(k) To disclose or, in specific instances, authorize the disclosure, upon written request, of returns filed in accordance with IRC 6050I, to officers and employees of any Federal agency whose official duties require such disclosure to administer Federal criminal statutes not related to tax administration, pursuant to the provisions of IRC 6103(i)(8). The authority delegated in this paragraph also is delegated to the Assistant Commissioner (Criminal Investigation); District Directors and Assistants; Special Assistant for Financial Enforcement, Detroit Computing Center, and Chiefs, Criminal Investigation Division. This authority may not be redelegated, and shall expire November 17, 1990, the expiration of the disclosure authority under IRC 6103(i)(8).

(l) For disclosure relate to title 31 CFR part 103 see Delegation Order 143, as revised, paragraph 5.

(7) The Assistant Commissioner (Returns Processing) is authorized:

(a) To disclose or, in specific instances, authorize the disclosure of returns or return information for statistical use to officers and employees of the Department of Commerce, Bureau of Census, upon the written request of the Secretary of Commerce or to officers and employees of the Department of the Treasury, subject to the conditions prescribed in IRC 6103(i)(1)(A) and the Treasury regulations thereunder and (j)(3). The authority delegated in this paragraph may be redelegated only to the Director, Statistics of Income Division.

(b) To disclose or, in specific instances, authorize the disclosure of return information for statistical use to officers and employees of the Department of Commerce, Bureau of Economic Analysis, upon the written request of the Secretary of Commerce, or to officers and employees of the Federal Trade Commission, upon written request of the Chairman, subject to the conditions prescribed in IRC 6103(j)(1)(B) and (j)(2) and the Treasury regulations thereunder. The authority delegated in this paragraph may be redelegated only to the Director, Statistics of Income Division.

(8) The Director, Public Affairs Division; Regional Commissioners; Assistant Commissioner (International); and District Directors are authorized to disclose or, in specific instances, authorize the disclosure of taxpayers' names and the city, state and zip code of their mailing addresses to the press and other media for purposes of notifying persons entitled to undelivered tax refunds, subject to the conditions prescribed in IRC 6103(m)(1). The authority delegated in this paragraph may be redelegated to Assistant Directors and Public Affairs Officers.

(9) The Assistant Commissioner (Examination) is authorized:

(a) Upon written request of the President, to disclose, or in specific instances, authorize the disclosure of return information (other than return information that is adverse to the taxpayer) of an individual who is under consideration for appointments to a position in the executive or judicial branch of the Federal Government to the authorized representative of the Executive Office of the President or to the Federal Bureau of Investigation on behalf of the President, subject to the conditions prescribed in IRC 6103(g)(2) and (g)(4). Authority is also delegated to disclose or, in specific instances, authorize the disclosure of return information with respect to the categories of individuals discussed above to the heads of Federal agencies upon written request, or the Federal Bureau of Investigation on behalf of and upon the written request of such agency heads, subject to the conditions described in IRC 6103(g)(2) and (g)(4). Upon receipt of any request for return information under IRC 6103(g)(2), authority to notify the individuals with respect to whom the request has been made is also delegated. The authority delegated in this paragraph may be redelegated but not lower than:

(i) Deputy Assistant Commissioner (Examination), in the case of requests by or on behalf of the President where the return information to be disclosed is not adverse to the taxpayer;

(ii) Director, Office of Disclosure, in the case of requests by or on behalf of the heads of Federal agencies where the return information to be disclosed is adverse to the taxpayer;

(iii) Director, Office of Disclosure, in the case of requests by or on behalf of the heads of Federal agencies where the return information to be disclosed is not adverse to the taxpayer; and

(iv) Director, Office of Disclosure, concerning the notification of individuals with respect to whom a request has been made.

(b) To make the determination that an agency, body or commission or the General Accounting Office has failed to or does not meet the requirements of IRC 6103(p)(4). Subject to the administrative review applicable to State tax agencies described in IRC 6103(p)(7), authority to withhold returns and return information from any agency, body or commission or the General Accounting Office until a determination is made that the requirements of IRC 6103(p)(4) have been or will be met is also delegated. The authority delegated in this paragraph may not be redelegated.

(10) The Deputy Assistant Commissioner (Employee Plans and Exempt Organizations); Director, Office of Disclosure; Regional Commissioners; District Directors of Key Districts for Employee Plans and Exempt Organizations matters; Service Center Directors; Director, Austin Compliance Center; Director, Martinsburg Computing Center; and Director, Detroit Computing Center are authorized to disclose, or in specific instances, authorize the disclosure of:

(a) Statements, notifications, reports, or other return information described in IRC 6057(d) to officers and employees of the Social Security Administration for the administration of section 1131 of the Social Security

Act, upon written request and subject to the conditions prescribed in IRC 6103(l)(1)(B). The authority delegated in this paragraph to the Deputy Assistant Commissioner (Employee Plans and Exempt Organizations) may be redelegated, but not lower than Branch Chiefs, Employee Plans Technical and Actuarial Division. The authority delegated in this paragraph to Regional Commissioners may be redelegated not lower than Assistant Regional Commissioner. The authority delegated in this paragraph to the District Directors of Key Districts may be redelegated, but not below Chiefs, Technical Review Staffs, Employee Plans and Exempt Organizations Division. The authority delegated in this paragraph to Service Center Directors and the Director, Austin Compliance Center may be (redelegated, but not lower than Section Chiefs (or their equivalent). The authority delegated in this paragraph to the Director, Martinsburg Computing Center and Director, Detroit Computing Center may be redelegated, but not lower than Branch Chiefs (or their equivalent).

(b) Returns or return information, including compensation information, to officers and employees of the Department of Labor and Pension Benefit Guaranty Corporation for the administration of titles I and IV of the Employee Retirement Income Security Act of 1974, upon written request and subject to the conditions prescribed in IRC 6103(l)(2) and the Treasury regulations thereunder. The returns or return information which may be disclosed under this paragraph include:

(i) Upon specific written request, the information specified in 26 CFR 301.6103(i)(2)-1(a), 2(a), 3(b)(1), and 3(b)(2);

(ii) Upon receipt by the Commissioner of Internal Revenue of an annual written request, the information specified in 26 CFR 301.6103(i)(2)-3(a);

(iii) Upon receipt by the Commissioner of Internal Revenue of a general written request, information specified in 26 CFR 301.6103(i)(2)-3(d).

The authority delegated in this paragraph to the Deputy Assistant Commissioner (Employee Plans and Exempt Organizations) may be redelegated, but not lower than Branch Chiefs, Employee Plans Technical and Actuarial Division. The authority delegated in this paragraph to Regional Commissioners may be redelegated not lower than Assistant Regional Commissioner. The authority delegated in this paragraph to District Directors of the Key Districts may be redelegated, but not lower than Employee Plans Specialist. The authority delegated in this paragraph to Service Center Directors and the Director, Austin Compliance Center may be redelegated, but not lower than Section Chiefs (or their equivalent). The authority delegated in this paragraph to the Director, Martinsburg Computing Center and Director, Detroit Computing Center may be redelegated, but not lower than Branch Chiefs (or their equivalent). The authority delegated in this paragraph is also delegated to the National Director of Appeals; Regional Director of Appeals; Chief, Appeals Office; and Associate Chief, Appeals Office and may not be redelegated.

(11) The Deputy Assistant Commissioner (Employee Plans and Exempt Organizations) is authorized to disclose or, in specific instances, authorize the disclosure of drafts of proposed exemptions or of proposed denials of exemption requests, denial letters, and copies of information submitted by taxpayers requesting exemptions to the proper officers of the Department of Labor for consultation and coordination as required by IRC 4975(c)(2). The authority delegated in this paragraph may be redelegated not lower than Branch Chiefs, Employee Plans Technical and Actuarial Division.

(12) Disclosure of information to appropriate Federal, State or local law enforcement officials may be made by Internal Revenue Service employees, and employees of the Office of Chief Counsel, concerning nontax crimes which do not involve return information or the income or other financial information of an individual or entity, in accordance with the provisions of Chapter (35)00 of the Disclosure of Official Information Handbook, IRM 1272. In situations where there is a question as to whether the information to be disclosed is or is not return information, such as those described in IRM 1272, the Director, Office of Disclosure; Regional Commissioners; Assistant Commissioner (International); Assistant District and Service Center Directors; and the Assistant Director, Austin Compliance Center are authorized to approve or deny such requests for disclosure. The Director, Office of Disclosure, should act in all such matters only after coordination with the office of the Assistant Chief Counsel (Disclosure Litigation). Regional Commissioners; Assistant Commissioner (International); Assistant District and Service Center Directors; and the Assistant Director Austin Compliance Center should act in all such matters only after coordination with the Associate Chief Counsel (International), Office of Regional or District Counsel, as appropriate. The authority delegated in this paragraph may not be redelegated.

(13) The authority vested in the Commissioner of Internal Revenue by 26 CFR 301.9000-1 is delegated by this Order to the Senior Deputy Commissioner. It is also delegated to the following officials to the extent described below. (No authorization is needed in cases referred to the Department of Justice which are discussed in paragraph (1)(c) where the testimony or disclosure is made on behalf of the government.)

(a) Regional Commissioners are authorized to determine whether employees of the Internal Revenue Service assigned to their regions, including employees of the Office of the Regional Counsel, but not including employees of the Regional Inspector, will be permitted to testify or produce Service records because of a request or demand for the disclosure of such records or information. The Regional Commissioners should act in all such matters only after coordination with the Office of Regional Counsel. However, the personal testimony of a Regional Commissioner shall require authorization in accordance with (b) below. The authority delegated in this paragraph may not be redelegated. (See (d) and (e) below.) The authority delegated in this paragraph shall not extend to the disclosure of Internal Revenue Service records and information in response to a subpoena or request or other order of the Tax Court. (See General Counsel Order No. 4, which provides the authority for disclosure of Internal Revenue

Service records and information in tax court proceedings.)

(b) The Deputy Assistant Commissioner (Examination) is authorized to determine whether Regional Commissioners, employees of the Internal Revenue Service assigned to the National Office, including employees of the Office of Chief Counsel, and employees assigned to Regional Inspectors will be permitted to testify or produce Service records because of a request or demand for the disclosure of such records or information. The Deputy Assistant Commissioner (Examination) should act in all such matters only after coordination with the office of the Assistant Chief Counsel (Disclosure Litigation). The authority delegated in this paragraph may not be redelegated. (See (d) and (e) below). the authority delegated in this paragraph shall not extend to the disclosure of Internal Revenue Service records and information in response to a subpoena or request or other order of the Tax Court. (See General Counsel Order No. 4.)

(c) The Assistant Commissioner (International), District Directors, Service Center Directors and the Director, Austin Compliance Center are authorized to determine whether officers and employees of the Internal Revenue Service assigned to their office, district of service center or the Austin Compliance Center (including regional appeals employees located in the district) will be permitted to testify or produce Service records because of a request or demand for disclosure of such records or information. For purposes of this paragraph, employees of the Office of the District Counsel come under the authority of the District Director. Employees of the Regional Inspector are covered under paragraph (b), above. The District and Service Center Directors and the Director, Austin Compliance Center should act in all such matters only after coordination with the Office of the District Counsel. The Assistant Commissioner (International) should act in all such matters only after coordination with the Associate Chief Counsel (International). However, the personal testimony of a District Director or Service Center Director or Director, Austin Compliance Center shall require authorization in accordance with (a) above. The authority in this paragraph may not be redelegated. (See (d) and (e) below.) The authority delegated in this paragraph shall not extend to the disclosure of Internal Revenue Service records and information in response to a subpoena or request or other order of the Tax Court. (See General Counsel Order No. 4.)

(d) The authority delegated in paragraphs (a), (b) and (c) shall not extend to testimony or the production of Service records because of a request or demand for the disclosure of such records or information:

(i) By a Congressional Committee;

(ii) Involving a disclosure to correct a misstatement of fact pursuant to IRC 6103(k)(3).

(e) The Assistant Chief Counsel (General Legal Services), and Assistant Regional Counsel (GLS), with the concurrence of the Assistant Chief Counsel (General Legal Services), are authorized to determine whether officers and employees of the Internal Revenue Service, including employees of the Office of Chief Counsel, will be permitted to testify or produce Internal Revenue records or information because of a request or demand for the disclosure of such records or information, if the request or demand is made in connection with personnel or claimant representative matters under the jurisdiction of the office of the Assistant Chief Counsel (General Legal Services) for which they have been delegated authority to disclose returns or return information as described in paragraph 1(d). The authority delegated above in this paragraph to the Assistant Chief Counsel (General Legal Services), may be redelegated only to the Deputy Assistant Chief Counsel (General Legal Services), and to Branch Chiefs and attorneys of the Office of Chief Counsel directly involved in such matters. This paragraph does not limit the authority granted in (a), (b), or (c) above.

(f) The authority delegated to Regional Commissioners, District and Service Center Directors and the Director, Austin Compliance Center in paragraphs (a) and (c) shall not extend to testimony or the production of Service records because of a request or demand for the disclosure of such records or information which may require a disclosure to a competent authority under a tax convention, whether or not such records or information were previously disclosed pursuant to such convention. The Deputy Assistant Commissioner (Examination) should act in all such matters only after authorization by the appropriate United States competent authority. (See Delegation Order 114, as revised).

(g) In addition to paragraphs (a), (b), (c) and (e) above, authority is further delegated to Assistant Regional Commissioners (Resources Management); Regional Inspectors; Regional and District Counsel; District Service Center Directors; Director, Austin Compliance Center, and Director, Detroit Computing Center, to release or, in specific instances, authorize the release of information from the leave and payroll records of employees under their jurisdiction, and to the Director, National Office Resources Management Division, to release or, in specific instances, authorize the release of information from the leave and payroll records of all employees of the National Office, when such information is requested or subpoenaed in connection with private litigation, upon determination that release of the information would not be detrimental to the Internal Revenue Service. This delegation does not include authority to release or authorize the release of information contained in official personnel folders, which is covered by IRM 0293. When any uncertainty exists as to the availability of furnishing leave and pay information in a particular case, the matter should be referred to the National Office, Attention: HR:N:H, with a compete report of the circumstances. The authority delegated in this paragraph may not be redelegated.

The provisions of this paragraph (13(a)—(g)) are limited to the authorization of testimony or the production of documents pursuant to a request or demand as referred to in paragraphs (d)(1)(i) and (ii) of 26 CFR 301.9000-1 and do not extend to or affect other disclosure authority previously delegated in paragraphs (6) and (9) of this order. Furthermore, in instances where it is anticipated that the testimony or production of Service records by a Chief Counsel attorney will involve matters which may fall within the attorney-client privilege, the determination of whether to

waive the privilege, as well as the authority to authorize the testimony or production shall lie with the Deputy Assistant Commissioner (Examination) who will act in these matters only after coordination with the office of the Assistant Chief Counsel (Disclosure Litigation). In instances involving Regional or District Counsel attorneys and the attorney-client privilege, authority shall lie with the Regional Commissioner, who will act in these matters only after coordination with the Regional Counsel.

(14) The Deputy Assistant Chief Information Officer (Information Systems Management); Regional Commissioners; Assistant Commissioner (International); Director, Tax Systems Division; Director, Martinsburg Computing Center; Service Center Directors; and the Director, Austin Compliance Center are authorized to disclose or, in specific instances, authorize the disclosure of individual master file information to the head of a Federal, State or local child support enforcement agency or an authorized supervisory official under a contractual agreement entered into pursuant to Delegation Order 100, as revised, Revenue Procedure 78-10, and subject to the conditions prescribed in IRC 6103(l)(6)(A)(i). Such contractual agreement should be entered into only after coordination with the Director, Office of Disclosure. The authority delegated in this paragraph may be redelegated to any supervisory level deemed appropriate.

(15) The Deputy Assistant Commissioner (Examination); Regional Commissioners; Assistant Commissioner (International); Service Center Directors; the Director, Austin Compliance Center are authorized to disclose or, in specific instances, authorize the disclosure of return information to the head of a Federal, State or local child support enforcement agency or an authorized supervisory official under a contractual agreement entered into pursuant to Delegation Order 100, as revised, Revenue Procedure 78–10, and subject to the conditions prescribed in IRC 6103(l)(6)(A)(ii). Such contractual agreement should be entered into only after coordination with the Director, Office of Disclosure. The authority delegated in this paragraph may be redelegated to any supervisory level deemed appropriate.

(16) The Deputy Assistant Commissioner (Examination); Regional Commissioners; Service Center Directors; the Director, Austin Compliance Center; Director, Martinsburg Computing Center; and Director, Detroit Computing Center are authorized to disclose or, in specific instances, authorize the disclosure of information returns filed pursuant to part III of subchapter A of IRC chapter 61 to designated personnel of the Social Security Administration for the purpose of carrying out an effective return processing program in accordance with section 232 of the Social Security Act and pursuant to IRC 6103(l)(5). The authority delegated in this paragraph may not be redelegated.

(17) The Senior Deputy Commissioner, Associate Chief Counsel (International), and Associate Chief Counsel (Litigation) are authorized to disclose or, in specific instances, authorize the disclosure of returns and return information to the designated officers and employees of the Department of Justice pursuant to a written request from the Attorney General, the Deputy Attorney General, or an Assistant Attorney General in a matter involving tax administration, subject to the conditions prescribed in IRC 6103(h)(3)(B). The authority delegated in this paragraph may not be redelegated.

(18) The Assistant Chief Information Officer (Information Systems Management); Assistant Commissioners (Returns Processing); Director, Office of Disclosure; Service Center Directors; Director, Austin Compliance Center, and Director, Martinsburg Computing Center are authorized upon written request to disclose, or in specific instances, authorize the disclosure of return information pursuant to IRC 6103(h)(6) with respect to the address and status of an individual as a nonresident alien, citizen or resident of the United States to the Social Security Administration or the Railroad Retirement Board for purposes of carrying out responsibilities for withholding tax from social security benefits under IRC 1441.

(19) At the request of the Commissioner of Internal Revenue and with the approval of the Joint Committee on Taxation, the following officials may disclose information with respect to a specific taxpayer pursuant to IRC 6103(k)(3): Regional Commissioners; Assistant Commissioner (International); District and Service Center Directors; Director, Austin Compliance Center; Assistant Commissioner (Collection); Assistant Commissioner (Criminal Investigation); Assistant Commissioner (Employee Plans and Exempt Organizations); Director, Office of Disclosure; any individual who is specifically designated by the Commissioner of Internal Revenue. The authority delegated in this paragraph may not be redelegated.

(20) Director, Martinsburg Computing Center; and Director, Office of Disclosure, are authorized to disclose or, in specific instances, to authorize the disclosure of return information from the Information Returns Master File under a contractual agreement entered into pursuant to Delegation Order No. 100, as revised, and the applicable Revenue Procedure to Federal, State, and local agencies administering certain welfare programs, subject to the conditions of IRC 6103(l)(7). Such contractual agreements may be entered into only after coordination with the Office of Disclosure. The authority in this paragraph may be redelegated to any supervisory level deemed appropriate, but only by the officials named above.

(21) The Assistant Commissioner (Returns Processing) and the Director, Office of Disclosure, are authorized to disclose or, in specific instances, to authorize the disclosure of available filing status and taxpayer identity information from the Individual Master File to the Commissioner of Social Security under a contractual agreement entered into pursuant to Delegation Order No. 100, as revised, and subject to the conditions of IRC 6103(l)(12). Such contractual agreements may be entered into only after coordination with the Office of Disclosure. The authority in this paragraph may be redelegated only to the Director, Returns Processing and Accounting Division.

(22) Delegation Order No. 156 (Rev. 11) and Chief Counsel Directives Manual (30)330, effective September 27, 1989 are superseded.

Dated May 25, 1990.

Charles H. Brennan,
Deputy Commissioner (Operations).

Delegation Order No. 159 (Rev. 3) Effective September 17, 1990

Delegation of Authority; Director, Employee Plans Technical and Actuarial Division

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: The authority to waive the minimum funding standards under section 412 of the Internal Revenue Code may be further redelegated by Branch Chiefs in the Employee Plans Technical and Actuarial Division to reviewers Grade GS–13 and higher for waivers not exceeding $100,000. The text of the delegation order appears below.

Requests for Variance From Minimum Funding Standards (IRC 412(d))

1. Pursuant to authority vested in the Commissioner of Internal Revenue by Treasury Order 150–10, there is hereby delegated to the Director, Employee Plans Technical and Actuarial Division, the authority to:

a. Waive the minimum funding standards under IRC 412 in accordance with subsection (d) thereof, and

b. perform the corresponding duties of the Secretary of the Treasury under section 303 of the Employee Retirement Income Security Act of 1974 (ERISA) with respect to the minimum funding standards under ERISA section 302.

2. For purposes of this Order, a substantial waiver is a waiver with respect to a plan's minimum funding requirements for a plan year which, based on information reported to the Internal Revenue Service, exceeds one million dollars on a noncumulative basis (that is, exclusive of any amount with respect to which a waiver was requested for a prior plan year of years).

3. The authority contained in paragraph 1 may be redelegated to Branch Chiefs, Employee Plans Technical and Actuarial Division, for such waivers which are not determined substantial as defined in paragraph 2, with authority to further redelegate to reviewers Grade GS–13 and higher for waivers not exceeding $100,000.

4. Delegation Order No. 159 (Rev. 2), effective October 31, 1987, is superseded.

Dated: August 30, 1990.

Approved:

Charles H. Brennan,
Deputy Commissioner (Operations).

(Filed by the Office of the Federal Register on September 19, 1990, 8:45 a.m., and published in the issue of the Federal Register for September 20, 1990, 1990, 55 F.R. 38779)

Delegation Order No. 209 (Rev. 4) Effective September 19, 1990

Delegation of Authority

AGENCY: Internal Revenue Service, Treasury.

SUMMARY: This delegation order extends the authority to execute settlement agreements involving partnership and S corporation affected items to appeals officers at service centers and the Austin Compliance Center. The previous delegation order limited such appeals officers authority to partnership and S corporation items only. In addition, authority to execute consents extending the period for filing a refund suit pursuant to request for administrative adjustment that has been denied by the Service is being redelegated. The text of the delegation order appears below.

EFFECTIVE DATES: September 17, 1990.

Delegation of Authority in Partnership and S Corporation Matters

Pursuant to the authority vested in the Commissioner of Internal Revenue by IRC 6223, 6224, 6228, 6229, 6231(a)(7), 6232, 6243, and 6244, and Treasury Order 150–10:

1. Authority to sign the notice to partners or shareholders at the beginning of an administrative proceeding at the partnership or S corporation level with respect to a partnership or subchapter S item is delegated to revenue agents (grade GS–11 and higher).

2. Authority to sign the notice of final partnership or S corporation administrative adjustment is delegated to:

a. Chiefs and associate chiefs of appeals offices;

b. Appeals team chiefs as to their respective cases;

c. Appeals officers in service centers and the Austin Compliance Center.

d. Revenue agents (reviewers), (grade GS–11 and higher), in Examination Division or in Office of Taxpayer Service and Compliance, Assistant Commissioner (International); and

e. Revenue agents (grade GS–11 and higher) in service center and the Austin Compliance Center.

3. Authority to enter into and approve a written settlement agreement with one or more partners or shareholders with respect to the determination of partnership or subchapter S items and any items affected by such items for such partnership or S corporation taxable year is delegated to:

a. Chiefs and associate chiefs of appeals offices;

b. Appeals team chiefs, as to their respective cases; and

c. Appeals officers in service centers and the Austin Compliance Center but not as to their respective cases;

d. Revenue agents (reviewers), (grade GS–11 and higher), in Examination Division or Office of Taxpayer Service and Compliance, Assistant Commissioner (International); and

e. Revenue agents (grade GS–11 and higher) in service center and the Austin Compliance Center.

4. Authority to designate a Tax Matters Partner with respect to a partnership or a Tax Matters Person for an S Corporation, is delegated to:

a. Chiefs and associated chiefs of appeals offices;

b. Appeals team chiefs as to their respective cases;

c. Group managers in Examination Division.

5. Authority to sign consents fixing the period of limitations on assessment and collection of any tax under subtitle A attributable to any partnership item, subchapter S item (or affected items), or to extend the period filing a civil action for adjustment of partnership items pursuant to IRC 6228, is delegated to:

a. Appeals officers;

b. Appeals team chiefs, as to their respective cases; and

c. The Examination Division as indicated in Delegation Order No. 42, as revised.

6. To the extent that authority previously exercised consistent with this Order may require ratification, it is hereby affirmed and ratified.

The authority delegated herein may not be redelegated.

Delegation Order No. 209 (Rev. 3) (Correction), effective October 31, 1987, is hereby superseded.

Dated: August 31, 1990.

Approved.

Charles H. Brennan,
Deputy Commissioner (Operations).

(Filed by the Office of the Federal Register on October 5, 1990, 8:45 a.m., and published in the issue of the Federal Register for October 9, 1990, 55 F.R. 41154)

Weighted Average Interest Rate Update

Notice 90-43

Notice 88-73 provides guidelines for determining the weighted average interest rate and the resulting permissible range of interest rates used to calculate current liability for the purpose of the full funding limitation of section 412(c)(7) of the Internal Revenue Code as amended by the Omnibus Budget Reconciliation Act of 1987 (OBRA 1987).

The notice also provides that an announcement will be published monthly to provide the weighted average and the permissible range for the plan years beginning each month. The following rates were determined for the plan years beginning each month. The following rates were determined for the plan years beginning in the months shown below.

Month	Year	Weighted Average	Permissible Range
June	1990	8.58	7.72 to 9.43

Administrative Pronouncement

This document serves as an "administrative pronouncement" as that term is described in section 1.6661-3(b)(2) of the Income Tax Regulations and may be relied upon to the same extent as a revenue ruling or revenue procedure.

Like-Kind Exchanges; Additional Rules for Exchanges of Personal Property and for Exchanges of Multiple Properties (Corrections)

Notice 90-44

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to Notice of Proposed Rulemaking.

SUMMARY: This document contains corrections to the notice of proposed rulemaking relating to amendments and additions under section 1031 of the Internal Revenue Code of 1986, as amended.

SUPPLEMENTARY INFORMATION:

Background

The notice of proposed rulemaking provided rules for determining the applicability of section 1031 in an exchange of personal property, as well as rules for determining gain recognized and the basis of property received in an exchange of multiple properties under section 1031; and, the treatment of liabilities incurred by the taxpayer in anticipation of an exchange under section 1031 was clarified.

Need for Correction

As published, the notice of proposed rulemaking contains errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of the notice of proposed rulemaking which was the subject of FR Doc. 90-9619, published April 26, 1990, is corrected as follows:

Par. 1. On page 17635, column 3 [1990-21 I.R.B. 9, column 1], in the "DATES" portion of the preamble, the first sentence should read "These proposed regulations are proposed to be effective after publication of the final regulations in the Federal Register."

Par. 2. On page 17638, column 3, in line 6 of §1.1031(a)-2(b)(2) [1990-21 I.R.B. 9], the language "and 00.4 of Rev. Proc. 87-56, 1978-2 C.B." should read "and 00.4 of Rev. Proc. 87-56, 1987-2 C.B.".

Par. 3. On page 17639, column 3, in line 19 of §1.1031(a)-2(c)(1), the language "tangible personal property relates." should read "intangible personal property relates.".

Par. 4. On page 17641, column 1, in line 5 of §1.1031(f)-1(b)(2)(iv), the language "exchange group surplus is the excess of" should read "exchange group deficiency, if any, must be determined. An exchange group surplus is the excess of".

Par. 5. On page 17641, column 2, in line 24 of §1.1031(f)-1(c), the language "accordance with its fair value. The basis" should read "accordance with its fair market value. The basis".

Par. 6. On page 17641, column 3, in line 1 of §1.1031(f)-1(d) Example 2 (i), the language "F exchanges computer F" should read "F exchanges computer A".

Par. 7. On page 17641, column 3, in line 5 of §1.1031(f)-1(d) Example 2 (i), the language "printed B (asset class 00.12) and automobile B" should read "printer B (asset class 00.12) and automobile B".

Par. 8. On page 17643, column 2, in line 3 of §1.1031(f)-1(d) Example 4 (ii)(B), the language "are offset by all liabilities of which R is" should read "are offset by all liabilities of which B is".

Dale D. Goode,
Federal Register Liaison Officer,
Assistant Chief Counsel (Corporate).

(Filed by the Office of the Federal Register on May 30, 1990, 8:45 a.m., and published in the issue of the Federal Register for May 31, 1990, 55 F.R. 22036)

Failure to Comply With Certain Information Reporting Requirements

Notice 90-45

This notice is intended to advise persons required to file information returns of changes made by the Revenue Reconciliation Act of 1989 to the penalties for failure to file information returns on or before the required filing date, and for failure to report correct information on those returns. The notice also advises filers of administrative practices that the Internal Revenue Service will follow with regard to the correction of information returns due during 1990. The new

penalty provisions, which appear in newly revised sections 6721-6724 of the Internal Revenue Code, apply to the widely used forms in the W-2 and 1099 series (except for Forms W-2P and 1099-R), to Form 1098, and to numerous other information returns, as specified in newly revised section 6724(d)(1) of the Code. The new rules are effective for returns the due date for which (determined without regard to extensions) is after December 31, 1989.

In general, the new penalty for failure to file correct information returns is "time sensitive," in that prompt correction of failures to file, or prompt correction of errors on returns that were filed, can lead to reduced penalties. The penalty generally is $50 for each information return that is not filed, or is not filed correctly, by the prescribed filing date, with a maximum penalty of $250,000 per year ($100,000 for certain businesses with average annual gross receipts, over the most recent 3-year period, not in excess of $5,000,000). The penalty generally is reduced to:

—$15 for each failure to comply if the failure is corrected within 30 days after the date the return was due, with a maximum penalty of $75,000 per year ($25,000 for certain businesses with average annual gross receipts, over the most recent 3-year period, not in excess of $5,000,000).

—$30 for each failure to comply if the failure is corrected more than 30 days after the return was due, but on or before August 1 of the calendar year in which the return was due, with a maximum penalty of $150,000 per year ($50,000 for certain businesses with average annual gross receipts, over the most recent 3-year period, not in excess of $5,000,000).

Penalties can be waived if failures were due to reasonable cause and not to willful neglect. In addition, section 6721(c) provides that if (a) information returns have been filed but were filed with incomplete or incorrect information, and (b) the failures are corrected on or before August 1 of the calendar year in which the returns were due, then the penalty will not apply to the greater of 10 returns, or one-half of 1 percent of the total number of information returns required to be filed by the filer during the calendar year.

In the past, the Service has applied an administrative policy providing certain relief from penalties if errors on previously filed information returns were corrected by October 1 of the year in which the returns were due. The Service's instructions for information returns due during calendar year 1990 were printed prior to the amendments to sections 6721-4 and thus advise taxpayers to correct errors by October 1. In view of these instructions, the Service will, for information returns due during 1990, continue to apply this policy by waiving penalties for incorrect information on returns that were previously filed, provided the filer furnishes corrected information, to the office of the Service (or the Social Security Administration) with which the returns were originally filed, by October 1, 1990. However, for information returns due after 1990, this administrative policy will be discontinued.

The Service has not in the past provided, and is not currently providing, automatic waiver, on grounds of correction, of penalties for *failure to file* information returns by the required filing date. Instead, penalties for failure to file are waived only upon a showing that the failure was due to reasonable cause and not to willful neglect.

Estate Tax Marital Deduction—Qualified Terminable Interest Property

Notice 90-46

This Notice extends the procedural relief provided by Notice 89-4, 1989-1 C.B. 624.

The Internal Revenue Service issued Notice 89-4 in response to *Estate of Howard v. Commissioner*, 91 T.C. 329 (1988). In *Howard*, the Tax Court held that a trust does not satisfy the requirements of a qualified terminable interest property (QTIP) trust under section 2056(b)(7) of the Internal Revenue Code unless certain requirements are met. These requirements are satisfied if the trustee is required (1) to distribute the trust income at annual or more frequent intervals and (2) to pay the income accrued between the last distribution date and the surviving spouse's death to the surviving spouse's estate or pursuant to his or her exercise of a general power of appointment.

The Tax Court's opinion is in conflict with section 20.2056(b)-7(c)(1) of the proposed Estate Tax Regulations. Because taxpayers and their representatives were concerned that the Service might abandon the position reflected in the proposed regulations and deny the marital deduction with respect to property passing to a trust that did not meet the requirements set forth by the Tax Court, the Service in Notice 89-4 set forth an interim settlement procedure available with respect to any trust that presented the issue addressed in *Howard* but otherwise met the requirements of section 2056(b)(7) or 2523(f)(2) of the Code. Under the procedure, the Service and the persons having an interest in the trust could formally acknowledge that the marital deduction is allowable for the property passing to the trust and that the spouse's interest in the trust is a "qualifying income interest for life" for purposes of sections 2044 and 2519.

Under Notice 89-4 the settlement procedure was made available with respect to any transfer in trust for which the applicable period of limitations remained open, including a transfer reported on a return that is the subject of a closing letter issued by the District Director. It was made available with respect to any transfer until the later of December 31, 1989, or ninety days after the date the District Director gave the taxpayer written notice of the availability of the procedure. Under the present notice, the period for which the settlement procedure is available is extended and will remain available with respect to any such transfer for which a properly prepared closing agreement is submitted by the taxpayer on or before December 31, 1990.

In cases where the return has not yet been filed, the taxpayer may initiate the procedure by filing a proposed closing agreement with the estate tax or gift tax return. Provided that the trust otherwise meets the requirements of section 2056(b)(7) or 2523(f)(2) of the Code, the filing with the estate tax or gift tax return of the proposed closing agreement (if

signed by all persons having an interest in the trust) will ensure that the marital deduction will not be disallowed on the basis that the surviving spouse does not have a right to accrued but undistributed income at death.

In other cases, a closing agreement may be executed in connection with the examination of the return on which the transfer is reported. In the case of a return that was previously examined or was filed and has not yet been examined, either the Service or the taxpayer may initiate the settlement procedure.

The provisions of Notice 89-4 continue to apply with respect to the interim settlement procedure for the extended period provided in this Notice.

Tax on Certain Imported Substances; Notice of Determination

Notice 90-47

SUMMARY: This notice announces a determination, under Notice 89-61, 1989-1 C.B. 717, that the list of taxable substances in section 4672(a)(3) of the Internal Revenue Code will be modified to include *linear alpha olefins* and *polyalphaolefins*.

EFFECTIVE DATE: This modification is effective as of April 1, 1990.

SUPPLEMENTARY INFORMATION:

Background

Under section 4672(a) of the Internal Revenue Code, an importer or exporter of any substance may request that the secretary determine whether such substance should be listed as a taxable substance. The Secretary shall add such substance to the list of taxable substances in section 4672(a)(3) if the Secretary determines that taxable chemicals constitute more than 50 percent of the weight, or more than 50 percent of the value, of the materials used to produce such substance. This determination is to be made on the basis of the predominant method of production. Notice 89-61, 1989-1 C.B. 717, sets forth the rules relating to the determination process.

