POLICY OF DISTRIBUTION

The Select Committee on Nutrition and Human Needs makes its services available through publications which include reports, hearings, and collections of professional materials.

These publications are made available to individuals and organizations with a continuing interest in policies of Nutrition and Human Needs.

However, due to public demand, the committee's allotment of some publications has been depleted and we can no longer furnish complete sets of the publications.

Nonetheless, complete sets of the committee's published hearings may be obtained from depository libraries—libraries throughout the country especially designated to receive government publications. If the library you use is not a depository library, the librarian should be able to direct you to the one nearest you.

You may also purchase individual volumes of committee hearings by ordering from:
