Mr. Ryan. Yes, sir.

Mr. Jonas. Where do you plan to open them?

Mr. Ryan. Increased space in Fort Worth. We have put additional people there. We need additional space in Portland, Oreg. None of those are new offices but all additional space.

PRINTING AND REPRODUCTION

Mr. JONAS. Why do you expect such a substantial increase in your printing and reproduction item next year, $18,600. You spent $184,204 on that item in 1962, $213,400 in 1963, and you estimate it will cost you $232,000 in 1964. Why the increase?

Mr. RYAN. The large item is for additional reports of Commission's decisions to be printed.

Mr. JONAS. Do you suppose the Commission will render more decisions next year than it did this year?

Mr. RYAN. Yes, sir, more of the decisions will be printed.

Mr. JONAS. You don't print all the decisions of the Commission?

Mr. RYAN. Not all of them; no, sir. These are printed and put in bound volumes.

We have another item of $2,800 for republication of the Commission's motor carrier safety regulations.

EQUIPMENT

Mr. JONAS. What is this equipment you will buy, $62,700 increase? It amounts to almost $273,000 worth of equipment.

Mr. RYAN. Related to the new employees we have asked for, the 73 additional employees, plus upgrading and replacement of wornout equipment we now have.

Mr. JONAS. $180,050 for replacement of old and wornout equipment. What standard do you use? Do you have a yearly use standard?

Mr. SCHMID. It varies according to equipment.

Mr. RYAN. Varies according to the type of equipment and its use.

Mr. JONAS. Who inspects it to determine whether it is usable?

Mr. SCHMID. Guided primarily by GSA.

Mr. JONAS. They just give you a bulletin showing that a typewriter after it has been used 10 years is no longer any good. Do you just follow that or do you use your own judgment?

Mr. SCHMID. We don't follow it completely because we wouldn't dare come in and ask for as much money as we would need to replace what we have that already meets their criteria.

Mr. JONAS. This amount is a good chunk of money. You are not buying any electronic equipment.

Mr. SCHMID. We rent the electronic equipment.

Mr. JONAS. This is purely for replacement of old equipment?

AUTOMOBILE REPLACEMENT

Mr. SCHMID. We have an orderly replacement program.

For example, in automobiles we replace our cars every 6 years or 60,000 miles, whichever comes first.

Mr. THOMAS. It is just getting broken in. Mine has only 125,000 miles on it and it is 8 years old. You talk about 6 years and 60,000 miles.

How about that, Judge Goff?

Mr. GOFF. I am driving a 1951 car, but I don't have to give it the service that they do. They have to get out and go. I use mine to drive to get groceries once a week.

Mr. JONAS. That is an interesting question. How many new automobiles are you asking for?

Mr. RYAN. No new ones. We are asking for 62 automobiles to replace 62 automobiles.

Mr. SCHMID. We are not increasing the fleet. We want to replace 62 automobiles which have reached the 60,000-mile level or better.

Mr. JONAS. Do you use the 60,000 miles or 4-year criterion?

Mr. RYAN. Six years, not 4 years.

Mr. JONAS. Or 60,000 miles?

Mr. RYAN. That is right.

Mr. JONAS. That is the GSA standard?

Mr. SCHMID. That is right. Their studies disclose after 60,000 miles the cost of maintenance is more costly in the long run than replacing the car.

PRINTING

Mr. JONAS. Printing and reproduction is next. I thought we had that in other objects.

Mr. RYAN. Yes, sir.

Mr. JONAS. We have discussed that.

Insert page 206 in the record.

(The page referred to follows:)

PRINTING AND REPRODUCTION

Funds requested under this heading are to provide for all printing and reproduction needs of the Commission, including items purchased from and through the Government Printing Office, and such other items as may be lawfully purchased elsewhere.

The $232,000 requested under this heading for 1964 represents an increase of $18,000 over the estimated obligations of $213,400 for the current fiscal year.

The increase of $18,600 requested for the following purposes:

1. Printing of an increased number of Commission reports and orders in bound volume form	$33,000
2. Republication of the Commission's Motor Carrier Safety Regulations	2,800
3. Miscellaneous publications, forms, administrative orders, etc	3,800
Total increases	39,600
Less a decrease in printing of individual volume of annotations and revision of rules of practice	21,000
Net increase	18,600

Mr. JONAS. That completes the justifications.

Mr. THOMAS. Mr. Boland, have you any questions?

GUARANTEE OF LOANS TO RAILROADS

Mr. BOLAND. Under the Bureau of Finance I would like to get into the question of loans to railroads. I think page 54 touches on this. This is as a result of the 1958 act guaranteeing loans to railroads. This is an activity of ICC.

I note in your narrative you indicate that the President has recommended this be transferred. It expires June of this year?

Mr. WALRATH. That is right.

Mr. BOLAND. The President has recommended that it be transferred, if it is extended, to the Department of Commerce. Why the transfer? Is there any reason for it?

Mr. WALRATH. I think it is that the President's recommendation treats that and the Civil Aeornautics Board loan guarantee authority as being of the promotional type as contrasted with regulatory functions of the two agencies. I believe that is the underlying philosophy.

Mr. BOLAND. Insert that section on loans and financial analysis starting at page 56 and including the first four paragraphs on page 57.

(The pages referred to follow:)

SECTION OF LOANS AND FINANCIAL ANALYSIS

This Section was first established as the "Section of Loans" following enactment of part V of the act, August 12, 1958, to handle the staff work connected with applications for the guarantee by the Commission of loans to railroads.

During the 1960 fiscal year, additional functions were added to this Section and the name changed to that shown above. All financial analysis work incident to proceedings handled by the Bureau of Finance is concentrated in this Section.

During fiscal year 1962, 5 loan-guaranty applications and 4 related section 20a applications were received requesting loan guaranties of approximately $23.9 million as compared with 12 and 12 applications, respectively, involving $87 million received during fiscal year 1961.

The present authorization of the Commission to guarantee loans will expire June 30, 1963. Also, the President has recommended that this function be transferred to the Department of Commerce. If the authorization is extended beyond June 30, 1963, it is anticipated that the work will continue at about the same level as in 1962. In addition to the processing of new applications, a substantial amount of work is entailed in policing and servicing outstanding loans.

On pages 64 through 71 there are statements showing the loan guaranty applications received and disposed of from the inception of the program in August 1958 to December 31, 1962, as well as applications pending on December 31, 1962.

Pages 64 to 67 show the applications filed in chronological order, the purpose of the loans, rate of interest, and the action by the Commission. Pages 68 to 69 show practically the same information for the individual railroads. Pages 70 to 71 show repayments and the unpaid balance as of December 31, 1962.

The handling of sections 5 and 214 motor finance and section 20a rail security applications have been expedited because of preliminary review by employees of this section. Analyses of motor finance cases have been limited to the larger, the more involved, or the nationally important cases; and verifications of the draft reports and orders have been restricted to the salient financial and accounting features thereof. There does not appear to be any phase of the work on motor finance cases that could be further restricted without affecting the quality of the Commission's reports and orders in such cases, which comprise the largest single segment of the Bureau's workload.

Up to the present time this section has been unable to make any sizeable contribution towards the processing of rail merger and other rail unification cases, train discontinuance matters, and rail abandonment applications. Consequently, only those reports and orders in cases which involve highly technical, novel or complicated accounting and financial matters are sent to this section for verification.

Mr. BOLAND. The tables are excellent on the applications and authorizations and repayments. They have not been very much.

Put in the table starting with page 64 and running through page 71.

(The information referred to follows:)

Chronological statement showing loan guaranty applications received and actions thereon

Finance Docket No.	Date filed	Railroad	Amount of guaranty originally sought	Amended or withdrawn	Approved				Date loan closed	Denied	Related sec. 20a Finance Docket No.

Grand total			211,192,808	19,320,448		168,372,360				6,500,000	

[a] Acquisition of 30 new diesel-electric locomotives.
[b] Reimbursement of treasury (for capital expenditures after Jan. 1, 1957).
[c] Acquisition of maintenance of way equipment and machinery.
[d] Construction of certain shop facilities.
[e] Acquisition of 100 new freight cars.
[f] Maintenance and rehabilitation of roadway.
[g] Reimbursement of treasury $181,000; refinancing of balance on 100 freight cars $100,000; acquisition of 100 used freight cars $240,000; and expenditures for future maintenance $279,000.
[h] Refinance equipment obligations $1,167,127; finance planned capital expenditures $1,584,609; and reimburse treasury $3,181,264.
[i] Expenditures for future maintenance.
[j] Reimbursement of treasury $1,000,000; future capital expansion $4,000,000.
[k] Acquisition of not less than 634 covered hopper cars and 725 box cars at a cost in excess of $5,000,000; and reimbursement of treasury in part for capital expenditures of $10,000,000.
[l] Financing acquisition of 3 locomotives (conditional sale agreement).
[m] Refinancing certain equipment obligations incurred after Jan. 1, 1957.
[1] Application amended to withdraw proposed guarantee of financing of 30 locomotives already delivered, and to adjust the amount of proposed financing of 30 new locomotives (not yet built) from $8,152,930 to $8,159,400.
[2] Upon request of applicant, tentative affirmative findings were issued, subject to conditions on Mar. 25, 1959. Supplemental report and order issued Sept. 14, 1959, deferred final action pending receipt of supplemental data. Supplemental data received Mar. 30, 1960. Supplemental order of June 9, 1960, approved application on condition rate of interest not exceed 5 percent. Supplemental order of Aug. 5, 1960, modified order of June 9, 1960, and approved 5½ percent interest rate. Loan closed Sept. 29, 1960.
[3] Withdrawn at request of application. Applicant dismissed Jan. 29, 1959.
[4] Upon request of applicant, tentative affirmative findings were issued, subject to conditions, on Mar. 25, 1959. Application approved in supplemental report and order of Sept. 14, 1959. Supplemental orders were issued Sept. 30, 1959, and Oct. 28, 1959. Loan closed Oct. 29, 1959, and $750,000 advanced on that date; balance advanced on July 7, 1960.
[5] By amendment the amount of guarantee sought was reduced to $6,000,000. By report and order of May 18, 1959, and supplemental report and order of June 22, 1959, a loan guarantee in amount of $3,000,000 was approved subject to conditions. Loan closed on June 25, 1959.
[6] By amendment the amount of guarantee sought was reduced to $934,960 (actual cost of cars). and in report issued on May 8, 1959, guarantee of that amount was approved. Loan closed June 30, 1959.
[7] Approved Sept. 16, 1959. Loan closed Oct. 15, 1959, and $19,500,000 advanced; $17,000,000 advanced July 1, 1960; balance advanced July 6, 1961.
[8] Denied Jan. 6, 1960.
[9] Approved Dec. 23, 1959. Supplemental order entered Apr. 20, 1960. Loan closed May 3, 1960.
[10] Denied Dec. 23, 1959.
[11] Approved July 26, 1960, subject to condition that security be furnished. Amendment offering second mortgage filed Aug. 29, 1960, and supplemented Sept. 16, 1960. Supplemental approval order Sept. 21, 1960. Loan closed Oct. 4, 1960. Second supplemental order Dec. 13, 1960.
[12] Order of Oct. 31, 1960, approved $4,500,000 and deferred action on $1,500,000; and the $4,500,000 loan was closed Nov. 3, 1960. Amendment filed Dec. 22, 1960, sought an additional $4,500,000. Second supplemental order of Dec. 29, 1960, approved an additional loan of $3,500,000 closed (Jan. 3, 1961) and denied application in all other respects. Amendment filed Feb. 8, 1961, sought $5,000,000 additional. By third supplemental order of Feb. 14, 1961, approved additional $3,500,000. Remaining $1,500,000 approved by fourth supplemental order of May 12, 1961. Last 2 loans closed Feb. 17, 1961, and May 17, 1961, respectively.
[13] At first closing on June 15, 1961, $6,200,000 of loan was advanced. Second advance of $2,500,000 was made Nov. 30, 1961. Balance advanced on Jan. 3, 1962.
[14] Denied July 19, 1961. On reconsideration, on Commission's own motion, approved Aug. 15, 1961. Loan closed Aug. 29, 1961.
[15] As approved, the loan proceeds would be disbursed by lenders upon request of trustees before June 1, 1962. On closing date, Dec. 13, 1961, $3,000,000 was disbursed. At request of trustees commitment date of June 1, 1962, was extended to Dec. 31, 1962, as to the $4,500,000 balance of the proceeds and that extension was approved by the Commission in supplemental order of May 18, 1962. Upon request of trustees commitment date was further extended to June 1, 1963, and approved by the Commission in its second supplemental order of Nov. 26, 1962.
[16] Withdrawn at request of applicant. Application dismissed July 27, 1962.
[17] Pending as of Dec. 31, 1962.

Recapitulation by railroads of loan guarantee applications received, and actions thereon, as of Dec. 31, 1962

[2] Withdrawn.

Mr. BOLAND. Questions on this?

BUREAU OF TRAFFIC

Mr. THOMAS. Did we cover all the Bureaus here? What about the Bureau of Traffic? Was this touched on?

Mr. WALRATH. I believe not, Mr. Chairman.

Mr. THOMAS. Let us insert page 168 at this point.

(Page 168 referred to follows:)

BUREAU OF TRAFFIC

The program and performance of this Bureau are under two activities: Activity No. 1, "Regulation of carriers' rates, practices, operating authorities, and finance," which includes the Board of Suspension and the Fourth Section Board; and activity No. 4, "Supervision and interpretation of tariffs," which includes the Director's Office and Sections of Rates and Informal Cases and Tariffs.

This Bureau receives and processes all freight rate and passenger fare tariffs and schedules of compensation which the carriers are required to file under the Interstate Commerce Act. These tariffs and schedules are prepared by carriers and their agents and must conform with the rules and regulations prescribed by the Commission governing the construction and filing of tariffs. The Bureau also receives and processes: (1) All applications filed by the carriers for relief from the provisions of sections 6, 216, 306, and 405 of the act relative to notice and the form and content of tariffs; (2) applications filed by rail and water carriers for relief from the provisions of section 4; (3) requests by shippers, carriers, and others for the suspension and investigation, under sections 15, 216, 218, 307, and 406, of proposed rates and other charges published in tariffs or schedules filed but not yet effective; and (4) informal complaints and special docket applications.

Comparison of 1964 budget with 1963 appropriation

	1963	1964	Change
Positions	255	259	+4
Personnel compensation	$1,827,247	$1,957,659	+$130,412
Personnel benefits	134,420	143,491	+9,071
Total personal services and benefits	1,961,667	2,101,150	+139,483
Travel	1,000	1,000	0
Total	1,962,667	2,102,150	+139,483

The increase of $139,483 is requested primarily for the four additional positions, 2 extra compensable days in 1964 over 1963, and for pay increases authorized by Public Law 87-793.

Four additional GS-10 report writers are requested for the Board of Suspension to provide an adequate staff to develop complete and factual records upon which the Board may base its decisions.

Mr. THOMAS. You have 255 employees and want 259. This is one of the big bureaus.

This Bureau regulates carriers' rates, practices, operating authorities, everything in the book.

This is all covered on page 168. This Bureau receives and processes all freight rates, passenger fare rates, schedules, and so forth. The Bureau also receives and processes all applications filed by the carriers for relief from the provisions of sections 6, 216, 306, and 405 of the act relative to notice and the form and content of tariffs.

You have a lot to do here.

Mr. WALRATH. That request is principally directed to much needed help to our Board of Supension which deals with these matters in short order.

Mr. THOMAS. Can we combine this Bureau with any other bureau?

Mr. WALRATH. No one else would want it, I think.

Mr. THOMAS. Who has this Bureau?

Mr. WALRATH. Director Cox is right here, sir.

Mr. THOMAS. You couldn't wish this on anybody else?

Mr. COX. I am afraid not, Mr. Chairman.

Mr. THOMAS. What is the urgency of your work under your jurisdiction? This is one of the important bureaus.

BOARD OF SUSPENSION

Mr. COX. The main emergency here is four additional employees in the Board of Suspension.

Mr. THOMAS. How does the Board suspension work?

Mr. COX. They receive protests from shippers, carriers, and other people protesting against proposed changes in rates, fares, and charges, and seeking suspension of changes by the Commission pending an investigation and determination——

Mr. THOMAS. Suspension has heretofore gone into effect?

Mr. COX. Before they go into effect.

Mr. THOMAS. Go ahead. What is the time limit?

Mr. COX. The effective date of each schedule filed by the carriers which under the law is required to give not less than 30 days' notice.

Mr. THOMAS. You are in a hot spot.

Mr. COX. Under the Commission's rules protests must be filed not less than 12 days before the effective date of the schedule.

Upon the filing of a protest, the Board——

Mr. THOMAS. The filer is in a hurry and you are in pretty much of a hurry because you have no more than 10 or 12 days as a matter of everyday practice to act on it after you get it.

Mr. COX. That is right, and when a schedule is effective on a Monday particularly there are two Saturdays and two Sundays within that 12-day period.

Upon filing of the protest we have to notify the respondent carrier and give the carrier an opportunity to reply to the protest, to justify what it proposes, analyze the protest, and then the Board of Suspension acts on it and must act at least 2 workdays before the effective date in order to afford an opportunity for appeal to the Appellate Division.

Mr. THOMAS. Let's look at your workload on page 173.

Mr. WALRATH. That is the hot spot.

Mr. THOMAS. It sets it out for 5 years. Protests disposed of are shown. There are a lot of telegrams.

Mr. WALRATH. Because of the shortage of time, especially in appeals.

Mr. THOMAS. You mean you disposed of each of these?

Mr. COX. That is right.

Mr. THOMAS. Every one filed has to be disposed of. What is the average working period in that, 10 to 14 days after you get it?

Mr. COX. A lot less than that. I would say it is about 8 days on the average.

Mr. THOMAS. How serious is it? What is the nature of one of these? A man files and says he wants you to hold putting this in the rate. He is going to ship a carload of alfalfa from X county to C county and the rates are too high.

Most of them are that simple?

Mr. GOFF. No, but let Mr. Cox speak to that.

Mr. THOMAS. Tell us, Judge.

Mr. GOFF. I have something to add to that.

Mr. THOMAS. Go ahead, then, Director.

Mr. COX. Unless the Commission suspends the schedule it will automatically become effective. If it is unlawful, the unlawful rates become effective and the shipper is required to pay them.

Mr. THOMAS. How much time does it take? You cannot tell how much money is involved. It could be a sackful of money. It could be very important. How much time do you have? How many cases can one man dispose of?

Mr. COX. We have a good explanation in there on page 171. It is difficult to make an absolute statement because of the types of cases.

Mr. THOMAS. You mean based on recent studies approximately 60 percent of the protested adjustments are of lesser complexity and 40 percent greater complexity?

Mr. COX. That is right.

Mr. THOMAS. You are pretty definite there, Judge.

Therefore, in order to perform a reasonably adequate job, the report writer must spend the time indicated below in processing the protested adjustment and preparing the report.

You break it down between lesser and greater complexity.

You show an average of 9 hours in the lesser complexity, and in the greater complexity there is an average of 13 hours and then 25 hours.

Mr. COX. That is right.

Mr. THOMAS. What is the nature of one of the lesser suspensions?

Mr. COX. Well, with the alteration of a single rate on a single commodity to one destination to meet some sort of competition, and the competing carrier protested it on the ground it is unreasonably low, or unlawful in some other respect.

Mr. THOMAS. That is the basis of the protest, unreasonably low?

Mr. COX. That is right.

Mr. THOMAS. Most of the complaints come from competing carriers?

Mr. COX. That is right. Most of the work is based on competition.

Mr. THOMAS. How do you arrive at the time schedule? What does he do to combat that unreasonable charge?

Mr. COX. He ought to give us some figures indicating the costs in handling traffic.

Mr. THOMAS. Your people spend an average of 9 hours on these. What does he do in that 9 hours? He has to get statistical information, cost accounting data, and so on. You don't have that all in your Bureau.

Mr. Cox. That is right. When the contention is that the rates are unreasonably low, our Board of Suspension goes to the section of cost finding to find out what the cost is.

In the meantime a report writer will check the tariffs involved to determine what the rate situation is, analyze the contentions, and verify to the extent he can the contentions of the protestants.

When a reply comes in he will analyze the justification offered by the respondent carrier or carriers, including any rate information or cases which might be cited there in justification of the proposal, and on the basis of all that information, after analysis, he makes a determination as to whether the rates appear to be unlawful in any respect.

He makes a recommendation as to whether it should or should not be suspended.

AUTOMATION

Mr. THOMAS. What are they doing with reference to automation of your Bureau? It seems your Bureau could be automated.

They say a rate increase is unreasonable. You have a starting point. It seems it would be susceptible to automation.

Mr. Cox. Whether or not a rate is unreasonable is a matter of judgment. Our Bureau is one of those included in this study.

Mr. THOMAS. You have a starting point. If it is unreasonable you would have been working with it just the same. From that point he is going either up or down in his request. It is immaterial whether or not it is unreasonable. What you are concerned with now is the variation from that point.

Mr. Cox. We are concerned at this point as to whether or not the rate which has been proposed and filed by the carrier appears to be unreasonable or otherwise unlawful. If it does then the rate is suspended and sent to a formal hearing where the record is fully developed.

Mr. THOMAS. Where is your starting point in discovering whether it is unreasonable? You first look into the present rate?

Mr. Cox. That is right.

Mr. THOMAS. There is the starting point. It seems to me smart technicians could figure it out. There is your starting point. You operate from there.

Mr. GOFF. What do you do from there?

Mr. Cox. Use our judgment on the basis of the cost information we have.

Mr. THOMAS. You have to look it up and see what the rate is. It seems you can save a lot of paper shuffling right there.

Then as you well point out it is a matter of judgment whether the increase is too much or too little.

Mr. WALRATH. There is an area of automation that you touched upon which we hope to use, and that is in the costing itself. When you go to the costing people——

Mr. THOMAS. When will it be beyond the hope stage?

Mr. WALRATH. We are using it now.

In Mr. Cox's position——

Mr. THOMAS. It is doing Mr. Cox no good.

Mr. WALRATH. Yes, sir; it will get it for him in a few seconds rather than in many man-hours.

Mr. THOMAS. Off the record.

(Discussion held off the record.)

BOARD OF SUSPENSION WORKLOAD

Mr. THOMAS. Let us insert page 173 and the workload on page 175. (The pages referred to follow:)

BOARD OF SUSPENSION WORKLOAD

Statistics for the principal classes of work appear below:

	Actual			Estimate	
	1960	1961	1962	1963	1964
Disposed of:					
Protested adjustments	4,252	4,855	5,170	5,200	5,200
Petitions to vacate	134	136	197	175	175
Special permission applications	418	465	510	475	475
Petitions to investigate, discontinue, etc	(1)	90	89	90	90
Appeals of no suspend	580	521	610	590	590
Letters and telegrams:					
Received	7,030	6,617	8,059	8,000	8,000
Sent	5,216	6,047	6,754	6,500	6,500

[1] No records available.

FOURTH SECTION BOARD WORKLOAD

The following statement shows the actual workload for the fiscal years 1960, 1961, and 1962 and estimates for 1963 and 1964:

	Actual			Estimate	
	1960	1961	1962	1963	1964
Work on hand beginning of year:					
Applications	115	113	99	88	88
Petitions	6	13	2	1	1
Total	121	126	101	89	89
Work received during year:					
Applications	844	889	[1] 591	750	750
Petitions	119	77	55	50	50
Total	963	966	646	800	800
Disposed of during year:					
Applications	846	903	602	750	750
Petitions	112	88	56	50	50
Total	958	991	658	800	800
On hand at end of year:					
Applications	113	99	88	88	88
Petitions	13	2	1	1	1
Total	126	101	89	89	89
Letters and telegrams:					
Received	957	887	681	681	681
Sent	1,770	1,857	1,229	1,229	1,229

[1] Includes 7 applications which were reopened for further consideration.

Mr. THOMAS. Questions, gentlemen?

NEW YORK, NEW HAVEN & HARTFORD RAILROAD

Mr. JONAS. I have a question on another subject, one raised by Mr. Boland.

We had quite a discussion last year regarding the New Haven Railroad. I don't think the hearing should be closed without putting on the record what improvement occurred in that situation in the past year, if any.

Mr. WALRATH. I believe Director Baker would have more current information on that than I would.

Mr. BAKER. I do not have figures before me. I do know that during the past year the trustees have shown considerable improvement. In other words, they still have a sizable deficit, but the deficit is not as great as it was the year before.

Mr. BOLAND. Will you supply for the record the size of the deficit?

Mr. BAKER. We can do that.

(The information supplied follows:)

New York, New Haven & Hartford Railroad Co.

Calendar year:	*Deficit*
1960	$14,698,640
1961	19,549,689
1962	[1] 12,159,493

[1] 11 months ended Nov. 30, 1962. For comparative purposes the 11-month deficit in 1961 totaled $18,640,564.

Mr. BOLAND. I recall talking to the trustees and they are about to wipe out the deficit. This is not true, is it?

Mr. BAKER. No. It almost reached the point of wiping out the cash attrition but that is because they are not paying some of the obligations. They are not paying taxes and the like.

Mr. THOMAS. Are they behind with the payment on the loan?

Mr. BAKER. As you know, two of the loans were in default and the Government paid those, but the trustees assumed the obligation on two other loans and they have been meeting those payments currently.

Mr. THOMAS. What became of the two the Government picked up? This is a guaranteed loan. What became of that?

Mr. BAKER. Nothing happened yet.

Mr. THOMAS. Still delinquent?

Mr. BAKER. They are still in reorganization. That will have to be taken care of when the railroad is reorganized.

Mr. THOMAS. Further questions?

Mr. JONAS. I noticed the other day that the Boston & Maine Railroad is improving its commuter service.

Mr. WALRATH. We have had rather glowing reports, not official but from observations of those who have seen it, and they claim with that local subsidy aid they have improved the condition of their cars and their service and the percentage of passenger traffic on that is rising.

Mr. JONAS. It has shown a phenomenal rise, has it not?

Mr. WALRATH. That is right.

Mr. BOLAND. It has. I thought one of the best remarks I have seen was in a television program one night.

Off the record.

(Discussion held off the record.)

Mr. BOLAND. Were there any other lines in default outside of New Haven?

Mr. WALRATH. That is all.

Mr. BOLAND. They borrowed $168,372,000. The unpaid balance is $158,350,000. These are loans under the 1958 act.

Mr. THOMAS. Off the record.

(Discussion held off the record.)

Mr. THOMAS. Gentlemen, we thank you for your courtesy and your help. It is always pleasant to be with you.

You are all experts in your field and you render the public a very distinguished service. We are proud of all of you.

Mr. WALRATH. Thank you, Mr. Chairman. We have been very pleased to appear before you.

THURSDAY, JANUARY 31, 1963.

SECURITIES AND EXCHANGE COMMISSION

WITNESSES

WILLIAM L. CARY, CHAIRMAN
MANUEL F. COHEN, COMMISSIONER
JACK WHITNEY II, COMMISSIONER
PHILIP A. LOOMIS, JR., DIRECTOR, DIVISION OF TRADING AND EXCHANGES
ALLAN F. CONWILL, DIRECTOR, DIVISION OF CORPORATE REGULATIONS
EDMUND H. WORTHY, DIRECTOR, DIVISION OF CORPORATION FINANCE
MILTON H. COHEN, DIRECTOR, SPECIAL STUDY OF SECURITIES MARKETS
ARTHUR FLEISCHER, JR., EXECUTIVE ASSISTANT TO THE CHAIRMAN
WILLIAM GREEN, REGIONAL ADMINISTRATOR, ATLANTA OFFICE
DONALD J. STOCKING, REGIONAL ADMINISTRATOR, DENVER OFFICE
FRANK J. DONATY, COMPTROLLER

Mr. THOMAS. The committee will please come to order.

We have with us this morning the members of the Securities and Exchange Commission. It is always nice to have this group before us. We have the very able and distinguished Chairman, William L. Cary. Is Commissioner Woodside here?

Mr. CARY. I am sorry to say he has been home sick since 3 o'clock yesterday afternoon.

(Off the record.)

Mr. THOMAS. We have also Commissioners Manuel F. Cohen and Jack Whitney II. Have you a vacancy?

Mr. CARY. Senator Frear has been ill. He is in now about 2 hours a day, 4 days a week.

Mr. THOMAS. Is he improving?

Mr. CARY. He is improving. I think he looks a lot better.

Mr. THOMAS. Give him and Commissioner Woodside our best and tell them we miss them and wish them a very speedy recovery.

We have Philip A. Loomis, Jr., Director of the Division of Trading and Exchanges. He is well and favorably known to us. He is an outstanding public servant. We are delighted to have him.

Allan F. Conwill, Director of the Division of Corporate Regulation. It is nice to have you with us.

Edmund H. Worthy, Director of the Division of Corporation Finance. It is nice to have you with us.

Milton H. Cohen, Director of the Special Study of Securities Markets. Are we going to be able to keep Mr. Cohen?

Mr. CARY. We will keep him until at least June.

Mr. THOMAS. It is always nice to have you with us, Mr. Cohen. You have made an outstanding contribution in this job.

Arthur Fleischer, Jr., executive assistant to the Chairman.

I wish to commend you for having with you William Green, regional administrator of the Atlanta office.

Mr. CARY. He came with us, as you know, from the Federal Trade Commission back in 1933.

Mr. THOMAS. We are delighted to have him. I think it is a good idea that you bring in one or two of your regional administrators every year. I notice the VA are bringing in all of their top people. They started that policy under Administrator Gleason a year or two ago. There are a lot of them, from 170 hospitals and 18 doms, insurance offices, and regional offices. They have in town a crowd of about 300 top medical people, area people, regional people, insurance people. I think it is most worthwhile. If everybody would take a look at their pattern, I think it would be beneficial to all the agencies.

Donald J. Stocking, regional administrator of the Denver office. We are delighted to have you, too.

Mr. CARY. Mr. Stocking was assistant regional administrator in Seattle for many years and came down to be the regional administrator in Denver last year.

Mr. THOMAS. He left a great city and came to a great one. I imagine I would rather be in Seattle than Denver, though, today. We are delighted to have you with us, Mr. Stocking.

We have also Frank J. Donaty, the Comptroller. It is good to see you again. We could not get along without you.

Mr. Chairman, if you and your fellow Commissioners want to talk to us or make a statement, whatever you want to do, we are more than delighted to have you.

Mr. CARY. I do have a statement, but I do not have copies to distribute.

Mr. THOMAS. Before you start, I think a few flowers to the living are in order. You have done a tremendous job. I don't think I have ever seen anybody come into Government service on the same footing as you have as far as enthusiasm and willingness to serve. I recall the first year Mr. Cary was here, I thought he was in the office over here with us all the time. He was over here once a week, but he was trying to find out what little we knew and to see if we knew half as much as he did. It took him but about 9 months to find out we did not.

He works at the job. I have found him at his office late at night. Of course, he was violating the wage and hour law, but he was still in his office. He does a tremendous job.

You have gotten along with the people you are supposed to regulate. I do not hear any abuse of you. I think you have brought a whole lot of balance to the trade. Certainly the public is greatly benefited by your good, level head and your good judgment. You are topnotch by any yardstick we want to measure you by.

Mr. CARY. Thank you very much. I enjoy my job. I don't think I could do it without the help and cooperation I have received from this committee. I am very grateful to you. I mean it.

Mr. THOMAS. We notice the people who like their jobs are the ones who do the best job. You people could go out in the financial world and do far better. That is the strongest evidence that you like your job. You have to like it before you can turn in a bangup performance. Anybody can do a mediocre job. We like to see people who do outstanding jobs, as you do.

Go ahead with you statement.

GENERAL STATEMENT

Mr. CARY. Thank you, Mr. Chairman.

I should like first to discuss the program activities and the financial requirements of the Commission for the fiscal year beginning next July 1.

The total amount of our request for next year is $14,400,000, an increase of $1,114,000 over the assumed amount of $13,386,000, which includes $486,000 for pay increases effective last October 14. The increase of $1,114,000 for 1964 represents $914,000 for personal services and $200,000 for other expenses. The sum of $914,000 for personal services is distributed as follows: (*a*) $418,000 for pay increases, (*b*) $344,300 for a net increase of 54 additional positions for the regional offices, and (*c*) $151,700 for salary step increases.

At the outset, I wish to state we have expanded substantially in the last 2 years with your concurrence. We feel this is the time to try to meet our responsibilities with a slight increase in the number of personnel, principally for our regional offices.

I shall cover, if I may, four topics.

1. The requested increase of 54 positions for 1964 for the regional offices.

2. The request of 23 positions for the central office for 1964.

3. Our registration statement activity and its related problems which we discussed with you at some length in prior hearings.

4. The one-half million dollar supplemental request for this year which was not enacted by the last Congress.

Mr. THOMAS. What does it all add up to—77 jobs or 23 jobs?

Mr. CARY. We are abolishing 23 of the positions that we had in the special study.

Mr. THOMAS. It means that you are asking for about 77 more permanent positions than you had.

Mr. CARY. Yes. Net, it would be 54, but you are right absolutely.

Mr. THOMAS. We do not want to be confused by this plus or minus business.

Mr. CARY. I am perfectly willing to state it the other way, as 77.

The first topic I would like to discuss, if I may, is the regulation and inspection of investment companies.

COMPLETION OF THE SPECIAL STUDY OF SECURITIES MARKETS

Mr. THOMAS. Since you mention it, to what date does the special study carry you to, April 1 or June 1?

Mr. CARY. April 3.

Mr. THOMAS. Does that give you the time you need to wrap it up and everything?

Mr. CARY. We are still shooting for that deadline. I won't guarantee we will have every paragraph and every part of the report out, but we will have a very substantial part of that report in the hands of Congress on April 3.

Mr. THOMAS. Have you the same supplemental pending with the Bureau of the Budget that you had last session?

Mr. CARY. No, we have not, sir. We decided we would attempt to absorb that. As you recall, that half million dollars that we asked for went through both the House and the Senate, but it was in that last supplemental appropriation bill. Therefore, we simply decided that we would have to reprogram our other activities. That meant roughly, as I recall, $200,000 applicable to the special study and $100,000 to carry over the people in the special study into our regular operations to handle the problems afterward; in other words, carrying out the recommendations. We have absorbed that $300,000 within our present appropriation, and therefore we do not have a supplemental pending.

Mr. THOMAS. How did you absorb it? Through attrition or how?

Mr. DONATY. As you realize, we received our appropiration this year on about August 31. There were 2 months in which we could not recruit because of the joint resolution. As a result, there was a savings.

Mr. THOMAS. You were operating under a continuing resolution?

Mr. DONATY. Yes, sir. In addition, we had to tighten our belt in other areas of expenses; for instance, equipment and supplies, matters of that nature.

Mr. THOMAS. I repeat my original question: How did you absorb it?

Mr. DONATY. Primarily, the absorption was made because we were unable to recruit personnel during the months of July and August.

Mr. THOMAS. Did you do it through attriton, not filling vacancies?

Mr. DONATY. Not filling vacancies, because of the continuing resolution.

Mr. THOMAS. Go ahead.

INVESTMENT COMPANY INSPECTION PROGRAM

Mr. CARY. I should like to discuss first of all our request for 54 positions for the regional offices. One of the Commission's principal problem areas relates to its administration of the Investment Company Act of 1940. Under this program, the Commission has its most active regulatory functions over companies and its most immediate supervisory responsibilities to shareholders. These responsibilities loom large when we note the enormous growth of investment companies. The aggregate net asset value of investment companies was $2.5 billion in 1940 as compared with $27.3 billion last June 30. Reliable estimates place the number of shareholders at 5.7 million.

Our request is directed at the manpower problem existing in our inspection program of investment companies. We are requesting funds for an increase of 24 positions for our regional offices to achieve a 3-year inspection cycle, which would be 240 inspections of investment companies.

Mr. THOMAS. I see that you hope to get it down to 18 months, but in a young and growing industry like this even 18 months may be too long a cycle.

Mr. CARY. Sir, I do not have any illusion that we can get our inspection cycle down to 18 months for some years. We are shooting for this target.

Mr. THOMAS. Roughly, how many companies are there?

Mr. CARY. There are roughly 700, but I would like to ask Mr. Conwill to give us the precise figure.

Mr. CONWILL. As of yesterday, 722.

Mr. THOMAS. They can go into business without any certificate from anybody. All they have to get is a corporate charter.

Mr. CARY. For all practical purposes. They have to register with us, but that is a registration process simply providing the adequate information and fulfilling certain requirements of the Investment Company Act. Those primarily can be fulfilled by any company that is going into a legitimate operation as an investment company, either closed end or mutual fund.

Mr. THOMAS. What are the requirements that might be a prohibition imposed by your act?

Mr. CARY. Basically, there is no prohibition at all. There are certain restrictions; for example, you may not have senior debt in an investment company, but that is not a requirement that they cannot meet. In other words, there would be certain conditions to entrance but, as I see it, there is no prohibitory type of requirement. I think you state correctly that they can go into business as they choose if they file the necessary papers.

Mr. CONWILL. They must have a $100,000 minimum capital requirement. Basically, almost anyone can get into the investment company business, provided he has not been convicted of a crime involving the purchase and sale of a security, and that sort of thing.

Mr. THOMAS. In the very fast growing days of the savings and loan business, how frequent were the examinations of the Home Loan Bank Board? Every 36 months or 24 months?

Mr. BOLAND. Yes.

Mr. THOMAS. Finally, they have gotten it down to 12 months. In a fast-growing industry such as you have, that is the only way you will keep up with your information. Is there any opposition to your investigation and inspection work?

Mr. CARY. I would say there is no opposition to our doing inspection work.

I have brought along with me, by the way, some copies of a speech I made before the Investment Bankers Association, in which I was talking about self-regulation in the securities industry. This is an area in which I have a very substantial interest.

One of the major areas I was talking about was the investment company field and this very question of inspections. I was trying to urge the Investment Company Institute, which is a trade association, to work with us on a program of inspections, because I have been worried about our doing enough of it. I have also felt this is an area in which they could participate and pay some of the costs for us.

Mr. THOMAS. What jurisdiction do the States have over these companies? What does the inspection service of the States amount to, if anything?

Mr. CARY. They do not have any counterpart to the insurance superintendent. In other words, they do not have the careful regulation and inspection of investment companies that they do, for instance, over insurance companies. To my knowledge, in most States, unless there is some fraudulent activity which is suspected and which they could get into, I would think there would be no counterpart.

Mr. THOMAS They are first put in business by State charter, are they not?

Mr. CARY. Of course, they have to incorporate under a State charter; that is correct.

Mr. THOMAS. There is no supervision or investigation by the various State agencies?

Mr. CARY. Not basically, not any more than an industrial concern. Mr. Conwill could speak to this.

Mr. EVINS. I am aware of the fact that there are more than 600 small business investment companies now chartered, licensed, organized, and operating. You refer to 700. Of these, 600 have recently been chartered.

Mr. MANUEL F. COHEN. They are not all subject to our act.

Mr. EVINS. This is an area of controversy, whether the SEC or the Small Business Administration should make inspections and supervise them.

Mr. CARY. That is a very definite problem.

Mr. EVINS. You are not referring to the 600 small investment companies.

Mr. CARY. Could I ask Mr. Conwill to speak to that?

Mr. CONWILL. I think the latest figures from the Small Business Administration show slightly over 700 small business investment companies. However, only those that make a public offering of securities are subject to our jurisdiction, which means that only approximately 100 are subject to our jurisdiction.

Mr. EVINS. They have thus far not offered, but that does not preclude them from making offerings in the future for additional financing.

Mr. CONWILL. That is correct.

Mr. EVINS. If they made an offering at any time in the future, then they would come under your jurisdiction.

Mr. CARY. They would come within our jurisdiction.

(Off the record.)

Mr. EVINS. You have the potential of doubling the number of investment companies under your jurisdiction.

Mr. CARY. Yes, sir.

I don't know whether you would be interested in a copy of this speech which I mentioned, but on page 11 I did point out to the Investment Company Institute that there was an opportunity for them to engage in self-regulation and to participate in the inspection program. I thought this would be a good idea philosophically and also budgetarily. In other words, it might cut down the demand we would have to come before you and ask for additional people.

Mr. THOMAS. There was recently a decline in the market for stocks, bonds, and securities. That would be a pretty good test one way or the other whether you need any inspection. How did the securities of these investment companies fare?

Mr. CARY. I would say they fared——

Mr. THOMAS. You give some examples in the justifications, but you might spell that out for the record in a little bit more detail. How did they fare?

Mr. CARY. By and large, the asset value dropped off somewhat in accordance with the market as a whole in dropping off. For example, when I came here a year ago I think I would have said that the asset value of the investment company industry was in excess of $30 billion, but it did drop off substantially.

Mr. THOMAS. Did they do as well as the stocks and bonds of the average corporation?

Mr. CARY. It is hard to say there is an exact correlation, but they dropped off somewhat in the same percentage.

Mr. Conwill, would you speak to that?

Mr. THOMAS. I believe the most concrete statement you made in your justifications is that the public perhaps lost its sweet tooth for investment; certainly the speed at which they went into that type of investment slowed down.

Mr. CARY. I think there has been a slowing down in the total amount of purchase of shares, but the public is still buying them. After all, there is a tremendous amount of savings that is going into some area of investment and the investment company field is definitely one of them.

Mr. CONWILL. I think I might answer this way: Those funds which had an investment policy of investing in speculative stock issues had a very sharp depreciation in their values after the market break. Those funds which had a more conservative policy of investing—blue chips, preferred stocks, and bonds—had much less depreciation, but they had a sizable depreciation, too. I think the impact is that the market break did cause a sizable reduction in their sales compared to last year.

Mr. THOMAS. Did any bad business practices come to light? Did anyone lose an appreciable amount of money? Did any of them go broke or anything like that?

Mr. CONWILL. None of them went broke; no, sir.

Mr. THOMAS. That is not a bad record, is it?

Mr. EVINS. What is the estimated capital net value of the investment companies now as compared with a year ago?

Mr. CARY. It is about $27.3 billion now. At least, that is the latest figure we have.

Mr. EVINS. A $3 billion drop.

Mr. CARY. I would say more than a $3 billion drop.

Mr. CONWILL. At one point it dropped a little over $5 billion.

Mr. THOMAS. The listed stocks on the major stock exchanges showed about the same proportion of loss or maybe a little bit more?

Mr. CARY. That is correct. In other words, it went along in somewhat the same relationship.

REAL ESTATE INVESTMENT COMPANIES

Mr. THOMAS. Are the real estate trusts separate and distinct?

Mr. CARY. Real estate investment companies are not under our Investment Company Act jurisdiction. Basically, there is an exemption from the Investment Company Act.

Mr. THOMAS. You don't take a look at them, then?

Mr. CARY. We do. We have been very much involved in the real estate field, as you may have noticed from the Wall Street Journal in recent times, but it is on the side that Mr. Worthy is involved in, namely, the Division of Corporate Finance. There our job is exclusively disclosure. The fact of the matter is that we have made a very careful effort to insure that the facts with respect to these real estate companies are in front of the public. We have had a very substantial amount of problems recently with a number of the so-called cash flow type of real estate companies which are operating primarily to produce a large amount of cash through depreciation as well as profits which they distribute to the public in substantial part tax-free.

Mr. THOMAS. Have you any direct jurisdiction over them?

Mr. CARY. We do not have any jurisdiction over them.

Mr. THOMAS. How do you assume any jurisdiction, then?

Mr. CARY. Through the disclosure requirement. When I said jurisdiction, I meant we do not have any regulatory power. We do have jurisdiction over the disclosure. In other words, we make sure that all the facts are properly stated to the public; that is, where we have begun to have problems because there was a failure to state the exact facts. For example, the basis on which cash distributions were being paid, whether in fact it was being paid from the proceeds of stock that a company was issuing or whether it arose from depreciation and earnings of the company.

Mr. THOMAS. What is this type of investment based on? What is behind it?

Mr. CARY. It has a very substantial tax base because of the fact that a real estate company can pick up a piece of property and then begin to accelerate the depreciation which they take. As a consequence——

Mr. THOMAS. That applies only to the improvements thereon. Isn't that true?

Mr. CARY. No. It applies to the building. Yes, you are right, if that is what you mean—the original building and the improvements upon it.

Mr. THOMAS. One is depreciation of improvements on the land.

Mr. CARY. That is right.

Mr. THOMAS. What is next?

REAL ESTATE TRUST DIVIDENDS

Mr. CARY. That is the basic factor, you might say, that makes them particularly attractive. A company can distribute a very substantial amount of money back to its shareholders which is tax free because it is really distributing the depreciation which they have taken on an accelerated basis pursuant to——

Mr. THOMAS. Do the ad valorem taxes figure in it in any way?

Mr. CARY. I cannot speak to that. I do not know.

Mr. MANUEL F. COHEN. That is right. The device, as the chairman explained, is using that which is a tax deduction, although not an actual cash outflow, as a return of capital.

Mr. THOMAS. That is equivalent to cash in one sense.

Mr. MANUEL F. COHEN. Yes, sir.

Mr. CARY. That is correct.

Mr. JONAS. The trust has to pay out a certain percentage of its cash earnings in order to qualify for tax exemption, does it not? That is a high percentage, too.

Mr. CARY. Mr. Cohen, could you speak to that?

Mr. MANUEL F. COHEN. If you are speaking about a real estate investment trust——

Mr. JONAS. Yes.

Mr. MANUEL F. COHEN. I think you are quite right. I think the chairman was speaking generally to the type of real estate operation which is a cash flow operation.

Mr. JONAS. We are talking right now about real estate investment trusts.

Mr. CARY. I must say I was referring not only to real estate investment trusts but real estate companies generally.

Mr. JONAS. You told us you had some pretty clear lines of jurisdiction over real estate investment trusts.

Mr. CARY. I said that we were extremely interested in their problems, as well as those of other real estate companies, Congressman Jonas. You will notice, for example, we have at the moment a stop order proceeding pending with respect to a corporation. We are already studying the problems of real estate companies.

Mr. THOMAS. How many of them are in existence and doing business?

Excuse me. Go ahead.

Mr. JONAS. Can you tell us offhand how many?

Mr. CARY. Mr. Worthy, have you any information on the number of real estate companies? I think we have a study on that. Perhaps Mr. Worthy, the head of our Division of Corporation Finance, can answer that.

Mr. JONAS. I ask the question to clear the record. Someone reading the record may get the impression the dividends are tax free to the stockholders. You did not mean to imply that. You meant it was not taxable to the trust.

Mr. CARY. Actually, they are tax free to the stockholders, too, Congressman Jonas.

Mr. JONAS. Is that right?

Mr. CARY. For this reason: They are really not distributed out of the earnings and profits of the company, which may be zero. To the extent they are distributed out of earnings and profits, they would be income and taxable, but a large portion of it is not earnings and profits of the company but represents this depreciation factor.

Mr. THOMAS. Capital investment.

Mr. CARY. That is right.

Mr. MANUEL F. COHEN. It is a return of capital.

Mr. CARY. It is a return of capital, and so treated.

Mr. WYMAN. A reduction of basis.

Mr. CARY. That is right.

Mr. JONAS. How can a stockholder know how to make his tax return?

Mr. WHITNEY. He is told. The company gives him a report.

Mr. JONAS. On the percentage?

Mr. WHITNEY. Yes, sir, in dollars. We cleared a case 2 days ago this week where the investor was going to pay $4,000 for his unit of investment, and they estimated he would get $420 a year in cash on that unit. Out of that $420, only $54 represented income as you and I understand it. The rest of it was return of capital.

(Off the record.)

Mr. CARY. We want to insure they do know what they are buying. That is the only kind of jurisdiction we have at the moment with respect to these companies.

JURISDICTION OVER REAL ESTATE COMPANIES

Mr. THOMAS. How intensely and deeply do you go into these companies?

Mr. CARY. I would like Mr. Worthy to speak to this, but I can start it off, if I may. First of all, in a registration statement they must describe the properties which they have. I might add we wrote a special registration form just for real estate companies. Secondly, they have to give financial statements with respect to their properties. Thirdly, there is a separation of the depreciation element from the earnings, so the public is completely aware of the fact that they are getting a return of capital. Finally, we want to insure that the public knows that the money that they will receive is available to the company and will not arise from additional debt that they were incurring or an additional stock issue. We want to know the source of the cash as well as the source of the payment.

Mr. THOMAS. How often do they file a statement.

Mr. CARY. First of all, if these are very substantial companies—and the cash flow companies to which I have referred are substantial—they are required to make periodic reports—actually, quarterly reports, if I am not mistaken. We have instituted in the last year, which goes to the point you made a moment ago, Congressman Jonas, a new requirement of a form for real estate companies which specifies a division of cash distributions and cash flow into what part is earnings, what part is depreciation, and what part arises from other sources. So there is a periodic analysis being made of the payments which the parties are receiving. This is a way by which the companies themselves have control over their operations. Also we are made aware that they are not paying out more than they are in a position to do—that the companies are complying with their representations.

REAL ESTATE COMPANY MARKETS

Mr. WYMAN. Is the relationship between this reduction in basis and the depreciation, and so forth, that is taken as a return, reflected in the market price of the securities involved. As they draw out unearned income, can you see the market price follow this? Are the people aware of this?

Mr. CARY. I would like Mr. Worthy to speak on that.

Mr. WORTHY. One of the problems that we have had under very serious consideration is whether or not the increase in the distribution by the month or the quarter in fact has not raised the price of the security. That is one of the problems we have under study at the present time.

Mr. THOMAS. That sounds all right on an ascending real estate market, but we have not had one now for 2½ or 3 years. What about on a descending real estate market? How does that change the picture?

Mr. CARY. They have been cutting their payments recently, in part.

Mr. WORTHY. Some of them have. They make every possible attempt to keep them at a steady level, if they cannot in fact increase them. Some of these companies have gone so far as to sell properties which they have in order to take a capital gain and make a profit. That money then is used for a cash distribution in order to be able not to have to cut their regular, advertised rate of return.

(Off the record.)

Mr. JONAS. I would like Mr. Worthy to put in the record the information that he was looking up, the extent to which these trusts have developed.

Mr. WORTHY. I do not have the exact figures as of December 31. I would say there are approximately 60 of the real estate investment trusts alone. That does not mean that those are all of the real estate filings we have had. We have had innumerable filings by ordinary corporate real estate issuers which are not under the real estate trust.

Mr. JONAS. To qualify as a real estate investment trust under the Internal Revenue Code, the trust must pay out what percentage of its earnings each year?

Mr. WORTHY. I think approximately 90 percent.

Mr. JONAS. Many of the real estate holding companies to which you refer are not seeking that kind of tax haven. They operate ordinarily, do they not?

Mr. CARY. That is correct.

Mr. WHITNEY. That is correct.

Mr. CARY. Actually, they have a built-in tax haven because they have never generated enough earnings. Most of their payments are in fact out of depreciation and, therefore, not subject to taxation in the hands of shareholders; reduction of basis, as Congressman Wyman indicated a moment ago.

Mr. JONAS. That is all.

Mr. THOMAS. Proceed with your statement, Mr. Chairman.

ADDITIONAL PERSONNEL—INVESTMENT COMPANY PROGRAM

Mr. CARY. As you recall, I was referring to investment companies. As I said a moment ago, our discussion is quite pertinent to the work of the Division of Corporation Finance, but this is something over which we do not have jurisdiction through the Investment Company Act. However, as Mr. Conwill pointed out a moment ago, we have about 700 investment companies which are under our jurisdiction and in which we must have an inspection program.

Recent events have required a broad reexamination of industry practices in the investment company industry. As you may know,

50-odd private lawsuits have focused our attention on the relationship of investment companies to their managers. The Wharton School of the University of Pennsylvania has completed, at the direction of the Commission, an extensive study of various aspects of mutual funds. Therefore, the Division of Corporate Regulation and the Special Study are at the present time reviewing the industry problems.

(Off the record.)

Mr. CARY. The number of positions now available to the Commission to handle the inspection of investment companies is wholly inadequate. Inspections made in past years reveal many irregularities and indicate the need for substantial extension of this program for the protection of public shareholders. The inspection program represents preventive enforcement for the protection of the investing public.

OBJECTIVE OF INVESTMENT COMPANY INSPECTION PROGRAM

It is the Commission's goal, as was said a moment ago, ultimately to have an inspection on the basis of an 18-month cycle. Until that objective is met the Commission cannot state that it is meeting its full regulatory responsibilities. We do believe it will take a few years before we can achieve that.

May I say further, although we come in and ask for additional people for certain goals, up to this point we literally have not met the goal which we have attempted each year because each time we make an inspection—not each time but very frequently when we make an inspection—we find a problem. Therefore, an inspection means further investigation.

As a consequence, for example, this year I think our target is 90 inspections with respect to 700 companies, but as of January 27 of this year we really have gotten through only 44 inspections and we have only 20 reports out of those 44. This is for really a half year. Therefore we are not yet meeting even our goals because of the difficulties involved in this inspection program.

That is one of the reasons, if I may say, why I have been urging the Investment Company Institute to work with us in a self-regulatory program of inspection so they will assume some of the burden and do it on a basis which would be cooperatively with us and generally under our supervision. That was the thrust of my speech at the——

Mr. EVINS. How many inspectors do you have?

Mr. CONWILL. Full-time inspectors in the field and regional offices number 10.

I have a total of five full time. In the regional offices there are about 27 who do it on a part-time basis, and then I throw in people from the regular process.

Mr. EVINS. You have 15 doing it on a regular basis?

Mr. CARY. We are asking for 24 more.

Mr. EVINS. How long does it take to make an inspection of an average financial institution?

Mr. CARY. Theoretically two men should do it in 3 weeks. The theory just does not seem to work because so many problems are uncovered where frequently you have to have some kind of additional investigation.

To give you an exact figure, Congressman Evins, is a little impractical. We found so many problems involved.

Mr. THOMAS. In your figure of 15 is it not inaccurate? The people in the regional offices are ambidextrous, so to speak. They are very capable. They can do anything.

Mr. CARY. We try to keep them that way; yes, sir.

Mr. THOMAS. If he does something today he does something different tomorrow. When you say 15 it does not quite tell the tale.

Mr. CARY. I think it is an understatement, although this takes a considerable amount of skill and training in order to do it.

I know when I was down in Atlanta in November, and Mr. Green can speak to this, as our regional administrator there, he was sending out two people on that very day to handle an inspection of an investment company.

Mr. THOMAS. We have Brother Green here from the Atlanta regional office. We certainly welcome him again.

Tell us about some of your problems down there. You are growing fast there.

Mr. GREEN. And we are proud of that growth, Mr. Chairman. I think the weather we have had down there recently acclimated me to this weather. I am generally not used to it.

Mr. THOMAS. Around zero?

Mr. GREEN. Two below zero there one day.

Coming back to the first thing the chairman mentioned, I am a country boy and I use country expressions although I am traveling with a sophisticated group.

Mr. THOMAS. We talk your language.

TRAINING OF INVESTMENT COMPANY INSPECTORS

Mr. GREEN. This investment program is breaking new ground for us. We have not done too much of that. It requires a great deal of training.

We are just commencing our inspection program. So far we have 33 investment companies in my region with assets of about $85 million.

The phase we did was the broker-dealer work. You have a sponsor and underwriter. We made the inspection of the broker-dealer. We had men loaned to us from the Division to make the examination required of the Investment Company Act.

At this time my men are not trained to make an examination under the Investment Company Act. We have to train them.

Mr. THOMAS. Here I have been bragging about you and your men and now you are snatching the blanket off me.

I thought you already trained them.

Mr. GREEN. Not under the Investment Company Act because we have had no responsibility under that act until recently. Now we have been given the responsibility, we will train the men, and let them undertake the job. It is a time-consuming job.

Mr. THOMAS. You are not exactly in virgin soil, though, are you?

Mr. GREEN. That is right.

Mr. THOMAS. Other activities are almost first cousins to this. You are not strangers.

Mr. GREEN. You made a very accurate statement a moment ago.

Mr. THOMAS. Just one?

Mr. GREEN. So far as I am concerned, every man in the regional office has to be able to do every job. In other words, we cannot specialize. We use a man as the need comes up. We try to train every man so he knows about every phase of our work. We cannot operate otherwise, particularly in a small office such as I have.

This statute is very complicated. There are many restrictions in there. Unquestionably we have to train the men. We will train them. We will make the inspections. I think we can make them in conjunction with our broker-dealer inspections.

You asked a question a moment ago I would like to answer. Our principal work in the field office in Atlanta involved the majority of time in investigation and prosecution of cases.

While this may not sound reasonable, it is a fact that it takes more time in a case after it is once referred and complete it than it does to redevelop a case for reference.

As you well know, most assistant U.S. attorneys are not career men. They come and go rapidly. Our cases are complex and most of them involve accounting work. The result is that we have to spend considerable time preparing the assistant U.S. attorney to try the case, even before it is presented for indictment, and as it is tried we have to practically hold his hand.

Mr. THOMAS. Off the record.

(Discussion held off the record.)

Mr. GREEN. We have happy relations in my area with the States. We work closely with the State commissions. If it is a simple case, not involved, they will handle it and we will loan them an expert to help. A complicated case we handle because we have expert men.

Mr. THOMAS. Our distinguished visitor here has expert men in one breath and in the next breath he hasn't quite trained them.

Mr. CARY. We are running a training school on this very subject in this very month in New York.

Mr. CONWILL. We have a training program in New York which will last for 4 weeks.

Next month, we will give the same course in Chicago for that regional office, regional offices nearby, and the following month we will go to San Francisco to give the course again.

Mr. THOMAS. Mr. Jonas?

Mr. JONAS. This is on a subject entirely removed from the one under consideration. I shall wait until the chairman finishes his statement.

Mr. EVINS. He is saying the country lawyers have to brief the smart boys, Mr. Chairman.

NEW LIFE INSURANCE COMPANIES

Mr. JONAS. A few years ago there was a rash of life insurance company formations. Has that subsided?

Mr. GREEN. Yes, sir.

Mr. CARY. I would say it has subsided.

Mr. JONAS. Was the market overcrowded?

Mr. GREEN. We have not had many in the last 2 or 3 years. They were organized more in the South than elsewhere. More life insur-

ance companies were organized in 1 year in Alabama than in any other State in the Union.

Mr. JONAS. We had quite a few, too.

Mr. GREEN. In North Carolina; yes, sir.

Mr. JONAS. You could not walk down the street without seeing a new life insurance company operating.

Mr. GREEN. We have a situation going on again, shotgun mergers. We have a lot of life insurance companies unable to make a go of it. They bring about mergers with larger companies. We have a substantial number of those cases.

Mr. JONAS. You have had no serious trouble with them, have you?

Mr. GREEN. We have prosecuted some of them.

Mr. JONAS. For what kinds of violations?

Mr. GREEN. We have jurisdiction only over the disclosure aspect and the registration.

Mr. EVINS. Off the record.

(Discussion held off the record.)

Mr. OSTERTAG. What about over-the-counter?

JURISDICTION OVER INSURANCE COMPANIES

Mr. CARY. I refer to the securities. We do not have any control, Congressman Ostertag, over the sale of insurance itself. That is very carefully kept under the jurisdiction of this insurance superintendent. They are totally exempt from our jurisdiction except so far as the offering of the securities which would be subject to the Securities Act of 1933.

If we take the next step of having a broader list of over-the-counter securities subject to reporting requirements, then they would have to file information about the companies.

Mr. OSTERTAG. At one time there was quite a controversy over insurance such as between the States and the Federal Government over central control.

Mr. CARY. That is correct.

Mr. OSTERTAG. Has that been resolved?

Mr. CARY. There was a Supreme Court case which in effect indicated, if I am not mistaken, that the Federal Government could have jurisdiction, but then it was immediately followed by a new act of Congress which exempted it. That was the McCarran Act. It was laid to rest at that time.

Mr. CONWILL. There is another exception which should be mentioned. When the insurance companies get into noninsurance activities, into investment company activities, such as with the variable annuity, then we assert our regulatory jurisdiction over that phase.

Mr. OSTERTAG. Are insurance companies generally speaking the largest investors?

Mr. CARY. In total investment in securities?

Mr. OSTERTAG. Yes.

Mr. CARY. The major investors today are probably pension funds, investment companies, insurance companies, trusts as a whole, and then the public generally.

I would think that insurance companies do not have as large a portfolio of equities as either pension funds or investment companies, for

the reason that primarily insurance companies are still invested on the bond side.

The answer is, if we are talking in terms of equity investments, insurance companies are perhaps in third place among the institutions. I am not sure I am precisely correct, but they are probably in third place behind pension funds and investment companies.

VARIABLE ANNUITIES

Mr. THOMAS. Have you not just finished an insurance case involving Prudential?

Mr. CARY. That is right. I wrote an opinion on that.

The issue came up as to whether Prudential of New Jersey could issue variable annuities which would not be subject to our jurisdiction.

The general argument they made was that they are an insurance company and therefore exempt from the application of the Investment Company Act of 1940.

We took the position in a general way that that is true with respect to insurance transactions. However, when you get into selling a variable annuity, which depends upon the market, you really are selling primarily an interest in a unit of an investment company. Therefore, to the extent that they are proposing to sell variable annuities that phase of the business would be subject to the investment——

Mr. THOMAS. What do you mean by variable?

Mr. CARY. In the conventional annuity, I may make a substantial payment, a few thousand dollars now, with the idea of having an annuity which will run from age 65 to my death. The insurance company will pay me a fixed amount of dollars until death; they guarantee the payment of this fixed amount.

On the other hand, in a variable annuity, the insurance company will not assure you an exact amount each year. They agree only to pay you a fixed number of units, the value of which depends on the value of a portfolio of investments. In other words, it will depend on the varying value of stocks in which they will invest—the annuitant's payments will essentially fluctuate with the stock market.

Mr. THOMAS. How does the variable feature attract or detract? Insurance is based on two things—selling the policy and getting the money, and then investing it. They are in the business of selling primarily. They are bankers. They have to go out and invest the funds they take in, whether it is in stocks or what not. What does the variable feature add to it? If you get anything for the money you pay in it depends upon the success of the company's investment.

Mr. CARY. Mr. Conwill was in South Carolina yesterday discussing this very problem. I will ask him to speak to it.

Mr. CONWILL. In the usual annuity, as we ordinarily think about it, you make a fixed payment.

Mr. THOMAS. When it is fixed, is that exempt under the act?

Mr. CONWILL. That is right.

Mr. THOMAS. There is the answer to my question.

Mr. CONWILL. At 65, they will guarantee to pay you $100 a month. The difference in the variable annuity is that you make your payments and they take your payments and put them in a fund composed largely

of equity securities. Then they say, "We will pay you whatever your interest works out to be in that pool on your retirement," so it will vary.

The advantage of the——

Mr. THOMAS. The sale is not based upon any limitation of where they reinvest the fund, is it?

INVESTMENTS OF INSURANCE COMPANIES

Mr. CONWILL. It is based on the idea they will invest your money in equity securities.

Mr. THOMAS. Nothing else?

Mr. CONWILL. They might throw in a percentage of bonds.

Mr. THOMAS. Real estate?

Mr. CARY. It depends on their policy.

Mr. THOMAS. Office buildings? Anything that produces a revenue is what they are interested in, is it not?

Mr. CONWILL. They confine themselves to securities, predominantly equity securities.

Mr. CARY. Today an insurance company has a limited percentage of its assets in real estate. It is a very limited percentage. I don't know whether it will carry over——

Mr. THOMAS. It depends on the charter of the issuing State. Don't they have the Robinson-Patman Act in my State which says that any insurance company which comes into that State will have to invest X amount of their cash inflow in Texas real estate, securities, and so on?

Mr. CONWILL. Almost every State specifies what the insurance company can invest in generally, and the percentage. Normally you find they are conservative investments, bonds, debt securities, and real estate.

Mr. THOMAS. I don't know of anything safer than real estate. The good Lord doesn't make very much additional land every day.

Mr. CONWILL. There is an exception for the variable annuities, and the exception is a statute which states in substance, notwithstanding any other limitations you can create a separate account and use that separate account to invest in equity securities.

Mr. THOMAS. Is the company accepting your opinion?

Mr. OSTERTAG. Is this all associated with the original charter?

Mr. CONWILL. This is a recent development. Thinking in terms of 15 years ago this would have been unheard of.

JURISDICTION OVER INSURANCE COMPANY INVESTMENTS

Mr. OSTERTAG. These insurance companies are all chartered under the various States.

Mr. CARY. That is right.

Mr. OSTERTAG. There are some States which have a larger number of insurance companies by virtue of one reason or another. I was wondering whether the point you are developing is associated with the original right or charter under which they are granted rights for doing business?

Mr. CONWILL. It would constitute an amendment to their charter. For example, Prudential, incorporated under the New Jersey law, got a specific amendment for the purpose of going into the variable annuity business.

There are many States who as yet do not permit insurance companies to engage in that.

Mr. OSTERTAG. We have 50 States and perhaps 50 different basic principles under which these organizations or companies can do business.

Mr. CONWILL. That is correct.

Mr. OSTERTAG. Does that create a tremendous problem within your jurisdiction?

Mr. CARY. We hope by this principle of establishing our jurisdiction over the fund which is invested in equity securities and provides for variable annuities to regularize that phase of the business. We are only asserting jurisdiction over the investment company phase of the problem; the States still regulate the insurance phase.

Mr. THOMAS. If I may repeat my question—do the companies accept the rule?

Mr. CARY. We don't know yet. The opinion was handed down last week. We believe and we hope that the insurance industry will be satisfied with the way we are offering certain exemptions to make it a practical administration and a cooperative regulation with the insurance superintendents. We believe under these circumstances it should be acceptable to them, but I cannot guarantee it will be. It may be appealed.

Mr. THOMAS. Continue with your statement, please.

INVESTIGATIONS AND ENFORCEMENT PROGRAM

Mr. CARY. The discussion you had primarily with Mr. Green of our Atlanta regional office brings up the second phase of our request of 27 positions for our regional offices for the investigations and enforcement program

Mr. THOMAS. Mr. Green doesn't need any. He already has his distinguished staff trained.

Mr. GREEN. I didn't say that, Mr. Chairman.

Mr. THOMAS. Excuse me.

Mr. CARY. Our examination of registration statements and regulation A filings is the beginning of our jurisdiction over the distribution of securities. It is not the termination of our responsibilities. We must be in a position to determine whether the registration or antifraud provisions of the act are being violated not only during a public offering but in the subsequent trading of a security.

The additional positions are necessary in order to accelerate the disposition of investigations as well as administrative, civil, and criminal proceedings pending before the Commission and the courts. Our backlog of investigations has reached an unrealistic figure, 985, and as of December 31 it is 1,054, and it must be reduced.

The criminal workload has increased substantially in the past few years. The Commission referred a record 64 cases to the Department of Justice for the 12-month period ending June 30, 1962, as compared with 17 in 1958.

We anticipate an additional 55 cases will be referred to the Department in this fiscal year. Moreover, the number of charges, of defendants and co-conspirators in the past few years has increased. Such criminal work is far more demanding in both extent and depth

than required in most civil and administrative proceedings. On last December 31 we had 131 criminal cases pending with the Department of Justice.

Experience has shown the Commission that effective enforcement demands recourse not only to the civil and administrative remedies but to criminal as well if full effectiveness is to be achieved in halting the illegal activities of these violators.

Emphasis on developing criminal cases has broad implications in utilizing our personnel. First of all, our job is to obtain the evidence in these criminal cases and, second, additional manpower is needed to assist U.S. attorneys in the grand jury phase of the case and its prosecution.

"UNITED DYE" CASE

In that connection you might be interested in an article which appeared in the Wall Street Journal dated January 23 of this year in which they describe the longest criminal trial on record in the Southern District of New York. It is the *United Dye* case where we have had two people working with the U.S. attorney for more than a year. Mr. Donaty has been complaining about their being up there on per diem for this period of time but they never seem to finish the case.

The story in the Wall Street Journal refers to this as the longest case on record, longest criminal case of record in the southern district, and perhaps one of the longest cases ever held.

Mr. LOOMIS. This is the longest criminal trial in the history of the Federal courts.

Mr. THOMAS. What was the nature of it?

Mr. CARY. It is called the *United Dye* case. Mr. Loomis can explain it better than I.

Mr. THOMAS. What is the situation?

Mr. LOOMIS. We are trying quite a number of individual defendants.

Mr. THOMAS. Without a jury?

Mr. LOOMIS. It is a jury trial. There were 16 original defendants during the year that the case went on. Nine of them—more than that—pleaded guilty, one had a heart attack, and the remaining five are still involved. It is a very complicated case. I could take your time to describe it, but perhaps it might be more interesting if you read this article.

Mr. EVINS. I prefer your describing it to us. I have too much reading material.

Mr. LOOMIS. In essence this involves a situation where United Dye was a company listed on the New York Stock Exchange and not doing very well. A group of people headed by Mr. Alexander Guterma, who has been in the papers from time to time, bought control of the company. Then another group of people who became allied with him, who came from Nevada mostly, got into the picture. They bought for some $500,000 some oil and coal properties and gave him a note so they didn't put up any money.

Then they put the oil and coal properties into a corporation which had no assets. Then they conveyed it to United Dye in exchange for some 575,000 shares of United Dye, which then was selling on the New York Stock Exchange in the neighborhood of $10 or $12, so there is

about $5 million worth of stock which they got for some properties which they had purchased for $500,000 but not yet paid for.

Mr. THOMAS. What were they charged with?

Mr. LOOMIS. Lots of things.

Mr. THOMAS. How many counts in the indictment and what were they?

Mr. LOOMIS. There were 30 counts in the indictment. Basically they charged fraud in the sale of these securities, filing false reports with the Commission, manipulating the market in New York and elsewhere in these securities. They made about $5 million.

Mr. THOMAS. On which count did you have the most difficulty in making your proof?

Mr. LOOMIS. Since the jury has not decided——

Mr. THOMAS. It is not through?

Mr. LOOMIS. Nine of them pleaded guilty. The jury still has not been heard from.

Mr. CARY. The jury will be charged this week, I believe.

Mr. WORTHY. The judge began charging the jury yesterday afternoon. His charge may take the remainder of the day. The case perhaps will go to the jury tomorrow.

Mr. JONAS. How can a court keep a jury there for a year? Is there a problem?

Mr. LOOMIS. I wondered about that.

Mr. WORTHY. How they kept the jury that long, I don't know. I am sure they did not keep them locked up overnight.

Mr. LOOMIS. They knew it would be a long case when it started and in the selection of the jury they tried to pick people who could stick around for some time.

NUMBER OF INVESTIGATORS, ATTORNEYS, AND OTHER POSITIONS

Mr. WYMAN. How many field investigators do you have?

Mr. CARY. Over the whole country?

Mr. WYMAN. Yes, approximately.

Mr. DONATY. Seventy-eight on board as of December 31.

Mr. WYMAN. You have 1,054 investigations underway as of the end of December 1962?

Mr. DONATY. That is right.

Mr. WYMAN. Are these men engaged in several investigations concurrently?

Mr. DONATY. This is strictly investigative. In addition to the investigators, we have attorneys who also work in these cases—Commission-wide, we have 371.

In addition many of these investigators have broker-dealer inspection experience. We have approximately 66 of those. Also we have financial analysts and accountants out in the field.

Of the total employment in the field, approximately 60 percent of that employment is devoted to investigations and enforcement actions. Enforcement actions include civil, administrative, and criminal proceedings.

Mr. WYMAN. And those investigations are, practically speaking, conducted in large measure by your accountants and attorneys as well as the 78 actual investigators?

Mr. DONATY. That is correct.

Mr. CARY. We can give you a breakdown by classes if you would like. We have, for example, a total of 371 attorneys in the SEC, of whom 170 are in the field. I suppose more than 170 would be involved in that.

Mr. WYMAN. Do these field men work on more than one case at the same time?

Mr. CARY. That is correct.

Mr. EVINS. Mr. Loomis is a tough sheriff. He keeps them busy.

Mr. CARY. That is right.

Mr. THOMAS. Go ahead.

Mr. CAREY. That completes the discussion that I wanted to have.

Mr. THOMAS. That is a fine and informative statement.

Mr. CARY. I have more; I meant that I have completed my discussion with respect to these two major categories of inspections of investment companies and the investigation field.

I have indicated the 2 programs for the regional offices of the 51 we are requesting. The other three are for interpretation and information in the New York regional office because of the increased number of interpretative questions and general information problems posed to that office.

ADDITIONAL POSITIONS FOR THE CENTRAL OFFICE

The next item is the increase of 23 positions for the central office for 1964 which is offset by the reduction of 23 positions in the special study by next April 3. For the current fiscal year, as you may know, 65 positions have been allocated to the special study of securities markets. It is our anticipation to transfer 42 of these positions to our regular staff on or about April 3, which is the termination date of the special study. Accordingly, the remaining 23 positions will be abolished as to the special study. These positions represent the top 8 positions of the special study staff and 15 stenographic and clerical positions. The 23 additional positions—in other words, we are abolishing 23 from the special study but we are turning them over into other areas—for the central offices are distributed roughly as follows:

Five clerical and stenographic positions in the Division of Trading and Exchanges for the anticipated increase in workload for the processing of new applications and amendments for registration of broker-dealers and investment advisers, and to provide adequate stenographic assistance to professional personnel in the investigations and enforcement program.

Four statisticians in the Division of Trading and Exchanges for the purpose of providing the Commission on a continuing basis financial and statistical data relating to the stock market and registered broker-dealers.

Eight positions for the Division of Corporate Regulation because of an anticipated increase in workload under the investment company program and our chapter X activity of the National Bankruptcy Act. That has increased perceptibly in the past 6 months, just as the market itself, after a falloff in May, began to give us a little relief for a moment on the registration activity. By the same token, there

is more activity under chapter X and a substantial number of companies have filed.

Five positions for our administrative area to support our program offices on a current basis. That is the type of work such as records and services, personnel, and Mr. Donaty's office.

One position in each of the following offices because of accelerated enforcement and inspection programs; namely, one for the office of the secretary, one for the office of the hearing examiners because we are having so many cases, and one for the office of the General Counsel.

That completes our requests. The last 23 represents the 23 jobs abolished on the special study—a net of zero with respect to our central office.

OPERATION OF THE COMMISSION

Mr. OSTERTAG. Getting down to the basic responsibility of your Commission, you have a number of statutory provisions for which you are responsible. You are a Commission, yet you have a number of divisions within your organization dealing with such matters as investigations and enforcements. How do you, as a commission, operate? Do you, as individual Commissioners, have a definite responsibility of working separately and apart, or are all these decisions made jointly by the Commission as a body rather than by the examiner?

Mr. CARY. I believe, of all the commissions in the Government, we perhaps operate more as a commission, meeting usually from 11 in the morning until 1, and quite often 3 hours in the afternoon. We meet about 5 hours a day.

Mr. THOMAS. You meet every day? Not every 2 weeks?

Mr. CARY. Every day. I would say, on the average, we meet about 4 hours a day.

Mr. OSTERTAG. I know there are meetings, but what do you do at these meetings?

Mr. CARY. Perhaps the first thing we do, in the morning, is to clear the registrations which become effective with respect to new issues of securities. Those were immense, up until May, though they have dropped off recently.

Secondly, we have recommendations made by the staff with respect to new investigations which should be carried out, and those come up in the form of a very substantial memorandum. They might come from Mr. Stocking's office in Denver or Mr. Green's office in Atlanta. They would be sifted through the Division of Trading and Exchanges, which is Mr. Loomis' office, and then presented to us with, (a) the report of the regional office; and (b) the report of the Trading and Exchanges Division. Then we pass on whether or not that particular investigation should be authorized.

Then, in addition, we might have a recommendation for a proceeding to be brought to revoke a broker-dealer license, or perhaps to ask for an injunction. All of those pass through us and we go over the memorandums.

Then we may have a problem presented by Mr. Conwill's office with respect to an investment company. There are quite a number of problems under that regulatory act.

Finally, in the afternoon, for instance, yesterday, we had a hearing with the counsel coming up on a major matter involving a particular investment company; or we may have a hearing on another matter.

If we do not have that, we are listening to a report, perhaps, brought up by Mr. Milton Cohen on behalf of a special study. Although, in a sense, this will be his report as director of the special study, it will also be our report. We want to be sure the positions they have taken are in conformity with our own, and we also want to be informed as to where he is going and what the problems are as he sees them.

Basically our day is represented by that kind of activity.

DECISIONS OF THE COMMISSION

Mr. OSTERTAG. Are all decisions made by the Commission? Do any of your Division heads have authority to resolve and make decisions?

Mr. CARY. We delegate, but do not delegate anything which we regard as substance. For example, if it is a revocation of a person's license to do business, obviously that is not delegated.

On the other hand, if, for example, it is a request for approval that somebody can continue in the business, and it is approved by the Trading and Exchange Division—and thus he is not adversely affected—in some of those areas we have authorized delegation. Wherever action may adversely affect individuals or firms, by and large, we do not delegate that and it comes up to us.

Mr. JONAS. You don't divide it out among yourselves?

Mr. CARY. No. Sometimes you rely on one of your colleagues who has gone into a particular matter more thoroughly than you have. In one case you may not have gone over the matter. We have all acted together as a corporate body and act and vote on each issue.

Mr. OSTERTAG. If you as a Commission sit each day for a large portion of the time, when do you have time to operate separately by way of familiarizing yourselves and assuming responsibilities as individual Commissioners?

Mr. CARY. We are proud of it. We are a terribly hardworking group. I would say most of us work at night a good deal of the time.

Mr. JONAS. You opened the door there.

Mr. CARY. I did not mention that, but it is true.

Mr. WYMAN. Do you have many attempts made to contact various Commissioners as to registration statements outside the formal channel, so to speak?

Mr. CARY. We do get calls and occasionally people visit us. We, of course, could not afford, in a process in which you have to take people as they line up, we could not afford to deviate and give one person accelerated treatment and not another. If something is called to our attention we look at it and see that we are not being arbitrary or things of that kind.

Mr. WYMAN. I did not mean that. I mean when somebody is particularly interested in a registration statement, in expediting it, do they attempt to contact the Commissioners outside their offices and ask them to give it consideration?

Mr. CARY. We get some of that but that is usually sifted down to the staff.

Mr. WORTHY. They are usually referred to me.

There is one point I would like to make. I think if this group saw a copy of the Commission's daily calendar which is distributed to the various division heads at the end of each day, you could appreciate the amount of time and the magnitude of the work done by the Commission itself.

SELF-REGULATION WITHIN THE SECURITIES INDUSTRY

Mr. OSTERTAG. Well, it seems to me that all agencies of Government are growing and growing in size and I suppose you might say in responsibilities. Do you see, in the objectives and purposes and responsibilities of the Securities and Exchange Commission, an ever-increasing development in the country which requires more work, more responsibility, more effort, and a larger organization than you have had in the past?

Mr. CARY. I would have to be candid and say that I certainly feel, as the industry grows, we will grow too. I have made a strong plea for self-regulation. I do not think we can do the job of regulating the activities of everybody in the securities industry ourselves alone. I think we have to depend on organizations such as the exchanges and the National Association of Securities Dealers. I am trying now to urge the Investment Institute into the picture because they could work cooperatively with us, take some of the inspection workload from us, and I think do it responsibly and we would not have to grow as much as we otherwise might have to. I do not see the necessity for our ballooning in size, but I am telling these organizations that they themselves will have to expand, the self-regulatory bodies. I think that will help to solve the situation.

Mr. BOLAND. Have they indicated a willingness to do that?

Mr. CARY. I think the exchanges have shown some willingness to go ahead; so has the National Association of Securities Dealers. The Investment Institute is now, yesterday to be precise, talking about giving us some participation in the field of inspection. I think they have made a token suggestion that the Commission rejected because it was too small. That does not foreclose them from offering another suggestion that will be more substantial. We think they will help.

Mr. OSTERTAG. You mentioned exchanges as a means for self-policing?

Mr. CARY. Yes, sir.

Mr. OSTERTAG. At the same time you as a Commission find it necessary to police the exchanges, do you not?

Mr. CARY. That is true, sir. I do believe that that is the system under which we ought to operate. They cannot have totally unregulated self-regulation. I think we have to furnish some oversight. I was making a speech on this in Florida before the Investment Bankers Association and I said just as we are alleged to be an independent agency we have oversight from the Congress. I think we have to furnish some oversight to these organizations. We have to be sure they are being vigorous enough and effective enough. And, as you will recall, a year or so ago in regard to the American Stock Exchange, we

had to take a vigorous position and yet we maintained the theory of self-regulation. We published a report pointing out what was wrong and a new group reorganized the exchange, drafted a new constitution, they have a new president and a new system of operation, and it is working along satisfactorily. That is what I mean by cooperative self-regulation, namely, we have to furnish some oversight just as you furnish some oversight over us.

Mr. OSTERTAG. The statutory authority in your justifications starts out by saying:

> The Securities and Exchange Commission is an independent quasi-judicial agency.

I realize it is a quasi-judicial agency, but why is the word "independent" necessary to be descriptive of your organization?

Mr. CARY. That is a phrase applied to all the regulatory agencies. This is a quote from my speech in November. I said:

> We are called an independent regulatory agency but anybody who thinks we are completely independent hasn't been long in Washington.

That is on page 1 of that speech I made. I understand what you mean and you are quite correct in saying we do not have total independence.

Mr. THOMAS. I know one agency that the word "independent" can be applied to. That is the FDIC. Congress does not have anything to do with them. They do not furnish them money or anything.

Mr. JONAS. I had one general question, Mr. Chairman.

Mr. THOMAS. Go ahead, Mr. Jonas.

INCREASE IN BANKRUPTCY PROCEEDINGS

Mr. JONAS. How do you account for the increase in bankruptcy filings in a period of high prosperity?

Mr. CARY. Let me state roughly the areas in which there have been these principal reorganizations. As far as I know they have been in shell homes, in big real estate developments, and most recently in the chain-store specialty area, discount stores. Those have been the three areas I have seen the most of in the last 6 months.

As to shell homes, they had a tremendous wave of enthusiasm. I do not know enough about the industry to give you a reason as to why they have gotten into the trouble they have.

Do you have any views on that, Mr. Worthy?

Mr. WORTHY. No. We have had some registration statements by those particular concerns. I think one of the problems is probably overcapitalization and things of that kind.

Mr. MANUEL F. COHEN. Some have been subject to overexpansion and overestimation of public acceptance.

Mr. GREEN. I think one thing was they came out with one or two issues that sold well and then others wanted to get into it and many did not have real foundations to continue the job.

Mr. JONAS. Is there much substantial use of chapter XI?

Mr. CARY. There have been many applications in chapter XI. In some we have taken the position they should shift to chapter X because there were so many stockholders involved it required a trustee to look into why they got into trouble.

Mr. CONWILL. I think they start with chapter XI and want to stay with chapter XI as long as they can.

Mr. CARY. We file applications sometimes to have chapter XI dismissed and that would force them into chapter X.

SPECIAL STUDY OF SECURITIES MARKETS

Mr. EVINS. Mr. Chairman, I know you will be telling us about your Special Study of Securities Markets and that your report will be issued in due time, but I am interested in having a short report at this time. What have you discovered, what are your intentions, and what has developed?

Mr. CARY. Perhaps I could start off and then I think Mr. Milton Cohen could carry on in detail.

By the way, may I say this is going to be an extremly intensive study that will cover in the neighborhood of 1,500 or 2,000 pages. It will cover the securities markets as a whole; the exchanges and the over-the-counter market; the distribution of securities; investment advice and many other things. Where is it pushing us? What conclusions have we reached? The answer is, of course, that the recommendations have not come out yet. It will not until April 3, so the conclusion stage is just getting underway. We have done the planning. We have the facts and I think it is being put together already.

May I say it has already had certain beneficial results in some areas. I would like to point out a couple of them to you.

First of all, the past president of the Investment Bankers Association, Curtis Bingham, noticed the improvement in the supervision and training of salesmen. We think that is important. It involves the question of whether or not there should be some qualifications imposed on people entering the business; and, secondly, after they enter the business whether they are adequately trained and supervised, particularly in view of the fact so many brokerage firms have so many branch offices.

Secondly, we find that the self-regulatory organizations I have referred to, both the National Association of Securities Dealers and the New York Stock Exchange, have stepped up their enforcement procedures.

Third, the New York Stock Exchange has a program for spot-checking the quality of supervision of sales activities by brokerage firms. This will cover not only the main offices, which they have covered before, but the branch offices. They are getting into that for the first time. As a part of this work they will determine what steps the brokers and their agents take to investigate their customers. This is a growing emphasis, that only securities suitable to a customer's needs and circumstances be recommended to him.

SUPERVISION AND TRAINING OF BROKERS

Mr. THOMAS. Mr. Chairman, will you let me interrupt there for information?

You say you place great emphasis on the brokerage industry training to a better degree their salesmen and representatives. Are there any cases on record where a suit has been brought against a brokerage company for the acts of its agents who get on the telephone and for

example call Widow Jones, who they know has a little money, and they want her to buy some stock that they tell her will go up in 30 or 60 days? I imagine the agent was acting in good faith, but I understand he gets a very lucrative commission, perhaps he makes between $2,000 and $3,000 a month on commissions. I understand they get a lion's share of the commission. Are there cases on the books where the brokerage firm has been sued for reckless statements by the agents where customers have been misled?

Mr. CARY. I think Mr. Loomis or Mr. Cohen can speak to that.

Mr. THOMAS. Are there any cases like that?

Mr. LOOMIS. Yes.

Mr. THOMAS. Are not the companies liable for loose come-on statements?

Mr. LOOMIS. Yes. There have been several cases brought by investors. We hear of five or six a year brought by investors against brokerage firms for statements by salesmen. I think there is no question the brokerage firm is responsible for what the salesman says and can be held liable if the statements are fraudulent. The only difficulty has been to define what is fraudulent and what is not.

Mr. THOMAS. What attitude have the courts taken in that type of case?

Mr. LOOMIS. I think the courts have been more strict with the brokerage firms recently. It used to be if the salesman said, "This is a very good stock and it probably will go up," the courts would say that was merely his opinion and the brokerage firm was not liable, but lately the courts have said if there was not a substantial basis for the statement the brokerage firm is liable for it.

Mr. THOMAS. Suppose brokerage houses turn loose their salesmen to telephone the unsuspecting public, maybe a woman who has made a few investments, and make these solicitations? I do not mean they intentionally do any wrong but they want to make a sale. After all, the only people who will make money whether the stock goes up or down is the brokerage house. It looks to me there ought to be more supervision by the Commission over the activities of the brokerage houses themselves and the activities of their personnel.

It is a common practice, we all know, for a salesman to call his friends and say, "It looks like such-and-such would be a good buy today." The fellow has no more idea what he is talking about than a shoe salesman keeping stock on shoes; his opinion is worth that much, but the fact that he is telephoning from the brokerage house gives some authenticity to it and, everybody being human, it begs the question to say caveat emptor applies. I have thought one of the shortcomings of the Commission has been the need for some tightening up of your rules and regulations on that aspect. Of course, nobody realizes it more than the big brokerage houses.

Mr. CARY. This is part of the problem of the qualifications of persons entering the business and their supervision. We are thoroughly studying this area.

Mr. MILTON COHEN. We are taking a look at what passes as research in the brokerage firms and advising where it is possible to consider the securities business as a profession with obligations to customers as distinguished from merchandising, and what the self-regulatory bodies have done in this area and how that can be tightened up.

Mr. THOMAS. It is one thing for a customer to phone and ask for advice, but it is something else for the salesman to call the customer and make an unasked for recommendation and push a sale.

Mr. MILTON COHEN. We will have a chapter on selling practices.

Mr. THOMAS. It needs looking into. In the life insurance business if an agent goes out and sells a life insurance policy the first year's premium is the salesman's commission and after that it is divided up. Whether that is exactly right I cannot say, but it is some proportion. How is it worked in a brokerage office between the broker and the salesman?

Mr. MANUEL COHEN. Mr. Chairman, this is an area that has been of considerable difficulty to the Commission for some years, the development of the so-called boilerroom in which sales are made largely, if not entirely, over the telephone.

Mr. THOMAS. As to the boilerroom operator, certainly you do not have the slightest doubt, that is the extreme, but how about the middle ground where the nice salesman calls his customer, based perhaps on previous contact, without any fraud. He will say, "I think this is a good buy." What difference does it make if he is honest or not in his opinion? He knew good and well he did not know. He was expressing his desire and hope based on his judgment, but the fellow who took his advice lost his money.

Mr. OSTERTAG. Is it not a part of your responsibility or authority to prohibit or prevent misrepresentation and deceit? This is basic in your objective, is it not?

Mr. THOMAS. The question I posed does not involve that.

Mr. MANUEL COHEN. I might digress to say I will reread the words——

Mr. THOMAS. There is that "gray area" where the fellow gives you the unsolicited benefit of his good judgment and it turns out to be very bad judgment.

Mr. MANUEL COHEN. It is very gratifying to hear you say that, Mr. Chairman.

Mr. THOMAS. I realize you cannot put a diaper on John Public, but it is not like going down and buying a pair of shoes or a can of soup. Excuse me, Mr. Commissioner, go ahead.

Mr. MANUEL COHEN. The Commission has been trying to develop in its opinions the idea you describe of the burden the salesman and the brokerage firm have of fair dealing—they cannot make prognostications without a reasonable basis. We are also approaching the problem by rule. This is a slow process because we have to get the courts to agree that the standards we are trying to raise come within our authority generally in the antifraud area. I think you will find that in one of our next opinions.

Mr. MILTON COHEN. The more subtle problem of the boilerroom operation comes about in the branch offices, which have been phenomenal in the last few years.

Mr. THOMAS. They do not go in the expansion business for their health but for profit. It begs the question to say, "This is one of our new offices and we have not been able to educate our salesmen yet."

Mr. MILTON COHEN. That is right. There is quite a slippage between what goes on by way of research in the main office and what happens at the salesman level in the country.

Mr. JONAS. Is there much of that going on now?

Mr. CARY. We have spoken to this in connection with the authorization for the special study which we obtained from Congress. We found a very substantial amount of unsupervised growth of the branch offices, of lack of supervision. We had a case where they had a fellow from a health gym who took over and became the manager of a branch office of a brokerage firm. When you reach that stage where the frenzy of purchasing is quite clear and where they have not tightened the controls adequately, you have problems. This is not true of all firms, of course.

COMPENSATION OF SALESMEN

Mr. THOMAS. What is the the honored practice of the trade with reference to payment of their employees? Is it on a straight salary basis regardless of how many sales they make or are they paid purely on a commission basis and do they earn their living by the old act of selling? That makes a vast difference.

Mr. CARY. Yes. They are paid on the commission basis primarily.

Mr. LOOMIS. Some firms put their salesmen on a salary basis. But primarily they are paid on a commission basis.

Mr. MANUEL COHEN. In recent years some of the firms who placed their salesmen on a salary basis have been faced with losing them because they can get higher compensation elsewhere through commissions. They have tried to overcome this by providing fringe benefits.

Mr. MILTON COHEN. Another point is that the commission rates may be different for different kinds of securities. A salesman may be paid more for selling one kind of security rather than another. That goes to the matter of motivation for selling.

Mr. THOMAS. One further question. What regulation does the Commission maintain over a brokerage house that has an interest in the stock that it is selling?

Mr. CARY. That is one of the areas on which we are focusing in this special study because it does present problems when a firm begins to sell the securities in which they have a substantial inventory. For example, if a firm sends out a so-called market letter and recommends a particular security, should we not move toward a program of requiring a statement by the firm that it has an inventory in the security recommended?

UNDERWRITING AND MARKET STABILIZATION

Mr. THOMAS. Does this situation happen often, or happen at all: Here is an existing corporation that wants to do a little refinancing with nothing but the best motives in mind. It goes to a brokerage house and the brokerage house says, "We will finance this and we will take so many shares of stock for our fee or we will buy so many shares and we will guarantee to you if your stock goes below a certain figure we buy it in," thereby preventing the stock from going to a lower level than the agreed figure. Does that happen?

Mr. WORTHY. Only in the offering period, the stabilizing period.

Mr. CARY. Otherwise it would be manipulation.

Mr. THOMAS. What is manipulation? In this case, if the market would go below a certain figure they would buy it to prevent it from going lower.

Mr. CARY. We had a case the other day of a man who had underwritten an issue; he then found that the stock was going down rapidly and he began to buy it up. That was not pursuant to an agreement. He just chose to do it. The question came to us as to whether his capital was sufficient. In cases of that kind where they have been making those purchases voluntarily to hold the market up, I do not suppose he would be subject to a sanction on the ground of manipulation.

Mr. LOOMIS. Not if he buys voluntarily.

Mr. THOMAS. Suppose by contract he agrees to buy?

Mr. LOOMIS. I think it is very unusual to have a broker make a contract with an issuer that he will hold the price of stock up.

Mr. THOMAS. Do you have any regulation that prevents it?

Mr. LOOMIS. I would think by and large such a transaction, at least unless it was disclosed to everybody, which they never do——

Mr. THOMAS. In the registration you have it on the face?

Mr. LOOMIS. On a new offering the offerer will say he will stabilize the price. He usually does not contract to hold the price.

Mr. THOMAS. He will say for X number of shares, we will buy this many to stabilize the stock.

Mr. LOOMIS. That is not usually the way he does it, I do not think. He usually would not have an agreement with the company that he will buy the X number of shares to stabilize the stock. He stabilizes for his own benefit. Naturally if the market price goes below what he has to pay for them, he is in trouble, so for that purpose he stabilizes it.

Mr. THOMAS. He files with you a registration statement and what is your jurisdiction over that?

Mr. LOOMIS. The registration statement requires disclosure of what they propose to do.

Mr. THOMAS. All right. Suppose the registration statement shows he is going to sell this stock for $10 a share and he lists it where the world can see it. Say they have issued 10,000 shares and then buy 5,000 of them when the price reaches $7. Your jurisdiction does not permit you to say whether that stock is worth $10 a share, does it?

Mr. LOOMIS. No, sir.

Mr. THOMAS. It could be worth $1 a share, just so he makes a complete disclosure to you, and yet he has the brokerage house saying, "We will stabilize the market at $7."

Mr. WORTHY. We have not had that case yet.

Mr. THOMAS. I thought I read of one a year or so ago.

Mr. FLEISCHER. We had a case where a brokerage firm sold a security and said that within 6 months they would maintain it at a certain price and within 12 months they would maintain it at a higher price. The Commisson held that was a fraudulent practice.

Mr. THOMAS. It is not fraudulent if he tells everybody what he is going to do.

Mr. WORTHY. I doubt he said it in the registration statement.

Mr. THOMAS. He certainly is manipulating the market; it is giving him an unfair advantage; and certainly if there is any legitimate reason in the world for the Securities and Exchange Commission to step in and say this is unhealthy, that is a foremost example.

Mr. LOOMIS. We have not seen quite this case you describe. We do have rules that regulate stabilizing and, in essence, say you cannot stabilize above what the general public is paying. I would say in the case you describe it would be illegal.

Mr. THOMAS. What about your 6-month period you detailed where you permit the broker to stabilize the price?

Mr. LOOMIS. That is only during the short period where he is offering the issue.

Mr. THOMAS. Why should it not be 5 years?

Mr. LOOMIS. The basic argument is unless you allow this type of stabilizing the industry would grind to a halt. That may be an exaggeration but that argument was made in 1934 and recognized in the statute when it was passed and has been recognized ever since.

Mr. CARY. We have had a continuing debate over the so-called stabilizing rule.

Mr. THOMAS. Have you completed your statement, Mr. Chairman?

Mr. CARY. I have about completed it.

REGISTRATION STATEMENT ACTIVITY

Having highlighted the necessity for the increase in positions in 1964, I should like to present some current information on our registration statement activities, for which no additional positions are requested in 1964.

We believe that approximately 1,550 statements will be filed this fiscal year. This estimate represents the best judgment of the Commission at this time because of the unsettled state of the securities markets since the sharp downturn of last May.

On various economic assumptions, as many as 2,000 registration statements may be filed or conceivably as low as 1,300.

Mr. THOMAS. Your justifications make that very clear.

Mr. CARY. We had only 523 as of December 31, but there is talk that, at some point along the way, they will start flooding in. So we cannot make an accurate forecast. Nevertheless, we are making a forecast of 1,550 statements as our best judgment. At any time we may be confronted with a dramatic and sudden increase in filings. Therefore, to respond effectively to such an upsurge, the Commission cannot reduce its present complement in the Division of Corporation Finance. The personnel there are fully occupied this fiscal year in cuting down our existing backlog and pursuing stop-order and other administrative proceedings which are long overdue. If we did otherwise, the Commission might be faced with the same heavy and unrealistic backlog in 1964 as has existed in the last few years.

I think you might be interested in a reference to what we are doing when we do not have as many registration statements as we had been having until last May. The Division of Corporation Finance is just getting caught up and it is going over the 10–K annual reports and the other periodic reports; we have made an enormous inroad in those. At the same time, they are very active in the field of stop-order proceeding. About 8 months ago when I was before this committee, I said that stop-order proceedings might be a way to prevent some of these irresponsible filings from coming in. But, frankly, at that time when our filings of registration statements were at an all-time high, we did not have the manpower to do that work. We were just trying to get the statements out. Now for the first time we are going back over some of these registration statements and in certain cases we have had administrative proceedings.

Mr. THOMAS. That is a very, very fine statement and it is just what we expected from you.

Let us go to lunch now and get back here at 1:15.

AFTERNOON SESSION

Mr. THOMAS. Gentlemen, if there are no further general questions let us go through this budget. We have all looked it over pretty carefully, and certainly the chairman has made a very illuminating and helpful statement.

Insert the administrative statement in the record. There were many questions asked concerning it, so we shall insert pages 1, 2, and 3 in the record.

(The pages referred to follow:)

JUSTIFICATION FOR THE 1964 BUDGET ESTIMATE

Statutory authority

The Securities and Exchange Commission is an independent, quasi-judicial agency. It administers: (1) Securities Act of 1933; (2) Securities Exchange Act of 1934; (3) Public Utility Holding Company Act of 1935; (4) Trust Indenture Act of 1939; (5) Investment Company Act of 1940; and (6) the Investment Advisers Act of 1940. By terms of chapter X of the National Bankruptcy Act, as amended, the Commission also serves as adviser to Federal courts in corporate reorganization proceedings.

Purpose

The general objective of the statutes administered by the Commission is to protect the interests of the public and investors by preventing fraud, deceit, and manipulation in the sale and trading of securities, by enforcing statutes requiring high standards of conduct in financial reporting and other activities of issuers of securities and brokers and dealers, by regulating public utility holding company systems and investment companies, and by rendering assistance to courts in corporate reorganizations.

Duties

The primary duties of the Commission under the above statutes are:

1. *Securities Act of 1933.*—Administration of the law which, with respect to securities sold in interstate commerce or by use of the mails, has two basic objectives: (*a*) to provide investors with financial and other information concerning new issues of securities or outstanding issues owned by controlling persons offered for public sale; and (*b*) to prohibit misrepresentation, deceit, and other fraudulent acts and practices in the sale of securities generally.

2. *Securities Exchange Act of 1934.*—This act requires the filing of registration applications and annual and other reports with national securities exchanges and the Commission by companies whose securities are listed on the exchanges. These filings must contain financial and other data prescribed by the Commission for the information of the investing public.

The act also requires registration with the Commission of national securities exchanges, brokers, and dealers engaged in an over-the-counter securities business, and national associations of such dealers. Their activities and practices are subject to regulation and disciplinary action by the Commission to prevent fraud in the purchase or sale of securities, to prevent manipulative practices in the over-the-counter and exchange markets, and to insure maintenance of just and equitable principles of trade for the protection of investors and the public.

The act also subjects to Commission regulation short sales, stabilizing, floor trading, the activities of specialists and odd-lot dealers, and such matters as excessive trading by exchange members. It further provides for control of the use of credit to finance the purchase of securities listed and registered on exchanges through establishment of minimum margin requirements by the Board of Governors of the Federal Reserve System.

Public Law 87–196 dated September 5, 1961, amended section 19 of the 1934 act so as to authorize and direct the Securities and Exchange Commission to conduct a study and investigation of the adequacy, for the protection of the investors, of the rules of national securities exchanges and national securities associations. The law requires also that the Commission report to the Congress on or before April 3, 1963, the results of its study and investigation, together with recommendations, including such recommendations for legislation as it deems advisable.

3. *Public Utility Holding Company Act of 1935.*—This act provides three areas for regulation of holding companies controlling electric and gas utilities: (1) physical integration of public utility and related properties of holding company systems, and simplification of financial and corporate structures of those systems; (2) regulation of financing operations, acquisitions, and dispositions of securities and properties, accounting practices and servicing arrangements of holding company systems; and (3) exemptions of certain companies from provisions of the act and regulation of the rights of persons affiliated with a public utility to acquire securities of other public utilities.

4. *Trust Indenture Act of 1939.*—The rights and interest of purchasers of debt securities issued under mortgage indentures and sold publicly are safeguarded through provisions of this act requiring elimination of exculpatory clauses from and inclusion of protective provisions in indentures. The act also requires that the indenture trustee, who as a representative of the debtholders has the duty to see that the covenants in the indenture are adhered to, shall be "independent" and free of any interests which might conflict with the proper exercise of his duties.

5. *Investment Company Act of 1940.*—This act provides for the registration with the Commission of investment companies, and subjects their activities to regulation in accordance with prescribed standards in the interest of protecting investors.

6. *Investment Advisers Act of 1940.*—Persons who, for compensation, engage in the business of advising others with respect to their security transactions must register with the Commission.

In addition to other provisions, amendments to this act by the 86th Congress expand the authority of the Commission as follows: (1) empowers the Commission to require investment advisers to keep books and records in accordance with rules to be prescribed by the Commission; (2) provides for regular and periodic inspections of registered investment advisers; (3) expands the power for denial of revocation of registration of investment advisers; and (4) empowers the Commission to issue rules and regulations, which would prohibit fraudulent, deceptive, and manipulative practices by investment advisers.

7. *National Bankruptcy Act—Chapter X.*—To aid the Federal courts in the administration of the affairs of debtor corporations being reorganized under chapter X, the Commission participates actively as a party to the proceedings in those cases in which a substantial public investor interest is involved, and files advisory reports on reorganization plans in appropriate cases. The Commission also may appear in chapter XI cases to challenge whether the relief sought may properly be granted under the provisions of that chapter.

The Commission is assisted by a staff of professional employees, including lawyers, accountants, engineers, security analysts, and examiners; and by administrative and clerical employees. The staff is organized into separate divisions and offices, including nine regional offices, each under the charge of a division director or office head, and each of which is responsible for the performance of certain functions in the administration of the laws assigned to the Commission.

SUMMARY FINANCIAL DATA

Mr. THOMAS. Let us insert the table numbered 4 in the record.

(The table referred to follows:)

Securities and Exchange Commission

Actual costs for 1962, program for 1963, changes for 1964, and estimate for 1964

[1] Based on new rates of pay effective Oct. 14, 1962.

[2] Represents the difference between the 65 positions presently allocated to the special study and 42 positions to be transferred on or about Apr. 3, 1963 to the operating division and staff offices from the study. See p. 78 for distribution of the 42 positions.

Mr. THOMAS. Let us now turn to the back of the book.

Your table of organization shows positions, regional offices, and so forth. It is well worth looking over.

(Discussion held off the record.)

HEARING EXAMINERS

Mr. THOMAS. I note you have nine hearing examiners and four other people. In some of the agencies we run into 63 and 65 and they are divided about 44 examiners and the others clerical people. You have nine here.

Is there a heavy caseload on your hearing examiners now?

Mr. CARY. Very heavy, Mr. Chairman. We are hoping to have one additional hearing examiner because we just have to reduce our backlog.

DECISIONS MADE BY THE COMMISSION

Mr. THOMAS. When we get to your workload by divisions that will enlighten us. Mr. Ostertag went into this in a general way this morning.

What part of the overall decisions are made by your staff and what part made by the Commission itself after a matter is referred to them for final decision? Can you give us a general picture of this?

Mr. CARY. I would say that any decision which seriously affects——

Mr. THOMAS. That was your answer this morning. I am asking for a figure. Is it 50 percent?

Mr. CARY. Coming before the Commission itself and for final decision we get the bulk——

Mr. THOMAS. Is there some rule and percentage you can give us? You discussed this with Mr. Ostertag this morning regarding the types of cases. You made that situation very clear.

Mr. Boland, you will recall they stated they meet every day, not every 2 weeks.

Mr. CARY. Mr. Cohen, can you give us an idea?

Mr. MANUEL COHEN. So far as decisions are concerned which are written down, the Commission does that. None of those decisions are delegated to the staff.

So far as decisions with respect to the initiation of injunctive proceedings, investigations, administrative proceedings, the Commission makes the final decision in all of those areas.

I want to make it perfectly clear that, as you know, Mr. Chairman, all these matters are brought to the Commission by the staff.

The Commission also acts as an appellate tribunal in certain types of proceedings coming up from the National Association of Securities Dealers. There again the Commission makes the final decision.

However, there is a vast amount of administrative work, such as processing registration statements in the normal course——

Mr. THOMAS. How vast?

Mr. MANUEL COHEN. So far as the whole volume of the work of the Commission is concerned, the amount which is actually determined by the Commission as against the staff, I would say the Commission's effort is obviously much smaller——

Mr. THOMAS. 20 or 25 percent, 15 percent?

Mr. MANUEL COHEN. Fifteen, perhaps. That is just a rough guess, and I don't know whether it is very meaningful to you.

Mr. THOMAS. That helps us.
Mr. CARY. It is a very difficult answer to give.

OFFICE OF OPINION WRITING

Mr. OSTERTAG. Right at that point, Mr. Chairman, you have placed under your organizational setup the Office of Opinion Writing the work of your hearing examiners?
Mr. CARY. Yes, sir.
Mr. OSTERTAG. I take it that the Office of Opinion Writing renders opinions. Does that go directly to the Commission from the Office of Opinion Writing? Is that part of the basis leading up to the Commission's final actions?
Mr. CARY. That is correct in this area, sir—primarily in two areas. First, we have administrative hearings in which, for example, the question comes up regarding the revocation of a broker-dealer's license. In that kind of a case, when we have an actual hearing, a quasi-judicial hearing, the Opinion Writing Office sits with us and prepares a base for a decision, which we in many cases write ourselves finally, but in all cases which we review.
The amount of opinion work we have done this year has been larger than ever before, and there are some very large opinions which might take a couple of those men, at least one man, 3 or 4 months to do.
In the Prudential case it took considerable time. There it was substantially changed by us.
Mr. THOMAS. We realize it is tedious and important work. You are certainly bound by your own opinions and you have to be right.
Mr. OSTERTAG. That is legal.
Mr. CARY. Purely legal.
Mr. OSTERTAG. What is difficult for me to understand is this: You have your Office of the General Counsel, which is legal work and responsibility.
Mr. CARY. That is correct.

RELATION TO THE GENERAL COUNSEL

Mr. OSTERTAG. What is the difference between the General Counsel's Office and that of opinion writing? Is there a need for both?
Mr. CARY. The General Counsel is trying a case right now—a major case in which we took an action with respect to an investment company.
When the Commission is in the courts, in other words as a party in the courts, the General Counsel participates. That is the distinction.
Mr. OSTERTAG. Does the Office of Opinion Writing take over after the General Counsel is through?
Mr. CARY. In general, no. Let me explain it this way: Opinion Writing is working with us. It is an agent of ours in making decisions, administrative decisions which are argued on one side by the staff of the Commission and by private litigants on the other.
Secondly, if a case comes up from the National Association of Securities Dealers on appeal, that is also handled by the Office of Opinion Writing.
In general, however, the General Counsel's field is in litigation where the Commission, as such, is involved.

For example, if a case were appealed which we had decided, in a case of that kind it might well be that the General Counsel then would be representing us in the courts.

Mr. MANUEL COHEN. Under the Administrative Procedure Act, a separation of functions is required with regard to proceedings before the Commission. Frequently, the General Counsel also acts as adviser to the staff in the conduct of administrative proceedings, and by law, even if it were not otherwise a necessary thing to do, the General Counsel cannot advise with the Commission regarding these ultimate decisions. There is a complete separation of function.

The opinion-writing office is not involved in any way in the conduct of proceedings or in administrative work. Its personnel are really assistants to the Commission.

Mr. OSTERTAG. That is what I was trying to determine.

PERSONNEL IN THE OFFICE OF OPINION WRITING

Mr. JONAS. How can you get a competent opinion writer for $8,000 a year?

Mr. CARY. That is a good question, and we have had a great turnover. It is a problem.

Mr. JONAS. You take young lawyers out of law school?

Mr. CARY. Recently we got two young men who had been in private practice, and who decided they liked this kind of work. They like writing. They like that kind of analysis. We have been very fortunate.

Mr. THOMAS. The Civil Service Commission is not that tight on you, regarding grades, are they?

Mr. JONAS. They have 12 and they pay the 12 only $100,000.

Mr. CARY. That includes secretaries as well.

M. OSTERTAG. You have one Director and two Associate Directors?

Mr. CARY. One associate and one assistant.

Mr. OSTERTAG. Grades 16 and 15.

Mr. CARY. Yes, sir. The intermediate persons working for the Director, Associate Director, and Assistant Director might be up to 12. Some may be 11's.

Mr. DONATY. $100,000 represents two grade 13's, two grade 12's, three grade 11's, two grade 9's, and three secretarial below grade 8. From 9 to 13 are all attorneys.

Mr. JONAS. How many is that?

Mr. DONATY. Nine.

Mr. CARY. Plus the Director?

Mr. DONATY. Nine plus the three secretarial gives you the 12.

Mr. JONAS. You have only about nine people writing opinions?

Mr. DONATY. Nine professional and three secretarial as well as the Director, Associate and Assistant Directors.

Mr. WHITNEY. In addition, each Commissioner has a legal assistant who helps him personally in his review of the opinions which come out of the opinion-writing office. They are all 13's, I believe.

REGIONAL OFFICES

Mr. THOMAS. Look at the regional offices. You have nine. New York is the big one.

How about Chicago?

Mr. CARY. Chicago is the next largest one.

(Discussion held off the record.)

Mr. THOMAS. San Francisco has 61.

What is the jurisdiction of the Washington office?

Mr. CARY. Washington covers the District which has been very active, plus Maryland, Delaware, Virginia, and Pennsylvania.

Mr. THOMAS. What about West Virginia?

Mr. CARY. And West Virginia.

SUMMARY OF INCREASES REQUESTED FOR 1964

Mr. THOMAS. Let us put 4–A in the record.

(The page referred to follows:)

Summary of additional funds requested for fiscal 1964

	Positions	Funds	
FISCAL 1963			
Appropriation for fiscal 1963	1,481	$12,800,000	
Proposed supplemental—pay increase and related costs		486,000	
Total available fiscal 1963	1,481		$13,286,000
DECREASE, FISCAL 1964			
Cost of 65 positions and related expenses because of the termination (April 3, 1963) of the Special Study of Securities Markets—9 months cost to the special study in 1963	(65)	(537,500)	
Less: Cost of 42 positions and related expenses to be transferred to the operating division and staff offices from the special study, 9 months cost to Divisions and Offices in 1964	42	389,500	
Net decrease, fiscal 1964	(23)		(148,000)
INCREASES, FISCAL 1964			
Program increases, additional positions and related expenses	77	610,300	
Salary step increases		151,700	
Cost of pay increases in 1964 over 1963		500,000	
Net increase for fiscal 1964	54		1,262,000
Total requested appropriation for fiscal 1964	1,535		14,400,000

Mr. THOMAS. You show a net increase of 54 positions. You are seeking $14,400,000, an increase of about 77 positions in fact.

You have done an outstanding job. You have an increase of about 65 people to start with?

Mr. CARY. That is right.

Mr. THOMAS. We are anxious to see that final report, Judge.

Mr. MILTON COHEN. So am I, sir.

SUPPLEMENTAL APPROPRIATION—PAY INCREASE

Mr. THOMAS. What deficiencies do you have pending? Have any cleared the Bureau of the Budget yet?

Mr. DONATY. We have a proposed supplemental of $486,000. I understand that comes up in a combined form.

Mr. THOMAS. Is that the only one you have?

Mr. DONATY. We have no other.

Mr. THOMAS. What did the Pay Act cost you last year?

Mr. DONATY. For this year $486,000, of which $31,000 was for personnel benefits, retirement, and so forth, and $455,000 for personal services.

Mr. THOMAS. The pay increase shows $500,000.

Mr. DONATY. There will be another pay increase effective January 5 of next year.

Mr. THOMAS. That will cost you $500,000, in addition to the $486,000 for this year?

Mr. DONATY. That is right. There are two separate increases.

ABSORPTION OF ADDITIONAL COSTS IN 1963

Mr. OSTERTAG. Did you absorb any of the additional costs or pay increase during fiscal 1963?

Mr. DONATY. We did absorb $200,000 for the continuation of the special study and the $100,000 for the additional 42 jobs this year.

Mr. OSTERTAG. I am referring to the pay increase.

Mr. DONATY. We could not absorb any funds on the pay increase. I take that back—there was $8,500 for postal increase and wage board.

Mr. THOMAS. Judge Cohen got money by virtue of the fact the supplemental didn't go through, so he will absorb about $200,000.

Mr. DONATY. We could not absorb any of the pay increase because we had to provide funds for the special study for an additional 3 months.

Mr. CARY. You may recall the $500,000 went through both the House and Senate. It was in the last supplemental.

EXECUTIVE OFFICES

Mr. THOMAS. Let us insert page 5 in the record.

(The page referred to follows:)

EXECUTIVE OFFICES

FUNCTIONAL STATEMENT

The members of the Commission are responsible for the administration and enforcement of the Federal securities laws, the primary provisions of which have been outlined in pages 1 to 3 of the introduction.

Justification

Fiscal year	Cost	Average employment
1963	$311,000	29.0
Increase	80,800	6.5
1964	391,800	35.5

For 1964, no additional positions are requested for the executive offices. The amount requested for these offices in fiscal year 1964 will provide for the five Commissioners, legal assistants, secretaries, and a program management staff.

The net increase of $80,800 in 1964 over the 1963 represents the following items:

(*a*) The sum of $70,500 for eight positions to be transferred to these offices upon termination of the special study of securities markets on April 3, 1963. These 8 positions as well as the other 34 positions distributed to the Divisions of Corporate Regulation and Trading and Exchanges and the Office of the General Counsel are required for effective execution of the recommendations of the special study. The amount of $70,500 is offset by the decrease of $444,000 as a result of the termination of that study.

(*b*) The sum of $3,500 for the cost of salary step increases.

(*c*) The sum of $6,800 for the cost of pay increases effective January 5, 1964.

OFFICE OF HEARING EXAMINERS

Mr. THOMAS. Insert pages 10 and 11 in the record.

(The pages referred to follow:)

OFFICE OF HEARING EXAMINERS

FUNCTIONAL STATEMENT

The hearing examiners preside in a quasi-judicial capacity over public and private hearings ordered by the Commission under the various statutes it administers and held throughout the United States, as may be required. They administer oaths; subpena witnesses; take testimony; rule on the admissibility of evidence, offers of proof and other disputed matters; rule upon motions and procedural requests; and take all necessary precautions to protect the rights of all parties.

At the conclusion of the hearings, the hearing examiners prepare recommended decisions to the Commission, as required, for action based upon the evidence in the record, the arguments and contentions made, and the application of law and regulations to the facts.

Although some cases are settled prior to the dates established for the hearings, the preliminary work must be performed on the assumption that all scheduled hearings will in fact, be held.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$138,400	11.9
Increase	19,800	1.0
1964	158,200	12.9

One additional hearing examiner will be required in 1964 over 1963 to provide for the expeditious disposal of the increased number of administrative hearings resulting from the accelerated enforcement program of the Commission and to reduce the number of hearings pending at the close of fiscal 1963.

	Actual, 1962	Estimate, 1963	Estimate, 1964
Administrative proceedings:			
Pending, beginning of year	69	83	80
Authorized during year	116	130	140
Subtotal	185	213	220
Disposed of by Office of Hearing Examiners	102	133	150
Pending, end of year	83	80	70

The increase of $19,800 in 1964 represents $14,500 for the additional hearing examiner, $1,800 for salary step increases, and $3,500 for pay increases effective January 5, 1964.

OFFICE OF THE SECRETARY

Mr. THOMAS. The Secretary is busy all the time?

Mr. CARY. Yes, sir. I think he has had the busiest year last year that he has ever had.

Mr. THOMAS. Insert pages 7 and 8 in the record at this point.

(The pages referred to follow:)

OFFICE OF THE SECRETARY

FUNCTIONAL STATEMENT

The Secretary attends meetings of the Commission and is responsible for preparation and maintenance of the official minute record of its actions. He is custodian of the Commission's seal, with power to certify and authenticate documents reflecting official action of the Commission, and performs other and related duties. In addition, he is the chief information officer of the Commission to whom general inquiries of the public and press representatives are directed. An important phase of the latter function is the preparation, for the press, of a daily résumé or digest pertaining to (1) all Commission decisions and orders and (2) all financing and related proposals filed with the Commission.

The Secretary is responsible also for the scheduling of hearings in administrative proceedings, the assignment of hearing examiners, and other related actions under the rules of practice.

All official decisions, orders and rules adopted by, as well as all administrative actions of, the Commission, are recorded by and issued through this office. All public announcements of Commission action also are prepared by and/or released through this office.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$64,700	9.0
Increase	7,200	1.0
1964	71,900	10.0

For fiscal 1964, one additional clerical position ($4,100) is necessary to meet the increasing workload demands upon this Office due to the Commission's accelerated enforcement, regulatory and inspection programs and the additional duties of the Office involving hearing examiner assignments and related work.

The additional amount of $7,200 in 1964 includes also $1,900 for salary step increases and $1,200 for pay increases effective January 5, 1964.

ADDITIONAL POSITION—OFFICE OF THE SECRETARY

Mr. DONATY. On hearing examiners, we are asking for an additional hearing examiner.

Mr. THOMAS. That is right. You go up from 8 to 9.

Mr. CARY. The same for the Office of the Secretary.

Mr. THOMAS. You don't show an increase for the Secretary.

Mr. DONATY. Under the Office of the Secretary, page 9, there is a small column, 1964 increase, and at the bottom it shows one.

Mr. THOMAS. I don't see it on page 12.

Mr. DONATY. On page 12 it shows 12, and then a small column shows a one, up to 13.

OFFICE OF OPINION WRITING

Mr. THOMAS. Insert the Opinion Writing Section in the record, pages 13 and 14.

(The pages referred to follow:)

OFFICE OF OPINION WRITING

FUNCTIONAL STATEMENT

The principal function of this Office is to assist the Commission in the preparation of findings, opinions and orders in cases, which come before the Commission for decision in the exercise of its quasi-judicial functions. Further, this Office is responsible for the preparation of the annual report of the Commission to the Congress, and exercises joint responsibility with the Office of General Counsel in dealing with general problems arising under the Administrative Procedure Act, including the adoption or revision of the rules of practice.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$144,000	14.5
Increase	6,400	
1964	150,400	14.5

For fiscal 1964, no additional positions are requested for this Office. The increase of $6,400 in 1964 includes $3,000 for salary step increases as well as $3,400 for pay increases effective January 5, 1964.

During fiscal 1962, this Office prepared drafts for the Commission's use in disposing of 164 matters of an adjudicatory nature. It is expected that the Office will dispose of 180 matters in 1963 and approximately the same number in 1964.

Personal services data sheet, Office of Opinion Writing

Title and grade	Program, 1963		1964 increase	Estimate, 1964	
	Number	Annual salary		Number	Annual salary
Director, GS-16	1.0	$18,013		1.0	$18,013
Associate Director, GS-15	1.0	16,016		1.0	16,494
Assistant Director, GS-15	1.0	16,016		1.0	16,494
Attorney:

Total permanent	15.0	148,348		15.0	151,530
Less lapse	.5	4,348		.5	1,130
Average employment and cost	14.5	144,000		14.5	150,400

SUPERGRADES

Mr. THOMAS. You folks have not done badly with Judge Irons in the Civil Service Commission.

Mr. CARY. On supergrades? We have applied for an additional number.

Mr. THOMAS. How many do you have?

Mr. DONATY. We have 3 grade 18, 5 grade 17, and 11 grade 16, or a total of 19 supergrades.

Mr. OSTERTAG. Do you have them now?

Mr. DONATY. Yes, sir.

Mr. THOMAS. How many 14's and 15's?

Mr. DONATY. Grade 15, we have 56. Grade 14 we have 73.

Mr. THOMAS. How do you rate your regional offices?

Mr. CARY. Unfortunately at the present time most of them are GS–15. That is the major point——

Mr. THOMAS. I thought they were promoted to 16 last year?

Mr. CARY. I tried but did not succeed.

Mr. THOMAS. What did they say?

Mr. CARY. First they concluded that the job didn't warrant it. Then we have rewritten the job descriptions to conform to their actual duties, and they agree the job warrants a GS–16, but they have not yet given us that many slots.

We have pressed it, but——

Mr. THOMAS. None of the offices got 16?

Mr. CARY. New York is 17, Chicago is 16, but that is all.

Mr. THOMAS. You need seven more?

Mr. CARY. That is correct. We have made strong protests. In fact, I have been over to see John Macy on this very question.

Mr. THOMAS. What does he say?

Mr. CARY. I think he is favorable in spirit, but he has not yet made available the number of slots for that purpose. We are pressing at the present time, and we have not yet received their final OK of this new list of supergrades.

Mr. THOMAS. Where is the General Counsel?

Mr. DONATY. Grade 18.

Mr. CARY. That just went up.

Mr. THOMAS. How long has he been with you?

Mr. CARY. About 1 year. Right now he is in Minneapolis handling a case.

OFFICE OF THE GENERAL COUNSEL

Mr. THOMAS. Insert pages 15 through 18 in the record.

(The pages referred to follow:)

OFFICE OF THE GENERAL COUNSEL

FUNCTIONAL STATEMENT

The General Counsel is the Commission's chief legal officer and counsel on overall legal policy, litigation, legislation, rulemaking, and in the interpretation of the several statutes administered by the Commission. In addition, the General Counsel exercises joint responsibility with the Director, Office of Opinion Writing, in dealing with general problems arising under the Administrative Procedure Act as well as the adoption or revision of the Rules of Practice.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$245,000	29.0
Increase	30,900	2.5
1964	275,900	31.5

For fiscal 1964, one additional attorney will be required as a direct result of the continued expansion of the Commission's overall activities, as well as the increasing volume, complexity and duration of civil and appellate litigation in which the Commission is involved.

The net increase of $30,900 represents the following items:

(*a*) The sum of $14,500 for three positions to be transferred to this Office upon termination of the Special Study of Securities Markets on April 3, 1963. The amount of $14,500 is offset by the decrease of $444,000 as a result of the termination of that study.

(*b*) The amount of $7,500 for the additional attorney position in 1964.

(*c*) The sum of $3,000 for the cost of salary step increases as well as $5,900 for pay increases effective January 5, 1964.

Civil and appellate litigation

One of the most important phases of the work of the General Counsel's Office is the conduct of appellate litigation, which includes appeals from Commission decisions, appeals in injunction cases and appeals in chapter X proceedings. Assistance is rendered also to the Department of Justice in the preparation of appellate briefs in criminal cases arising from criminal references. The civil appellate proceedings are briefed and argued by the staff of this Office and usually involve complicated factual situations and difficult legal problems requiring the expenditure of very large amounts of time.

In addition to the preparation of briefs and the presentation of oral arguments in the Supreme Court and in the various U.S. Courts of Appeals, this Office prepares also briefs and occasionally participates in oral argument in private law suits as amicus curiae when the issues presented involve questions of such importance under the Federal securities statutes as to warrant participation by the Commission.

This Office is responsible for defending the Commission in actions instituted against it, including suits to enjoin Commission hearings, administrative proceedings, or investigations.

This Office also supervises all civil litigation in the U.S. District Courts in the enforcement of the securities laws. As a general rule, trials at the U.S. District Court level are conducted by attorneys in the Commission's regional offices working under the supervisory direction of the Office of the General Counsel. However, in important or novel cases, particularly in the proxy and investment company field, personnel of the Office of the General Counsel are assigned as trial counsel in District Court matters. The frequency of such direct involvement has been steadily increasing.

During fiscal 1962, the Commission filed 89 suits for injunctions in the U.S. District Courts. In addition, there were pending 14 appeals involving petitions for review of Commission orders. There were also pending 17 amicus curiae proceedings in which the Commission participated, 11 appeals in reorganization matters, and 15 appeals in injunction cases.

Criminal reference reports

Although the function of reviewing and supervising criminal reference reports to the Department of Justice is a responsibility of the Division of Trading and Exchanges as part of its enforcement activities, the General Counsel still retains ultimate responsibility for all criminal matters referred to the Department of Justice.

During fiscal 1962, the General Counsel referred to the Department of Justice 64 criminal reference reports. The scope and complexity of these criminal matters is significantly increasing.

94926—63—pt. 1——36

Legislative matters

The General Counsel is the Commission's primary legal consultant and counsel on legislation and is responsible for the preparation of material submitted by the Commission to the committees of the Congress, and advises and assists the Commission in its hearings and appearances before the Congress. During fiscal 1962, comments were requested by the congressional committees or which were referred by the Bureau of the Budget on 44 legislative proposals.

Following submission of the report(s) to the Congress and termination of the special study of securities markets on April 3, 1963, it is anticipated that the personnel of this Office will be engaged in resolving numerous problems relating to proposed legislation and rulemaking.

Other functions

The Office of the General Counsel is constantly required to render opinions, either written or oral depending upon the magnitude of the problem, in numerous legal problems that are presented by the operating divisions, by the regional offices, by the Commission itself, and by attorneys and other members of the public. It is responsible also for the conduct of administrative proceedings relating to possible disqualification of attorneys, accountants, and other professional persons from practice before the Commission. Such matters may involve extensive investigation and travel and result in vigorously contested proceedings.

Mr. THOMAS. What is the number of lawyers in his shop?

Mr. DONATY. About 20, sir.

Mr. THOMAS. Right now he has about 32?

Mr. DONATY. He has 32.

TOTAL VACANT POSITIONS

Mr. THOMAS. How many unfilled jobs do you have throughout the agency now?

Mr. DONATY. As of December 31, we had 80 vacancies.

Mr. THOMAS. Out of the 1,481 positions you had 80 vacancies? About 6 percent.

Mr. DONATY. Of those 80 vacancies, 27 have been committed to come on board in January and early February. In fact, a week ago last Monday, 14 of the 27 came in between the period January 1 and January 15. In essence, I would say we would have 80 less 27, or about 53.

Mr. THOMAS. Why did you wait this long if you needed these new employees so badly?

Mr. CARY. One, we are trying to get the best people we can.

Mr. THOMAS. That is true with all of us.

Mr. OSTERTAG. Do you have a figure as to man-years in vacancies?

Mr. DONATY. All I can say——

Mr. OSTERTAG. Positions.

Mr. THOMAS. He gave a figure of 80.

Mr. OSTERTAG. Is that the average throughout the year? Actually having so many vacancies as of a given month is one thing, but what has been the average number of vacancies throughout the year?

Mr. DONATY. Of those 80 vacancies approximately 20 were vacant 2 months. In other words, there was a turnover through retirements, death, resignation, transfer, and so on.

I wish to point out that of the 80 vacancies on December 31, we had named actions for people to come in of 27, leaving 53 vacancies as of today.

As Chairman Cary indicated——

Mr. THOMAS. Give Mr. Ostertag a horseback opinion. Throughout the year what would be the man-hour vacancies? Is it 5 percent, 3 percent?

Mr. DONATY. Approximately 5 to 6 percent.

Mr. THOMAS. Out of 1,481 appropriated positions 5 percent would mean about 70 jobs.

Mr. CARY. Last year when we came before this very committee we had a problem of filling some vacancies that Congressman Thomas brought sharply to our attention. The facts were that it was hard to get investigators. That was at a time when the market was at a very favorable height and nobody wanted to leave a private firm.

I think the possibilities of getting more competent investigators from now on is increasing, just because they begin to realize there is a certain permanency of tenure in the Federal Government which they cannot get in a brokerage firm which expands and then contracts so violently.

DIVISION OF CORPORATION FINANCE

Mr. THOMAS. Insert the Division of Corporation Finance, pages 23, 24, 25, and 25A in the record.

(The pages referred to follow:)

DIVISION OF CORPORATION FINANCE

FUNCTIONAL STATEMENT

The Division of Corporation Finance assists the Commission in the discharge of those responsibilities relating to the (1) prevention of fraud in the public offering of new securities; (2) establishing and requiring adherence to standards of adequacy and fairness in economic and financial reporting by companies, underwriters, and others with respect to securities traded on national exchanges or offered for public sale; (3) establishing, in collaboration with the Office of the Chief Accountant and in cooperation with the accounting profession, sound standards of auditing and accounting procedures and practices; (4) establishing and requiring, with respect to securities traded on national securities exchanges and to certain other securities, adherence to standards of fair disclosure and fair dealing in the solicitation of proxies of security holders for the election of directors or the accomplishment of other corporate actions, such as mergers, consolidations, reorganizations, recapitalizations, acquisition or disposition of assets; and (5) the enforcement of statutory provisions requiring that indentures governing debt securities contain certain provisions for the protection of the public security holder, including high standards of conduct on the part of indenture trustees.

The Division also enforces the financial reporting, proxy solicitation, and disclosure provisions applicable to the various types of investment companies subject to the Investment Company Act of 1940 and reviews sales practices in the public distribution of securities and sales literature used for that purpose. In addition, the Division has responsibility for rendering interpretations to issuers, underwriters and their representatives, and to the public as to the meaning and application of the statutes it administers, and the rules and regulations thereunder.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$2,430,000	290
Increase	102,900	
1964	2,532,900	290

Summary of average employment increase, 1964 over 1963

Activity	1963	1964	Increase, 1964 over 1963
Registration statements and other filings	186.0	186.0	
Preliminary proxy statements	26.5	26.5	
Annual and periodic reports	28.0	28.0	
Stop order proceedings and other administrative actions	30.5	30.5	
Administration of regulations A and F	19.0	19.0	
Total	290.0	290.0	

For 1964, no additional positions are requested for the various activities of the Division. The additional amount of $102,900 for 1964 represents the cost of $47,300 for salary step increases as well as $55,600 for pay increases effective January 5, 1964.

The workload activity of the Division is subdivided into five major areas which is performed by the following branches of the Division of Corporation Finance Tabulations of workload relating to these activities are shown in subsequent pages. The Division has no control over the volume of filings, preliminary proxy statements, and reports submitted by corporations and individuals.

Activity	*Organization*
1. Registration statements and other filings	Branches of Corporate Analysis and Examination (15).
2. Preliminary proxy statements	
3. Annual and periodic reports	
4. Administrative proceedings and investigations	Branch of Administrative Proceedings and Investigation.
5. Administration of regulations A and F	Branch of Small Issues.

In view of existing market conditions, the workload data shown on the following pages represent the best forecasts of the Commission as to the number of registration statements to be filed in 1963 and 1964. Although we estimate approximately 1,550 and 2,150 registration statements will be filed in 1963 and 1964, it is conceivable that these estimates could be on the liberal side as compared with our too conservative attitude in the past 4 years—when we underestimated the number of registration statements to be filed from 20 to 40 percent below the number received each year. By the same token, our estimates of registration statements to be filed in 1963 and 1964 could be a continuance of our conservatism. Despite all our economic indexes, it is impossible for the Commission to make precise forecasts in the registration area.

Assuming our estimates of filings for 1963 and 1964 are liberal or are overestimated, we can process our filings at a faster rate and thus reduce the waiting period which has been a troublesome problem for several years. Further, manpower in the examining branches can be utilized in handling the growing number of pending stop-order proceedings and administrative actions anticipated. Because of our backlog of filings and reports we have never before been able to institute or prosecute many of the cases which warranted administrative action. Finally, personnel would also be utilized in reducing the number of unexamined annual and periodic reports which built up during the peak registration periods.

Assuming our forecasts are low, the Commission must be ready, must cut down its present backlog, and have sufficient personnel, to meet any unanticipated upsurge. Otherwise, we may be faced with the same heavy and unrealistic backlog as has existed in the past 4 years. As a responsible agency, the Commission must be in a position to meet another avalanche of filings with experienced personnel, thus avoiding serious delays which were a source of genuine concern to this agency and the financial community last spring and which can severely impair the flow of capital into the markets.

In brief, the manpower of the Division will be fully utilized within the five activities of the Division for fiscal 1963 and 1964.

Mr. THOMAS (reading).

The Division also enforces the financial reporting, proxy solicitation, and disclosure provisions applicable to various types of investment companies subject to the Investment Company Act of 1940.

We spent a lot of time on that this morning.

DIVISION OF TRADING AND EXCHANGES

Insert pages 40 and 41 in the record.
(The pages referred to follow:)

DIVISION OF TRADING AND EXCHANGES

FUNCTIONAL STATEMENT

The Division of Trading and Exchanges is responsible for (1) administering the provisions of the Securities Exchange Act of 1934 and the Investment Advisers Act of 1940 pertaining to the detection and prevention of illegal or fraudulent practices in the marketing and trading of securities both on the exchanges and in the over-the-counter markets; (2) the registration and regulation of national securities exchanges, national securities associations of brokers and dealers, brokers and dealers, and investment advisers; (3) the compilation and analysis of financial statistics; (4) the coordination and supervision of the investigative and other enforcement activities of the regional offices; and (5) the investigation and trial of certain administrative, civil, and criminal cases.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$1,246,000	167
Increase	234,400	18
1964	1,480,400	185

Summary of average employment increase, 1964 over 1963

Activity	1963	1964	Increase, 1964 over 1963
1. Investigations and enforcement	86.0	90.0	4.0
2. Registration of broker-dealers and investment advisers	23.0	26.0	3.0
3. Regulation of exchanges	16.1	23.5	7.4
4. Market surveillance and stabilization	10.5	10.5	
5. Compilation and publication of statistics	31.4	35.0	3.6
Total	167.0	185.0	18.0

For 1964, nine additional positions are requested for the increased workload of the Division. The additional positions are distributed as follows:

(*a*) The addition of three examiners in the Branch of Regulation are required to maintain on a current basis the processing of new applications and amendments for registration of broker-dealers and investment advisers.

(*b*) The addition of two stenographic positions are required so that adequate stenographic assistance is available to professional personnel in the areas of investigations and enforcement.

(*c*) Four additional statisticians are required in the Branch of Economic Research to provide needed current statistical data relating to the stock market and registered broker-dealers for the use of the Commission on a continuing basis.

The net increase of $234,400 represents the following items:

(*a*) The sum of $145,000 for 21 positions to be transferred to this Division upon termination of the special study of securities markets on April 3, 1963. The amount of $145,000 is offset by the decrease of $444,000 as a result of the termination of that study.

(*b*) The sum of $13,500 for the cost of salary step increases.

(*c*) The sum of $43,000 for the cost of nine additional positions in 1964 over 1963.

(*d*) The sum of $32,900 for pay increases effective January 5, 1964.

DISTRIBUTION OF PERSONNEL

Mr. THOMAS. Page 40 tells what the Division of Trading and Exchanges is responsible for.

Taking activity No. 4, what part of the 77 employees will be assigned to the regional offices?

Mr. DONATY. Fifty-four, sir.

Mr. THOMAS. What will you do with the other 23?

Mr. DONATY. They are in the various central offices.

Mr. THOMAS. They are already here and you will keep them?

Mr. DONATY. No, sir.

Mr. CARY. They may not be the same people because people like Mr. Cohen will not stay with us, and therefore in some cases they will be new, and some of them will be——

Mr. THOMAS. He has 65 and keeps 23 of them.

Mr. DONATY. Basically they are about the same types of jobs.

Mr. THOMAS. Mr. Cohen already has trained them. Is he going to leave you with 23 of them or do you have to hire 23 new employees, and train them?

Mr. DONATY. We are going out in the market and train 23 people.

Mr. THOMAS. I don't think that is accurate, is it?

Mr. DONATY. On the 23 jobs there are 8 positions in the Special Study, top-notch jobs, like Mr. Cohen's and the Chief Counsel, plus 15 other types of jobs. The positions will be abolished April 3.

For next year we are going to employ, or we are requesting funds for, 23 in other areas.

Mr. THOMAS. Are they already on the payroll?

Mr. MILTON COHEN. They are taking 42 from me.

Mr. THOMAS. As of April 3 you have that many?

Mr. MILTON COHEN. That is right.

Mr. THOMAS. And 23 will stay?

Mr. BOLAND. He has 65 now.

Mr. MILTON COHEN. That is right, and 42 will stay after April 3. The other 23 will be disappearing but they will be replaced by 23 new people.

Mr. THOMAS. You will leave 23 trained people, then?

Mr. MILTON COHEN. Forty-two.

Mr. CARY. No, Mr. Chairman, it is the other way around. We are trying to keep as many as we possibly can. I have made every effort to do that because they are people who have had a very unusual experience, understand the whole securities markets, and we will have problems in appearing before congressional committees and explaining the analysis we have made and what we are going to do about it.

Mr. THOMAS. Look at page 40 briefly.

The Division of Trading and Exchanges is responsible for administering the provisions of the Securities Exchange Act of 1934—

that is all shown in the page we have inserted in the record.

In the field you jump from 167 to 185, an increase of 18. These are all in the field?

Mr. DONATY. In the Division of Trading and Exchanges.

Mr. THOMAS. That is right.

Mr. DONATY. Average employment increases by 18. The additional positions requested are shown on page 41, sir.

Mr. THOMAS. You state here the increase is 18.

Mr. DONATY. That is average employment, sir.

Mr. THOMAS. You have investigation and enforcement, three regulation of exchange, seven compilation and publication. It looks like it is 18. Is that correct?

Mr. LOOMIS. Eighteen increase in average employment but an increase of only nine positions over the authorized for 1963, and that is because some positions will be transferred from the Special Study to the Division on April 3, which affects the average employment.

I didn't have them all year but I hope to have them on April 3.

DIVISION OF CORPORATE REGULATION

Mr. THOMAS. Look at the Division of Corporate Regulation.

Did we get Judge Conwill in the record this morning?

Mr. CARY. He spoke on variable annuities.

Mr. THOMAS. Let us put pages 57 and 58 in the record.

(The pages referred to follow:)

DIVISION OF CORPORATE REGULATION

FUNCTIONAL STATEMENT

The Division of Corporate Regulation assists the Commission in administering the regulatory provisions of the Investment Company Act of 1940 and the Public Utility Holding Company Act of 1935. It also performs the Commission's functions as adviser to the courts under chapters X and XI of the National Bankruptcy Act.

The Division consists of the Office of the Director, the Office of Chief Counsel, three Branches of Investment Company Regulation, one Branch of Investment Company Inspections and Investigations, the Office of Research and Service Company Regulation, the Branch of Reorganization (chs. X and XI), and the Branch of Public Utility Regulation.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$806,300	88.0
Increase	140,100	13.0
1964	946,400	101.0

Summary of average employment increase—1964 over 1963

Activity	Estimate 1963	Estimate 1964	Increase 1964 over 1963
1. Regulation of investment companies	46.5	55.0	8.5
2. Investment company inspections	5.3	7.0	1.7
3. Reorganization proceedings	11.4	14.2	2.8
4. Regulation of public utilities	19.8	19.8	
5. Regulation of service companies	5.0	5.0	
Total	88.0	101.0	13.0

For fiscal year 1964, six additional positions are requested for the following activities of the Division.

1. The addition of three financial analyst positions is required to meet the anticipated increased workload of applications, filings and reports as well as developing and analyzing data toward an extensive legislative and rulemaking program.

2. The addition of three positions (one attorney, on financial analyst, and one stenographer) is required to meet the anticipated increased workload in supervision of and participation in reorganizations under chapters X and XI of the Bankruptcy Act.

The net increase of $140,100 represents the following items:

(*a*) The sum of $66,000 for 10 positions to be transferred to this Division upon termination of the special study of securities markets on or about April 3, 1963. The amount of $66,000 is offset by the decrease of $444,000 as a result of the termination of that study.

(*b*) The sum of $5,800 for the cost of salary step increases.

(*c*) The sum of $48,000 for the cost of six additional positions in 1964 over 1963.

(*d*) The sum of $20,300 for pay increases effective January 5, 1964.

The workload activity of the Division is subdivided into five major activities: (1) Regulation of investment companies; (2) investment company inspections; (3) reorganization proceedings; (4) regulation of public utility holding companies and their subsidiaries; and (5) regulation of service companies.

REGULATION OF PUBLIC UTILITIES

Mr. THOMAS (reading):

The Division of Corporate Regulation assists the Commission in administering the regulatory provisions of the Investment Act of 1940 and the Public Utility Holding Company Act of 1935.

Do you still have that?

Mr. CARY. We have 16 people on that.

Mr. DONATY. In 1962 we had 18.

Mr. CARY. We are trying to cut that down.

Mr. THOMAS. In my book it looks like 21 or 22.

When is this going to be cut down?

Mr. CARY. We have had two major cases before us of very sizable proportion.

Mr. THOMAS. You don't need that many people there.

Mr. CARY. Registration work.

Mr. THOMAS. They can stand on one foot and do this work now.

I imagine these people are not engaged exclusively in just this activity. Don't you have them spread over other activities as well?

Mr. CONWILL. As a matter of fact, they are devoting exclusive time to this activity. It is not only the proceedings the Chairman referred to but as long as we have public utilities holdings there is work of a routine nature that has to be done.

For example, every time a public utility holding company proposes to do any financing it has to come to us, which means we have to analyze——

Mr. THOMAS. Do you take these 21 people and devote their time exclusively to this one subject?

Mr. CONWILL. Included in that 21 is the supervisor and assistant director, for example, who is in charge both of the Public Utility Holding Company Act work and chapter 10 organization work.

Mr. THOMAS. They must have a hard time keeping the two busy right there, the supervisor and assistant supervisor.

Mr. CARY. Section 10 is very active. The bulk of those are full time.

I have said the same thing you have, why can't we cut down this public utility group, because we are really handling a residual job in this area. I have no doubt of it.

Mr. THOMAS. It has been residual for about 10 or 12 years.

Mr. CARY. It is a residue we cannot absolutely get rid of without congressional authorization. That is the fact I faced up to.

Mr. THOMAS. It is not a question of getting rid of it. It involves allocation of people.

Is there not some featherbedding in there? You say you need additional people. It seems you can get more out of your people elsewhere rather than putting them here.

Mr. MILTON COHEN. When I was in the Public Utilities Division in the forties we had something like 200 people in that Division. That was in the active phase of the reorganization.

Mr. THOMAS. You were really bursting out at the seams then.

Mr. CONWILL. If you look at page 66 you will get an indication there is still work to be done in that area.

Mr. THOMAS. Our friend wants 66 in the record, so we shall insert that.

(The page referred to follows:)

4. Regulation of public utilities

	Actual, 1961	Estimate, 1963	Estimate, 1964
Number of applications relating to approval of exemptions, financing transactions, acquisitions of securities or other assets, intercompany loans, dividends, contributions, etc.:			
Pending at beginning of year	36	42	42
Filed during year	87	90	95
Subtotal	123	132	137
Applications reviewed during year	−81	−90	−95
Pending at end of year	42	42	42
Examination of periodic reports	624	600	600
Proxies reviewed for violations	51	55	55
Public and interpretive letters	502	525	525
Average employment	19.8	19.8	19.8

For this activity, no additional personnel are requested in fiscal 1964.

The Branch of Public Utility Regulation administers and enforces matters arising under the 1935 act, which regulates principally interstate public-utility holding-company systems engaged in the electric utility business or in the retail distribution of gas.

The workload of the Branch consists of the processing of applications, declarations, informal proposals, and supervisory reports relating to a broad range of

proposed corporate and financial transactions of the 17 registered holding company systems, which are expected to continue in operation indefinitely subject to the regulatory provisions of the act. These systems include 90 electric and gas utility subsidiaries, 39 nonutility subsidiaries, 13 holding companies, 6 holding and operating companies, and 13 inactive companies. The assets of these systems, less valuation reserves, aggregate $11.8 billion as of December 31, 1961.

During fiscal 1962, exclusive of notes sold to banks, registered holding-company systems and their subsidiaries sold $295 million of securities to the public to finance plant and equipment expenditures.

In addition to the workload shown on the prior page, there are unresolved problems relating to the integration and simplification standards of section 11. These unresolved problems involve complex questions of law, engineering, and financing. It is difficult to estimate the future trend of workload in respect of these matters because it is impossible to foretell the year in which a particular reorganization plan will be filed or a proceeding instituted by the Commission.

INVESTMENT COMPANY INSPECTIONS

Mr. THOMAS. Insert pages 62 and 63. We talked about this earlier. (The pages referred to follow:)

2. Investment company inspections

	Actual, 1962	Estimate, 1963	Estimate, 1964
A. Registered investment companies			
Number at beginning of year	663	727	757
Number of registrations during year	97	60	60
Subtotal	760	787	817
Number of registrations terminated during year	−33	−30	−60
Number of registrations, end of year	727	757	757
Less: Inactive companies	−60	−55	−55
Potential inspection workload	667	702	702
Investment company inspections	52	90	240
Approximate cycle of inspections (years)	12.8	7.8	3
B. Investigations relating to serious violations involving possible civil action:			
Pending at beginning of year		19	29
Opened during the year	24	25	40
Subtotal	24	44	69
Disposed of during the year	5	15	32
Pending at end of year	19	29	37
Average employment	1.9	5.3	7

For this activity, the Branch of Investment Company Inspections and Investigations requires no additional personnel in 1964 although 24 additional positions are requested for the field offices to achieve a 3-year inspection cycle in 1964. The 24 positions are justified under the "Regional offices" section of this justification.

The personnel of the Branch extensively assists the regional office personnel in inspection of investment companies since this program is in its formative stage. Eventually, it is anticipated that a greater share of the workload will be accomplished subsequent to fiscal 1963 by field personnel.

Inspections made in past years revealed some irregularities and indicate the need for substantial extension of this program for the protection of public shareholders. Examples of a few substantial irregularities follow:

1. Failure of directors to attend meetings or to otherwise perform their statutory duties: For example, the inspection of one fund, highly rated for its performance recently by leading financial periodicals, disclosed that the directors were completely indifferent to their fiduciary obligations. Their laxness resulted in a complete deterioration of the management and internal operations of the fund. The entire board was removed, each former director agreed not to be an officer, director, or other affiliate of an investment company for 5 years,

but the board was replaced with entirely independent members, and the principal of the investment adviser was placed on a stringent type of probation.

2. Failure to obtain approval of stockholders or the board of directors for an investment advisory contract: In this connection, a recent inspection of a prominent large fund disclosed that it had been operating with an invalid advisory agreement for over 2 years. The board of directors was reconstituted, and the new board entered into a settlement which resulted in investment adviser refunding $250,000 to the investment company.

REPORT ON SPECIAL STUDY

Mr. THOMAS. Judge Cohen is doing an outstanding job here. He will wind up the special study April 3?

Mr. MILTON COHEN. April 3; yes, sir.

Mr. THOMAS. We will be anxious to see your report. Some good things will come of it, I am sure. You are an outstanding man and the country is indebted to you for leaving your regular activity which is far more lucrative than your Government employment. You are rendering an outstanding service to the Government.

Mr. BOLAND. Is this the most comprehensive study ever made in this area?

Mr. MILTON COHEN. Yes, sir.

Mr. BOLAND. Are you happy with the work being done?

Mr. MILTON COHEN. We are working hard, covering a lot of ground, and I think it will be a fine report. We could have gone into this same area over a longer period of time with a larger staff and it would not have been excessive, I can assure you, but I think we shall cover it all right.

FORMAT FOR BUDGET JUSTIFICATION

Mr. THOMAS. Next year will you give us jobs rather than average employment or man-years?

Mr. BOLAND. Why do you give us the average employment?

Mr. DONATY. I show actual on personal services data sheet—the old green sheet.

The reason we do this is this: As you know, we must submit a budget to the Bureau of the Budget. Based on the Presidential allowance, we send it here and thus we try to simplify work by using the same document.

SPECIAL STUDY OF SECURITIES MARKET

Mr. BOLAND. Are there any questions on the special study?

Mr. JONAS. I have nothing.

Mr. BOLAND. Insert 71 through 78 in the record.

(The pages referred to follow:)

SPECIAL STUDY OF SECURITIES MARKETS

FUNCTIONAL STATEMENT

Under Public Law 87-196 dated September 5, 1961, the Commission is authorized and directed to make a study and investigation of the rules of national securities exchanges and national securities associations, including rules for the expulsion, suspension or disciplining of a member for conduct inconsistent with just and equitable principles of trade. The special study of securities markets is assisting the Commission in making that study and investigation.

Public Law 87–196 provides that (1) the Commission shall report to the Congress on or before January 3, 1963, the results of its study and investigation, together with its recommendations, including such recommendations for legislation as it deems advisable; (2) to carry out such study and investigation, there is authorized to be appropriated the sum of $750,000; and (3) employment of personnel may be made without regard to civil service laws, rules and regulations or to the Classification Act of 1949, as amended, except that no such rate shall exceed $18,500 per annum.

On July 27, 1962, Public Law 87–196 was amended by Public Law 87–561, which (1) extended the date of the report of the Commission from January 3 to April 3, 1963; and (2) authorized to be appropriated an additional $200,000 (from $750,000 to $950,000) to continue the study and investigation.

The special study group consists of 65 employees, of which 7 are stationed in the New York regional office reporting directly to the director of the study.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$444,000	50.0
Decrease	(444,000)	(50.0)
1964		

Summary of average employment, 1964 over 1963

Activity	1963	1964	Difference
1. Special study and investigation of national securities exchanges and national securities associations	50.0		(50.0)

During the past year, the Commission through its special study group has progressed in the following areas:

1. All 65 positions (attorneys, economists, statisticians, and other personnel) have been filled.

2. Definite study plans of inquiry relating both to the scope of the total study and the procedure for inquiry into particular subjects have been developed.

3. Implementation of the study plan has commenced in all areas with varying degrees of progress. The techniques of the investigation and study have been and will vary dependent upon circumstances. Examples of some techniques being used are: (1) interviewing witnesses, both informally and on the record; (2) observing and reviewing operating procedures on the exchanges and in brokerage firms; (3) discussing problems with responsible members of the securities industry; (4) utilizing questionnaires and the resultant accumulation and analysis of data; and (5) holding public hearings on certain subjects to afford opportunity for public presentation.

Although the language of the law is specific, it is clearly the intent of Congress that the study and investigation be comprehensive. The special study group is analyzing and studying a number of general areas, some of which are described briefly below:

1. The growth of the securities industry during the past decade in terms of issues, transactions, broker-dealer firms, branch offices, salesmen and public investors. The problems that result from such growth will be thoroughly examined. For example: Qualifications to engage in the securities business and recruitment, training, testing, surveillance and disciplining of persons engaged in the securities business.

2. The stock exchanges and their rules and practices, with particular attention to (1) the role of specialists, floor traders, and odd lot dealers; (2) the handling of block transactions; (3) the listing policies and controls over listed corporations; (4) the control of members' activities ;and (5) special problems relating to regional exchanges.

3. Public offerings of securities, with particular attention given to amounts and forms of underwriters' compensation, and underwriters' responsibility to the issuer and to his customers, "hot" issues, and the "after market."

4. The operation of the over-the-counter markets, the existing quotation systems, the actual pricing of transactions, the relationship between principal and agency transactions, and the significance and effect of sponsorship of over-the-counter securities.

5. The appropriateness of existing distinctions in the regulation of issuers with listed securities and unlisted securities, particularly with respect to publication of reports, solicitation of proxies, and insiders' transactions.

6. The security credit and margin requirements, including the inconsistencies of regulation as between listed and unlisted issues, the different treatment as between banks and broker-dealers, and unregulated sources of credit.

7. Selling techniques in the securities industry, with discussion of legal and business controls.

8. The nature and extent of responsibility and fiduciary obligation associated with investment advice, both free and paid; research activities in relation to recommendations, and recommendations in relation to selling.

9. The techniques of publicity and "financial public relations" to determine the various gradations between legitimate publicly and publicity used for manipulative purposes, in relationship to both outstanding securities and those in the process of distribution.

10. The financial responsibilities of broker-dealers in terms of the protection of customers' funds and securities, including an examination of alternate sources of protection of customers' funds; that is, minimum capital, capital ratios, or bonding.

11. Industry self-regulation through the registered exchanges and the National Association of Securities Dealers, and the adequacy of controls in areas not covered by industry self-regulation.

12. The staffs of the special study and the Division of Corporate Regulation are examining various problems in the mutual fund area, such as selling practices, industry practices with respect to the allocation of brokerage, use of advisory information by persons affiliated with mutual funds, and practices and procedures with respect to portfolio transactions.

Following submission of the report(s) to the Congress and termination of the special study on April 3, 1963, it is proposed to transfer 42 of the 65 employees from the study group to the Divisions of Trading and Exchanges and Corporate Regulation and to staff offices for the purpose of implementing the recommendations of the special study.

It is conceivable that subsequent to the transfer, this group, in part, will be used as a task force to execute the recommendations of the special study. Effective execution of the recommendations will entail the use of these experienced employees in several ways, such as (1) developing additional rules and regulations of the Commission and revising existing rules and forms; (2) preparing recommended legislation and supporting data for submission to the Congress; (3) taking such enforcement action as may be called for as a result of evidence developed in the study; and (4) effectuating such recommendations as may be made by the study for modifications in the rules, regulations, organizations, and practices of the exchanges and national securities associations, and reviewing rules, regulations, disciplinary proceedings, and other related matters proposed by such exchanges and associations as well as ascertaining periodically that these organizations are operating in the manner contemplated.

The distribution of the additional 42 positions for the period April 3 to June 30, 1963, is shown on page 78.

Administrative and Management Functions

OFFICE OF THE COMPTROLLER

Mr. Boland. Next we have the Office of the Comptroller. Insert page 79 in the record.

(The page referred to follows:)

Office of the Comptroller

FUNCTIONAL STATEMENT

This Office performs all the Commission's financial management functions, including (1) formulation of budget estimates; (2) apportionment, allocations, and control of funds; (3) program planning; (4) payroll and audit operations; (5) billings and collections; (6) recording transactions to the general ledger accounts and subsidiary ledgers; (7) preparation of financial statements; (8) machine tabulation; and (9) compilation of required reports in accordance with current regulations.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$152,200	25.5
Increase	13,900	2.0
1964	166,100	27.5

The increase of $13,900 in 1964 over 1963 represents the cost ($8,700) of two additional positions (payroll and leave technician and auditor, GS–5), salary step increases of $1,400 and $3,800 for pay increases effective January 5, 1964. The additional positions are required to meet the increasing workload demands of this Office due to the Commission's accelerated programs.

Function	Average employment	
	Estimate, 1963	Estimate, 1964
Budget activities, appropriation control, etc	4.8	4.8
Payroll operations and maintenance of leave records	6.6	7.6
Administrative auditing	2.5	3.5
Administrative accounting, collection and disposition of fees and revenue	1.8	1.8
Machine tabulation	9.8	9.8
Total	25.5	27.5

Mr. Boland. How many people do you have now?

Mr. Donaty. 26.

Mr. Boland. You are looking for two more?

Mr. Donaty. Yes, sir.

Mr. Boland. What is to be their function?

Mr. Donaty. One is for payroll and the other is for audit, two grade 5's.

OFFICE OF PERSONNEL

Mr. Boland. Insert pages 81, 82, and 83 in the record.

(The pages referred to follow:)

OFFICE OF PERSONNEL

FUNCTIONAL STATEMENT

This Office performs all the Commission's personnel management functions, including: (1) recruitment, placement, and separations; (2) job classification; (3) incentive awards program; (4) operation of a performance rating program; (5) maintenance of personnel files; (6) retirement and other counseling; (7) training and employee development; and (8) promotion and grievance policies.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$99,000	13.5
Increase	9,000	1.0
1964	108,000	14.5

The additional position (personnel clerk, GS–5) is required to meet the increased workload in the areas of recruitment, placement, and appointment. The additional position is within the ratio of 1 personnel position for every 135 employees.

In addition to the normal personnel functions, the Office has responsibilities in connection with reviews and reports to the Commission on matters arising out of the Commission's rules of conduct, including notices of appearance by former Commission employees and employees' securities transactions.

The increase of $9,000 in 1964 over 1963 represents the cost ($4.500) of the additional position, the sum of $2,000 for salary step increases, and $2,500 for pay increases effective January 5, 1964.

Function	Average employment	
	Estimate, 1963	Estimate, 1964
Personnel activities	9.7	10.7
Nonpersonnel work	2.8	2.8
Nurse	1.0	1.0
Total	13.5	14.5

OFFICE OF RECORDS AND SERVICE

FUNCTIONAL STATEMENT

This Office provides for office facilities and services, including (1) receipt, recording, and docketing of all material required to be filed with the Commission pursuant to the statutes it administers; (2) acquisition, storage, and distribution of supplies and equipment; (3) planning and operation of internal records management; (4) providing communication and messenger services; (5) utilization and disposal of all personal property of the Commission; (6) maintenance of library, publications, and public reference services; (7) alteration and repair of assigned space; and (8) maintenance of printing and duplicating services.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$543,100	104.0
Increase	27,300	2.0
1964	570,400	106.0

The increase of $27,300 in 1964 over 1963 represents the cost ($6,300) of two additional messenger positions, the cost ($7,700) of salary step increases and the cost ($13,300) of pay increases effective January 4, 1964. These additional positions are required to meet the increasing workload demands resulting from the Commission's accelerated programs.

Function	Average employment	
	Estimate 1963	Estimate 1964
Library	6.6	6.6
Duplicating and printing	17.0	17.0
Public reference and publications	11.0	11.0
Purchasing, space and records management	15.0	15.0
Docket, mail, files and certification	54.4	56.4
Total	104.0	106.0

Regional Offices

Mr. Boland. We went into the regional offices thoroughly. This is well set forth.

You show your workload in the successive pages, so let us insert the whole section, pages 86 through 103, in the record.

(The pages referred to follow:)

Regional Offices

Functional Statement

The regional offices are the field representatives of the Commission in the administration and enforcement of the various acts.

The principal functions of the regional offices include the following: (1) examination of the books, records, and practices of registered brokers and dealers and members of national securities exchanges, and the examination of their annual financial reports; (2) investigation of (*a*) transactions in securities on national securities exchanges, in the over-the-counter market, and in distributions to the public, and (*b*) complaints from investors and others; (3) examination and processing of filings under regulation A; (4) recommendation of administrative, civil, or criminal sanctions where violations have been established; (5) prosecution of injunctive actions in U.S. district courts and administrative proceedings before hearng examiners; (6) rendering of assistance to U.S. attorneys in criminal cases; (7) participation in proceedings in U.S. district courts under chapters X and XI of the Bankruptcy Act; (8) examination of the accounts and records of registered investment companies; (9) rendering interpretative advice and assistance to registrants, registered brokers and dealers, prospective registrants, the investing public and others as to the application and meaning of the various statutes and the Commission's rules, regulations and forms; and (10) examination of the books, records, and practices of registered investment advisers.

Justification

Fiscal year	Personal services	
	Cost	Average employment
1963	$4,350,300	550.1
Increase	590,500	48.0
1964	4,940,800	598.1

Summary of average employment increase, 1964 over 1963

Activity	1963	1964	Increase, 1964 over 1963
1. Executive direction	18.0	18.0	
2. Broker-dealer inspections	57.2	57.2	
3. Examination of annual financial reports from brokers and dealers	16.3	16.3	
4. Investigations and enforcement	340.5	364.5	24
5. Interpretation and information	15.0	18.0	3
6. Investment company inspections	9.4	30.4	21
7. Regulation A	59.8	59.8	
8. Chapter X, National Bankruptcy Act	26.0	26.0	
9. Investment adviser inspections	7.9	7.9	
Total, average employment	550.1	598.1	48

The 54 additional positions requested for the regional offices in 1964 over 1963 are required for the following purposes: (1) accelerate the conduct of investigations and enforcement actions including administrative, civil, and criminal proceedings; and (2) increase the number of inspections of investment companies which will result in an overall 3-year cycle as compared to the 8-year cycle estimated for 1963. Distribution of the additional positions by regional offices is shown on page 102. The 54 additional positions are distributed as follows:

(*a*) 27 positions for the investigations and enforcement program including administrative, civil and criminal proceedings.

(*b*) 24 positions for the investment company inspection program.

(*c*) 3 positions for the interpretation and information function in the New York regional office.

The increase of $590,500 in 1964 over 1963 includes the cost of the additional positions and salary step increases as well as approximately $102,000 for pay increases effective January 5, 1964.

1. REGIONAL EXECUTIVE DIRECTION

The regional administrators are responsible for the execution, wihin their geographic regions, of assigned programs under the various acts administered by the Commission, subject to the supervision and direction of the various operating officials of the Commission within their respective spheres of responsibilities. The aggregate average supervisory employment in the nine field offices from 1962 to 1964, inclusive, is 18 man-years for each year.

2. Broker-dealer inspections

	Actual, 1962	Estimate, 1963	Estimate, 1964
Total estimated number of registered broker-dealers	5,870	6,100	6,200
Less: Registered broker-dealers adequately inspected by securities exchanges	870	885	900
Potential workload	5,000	5,215	5,300
Broker-dealer inspections	1,515	1,670	1,670
Cycle of inspections—years	3.3	3.1	3.1
Average number of inspections per man-year	29	29	29
Average employment	52.3	57.2	57.2

For 1964, no additional positions are requested for this program. The inspection cycle of 3.1 years in 1963 will continue in 1964. The ultimate objective of the Commission is to inspect the registered brokers and dealers on an 18-month cycle.

The broker-dealer inspection program includes regular and periodic examinations of the books and records of registered brokers and dealers. The purpose of these inspections is to obtain compliance with the securities acts and with the rules and regulations promulgated by the Commission, and detect and prevent violations. The program represents preventive enforcement for the protection

of the public investors. These inspections frequently disclose situations, which, if not corrected, would result in losses to customers and which form the basis for investigative and enforcement action.

The following table shows the various types of violations disclosed as a result of the inspection program in 1959 to 1962, inclusive.

Type	Actual, 1959	Actual, 1960	Actual, 1961	Actual, 1962
Financial difficulties	180	139	236	204
Hypothecation rules	53	43	42	15
Unreasonable prices for securities purchases	255	194	240	188
Regulation T of the Federal Reserve Board	170	180	200	181
Secret profits	7	7	2	6
Confirmation and bookkeeping rules	1,081	967	1,000	889
Miscellaneous	324	371	399	315
Total, indicated violations	2,070	1,901	2,119	1,798
Total number of inspections	1,471	1,499	1,627	1,515

An inspection ordinarily includes, among other items, (1) a determination of the financial condition of the broker-dealer; (2) a review of pricing practices; (3) a review of the treatment of customer's funds and securities; and (4) a determination whether adequate disclosures are made to customers. The inspection process also determines whether the required books and records are adequate and currently maintained, and whether broker-dealers are conforming with the margin and other requirements of regulation T, as prescribed by the Federal Reserve Board. Our inspectors also check for sale of unregistered securities, use of improper sales literature or sales methods, and other fraudulent practices.

Many of the new brokers and dealers are inexperienced and unfamiliar with the responsibilities owed to their customers and with the rules of the Commission and established practices for the conduct of the business. A more serious problem is created by those who enter the securities field for the prime purpose of a quick profit, rather than the establishment of a sound business based upon just and equitable principles of trade in dealing with the investing public.

While an inspection may disclose violations of the statutes or the Commission's rules, formal action is not taken against every broker-dealer found to be in violation. In determining whether to institute action against a broker-dealer found as a result of an inspection to be in violation, consideration is given to the nature of the violation and to the effect it has upon the investing public. Inspections usually reveal a number of inadvertent violations, which are discovered before they become serious and before they jeopardize the rights of customers. In such situations, where no harm has come to the public, the matter is usually called to the attention of the registrant and arrangements made to correct the improper practices. Where, however, the violation appears to be willful and the public interest or the protection of investors is best served by instituting proceedings against the broker-dealer, such action is promptly taken.

3. Broker-dealer reports (X–17A–5)

	Actual, 1962	Estimate, 1963	Estimate, 1964
Number of reports	5,228	5,400	5,600
Average employment	15.1	16.3	16.3

The slight increase in workload in 1964 over 1963 will require no additional personnel.

Under the Commission's rule X–17A–5, every registered broker-dealer is required to file annually a report of its financial condition. These reports are examined and analyzed by the regional offices for the purpose of determining the registrant's compliance with the Commission's net capital rule. If the requirement is not met after a reasonable time, the Commission initiates appropriate administrative or court action for the protection of the public investor.

4. Investigations and enforcement

	Actual, 1962	Estimate, 1963	Estimate, 1964
1. Investigations including administrative, civil, and criminal proceedings:			
Pending at beginning of year	1,126	985	940
Opened during the year	510	615	660
Subtotal	1,636	1,600	1,600
Closed during the year	651	660	775
Pending at end of year	985	940	825
(a) Administrative proceedings to deny or revoke registrations of brokers and dealers or to expel from NASD:			
Pending at beginning of year	124	162	157
Opened during the year	95	120	120
Subtotal	219	282	277
Concluded during the year	57	125	125
Pending at end of year	162	157	152
(b) Administrative proceedings to deny or revoke registration of investment advisers:			
Pending at beginning of year	4	11	11
Opened during the year	7	25	25
Subtotal	11	36	36
Concluded during the year	0	25	25
Pending at end of year	11	11	11
(c) Injunction actions:			
Pending at beginning of year	96	105	100
Filed during the year	89	100	100
Subtotal	185	205	200
Disposed of during the year	80	105	110
Pending at end of year	105	100	90
(d) Criminal reference reports referred to the Department of Justice:			
Pending at beginning of year	100	130	130
Referred during the year	64	55	55
Subtotal	164	185	185
Disposed of during the year	34	55	60
Pending at end of year	130	130	125
Average employment	275.7	340.5	364.5

The addition of 27 positions (3 accountants, 7 attorneys, 1 financial analyst, 10 investigators and 6 stenographers) is required in order to accelerate the conduct of investigations including administrative, civil, and criminal proceedings.

Statutory authority to conduct investigations is contained in the several acts administered by the Commission. These investigations are conducted primarily by the regional offices for the purpose of determining whether civil or criminal proceedings should be brought based on violations of the acts.

The majority of investigations emanate from: (1) Complaints by the investing public; (2) the Commission's broker-dealer inspection program; (3) suspected fraud and malpractices in the solicitation, sale, and trading of securities; (4) surveillance of the securities markets; and (5) requests for field office assistance by the central office in connection with all aspects of the Commission's work. Other sources of information which are of great assistance to the Commission in carrying out its enforcement responsibilities are the national securities exchanges, brokerage firms, State and Canadian securities authorities, better business bureaus, the National Association of Securities Dealers, Inc., and various law enforcement agencies.

The special study of the securities markets has greatly increased the number of complaints filed by investors whose attention is attracted to the Commission's investigative and enforcement activity through publicity relating to the conduct of the study and the matters it has uncovered.

If an inquiry discloses that no violation has been committed or that a violation has occurred due to a misunderstanding or ignorance of the law, no further action is generally taken except that under the latter circumstance, the offender is informed of the violation and appropriate administrative measures are taken to procure immediate compliance and to prevent recurrence of violations.

If the matter cannot be disposed of satisfactorily after the inquiry, the Commission may utilize its power to issue subpenas requiring the appearance of witnesses to testify under oath and the furnishing of documents. Upon completion of such investigation, the regional office submits a recommendation that appropriate action be instituted by the Commission or that the investigation be closed. These reports are reviewed by the central office prior to presentation to the Commission for disposition. If it appears that criminal prosecution would be appropriate, the action of the Commission may take the form of a reference of the evidence to the Attorney General. In other cases, the Commission may authorize institution of a civil proceeding for injunctive relief or administrative proceedings against broker-dealers and investment advisers. The fraudulent sale of securities still remains a major problem for the Commission.

The criminal workload has increased substantially in the past few years. Such criminal work is far more demanding in both extent and depth than is required in most civil and administrative proceedings. Experience has shown the Commission that effective enforcement demands recourse not only to the latter remedies, but to criminal action as well if full effectiveness is to be achieved in halting the illegal activities of those violators who demonstrate an utter disregard for the law. As an illustration of this point, the Commission has referred 64 cases to the Department of Justice for the 12-month period ending June 30, 1962.

Another important factor to note in connection with criminal references to the Department of Justice is that the number of charges, and of defendants and coconspirators in the past year has increased significantly. For example: (1) The average number of defendants per case referred to the Department of Justice totaled about 6 or 7 as compared with 2 or 3 defendants in 1958; and (2) the average number of charges per case totaled about 21 as compared with 12 in 1958. Unquestionably, the current prosecutions are far more complex and difficult than those which the Commission faced in the past. In a number of recent cases, it has been necessary to return multiple indictments against numerous major defendants and coconspirators.

The Commission has been compelled to carry on a vigorous, firm, and aggressive enforcement program designed to afford protection to the investing public. It is our experience that our work becomes more and more intricate as the violators are forced to exercise greater ingenuity in order to avoid the impact of our investigations and proceedings.

Another factor to consider is that with the additional Federal judges, it can be assumed that the time lapse between the date of referral and the date of prosecution will be shortened. In view of the increase in number and scope of violations occurring within the jurisdiction of the southern district of New York, the U.S. attorney in New York has assigned top priority to these cases and has established a special unit composed of several assistant U.S. attorneys who have been assigned specifically to prosecute securities cases. As a result of this action, numerous employees of the staff in the New York and central offices must devote substantially all of their time to assist the U.S. attorney in his presentations to the grand jury and in the trial of these cases.

Emphasis upon developing criminal cases necessarily means that the Commission is utilizing its personnel for this purpose who would otherwise be available to devote their full attention to other urgent enforcement and regulatory problems. In addition to developing the evidence in these criminal cases, manpower must be utilized also in assisting U.S. attorneys in the grand jury action of the case and the prosecution thereof. For 1962, approximately 10 percent or 27 positions of the total manpower used under this program in the regional offices was devoted to criminal proceedings as compared with 8 percent or 20 positions in fiscal 1961. It is estimated that 12 percent or 40 positions of the manpower under this program will be used in 1963 as well as 1964.

5. Interpretation and information

Interpretations and opinions under all acts administered by the Commission, except the Public Utility Holding Company Act of 1935, Investment Company Act of 1940, and chapter X of the Bankruptcy Act are rendered by the interpretative attorneys in the regional offices to the public and to members of the staff of the

regional offices. In addition, they render interpretations and opinions of rules and regulations adopted by the Commission (including questions of general interpretations under regulation A) and practices and procedures followed in the administration of these statutes. Inquiries requesting such interpretations, both formal and informal, are received from prospective registrants, registered brokers and dealers, and the investing public.

For 1964, three additional positions (two attorneys and one stenographer) are requested for this program for the New York regional office because of the increased workload under this actiivty. The average employment for fiscal 1964 is estimated at 18 as compared with 15 in 1963.

6. Investment company inspection program

	Actual, 1962	Estimate, 1963	Estimate, 1964
Number of investment company inspections	52	90	240
Approximate cycle of inspections (years)	12.8	7.8	3.0
Average employment	4.3	9.4	30.4

For 1964, 24 additional positions (16 investment company inspectors, 2 attorneys, and 6 stenographers) are required to achieve a 3-year inspection cycle, which involves the inspection of 240 investment companies. As described in the justification (pp. 62 to 64) for the Division of Corporate Regulation, inspections made in past years revealed many irregularities and indicate the need for substantial extension of this program for the protection of public shareholders.

7. Regulation A program

	Actual 1962	Estimate 1963	Estimate 1964
A. Regulation A filings (Form 1-A):			
Pending beginning of year	289	227	50
Filed	1,065	850	1,100
Subtotal	1,354	1,077	1,150
Examined	1,127	1,027	1,100
Pending, end of year	227	50	50
Aggregate dollar amount of proposed offerings (millions)	$236	$185	$245
B. Regulation A suspension orders:			
Pending beginning of year	28	31	40
Instituted during year	52	65	65
Subtotal	80	96	105
Closed during year	49	56	75
Pending, end of year	31	40	30
Average employment	53.1	59.8	59.8

For 1964, no additional positions are required for this program in the regional offices.

Securities offered for public sale not in excess of $300,000 in 1 year must be qualified for exemption from the registration provisions of the Securities Act under the Commission's Regulation A. The staffs of the regional offices are required to examine and process the material filed under this regulation within 10 days after the filing is received. When the information disclosed appears to be inadequate, a suspension order or other action must be undertaken promptly. Many suspension cases result in investigations and administrative proceedings. In addition, the regional offices review the conduct of the offering and the sales methods used.

8. Chapter X—National Bankruptcy Act

Regional office	Number of cases in which regional offices participated in 1962	1962 average employment
New York	11	10.6
Chicago	29	9.3
San Francisco	6	3.8
Total	46	23.7

No additional positions are requested for this program in the regional offices for 1964. It is anticipated that 26 man-years will be expended by the regional offices in 1963 and 1964 for this program.

The functions of this program are performed by the regional offices, subject to supervision and review by the Division of Corporate Regulation. The chapter X cases originating in the Washington, D.C., and Atlanta, Ga., regions, are processed directly by the Division, because the irregularity of the workload in these two regions does not justify the permanent assignment of specialists to the regional offices serving such areas.

9. Investment adviser inspection program

	Actual, 1962	Estimate, 1963	Estimate, 1964
Total estimated number of registered investment advisers	1,836	1,600	1,650
Investment adviser inspections	149	200	200
Cycle of inspections—years	12.3	8.0	8.0
Average employment	3.3	7.9	7.9

For 1964, no additional positions are requested in the regional offices for this program. Section 204 of the Investment Advisers Act of 1940 was amended by the 86th Congress to provide for regular and periodic inspections of registered investment advisers. The program represents preventive enforcement for the protection of the public investors. For 1963 and 1964, an inspection cycle of 8 years is contemplated.

Heretofore, the act did not empower the Commission to require investment advisers to keep such books and records as the Commission may prescribe by rule and to inspect such books and records. Under the amended act, the Commission presently has this power. Previously, the Commission could not deny or revoke the registration of an investment adviser who had been convicted of embezzlement, fraudulent conversion, or misappropriation of funds of securities; or who had violated the mail fraud statute; or who had willfully violated the Federal securities laws. Under the act, as amended, these offenses are a basis for denial or revocation.

Previously, the Commission did not have the power to issue rules and regulations, which would prohibit fraudulent, deceptive, and manipulative practices by investment advisers as are fraudulent, deceptive, or manipulative.

Heretofore, the antifraud provision of the act did not apply to unregistered investment advisers. The act exempted from registration certain investment advisers, primarily those whose business is wholly intrastate or whose only clients are investment and insurance companies or those who have fewer than 15 clients and do not hold themselves out generally to the public as investment advisers. Under the act as amended, the fraud provisions are applicable to all investment advisers whether registered or not.

Summary of additional positions requested for regional offices for fiscal 1964—by program

Region	Investigations and enforcement		Investment company inspections		Total	
	Number	Annual salary rate	Number	Annual salary rate	Number	Annual salary rate

Mr. BOLAND. Are there any questions regarding the regional offices?
(No response.)

OTHER OBJECTS OF EXPENSE

Mr. BOLAND. Then we have other expenses starting at page 104. You have an increase of $200,000. You will spend $2,267,000 in 1964, $200,000 more than in 1963.

Is this increase due to the new personnel you hope to bring aboard?

Mr. DONATY. Basically; yes, sir.

Mr. BOLAND. Insert page 104 in the record.

(The page referred to follows:)

OTHER EXPENSES

The sum of $2,267,000 is required in 1964 for costs other than salaries. These costs are itemized in the following tables:

Item of expense	Actual, 1962	Estimate, 1963	Estimate, 1964
Personnel benefits	$623,879	$771,000	$839,000
Travel and transportation of persons	433,167	525,000	602,000
Transportation of things	8,115	12,000	12,000
Communications and rental	316,424	378,000	382,000
Printing and reproduction	55,042	69,000	51,000
Other services	307,495	130,000	205,000
Supplies and materials	155,063	120,000	125,500
Equipment	192,910	62,000	50,500
Total	2,092,095	2,067,000	2,267,000

The overall increase of $200,000 for expenses other than personal services in 1964 represents generally normal office expenses for the additional personnel requested necessary to accomplish the increased program workload of the Commission.

TRAVEL AND TRANSPORTATION OF PERSONS

Mr. BOLAND. Travel and transportation of persons is up $77,000 in 1964. With regard to $63,000 is for additional attorneys and inspectors. Insert page 106 and page 107.

(The pages referred to follow:)

TRAVEL AND TRANSPORTATION OF PERSONS

The amount of $602,000 is required for travel expenses for 1964. This amount will provide for the payment of transportation expenses, rental of automobiles, subsistence, incidental expenses, and mileage for the use of privately owned automobiles for official travel of employees. The total amount includes also provision for the cost of transportation of dependents on change of duty station and compensation for witnesses. An itemization of these costs is shown in the following table:

	Actual, 1962	Estimate, 1963	Estimate, 1964
Transportation of persons	$157,298	$189,900	$219,000
Commercial rental of automobiles	3,315	4,000	5,000
Subsistence expenses	184,456	222,500	256,000
Incidental expenses	4,596	5,500	6,000
Mileage—use of private auto	37,357	45,000	52,000
Government motor pool rentals—cars	5,058	6,100	7,000
Transportation of dependents	1,853	2,000	2,000
Compensation of witnesses	39,234	50,000	55,000
Total	433,167	525,000	602,000

The increase of $77,000 in 1964 for travel is distributed as shown below. The cost of transportation, per diem, and incidental expenses of employees is estimated at $35 per day.

1. The sum of $63,600 is required for the additional attorneys, investigators, and inspectors of the regional offices relative to the increased workload of the following programs: (1) The investigations program including administrative, civil, and criminal proceedings; and (2) the investment company inspection program. It is estimated that 60 travel days will be required for each traveler.

2. The amount of $3,150 is required for one additional hearing examiner to preside over public and private hearings. It is estimated that 90 travel days will be required for the traveler.

3. The amount of $3,150 is required for one financial analyst and one attorney in the Division of Corporate Regulation for the purpose of providing assistance to regional offices in chapters X and XI proceedings and to perform the original work on all chapters X and XI cases in the Atlanta and Washington, D.C., regional areas. It is estimated that 45 travel days will be required for each traveler.

4. The amount of $2,100 is required for one attorney in the Office of the General Counsel for the purpose of conducting appellate litigation. It is estimated that 60 travel days will be required.

5. The sum of $5,000 is required for witness fees relating to the increased number of investigations to be conducted.

COMMUNICATIONS AND RENTAL

Mr. BOLAND. Communications and rental appears on page 109, an increase of $4,000. Insert page 109 in the record.

(The page referred to follows:)

COMMUNICATIONS AND RENTAL

The sum of $382,000 is required for communication services, rental of space, and equipment for 1964. The items carried under this classification are shown in the table appearing below:

Item	Actual, 1962	Estimate, 1963	Estimate, 1964
Telegraph service	$4,059	$4,500	$6,400
Telephone—local	110,111	119,000	127,600
Telephone—long distance	75,162	81,500	89,500
Teletype and ticker service	12,045	14,000	14,500
Payment of penalty mail	47,000	50,000	62,000
Rental of tabulating equipment	26,227	27,000	32,000
Rental of other equipment	3,788	12,000	20,000
Rental of space	38,032	70,000	30,000
Total	316,424	378,000	382,000

The net increase of $4,000 represents primarily adjustments to the following items:

1. An increase of $19,000 in telephone and telegraph services primarily for the additional personnel requested in this estimate.

2. A decrease of $40,000 for rental of space. The sum of $30,000 is required in 1964 to provide space for the additional 54 positions in the regional offices. Agencies are required to budget initially for the estimated rental cost of all additional space necessitated by new or expanded activities. When the space has been secured and the cost thereof is known, an appropriation transfer will be made from the agency appropriation to an appropriation of the General Services Administration. Thereafter, the GSA will be responsible for obtaining funds for such additional space.

3. An increase of $25,000 to cover the additional cost of penalty mailings, and the rental of tabulating and other equipment.

PRINTING, REPRODUCTION, AND OTHER SERVICES

Mr. BOLAND. Printing and reproduction actually goes down, does it not?

Mr. DONATY. That is right.

Mr. BOLAND. It is well explained on page 111. Insert pages 110 and 111.

(The pages referred to follow:)

PRINTING AND REPRODUCTION

The following table shows the actual costs for 1962 and estimated costs for 1963 and 1964 for the several items of printing:

Description	Actual 1962	Estimate 1963	Estimate 1964
1. Reprints of rules and amendments, technical forms, etc	$10,475	$10,000	$10,000
2. Decisions and reports of the Commission		11,000	
3. Legal briefs, transcript of record, etc	7,885	7,000	7,000
4. The Commission's annual report to Congress	5,310	6,000	6,000
5. Administrative forms, letterheads, envelopes, standard forms, printed supplies, etc	9,280	9,000	9,000
6. Official summary of security transactions and holdings, and statistical bulletins (published monthly)	6,105	6,500	6,500
7. Photo duplication, binding, and reproduction	13,352	11,000	11,000
8. Copies of public bills, documents, etc	1,327	1,500	1,500
9. Reports issued by the Special Study of Securities Markets	1,308	7,000	
Total	55,042	69,000	51,000

OTHER SERVICES

The sum of $205,000 is required for the services described in the following table for fiscal 1964:

Item	Actual, 1962	Estimate, 1963	Estimate, 1964
Repairs to equipment	$15,261	$20,000	$20,000
Building alterations and moving expenses	74,946	25,000	10,000
Miscellaneous expenses	11,845	26,250	16,150
Contract stenographic reporting	165,524	50,000	150,000
Purchase of transcript	3,869	6,900	7,000
Background investigations	2,450	1,850	1,850
Investment company study	33,600		
Total	307,495	130,000	205,000

The increase of $75,000 in 1964 represents net changes to the following major items:

1. An increase of $100,000 for the stenographic reporting service. In 1963, it is anticipated that $50,000 will be required based on an unusually low bid by the contractor who expects that sales of transcript to the public will be substantial because of wide interest in the anticipated hearings to be conducted by the special study of securities markets, thus resulting in a lower cost of this service to the Commission. For 1964, the sum of $150,000 is required on the basis of an average cost of 65 cents per page for public and private hearings, and an average cost of $1 per page for investigations. These unit prices were applicable for 1962.

2. A decrease of $15,000 in minor building alterations and moving expenses.

3. A decrease of $10,100 due to completion of a tabulating project by the Bureau of the Census for the special study of securities markets.

4. A nominal increase of $100 for purchase of transcript.

STENOGRAPHIC REPORTING SERVICES

Mr. BOLAND. You spent $50,000 in the professional study in 1963?

Mr. DONATY. This was not the result of the special study. Actually, when we solicited bids for stenographic reporting, it was on the assumption there would be public hearings held by the special study in this fiscal year. As a result, the contractor submitted a low bid on the assumption he could make more income on the sales of the transcripts to the public. As a result, he gave us a low bid.

Mr. THOMAS. Why did they jump it to $150,000 this year, then?

Mr. DONATY. This is reverting back to what we had in 1962, when we spent $165,000.

Mr. THOMAS. How many bidders did you have?

Mr. DONATY. Four or five, sir.

Mr. BOLAND. You spent $165,000 in 1962, and $50,000 in 1963, and $150,000 in 1964.

Mr. DONATY. The reason we dropped in 1963 over 1962 was because the contractor assumed we were going to have public hearings, copies of which would be available to the public. By selling them he could give us a low bid, which he did.

(Discussion held off the record.)

Mr. DONATY. Of the $150,000 we are requesting next year this is based on unit prices we had last year in 1962.

Mr. THOMAS. How much a page?

Mr. DONATY. It averages 65 cents per page for public and private proceedings and approximately $1 for investigations. Incidentally, we had approximately 178,000 pages in fiscal 1962 at a cost of about $165,000.

Mr. JONAS. How do you select these reporters? Is it by competitive bids?

Mr. DONATY. Yes, sir.

Mr. JONAS. Strictly competitive?

Mr. DONATY. Yes, sir, we are forced to by regulation.

Mr. JONAS. You let it to the low bidder?

Mr. DONATY. Yes, sir.

Mr. JONAS. If he is competent?

Mr. DONATY. There are a number of factors—competency, financial ability, ability to carry out the contract.

Mr. JONAS. Do you always let it to the low bidder?

Mr. DONATY. We are required by law.

Mr. JONAS. You can throw out one as being incompetent?

Mr. DONATY. To the best of my recollection in the last 5 or 6 years I have been with the agency, we have not. My office looks over that bidding.

TRAVEL EXPENSE

Mr. WYMAN. On page 107 at the top you talk about 90 travel days. Then down in the third paragraph you talk about 45 travel days, 60 travel days. What do you mean by travel days? You mean that is the number of days that an examiner will be on the road traveling?

Mr. DONATY. He will be in travel status from the time he leaves his duty station to the time he comes back. This is 90 days out of 360 days.

Mr. WYMAN. That is in direct relation between the figure that is shown there and the number of travel days. You have a figure for each travel day times 90.

Mr. DONATY. Yes, sir, based on actual costs we figure, including per diem, transportation, and so on, it runs approximately $35 a day. We use this as a guide. We multiply $35 times 90 days.

In the particular case you mention, hearing examiners are on the road a lot.

Mr. JONAS. I don't understand the $35 a day.

Mr. DONATY. The $35 a day is an average we have struck.

Mr. JONAS. That includes transportation and dwelling?

Mr. DONATY. Transportation, per diem, and miscellaneous expenses. We pay $16 a day per diem.

Mr. JONAS. That is maximum?

Mr. DONATY. Yes, sir.

Mr. JONAS. You pay all the people in travel status that much? Does that include investigators?

Mr. DONATY. If we know a person will be out more than 2 months, we make arrangements with him to reduce the $16 down to $14 or $12, for example.

Mr. JONAS. Do you pay the same per diem to the examiners as you do investigators?

Mr. DONATY. Yes, sir.

PURCHASE OF TYPEWRITERS

Mr. WYMAN. At page 114 you show electric typewriters, 25, unit price $430. You intend to replace them. Then you say the total trade-in value is $750. You mean the 25 electric typewriters you now have will bring only $750 as trade?

Mr. DONATY. No, sir. What we will trade in are manuals for electric typewriters. The trade-in on the 25 typewriters will give us $750.

Mr. WYMAN. Manuals, not electrics?

Mr. DONATY. That is right.

Mr. WYMAN. It doesn't say that there.

Mr. THOMAS. Don't we still carry that limitation on typewriters? You get them from GSA?

Mr. DONATY. Yes, sir, they have schedules.

Mr. THOMAS. Off the record.

(Discussion held off the record.)

Mr. THOMAS. You buy through the General Services Administration?

Mr. DONATY. That is right.

Mr. THOMAS. What does an electric typewriter cost now?

Mr. WYMAN. The Executive is around $650 to $700. That is the top grade.

Mr. DONATY. We buy them for $430.

Mr. THOMAS. There is a 33⅓-percent reduction.

Mr. DONATY. Off the record.

(Discussion held off the record.)

EQUIPMENT

Mr. BOLAND. Insert pages 113 and 114 in the record regarding equipment.

(The pages referred to follow:)

EQUIPMENT

The following table shows the amount required for the purchase of equipment in 1962, the estimate for 1963, and the 1964 estimated requirements.

Item	Actual, 1962	Estimate, 1963	Estimate, 1964
Equipment	$192,910	$62,000	$50,500

For 1964, the amount of $50,500 represents the cost of items summarized in two major groups, which are explained later in detail:

1. Purchase of equipment for additional positions requested in 1964	$11,800
2. Replacement of equipment	38,700
Total	50,500

1. PURCHASE OF EQUIPMENT FOR ADDITIONAL POSITIONS

The following tabulation lists the items of equipment, which are the minimum requirements for the additional personnel requested in 1964:

Description	Unit price	Number	Total cost
Clerical desks	$160	41	$6,560
Typist desks	160	13	2,080
Rotary chairs	40	41	1,640
Typist chairs	30	13	390
Calculators	900	4	3,600
Typewriters	430	13	5,590
Subtotal			19,860
Less: Estimated cost of equipment to be obtained, as excess, from GSA			8,060
Total			11,800

2. REPLACEMENT OF EQUIPMENT

The request for $38,700 pertains to the following items:

A. Normal replacement of 25 existing typewriters, which are eligible for replacement under the GSA replacement standards.

Type	Quantity	Unit price	Replacement cost	Total trade-in value	Net cost
Electric	25	$430	$10,750	$750	$10,000

B. The agency utilizes approximately 200 adding machines and calculators, of which approximately 60 are more than 10 years old. The cost for servicing and repairing these machines is increasing. The net sum of $12,200, as shown below, is requested to replace 12 obsolete adding machines and 10 calculators.

Type	Quantity	Unit price	Replacement cost	Total trade-in value	Net cost
Adding machine	12	$300	$3,600	$300	$3,300
Calculator	10	950	9,500	600	8,900
Total					12,200

C. The present Commission car is a 1957 Ford station wagon and is eligible for replacement under the GSA standards. The net cost of a new vehicle after trade-in value ($550) is estimated at $1,400.

D. Conversion of upright filing cabinets to open shelf files at a cost of $7,000. This amount will permit the purchase of 100 complete sections of open shelf file units for normal expansion of records and files.

FEES COLLECTED BY THE COMMISSION

Mr. BOLAND. On page 116 we note you are going up $600,000 in fees for 1964, totaling $3,303,000 as opposed to $2,703,000 in 1963.

Are there any questions on page 116?

Mr. JONAS. Why did you go down in fees in 1963 as compared to 1962?

Mr. DONATY. In 1962, if I recall, we received 2,307 registration statements for which we obtained fees.

In fiscal 1963, this current year, we assume we will receive only 1,550 registration statements.

Mr. JONAS. How do you account for that?

Mr. CARY. The market break. Up to that point people were filing regularly.

Mr. JONAS. You should have come in and voluntarily offered to reduce about 100 positions, should you not?

Mr. CARY. Actually we came in before you to have more people, just before May 28, because we were so far behind——

Mr. JONAS. Off the record.

(Discussion held off the record.)

TEMPORARY EMPLOYMENT

Mr. BOLAND. Look at page 117, personal services other than permanent. This program includes temporary, part time and consultants, and serves as an avenue for recruiting.

Do you actually pick up any personnel through this program?

Mr. CARY. We have had a number who come with us and stay with us.

Mr. BOLAND. Any questions, gentlemen?

Mr. JONAS. You are not planning to use consultants?

Mr. CARY. We will have some consultants in this sense: For example, I am hoping to have Mr. Cohen stay with us as long as he can.

Mr. JONAS. Is he on leave from Pennsylvania?

Mr. CARY. Mr. Cohen is a practicing lawyer and a leading member of a Chicago firm from which he resigned to take this job.

Mr. JONAS. How about Wharton School?

Mr. CARY. They did the Wharton School report. This was on a contract basis.

Mr. JONAS. You did the other study within the agency?

Mr. CARY. That is correct.

Mr. BOLAND. Off the record.

(Discussion held off the record.)

Mr. BOLAND. Thank you, Mr. Chairman and gentlemen. It is always a delight to listen to you.

I think you have noted that your Commission is one of our favorites. We think the Commission works about as hard if not harder than any other Commission which appears before us. You do a fine job.

Thank you very much. Come back again any time.

Mr. CARY. We appreciate your confidence and we shall try to live up to it.

Mr. CONWILL. There are occasions when we do retain consultants for special purposes, thinking particularly of some rather difficult litigation we are now engaged in.

Mr. JONAS. That is shown blank in the justification.

Mr. CONWILL. It is only temporary for the purpose of litigation.

Mr. THOMAS. Thank you, gentlemen.

MONDAY, FEBRUARY 4, 1963.

VETERANS ADMINISTRATION

WITNESSES

J. S. GLEASON, JR., ADMINISTRATOR

DEPARTMENT OF MEDICINE AND SURGERY

G. C. PARMELEE, DIRECTOR, SUPPLY SERVICE

Mr. THOMAS. Gentlemen, will the committee please come to order.

The committee always looks forward to having with us the Veterans Administration and its very able and distinguished Administrator and his very capable and efficient staff.

INTRODUCTION OF STAFF

We have with us again the Administrator, Mr. John S. Gleason; Mr. Driver, the Deputy Administrator; Dr. Monk, the Associate Deputy Administrator; Mr. McAnsh, the Assistant Deputy Administrator—where is Mr. McAnsh?

Mr. MCANSH. Here, sir.

Mr. THOMAS. Good morning.

The Controller, Mr. Hansman—where is he?

Mr. HANSMAN. Here, Mr. Chairman.

Mr. THOMAS. Welcome aboard. It is nice to see you.

Mr. Shytle, the Director of the Budget Service. You have certainly done an outstanding job. Those tables tell the story.

Mr. SHYTLE. Thank you, sir.

Mr. THOMAS. But on the compensation and pensions next time break that down in the different categories and do not lump them all together. It is easy to pick out one or two little shortcomings in a budget, but I tell you it is a work of art to put it together like you have and you deserve a lot of credit, so we have nothing but praise for you.

Where is Mr. Turner, the Assistant Administrator for Appraisal?

Mr. TURNER. Here, Mr. Chairman.

Mr. THOMAS. How are you this morning?

Mr. TURNER. Fine, thank you.

Mr. THOMAS. You are in business in a big way, are you not?

Mr. Schmoll, the Assistant Administrator for Management Services. Where are you?

Mr. SCHMOLL. Here.

Mr. THOMAS. Good morning, sir.

Mr. Gorman, the Manager of Administrative Services. Where is Brother Gorman?

Mr. GORMAN. Here, sir.

Mr. THOMAS. It is good to see you.

Mr. Underwood, the Assistant Administrator for Personnel. Where is Mr. Underwood?

Mr. UNDERWOOD. Here, sir.

Mr. THOMAS. You have not put a green sheet in here yet, have you, and the closest approximation to it are your big overall tables and they are incomplete, but that is not too bad. We want to do a little business with you during the hearings. We want your green sheets for some of these divisions and you might be prepared to break down your pay raises and give us a little bit more information. Besides the salary increase we want to see the benefits.

Mr. Brickfield, the General Counsel. Where is the chief counsel?

Mr. BRICKFIELD. Here, sir.

Mr. THOMAS. Good morning, sir. How many chief attorneys do you have now in the VA?

Mr. BRICKFIELD. 65, Mr. Chairman.

Mr. THOMAS. Well, you have your hands full. You have a tremendous legal job. How much jurisdiction do you have over the other 65 chief attorneys?

Where is Judge Stancil, Chairman of the Board of Veterans Appeals?

Mr. STANCIL. Here, sir.

Mr. THOMAS. Judge, how are you doing?

Mr. STANCIL. Just fine, sir.

Mr. THOMAS. Nice to have you. I imagine you are importuned several times a week, are you not, Judge?

Mr. STANCIL. Yes, sir.

Mr. THOMAS. We think you do a terrific job.

Where is Mr. Hood, the Director of Information Service?

Mr. HOOD. Here, Mr. Chairman.

Mr. THOMAS. How are you doing this morning?

Mr. HOOD. Fine, thank you, sir.

Mr. THOMAS. You really have a nice staff all over the country.

Mr. Cook, the Acting Director of the Supply Management Service. Where is Mr. Cook?

Mr. COOK. Here, sir.

Mr. THOMAS. Nice to have you with us. Have you taken over the "merchant prince's" job altogether?

Mr. COOK. Acting as the "merchant prince" at the moment, sir.

Mr. THOMAS. Well, for the first time we finally have the supply operation all on one page where you can get a bird's-eye view. Was that your handiwork?

Mr. SHYTLE. We keep trying to give you what you need, sir.

Mr. THOMAS. Mr. Ashbridge, the Assistant Administrator for Construction. Where is the colonel?

Mr. ASHBRIDGE. Here, sir.

Mr. THOMAS. How is everything?

Mr. ASHBRIDGE. Fine, thank you, sir.

Mr. THOMAS. Mr. Schweickart, the Executive Assistant for Construction. Where is Mr. Schweickart?

Mr. SCHWEICKART. Right here, sir.

Mr. THOMAS. He is an oldtimer, is he not?

Mr. Hegner, Manager of Operations for Construction. Where is Mr. Hegner?

Mr. HEGNER. Here, sir.

Mr. THOMAS. Mr. Garver, the Chief of the Program Control Division for Construction. Where is Mr. Garver?

Mr. GARVER. Here, sir.

Mr. THOMAS. In the Department of Insurance we have Mr. Budd, the Chief Insurance Director. Where is Mr. Budd?

Mr. BUDD. Here, sir.

Mr. THOMAS. Nice to see you.

Mr. Watermeier, the Deputy Chief Insurance Director; Mr. H. J. Clarke, the Controller of the Department of Insurance; and Mr. Poissant, the Chief Actuary of the Department of Insurance. Where is Judge Poissant?

Mr. POISSANT. Here, sir.

Mr. THOMAS. Off the record.

(Discussion off the record.)

Mr. THOMAS. It is certainly nice to have with us our distinguished Dr. Middleton, the Chief Medical Director; and Dr. Engle, the Deputy Chief Medical Director. Where is Dr. Engle?

Dr. ENGLE. Right here, sir.

Mr. THOMAS. Good morning, Doctor.

Dr. ENGLE. Good morning.

Mr. THOMAS. Dr. Zink, the Assistant Chief Medical Director for Plans and Coordination. Where is Dr. Zink?

Dr. ZINK. Here.

Mr. THOMAS. Nice to see you.

Mr. Baker, the Controller for the Department of Medicine and Surgery. Where is Brother Baker?

Mr. BAKER. Here, sir.

Mr. THOMAS. He is an oldtimer; one of the pillars.

Mr. Wise, the Director of the Budget Service of the Department of Medicine and Surgery. Where is he?

Mr. WISE. Good morning, sir.

Mr. THOMAS. Brother Wise has been with us a long time. We could not run the Medical Department without him. The bed cost is going up all the time, Doctor. What will you do about it?

Where is Mr. Bucknell, the Director of the Veterans' Canteen Service of the Department of Medicine and Surgery?

Mr. BUCKNELL. Right here, sir.

Mr. THOMAS. Good morning. When is the Merchant Prince going to take you over or are you going to take over the Merchant Prince?

Mr. BUCKNELL. I think there are no plans for either, sir.

Mr. THOMAS. Why are there not?

Mr. BUCKNELL. I do not think it is appropriate that either be done.

Mr. THOMAS. Well, he is in the buying business and you are in the buying business, the taxpayers put you in business and are keeping you in business with a protective arm over your head. The Merchant Prince says he can buy cheaper than anybody in the country and if you listen to him long enough he will prove it, but I cannot understand his tables. Once he said for every $100 of sales it costs $4 to do business, and then at another place he says it is $11. I do not know what that includes. Is it all salaries? What about the other objects and so forth? You prepare yourself on that. That is Mr. Cook's problem, is it not?

Mr. COOK. Yes, sir.

Mr. THOMAS. And in the Department of Veterans Benefits we have Mr. P. N. Brownstein, the Chief Benefiter. Is is true what I read in the paper that we are going to lose Judge Brownstein?

Mr. GLEASON. That is correct.

Mr. JONAS. Off the record.

(Discussion off the record.)

Mr. THOMAS. Well, the Veterans' Administration's loss will be the gain of FHA. Judge Brownstein is an outstanding administrator and has turned in a magnificent performance with the Veterans' Administration. Mr. Gleason, the Administrator, thoroughly dislikes the idea of losing him but the people of the country generally will have the benefit of his good judgment and good service.

Mr. BROWNSTEIN. Thank you, sir.

Mr. JONAS. Was he not quoted as saying he did not like houses, that he likes apartments?

Mr. BROWNSTEIN. They were then talking about where I live.

Mr. JONAS. And not what you recommend for others.

Mr. THOMAS. Off the record.

(Discussion off the record.)

Mr. THOMAS. Mr. Farmer, the Director of Compensation and Pensions Service. Where is Judge Farmer?

Mr. FARMER. Here, sir.

Mr. THOMAS. Nice to see you. We were told the compensation and pension administrative expenses were going down and down, that they were processing the papers in Chicago with electronic equipment, and here we come up with 88 new jobs. Where is that reduction? Was it 88 new jobs?

Mr. GLEASON. Eighty-seven.

Mr. THOMAS. You would not trip me up for one job. Looking at your justifications, it says 88.

Mr. Dervan, the Director of the Loan Guaranty Service. Where is Brother Dervan?

Mr. DERVAN. Here, sir.

Mr. THOMAS. We are glad to have you. You think these foreclosures will slow down this year?

Mr. DERVAN. In the last fiscal year we acquired about 21,000 properties and the first half of this year we have acquired 12,391.

Mr. THOMAS. It does not look like it is slowing down, does it?

Mr. GLEASON. Our sales have been increasing.

Mr. THOMAS. Your budget indicates it will slow down by about 20 percent.

Mr. BROWNSTEIN. Our new defaults being reported are slowing down and we hope this will translate into fewer acquisitions in 1963.

Mr. THOMAS. Where is Mr. Silberman, the Controller of the Department of Veterans Benefits?

Mr. SILBERMAN. Right here, sir.

Mr. THOMAS. Where is Mr. Wells, the Assistant Controller of the Department of Veterans Benefits?

Mr. WELLS. Here, sir.

Mr. THOMAS. Mr. Wells has been with us a long time.

Mr. Duggar, the Chief of the Budget and Accounting Section for Construction. Where is Mr. Duggar?

Mr. ASHBRIDGE. He is in the other room.

Mr. THOMAS. And Mr. Burns, the budget analyst for construction?

Mr. ASHBRIDGE. He is also in the other room.

Mr. THOMAS. Mr. York, the Director of the Vocational Rehabilitation and Education Service. Where is Mr. York?

Mr. BROWNSTEIN. He is in the next room, Mr. Chairman.

Mr. THOMAS. Mr. P. H. Thomas, the Director of the Guardianship Service. Where is Mr. Thomas?

Mr. BROWNSTEIN. He is with Dr. York, and Mr. Koseluk is there, too.

Mr. THOMAS. Mr. Koseluk is Director of the Administration and Data Processing Service, and Acting Director of the Contact and Foreign Affairs Service.

OPERATIONS IN FOREIGN COUNTRIES

Which countries are we operating in now?

Mr. GLEASON. The Philippines and Italy.

Mr. DRIVER. We distribute benefits in 110 countries now, Mr. Thomas.

Mr. THOMAS. Where are your foreign offices?

Mr. GLEASON. Rome and Manila.

Mr. DRIVER. And Puerto Rico.

Mr. THOMAS. Do you not have some people in France?

Mr. BROWNSTEIN. Those are under the State Department. There is a Foreign Affairs Service Officer in Paris, one in London, one in Frankfurt, and one in Rome.

Mr. THOMAS. How many do you have altogether in foreign countries?

Mr. BROWNSTEIN. Foreign Affairs Service Officers in toto in Europe, seven, then there are clerical assistants who are natives.

Mr. THOMAS. Clerical assistants to whom?

Mr. BROWNSTEIN. To the Foreign Affairs Service Officers. These are not on our payroll. These are on the State Department payroll. I think the total staff in all European offices is 22.

Mr. THOMAS. About seven or eight in each?

Mr. BROWNSTEIN. Frankfurt is the largest.

Mr. THOMAS. Are they operated by transferred funds?

Mr. DRIVER. Partially. We pay an average of $10,000 to $12,000 annually.

Mr. THOMAS. Those services do not serve any useful purpose. You have people going to school in foreign countries drawing GI benefits and if they are old enough to go in the service and old enough to go to school in a foreign country they could receive their checks through the mail.

Mr. BROWNSTEIN. Most of them are compensation and pension payments and now under the new law there is a hospital provision for those permanently residing abroad. Formerly that provision had been only for those temporarily residing abroad.

Mr. THOMAS. Those offices can be closed down. I notice you are transferring some people to Manila and the transportation of household goods alone is $4,000 apiece.

Mr. BROWNSTEIN. We have a rotation plan on the people in Manila.

Mr. DRIVER. It is our largest foreign office. There are about 350 employees in Manila.

Mr. GLEASON. About 65 percent of the Embassy staff is over there, sir.

Mr. THOMAS. The transportation cost, not the travel cost of the employee but the transportation of household goods, if my memory is right, is $4,000 apiece. Or is it $3,000?

Mr. MONK. Close to $3,000.

Mr. JONAS. Will the chairman yield?

Mr. THOMAS. Go ahead, Mr. Jonas.

Mr. JONAS. In how many Iron Curtain countries do we have people receiving benefits?

Mr. DRIVER. None. We specifically refrain from paying benefits to Iron Curtain country people. The only places we make a distribution of money are where we can be sure the beneficiary gets the benefit.

Mr. JONAS. How can you be sure?

Mr. DRIVER. We go in and actually see the people.

Mr. JONAS. What group constitutes the people abroad receiving benefits?

Mr. DRIVER. The largest group are the Filipinos. We are spending $47 million a year in benefit payments in the Philippines and $24 million in the rest of the world with $16 or $18 million of that going in Western Europe.

Mr. JONAS. Are beneficiaries mostly U.S. nationals working abroad temporarily?

Mr. DRIVER. No, sir. Most of them would be pensioners, such as in Italy, men who were here in our country and served in our forces in World War I and after they worked 20 or 25 years and retired they

went back home. They are not citizens but they served in our Armed Forces. They live in Greece and Italy mostly.

Mr. BROWNSTEIN. About 60 percent of our European payments are paid to beneficiaries in Italy and Greece.

Mr. THOMAS. The record should be clear that these people were residents of the United States and served in the U.S. armed services and they were inducted in the military service of the United States while they were living in the United States. They were legally here.

Mr. DRIVER. Right.

Mr. THOMAS. And then, for reasons which were their own choosing, and certainly legal, they decided to go back to their old countries.

Mr. DRIVER. In that regard, just recently the Treasury Department has suspended the distribution of checks in Cuba. They had been distributing them through the Swiss Embassy until about a month ago, when it became so uncertain where the money went, they have been suspended.

Mr. JONAS. What do you do, impound the money?

Mr. DRIVER. The Treasury Department holds it up.

Mr. THOMAS. Mr. Administrator, do you have a statement for us? If so, we will be glad to listen to it. The budget is really running into money, in round figures, $5,430 million. That is real money.

GENERAL STATEMENT

Mr. GLEASON. Mr. Chairman and gentlemen of the committee, this committee has always shown a keen and deep interest in the Veterans' Administration and the manner in which it conducts its programs. Your suggestions always have been most helpful and in the best interest of the veteran and his dependents. I am honored to appear before you today with my staff to explain the fiscal year 1964 appropriation requirements of the Veterans' Administration. I also wish to highlight for you our progress since I last appeared before you on January 23, 1962.

Our budget request for fiscal year 1964 totals $5,429,462,000. This represents an increase of $35,351,000 from the amounts appropriated for fiscal year 1963, including pending supplementals. The accompanying table shows a comparison of our needs, by appropriation, with those of this year. Before explaining major elements of our budget estimate for fiscal year 1964, I would like to discuss briefly where we have been and where we are going.

AUTOMATIC DATA PROCESSING

Since we were last before you, the Veterans' Administration has made significant strides in the area of automatic data processing. As of now, virtually all of our compensation and pension accounts, totaling some 4.5 million, are on our computer equipment at the Hines, Ill., Data Processing Center. At our Philadelphia Center, 4.5 million national service life insurance accounts have also been placed on our computer there. By December 1963, U.S. Government life insurance accounts will be phased into this equipment.

These actions have already resulted in substantial savings in administrative costs and we are hopeful that we will be able to realize sub-

stantial additional economies in the future. An example of the savings realized by our data automation program is the payment of the accelerated regular and special dividends in early January. These dividends were processed mechanically by the Philadelphia Center. By January 7, 3.2 million checks were in the mail, or in the hands of the policyholders. The entire dividend payment was completed by the end of January. The estimated cost of this administrative processing was approximately $100,000. Based on past experience, it would have cost $1.3 million, or more, to pay this dividend on a manual basis. In addition, the payments would have been spread over many months. If all of our life insurance accounts were on tape, the estimated cost of payment would have been approximately $25,000. The above figures relate to differentials in cost of personal services. Service is improved and costs are down by using this equipment. Our future plans call for the aggressive exploration of other profitable data automation applications in the Veterans' Administration. Our Department of Medicine and Surgery has also made substantial progress in this area. Current studies looking toward the automation of patient data and research support data should make a substantial contribution to the advance of medicine, not only in the Veterans' Administration, but within the entire medical profession.

As you will remember, when we were before you last year to explain our fiscal year 1963 budget request, we discussed the relative merits of purchase versus rental of computer equipment. After our meeting, we examined this more carefully and determined that purchase would be to the definite advantage of the Government. In February 1962, I ordered a tightening of the belt in all Veterans' Administration activities. As a result, we were able to purchase computer equipment costing $2.8 million, from available fiscal year 1962 funds.

Then, as a result of further belt tightening in our plans for fiscal year 1963, we have been able to purchase additional computer equipment, costing $3.0 million, this year. To summarize, the total cost of this equipment has been $5.8 million. However, the total annual savings in rent, making allowances for all other factors such as service, etc., is $1.6 million per year. In other words, the cost of this major computing equipment will be amortized in about 3½ years through rental savings. The support of this committee has made the above possible.

PAY RAISE COST AND ABSORPTION

One other item that deserves comment at this time relates to the pay raise legislation, Public Law 87–793, and what we did about it. The total fiscal year 1963 cost of Public Law 87–793 for all Veterans' Administration activities was $32,469,000. The act provided that departments and agencies absorb the cost of increases to the fullest extent possible. I am proud of our accomplishments in this area. Of the $32.5 million total cost in fiscal year 1963, we have been able to absorb in excess of $12 million. Over $5 million is reflected as a direct absorption of pay act and wage board increases, and some $7 million is represented by the absorption of unbudgeted cost increases that arose after the fiscal year 1963 budget was formulated. We are continuing our efforts to become more efficient in all areas of our operations.

EQUIPMENT PROGRAM

A significant feature of medical operations is the continuation of the program you approved last year to start bringing the equipment in our hospitals and clinics to a satisfactory operating level.

Before initiating this program, the condition of much of our medical care equipment posed a serious problem. Average annual expenditures during the prior 5 years for this purpose, in relation to the total value of all equipment, indicated a replacement cycle of almost 35 years, compared to the 10- to 15-year life expectancy standard developed by the major medical associations as guides for their member hospitals.

A study, conducted jointly with the Bureau of the Budget, resulted in a new system which enables us to determine by fiscal year when each item of equipment should be replaced, on the basis of established life-expectancy standards. This study, completed late in fiscal year 1962, disclosed that at the start of fiscal year 1963 there existed a backlog of replacement needs exceeding $18 million at current price levels.

Due to your help last year, we expect to reduce this backlog to about $9 million by the end of fiscal year 1963. Your approval of our fiscal year 1964 request will practically eliminate the backlog (to less than $1 million). In future years, our requests will be geared to the timely replacement of equipment when maximum useful life expectancy has been reached.

Your continued support of our objective in this area cannot help but improve both the efficiency and quality of medical care given our veteran patients.

ORGANIZATIONAL CHANGES

I am continuing to study the organization of the Veterans' Administration. Of immediate importance to this committee are the following actions:

AREA MEDICAL DIRECTORS

1. In December, I directed the Chief Medical Director to move his area medical directors to Washington. Within the past few days, this transfer has been effectively completed. This action brings the policy and decisionmaking aspects of the area medical office to Washington, reporting directly and responsible to the Chief Medical Director through the Deputy Chief Medical Director. The seven area offices, representing the review and appraisal aspects of the program, remain operative. I am convinced that the move of the area medical directors to Washington to shorten the span of control is essential to the effective operation of this program.

CLOSING OF CONTACT OFFICES

2. In December, I ordered the closing of 26 of the existing 35 Veterans' Administration contact offices. The nine remaining contact offices contain special activities, such as loan guaranty and medical functions. All these offices, which numbered more than 1,000 at one point, served a valid and useful purposes over the years, but they are now no longer essential to the effective operation of the various vet-

erans' programs. We will, however, continue to maintain approximately 235 contact locations, with more than 900 contact employees, at Veterans' Administration field installations to serve the Nation's veterans and their dependents. In addition, necessary itinerant service will be provided.

INSURANCE ACTIVITIES

3. When the present organizational structure was established in 1953, the Department of Insurance had 11,103 average employment. Our fiscal year 1964 projection for all insurance activities calls for an average employment of 2,641—or a reduction of 8,462 average employees in 11 years. This substantial reduction of 76 percent in employment has been accomplished even though workloads have decreased very slightly. For example, there were 7,320,000 policies in force in 1953. Our estimate for fiscal year 1964 is 5,887,000 policies in force, or a reduction from fiscal year 1953 of less than 20 percent, while employment has decreased 76 percent. In fiscal year 1950 the unit operating cost per policy in force was $9.03. In fiscal year 1964 we are projecting a unit operating cost per policy of $3.41.

As you know, the question of merging insurance offices has been and continues to be reviewed from time to time. On August 17, 1961, the chairman of the Veterans' Affairs Committee requested the General Accounting Office to conduct a study of the present three insurance offices and to advise him of their findings as to the feasibility and desirability of merging these offices into one or two offices instead of the present three. This was done and House Committee Print No. 257, dated November 9, 1962, clearly established all of the facts relating to this matter, as well as our response thereto.

We have continued our study of this matter and after giving careful consideration to all factors, such as the optimum size of the operation; the labor market, including availability of employees, turnover rates, productivity of employees; the availability and location of space; and other factors, I have determined it desirable to direct the following changes:

(*a*) consolidate the insurance activity at Denver with the St. Paul office, thereby serving the policyholders from two locations instead of the present three;

(*b*) consolidate the Department of Insurance in the organizational structure of the Veterans' Administration with the Department of Veterans' Benefits; and

(*c*) consolidate the regional office functions located in Philadelphia with the Insurance Center at Philadelphia. The outpatient clinic will remain in its present location until such time as it can be consolidated and merged with the hospital operation at Philadelphia. The consolidation of Insurance and Department of Veterans' Benefits activities in central office and in the field at both Philadelphia and St. Paul will pay considerable dividends in economies, as well as service in the future.

DEPARTMENT OF DATA MANAGEMENT

4. In order to exploit fully the increased efficiency and economy inherent in automation, I believe it is necessary for the administrative organization of the agency to keep pace with the improvements in

equipment technology and systems techniques. Fragmented systems patterned along organizational lines are no longer practical, since they do not enable us to view all aspects of the system. We must make certain that the total system is considered in all facets of system design and total operations of the agency. Therefore, I have directed the establishment of a separate operating department, i.e., Department of Data Management, that reports directly to my office and with the same status as the Department of Veterans' Benefits and the Department of Medicine and Surgery.

The study required prior to my final decision on these organizational changes has made it impossible to reflect them in our fiscal year 1964 budget submission now before you for consideration. It is my judgment that in fiscal year 1964, due to one-time costs inherent in organizational changes of this magnitude, savings will not be substantial, although I firmly believe that savings and improved service in future years will be significant. I do not visualize material savings will be immediately possible—in fact, additional expenditures may be required in establishing our Department of Data Management. I do feel that in the near future economies will result from the consolidations which I have directed. They will be realized as rapidly as possible and will be reflected in our fiscal year 1965 budget submission. I am unable to be more specific at this time, but I am sure we will accrue very worthwhile future benefits from these organizational changes in both service and more efficient and economical operations.

As previously stated, our request for fiscal year 1964 of $5,429,462,000 represents an increase of $35,351,000 from the estimated fiscal year 1963 requirements, including pending supplementals. This request contains specific provisions for the following:

1. Continued improvement in the quality of medical care;
2. Elimination of virtually all of the backlog of replacement equipment in our hospitals and clinics;
3. The fourth annual increment to finance our long-range hospital modernization and replacement program;
4. Rising costs of veterans' pensions, caused by our aging veteran population; and
5. Further decreases in the administrative cost of operations.

Of the total request, about 97 percent, or $5,256,355,000, is for:

1. Medical care;
2. Direct benefit payments to eligible beneficiaries; and
3. Modernization, improvement, and repair in our medical facilities.

GENERAL ADMINISTRATIVE COSTS

Our administrative costs, estimated at $173,107,000, or about 3 percent of our total budget, are $606,000 less than our estimate for the current year. These funds are requested for use as follows:

Staff services	$16,571,000
Department of Veterans Benefits	123,128,000
Department of Insurance	20,051,000
Medical administration	11,528,000
Assistant Administrator for Construction (Central Office)	1,829,000
Total	173,107,000

Our average employment level in administrative activities of 19,765 for fiscal year 1964 represents a decrease of 689 from the current year. Since 1947, our average employment in these activities has been reduced approximately 82 percent. We are proud of the improved productivity of our employees and are continuing to make considerable progress in the development of more efficient systems to render better service to our Nation's veterans.

STAFF SERVICES

The fiscal year 1964 estimates reflect a decrease of eight in average employment from the current year. The level requested for all staff activities of 1,502 average employment will enable us to continue the top management direction which has resulted in substantial gains to date. The overall cost reflects an increase of $492,000 over the fiscal year 1963 level, due principally to pay increases provided by Public Law 87–793 and two extra paid days in fiscal year 1964.

DEPARTMENT OF VETERANS' BENEFITS

The Department of Veterans' Benefits will require $123,128,000, an amount $2,829,000 above the fiscal year 1963 level. This increase in dollar cost is necessary chiefly because of Public Law 87–793 pay increases, even though the average employment request for fiscal year 1964 is down 324.

The employment decrease of 324 represents substantial gains in manpower utilization. Improved efficiency, continuing organizational and functional changes, coupled with some minor decreases in workload, account for this improvement.

As I previously mentioned, automatic data processing is paying substantial dividends. Payment and accounting for disability and death benefits, which involves processing and issuing monthly benefit checks to about 4½ million veterans and their dependents, are presently on the computer equipment at the Hines Data Processing Center. Data on magnetic tape is provided the Treasury Department, which produces checks automatically from the tape. Data is included in the tape to permit automatic presorting of checks by destination code. The system also provides accounting, statistical, and management reports. I expect even more progress in the very near future.

Vocational rehabilitation and education will continue to decline, notwithstanding the vocational rehabilitation and education bill, Public Law 87–815, passed late inthe last session of Congress. We expect a decrease from fiscal year 1963 to fiscal year 1964 of approximately 24,000 in the average number of Korean conflict trainees. The estimated average personnel reduction for this function from fiscal year 1963 to fiscal year 1964 is 71. The rapidly declining workload in this area has required that we consolidate administrative processing at a number of our stations. At present, the number of field stations having responsibility for education and training programs is 29. During fiscal year 1964 we will continue to review workloads in this program and effect further consolidations where warranted.

Our fiscal year 1964 projection for the loan guarantee program provides for a decrease in average employment of 69 from the fiscal

year 1963 level. This reduction is attributable to a projected leveling off of workloads in 1964. Operational responsibilities in the program to date have represented an initial contingent liability on the part of the Government of over $29 billion on loans aggregating over $54 billion in principal amount; a mortgage loan portfolio with an asset value of approximately $1.8 billion; property holdings having a value in excess of $231 million; and other assets receivable in excess of $28 million. These figures are cited to emphasize the magnitude of the program and the importance of effective management.

In the area of the Chief Attorney, we are estimating a decrease of 60 average employment from fiscal year 1963 to fiscal year 1964. This program has served the veteran's dependents well and represents a model of true service where and when it is needed. We have reached the point now when a fresh look is required of our mission and the procedures necessary to perform this function. We will deal with these problems carefully and continue to be sure that the interest of the veteran's dependent is protected.

Our compensation and pension employment is estimated to increase by an average of 87 employees in fiscal year 1964. This increase is attributed to recent legislation (Public Law 87–666) which requires that we furnish a "statement of the case" to any claimant or his representative who expresses dissatisfaction with our initial determination on a compensation or pension claim.

We continue to make substantial gains in the effectiveness of our office services. The average employment level in fiscal year 1964 is expected to decrease 99 from the current year.

DEPARTMENT OF INSURANCE

As previously explained, the Department of Insurance continues to make significant progress. Our estimated average employment in fiscal year 1964 is down 402 from the fiscal year 1963 level. Employee productivity is increasing and systems continue to improve. I have directed that the changes in organization previously mentioned to you be completely accomplished within the scope of this budget. We hope that further savings can be made. However, at this time I am not in a position to spell out the exact requirements of the revised organization in detail, except to assure you that it will be done within the budgetary amounts requested.

MEDICAL ADMINISTRATION AND MISCELLANEOUS OPERATING EXPENSES

The fiscal year 1964 budget estimate reflects an increase over the fiscal year 1963 expected level of 45 man-years and $989,000. All but approximately 15 man-years of this increase were previously authorized by this committee for fiscal year 1963. The late enactment of the fiscal year 1963 appropriation bill and pending organizational changes precluded the addition of the fiscal year 1963 authorized employment until late in the current year. The new request for 15 man-years over the previously authorized level is to conduct a special nursing home study. We propose to undertake this study at the request of the chairman, Veterans' Affairs Committee, as endorsed by the Bureau of the Budget. The 15 additional employees include 10 social workers

and 5 clerical employees who will examine available resources for maintaining, outside of Veterans' Administration installations, patients and members in useful and productive lives.

The 45 man-year increase is distributed as follows:

Department of Medicine and Surgery, central office	4
Department of Medicine and Surgery, area offices	19
Assistant Administrator for Construction	7
Special nursing home study	15

Of the increase in cost of $989,000—$596,000 is attributable to average salary increases, most of which is the result of pay raise legislation, and $82,000 for the 2 extra days. We are not in a position at this time to spell out the details of the transfer of area medical directors to Washington, but, again, I have directed that it be accomplished within the amounts requested.

MEDICAL AND PROSTHETIC RESEARCH

Our request for $33,742,000 for this purpose in fiscal year 1964 is $3,242,000 more than the amount estimated for fiscal year 1963. Of this request, $1,275,000 is for prosthetic research, representing an appropriation increase over fiscal year 1963 of $275,000 for this purpose. Public Law 87–572 removed the appropriation limitation of $1 million for this function. The extremely modest increase of $275,000 will offset to some extent the inflation of research costs over the years and permit the Veterans' Administration to continue its major role in the prosthetic research field.

For medical research, the fiscal year 1964 request reflects an increase over fiscal year 1963 of $2,967,000. This increase provides an orderly and manageable growth pattern for the Veterans' Administration in this important area and is in accord with our 10-year long-range plan.

Although still a young program, Veterans' Administration medical research has paid big dividends in its contributions to scientific knowledge. In addition, the program is a major factor in maintaining the close relationships existent between the Veterans' Administration and the medical schools. Research, however, is not limited to these hospitals and many nonaffiliated hospitals have vigorous programs. In these, too, research is instrumental in attracting physicians of the highest grade and comparably trained bioscientists. The excellence of patient care throughout the Veterans' Administration hospital system is largely an indirect result of the research program.

MEDICAL CARE

We are requesting $1,087,688,000 for fiscal year 1964, an increase of $69,796,000 over the fiscal year 1963 annual appropriation. However, considering the supplemental for the pay raise (Public Law 87–793) and wage board increases of $31,874,000 to be added to fiscal year 1963, the true appropriation increase from fiscal year 1963 to fiscal year 1964 is adjusted to $37,922,000. Of this increase, $31,104,000 is attributable to the pay raise, periodic step increases, 2 extra paid days, and 1 extra calendar day in fiscal year 1964 over fiscal year 1963. Therefore, all other program changes, including the complete activa-

tion of our new Brecksville, Ohio, hospital, initial activation of additional beds at our new Washington, D.C., hospital, the activation of the restoration center at East Orange, N.J., increased cost of drugs, and other adjustments in staffing, net out to less than $7 million. Our total employment increase for all purposes is 550 average employment in fiscal year 1964 over fiscal year 1963.