Determination

On December 26, 1989, the Secretary determined that linear alpha olefins and polyalphaolefins should be added to the list of taxable substances in section 4672(a)(3) of the Internal Revenue Code, effective as of April 1, 1990.

The petitions to add linear alpha olefins and polyalphaolefins were submitted by Ethyl Corporation, a manufacturer and exporter of these substances. No material comments were received on these petitions.

Linear Alpha Olefins

Linear alpha olefins have been determined to be a taxable substance because a review of the stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 100 percent by weight of the materials used in its production.

HTS number: 2901.29.10.10
Schedule B number: 2901.29.1010
CAS number: variable

Linear alpha olefins are clear liquids derived from the taxable chemical *ethylene*. The predominant method of producing linear alpha olefins is via the catalytic chain growth of ethylene.

The stoichiometric material consumption formula for this substance is:

$n/2\ C_2H_4 \dashrightarrow C_nH_{2n}$
ethylene linear alpha olefin

The rate of tax prescribed for this substance, under section 4671(b)(3), is $4.87 per ton. This is based upon a conversion factor for ethylene of 1.00.

Polyalphaolefins

Polyalphaolefins have been determined to be a taxable substance because a review of the stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 99.6 percent by weight of the materials used in its production.

HTS number: 3902.90.00.50
Schedule B number: 3902.90.0050
CAS number: variable

Polyalphaolefins are clear liquids derived from the taxable chemical *ethylene*. The predominant method of producing polyalphaolefins is by oligomerization of decene-1, a linear alpha olefin.

The stoichiometric material consumption formula for this substance is:

$n/2\ C_2H_4 + H_2 \longrightarrow C_nH_{2n+2}$
ethylene hydrogen polyalphaolefin

The rate of tax prescribed for this substance, under section 4671(b)(3), is $4.85 per ton. This is based upon a conversion factor for ethylene of 0.9961.

Dale D. Goode,
Federal Register Liaison Officer,
Assistant Chief Counsel (Corporate).

(Filed by the Office of the Federal Register on June 12, 1990, 8:45 a.m., and published in the issue of the Federal Register for June 13, 1990, 55 F.R. 24023)

Tax on Certain Imported Substances; Notice of Determination

Notice 90-48

SUMMARY: This notice announces a determination, under Notice 89-61, 1989-1 C.B. 717, that the list of taxable substances in section 4672(a)(3) of the Internal Revenue Code will be modified to include *polyethylene terephthalate pellets*.

EFFECTIVE DATE: This modification is effective as of April 1, 1990.

SUPPLEMENTARY INFORMATION:

Background

Under section 4672(a) of the Internal Revenue Code, an importer or exporter of any substance may request that the Secretary determine whether such substance should be listed as a taxable substance. The Secretary shall add such substance to the list of taxable substances in section 4672(a)(3) if the Secretary determines that taxable chemicals constitute more than 50 percent of the weight, or more than 50 percent of the value, of the materials used to produce such substance. This determination is to be made on the basis of the predominant method of production. Notice 89-61, 1989-1 C.B. 717, sets forth the rules relating to the determination process.

Determination

On December 26, 1989, the Secretary determined that polyethylene terephthalate pellets should be added to the list of taxable substances in section 4672(a)(3) of the Internal Revenue Code, effective as of April 1, 1990.

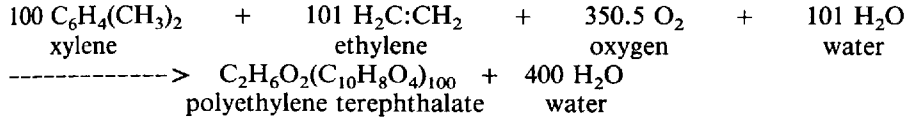
The petition to add polyethylene terephthalate was submitted by Eastman Chemicals Division, Eastman Kodak Company, a manufacturer and exporter of this substance. No material comments were received on this petition.

Polyethylene terephthalate has been determined to be a taxable substance because a review of its stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 50.8 percent by weight of the materials used in its production.

HTS number:	3907.60.00
Schedule B number:	3907.60.0000
CAS number:	25038-59-9

Polyethylene terephthalate, a semicrystalline solid, is derived from the taxable chemicals *xylene* and *ethylene*. The predominant method of producing polyethylene terephthalate involves reacting terephthalic acid with ethylene glycol. Terephthalic acid is produced by the air oxidation of p-xylene, and ethylene glycol is produced by reaction of ethylene with oxygen and water.

The stoichiometric material consumption formula for this substance is:



The rate of tax prescribed for this substance, under section 4671(b)(3), is $6.30 per ton. This is based upon a conversion factor for xylene of 0.5507 and a conversion factor for ethylene of 0.1470.

Dale D. Goode,
Federal Register Liaison Officer,
Assistant Chief Counsel (Corporate).

(Filed by the Office of the Federal Register on June 12, 1990, 8:45 a.m., and published in the issue of the Federal Register for June 13, 1990, 55 F.R. 24023)

Privacy Act; Computer Matching Programs

Notice 90-49

AGENCY: Internal Revenue Service; Treasury Department.

ACTION: Notice.

SUMMARY: Pursuant to the Computer Matching and Privacy Protection Act of 1988, Public Law 100-503, October 18, 1988, and the Office of Management and Budget (OMB) Guidelines on the Conduct of Matching Programs, notice is hereby given of the conduct of Internal Revenue Service's computer matching programs. In accordance with various provisions of section 6103 of the Internal Revenue Code of 1986, the computer matching programs provide Federal, State, and local agencies with tax information from IRS records to assist them in administering the programs and activities described hereafter. The matching programs substantially prevent or reduce fraud and abuse in certain government programs and facilitate the settlement of government claims while protecting the privacy interest of the subjects of the match.

EFFECTIVE DATE: July 27, 1990.

ADDRESSES: Inquiries may be mailed to Director, Office of Disclosure, Internal Revenue Service, P.O. Box 388, Washington, DC 20044.

SUPPLEMENTARY INFORMATION: The nature, purposes, and authorities for IRS computer matching programs are as follows:

Matches Conducted Pursuant to IRC 6103(l)(3)

Upon written request, the Service may disclose to the head of a Federal agency, which makes, guarantees, or insures certain Federal loans, whether an applicant for such a loan has a tax delinquent account.

The disclosure of a Tax Delinquent Account Status Indicator under IRC 6103(l)(3) is made only for the purpose of, and to the extent necessary in, determining the creditworthiness of the applicant for the loan in question. The information provided is extracted monthly from the Internal Revenue Service Individual Master File (Treas./IRS System 24.030 (IMF)) located at the Internal Revenue Service, Martinsburg Computing Center (MCC), in Martinsburg, West Virginia. The IMF contains tax accounts of individuals.

There are currently no (l)(3) matching agreements in effect.

Matches Conducted Pursuant to IRC 6103(l)(7)

The Service is required, upon written request, to disclose current information from returns with respect to unearned income to any Federal, State, or local agency administering certain federally approved programs to provide:

(a) Aid to Families with Dependent Children;

(b) Medical assistance;

(c) Supplemental Security Income benefits;

(d) Social security benefits;

(e) Unemployment compensation;

(f) Food Stamps; or

(g) State administered supplementary payments.

Information is disclosed by the Service only for the purpose of, and to the extent necessary in, determining eligibility for, or the correct amount of, benefits under the aforementioned programs.

The return information is extracted on a monthly basis from the Internal Revenue Service Wage and Information Returns Processing File (Treas./IRS System 22.061 (IRP)) for the latest processing year. This file contains information returns filed by payers of income such as interest and dividends reported on Forms 1099-INT and 1099-DIV.

Federal agencies participating in (l)(7) matches are the Social Security Administration and Health Care Financing Administration.

Matches Conducted Pursuant to IRC 6103(l)(12)

The Service shall, upon written request from the Commissioner of Social Security (SSA), disclose to SSA available filing status and taxpayer identity information from the IMF (Treas./IRS System 24.030) relating to whether any medicare beneficiary

identified by SSA was a married individual for any specified year after 1986, and, if so, the name of the spouse of such individual and such spouse's TIN, but only for purposes of, and to the extent necessary in, determining the extent to which any medicare beneficiary is covered under any group health plan. This section provides further for the redisclosure of certain taxpayer identity information by SSA to Health Care Financing Administration (HCFA) upon the written request of the Administrator of HCFA. With respect to the information redisclosed by the Commissioner of SSA, the Administrator of HCFA may further disclose said information to certain qualified employers and group health plans.

The information provided is extracted monthly from the IMF.

The Federal agencies participating in (l)(12) computer matches are SSA and HCFA.

Matches Conducted Pursuant to IRC 6103(m)(2)

The Service may, upon written request, disclose the mailing address of a taxpayer for use by officers, employees, or agents of a Federal agency for purposes of locating such taxpayer to collect or compromise a Federal claim against the taxpayer in accordance with sections 3711, 3717, and 3718 of title 31 of the United States Code. This section also provides for the redisclosure of a taxpayer's mailing address to a consumer reporting agency, but only to allow for the preparation of a commercial credit report on the taxpayer for use by the requesting Federal agency in accordance with the Federal Claims Collection Act of 1966, as amended by the Debt Collection Act of 1982.

The information provided is extracted monthly from the IMF (Treas./IRS System 24.030).

Federal agencies participating in (m)(2) matches are:

Army & Air Force Exchange Service (AAFES)
Army Finance & Accounting Center (AFAC)
Equal Employment Opportunity Commission (EEOC)
Health Resources & Services Administration (HRSA)
Health Care Financing Administration (HCFA)
Housing & Urban Development (HUD)
Marine Corps Finance Center (MCFC)
National Institutes of Health (NIH)
Navy Finance Center (NFC)
Navy Resale & Services Support Office (NRSSO)
Public Health Service (PHS)
Railroad Retirement Board (RRB)
Social Security Administration (SSA)
U.S. Army Community & Family Support Center (ACFSC)
U.S. Coast Guard (USCG)
Department of Education (ED)
Department of Health & Human Services (HHS)
Department of Justice—Civil Division (DOJ)
Department of State (DOS)
Department of Veterans Affairs (VA)

Matches Conducted Pursuant to IRC 6103(m)(4)

Upon written request from the Secretary of Education, the Service may disclose the mailing address of any taxpayer who has defaulted on certain loans extended under the Higher Education Act or Migration and Refugee Assistance Act for purposes of locating such taxpayer to collect the loan. This section further provides for the redisclosure by the Secretary of Education of a taxpayer's mailing address to any lender, or any State or nonprofit guarantee agency, participating under the Higher Education Act, or any educational institution with which the Secretary of Education has an agreement under that Act.

Redisclosure is made by the Secretary of Education for use only by officers, employees, or agents of such lender, guarantee agency, or institution whose duties relate to the collection of student loans for purposes of locating individuals who have defaulted on student loans made under such loan programs for purposes of collecting such loans.

The information provided is extracted monthly from the IMF (Treas./IRS System 24.030).

The U.S. Department of Education participates in (m)(4) computer matches.

Matches Conducted Under IRC 6103(m)(5)

Upon written request from the Secretary of Health and Human Services (HHS), the Service may disclose the mailing address of any taxpayer who has defaulted on certain loans extended under the Public Health Service Act for purposes of locating such taxpayer to collect the loan. This section also provides for the redisclosure by the Secretary of HHS of a taxpayer's mailing address to any school with which the Secretary has an agreement under the Public Health Service Act, or any eligible lender participating under such Act.

Redisclosure is made by the Secretary of HHS for use only by officers, employees, or agents of such school or eligible lender whose duties relate to the collection of student loans for purposes of locating individuals who have defaulted on student loans made under the Public Health Service Act for the purposes of collecting such loans.

The information provided is extracted monthly from the IMF (Treas./IRS System 24.030).

The Department of Health & Human Services participates in (m)(5) computer matches.

Approval of the IRS computer matching programs was granted by the Treasury Data Integrity Board on June 7, 1989.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

Approved:

Linda M. Combs,
Assistant Secretary of the Treasury (Management).

(Filed by the Office of the Federal Register on June 26, 1990, 8:45 a.m., and published in the issue of the Federal Register for June 27, 1990, 55 F.R. 26327)

Tax on Certain Imported Substances; Notice of Determination

Notice 90-50

SUMMARY: This notice announces a determination, under Notice 89-61, 1989-1 C.B. 717, that the list of taxable substances in section 4672(a)-(3) of the Internal Revenue Code will be modified to include *butyl acrylate, methyl acrylate, ethyl acrylate,* and *2-ethylhexyl acrylate.*

EFFECTIVE DATE: This modification is effective as of July 1, 1990.

SUPPLEMENTARY INFORMATION:

Background

Under section 4672(a) of the Internal Revenue Code, an importer or exporter of any substance may request that the Secretary determine whether such substance should be listed as a taxable substance. The Secretary shall add such substance to the list of taxable substances in section 4672(a)(3) if the Secretary determines that taxable chemicals constitute more than 50 percent of the weight, or more than 50 percent of the value, of the materials used to produce such substance. This determination is to be made on the basis of the predominant method of production. Notice 89-61, 1989-1 C.B. 717, sets forth the rules relating to the determination process.

Determination

On March 5, 1990, the Secretary determined that butyl acrylate, methyl acrylate, ethyl acrylate, and 2-ethylhexyl acrylate should be added to the list of taxable substances in section 4672(a)(3) of the Internal Revenue Code, effective as of July 1, 1990.

The petitions to add butyl acrylate, methyl acrylate, ethyl acrylate, and 2-ethylhexyl acrylate were submitted by Hoechst Celanese, a manufacturer and exporter of these substances. No material comments were received on these petitions.

Butyl Acrylate

Butyl acrylate has been determined to be a taxable substance because a review of its stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 67.6 percent by weight of the materials used in its production.

HTS number:	2916.12.50.30
Schedule B number:	2916.12.5030
CAS number:	141-32-2

Butyl acrylate, a liquid, is derived from the taxable chemicals *propylene* and *methane*. The predominant method of producing butyl acrylate is by esterification of acrylic acid with butanol. Acrylic acid is produced by oxidation of propylene. Butanol is produced from propylene using the vapor phase technology.

The stoichiometric material consumption formula for this substance is:

$$2\ C_3H_6 + 1.5\ O_2 + CH_4 \text{ -----> } CH_2CHCOOC_4H_9 + H_2 + H_2O$$

propylene oxygen methane; butyl acrylate hydrogen water

The rate of tax prescribed for this substance, under section 4671(b)(3), is $4.38 per ton. This is based upon a conversion factor for propylene of 0.7841 and a conversion factor for methane of 0.162.

Methyl Acrylate

Methyl acrylate has been determined to be a taxable substance because a review of its stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 54.7 percent by weight of the materials used in its production.

HTS number:	2916.12.50.20
Schedule B number:	2916.12.5020
CAS number:	96-33-3

Methyl acrylate, a liquid, is derived from the taxable chemicals *propylene* and *methane*. The predominant method of producing methyl acrylate is by esterification of acrylic acid with methanol. Acrylic acid is produced by oxidation of propylene. Methanol is obtained by steam reforming natural gas.

The stoichiometric material consumption formula for this substance is:

$$C_3H_6 + 1.5\ O_2 + CH_4 \text{ -----> } CH_2CHCOOCH_3 + H_2 + H_2O$$

propylene oxygen methane; methyl acrylate hydrogen water

The rate of tax prescribed for this substance, under section 4671(b)(3), is $4.29 per ton. This is based upon a conversion factor for propylene of 0.5534 and a conversion factor for methane of 0.463.

Ethyl Acrylate

Ethyl acrylate has been determined to be a taxable substance because a review of its stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 59.3 percent by weight of the materials used in its production.

HTS number:	2916.12.50.10
Schedule B number:	2916.12.5010
CAS number:	140-88-5

Ethyl acrylate, a liquid, is derived from the taxable chemicals *propylene* and *ethylene*. The predominant method of producing ethyl acrylate is by esterification of acrylic acid with ethanol. Acrylic acid is produced by oxidation of propylene. Ethanol is produced from ethylene.

The stoichiometric material consumption formula for this substance is:

$$C_3H_6 + 1.5\ O_2 + C_2H_4 \text{ -----> } CH_2CHCOOCH_2CH_3 + H_2O$$

propylene oxygen ethylene; ethyl acrylate water

The rate of tax prescribed for this substance, under section 4671(b)(3), is $3.85 per ton. This is based upon a conversion factor for propylene of 0.4861 and a conversion factor for ethylene of 0.3039.

2-Ethylhexyl Acrylate

2-ethylhexyl acrylate has been determined to be a taxable substance because a review of its stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 76.7 percent by weight of the materials used in its production.

HTS number:	2916.12.50.40
Schedule B number:	2916.12.5040
CAS number:	103-11-7

2-ethylhexyl acrylate, a liquid, is derived from the taxable chemicals *propylene* and *methane*. The predominant method of producing 2-ethylhexyl acrylate is by direct esterification of acrylic acid with 2-ethylhexanol in the presence of sulfuric acid. Acrylic acid is obtained from propylene by two stage oxidation. 2-ethylhexanol is produced from propylene, using n-butyraldehyde as an intermediary.

The stoichiometric material consumption formula for this substance is:

$$3\ C_3H_6 + 1.5\ O_2 + 2\ CH_4 \text{ -----> } CH_2CHCOOCH_2CHC_2H_5C_4H_9 + H_2O + 2\ H_2$$

propylene oxygen methane; 2-ethylhexyl acrylate water hydrogen

The rate of tax prescribed for this substance, under section 4671(b)(3), is $5.08 per ton. This is based upon a conversion factor for propylene of 0.8741 and a conversion factor for methane of 0.2376.

Dale D. Goode,
Federal Register Liaison Officer,
Assistant Chief Counsel (Corporate).

(Filed by the Office of the Federal Register on June 21, 1990, 8:45 a.m., and published in the issue of the Federal Register for June 22, 1990, 55 F.R. 25768)

Tax on Certain Imported Substances; Notice of Determination

Notice 90-51

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice.

SUMMARY: This notice announces a determination, under Notice 89-61, 1989-1 C.B. 717, that the list of taxable substances in section 4672(a)-(3) of the Internal Revenue Code will be modified to include *vinyl acetate, normal propyl acetate, isopropyl acetate, normal butyl acetate,* and *isobutyl acetate.*

EFFECTIVE DATE: This modification is effective as of July 1, 1990.

SUPPLEMENTARY INFORMATION:

Background

Under section 4672(a) of the Internal Revenue Code, an importer or exporter of any substance may request that the Secretary determine whether such substance should be listed as a taxable substance. The Secretary shall add such substance to the list of taxable substances in section 4672(a)(3) if the Secretary determines that taxable chemicals constitute more than 50 percent of the weight, or more than 50 percent of the value, of the materials used to produce such substance. This determination is to be made on the basis of the predominant method of production. Notice 89-61, 1989-1 C.B. 717, sets forth the rules relating to the determination process.

Determination

On March 5, 1990, the Secretary determined that vinyl acetate, normal propyl acetate, isopropyl acetate, normal butyl acetate, and isobutyl acetate should be added to the list of taxable substances in section 4672(a)-(3) of the Internal Revenue Code, effective as of July 1, 1990.

The petitions to add vinyl acetate, normal propyl acetate, isopropyl acetate, normal butyl acetate, and isobutyl acetate were submitted by Hoechst Celanese, a manufacturer and exporter of these substances. No material comments were received on these petitions.

Vinyl acetate

Vinyl acetate has been determined to be a taxable substance because a review of its stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 63.8 percent by weight of the materials used in its production.

HTS number: 2915.32.00
Schedule B number: 2915.32.0000
CAS number: 108-05-4

Vinyl acetate, a liquid, is derived from the taxable chemicals *ethylene* and *methane.* The predominant method of producing vinyl acetate is by oxyacetylation of ethylene with oxygen and acetic acid. Acetic acid is made by carbonylation of methanol.

The stoichiometric material consumption formula for this substance is:

$$\underset{\text{ethylene}}{C_2H_4} + \underset{\text{methane}}{2\,CH_4} + \underset{\text{water}}{H_2O} + \underset{\text{oxygen}}{\tfrac{1}{2}\,O_2} \text{-----} > \underset{\text{vinyl acetate}}{CH_3COOHCH_2} + \underset{\text{hydrogen}}{4\,H_2}$$

The rate of tax prescribed for this substance, under section 4671(b)(3), is $2.72 per ton. This is based upon a conversion factor for ethylene of 0.3669 and a conversion factor for methane of 0.2695.

Normal Propyl Acetate

Normal propyl acetate has been determined to be a taxable substance because a review of its stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 67.9 percent by weight of the materials used in its production.

HTS number: 2915.39.45.10
Schedule B number: 2915.39.4510
CAS number: 109-60-4

Normal propyl acetate, a liquid, is derived from the taxable chemicals *ethylene* and *methane.* The predominant method of producing normal propyl acetate is by esterifying normal propyl alcohol with acetic acid. Normal propyl alcohol is produced by the hydrogenation of propionaldehyde. Propionaldehyde is produced by the oxo reaction of ethylene with synthesis gas. Acetic acid is made by carbonylation of methanol. Both carbon monoxide and methanol are produced from methane.

The stoichiometric material consumption formula for this substance is:

$$\underset{\text{ethylene}}{C_2H_4} + \underset{\text{methane}}{3\,CH_4} + \underset{\text{water}}{2\,H_2O} \text{-----} > \underset{\text{n-propyl acetate}}{CH_3COOC_3H_7} + \underset{\text{hydrogen}}{5\,H_2}$$

The rate of tax prescribed for this substance, under section 4671(b)(3), is $2.26 per ton. This is based upon a conversion factor for ethylene of 0.3148 and a conversion factor for methane of 0.2117.

Isopropyl Acetate

Isopropyl acetate has been determined to be a taxable substance because a review of its stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 67.9 percent by weight of the materials used in its production.

HTS number: 2915.39.50.00
Schedule B number: 2915.39.6000
CAS number: 108-21-4

Isopropyl acetate, a liquid, is derived from the taxable chemicals *ethylene* and *methane.* The predominant method of producing isopropyl acetate is by esterifying isopropyl alcohol with acetic acid. Isopropyl alcohol is produced by the hydrogenation of propionaldehyde. Propionaldehyde is produced by the oxo reaction of ethylene with synthesis gas. Acetic acid is made by carbonylation of methanol. Both carbon monoxide and methanol are produced from methane.

The stoichiometric material consumption formula for this substance is:

$$\underset{\text{ethylene}}{C_2H_4} + \underset{\text{methane}}{3\,CH_4} + \underset{\text{water}}{2\,H_2O} \text{-----} > \underset{\text{isopropyl acetate}}{CH_3COOC_3H_7} + \underset{\text{hydrogen}}{5\,H_2}$$

The rate of tax prescribed for this substance, under section 4671(b)(3), is $2.34 per ton. This is based upon a conversion factor for ethylene of 0.326 and a conversion factor for methane of 0.2173.

Normal Butyl Acetate

Normal butyl acetate has been determined to be a taxable substance because a review of its stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 71.4 percent by weight of the materials used in its production.

HTS number:	2915.33.00
Schedule B number:	2915.33.0000
CAS number:	123-86-4

Normal butyl acetate, a liquid, is derived from the taxable chemicals *propylene* and *methane*. The predominant method of producing normal butyl acetate is by esterifying normal butyl alcohol with acetic acid. Butyl alcohol is produced by the hydrogenation of butyraldehyde. Butyraldehyde is produced by the oxo reaction of propylene with synthesis gas. Acetic acid is made by carbonylation of methanol. Both carbon monoxide and methanol are produced from methane.

The stoichiometric material consumption formula for this substance is:

C_3H_6 + 3 CH_4 + 2 H_2O
propylene methane water

-----> $CH_3COOC_4H_9$ + 5 H_2
n-butyl acetate hydrogen

The rate of tax prescribed for this substance, under section 4671(b)(3), is $2.72 per ton. This is based upon a conversion factor for propylene of 0.4242 and a conversion factor for methane of 0.1881.

Isobutyl Acetate

Isobutyl acetate has been determined to be a taxable substance because a review of its stoichiometric material consumption formula shows that, based on the predominant method of production, taxable chemicals constitute 71.4 percent by weight of the materials used in its production.

HTS number:	2915.34.00
Schedule B number:	2915.34.0000
CAS number:	110-19-0

Isobutyl acetate, a liquid, is derived from the taxable chemicals *propylene* and *methane*. The predominant method of producing isobutyl acetate is by esterifying isobutyl alcohol with acetic acid. Butyl alcohol is produced by the hydrogenation of butyraldehyde. Butyraldehyde is produced by the oxo reaction of propylene with synthesis gas. Acetic acid is made by carbonylation of methanol. Both carbon monoxide and methanol are produced from methane.

The stoichiometric material consumption formula for this substance is:

C_3H_6 + 3 CH_4 + 2 H_2O
propylene methane water

-----> $CH_3COOC_4H_9$ + 5 H_2
isobutyl acetate hydrogen

The rate of tax prescribed for this substance, under section 4671(b)(3), is $2.86 per ton. This is based upon a conversion factor for propylene of 0.4524 and a conversion factor for methane of 0.1920.

Dale D. Goode,
Federal Register Liaison Officer,
Assistant Chief Counsel (Corporate).

(Filed by the office of the Federal Register on June 21, 1990, 8:45 a.m., and published in the issue of the Federal Register for June 22, 1990, 55 F.R. 25770)

Weighted Average Interest Rate Update

Notice 90-52

Notice 88-73 provides guidelines for determining the weighted average interest rate and the resulting permissible range of interest rates used to calculate current liability for the purpose of the full funding limitation of section 412(c)(7) of the Internal Revenue Code as amended by the Omnibus Budget Reconciliation Act of 1987 (OBRA 1987).

The notice also provides that an announcement will be published monthly to provide the weighted average and the permissible range for the plan years beginning each month. The following rates were determined for the plan years beginning each month. The following rates were determined for the plan years beginning in the month shown below.

Month	Year	Weighted Average	Permissible Range
July	1990	8.58	7.72 to 9.44

Administrative Pronouncement

This document serves as an "administrative pronouncement" as that term is described in section 1.6661-3(b)(2) of the Income Tax Regulations and may be relied upon to the same extent as a revenue ruling or revenue procedure.

List of Countries Requiring Cooperation with an International Boycott

Notice 90-53

In order to comply with the mandate of section 999(a)(3) of the Internal Revenue Code of 1986, the Department of the Treasury is publishing a current list of countries which may require participation in, or cooperation with, an international boycott (within the meaning of section 999(b)(3) of the Internal Revenue Code of 1986). The list differs from the prior quarterly list published in the Federal Register. The list reflects the recent union of the Arab Republic of Yemen and the Peoples Democratic Republic of Yemen, the new state being named the Republic of Yemen.

On the basis of the best information currently available to the Department of the Treasury, the following countries may require participation in, or cooperation with, an international boycott (within the meaning of section 999(b)(3) of the Internal Revenue Code of 1986).

Bahrain
Iraq
Jordan
Kuwait
Lebanon
Libya
Oman
Qatar
Saudi Arabia
Syria
United Arab Emirates
Yemen, Republic of

Dated: July 18, 1990.

Kenneth W. Gideon,
Assistant Secretary for Tax Policy.

(Filed by the Office of the Federal Register on July 24, 1990, 8:45 a.m., and published in the issue of the Federal Register for July 25, 1990, 55 F.R. 30363)

Income Limits Released by HUD

Notice 90-54

Rev. Rul. 89-24, 1989-1 C.B. 24, provides the manner in which to compute the income limits that are applicable both to exempt facility bonds issued to provide for qualified residential rental projects under section 142 of the Internal Revenue Code and to low-income housing credits under section 42. These income limits are computed by reference to income limits that are computed and listed, according to family size, by the Department of Housing and Urban Development (HUD). Rev. Rul. 89-24 provides that a list of income limits released by HUD may be relied upon until 30 days after the Internal Revenue Service publishes an announcement or notice in the Internal Revenue Bulletin indicating that HUD has released updated income limits.

On February 16, 1990, HUD released new income limits for every Metropolitan Statistical Unit, Primary Metropolitan Statistical Unit, and nonmetropolitan county of the United States, Puerto Rico, Guam, and the Virgin Islands. These new income limits must be used after September 26, 1990, for purposes of computing the income limits under sections 142(d) and 42 of the Code.

Designation of Foreign Countries Pursuant to Section 1.163-5(c)(2)(i)(D)(3)(*iii*)(*F*) of the Regulations

Notice 90-55

Section 163(f) of the Internal Revenue Code of 1986 provides that the issuer shall be denied a deduction for interest on any registration-required obligation that is not in registered form. Section 163(f)(2)(A)(iv) provides that the term "registration-required obligation" does not include an obligation described in section 163(f)(2)(B). Under section 163(f)(2)-B)(i), an obligation will not be considered to be described in section 163(f)(2)(B) unless "there are arrangements reasonably designed to insure that such obligation will be sold (or resold in connection with the original issue) only to a person who is not a United States person".

Section 1.163-5(c)(2)(i) of the regulations provides that an obligation will be considered to satisfy the requirement of "reasonable arrangements" if the provisions of paragraph (c)(2)(i)(D) of that section are met in connection with the original issuance of the obligation. In general, section 1.163-5(c)(2)(i)(D) applies to obligations issued after September 7, 1990. Under section 1.163-5(c)(2)(i)(D)(*3*), a certificate regarding the ownership of the obligation must generally be provided to the issuer. Certain obligations are exempted from the certification requirement. Those obligations must satisfy the conditions listed in section 1.163-5(c)(2)(i)(D)(*3*)(*iii*). Among these conditions is subdivision (F), which requires that the Commissioner designate the foreign country as a foreign country in which certification is not permissible.

The Federal Republic of Germany and the Swiss Confederation are hereby designated as foreign countries in which certification is not permissible for purposes of section 1.163-5(c)(2)-(i)(D)(*3*)(*iii*)(*F*) of the regulations.

This notice is effective in general for obligations originally issued after September 7, 1990, This notice also applies to an issuer making the election to apply the rules of section 1.163-5(c)(2)(i)(D) of the regulations to an obligation originally issued after May 10, 1990, pursuant to sections 1.163-5(c)(3)(ii) of the regulations.

Service May Require an Alternative Method of Basis Recovery with Respect to Installment Obligations Where Basis Is Inappropriately Deferred

Notice 90-56

The Internal Revenue Service understands that some taxpayers have entered into transactions with respect to which the installment sales rules under section 453(c) of the Internal Revenue Code are being interpreted to permit the creation of artificial gain and a corresponding artificial deferred loss. In this connection, the Service plans to amend the regulations under section 15A.453-1(c)(7) to clarify that the Service may require an alternative method of basis recovery with respect to installment obligations where basis is inappropriately deferred.

The Service will examine these transactions to determine whether they lack economic substance or are entered into for tax avoidance purposes. Depending on the facts and circumstances, it may be determined that (i) the deferred basis treatment of the regulations does not apply; (ii) an accounting method has been used that does not clearly reflect income; or (iii) other aspects of the transaction preclude the tax treatment intended by the parties. In cases in which the transaction occurs in the partnership context, the Service may determine, among other things, that a true partnership has not been formed, that one or more of the purported partners should not be treated as a partner for tax purposes, or that the partnership allocations do not meet the requirements of section 704(b) of the Code.

Separate Line of Business; Notification Requirement

Notice 90-57

The purpose of this notice is to inform plan sponsors that wish to apply the separate line of business rules under section 414(r) of the Code that notification of the Secretary, as provided by Code section 414(r)-(2)(B), is not required until further guidance is issued.

Section 414(r) of the Code provides rules for determining whether an employer operates separate lines of business for purposes of applying sections 129(d)(8) (relating to dependent care assistance programs), 401(a)(26) (relating to additional participation rules) and 410(b) (relating to minimum coverage). Section 414(r)(2) requires that (A) a line of business have at least 50 employees who are not excluded under section 414(q)(8) of the Code, (B) the employer notify the Secretary that the employer intends to treat the line of business as separate, and (C) the line of business satisfies either the safe harbor rule of section 414(r)(3) or the guidelines prescribed by the Secretary, or the employer receives a determination from the Secretary that, even though the line of business does not satisfy the safe harbor rule or the guidelines, the employer is nonetheless permitted to treat the line of business as separate under section 414(r).

Section 204 of the Public Debt Limit Increase (Public Law 101-140, enacted November 8, 1989) provides that for plan years beginning before the Secretary of the Treasury or his delegate issues guidelines and begins issuing determinations under section 414(r)(2)(C), an employer is treated as operating separate lines of business if the employer reasonably determines that it meets the applicable requirements of the Code (other than section 414(r)(2)(C)).

Pursuant to this notice, an employer will not currently be required to notify the Secretary that it intends to treat a line of business as separate under section 414(r) until further guidance is issued. Subsequent guidance, however, may require notification by the employer of its application of the separate line of business rules for periods prior to the issuance of such subsequent guidance.

EFFECTIVE DATE

This notice is effective for plan years beginning after December 31, 1988.

Continuation of Employer Health Coverage For Activated Reservists and Their Families

Notice 90-58

The calling up of military reservists to active duty during the current crisis in the Mideast has prompted a large number of inquiries about continuing health coverage for reservists and their families. This notice addresses the voluntary maintenance of group health plan coverage by employers and the COBRA continuation coverage requirements in section 4980B of the Internal Revenue Code. Group health plans that are subject to those requirements must give certain individuals an opportunity to continue coverage at their own expense.

May an employer voluntarily maintain coverage?

Yes. The Internal Revenue Service is aware that many employers will voluntarily maintain full coverage under their group health plans for reservists and their families, with no increase in employee contributions. These plans will not have to offer the reservists or their family members a COBRA election. In addition, employer contributions for the cost of that coverage will continue to be excludible from the gross income of the reservists under section 106 of the Code.

What if an employer does not voluntarily maintain coverage?

If an employer does not voluntarily maintain coverage for the period contemplated in section 4980B and the group health plan is otherwise subject to the requirements of that section, there is a "qualifying event" for COBRA purposes. In these situations, section 4980B requires that the group health plan offer the reservist and the reservist's spouse and dependent children (if they are covered under the plan) an election to continue coverage at their own expense. Section 4980B and title I of the Employee Retirement Income Security Act of 1974 (ERISA) require that those persons be furnished a notice of their COBRA rights.

Is an employer's COBRA obligation affected by military health coverage?

No. In some cases, section 4980B of the Code allows (but does not require) a cutoff of COBRA continuation coverage when a beneficiary is covered under another group health plan. Questions have thus arisen about whether COBRA continuation coverage can be cut off because a reservist receives health coverage as an active duty member of the uniformed services and a reservist's family member may receive health coverage under CHAMPUS.

