Dear Colleague:

With the publication of NIST Handbook 150, *NVLAP Procedures and General Requirements*, the basis was established for several subsequent activities that should be beneficial to NVLAP-accredited laboratories and to the users of these laboratories. Basically, the adoption of the new procedures and criteria made the NVLAP program compatible with international standards for laboratory accreditation and quality systems management. There are several NIST-sponsored initiatives underway which will result in value added to the NVLAP-accredited laboratories providing services in more than one state, and especially for laboratories providing services outside the United States.

The first initiative focuses on the Federal government as the user, developer and operator of accreditation programs to support its regulatory assignments. The Interagency Committee on Standards Policy (ICSP), established several years ago to coordinate policy on standards development and participation by Federal government agencies, created a Working Group on Laboratory Accreditation to work toward coordination among Federal agencies that operate existing laboratory programs or plan new programs. The Working Group is working toward consensus in criteria and procedures, as well as working toward reducing the requirements now placed on accredited laboratories for assessments by multiple agencies.

The second initiative is the establishment of The Laboratory Accreditation Working Group (LAWG) to study and work toward the resolution of problems reported by laboratories and users of laboratory services. Several subgroups were established to address issues related to manufacturers/customers of laboratories, accredited laboratories, governmental users (federal and state), laboratory accrediting organizations, and recognition of accreditation programs and accredited laboratories.

The third initiative is in the negotiation of mutual recognition agreements. NVLAP has had such agreements with Australia and Canada and is working toward reaching similar agreements with other countries, including Mexico and the European Union through the European Accreditation Laboratory (EAL).

NVLAP hopes that these activities will result in broader recognition and use of NVLAP-accredited laboratories and in the reduction of multiple assessments and accreditations that laboratories undergo annually under the existing environment. We encourage users of calibration and testing laboratory services to use NVLAP-accredited laboratories; we believe that they are the most qualified laboratories available. We look forward to another year of service to our laboratories.

Sincerely,

Albert D. Tholen, Chief

NVLAP AND THE NVLAP LOGO

The term NVLAP and the NVLAP logo are Federally registered trademarks of the National Institute of Standards and Technology and the Federal Government, who retain exclusive rights therein. Permission to use the term and/or the logo is granted to NVLAP-accredited laboratories for the limited purposes of announcing their accredited status, and for use on reports that describe only testing and calibration within the scope of accreditation. NIST reserves the right to control the quality of the use of the term NVLAP and of the logo itself.

INTRODUCTION

The laboratories listed in this Directory have been found to be competent to perform certain tests or calibrations as specified. These laboratories are allowed to use the NVLAP logo on their test or calibration certificates or reports, which implies that the processes used to achieve the tests or calibrations have been evaluated by NVLAP as being technically adequate when performed under the conditions specified in the laboratories' quality manual and associated documentation. Further, NVLAP certifies that the laboratories have demonstrated traceability of their tests or calibrations to national standards at the appropriate levels of uncertainty for which the laboratories have been accredited.

As a prospective customer of the laboratories listed in this Directory, you should be aware that the laboratories are obligated to inform you, before the fact, whenever a test or a calibration service which you have requested is not covered by the NVLAP accreditation (NIST Handbook 150, Section 285.33(k)(8)). When contracting for the test or calibration service, you have the right to specify whether or not you desire a NVLAP-accredited test or calibration. Provision of a non-NVLAP-accredited test or calibration shall not be accompanied by the use of the NVLAP logo on the certificate or report, and NVLAP does not endorse any claims made regarding traceability and uncertainty of the measurements performed.

In addition, if a laboratory performs a combination of tests or calibrations, some of which have been accredited by NVLAP and some of which have not, the laboratory is bound by the provisions of NIST Handbook 150 to clearly identify the tests or calibrations covered by NVLAP accreditation and those not accredited by NVLAP on the test or calibration certificate or report.

Current information on the accreditation status of a laboratory can be obtained:

(1) directly from the laboratory;

(2) by writing to: Chief, Laboratory Accreditation Program
National Institute of Standards and Technology
Building 411, Room A162
Gaithersburg, MD 20899;

(3) by computer-to-computer communication with the NVLAP electronic bulletin board on 301-948-2058;

(4) by FAX on 301-926-2884; or

(5) by calling NVLAP on 301-975-4016.

PROGRAM SUMMARY

The National Institute of Standards and Technology (NIST) administers the National Voluntary Laboratory Accreditation Program (NVLAP). NVLAP is comprised of a series of laboratory accreditation programs (LAPs) which are established on the basis of requests and demonstrated need. Each LAP includes specific calibration and/or test standards and related methods and protocols assembled to satisfy the unique needs for accreditation in a field of testing or calibration. NVLAP accredits public and private laboratories based on evaluation of their technical qualifications and competence to carry out specific calibrations or tests. Accreditation criteria are published in the Code of Federal Regulations as a part of the NVLAP Procedures. Accreditation is granted following successful completion of a process which includes submission of an application and payment of fees by the laboratory, an on-site assessment, resolution of any deficiencies identified during the on-site assessment, participation in proficiency testing, and technical evaluation. The accreditation is formalized through issuance of a Certificate of Accreditation and Scope of Accreditation (fig. 1) and publicized by announcement in various government and private media.

NVLAP accreditation is available to commercial laboratories; manufacturers' in-house laboratories; university laboratories; and federal, state, and local government laboratories. Foreign-based laboratories may also be accredited if they meet the same requirements as domestic laboratories and pay any additional fees required for travel expenses.

NVLAP provides an unbiased third party evaluation and recognition of performance, as well as expert technical assistance to upgrade laboratory performance. NVLAP accreditation signifies that a laboratory has demonstrated that it operates in accordance with NVLAP requirements in the following areas: accommodation and environment; calibration and test methods; certificates and reports; complaints; equipment and reference materials; handling of calibration and test items; measurement traceability and calibration; organization and management; outside support services and supplies; personnel; quality system, audit and review; records; and subcontracting. NVLAP accreditation does not imply any guarantee (certification) of laboratory performance or test/calibration data; it is solely a finding of laboratory competence. A laboratory may cite its accredited status and use the NVLAP logo on reports, stationery, and in business and trade publications provided that this use does not imply product certification.

This Directory of laboratories is published annually and lists the name, address, contact person, phone number, accreditation renewal date and scope of accreditation for each laboratory. An updated listing of laboratories is published periodically as a supplement to the Directory.

Accreditation Renewal Date

The period of NVLAP accreditation is one year. A laboratory can be accredited until January 1, April 1, July 1, or October 1 of the following year; its accreditation will terminate on that date unless renewed. Users of this Directory who are considering selection of accredited laboratories should be aware of the renewal date and verify if the laboratory has retained its accreditation at the time its services are to be provided. Verification can be obtained by asking the laboratory for a copy of its Certificate of Accreditation or by contacting NVLAP.

On-Site Assessment

Before initial accreditation, an on-site assessment of each laboratory is conducted to determine compliance with the NVLAP criteria. After accreditation is granted, an on-site assessment must be conducted every two years in order for the laboratory to maintain accreditation. An assessment is conducted by one or more NVLAP assessors selected on the basis of their expertise in the field of testing or calibration to be reviewed. They may be engineers or scientists currently active in the field, consultants, college professors or retired persons. Their services are generally contracted as required; they are normally not NVLAP staff members.

Assessors use checklists provided by NVLAP so that each laboratory receives an assessment comparable to that received by others. However, assessors have some latitude to make judgments about a laboratory's compliance with the NVLAP criteria.