This request provides for the treatment of 10,000 more patients and 18,000 more prepost and trial visits in fiscal year 1964 over fiscal year 1963. As we explained to you last year, we are particularly impressed by the fact that we are able to care for more patients in approximately the same number of beds. For example, since fiscal year 1960, our patients treated workload has increased from 637,377 to our present fiscal year 1964 projection of 708,508, an increase of 71,131 patients cared for in practically the same number of beds. Our chart on pages 22–21 of volume II of the justification spells out clearly the increased workload in our hospitals.

MEDICAL CARE PATIENT LOAD

Mr. THOMAS. May I interrupt you there? Look at the other side of the coin and see what your words imply. Do they imply that in years gone by, particularly in 1960 and 1961, that you had a backlog of patients that you were not able to give any medical attention to?

Mr. GLEASON. Yes, sir. We had quite a substantial waiting list. Through the prehospital and posthospital care program that was initiated and permitted by the Congress 2 years ago we are now able to take care of that many more patients.

Mr. THOMAS. Let us analyze the statement. You had a limitation of 125,000 beds?

Mr. GLEASON. Yes, sir.

Mr. THOMAS. For how many years?

Mr. GLEASON. Since 1959.

Mr. THOMAS. It has been testified time and time and time again that there was no backlog for service-connected cases.

Mr. GLEASON. That is correct, sir.

Mr. THOMAS. What was your backlog for 1960, 1959, and those years on your non-service-connected cases?

Mr. GLEASON. I do not know that we have those figures available.

Dr. MIDDLETON. In the neighborhood of 25,000. I will have to get the exact figures.

Mr. BAKER. It was about 25,700 in March of 1960, and it is now down to around 17,100; about an 8,600 decrease.

Mr. THOMAS. Are they TB cases, general medical, or NP cases?

Mr. BAKER. At the present time, December 31, 1962, the total was 17,133. Of these 12,103 are psychiatric, 3,120 medical, and 2,210 surgical.

Mr. THOMAS. As to the number of patients waiting to be served, what part of those cases were bed cases that actually went into a hospital for treatment?

Mr. HANSMAN. They all went into the hospital.

Mr. THOMAS. It was not outpatient clinic work?

Mr. HANSMAN. No, sir; inpatient care.

Mr. THOMAS. What is the reduction from 1959 up to now in the days that the average patient spent in the hospital?

Mr. GLEASON. Mr. Chairman, I can give you these figures accurately if you would like from our annual report which we just sent over the weekend to all of the members here. The waiting list consists of veterans who have applied for VA hospitalization, determined legally eligible for VA inpatient care but not scheduled for admission. At the end of fiscal year 1962, the total number of applicants on the waiting list was 18,428, of which 45 were TB, 6,282 medical, surgical, or neurological, and 12,101 psychiatric. None of these applicants had service-connected conditions. The number of applicants awaiting admission to a VA hospital was 344 less on June 30, 1962, than at the end of the prior fiscal year. Of the more than 12,000 psychiatric patients on the waiting list two-thirds were already in hospitals but not as beneficiaries of the Veterans' Administration.

Mr. THOMAS. Were they former patients or first-time patients?

Mr. GLEASON. Generally, they were first-time patients. As the veteran population gets older, there is a need for greater medical attention. Our World War I veterans are requiring more hospital treatment.

Mr. THOMAS. Do you have any information on the period of time they stay in the hospital?

Mr. GLEASON. Approximately, sir, it is about 30 days for general medical and surgical.

Mr. THOMAS. Has there been a reduction?

Mr. GLEASON. It is down slightly. This is very difficult for us to bring this down, Mr. Chairman, because as you know, we do not have pediatrics, gynecology, or obstetrics in our hospital, which are short-time stay and the ones that we do care for are all of elderly nature and of course it takes longer for them to get well.

Dr. MIDDLETON. Mr. Administrator, if I may answer directly to this question, we could do so, Mr. Chairman, if we took specific conditions, I imagine.

Mr. THOMAS. Doctor, how do you explain the number of patients treated if there has been no reduction in the period of time a patient stays in the hospital and there has not been an increase since 1959 in the number of beds? Does that indicate that the hospitals before 1959 were not running at their maximum bed capacity?

Dr. MIDDLETON. The new bill made it possible for us to take care of patients in the order of prebed care, for laboratory tests, and so forth, of the non-service-connected veterans, who were scheduled for admission. Under those terms the time of stay for hemorrhoidectomy in that period of time has been reduced 1 day, herniotomy has been reduced 2 days; so in those two specific cases where you can pinpoint the surgical indication there has been a gain. If you multiply that by the number of patients who had those operations, you have some idea of what could be gained from the other part.

Mr. THOMAS. What part of the patient load goes to the hospital with one purpose in mind, for another purpose of looking toward compensation or pension?

Dr. MIDDLETON. That is outpatient in the main.

Mr. THOMAS. No bed care.

Dr. MIDDLETON. Those who need further study will be admitted. You are relating this question, as I judge, to the matter of compensation or pension and that goes to the outpatient service.

Mr. THOMAS. What part of your total workload of the outpatient service then is related to that type of case where he is looking for more evidence of either increase or decrease in pension?

Dr. MIDDLETON. We have those exact figures.

(NOTE.—The Veterans' Administration subsequently indicated 10 percent.)

Mr. THOMAS. We will go into the details later. Go ahead, Mr. Administrator. I beg your pardon for interrupting.

INPATIENT CARE

Mr. GLEASON. Our request anticipates a cost of $992,715,000 for inpatient care activities in fiscal year 1964—an increase of $34,935,000 over current year levels. Of the total increase, $24,957,000 is attributable to average salary and pay increases granted by Public Law 87–793 and $6,354,000 for the 2 extra paid days and 1 extra calendar day in fiscal year 1964 over fiscal year 1963. Therefore, the net program gain in fiscal year 1964 over fiscal year 1963 is $3,624,000.

We are continuing to operate our hospital system under the hospital bed ceiling of 125,000 established by the President on February 26, 1959. In fiscal year 1964 we plan to operate 121,486 hospital beds and 16,431 domiciliary beds for a total of 137,917 Veterans' Administration beds. We estimate that we will experience an average daily patient load in Veterans' Administration beds of 127,136, which represents 92 percent occupancy. The total of all beneficiaries to be cared for by the Veterans' Administration in fiscal year 1964, including contract hospitals and State homes, is expected to amount to a daily average of 139,055.

If our budget request is approved, our overall staffing ratio in Veterans' Administration hospitals will continue to improve from 1,077 employees per 1,000 average daily patient load in fiscal year 1963 to 1,085 employees per 1,000 average daily patient load in fiscal year 1964.

To recapitulate, the major items provided for in our inpatient medical care budget request are—

1. Annualization of the cost of full activation at the Veterans' Administration hospital, Brecksville, Ohio;
2. Initial activation of additional beds at the Veterans' Administration hospital, Washington, D.C.;
3. Initial activation of the restoration center at East Orange, N.J.; and
4. Increased costs and usage of drugs, medicine, medical supplies, and utilities, etc.

OUTPATIENT CARE

Our outpatient care operations are estimated to cost $100,149,000 in fiscal year 1964, an increase of $3,388,000 over fiscal year 1963. Of this increase, $2,793,000 is required to cover the cost of Public Law 87–793 salary increases and within-grade increases, and the 2 extra paid days. The additional $595,000 will be used to employ 28 addi-

tional personnel for professional care of patients in one new audiology clinic and five new day-care centers. It is estimated that we will have 47,000 more staff visits in fiscal year 1964 than is estimated for the current year.

COMPENSATION AND PENSIONS

We are requesting $3,921 million under this title for fiscal year 1964, which is an increase of $47 million over the amount needed for the current year. These funds are to finance an average case load for both compensation and pension of 4,384,157, which is an increase of 62,374 over the current level.

COMPENSATION

The estimate for fiscal year 1964 of $2,061,283,000 for compensation represents a decrease from fiscal year 1963 of $25,138,000. This downward trend in compensation is expected to continue, due primarily to death of veterans now on the rolls. We are estimating a case load of 2,332,185 for fiscal year 1964, which is a decrease of 22,350 from the fiscal year 1963 estimate.

PENSION

Our pension rolls are expected to continue to increase, due to the advancing age of the veteran population. These rolls are expected to average 2,051,972 in fiscal year 1964, which represents an increase of 84,724 cases over fiscal year 1963. The $1,799,840,000 requested for fiscal year 1964 for pensions represents an increase over fiscal year 1963 of $63,477,000.

OTHER MISCELLANEOUS BENEFITS

Included in this category are retired officers (emergency officers' retirement), adjusted service and dependents' pay, subsistence allowance, burial allowances, special allowance—dependents, and invalid lifts. The estimate for fiscal year 1964 includes $45,745,000 under "Burial allowances," which provides for 181,200 burial awards, or 5,800 more than our present estimate for fiscal year 1963. This cost, of course, can be expected to increase with the advancing age of the veteran population.

The total provided in the estimate for all other items listed above is only $14,132,000. The largest item in the "Other" category is subsistence allowance, which amounts to $11,262,000.

READJUSTMENT BENEFITS

We are requesting $101,100,000 for fiscal year 1964, which represents a reduction from fiscal year 1963, including pending supplementals, of $53,975,000. Of the amount requested, $56,751,000 is for education and training, $34 million is for transfer to the loan guarantee revolving fund, and $10,349,000 is for special assistance to disabled veterans.

EDUCATION AND TRAINING

World War II: The tremendous World War II training program has virtually drawn to a close. In fiscal year 1962 we had an average of only seven trainees. We estimate that the cost of this program in fiscal year 1963 and fiscal year 1964 will be negligible. As a matter of interest, during the course of this World War II training program, we received more than 11 million applications for training, and about 8 million entered training. I feel that this program has contributed substantially to the well-being of the entire Nation as we view it today.

Korean conflict: Our estimated average training load for Korean conflict veterans is projected at 28,000 for fiscal year 1964, a decrease of 24,000 from the current year level. The estimated cost of $35,-301,000 for fiscal year 1964 represents a decrease of $28,861,324 from current year requirements.

War orphans: We estimate the war orphans average traning load will decrease from 15,000 in fiscal year 1963 to 13,000 average trainees in fiscal year 1964. The cost is estimated at $21,450,000 for fiscal year 1964, a decrease from fiscal year 1963 of $3,300,000.

SPECIAL ASSISTANCE TO DISABLED VETERANS

The fiscal year 1964 budget estimate for this item is $10,349,000 or an increase over fiscal year 1963 of $1,857,000. Included in this item is vocational rehabilitation for disabled veterans, housing grants, and automobiles or other conveyances for disabled veterans. The entire increase is the result of Public Law 87–815 for extended vocational rehabilitation benefits to peacetime veterans.

TRANSFER TO LOAN GUARANTEE REVOLVING FUND

We are requesting $34 million for transfer to the loan guarantee revolving fund in fiscal year 1964 to supplement income of that fund to meet the high cost of claims and property acquisitions.

LOAN GUARANTEE REVOLVING FUND

The high cost of claims, property acquisitions, and other property management and sales expense continue to be a matter of grave concern to me at this time. Our revised fiscal year 1963 requirements are now estimated at $311,603,000, which contemplates a supplemental of $59,275,000 for the current year. Our estimated expenditures for fiscal year 1964 of $246,240,000 are based on a projection of continued improvement in economic conditions, dislocations, and so forth.

Our estimate for the current year and the pending supplemental are based on the projected sale of $150 million of mortgage loans to private investors. Our fiscal year 1964 projection contemplates the additional sale of $147 million of loans. We are reasonably sure that we can make the projected sale in fiscal year 1963. We will do all we can to sell as many loans as possible in fiscal year 1964. If we are unable to meet these sales figures, or if expenditures exceed estimates, our added requirements will have to be met from direct appropriations. In view of the uncontrollable nature of the expense involved

in property acquisitions and other loan guarantee costs, we are asking that the limitation on expenditures placed in previous appropriation acts be removed.

CONSTRUCTION

Our fiscal year 1964 "Construction" appropriation request is $81 million. This represents the fourth increment under our long-range modernization and replacement program. Major items included are—

1. Construction funds for a new 480-bed hospital for Gainesville, Fla.;
2. Construction funds for replacement hospitals at Long Beach Calif.; Oteen, N.C.; and Temple, Tex.;
3. Design and site funds for a new 1,000-bed neuropsychiatric hospital at Long Island, N.Y.;
4. Design funds for new hospitals at Los Angeles, Calif., and San Juan, P.R.; and
5. Funds for modernization and improvement of our hospitals that were built prior to World War II. This updating is vital if we are to realize maximum benefits from the great advances being made in the care and treatment of veterans.

Gentlemen, this concludes my opening summation of the highlights of the Veterans' Administration's fiscal year 1964 budget estimates.

I and members of my staff will be happy to supply any additional information that you may need.

SUMMARY OF APPROPRIATION AND ESTIMATES 1963 AND 1964

Mr. THOMAS. Insert the summary table at the end of the general statement.

(The table referred to follows:)

Summary of Veterans' Administration appropriations and estimates, fiscal years 1963 and 1964

Appropriation	Appropriated, fiscal year 1963 [1]	Estimate, fiscal year 1964	Decrease (−) or increase (+)
General operating expenses	$161,470,000	$159,750,000	−$1,720,000
Medical administration and miscellaneous operating expenses	13,993,000	14,982,000	+989,000
Medical and prosthetic research	30,500,000	33,742,000	+3,242,000
Medical care	1,049,766,000	1,087,688,000	+37,922,000
Construction of H. & D.F.	77,000,000	81,000,000	+4,000,000
Compensation and pensions	3,874,000,000	3,921,000,000	+47,000,000
Readjustment benefits	155,075,000	101,100,000	−53,975,000
Veterans' insurance and indemnities	32,000,000	30,200,000	−1,800,000
Grants to Republic of the Philippines	[2] 307,000	0	−307,000
Total	[3] 5,394,111,000	[4] 5,429,462,000	+35,351,000

[1] Includes the following pending 1963 supplemental requests:

General operating expenses	$3,801,000
Medical care	31,874,000
Medical administration and miscellaneous operating expenses	221,000
Compensation and pensions	42,000,000
Readjustment benefits	63,575,000
Grants to Republic of the Philippines	−193,000
Total	141,278,000

[3] Adjusted to reflect anticipated transfer of $193,000 to general operating expenses.
[2] Excludes direct loans of $200,000,000 and permanent indefinite of $760,000 in V.I. & I.
[4] Excludes direct loans of $150,000,000 and permanent indefinite in V.I. & I. of $800,000.

Mr. THOMAS. A very excellent, well-worded and compact statement.

Gentlemen, I suggest we might ask general questions at this time before we go on to the budget. Mr. Evins?

Mr. EVINS. Mr. Chairman, I have a couple of observations. I have listened with great interest to Administrator Gleason's statement and one gains the impression, for which he and his staff ought to be commended, that there is tremendously improved efficiency in the administration of all of the vast veterans' programs. There is a decrease in the number of personnel. Yet, we are struck with the fact that there is an increased appropriation request. They are to be commended for the reduction in personnel and for improved efficiency. I guess we will have to bear some of the responsibility for the passage of the pay increase and with the large number of personnel in the Veterans' Administration this comes to a substantial sum in increased expenditures. Certainly they are to be commended for the efficiency and improvement of the program.

REORGANIZATION—AREA MEDICAL OFFICES

Mr. Administrator, will you please spell out for us in a little more detail the reorganization work that you are doing? This committee has been very much interested in the reorganization of the VA for several years. I know we discussed at length the timelag and the various levels that the hospital managers have to go through to reach the Veterans' Administrator and the Chief of the Medical Services. I note with interest that you are planning on bringing in your area medical directors. Does this mean you will have a deputy area medical director retained in the field to perform substantially the same functions?

Mr. GLEASON. No, sir. I do not envisage that at all, Mr. Evins. I do believe that as in any organizaton there is a No. 2 and No. 3 man; prior to this time whenever the area medical director has been away making visits there has always been a No. 2 man in charge while he is absent. I would like very much to have the area medical directors in Washington to assist in the formulation of policy of the Departmen of Medicine and Surgery because I honestly feel that they can have a closer feel of what is going on in the geographic areas for which they are charged. It will also mean that they will be making their inspection trips just as they have in the past.

Mr. EVINS. I am sure these gentlemen have a vast reservoir of knowledge and experience and by pooling this experience they may be of great assistance to Dr. Middleton, the Chief Medical Officer, but does it mean sort of an additional staff level?

Mr. GLEASON. Mr. Evins, I have directed that all of these be accomplished within the budget funds that you people voted for us in fiscal year 1963 and to continue at that level.

Mr. EVINS. How much reduction in personnel will it mean in the areas in the field?

Mr. GLEASON. It won't mean any. As a matter of fact, we are already authorized additional people which we have not put on. We have had a freeze on those for about a year and a half, is it not, Doctor?

Dr. MIDDLETON. That is correct, sir.

Mr. GLEASON. Since a year ago last June we put a freeze on increasing any more. Those levels in effect at the time of the freeze will remain in effect.

Mr. EVINS. Will this reorganization change when fully accomplished, mean a direct line of contact between the hospital manager and the rest of the medical services?

Mr. GLEASON. This is certainly what I anticipate, Mr. Evins.

Mr. EVINS. A savings of time?

Mr. GLEASON. Yes, sir.

Mr. EVINS. More than any other factor?

Mr. GLEASON. That is right.

LOAN GUARANTEE DEFAULTS AND FORECLOSURES

Mr. EVINS. Would Mr. Brownstein, before he leaves, give us a picture as to how bad we are in the guarantee loan field? Are you leaving us, Mr. Brownstein, just at a time when they need to retain your services to clean up what we have learned is a rather alarming situation?

Mr. BROWNSTEIN. I do not think it is really an alarming situation, Mr. Evins. I think we are really in pretty good shape. Actually, I believe that for a good many years we all got used to a somewhat abnormally low foreclosure rate and we had relatively few, hardly any foreclosures for a good many years. The reason for this, I think, is fairly evident. We had a period of inflation that made up for a lot of mistakes, poor judgment of prospective homeowners, and this sort of thing; homeowners who wanted out generally were able to get out and probably make a profit doing so but for the last 6 or 7 years there has been relative stability in the real estate market.

From 1957 to the present time the Boeckh Index of Construction Costs has risen only about 6 percent. This is about what the present broker's commission is on the sale of a house. So, with this stability in the market, the person who today wants for one reason or another to dispose of his house has difficulty in doing so when you take into account the amount that this individual owes on the mortgage and the broker's commission that would be payable in the event that he sells.

As the Administrator mentioned in his statement, we do estimate some decrease in the number of properties that we will acquire in fiscal year 1964. The basis for this estimate is that the loans on the books are continuing to be seasoned, plus the fact too that we are experiencing a decline in the number of new defaults being reported to us. We now seem to have at least reached a level of activity that is not increasing. We have experienced some decline in the number of properties that we have been acquiring the last couple of months.

NUMBER AND RATE OF FORECLOSURES

Mr. EVINS. How many foreclosures did the VA assume within the last year?

Mr. BROWNSTEIN. We took in 21,000 properties in the last fiscal year.

Mr. EVINS. How does that compare again with the last 2 previous years?

Mr. BROWNSTEIN. The year before that I believe it was 14,600 and the year preceding that I believe it was about 11,000.

Mr. EVINS. Instead of declining it has increased from 11,000 to 15,000 to 21,000.

Mr. BROWNSTEIN. That is correct. It has increased. We have now, I hope, reached the point where this increase has stopped and I would hope that there will be somewhat of a reverse trend, although I must say I do not think, Mr. Evins, we are going to get back to those days that we had formerly, when we had relatively insignificant foreclosures.

Mr. JONAS. Will you yield?

Mr. EVINS. Yes.

Mr. JONAS. I understood the Administrator to say foreclosures in the last half of the current year would be 12,000. On a full-year basis that would be 25,000.

Mr. BROWNSTEIN. I was talking about fiscal year, Mr. Jonas. In fiscal year 1962 we took in, I believe, 21,500 properties. In the last 6 months we did take in about 12,000.

Mr. JONAS. I cannot follow you. You say the foreclosure rate is decreasing.

Mr. BROWNSTEIN. No. What I said was the number of new defaults being reported to us is decreasing and, in time, we would hope that this reduction will translate itself into a reduced level of foreclosure activity.

Mr. JONAS. While Mr. Evins has yielded to me, I will make one other comment. You are just jumping from the frying pan into the fire. You are not going to get out of this thing and give it to FHA, are you? They are in worse trouble than you are.

Mr. GLEASON. He knows that, Mr. Jonas.

Mr. BROWNSTEIN. I know that.

MORTGAGE PORTFOLIO

Mr. EVINS. Mr. Brownstein, how much is your total portfolio of mortgages which you hold in the VA at this time in round figures?

Mr. BROWNSTEIN. Including direct loans, Mr. Evins?

Mr. EVINS. Yes.

Mr. BROWNSTEIN. About $1.8 billion.

Mr. EVINS. How many have you been able to sell on the market to other financial institutions within the past year?

Mr. BROWNSTEIN. Well, we have been selling two kinds of mortgages. Our direct loans, of course, have to be sold at no less than par under the law. In addition when we take back a property and resell it we have been selling what we term our "vendee accounts." These are the mortgages that result from the sale of those houses. Our direct loans because of the scattered nature of the mortgages and the locations, plus the fact that we must sell them at par—we have sold in the past fiscal year, I believe, about $20 million. The others, on our "vendee account" sales in the past year—in 1963 our estimate is we will sell $150 million. That is for fiscal year 1963.

EXPERIMENTAL NURSING HOME STUDY

Mr. JONAS. You speak about an experimental nursing home training outside service——

Mr. GLEASON. That would be a study.

Mr. JONAS. Directed by the Veterans' Affairs Committee?

Mr. GLEASON. Yes, they have asked us to conduct it.

Mr. EVINS. This is a provision where people who run nursing homes would take patients out of the nursing hospitals and place them into privately owned nursing homes?

Mr. GLEASON. That is what we do now, Mr. Evins, but the House Veterans' Affairs Committee would like to have a study made to see whether the Veterans' Administration itself should not conduct nursing homes. I mean this is the study we are going to make to try to arrive at some conclusion to present to the House Veterans' Affairs Committee.

Mr. JONAS. In your domiciliary homes and nursing homes, if you ultimately establish that policy then you would have to revise your maximum limitation on numbers of beds?

Mr. GLEASON. That is correct, sir.

Mr. JONAS. That is all at the moment, Mr. Chairman.

HOSPITALIZATION FOR OVERSEAS RESIDENTS

Mr. BOLAND. With respect to activities overseas, did I understand we are now going to pay hospitalization for those who permanently reside overseas?

Mr. GLEASON. Yes, sir.

Mr. BOLAND. We have not been doing this heretofore.

Mr. GLEASON. Not until the law was passed at the last session of the Congress.

Mr. BOLAND. How much do you expect the increase to be in this area?

Mr. GLEASON. It is a small amount, Mr. Boland. I don't have it but I will get it for you.

(The information supplied follows:)

Medical care which may be furnished to veteran beneficiaries in Europe under Public Law 87–815 is estimated to cost somewhat less than $200,000 and will provide care annually for approximately 4,400 veterans with service connected disabilities residing there on a permanent basis, and for about 2,650 veterans in a transient status.

TRANSFER OF AREA MEDICAL DIRECTORS

Mr. BOLAND. On the transfer of area medical directors to Washington, Dr. Middleton, was this a recommendation you made? Is this a recommendation which you favor? Is it actually a transfer which you desire?

Dr. MIDDLETON. This has been under study for some time. It was not the recommendation of the Chief Medical Director.

Mr. BOLAND. Are you opposed to it?

Dr. MIDDLETON. We can make it work, sir.

Mr. BOLAND. That really isn't responsive.

Would you prefer to see them in the areas? In your opinion, do they do a better job in the areas than they can do in the central office?

Dr. MIDDLETON. In my judgment, yes.

Mr. BOLAND. Why is this necessary, then? This has apparently created quite a problem or controversy within the Veterans' Administration.

Dr. MIDDLETON. Sir, there is no controversy. This has been subjected to study and this is the decision of the Administrator and certainly it will work and we think, effectively.

Mr. BOLAND. You don't think it is going to work as well?

Dr. MIDDLETON. That is my judgment.

Mr. BOLAND. Mr. Administrator, would you defer to the judgment of the Medical Director in matters of this kind?

Mr. GLEASON. Not necessarily, Mr. Boland. As the chief administrative officer of the Veterans' Administration, under the law it is my duty and obligation to try and see that the organization functions as well as possible. It is my opinion, sir, that this will eventually work out to great advantage to the Veterans' Administration. I have been assured by the Chief Medical Director that it does not interfere with the medical care and treatment of the patients. This was a matter that has been under study for many years, Mr. Boland.

Mr. BOLAND. I am sure, Mr. Administrator, you are the last one in the world who would want to have anything interfere with the proper treatment and care of the veterans. I am confident of that. One of the things that puzzles me about this shift is that these are people who are expert in their own areas, as I understand it—how many are there, seven?

Mr. GLEASON. Seven; yes, sir.

Mr. BOLAND. These were area administrators who actually were supervising medical activities, as I understand it, in these seven areas. It would appear to me that they would be more effective in the field in which they operate rather than being in the central office. Why does this lead to better efficiency or why does it lead to a better care for the veteran with these people in Washington?

Mr. GLEASON. Because I think there will be a closer association with the Chief Medical Director and his staff as far as knowledge and line of authority is concerned. We have this same situation in our Department of Veterans' Benefits and the five area directors are in Washington and it has been very successful. We think this can be just as effective and successful as the Department of Veterans' Benefits area.

Mr. BOLAND. There has been some concern voiced by some people that this is an effort being made by the Administrator to get greater control of the Department of Medicine and Surgery.

Dr. MIDDLETON. I do not share that, sir.

Mr. BOLAND. You do not share that?

Dr. MIDDLETON. No, sir.

Mr. BOLAND. This is not my statement. I am repeating what all of you are aware of, of course.

In your judgment, Doctor, is this going to contribute to any decline in the efforts that are made by the Veterans' Administration in behalf of the care and treatment of the veteran?

Dr. MIDDLETON. No, sir.

Mr. BOLAND. Then you really don't have too much opposition to the transfer itself?

Why would you prefer to have these seven area medical directors back in the areas? You don't agree with what has been done here, and since you don't agree would you prefer to have them back in the areas?

Dr. MIDDLETON. I think it is a basic philosophy of management. The questions of the span of control, the proximity of the direct line officials to the action and decisions and the ability to regulate from a physical and geographic standpoint and thus to supervise the field. Those have been the bases of my position.

Mr. BOLAND. This disagreement doesn't really square then with the decision of the Veterans' Administration to accomplish this transfer, does it?

Dr. MIDDLETON. There is agreement, sir. I think that holds true in a democracy and I do respect the opinion of the other man—the other man being the Administrator.

Mr. BOLAND. How do the hospital men generally accept the area medical directors as to their supervision and authority to do the job that the area medical officers do, insofar as the hospitals in their area are concerned?

Dr. MIDDLETON. There is every range in the spectrum of dependence and independence. We, of course, have stimulated the philosophy that these hospital directors are men, responsible individuals, responsible for the conduct of their particular station and all of its activities. I can say categorically that some hospital directors could not care less for the area medical directors, or whether there are chief medical directors or even administrators.

Mr. BOLAND. Or whether they have them at all?

Dr. MIDDLETON. As a matter of fact, as long as they have money, as long as they have facilities, as long as they have all the support and personnel and so forth, this is true. If they were given carte blanche, I think you could state flately that the control and the supervision from their level up is simply a matter of their own personal convenience in operation.

Mr. BOLAND. Would they be happy to see the dissolution of the area medical directors completely?

Dr. MIDDLETON. When you approach them individually so far as the services are concerned, obviously they have depended not only on the area medical directors but on the chief medical directors, on the administrator, and on the Congress, but actually they are brought up in an independent frame of mind and they do run their shows, their independent operations, as stanch individualists.

Mr. BOLAND. Area medical directors are not changed very much are they?

Dr. MIDDLETON. They are a great source of strength, sir.

Mr. BOLAND. They remain there over a number of years, while hospital directors and managers come and go, don't they?

Dr. MIDDLETON. I have been here only 8 years, but they have had 351 changes in hospital directors.

Mr. BOLAND. These hospital directors and managers shift from area to area. They don't necessarily transfer within a particular area. So

the area medical director would probably know a lot more about the operation of hospitals in this area than a new hospital manager coming into an area? I am speaking about the administrative end of it.

Dr. MIDDLETON. That is a difficult question to answer categorically, Mr. Boland, because these area medical directors obviously must have the complete picture of their 26 to 32 hospitals. However, they cannot have the intimate operations of each unit in mind, such as complete knowledge of the personnel and the interplay of the personnel. So one could not answer your question yes or no. I think the day-to-day working of the hospital team is in the possession of the hospital director. In the overall supervision, it is the area medical director. He has been an invaluable assistant and associate to the central office in that respect.

Mr. BOLAND. Would you agree that even though this change has taken place and the transfer has now been fully effected, that this is not necessarily going to reflect in any diminution of services to the veteran?

Dr. MIDDLETON. I would like to have it a matter of record that it will not and cannot deteriorate medical care.

COSTS CONNECTED WITH TRANSFER OF AREA MEDICAL OFFICER

Mr. BOLAND. How about the cost? Will there be lower costs in this area or in your judgment will the costs increase over the years because of this transfer?

Dr. MIDDLETON. Under the present arrangement there is no design for increase in costs. As a matter of fact we have a ceiling of 268 personnel for area medical offices under which we are operating and we are asking for a total eventually of 305, so that there is no present design for a decrease in the personnel representing the area medical office function.

Mr. BOLAND. How about the costs for travel?

Dr. MIDDLETON. That presently, of course, is within the budgetary limitations and we will have to have experience.

Mr. BOLAND. No doubt the experience will show it will cost more. You are not going to keep these people in the central office. They are going to go out over the areas frequently and it will cost a lot more to travel from Washington to Boston than from Boston to West Roxbury or Jamaica Plain where you have a Veterans' Administration hospital.

Mr. GLEASON. That is correct.

Mr. BOLAND. So necessarily the costs will be increased?

Mr. GLEASON. Not the overall costs, Mr. Boland; I do not believe, sir.

Mr. MONK. Heretofore when they have been in the area they have gone out on short trips and have come back. Now certainly if they are here in Washington they are going to the west coast and not just visit one station there.

Dr. MIDDLETON. I am sorry, that has not been the general rule. When a man goes out, the area director or a member of his staff, he goes out to visit three or four hospitals.

Mr. MONK. But they have been home every weekend.

Dr. MIDDLETON. That is right, as a rule.

Mr. MONK. This would not necessarily be true when stationed here in Washington.

Mr. BOLAND. And the area medical director will get into the area less than he is now? Is that a fair statement?

Mr. MONK. I do not think so.

Mr. BOLAND. It would have to be. The area director for San Francisco, for instance, is not going to travel to San Francisco every week, is he?

Mr. MONK. No, sir.

Mr. BOLAND. If he were living in San Francisco, he would make the rounds of his area, I would think, a lot more frequently than he will now do with this setup.

Would this be true, Doctor?

Dr. MIDDLETON. I think he is going to have to delegate more regularly than he did before, so he will spell himself with an associate. He will have associates in the Washington office. Presently now they are located here and very comfortably.

Mr. BOLAND. And they are all happy, I presume?

Dr. MIDDLETON. I wouldn't say that.

Mr. GLEASON. I wouldn't say that either, Mr. Boland.

Mr. BOLAND. Well, it is agreed, at least within the framework of the VA, by the Administrator and the Chief Medical Director, that this is not going to cut down or curtail on the services which are now given to veterans and will not interfere with the operation of the Department of Medicine and Surgery, and there is no effort here on the part of anyone within the Veterans' Administration to exercise more power in the field of medicine. Is this a fair statement?

Dr. MIDDLETON. This is a fair statement of my opinion. I am certain there can be no deterioration of medical service. That I would not tolerate.

Mr. BOLAND. I am glad to have that on the record. It should be on the record in view of the publicity that has been released recently. I am sure this Administrator would be the last person in the world to interfere with the medical treatment received by the veteran. I am sure of that.

That is all, Mr. Chairman.

Mr. JONAS. I have one question I wanted to ask the Administrator.

ECONOMIES TO PERMIT PURCHASE OF COMPUTERS

I was impressed by your ability to pick up $5.8 million by tightening the belt, in order to buy some data processing equipment. Where did you make those economies?

Mr. GLEASON. I think the Controller can give you a little bit better idea than I can, Mr. Jonas.

Mr. JONAS. If you can make them to do that, why can't you make them all the time when you don't want to buy equipment? It brings into question whether your budget is as tight as you represent it to be to us when you present it.

Mr. HANSMAN. I think we have endeavored to present to this committee as tight a budget as we could.

Mr. JONAS. You say $5.8 million is saved somewhere. Where have those economies been made?

Mr. HANSMAN. They have been in all areas, sir. In some places we have been able to accomplish more workload with fewer people.

Mr. JONAS. How? You told us you couldn't do that when you defended the budget last year. You said you had it as tightly drawn as it could be drawn.

Mr. HANSMAN. That was our opinion at the time.

Mr. JONAS. This just proves budgets are never as tight as they are represented to be.

Mr. DRIVER. The biggest saving was in the rental cost of the equipment itself. We save $1.6 million annually by purchasing. We of course saved a good deal of money by closing the contact offices and there has been, as in keeping with past years, an increase in productivity in several programs that enabled us to save this money.

Mr. JONAS. You don't think you adversely affected any services veterans are entitled to in picking up this $5.8 million?

Mr. DRIVER. No, sir; we don't. We think in fact by increasing the productivity and decreasing the processing time that we have improved services at the same time we have saved money.

Mr. JONAS. I recommend you pursue that effort.

Mr. DRIVER. We certainly intend to. Mr. Kennedy, as you recall, issued a directive to all agencies to concentrate on this. We think within the Veterans' Administration we have had a fine record in the past, but we are certainly going to endeavor to improve it.

BAY PINES HOSPITAL

Mr. JONAS. Mr. Administrator, I want to ask you what you plan to do at Bay Pines, Fla.

Mr. GLEASON. At the moment all we plan to do at Bay Pines, Fla., is put in additional operating suites, making them more modern, Mr. Jonas.

Mr. JONAS. May I read into the record at this point, Mr. Chairman, the statement of the Senate committee?

Mr. THOMAS. Go ahead.

Mr. JONAS. This is in its report last year. I quote from page 21 of the Senate report:

> The committee approves the recommendation of the House Appropriations Committee relative to the earmarking of funds heretofore appropriated for the veterans hospital at Bay Pines, Fla.
>
> The committee further recommends to the Administrator of the Veterans' Administration that technical services contracts for new construction at Bay Pines be let no later than during the calendar year 1963 because of the critical shortage of beds in Florida Veterans' Administration hospitals * * *.

Do you plan to follow that recommendation of the Congress?

Mr. GLEASON. Well, Mr Jonas, I think, sir, this is going to become a very difficult issue for us. As I tried to explain last year before this body, if I was sure a medical school was not going to be established in the St. Petersburg-Tampa area then I would be most happy to go ahead with Bay Pines. But as I tried to bring out last year—and Dr. Middleton has been in touch with the president of the University of Florida of the South—that within the next 5 to 6 years they do plan on originating a medical school in that area.

As I mentioned last year, I think it would be a crime to have a hospital located so far away from a medical school. The advantages that we see in locating them next to medical schools are tremendous. As Mr. Evins knows, our new hospital in Nashville, Tenn., in conjunction with the University of Vanderbilt Medical School is going to aid the veteran so tremendously that I just can't see the necessity of going ahead at this time.

The hospital at Gainesville and the hospital at Miami will be completed within the next few years. The veteran patients within the State of Florida will have more hospital beds than they do now and they will be more modern and up to date.

Mr. JONAS. How far is your Miami site from the medical school?

Mr. GLEASON. Approximately a hundred yards, sir.

Mr. JONAS. Miami University?

Mr. GLEASON. Yes, sir. Our hospital at Gainesville is probably 130 or 140 yards, roughly speaking, from the University of Florida Medical School.

Mr. JONAS. Of course, no one on this committee objects to combining the resources of medical schools with Veterans facilities. We are interested, or at least I am, in knowing what you plan to do concerning the recommendation made to you by Congress. You had this specific recommendation from the committees of Congress, and as I understand your answer you don't plan to do anything this year.

Mr. GLEASON. Congressman, I don't plan to do anything this year unless by chance the president of the university tells me positively that they are not going to have a new medical school.

FLORIDA MEDICAL SCHOOLS

Mr. JONAS. I can't put my finger on the source of the information but I have heard that this issue has been resolved and it has been determined that there will not be a medical school built in the Tampa-St. Petersburg area. Do you have any information on that subject?

Mr. GLEASON. The information that I have, Congressman, is that they are planning on operating one in the next 4 to 5 years.

Mr. JONAS. May I ask Dr. Middleton if he has any concrete information on that?

Dr. MIDDLETON. I have been in touch with President Allen in the past, but I have not been in touch with him since the Florida Board of Education said they were not presently planning on a second State medical school.

Mr. JONAS. When was that decision made?

Dr. MIDDLETON. That decision was made about 10 days ago but I have been in touch with people in that area—I have not been able to get hold of President Allen—and the indication is that this is not a final decision by any manner or means.

Mr. GLEASON. Mr. Jonas, if I might interrupt, sir, for a moment, the decision by the Florida Board of Education was presently—I mean at this particular time, but I am given to understand by people in Florida who have a great deal of influence in the State that 4 to 5 years from now there will be a medical school; but presently; no, sir.

PLANS FOR BAY PINES

Mr. JONAS. So you do not plan to do anything about Bay Pines for 4 or 5 years?

Mr. GLEASON. When you say not do anything about it, Mr. Jonas, we are spending quite a bit of money in updating the hospital surgical suites at Bay Pines. I mean this is a terrific hospital if you have ever been there.

Mr. JONAS. I know it is, and it has the largest waiting list of any hospital in the country, hasn't it?

Mr. GLEASON. I wouldn't say so, sir.

Mr. JONAS. You wouldn't contradict that statement would you?

Mr. GLEASON. Well, no; but I think we can get to the nub of it right here.

Mr. JONAS. Isn't it the choice of all your medical people, Dr. Middleton?

Dr. MIDDLETON. It is the favorite one because of its geographic location.

Mr. BAKER. The waiting list is 583 at December 31 last.

Dr. MIDDLETON. Northport has 2,500, so the Administrator is correct, we have a number higher.

Mr. JONAS. Northport is on Long Island where you plan a 1,000-bed hospital to take care of that situation?

Mr. GLEASON. That is right, sir.

We are planning that hospital as soon as New York tells us where they are going to locate their medical school.

Mr. DRIVER. That is in the same category really as Bay Pines.

Mr. JONAS. You are asking for money here for Long Island, are you not, in this budget?

Mr. GLEASON. This is the same thing you have given us for Bay Pines; yes, sir.

Mr. JONAS. In fact if we give you the money that doesn't mean you are going to spend it?

Mr. GLEASON. Well, I don't want to spend it foolishly, Mr. Jonas. It is the same with Northport, sir. We will have the authorization for the money but that doesn't mean we are going to go ahead and spend it until we find out where the medical school of New York State is going to be located.

Mr. DRIVER. As soon as that decision is made we would like to be in a position to go forward and do something technically rather than have to wait.

Mr. JONAS. Doctor, how many of your installations have larger waiting lists than Bay Pines?

Dr. MIDDLETON. It is the highest among the GM. & S. hospitals, you are right.

Mr. THOMAS. We will recess at this time and come back at 1 o'clock.

AFTERNOON SESSION

Mr. THOMAS. Gentlemen, will the committee please come to order.

We had finished the Administrator's statement and general questions.

Mr. Ostertag, did you have any general questions before we go in the specific categories of the budget?

Mr. OSTERTAG. Mr. Chairman, I have no general questions at this time.

Mr. THOMAS. Some of these tables are fabulous. They are very beneficial. They tell the tale but it takes about four of the charts to tell the whole tale. They give a complete breakdown of all the activities and this is the only information in the budget dealing with the grades. For instance, it gives the number of top positions down through GS–15. I think it stops there. Then it lumps in all the remainder.

Let us take a look at chart 1, "Average Employment and Principal Positions as Contemplated in the Fiscal Year 1964 Budget Estimate."

We will take the Office of the Administrator. You give us two conflicting statements. Throughout the budget you give the figure of average employment. In the Information Service you have a total of 43. There are 22 in the departmental and 21 in the field. Your average employment is 39, however.

NUMBER OF SUPERGRADES

How many supergrades are there in the agency?

Mr. MONK. Sixty-three, sir; five GS–18's, nine GS–17's, and forty-nine GS–16's.

Mr. THOMAS. Five GS–18's?

Mr. MONK. Yes. There are 5 GS–18's, 9 GS–17's, and 49 GS–16's.

Mr. THOMAS. How many 15's do you have?

Mr. MONK. We have about 230 grade 15's.

Mr. THOMAS. Do you have any ungraded positions?

Mr. MONK. Only the Administrator and the Deputy.

Mr. THOMAS. And they are statutory?

Mr. MONK. They are statutory, yes, sir. And of course the medical people are under a separate pay system.

COMPARATIVE SUMMARY OF APPROPRIATIONS AND APPROPRIATION ESTIMATES

Mr. THOMAS. Let us put the table on page 2–1 in the record. That is a comparative summary of appropriations and estimates.

(The table referred to follows:)

Comparative summary of appropriations and appropriation estimates

Appropriation title	Fiscal year 1962 appropriations	Fiscal year 1963				Fiscal year 1964 appropriation estimate	Increase (+) or decrease (−), 1964 over 1963
		Appropriated	Supplementals		Total		
			Pay raise	Other			
General operating expenses	$161,773,000	$157,669,000	[1] $3,801,000		$161,470,000	$159,750,000	−$1,720,000
Medical administration and miscellaneous operating expenses	43,876,500	13,772,000	221,000		13,993,000	14,982,000	+989,000
Medical and prosthetic research		30,500,000			30,500,000	33,742,000	+3,242,000
Medical care	989,371,000	1,017,892,000	25,365,000	$6,509,000	1,049,766,000	1,087,688,000	+37,922,000
Subtotal	1,195,020,500	1,219,833,000	29,387,000	6,509,000	1,255,729,000	1,296,162,000	+40,433,000
Compensation and pensions	3,500,000,000	3,832,000,000		42,000,000	3,874,000,000	3,921,000,000	+47,000,000
Readjustment benefits	135,000,000	91,500,000		63,575,000	155,075,000	101,100,000	−53,975,000
Veterans insurance and indemnities [2]	39,200,000	32,000,000			32,000,000	30,200,000	−1,800,000
Grants to the Republic of Philippines	1,000,000	500,000	−193,000		[3] 307,000		−307,000
Construction of hospitals and domiciliary facilities	76,250,000	77,000,000			77,000,000	81,000,000	+4,000,000
Total appropriations [4]	4,946,470,500	5,252,833,000	29,194,000	112,084,000	5,394,111,000	5,429,462,000	+35,351,000

[1] Includes $193,000 proposed transfer from "Grants to the Republic of Philippines" appropriation.

[2] Excludes permanent indefinite, fiscal year 1962, $718,000; fiscal year 1963, $760,000; fiscal year 1964, $800,000.

[3] Excludes $193,000 proposed transfer to "General operating expenses" appropriation.

[4] Excludes direct loan borrowing authority, fiscal year 1962, $500 million; fiscal year 1963, $200 million; fiscal year 1964, $150 million.

NOTE.—The "Medical research" and "Prosthetic testing and development" portions of the "Medical administration and miscellaneous operating expenses" appropriation combined into 1 appropriation "Medical and prosthetic research."

Mr. THOMAS. This gives you a budget this year of $5,429,462,000, which shows an increase of $35,351,000 over last year.

Take a look at the far right-hand column, gentlemen, and you will find the increases and the decreases. In "General operating expenses" it shows a decrease of $1,720,000; in "Medical administration and miscellaneous operating expenses" it shows an increase of $989,000, almost $1 million; in "Medical and prosthetic research" it shows an increase of $3,242,000. Off the record.

(Discussion off the record.)

Gentlemen, here is a good table on page 2–2. The table on 2–3 breaks it down in a little different way. The amount of detail work going in compiling these tables is out of this world. Maybe for our purposes 2–4 is better than 2–3. Let us put 2–2 and 2–4 in the record.

(The tables referred to follow:)

Summary statement of all appropriations—Showing balances forwarded, appropriation accounts, transfers, and obligations for fiscal years 1962, 1963, and 1964

Appropriation	Unobligated balance available July 1, 1961	Fiscal year 1962 actual			
		Appropriated	Adjustments to obligations [1]	Obligations	Unobligated balance June 30, 1962
General operating expenses	----------	$161,773,000	+$193,494	$160,831,365	$(1,135,129)
Medical administration and miscellaneous operating expenses	$14,696	43,876,500	−34,820	41,073,374	(2,767,139)
					15,863
Medical and prosthetic research	----------	----------	----------	----------	----------
Medical care	----------	989,371,000	+4,660,719	993,985,682	(46,037)
Compensation and pensions	213,112,342	3,500,000,000	−2,500,000	3,707,536,448	3,075,894
Readjustment benefits	14,515,225	135,000,000	+2,500,000	150,410,901	1,604,324
Veterans insurance and indemnities	7,480,231	39,200,000	+714,589	41,292,786	6,102,034
Grants to the Republic of the Philippines	----------	1,000,000	----------	359,307	(640,693)

Footnote at end of table, p. 627.

Summary statement of all appropriations—Showing balances forwarded, appropriation accounts, transfers, and obligations for fiscal years 1962, 1963, and 1964—Continued

Appropriation	Unobligated balance available July 1, 1961	Fiscal year 1964 estimated			
		Appropriated	Adjustments to obligations [1]	Obligations	Unobligated balance June 30, 1964
General operating expenses		$159,750,000	+$40,000	$159,790,000	
Medical administrative and miscellaneous operating expenses	$14,696	14,982,000		14,982,000	
Medical and prosthetic research		33,742,000		33,742,000	
Medical care		1,087,688,000	+5,176,000	1,092,864,000	
Compensation and pensions	213,112,342	3,921,000,000		3,921,000,000	
Readjustment benefits	14,515,225	101,100,000		101,100,000	
Veterans insurance and indemnities	7,480,231	30,200,000	+800,000	31,114,724	
Grants to the Republic of the Philippines					
Construction of hospitals and domiciliary facilities	59,775,205	81,000,000		95,776,000	$31,495,458
Grand total	294,897,699	5,429,462,000	+6,016,000	5,450,368,724	31,495,458

[1] Explanation of adjustments (appropriations to obligations):

	Fiscal year 1962 actual	Fiscal year 1963estimated	Fiscal year 1964estimated
General operating expenses:			
Transfer from "Veterans special term insurance fund"	+$220,512	+$40,000	+$40,000
Transfer to General Services Administration for general purpose space rentals	−27,018	−50,000	
Supplemental (Public Law 87-793 costs)		+3,801,000	
Proposed transfer from "Grants to the Republic of Philippines"		(193,000)	
Medical administration and miscellaneous operating expenses:			
Transfer to General Services Administration for general purpose space rentals	−34,820		
Supplemental (Public Law 87-793 costs)		(+221,000)	
Transfer to "Medical and prosthetic research"		(−15,863)	
Medical and prosthetic research: Transfer from "Medical administration and miscellaneous operating expenses"		+15,863	
Medical care:			
Reimbursements	+4,677,602	+4,850,000	+5,200,000
Supplemental—Wage rate increases and Public Law 87-793 costs		+31,874,000	
Transfers to General Services Administration for general purpose space rentals	−16,883	−75,000	−24,000
Compensation and pensions:			
Transfer to "Readjustment Benefits"	−2,500,000		
Supplemental		+42,000,000	
Readjustment benefits:			
Transfer from "Compensation and Pensions"	+2,500,000		
Supplemental		+63,575,000

Mr. THOMAS. How many 15's did you say you had?
Mr. UNDERWOOD. About 230.

FIELD OFFICES

Mr. THOMAS. How many regional offices do we have? I notice you call them field offices. How many do you have?
Mr. BROWNSTEIN. Sixty-seven.
Mr. THOMAS. Where are they located? Do you have a list or a map showing where they are located by States?
Mr. BROWNSTEIN. Yes, sir.
Mr. THOMAS. How many do you have outside the continental United States?
Mr. DRIVER. Four.
Mr. THOMAS. Where are they?
Mr. DRIVER. Hawaii, Juneau, Manila, and Puerto Rico.

VA OFFICE IN ROME

Mr. OSTERTAG. There has been some talk about a VA office in Rome.
Mr. GLEASON. Yes, sir.
Mr. OSTERTAG. Is that a regional office?
Mr. GLEASON. That will be an office similar to the one we have in Manila.
Mr. DRIVER. It is more of a coordinating office than a processing office, attempting to get all the Embassy people who handle our work to handle it in a similar fashion. We will have a small staff in Rome to explain it to them.
Mr. GLEASON. We chose Rome because Greece and Italy are the places where most of the pensioners we referred to this morning reside.
Mr. OSTERTAG. Where will the cost or expense of that office appear in the justifications?
Mr. DRIVER. Under the central office. It is just barely getting underway at the moment with only three people involved.
Mr. GLEASON. The Congress only authorized it in the closing days of the last session, Mr. Ostertag.

TOTAL VA EMPLOYMENT—1947 TO 1964

Mr. THOMAS. I thought I saw a figure of your overall employment but I cannot put my finger on it right now.
Mr. DRIVER. The chart on 2–6.
Mr. MONK. 2–5 goes clear back to 1947.
Mr. THOMAS. Let us put 2–5 in the record. This is the overall employment figure from fiscal 1947 through fiscal 1964.
(The table referred to follows:)

Comparison of average employment from fiscal year 1947 through fiscal year 1964

[1] Due to reorganization, comparative employment by the new organizational elements in the appropriation "General operating expenses" for fiscal years 1947 through 1952 is not available.

[2] The peak VA employment (full-time equivalent) was in February 1947.

[3] Excludes consultants except as specifically identified.

NOTE.—The medical research and prosthetic testing and development portions of the "Medical administration and miscellaneous operating expenses" appropriation combined into 1 appropriation "Medical and prosthetic research."

EMPLOYMENT LEVELS IN PRIOR YEARS

Mr. THOMAS. Who was the Administrator in 1947?

Mr. GLEASON. General Bradley.

Mr. THOMAS. He came back right after the war. As a matter of fact, he was appointed Administrator late in 1945, was he not?

Mr. DRIVER. August 1945.

Mr. THOMAS. If I am not mistaken, in fiscal 1946 he had in the neighborhood of 220,000 employees?

Mr. BAKER. 226,000 approximately, in February 1947.

Mr. THOMAS. 1947 or 1946?

Mr. DRIVER. 1947.

Mr. THOMAS. In 1948 it dropped down to 193,307, and it is going down, going down, and in 1960 you had 151,825; in 1961, 151,843; in 1962, 153,508; in 1963, 154,021; and in 1964, 154,060.

PERSONNEL IN FIELD OFFICES

In your 67 field offices, give us a green sheet breakdown of your personnel in each office. Do you have that available?

Mr. DRIVER. We will have to supply that.

(The information supplied follows:)

GRADE LEVELS IN REGIONAL OFFICES

Mr. THOMAS. Do you have any supergrades in your regional offices?

Mr. MONK. In eight offices the manager is grade 16, in San Francisco, Newark, St. Paul, Los Angeles, Chicago, Washington, New York, and Detroit.

Mr. THOMAS. What about your chief attorney?

Mr. DRIVER. They range from GS–15 to GS–13.

Mr. THOMAS. In the other 59 regional offices what are your managers there?

Mr. DRIVER. The lowest is GS–14 and the rest are GS–15's.

Mr. THOMAS. In the eight offices you mentioned the workload is larger?

Mr. DRIVER. Much larger.

Mr. THOMAS. What is the typical pattern?

Mr. DRIVER. The chief attorney, the compensation and pensions program——

Mr. THOMAS. What is his classification?

Mr. DRIVER. It ranges from GS–15 to GS–14 and GS–13.

Mr. THOMAS. Go ahead.

Mr. DRIVER. The Loan Guaranty Division, the Education Division——

Mr. THOMAS. What are the chiefs of those divisions?

Mr. DRIVER. GS–14's to GS–13's. We have about 35 of them left. We have consolidated the rest in larger regional offices.

Mr. THOMAS. Do you have that same pattern in all of your regional offices?

Mr. DRIVER. Yes.

Mr. THOMAS. What about the Loan Guaranty?

Mr. DRIVER. The range is the same, GS–15 to GS–13, with the general run being in GS–14 or GS–15. And we have consolidated as the workload has gone down. Then we have supporting programs personnel.

COST OF PAY INCREASE AND AMOUNT ABSORBED

Mr. THOMAS. What did the pay increase cost you this year?

Mr. MONK. $32 million total for fiscal 1963.

Mr. THOMAS. I mean 1964?

Mr. MONK. $60 million.

Mr. THOMAS. Will you be able to absorb any of that $60 million?

Mr. GLEASON. The way we have it figured right now, Mr. Chairman, no, but we will try.

Mr. THOMAS. You absorbed $12 million of your $32 million in 1963?

Mr. GLEASON. Yes, sir.

Mr. THOMAS. How did you make up your $12 million? You gave that in your original statement, but let us get it in the record at this point.

Mr. MONK. We had actual cash absorptions of $5.4 million. We applied $3,247,000 to the pay raise itself, and applied $2,182,000 to the wage board increases, and then we absorbed unbudgeted costs of $6,794,000, which makes up the $12,223,000 that we absorbed.

TOTAL VA VACANCIES

Mr. THOMAS. Of your 154,060 positions for 1963, how many unfilled vacancies did you have as of February 1 or some recent date?

Mr. UNDERWOOD. I do not have the total but I have it in shortage category groups—physicians, nurses, psychologists, dietitians, social workers, therapists, and engineers.

Mr. THOMAS. Out of 154,000 jobs for 1963, how many unfilled vacancies did you have?

Mr. MONK. Approximately 1,400.

Mr. THOMAS. What is your figure, Mr. Controller?

Mr. HANSMAN. We are comparing those figures?

Mr. THOMAS. We are talking about January 1 or February 1. How many unfilled jobs did you have at that time?

Mr. MONK. 1,400.

Mr. OSTERTAG. As of when?

Mr. MONK. December 31, 1962.

Mr. THOMAS. What page is that on?

Mr. MONK. That is not in your book, sir.

Mr. THOMAS. Come up with the best figure you can.

Mr. MONK. 1,400.

Mr. DRIVER. 1,432.

Mr. THOMAS. How long have you had those 1,432 vacancies?

Mr. GLEASON. Since the appropriations were passed late in the last session; these are the ones we are anxious to fill.

Mr. THOMAS. You received your appropriation in October.

Mr. GLEASON. It is pretty hard, Mr. Chairman, to program——

Mr. THOMAS. You had October, November, December, and January. You had 4 months.

Mr. MONK. We have a turnover of about 2 percent a month, Mr. Chairman, so at any given time there will be vacancies.

Mr. THOMAS. Is that the way you come up with that figure of 1,400?

Mr. MONK. No. If you used 2 percent it would run about 3,000, but they are not all vacant at any one time. And of course we compute our requirements on the basis of the average employment for the year, which takes into account those vacancies that occur throughout the year.

Mr. THOMAS. If you would put down specific jobs we could sort of keep up with it.