"Group health plan" is defined in section 4980B by cross-reference to section 5000(b)(1) of the Code, which defines it in terms of an "employer" and the employer's employees. Section 5000(d), however, provides that for purposes of section 5000, "employer" does not include a Federal or other governmental entity. The military health plans, therefore, are not "group health plans" for purposes of the COBRA cutoff rule in section 4980B.

Accordingly, the Service considers that terminating the COBRA continuation coverage of a reservist or family member on the basis of coverage under the military health plans does not constitute good faith compliance with a reasonable interpretation of the statutory requirements.

Weighted Average Interest Rate Update

Notice 90-59

Notice 88-73 provides guidelines for determining the weighted average interest rate and the resulting permissible range of interest rates used to calculate current liability for the purpose of the full funding limitation of section 412(c)(7) of the Internal Revenue Code as amended by the Omnibus Budget Reconciliation Act of 1987 (OBRA 1987).

The notice also provides that an announcement will be published monthly to provide the weighted average and the permissible range for the plan years beginning each month. The following rates were determined for the plan years beginning each month. The following rates were determined for the plan years beginning in the month shown below.

Month	Year	Weighted Average	Permissible Range
August	1990	8.59	7.73 to 9.45

Administrative Pronouncement

This document serves as an "administrative pronouncement" as that term is described in section 1.6661-3(b)(2) of the Income Tax Regulations and may be relied upon to the same extent as a revenue ruling or revenue procedure.

Contributions in Aid of Construction

Notice 90-60

The purpose of this notice is to amplify and modify section 4, and to amend section 6, of Notice 88-129, 1988-2 C.B. 541. Notice 88-129 provides guidance with respect to certain payments or transfers of property to regulated public utilities ("utilities") by qualifying small power producers and qualifying cogenerators (collectively "Qualifying Facilities"), as defined in section 3 of the Federal Power Act, as amended by section

201 of the Public Utilities Regulatory Policies Act of 1978 ("PURPA").

1. Section 4(A) of Notice 88-129, 1988-2 C.B. 541, states that upon the occurrence of a "disqualification event", a portion of the fair market value of property transferred in a "QF transfer" shall be included in income by the utility as a contribution in aid of construction ("CIAC"). Notice 88-129 refers to Section III of Notice 87-82, 1987-2 C.B. 389, for guidance as to the fair market value of a CIAC. Notice 87-82 states that, absent unusual circumstances, the fair market value of a CIAC is determined under the replacement cost method. The implicit reference in Notice 88-129 to the replacement cost method is hereby amplified to clarify that the condition of property deemed transferred as a CIAC under section 4(A) of Notice 88-129 shall be taken into account in establishing its fair market value. Absent unusual circumstances, the fair market value of used CIAC property will be the depreciated replacement cost, that is, the percentage of the replacement cost which reflects the remaining economic useful life of the property. For example, a trunk line originally cost $100x to install. Ten years later the replacement cost of the line is $150x, and 60% of the useful life remains. The depreciated replacement cost is $90x (60% of $150x).

2. Section 4(B) of Notice 88-129 states that upon the termination of a power purchase contract between a Qualifying Facility and a utility, if the utility obtains or retains ownership (for tax purposes) of property transferred in a QF transfer, the Qualifying Facility will be deemed to have made a transfer to the utility which constitutes a CIAC under section 118(b) as of the first day of such termination. Section 4(B) of Notice 88-129 is hereby modified to read as follows:

(B) *Termination of Power Purchase Contract.* Upon the termination of the power purchase contract between a Qualifying Facility and a utility, if the utility obtains or retains ownership (for tax purposes) of property transferred in a QF transfer, the Qualified Facility will be deemed to have made a transfer to the utility as of the first day of such termination. Such a deemed transfer will not be treated as a CIAC, except where circumstances indicate an intention by the parties to characterize as a QF transfer a transaction that in substance constitutes a CIAC. The utility shall include in income the fair market value of the property deemed transferred less the amount, if any, paid by the utility to obtain or retain ownership of the property for tax purposes. Therefore, if the amount paid by the utility is fair market value, no amount will be includible in income by the utility. The amount paid by the utility shall include any "extension allowance" or similar payment by the utility to the Qualifying Facility during the term of the power purchase contract. For this purpose, an extension allowance is a payment to compensate the Qualifying Facility in consideration of the anticipated use of the property by the utility to deliver power to customers other than the Qualifying Facility.

The fair market value of the property deemed transferred upon termination (except for any deemed transfer treated as a CIAC) shall be determined by taking into account all facts and circumstances, including the age and condition of the property and whether the property is needed to serve the utility's customers. If a utility pays to a Qualifying Facility an amount which is determined upon termination of a power purchase contract to be the fair market value for such property under a procedure or method established or utilized by the relevant utility commission, such fair market value shall be presumed correct in the absence of substantial contrary evidence. For this purpose, a utility commission may take into account any relevant factors, including payments made in connection with the retention of property by a utility upon the termination of a PURPA contract and payments by the utility during the term of the contract (e.g., extension allowances).

These principles are illustrated by the following examples:

Example 1. The QF transfer property is a circuit breaker that was installed as part of the intertie to protect the utility against damage to its system in the event of a generator breakdown at the Qualifying Facility. At termination, the utility does not need the circuit breaker to serve its customers. The fair market value is the salvage value of the circuit breaker (less any cost of removal).

Example 2. Upon termination of a 20 year power purchase contract, a utility retains ownership of a 50 megawatt trunk line which was the subject of a QF transfer at the commencement of the contract. The utility will not use the trunk line other than to supply power to a 10 megawatt customer who has hooked into the trunk line. The fair market value is the economic value to the utility of a 20 year old 10 megawatt line, taking into account any other characteristics or factors which are relevant.

Example 3. Assume the same facts as Example 2, except that upon termination the local public utility commission requires the utility to pay $10x to the Qualifying Facility, which the commission has determined to be the fair market value of the property. In the absence of substantial contrary evidence, the commission's finding will be presumed correct, $10x will be treated as the fair market value for federal income tax purposes, and the utility will not be required to include any amount in income upon termination.

Example 4. A Qualifying Facility transfers a trunk line to a utility in a QF transfer. The trunk line cost the Qualifying Facility $10x to construct. Three years later, a customer of the utility hooks into the trunk line, and the local public utility commission requires the utility to pay to the Qualifying Facility an extension allowance of $5x. The following year, another customer of the utility hooks into the line, and the commission requires another extension allowance of $4x. The commission employs a procedure under which the utility will be required to compensate the Qualifying Facility for the fair market value of property deemed transferred upon termination. When the contract terminates, the commission determines that the utility has, by means of the extension allowances, paid to the Qualifying Facility the fair market value of the property. In the absence of substantial contrary evidence, the commission's finding will be respected and the utility will not be required to include any amount in income upon termination.

Example 5. A Qualifying Facility transfers a trunk line to a utility in a QF transfer. Twenty years later the

contract terminates. The utility commission determines the fair market value of the trunk line to be $10x, but does not require the utility to pay this amount to the Qualifying Facility. No presumption of correctness attaches to the utility commission's findings.

3. In Section 6 of Notice 88-129, the last sentence of the second paragraph is amended by deleting the words "as a CIAC". As amended, the sentence reads as follows: "However, if property which is the subject of a QF transfer is subsequently transferred or deemed transferred to the utility, the utility may be allowed to take depreciation deductions with respect to the property."

EFFECT ON OTHER DOCUMENTS

Notice 88-129, 1988-2 C.B. 541, is amplified and modified.

Reporting By Employee Plans and Exempt Organizations of Certain Amounts of Cash Received in a Trade or Business

Notice 90-61

This notice provides guidance to employee plans and exempt organizations as to their responsibilities under section 6050I of the Internal Revenue Code in reporting certain large amounts of cash received in the course of a trade or business.

Section 6050I of the Code provides generally that any person who is engaged in a trade or business and, that in the course of such trade or business, receives cash in excess of $10,000 in one transaction (or in any two or more related transactions) shall file a return with respect to such transaction as prescribed by the Secretary. Section 1.6050I-1 of the Income Tax Regulations provides implementing rules and requires that Form 8300, *Report of Cash Payments Over $10,000 Received in a Trade or Business*, be completed and returned to the Service for each transaction.

Section 7701(a)(1) of the Code defines "person" to include an individual, a trust, an estate, a partnership, an association, a company, or a corporation. Organizations exempt from federal income tax under section 501(a) of the Code, including employee plans, are persons as defined in section 7701(a) and are subject to the requirement to report cash transactions in the same manner and to the same extent as any other entity treated as a person under the Internal Revenue Code.

"Trade or business" under section 6050I of the Code has the same meaning as it does under section 162 and refers to any activity constituting the sale of goods or the performance of services to produce income. The determination that an activity is not subject to tax under the unrelated trade or business taxable income provisions of sections 511 through 514 of the Code does not control whether the activity constitutes a "trade or business" within the meaning of section 162. Thus, for example, an exempt organization that receives a cash payment in excess of $10,000 for the rental of part of its building must report the transaction on Form 8300 regardless of how the transaction might be viewed in the context of sections 511 through 514 of the Code. However, if, for example, the organization receives a charitable cash contribution in excess of $10,000, it would not be subject to the reporting requirement since the funds were not received in the course of a trade or business.

Weighted Average Interest Rate Update

Notice 90-62

Notice 88-73 provides guidelines for determining the weighted average interest rate and the resulting permissible range of interest rates used to calculate current liability for the purpose of the full funding limitation of section 412(c)(7) of the Internal Revenue Code as amended by the Omnibus Budget Reconciliation Act of 1987 (OBRA 1987).

The notice also provides that an announcement will be published monthly to provide the weighted average and the permissible range for the plan years beginning each month. The following rates were determined for the plan years beginning each month. The following rates were determined for the plan years beginning in the month shown below.

Month	Year	Weighted Average	Permissible Range
September	1990	8.60	7.74 to 9.46

Administrative Pronouncement

This document serves as an "administrative pronouncement" as that term is described in section 1.6661-3(b)(2) of the Income Tax Regulations and may be relied upon to the same extent as a revenue ruling or revenue procedure.

Extension of Rev. Proc. 85-29

Notice 90-63

This notice extends the effective date of Rev. Proc. 85-29, 1985-1 C.B. 581, through plan years beginning on or before December 31, 1991.

Section 412(c)(5) of the Internal Revenue Code, as amended, and section 302(c)(5) of the Employee Retirement Income Security Act of 1974 (ERISA), Pub. L. 93-406, 1974-3 C.B. 1, 40, states that a change in the funding method of a plan is effective only if the change is approved by the Secretary.

Rev. Proc. 85-29 gave approval, subject to certain restrictions and limitations, for changes to any acceptable funding method for plan years beginning on or after January 1, 1984, but not after December 31, 1989. This notice extends Rev. Proc. 85-29 to changes in funding method made with respect to plan years beginning on or after January 1, 1984, but not after December 31, 1991.

Economic Performance; Accrual of Property Taxes

Notice 90-64

This notice provides guidance regarding the economic performance requirement of section 461(h) of the Internal Revenue Code ("Code") and the accrual of property taxes.

Section 461(h) was added to the Code by the Tax Reform Act of 1984 and is effective with respect to amounts incurred (without regard to

section 461(h)) after July 18, 1984. Section 461(h) provides that the all events test with respect to a liability is not met before the economic performance requirement with respect to the liability occurs. On June 7, 1990, the Internal Revenue Service issued proposed regulations under section 461(h). The proposed section 461(h) regulations provide that for taxable years beginning after December 31, 1989, economic performance with respect to taxes occurs when the taxes are paid. The proposed regulations do not, however, provide rules for determining when economic performance occurs with respect to property taxes during the time between the effective date of section 461(h) and the effective date of the proposed regulations.

Before the enactment of section 461(h), the Service issued a number of revenue rulings addressing the accrual of property taxes. *See e.g.*, Rev. Rul. 73-64, 1973-1 C.B. 70; Rev. Rul. 72-409, 1972-2 C.B. 99; Rev. Rul. 71-204, 1971-1 C.B. 71; Rev. Rul. 70-653, 1970-2 C.B. 48. The Service has determined that, for taxable years beginning before January 1, 1990, it will not challenge positions previously taken by taxpayers that relied on earlier published rulings relating to the accrual of property taxes.

Table for Figuring Amount Exempt from Levy on Wages, Salary, and Other Income (Forms 668-W and 668-W(c)) 1991

Notice 90-65

Publication 1494, shown below, includes the amount of an individual's income that is exempt from a notice of levy used to collect delinquent tax in 1991.

(Amounts are for each pay period.)

Filing Status: Single							
Number of Exemptions Claimed on Statement							
Pay Period	1	2	3	4	5	6	More Than 6
Daily	21.35	29.62	37.88	46.15	54.42	62.69	13.08 Plus 8.27 for each exemption
Weekly	106.73	148.08	189.42	230.77	272.12	313.46	65.38 Plus 41.35 for each exemption
Bi-Weekly	213.46	296.15	378.85	461.54	544.23	626.92	130.77 Plus 82.69 for each exemption

2. Table for Figuring Additional Exempt Amount for Taxpayers at least 65 years old and/or Blind

		Additional Exempt Amount				
Filing Status	*	Wkly	Bi-Wkly	Semi-Mo	Monthly	Daily
Single or Head of Household	1	16.35	32.69	35.42	70.83	3.27
	2	32.69	65.38	70.83	141.67	6.54
Any Other Filing Status	1	12.50	25.00	27.08	54.17	2.50
	2	25.00	50.00	54.17	108.33	5.00
	3	37.50	75.00	81.25	162.50	7.50
	4	50.00	100.00	108.33	216.67	10.00

* ADDITIONAL STANDARD DEDUCTION claimed on Parts 3, 4, & 5 of levy

EXAMPLES

This table shows the amount exempt from a levy on wages, salary, and other income. For example:

1. A single taxpayer who is paid weekly and claims three exemptions (including one for the taxpayer) has $189.42 exempt from levy.
2. If the taxpayer in number 1 is over 65 and writes 1 in the ADDITIONAL STANDARD DEDUCTION space on Parts 3, 4, & 5, $205.77 is exempt from this levy ($189.42 plus $16.35).
3. A taxpayer who is married, files jointly, is paid bi-weekly, and claims two exemptions (including one for the taxpayer) has $384.62 exempt from levy.

4. If the taxpayer in number 3 is over 65 and has a spouse who is blind, this taxpayer should write 2 in the ADDITIONAL STANDARD DEDUCTION space on Parts 3, 4, & 5. Then, $434.62 is exempt from this levy ($384.62 plus $50.00).

Section 129 Notice on Fair Market Value

Notice 90-66

Notice 89-111, 1989-2 C.B. 449, provides guidance concerning the reporting requirements for dependent care assistance furnished by an employer to an employee under a qualified dependent care assistance program described in section 129 of the Internal Revenue Code of 1986. Notice 89-111 includes a safe harbor rule for computing the fair market value of in-kind dependent care assistance provided by an employer to an employee. The safe harbor was available only for calendar year 1989. This notice extends the safe harbor rule in Notice 89-111. Therefore, until further guidance is issued, an employer is permitted, but is not required, to use the safe harbor rule set forth in Notice 89-111 for years following 1989. In 1989, dependent care assistance was reported in Box 16 of Form W-2, Wage and Tax Statement. Beginning in 1990, dependant care assistance will be reported in Box 15 of Form W-2, Wage and Tax Statement. Other provisions of Notice 89-111 continue in effect without modification.

Domestic Asset/Liability Percentage and Domestic Investment Yield

Notice 90-67

I. INTRODUCTION.

This Notice provides the domestic asset/liability percentages and domestic investment yields needed by foreign life insurance companies and foreign property and liability insurance companies to compute their minimum effectively connected net investment income under section 842(b) of the Internal Revenue Code for taxable years beginning after December 31, 1989. Instructions are provided for computing foreign insurance companies' liabilities for the estimated tax and installment payments of estimated tax for taxable years beginning after December 31, 1989. For more specific guidance regarding the computation of the amount of net investment income to be included by a foreign insurance company on its U.S. income tax return, see Notice 89-96, 1989-2 C.B. 417.

II. DOMESTIC ASSET/LIABILITY PERCENTAGES FOR 1990.

The Secretary determines the domestic asset/liability percentage separately for life insurance companies and property and liability insurance companies. For the first taxable year beginning after December 31, 1989, the relevant domestic asset/liability percentages are:

116.5 percent for foreign life insurance companies, and 152.5 percent for foreign property and liability insurance companies.

III. DOMESTIC INVESTMENT YIELDS FOR 1990.

The Secretary is required to prescribe separate domestic investment yields for foreign life insurance companies and for foreign property and liability insurance companies. For the first taxable year beginning after December 31, 1989, the relevant domestic investment yields are:

8.8 percent for foreign life insurance companies, and 6.7 percent for foreign property and liability insurance companies.

IV. ESTIMATED TAXES.

To compute estimated tax and the installment payments of estimated tax due for taxable years beginning after December 31, 1989, a foreign insurance company must compute its estimated tax payments by adding to its income other than net investment income the greater of (i) its net investment income, as determined under section 842(b)(5), that is actually effectively connected with the conduct of a trade or business within the United States for the relevant period, or (ii) the minimum effectively connected net investment income under section 842(b) that would result from using the most recently available domestic asset/liability percentage and domestic investment yield. Thus, for installment payments due after the release of this Notice, the domestic asset/liability percentages and the domestic investment yields provided in this Notice must be used to compute the minimum effectively connected net investment income. However, if the due date of an installment is less than 20 days after the date this Notice is published in the Internal Revenue Bulletin, the asset/liability percentages and domestic investment yields provided in Notice 90-13 may be used to compute the minimum effectively connected net investment income for such installment. For further guidance in computing estimated tax, see Notice 89-96.

List of Countries Requiring Cooperation With an International Boycott

Notice 90-68

In order to comply with the mandate of section 999(a)(3) of the Internal Revenue Code of 1986, the Department of the Treasury is publishing a current list of countries which may require participation in, or cooperation with, international boycott (within the meaning of section 999(b)(3) of the Internal Revenue Code of 1986). The list reflects the recent union of the Arab Republic of Yemen and the Peoples Democratic Republic of Yemen, the new state being named the Republic of Yemen.

On the basis of the best information currently available to the Department of the Treasury, the following countries may require participation in, or cooperation with, an international boycott (within the meaning of section 999(b)(3) of the Internal Revenue Code of 1986).

Bahrain
Iraq
Jordan
Kuwait
Lebanon
Libya
Oman
Qatar
Saudi Arabia
Syria
United Arab Emirates
Yemen, Republic of

Dated: October 1, 1990.

Kenneth W. Gideon,
Assistant Secretary for Tax Policy.

(Filed by the Office of the Federal Register on October 11, 1990, 8:45 a.m., and published in the issue of the Federal Register for October 12, 1990, 55 F.R. 41635)

Applicable Rate of Interest on Nonqualified Withdrawals from a Capital Construction Fund

Notice 90-69

Under the authority in section 607(h)(4)(B) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1177(h)(4)(B)), we hereby determine and announce that the applicable rate of interest on the amount of additional tax attributable to any nonqualified withdrawals from a Capital Construction Fund established under section 607 of the Act shall be 9.28 percent, with respect to nonqualified withdrawals made in the taxable year beginning in 1990.

The determination of the applicable rate of interest with respect to nonqualified withdrawals was computed, according to the joint regulations issued under the Act (46 CFR 391.7(e)(2)(ii)), by multiplying eight percent by the ratio which (a) the average yield on 5-year Treasury securities for the calendar year immediately preceding the beginning of such taxable year bears to (b) the average yield on 5-year Treasury securities for the calendar year 1970. The applicable rate so determined was computed to the nearest one-hundredth of one percent.

Dated: September 27, 1990.

Warren G. Leback,
Maritime Administrator.

Jennifer Joy Wilson,
Acting Administrator, National Oceanic and Atmospheric Administration.

Kenneth W. Gideon,
Assistant Secretary for Tax Policy.

So ordered by Maritime Administrator, Maritime Administration.
Administrator, National Oceanic and Atmospheric Administration.
Assistant Secretary for Tax Policy, Department of the Treasury.

James E. Saari,
Secretary, Maritime Subsidy Board, Maritime Administration.

(Filed by the Office of the Federal Register on October 2, 1990, 8:45 a.m., and published in the issue of the Federal Register for October 3, 1990, 55 F.R. 40505)

Information Reporting on Home Mortgage Financing—Points and Federally-Subsidized Indebtedness

Notice 90-70

I. INTRODUCTION AND PURPOSE

This Notice informs persons who participate in home mortgage financing of two new information reporting requirements under the Internal Revenue Code that will become effective January 1, 1991.

First, under section 6050H(b)(2)(C) of the Internal Revenue Code, persons required to file a return of information (Form 1098, Mortgage Interest Statement) to report mortgage interest (mortgage interest recipients), must report certain points on financing provided after December 31, 1990, as set forth in this Notice.

Second, under the authority contained in section 143(m)(8)(D) of the Code issuers of qualified mortgage bonds (within the meaning of section 143(a) of the Code) will be required to report to the Internal Revenue Service the name, address and social security number of those persons who receive federally-subsidized financing (after December 31, 1990) through the issuance of the bond. This will facilitate the Service's enforcement of the recapture rules of section 143(m) of the Code (as amended by the Revenue Reconciliation Act of 1990 ("RRA 1990")).

The purpose of this Notice is to inform affected persons of the information they will be required to collect when these new reporting requirements become effective. Because this Notice is limited to guidance on the collection of prescribed information, the Service will issue additional comprehensive guidance (including forms and instructions) on these new reporting requirements. The additional guidance will be issued in time for affected persons to meet their reporting obligations.

II. POINTS REPORTING ON FORM 1098

Background

As the result of amendments contained in recent tax legislation, section 6050H(b)(2)(C) of the Code provides for the reporting of "points" on the return of information required under section 6050H, effective for returns of information the due date for which (without regard to extensions) is after December 31, 1991. Because the return of information under section 6050H of the Code generally includes information regarding the entire preceding calendar year, the first return of information required to be filed after December 31, 1991, will generally report points on financings provided after December 31, 1990.

These new rules are equally effective for the statement of information that must be furnished to the individual payer (hereinafter "mortgagor") of the points. Persons affected by this Notice should note that all rules referring to the return of information that is filed with the Service also apply to the statement of information furnished to the mortgagor. The return of information requirement is currently met by the timely, accurate filing of Form 1098, which will be modified for 1991 for this new reporting requirement. It is anticipated that the form will contain a new box for reporting points titled "Points paid directly by payer(s)/borrower(s) on purchase of principal residence." The Service expects the modified Form 1098 to be available in early January 1991.

Reporting requirements

Although other amounts may be charged, only the amounts that meet ALL the following criteria are to be reported by mortgage interest recipients as reportable points for purposes of section 6050H(b)(2)(C) of the Code:

A. The amounts are charged for the use or forbearance of money, and not for services;

B. The amounts conform to an established business practice of charging points in the area in which the loan is issued and do not exceed the amount generally charged in the area;

C. The amounts are for mortgage loan proceeds provided for and applied to closings occurring after December 31, 1990;

D. The amounts are paid directly by the mortgagor. An amount is so paid if the mortgagor provides funds (including down payments, escrow deposits, earnest money applied at the closing and funds actually paid over at closing) at least equal to the amount of points required for application at the closing. In view of standard commercial lending practices, for purposes of this reporting requirement an amount charged to the mortgagor as points with respect to the acquisition of a principal residence will be treated as paid directly by the mortgagor. (The determination of whether points are paid directly in transactions other than the acquisition of a principal residence (e.g., home improvements) must be based upon the actual facts of the transaction.)

E. The amounts are for the purchase of the mortgagor's principal residence and the mortgage loan is secured by such residence. The mortgage interest recipient may rely on a signed written statement of the mortgagor that states whether the proceeds of the loan are for the purchase of the mortgagor's principal residence

The reporting, for example, will not include the following amounts: (1) points paid for loans that will be used for the improvement of a principal residence; (2) points paid for loans to purchase or improve a second or vacation property, investment property, or trade or business property; (3) points paid on a refinancing, a home equity loan or for a line of credit secured by a principal residence; (4) points paid in excess of the amount generally charged in the area (e.g. the payment of excess points to "buy down" the cost of money); and (5) points paid on financing provided for closings occurring prior to January 1, 1991.

Income tax treatment of lender

The information required to be reported under this Notice is collected and reported for purposes of verifying deductions claimed by mortgagors. This information is not collected for purposes of determining the appropriate reporting of income by mortgage interest recipients. Thus, reporting is required with respect to the amounts that meet the criteria set forth above, irrespective of the mortgage interest recipient's method and timing of accounting for such points as income for federal income tax purposes.

III. REPORTING THE PRESENCE OF FEDERALLY-SUBSIDIZED INDEBTEDNESS

Background

If a taxpayer disposes of an interest in a residence, with respect to which there was federally-subsidized indebtedness (for which the taxpayer was liable in whole or in part) that was provided after December 31, 1990, section 143(m) of the Code provides (subject to specified exceptions) for the recapture of a portion of the subsidy. Rules for the determination of the recapture amount are found under section 143(m), as amended by RRA 1990. In addition, sections 6045(a) and 6045(e)(4) of the Code give the Service the authority to require reporting by those responsible for reporting real estate transactions to facilitate the Service's enforcement of the recapture rules of section 143(m) of the Code. Under section 143(m)(7) there is a separate reporting requirement.

The Service has determined that the recapture rules of section 143(m) of the Code can be most effectively enforced, with the minimum overall reporting, recordkeeping and processing burden, if the issuer of federally-subsidized indebtedness reports the information. In addition, because of exceptions contained in the regulations implementing section 6045(e) of the Code, certain transactions subject to recapture under section 143(m) are not currently subject to information reporting under section 6045(e). For those exempted transactions, it is necessary that the Service receive information on the presence of federally-subsidized indebtedness prior to the disposition of the taxpayer's residence.

However, in the case of a mortgage credit certificate, the mortgage lender is currently required to report (on Form 8329, Lender's Information Return for Mortgage Credit Certificates (MCCs)) sufficient information, for purposes of the Service's enforcement of the recapture rules of section 143(m) of the Code. Therefore, the requirements of this Notice are limited to issuers of qualified mortgage bonds.

Accordingly, the purpose of this portion of this Notice is to advise issuers of qualified mortgage bonds of the information they must collect to comply with this new reporting requirement. More comprehensive guidance (including guidance on the information that the issuer must furnish under section 143(m)(7) of the Code) will be issued by the Service on these new reporting requirements.

Authority

The reporting requirements contained in this portion of this Notice are imposed by the Service under the authority contained in section 143(m)(8)(D) of the Code.

Reporting requirements

Issuers of qualified mortgage bonds must, with respect to financing provided after December 31, 1990, directly or indirectly through the issuance of qualified mortgage bonds, report the name, address (of the residence purchased with the subsidized financing) and social security number (SSN) of taxpayers receiving such financing, in accordance with the form to be developed and its instructions. The SSN may be solicited and collected by the use of Form W-9 and must be solicited and collected by the issuer at or before the time the financing is provided. The issuer may rely on the mortgage lender's solicitation and collection of the mortgagor's SSN. However, the issuer is ultimately responsible for the timely, accurate filing of the information return.

Reserve reporting under section 6045(e)(4)

The Service will reserve, until otherwise provided in regulations or

forms and instructions, its authority under sections 6045(a) and 6045(e)(4) of the Code to require the real estate reporting person to report with respect to the presence of federally-subsidized indebtedness. Any such reporting requirements will not be effective for financing provided (or certificates issued) prior to the issuance of those requirements.

Weighted Average Interest Rate Updated

Notice 90-71

Notice 88-73 provides guidelines for determining the weighted average interest rate and the resulting permissible range of interest rates used to calculate current liability for the purpose of the full funding limitation of section 412(c)(7) of the Internal Revenue Code as amended by the Omnibus Budget Reconciliation Act of 1987 (OBRA 1987).

The notice also provides that an announcement will be published monthly to provide the weighted average and the permissible range for the plan years beginning each month. The following rates were determined for the plan years beginning each month. The following rates were determined for the plan years beginning in the month shown below.

Month	Year	Weighted Average	Permissible Range
October	1990	8.61	7.75 to 9.48

Certain Payments Received by Retired Insurance Agents

Notice 90-72

This notice is to advise current and former self-employed insurance salespersons and agents about the treatment under the Self-Employment Contributions Act (SECA) of certain payments received by those individuals from an insurance company after retirement from that company. The payments in question are (a) amounts paid to the individual after retirement, but calculated as a percentage of commissions received by the individual from the paying company prior to retirement, (b) renewal commissions, and (c) deferred commissions paid after the individual's retirement for sales made prior to the individual's retirement.

These payments are subject to tax under SECA. They are derived from the individuals' service as agents or salespersons. Under current law, no provision excludes these payments from taxation under SECA. The names or characterizations given these payments by a recipient or payor will not affect their taxation under SECA.

Because the payments are subject to SECA taxes in the year received, they may be used in computing benefits payable under Social Security. However, if the payments are attributable to sales activities that occurred prior to the initial month of entitlement to Social Security benefits, they generally will not cause a reduction in Social Security benefits under the Social Security earnings test. This is so, provided after the initial month of entitlement to Social Security benefits, the individual performs no services on the policies on which such payments are based.

Extension of Section 401(b) Remedial Amendment Period and Section 403(b) Safe Harbors

Notice 90-73

I. PURPOSE

This notice extends the period for amending plans qualified under section 401(a) or 403(a) of the Internal Revenue Code, extends certain safe harbors available to section 403(b) annuities, modifies the relief provided in Notice 88-131, 1988-2 C.B. 546, Notice 89-92, 1989-2 C.B. 410, and Rev. Proc. 89-65, 1989-2 C.B. 786, and addresses the application process for amended plans.

II. SUMMARY

This notice addresses the following areas related to the extension of the remedial amendment period and the dates for compliance with certain requirements.

1. Extension of Remedial Amendment Period

The expiration date of the remedial amendment period under section 401(b) of the Code for certain disqualifying provisions is extended until the end of the first plan year beginning after December 31, 1991. Although this extension enables the continued suspension of benefit accruals under Model Amendment 2 (Model 2) or Model Amendment 3 (Model 3) of Notice 88-131, if certain conditions are met, as noted below the relief provided under Alternative II D of Notice 88-131 for benefits accrued after the effective dates of certain qualification requirements will not continue into the 1992 plan year.

2. Section 403(b)(12) Compliance

The safe harbors under section 403(b)(12) of the Code provided in Notice 89-23, 1989-1 C.B. 654, which were scheduled to expire at the end of 1990, are extended until further guidance is issued under section 403(b)(12). Thus, employers may rely on a reasonable, good faith interpretation of section 403(b)(12) and/or the transitional safe harbors until further guidance is issued concerning these nondiscrimination rules.

3. Alternative II D

The availability of the relief provided by Alternative II D of Notice 88-131 is no longer connected to the remedial amendment period, but will end with the 1991 plan year. Thus, benefit accruals in the 1992 plan year must meet the requirements of section 401(a)(4) of the Code.

4. Notice to Participants

Plan sponsors are reminded that the suspension of benefit accruals for all participants under Model 3 beyond the last day of the 1990 plan year is conditioned upon providing the notice described in section 204(h) of the Employee Retirement Income Security Act of 1974 (ERISA) no later than the last day of the 1990 plan year. Suspension of benefit accruals for highly compensated employees beyond the last day of the 1991 plan year is also conditioned upon providing the notice described in section 204(h).

5. Applications for Approval of Plan Amendments

The deadline for submission of applications for sponsors of master and prototype plans that seek continued reliance on a prior opinion letter, and sponsors of master and prototype plans and regional prototype plans that seek extended reliance on a new letter, is extended to March 31, 1991. The Service anticipates that it will begin accepting applications for determination letters with respect to additional categories of plans, including defined benefit plans, early in 1991.

III. EXTENSION OF THE SECTION 401(b) REMEDIAL AMENDMENT PERIOD

A. BACKGROUND

Section 1.401(b)-1 of the Income Tax Regulations provides that a plan that fails to satisfy the requirements of section 401(a) solely as a result of a disqualifying provision defined under section 1.401(b)-1(b)(2)(ii) need not be amended to comply with those requirements until the later of the due date for filing the employer's tax return for the 1989 tax year (including extensions) or the last day of the 1989 plan year, or, in the case of a plan maintained by more than one employer, the last day of the tenth month following the end of the 1989 plan year. A disqualifying provision is defined in section 1.401(b)-1(b)(2)(ii) as a plan provision (or the absence of a plan provision) that causes a plan to fail to satisfy the qualification requirements of the Code because of changes made by the Tax Reform Act of 1986, Pub. L. No. 99-514, 1986-3 (Vol. 1) C.B. 1 (TRA '86), the Omnibus Budget Reconciliation Act of 1986, Pub. L. No. 99-509 (OBRA '86), and the Omnibus Budget Reconciliation Act of 1987, Pub. L. No. 100-203, 1987-3 C.B. 1 (OBRA '87), that are effective before the first day of the first plan year beginning after December 31, 1989; a plan provision that is not required, but is integral to a qualification requirement changed by TRA '86, OBRA '86, OBRA '87; or a plan provision that fails to satisfy any requirement that is treated, directly or indirectly, by the Service as if section 1140 of TRA '86 applied to it (hereinafter collectively referred to as the "Tax Reform requirements").

Section 1.401(b)-1(b)(2)(iii) of the regulations also defines as a disqualifying provision any plan provision (or the absence of any plan provision) that results in the failure of the plan to satisfy the qualification requirements of the Code by reason of a change in those requirements made by amendments to the Code that are designated by the Commissioner, at his discretion, as disqualifying provisions described in section 1.401(b)-1(b)(2).

Rev. Proc. 89-65 extended the section 401(b) remedial amendment period for disqualifying provisions described in section 1.401(b)-1(b)(2)(ii) until the last day of the first plan year beginning on or after January 1, 1991 and added to the definition of such disqualifying provisions changes in the qualification requirements of the Code made by the Technical and Miscellaneous Revenue Act of 1988, Pub. L. No. 100-647, 1988-3 C.B. 1 (TAMRA), and those provisions that became effective on or after January 1, 1990, with respect to collectively bargained plans. Rev. Proc. 89-65 also extended the expiration date of the remedial amendment period for plans adopted or amended after December 31, 1987.

Section 1.401(b)-1(e) of the regulations grants the Commissioner the discretion to extend the section 401(b) remedial amendment period.

B. EXTENSION OF REMEDIAL AMENDMENT PERIOD

Pursuant to the grant of authority in 1.401(b)-1(e) of the regulations, the remedial amendment period is extended for disqualifying provisions described in section 1.401(b)-1(b)(2)(ii) to the last day of the first plan year beginning after December 31, 1991. The remedial amendment period is also extended until the last day of the first plan year beginning after December 31, 1991, for new plans adopted or existing plans amended after December 31, 1987, that fail to satisfy the qualification requirements of sections 401(a) or 403(a) as of the date the plan or amendment is adopted or effective (whichever is earlier).