An assessment normally takes one to five days depending on the extent of the laboratory's application. Every effort is made to conduct an assessment with as little disruption as possible to the normal operations of the laboratory. During the assessment, the assessor carries out the following functions:

- meets with management and supervisory personnel responsible for the laboratory's activities to review the assessment process and to set the assessment agenda;

- examines the laboratory's quality assurance system, selects and traces the history of one or more samples from receipt to final issuance of reports, conducts a thorough review of the laboratory's quality manual or equivalent, evaluates the training program, examines notebooks or records pertaining to the samples, checks sample identification and tracking procedures, determines whether the appropriate environmental conditions are maintained, and examines copies of completed reports;

- reviews records of periodic internal audits, use of check samples or participation in round-robin testing or other similar programs, personnel records including resumes and job descriptions of key personnel, competency evaluations for all staff members who routinely perform the testing or calibration for which accreditation is sought, calibration or verification records for apparatus used, reports, and sample control records;

- observes demonstrations of laboratory techniques and discusses them with the technical personnel to assure their understanding of the procedures; and

- examines major equipment, apparatus, and facilities.

At the conclusion of the assessment, the assessor will conduct an exit briefing to discuss observations and any deficiencies with responsible laboratory staff. A written assessment report will be left with the laboratory, and a copy forwarded to NVLAP.

If the on-site inspection reveals deficiencies that pertain to NVLAP requirements, the laboratory must respond in writing to NVLAP within thirty days of such notification. The response must provide documentation, signed by the Authorized Representative, that the specified deficiencies have either been corrected or include a plan of action to make corrections.

Monitoring Visits

Monitoring visits may be conducted at any time during the accreditation period for cause or on a random selection basis. These visits serve to verify reported changes in the laboratory's personnel, facilities, or operations, or to explore possible reasons for poor performance in proficiency testing. The scope of a monitoring visit may range from checking a few designated items to a complete review.

Proficiency Testing

Proficiency testing is an integral part of the NVLAP accreditation process. On-site demonstration of appropriate facilities, equipment, personnel, etc., is essential, but may not be sufficient for the continuing evaluation of laboratory competence. The production of test/calibration data using special proficiency testing samples or artifacts provides NVLAP with a means to determine the overall competence of the laboratory. Information obtained from proficiency testing helps to identify problems in a laboratory. When problems are found, NVLAP works with the laboratory staff to solve them.

Each field of calibration or testing has proficiency testing requirements. Data submitted by the laboratories in response to specific NVLAP requirements are analyzed and reports of the results are made known to the participants. Summary results are available upon request to other interested parties; e.g., professional societies and standards writing bodies. The identity and performance of individual laboratories are kept confidential.

Satisfactory participation is based on specially tailored exercises designed to evaluate the ability of the laboratory to produce the services for which it is accredited. Some methods define pass/fail criteria; in other cases, individual laboratory results must fall within statistically acceptable limits of overall group performance. In a number of programs, NVLAP requires satisfactory participation in proficiency testing as a condition of initial, as well as continuing, accreditation.

Technical Evaluation

A final technical evaluation is performed by one or more NVLAP technical experts. Their recommendations regarding accreditation are based on:

- information provided on the application;
- results of quality system documentation review;
- on-site assessment reports;
- actions taken by the laboratory to correct deficiencies;
- results of proficiency testing; and
- information from any monitoring visits of the laboratory.

If the technical evaluation reveals additional deficiencies, written descriptive notification will be sent to the laboratory. The laboratory must respond as specified in the previous section, *On-Site Assessment*. Clarification of some issues may be requested by telephone. All deficiencies must be resolved before accreditation can be granted.

Accreditation Actions

After the technical evaluation has been completed and all financial and administrative requirements have been satisfied, NVLAP takes one of the following accreditation actions:

Accreditation The laboratory is issued a Certificate of Accreditation and a Scope of Accreditation.

Denial The laboratory is notified of a proposal to deny accreditation and the reason(s).

If an accredited laboratory is found to be out of compliance with the NVLAP criteria, NVLAP may take one of the following actions:

Suspension Suspension is a temporary removal of the accredited status of a laboratory when it is found to be out of compliance with the terms of its accreditation. The laboratory will be notified of the reasons for and conditions of the suspension and the action(s) that the laboratory must take to have the accreditation reinstated.