VACANCIES BY JOB CATEGORIES

Mr. GLEASON. I think Mr. Underwood can give the figures as to the job categories we are short in and that we need.

Mr. THOMAS. That might be helpful. Tell us about it.

Mr. UNDERWOOD. In positions—and these are rounded figures as of December 31—we have about 5,000 on duty and we have vacancies of about 350.

In nurses we have about 14,500 on duty and we have vacancies of about 250.

In psychologists we have about 1,000 on duty and we have about 80 vacancies.

In dietitians we have about 1,000 on duty and about 40 vacancies.

In social workers we have about 1,600 on duty and about 75 vacancies.

In therapists, occupational and physical, we have about 1,100 on duty and about 75 vacancies.

And in engineers we have about 450 on duty and about 30 vacancies.

Those we consider our principal shortage categories.

Mr. THOMAS. That is the Department of Medicine and Surgery. What about the other departments?

Mr. DRIVER. There would be very few vacancies in those because the employment has been on the decline rather than the increase. We absorb most of the reductions by attrition.

Mr. UNDERWOOD. The engineers are in the Office of Construction, and at medical field stations.

Mr. DRIVER. But vacancies occur primarily in the Department of Medicine.

Mr. JONAS. Do you have a record that shows what your unfilled positions amounted to at the end of each month since the fiscal year began?

Mr. GLEASON. I do not think we have that here.

Mr. UNDERWOOD. No.

Mr. OSTERTAG. The Administrator referred to the appropriation for the fiscal year, associating it with the 1,400 vacancies.

Mr. GLEASON. Yes.

Mr. OSTERTAG. What is the significance of your statement on that?

Mr. GLEASON. The significance is that until we know definitely we will receive certain appropriations it is difficult for us to hire and recruit these people until it is actually passed.

Mr. THOMAS. Mr. Administrator, you have had 1963 funds for the last 4 months and before that you were operating under a continuing resolution, so you had all the funds you needed.

Mr. GLEASON. We had a continuing resolution, that is true, Mr. Chairman, but we did not have the final appropriation so that Dr. Middleton and the Department of Medicine and Surgery could not go on a recruitment program to recruit these doctors and technicians.

Mr. THOMAS. You say you have a 2-percent monthly turnover in the agency?

Mr. GLEASON. This is the only way we have an opportunity of reducing the administrative costs, through attrition, and this 2 percent helps us throughout the agency.

Mr. DRIVER. In the hospital program we have a large number of low-grade employees and your turnover is larger among those employees.

Mr. JONAS. Mr. Chairman, could I ask a question at this point?

Mr. THOMAS. Yes.

VACANCY RATE

Mr. JONAS. Is the vacancy rate that exists currently caused by the President's directive last October to absorb this pay increase?

Mr. GLEASON. I do not think so, Mr. Jonas.

Mr. JONAS. Is there any relationship between that order and this vacancy rate?

Mr. GLEASON. No, I do not think so, because this vacancy rate of approximately 1,400 people are people we really need in our hospital program.

Mr. JONAS. Has that been a constant thing?

Mr. GLEASON. That has been a constant thing for some time, yes.

Mr. JONAS. So a 1,400 figure is not unusual?

Mr. GLEASON. I do not know about the 1,400 as to whether that is unusual.

Mr. JONAS. Maybe Dr. Middleton could throw some light on that.

Dr. MIDDLETON. We do encounter difficulty in critical categories when we come to a delay in funds because we must operate under the level of the last appropriation until new funds are available. We cannot go out on promise and pick up psychiatrists and others.

Mr. JONAS. Did you have that shortage of 1,400 in the other years?

Dr. MIDDLETON. No. The average would be below 1,400, but certainly it would be a considerable number.

Mr. MONK. I think we should make it clear we do not operate on a table of organization. We operate on an average employment basis, which means we go up and down but average out over the year. When we compute our budgetary requirements we take into consideration the fact that there will be positions vacant for which we are not paying salaries all the time, and this is computed in the average employment figure. So, it is very difficult for us to say at any given time that we have "x" number of vacant positions.

UNOBLIGATED BALANCES

Mr. THOMAS. What was your unobligated balance, first, throughout the agency in 1962?

Mr. MONK. $82,648,000.

Mr. THOMAS. Break it down.

Mr. MONK. General operating expenses, $1,135,000; medical administration and miscellaneous operating expenses, $2,767,000; medical and prosthetic research, $16,000; medical care, $46,000; compensation and pensions, $3,076,000; construction, $67,271,000; veterans' insurance claims and indemnities, $6,102,000; readjustment benefits, $1,604,000; grants to the Philippines, $641,000.

Mr. OSTERTAG. These are total figures in regard to those programs?

Mr. MONK. Yes, sir.

Mr. THOMAS. Repeat your figure for General Operating Expenses?

Mr. MONK. $1,135,000.

VACANCY RATE

Mr. OSTERTAG. On this subject, do I understand correctly that you figure on an average of 2 percent across-the-board vacancies in personnel?

Mr. MONK. Approximately a 2 percent turnover, Mr. Ostertag.

Mr. OSTERTAG. What percentage do you figure on vacancies?

Mr. MONK. We do not compute the percentage of vacancies because we do not have a set number of positions.

Mr. OSTERTAG. But 2,000 is better than 3,000 in personnel, is it not?

Mr. DRIVER. Right, but they are coming and going all the time.

Mr. MONK. The job may be vacant a day or a month.

Mr. OSTERTAG. You mean there is no way of determining the average number of personnel vacancies that exist throughout the year? You have vacancies that occur by virtue of normal circumstances?

Mr. MONK. That is right.

Mr. OSTERTAG. Do we have a picture of how many positions are budgeted or programed that you never fill on an average throughout the year?

Mr. BROWNSTEIN. In the Department of Veterans' Benefits we, of course, have contracting programs. To illustrate, our estimate for 1963, the average employment estimate, is 15,506. Our July through December average employment was 15,578, which is 72 in excess of our average employment for the entire year. This means that in the last 6 months we will have to reduce by roughly 145 people in order to come up to our average employment of 15,506. So to say that a certain number of these positions is vacant would not mean much.

FIELD AND CENTRAL OFFICE EMPLOYMENT

Mr. THOMAS. What is the ratio of employment in the field to the Washington office out of your total of 155,000?

Mr. DRIVER. About 150,000 in the field.

Mr. THOMAS. In the field?

Mr. DRIVER. Yes.

Mr. THOMAS. And about 5,000 in the District of Columbia?

Mr. DRIVER. Yes, sir.

TURNOVER OF PERSONNEL

Mr. THOMAS. What is the ratio of turnover in the two locations, the field and Washington?

Mr. MONK. It would be greater in the field primarily because of the low-grade employees in the hospitals, housekeeping and food service, and laundry employees.

Mr. UNDERWOOD. It is true we are averaging 2 percent a month or 24 percent a year turnover on all our employees and the turnover for the Government as a whole is only about 21 percent.

Mr. THOMAS. How much?

Mr. UNDERWOOD. 20.9 percent. But if you take full time as one group and part time as another it shows a different thing.

Among full-time employees we have a turnover of only 17.8. What causes our big statistical figure is our higher use of part-time employees—13.8 percent of our people, which are part time, are giving us 36 percent of our total separations, and that is because we use quite a few part-time employees in food handling and other categories.

Mr. THOMAS. The general figure throughout the Government was 18 percent, was it not? This year the Civil Service Commission tells us it will be about 16 percent.

PAY INCREASE BY GRADE

Mr. THOMAS. Tell us about the pay increase, comparing 1963 to 1964, and tell us how much of an increase per job it was. Was it 15 percent? Does it average that?

Mr. MONK. No, between 5 and 10 percent.

Mr. SHYTLE. We have a table that shows that.

Mr. THOMAS. Where is that table?

Mr. SHYTLE. It is a supplemental sheet.

Mr. THOMAS. Is this out of your book or Dr. Monk's?

Mr. SHYTLE. It is out of his.

Mr. THOMAS. That was a sliding scale increase, was it not?

Mr. SHYTLE. Yes, sir.

Mr. THOMAS. Give us a little quick rundown. What you have here is not a percentage increase, it shows the dollar increase?

Mr. DRIVER. That is right.

Mr. THOMAS. In grade 1 what was the increase? Do you have that?

Mr. SHYTLE. We did not percentage it out.

Mr. THOMAS. Can you figure it approximately and then correct the record? Then I will ask you about your ingrade steps and then I am going to ask you about your benefits.

Mr. UNDERWOOD. I have the material on the benefits now.

Mr. THOMAS. Can you give us some reasonably accurate figures and then you can straighten it out. We want to see who got this increase.

In your grade 1, who are these and what was the increase? Who are your grade 1 people? What do they do?

Mr. UNDERWOOD. For all practical purposes we do not have grade 1, sir.

Mr. THOMAS. You do not have any grade 1's?

Mr. UNDERWOOD. No, not exactly. There are very few in the Government as a whole. We have about 300.

Mr. THOMAS. What about your next grade, grade 2?

Mr. UNDERWOOD. The new salary range is $3,560 to $4,505.

Mr. THOMAS. Are there quite a few of those?

Mr. UNDERWOOD. Yes.

Mr. THOMAS. What is the percentage increase in pay? What is the overall increase?

Mr. MONK. That would be roughly 5 percent.

Mr. UNDERWOOD. About 2 percent for grade 2.

Mr. THOMAS. What about your grade 3, from $3,820 to $4,830?

Mr. DRIVER. The increase was from $3,760 to $3,820. The two figures are the range in the present salary.

Mr. THOMAS. How much of an increase was that?

Mr. DRIVER. Slightly less than 2 percent. Grade 4 went from $4,040 to $4,110, less than 2 percent.

Mr. THOMAS. That is grade 4?

Mr. DRIVER. Yes.

Mr. THOMAS. What about grade 5?

Mr. DRIVER. The first step rate went from $4,345 to $4,565.

Mr. THOMAS. How much of a percentage increase is that?

Mr. DRIVER. About 5 percent.

Mr. THOMAS. What are their duties mainly?

Mr. BROWNSTEIN. High grade clerical.

Mr. UNDERWOOD. Those would be supervisors of lower clerical or clerks of a specialized type.

Mr. THOMAS. They got a 5-percent increase?

Mr. UNDERWOOD. Approximately, yes.

Mr. DRIVER. Your average general operating expenses grade is 6.6; and your average medical care grade, not counting professional, is 4.7. Your average medical administration and miscellaneous operating expenses grade is 9.3; medical and prosthetic research, the average grade is 7.0; construction, 9.0; supply fund 6.3.

Mr. THOMAS. What would it average out throughout the agency, the increase? I am asking for the sum total 1963 and 1964. What is the package increase?

Mr. MONK. About 7.5 percent overall.

Mr. DRIVER. For everybody.

Mr. THOMAS. But who got the biggest increase?

Mr. MONK. Grade 15 was the biggest increase.

Mr. THOMAS. What was it in grades 12, 13, and 14?

Mr. MONK. Grade 14 averaged about 7.6 percent; grade 13 got an average increase of about 10 percent; grade 12 got about 6.7 percent on the average.

Mr. THOMAS. And when you get up to grade 15 it totaled 15 to 20 percent, did it not?

Mr. MONK. About 8.1 percent for grade 15. Grades 16, 17, and 18 it was not that much.

Mr. THOMAS. The supers, what did they average?

Mr. DRIVER. About 7 percent.

Mr. THOMAS. More than that. It was nearer 12 percent, was it not?

Mr. DRIVER. The 16's got a $750 increase. They would average about 7½ percent in the three grades of the supers.

Mr. THOMAS. The sum total for 1963 and 1964?

Mr. BROWNSTEIN. That is the total. They do not get it in 1964.

Mr. DRIVER. They stopped with one adjustment.

Mr. THOMAS. I was talking about the whole package deal. The first step of a 15 went from $13,730 to $15,665 or 14.1 percent and the top step went from $15,810 to $19,270 or 21.2 percent. This includes both increases. You are right the supers got only one increase.

AUTOMATIC IN-GRADE INCREASES

What about your automatic grade increases? What did they cost for fiscal 1964?

Mr. MONK. About $9 or $10 million.

Mr. THOMAS. That will be every year?

Mr. MONK. Yes, sir.

Mr. THOMAS. How does it work? What does the law say?

Mr. MONK. The law says that the individual will be entitled to an in-grade increase if his performance on the job has been at an acceptable level of competence.

Mr. THOMAS. What is the automatic in-grade step each year?

Mr. MONK. It varies with the grade and the time also varies within the grade.

Mr. THOMAS. A grade 15, the automatic step will be more than a grade 10.

Mr. MONK. That is right.

Mr. THOMAS. What would an automatic grade increase for 15 be? What would it be for a 10?

Mr. DRIVER. About $500 for grade 15, and about $250 for grade 10.

Mr. UNDERWOOD. For grade 15 it goes from $14,565 in the first step to $15,045 in the second.

Mr. MONK. $480 is in the 15.

Mr. THOMAS. What would it be in the popular lower grades, say your grade 7?

Mr. MONK. In the 7's it would be $185.

Mr. THOMAS. Those automatic steps are quite sizable. They ought to be quite a morale booster.

Mr. MONK. Yes, sir.

Mr. THOMAS. It costs the Veterans' Administration every year between $9 and $10 million.

Mr. MONK. That is about right, sir.

EFFECT OF INCREASED IN-GRADE SALARIES

Mr. THOMAS. Mr. Personnel Manager, how does this pay increase bill work with you? Do your people like it? Will it help you to cut down your 2-percent monthly turnover, which is quite expensive and quite large?

Mr. UNDERWOOD. Yes. I think it will and if we properly administer this bill it will do more than that. I think it will increase productivity. You referred to the automatic increases. One of the points of that bill is not to make those automatic but rather to require an acceptable level of competence before they get it. Instead of being automatic they must earn it, therefore. There are a number of situations in which they will not be automatic.

QUALIFICATION FOR IN-GRADE PROMOTIONS

Mr. THOMAS. If the employment was at an unacceptable level why weren't they dismissed?

Mr. UNDERWOOD. I think there is a difference. It is a margin where they won't get an automatic increase that is the difference between totally unsatisfactory where we discharge them and between those that we consider fully satisfactory, and, of course, that is rather difficult to define. But then there are a number of them who will not get it. We have already had 12 of them in the central office who have not received them. One who did not get it retired, another one transferred laterally, and another resigned.

Mr. THOMAS. Who is going to hand out those automatic grade increases?

Mr. UNDERWOOD. Those must be certified by the person who knows his work best, his immediate supervisor. They have to certify in each case now, which is an element that did not exist previously.

Mr. THOMAS. You are going to get more politics inside of an organization than there is up here on the floor of the House.

Mr. UNDERWOOD. It is true that can be a pretty severe jolt because in one sense of the word it is a harder jolt than a reprimand or certain other types of adverse actions, because it goes into his record and shows that for the past period of time he has not been performing at an acceptable level. That is kind of a hard thing for him to carry in his record; but the very fact that a few do not get it, I think, is a pretty good spur to all the rest of them, even if they do get it. There are a few examples of types of performance for which we do not intend to give within grades.

Mr. THOMAS. Which, for instance?

Mr. UNDERWOOD. One would be where his past work had been satisfactory but had fallen off since his last rating; another would be where his work is marginal and barely satisfactory but not fully un-

satisfactory; another is where he has been meeting minimum requirements but he always seems to be avoiding ever doing anything above a bare minimum and another is where his total amount of work is adequate but he is so careless that you really cannot depend upon his work and it takes an unnecessary amount of supervision, or in cases where he has been notified of unsatisfactory work, leading toward discharge. In other words, he has a 90-day warning, or another is where there are specific examples of record of unsatisfactory conduct or there are other negative factors adversely affecting the total group so that he does not deserve more money. Those are examples.

Mr. OSTERTAG. Do you have a figure as to the total number in the VA that have not received the benefit of the increase?

Mr. UNDERWOOD. No, not for the whole VA. We haven't required those kinds of reports. We have had 12 in central office here as a separate station that have not received it so far.

Mr. OSTERTAG. Then you have no general figure throughout the overall service?

Mr. UNDERWOOD. No. There is a lot of experimentation and we do not know exactly how well it is going to work. We know there are certain problems involved in it.

Mr. OSTERTAG. Who has jurisdiction over such determination?

Mr. UNDERWOOD. Each agency is responsible for administering its own under regulations issued by the Civil Service Commission, but the Commission is going to issue new criteria before they give the other side of this, the incentive, the high quality awards.

They expect a certain small percentage of people to earn those. We are talking about the lower end where they have to meet acceptable level of performance to get their regular within grades. We are not authorized to give any of the high quality yet because they are prescribing more concrete guidelines. That will come sometime this year.

ACCRUED ANNUAL LEAVE

Mr. THOMAS. How much money do you have in here for annual leave carryover? That is no new subject with you, Doctor?

Mr. MONK. Do you mean termination pay?

Mr. THOMAS. No. I am going to get to that next.

Mr. MONK. We do not have any money in here specifically for annual leave.

Mr. THOMAS. What is your rule now on annual leave?

Mr. MONK. The rule is 30 days.

Mr. THOMAS. Use it or lose it?

Mr. MONK. Use it or lose it, yes. You can accumulate up to 30 days and carry over.

Mr. THOMAS. What is that figure?

Mr. DRIVER. That varies with each employee. We do not keep records on that and do not carry any money forward for it.

Mr. THOMAS. What happens when one of your employees transfers to another agency?

Mr. MONK. We do not transfer the money. We transfer the leave.

Mr. DRIVER. He takes his own rights with him as to leave.

Mr. THOMAS. Who pays for that leave that accumulated while he was with you?

Mr. DRIVER. Whoever took him.

Mr. MONK. The agency that receives him.

Mr. DRIVER. He may not work a full year for them. He may work less number of days than somebody else because he has the right to the leave.

Mr. THOMAS. The new agency honors the leave that he built up while he was with you.

Mr. DRIVER. That is right.

Mr. THOMAS. You have a 2-percent monthly turnover. You are receiving a lot of other agencies' former employees. How much do you carry in this budget for that activity?

Mr. DRIVER. None. We just carry the money to pay the average employment.

Mr. THOMAS. "X" comes to you. He has 30 days of leave accumulated.

Mr. GLEASON. If one who worked for us went to another agency it offsets.

Mr. DRIVER. The big problem would be the one with the very low leave.

TERMINAL LEAVE

Mr. MONK. The best answer we can give, Mr. Chairman, is the amount we carry in here for terminal leave.

Mr. THOMAS. Those are separate and distinct things.

Mr. MONK. This is the only time we pay it, when the man leaves.

Mr. THOMAS. How much is in here for terminal leave?

Mr. MONK. $7,924,270 for 1963, $8,078,302 for 1964.

Mr. THOMAS. How do you arrive at the terminal leave figure that is $7.5 million a year?

Mr. MONK. This is on the basis of past experience, basically.

Mr. DRIVER. And projected retirements based on age and length of service which we have documented.

Mr. THOMAS. What is the formula now? What is the terminal leave law now?

Mr. GLEASON. The maximum is generally 30 days.

Mr. MONK. When a man terminates his employment with the Government he gets paid in a lump sum.

Mr. THOMAS. What is the lump sum and what is the formula for arriving at it?

Mr. GLEASON. It depends on what his salary is and how much accrued leave he has left.

Mr. MONK. It will run from 90 days to zero for employees covered by Public Law 102, 83d Congress. The maximum anybody could have would be 90 days and this was during the war when they were permitted to accumulate up to 90.

Mr. THOMAS. What is the present law for a new employee?

Mr. MONK. The present law is 30 days, a maximum of 30 days, and if the individual has more than 30 days at the end of the year it is cut back to 30 days and he starts over.

Mr. THOMAS. Is that $7.5 million a figure you carry every year?

Mr. GLEASON. That varies.

Mr. THOMAS. When did this new law go into effect?

Mr. MONK. About 4 or 5 years ago.

Mr. THOMAS. It was longer than that.

Mr. DRIVER. About 1953.

Mr. GLEASON. It is about that.

Mr. THOMAS. You are still carrying this for 10 years?

Mr. GLEASON. It varies from year to year, though, Mr. Chairman.

Mr. THOMAS. As I understood Dr. Monk, the large part accumulated by virtue of the old law.

Mr. MONK. If I left that impression I am sorry. I did not intend to. There would be a relatively few number of employees that have over the 30 days.

Mr. THOMAS. How many people have you budgeted to retire this year for sickness, retirement, and what not? That is your $8 million.

Mr. MONK. $7,924,270 for all terminal leave.

Mr. THOMAS. Is that for 30 days?

Mr. MONK. That would be the average. Some have more than 30.

Mr. THOMAS. What is the total number you figure on retiring? Nobody can have more than 30 days.

Mr. GLEASON. Yes, sir. Some of them can have more than 30.

Mr. THOMAS. That goes gack to the old law, then.

Mr. GLEASON. Yes.

Mr. UNDERWOOD. I would be glad to supply that information.

Mr. GLEASON. We can get the figures, Mr. Chairman.

Mr. THOMAS. What is your best guess?

Mr. MONK. About 3,000 to 3,500 will retire.

Mr. THOMAS. You will average out close to the maximum of 30 days?

Mr. BAKER. Several years ago we made a study of that. At that time there was an accumulation of 32 days per employee, annual leave. That is several years ago. It may have increased or decreased a little bit since then. I couldn't tell you.

Mr. THOMAS. In the old days we found a lot of the agency heads, supergrades, and career employees ready to retire would have 2 or 3 months.

Mr. GLEASON. How many days do you have?

Mr. MONK. I have 60 days.

Mr. THOMAS. That goes back to the old law.

Mr. MONK. Yes, sir.

EMPLOYEE BENEFITS COSTS

Mr. THOMAS. Tell us about the fringe benefits. That costs more money now by virtue of the pay raise.

Mr. MONK. The fringe benefits for 1963 run about $70 million; for 1964 they run about $74 million. I can give you a breakdown if you would like of the categories. The Federal group life insurance——

Mr. THOMAS. All right. For 1964 it is going to be in round figures about $74 million.

Mr. MONK. Yes, sir; Federal group life insurance is $3 million, roughly; Federal health——

Mr. THOMAS. How does that operate, Federal group life insurance?

Mr. MONK. This is the group insurance where the employee pays part and the Government pays part.

Mr. THOMAS. It is on a 50–50 matching basis?

Mr. GLEASON. I think so.

Mr. THOMAS. It does not miss it far.

Mr. MONK. It is pretty close. Health insurance is roughly $8 million.

Mr. THOMAS. What is the basis for that?

Mr. MONK. That is roughly two-thirds employee, one-third Government.

Mr. THOMAS. That is correct. There are four or five variations in there. It averages out 2 to 1.

Mr. MONK. Yes, sir. Now the big one is the retirement contribution. That is roughly $60 million—$59,713,728—and that is a 50–50 proposition. The employee contributes 6½ percent of his gross pay.

Mr. THOMAS. The employees contribute theirs every payday?

Mr. MONK. Yes, sir.

Mr. THOMAS. The Government has been contributing for some years.

Mr. MONK. Uniform allowances, $1,458,799.

Mr. THOMAS. Who gets uniforms?

Mr. GLEASON. That is generally in medical, Mr. Chairman.

Mr. THOMAS. You have policemen and guards, laboratory technicians, food handlers.

Mr. UNDERWOOD. Social workers.

Mr. THOMAS. Social workers, too?

Mr. UNDERWOOD. Yes, sir.

Mr. THOMAS. What does the uniform allowance cost?

Mr. MONK. $1,458,799.

Mr. THOMAS. That is it, is it not?

Mr. MONK. Social security, FICA, $561,878. We have very few employees, relatively, that are participating in the social security program.

Mr. THOMAS. All of yours are under civil service?

Mr. MONK. Most of ours are under civil service, yes.

Mr. THOMAS. This takes care of some of your part-time workers, then?

Mr. MONK. That are on an hourly rate, yes, sir. Then in 1964 we are going to pay the Bureau of Employment Compensation $683,000 as our share of the accident compensation for VA employees.

Mr. THOMAS. What is your overall cost there for your fringe benefits against your payroll?

Mr. MONK. $74 million out of a total payroll of $1,036,004,011; without the fringe benefits it is $962,630,957, so this would be roughly 7½ percent.

Mr. GLEASON. Mr. Chairman, could we insert in the record 2–8? That has the figures on it.

Mr. THOMAS. Yes, civil service contribution, uniform allowance, et cetera. Put 2–8 in the record.

NOTE.—The "Medical research" and "Prosthetic testing and development" portions of the "Medical administration and miscellaneous operating expenses" appropriation combined into one appropriation "Medical and prosthetic research."

Mr. THOMAS. This all averages up about 7½ percent of your total payroll costs. I thought it was a little bit more than that. It is nearer 10 or 10½, is it not?

Mr. GLEASON. No, sir. Ten percent would be $96 million, Mr. Chairman.

Mr. THOMAS. You are right. It is 7½ percent.

Mr. THOMAS. Let us take a look at your general operating expenses. There is $159,750,000 for this. Put page 3–1 in the record.

(The page referred to follows:)

GENERAL OPERATING EXPENSES, $159,750,000

This appropriation provides funds for (a) executive direction of the Veterans' Administration and (b) expenses involved in administering the several direct benefit appropriations and the insurance program.

The general operating expenses appropriation supports the following three major segments of the agency: General administration, the Department of Veterans' Benefits and the Department of Insurance. General administration includes the Office of the Administrator and all supporting staff offices with the exception of the Office of the Assistant Administrator for construction, which is financed by the medical administration and miscellaneous operating expenses appropriation.

The appropriation of $159,750,000 proposed is a net of $1,720,000 less than the amount required for 1963. This includes an increase of $4,330,000 for pay raise and related costs attributable to Public Law 87-793. Excluding these costs, a decrease of $6 million is forecast. This decrease is due principally to (1) reduced rental costs of computer equipment as the result of purchases of this equipment in 1962 and 1963, and (2) employment reductions in most benefit and insurance programs.

Continuing progress is being made in the area of automation and is reflected in this estimate. Specific areas of accomplishment are included in the presentations of the concerned major operating segments.

Mr. THOMAS. Gentlemen, I suggest you read this again. I know you read it last night.

This appropriation provides funds for executive direction of the Veterans' Administration, expenses involved in administering its several direct benefit appropriations and the insurance program. The general operating expense appropriation supports the following three major segments of the agency: General administration, the Department of Veterans' Benefits, and the Department of Insurance. General administration includes the Office of the Administrator and all the supporting staff officers, with the exception of the Office of the Assistant Administrator for construction, which is financed by the medical administration and miscellaneous operating expenses appropriation.

The appropriation of $159,750,000 proposed is a net of $1,720,000 less than the amount required for fiscal year 1963.

You have a few less employees but the overall cost is more.

This includes an increase of $4,330,000 for pay raises and related costs attributable to Public Law 87-793. Excluding these costs, a decrease of $6 million is forecast. This decrease is due principally to reduced rental cost of computer equipment, employment reductions in most benefit and insurance programs.

EMPLOYMENT—GENERAL OPERATING EXPENSES

This is a good page on page 3-2 relating to general administration. Where is this employment in general administration? How is it broken down between the regional and the district?

Mr. DRIVER. That is all Central Office.

Mr. THOMAS. What is the total figure in the Central Office? Is it about 5,000?

Mr. MONK. Roughly, yes, sir.

Mr. UNDERWOOD. That is the Washington area.

Mr. DRIVER. That includes Mount Alto.

Mr. UNDERWOOD. As of December 31 we had about 3,750 in the Central Office; 793 in the Veterans' Benefits Office; and about 902 at Mount Alto.

Mr. THOMAS. Turn to the first chart on page 1-1. You can run this down. You can follow this very easily. General administration, Department of Veterans' Benefits, and so forth.

Mr. Reporter, put 3-2 in the record.

(The page referred to follows:)

GENERAL OPERATING EXPENSES

Comparison of employment and costs by departments

Department	Fiscal year 1962, actual	Fiscal year 1963, estimate	Fiscal year 1964, estimate	Increase (+) or decrease (−) 1964 over 1963
General administration:				
Average employment	1,453	1,510	1,502	−8
Costs:				
Personnel compensation	$10,666,321	$11,892,944	$12,532,154	+$639,210

Total costs	23,458,173	25,082,000	20,091,000	−4,991,000
Public Law 87-793 costs		(713,000)	(1,208,000)	(+495,000)
Grand total:				
Average employment	20,520	19,395	18,661	−734
Costs:				
Personnel compensation	$127,598,623	$128,601,970	$130,290,557	+$1,688,587
All other	33,177,830	32,858,030	29,499,443	−3,358,587
Total costs	160,776,453	161,460,000	159,790,000	−1,670,000
Public Law 87-793 costs		(5,803,800)	(10,134,200)	(+4,330,400)
Change in selected resources	+54,912			
Total obligations	160,831,365	161,460,000	159,790,000	−1,670,000
Unobligated balance lapsing	+1,135,129			
Transfers:				
To Public Building Service, GSA	+27,018	+50,000		−50,000
From veterans special term insurance fund	−220,512	−40,000	−40,000	
Total appropriation or estimate	161,773,000	[1] 161,470,000	159,750,000	−1,720,000

[1] Includes proposed supplemental request of $3,801,000, covering partial cost of pay increase (Public Law 87-793), of which $193,000 is anticipated as a transfer from the appropriation for "Grants to the Republic of the Philippines," fiscal year 1963.

Mr. THOMAS. Here is the Department of Insurance. It goes down from 3,043, a decrease of 402. Your grand total for general operating expenses is minus 734 from 19,395 for 1963.

SUPPLEMENTAL FUNDS, FISCAL YEAR 1963

How many deficiencies do you contemplate for 1963?

Mr. SHYTLE. We have a pending supplemental for readjustment benefits of $63,575,000; $59 million of that is for transfer to the loan guarantee revolving fund.

Mr. THOMAS. Is that fresh money?

Mr. SHYTLE. It is new money we need to pay this $311 million worth of expenditures in the loan guarantee revolving fund. The additional amount, between 1959 and 1961, is the vocational rehabilitation peacetime bill cost.

Mr. THOMAS. That gives vocational rehabilitation to the Korean verteran?

Mr. SHYTLE. Peacetime veterans.

Mr. THOMAS. How many are involved?

Mr. SHYTLE. A little over 1,200 average trainees, I believe.

Mr. GLEASON. Roughly.

Mr. THOMAS. The total cost this year is around $3 million?

Mr. SHYTLE. In the direct benefit appropriation we also have a $42 million supplemental coming up here for compensation and pensions.

Mr. THOMAS. What does that take care of?

Mr. GLEASON. The compensation increase the Congress voted last year?

Mr. SHYTLE. The $31,874,000 is coming up for the pay raise including wage rate increases, for medical care; we have $221,000 coming up for medical administration and miscellaneous operating expenses and we have a general operating expense net supplemental request of $3,801,000.

Mr. THOMAS. Where did that come from?

Mr. SHYTLE. Our pay raise cost in general operating expense was $5,804,000, and our request to you is $3,801,000 and included in that is a request that you transfer $193,000 from grants, which is excess to that grant to the Philippines.

Mr. THOMAS. How many items do you have, four or five?

Mr. SHYTLE. We have five items coming up.

Mr. THOMAS. What is the fifth one?

Mr. SHYTLE. I had readjustment benefits, compensation and pension, medical care, medical administration, and miscellaneous operating expenses and general operating expenses. The total, Mr. Chairman, is $141,278,000.

Mr. HANSMAN. Out of that $35,703,000 is for pay raise cost including wage rate increases.

ABSORPTION OF PAY INCREASES

Mr. THOMAS. I thought you absorbed $12 million out of that $32 million.

Mr. MONK. We did, but not in cash.

Mr. THOMAS. You did not absorb it if it is not in cash.

Mr. MONK. We would have been back to ask you for $9 million more.

Mr. THOMAS. You did not absorb it then.

Mr. MONK. This depends on how you look for it.

Mr. THOMAS. Those are just words, Doctor. When we talk about absorb, that is where a fellow says "absorb." You are asking for more money.

Mr. MONK. That is true. But if we had not absorbed these costs we would be back here for $150 million instead of $141 million.

Mr. THOMAS. Why don't you put it down there, then, "All we were able to absorb was about $9 million." That is what it adds up to, does it not?

Mr. MONK. We do not look at it that way, sir.

Mr. SHYTLE. This is additional workload which we absorbed. As Mr. Monk said, if we had not absorbed it——

Mr. THOMAS. What is that additional workload? You make that explanation under compensation and pensions anyway.

You write them not one letter but usually three or four. If you do not get enough mail we will send you some of ours. You have been doing that all along. There is nothing new in that. You are asking for a supplemental?

Mr. BROWNSTEIN. We did not ask for a supplemental on the statement of the case, Mr. Chairman.

Mr. THOMAS. I mean you set that up as a new item under "Compensation and pension for 1964." What was the amount?

Mr. BROWNSTEIN. 87 positions.

Mr. THOMAS. What does it cost?

Mr. BROWNSTEIN. About $700,000.

Mr. THOMAS. What else is there in the new law?

Mr. SHYTLE. Statement of the case is one of them, peacetime vocational rehabilitation is $850,000, then the administrative appropriation thatwe are going to absorb.

Mr. THOMAS. What other new legislation did you have? You have vocational, settlement, and what else?

Mr. SHYTLE. That is right. Then the priority of absorption was that we would absorb all of the wage board we possibly could. We had an additional $2,182,000 that we absorbed.

Mr. THOMAS. How much did you set aside?

Mr. SHYTLE. We absorbed $2,182,000 of that.

Mr. THOMAS. They all add up to $141 million?

Mr. SHYTLE. That is right, $141,278,000 to be exact.

GENERAL OPERATING EXPENSES BY OBJECTS OF EXPENSE

Mr. THOMAS. Put page 3–3 in the record, Mr. Reporter.
(The page referred to follows:)

Transfers:				
To Public Buildings Service, GSA	+27,018	+50,000		−50,000
From veterans' special term insurance fund	−220,512	−40,000	−40,000	
Total appropriation or estimate	161,773,000	[1] 161,470,000	159,750,000	−1,720,000

[1] Includes proposed supplemental request of $3,801,000, covering partial cost of pay increase (Public Law 87–793), of which $193,000 is anticipated as a transfer from the appropriation for "Grants to the Republic of the Philippines" fiscal year 1963.

Mr. THOMAS. This is by objects. You list the personnel at $130 million, an increase of $1,688,587. Then comes your benefits. It is about 7½ percent of your salaries.

Now we come to "Other objects." You list travel and transportation of persons, employees, and all other. Employees travel for 1963 was $3,177,554. This shows a decrease of $131,330; 1963 over 1962 reflects your increase in the travel per diem, does it not?

Mr. SHYTLE. Yes, sir.

BENEFICIARY TRAVEL

Mr. THOMAS. You have "All other." It shows a $34,000 increase, up to $360,000 against $326,000. What is all other?

Mr. MONK. The increase in beneficiary travel of $34,000 is basically for the peacetime disabled. They go into counseling under the new bill. We pay their way to the counseling point.

Mr. THOMAS. What is that now?

Mr. MONK. The disabled veterans are counseled when they go into training. We pay their way to the point of counseling.

Mr. THOMAS. This is under "Veterans benefits"?

Mr. GLEASON. Yes, sir; peacetime.

Mr. THOMAS. How do you arrive at this figure?

Mr. MONK. This is based on an estimate.

Mr. THOMAS. How long has this been in the law?

Mr. MONK. It has been in the law since the word "go" as far as paying beneficiary travel but the benefits for peacetime came in last year.

Mr. THOMAS. This increase of $34,000 is the peacetime disabled?

Mr. MONK. Yes, sir.

Mr. THOMAS. What is the nature of the expenditures? How large do they run? You pay them from where to where and at what rate?

Mr. MONK. We pay them at the rate of 5 cents a mile unless they want to claim actual expenses, from their home to the point of counseling and of course it depends on how far away they are.

Mr. THOMAS. Your travel increase did not affect this, did it?

Mr. MONK. No, sir. We did not raise this rate when we raised the other rate. There is a sum here——

Mr. THOMAS. Is this the same rate you use in the medical-care program?

Mr. MONK. Yes, sir; for beneficiary travel.

TRANSPORTATION OF THINGS

Mr. THOMAS. Transportation of things is set forth here. It is $384,700 in 1963 against $343,900 in 1964.

I notice the footnote:

Includes proposed supplemental request for $3.8 million, covering partial cost of the pay increase of which 193 is anticipated as a transfer from the appropriation for grants to the Philippines for fiscal year 1963.

Tell us about this transportation of things. Does that include charges to the GSA or is it all household goods?

Mr. GLEASON. Most of it is household goods, Mr. Chairman.

Mr. THOMAS. This is not the item that has a little increase for about four employees going to Manila?

Mr. MONK. Yes, sir. That would be in here.

Mr. THOMAS. What is your yardstick used in your transportation of things? This gets up into money. It would not be here because it shows a minus. You put it over I think under——

EMPLOYEE TRAVEL

Mr. GLEASON. I issued instructions that anyone using air travel——

Mr. THOMAS. Yes.

Mr. GLEASON. I issued instructions that anyone using air travel——

Mr. THOMAS. No, this is transportation of things, now, not personnel. You have got quite a travel bill for employees, in excess of $3 million.

Mr. GLEASON. That is down $131,000 from the previous year.

Mr. THOMAS. Who does all the traveling?

Mr. DRIVER. Field examiners, examiners in connection with training institutions, supervisors.

Mr. THOMAS. We will look into your individual sections or offices. Each has a tremendous travel bill. Be prepared to go into several of your other objects. We will go into it in some detail.

OTHER OBJECT COSTS

This is your overall table. What is your overall "Other objects"? What does that cost this year?

Mr. MONK. In this appropriation?

Mr. THOMAS. Yes. This is your cover sheet for your big one.

Mr. MONK. Approximately $20 million.

Mr. THOMAS. Against your total appropriation of what?

Mr. MONK. $159,790,000.

Mr. THOMAS. What percentage is that?

Mr. MONK. Thirteen, twelve and a half.

Mr. THOMAS. You have a personnel cost here of about $140 million?

Mr. MONK. $140 million.

Mr. THOMAS. What are your other objects?

Mr. MONK. Roughly $20 million.

Mr. THOMAS. Ten percent of your $140 million is $14 million. You have around 15 percent, have you not?

Mr. MONK. Not quite—12½.

Mr. SHYTLE. You can do it as percentage of payroll.

Mr. THOMAS. That is what it is based on. There is no other yardstick you have.

Some of these items are matter over which you have no control. Name those items.

Mr. MONK. Roughly it is the item 25; there are other services where we pay counseling fees, we pay handling charges to institutions, we pay a reporting allowance to institutions.

Mr. THOMAS. Let us see a good breakdown. Let us see one of your first breakdowns on other services.

Mr. MONK. The best one is on 8–5. That is where most of the money is.

Mr. THOMAS. I was bragging on that budget officer this morning. He sure got tired when he got over to "Other objects." Where is it on this page?

Mr. MONK. The third column, "Other services."

Mr. THOMAS. You control most of these, repair of furniture and equipment, miscellaneous contract service, handling charges, vocational rehabilitation and education, counseling fees, R. & E.; Representation allowance, R. & E.

Mr. DRIVER. Reporting allowance, R. & E.

Mr. THOMAS. Reporting, and here is representation down below.

Mr. DRIVER. That is Manila.

Mr. THOMAS. You have here transportation of things, rents, utilities, supplies, materials. There is a summary sheet on 8–4 and 8–5. In between there is not much definite information. You list equipment, furniture, and fixtures. That is quite a figure. Here is grants to States. You have common services adjustments.

Let us see if we can eke it out as we go along.

REPORTING ALLOWANCES

Mr. JONAS. May I ask a question about the $1,462,190 for miscelleaneous services? Is reporting included in there?

Mr. MONK. No, sir.

Mr. JONAS. What do you pay in institutions for reporting?

Mr. MONK. We pay in total, Mr. Jonas, $575,000 in 1964. We pay them $1 a month.

Mr. JONAS. Per student?

Mr. MONK. Per student. That is a full-time resident student. In a correspondence course we pay $1 a quarter.

Mr. THOMAS. We have carried that limitation, have we not, for 10 years?

Mr. MONK. Yes, sir, a number of years.

Mr. JONAS. Do they report on a postal card for 5 cents and you give them $1?

Mr. MONK. No. They report on a sheet about the size of this, but it is a certification they make as to the fact that the veteran was in training and that his progress was satisfactory.

Mr. JONAS. You give them $9 a year or $1 a month?

Mr. MONK. $1 a month.

Mr. THOMAS. At one time you were paying $2 or $3.

Mr. MONK. $1.50 is the highest that it got, then this committee wrote a limitation in. Of course, when our trainees were much higher it ran into a lot of dollars.

We did not pay in the correspondence school but we lost a case in the Court of Claims that requires us to do that.

GENERAL ADMINISTRATION

Mr. THOMAS. General administration.

Put page 4–1 in the record.

(The page referred to follows:)

GENERAL OPERATING EXPENSES

GENERAL ADMINISTRATION, $16,571,000

General statement

In the administration of the Veterans' Administration, the Administrator requires appropriate supporting staff services to keep him informed and advised of the development of agencywide policies and objectives, and to also keep him apprised of the effectiveness and economy of agency operations.

With the exception of the Office of the Assistant Administrator for Construction which is shown under the heading of the "Department of Medicine and Surgery," these supporting staff services are grouped under the title "General Administration," and include the following offices:

Assistant Administrator for Appraisal
Information Service
General Counsel
Board of Veterans Appeals
Assistant Administrator for Personnel
Administrative Services
Controller
Assistant Administrator for Management Services

Personal service cost

Employment and personal service costs for these staff offices are individually set forth and justified in the following presentation.

Costs other than personal services

All costs other than personal services are charged directly to each consuming staff office whenever practicable. In some instances, however, it is more practicable to charge either Administrative Services or Management Services with certain costs consumed by all staff offices and the three operating departments in Washington, D.C. Such costs are transportation, communication services, penalty mail, rentals, printing and reproduction, and certain miscellaneous con-

tractual services. Any comparison of the relationship of "Costs Other Than Personal Services" to "Total Costs," between General Administration and the three operating departments should take into consideration the above costing practice.

Mr. THOMAS (reading):

In the administration of the Veterans' Administration, the Administrator requires appropriate supporting staff services to keep him informed and advised of the development of agencywide policies and objectives, and to also keep him apprised of the effectiveness and economy of agency operations.

With the exception of the Office of the Assistant Administrator for Construction which is shown under the heading of the "Department of Medicine and Surgery," these supporting staff services are grouped under the title "General Administration," and include the following offices: Assistant Administrator for Appraisal, Information Service, General Counsel, Board of Veterans Appeals, Assistant Administrator for Personnel, Administrative Services, Comptroller, Assistant Administrator for Management Services.

Again, we will turn back to the chart 1–2. You will see that broken down here with grade and numbers, which I repeat is a very excellent chart.

This is a good paragraph. It deals with costs other than personal services.

All costs other than personal services are charged directly to each consuming staff office whenever practicable. In some instances, however, it is more practicable to charge either administrative services or management services with certain costs consumed by all staff offices and the three operating departments in Washington, D.C. Such costs are transportation, communication services, penalty mail, rentals, printing and reproduction, and certain miscellaneous contractual services. Any comparison of the relationship of "Costs other than personal services" to total costs between the general administration and the three operating departments should take into consideration the above costing practices.

In other words, you charge that in one spot rather than split it up in three or four spots. Is that what you mean by that language?

Mr. MONK. Yes, sir.

GENERAL ADMINISTRATION COSTS BY OBJECT

Mr. THOMAS. Here is a breakdown that is a good one. Let us put this table on page 4–2 in the record.

(The page referred to follows:)

General operating expenses

DISTRIBUTION OF ACTUAL APPLIED COSTS BY PROGRAM AND OBJECT, FISCAL YEAR 1962

Staff offices	Average employment	10 Personnel services and benefits			20 Contractual services and supplies							42		31

Mr. THOMAS. This is a distribution of applied costs by programs and objects.

You have the Office of the Administrator for 1962, 54 average employment, 1963, 59, and then 1964, 59. Information Service, 1962 is 39; 1963 is 43; 1964 is also 43. General Counsel is 99 for 1962, 104 for 1963 and 1964.

Board of Veterans Appeals, 305 for 1962; 343 for 1963; and 343 for 1964.

MANAGEMENT SERVICES

You have Management Services here, 106 for 1962; 120 for 1963; and 120 for 1964.

Put your finger on the breakdown for Management Services. Which page is that?

Mr. GLEASON. It is page 5–38.

Mr. THOMAS. It starts on 5–37. Look at 5–38.

(Reading):

The Assistant Administrator for Management Services advises and assists the Administrator in Management Services policy matters agencywide. These services include agency manpower utilization, purchasing and supply, data processing systems, telecommunications, paperwork management, work analysis and improvement, mechanization of operations, civil defense and disaster relief. It develops agencywide policies, objectives and guidelines in the above areas designed to improve the agency's performance in discharging its responsibilities with a maximum of economy.

These people are broken down into the Office of Assistant Administrator, 9; Supply Management Services, 36; Systems Engineering Service, 29; and Manpower Utilization Service, 9; a total of 120 average employment.

In the old days you used to call this your brain trust staff, did you not?

Mr. MONK. This office?

Mr. THOMAS. Yes.

They are property custodians, are they not?

Mr. GLEASON. Part of this will be absorbed into our new department which was just reorganized, Mr. Chairman.

Mr. THOMAS. What part?

Mr. GLEASON. Principally Systems Engineering Service.

Mr. THOMAS. What do the management analysts do?

It says:

Formulates and recommends general policies and plans of VA-wide application for management of paperwork from creation to final disposition, work analysis and improvement and mechanization of operations.

Mr. JONAS. They must not be using Dr. Grover.

Mr. THOMAS. We are referring to our distinguished friend at General Services Administration.

Mr. JONAS. Hasn't he told you how to do away with half of your paperwork?

Mr. MONK. We have worked with him.

Mr. THOMAS. Where are the green sheets on this organization now? The best I can find out is on table 1–2. Where is it on this chart?

Mr. MONK. It would be on 1–1. On the lower left.

Mr. THOMAS. Here it is, gentlemen. Assistant Administrator GS–16. Director of Services GS–16. You have two 15's and three more are 5. There is one GS–15 vacancy. Then you have GS–10 to 14, 78. Are there not some savings that could be made there, gentlemen? What about that, Dr. Monk? Aren't you a little topheavy there?

Mr. MONK. I don't think so.

Mr. THOMAS. Didn't it start out with a brain trust unit 10 or 12 years ago?

Mr. DRIVER. No, sir; not this organization.

Mr. MONK. Up until last year this organization and the Administrative Services were under one head. We split off; the Administra-

tive Services is our housekeeping activity. This is our staff support for work measurement, mechanization, supply activity——

Mr. THOMAS. You have the "merchant prince" over there on supply——

Mr. MONK. He is in this Office. His part of this is 36.

Mr. THOMAS. He is all over the place; is that it? We have been trying to get him in one place for 10 years and finally we thought we did but it looks like he is not there yet.

Mr. MONK. He has 36 people in this office.

BOARD OF VETERANS' APPEALS

Mr. THOMAS. What about your workload on veterans appeals?

This budget is a work of art and we want to commend you for it, but next year when you do this, don't change the composition. You just put over here "General Counsel, see page 15." You see we only have 10 fingers and we need 16 fingers to locate all the pages. Will you do that for me?

Mr. SHYTLE. Yes, sir.

Mr. THOMAS. Where is the Judge of the Veterans' Appeals Board?

Mr. STANCIL. Right here, sir.

Mr. THOMAS. What page are you on?

Mr. STANCIL. 5–19.

Mr. THOMAS. Put page 5–19 in the record.

(Page 5–19 follows:)

GENERAL ADMINISTRATION

Board of Veterans' Appeals, $3,446,000—Summary of requirements

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated	Increase (+) or decrease (−), 1964 over 1963

Travel and transportation of persons	13,444	12,100	13,300	+1,200
Transportation of things	8,075	7,000	6,000	−1,000
Rents, communications, and utilities	450			
Other services	5,151	9,000	13,400	+4,400
Supplies and materials	9,051	3,800	6,700	+2,900
Equipment	42,627	6,800	9,900	+3,100
Total cost	2,835,143	3,232,000	3,446,000	+214,000
Public Law 87–793 costs		(177,000)	(330,800)	(+153,800)

Mr. THOMAS. What do your other objects cost here? You have a total personnel cost in round figures of $3.4 million. What do your other objects cost you here?

Mr. MONK. $49,000.

Mr. THOMAS. You have an increase of $1,200 for travel; supplies and materials increases $2,900; equipment is up $3,100. How do you justify that, Judge?

Mr. STANCIL. Which one, sir?

Mr. THOMAS. All of them.

Put pages 5–20 and 5–21 in the record.

(The pages referred to follow:)

BOARD OF VETERANS' APPEALS

The Board of Veterans' Appeals is a statutory Board created in 1933. Its authority is now defined in title 38, United States Code, chapter 71. The major

objective is to equitably decide appeals under all laws administered by the VA, with sympathetic understanding and as expeditiously as possible consistent with quality, in order to grant all benefits to which veterans and their dependents are entitled. The decisions of the Board are final except as to cases involving insurance contracts (1 percent of the cases decided) where suit may be brought into Federal courts. We estimate our workload for fiscal year 1964 at 37,000 cases, which has been the fairly stable rate of receipt in recent years. Many of the decisions entered in these cases involve multiple issues and include contesting claims by two or more claimants.

Distribution of average employment

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated
Office of Chairman	8	6	6
Appellate Service I	76	93	93
Appellate Service II	79	87	87
Administrative Service	142	157	157
Total	305	343	343

Personnel requirements for accomplishing the Board's mission are determined by use of work measurement techniques and principles. Estimates for measured activities are developed by applying work performance standards to anticipated workloads. Staffing requirements for planning, program direction, and supervision, as well as overall personnel in the limited nonmeasurable areas, are dictated by experience.

Average employment in fiscal year 1963 and 1964 is expected to increase 38 over fiscal year 1962. These overall changes in average employment are necessary to:

Absorb increased workload inherent in Public Law 87-97 (38 U.S.C. 4004(d)) which requires the Board to separately set forth findings of fact and conclusions of law in its decisions.

Bring manpower expenditures and workload into reasonable balance.

Continue the maintenance of high-quality decisions that are comprehensive and complete and reflect expert medical and legal appraisal of the facts in the individual case.

Average employment for fiscal year 1962 was considerably below workload demands. It was necessary to supplement the regular work force with extensive overtime to maintain the level of pending appeals within reasonable balance.

Summary of workload

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated
Case receipts	36,153	[1] 34,000	37,000
Board's docket end of fiscal year	9,104	5,000	5,000

[1] Case receipts reduced by reason of Public Law 87-666, effective Jan. 1, 1963. This law modifies appellate procedures at the original jurisdictional level by requiring that field offices furnish each appellant with a "statement of case" and allow a period up to 60 days for appellants to answer. This lengthening of processing time in field offices will create a 1-time lag in appeals received in Washington, thus reducing receipts for fiscal year 1963. However, it is anticipated that decisions will be promulgated in an estimated 38,000 cases during fiscal year 1963 with a consequent reduction in the Board's docket, which is presently excessive.

The workload estimates are developed by applying experience factors to trends in workloads from which appeals are received. Projections for fiscal year 1964 are slightly higher than actual receipts for fiscal year 1962, but within the variance range experienced in the past several years.

Mr. THOMAS. You have the same personnel load in 1964 and it breaks down between appellate service I and II and administrative services, 142, 157, and 157.

What do you mean by your "administrative services," Judge?

Mr. STANCIL. That is a group of divisions that keeps the professional people in business. The typing pool, the mail and records, the hearings section, the correspondence clerks, and things of that sort.

Mr. THOMAS. Do you mean it takes 46 percent of your people to keep the other 54 percent going?

Mr. STANCIL. They are divided about half and half. There are some professional people in the administrative services, but largely we are 50 percent lawyers and doctors and 50 percent clerical personnel.

WORKLOAD—BOARD OF VETERANS' APPEALS

Mr. THOMAS. Look at the workload on 5–21. The case receipts are 36,153 for 1962.

In 1963 you have 34,000, and it is estimated for 1964, 37,000.

You indicate here, "Case receipts reduced by reason of Public Law 87–666 effective January 1, 1963." At the time this was written there was a little guesswork involved.

This law modifies appellate procedures at the original jurisdictional level by requiring that the field offices furnish each appellant with a "statement of case" and allow a period of up to 60 days for appellants to answer.

Do you think that is going to cut down your appeals?

Mr. STANCIL. No, sir. What you are reading here refers to a one-time lag. This law introduces some new requirements in the field that will stretch out the processing time in the field and give me a one-time lag during the current 6 months that we are working.

As to the final effect of this law, it may reduce the number of appeals some. We won't know until we gain some experience.

If it does it would be by reason of the fact that the appellant upon receiving the complete statement of the case would decide not to proceed. I don't expect the reduction to be very material.

Mr. THOMAS. I think that is a good, fair statement, Judge.

EFFECT OF "STATEMENT OF CASE" REQUIREMENT

Mr. JONAS. Do you not anticipate that it will cause considerable reversals, giving the appellant an opportunity to answer the specific reason for his turndown?

Mr. STANCIL. I think unquestionably the appellant will be in a much better position. He can stipulate which facts he is in agreement with, he can pinpoint the facts that he thinks are wrong, and he can address his arguments to the specific issues in a much sharper way.

I think the cases that do reach us will be, on the average, more controversial and perhaps a little more difficult to deal with.

Mr. JONAS. Have you had any yet?

Mr. STANCIL. No, sir. This applies only to appeals received on and after January 1 in the field, and there hasn't been time for any of those to reach us yet.

COMPOSITION OF BOARD OF VETERANS' APPEALS

Mr. THOMAS. How many judges do you have?

Mr. STANCIL. Forty-three associate members.

Mr. THOMAS. How many people does it take to decide a case?

Mr. STANCIL. We have 43 associate members, Mr. Chairman, legal and medical. There are 30 legal associate members and 13 medical associate members.

OPERATION OF APPEALS BOARD

Mr. JONAS. How long does it take you to handle an appeal? To dispose of it?

Mr. STANCIL. This varies with the size of the backlog that we have here in Washington. Right now it is running 50-some-odd days in Washington and about an equal period in the field before the case ever reaches us. When we reduce our workload as I think we will do during the one-time lag that we will have during the first 6 months of this calendar year, I expect the processing time to be in the neighborhood of 35 days in Washington.

Mr. JONAS. How many cases are reviewed by you and the Board?

Mr. STANCIL. The cases are assigned to a section of the Board and they do not all come before me. I see the ones that become controversial for some reason or other and if something particularly brings it to my attention but it runs——

Mr. THOMAS. How many people sit on a section?

Mr. STANCIL. There are three members on a section. The usual composition is two legal members, one medical member, except for those appeals that deal with strictly legal issues. Then it would be all three legal members.

Mr. THOMAS. Is that binding on the Administrator, the three?

Mr. STANCIL. Yes. In the law it provides that if the three are unanimous then this is the final decision with the legal effect of finality.

If there is a split decision then by law it can be disposed of by concurrence of the chairman—that is when I get a vote—with the majority, or the usual practice is to enlarge the panel considering the individual case by adding one or more additional sections. Then I would approve the majority vote.

Mr. EVINS. But they can appeal from that decision.

Mr. STANCIL. From the Board's decision?

Mr. EVINS. Yes.

Mr. STANCIL. No; by law the Board of Veterans Appeals decision is final except in the insurance contracts, which applies to 1 percent of our cases.

Mr. EVINS. The law says the decision of the Administrator shall be final.

Mr. STANCIL. And then it goes on to say such decisions shall be made by the Board of Veterans Appeals.

Mr. DRIVER. The Administrator could ask for another decision.

Mr. JONAS. There is no appeal from the Board to the Administrator? He cannot overrule the Board?

Mr. STANCIL. The Board acts for the Administrator.