In addition, pursuant to the authority of section 1.401(b)-1(b)(2)(iii), this notice provides that the definition of disqualifying provision under section 1.401(b)-1(b)(2)(ii) includes a plan provision (or the absence of a plan provision) that causes a plan to fail to satisfy the qualifica-tion requirements of the Code because of changes made in such requirements by the Omnibus Budget Reconciliation Act of 1989, Pub. L. No. 101-239, 1990-1 C.B. 210 (OBRA '89), or a plan provision that is not required, but is integral to a qualification requirement changed by OBRA '89. Thus, plans that do not satisfy the requirements of section 401(a) or 403(a) because of such a disqualifying provision may also be retroactively amended to meet such requirements at any time up to and including the last day of the 1992 plan year.

In order to be eligible for the extended remedial amendment period, a plan must continue to meet the requirements of section 1140 of TRA '86. Thus, with respect to requirements subject to section 1140, the plan sponsor must continue to operate the plan in compliance with such requirements from the applicable effective dates with respect to the plan. In the case of changed plan provisions that are not required but are integral to a qualification requirement changed by TRA '86, OBRA '86, OBRA '87, TAMRA, or OBRA '89, or any requirement which is treated, directly or indirectly, by the Service as if section 1140 applied to it, the plan will be eligible for the extended remedial amendment period only if the plan is operated in accordance with such changed provisions from the effective date of such changes under the plan. In addition, the plan sponsor must amend the plan for all Tax Reform requirements (including those effective after the 1988 plan year) retroactively to the date the applicable requirements become effective.

IV. EXTENSION OF SAFE HARBORS UNDER SECTION 403(b)(12)

Section 1120 of TRA '86 enacted section 403(b)(12) of the Code, which requires that annuities under section 403(b) be purchased under a nondiscriminatory plan. Notice 89-23 provides that, until further guidance, the Service will deem a section 403(b) annuity plan to comply with section

403(b)(12) if the employer administers it in accordance with a reasonable good faith interpretation of section 403(b)(12). The notice also provides certain safe harbors under which the Service will consider an employer to be operating a section 403(b) annuity plan in accordance with a reasonable, good faith interpretation.

Notice 89-23 makes the safe harbors applicable only to plan years beginning in calendar years 1989 and 1990, even though taxpayers may generally rely on Notice 89-23 until further guidance is published. This limitation is modified to permit reliance on the safe harbors until further guidance provides otherwise.

V. ALTERNATIVE II D DISCONTINUATION, AND ERISA 204(h) NOTICE

A. BACKGROUND

On December 13, 1988, the Service issued Notice 88-131, which provides relief from certain requirements of section 411(d)(6) of the Code to sponsors of qualified pension, profit-sharing and stock bonus plans under section 401(a) and annuity plans under section 403(a). Section 411(d)(6) provides, in general, that a plan amendment (other than an amendment described in section 412(c)(8)) may not decrease a participant's accrued benefit determined as of the later of the date of adoption or the effective date of the amendment. Although section 1140 of TRA '86 and section 401(b) permit an extended period of time for amending plans to comply with the Tax Reform requirements, neither section provides an exception to section 411(d)(6), with respect to plan amendments made to comply with the Tax Reform requirements after benefits accrue during the 1989, 1990, and 1991 plan years.

Plan sponsors may take advantage of the relief offered in Notice 88-131 by adopting one or more of the model amendments described in the Notice and/or following the requirements of an alternative (Alternative II D) set forth in the Notice. The options described in Notice 88-131 provide plan sponsors with additional time in which to make decisions about plan changes that might be necessary or desirable as a result of amendments to the qualification requirements.

Under Alternative II D of Notice 88-131, if a plan satisfied the requirements for qualification immediately before the 1989 plan year, benefit accruals under that plan arising on or after the first day of the first plan year beginning in 1989 under those prior plan provisions will not cause the plan to fail to meet the requirements of sections 401(a)(4) or 401(a)(26) of the Code for the 1989 plan year provided certain requirements are satisfied.

B. RELIANCE ON ALTERNATIVE II D

Notice 89-92 extended the use of Alternative II D through the end of the section 401(b) remedial amendment period. Pursuant to that extension and the extension of the remedial amendment period in Rev. Proc. 89-65, Alternative II D relief is available to plan sponsors until the end of the 1991 plan year. Pursuant to Section III of this notice, the remedial amendment period for Tax Reform requirements is now extended to the end of the 1992 plan year. Notwithstanding the extension of the remedial amendment period, however, plan sponsors may not rely on the relief provided by Alternative II D for benefit accruals after the 1991 plan year. Accordingly, the period for reliance on Alternative II D is severed from the remedial amendment period, and Notice 89-92 is so modified.

Thus, although a plan's provisions before its amendment for Tax Reform requirements might not otherwise meet the requirements of section 401(a)(4), those provisions will continue to produce benefit accruals for all participants, including highly compensated employees, until the plan is amended, retroactive to the 1989 plan year, for the Tax Reform requirements. Furthermore, although the pre-amendment benefit accruals are protected, the level of those pre-amendment benefit accruals for highly compensated employees will not obligate the plan sponsor to increase benefits for nonhighly compensated employees for plan years 1989, 1990 and 1991 under the amended plan, to levels that are nondiscriminatory relative to the pre-amendment accruals. Benefits that accrue in the 1992 plan year, however, must be nondiscriminatory.

Plan sponsors have three alternatives for the 1992 plan year. First, without further action, if a highly compensated employee accrues a benefit during the 1992 plan year under plan provisions before they are amended pursuant to the remedial amendment period described above to comply with the Tax Reform requirements, the plan, as amended, must provide benefit accruals in the 1992 plan year for any nonhighly compensated participants that are sufficient to insure that the benefit accrued in the 1992 plan year by any highly compensated employee is nondiscriminatory. Second, before the first day of the 1992 plan year, the plan sponsor can adopt Model 2 or Model 3 prospectively suspending benefit accruals in the 1992 plan year. As explained below, suspension of benefits in the 1992 plan year will require the notice necessitated by section 204(h) of ERISA. Third, the plan sponsor can amend the plan to comply with the Tax Reform requirements before benefits accrue in the 1992 plan year.

C. ERISA 204(h) NOTICE

In general, section 204(h) of ERISA requires that advance notice be given if a defined benefit plan or an individual account plan that is subject to section 302 of ERISA is amended to provide for a significant reduction in the rate of future benefit accruals. Plan sponsors that either intend to adopt Model 3 or have adopted and are operating under Model 3 are reminded that Rev. Proc. 89-65 provided that the suspension of benefit accruals for all plan participants under Model 3 beyond the last day of the 1990 plan year and until the last day of the remedial amendment period is effective only if the notice described in section 204(h) of ERISA is provided to all participants by the later of the last day of the 1990 plan year or 15 days before Model 3 is effective.

Furthermore, plan sponsors that either intend to adopt Model 2 or have adopted and are operating under Model 2 may suspend benefit accruals for all highly compensated employees under Model 2 beyond the last day of the 1991 plan year and until the end of the remedial amendment period only if the section 204(h) notice is provided to all highly compensated

employees participating in the plan no later than 15 days before the first day of the 1992 plan year. A plan sponsor that suspends benefit accruals after the 1990 plan year in the case of Model 3, or after the 1991 plan year in the case of Model 2, and who provides the 204(h) notice by the time prescribed above for the applicable participants will be deemed to have satisfied the requirements of section 204(h) with respect to prior benefit suspensions under Model 2 or Model 3.

VI. DEADLINE FOR SUBMISSION OF MASTER OR PROTOTYPE AND REGIONAL PROTOTYPE PLANS AND PLANS FOR FURTHER OPENING THE DETERMINATION LETTER PROGRAM

The deadline for submission of applications for master or prototype and regional prototype plans to the Internal Revenue Service by mass submitters, sponsors, and sponsoring organizations of master and prototype plans that seek continued reliance on a prior opinion letter and sponsors of master and prototype plans and regional prototype plans that seek extended reliance on a new letter is extended to March 31, 1991. See Rev. Proc. 89-9, 1989-1 C.B. 780, with respect to master or prototype plans and Rev. Proc. 89-13, 1989-1 C.B. 801, with respect to regional prototype plans; see also Announcement 90-89, 1990-31 I.R.B. 60, July 30, 1990. The guidance necessary for submission of master or prototype and regional prototype plans is now available, and the Service does not anticipate changes in the applicable guidance that would affect plan design or require plan sponsors to reapply for opinion or notification letters for plans approved under TRA '86. Sponsors should note that Lists of Required Modifications (LRMs), which the Service uses in reviewing master and prototype or regional prototype plans, have recently been revised and are an aid to sponsors who are drafting or amending plans.

In the first quarter of 1991, the Service plans to open the determination letter program for additional categories of plans that have been amended for the Tax Reform requirements. The Service anticipates that the additional categories will include many defined benefit plans and adopters of master or prototype or regional prototype plans.

VII. EFFECT ON OTHER DOCUMENTS

Rev. Proc. 89-65 and Notices 88-131, 89-23 and 89-92 are modified.

Family Support Act Notice

Notice 90-74

PURPOSE

This notice provides guidance to employers concerning the withholding and reporting requirements regarding employee business expense reimbursements and allowances.

BACKGROUND

Temporary and proposed regulations regarding employee business expense reimbursements and allowances were published in the Federal Register on December 12, 1989, and in the Cumulative Bulletin (see T.D. 8276, 1990-1 C.B. 14). Final regulations are being issued contemporaneously with this notice. Under the regulations, the withholding rules are effective for payments made under reimbursement or other expense allowance arrangements that are received by an employee on or after July 1, 1990, with respect to expenses paid or incurred on or after July 1, 1990. The reporting rules are effective for payments made under reimbursement or other expense allowance arrangements that are received by an employee on or after January 1, 1989, with respect to expense paid or incurred on or after January 1, 1989. However, a transition rule is provided under the reporting rules for payments made prior to July 1, 1990. To bring their arrangements into compliance with the regulations, some employers have had to make significant modifications in their payroll and accounting procedures. This notice provides guidance regarding the imposition of penalties for failure to comply with these withholding and reporting requirements on employers who have made a substantial and good faith effort to comply with the requirements.

IMPOSITION OF PENALTIES

Where an employer has made a substantial and good faith effort to comply with the regulations regarding withholding and reporting on employee business expense reimbursements and allowances, the Service will not impose penalties for failure to pay and failure to make timely deposits of employment taxes with respect to, and for failure to report, payments made under reimbursement or other expense allowance arrangements before July 1, 1991.

Weighted Average Interest Rate Update

Notice 90-75

Notice 88-73 provides guidelines for determining the weighted average interest rate and the resulting permissible range of interest rates used to calculate current liability for the purpose of the full funding limitation of section 412(c)(7) of the Internal Revenue Code as amended by the Omnibus Budget Reconciliation Act of 1987 (OBRA 1987).

The notice also provides that an announcement will be published monthly to provide the weighted average and the permissible range for the plan years beginning each month. The following rates were determined for the plan years beginning each month. The following rates were determined for the plan years beginning in the month shown below.

Month	Year	Weighted Average	Permissible Range
November	1990	8.63	7.76 to 9.49

Administrative Pronouncement

This document serves as an "administrative pronouncement" as that term is described in section 1.6661-3(b)(2) of the Income Tax Regulations and may be relied upon to the same extent as a revenue ruling or revenue procedure.

---

26 CFR 601.204: Changes in accounting periods and in methods of accounting.
(Also Part I, Sections 162, 167, 263, 446, 481, 805, 811; 1.162-1, 1.167(a)-1, 1.263(a)-1, 1.446-1, 1.481-1, 1.817-4(d).)

Rev. Proc. 90-36

SECTION 1. PURPOSE

This revenue procedure provides an administrative procedure whereby certain life insurance companies may expeditiously obtain the consent of the Commissioner to change their method of accounting for ceding commissions to comply with the principles of Rev. Rul. 82-69, 1982-1 C.B. 102, and the Supreme Court decision in *Colonial American Life Insurance Co. v. Commissioner,* 109 S. Ct. 2408 (June 15, 1989), 1989-2 C.B. 110. A taxpayer that complies with this revenue procedure will be treated as having obtained the consent of the Commissioner to change its accounting method.

SEC. 2. BACKGROUND

.01 Rev. Rul. 82-69 concerns a reinsuring life insurance company that paid ceding commissions under an indemnity reinsurance agreement. In an indemnity reinsurance agreement, the primary insurer remains directly liable to the policyholders and continues to collect premiums and pay claims. The indemnity reinsurer assumes no direct liability to the policyholders, but agrees to reimburse the primary or direct insurer for a specified percentage of claims and expenses associated with the reinsured risks. In return, the reinsurer receives a specified percentage of the income generated from the policies. In Rev. Rul. 82-69, the taxpayer paid ceding commissions to the direct insurer as consideration for the reinsurance of an existing block of life insurance policies. The stated purpose of these "up-front" ceding commissions was to reimburse the direct insurer for previously incurred expenses associated with selling and maintaining the reinsured policies. The ruling requires the ceding commissions to be treated as the cost of an asset with a useful life extending beyond the close of the tax year, and therefore amortized over the period covered by the agreement.

In the *Colonial American* case, the Supreme Court addressed the tax treatment of ceding commissions paid by a reinsuring life insurance company to a direct insurer under indemnity reinsurance contracts to reinsure blocks of life insurance policies. The case holds that, for purposes of the Internal Revenue Code, ceding commissions are capital expenditures that must be amortized over the anticipated life of the asset (here the reinsurance agreement), and are not current expenses that may be deducted in the year paid or incurred. The Court concluded that ceding commissions represent payments to acquire an asset (the future stream of income from the reinsured policies) with a life extending beyond the tax year. As a result, the ceding commissions must be treated like commissions involved in assumption reinsurance, which must be treated as a deferred expense and amortized over the reasonably estimated life of the policies. *Cf.* section 1.817-4(d) of the Income Tax Regulations.

Rev. Rul. 82-69 also provides for the current deductibility of an "annual ceding commission" paid by the reinsurer to reimburse the ceding company for the reinsurer's share of the current expenses in administering the policies. Consequently, if a taxpayer enters into an indemnity reinsurance contract that provides for the payment of an annual ceding commission to reimburse the direct insurer for the taxpayer's proportionate share of the current expenses involved in administering and servicing the reinsured policies, those ceding commissions may be deducted in the year paid or incurred.

If an up-front ceding commission is paid by the taxpayer to acquire an indemnity reinsurance agreement, but all or a portion of the assumed business is retroceded to third parties, the taxpayer is required to amortize only the portion of the ceding commission that is proportionate to the retained business. Thus, the portion of the ceding commission that is attributable to the retroceded portion of the business may be deducted in the year of the retrocession.

.02 Under the principles of Rev. Rul. 82-69 and the *Colonial American* decision, if an indemnity reinsurance agreement provides for the reinsurance of a block of policies with an income producing life extending beyond the tax year, the reinsurer must treat the up-front ceding commission paid for this asset like the ceding commissions involved in assumption reinsurance, which must be capitalized. The principles of section 1.817-4(d)(2) of the regulations (relating to assumption reinsurance transactions) are relevant in determining the amount of the up-front ceding commission that is subject to amortization. Thus, for transactions occurring during tax years beginning after December 31, 1983, the amount of the up-front ceding commission paid by the reinsurer is equal to the excess of the increase in the reinsurer's tax reserve liabilities resulting from the transaction (computed in accordance with section 807 of the Code) over the value of the net assets received. Unlike assumption reinsurance, however, the up-front ceding commission must be amortized over a period reflecting the life of the reinsurance agreement rather than the reasonably estimated life of the reinsured policies.

The establishment of the life of the reinsurance agreement requires a factual determination. If the reinsurance agreement has (either explicitly or implicitly) a determinate life, then that life should be used for amortization purposes. For example, if a reinsurance agreement is written for an indefinite period but contains terms that demonstrate that the agreement has a limited life (such as a provision granting the direct insurer a recapture right after a specified period), this life is used for amortization purposes. If the reinsurance agreement has an indeterminate life, the reasonably estimated life of the underlying policies should be used. See section 1.817-4(d)(2)(iv) of the regulations with respect to the factors that may be considered in determining the reasonably estimated life of the reinsured policies.

The taxpayer may use the straight-line method for purposes of determining a reasonable allowance for amortization. The taxpayer may also use any amortization method that results in an allowance for amortization that is consistent with the anticipated income stream. For this purpose, both future premiums and investment earnings must be taken into account in determining the anticipated income

stream from the reinsured policies. The annual allowance for amortization must be calculated from the effective date of the reinsurance agreement.

.03 Taxpayers that must change their method of accounting for ceding commissions in order to comply with the principles of Rev. Rul. 82-69 and the *Colonial American* decision must do so in accordance with section 446(e) of the Code and the regulations thereunder.

.04 Section 446(e) of the Code states generally that a taxpayer that changes the method of accounting on the basis of which it regularly computes its income in keeping its books must, before computing taxable income under the new method, secure the consent of the Secretary.

Section 1.446-1(e)(3)(ii) of the regulations states that the Commissioner may prescribe administrative procedures, subject to such limitations, terms, and conditions as deemed necessary to obtain consent, to permit taxpayers to change their accounting practices or methods to an acceptable treatment consistent with applicable regulations. Limitations, terms, and conditions, as may be prescribed in such administrative procedures by the Commissioner, include those necessary to prevent the omission or duplication of items includible in gross income or deductions.

.05 If a taxpayer's taxable income for a tax year (year of change) is computed under a method of accounting different from the method used to compute taxable income in the preceding tax year, then section 481(a) of the Code requires that those adjustments necessary to prevent amounts from being duplicated or omitted be taken into account.

.06 Rev. Proc. 84-74, 1984-2 C.B. 736, contains procedures under section 1.446-1(e) of the regulations for obtaining the consent of the Commissioner to change a method of accounting for federal income tax purposes. Except as otherwise specifically provided by documents published in the Internal Revenue Bulletin, a change in method of accounting initiated by the taxpayer can be made only under the provisions of Rev. Proc. 84-74.

Section 6.02 of Rev. Proc. 84-74 defines a Category A method of accounting as a method of accounting that is specifically not permitted to be used by the taxpayer by the Code, the regulations, or a decision of the Supreme Court of the United States.

Sections 4.01(1), 4.01(2), 4.01(3), and 4.01(5) of Rev. Proc. 84-74 provide that, subject to certain limited exceptions, a taxpayer may not use that revenue procedure to change a method of accounting if, at the time of the filing the Form 3115, one or more of the following conditions exist: (1) the taxpayer is under examination for the year or years in which the erroneous method of accounting was initiated or in which the taxpayer changed to a method of accounting without the consent of the Commissioner, (2) the method being changed is a Category A method and the taxpayer has been contacted in any manner by the Service for purposes of scheduling an examination (and such examination has not been completed), (3) the taxpayer is under examination by the district director, (4) the taxpayer has a return that is under consideration by an appeals office of the Service, (5) a return of the taxpayer is before any federal court with respect to an income tax issue, or (6) there is pending a criminal investigation or proceeding concerning any issue related to the taxpayer's federal tax liability for any year. These limitations are intended to encourage taxpayers to adopt proper methods of accounting prior to becoming subject to examination.

Section 5.06(1)(d) of Rev. Proc. 84-74 provides that if there is a change in method of accounting from a Category A method that results in a positive net adjustment under section 481(a) of the Code, then the adjustment period shall not exceed 3 tax years.

.07 With respect to actions taken by taxpayers, or determinations made by the Service, on or after June 15, 1989 (the date of the *Colonial American* decision), a method of accounting for the treatment of ceding commissions that is inconsistent with the principles of Rev. Rul. 82-69 and the *Colonial American* decision is a Category A method of accounting (as defined in section 6.02 of Rev. Proc. 84-74).

.08 Under this revenue procedure, however, as a matter of administrative convenience, if a life insurance company applies to change its method of accounting for ceding commissions, then it may obtain less stringent treatment than the limitations, terms, and conditions that usually apply for a change from a Category A method. This treatment applies only with respect to the types of taxpayers and the specific changes in method that are within the scope of this revenue procedure. No inference should be drawn from the treatment provided by this revenue procedure as to the procedures that the Service may adopt in other situations in which a change from a Category A method of accounting is required as the result of a Supreme Court decision.

.09 Taxpayers' actions taken to change their method of accounting for ceding commissions to comply with the provisions of Rev. Proc. 82-69, on or after December 5, 1988 (the date certiorari was granted in *Colonial American*) but before June 15, 1989, are subject to the rules of section 14 of this revenue procedure. This section imposes conditions designed to put the taxpayer in the same position as if it had not acted to change its method of accounting until June 15, 1989.

SEC. 3. SCOPE

This revenue procedure must be used by life insurance companies to change their method of accounting for ceding commissions to comply with the principles of Rev. Rul. 82-69 and the *Colonial American* decision for their first tax year ending after June 15, 1989, as set forth below. In general, this revenue procedure applies (i) to taxpayers that as of June 15, 1989 were not under examination by the Service, as described more fully in section 3.01, and (ii) to taxpayers that were under examination on that date if the taxpayer's treatment of ceding commissions was not a "pending issue" as of June 15, 1989, as described more fully in section 3.02. Taxpayers eligible to use this revenue procedure to effect a change in method of accounting must treat the tax year that includes June 15, 1989 as the year of change, as described more fully in section 5.

.01 This revenue procedure applies to any life insurance company that, as of June 15, 1989, had not been

contacted by a representative of the Service for purposes of scheduling an examination and was not otherwise described in sections 4.01(1), 4.01(2), 4.01(3), or 4.01(5) of Rev. Proc. 84-74 on that date, provided the taxpayer complies with the general procedures for implementing the change set forth in section 5 of this revenue procedure. Thus, if at any time after June 15, 1989, but prior to the due date (including extensions) of the taxpayer's tax return for the first year ending after June 15, 1989, a taxpayer described in this section 3.01 has been contacted by the Service for purposes of scheduling an examination, this revenue procedure may be used to change the method of accounting. In such a case, however, the taxpayer must comply with the additional procedures in section 5.04 for notifying the district director of the change.

.02 This revenue procedure also applies to any life insurance company that, as of June 15, 1989, had been contacted for purposes of scheduling an examination or was otherwise subject to section 4.01(1), 4.01(2), or 4.01(3) (without regard to section 4.02) of Rev. Proc. 84-74, provided that an issue concerning the taxpayer's treatment of ceding commissions was not a "pending issue" as of that date. See section 4 of this revenue procedure for the definition of a pending issue. More specifically, if as of June 15, 1989, a life insurance company had a federal income tax return (i) with respect to which the taxpayer had been contacted in any manner by the Service for purposes of scheduling an examination (and such examination was not yet completed), or (ii) which was either (a) under examination by the district director, (b) under consideration by an appeals office of the Service, or (c) before any federal court with respect to an income tax issue, then the taxpayer may use this revenue procedure only if the treatment of ceding commissions on indemnity reinsurance was not a pending issue as of June 15, 1989. See section 5 regarding the general procedures for implementing the change, including section 5.05 with regard to the additional procedures for notifying the Service representative(s) or counsel for the Government and obtaining a statement verifying that the taxpayer's treatment of ceding commissions on indemnity reinsurance was not a pending issue.

SEC. 4. SPECIAL RULES RELATING TO PENDING ISSUE

A taxpayer's treatment of ceding commissions on indemnity reinsurance is considered to have been a pending issue as of June 15, 1989, only if on or before that date the Service had sent the taxpayer written notification indicating that an adjustment was being proposed to the treatment of ceding commissions on a return that was under examination (e.g., by Form 5701, Notice of Proposed Adjustment). Thus, if on or before June 15, 1989, the examining officer had merely notified the taxpayer orally that its indemnity reinsurance transactions were being examined but had not proposed any adjustments in writing to the taxpayer's treatment of ceding commissions on indemnity reinsurance, the taxpayer's treatment of ceding commissions was not a pending issue. Similarly, if on or before June 15, 1989, the examining officer had formally requested relevant documents but had not yet notified the taxpayer in writing of a proposed adjustment in the treatment of ceding commissions, the taxpayer's treatment of ceding commissions was not a pending issue.

SEC. 5. APPLICATION

.01 *Consent.* If a taxpayer properly complies with the provisions of this revenue procedure (i) in accordance with section 1.446-1(e)(3)(ii) of the regulations, the 180-day time period for filing an application is extended to the due date (including extensions) of the taxpayer's federal income tax return for the first tax year ending after June 15, 1989, and (ii) consent is hereby granted to the taxpayer to effect the change in method for the tax year which includes June 15, 1989. If the return for the year of change has already been filed, see section 5.03.

.02 *Method of implementing the change.* A taxpayer applying for a change in method under this revenue procedure must complete and file a current Form 3115 in duplicate. The original must be attached to the taxpayer's timely filed (including extensions) original federal income tax return for the first tax year ending after June 15, 1989. The duplicate of the completed Form 3115 shall be filed with the Commissioner of Internal Revenue, Office of Assistant Chief Counsel (Financial Institutions and Products), CC:FI&P:4, P.O. Box 7616, Ben Franklin Station, Washington, D.C., 20044, no later than the time the original of the Form 3115 is filed as described above. In order to assist in the processing and proper handling of these applications, reference to this revenue procedure shall be made a part of the Form 3115 by either typing or legibly printing the following statement at the top of page 1 of the Form 3115: "FILED UNDER REV. PROC. 90-36." No user fee is required for an application filed under this revenue procedure.

.03 *Return for the year of change already filed.* If on or before August 1, 1990, any taxpayer eligible to change its method of accounting under this revenue procedure files its federal income tax return for the first tax year ending after June 15, 1989, consent is hereby granted to the taxpayer to effect the change in method by filing an amended return for the tax year that included June 15, 1989, provided the taxpayer otherwise complies with the requirements of section 5.02 and the amended return is filed by September 17, 1990.

.04 *Contacted for examination before Form 3115 is filed.* If any taxpayer described in section 3.01 is contacted by the Service for purposes of scheduling an examination at any time after June 15, 1989, but prior to the due date (including extensions) of the taxpayer's tax return for the first year ending after June 15, 1989, the taxpayer must provide the district director a written statement indicating that the taxpayer is changing its method of accounting for ceding commissions under this revenue procedure. This statement must be provided by the later of (i) 90 days after the taxpayer has been contacted by the Service for purposes of scheduling an examination, or (ii) September 30, 1990. In addition, the taxpayer must provide the district director a duplicate of the completed Form 3115 filed with the taxpayer's federal income tax return for the year of change. This duplicate must be provided by the later of the date the above statement is filed or the date the Form 3115 is filed.

.05 *Supporting statement required.* A taxpayer qualifying to use this revenue procedure under section 3.02 may change its method of accounting under this revenue procedure only if on or before September 30, 1990, the taxpayer notifies the Service representative(s) or counsel for the Government with jurisdiction over its tax returns that the taxpayer is changing its method of accounting for ceding commissions under this revenue procedure. The taxpayer must also request that the Service representative(s) or counsel for the Government with jurisdiction over its return(s) provide a written statement concurring that on or before June 15, 1989, there was no pending issue concerning the taxpayer's treatment of ceding commissions on indemnity reinsurance. A copy of this supporting statement must be filed with the completed Form 3115 attached to the return for the tax year of change. The taxpayer must also provide the Service representative(s) or counsel for the Government a duplicate of the Form 3115 filed with the taxpayer's federal income tax return for the tax year of change. If the taxpayer fails to comply with these requirements, then the treatment of ceding commissions on returns under examination or otherwise described in sections 4.01(1), 4.01(2) or 4.01(3) (without regard to section 4.02) of Rev. Proc. 84-74 shall be subject to adjustment in the earliest open year in the manner provided in section 11 of this revenue procedure.

.06 *Year of Change.* The year of change for any change in method of accounting for ceding commissions which is made in accordance with this section 5 is the first tax year ending after June 15, 1989.

SEC. 6. SECTION 481(a) ADJUSTMENT

.01 *Section 481(a) adjustment.* An adjustment (the "section 481(a) adjustment") is required to prevent items from being omitted or duplicated solely by reason of a change in method of accounting. In a situation in which the taxpayer has been treating ceding commissions as currently deductible expenses, the section 481(a) adjustment required by reason of the change in accounting method is the amount that would be the unamortized balance of the ceding commissions as of the beginning of the year of change, if the method to which the taxpayer is changing had always been used. Thus, the section 481(a) adjustment (which is positive) takes into account all of the reinsurance agreements entered into by the taxpayer prior to the year of change for which the taxpayer would, as of the beginning of the year of change, have an unamortized balance of ceding commissions, if the method of amortization to which the taxpayer is changing had originally been applied to such commissions.

.02 *Adjustment period.* If the entire amount of the section 481(a) adjustment is attributable to the tax year immediately preceding the year of change, then the total adjustment must be taken into account in computing taxable income for the year of change. Otherwise, the section 481(a) adjustment must be taken into account in computing taxable income ratably over a period equal to the lesser of (i) the number of tax years the taxpayer has used the method being changed, or (ii) 3 tax years.

.03 *Acceleration of adjustment.* If, during the adjustment period, the aggregate amount of unamortized ceding commissions as of the last day of any tax year is reduced by more than 66 2/3 percent of the aggregate amount of unamortized ceding commissions at the beginning of the year of change, the balance of the section 481(a) adjustment not previously taken into account must be included in income in the year the aggregate amount of unamortized ceding commissions is so reduced.

.04 *Ceasing to engage in the trade or business.* If, during the adjustment period, the taxpayer ceases to engage in the trade or business giving rise to the adjustment, the balance of the section 481(a) adjustment not previously taken into account must be included in income in the year that the taxpayer ceases to engage in the trade or business. See section 5.09 of Rev. Proc. 84-74 for guidance as to when a taxpayer is treated as ceasing to engage in a trade or business.

.05 *Net operating losses.* No limitations on net operating loss and tax credit carryovers apply with respect to any section 481(a) adjustment taken into account as a result of a change in method under this revenue procedure. See section 5.15(3) of Rev. Proc. 84-74.

.06 *Consolidated returns.* If the taxpayer is a member of an affiliated group and more than one member of the group is requesting to change its method of accounting for ceding commissions under this revenue procedure, the section 481(a) adjustment must be computed and separately stated for each taxpayer.

SEC. 7. ESTIMATED TAXES

For purposes of any required quarterly installments and extension payments made on or before August 1, 1990, no penalty shall be assessed for underpayment of estimated taxes under section 6655 of the Code or for late payment of tax under section 6651 of the Code on account of an underpayment or late payment that results from the treatment of ceding commissions on indemnity reinsurance as being currently deductible.

SEC. 8. RECORDS

The taxpayer must maintain adequate records so that the Service may, upon examination, verify the data relating to the change in method of accounting.

SEC. 9. COMPLIANCE WITH CONDITIONS

A taxpayer that attempts to make an accounting method change under this revenue procedure without complying with all the conditions of this revenue procedure has initiated the change without obtaining the consent of the Commissioner.

SEC. 10. ADDITIONAL PROCEDURAL REQUIREMENTS

The signature of the person preparing the request for the change in method of accounting must appear in the space provided on Form 3115. The Form 3115 also must be signed by or on behalf of the taxpayer requesting the change. See the signature requirements set forth in the General Instructions attached to Form 3115 regarding those who are to sign. For example, an officer must sign on behalf of a corporation. If for the year of change the taxpayer is a member of an affiliated group that has elected to file a consolidated federal income tax return, a Form 3115

submitted on behalf of the taxpayer must be signed by a duly authorized officer of the common parent. (*See* section 1.1502-77 of the regulations.)

SEC. 11. TREATMENT OF LIFE INSURANCE COMPANIES WITH PENDING ISSUE

If a life insurance company is ineligible to use this revenue procedure because there was a pending issue concerning the treatment of ceding commissions on indemnity reinsurance on or before June 15, 1989, then the change in method of accounting shall be imposed by the Service under authority of section 446(b) and section 481 of the Code in accordance with the procedures that generally apply when an issue is raised concerning the use of a Category A method of accounting pursuant to an examination of the taxpayer's returns.

SEC. 12. ACCOUNTING METHOD CHANGES BY NON-LIFE COMPANIES

The provisions of this revenue procedure are applicable only to life insurance companies as defined in section 816(a) of the Code. With respect to non-life companies engaged in reinsuring life insurance policies, the Service will not treat a method of accounting for ceding commissions that is inconsistent with the principles of *Colonial American* decision as a Category A method of accounting. Thus, an insurance company taxable under section 831(a) (a non-life company) that has reinsured life insurance business may request to change its method of accounting with respect to the treatment of the related ceding commissions to be consistent with the principles of the *Colonial American* decision by filing a Form 3115 in accordance with the procedures and rules of Rev. Proc. 84-74.

SEC. 13. EXCLUSIVE APPLICATION

If a life insurance company does not implement the change in method of accounting for ceding commissions to comply with the principles of Rev. Rul. 82-69 and the *Colonial American* decision in the manner provided by section 5 above, the company must use Rev. Proc. 84-74 to change the method of accounting. With respect to any application filed by a life insurance company under Rev. Proc. 84-74 prior to January 1, 1992, however, under the authority of section 1.446-1(e)(3)(ii) of the regulations, the Service will require as a condition for its consent that the taxpayer implement the change in method of accounting for the treatment of ceding commissions in the year of change provided under this revenue procedure. Thus, a taxpayer that files an application under Rev. Proc. 84-74 prior to January 1, 1992 to request the change in method will generally be required to file an amended return to implement the change. For applications filed after December 31, 1991, the Service will process these applications in accordance with the general procedures then in effect for obtaining the consent of Commissioner to change a method of accounting for federal income tax purposes.

SEC. 14. APPLICATIONS FOR METHOD CHANGE FILED AFTER DATE CERTIORARI WAS GRANTED

With respect to any application on Form 3115 filed on or after December 5, 1988 (the date certiorari was granted in *Colonial American*) but before June 15, 1989, in order to comply with Rev. Rul. 82-69, the Service will impose the conditions outlined in this section, which are necessary in order to provide treatment that is substantially equivalent to the treatment of taxpayers that change their method of accounting pursuant to section 5. If the taxpayer's treatment of ceding commissions was a pending issue at the time the Form 3115 was filed, then both the year of change and spread period shall be imposed by the Service under the authority of section 1.446-1(e)(3)(ii) of the regulations in accordance with the procedures that generally apply when an issue is raised concerning the use of a Category A method of accounting pursuant to an examination of the taxpayer's returns. If the taxpayer's treatment of ceding commissions was not a pending issue at the time the Form 3115 was filed, then the year of change is the applicable year in which the Form 3115 is filed and the spread period will be determined under section 6.02 of this revenue procedure (*i.e.*, not more than 3 years).

SEC. 15. EFFECTIVE DATE

This revenue procedure is effective June 15, 1990, the date in which notice of its publication in the Internal Revenue Bulletin was given to the public.

SEC. 16. INQUIRIES

Inquiries in regard to this revenue procedure should refer to its number and be addressed to the Commissioner of Internal Revenue, Attention: Office of Assistant Chief Counsel (Financial Institutions and Products), CC:FI&P:4, P.O. Box 7604, Ben Franklin Station, Washington, D.C. 20044.

26 CFR 601.204: Changes in accounting periods and in methods of accounting.
(Also Part I, Sections 446, 481, 1281; 1.446-1, 1.481-5.)

Rev. Proc. 90-37

SECTION 1. PURPOSE

This revenue procedure provides that certain taxpayers may obtain expeditious consent to change their accounting method for reporting interest income on short-term loans to customers to accord with the provisions of section 1281 of the Internal Revenue Code. As used in this revenue procedure, the term "interest income" includes stated interest, original issue discount, and acquisition discount. A taxpayer that complies with this revenue procedure will be deemed to have obtained the consent of the Commissioner to change its accounting method.

SEC. 2. BACKGROUND

.01 In general, section 1281(a) of the Code, as modified by section 1283(c)(1), requires a holder of certain short-term obligations, including a bank as defined in section 581, to include in gross income any accrued interest income on such obligations, regardless of the holder's overall method of accounting. Section 1281(a) applies to all types of interest income, including acquisition discount, original issue discount, and stated interest. *See* S. Rep. No. 99-313, 99th Cong., 2d Sess. 903 (1986), 1986-3 (Vol. 3) C.B. 903.

.02 Section 1283(a)(1) of the Code generally defines a short-term obligation as any bond, debenture, note,

certificate, or other evidence of indebtedness that matures in one year or less from its issue date. A short-term loan is a short-term obligation.

.03 Section 1281(a) of the Code, by its terms, requires only the inclusion of acquisition discount. It is modified by section 1283(c) of the Code, however, to require the inclusion of original issue discount (rather than acquisition discount) on short-term nongovernmental obligations. See section 1273(a)(1) for the definition of original issue discount and section 1283(a)(2) for the definition of acquisition discount.

.04 Under sections 1281(a) and 1283(c) of the Code, the holder of a short-term obligation subject to section 1281 must include in gross income an amount equal to the sum of the daily portions of the acquisition discount or original issue discount, whichever is applicable, on the obligation for each day during the tax year that the obligation is held by the holder. See section 1283(b), as modified by section 1283(c), for the determination of the daily portion of the acquisition discount or original issue discount on a short-term obligation. In addition, section 1281(a) requires the holder of any short-term obligation subject to section 1281 to include in gross income any interest that is payable on the obligation (other than interest taken into account in determining the amount of the acquisition discount or original issue discount) as it accrues.

.05 Section 446(e) of the Code and section 1.446-1(e) of the Income Tax Regulations provide that, except as otherwise provided, a taxpayer must obtain the consent of the Commissioner in order to change a method of accounting for federal income tax purposes. Section 1.446-1(e)(3)(i) of the regulations generally requires that in order to obtain this consent, a Form 3115, Application for Change in Accounting Method, must be filed within 180 days after the beginning of the tax year in which the proposed change is to be made. Section 1.446-1(e)(3)(ii) authorizes the Commissioner to prescribe administrative procedures setting forth the limitations, terms, and conditions deemed necessary to permit a taxpayer to obtain consent to a change in its method of accounting in accordance with section 446(e) of the Code.

.06 Section 481(a) of the Code requires that those adjustments necessary to prevent amounts from being duplicated or omitted be taken into account when the taxpayer's taxable income is computed under a method of accounting different from the method used to compute taxable income for the preceding tax year. Section 481(c) and section 1.481-5 of the regulations provide that the adjustment required by section 481(a) may be taken into account in determining taxable income in the manner and subject to the conditions agreed to by the Commissioner and the taxpayer.

.07 Rev. Proc. 84-74, 1984-2 C.B. 736, contains procedures under section 1.446-1(e) of the regulations for obtaining the consent of the Commissioner to a change in a method of accounting for federal income tax purposes. Section 5.15 of the revenue procedure states, in part, that the Commissioner will impose terms and conditions when consenting to changes in methods of accounting to make certain that taxable income is or will be clearly reflected, and to prevent taxpayers from receiving otherwise unavailable benefits that could arise from a change in method of accounting. Although Rev. Proc. 84-74 also specifies procedures for spreading an adjustment required by section 481(a) of the Code resulting from a change in method of accounting over a number of tax years to ameliorate the otherwise distortive effect of such adjustment, section 2.04 of that revenue procedure provides that, in order to further compliance with proper methods of accounting, certain situations exist when allowing a section 481 adjustment period of more than one tax year is not appropriate.

SEC. 3. SCOPE

.01 Except as provided in section 3.02 below, this revenue procedure applies to a taxpayer described in this subsection that desires to effect a change in method of accounting to comply with section 1281 of the Code for interest income on short-term loans to its customers. A taxpayer is described in this subsection if it satisfies two conditions:

1. The taxpayer is a bank (as that term is defined in section 581 of the Code, which definition includes most thrift institutions); and

2. The taxpayer's present method of accounting is in compliance with section 1281 for all of the taxpayer's short-term obligations described in section 1281(b)(1) other than short-term loans to its customers.

.02 This revenue procedure does not apply to:

(1) Any bank that, as of the date of the filing of the Form 3115 with the National Office, has been contacted in any manner by a representative of the Internal Revenue Service for the purpose of scheduling an examination of its federal income tax return(s) for any year, if the examination has not been completed, unless the bank has obtained and attaches to its Form 3115 an agreement from the revenue agent that there is no objection to the proposed change in method of accounting.

(2) Any bank that, as of the date of the filing of the Form 3115 with the National Office, is:

(a) Before an appeals office of the Service with respect to an examination of its federal income tax return(s) for any year, unless the bank has obtained and attaches to its Form 3115 an agreement from the appeals officer that there is no objection to the proposed change in method of accounting; or

(b) Before any federal court with respect to an income tax issue arising in any year, unless the bank has obtained an agreement from counsel for the government that there is no objection to the proposed change in method of accounting.

(3) Any bank that, as of the date of the filing of the Form 3115 with the National Office, is the subject of a criminal investigation or proceeding concerning (a) directly or indirectly the bank's federal income tax liability for any year, or (b) the possibility of false or fraudulent statements made by the bank with respect to any issue relating to its federal income tax liability for any year.

.03 Any taxpayer to which this revenue procedure does not apply must file a current Form 3115 with the Commissioner in accordance with the requirements of section 1.446-1(e)(3) of the regulations and Rev. Proc. 84-74 in order to secure the consent of the Commissioner to change the taxpayer's method of accounting for reporting interest income on short-term obligations to the

method required by section 1281 of the Code.

SEC. 4. APPLICATION

.01 *Consent.* In accordance with section 1.446-1(e)(3)(ii) of the regulations, the requirement to file an application on Form 3115 within a 180-day period is waived, and under section 1.446-1(e)(2)(i) consent is hereby granted to any taxpayer to which this revenue procedure applies to change its method of accounting for reporting interest income on short-term obligations to the method required by section 1281 of the Code. This consent is granted for the tax year for which the taxpayer requests a change (year of change) by filing a current Form 3115 in the manner described in section 6 of this revenue procedure and by otherwise complying with the provisions of this revenue procedure. See section 5 regarding compliance with the provisions of this revenue procedure. If a taxpayer to which this revenue procedure applies changes its method of accounting for reporting interest income on short-term obligations to the method required by section 1281 of the Code without complying with all the provisions of this revenue procedure, the taxpayer will be deemed to have initiated the change in method of accounting without obtaining the permission of the Commissioner as required under section 446(e) of the Code.

.02 *Section 481(a) adjustment and adjustment period.* Section 481 of the Code prescribes the rules to be followed in computing taxable income of a taxpayer in cases where the taxable income of a taxpayer is computed under a method of accounting different from the method used to compute taxable income for the preceding year. An adjustment is required to prevent amounts from being duplicated or omitted when a change in method of accounting is made. The Service has determined that an adjustment period of one year for a positive section 481(a) adjustment (increase in income) is appropriate in situations in which taxpayers are requesting permission to change to the method of accruing interest income on short-term loans to customers in accordance with the provisions of section 1281. Accordingly, the positive section 481(a) adjustment will be taken into account entirely in the year of change.

.03 Taxpayers to which this revenue procedure applies may not use Rev. Proc. 84-74 but must use the provisions of this revenue procedure to change their method of accounting for reporting interest income on short-term obligations to the method required by section 1281 of the Code.

SEC. 5. MANNER OF EFFECTING THE CHANGE

.01 A taxpayer applying for a change in method of accounting pursuant to this revenue procedure must complete and file a current Form 3115 in duplicate. The original shall be attached to the taxpayer's timely filed (determined with regard to extensions) federal income tax return for the year of change. The copy shall be filed with the National Office of the Internal Revenue Service, CC:IT&A:8, P.O. Box 7616, Benjamin Franklin Station, Washington, D.C. 20044, by the later of 270 days after the beginning of the year of change, or August 31, 1990 (60 days after publication of this revenue procedure). In addition to including all information required on the Form 3115, the taxpayer shall indicate that it will take the entire section 481(a) adjustment into account in the year of change. No user fee is required for an application filed under this revenue procedure.

.02 In order to assist in the processing of these changes in method of accounting and to insure proper handling, reference to this revenue procedure shall be made a part of the Form 3115 by either typing or legibly printing the following statement at the top of Page 1 of Form 3115: "FILED UNDER REV. PROC. 90-37."

.03 The signature of the person requesting the change in method of accounting must appear in the space provided for it on the Form 3115. For example, an officer must sign on behalf of a corporation. See the signature requirements set forth in the General Instructions attached to a current Form 3115 for those who are authorized to sign. If an agent is authorized to represent the taxpayer before the Service, to receive the original or copy of correspondence concerning the request, or to perform any additional act(s) regarding the application on behalf of the taxpayer, a power of attorney reflecting such authorization(s) must be attached to the application. A taxpayer's representative without a power of attorney to represent the taxpayer as indicated in this subsection will not be given any information about the application.

.04 If the taxpayer is a member of an affiliated group that has elected to file a consolidated federal income tax return, a Form 3115 submitted on behalf of the taxpayer must be signed by a duly authorized officer of the common parent. See section 1.1502-77 of the regulations.

SEC. 6. INQUIRIES

Inquiries regarding this revenue procedure may be addressed to the Commissioner of Internal Revenue, Attention: CC:IT&A:8, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

SEC. 7. EFFECTIVE DATE

This revenue procedure is effective July 2, 1990, the date of its publication. Any request for a change in method of accounting to which this revenue procedure applies that is received by the National Office after the effective date will be returned to the taxpayer. Taxpayers who have already filed a timely Form 3115 with the National Office prior to the effective date of this revenue procedure may use the automatic provisions of this revenue procedure and will be so notified to this effect by the National Office.

(Also Part I, Sections 62, 162, 274; 1.62-2T, 1.162-17, 1.274-5T.)

Rev. Proc. 90-38

SECTION 1. PURPOSE

This revenue procedure amplifies Rev. Proc. 89-67, 1989-2 C.B. 795, as amplified by Rev. Proc. 90-15, 1990-1 C.B. 476, by providing a special method for determining the amount of ordinary and necessary expenses of an employee or self-employed individual in the transportation industry for meal and incidental expenses incurred while traveling

away from home that will be deemed substantiated for purposes of section 1.274-5T of the temporary Income Tax Regulations. This revenue procedure also clarifies and modifies Rev. Proc. 89-67 by providing that (1) a per diem allowance is treated as paid only for meal and incidental expenses if the payor pays an employee for actual expenses for lodging, (2) only payors are not required to reduce the Federal per diem rates for meals provided in kind, and (3) the 6-hour/$6 limitation in the Federal Travel Regulations for OCONUS travel does not apply.

SEC. 2. PROCEDURE

Rev. Proc. 89-67 is hereby clarified by revising subsection 4.02, amplified by adding subsection 4.04, and modified by revising subsections 6.03 and 6.04 as follows:

SEC. 4. PER DIEM SUBSTANTIATION METHOD

* * * * *

.02 *Meals only per diem allowance.* If a payor pays a per diem allowance only for meals and incidental expenses in lieu of reimbursing actual expenses for meal and incidental expenses incurred or to be incurred by an employee for travel away from home, the amount of the expenses that is deemed substantiated is equal to the lesser of the per diem allowance or the amount computed at the Federal M&IE rate for the locality of travel for the period the employee is away from home. A per diem allowance is treated as paid only for meal and incidental expenses if (1) the payor pays the employee for actual expenses for lodging, (2) the payor provides the lodging in kind, (3) the payor pays the actual expenses for lodging directly to the provider of the lodging, or (4) the payor does not have a reasonable belief that lodging expenses were or will be incurred by the employee.

* * * * *

.04 *Special meals only rate for transportation industry.* This section 4.04 applies to (1) a payor that pays a per diem allowance only for meal and incidental expenses for travel away from home as described in section 4.02 above to an employee in the transportation industry, or (2) an employee or self-employed individual in the transportation industry that computes the amount allowable as a deduction for meal and incidental expenses for travel away from home in accordance with section 4.03 above. Such a taxpayer (1) may treat $30 as the Federal M&IE rate for any locality of travel in CONUS, and/or (2) may treat $34 as the Federal M&IE rate for any locality of travel OCONUS. A payor that uses either (or both) of these special rates with respect to an employee must use these special rate(s) for all amounts subject to section 4.02 above paid to that employee for travel away from home within CONUS and/or OCONUS, as the case may be, during the calendar year. Similarly, an employee or self-employed individual that uses either (or both) of these special rates must use these special rate(s) for all amounts computed pursuant to section 4.03 above for travel away from home within CONUS and/or OCONUS, as the case may be, during the calendar year. For purposes of this section 4.04, an employee or self-employed individual is "in the transportation industry" only if the employee's or individual's work (1) is of the type that directly involves moving people or goods by airplane, barge, bus, ship, train, or truck, and (2) regularly requires travel away from home which, during any single trip away from home, usually involves travel to localities with differing Federal M&IE rates. For purposes of the preceding sentence, a payor must determine that an employee or a group of employees is "in the transportation industry" by using a method that is consistently applied and in accordance with reasonable business practice.

* * * * *

SEC. 6. LIMITATIONS

* * * * *

.03 *Federal per diem or M&IE rate.* A payor is not required to reduce the Federal per diem rate or the Federal M&IE rate for the locality of travel for meals provided in kind, provided the payor has a reasonable belief that meal and incidental expenses were or will be incurred by the employee. In addition, a reduction to reflect the 6-hour/$6 limitation provided in 41 C.F.R. Part 301-7.6(c)(2)(iii) (1989) of the Federal Travel Regulations is not required in order to apply the Federal per diem rates and Federal M&IE rates to OCONUS travel.

.04 *Proration of the Federal per diem or M&IE rate.* Pursuant to the Federal Travel Regulations, in determining the Federal per diem rate or the Federal M&IE rate for the locality of travel, the full applicable Federal M&IE rate is available for a full day of travel from 12:01 a.m. to 12:00 midnight. For purposes of determining the amount deemed substantiated under section 4 or section 5 above with respect to partial days of travel away from home, either of the following methods may be used to prorate the Federal per diem rate or the Federal M&IE rate:

(1) Such rate may be prorated using the method prescribed by the Federal Travel Regulations under which one-fourth of the applicable Federal M&IE rate is allowed for each 6-hour quarter of the day (*i.e.*, midnight to 6 a.m., 6 a.m. to noon, noon to 6 p.m., and 6 p.m. to midnight) during any portion of which the employee or self-employed individual is traveling away from home in connection with the performance of services as an employee or self-employed individual; or

(2) Such rate may be prorated using any method that is consistently applied and in accordance with reasonable business practice. For example, if an employee travels away from home from 9 a.m. one day to 5 p.m. the next day, a method of proration that results in an amount equal to 2 times the Federal M&IE rate will be treated as being in accordance with reasonable business practice (even though only 1 1/2 times the Federal M&IE rate would be allowed under the Federal Travel Regulations). Similarly, if a self-employed individual travels away from home from 7 p.m. one day to 9 p.m. the next day, a method of proration that results in an amount equal to 1 1/2 times the Federal M&IE rate will be treated as being in accordance with reasonable business practice (even though only 1 1/4 times the Federal M&IE rate would be allowed under the Federal Travel Regulations).

26 CFR 601.201: Rulings and determination letters.
(Also Part I, Section 1502; 1.1502-33.)

Rev. Proc. 90-39[1]

SECTION 1. PURPOSE

.01 This revenue procedure provides a means for an affiliated group of corporations filing a consolidated federal income tax return to obtain consent, without filing an advance ruling request, to elect or to change its method of allocating the consolidated federal income tax liability to members of the affiliated group for purposes of determining the earnings and profits of each member of the affiliated group.

.02 If an affiliated group qualifies to use this revenue procedure, then this revenue procedure is the exclusive procedure available for obtaining consent to elect or change its method of allocating the consolidated federal income tax liability.

SEC. 2. BACKGROUND

.01 Section 1552(a) of the Internal Revenue Code and section 1.1552-1(a) of the Income Tax Regulations provide four methods for allocating an affiliated group's consolidated federal income tax liability to members of the group (the "basic methods"). Three of these methods (described in section 1552(a)(1), (2), and (3) and section 1.1552-1(a)(1), (2), and (3), respectively) provide specific allocation formulas. The fourth method (described in section 1552(a)(4) and section 1.1552-1(a)(4)) allows the affiliated group to determine its own allocation formula with the prior approval of the Commissioner.

.02 For use in conjunction with one of the four basic methods, three additional allocation methods are described in section 1.1502-33(d)(2) of the regulations (the "complementary methods"). These additional methods allow the affiliated group to compensate a member for its losses that are availed of by profitable members of the affiliated group. Two of these methods (described in section 1.1502-33(d)(2)(i) and (ii)) provide specific formulas. The third method (described in section 1.1502-33(d)(2)(iii)) allows the affiliated group to determine its own formula with the prior approval of the Commissioner.

.03 Section 1552(a) of the Code states that, pursuant to regulations prescribed by the Secretary, the earnings and profits of each member of an affiliated group required to be included in a consolidated return for the group filed for a taxable year shall be determined by allocating the tax liability of the group for the taxable year among the members of the group in accordance with whichever of the following methods the group elects in its first consolidated return filed for the taxable year:

(1) The tax liability shall be apportioned among the members of the group in accordance with the ratio which that portion of the consolidated taxable income attributable to each member of the group having taxable income bears to the consolidated taxable income;

(2) The tax liability of the group shall be allocated to the several members of the group on the basis of the percentage of the total tax which the tax of each member, if computed on a separate return, would bear to the total amount of the taxes for all members of the group so computed;

(3) The tax liability of the group (excluding the tax increases arising from the consolidation) shall be allocated on the basis of the contribution of each member of the group to the consolidated taxable income of the group. Any tax increases arising from the consolidation shall be distributed to the several members in direct proportion to the reduction in tax liability resulting to the members from the filing of the consolidated return as measured by the difference between their tax liabilities determined on a separate return basis and their tax liabilities based on their contributions to the consolidated taxable income; or

(4) The tax liability of the group shall be allocated in accordance with any other method selected by the group with the approval of the Commissioner.

.04 Section 1552(b) of the Code provides that if an allocation method is not elected in the first consolidated return, the tax liability shall be allocated among the several members of the group pursuant to the method prescribed in section 1552(a)(1).

.05 Section 1.1552-1(c)(1) of the regulations provides that an election to use one of the methods described in section 1.1552-1(a)(1), (2), or (3) (which correspond to the methods described in section 1552(a)(1), (2), and (3) of the Code, respectively) shall be made by attaching a statement to the first consolidated return of the group stating which method is elected. In the event that the group desires to allocate its tax liability in accordance with any other method pursuant to section 1.1552-1(a)(4) (and section 1552(a)(4) of the Code), approval of the method by the Commissioner must be obtained prior to its use. An election, once made, is irrevocable and is binding on the group with respect to the year for which it is made and for all future years for which a consolidated return is filed or required to be filed, unless the Commissioner authorizes a change to another method prior to the time prescribed by law for filing the return for the year in which the change is to be effective.

.06 Section 1.1502-33(d)(1) of the regulations provides that, for the purpose of determining the earnings and profits of each member of a group for a consolidated return year, the tax liability of the group for the year may be allocated among the members in accordance with one of the methods prescribed in section 1.1502-33(d)(2)-(i), (ii), or (iii), if an election is made in accordance with section 1.1502-33-(d)(3).

.07 Section 1.1502-33(d)(2)(i) of the regulations provides that the tax liability of the group, as determined under section 1.1552-1(b)(1), shall be allocated to the members in accordance with section 1.1552-1(a)(1), (2), or (3), whichever is applicable, but—

(*a*) The amount of the tax liability allocated to any member for a taxable year shall not exceed the excess of (1) the total of the tax liabilities of the member on a separate return basis for all taxable years to which the election of this method applies, and for which the member joined in the filing of a consolidated return of the group (including the current taxable year), computed as if it

[1]As corrected by Rev. Proc. 90-39A, page 367, this Bulletin.

had actually filed separate returns for all such years, over (2) the total of the portions of the tax liability of the group allocated to the member for all previous taxable years to which the election under this paragraph applies; and

(*b*) The amount of any excess tax liability that would be allocated to a member of a group but for section 1.1502-33(d)(2)(i)(*a*) of the regulations shall be apportioned among the other members in direct proportion to, but limited to, the reduction in tax liability resulting to those other members. The reduction for any member shall be the excess, if any, of (1) the total of its tax liabilities on a separate return basis for all taxable years to which the election under this paragraph applies, and for which the member joined in the filing of a consolidated return of such group (including the current taxable year), computed as if it had actually filed separate returns for all such years, over (2) the total of the portions of the tax liability of the group allocated to the member for all taxable years to which the election under this paragraph applies (including for the current taxable year only the amount allocated under section 1.1552-1(a)(1), (2), or (3)). If any excess tax liability remains after being apportioned among members with a reduction in tax liability to the extent of the reduction, as provided in section 1.1502-33(d)(2)(i)(*b*), the remaining amount shall, notwithstanding section 1.1502-33(d)(2)(i)(*a*), be allocated to the members in accordance with section 1.1552-1(a)(1), (2), or (3), whichever is applicable.

.08 Section 1.1502-33(d)(2)(ii) of the regulations provides that:

(*a*) The tax liability of the group, as determined under section 1.1552-1(b)(1) of the regulations, shall be allocated to the members in accordance with section 1.1552-1(a)(1), (2), or (3), whichever is applicable;

(*b*) An additional amount shall be allocated to each member equal to a fixed percentage (which does not exceed 100 percent) of the excess, if any, of (1) the separate return tax liability of such member for the taxable year (computed as provided in section 1.1552-1(a)(2)(ii) of the regulations), over (2) the tax liability allocated to the member in accordance with section 1.1502-33(d)(2)(ii)(*a*); and

(*c*) The total of any additional amounts allocated pursuant to section 1.1502-33(d)(2)(ii)(*b*) (including amounts allocated as a result of a carryback) shall be credited to the earnings and profits of those members which had items of income, deductions, or credits to which the total is attributable pursuant to a consistent method which fairly reflects those items of income, deductions, or credits, and which is substantiated by specific records maintained by the group for such purpose.

.09 Section 1.1502-33(d)(2)(iii) of the regulations provides that allocations of tax liability to the members may be made in accordance with any other method approved by the Commissioner. A condition of the approval is that the group maintains specific records to substantiate its computations pursuant to the method.

.10 Section 1.1502-33(d)(3)(i) of the regulations provides that in the event a group desires to allocate its tax liability in accordance with a method provided in section 1.1502-33(d)(2)(i) or (ii), an election to that effect shall be made by attaching a statement to the consolidated return for the first consolidated return year of the group. The statement shall indicate which method is elected and which method under section 1.1552-1(a)(1), (2), or (3) is elected in conjunction with the election under section 1.1502-33(d)(3)-(i). In addition, if the method elected is the method provided in section 1.1502-33(d)(2)(ii), the statement shall indicate the percentage used pursuant to section 1.1502-33(d)(2)(ii)(*b*). In the event the group desires to allocate its tax liability in accordance with a method pursuant to section 1.1502-33-(d)(2)(iii), approval of that method by the Commissioner must be obtained prior to its use. An election once made is irrevocable and is binding on the group with respect to the year for which it is made and for all future consolidated return years of the group, unless the Commissioner authorizes a change to another method prior to the time prescribed by law for filing the return for the year in which the change is to be effective.

.11 Section 1.1502-33(d)(3)(ii) of the regulations provides that if a group does not make an election under section 1.1502-33(d)(3)(i) for the first consolidated return year of the group, the group may not thereafter make an election without the approval of the Commissioner.

SEC. 3. SCOPE

.01 Except as provided in section 3.02, this revenue procedure applies to any affiliated group filing consolidated returns that desires to elect or to change its method of allocating the consolidated federal income tax liability to members of the group.

.02 This revenue procedure does not apply to an affiliated group that:

(1) is filing its first consolidated return;

(2) is requesting an allocation of consolidated federal income tax liability under a basic method described in section 1.1552-1(a)-(4) of the regulations or under a complementary method described in section 1.1502-33(d)(2)(iii);

(3) has changed its basic method (not including adoption of the method in the first consolidated return) within the five preceding taxable years; or

(4) has changed its complementary method (not including adoption of the method in the first consolidated return) within the five preceding taxable years.

.03 If this revenue procedure does not apply to an affiliated group by reason of section 3.02 (2), (3), or (4) of this revenue procedure, the group needs the Commissioner's consent to elect or to change its method of allocating the consolidated federal income tax liability to members of the group. Such a group must file a request with the Commissioner as required by sections 1.1502-33(d)(3)(i) and (ii) and 1.1552-1(c)(1) of the regulations.

SEC. 4. MANNER OF EFFECTING THE ELECTION OR CHANGE

.01 In order to obtain the consent of the Commissioner under this revenue procedure, the common parent of

the group must attach a statement to its consolidated federal income tax return (filed on a timely basis, taking into account any extensions). The statement must contain the following information and representations:

(1) The name of the common parent corporation of the affiliated group, its Employer Identification Number (EIN) and its address, the name and EIN of all the members of the affiliated group, and the district office that has jurisdiction over the consolidated return;

(2) A complete description of the present method of allocating the consolidated federal income tax liability. If the present method is not the method that was used for the first filing of a consolidated return, the statement must indicate the date permission to change the affiliated group's allocation method was granted and the taxable year for which the change was effective. If the affiliated group previously used this revenue procedure to elect or to change its method of allocating the consolidated federal income tax liability, a copy of the earlier statement under this section 4.01, including the date such statement was filed and the taxable year of the consolidated return with which it was filed, must be attached to this statement;

(3)A complete description of the affiliated group's proposed method of allocating the consolidated federal income tax liability. If the method described in section 1.1502-33(d)(2)(ii) of the regulations is to be employed, the fixed percentage must be stated; and

(4) A representation that adoption of the proposed method of allocation will not change the taxable status of distributions made during the year of change or in any foreseeable future year to shareholders who are not members of the affiliated group.

.02 The statement must be signed under penalties of perjury by a duly authorized officer of the common parent of the affiliated group. *See* section 1.1502-77 of the regulations.

SEC. 5. CONSENT

In accordance with sections 1.1552-1(c)(1) and 1.1502-33(d)(3)(i) of the regulations, consent is hereby granted to an affiliated group within the scope of this revenue procedure:

(1) To change its method of allocating the consolidated federal income tax liability to one of the basic methods described in section 1.1552-1(a)(1), (2), or (3) of the regulations; and/or

(2) To elect or change to a complementary method described in section 1.1502-33(d)(2)(i) or (ii) of the regulations for use in conjunction with a basic method described in section 1.1552-1(a)(1), (2), or (3). This consent is granted for the consolidated return year for which the statement described in section 4 of this revenue procedure is attached to a timely filed federal consolidated income tax return. *See* section 6 regarding compliance with the conditions of this revenue procedure.

SEC. 6. COMPLIANCE WITH CONDITIONS

An affiliated group that takes the desired action without complying with all the conditions of this revenue procedure has initiated the desired action without obtaining the permission of the Commissioner that is required by sections 1.1502-33(d)(3)(i) and (ii) and 1.1552-1(c)(1) of the regulations.

SEC. 7. INQUIRIES

Inquiries regarding this revenue procedure may be addressed to the Commissioner of Internal Revenue, ATTN: CC:CORP:02, P.O. Box 7604, Ben Franklin Station, Washington, D.C. 20044.

SEC. 8. EFFECTIVE DATE

This revenue procedure is effective for all consolidated returns timely filed (including extensions) after July 23, 1990, the date of publication of this revenue procedure in the Internal Revenue Bulletin.

(Also Part I, Section 1552; 1.1552-1.)

Rev. Proc. 90-39A

Rev. Proc. 90-39, page 365, this Bulletin, sets forth a means for an affiliated group of corporations filing a consolidated federal income tax return to obtain consent, without filing an advance ruling request, to elect or to change its method of allocating the consolidated federal income tax liability to members of the affiliated group for purposes of determining the earnings and profits of each member of the affiliated group. The purpose of this revenue procedure is to clarify the scope of Rev. Proc. 90-39. Sections 3.02(3) and (4) of Rev. Proc. 90-39 should read as follows:

(3) has changed its basic method (not including adoption of the method in the first consolidated return) within the five preceding taxable years; or

(4) has changed its complementary method (not including adoption of the method in the first consolidated return) within the five preceding taxable years.

This clarification to Rev. Proc. 90-39 appears in that revenue procedure on page 365, this Bulletin.

EFFECT ON OTHER DOCUMENTS

Rev. Proc. 90-39 is clarified.

26 CFR 601.201: Rulings and determination letters.
(Also Part I, Sections 265, 441, 448; 1.265-2, 1.441-4T, 1.448-1T.)

Rev. Proc. 90-40

SECTION 1. BACKGROUND

Rev. Proc. 90-3, 1990-1 C.B. 402, sets forth areas of the Internal Revenue Code under the jurisdiction of the Associate Chief Counsel (Technical) in which the Internal Revenue Service will not issue advance rulings or determination letters. Section 4 of Rev. Proc. 90-3 is entitled "AREAS IN WHICH RULINGS OR DETERMINATION LETTERS WILL NOT ORDINARILY BE ISSUED."

SEC. 2. PROCEDURE

Section 4 of Rev. Proc. 90-3 is amplified by adding to section 4.01 the following new sections:

Section 265(a)(2).—Interest Expense Relating to Tax-Exempt Income.—Whether indebtedness is incurred or continued to purchase or carry obligations the interest on which is wholly exempt from the

taxes imposed by subtitle A of the Code.

Section 441(i).—Taxable Year of Personal Service Corporations.—Whether the principal activity of the taxpayer during the testing period for the taxable year is the performance of personal services within the meaning of section 1.441-4T(d)(1)(ii) of the temporary Income Tax Regulations.

Section 448(d)(2)(A).—Method of Accounting for Qualified Personal Service Corporations.—Whether 95 percent or more of the time spent by employees of the corporation, serving in their capacity as such, is devoted to the performance of services within the meaning of section 1.448-1T(e)(4)(i) of the temporary regulations.

SEC. 3. EFFECT ON OTHER REVENUE PROCEDURES

Rev. Proc. 90-3 is amplified.

SEC. 4. EFFECTIVE DATE

This revenue procedure will apply to all ruling requests on hand in the National Office on July 30, 1990, the date of the publication of this revenue procedure in the Internal Revenue Bulletin, as well as to all requests received thereafter.

Rev. Proc. 90-41

NOTE: THIS REVENUE PROCEDURE MAY ONLY BE USED TO PREPARE MAGNETIC MEDIA OR ELECTRONICALLY FILED SUBMISSIONS FOR TAX YEAR 1990 INFORMATION RETURNS TO INTERNAL REVENUE SERVICE (IRS). UPDATED COPIES ARE PUBLISHED EACH YEAR. PLEASE READ THIS PUBLICATION CAREFULLY. PERSONS REQUIRED TO FILE MAY BE SUBJECT TO A FAILURE TO FILE PENALTY IF THEY DO NOT FOLLOW THE INSTRUCTIONS IN THIS REVENUE PROCEDURE OR FOR FAILURE TO INCLUDE CORRECT INFORMATION. THE REVENUE RECONCILIATION ACT OF 1989 HAS CHANGED THE PENALTY PROVISIONS AND SOME OF THE MAGNETIC MEDIA FILING REQUIREMENTS FOR INFORMATION RETURN REPORTING. FOR FURTHER INFORMATION, PLEASE READ THE CHAPTERS CONCERNING "NATURE OF CHANGES," AND "FILING REQUIREMENTS."

- SECTION 2. FEDERAL DOLLAR CRITERIA

PART A. GENERAL

SECTION 1. PURPOSE

SPECIFICATIONS FOR FILING INFORMATION RETURNS ELECTRONICALLY HAVE BEEN INCLUDED IN THIS REVENUE PROCEDURE. CONDITIONS FOR FILING ON MAGNETIC MEDIA (TAPE OR DISKETTE) AND THROUGH ELECTRONIC FILING ARE IN MOST CASES THE SAME. ANY DIFFERENCES BETWEEN MAGNETIC MEDIA AND ELECTRONIC FILING WILL BE SPECIFIED THROUGHOUT THIS REVENUE PROCEDURE. PART C OF THIS PUBLICATION PROVIDES SPECIFIC INSTRUCTIONS FOR FILING INFORMATION RETURNS ELECTRONICALLY. IF THERE ARE ANY QUESTIONS CONCERNING EITHER MAGNETIC

MEDIA OR ELECTRONIC FILING, YOU MAY CONTACT INTERNAL REVENUE SERVICE (IRS) MARTINSBURG COMPUTING CENTER (MCC) FOR CLARIFICATION (SEE PART A, SEC. 3 FOR ADDRESS AND TELEPHONE NUMBER). IF YOU ARE REQUIRED TO FILE ON MAGNETIC MEDIA, YOU MAY SATISFY THE MAGNETIC MEDIA FILING REQUIREMENTS BY SUBMITTING YOUR DATA ELECTRONICALLY INSTEAD.

.01 The purpose of this revenue procedure is to provide the requirements and conditions for filing Forms 1098, 1099, 5498 and W-2G electronically or on magnetic media to IRS, including ½ inch magnetic tape; 5 ¼ inch and 3½ inch magnetic diskettes; or IBM 3480 compatible tape cartridges. Publication 1255 provides instructions for filing on 8 inch magnetic diskette. THIS REVENUE PROCEDURE IS TO BE USED FOR THE PREPARATION OF 1990 INFORMATION RETURNS ONLY. THIS PROCEDURE IS UPDATED YEARLY TO REFLECT NECESSARY CHANGES. PLEASE READ THIS PUBLICATION CAREFULLY. Specifications for filing the following forms are contained in this procedure:

(a) Form 1098, Mortgage Interest Statement.