Reasons for suspension include: loss of key personnel, loss of major equipment, damage to laboratory by fire, changing laboratory location, proficiency test failure.

Revocation Revocation is the removal of the accredited status of a laboratory when it is found to have violated the terms of its accreditation. The laboratory may be given the option of voluntarily terminating the accreditation. If accreditation is revoked, the laboratory must return its Certificate of Accreditation and cease use of the NVLAP logo on any of its reports, correspondence, or advertising.

Reasons for revocation include: obtaining accreditation through fraud, refusal to resolve deficiencies, no longer providing the type of calibration or testing service for which accreditation was issued.

If denial or revocation has been proposed, the laboratory may appeal the decision to the Director of NIST. If an appeal is not requested, the action becomes final upon the expiration of the thirty-day period following receipt of the notification.

LABORATORY PARTICIPATION SUMMARY

The following table summarizes laboratory participation by field of accreditation as of the date this Directory was prepared. Since some laboratories participate in more than one field, the total number of laboratories listed by field of accreditation (see Index B) is greater than the number of laboratories in the system (see Index A).

PROGRAM/Field of Accreditation	*Number of Laboratories*
CALIBRATION PROGRAM	
Ionizing Radiation	2

HOW TO USE THIS DIRECTORY

The ***1995 Directory*** lists laboratories accredited by NVLAP. It consists of four indexes which are cross-referenced by NVLAP Lab Code, a unique identifier assigned to each laboratory; e.g., 1000 or 1000-00.

The Directory enables the user to locate name, address, telephone and accreditation information about laboratories of interest. The user should contact the laboratories directly to get information beyond that provided here.

INDEX A, LISTING BY LABORATORY NAME, lists all laboratories in alphabetical order by laboratory name. An ellipsis (...) after a laboratory's name indicates that the name was too long to fit within the available space. (The ellipsis notation is also used in Indexes B and C.) The full laboratory name is given in Index D, Listing by NVLAP Lab Code.

INDEX B, LISTING BY FIELD OF ACCREDITATION, lists all laboratories in alphabetical order by laboratory name within field of accreditation. The index is organized by PROGRAMS, which are groups of Laboratory Accreditation Programs (LAPs) assembled in categories of technical fields for efficiency in management (see page 6). Listed under each PROGRAM are the technical fields of accreditation managed within that PROGRAM. Laboratories participating in more than one field will have more than one listing.

INDEX C, LISTING BY STATE/COUNTRY, lists all laboratories in alphabetical order by laboratory name within state. The states are designated by the standard two-letter postal abbreviations. Laboratories located outside of the United States are listed at the end of the index. Index C also indicates the field of accreditation for each laboratory.

INDEX D, LISTING BY NVLAP LAB CODE, lists all laboratories in numerical order by NVLAP Lab Code. There is only one listing per Lab Code in Index D.

Each laboratory receives a Certificate of Accreditation and a Scope of Accreditation when accreditation is granted or renewed. The Scope of Accreditation details the methods and services for which accreditation has been granted in each program. Index D gives a condensation of the Scope(s) of Accreditation for each laboratory. Users of laboratory services may ask a laboratory for a copy of its Scope and Certificate as proof of accreditation for specific methods and services.

The following information is presented for each laboratory in Index D:

(a) NVLAP Lab Code
(b) Laboratory name and address
(c) Contact person
(d) Phone number
(e) Accreditation renewal date
(f) Scope of Accreditation.

HOW TO LOCATE SPECIFIC INFORMATION

For a laboratory whose name is known

Refer to Index A and note the laboratory's NVLAP Lab Code. Look up the Lab Code in Index D to obtain specific information about the laboratory; e.g., address, phone number, Scope of Accreditation, etc.