Mr. THOMAS. He is the Board.

Mr. STANCIL. If we are making decisions out of harmony with the Administrator's concepts, then I don't assert that the Board is an independent group that can proceed on its own contrary to the Administrator's dictates.

Mr. THOMAS. Give Mr. Jonas a direct answer if you can. Put it directly.

Mr. JONAS. Could the veteran appeal from the decision of the Board in a case that the Administrator has never seen, to the Administrator himself?

Mr. STANCIL. There is nothing to keep him from directing a communication or appeal, as you put it, in a general sense to the Administrator. The law doesn't provide this as a regular adjudicatory step.

Mr. DRIVER. In the informal sense, if the case is brought to the Administrator, he would look at it and write the person and say he has read it and finds no reason to disagree with the Board. Or if he

found a run of cases indicating some policy that he felt differently about, he would then talk to the Chairman of the Board and in that way influence the Board's attitude toward other cases. But to answer your question directly, in a formal sense, in the sense the Board operates, the Board's decision is final and that is as far as it goes.

Mr. GLEASON. Sometimes they can ask for independent medical review, Mr. Jonas.

Mr. STANCIL. This independent medical opinion is another new provision of the law that went into effect January 1 and it is designed to provide in certain complex and controversial cases access to independent medical opinion outside of the Veterans' Administration, to provide expert evidence for the Board. It isn't a routine adjudicative step.

Mr. DRIVER. And it is furnishing evidence.

Mr. STANCIL. It is furnishing evidence for the Board's consideration.

Mr. THOMAS. But in the final analysis, the adjudication is the opinion of the Administrator. Doesn't the law say that?

Mr. DRIVER. The Board's action is, yes, sir.

Mr. THOMAS. Gentlemen, we will now adjourn and meet in the morning at 10.

TUESDAY, FEBRUARY 5, 1963.

Mr. THOMAS. Gentlemen, let the committee please come to order.

When we adjourned yesterday we were taking a look at the general operating expense. May I ask the committee to turn to page 4–1 where the various activities are listed. Yesterday we took up the Board of Veterans' Appeals and the management services functions.

OFFICE OF THE ADMINISTRATOR

Let's look at the Office of the Administrator. We will include the table at page 5–1 in the record. This shows $824,000 for 1964, an increase of $46,000 over 1963. Average employment for 1962 is 54 and it is 59 in both 1963 and 1964.

This in the Administrator's immediate office. Follow the table on 5–1 with pages 5–2, 5–3, 5–4, and 5–5.

(The material referred to follows:)

GENERAL ADMINISTRATION

Office of the Administrator, $824,000—Summary of requirements

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated	Increase (+) or decrease (−), 1964 over 1963
Average employment	54	59	59	
Personnel compensation	$569,903	$664,900	$709,200	+$44,300
Personnel benefits	39,902	48,700	51,500	+2,800
Subtotal	609,805	713,600	760,700	+47,100
Public Law 87-793 pay increase		(34,600)	(59,200)	(+24,600)
Travel and transportation of persons	18,781	31,700	31,700	
Transportation of things		500	500	
Other services	13,263	22,500	22,400	−100
Supplies and materials	2,574	3,700	3,700	
Equipment	5,773	6,000	5,000	−1,000
Total cost	650,196	778,000	824,000	+46,000
Public Law 87-793 costs		(34,600)	(59,200)	(+24,600)

Distribution of average employment

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated
Administrator, Deputy Administrator, Associate Deputy Administrator, and staffs	25	30	30
Assistant Deputy Administrator and staff	9	8	8
Administrator's Advisory Council	12	15	15
Contract Appeals Board	8	6	6
Total	54	59	59

The Administrator is responsible to the President for the administration of veterans' affairs and the laws which govern them.

The Deputy Administrator is the principal assistant to the Administrator in the administration of the VA.

The Associate Deputy Administrator assists the Administrator and the Deputy Administrator in the administration of the VA. He takes independent action for the Administrator on all problems affecting the VA in the areas of office methods and administration, supply management, budget, construction, fiscal, personnel, management audits, and investigation and security, which do not require the personal attention of the Administrator or the Deputy Administrator. He acts for the Deputy Administrator in the latter's absence and for the Administrator in the absence of both the Administrator and the Deputy Administrator. The Assistant Administrator for Management Services, Appraisal, Construction, Personnel, the VA Controller, and the Manager, Administrative Services, report to the Administrator and the Deputy Administrator through the Associate Deputy Administrator.

The Assistant Deputy Administrator, as full assistant to the Administrator and the Deputy Administrator, participates in high-level policy discussions and contributes recommendations regarding solutions of problems and decisions to be made on all programs administered by VA. As directed, he represents the Administrator with the Congress, other Federal agencies, and the Bureau of the Budget. He also acts for the Associate Deputy Administrator in the latter's absence and for the Deputy Administrator in the absence of both the Deputy Administrator and the Associate Deputy Administrator.

The Assistant Deputy Administrator directs the activities of the operations evaluation staff in the Office of the Administrator. He makes independent recommendations to the Administrator regarding areas which should receive priority in substantive research, recommends approval, disapproval or revision of plans submitted by the department heads and staff offices, and recommends action to be taken to solve individual operating problems. He is the Administrator's top planning officer and director of substantive research.

The Executive Assistant presents to the Administrator matters requiring his personal attention. As directed by the Administrator, he monitors special projects and assignments and insures that required action is controlled and coordinated. He discharges for the Administrator all matters of an administrative nature within the Administrator's office.

The operations evaluation staff, under a director responsible to the Assistant Deputy Administrator, acts as the point of contact for operating matters coming to the Office of the Administrator. This staff is responsible for making inquiries into operating matters of interest; evaluating proposals for changes in operating policies and recommending to the Administrator, Deputy Administrator, and Associate Deputy Administrator approval, disapproval, further study or other appropriate action; coordinating proposals with departments and staff offices to assure their presentation for decision in the form desired; and following up to assure that decisions are implemented.

The Contract Appeals Board is an integral part of the Office of the Administrator. Under the Chairman, this Board, by delegation of authority from the Administrator, acts as his authorized representative to ascertain the facts and circumstances attending appeals by contractors from decisions of VA contracting officers under construction, architect-engineer, and supply contracts; and to render final decisions on such appeals in accordance with contract provisions.

The Administrator's Advisory Council, under a Chairman, advises the Administrator on policies, plans, research programs, organization, and effectiveness of established programs. The Chairman of the Administrator's Advisory Council is assisted by a Deputy Chairman who is a member of the Council and also director of planning. The Council is concerned with such matters as how veterans compare with nonveterans, what are the handicaps and needs of veterans in various categories, what new programs are needed, what changes to established programs should be made, and the long-range impact of both existing and proposed programs upon sociological and economic welfare of the veteran population as a whole.

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated	Increase (+) or decrease (−), 1964 over 1963
Personal services and benefits:				
Personnel compensation	$569,903	$664,900	$709,200	+$44,300
Personnel benefits	39,902	48,700	51,500	+2,800
Total	609,805	713,600	760,700	+47,100
These funds are required to provide the necessary personal services to assure adequate staff support to the immediate office of the Administrator. The Administrator's immediate staff provides him a last line of review and in addition deals with problems which do not properly belong in any other 1 organizational element. The increase in cost is primarily attributable to the increased rates provided by Public Law 87-793.				
Travel and transportation of persons:				
Local travel	236	300	300	----------
Employee travel	18,545	31,400	31,400	----------
Total	18,781	31,700	31,700	----------
These funds will provide for trips the Administrator, Deputy Administrator, Associate and Assistant Deputy Administrators, members of their staffs, chairmen and members of the advisory council and Contract Appeals Board must make to carry out their assigned responsibilities.				
Transportation of things: Shipment of household goods	----------	500	500	----------
These funds will provide for the shipment of household goods and personal effects of employees who transfer to this office.				
Other services:				
Miscellaneous contractual services	1,500	5,300	5,100	−200
Contracts with lecturers	9,763	6,900	6,800	−100
President's Council on Aging	2,000	10,300	10,500	+200
Total	13,263	22,500	22,400	−100
These funds will provide for contractual services including VA's proportionate share of the budget for the President's Council on Aging, consultants and court reporters fees, conferences, surveys, repairs to furniture and equipment, laundry service for the staff dining room, and other miscellaneous services incident to Agency management.				
Supplies and materials	2,574	3,700	3,700	----------
These funds will provide for miscellaneous office supplies and other materials for the entire staff of the Administrator's office and necessary supplies for the Administrator's staff meetings and briefings.				
Equipment	5,773	6,000	5,000	−1,000
These funds will provide for replacement and any necessary initial purchase of furniture and equipment.				

Mr. THOMAS. It breaks down some of the other objects here, travel and transportation of persons and other services.

These funds will provide for contractual services including VA's proportionate share of the budget for the present Council on the Aging. Consultants and court reporters fees, conferences, surveys, repair to furniture and equipment, laundry service for the staff dining room, and other miscellaneous services incident to agency management.

This is other services. This more or less covers the waterfront.

PRESIDENT'S COUNCIL ON THE AGING

Who is contributing to the President's Council on the Aging?

Mr. GLEASON. Mr. Chairman, the Administrator of Veterans' Affairs, the Secretary of Health, Education, and Welfare, the Secretary of Labor, the Secretary of the Treasury. Those are the only ones that I can recall offhand.

Mr. THOMAS. We think it is a grand thing, but why can't the VA's part of the overall contribution come out of your research money? Why do you have to set it up here? Can it not come out of your research money?

Mr. GLEASON. I don't think it should properly come out of that, Mr. Chairman, in view of the fact that this is entirely medical.

Mr. THOMAS. This is dealing with a medical problem, though.

Mr. GLEASON. Along with social——

Mr. DRIVER. It is housing and pensions.

ASSISTANT ADMINISTRATOR FOR APPRAISAL

Mr. THOMAS. Assistant Administrator for Appraisal. We will include 5–6 and the workload on 5–7 in the record.

(The pages referred to follow:)

GENERAL ADMINISTRATION

Assistant Administrator for Appraisal, $1,214,000—Summary of requirements

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated	Increase (+) or decrease (−), 1964 over 1963
Average employment	93	93	93	
Personnal compensation	$856,707	$913,859	$965,958	+$52,099
Personnel benefits	65,140	68,030	72,345	+4,315
Subtotal	921,847	981,889	1,038,303	+56,414
Public Law 87–793 pay increase		(47,500)	(77,500)	(+30,000)
Travel and transportation of persons	138,476	153,724	153,674	−50
Transportation of things	8,350	11,188	9,463	−1,725
Other services	8,778	8,490	8,490	
Supplies and materials	849	995	845	−150
Equipment	1,830	4,714	3,225	−1,489
Total cost	1,080,130	1,161,000	1,214,000	+53,000
Public Law 87–793 costs		(47,500)	(77,500)	(+30,000)

The Assistant Administrator for Appraisal advises the Administrator on the effectiveness and integrity of all VA programs and operations. Directs agency-wide management surveys, security, and investigation activities. As Employment Policy Officer for VA represents and acts for the Administrator in promoting and insuring equal employment opportunities for all qualified per-

sons, without regard to race, creed, color, or national origin, employed or seeking employment with VA, and on Government contracts.

Summary of major workloads

Field representatives	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated
Station visits	244	245	245
Preliminary inquiries	93	90	90
Investigation service:			
Full investigations	67	80	80
Preliminary inquiries	74	85	85
Internal audit service:			
Field station audits	7	10	10
State soldiers homes audits	3	1	1
Central office audits		1	1
Special studies	6	5	5
Security service: Cases closed	816	800	800

Mr. THOMAS. The average employment is 93 in 1962, 93 in 1963, and 93 in 1964.

Travel and transportation of persons is $138,476 for 1962, $153,724 for 1963 and $153,674 for fiscal year 1964.

Transportation of things. Why so much travel money? On 5–7 I have a note here, "See green sheets." Where are they?

The Assistant Administrator for Appraisal advises the Administrator of the effectiveness and integrity of all VA programs in operations.

This is one of the most valued sources of information that the Administrator has, is it not?

Mr. GLEASON. That is correct.

Mr. THOMAS. Do they spend most of their time on the road?

Mr. GLEASON. A great percentage of the time, Mr. Chairman.

Mr. THOMAS. As employment policy officer for the VA, he represents the Administrator in insuring equal employment opportunities for all qualified persons without regard to race, creed, or color.

Where are your green sheets on this?

Look at the table, gentlemen. It says, "Stations visited," around 245.

Preliminary inquiries, 93. I don't know what you mean by that.

Veterans services, full investigations; 80, 80.

Preliminary inquiries, 85, 85.

And the internal audits, field station audits, 10, 10.

Security service, cases closed, 800, 800.

POSITIONS AND GRADE—ASSISTANT ADMINISTRATOR FOR APPRAISAL

You have a pretty good staff here and no doubt you need it. You show 93 people. Let's see the green sheets on these.

Mr. MONK. We will have to look at 1–1.

Mr. THOMAS. That is a little cumbersome. It is just one spot in your whole budget.

You have one GS–16, three GS–15's, one 14, and 57 GS–11's to 14. GS–3 to 9, there are 29, and this makes up your 91.

Your table over here on 5–6 calls for 93.

Mr. SHYTLE. This is average employment here, sir.

Mr. THOMAS. Your box still doesn't give us too much information.

How do you grade your investigators? Do they have the same classification that the Civil Service investigators have? They have

a staff over here of about 1,500 and what was the figure, about six or seven hundred investigators and the remaining in clerical work—does anybody remember the breakdown?

Mr. MONK. There are around 600 Civil Service Commission investigators.

Mr. THOMAS. How do the classifications stack up, are they on a comparable basis?

Mr. TURNER. We have grades 11 through 13, Mr. Chairman.

Mr. THOMAS. Your investigators?

Mr. TURNER. Yes, sir.

Mr. THOMAS. And how many of them do you have?

Mr. TURNER. We have 16.

Mr. THOMAS. Out of your 93?

Mr. TURNER. That is right.

Mr. THOMAS. And a remainder of what?

AUDITORS AND INVESTIGATORS

Mr. TURNER. We have three services, sir, the Investigation Service, the Internal Audit Service and the Security Service.

Mr. THOMAS. Do you classify an auditor separate and distinct from an investigator?

Mr. MONK. Yes, sir, there is a different classification standard.

Mr. THOMAS. I can remember in the old days the Department of Justice's investigators investigated and in addition they were good auditors. Which one carries the highest classification?

Mr. TURNER. The internal audit people which we call management specialists range in grade from 11 through 14. We have a few 14's.

Mr. THOMAS. That is your auditing staff?

Mr. TURNER. That is right.

Mr. THOMAS. How many of those do you have?

Mr. TURNER. We have 34 so-called internal auditors.

Mr. THOMAS. Now, your straight-out investigators, do they have a higher classification than the auditor?

Mr. TURNER. No; they are about the same, Mr. Chairman.

WORKLOAD—ASSISTANT ADMINISTRATOR FOR APPRAISAL

Mr. THOMAS. Now, what does that table on 5–7 mean? These bare unexplained figures don't mean much to us. Now, what do they mean?

Mr. TURNER. This is a reflection of the work accomplished in the year indicated.

Mr. THOMAS. Put a little life into these figures. That is what I am trying to get to. What do they mean?

Mr. TURNER. Which ones would you like?

Mr. GLEASON. Start with any of them.

Mr. THOMAS. What do you mean by station visits? What do you mean by preliminary inquiries? "Full investigations," you have 80 this year and 80 next year. How do you know you are going to have 80 next year?

"Preliminary inquiries," 85 this year and half of the fiscal year hasn't come. You give the same figure for next year. Then you have internal audits, field station audits. You have 10 this year and 10 next year.

Soldiers home audits. You are over there looking after the old general.

Central office audits, one and one.

Special studies, five and five.

What does that mean?

Security cases closed, 800, 800.

Breath a little life into these figures.

Mr. TURNER. On station visits we have five field representatives, Mr. Chairman at Atlanta, Boston, Chicago, Dallas, and San Francisco.

Mr. THOMAS. Repeat that again.

Mr. TURNER. They are called field representatives, sir.

Mr. THOMAS. And they are stationed——

Mr. TURNER. In Altanta, Boston, Chicago, Dallas, and San Francisco.

Mr. THOMAS. Where are your 93 people? What part of them are in the District of Columbia and what part of them are elsewhere?

Mr. TURNER. We have all but 10 on duty here in Washington. The five field representatives and their five secretaries are stationed out in the field and they are assigned field stations within given territories which they visit on a routine basis periodically.

They frequently will make a preliminary inquiry—and I would like to define that—at the request of the station manager or a department head. A preliminary inquiry is an investigation to determine whether allegations which we have received are serious enough to warrant a full investigation using people from the central office.

INVESTIGATION OF COMPLAINTS

Mr. THOMAS. How do your investigation audits or otherwise originate now?

Mr. TURNER. Well, they can originate from many sources, sir. From complaints from the public or from Congressmen or reports from inside VA or from veterans who are complaining about services or lack of services, involving any alleged irregularity concerning people in the agency or any of the programs. As they come to us the allegations are referred to the 10th floor and the investigation is approved by the Administrator or his deputy, which we then make.

Mr. THOMAS. What type of inquiry do you get? Do you pay any attention to them?

Mr. TURNER. The nature of the investigations we make are somewhat major. In other words, they may involve the serious personnel irregularities or allegations of those, allegations of program irregularities, such as in the GI housing, schooling, et cetera. They are more of a major nature than individual-type complaints. Sometimes we get complaints of generally bad service at a VA field station or serious allegations against the manager or the director.

Mr. THOMAS. It must be that during the course of any fiscal year you will get 2,000 or 3,000 such complaints from various sources?

Mr. TURNER. There are a lot of individual complaints, sir, and if these appear to be fairly local or involve one person, many times these are referred to the field stations for handling.

Mr. THOMAS. All of your 93 are here in the District of Columbia, excusing 10. What part of that 83 here in the District of Columbia are engaged in reading those complaints, evaluating them, passing them out for investigation, and so forth?

Mr. TURNER. The people in the Investigation Service do this, sir.

Mr. THOMAS. How many?

Mr. TURNER. Altogether there are 32, but only 16 of them are investigators who travel and conduct investigations. Now, we also operate a laboratory in which we examine questionable documents——

Mr. THOMAS. I am not clear whose say-so it is about evaluating these complaints and so forth and so on. The Administrator never sees one, does he, unless it is something of some magnitude, involving some serious shortcoming or alleged shortcoming?

Mr. TURNER. We evaluate these complaints for the Administrator, sir.

Mr. THOMAS. How many people do you have doing that?

Mr. TURNER. As I said, we have 32 total people in the Investigation Service, 16 of which are investigators.

Mr. THOMAS. Does the investigator evaluate these?

Mr. TURNER. No, sir; we have a supervisory head and an assistant and they evaluate the complaints.

Mr. THOMAS. What is that civil service classification?

Mr. TURNER. The Director is a grade 15 and his assistant is 14.

Mr. THOMAS. And that is one subdivision inside the general division?

Mr. TURNER. It is one of three services of the Office of Appraisal.

Mr. THOMAS. How many people do you have in travel status out of your 93 people?

Mr. TURNER. It would be 55; 34 internal auditors, 16 investigators, and 5 field representatives.

Mr. THOMAS. You don't have but 40 internal auditors in the whole service. Thirty-four of those are auditors and the other six are clerical personnel?

Mr. TURNER. Supervisory and clerical; yes, sir.

Mr. THOMAS. What were some of the outstanding things accomplished by this unit say in the last 6 months?

Mr. TURNER. In the Internal Audit Service?

Mr. THOMAS. Yes.

AUDIT STUDY IN FOREIGN COUNTRIES

Mr. TURNER. In terms of special studies, sir, we made a study of VA activities in foreign countries. We also made a study of VA Chief Attorneys' functions.

Mr. THOMAS. VA activities in foreign countries? Do we have to go over there and make a study or do we do that in the Washington office?

Mr. TURNER. We went over there.

Mr. THOMAS. How many went?

Mr. TURNER. Two.

Mr. THOMAS. How long did they stay?

Mr. GLEASON. It was about a 4-month study.

Mr. TURNER. It was about 5 weeks, sir. I would have to check it.

Mr. THOMAS. Including transportation costs, per diem, and everything else, what did that study cost?

Mr. TURNER. I can tell you in a minute.

Mr. GLEASON. That particular study, Mr. Chairman, was an invaluable service to us. Mr. Driver and myself were over there a year ago in Europe and when we came back this is one of the reasons why the law passed by the Congress in the last session gave us permission to consolidate and open up our office in Rome rather than have just the attaché in London, Paris, Frankfurt, and Rome. Because there were so many of the widows who had remarried and not told us about it and were still receiving checks from the Government, I think that internal audit alone saved us a number of millions of dollars.

Mr. THOMAS. You have a little office in Frankfurt, you have a little office in Paris, you have a little office in London. You have had them for several years.

Mr. GLEASON. That is right, and now we are coordinating those through the Rome office.

VA FOREIGN OFFICES

Mr. THOMAS. What has been the function of those offices all along?

Mr. GLEASON. This has been under the Foreign Service itself, Mr. Chairman.

Mr. THOMAS. The justification for this 8 or 10 years ago was for the GI's who went to school over there. Now there is no justification for that. Under the law they had a right to go to school anyplace they wanted to. They were going to get so much money and that was it. So what was the justification of the VA keeping those offices for that purpose?

Mr. GLEASON. It wasn't exactly the Veterans' Administration that was keeping them, Mr. Chairman, because all of those personnel were transferred to the State Department as Foreign Service employees and because of the fact that they have other duties to do——

Mr. THOMAS. You paid the bill though, through transfer of funds.

Mr. DRIVER. When it started we did, Mr. Chairman.

Mr. GLEASON. We haven't paid it for a number of years.

Mr. DRIVER. The program was phased out and transferred to the State Department after the GI education program just about came to a close.

RESULTS OF FOREIGN AUDIT

Mr. THOMAS. What were the fruits of your audit?

Mr. GLEASON. It saved us a couple million dollars, Mr. Chairman, on finding and locating widows especially who had remarried and we had never received information pertaining to the remarriage.

Mr. THOMAS. Who are the widows, foreign nationals?

Mr. GLEASON. Yes, sir.

Mr. THOMAS. And their husbands were living in the United States at the time of the war and they served in the American armed services?

Mr. GLEASON. Or married them overseas, sir.

Mr. DRIVER. During the war.

Mr. THOMAS. Therefore, under the law the veteran was entitled to certain benefits and those benefits are entailed to his family?

Mr. GLEASON. That is right, sir.

Mr. THOMAS. Well, what is the purpose in operating or opening an office? Were you trying to dig up the widows?

Mr. GLEASON. We are trying to dig out those widows, Mr. Chairman, who have remarried and therefore are no longer eligible for the moneys that the United States gives to them.

Mr. OSTERTAG. Was that the purpose of this service?

Mr. GLEASON. Yes, sir.

Mr. THOMAS. What was the net result of it?

Mr. GLEASON. I cannot tell you exactly how many millions of dollars it saved us, but it was in the millions.

Mr. THOMAS. Who are the three big participating countries—Italy, England, France?

Mr. GLEASON. The Philippines is the largest.

Mr. DRIVER. Greece, Italy, and France, with England coming in later.

Mr. OSTERTAG. How about Germany?

Mr. GLEASON. Very few, Mr. Ostertag. When they moved the office from Paris to Frankfurt——

Mr. THOMAS. What is the sum total, Mr. Administrator, sent overseas excluding the Philippines?

Mr. GLEASON. $25 million to $30 million.

Mr. THOMAS. Every year?

Mr. GLEASON. Yes, sir.

COST OF AUDIT

Mr. THOMAS. What did your survey cost you?

Mr. TURNER. The travel cost was $2,880. Salary is figured at $6,072 for a total of $8,952.

Mr. THOMAS. That is far from being excessive.

SAVINGS DUE TO AUDIT

How much money did you save by it?

Mr. TURNER. I don't know, sir.

Mr. GLEASON. We estimate a couple million dollars.

Mr. DRIVER. This is a continuing thing, Mr. Chairman, and the office which will be there now will try to make a permanent part of our operation through the Embassy a regular checking of cases on the rolls.

Mr. THOMAS. As a result of the investigation you opened up in the office in Rome?

Mr. DRIVER. Yes, sir.

Mr. THOMAS. How many people do you have there?

Mr. DRIVER. Three will go.

Mr. THOMAS. What does it cost you a year?

Mr. DRIVER. It hasn't cost us anything yet, because they haven't gone. It will cost in the neighborhood of $75,000.

Mr. THOMAS. It will cost you more than that?

Mr. OSTERTAG. That is for all of Europe?

Mr. GLEASON. Yes, sir.

STATE DEPARTMENT-VA OFFICES

Mr. DRIVER. This is just for the Veterans' Administration personnel. It won't be for the State Department people who also handle our work.

Mr. THOMAS. And your London office, your Paris office——

Mr. GLEASON. That is State Department.

Mr. THOMAS. But the United States is paying the bill and it deals with your subject matter and each one of those offices costs you considerably in excess of $100,000 or $150,000 a year.

Mr. BROWNSTEIN. None of those people work exclusively any more on veterans' affairs matters, Mr. Chairman. They have been integrated in the consular service and they work on a good many things. Social security, visas, etc.

Mr. THOMAS. They have no connection with the VA, then?

Mr. DRIVER. None.

Mr. BROWNSTEIN. They help with the claims, they see that the collections are made or the checks distributed, they help with getting examinations and hospitalization and so forth, but it is only one of several functions they now perform.

Mr. DRIVER. They have a larger function for Social Security than for us in any one location.

Mr. THOMAS. I don't see what the Veterans' Administration can do for one of these people. If they want to go overseas to go to school, the checks are going to be delivered to them.

Mr. DRIVER. We have to have the income questionnaire every year on pension cases. We found considerable fruit here because of misunderstanding of what is required in reporting income and that sort of thing. Coordinating these efforts among all of the embassies——

Mr. THOMAS. You are not in business to figure out income tax returns are you?

Mr. DRIVER. It is an income questionnaire for pension purposes. We have to get one each year.

PAYMENTS IN FOREIGN COUNTRIES

Mr. BOLAND. Why do you have to pay pensions in these countries?

Mr. DRIVER. We are paying them to former American servicemen who live there. The former American serviceman is entitled to it regardless of where he lives, Mr. Boland.

Mr. BOLAND. But this is a different matter. You would look upon this differently in a foreign country, I would think, than in the United States. You are talking about a pension given to somebody who is in need. This is almost in a pauper status. You have to make the same in the United States as he does but you are actually paying him a pension. This is not a service-connected compensation payment. This is a pension which you hand to a veteran in Italy or Greece or wherever he might be.

Mr. DRIVER. We pay it only because of the law.

Mr. OSTERTAG. Is it mostly dependents or widows?

Mr. DRIVER. The pension program is mostly living veterans, but we have many widows and children who also draw pensions.

Mr. THOMAS. Can't you make it mandatory that they sign something indicating they haven't remarried and have it validated by the State Department? They have a tremendous number of employees in all these Embassies and consulate offices.

Mr. BROWNSTEIN. Every check they get shows "unremarried widow," but this doesn't stop them from negotiating the checks after remarriage.

Mr. DRIVER. We find a great willingness to say almost anything to get dollars.

Mr. THOMAS. You can say to the American Embassy, "You go by there and have them satisfy the officer in charge that they are entitled to the check."

They have plenty of staff, don't worry about that. They are not understaffed.

Mr. EVINS. That is what the Embassy is for, to serve our nationals in those countries.

Mr. DRIVER. We find if we wait on the State Department we wait months and months to develop cases. If we find something irregular in a case here in Washington and ask it be investigated we find it will take weeks and the answer almost always is that they have no travel money.

Mr. GLEASON. When Mr. Driver and I were in France checking on this particular matter, Mr. Chairman, we found that out of the Embassy in Paris they had only been able to make five checks on unremarried widows in an entire year and——

Mr. THOMAS. I can tell you how to do it and it will cost you very little. Send the check to the American Embassy.

Mr. DRIVER. We do.

Mr. THOMAS. And say to the recipient, "Here it is. You satisfy our officer that you haven't remarried and you will get the check."

Mr. DRIVER. You have to go to the place where the person lives and talk to the people in the community. They are not going to inform on themselves.

Mr. EVINS. Mr. Driver, couldn't you send a team of two or three people from the VA over there once a year and have it be less expensive?

Mr. DRIVER. We believe it would be more expensive to keep them in a travel status that long rather than to operate out of a permanent station abroad.

Mr. SHIPLEY. How many are involved?

Mr. DRIVER. 2,000 in Greece, another 7,500 in Italy. About 16,000 in Europe I would say, very month.

Mr. SHIPLEY. May I ask another question?

Mr. THOMAS. Yes.

Mr. SHIPLEY. Based on the investigations you had, what percentage of the total recipients in these countries were found to be in a class of drawing it that weren't qualified?

Mr. DRIVER. In the last 5 or 10 years as a result of these checks, and this would include places like Hong Kong and Manila, the total reduction from the rolls has been several million dollars.

Mr. EVINS. This is outside the United States?

Mr. DRIVER. Yes.

Mr. BOLAND. What was the percentage on pensions alone?

Mr. DRIVER. I can't tell you. This involves compensation as well as pensions.

Mr. BOLAND. I am not concerned about the compensation payments but I am concerned about the pension payments. I know you have to pay it under the law but I think we ought to change the law with respect to our nationals in foreign countries and foreign nationals.

Mr. DRIVER. The biggest share of our benefit money going to Western Europe is for pension purposes. The largest share of it is going to the Philippines where we are spending $35.7 million a year for compensation and pension purposes.

Mr. THOMAS. What is the total of your 16,000 checks on an annual basis, a horseback estimate?

Mr. BOLAND. For pensions alone.

Mr. DRIVER. The 16,000 checks would amount to about $16 million per year; pensions alone would be about 13,000 checks at about $13 million.

Mr. BOLAND. This is just pure pensions, people who are living abroad?

Mr. DRIVER. That is right and they are totally disabled.

Mr. BOLAND. I think the pension laws should apply only to people residing in the United States.

Mr. OSTERTAG. Referring to the income factor, how do you deal with that? Is it the same criteria as applied here in the United States?

Mr. DRIVER. Yes, sir.

Mr. OSTERTAG. In other words, you investigate in foreign lands how much they might be earning to determine if they are violating the law as it applies to a limitation on income?

Mr. DRIVER. That is right.

There was a bill, Mr. Boland, which would have removed people permanently residing abroad from the pension program about 4 years ago and it was not passed in the Congress.

Mr. BOLAND. They didn't get anywhere?

Mr. DRIVER. No, sir.

MEDICAL CARE FOR OVERSEA RESIDENTS

Mr. GLEASON. And just in this last session, Mr. Boland, the Congress passed a bill authorizing medical care for these same people overseas.

Mr. BOLAND. What is the view of the Veterans' Administration on this type payment?

Mr. DRIVER. We took a position against that bill.

Out of all the bills we commented on last year I would presume we were in favor of about 10 percent of them, Mr. Boland, and they do cost a lot of money.

PENSION PAYMENTS TO FOREIGN RESIDENTS

Mr. BOLAND. Give us your reasoning why we should pay pensions to those who served in the Armed Forces of the United States who now want to live overseas. And the difficulty which it brings upon the Administration to search them out, determine what their earnings

are and what their disabilities might be and what their medical costs might be, or whether they are in need of medical attention.

Mr. DRIVER. It is far less expensive than it is to do it in this country, for that matter.

Mr. BOLAND. That is not the question. I didn't ask that question at all.

Mr. GLEASON. The basic reason, Mr. Boland, is the fact that the Congress stated that we will pay.

Mr. BOLAND. I know, Mr. Administrator. I understand why you have to do it. There is no quarrel here, but I would like to know whether or not you agree with this law.

Mr. DRIVER. Several years ago when the bill I referred to was introduced, Mr. Boland, we took a position against removing from the pension rolls former American soldiers of war service who earned the right to pension under the law as it was at the time they served, on the grounds that the only reason for the program in the first place was war service.

The question of need and permanent disability in our opinion can apply to a person regardless of where he lives, and the question of residence in these days it seems to us has become one which reaches all around the globe.

This includes people living in South America, in Canada, Italy, and Greece.

Mr. THOMAS. Aren't you advocating a bunch of paid mercenaries?

Mr. DRIVER. These are American veterans the same as anyone else.

Mr. THOMAS. They are not American citizens and they are not living in the United States. What it amounts to, he was a mercenary, bought and paid for. You pay him for his services.

Mr. GLEASON. Many of them are American citizens, Mr. Chairman.

Mr. DRIVER. This is the reason they changed the law the last time to pay medical benefits.

Mr. THOMAS. There is no squabble about that, if he is an American citizen. We are talking about the foreign nationals now. Let's confine our thinking here.

Mr. DRIVER. They were subject to the draft and served honorably in war service.

Mr. EVINS. General De Gaulle says, "Yankees, go home." We had better let them come home and get their checks over here.

Mr. OSTERTAG. The same principle applies to social security, does it not?

Mr. DRIVER. That is right.

Mr. OSTERTAG. In other words, the benefit follows you wherever you may be?

Mr. DRIVER. That is right.

Mr. OSTERTAG. I believe there are literally thousands or hundreds of thousands of social security checks that are being mailed all over the world today.

Mr. DRIVER. Far more than that. There is railroad retirement, civil service; they all have it.

Mr. BOLAND. This is something different from railroad retirement and civil service. That is something they have earned. These employees have paid into the retirement system. I don't know because

you serve in the Army of the United States that you earn a pension—that you earn this or that. Patriotism is something which is important. This system of government under which we all live is important. So you cannot compare it to the civil service payments or railroad retirement at all.

Mr. THOMAS. Half of that money is their own under the civil service retirement. They made a contribution to it all the years they were working.

Mr. BOLAND. You don't want to leave it on that basis, do you?

Mr. BROWNSTEIN. It all depends on how you earn it. It has been suggested that since there was a contribution made by the individual, he is put in a different category than the one who is entitled to this by reason of his service.

Mr. OSTERTAG. That is right.

Mr. BROWNSTEIN. It is a question of payment either in cash or in kind.

Mr. DRIVER. Much of the social security payment, Mr. Boland, is going abroad because the veterans who served, while they were serving got $160 a month credit toward social security. They didn't pay a nickel, except that their service paid for it and that is the same principle for the pension.

Mr. THOMAS. Yes; but outside of that he made a contribution out of every paycheck?

Mr. DRIVER. Not during service.

Mr. THOMAS. No; nobody did.

Mr. DRIVER. But the man who was killed during service, his widow is undoubtedly drawing social security because of the automatic credit paid to his account during his service of $160 a month.

POLICY OF OTHER GOVERNMENTS

Mr. THOMAS. Let's reverse the matter. What did the British and what did the other foreign governments do in this field?

Mr. DRIVER. The other foreign governments didn't pay pensions. I think Israel is about the only country that does.

Mr. THOMAS. What did Canada do?

Mr. DRIVER. Canada pays their men while they are here but their benefit is almost exclusive with compensation.

Mr. THOMAS. You folks had an office in England and France.

What did the British do in this field?

Mr. DRIVER. They don't pay pensions in the sense we are talking about now. They compensate for service-connected disability and that is about all, and they pay that anywhere they are.

Mr. THOMAS. So we are not saying if it is a Greek or an Italian boy living in England at the time of the war and he joined——

Mr. DRIVER. He would get compensated in the case of injury, and they would pay him that when he went back to Greece. But they do not pay him for being in need.

Mr. EVINS. He wouldn't be compensated as well as an American veteran in any event?

Mr. GLEASON. Definitely not.

Mr. OSTERTAG. Mr. Chairman, I don't know whether this is the proper place to raise this question, but I understand that the Veterans' Administration through the Census Bureau has been mailing a questionnaire to literally all veterans who are receiving benefits or to veterans who are in some way associated with benefits of one form or another.

Mr. DRIVER. About 47,000, Mr. Ostertag.

Mr. OSTERTAG. In any event you are sending out a questionnaire to veterans.

Mr. DRIVER. A sample, that is right.

Mr. OSTERTAG. What is the basis or purpose of this questionnaire?

Mr. DRIVER. The Census Bureau has made a random sampling.

Mr. OSTERTAG. You are making a sampling?

Mr. DRIVER. Yes, sir.

Mr. OSTERTAG. As you know, there has been some degree of unfavorable reaction to this questionnaire throughout the country.

Mr. DRIVER. No; is that right?

Mr. OSTERTAG. It is my understanding that many veterans resist or resent some of the questions that are being asked.

Now my question is, Does this same questionnaire go overseas where you are seeking this same information or are you just limiting it to the United States?

Mr. GLEASON. It is limited to the 50 States.

Mr. OSTERTAG. What is the purpose of this questionnaire?

Mr. DRIVER. The primary purpose is to get data regarding veterans status and we are making an effort to use the same questionnaire for disabled veterans to validate the disability rating schedule.

You know under the rating schedule we pay different amounts for disability to compensate the man for his economic loss. We haven't made a check on the amount of economic loss by degree of disability, by disease category for many, many years.

Mr. OSTERTAG. Whether it be service connected or not?

Mr. DRIVER. Only service connected. We are only talking about the service-connected veteran.

Mr. GLEASON. Which has nothing at all to do with pensions.

Mr. DRIVER. That is right. We do not know whether $60 a month for the loss of a leg below the knee adequately compensates the man for his economic loss or not, today.

Mr. OSTERTAG. Consequently it is limited to those veterans who are currently receiving disability compensation that receive this questionnaire?

Mr. DRIVER. Who have a disability of a certain kind; yes, sir. And they have tried to make a correct sampling so the data will be reliable for a larger universe than the sample.

Mr. OSTERTAG. It may be that the inquiry goes beyond the necessary information you seek. For one reason or another there has been a bitter reaction in some quarters.

Mr. DRIVER. We haven't heard anything about that, Mr. Ostertag.

Mr. GLEASON. We haven't gotten any flak on that at all, Mr. Ostertag.

COST OF OVERSEA PENSION PAYMENTS

Mr. EVINS. How much does it cost the VA or the American Government to process, to finance, to service this $13 million worth of pension payments that are paid overseas? Annually, how much does it cost in investigating, looking into it, and so forth?

Mr. DRIVER. Our administrative costs throughout the VA are about 3 percent, Mr. Evins.

Mr. EVINS. How much does it cost in dollars every year?

Mr. DRIVER. The general operating bill is about $160 million.

Mr. GLEASON. For those in Europe, Mr. Evins, we think the office in Rome will be able to handle this adequately, and as Mr. Driver has mentioned this will be in the nature of $60,000 to $75,000 a year.

Mr. EVINS. Do you think you could have an expert team of two or three men and give them a trip once a year and have them look into this more cheaply than you could maintain an office? You need it about once a year to make an appraisal of it.

Mr. GLEASON. We have to keep the folders on all these people somewhere, Mr. Evins, and if it goes by mail sometimes it takes anywhere from 5 weeks to 2 months to reach the Veterans' Benefits Office in Washington. The Rome office is set up more like our office in Manila.

Mr. THOMAS. In response to Mr. Evins' question I think we have the record all mixed up. Now, let's straighten it out.

How many cases do you have overseas of foreign nationals?

Mr. GLEASON. About 16,000 total cases in Europe including foreign nationals.

Mr. THOMAS. Mr. Driver gave the figure a while ago, Mr. Boland, that there is an annual cost of $16 million. The Administrator came up just then with a figure of around $65,000 for administrative costs for Rome. Now what is the actual cost for administrative expense on pensions for those foreign nationals who served with us during the war?

Mr. DRIVER. You are talking about all expenses, developing cases, continuing them on the rolls, and so on?

Mr. THOMAS. Yes.

Mr. DRIVER. We do not have that figure.

Mr. THOMAS. Is the figure for compensation and pensions about $65 million?

Mr. GLEASON. No, sir; $35.7 million is the amount we pay in the Philippines for compensation and pensions.

Mr. DRIVER. About $22 million more in all other countries.

Mr. GLEASON. That is about $16 million as a round figure for Europe.

Mr. THOMAS. That is for Europe?

Mr. GLEASON. Yes, sir.

OPERATIONS IN THE PHILIPPINES

Mr. THOMAS. How about the Philippines, what are we spending there?

Mr. GLEASON. About $47 million in fiscal year 1962 for all benefits.

Mr. THOMAS. And what is that?

Mr. GLEASON. Most of this is compensation for veterans of the Philippines who fought for us during World War II. Then it was a territory.

Mr. THOMAS. They are only drawing compensation?

Mr. GLEASON. In the majority of cases; yes, sir.

Mr. DRIVER. The ones who draw pensions are those who served in our Armed Forces before they achieved a Commonwealth status.

Mr. THOMAS. The Philippine Scouts?

Mr. DRIVER. Yes, sir.

Mr. THOMAS. What is the amount of dollars and cents you send over there either for compensation and pensions——

Mr. GLEASON. It would be about $35.7 million for compensation and pensions, and about $50 million for all VA expenditures.

Mr. THOMAS. For the Philippines alone?

Mr. GLEASON. Yes, sir.

Mr. THOMAS. How many people do you have over there?

Mr. GLEASON. About 318 people, which makes about 53 percent of the entire Embassy staff.

Mr. DRIVER. And about 25 of those are Americans. The others are Filipinos.

Mr. GLEASON. And they do not get paid on the same wage scale.

Mr. THOMAS. Does that take care of the hospital and everything? They operate their own hospital?

Mr. DRIVER. We pay a per diem for the hospital.

Mr. THOMAS. It has nothing to do with the hospital?

Mr. DRIVER. They pay the hospital.

Mr. THOMAS. How many employees do you have?

Mr. GLEASON. About 318 right now, Mr. Chairman.

Mr. THOMAS. What do the 318 do? What is the total number of beneficiaries receiving compensation and pensions?

Mr. GLEASON. It would run I believe close to 55,000 cases out of about 340,000 Philippine veterans.

Mr. THOMAS. 55,000 cases out of 340,000 veterans?

Mr. GLEASON. Yes.

Mr. THOMAS. Are all the checks written over there and all the paperwork and everything done there?

Mr. DRIVER. The checks are written there. The Treasury has a disbursing office in Manila.

Mr. THOMAS. All the bookkeeping and records are there?

Mr. DRIVER. No, sir; the death claims are developed in Washington. During the Korean war the Army removed all of these records out of that country and brought them to this country. And because of that we get the applications in Manila; they are developed by adjucative personnel of the Veterans' Administration: they get the necessary evidence from the claimant but then that information is sent to Washington and compared with the military records of the former service person, which are here, and the award is set up from here.

After that happens all of the continuing work to make the monthly payments is carried on in the Philippines.

So they perform the initial development and continue the case after the adjudication.

Mr. THOMAS. Does the same scale of disability apply to them as applies to American-born and the same scale of disability is paid?

Mr. DRIVER. The same scale of disability is paid but they are paid in pesos.

Mr. THOMAS. The foreign exchange rate is——

Mr. DRIVER. It is about a quarter of the rate today.

Mr. THOMAS. What is the rate now?

Mr. GLEASON. 3.98 pesos per dollar.

Mr. THOMAS. Do you pay them in dollars or pesos?

Mr. DRIVER. They are paid in what is called a lipstick check. It is a Treasury check with a red line across it. They get a peso for a dollar.

Mr. GLEASON. In other words, the veteran who is drawing 40 percent compensation disability in the United States is paid in dollars. A veteran of the Philippines who fought with us would get exactly the same number of pesos that the American gets in dollars and the pesos is running right now about 4 to 1.

Mr. THOMAS. So it costs you about 25 cents on the dollar?

Mr. GLEASON. Yes, sir.

PAYMENTS IN OTHER COUNTRIES

Mr. SHIPLEY. What about other countries?

Mr. DRIVER. It is payable in dollars. Dollar for dollar.

Mr. THOMAS. How about Greece and Italy?

Mr. GLEASON. These are paid in dollars.

Mr. THOMAS. If a man gets 40 or 50 American dollars in Greece or Italy, he is doing pretty well, then?

Mr. DRIVER. He cannot get dollars in Italy because he has to cash his check at the national bank and they of course will only give him lira.

Mr. THOMAS. Yes, but he gets the equivalent.

Mr. DRIVER. Yes, sir.

Mr. THOMAS. Why make fish out of one and fowl out of the other? Why penalize the Filipino, then, and not the others?

Mr. DRIVER. Congress in its wisdom, Mr. Thomas, decided to do this for the Philippines and I believe that is the right way because just last year the State Department again examined this situation and found that on the peso-per-dollar basis the average Philippine citizen living on the Philippine economy lived just as well as the American who gets dollars in Washington and New York.

Mr. THOMAS. We are not talking about the Philippines now; we are talking about the other nationals.

I see now, Mr. Boland, why these patriotic Greeks and Italians went home. They get $50 or $60 American money.

Mr. DRIVER. He can live a lot better, there is no question about it.

Mr. THOMAS. He has got it made. So you have given him an invitation to get out of the United States.

Mr. EVINS. Then we service him over there.

Mr. OSTERTAG. Did I understand Mr. Gleason to state that pensions and compensations are paid in dollars in foreign countries?

Mr. DRIVER. Payments other than in Manila.

Mr. GLEASON. Other than in the Philippines, Mr. Ostertag, pensions and compensation are paid in dollars. In the Philippines they are paid in pesos.

Mr. DRIVER. Except to the scouts. We pay them in dollars.

Mr. OSTERTAG. We are talking about compensation and pensions?

Mr. DRIVER. Both.

EMPLOYEE TRAVEL—ASSISTANT ADMINISTRATOR FOR APPRAISAL

Mr. THOMAS. You have a pretty good travel bill here in the office of the Assistant Administrator for Appraisal of about $153,000. How many do you have in travel status?

Mr. TURNER. Fifty-five.

Mr. THOMAS. How much is that per man per year for travel?

Mr. TURNER. I would have to get that figure for you, sir.

Mr. THOMAS. Well, that is not much. It is about $3,000 a year.

Mr. TURNER. Our travel averages, I think, about——

Mr. THOMAS. What is the length of time he stays on one assignment? Give us a little information on that.

Mr. TURNER. Our field station audits last 4 to 7 weeks depending on the size of the station. Length of time on investigations depends completely on the particular case.

FIELD STATION AUDITS

Mr. THOMAS. How often do you give your hospitals or your installations a general audit?

Mr. TURNER. We have not audited all of them yet, sir. We have audited roughly two-thirds——

Mr. THOMAS. Do you mean you haven't even audited them that first time?

Mr. TURNER. Not all of them, no, sir.

Mr. THOMAS. Why?

Mr. TURNER. We just haven't gotten around to all of them yet.

Mr. THOMAS. Do you rely upon the General Accounting Office to do it, or what?

Mr. TURNER. No——

Mr. MONK. The program people have their own survey staffs who go in on a program basis. The internal audit is approached from a management standpoint across the board. So we have people in these field stations looking at various segments of the stations almost every year.

Mr. THOMAS. How many installations do you have?

Mr. GLEASON. 169 hospitals and 93 clinics, 18 domiciliaries and 1 restoration center.

Mr. THOMAS. Most of your clinics are combined now with your hospitals, are they not? How many men do you have in these field stations, these 5 stations with 10 men? They don't do that much auditing, do they?

Mr. TURNER. These 34 auditors, sir, are stationed here in Washington and travel out of Washington. The field representatives do not make audits.

Mr. MONK. This budget contemplates only 10 field station audits this year.

GAO AUDITS OF VA ACTIVITIES

Mr. THOMAS. What services does General Accounting Office render VA in the way of internal audits?

Mr. MONK. They also make field station audits. We coordinate their work with the work of these internal auditors so that we don't duplicate.

Mr. THOMAS. The General Accounting Office has sent over to the committee two or three segments of audits they have had with the VA where they have made certain criticisms, but it would appear to me that the VA with all this tremendous personnel of theirs would do well to audit each installation every year from top to bottom, and that includes the regional offices where the big money is spent.

Mr. BAKER. Mr. Chairman, in the medical service we have a crew of fiscal auditors who audit all hospitals for which we have accounting responsibility at least once every 18 months.

COMPENSATION AND PENSION AUDITS

Mr. THOMAS. What audit is done with reference to compensation and pensions?

Mr. BROWNSTEIN. We have survey specialists who go into the field stations, Mr. Chairman, but in addition we have installed what we call statistical quality control. This means that a representative number of random sample cases come into central office every month and all of the adjudicative activity is looked at from one end of that case to the other.

In every program within the Department of Veterans' Benefits, we have survey specialists who go to the regional offices and look at the technical proficiency of management as well as every aspect of the particular program.

Mr. THOMAS. You have a big office in Brooklyn. In any of your large cities what scrutiny do you give your Compensation Board in all their decisions?

Mr. BROWNSTEIN. As I mentioned, a representative number of their cases will automatically come into Washington for review. In addition to that, we will have compensation and pension survey specialists go to the field stations and make a site review of the operations.

Mr. THOMAS. What is the nature of the review?

Mr. BROWNSTEIN. Case analysis, quality, and manpower utilization. They run the entire gamut from one end of the operation to the other.

Mr. THOMAS. How many people do you have engaged in this?

Mr. BROWNSTEIN. In the survey work?

Mr. THOMAS. Yes.

Mr. BROWNSTEIN. In compensation and pensions we have 11.

Mr. FARMER. Brooklyn is one being visited at the present time by three technicians to accomplish this survey.

Mr. THOMAS. You have 11 people doing that?

Mr. FARMER. We have 11 people plus——

Mr. THOMAS. How many people are drawing compensation and pensions in total?

Mr. FARMER. 4.3 million.

Mr. THOMAS. And 11 people are checking this?

Mr. FARMER. That is what I want to amend. In addition to the 11 assigned to that, we also draw on the resources of 40 other consultants, and they supplement the efforts of those 11 people.

There is another program which goes on at the local regional office where they are audited too.

Mr. BROWNSTEIN. There is also a built-in audit at the computers.

Mr. DRIVER. Of course those cases have been on the rolls for years and don't change, Mr. Chairman.

Mr. OSTERTAG. How many of the 4 million are permanently rated?

Mr. DRIVER. Permanently? All of them.

Mr. BROWNSTEIN. We also have a built-in audit from our computer and data processing center at Hines, Ill.

Every month we random sample a certain number of cases. This will run about 2 percent of the total per year and these cases are physically audited to see that the payment is proper, that there can be no tampering with any of the input data into the computers and it is a fiscal audit that is performed there as well.

OPERATION OF RATING BOARDS

Mr. THOMAS. How many people are on your board in each one of your field offices in the regional offices?

Mr. BROWNSTEIN. On the rating boards?

Mr. THOMAS. Yes.

Mr. BROWNSTEIN. Three.

Mr. THOMAS. What is the nature of their skills?

Mr. BROWNSTEIN. Well, there is a lawyer and an occupational specialist and a medical specialist.

Mr. THOMAS. All employees of the VA?

Mr. BROWNSTEIN. Yes, sir.

Mr. THOMAS. What supervision does the rating board have?

Is their decision final, unless there is an appeal taken from it?

Mr. BROWNSTEIN. The authorizer will review this action.

Mr. THOMAS. The authorizer. You mean somebody checks his own action?

Mr. BROWNSTEIN. No. This is a separate person.

Mr. THOMAS. Who is the authorizer?

Mr. BROWNSTEIN. An authorizer is a man in a position apart from the rating board.

Mr. THOMAS. Where is he stationed?

Mr. BROWNSTEIN. In the regional office.

Mr. THOMAS. He is a part of the rating board, then?

Mr. BROWNSTEIN. No, sir. He is a part of the authorization activity.

Mr. THOMAS. What say-so in the process does the regional manager have?

Mr. BROWNSTEIN. He, of course, has overall responsibility and the regional manager also, through his office, conducts a quality review. The division chiefs, section chiefs, of adjudication divisions all take random samples.

Mr. THOMAS. Does the regional manager have authority to say to the rating board, "I do not like the result of your decision"?

Mr. BROWNSTEIN. No, sir.

Mr. DRIVER. He can take an appeal to the board of appeals on the decision but he cannot alter it.

Mr. THOMAS. He has no authority, then?

Mr. DRIVER. Not to decide the case. He has authority to review it, to see whether there are irregularities in the decision and if he finds them, he has a clear channel to do something about it.

Mr. THOMAS. He can do like the veteran. He can appeal to the appeals board in Washington.

Mr. DRIVER. If he thinks the case was improperly decided, because of bad evidence, he can write to the Chief Benefits Director and undoubtedly have the board either disciplined or removed.

Mr. OSTERTAG. Can he require the rating board to reconsider or review?

Mr. DRIVER. Yes.

Mr. THOMAS. Repeat that, please.

Mr. DRIVER. He can. Mr. Ostertag asked whether he could have the rating board reconsider or review. He not only could do that, but he could ask that the case be reviewed by another rating board.

Mr. THOMAS. He has that statutory authority?

Mr. DRIVER. Regulatory. It is in the regulations. So does the adjudication officer, the man in charge of the division that the rating boards function in.

Mr. THOMAS. Is it mandatory after he makes that request that it be followed?

Mr. DRIVER. Yes, sir.

Of course, if any case—let's say it is an office with only one rating board so he would not have the advantage of going to another one. He can always write to the Chief Benefits Director in Washington and ask that the case be reviewed by a board of specialists here. In addition, after that he can go to the Board of Veterans' Appeals.

Mr. THOMAS. Does that ever happen?

Mr. DRIVER. Many, many times, yes, sir; in cases of honest difference of opinion.

Mr. OSTERTAG. Do you have authority to take it away from the Rating Board?

Mr. DRIVER. Yes, sir; and direct the action.

Mr. OSTERTAG. But not to change the decision?

Mr. DRIVER. Yes, sir.

Mr. OSTERTAG. It does not necessarily go to the Appeals Board for such a change?

Mr. DRIVER. No. Especially where the question is one of interpreting the law or interpreting a regulation. Many times a veterans representative of a veterans organization will write Mr. Gleason and ask that the case be reviewed here. It will then be brought into a group of specialists in the Compensation and Pension Service, not the Board of Appeals, and that may very well result in a new decision.

Mr. OSTERTAG. You left the impression in response to the chairman's question that the only avenue for a change was through the Board of Appeals.

Mr. DRIVER. No; I did not mean that. If I did, I am sorry, sir.

The point I was making with Mr. Thomas was that the manager is not considered an arbiter on the case. That is all.

Mr. OSTERTAG. I understand.

INFORMATION SERVICE

Mr. THOMAS. Gentlemen, let us take a look at your Information Service, $532,000. Put pages 5–11 and 5–12 in the record.

(The pages referred to follow:)

GENERAL ADMINISTRATION

Information service, $532,000—Summary of requirements

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated	Increase (+) or decrease (−), 1964 over 1963
Average employment	39	43	43	
Personnel compensation	$326,319	$390,119	$418,444	+$28,325
Personnel benefits	24,138	28,981	30,956	+1,975
Subtotal	350,457	419,100	449,400	+30,300
Public Law 87-793 pay increase		(19,000)	(43,000)	(+24,000)
Travel and transportation of persons	18,753	21,300	21,300	
Transportation of things	1,952	1,500	1,500	
Other services	47,773	57,100	55,000	−2,100
Supplies and materials	3,566	3,800	3,800	
Equipment	2,678	4,200	1,000	−3,200
Total cost	425,179	507,000	532,000	+25,000
Public Law 87-793 costs		(19,000)	(43,000)	(+24,000)

MISSION

The threefold mission of Information Service is (*a*) to keep veterans and their dependents informed of their rights and benefits as provided by law, and the proper procedures to be followed in applying for such benefits; (*b*) to keep the general public informed in regard to VA operations, activities, and policy determinations through the release of general information to a wide variety of media, and by answering thousands of inquiries received from newspaper and magazine representatives, Members of Congress, veterans organizations, and other individuals and organizations; and (*c*) counseling and advising the Administrator, his principal assistants, and field station managers concerning public interest and reactions as they concern the determination of VA policies.

In providing accurate and timely information through Information Service, VA not only fulfills an obligation to veterans and their dependents, but also eliminates countless inquiries which would otherwise impose an added administrative burden, and thus retard service. To the extent that beneficiaries are apprised concerning eligibility requirements and correct procedures to follow in dealing with VA, the costs of operating programs are reduced.

WORKLOAD

The number of veterans and dependents who must be kept informed of benefits, laws, regulations, and policies will continue at about the present level. No lessening is anticipated in the needs of operating officials for the promulgation of advisory information to beneficiaries and others regarding proper procedures, policy and administrative changes, et cetera, and the heavy volume of press and other inquiries in regard to general programs and special happenings is expected to continue apace. Legislative changes and refinements enacted in each session of Congress require special informational effort.

In addition to its regular functions, Information Service again will be expected to spearhead ever-growing general Government programs, such as the President's Committee for employing the Handicapped, and Veterans' Day, and assist with other broad programs such as United Nations Day, National Hospital Week, National Mental Health Week, et cetera.

Mr. THOMAS. You had 39 employees in 1962, 43 in 1964.

Mr. GLEASON. May I ask if we could take this up a little bit later? Mr. Hood is working on something I discussed with you earlier. If we could, I would appreciate it very much.

Mr. THOMAS. Very well.

GENERAL COUNSEL'S OFFICE

What about the General Counsel's Office? We did not take a look at that yesterday?

Mr. GLEASON. No, sir.

Mr. THOMAS. Put page 5–16 in the record. This relates to the General Counsel's Office.

(The page referred to follows:)

GENERAL ADMINISTRATION

General Counsel, $1,248,000—Summary of requirements

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated	Increase (+) or decrease (−), 1964 over 1963
Average employment	99	104	104	----------
Personnel compensation	$899,173	$1,011,050	$1,049,126	+$38,076
Personnel benefits	65,797	73,884	82,824	+8,940
Subtotal	964,970	1,084,934	1,131,950	+47,016
Public Law 87-793 pay increase	----------	(50,500)	(93,100)	(+42,600)
Travel and transportation of persons	6,329	9,350	9,350	----------
Transportation of things	----------	861	----------	−861
Other services	228	700	700	----------
Supplies and materials	7,725	11,000	11,000	----------
Equipment	4,258	10,000	10,000	----------
Insurance claims and indemnities	83,851	331,155	85,000	−246,155
Total cost	1,067,361	1,448,000	1,248,000	−200,000
Public Law 87-793 costs	----------	(50,500)	(93,100)	(+42,600)

The General Counsel is the chief officer of the Veterans' Administration in all matters of law and legislation.

The primary responsibilities of the Office of the General Counsel are: (1) Rendering advice and opinions directly and through chief attorneys; (2) reviewing for legal correctness all regulations and directives; (3) collaborating with the Department of Justice on litigation; (4) making final disposition of tort claims; (5) supervising and coordinating matters pertaining to proposed legislation, Executive orders and proclamations; (6) maintaining liaison with both Houses of Congress and (7) acting on applications for recognition of service organizations and accreditation of their representatives.

Summary of major workloads

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated
1. General Counsel opinions requested	1,389	1,450	1,450
2. Chief attorneys opinions reviewed	775	800	800
3. Litigation briefs	1,733	1,750	1,750
4. Administrative tort claims received	138	140	140
5. Legislative history files maintained	954	1,900	[1] 950
6. Legislative reports prepared	395	[1] 320	400
7. Studies conducted and résumés prepared	298	300	300

[1] The number of bills introduced concerning veterans serves as the base upon which the number of legislative history files maintained is determined. Experience has shown the 1st session of a Congress to be more active in the introduction of bills than the 2d session.

Mr. THOMAS. (reading):

The primary responsibilities of the Office of the General Counsel are: (1) Rendering advice and opinions directly and through chief attorneys.

Are you on speaking terms with the chief attorneys?

Mr. BRICKFIELD. Yes, indeed.

Mr. THOMAS. (reading):

(2) Reviewing for legal correctness all regulations and directives; (3) collaborating with the Department of Justice on litigation; (4) making final disposition of tort claims—

what do you mean "final disposition of tort claims"?

Mr. BRICKFIELD. We have authority to compromise and settle tort claims up to $2,500 and anything over that the Department of Justice handles.

Mr. THOMAS. Your chief attorneys in the field do not handle any tort claims?

Mr. BRICKFIELD. Yes. They also have authority to settle tort claims up to $2,500.

Mr. THOMAS. Who settles them, the chief attorney or the chief counsel?

Mr. BRICKFIELD. This year, Mr. Chairman, we have decentralized this activity and I would say for the first 10 months the final decision was with me and in the last 2 months or so the final decisions have been in the chief attorneys, although I send my people out by way of surveillance and we look to see in what amounts they are settling these cases.

ACCREDITATION OF SERVICE ORGANIZATION'S REPRESENTATIVES

Mr. THOMAS (reading):

(5) Supervising and coordinating matters pertaining to proposed legislation, Executive Orders and proclamations; (6) maintaining liaison with both Houses of Congress—

that takes quite a bit of time—

(7) acting on applications for recognition of service organizations and accreditation of their representatives.

What does that mean?

Mr. BRICKFIELD. As you know, the service organizations have service officers. They are not usually attorneys. They are people who are employees of these service organizations who represent claimants before the VA in processing claims.

We pass on their qualifications. Also attorneys are recognized by us to practice before the VA and the Board of Veterans Appeals.

Mr. THOMAS. I did not think you had any limitations. John Doakes could appeal before the Rating Board if the Board wanted to hear him. Where does the Chief Justice come in?

Mr. BRICKFIELD. You know, Mr. Chairman, a private individual can try his own case in a court of law too, but for safety sake, and I guess the public welfare, the States require qualifications for attorneys to practice. So it is here. An individual can try his own case in the Veterans' Administration but when the service organizations prosecute the case for him we make certain that these people are qualified.

Mr. THOMAS. What do you do to make certain they are qualified? We don't mind, Chief Justice, your putting down all these activities if they are really activities. We just do not like all these words. What do you do to see that they are qualified? Do you tell them to go back to school?

Mr. BRICKFIELD. No.

Mr. THOMAS. Have you ever turned down one the American Legion said they wanted represented?

Mr. BRICKFIELD. Yes, sir. The service organization itself processes these people. If they feel they are qualified, I must in all honesty say to you that we pretty much accept, but we do on occasion turn them down but more frequently, when they have been accredited, we take them off the rolls.

Mr. SHIPLEY. Could we have an example, Mr. Chairman, of some that they have turned down?

Mr. THOMAS. Yes.

Mr. BRICKFIELD. Why do we turn them down? Sometimes we feel that there is a conflict of interest between what they are doing for the service organization and the individual, and the Government.

NUMBER OF LAWYERS

Mr. THOMAS. You have 104 people. How many lawyers are there?

Mr. BRICKFIELD. Forty-nine, sir.

Mr. THOMAS. Where are your green sheets on the lawyers? Do I have to go back to the large chart?

Mr. MONK. Yes, sir.

Mr. THOMAS. What do you pay them?

Mr. BRICKFIELD. The average salary, I think, is $10,000.

Mr. THOMAS. There is 1 at 18, 5 at 16, 1 at 15, 48 GS–11 to 15.

Mr. GLEASON. That is right.

Mr. BRICKFIELD. They are lawyers.

Mr. THOMAS. You have more than 45 lawyers, then. There is 15, 48, 52, 54, 55. That is what you said a while ago.

Did you not say 45 or did you say 55?

Mr. BRICKFIELD. I have 49 attorneys on my staff.

Mr. THOMAS. According to this, if I add it up correctly you have about 55.

Mr. BRICKFIELD. I do not believe so.

Mr. DRIVER. I think the difference is all those between 11 and 15 are not attorneys. Some grade 11's are not attorneys.

Mr. THOMAS. What do the grade 11's do if they are not attorneys?

Mr. BRICKFIELD. I have 49 attorneys who are all GS–11 or above. In addition there are five employees in GS–11 or above in our Liaison Service and our law librarian is a GS–11.

Mr. THOMAS. What do the grade 11's do?

Mr. BRICKFIELD. The grade 11 is a junior attorney, in a trainee position. He handles, I would term it the least difficult work in the office.

Mr. THOMAS. What are your qualifications for your lawyers?

Mr. BRICKFIELD. Any person who is admitted to the bar is a qualified attorney and if he is a recent law school graduate with two years experience we start him out at 11. If he has 3 or 4 years service, we will start him out as a 12 or a 13.

TRAVEL

Mr. THOMAS. What do all these figures mean on your workload? You have $9,350 for travel. Where do the lawyers travel to?

Mr. BRICKFIELD. My travel and transportation is $9,350 and a goodly portion of that, Mr. Thomas, is taken up by witness travel. We have $1,600 for witness travel and $6,200 for our employee travel to the various regional offices.

I have a setup whereby someone from my office visits each chief attorney once every 2 years.

JURISDICTION OVER CHIEF ATTORNEYS

Mr. THOMAS. You do not have jurisdiction over the chief attorney, do you?

Mr. BRICKFIELD. Yes. I have a good deal of jurisdiction.

Mr. THOMAS. Tell us about it.

Mr. BRICKFIELD. I am responsible for all legal opinions that any chief attorney renders and as you can imagine they render quite a number of opinions.

Mr. THOMAS. In all the guardianship cases?

Mr. BRICKFIELD. Yes, and loan guarantee. I am responsible for all litigation in State courts as well as in the Federal courts. We have a good deal of criminal matters and criminal prosecutions in false claims, fiduciaries, embezzlement, all crimes that happen in a Federal hospital. We also have tort claims, malpractice cases, and the like.

WORKLOADS—GENERAL COUNSEL

Mr. THOMAS. Where is your workload on your courthouse activities?

Mr. GLEASON. Page 5–16, Mr. Chairman.

Mr. BRICKFIELD. I do not have it broken down except on page 5–16, where No. 3 is "litigation briefs."

Mr. THOMAS. That is where I read about your duties a while ago. You have opinions requested, 1,450 for 1963 and 1,450 for 1964. Who requests these—Members of Congress?

Mr. BRICKFIELD. No. Occasionally Member of Congress but usually from the Department of Veterans Benefits, the various chief attorneys and also from the other elements in central office itself, like the Department of Medicine and Surgery.

Mr. THOMAS. You set out 1,750 litigation briefs.

Mr. BRICKFIELD. These are cases we have in which we develop the facts and the law for the Department of Justice.

Mr. THOMAS. How many cases do you have pending in the Federal courts?

Mr. BRICKFIELD. I think 3,000.

Mr. THOMAS. You do not set that out here, do you?

Mr. BRICKFIELD. I do not have it broken down.

Mr. THOMAS. How many do you have pending in State courts?

Mr. BRICKFIELD. I do not know.

Mr. THOMAS. Those cases are all handled by your chief attorneys in the field, are they not?

Mr. BRICKFIELD. Yes.

Mr. THOMAS. Do you have any jurisdiction over those cases?

Mr. BRICKFIELD. Yes, sir.

Mr. THOMAS. What do you do about it? What is your jurisdiction?

Mr. BRICKFIELD. I am responsible for litigation in all State court cases and it usually runs largely in the guardianship area, where there are guardians appointed for minor children and incompetent veterans.

RELATIONSHIP WITH CHIEF ATTORNEYS

Mr. THOMAS. Suppose your chief attorney in installation X thinks it is time to go in here and remove one of the guardians? Does he have to get permission from the Washington office to do it?

Mr. BRICKFIELD. No, sir.

Mr. THOMAS. Where do you come in, then, as far as regulation of activities of the chief attorneys in the field?

Mr. BRICKFIELD. Largely in the area of legal opinions, not too much in the area of court litigation, but I do not want to minimize the court litigation. We have quite a few problems on titles to land and things of that nature. Also we have quite a large conflict of law practice where the States of Michigan, say, and Maryland may be concerned and in that area we get in with the chief attorneys in the States.

Mr. EVINS. Suppose a beneficiary under some guardianship case wants the amount of compensation increased. Do they come to Washington to get an opinion whether that can be done or not?

Mr. BRICKFIELD. No. It is handled at the local level but if there is any doubt in the chief attorney's mind and he wants an opinion from us he writes us.

Mr. EVINS. He generally can decide it locally?

Mr. BRICKFIELD. He decides it if there is a precedent opinion by the General Counsel, yes. It is something like stare decisis.

Mr. THOMAS. Mr. Administrator, is this a very happy arrangement? How is it working out between your chief counsel's office in the District of Columbia and your field activities?

Mr. GLEASON. I think it works out very well, Mr. Chairman.

Mr. THOMAS. It is our general understanding that people in the field are just about as independent as a hog on ice as far as Washington is concerned. They run their own show.

Mr. GLEASON. To a certain extent this is true, Mr. Chairman.

Mr. THOMAS. What would you say, Mr. Chief Justice, is your one big activity or your two big activities? Your office here?

Mr. BRICKFIELD. I would say legal opinions and briefs, and——

Mr. THOMAS. To the Members of Congress and the various organizations?

Mr. BRICKFIELD. I am also principally responsible for all legislation.

Mr. THOMAS. That is a tremendous responsibility, is it not?

LEGISLATIVE REPORTS AND FILES

This table shows legislative reports prepared, legislative history files maintained, studies conducted, and résumés prepared. What do you mean by that?

Mr. BRICKFIELD. You mean in all three categories? Each in order, we keep a file on every bill that is introduced in Congress. This is on

item No. 5. We keep a file on those matters of interest to the Veterans' Administration.

Mr. THOMAS. Isn't that a lot of waste of time and effort?

Mr. BRICKFIELD. No, sir. You can see in one Congress we prepare about 700 reports.

Mr. THOMAS. Where is that set out?

Mr. BRICKFIELD. This is item No. 6.

Mr. THOMAS. Legislative reports prepared—not 600.

Mr. BRICKFIELD. If you add 1963 and 1964, it will come to about 700.

Mr. THOMAS. Do you give quite an exhaustive study and report to everybody, every Member of Congress, or is it just the bills that have been under active consideration and a request is made by the legislative committee?

Mr. BRICKFIELD. Precisely; the latter a request by a committee of the Congress is necessary and we prepare a report which goes through the Bureau of the Budget and is in turn sent to the committee of Congress.

Mr. THOMAS. There is your big field of activity, is it not?

Mr. GLEASON. It is one of the most important ones, Mr. Chairman.

Mr. OSTERTAG. On that item of legislative history files maintained, I notice there is a sharp reduction estimated for 1964 as against fiscal year 1963. There is a reduction from 1,900 to 950. That, as I understand it, is based on the experience of first sessions as against second sessions.

Mr. BRICKFIELD. That is right.

Mr. OSTERTAG. You are in a first session this year.

Mr. BRICKFIELD. The Congress works on a calendar year, Mr. Ostertag. It is true that in the first session of a Congress there are more bills filed than the latter. Fiscal year 1964 will mainly take in the second session, it will take in the second session of the 88th Congress.

Mr. OSTERTAG. The bills pending or under consideration in the first session are also considered in the second session.

Mr. BRICKFIELD. That is right. We count them as they are introduced. We set up a file at that particular time.

Mr. OSTERTAG. How do you account for the reduction?

Mr. BRICKFIELD. There were less bills introduced in the second session than in the first session of Congress.

Mr. DRIVER. The first session bills would be in the 1963 column.

Mr. OSTERTAG. As of July 1 you are in the 1964 fiscal year.

Mr. BRICKFIELD. That is right.

Mr. OSTERTAG. Which is part of this year.

Mr. GLEASON. No, sir. The bills won't be introduced, so many of them, Mr. Ostertag, after July 1, as there are right now. We are still in fiscal year 1963.

Mr. DRIVER. We will dispose of the reports in fiscal year 1963.

Mr. THOMAS. I imagine when the administration submits a bill it was prepared by your office, was it not?

Mr. BRICKFIELD. When the administration submits a recommendation, sends up an executive communication, yes. That draft is usually prepared in our office and it is accompanied by an executive communication, which is the same thing as the report, which we prepare.

Mr. THOMAS. That is bound to take a lot of time, is it not? You have to be right on the button with something specific that the administration is advocating. It has to be carefully worked out.

Mr. EVINS. Mr. Brickfield, what legislation are you recommending other than these bills that the Members of Congress introduce?

Mr. GLEASON. I would like to answer that, Mr. Evins, if I may. I do not think it is the prerogative of the Chief Counsel to do that. The bills that we would recommend would be those that the present administration would have discussed with me and either report favorably or unfavorably upon them.

Mr. THOMAS. The Chief Counsel has to work hand in glove then with the Administrator and his staff?

Mr. GLEASON. That is right.

BOARD OF VETERANS' APPEALS

Mr. THOMAS. Gentlemen, we went into the Board of Veterans' Appeals yesterday. Did we go into this fully enough as it pertained to the Board of Veterans' Appeals? I believe we did. Unless there is some question on it, we will move on.

Mr. BOLAND. What is the grade for doctors who sit on the Veterans' Appeals Board?

Mr. GLEASON. Grade 15.

Mr. BOLAND. You have some good ones, let me say.

Mr. STANCIL. The chief member of each section, a legal man, is a grade 15. The medical member is a grade 15 and the third legal member is a grade 14. Then there are medical consultants who serve these sections of the Board and legal consultants from grade 12 to 14.

Mr. GLEASON. We are going to have to do something about that and raise them.

PERSONNEL DIVISION

Mr. THOMAS. Let us take up the Personnel Office, pages 5–24 and 5–25. Put those pages in the record.

(The pages referred to follow:)

GENERAL ADMINISTRATION

Assistant Administrator for Personnel, $1,068,000—Summary of requirements

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated	Increase (+) or decrease (−), 1964 over 1963
Average employment	99	100	100	
Personnel compensation	$812,938	$899,964	$946,326	+46,362
Personnel benefits	60,929	67,301	70,974	+3,673
Subtotal	873,867	967,265	1,017,300	+50,035
Public Law 87-793 pay increase		(58,400)	(80,400)	(+22,000)
Travel and transportation of persons	28,479	29,600	31,000	+1,400
Transportation of things	2,090	1,869	2,100	+231
Other services	6,204	8,000	9,000	+1,000
Supplies and materials	9,403	3,266	4,600	+1,334
Equipment	9,442	4,000	4,000	
Total cost	929,485	1,014,000	1,068,000	+54,000
Public Law 87-793 costs		(58,400)	(80,400)	(+22,000)

The Assistant Administrator for Personnel advises and assists the Administrator in all personnel policy matters. Develops agencywide personnel objectives and policies which will enable VA to obtain, develop, and retain the best qualified personnel. Furnishes advice and technical guidance to key agency and department officials on the application of VA policies and of Civil Service Commission regulations.

Average employment is being held to the fiscal year 1963 level although increased workload is anticipated as a result of Executive Order No. 10988. This order places new emphasis on relationships with employee organizations. We cannot foresee all of the problems that will arise in this area but it is already evident that the workload increase will be substantial. Areas contributing to this increase include: Implementation and maintenance of regulations; development of training materials and guidelines; Civil Service reporting requirements; increase in the number and complexity of appeals by organizations and by individual employees; and problems associated with denials, withdrawals, suspensions of agreements with organizations.

Mr. THOMAS. You have 100 people. Travel and transportation is $29,600 in 1963 and jumps up to $31,000 in 1964. Other services go from $8,000 to $9,000, supplies and materials from $3,266 up to $4,600.

Where are all your people located, Mr. Personnel Officer? There are a hundred this year, a hundred next year.

Mr. UNDERWOOD. They are located here in the central office.

OTHER OBJECT COSTS—PERSONNEL DIVISION

Mr. THOMAS. Why do your other objects go up? They go to about $4,000. What do you do with $2,100 in transportation of things?

Mr. UNDERWOOD. The estimate there, transportation of things, that has to do primarily with our estimate as far as household goods are concerned when we bring in field people to fill essential technician vacancies. We try to staff these top technical positions with people who are informed about the problems in the field, if and when we decide to fill vacancies.

We feel they are better informed.

Mr. THOMAS. That is transportation of things. What about your $31,000 for travel of personnel?

Mr. UNDERWOOD. In our $31,000, that is broken basically into three parts: $17,000 has to do roughly with the evaluation of the total personnel program of the Veterans' Administration. That would include elements like the review of classification and wage administration, our recruiting program at colleges and other recruitment activities, the net effects of our program.

Mr. THOMAS. You do not staff personnel at X hospital in Boston, New York, Los Angeles, or Chicago, do you?

Mr. UNDERWOOD. No; but we evaluate how our total personnel policies of the agency are working from the broad overview.

Mr. THOMAS. How many people do you have under your jurisdiction? You have jurisdiction just over the central office, around 5,000 people?

Mr. UNDERWOOD. No. I advise with the Administrator on all of the personnel management matters of the Veterans' Administration in all departments and then, of course, out of that——

Mr. THOMAS. In the field, too.

Mr. UNDERWOOD. Yes; throughout the country, and then of course 38 of those people run the central office personnel service for the central office itself like any other personnel office.

ACTIVITIES, PERSONNEL OFFICE

Mr. THOMAS. Break down the activities of your 100 people. What do they do?

Mr. UNDERWOOD. Thirty-eight run the central office as a station; 12 of them work on evaluations, reports, and statistics. That has to do with the evaluation of the total program; the accumulation of statistics for reports and research, and material dealing with manpower utilization; 18 of them have to do with work in recruitment and placement, employee relations, and appeals to the Administrator from the field.

Mr. THOMAS. Where are you reading that?

Mr. UNDERWOOD. I am just giving it to you. This is supplemental.

Mr. THOMAS. I have looked in my book. I do not see that good material.

Mr. UNDERWOOD. I am giving you material that is not in the book. I can read it from the book if you wish.

Mr. THOMAS. Sir?

Mr. UNDERWOOD. I can read it from the book. I can refer to the material in the book. I was trying to supplement what is in writing.

Mr. GLEASON. Pages 5–25 and 5–26 relate to this, sir.

Mr. THOMAS. I do not understand where it is. I do not find it in my book.

Go ahead.

Mr. UNDERWOOD. You asked me how we were using the 100 people.

Mr. THOMAS. Break down again now your 100 people. Thirty-eight of them run the central office as a station.

Mr. UNDERWOOD. That is right. The others, evaluation and reporting, are 12.

Mr. THOMAS. Is that part of the 38?

Mr. UNDERWOOD. No.

Mr. THOMAS. Evaluation and reports from where?

Mr. UNDERWOOD. From the central agency as a whole—throughout the country and outside the United States. In other words, that provides a lot of the statistics we have in here, and for other requests.

Mr. THOMAS. Go ahead.

WAGE BOARD AND CLASSIFICATION ACTIVITIES

Mr. UNDERWOOD. Classification and wage administration—that is classification of positions under the Classification Act, and evaluation of positions for about 37,000 people that are under the wage administration system.

Mr. THOMAS. What do you do about that?

Mr. UNDERWOOD. We establish basic agency policy and systems for administration of these programs, see that they are kept in alinement.

Mr. THOMAS. Do you set the wage?

Mr. UNDERWOOD. We administer the total program to see that it is in compliance.

Mr. THOMAS. Who sets the wage? Do you set it?

Mr. UNDERWOOD. No; the wages at individual stations are set up on the basis of the prevailing wage rate in the local community.

Mr. THOMAS. I am trying to get you to say that you can pinpoint the Department of Defense to do it for you. They do it for you, do they not?

Mr. UNDERWOOD. No.

Mr. THOMAS. They set the prevailing wage for the classification in the area and you come within that, do you not?

Mr. UNDERWOOD. No.

Mr. THOMAS. Who does?

Mr. UNDERWOOD. We, through our own wage program. We have three separate and distinct wage schedules and we do work in harmony with other agencies, such as GSA, that have similar wage schedules.

Mr. THOMAS. Don't you have one agency in the Government that really works out that schedule?

Mr. MONK. No, sir.

Mr. DRIVER. We ought to have.

Mr. GLEASON. That would be a good thing if you could do it, Mr. Chairman. Then everybody would be on the same basis. We won't have the problems that we run into now.

Mr. THOMAS. Do you not ultimately rely upon the Department of Defense?

Mr. MONK. Not very often. We do in an area, as Mr. Underwood said.

Mr. THOMAS. Let us go back. Here is the area of New York City and the New England States. Who is the largest employer up here? It is not the Veterans' Administration. It is the Department of Defense, is it not?

Mr. MONK. In the food service area we are the biggest and generally we make the wage surveys on foodworkers. In the maintenance area we may ride with the Army, the Air Force, or the Navy, maybe participate in the survey.

Mr. THOMAS. The predominating employer in the area really carries the flag?

Mr. GLEASON. It depends on the function performed, Mr. Chairman.

Mr. THOMAS. How does Mr. Underwood come in there?

Mr. MONK. He prescribes the system and criteria for determining the wage rates in an area.

Mr. THOMAS. For all of his wage board employees. How many do you have?

Mr. UNDERWOOD. 37,000.

Mr. THOMAS. How many people do you have assigned to that?

Mr. UNDERWOOD. On our staff we only have nine people in the Classification and Wage Service because we are administering and controlling the overall. When they conduct a wage survey at an individual station, the locality data are obtained by the local station and are sent in to the central office.

EMPLOYEES ENGAGED IN PERSONNEL WORK

Mr. TURNER. Your entire personnel is located in the Washington office?

Mr. UNDERWOOD. Under this 100 people we are talking about; yes.

Mr. THOMAS. How many do you have in your various installations out in the field? Do you have any jurisdiction over those?

Mr. UNDERWOOD. Through the departments. The departments are operational and administer the general policy.

Mr. THOMAS. How many people outside of the District of Columbia are engaged in personnel work?

Mr. MONK. 1,426.

Mr. THOMAS. Who has jurisdiction over those?

Mr. MONK. It depends.

Veterans' Benefits has part of them. They have 164; Medical has 1,223, and Insurance has 39.

CENTRAL OFFICE PERSONNEL STAFF

Mr. THOMAS. Mr. Underwood's office has no jurisdiction over them?

Mr. MONK. He has no direct line jurisdiction. He has the staff responsibility on the Administrator's staff for the total personnel program, policies, procedures, but as far as direct jurisdiction over these field people he has none.

Mr. THOMAS. What does he need with a hundred people then? It looks like it should be cut in two. He does no payroll work, he does nothing. That goes over to Administrative Services.

Mr. MONK. Thirty-eight of these people serve about 3,750 employees in the central office. All operating personnel matters for those employees are done in Mr. Underwood's shop.

Mr. THOMAS. What are those actions?

Mr. MONK. Recruitment, promotions, all the personnel actions—terminations, discipline, training, classification.

Mr. THOMAS. But the bookkeeping work is done by Administrative Services?

Mr. MONK. The bookkeeping work is done by Administrative Services; initial papers are prepared in Personnel.

Mr. THOMAS. Let us see the green sheets on this activity. There is 1 grade 17, 1 grade 16, 4 grade 15's, 1 grade 14, and 46 from 10 to 14.

Mr. GLEASON. Forty-seven from 3 to 9.

Mr. UNDERWOOD. I have it broken down for each individual grade if you would like, Mr. Chairman.

Mr. THOMAS. Your justification needs considerable strengthening for 100 people in view of the fact that you have about 1,500 people engaged in personnel work in the field.

Mr. GLEASON. A lot of this is a consolidation of those reports from the field, Mr. Chairman.

Mr. THOMAS (reading):

The Assistant Administrator for Personnel advises and assists the Administrator in all personnel policy matters, develops agencywide personnel objectives and policies which will enable VA to obtain, develop, and retain the best qualified personnel; furnishes advice and technical guidance to key agency and department officials on the application of VA policies and of civil service regulations.

Implementation and maintenance service reporting requirements, increase in the number and complexity of appeal for organization—

et cetera. You duplicate all that in the field.

Mr. GLEASON. Not quite, sir. If you will be good enough to read the second paragraph on 5–25 you will notice that there is an anticipated increase in the workload for this year.

Mr. THOMAS. That is what I was reading from.

Average employment is being held to the fiscal year 1963 level. Order 10988 places new emphasis on relationships with employee organizations. We cannot foresee all of the problems that will arise in this area but it is already evident that the workload increase will be substantial.

How?

Mr. UNDERWOOD. That has to do with employee organizations or unions. Since July 1 until December 31 we have had 124 different lodges or union organizations recognized throughout the VA. We could expect that by June 30 next year we will have a total of about 240 recognized.

Mr. THOMAS. They can fill your office altogether by that time. Next year they will run the show, won't they?

Mr. MONK. Mr. Chairman, we are the third largest employer in the Federal Government, 175,000, roughly, individuals on the payroll. Mr. Underwood has 62 people——

Mr. THOMAS. 175,000?

Mr. MONK. Roughly, individuals, full-time equivalent of 155,000.

Mr. THOMAS. You just handled that 20,000 very lightly, Dr. Monk.

Mr. MONK. Those are full-time individuals. Part-time individuals, as far as personnel administration is concerned, take as much as a full-time individual because he has to have the same kind of personnel action. Mr. Underwood has 62 people to provide the staff assistance, to set the policies, lay the procedures, evaluate the program, and ride herd on it for the Administrator.

VA AND CSC PERSONNEL WORK

Mr. THOMAS. What does the Civil Service Commission do?

Mr. MONK. They do some of the same thing, but we have to translate all of the Civil Service Commission regulations into our language and policy for the field operation.

Mr. GLEASON. We have to prepare it now.

Mr. THOMAS. Do you give your own examinations through this personnel office? Do you do your own placement or does the Civil Service Commission do it?

Mr. MONK. We do our own placement in the central office through this central office personnel service, which employs 38 people.

Mr. THOMAS. Do you have a board sitting over there with you from the Civil Service Commission?

Mr. GLEASON. No.

Mr. UNDERWOOD. In certain categories of personnel, no. In dietetics, psychologists, and in those fields where we have rating boards, we do our own rating. We develop qualification standards as to what the appropriate requirement should be for individuals for rating. We develop many of those in categories that are peculiar to our organization.

Mr. THOMAS. You mean you write standards and job descriptions?

Mr. UNDERWOOD. There are individual job descriptions for an individual. Actually, I was referring to the qualifications of individuals

on the one hand and then standard for grades and classification on the other. We set up criteria for those in categories that are peculiar to us. We also work with the Commission.

IN-GRADE PROMOTIONS

Mr. THOMAS. Is it your function to pass on these in-grade promotions each year that are set up in the new pay act?

Mr. UNDERWOOD. No. We do not handle individual actions. That is operational, which is handled at the operating level.

Mr. THOMAS. Where do you come in then?

Mr. UNDERWOOD. How it shall be done in the first place. In other words, what are the criteria? Are we going to have a lean or a liberal policy on granting high quality within grades or in meeting what is required to gain within grades? That has to do with one type of policy. I could name a number of things that we are working on now.

Mr. THOMAS. The supervisor says "Yes" or "No" to an in-grade promotion. Is that final or does your office have anything to do with it?

Mr. UNDERWOOD. At the very high levels, if it becomes a problem for the Administrator, we review it, study it, make a recommendation to him.

SUPERVISION

Mr. THOMAS. You have a lot of chiefs and you have a lot of Indians. Who handles the Indians?

Mr. UNDERWOOD. The personnel officers at the station and at the lower level. We do believe in a high degree of delegation of authority to the field in the field of supervision and administration. We feel that is important. If we would overcentralize administration in Washington, that is not good. We have only nine people, for example, in the administration of wage and classification for our total agency and that is a pretty small group. Yet we do have to develop a great deal of material for the Bureau of the Budget and others when they are talking about these new pay acts and things of that kind.

Mr. THOMAS. Are there further questions on this?

EMPLOYEE ORGANIZATIONS

Mr. EVINS. How many employee organizations are there within the VA itself?

Mr. UNDERWOOD. Employee organizations?

Mr. EVINS. That have been organized or where there are employee union organizations.

Mr. UNDERWOOD. At the moment we have 134 recognized lodges. That is made up of only about five different organizations. For example, the American Federation of Government Employees has about 80 recognized; the National Federation of Federal Employees has about 40, and then there is NAGE; a metal trades union, and a few small trade and craft unions that are organized, but not many. I would say 5 nationals representing 134 recognized lodges at the moment. We could expect to have about 240 lodges recognized by the end of the year.

Mr. THOMAS. Mr. Reporter, put pages 5–27, 28, 29, and 30 in the record.

(The pages follow:)

GENERAL ADMINISTRATION

Office of the Manager, Administrative Services, $4,690,000—Summary of requirements

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated	Increase (+) or decrease (−), 1964 over 1963
Average employment	584	573	565	−8
Personnel compensation	$3,005,290	$3,131,900	$3,217,500	+$85,600
Personnel benefits	227,012	248,500	252,800	+4,300
Subtotal	3,232,302	3,380,400	3,470,300	+89,900
Public Law 87-793 pay increase		(132,200)	(206,800)	(+74,600)
Travel and transportation of persons	5,409	9,200	11,100	+1,900
Transportation of things	32,034	39,300	39,000	−300
Rents, communications, and utilities	364,156	391,600	415,700	+24,100
Printing and reproduction	331,561	418,300	418,100	−200
Other services	159,100	224,000	150,800	−73,200
Supplies and materials	157,043	151,000	150,000	−1,000
Equipment	69,175	35,200	35,000	−200
Total cost	4,350,780	4,649,000	4,690,000	+41,000
Public Law 87-793 costs		(138,300)	(225,600)	(+87,300)

During fiscal year 1962 the central office operational elements of Management Services were separated from Management Services and relocated organizationally and renamed Office of the Manager, Administrative Services. The new organizational element has the immediate office of the Manager and six divisions: (*a*) Office Services, (*b*) Central Office Finance, (*c*) Publications, (*d*) Building and Supply, (*e*) Data Operations, and (*f*) Visual Aids. The many varied basic services for central office, as well as several VA-wide services are furnished by its employees. Day-to-day functions and activities provide for central office receipt, distribution, and dispatch of mail; messenger service; telephone and wire services; travel services; administration of a complete fiscal program; purchase, storage, and distribution of supplies; building maintenance and operation; and automatic data processing services. Some of the services furnished on a VA-wide basis are index, claims, and insurance locator files services; research service on records of former servicemen; planning, coordination, and execution of a visuals presentation program; and printing and reproduction services.

Details and justification for Publications Division are shown under consolidated supply activities.

Distribution of average employment

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated
Office of the Manager	8	9	9
Office Services Division	337	332	328
Finance Division	46	48	48
Building and Supply Division	53	54	54
Data Operations Division	120	110	106
Visual Aids Division	20	20	20
Total	584	573	565

The estimate proposes an average employment of 565 for fiscal year 1964. This is a decrease of 8 over fiscal year 1963 and 19 over fiscal year 1962. The planned level of manpower requirements is based on maximum utilization of employees within and between activities in administrative services and increased productivity and effectiveness.

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated	Increase (+) or decrease (−), 1964 over 1963
Personal services and benefits:				
Personnel compensation	$3,005,290	$3,131,900	$3,217,500	+$85,600
Personnel benefits	227,012	248,500	252,800	+4,300
Total	3,232,302	3,380,400	3,470,300	+89,900
The estimated increase in funds requested is due primarily to the Public Law 87-793 pay increase.				
Travel and transportation of persons:				
Employee travel	2,408	5,200	7,200	+2,000
Local travel	3,001	4,000	3,900	−100
Total	5,409	9,200	11,100	+1,900
Increase in employee travel is primarily to cover the cost of trips involving the study, for application to our operations, of new developments in electronic data processing systems. Increased demands for installing and dismantling exhibits and photographic coverage; necessary participation in various training courses also requires additional funds. Included in estimate for local travel are funds for purchase of D.C. Transit tokens for all central office.				
Transportation of things:				
Freight, express, and drayage	8,291	11,400	11,500	+100
Parcel post reimbursement	18,750	22,500	22,500	----------
Rental of trucks from GSA pools	4,993	5,000	5,000	----------
Shipment of household goods	----------	400	----------	−400
Total	32,034	39,300	39,000	−300
All miscellaneous shipping costs for Central Office (excluding Publications Division); parcel post reimbursements for Central Office and the Veterans' Benefits Office (excluding Publications Division) and costs of all trucks rented from the GSA motor pools for Central Office use are included in this estimate.				
Rents, communications and utilities:				
Communications	81,832	101,100	111,500	+10,400
Register mail reimbursements	39,391	44,700	58,600	+13,900
Data processing machine rentals	242,933	245,800	245,600	−200
Total	364,156	391,600	415,700	+24,100
The estimate provides for the cost of all telephone services for staff offices in Central Office and mailings by Central Office (excluding Publications Division) and the Veterans' Benefits Office. Increases provide for postage rate increases of $18,800 pursuant to Public Law 87-793; upgrading of telephone equipment and telephone moves.				
Printing and reproduction	331,561	418,300	418,100	−200
The funds requested are to cover estimated reimbursement to the Supply Fund for all printing and reproduction for all staff offices other than the Assistant Administrator for Construction.				
Other services:				
Repairs of furniture and equipment	2,545	5,300	5,100	−200
Maintenance and repair of buildings	90,332	173,500	100,700	−72,800
Miscellaneous contractual services	66,233	45,200	45,000	−200
Total	159,110	224,000	150,800	−73,200

Mr. GLEASON. I wanted to point out to Mr. Evins, with all of these unions and keeping in mind we are the third largest employer in the U.S. Government, this poses a great problem for Mr. Underwood.

Mr. THOMAS. He is not by himself.

You have 584 people for 1962, 573 in 1963, and 565 in 1964, a reduction of 8 this year. We are referring to administrative services (reading):

During fiscal year 1962 the Central Office operational elements of Management Services were separated from Management Services and relocated organizationally and renamed Office of the Manager, Administrative Services. The new organization element has the immediate office of the Manager and six divisions: (a) Office Services, (b) Central Office Finance, (c) Publications, (d) Building and Supply, (e) Data Operations, and (f) Visual Aids. The many varied basic services for Central Office, as well as several VA-wide services are furnished by its employees. Day-to-day functions and activities provide for Central Office receipt, distribution and dispatch of mail; messenger service; telephone and wire services; travel service, storage and distribution of supplies.

We will call it good old housekeeping.

Mr. MONK. Housekeeping is right.

Mr. THOMAS. Your activities are mainly here in the District of Columbia?

Mr. MONK. Entirely, sir.

Mr. THOMAS. The Office Manager has 8, 9 and 9; Office Services Division has 337, 332, 328; Finance Division, 46, 48 and 48; Building and Supply Division, 53, 54 and 54; Data Operations Division, 120, 110 and 106; Visual Aid Division, 20, 20 and 20.

The estimate proposes an average employment of 565 for fiscal year 1964. What do these various activities do?

MAINTENANCE OF INDEX AND LOCATOR FILE

Mr. GORMAN. Some of the services we perform relate to the maintenance of the index and locator file. That file services about all of our 169 hospitals and 67 regional offices and 93 clinics and other installations writing in for verification or identification of anybody who may have been in service or who thinks he might have been in service.

Mr. THOMAS. You keep the master file, then?

Mr. GORMAN. Master file and locator; yes, sir.

Mr. THOMAS. What goes in the master file?

Mr. GORMAN. We have the——

Mr. THOMAS. Do you show benefits he has been given?

Mr. GORMAN. No, sir.

Mr. THOMAS. Does it show the service?

Mr. GORMAN. Yes. It also shows his full name, date of birth, date of enlistment, date of discharge, and sometimes the type of application on which we assigned a claim number or an insurance number.

Mr. THOMAS. Other than that, what happens after he gets out of the service and he is not on there?

Mr. GORMAN. We add the claim number which we assign.

Mr. THOMAS. How many people are there?

Mr. GORMAN. 172 people in the index and locator file.

Mr. THOMAS. How many records do you maintain? What was the figure?

Mr. GORMAN. Twenty-nine million index cards, 22 million locator cards.

Mr. THOMAS. Who does it cover? What does 29 million cover?

Mr. GORMAN. The 29 million covers the people who wore a uniform and who filed for some benefit from VA including insurance. It is the centralized master index file for our agency.

Mr. THOMAS. Indian wars on down?

Mr. GORMAN. Yes.

Mr. THOMAS. You do not have the Spanish-American?

Mr. GORMAN. Yes, we do. We also maintain a special register of "C" numbers assigned.

Mr. THOMAS. But your 29 million——

Mr. GORMAN. They represent all wars.

Mr. THOMAS. What does your special register cover?

Mr. GORMAN. This is a numerical listing of 22 million claim numbers assigned.

Mr. THOMAS. The Spanish-American, Indian war?

Mr. GORMAN. Civil War, Revolutionary War, yes, sir, as well as peacetime people.

Mr. THOMAS. Go ahead, sir, please.

Mr. GORMAN. We have this activity in our index and locator section.

Mr. THOMAS. That is 172 people.

Mr. GORMAN. 172 people in our index and locator file.

Mr. DRIVER. He has 22 million cards showing the location of case folders all over the country, too, Mr. Thomas.

Mr. GORMAN. Actually we play a vital part in the operation of all the hospitals and regional offices because when they get some correspondence in Houston for instance, which they cannot identify, they will send that in to our central office index operation for identification.

Mr. THOMAS. What is the purpose of them identifying it?

Mr. GORMAN. So we can get location of records and service anybody who is entitled.

Mr. THOMAS. This is the only way?

Mr. GORMAN. Yes, sir.

Mr. THOMAS. If they do not have any prior record, then they have to come here to get it?

Mr. GORMAN. That is right, sir. If a regional office can't identify a piece of correspondence, they send it in to us.

Mr. THOMAS. Go ahead.

Mr. GORMAN. The same thing is true in hospitals. If they have an application in a hospital or applicant for hospitalization and he has no verification of service on him the hospital goes through the regional office to us for identification.

Mr. THOMAS. That is better than a third of your total employment.

Mr. GORMAN. That is right, sir.

FINANCE DIVISION

Mr. THOMAS. You have a Finance Division.

Mr. GORMAN. That provides basically for the finance operations locally, not only for our 3,750 people in central office and payroll functions for about 793 people in VBO. We also provide payroll functions for the Office of Emergnecy Planning, about 500 accounts. We actively maintain about 4,900 pay accounts.

Mr. THOMAS. OEP?

Mr. GORMAN. Office of Emergency Planning, about 500.

Mr. THOMAS. Do you do the bookkeeping for them?

Mr. GORMAN. On a reimbursable basis. There is an agreement which provides for the reimbursement of up to $10,000 for work we do for OEP.

Mr. THOMAS. Your Finance Division then really writes the checks?

Mr. GORMAN. Treasury writes them.

Mr. THOMAS. I know Treasury actually does the work, but you prepare the rolls and everything else?

Mr. GORMAN. Yes, sir.

Mr. MONK. And keep the accounts.

Mr. THOMAS. For 5,000 people?

Mr. GORMAN. 4,900.

Mr. THOMAS. How many people do that?

Mr. GORMAN. Thirty-eight people. We have about 10 people in the payroll function.

Mr. THOMAS. You have no jurisdiction over the installations in the field in this regard?

Mr. GORMAN. We have no jurisdiction over them in finance but we work daily with them in connection with processing of all requests for identification and location of folders.

Mr. THOMAS. What do you mean work daily with them?

Mr. GORMAN. We regularly get about 5,000 wires a day from regional offices and hospitals, many asking for identifications and locations of claims folders. Many of these relate to entitlement to hospitalization.

Mr. THOMAS. That takes care of your records crowd of 178. They do not have anything to do with financing.

Mr. MONK. In the Finance Division they serve only the central office, Veterans' Benefits Office. There is no relationship at all with the field.

Mr. THOMAS. Do you agree with that, Judge?

Mr. GORMAN. Yes, sir.

Mr. EVINS. I think he does a pretty good job keeping up with all the veterans, Mr. Chairman.

BUILDING AND SUPPLY ACTIVITIES

Mr. THOMAS. Building and Supply Division, what do you do there?

Mr. GORMAN. We maintain building maintenance and supply activities for the VA central office, located on Vermont Avenue, Washington. We provide housekeeping activities for Munitions Building which houses the Veterans' Benefits Office as well as certain elements of Central Office. We provide also for our printing and reproduction plant at Shirlington.

Mr. THOMAS. What does "building" have to do with it?

Mr. GORMAN. We're responsible for building maintenance. We deal with GSA. Our buildings are GSA-controlled and we work closely with them on space moves, space alterations.

Mr. MONK. We have a small labor force.

Mr. THOMAS. GSA picks up the tab for your alterations, do they not?

Mr. MONK. Mostly.

Mr. GLEASON. Not all the time, mostly.

Mr. GORMAN. To some extent we provide minor alterations. GSA takes care of the major alterations.

Mr. THOMAS. What covers your supply end of it?

Mr. GORMAN. Supply is about 26 people. That is supply activities for central office alone including activities of the area that we mentioned, 3,600 people, the Shirlington area as well as Munitions and central office.

Mr. THOMAS. Papers, pencils, desks, et cetera?

Mr. GORMAN. Yes, sir.

We have an automatic issue program. We provide papers, pencils, desks, tables for staff offices in central office.

Mr. THOMAS. Are you in charge of the stockroom?

Mr. GORMAN. Yes, sir. Our inventory of office equipment is about $3 million.

Mr. THOMAS. Where do you get your stock?

Mr. GORMAN. Principally through GSA.

Mr. THOMAS. You are bound to have a lot of paperwork, then.

Mr. GORMAN. We do have substantial paperwork.

Mr. THOMAS. Do you pay them promptly?

Mr. GORMAN. Always.

Mr. THOMAS. Did they not say the VA was 2 months late?

Mr. EVINS. Some of them. They did not specify which ones.

DATA OPERATIONS

Mr. THOMAS. Tell us about your data operations.

Mr. GORMAN. Data operations is down from 120 to 106. That is due to the conversion of Veterans' Benefits Office compensation and pension accounts. We have been providing data operations service to Veterans' Benefits Office, which is a separate field office, as you know.

Mr. THOMAS. To whom?

Mr. GORMAN. The local regional office which we call the Veterans' Benefits, over on Constitution Avenue.

Mr. THOMAS. What do you provide for them?

Mr. GORMAN. All machine operations, loan guarantee accounting, personnel processing.

Mr. THOMAS. Does this get into publications?

Mr. GORMAN. No. Machine operations. They are electric accounting machines. We get into publications when we mention mineograph work. That is another Division under us, the Publications Division.

Mr. GLEASON. Mostly punchcards, Mr. Chairman.

Mr. THOMAS. You mean to supply the material for your automatic data processing. I do not understand.

Mr. MONK. In this office, this Data Operations Division, we assemble all of the statistical reports, consolidate them, put out the summaries on all of the operating elements in the central office.

Mr. THOMAS. What is the nature of the data?

Mr. MONK. Everything in this book, for example. All of our statistical reports that go in the annual report or monthly statistical reports, accounting reports are included.

Mr. THOMAS. For all of the installation?

Mr. MONK. Yes, sir.

Mr. GORMAN. We are talking about IBM installations.

Mr. MONK. Punchcard equipment. The reports come in.

Mr. THOMAS. What is the nature of some of the reports that you have to tabulate?

Mr. GORMAN. Statistical reports, the number of living veterans, et cetera. We summarize any and all kinds of statistical information which any office wants.

We summarize and tabulate for the concerned staffs and departments. Specifically we get into the summarization of compensation payments.

Mr. THOMAS. Half of the data in this justification is prepared in his office?

Mr. GLEASON. That is correct, sir. I would like to point out to you that here in our report, that the members of this committee have already received, these are all of the tables. Here is all of the work going all the way back through two-thirds of this book. This is what Mr. Gorman assembles for us.

Mr. THOMAS. How many people do you have doing this data work?

Mr. GORMAN. 106 people, sir.

Mr. THOMAS. When you once get it assembled, it is a question of maintaining it from year to year, is it not?

Mr. GLEASON. Yes, sir.

Mr. DRIVER. Month to month, some of it quarterly.

Mr. THOMAS. How long has this Division been in operation?

Mr. DRIVER. As a consolidated division, about 4 or 5 years; but there has always been this function here performed by several elements, Mr. Chairman. This Division represents a consolidation of it all.

Mr. THOMAS. What has been the employment in this Division for the last 10 years?

Mr. GORMAN. I do not have the figures going back.

Mr. GLEASON. Each year I am sure, Mr. Chairman, if we were to go back we would find that 10 years ago it was almost twice as high as it is today because of the IBM equipment, et cetera.

Mr. DRIVER. We have faster equipment now, too.

Mr. THOMAS. What is the nature of the equipment?

Mr. DRIVER. One small computer and the rest is typical IBM equipment, with one computer. We have the electrical accounting machines.

VISUAL AIDS DIVISION

Mr. THOMAS. What about your Visual Aids Division? How many employees do you have?

Mr. GORMAN. We have 20 people in the Visual Aids Division, sir.

Mr. THOMAS. What do they do?

Mr. GORMAN. Basically they provide presentations that are made throughout the country, like the exhibits that we have at National and State service organization conferences and professional and scientific groups. They provide art work for exhibit presentations similar to that in our Administrators Annual Report here. They make movies. We made a movie for the Department of Veterans' Benefits 2 years ago in which we outlined the functions of ADP for use as a training film for all 67 regional office personnel.

Mr. EVINS. Do you have any films available for loan purposes?

Mr. GORMAN. Yes, sir. We have a film library. They are available at any time for use by veterans organizations, medical groups, and for initial agency training.

Mr. THOMAS. What does this Division cost you over and above your salary cost?

Mr. GORMAN. The Division of Visual Aids would be in the neighborhood of—I do not have that figure for you, sir.

Mr. THOMAS. What is a horseback opinion of it?

Mr. GORMAN. Sir, I would say it costs $50,000, plus salaries.

Mr. GLEASON. I would think it would be more than that.

Mr. DRIVER. If it is in a year when you make a movie it could be higher.

Mr. GORMAN. It could be higher. The DVB movie cost about $12,000.

Mr. THOMAS. Mr. Controller, do you have that figure?

Mr. HANSMAN. My guess is it is more than that.

Mr. GLEASON. I am using the average of $50,000.

Mr. THOMAS. These figures do not tell the detail by any means. You use outside talent?

Mr. MONK. We have some contracts, yes, sir. Then there would be supplies. I would say in the neighborhood of $60,000. We would be glad to supply that figure for the record.

Mr. THOMAS. Please do that.

(The information supplied follows:)

Visual Aids Division, fiscal year 1964

Average employment	20
Personnel service and benefits	$165,975
Other objects	63,864
Total cost	229,839

Mr. THOMAS. What is their civil service rating?

Mr. GORMAN. The breakdown of the grade structure, sir, the chief is a 14, two 13's, and then illustrators and artists and clerical ranging from grade 3 to 11.

Mr. MONK. Salary costs run in the neighborhood of around $160,000 a year for these 20 people.

Mr. THOMAS. Do you send something to each one of your installations every year?

Mr. GORMAN. We make available to all installations a film catalog so that they can have access to any of the films in our library.

NUMBER OF FILMS

Mr. THOMAS. How many films did you make in the past year and how many do you intend to make in 1964?

Mr. GORMAN. We are working on two films, one on rehabilitation of blinded veterans and one on the VA Supply Service for in-service orientation and training.

Mr. DRIVER. You made one last year?

Mr. GORMAN. Yes, sir.

Mr. THOMAS. What did it cost?

Mr. GORMAN. $12,000, sir. We have our own motion picture man. He processes them through the Department of Agriculture motion

picture facility. He uses facilities of the laboratories in the Department of Agriculture.

Mr. THOMAS. You make it right in your own shop, then?

Mr. GORMAN. Between VA and Agriculture; yes, sir.

Mr. THOMAS. We will recess until 1 o'clock.

OFFICE OF CONTROLLER

Mr. THOMAS. Let the committee come to order.

Mr. Reporter, put 5–32, 5–33, and 5–34 in the record at this point. (The pages referred to follow:)

GENERAL ADMINISTRATION

Controller, $1,064,000—Summary of requirements

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated	Increase (+) or decrease (−), 1964 over 1963
Average employment	74	75	75	
Personnel compensation	$674,160	$736,800	$804,700	+$67,900
Personnel benefits	49,693	54,600	58,100	+3,500
Subtotal	723,853	791,400	862,800	+71,400
Public Law 87-793 pay increase		(40,500)	(78,000)	(+37,500)
Travel and transportation of persons	7,309	14,900	16,400	+1,500
Transportation of things		1,600	1,600	
Other services	21,530	163,400	178,600	+15,200
Supplies and materials	3,167	1,900	1,800	−100
Equipment	3,587	2,800	2,800	
Total cost	759,446	976,000	1,064,000	+88,000
Public Law 87-793 costs		(40,500)	(78,000)	(+37,500)

The Controller is the top fiscal officer of the agency. He is responsible to the Administrator for the economical and efficient use of all funds available to the agency and for the control, direction, and administration of all financial operations. He is responsible for reports management and the basic reports structure of the agency, and in research statistics he provides staff support and publications on the veteran population, its characteristics, composition, and participation in Veterans' Administration programs. In addition, he is the principal representative of the Veterans' Administration on budget, appropriations, accounting, and other fiscal matters with the Bureau of the Budget, the Congress, the Treasury Department, the General Accounting Office, and other Government agencies.

The Controller's office includes a Budget Service, Financial Management Service, Reports Management Service, and Research Statistics Service, in addition to his immediate office. These services operate in their functional areas VA–wide to assist the Controller in discharging his responsibilities.

Distribution of average employment

	Fiscal year 1962, actual	Fiscal year 1963, estimated	Fiscal year 1964, estimated
Comptroller's immediate office	6	4	4
Budget Service	26	27	27
Financial Management Service	23	24	24
Reports Management Service	12	12	12
Research Statistics Service	7	8	8
Total	74	75	75

The functions of these services have been emphasized and realined during the past year to meet increasing controllership demands.

In budget, the formulation and execution process is receiving added emphasis because of increasing requirements from our loan guarantee program, our conversions to automatic data processing, and from our funding and review requirements in the VA construction program.

In Financial Management Service, requirements are increasing because of the application of automatic data processing systems in accounting, costing, and related controller areas; and the continuing emphasis on the achievement of economy and effectiveness, agencywide, through improvements in financial management.

Reports Management is giving new and added attention to agencywide reports control, reporting needs, and improvements in presentations to the Administrator and top staff officials on program status, progress, and problems.

Research Statistics is developing long-needed data on veteran population and characteristics from tabulations by the Census Bureau and the Department of Health, Education, and Welfare.

Mr. THOMAS. The Controller is $1,064,000 for 75 employees. You have an increase of $1,500 in travel. Other services show a $15,200 increase, making a total of $178,600.

(Reading):

The Controller is the top fiscal officer of the agency. He is responsible to the Administrator for economical and efficient use of all funds available to the agency and for the control, direction, and administration of all financial operations. He is responsible for reports, management, and the basic reports structure of the agency, and in research statistics he provides staffs for and publications on the Veterans' Administration programs—

are you not duplicating a little bit over here?

The Controller's office includes a budget service, financial management, reports management service, and research statistics in addition to his immediate office. These services operate in their functional areas, VA-wide, to assist the Controller in discharging his responsibilities.

You have four people in your immediate office. Budget service is 27. Financial Management Service is 24. Reports Management Service is 12, and the research statistics, 8.

Regarding your eight research people, are you overlapping the administrative services?

Mr. HANSMAN. No, sir; we do not think so.

Mr. THOMAS. He keeps the master files?

Mr. HANSMAN. Yes, sir.

Mr. THOMAS. What else does he do?

Mr. HANSMAN. He operates the administrator's chartroom——

Mr. THOMAS. He does the statistical work, he compiles most of the figures submitted for the budget. The number of veterans in all classifications?

Mr. HANSMAN. The actual machine processing of them, sir. It is the design of the reporting system and the design of the statistical studies. That is done either in my shop or in cooperation with the statistical people in the several departments.

MANAGEMENT SERVICES

Mr. THOMAS. What is Supply Management Service? What do they do? You have 36 people shown there for next year.

Mr. MONK. You are in the section on the Assistant Administrator for Management Service?

Mr. THOMAS. Yes.

Mr. MONK. This is the merchant prince's shop.