(b) Form 1099-A, Information Return for Acquisition or Abandonment of Secured Property.

(c) Form 1099-B, Statement for Recipients of Proceeds From Broker and Barter Exchange Transactions.

(d) Form 1099-DIV, Statement for Recipients of Dividends and Distributions.

(e) Form 1099-G, Statement for Recipients of Certain Government Payments.

(f) Form 1099-INT, Statement for Recipients of Interest Income.

(g) Form 1099-MISC, Statement for Recipients of Miscellaneous Income.

(h) Form 1099-OID, Statement for Recipients of Original Issue Discount.

(i) Form 1099-PATR, Statement for Recipients (Patrons) of Taxable Distributions Received From Cooperatives.

(j) Form 1099-R, Statement for Recipients of Total Distributions From Profit-Sharing, Retirement Plans, Individual Retirement Arrangements, Insurance Contracts, Etc.

(k) Form 1099-S, Statement for Recipients of Proceeds From Real Estate Transactions.

(l) Form 5498, Individual Retirement Arrangement Information.

(m) Form W-2G, Statement for Recipients of Certain Gambling Winnings.

.02 Specifications for filing Forms 1042S and 8027 are contained in separate IRS publications. Specifications for filing Forms W-2 and W-2P on magnetic media are available from the Social Security Administration (SSA) ONLY.

.03 In most cases, the box numbers on the paper forms correspond with the amount codes used to file on magnetic media; however, if discrepancies occur, the instructions in this revenue procedure govern.

.04 The IRS/MCC has the responsibility for processing information returns filed on magnetic media, or by electronic filing. These information returns include Forms 1098, 1099 series, 5498, and W-2G.

IRS/MCC does NOT process Forms W-2 and W-2P; these forms are to be sent to SSA whether you file paper OR magnetic media returns.

IRS/MCC does, however, process magnetic media waiver requests and extension of time requests for filing Forms W-2/W-2P.

Therefore, contact IRS/MCC with questions concerning Forms W-2 and W-2P ONLY IF THE QUESTIONS PERTAIN TO AN EXTENSION OF TIME TO FILE ON PAPER OR MAGNETIC MEDIA OR MAGNETIC MEDIA WAIVER REQUEST. Questions pertaining to magnetic media filing of Forms W-2 or W-2P MUST be directed to SSA. TAX LAW QUESTIONS PERTAINING TO FORMS W-2 OR W-2P SHOULD BE DIRECTED TO IRS TAXPAYER SERVICE at 1-800-424-1040 (1-800-829-1040 after September 30, 1990), or to your local IRS office.

If you contact IRS/MCC with questions concerning Forms W-2/W-2P, and the questions are not pertaining to extensions of time or waivers for Forms W-2/W-2P, we will direct you to either SSA or IRS Taxpayer Service.

.05 Personnel at IRS/MCC are equipped to answer any questions you may have concerning the magnetic media or electronic filing of information returns. Tax law related questions should be directed to IRS Taxpayer Service at 1-800-424-1040 (1-800-829-1040 after September 30, 1990).

.06 This revenue procedure also provides the requirements and specifications for magnetic media or electronic filing under the Combined Federal/State Filing Program. (Refer to Part A, Sec. 16.)

.07 The following revenue procedures and publications provide more detailed filing procedures for certain information returns:

(a) 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" provides specific instructions on completing and submitting information returns to IRS. IRS/MCC includes this publication in the magnetic media reporting packages that are mailed to the transmitters who participate in the Magnetic Media Reporting Program (MMRP). These instructions are also available at IRS offices and can be obtained by contacting your local office, or by calling 1-800-424-FORM (1-800-829-FORM after September 30, 1990).

(b) Rev. Proc. 84-33, 1984-1 C.B. 502, or other current revenue procedure, regarding the optional method for agents to report and deposit backup withholding.

(c) Publication 1179, Specifications for Paper Document Reporting and Paper Substitutes for Forms 1096, 1098, 1099, 5498, and W-2G.

(d) Publication 1239, Requirements and Conditions for Submitting Form 8027, Employer's Annual Information Return of Tip Income and Allocated Tips, on Magnetic Tape.

(e) Publication 1187, Requirements and Conditions for Filing Form 1042S, Foreign Persons U.S. Source Income

Subject to Withholding, on Magnetic Tape.

(f) Publication 1245, Magnetic Tape Reporting for Forms W-4.

(g) Publication 1255, Requirements and Conditions for Filing Forms 1098, 1099, 5498, and W-2G on 8 Inch Diskette.

.08 This procedure supersedes the following:

Rev. Proc. 89-43 published in Publication 1220 (Rev. 7-89) [1989-2 C.B. 494], Requirements and Conditions for Filing Forms 1098, 1099, 5498 and W-2G on Magnetic Tape, 5¼ and 3½ Inch Magnetic Diskettes.

.09 Refer to Part A, Sec. 17 for definitions of terms used in this publication.

SEC. 2. NATURE OF CHANGES—CURRENT YEAR (TAX YEAR 1990)

.01 PROGRAMMING CHANGES—Part B—"Magnetic Media Specifications"

Payer/Transmitter "A" Record:

(a) Field Positions 2-3—"Payment Year"—must be incremented by one year (from 89 to 90).

(b) Field positions 42-43—"Magnetic Tape Filer Indicator"—Starting this year, magnetic tape filers MUST code the letters "LS," in uppercase letters, in Positions 42-43. This change is required for MAGNETIC TAPE FILERS AND TAPE CARTRIDGE FILERS ONLY. Diskette filers may continue to code blanks in these positions.

Payee "B" Record:

(a) Field Positions 2-3—"Payment Year"—must be incremented by one year (from 89 to 90).

(b) Field Positions 4-5—"Document Specific Code"—

The following categories for Form 1099-R Distribution Codes will now be:

(1) "Early (premature) distribution, no known exception"—Code 1

(2) "Early (premature) distribution, exception applies (as defined in section 72(q), (t), or (v))"—Code 2

(3) "Section 1035 exchange"—Code 6

(4) "Normal distribution"—Code 7

(5) Excess contributions plus earnings/excess deferrals (and/or earnings) taxable in 1990—Code 8

(6) Excess contributions plus earnings/excess deferrals taxable in 1989 —Code P

(7) Excess contributions plus earnings/excess deferrals taxable in 1988 —Code D

NOTE: IT WILL NO LONGER BE VALID TO CODE BLANKS IN *BOTH* POSITIONS 4 AND 5 OF THE PAYEE "B" RECORD FOR FORM 1099-R. YOU *MUST* PROVIDE AT LEAST ONE DISTRIBUTION CODE FOR THIS FORM. ALSO, A NUMERIC CODE MUST BE ENTERED IN ALL CASES EXCEPT WHEN CODE P OR D IS USED. HOWEVER, WHEN USING CODE P FOR AN IRA DISTRIBUTION UNDER SECTION 408(d)(4), YOU MAY ALSO ENTER CODE 1, IF IT APPLIES. IF MORE THAN ONE NUMERIC CODE IS APPLICABLE TO A DISTRIBUTION, YOU WILL NOW NEED TO REPORT TWO SEPARATE PAYEE "B" RECORDS.

(c) Field Positions 24-43—"Payer's Account Number for Payee"—In the past, if you had fewer than 20 characters, you were to left-justify the field. Now, you may EITHER left- or right-justify this field, and fill the remaining positions with blanks.

(d) Field Position 44—"IRA/SEP Indicator"—Starting this year, if you Code a "1", "2", "3", "4", "5", or "7" in either Position 4-5 of the Payee "B" Record (Document Specific Code) for Form 1099-R AND if you are reporting a distribution for an IRA or SEP, you will code a "1" in Position 44. If you are not reporting an IRA or SEP distribution, code a blank in this field.

End of Payer "C" Record—No changes.

State Totals "K" Record—No changes.

End of Transmission "F" Record—No changes.

.02 EDITORIAL CHANGES—PART A, "GENERAL"

.01 There have been numerous editorial changes due in part to the impact of the Revenue Reconciliation Act of 1989. IRS recommends that you read this publication in its entirety to ensure that you report properly. The changes are as follows:

(a) The Revenue Reconciliation Act of 1989 changed some of the magnetic media reporting requirements and penalty provisions. See Notice 90-15, printed in the IR Bulletin 1990-7 on February 12, 1990, for further information.

(b) Starting this year, IRS/MCC will be accepting information returns, both originals and corrections, by way of electronic filing as well as magnetic media. Therefore, a new section (Part C) has been added, and references to electronic filing have been made throughout this publication.

(c) The title of Publication 1220 has changed from "Requirements and Conditions for Filing Forms 1098, 1099, 5498, and W-2G on Magnetic Tape, 5¼ and 3½ Inch Magnetic Diskettes" to "Specifications for Filing Forms 1098, 1099 series, 5498, and W-2G Electronically or on Magnetic Tape, Tape Cartridge, 5¼ and 3½ Inch Diskettes," to incorporate the tape cartridge and electronic filing specifications.

(d) Added a new section (Part D) to provide miscellaneous information concerning the magnetic media reporting of information returns. This section contains a list of all of the magnetic media-related forms and publications available from IRS/MCC. This section also contains a table to provide the Federal dollar criteria requirements for reporting of information returns that can be compared with Table 2 in Part A, Section 16 that provides the individual state dollar criteria requirements.

(e) Added the IRS toll-free telephone number for those filers with tax law questions in Part A, Sec. 1.04, and Part A, Sec. 3.05(c).

(f) The title for the publication containing the 1099 instructions has changed in 1990 from "Instructions for Forms 1099, 1098, 5498, 1096, and W-2G" to "Instructions for Forms 1099, 1098, 5498, and W-2G". Therefore, the references in this publication have been changed accordingly.

(g) Part A, Sec. 4, "Filing Requirements", has been changed to reflect the impact of the Revenue Reconciliation Act of 1989, including:

(1) All Forms 1098, 1099 series, 5498, and W-2G are to be filed on magnetic media with IRS if you have 250 or more of any of them SEPARATELY. None of the forms will be aggregated.

(2) The "look-back" rule has been RESCINDED which stated that you are required to file on magnetic media this year if you had the requirement to file in the previous year. You are only required to file this year if you exceed the filing threshold (250) for Tax Year 1990.

(h) Part A, Sec. 6, "Vendor List," has been added to provide the vendor list that IRS/MCC maintains for those filers who wish to file on magnetic media but are having difficulty finding software companies or service bureaus in their area. This section will provide information on how to order the list if you are a filer, and how to be added to the list if you are a vendor.

(i) In the past, filers were required to apply for different Transmitter Control Codes (TCC) for different types of media. This is no longer necessary. (See Part A, Sec. 7, Form 4419, "Application for Filing Information Returns Magnetically/Electronically.") If you have more than one TCC already assigned to you, you may use any that you wish.

(j) A note was added to Part A, Sec. 7, encouraging filers to submit application Form 4419 at least 30 days before the due date of the returns to allow IRS/MCC time to process the application. However, IRS/MCC will still accept applications up to the filing due date.

(k) A note was added to Part A, Sec. 7, concerning filers who file on magnetic media with IRS/MCC, but still submit Form 1096, Annual Summary and Transmittal of U.S. Information Returns, to the IRS Service Center that processes paper information returns. If you file your information returns on magnetic media with IRS/MCC, use transmittal Form 4804 to submit your data, NOT Form 1096.

(l) Beginning this year, IRS/MCC will NOT return media to the filers, whether it is test, original, or correction data, after successfully processing the media. (See Part A, Sec. 12, "Processing of Magnetic Media Returns.") Your files will only be returned if a replacement file is necessary.

(m) A note was added to Part A, Sec. 13, "How to File Corrected Returns," concerning filers who submit late filed information returns as correction documents instead of originals (coding a "G" code in the Payee "B" Record).

(n) In the past, if you were correcting a bad payee address, you were instructed to correct the address using two transactions. This has been changed in the chart in Part A, Sec. 13. It now takes only one transaction to correct a bad payee address, *UNLESS* you are *also* correcting a bad payee name *or* TIN with the same correction. It will then still require two transactions to correct the bad address.

(o) Part A, Sec. 13 has information concerning the impact of the Revenue Reconciliation Act of 1989 upon the submission of corrected returns, and when IRS/MCC can process your corrections. It also refers you to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" for specific information concerning the due date for filing information returns, and any penalties that may apply to returns considered to be filed late or incorrectly.

(p) Part A, Sec. 14, "Taxpayer Identification Number (TIN)," has been rewritten to remove tax law information and to add information concerning the creation of Name Controls.

(q) The section on contacting IRS/MCC has been moved for easy reference to Part A, Sec. 3, "How to Contact the IRS Martinsburg Computing Center." Information was added to this chapter to instruct filers when it is appropriate to contact IRS/MCC, and if it is not appropriate, where the information can be obtained.

(r) In Part A, Sec. 19, "Major Problems Encountered," five problems were added (numbers 11, 12, 13, 14, and 15).

(s) Added the IRS/MCC Telecommunication Devices for the Deaf (TDD) telephone number in Part A, Sec. 3.03.

.03 EDITORIAL CHANGES—PART B, "MAGNETIC MEDIA SPECIFICATIONS"

.01 The following editorial changes were made to Part B, Sec. 1-9:

(a) Part B, Sec. 2, information was added concerning IRS/MCC accepting IBM 3480 compatible tape cartridges for Tax Year 1990 data, and the tape cartridge specifications are provided.

(b) Part B, Sec. 4.04, "Payer/Transmitter "A" Record," indicates that the first record in your magnetic media file will always be a "Payer/Transmitter "A" Record."

(c) Part B, Sec. 4, "Payer/Transmitter "A" Record," the following changes were made to the "AMOUNT INDICATOR FIELDS."

(1) For Forms 1099-B, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-OID, and 1099-PATR, the term for "Federal Income Tax Withheld" has been further defined as "Backup Withholding."

(2) For Form 1099-R, a Note 2 has been added referring you to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" for the definition of Federal Income Tax Withheld, and how it is applied to Form 1099-R reporting.

(3) For Form 1099-B, Amount Code 7 changed to "Unrealized profit or (loss) on open

contracts— 12/31/89," and Amount Code 8 changed to "Unrealized profit or (loss) on open contracts—12/31/90."

(4) For Form 1099-DIV, the note has been changed to state that Amount Code 1 MUST equal the sum of Amount Codes 2, 3, 4, and 5.

(5) For Form 1099-INT, Amount Code 5, title changed to "Foreign tax paid."

(6) For Form 1099-MISC, Amount Code 3, title changed to "Prizes, awards, etc."

(7) For Form 1099-OID, Amount Code 1, title changed to "Original issue discount for 1990."

(8) For Form 5498, Amount Code 1, title changed to "Regular IRA contributions made in 1990 and 1991 for 1990." In the Note for Form 5498, any references to calendar years have been incremented by one year.

(d) Descriptive information was added, and record layout was revised to add the "Magnetic Tape Filer Indicator" in positions 42-43.

(e) Positions 44-48, Transmitter Control Code (TCC)—added a sentence instructing filers to NOT enter more than one TCC per file.

(f) Position 49—Foreign Corporation Indicator—added a note that some filers are automatically coding a "1" in this position to indicate a foreign corporation, whether it is or not. Since IRS processes foreign payer information differently from domestic payer information, this has caused processing problems. The payer may be subject to a penalty for providing incorrect information to IRS for any records coded as foreign that are not.

(g) Part B, Sec. 6, "Payee "B" Record," for Form 1099-R, the field title "Category of Distribution" was changed to "Distribution Code." Also, some category titles changed under Description and Remarks to:

(1) Early (premature) distribution, (no known exception)—Code 1

(2) Early (premature) distribution, exception applies (as defined in Section 72(q), (t), or (v))—Code 2

(3) Section 1035 exchange—Code 6

(4) Normal distribution—Code 7

(5) Excess contributions plus earnings/excess deferrals (and/or earnings) taxable in 1990—Code 8

(6) Excess contributions plus earnings/excess deferrals taxable in 1989 —Code P

(7) Excess contributions plus earnings/excess deferrals taxable in 1988 —Code D

(h) Part B, Sec. 6, "Payee "B" Record", for Form 1099-R, added a sentence under "Description and Remarks" that you MUST enter at least one numeric code from the table that provides the categories for distribution in positions 4-5 of the Document Specific Code, Payee "B" Record, except when Code P or D is used. Also, if more than one numeric code is applicable, two separate Payee "B" Records are required.

(i) Positions 24-43—"Payer's Account Number for Payee," the instruction to left-justify and fill remaining positions with blanks has changed to EITHER left- or right-justify, and fill remaining positions with blanks.

(j) Positions 45-46—"Percentage of Total Distribution," a note was added to clarify that the field is only two positions in length since the figure MUST be 99% or less, and instructs how to round off fractions. If the percentage is 100, leave this field blank.

(k) Form 1099-S, Field Positions 379-417, "Description", added a statement that if you enter the address of the property being reported, include the state and ZIP code where the property is located.

(l) Part B, Sec. 7, End of Payer "C" Record, instructions were added that submitting files with missing or incorrect End of Payer "C" records will result in your media being returned for correction.

SEC. 3. HOW TO CONTACT THE IRS MARTINSBURG COMPUTING CENTER

.01 Magnetic media processing for all service centers is centralized at IRS/MCC. Your magnetic media files containing information returns covered by this revenue procedure, and all requests for IRS magnetic media-related publications, information, undue hardship waivers, requests for extensions of time to file, or magnetic media-related forms are to be directed to the following addresses:

If by Postal Service:

IRS-Martinsburg Computing Center
P.O. Box 1359
Martinsburg, WV 25401-1359

or

If by truck or air freight:

IRS-Martinsburg Computing Center
Magnetic Media Reporting Section
Route 9 and Needy Road
Martinsburg, WV 25401

.02 Hours of operation are 8:30 AM until 6:00 PM Eastern time. The telephone number is (304) 263-8700 (not a toll-free number). NOTE: The telephone number for the actual electronic filing of information returns is provided in Part C, Section 5.02. If you need to contact the Electronic Filing Coordinator at IRS/MCC, you may call the (304) 263-8700 telephone number.

.03 IRS/MCC has installed Telecommunication Devices for the Deaf (TDD). The number is 304-267-3367.

.04 Requests for 1099 paper returns, publications or forms not related to magnetic media processing, or paper Forms W-2/W-2P, MUST be requested by calling the "Forms Only Number" listed in the local telephone directory, or by calling the IRS toll-free number 1-800-424-FORM (1-800-829-FORM after September 30, 1990).

.05 Do NOT contact IRS/MCC if:

a. You have a question concerning filing Forms W-2/W-2P, either on paper or magnetic media, with SSA. You MUST contact your local SSA office for this information; therefore, IRS/MCC will refer you to SSA.

b. You want to order paper forms for information return filing, including paper Forms W-2/W-2P. IRS/MCC does NOT stock any paper

forms for information return or wage reporting. Call the IRS toll-free number for forms (1-800-424-FORM, 1-800-829-FORM after September 30, 1990), or call your local IRS office to order paper forms.

c. You have a question concerning the completion of the information return or Form W-2/W-2P. (For example, "How do I report a premature distribution on Form 1099-R?"). Call the IRS toll-free number (1-800-424-1040, 1-800-829-1040 after September 30, 1990) for such information.

d. You have received a penalty notice and you need additional information, or you are requesting an abatement of the penalty. Most penalty notices contain an IRS representative's name and phone number to contact with questions. This person will be most familiar with your particular case.

The letter may instruct you to respond in writing within a certain timeframe. IRS/MCC does NOT issue penalty notices, therefore, it does NOT have the authority to abate penalties. You MUST contact the service center that issued the penalty notice if you have questions, or if you are requesting abatement of the proposed penalty.

SEC. 4. FILING REQUIREMENTS

.01 Section 6011(e)(2)(A) of the Internal Revenue Code as amended by the Revenue Reconciliation Act of 1989 (Public Law No. 101-239 (1989) 103 Stat. 2106, Section 7713), requires any person, including corporations, partnerships, individuals, estates, and trusts, who file 250 or more information returns to file such returns on magnetic media. *This requirement applies separately for each type of form.* The filer also has the option of filing such returns electronically in lieu of magnetic media.

Thus, for example, if a person is required to file 200 returns on Form 1099-INT and 350 returns on Form 1099-DIV for a calendar year, the person is *not* required to file Forms 1099-INT on magnetic media, but is required to file Forms 1099-DIV on magnetic media.

.02 All filing requirements that follow apply individually to each reporting entity as defined by its separate Taxpayer Identification Number (TIN), Social Security Number (SSN), or Employer Identification Number (EIN). For example, if you are a corporation with several branches or locations and each uses the same EIN, you must aggregate the total volume of returns to be filed for that EIN and apply the filing requirements to each type of return accordingly.

.03 The following requirements apply separately to both originals and corrections filed on magnetic media:

1098 1099-A 1099-B 1099-DIV 1099-G 1099-INT 1099-MISC 1099-OID 1099-PATR 1099-R 1099-S 5498 W-2G	250 OR MORE OF ANY of these forms require magnetic media or electronic filing with IRS. These are stand alone documents and are not to be aggregated for purposes of determining the 250 threshold. For example, if 100 Forms 1099-B are to filed, they need not be filed magnetically or electronically since they do not meet the threshold of 250. However, if you have 300 Forms 1099-R, they must be filed magnetically or electronically since they do meet the threshold of 250.
W-2/W-2P	250 or more of either form must be filed with SSA.

.04 The above requirements shall not apply if you establish undue hardship (see Part A, Sec. 5).

.05 Filers who are required to submit their information returns on magnetic media may choose to submit their documents by electronic filing instead. (See Part C.) Filers who submit their information returns electronically are considered to have satisfied the magnetic media filing requirements.

.06 In the past, if you were required to file on magnetic media for a particular tax year, you were automatically required to file on magnetic media for the following tax year, regardless of the volume of returns. The Revenue Reconciliation Act of 1989 eliminated this "look-back" rule. Therefore, if you were required to file on magnetic media for Tax Year 1989, and the volume of documents you will be submitting for Tax Year 1990 is less than 250, you are not required to file on magnetic media for Tax Year 1990.

SEC. 5. FORM 8508, REQUEST FOR WAIVER FROM FILING INFORMATION RETURNS ON MAGNETIC MEDIA

.01 If you are required to file on magnetic media but fail to do so (or to file electronically in lieu of magnetic media filing), and you do not have an approved waiver on record, you may be subject to a failure to file penalty.

.02 Any person required to file original or corrected returns on magnetic media may request a waiver from these filing requirements if such filing would create an undue hardship by submitting Form 8508, Request for Waiver From Filing Information Returns on Magnetic Media, with IRS/MCC.

.03 If a waiver for original documents is approved, a waiver for corrections to these documents will be automatically approved. However, if you submit your original returns on magnetic media but not your corrections, then a waiver must be requested for corrections only if they exceed the filing threshold of 250 returns.

.04 Generally, only the Payer may sign the Form 8508; however, the

transmitter may sign if they have a power-of-attorney from the respective payers, and a copy of the power-of-attorney is attached to the Form 8508.

.05 A separate Form 8508 must be submitted for each payer. Do not submit a list of payers. Specify the type of returns for which the waiver is being requested on the Form 8508 (e.g., 1099-DIV, 1099-A, etc.).

.06 The waiver, if approved, will provide exemption from magnetic media filing for one tax year only. Filers may not apply for a waiver for more than one tax year at a time; application must be made each year a waiver is necessary.

.07 Copies of the Form 8508 are included in this publication, or may be obtained from other IRS offices. Form 8508 may be computer-generated as long as it contains all the information requested on the original form, or it may be photocopied.

.08 All requests for magnetic media related undue hardship exemptions must be submitted to IRS/MCC at least 90 days before the due date of the return except as stated in Sec. 5.08. *IF A REQUEST IS NOT POSTMARKED AT LEAST 90 DAYS BEFORE THE DUE DATE OF THE RETURN, IT WILL NOT BE CONSIDERED.* Therefore, for Forms 1098, 1099 series, and W-2G, the waiver request must be submitted to IRS/MCC with a postmark date of November 30. For Forms 5498, the waiver request must be submitted to IRS/MCC with a postmark date of March 2. Any waiver requests received with postmarks after the deadline(s) will be automatically denied.

.09 All magnetic media-related undue hardship requests for Forms W-2/W-2P are to be filed with IRS/MCC, NOT SSA, and must be postmarked at least 90 days before the due date of the return, also. Since Forms W-2/W-2P are due to SSA by February 28, the due date for the waiver request is November 30.

.10 Waivers are granted on a case-by-case basis and are approved at the discretion of the IRS/MCC. You must allow a minimum of 30 days for IRS/MCC to respond to a waiver request.

.11 If your waiver request is approved, keep it for your records. DO NOT send a copy of the approved waiver to the service center where you file your paper returns.

.12 AN APPROVED WAIVER FROM FILING INFORMATION RETURNS ON MAGNETIC MEDIA DOES NOT PROVIDE EXEMPTION FROM ALL FILING; YOU MUST STILL TIMELY FILE YOUR INFORMATION RETURNS ON ACCEPTABLE PAPER FORMS WITH THE APPROPRIATE SERVICE CENTER.

SEC. 6. VENDOR LIST

.01 IRS/MCC will provide you with a list of vendors who support magnetic media filing upon request. This list contains the names of service bureaus that will produce your files for you on the prescribed types of magnetic media, or via electronic filing. It also contains the names of vendors who can provide software packages for filers who wish to produce magnetic media or electronic files on their own computer systems or personal computers. This list is for filer information only, and in no way implies IRS approval or endorsement of their products or services.

.02 IRS/MCC will provide the vendor list to those filers who contact IRS/MCC at the address and phone number shown in Part A, Sec. 3. IRS/MCC WILL NOT PROVIDE ANY COMPANY NAMES OVER THE TELEPHONE.

.03 If you are a vendor that offers a software package, has the ability to produce magnetic media for your customers, or has the capability to electronically file information returns, and you would like to be included on the list, you MUST submit a written request. The written request must include:

a. The company name
b. Address (include the city, state, and ZIP code)
c. Telephone number (include area code)
d. Contact person
e. Type of service provided (for example, service bureau and/or software)
f. Type(s) of magnetic media offered (for example, ½ inch magnetic tape; tape cartridge; 8 inch, 5¼ inch, and/or 3½ inch diskettes; electronic filing).

.04 You may submit your request to be added to the vendor list at any time. Send the written request to IRS/MCC at the address provided in Part A, Sec. 3. IRS/MCC WILL NOT ACCEPT ANY COMPANY NAMES OVER THE TELEPHONE. The vendor list will be updated once a year, in March, to include new vendors.

SEC. 7. FORM 4419, APPLICATION FOR FILING INFORMATION RETURNS MAGNETICALLY/ELECTRONICALLY

.01 For purposes of this revenue procedure, the PAYER may be the person making payments; a recipient of mortgage interest payments; a broker; a barter exchange; a person reporting a real estate transaction; a trustee or issuer of an IRA or SEP; or a lender who acquires an interest in secured property or who has reason to know that the property has been abandoned. The TRANSMITTER is the organization submitting the magnetic media file. The payer and transmitter may be the same organization.

Payers or their transmitters are required to complete Form 4419, Application for Filing Information Returns Magnetically/Electronically, to ensure equipment compatibility. A single Form 4419 should be filed no matter how many types of returns the payer or transmitter will be submitting on magnetic media or by electronic filing. For example, if you plan to file Forms 1099-INT and Forms 1099-DIV on magnetic media, submit one Form 4419. If you later wish to file another type of return on magnetic media in the Form 1099, 1098, 5498 or W-2G series, it is not necessary to submit a new Form 4419. If you wish to file both electronically and magnetically, you need only submit one Form 4419.

Copies of Form 4419, for your use, are included in this publication. Please read the instructions on the back of the form very carefully. This form may be photocopied. Requests for additional forms or other information related to magnetic media processing should be addressed to IRS/MCC. (See Part A, Sec. 3 for address.)

.02 Form 4419 can be submitted at any time during the year. However, Form 4419 should be submitted to IRS/MCC at least 30 days before the due date of the return(s) you wish to file on magnetic media. This will

allow IRS/MCC the minimum amount of time necessary to process your application and send a response back to you. Otherwise, you may not receive the letter assigning your TCC to you in time for you to code the necessary TCC in your Payer/Transmitter "A" Record (see Part B, Sec. 4 for further information). For documents to be filed electronically, Form 4419 should be submitted as soon as possible, but not later than December 1. (See Part C, Sec. 2.) In the event that your computer equipment or software is not compatible with the IRS equipment, a waiver may be requested so that you may file your returns on paper documents for that tax year.

A five character alpha/numeric Transmitter Control Code (TCC) will be assigned and included in an approval letter. If you have more than one TCC, you must use more than one tape or diskette. You *cannot* use two TCCs on the same medium. They must be reported separately.

IRS encourages filers who file for multiple payers to submit one application and to use one Transmitter Control Code for all payers. Include a list of all payers and their TINs with the Form 4419. If you file for additional payers in later years, notify IRS in writing providing the additional names and TINs. Do not submit a new application for these additional payers.

Magnetic tape, diskette and electronically filed returns may not be submitted with IRS until the application has been approved and a TCC assigned. This TCC will be entered in the Transmitter Control Code field of the "A" Record—*DO NOT* enter blanks because your media will be returned.

.03 Upon approval, a magnetic media reporting package containing the appropriate revenue procedures and necessary transmittals, forms, labels, and instructions will be sent to the attention of the contact person indicated on Form 4419. Thereafter, IRS/MCC will send the transmitter a package containing the updated revenue procedure and forms each year. This package will continue to be sent to the contact person indicated on the Form 4419 unless IRS/MCC has received information concerning any changes or updates.

.04 If you have your magnetic media files prepared by a service bureau, you may not need to submit an application to obtain a TCC. Some service bureaus will produce your file for you, code their own TCC on the media, and send it to IRS/MCC for you.

Other service bureaus will prepare your magnetic media files, then send them to you to submit to IRS/MCC. These service bureaus may require you to submit an application to IRS/MCC so that you will be assigned your own TCC to be coded in the Payer/Transmitter "A" Record. (See Part B, Sec. 4.) Contact your service bureau for further information.

.05 Once approved to file magnetically or electronically, you do not need to reapply each year unless:

(a) You discontinue filing magnetically or electronically for a year, since your TCC may have been reassigned by IRS/MCC.

(b) Your magnetic media files were transmitted in the past by a service agency. However, you now have computer equipment compatible with that of IRS and wish to prepare your own files, so you must request your own TCC by filing an application Form 4419.

.06 If any of these conditions apply to you, contact IRS/MCC for clarification. Also, notify IRS/MCC if you had hardware or software changes that would affect the characteristics of the magnetic media or electronic submission. Be sure to refer to your current TCC in all correspondence with IRS/MCC.

.07 If you file on several different types of magnetic media (e.g., tape, 8 inch diskette, and 5¼ inch floppy disk) or by electronic filing, you need only submit one Form 4419. In the past, IRS/MCC required filers submitting different types of media to obtain different TCCs. This is no longer necessary. You may use the same TCC on all of your media. For example, if you submit a magnetic tape, an 8 inch diskette, and a 5¼ inch floppy disk, and an electronic file, you may use the same TCC for all types of filing. If you already have different TCCs assigned to you, you may choose any of the TCCs to be coded into the Payer/Transmitter "A" Record. It doesn't matter which one you use; however, remember to code only one TCC per medium. Please contact IRS/MCC and indicate which TCC(s) you will not be using so that we can remove them from our files. (See Part A, Sec. 3 for the address and telephone number.)

.08 If you are an approved filer on magnetic media and the name, EIN, or address of your organization or contact person changes, please notify IRS/MCC in writing so that your file may be updated to reflect the current information.

.09 In accordance with section 1.6041-7(b) of the Income Tax Regulations, payments by separate departments of a health care carrier to providers of medical and health care services may be reported on separate returns on magnetic media. In this case, the headquarters will be considered the transmitter, and the individual departments of the company filing reports will be considered payers. A single Form 4419 covering all departments filing on magnetic media should be submitted. One TCC may be used for all departments.

.10 Approval to file on magnetic media or by electronic filing does not imply endorsement by IRS of the computer software or quality of tax preparation services provided.

.11 The magnetic media or electronic file MUST be accompanied by Form 4804 (see Part A, Sec. 9), which will provide IRS with the necessary information. Filing the same information returns either magnetically or electronically, as well as on paper forms, will result in duplicate filing and may result in erroneous penalty notices being sent to the payees.

SEC. 8. TEST FILES

.01 IRS does not require magnetic media or electronic filers to submit test files, *except* for those filers who wish to participate in the Combined Federal/State Filing Program (see Part A, Sec. 16 for further information concerning combined federal/state filing).

However, IRS encourages first-time magnetic media or electronic filers, and filers of floppy disks or diskettes, to submit a test file for review prior to the filing season.

IRS will determine whether or not your file is formatted correctly, and will check the content of the records to ensure that it meets the

specifications of the current revenue procedure.

For those filers who have submitted magnetic media files in previous tax years, sending a test file provides them the opportunity to ensure that their software reflects the annual programming changes; however, submitting a test file is not mandatory for current filers.

.02 If you are a new filer, you must submit a Form 4419 before you send in a "TEST" file. If approved, you will be assigned a five character alpha/numeric Transmitter Control Code (TCC). This TCC must be entered in the TCC field of your Payer/Transmitter "A" Record (see Part B, Sec. 4).

.03 All tape and diskette "TEST" files must be submitted between October 1 and December 15 of each year. Do not submit tape or diskette "TEST" files after December 15. Only a hardcopy printout of the tape or diskette that shows a sample of each type of record used (A, B, C and F) may be submitted after December 15 and it must be postmarked before January 15.

.04 Electronically filed "TEST" files must be submitted between October 1 and January 15. (See Part C, Sec. 3).

.05 The information in the "A" Record must be ACTUAL information—NOT FICTITIOUS. Clearly mark the hardcopy print as "TEST" data and include identifying information such as name, telephone number, and address of a person who can be contacted to discuss its acceptability. If your "TEST" file is acceptable, we will send you an approval letter.

.06 Form 4804, Transmittal of Information Returns Reported on Magnetic Media, must accompany your test magnetic media file. Indicate that the file contains test data by marking the "TEST" checkbox in block 1 on Form 4804. Also, write "TEST" on the external media label, Form 5064. The "TEST" data must be programmed according to the current revenue procedure.

.07 For magnetic media filers, submit a "TEST" file between October 1 and December 15 for the first year you wish to participate in the Combined/Federal State Filing Program. For electronic filers, the time frame will be between October 1 and January 15. A hardcopy print is NOT an acceptable "TEST" file for this program for either magnetic media or electronic filers.