For a laboratory in a particular geographic area

Determine the states (or country) included in the geographic area of interest. Refer to Index C to obtain the NVLAP Lab Code of a laboratory within the selected geographic area for a given field of accreditation. Look up the Lab Code in Index D to obtain specific information about the laboratory; e.g., address, phone number, Scope of Accreditation, etc.

For a laboratory in a particular field of accreditation

Choose the field of accreditation from the list on page 6. Refer to Index B and note the name and Lab Code of each laboratory of interest. Index B is organized by field of accreditation within major program group. Look up the Lab Code in Index D to obtain specific information about the laboratory; e.g., address, phone number, Scope of Accreditation, etc.

SPECIAL NOTE ABOUT LABORATORIES LISTED IN ASBESTOS FIBER ANALYSIS

The Scopes of Accreditation for laboratories in the Asbestos Fiber Analysis program in Index D begin with NVLAP Lab Code 1001. The presence of a PLM Renewal Date or a TEM Renewal Date indicates that a laboratory's scope includes Bulk Asbestos Analysis (PLM) or Airborne Asbestos Analysis (TEM), respectively. The detailed description of the test method designations for PLM and TEM are printed at the beginning of the Asbestos section of Index D on page 115, rather than in the individual laboratory entries.

CALIBRATION

This facility has demonstrated compliance with the NVLAP criteria for Calibration Laboratories under the field of Ionizing Radiation for the following:

Procedures/ Instruments	*Radiation Types*
Calibration of Survey Instruments	X-ray Beam Codes M30, M50, L80, L100, and M100 over the Exposure Rate Range 2 mR/s to 100 mR/s, and the H50 Beam Code over the range 0.5 mR/h to 4 mR/s, with total uncertainty in the reference field value of ± 5 percent.

(See "How To Use This Directory" on page 7.)

Calibration of Instruments for Diagnostic Level	X-ray Beam Codes M20, M30, M50, L80, L100, and M100 over the Exposure Rate Range 2 mR/s to 100 mR/s, with total uncertainty in the reference field value of ± 3 percent.
Calibration of Reference-Class Instruments	X-ray Beam Codes M20, M30, M50, L80, L100, and M100 over the Exposure Rate Range 2 mR/s to 100 mR/s, with total uncertainty in the reference field value of ± 3 percent.

CALIBRATION

This facility has demonstrated compliance with the NVLAP criteria for Calibration Laboratories under the field of Ionizing Radiation for the following:

Calib. Catg'y.	*Rad. Type/ Beam Code*	*Energy (keV)*	*Intensity Range*	*Accuracy Goal*
Calibration of Survey Instruments				
B.1 (Gamma)				
	Am-241	60	130 mR/h[a]	4%(>10mR/h)
	Cs-137	660	1-3x10^5 mrem/h	4%(>10mR/h)
	Co-60	1250	0.4-3000 rem/h	4%(>10mR/h)
B.2 (X-ray)				
	M30	20	3.2-326 R/h	4%(>10mR/h)
	M50	29	3.4-350 R/h	4%(>10mR/h)
	S60	36	0.6-119 R/h	4%(>10mR/h)
	S75	39	4.6-472 R/h	4%(>10mR/h)
	M100	51	1.5-305 R/h	4%(>10mR/h)
	M150	70	3.8-391 R/h	4%(>10mR/h)
	H150	120	0.12-16.5 R/h	4%(>10mR/h)
B.3 (Beta)				
	Pm-147	60 (E_{av})	3 mrad/h[a]	8%
	Tl-204	260 (E_{av})	22, 2800 mrad/h[a]	8%
	Sr/Y-90	800 (E_{av})	560, 22000 mrad/h[a]	8%
B.4 (Neutron)				
	Cf-252 Bare	2000 (E_{av})	0.040-24 rem/h	8%
	Cf-252 Mod	500 (E_{av})	0.010-6 rem/h	8%

(See "How To Use This Directory" on page 7.)

Irradiation of Personnel Dosimeters

C.1 (Gamma)			
Am-241	60	130 mR/h[a]	3%(>10mR/h)
Cs-137	660	1-3x10^5 mrem/h	3%(>10mR/h)
Co-60	1250	0.4-3000 rem/h	3%(>10mR/h)
C.2 (X-ray)			
M30	20	3.2-326 R/h	3%(>10mR/h)
M50	29	3.4-350 R/h	3%(>10mR/h)

LANDAUER, INC.
2 Science Road, Glenwood, IL 60425-1586
R. Craig Yoder Phone: 708-755-7000

Accreditation Renewal Date: January 1, 1995

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing (1) automatic film reader Tech/Ops Model 1; (2) Harshaw Atlas Hotgas reader/modified Atlas reader with Apollo Systems CO_2 laser; (3) Harshaw 2271 reader; (4) NTA/Polycarbonate /CR-39 manual optical readers; (5) manual densitometers X-Rite, Tech/Ops Model 301, Macbeth Model TD504 or (6) ALNOR Dosacus reader.

This facility is accredited to process the following dosimeters by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Landauer designation:

DOSIMETER	PROCESS	ANSI-N13.11 CATEGORY	
Film		*Based On Test.*	*Based On Tech. Equiv.*
G-Film "GARDRAY"(A)		1,5	I-VII
P-G badge plus NTA(E)	1,4,5	VIII	I-VII
A-G badge plus polycarbonate(F)	1,4,5	VIII	I-VII
R-G badge plus ER(G)	1,3,4,5	VIII	I-VII
R-G badge plus ALNOR ER(M)	1,4,5,6	VIII	I-VII
B-G badge plus CR 39(L)	1,4,5	VIII	I-VII
C-G badge plus CR-39 and Cadmium	1,4,5		I-VIII
H-G badge plus NTA and Cadmium	1,4,5		I-VIII
J-G badge plus polycarbonate and Cadmium	1,4,5		I-VIII
Y-G badge plus Cadmium	1,4,5		I-VII
Q-DEX-RAY	1,4,5		I, VII
TLD			
D-(3) 700 chip Harshaw card (D)	3	II, IV, V, VII	
K-Modified ALNOR (TLD 100 Chips)(K)	6	I-VII	
W modified-2 chip Escort with x-ray filtration (J)	2	I, II	
Z-Neutron Track etch CR39(T)	4	VIII	
F-L badge plus CR-39	2,4		I-VIII
F-L badge plus polycarbonate	2,4		I-VIII
F-L badge plus ER	2,3,4		I-VIII
L-4 chip Alnor TLD	6		I-VII

(See "How To Use This Directory" on page 7.)

M-K badge (TLD 700 chips)	6	I-VII
S-K badge plus ER	4,6	I-VIII
Z-K badge plus CR-39	4,6	I-VIII
Z-K badge plus polycarbonate	4,6	I-VIII

The following sites are included to perform limited volume, emergency response processing employing either a Harshaw 3000 manual reader or manual film processing techniques for the following badges:

CATEGORY	ANSI-N13.11
G-Film "GARDRAY"	I-VII
L-TLD 4 chip "GARDRAY"	I-VII
K-TLD 3 chip ALNOR	I-VII

Panasonic TLD model UD802AS in a UD874A-T hanger for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0541 04

DRESDEN NUCLEAR POWER STATION
RR #1, Morris, IL 60450
Vernon Chaney Phone: 815-942-2920

Accreditation Renewal Date: January 1, 1995

This facility listed has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic automatic reader model UD710A.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD802AS in a UD874A-T hanger for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0541 05

BYRON NUCLEAR POWER STATION
4450 N. German Church Rd., Byron, IL 61010
Michael Ahlgrim Phone: 815-234-5441

Accreditation Renewal Date: January 1, 1995

This facility listed has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic automatic reader model UD710A.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD802AS in a UD874A-T hanger for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0541 06

BRAIDWOOD NUCLEAR POWER STATION
Rural Route #1, P.O. Box 84, Braceville, IL 60407
James Johnson Phone: 815-458-2801

Accreditation Renewal Date: January 1, 1995

This facility listed has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic automatic reader model UD710A.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD802AS in a UD874A-T hanger for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0543

NORTH ATLANTIC ENERGY SERVICE CORPORATION SEABROOK STATION
P.O. Box 300, Route 1
Seabrook, NH 03874-0300
Paul Plazeski Phone: 603-474-9521

Accreditation Renewal Date: January 1, 1995

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing a Panasonic automatic reader model UD710A or manual reader UD702E.