.08 Approved payers or transmitters should send the "TEST" file to IRS/MCC (see Part A, Sec. 3 for the address). See Part C, Sec. 3 for instructions on submitting electronic test files.

.09 IRS/MCC will send an acknowledgement in writing to indicate whether your "TEST" file was good or bad. If it was formatted incorrectly, we will indicate what the problems are in a letter and your file will be returned to you for replacement and resubmission. The "TEST" must be resubmitted by the deadline of December 15, 1990. After IRS/MCC successfully processes your test file, the media will not be returned.

SEC. 9. FILING OF MAGNETIC MEDIA RETURNS AND RETENTION REQUIREMENTS

.01 Form 4804, Transmittal of Information Returns Reported on Magnetic Media, must accompany all magnetic media and electronic submissions. This includes original, correction, replacement, and test data.

.02 In many cases, you can program your computer to generate a substitute Form 4804/4802 that contains the pertinent information. IRS encourages you to computer-generate your transmittal forms, as long as you include the necessary information contained on the most current revision of the form. You may also photocopy this form. If you file for multiple payers and have the authority to sign the affidavit on Form 4804, you should also submit Form 4802, "Transmittal for Multiple Magnetic Media Reporting."

.03 For magnetic media filers, the transmitter may code any combination of payers and/or documents on their media. For example, if you are reporting Forms 1099-INT for Bank A, Forms 1099-DIV for Bank B, and Forms 1098 for Bank C, you need not create 3 separate tapes or diskettes. All 3 banks and all types of documents can be coded on one tape or diskette. If you do create multiple tapes or diskettes, they can all be sent in one package; you need not send a separate package containing each tape or diskette. Be sure to include Form 4804, 4802, or computer-generated substitute with your magnetic media shipment. DO NOT MAIL THE MAGNETIC MEDIA AND THE TRANSMITTAL DOCUMENTS SEPARATELY. Magnetic media files covered by this revenue procedure are to be sent to IRS/MCC. (See Part A, Sec. 3 for the address.)

.04 Since IRS/MCC only processes returns filed magnetically or electronically, paper information returns for information not being filed magnetically or electronically must be submitted to the appropriate service center using Form 1096, Annual Summary and Transmittal of U.S. Information Returns. *DO NOT send information returns filed on paper forms to IRS/MCC.*

.05 DO NOT REPORT DUPLICATE INFORMATION; I.E., IF YOU SUBMIT PART OF YOUR RETURNS ON PAPER AND PART ON MAGNETIC MEDIA (OR VIA ELECTRONIC FILING), BE SURE THE SAME INFORMATION IS NOT INCLUDED IN BOTH SUBMISSIONS.

.06 Form 4804 contains an affidavit that MUST be signed by the payer; however, the transmitter, service bureau, paying agent, or disbursing agent (all hereafter referred to as agent), may sign the affidavit on behalf of the person required to file/payer if the agent has the authority to sign the affidavit under an agency agreement (either oral, written, or implied) that is valid under state law and adds the caption "FOR: (name of payer)."

NOTE: Failure to sign the affidavit on Form 4804 will result in your file being returned to you unprocessed.

.07 Although a duly authorized agent may sign the affidavit, the payer is responsible for the accuracy of the Form 4804 and the returns filed, and the payer will be liable for penalties for failure to comply with filing requirements.

.08 If returns from different branches or locations for one payer are submitted on the same file, consolidate each type of information return under one Payer/Transmitter "A" Record. For example, all Forms 1099-INT for the same payer on a single file must be sorted together under one Payer/Transmitter "A" Record followed by the appropriate "B" Records and one "C" Record.

.09 Before shipping magnetic media files, include the following:

(a) A signed Form 4804 (or computer-generated substitute).

(b) A Form 4802 if you transmit for multiple payers and have the authority to sign the affidavit on Form 4804.

(c) The magnetic media with an external identifying label (Form 5064) as described in Part B, Sec. 1.02. Be sure to include the proper sequence on this label.

(d) On the outside of the shipping container, include a Form 4801 or a substitute for the form which reads "DELIVER UNOPENED TO TAPE LIBRARY—MAGNETIC MEDIA REPORTING—BOX ___ of _____." If there is only one container, mark the outside as Box *1* of *1*. For multiple containers, include the sequence (for example, Box 1 of 3, 2 of 3, 3 of 3).

(e) If you were granted an extension, include a copy of the approval letter with the magnetic media shipment. (See Part A, Sec. 11 for information on how to apply for an extension of time to file.)

NOTE: See Part C, Sec. 4 for electronic filing submission requirements.

.10 IRS will not pay for or accept "Cash-on-Delivery" or "Charge to IRS" shipments of reportable tax information that an individual or organization is legally required to submit.

.11 Files may be returned to you due to coding or format errors. These files are to be corrected and returned to IRS within 45 days from the date of notice or the payer may be subject to a penalty. A copy of page 2 of the letter sent by IRS must be returned with the replacement file.

.12 Payers are required to retain a copy of the information returns filed with IRS or to have the ability to reconstruct the data for at least three years from the reporting due date.

SEC. 10. FILING DATES

.01 The dates prescribed for filing paper returns with IRS also apply to magnetic media or electronic filing. Magnetic media or electronic filing with IRS for Forms 1098, 1099, and W-2G must be on a calendar year basis. Form 5498 is used to report amounts contributed during or after the calendar year but not later than April 15.

.02 Information returns filed on magnetic media for Forms 1098, all types of Forms 1099, and Forms W-2G must be submitted to IRS/MCC postmarked no later than February 28. The due date for furnishing the required copy or statement to the payee is January 31.

.03 Information returns filed on magnetic media for Form 5498 must be submitted to IRS/MCC postmarked no later than May 31. Trustees or issuers of IRAs or SEPs must provide participants with a statement of the value of the participant's account by January 31, in any written format. Statements are due to the participants by May 31 for contributions made to IRAs for the prior calendar year. Form 5498 is filed for contributions to be applied to 1990 that are made between January 1, 1990, and April 15, 1991.

.04 If any due date falls on a Saturday, Sunday, or legal holiday, the due date is extended to the next day that is not a Saturday, Sunday, or legal holiday.

SEC. 11. EXTENSIONS OF TIME TO FILE

.01 A payer may request an extension of time to file information returns by submitting Form 8809, Request for Extension of Time To File Information Returns, to IRS/MCC. This form may be used to request an extension of time for information returns submitted on paper; magnetic media; electronically; or for all three types of submissions.

.02 A transmitter may submit Form 8809 for multiple payers by attaching a list of their names, addresses, and TINs to Form 8809. Also, Form 8809 may be computer-generated or photocopied. Be sure that all the pertinent information is included. If you are requesting extensions of time for more than 50 payers, we strongly encourage you to submit the list of payers, addresses, and EINs on tape or diskette. Contact IRS/MCC for the format. (See Part A, Sec. 3 for the address.) Transmitters who submit the extension of time requests on magnetic media will receive one approval letter from IRS/MCC with an attached listing of the payers with approved extensions.

.03 Request an extension of time in increments of 30 days AS SOON AS YOU ARE AWARE that an extension is necessary but no later than the due date of the return. The request must be sent to IRS/MCC. (See Part A, Sec. 3 for the address.) You must allow a minimum of 30 days for IRS/MCC to respond to an extension request.

.04 Form 8809 must be postmarked no later than the due date of the return(s) for which you are requesting an extension of time. If you are requesting an extension of time to file several types of forms, you may use one Form 8809, but you must submit Form 8809 to IRS/MCC postmarked no later than the earliest due date. For example, if you are requesting an extension of time to file both Forms 1099-INT and Forms 5498, you must submit Form 8809 postmarked on or before February 28. You may complete more than one Form 8809 to avoid this problem.

.05 IRS will process your Form 8809 and respond in writing. If the extension request is granted, a copy of the approved letter ONLY must be included with the transmittal Form 1096 or Form 4804 (or computer-generated substitute) when the file is submitted. INCLUDE ONLY THE APPROVAL LETTER SENT FROM IRS. DO NOT SEND A COPY OF FORM 8809 WITH EITHER YOUR PAPER DOCUMENTS TO THE SERVICE CENTER, OR YOUR MAGNETIC MEDIA FILE TO IRS/MCC. *Also, if you originally requested a 30-day extension and then find you need an additional 30 days, a copy of the first approved extension must accompany your second request.* IRS/MCC will not grant more than two extensions of time for a maximum of 60 days.

.06 You can request an extension for only one tax year on Form 8809.

.07 The extension request must be signed by the payer or a duly authorized representative.

.08 Failure to properly complete and sign the Form 8809 may cause delays in processing the request or result in a denial of your request. Please read the instructions on the back of the Form 8809 very carefully.

.09 Copies of the Form 8809 may be obtained from IRS/MCC (see Part A, Sec. 3 for the address), or from other IRS offices. Form 8809 may also be computer-generated as long as it contains all the information requested on the original form, and it may be photocopied.

SEC. 12. PROCESSING OF MAGNETIC MEDIA RETURNS

.01 All data received at IRS/MCC for processing will be given the same protection as individual returns (Forms 1040). IRS/MCC will process your magnetic media files and check that the records were formatted according to the most current revenue procedure. Please be sure that your record format and coding comply with this revenue procedure, which is to be used for the preparation of Tax Year 1990 information returns *only*.

.02 Revenue procedures are revised annually to reflect legislative and form changes to the information returns.

.03 If your data is formatted incorrectly, or if the file contains information that will cause invalid conditions in the IRS processing (for example, you code all 9's or all zeros in the field for the TIN), we will return your file for replacement.

.04 To distinguish between a correction and a replacement:

A correction is media submitted by the payer to correct records that were successfully processed by IRS, but contained erroneous information.

A replacement is media that IRS has returned to the payer or transmitter due to format errors encountered during processing. After necessary changes have been made, the media must be returned to IRS/MCC to be re-input.

.05 Beginning with Tax Year 1990, (processed in Calendar Year 1991), IRS/MCC will no longer return your files after processing. Therefore, if IRS/MCC returns your file to you, it is because a replacement is needed. *Open all packages immediately.* Files returned due to format or coding errors must be corrected and returned to IRS/MCC within 45 days from the date of the notice to avoid a failure to file penalty.

IRS/MCC will work with magnetic media filers as much as possible to assist with processing problems. If IRS/MCC calls your office, please respond promptly since we may have information that you need to correct your file.

.06 Do not use special shipping containers for transmitting data to IRS/MCC. Because of the high volume of data received and shipping costs involved, they will not be returned.

.07 When submitting your file to IRS/MCC, please keep in mind that:

a. You may include any of the forms covered by this revenue procedure on one tape, tape cartridge, diskette, or electronic submission. You do not have to separate the different types of forms on different media. For example, one tape or diskette could contain Forms 1098, 1099-INT, 1099-DIV, and 5498 for different payers. You need only identify the different forms and payers with different Payer/Transmitter "A" Records which are coded on the magnetic media. (See Part B, Sec. 4 for details.)

b. You may submit multiple types of media in your shipment. However, submit a separate Form 4804 for each type of media.

c. Enclose your transmittal Form 4804 in with your shipment. Do not send it in a separate mailing. If your shipment is packed in several packages, use label Form 4801 to indicate the number of packages, and put the transmittal in the first package.

d. IRS/MCC will NOT be returning your magnetic media to you after successfully processing it. Therefore, if you want proof that IRS/MCC received your shipment, you may choose to send your submission using a service with tracing capabilities, or that will provide proof of delivery (for example, U.S. Postal Service Certified Mail, Federal Express or UPS.)

SEC. 13. HOW TO FILE CORRECTED RETURNS

.01 The filing requirement thresholds listed in Part A, Sec. 4 apply separately to both original and corrected returns.

EXAMPLE: If you have 100 Forms 1099-A to be corrected, they can be filed on paper since they fall under the 250 threshold. However, if you have 300 Forms 1099-A to be corrected, they must be filed on magnetic media since they meet the 250 threshold. If for some reason you cannot file these corrections on magnetic media, you must request a waiver (see Part A, Sec. 5) before filing on paper, or you may be subject to a penalty. No waiver is required for corrections that fall under the required threshold.

.02 Corrections for the current year should be aggregated and filed no later than August 1 of each year. However, if you discover errors after August 1, you are still required to file corrections so that you will not be subject to a penalty for intentional disregard of the filing requirements. Failure to correct information returns submitted with erroneous information may result in penalties being assessed for failure to provide correct information. ALL FIELDS MUST BE COMPLETED WITH THE CORRECT INFORMATION, NOT JUST THE DATA FIELDS NEEDING CORRECTION. Submit corrections only for the returns filed in error, not the entire file. If your entire file is in error, contact IRS/MCC immediately. If you file corrected returns on paper forms, submit Copy A to the appropriate service center. Furnish corrected statements to recipients as soon as possible.

.03 See the 1990 "Instructions for Forms 1099, 1098, 5498 and W-2G" for information concerning the due date for filing information returns, and any penalties that may apply to returns considered to be filed late or incorrectly. A copy of these instructions is included in your MMR (Magnetic Media Reporting) package each year. This will also contain specific information concerning the impact of the Revenue Reconciliation Act of 1989 on the penalty provisions for ANY documents, including corrections, which are filed after the original filing due date for the information return.

.04 There are numerous types of errors. More than one transaction may be required to properly correct the initial error. A "G" in magnetic media position 7 of the "B" Record is used to indicate a corrected return. You are strongly encouraged to read

this ENTIRE section before attempting to make ANY correction.

.05 Corrected returns submitted to IRS on magnetic media, using a "G" coded Payee "B" Record, may be included on the same medium as those corrections without the "G" code; however, separate "A" Records are required. Corrected returns are to be identified as corrections on the transmittal document by marking the appropriate checkbox, and also on the EXTERNAL label of the file.

NOTE: If you discover that your original file omitted certain information returns that should have been included, do *not* submit those documents as "correction," and do not code the Payee "B" Records with the correction "G" code. They will be considered as late filed original documents and may be subject to a penalty.

.06 The instructions that follow will provide information on how to file corrected returns on magnetic media or by electronic filing for the current tax year. However, if you discover errors in previous years' files, please send us a letter with the following information:

(a) Name and address of payer

(b) Type of error. (Please explain clearly.)

(c) Tax year

(d) EIN

(e) TCC

(f) Number of Payees

This information will be forwarded to the appropriate office and may prevent erroneous notices from being generated against payee accounts. You are also required to furnish corrected statements to the payees.

.07 If you are not required to file your corrections on magnetic media and you file them on paper forms, do not submit the paper returns to IRS/MCC. All paper returns, whether original or corrected, must be filed with the appropriate service center. Corrected returns filed on magnetic media must be filed with IRS/MCC. (Refer to Part A, Sec. 3 for the address.) CORRECTED TAPES, TAPE CARTRIDGES, AND/OR DISKETTES WILL NOT BE RETURNED AFTER PROCESSING.

.08 Corrected statements to payees should be clearly identified as "CORRECTED" and should be provided to them as soon as possible.

.09 Use the same name and TIN (SSN or EIN) for the payer on Form 4804/4802 and all related Payer/Transmitter "A" Records.

.10 A transmittal Form 4804 (or computer-generated substitute) is used to transmit magnetic media and electronic files. A Form 4802, Transmittal for Multiple Magnetic Media Reporting, is a continuation sheet for a Form 4804. Use Form 4802 if you file for multiple payers, or submit multiple types of information returns, AND are an authorized agent for the payers. (See Part A, Sec. 9.05.)

.11 On magnetic media and electronic files, the Payee "B" Record provides a 20-position field to enter a Payer's Account Number for the Payee. This same account number may be provided on paper forms. This number will help identify the appropriate incorrect return if more than one return is filed for a particular payee. DO NOT ENTER A TIN (SSN OR EIN). A PAYER'S ACCOUNT NUMBER FOR THE PAYEE MAY BE A CHECKING ACCOUNT NUMBER; SAVINGS ACCOUNT NUMBER; SERIAL NUMBER; OR ANY OTHER NUMBER ASSIGNED TO THE PAYEE BY THE PAYER THAT WILL DISTINGUISH THE SPECIFIC ACCOUNT. THIS NUMBER SHOULD APPEAR ON THE INITIAL RETURN AND ON THE CORRECTED RETURN IN ORDER TO IDENTIFY AND PROCESS THE CORRECTION PROPERLY. THIS NUMBER IS ALSO PROVIDED WITH YOUR INVALID/NO-TIN NOTIFICATION BY THE IRS AND MAY HELP YOU DETERMINE THE BRANCH OR SUBSIDIARY REPORTING THE TRANSACTION.

.12 REVIEW THE CHART THAT FOLLOWS. The types of errors made normally fall under one of the two categories listed. Next to each *type* of error made, you will find a list of instructions on how to properly file the corrected return for that type of error. READ ALL OF THE INSTRUCTIONS LISTED AND FOLLOW CAREFULLY FOR THE TYPE OF ERROR MADE ON THE INITIAL RETURN. IN SOME CASES TWO TRANSACTIONS ARE REQUIRED TO PROPERLY FILE CORRECTIONS. IF THE ORIGINAL RETURN WAS FILED AS AN AGGREGATE, YOU MUST CONSIDER THIS IN FILING CORRECTED RETURNS.

Guidelines for Filing Corrected Returns On Magnetic Media

(PLEASE READ SEC. 13.01 THROUGH 13.12 BEFORE MAKING ANY CORRECTIONS).

Error Made on the Original Return Filed on Magnetic Media	How To File the Corrected Return on Magnetic Media
1. Original return was filed with one or more of the following errors: (a) No Payee TIN (SSN or EIN) (b) Incorrect Payee TIN (c) Incorrect Payee Name (d) Wrong type of return indicator TWO SEPARATE TRANSACTIONS ARE REQUIRED TO MAKE THE CORRECTIONS PROPERLY. READ AND FOLLOW ALL INSTRUCTIONS FOR BOTH TRANSACTIONS 1 AND 2.	TRANSACTION 1: Identify incorrect returns A. Form 4804 and 4802 (or computer-generated substitute): 1. Prepare a new transmittal Form 4804 (and 4802 if you file for multiple payers), or a computer-generated substitute, that includes information related to this new file. 2. Mark the Correction box in Block 1 of the new Form 4804. If you submit a computer-generated substitute for Form 4804, indicate "MAGNETIC MEDIA CORRECTION" at the top.

(PLEASE READ SEC. 13.01 THROUGH 13.12 BEFORE MAKING ANY CORRECTIONS).

Error Made on the Original Return Filed on Magnetic Media	How To File the Corrected Return on Magnetic Media
1. (Continued)	3. Provide ALL requested information correctly. 4. If you are a Combined Federal/State filer, it is your responsibility to transmit corrected returns to the state—IRS will not. Do not include "K" Records in your corrected returns. B. Magnetic tape on reel or cartridge, or diskette: (Form 1098, 1099, 5498 or W-2G) 1. Prepare a new file. 2. Use a separate Payer/Transmitter "A" Record for each type of return being reported. The information in the "A" Record will be the same as it was in the original submission. 3. The Payee "B" Record must contain exactly the same information as submitted previously EXCEPT insert a "G" in media position 7 of the "B" Record AND for ALL payment amounts used, enter "0" (zero). 4. Corrected returns submitted to IRS using a "G" coded "B" Record may be on the same tape or diskette as those returns submitted without the "G" code; however, separate "A" Records are required. 5. Mark the EXTERNAL label of the tape or diskette "MAGNETIC MEDIA CORRECTION." 6. Submit the magnetic media and the transmittal document(s) to IRS/MCC. (Refer to Part A, Sec. 3 for the address.) TRANSACTION 2: Report the correct information. Magnetic Tape on reel or cartridge, or Diskette: (Forms 1098, 1099, 5498 or W-2G) 1. Provide information on the Form 4804 or 4802 as stated in Transaction IA. 2. Prepare a new file with the correct information in all records. 3. Use a separate Payer/Transmitter "A" Record for each type of return being reported. 4. Do not "G" code the Payee "B" Record as a corrected return for this type of correction. 5. Submit the new returns as though they were originals. Provide all of the correct information including the TIN (SSN or EIN). 6. Mark the EXTERNAL label of the tape or diskette "MAGNETIC MEDIA CORRECTION." 7. Submit the magnetic media and the transmittal document(s) to IRS/MCC. (Refer to Part A, Sec. 3 for the address.)
2. Original return was filed with one or more of the following errors: (a) Incorrect Payment Amount Indicator in the Payer "A" Record. (b) Incorrect Payment amounts in the Payee "B" Record.	A. Forms 4804 and 4802 (or computer-generated substitute) 1. Prepare a *new* Form 4804 (and 4802 if you file for multiple payers), or a computer-generated substitute, that includes information related to this new file.

(PLEASE READ SEC. 13.01 THROUGH 13.12 BEFORE MAKING ANY CORRECTIONS).

Error Made on the Original Return Filed on Magnetic Media	How To File the Corrected Return on Magnetic Media
2. (Continued) (c) Incorrect Code in the Document Specific Code Field in the Payee "B" Record. (d) Incorrect payee address (See note) NOTE: If the only error to be corrected is an incorrect payee address, only one transaction is required. However, if you are correcting the name and/or TIN along with an incorrect address, then two transactions will be required. (See previous information on correcting an incorrect payee name/TIN.) REQUIRES ONLY ONE TRANSACTION.	2. Mark the Correction box in Block 1 of new Form 4804. If you submit a computer-generated substitute for Form 4804, indicate "MAGNETIC MEDIA CORRECTION" at the top. 3. Provide ALL requested information correctly. 4. If you are a Combined Federal/State filer, it is your responsibility to transmit corrected returns to the state—IRS will not. Do not include "K" Records in your corrected returns.
	B. Magnetic tape on reel or cartridge, or diskette: (Forms 1098, 1099, 5498 or W-2G) 1. Prepare a new file. 2. Use a separate Payer/Transmitter "A" Record for each type of return being reported. The information in the "A" Record will be the same as it was in the original submission EXCEPT, the correct Amount Indicators will be used. 3. The Payee "B" Record must contain exactly the same information as submitted previously EXCEPT insert a "G" in tape or diskette position 7 of the "B" Record AND report the correct information as it should have been reported on the original return. 4. Corrected returns submitted using a "G" coded "B" Record may be on the same tape or diskette as those returns submitted without the "G" code; however, separate "A" Records are required. 5. Mark the EXTERNAL label of the tape "MAGNETIC MEDIA CORRECTION." 6. Submit the magnetic media and the transmittal document(s) to IRS/MCC. (Refer to Part A, Sec. 3.)

SEC. 14. TAXPAYER IDENTIFICATION NUMBER (TIN)

.01 Section 6109 of the Internal Revenue Code, and the regulations thereunder, require a person whose Taxpayer Identification Number (TIN) must be shown on an information return to furnish his or her TIN to the person required to file the information return. The number must be furnished to the payer whether or not the payee is required to file a tax return or is covered by social security.

.02 The payee's TIN is used to associate and verify amounts reported to IRS with corresponding amounts on tax returns. Therefore, it is particularly important that CORRECT social security and employer identification numbers for payees be provided on magnetic media or paper forms submitted to IRS. DO NOT ENTER HYPHENS, ALPHA CHARACTERS, ALL 9s OR ALL ZEROS. IRS validates the SSN by using the Name Control of the surname (last name) of the individual who has been assigned this number. For this reason, provide the surname in the First Payee Name Line and/or the Name Control in positions 8-11 of the Payee "B" Record (see Part B, Sec. 6). Failure to provide this information may make it impossible for IRS to validate the SSN.

.03 The TIN to be furnished to IRS depends primarily upon the manner in which the account is maintained or set up on the payer's record. The payer and payee names with associated TINs should be consistent with the names and TINs used on other tax returns.

Also, the name and TIN provided must belong to the owner of the account. If the account is recorded in more than one name, furnish the name and TIN of one of the owners of the account. The TIN provided MUST be associated with the name of the payee provided in the first name line of the Payee "B" Record. For individuals, including sole proprietors, the payee TIN is the payee's social security number. For other entities, the payee TIN is the payee's

employer identification number.

.04 Failure to provide the correct name with the payee TIN, or failure to provide a valid TIN, could result in an Invalid/No TIN notice (sometimes referred to as "B" notice) being generated for that TIN.

.05 The following charts will help you determine the TIN to be furnished to IRS for those persons for whom you are reporting information (payees).

CHART 1. Guidelines for Social Security Numbers

For this type of account—	In the Taxpayer Identification Number field of the Payee "B" Record, enter the SSN of—	In the First Payee Name Line of the Payee "B" Record, enter the name of—
1. Individual	The individual	The individual
2. Joint account (Two or more individuals, including husband and wife)	The actual owner of the account (If more than one owner, the first individual on the account)	The individual whose SSN is entered
3. Custodian account of a minor (Uniform Gift (or Transfers) to Minors Act)	The minor	The minor
4. The usual revocable savings trust account (grantor is also trustee)	The grantor-trustee	The grantor-trustee
5. A so-called trust account that is not a legal or valid trust under state law	The actual owner	The actual owner
6. A sole proprietorship	The owner	The owner, not the business name

CHART 2. Guidelines for Employer Identification Numbers

For this account type—	In the Taxpayer Identification Number field of the Payee "B" Record, enter the EIN of—	In the First Payee Name Line of the Payee "B" Record, enter the name of—
1. A valid trust, estate, or pension trust	Legal entity[1]	The legal trust, estate, or pension trust
2. Corporate	The corporation	The corporation
3. Association, club, religious, charitable, educational or other tax-exempt organization	The organization	The organization
4. Partnership account held in the name of the business	The partnership	The partnership
5. A broker or registered nominee/middleman	The broker or nominee/middleman	The broker or nominee/middleman
6. Account with the Department of Agriculture in the name of a public entity, (such as a state or local government, school district, or prison), that receives agriculture program payments	The public entity	The public entity

[1]Do not furnish the identification number of the personal representative or trustee unless the name of the representative or trustee is used in the account title.

SEC. 15. EFFECT ON PAPER RETURNS

.01 Magnetic media reporting of the information returns listed in Part A, Sec. 4 applies only to the Copy A information submitted to IRS.

.02 Payers are responsible for providing statements to the payees as outlined in the 1990 "Instructions for Forms 1099, 1098, 5498 and W-2G."

.03 Refer to 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" for instructions and changes to reporting information returns on paper.

.04 Send all information returns filed on paper to the appropriate service center, not to IRS/MCC.

.05 If you file your information returns on magnetic media, *DO NOT* file the same returns on paper, since that will result in duplicate filing. Filing on magnetic media or by electronic filing takes the place of submitting the documents on paper. In some cases, you may want to file your original documents on magnetic media or electronically, but submit your corrections on paper documents. This is allowable as long as your corrections do not exceed the filing threshold; if the volume of corrections does exceed the threshold, you MUST have an approved waiver to submit your corrections on paper.

SEC. 16. COMBINED FEDERAL/STATE FILING PROGRAM

.01 The Combined Federal/State Program was established to simplify information returns filing for the taxpayer by providing the tax information to participating states free-of-charge. IRS/MCC will forward this information to participating states for approved filers so separate reporting to those states is not necessary. *FORMS 1098, 1099-A, 1099-B, 1099-S AND W-2G CANNOT BE FILED UNDER THIS PROGRAM.*

.02 To request approval to participate, a "TEST" file coded for this program, MUST be submitted by the transmitter to IRS/MCC between October 1 and December 15 using the revenue procedure that will be used for the actual data files.

.03 Attach a letter to the Form 4804 submitted with the "TEST" file which indicates that you wish to participate in this program.

.04 The "TEST" file is only required for the first year. Once you are approved, you need not resubmit tests each year except when notified by IRS. (See Part A, Sec. 8 for general guidelines on submission of "TEST" files.) Each record, both in the "TEST" file and the "ACTUAL" data file, must conform exactly to the revenue procedure for that tax year. Records must be coded using each state's dollar criteria from TABLE 2 of this section for each type of return.

.05 If your "TEST" file is acceptable, we will send you an approval letter, and a Form 6847, Consent for Internal Revenue Service to Release Tax Information, which the payer MUST complete, sign, and return to IRS/MCC before any tax information can be released to the state. Be sure to write your TCC on Form 6847. If your "TEST" file is not acceptable, we will return your media with a letter indicating what the problems were, and your replacement "TEST" file must be returned to IRS/MCC postmarked on or before December 15.

.06 A separate Form 6847 is required for each payer; therefore, this form may be photocopied so that you may provide copies to all of the payers for whom you submit magnetic media or electronic files. A transmitter may not combine payers on one Form 6847 even though acting as Attorney-in-Fact for several payers. Form 6847 may be computer-generated as long as it includes all information that is on the original form. If the Form 6847 is signed by an Attorney-in-Fact, the written consent from the payer must clearly indicate that the Attorney-in-Fact is empowered to authorize release of the information.

.07 If you file for multiple payers, code the records only for participating states for those payers who have properly submitted Form 6847. Do not submit "ACTUAL" data records coded for the Combined Federal/State Program WITHOUT PRIOR APPROVAL from IRS.

.08 If you had applied to participate in this program in the past but did not meet the requirements, you must resubmit the Form 6847 with the proper signatures as specified.

.09 Some participating states require separate notification that you are filing in this manner. Since IRS acts as a forwarding agent only, IT IS YOUR RESPONSIBILITY TO CONTACT THE APPROPRIATE STATES FOR FURTHER INFORMATION.

.10 Approval to participate in the Combined Federal/State Program will be revoked if files submitted do not totally conform to the specifications in this revenue procedure.

.11 IT IS THE FILER'S RESPONSIBILITY TO TRANSMIT CORRECTED RETURNS TO THE STATES.

.12 Participating states and corresponding valid state codes are listed in TABLE 1 of this section. If the state that you wish information released to does not participate in the program, do not code your records for that state. It is the filer's responsibility to file information returns with those nonparticipating states.

.13 The appropriate state code MUST be entered for those documents which meet the state's filing requirements (see TABLE 1). DO NOT USE STATE ABBREVIATIONS. It is the filer's responsibility to determine the state code to be used and to obtain the filing requirements from the appropriate state(s).

.14 To simplify filing, several of the participating states have provided lists of their information return reporting requirements (see TABLE 2). It is your responsibility to contact the participating states to verify the criteria provided in this table.

.15 If you have met *ALL* of the above conditions:

(a) You must submit all records coded exactly as required by this revenue procedure.

(b) The "C" Record *must* be followed by a "K" Record for each state. The "K" Record indicates the number of payees being reported to each particular state.

(c) Payment amount totals and the valid participating state code must be included in the State Totals "K" Record. (Refer to Part B, Sec. 8, for a description of the "K" Record.)

(d) The last "K" Record is followed by an "A" Record or End of Transmission "F" Record (if this is the last record of the entire file).

TABLE 1. PARTICIPATING STATES AND THEIR CODES

State	Code	State	Code	State	Code
Alabama	01	Iowa	19	New York	36
Arizona	04	Kansas	20	North Carolina	37
Arkansas	05	Maine	23	North Dakota	38
California	06	Massachusetts	25	Oregon	41
Delaware	10	Minnesota	27	South Carolina	45
District of Columbia	11	Mississippi	28	Tennessee	47
Georgia	13	Missouri	29	Wisconsin	55
Hawaii	15	Montana	30		
Idaho	16	New Jersey	34		
Indiana	18	New Mexico	35		

TABLE 2. DOLLAR CRITERIA FOR STATE REPORTING

STATE	1099-DIV	1099-G	1099-INT	1099-MISC	1099-OID	1099-PATR	1099-R	5498
Alabama	$1500	$ NR	$1500	$1500	$1500	$1500	$1500	NR
Arkansas	100	2500	100	2500	2500	2500	2500	[e]
District of Columbia[a]	600	600	600	600	600	600	600	NR
Hawaii	10	[e]	10[b]	600	10	10	600	[e]
Idaho	10	10	10	600	10	10	600	[e]
Iowa	100	1000	1000	1000	1000	1000	1000	NR
Minnesota	10	10	10	600	10	10	600	[e]
Mississippi	600	600	600	600	600	600	600	NR
Missouri	NR	NR	NR	1200[c]	NR	NR	NR	NR
Montana	10	10	10	600	10	10	600	[e]
New Jersey	1000	1000	1000	1000	1000	1000	1000	NR
New York	NR	600	600	600[d]	NR	600	600	NR
North Carolina	100	100	100	600	100	100	100	[e]
Tennessee	25	NR	25	NR	NR	NR	NR	NR
Wisconsin	NR	NR	NR	600	NR	600	600	NR

NOTE: This cumulative list is for information purposes only and represents dollar criteria. For complete information on state filing requirements including changes which may apply, contact the appropriate state tax agencies. Filing requirements for any state in TABLE 1 not shown in TABLE 2 are the same as the Federal requirement.

NR—No filing requirement.

Footnotes:

a. Amounts are for aggregates of several types of income from the same payer.

b. State regulation changing filing requirement from $600 to $10 is pending.

c. The state would prefer those returns filed with respect to non-Missouri residents to be sent directly to the state agency.

d. Aggregate of several types of income.

e. All amounts are to be reported.

SEC. 17. DEFINITION OF TERMS

Element	*Description*
b	Denotes a blank position. Enter blank(s) when this symbol is used (do not enter the letter "b"). This appears in numerous areas throughout the record descriptions.
CUSIP Number	A number developed by the Committee on Uniform Security Identification Procedures to serve as a common denominator in communications among users for security transactions and security information.
EIN	A nine-digit number (Employer Identification Number) that has been assigned by IRS to the taxpayer.
Electronic Filing	Submission of information returns using switched telecommunications network circuits. These transmissions use modems, dial-up phone lines, and bi-synchronous protocols. See Part C of this publication for specific information on electronic filing.
File	For purposes of this procedure, a file consists of all records submitted by a Payer or Transmitter, either magnetically or electronically.
Foreign Corporation	Any corporation organized or created other than in or under the laws of the United States or any of its states or territories.

Element	*Description*
Magnetic Media	For purposes of this procedure, the term "magnetic media" refers to ½ inch magnetic tape; IBM 3480 compatible tape cartridge; or 8 inch, 5¼, or 3½ inch diskette. Magnetic media may be produced on mainframe computer systems; mini- or micro-computer systems; or personal computers.
PS 58 Costs	The current cost of life insurance under a qualified plan taxable under section 72(m) and Regulations section 1.72-16(b). (See Part B, Sec. 6 Payee "B" Record, Document Specific Code, Category of Distribution, Code 9.)
Payee	Person or organization receiving payments from the Payer, or for whom an information return must be filed. The payee includes a borrower (Form 1099-A), participant (Form 5498) and a gambling winner (Form W-2G). For Form 1098, the payee is the individual paying the interest. For Form 1099-S, the payee is the seller or other transferor.
Payer	Includes the person making payments, a recipient of mortgage interest payments, a broker, a person reporting a real estate transaction, a barter exchange, a trustee or issuer of an IRA or SEP, or a lender who acquires an interest in secured property or who has reason to know that the property has been abandoned. The payer will be held responsible for the completeness, accuracy and timely submission of magnetic media files.
Special Character	Any character that is not a numeral, an alpha, or a blank.
SSA	Social Security Administration.
SSN	Social Security Number.
Taxpayer Identification Number (TIN)	May be either an EIN or SSN.
Transfer Agent (Paying Agent)	The transfer agent or paying agent is the entity who has been contracted or authorized by the payer to perform the services of paying and reporting backup withholding (Form 941). The payer may be required to submit to IRS a Form 2678, Employer Appointment of Agent Under Section 3504 of the Internal Revenue Code, which notifies IRS of the transfer agent relationship.
Transmitter	Person or organization *submitting* magnetic media file(s). May be Payer or agent of Payer.
Transmitter Control Code (TCC)	A five character alpha/numeric number assigned by IRS to the transmitter prior to actual filing on magnetic media. This number is inserted in the "A" Record of your files and must be present before the file can be processed. An application Form 4419 must be filed with IRS to receive this number. (See Part A, Sec. 7.)