The above named main facility is accredited to process the following dosimeters by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD813AS5 in a custom designed holder with open window (3mg/cm^2) and Plastic of 200mg/cm^2 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII.

Panasonic TLD combination UD809AS and UD813AS in a Panasonic UD889A-T holder for ANSI-N13.11 category VIII.

NVLAP LAB CODE 0544

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic automatic reader model UD710A.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11 through testing.

(See "How To Use This Directory" on page 7.)

Panasonic TLD model UD802 in a Panasonic UD874ATM1 hanger for ANSI-N13.11-1983 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0554

PENNSYLVANIA POWER AND LIGHT COMPANY
Two North Ninth Street, Allentown, PA 18101-1179
Stephen Ingram Phone: 610-774-7892

Accreditation Renewal Date: April 1, 1995

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic automatic reader model UD710A.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD802-AT in a Panasonic UD874-AT-1 hanger for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0555

ICN DOSIMETRY SERVICE
DIVISION OF ICN BIOMEDICALS, INC.
3300 Hyland Avenue, ICN Plaza
Costa Mesa, CA 92626
Sandra M. Nemecek Phone: 714-545-0100

Accreditation Renewal Date: July 1, 1995

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing a Panasonic automatic reader model UD710A, and a UD702 manual reader for TLD processing and a Macbeth densitometer for film processing.

This facility is accredited to process the following dosimeters by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

TLD model ICN 802 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

ICN model T2 (Kodak type II film) for ANSI-N13.11 categories I, II, III, IV, V, VI, VII.

What does NVLAP accreditation mean?

NVLAP accreditation means that a laboratory has been found competent to perform tests or calibrations.

Competence is defined as a laboratory's ability to meet the **NVLAP** conditions and to conform to the criteria in NVLAP publications for specific calibration and test methods.

NVLAP criteria for accreditation provide the basis for the technical evaluation of a laboratory and address the following areas of laboratory operation:

- Accommodation and Environment
- Certificates and Reports
- Equipment and Reference Materials
- Measurement Traceability & Calibration
- Outside Support Services and Supplies
- Quality System, Audit and Review
- Subcontracting
- Calibration and Test Methods
- Complaints
- Handling of Calibration and Test Items
- Organization and Management
- Personnel
- Records

Don't delay. Complete this request for information about **NVLAP** and mail to:

National Institute of Standards and Technology
National Voluntary Laboratory Accreditation Program
Building 411, Room A162
Gaithersburg, MD 20899

I am interested in additional information about NVLAP.

NIST Technical Publications

Periodical

Journal of Research of the National Institute of Standards and Technology—Reports NIST research and development in those disciplines of the physical and engineering sciences in which the Institute is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Institute's technical and scientific programs. Issued six times a year.

Nonperiodicals

Monographs—Major contributions to the technical literature on various subjects related to the Institute's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Include proceedings of conferences sponsored by NIST, NIST annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NIST under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published bimonthly for NIST by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

Building Science Series—Disseminates technical information developed at the Institute on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NIST under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NIST administers this program in support of the efforts of private-sector standardizing organizations.

Order the **following** *NIST publications—FIPS and NISTIRs—from the National Technical Information Service, Springfield, VA 22161.*

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NIST pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NIST Interagency Reports (NISTIR)—A special series of interim or final reports on work performed by NIST for outside sponsors (both government and non-government). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