SEC. 18. STATE ABBREVIATIONS

.01 You MUST use the following state abbreviations when developing the state code portion of address fields. (This table provides state abbreviations only and does not represent those states participating in the Combined Federal/State Filing Program. For a list of states that participate in the Combined Federal/State Filing Program, refer to Part A, Sec. 16, Table 1.)

State	Code	State	Code	State	Code
Alabama	AL	Kentucky	KY	North Dakota	ND
Alaska	AK	Louisiana	LA	Ohio	OH
American Samoa	AS	Maine	ME	Oklahoma	OK
Arizona	AZ	Mariana Islands	MP	Oregon	OR
Arkansas	AR	Maryland	MD	Pennsylvania	PA
California	CA	Massachusetts	MA	Puerto Rico	PR
Colorado	CO	Michigan	MI	Rhode Island	RI
Connecticut	CT	Minnesota	MN	South Carolina	SC
Delaware	DE	Mississippi	MS	South Dakota	SD
District of Columbia	DC	Missouri	MO	Tennessee	TN
Florida	FL	Montana	MT	Texas	TX
Georgia	GA	Nebraska	NE	Utah	UT
Guam	GU	Nevada	NV	Vermont	VT
Hawaii	HI	New Hampshire	NH	Virgin Islands	VI
Idaho	ID	New Jersey	NJ	Virginia	VA
Illinois	IL	New Mexico	NM	Washington	WA
Indiana	IN	New York	NY	West Virginia	WV
Iowa	IA	North Carolina	NC	Wisconsin	WI
Kansas	KS			Wyoming	WY

.02 You must use the 29-2-9 City, State, and ZIP Code format for U.S. addresses which include American Samoa, Guam, Mariana Islands, Puerto Rico, and the Virgin Islands.

.03 For Foreign Country addresses you may use a 40-position free format in lieu of the 29-2-9 City, State, and ZIP Code format; however, this is only allowable if a "1" appears in the Foreign Country Indicator Field of the "B" Record. You may choose to spell out the name of the foreign country or use abbreviations.

.04 When reporting APO/FPO addresses in Payee documents, the following format should be used:

EXAMPLE:	Payee Name	PVT Willard J. Doe	
	Mailing Address	Company F, PSC Box 100	)
		167 Infantry REGT	) See NOTE
	Payee City	APO New York	
	Payee State		
	Payee ZIP Code	098010100	

NOTE: Mailing address must be reported as one 40-position field.

SEC. 19. MAJOR PROBLEMS ENCOUNTERED

After preparing your files, we encourage you to verify the format and content of each type of record to ensure the accuracy of your data submission. This may eliminate the need for IRS/MCC to return your file for replacement, and therefore reduce the likelihood of a penalty assessment for incorrect submissions. We strongly urge you to print your data before shipping to make sure you have good data in your records according to the format found in this revenue procedure. This is especially true for those filers who have either had their files prepared by a third party service bureau, or who have purchased pre-programmed software packages. If you purchased your software package for a previous tax year, it will no longer be valid for reporting your tax year 1990 information returns, since there were programming changes.

Following are some of the most frequently encountered problems with magnetic media files submitted to IRS/MCC which result in files being returned to the filer:

---

1. The Payment Amount Fields in the Payee "B" Record do not correspond to the amount indicators in the Payer "A" Record.

If Amount Indicators 2, 4 and 7 appear in positions 23, 24 and 25 of the Payer "A" Record, then the Payee "B" Record must show payment amounts in Fields 2 (positions 61-70), 4 (positions 81-90) and 7 (positions 111-120), right-justified and unused positions zero filled.

EXAMPLE:	"A" RECORD	247bbbbbb (Pos. 23-31)	— (b = blank)
	"B" RECORD	0000867599 (Pos. 61-70)	— (Payment Amount 2)
		0000709097 (Pos. 81-90)	— (Payment Amount 4)
		0000044985 (Pos. 111-120)	— (Payment Amount 7)

---

2. Blanks or invalid characters appear in Payment Amount Fields in the Payee "B" Record.

Money amounts must be right-justified and zero (0) filled. DO NOT USE BLANKS. Each payment amount must be entered in U.S. dollars and cents; however, do not use dollar signs, decimal points, or commas, as these characters are understood. For example, if you are reporting a money amount of $100.00, your payment amount field would be coded "0000010000."

DO NOT ENTER NEGATIVE AMOUNTS EXCEPT for Amount Indicators 2, 6, 7, 8 or 9 of the Form 1099-B. A negative overpunch in the units position may be used instead of a minus sign to indicate negative amounts. If a plus or minus sign or negative overpunch is not used, the amount is assumed to be positive.

---

3. Data is in prior year's format.

Revenue procedures are updated each year and you must use the current revenue procedure to format your programs. DO NOT USE 1989 REVENUE PROCEDURES FOR 1990 FILING.

---

4. Discrepancy between IRS totals and totals in Payer "C" Records.

The Payer "C" Record is a summary record for a type of return for a given payer as reported in the Payee "B" Records. IRS computers automatically compute the total number of payees and total payment amounts in the Payee "B" Records and these totals are compared against the totals in the Payer "C" Records. These totals are also manually checked against the totals provided on Forms 4804/4802. Payers should verify the accuracy of the records because imbalances necessitate return of files for correction.

---

5. Incorrect/Invalid EIN in Payer "A" Record.

The Payer's federal EIN reported in position 7-15 of the Payer "A" Record must be correct in order for IRS to process the media. Be sure the EIN reported on the Forms 4804 and Form 4802 matches the EIN reported in the "A" Record. Do not enter blanks, hyphens, alphas, all 9s or all 0s. This field may be left blank for foreign corporations not required to have an EIN if the foreign indicator code is present in the "A" Record. Also, please double check for transposed numbers because an incorrect EIN will cause records to go unpostable, which means the records will not post to the Master File.

---

6. Bad Format.

We receive magnetic tape formatted using 8-inch diskette specifications and vice versa. BE SURE TO USE THE PROPER REVENUE PROCEDURE FOR FORMATTING YOUR DATA. Use this publication (1220) for formatting magnetic tape, tape cartridge, 5 1/4 and 3 1/2 inch diskettes, or your electronic files. Use Publication 1255 for formatting 8-inch diskettes ONLY.

---

7. Reporting Payments on Form 1099-R, Payer "A" Record.

There is no provision for reporting the Distribution Code (entered in Box 7 on the paper Form 1099-R) in the Payer "A" Record. This information is reported in the Document Specific Code of the Payee "B" Record. Therefore, the Amount Indicators in the Payer "A" Record should be reported as follows if you are reporting all 8 Amount Codes: 12345689b. Amounts are entered in ascending sequence, left-justified, and unused positions blank filled. The Amount Indicator may change from year to year. Please be sure your Payer "A" Record only contains the Amount Indicators specified in the Revenue Procedure.

---

8. Block size exceeds 25,200 positions.

Be sure your records do not span blocks. Even though the size was changed from 10,000 to 25,200 positions, filers are still exceeding the block size.

---

9. Bad or incomplete address in the Payer "A" Record.

The Payer's address in Field Position 131-170 of the Payer "A" Record should be left-justified and blank filled, and must agree with the address provided on Forms 4804/4802. Payer's City, State and ZIP MUST appear in positions 171-210 and must be left-justified and blank filled.

---

10. Record length is invalid.

Beginning in Tax Year 1987, the record length was changed from 360 to 420 positions. Some filers are still using old programs that create records of 360 positions, which are now unacceptable.

RECORDS MUST BE A FIXED 420 POSITIONS.

---

11. The City/State/ZIP Code in the Payee "B" Record is in wrong format.

The Payee City (Positions 282-310), State (Positions 311-312), and ZIP Code (Positions 313-321) in the Payee "B" Record MUST be coded in the correct positions. If your program cannot code this information in the correct fields, you MUST request a deviation in writing from IRS/MCC. Files submitted with the City/State/ZIP Code information coded incorrectly, and for which a deviation has not been approved by IRS/MCC, will be returned for replacement.

---

12. Invalid type of return indicator.

You must indicate the type of return submitted by inserting the appropriate code in Position 22 of the Payer/Transmitter "A" Record. For example, if the type of return being reported is Form 1099-INT, a code "6" must be inserted in Position 22.

---

13. Form W-2/W-2P information submitted on same media as Form 1099 information.

Form W-2/W-2P information is submitted to the Social Security Administration (SSA), and NOT to IRS/MCC. The Social Security Administration has its own magnetic media reporting program for wage information, and the media containing Forms W-2/W-2P is submitted to SSA. Any media received at IRS/MCC which contains Form W-2/W-2P information will be returned to the filer. Contact your local SSA office for information concerning filing Forms W-2/W-2P on magnetic media.

14. Excessive withholding credits.

For most information returns, other than Form 1099-R, withholding credits should NOT exceed 20 percent of the income reported. Validate the total reported in the withholding field against the total income reported.

15. Incorrect format for TINs in the Payee "B" Record.

A check of your "B" records should be made to ensure the Taxpayer Identification Numbers (TIN) are formatted correctly. There should be nine digits, no alpha characters, no hyphens or commas. Incorrect formatting of TINs may result in a penalty.

PART B. MAGNETIC MEDIA SPECIFICATIONS

SECTION 1. GENERAL

.01 The specifications contained in this part of the revenue procedure define the required format and contents of the records to be included in the magnetic media file. These specifications must be adhered to unless deviations have been specifically granted by IRS.

.02 An external label, Form 5064, must appear on each tape and diskette submitted for processing. If diskettes are used and the operating system is not MS/DOS compatible, the operating system and hardware information MUST be provided. Failure to provide this information will result in the diskette being returned to the filer. The following information is needed on the label:

(a) The transmitter's name.

(b) The five character alpha/numeric Transmitter Control Code.

(c) The tax year of the data (i.e., 1990).

(d) Operating system software and hardware used to create the file (e.g., Apple MacIntosh/MacWrite V2.2).

(e) Document types (e.g., 1098, 5498, INT, DIV, MISC, etc.).

(f) The total number of Payee "B" Records on the media.

(g) An in-house volume serial number which may be assigned by the transmitter to the magnetic media (this is optional for those organizations which assign their own numbers to their media). If you do not assign media numbers, leave this blank.

(h) The sequence of each tape or diskette (e.g., 001 of 008, 002 of 008, etc.). However, if your file is complete on one tape or diskette, then the sequence will be 001 of 001.

The information on the external media label, Form 5064, will assist IRS in processing or in locating a file, should the transmitter request that it be returned due to errors. IRS advises that special shipping containers not be used for transmitting data since they will not be returned.

.03 A provision is made in the Payee "B" Records for Special Data Entries. These entries are optional. If the field is not utilized, enter blanks to maintain a fixed record length of 420 positions. The field is intended to serve one or both of these purposes:

(a) Contain information required by state or local governments. Filers who wish to use this option for satisfying state or local reporting requirements should contact their state or local department of revenue for filing instructions. (Also refer to Part A, Sec. 16.)

(b) This field is also reserved for the filer's own personal use and may be used at the discretion of the filer to include information related to each individual return. IRS will not use the information supplied in this field. The length of this field will vary depending on the type of return. For Forms 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, and 5498, there are 67 positions reserved for Special Data Entries. For Form 1099-A, there are 21 positions; for Form 1099-B, there are 10 positions; for Forms 1099-OID, there are 28 positions; and for Forms 1099-S, there are 23 positions. Form W-2G has no available space within the Payee "B" Record for Special Data Entries.

.04 All records must be a fixed length of 420 positions. Use "K" Records *only* if you are an approved Combined Federal/State filer.

SEC. 2. TAPE SPECIFICATIONS

.01 In most instances, IRS can process any compatible magnetic tape files. Tape files must be EBCDIC, ASCII or BCD and must meet the following criteria:

(a) 9 track EBCDIC (Extended Binary Coded Decimal Interchange Code) with:
  (1) Odd Parity
  (2) A density of 800, 1600, or 6250 BPI.
  (3) If you use UNISYS Series 1100, you must submit an interchange tape.

(b) 9 track ASCII (American Standard Coded Information Interchange) with:
  (1) Odd Parity
  (2) A density of 800, 1600, or 6250 BPI.

(c) 7 track BCD (Binary Coded Decimal) with:

(1) Either Even or Odd Parity
(2) A density of 556 or 800 BPI. (IRS will accept and process 7 track tapes; however, 9 track is preferred.)

Please be consistent in the use of recording codes and density on your files. If files are generated in more than one recording code and/or density, multiple shipments would be appreciated.

.02 All compatible tape files must have the following characteristics: Type of tape—0.5 inch (12.7 mm) wide, computer grade magnetic tape on reels of up to 2400 feet (731.52 m) within the following specifications:

(a) Tape thickness: 1.0 or 1.5 mils and
(b) Reel diameter: 10.5 inch (26.67 cm), 8.5 inch (21.59 cm), or 7 inch (17.78 cm).

.03 Starting in Tax Year 1990 (reported in calendar year 1991), IRS/MCC will accept IBM 3480 compatible tape cartridges.

THE TAPE CARTRIDGE SPECIFICATIONS WILL BE AS FOLLOWS:

(a) The tape transports that will be processing the tape cartridges will be IBM 3480. Therefore, the tape cartridges must be IBM 3480 compatible.
(b) The tape cartridges must meet American National Standard Institute (ANSI) standards, and have the following characteristics:
(1) Tape cartridges will be ½ inch tape contained in plastic cartridges which are approximately 4 inches by 5 inches by 1 inch in dimension.
(2) Magnetic tape will be chromium dioxide particle based ½ inch tape.
(3) Cartridges will be 18-track parallel.
(4) Cartridges will be double density.
(5) Cartridges will contain 14,907 bytes/cm (37,871 bytes/in).

If your tape/data cartridge does not meet these specifications, you may submit it as a "TEST" file, and IRS/MCC will try to process it. Contact IRS/MCC for further information (see Part A, Sec. 3 for information on contacting IRS/MCC).

.04 Payers who can substantially conform to these specifications, but require some minor deviations, MUST contact IRS/MCC in writing. Tapes deviating from the specifications in this revenue procedure must not be submitted without prior approval from IRS. If you file on the Combined Federal/State Filing Program, your files must conform totally to this revenue procedure.

.05 The tape records defined in this revenue procedure may be blocked subject to the following:

(a) A block must not exceed 25,200 tape positions.
(b) If the use of blocked records would result in a short block, all remaining positions of the block must be filled with 9s; however, the last block of the file may be filled with 9s or truncated. Do not pad a block with blanks.
(c) All records, except the header and trailer labels, may be blocked.
(d) Records may not span blocks.

.06 Labeled or unlabeled tapes may be submitted.

.07 For the purposes of this revenue procedure the following must be used.

Tape Mark:

(a) Used to signify the physical end of the recording on tape.
(b) For even parity, use BCD configuration 001111 ("8421").
(c) May follow the header label and precede and/or follow the trailer label.

SEC. 3. 5¼ INCH AND 3½ INCH DISKETTE SPECIFICATIONS

.01 To be compatible, a diskette file must meet the following specifications:

(a) 5¼ or 3½ inches in diameter.
(b) Data must be recorded in standard ASCII code.
(c) Records must be fixed length of 420 bytes per record.
(d) Delimiter character commas (,) must not be used.
(e) Positions 419 and 420 of each record have been reserved for carriage return/line feed (cr/lf) characters.
(f) Filename of IRSTAX must be used. Do not enter any other data in this field. If a file will consist of more than one diskette, the filename IRSTAX will contain a 3 digit extension. This extension will indicate the sequence of the diskettes within the file. For example, the first diskette will be named IRSTAX.001, the second diskette will be IRSTAX.002, etc.
(g) A diskette file may consist of multiple diskettes as long as the filename conventions are adhered to.
(h) Diskettes must meet one of the following specifications:

Capacity	Tracks	Sides/Density	Sector Size
1.44 mb	96tpi	hd	512
1.2 mb	96tpi	hd	512
720 kb	48tpi	ds/dd	512
360 kb	48tpi	ds/dd	512
320 kb	48tpi	ds/dd	512
180 kb	48tpi	ss/dd	512
160 kb	48tpi	ss/dd	512

.02 IRS prefers that 5 1/4 and 3 1/2 inch diskettes be created using MS/DOS; however, diskettes created using other operating systems may be acceptable. IRS/MCC has equipment that can convert diskettes created under virtually any operating system to the appropriate MS/DOS format. We strongly recommend that you submit a test file for 5 1/4 and 3 1/2 inch diskettes, especially if your data was not created using the operating sys-

tem MS/DOS (see Part A, Sec. 8 for instructions on submitting "TEST" files).

.03 Deviations from the prescribed formats will not be acceptable. Diskettes deviating from the specifications in this revenue procedure must not be submitted without prior approval from IRS. If you file under the Combined Federal/State Filing Program, your files must conform totally to this revenue procedure.

SEC. 4. PAYER/TRANSMITTER "A" RECORD

.01 Identifies the payer and transmitter of the magnetic media file and provides parameters for the succeeding Payee "B" Records. IRS computer programs rely on the absolute relationship between the parameters and data fields in the "A" Record and the data fields in the "B" Records to which they apply.

.02 The number of "A" Records appearing on a tape reel or diskette will depend on the number of payers and the different types of returns being reported. The payment amounts for one payer for one type of return must be consolidated under one "A" Record if submitted on the same file.

.03 Do not submit separate "A" Records for each payment amount being reported. For example, if you are filing Form 1099-DIV to report Amount Codes 1, 2, and 3, all three amount codes must be reported under one "A" Record, not three separate "A" Records. For Payee "B" Records which do not contain payment amounts for all three amount codes, enter zeros for those which have no payment to be reported.

.04 The first record appearing on the file must be an "A" Record. A transmitter may include Payee "B" Records for more than one payer on a tape or diskette; however, each GROUP of Payee "B" Records must be preceded by an "A" Record.

.05 ALL RECORDS MUST BE A FIXED LENGTH OF 420 POSITIONS.

.06 A single tape or diskette may also contain different types of returns but the types of returns MUST NOT be intermingled. A separate "A" Record is required for each payer and for each type of return being reported. However, once you have written the first Payer "A" Record, you need not write another unless you report for another payer or another type of document, even if you have more than one tape or diskette. An "A" Record may be blocked with "B" Records; however, the initial record on a file must be an "A" Record. IRS will accept an "A" Record after a "C" Record.

.07 Do not begin any record at the end of a block or diskette and continue the same record into the next block.

.08 All alpha characters entered in the "A" Record should be uppercase.

.09 WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (BORROWER/PAYER OF RECORD) AND THE AMOUNT PAID.

RECORD NAME: PAYER/TRANSMITTER "A" RECORD

NOTE: For all fields marked REQUIRED, you must provide the information described under Description and Remarks. For those fields not marked REQUIRED, you must allow for the field but may be instructed to enter blanks or zeros in the indicated media position(s) and for the indicated length. All records are now a fixed length of 420 positions.

Field Position	Field Title	Length	Description and Remarks
1	Record Type	1	REQUIRED. Enter "A".
2-3	Payment Year	2	REQUIRED. Enter "90".
4-6	Reel Sequence Number	3	The reel sequence number incremented by 1 for each tape or diskette on the file starting with 001. You may choose to enter blanks or zeros in this field. IRS bypasses this information. You must indicate the proper sequence on the external label Form 5064.
7-15	Payer's Federal EIN	9	REQUIRED. Must be the valid 9-digit number assigned to the payer by IRS. DO NOT ENTER BLANKS, HYPHENS, ALPHA CHARACTERS, ALL 9s OR ALL ZEROS. (Also see Part A, Sec. 14.) For foreign corporations that are not required to have an EIN, this field may be left blank. Foreign corporations should have the Foreign Corporation Indicator set to "1." (See Part A, Sec. 17 for the definition of a Foreign Corporation.)

Field Position	Field Title	Length	Description and Remarks
16-19	Payer Name Control	4	The Payer Name Control can be obtained from the mail label on the Package 1099 that is mailed to most payers on record each December. To distinguish between Package 1099 and Magnetic Media Reporting (MMR) package, the Package 1099 contains instructions for paper filing only and the mail label on the package contains a four (4) character NAME CONTROL. The MMR package contains instructions for filing on magnetic media only, and the mail label DOES NOT contain a name control. Names of less than four (4) characters should be left-justified, filling the unused positions with blanks. If you have not received a Package 1099 or you do not know your Payer Name Control, this field should be blank filled.
20	Blank	1	Enter blank.
21	Combined Federal/ State Filer	1	FORMS 1098, 1099-A, 1099-B, 1099-S, and W-2G CANNOT BE FILED UNDER THIS PROGRAM. Enter the appropriate code from the table below. *Code* — *Meaning* 1 — Participating in the Combined Federal/State Filing Program. blank — Not participating. Prior approval is required. A Consent Form 6847 must be submitted to IRS before tax information will be released to the states. (Refer to Part A, Sec. 16, Table 2 for money criteria.) Not all states participate in this program. If the Payer/Transmitter is not participating in the Combined Federal/State Filing Program, enter blank. (Refer to Part A, Sec. 16 for the requirements that MUST be met *prior* to actual participation in this program.) Filers who participate in this program must incorporate state totals into corresponding "K" Records as described in Part B, Sec. 8.
22	Type of Return	1	REQUIRED. Enter the appropriate code from the table below: *Type of Return* — *Code* 1098 — 3 1099-A — 4 1099-B — B 1099-DIV — 1 1099-G — F 1099-INT — 6 1099-MISC — A 1099-OID — D 1099-PATR — 7 1099-R — 9 1099-S — S 5498 — L W-2G — W
23-31	Amount Indicators	9	REQUIRED. *In most cases, the box numbers on paper information returns correspond with the amount codes used to file on magnetic media; however, if discrepancies occur, the instructions in this revenue procedure govern.* For a detailed explanation of the information to be reported in each Amount Code, refer to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G," included in your Magnetic Media Reporting package. The amount indicators entered for a given type of return indicate type(s) of payment(s) that were made. For each Amount Code entered in this field, a corresponding Payment Amount will appear in the Payee "B" Record.

Field Position	Field Title	Length	Description and Remarks
			EXAMPLE: If position 22 of the Payer/Transmitter "A" Record is "7" (for 1099-PATR) and positions 23-31 are "247bbbbbb" (b = blanks), this indicates that you will be reporting 3 actual Payment Amounts in all of the following Payee "B" Records. *The first* Payment Amount field in the Payee "B" Record will be all "0" (zeros); *the second* will represent Nonpatronage distributions; *the third* will be all "0" (zeros); *the fourth* will represent Federal Income Tax Withheld; *the fifth and sixth* will be all "0" (zeros); *the seventh* will represent Energy Investment Credit; and *the eighth and ninth* will be all "0" (zeros). Enter the Amount Indicators in ASCENDING SEQUENCE (*i.e.*, 247bbbbbb, b = blanks), left-justify, filling unused positions with blanks. For any further clarification of the Amount Indicator codes, contact IRS/MCC (see Part A, Sec. 3.)
Amount Indicators Form 1098—Mortgage Interest Statement			For Reporting Interest Received from Payer(s)/Borrower(s) (Payer of Record) on Form 1098: Amount Code — Amount Type 1 — Mortgage interest received from payer(s)/borrower(s)
Amount Indicators Form 1099-A—Acquisition or Abandonment of Secured Property			For Reporting the Acquisition or Abandonment of Secured Property on Form 1099-A: Amount Code — Amount Type 2 — Balance of principal outstanding 3 — Gross foreclosure proceeds 4 — Appraisal value
Amount Indicators Form 1099-B—Proceeds From Broker and Barter Exchange Transactions			For Reporting Payments on Form 1099-B: Amount Code — Amount Type 2 — Stocks, bonds, etc. (For Forward Contracts see Note.) 3 — Bartering (Do not report negative amounts.) 4 — Federal income tax withheld (Backup withholding) 6 — Profit (or loss) realized in 1990 7 — Unrealized profit (or loss) on open contracts—12/31/89 8 — Unrealized profit (or loss) on open contracts—12/31/90 9 — Aggregate profit (or loss)
			NOTE: The Payment Amount field associated with Amount Code 2 may be used to represent a loss when the reporting is for Forward Contracts. Refer to Payee "B" Record— General Field Descriptions, Payment Amount Fields, for instructions on reporting negative amounts. Do not report negative amounts for Amount Codes 3 and 4.
Amount Indicators Form 1099-DIV—Dividends and Distributions			For Reporting Payments on Form 1099-DIV: Amount Code — Amount Type 1 — Gross dividends and other distributions on stock (see Note) 2 — Ordinary dividends (see Note) 3 — Capital gain distributions (see Note) 4 — Nontaxable distributions (if determinable) (see Note) 5 — Investment expenses (see Note) 6 — Federal income tax withheld (Backup withholding) 7 — Foreign tax paid 8 — Cash liquidation distributions

Field Position	Field Title	Length	Description and Remarks
			9 Noncash liquidation distributions (show fair market value)

NOTE: Amount Code 1 MUST equal the sum of amounts reported in Amount Codes 2, 3, 4 and 5.

Amount Indicators Form 1099-G—Certain Government Payments

For Reporting Payments on Form 1099-G:

Amount Code	Amount Type
1	Unemployment compensation
2	State or local income tax refunds
4	Federal income tax withheld (Backup withholding)
5	Discharge of indebtedness
6	Taxable grants
7	Agriculture payments

Amount Indicators Form 1099-INT—Interest Income

For Reporting Payments on Form 1099-INT:

Amount Code	Amount Type
1	Earnings from savings and loan associations, credit unions, bank deposits, bearer certificates of deposit, etc.
2	Early withdrawal penalty
3	U.S. Savings Bonds, etc.
4	Federal income tax withheld (Backup withholding)
5	Foreign tax paid

Amount Indicators Form 1099-MISC—Miscellaneous Income

For Reporting Payments on Form 1099-MISC:

Amount Code	Amount Type
1	Rents
2	Royalties
3	Prizes, awards, etc.
4	Federal income tax withheld (Backup withholding)
5	Fishing boat proceeds
6	Medical and health care payments
7	Nonemployee compensation or Crop Insurance Proceeds (see Note 1)
8	Substitute payments in lieu of dividends or interest
9	Direct sales "indicator" (see Note 2)

NOTE 1: Amount code "7" is normally used to report nonemployee compensation. However, Amount code "7" may also be used to report Crop Insurance Proceeds. If both Nonemployee compensation and Crop Insurance Proceeds are being paid to the same payee, two separate Payee "B" Records are required. See Part B, Section 6, Document Specific Code for instructions on how to indicate Crop Insurance Proceeds.

NOTE 2: Use Amount Code "9" to report the occurrence of sales of $5,000 or more of consumer products to a person on a buy-sell, deposit-commission, or any other commission basis for resale. Refer to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G," for specific instructions. Do not use this indicator for sales of less than $5,000. The use of Amount Code "9" actually reflects an indicator of direct sales of $5,000 or more and is not an actual payment amount or amount code. The corresponding payment amount field in the Payee "B" Record MUST be reflected as 0000000100 if you are reporting direct sales of $5,000 or more. This does not mean that a payment of $1.00 was made or is being reported.

Amount Indicators Form 1099-OID—Original Issue Discount

For Reporting Payments on Form 1099-OID:

Amount Code	Amount Type
1	Original issue discount for 1990
2	Other periodic interest
3	Early withdrawal penalty
4	Federal income tax withheld (Backup withholding)

Field Position	Field Title	Length	Description and Remarks
Amount Indicators Form 1099-PATR— Taxable Distributions Received From Cooperatives			For Reporting Payments on Form 1099-PATR: Amount Code — Amount Type 1 — Patronage dividends 2 — Nonpatronage distributions 3 — Per-unit retain allocations 4 — Federal income tax withheld (Backup withholding) 5 — Redemption of nonqualified notices and retain allocations 6 — Investment credit (see Note) 7 — Energy investment credit (see Note) 8 — Jobs credit (see Note) 9 — Low-income housing credit (see Note)
NOTE: The amounts shown for Amount Indicators 6, 7, 8 and 9 must be reported to the payee; however, they need not be reported to IRS.			
Amount Indicators Form 1099-R — Total Distributions From Profit-Sharing, Retirement Plans, Individual Retirement Arrangements, Insurance Contracts, Etc.			For Reporting Payments on Form 1099-R: Amount Code — Amount Type 1 — Gross distribution 2 — Taxable amount (see Note 1) 3 — Amount in Amount Code 2 eligible for capital gain election 4 — Federal income tax withheld (See Note 2) 5 — Employee contributions or insurance premiums 6 — Net unrealized appreciation in employer's securities 8 — Other 9 — State income tax withheld (see Note 3)
NOTE 1: If a distribution is a loss, do not enter a negative amount. For example, if stock is distributed but the value is less than the employee's after-tax contribution, enter the value of the stock in Amount Code 1, enter zero (0) in Amount Code 2, and enter the employee's contribution in Amount Code 5.			
NOTE 2. See the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" for further information concerning the definition of Federal Income Tax Withheld for Form 1099-R.			
NOTE 3: State income tax withheld has been added for the convenience of the payer but need not be reported to IRS.			
Amount Indicators Form 1099-S — Proceeds From Real Estate Transactions			For Reporting Payments on Form 1099-S: Amount Code — Amount Type 2 — Gross proceeds
Amount Indicators Form 5498— Individual Retirement Arrangement Information (See Note)			For Reporting Payments on Form 5498: Amount Code — Amount Type 1 — Regular IRA contributions made in 1990 and 1991 for 1990 2 — Rollover IRA contributions 3 — Life insurance cost included in Amount Code 1 4 — Fair market value of the account
NOTE: Form 5498 is filed for each person for whom you maintained an Individual Retirement Arrangement (IRA) (including an Individual Retirement Arrangement maintained as part of a Simplified Employee Pension (SEP)) during 1990. Amount Code 4 represents the value of the account. Trustees and issuers of IRAs and SEPs must report the value of accounts in existence during the year, even if no contributions were made during the year. However, if a total distribution was made from an IRA during the year and no contributions were made for that year, you need not file Form 5498 to reflect that the fair market value on December 31 was zero. Do not report employer SEP contributions on Form 5498; however, you must report the value of a SEP account. For an IRA, use all applicable Amount Codes. If no IRA contributions were made for 1990, you will only use Amount Code 4. Only IRA contributions to be applied to 1990 that are made between January 1, 1990 and April 15, 1991 are to be reported in Amount Code 1.			

Field Position	Field Title	Length	Description and Remarks
Amount Indicators Form W-2G— Certain Gambling Winnings			For Reporting Payments on Form W-2G: Amount Code — Amount Type 1 — Gross winnings 2 — Federal income tax withheld 3 — State income tax withheld (see Note) 7 — Winnings from identical wagers
NOTE: State income tax withheld has been added for the convenience of the payer but need not be reported to IRS.			
32-41	Blank	10	Enter blanks.
42-43	Magnetic Tape Filer Indicator	2	REQUIRED. Magnetic tape/tape cartridge filers *only*. Enter the letters "LS" (in UPPERCASE *ONLY*) in this field.
44-48	Transmitter Control Code (TCC)	5	REQUIRED. Enter the five character alpha/numeric Transmitter Control Code assigned by IRS. You must have a TCC to file data on this program. DO NOT ENTER MORE THAN ONE TCC PER FILE.
49	Foreign Corporation Indicator	1	Enter a "1" if the payer is a Foreign Corporation and income is paid by the corporation to a U.S. resident from sources outside of the United States. (See Part A, Sec. 17 for a definition of a Foreign Corporation.) If the payer is not a Foreign Corporation, enter a blank. See Note 1.
Note 1. Some filers are submitting their files with a "1" coded in Position 49 in all of the records contained on the file, whether the payer is a foreign corporation or not. Records that are coded as foreign corporations are processed differently than those that are coded with a blank in Position 49. If your program automatically codes a "1" in Position 49, all of the records on your file will be processed as foreign corporations. If you erroneously report corporations as foreign, you may be subject to a penalty for providing incorrect information to IRS. Therefore, be sure to code only those records as foreign corporations that should be coded as such.			
50-89	First Payer Name Line	40	REQUIRED. Must be present or files will be returned for correction. Enter the name of the payer whose Federal EIN appears in positions 7-15 of the "A" Record, in the manner in which it is used on other tax returns. Any extraneous information must be deleted from the name line. Left-justify and fill with blanks. (Do not enter the Transfer Agent's name in this field. The Transfer Agent's name should appear in the Second Payer Name field.) NOTE: WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME AND EIN OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (THE PAYER OF RECORD) AND THE AMOUNT PAID. FOR FORM 1099-S, THE "A" RECORD WILL REFLECT THE PERSON RESPONSIBLE FOR REPORTING THE TRANSACTION AND THE "B" RECORD WILL REFLECT THE SELLER.
90-129	Second Payer Name Line	40	The contents of this field are dependent upon the TRANSFER AGENT INDICATOR in position 130 of this record. If the Transfer Agent Indicator contains a "1," this field must contain the name of the Transfer Agent. If the Transfer Agent Indicator contains a "0" (zero), this field must contain either a continuation of the First Payer Name field or blanks. Left-justify and fill unused positions with blanks. IF NO ENTRIES ARE PRESENT FOR THIS FIELD, FILL WITH BLANKS. (See Part A, Sec. 17 for a definition of Transfer Agent.)

Field Position	Field Title	Length	Description and Remarks
130	Transfer Agent Indicator	1	REQUIRED. Identifies the entity in the Second Payer Name field. (See Part A, Sec. 17 for a definition of Transfer Agent.) *Code* — *Meaning* 1 — The entity in the Second Payer Name field is the Transfer Agent (as defined in Part A, Sec. 17). 0 (zero) — The entity shown is *not* the Transfer Agent (*i.e.*, the Second Payer Name field contains either a continuation of the First Payer Name field or blanks).
131–170	Payer Shipping Address	40	REQUIRED. If the TRANSFER AGENT INDICATOR in position 130 is a "1" enter the shipping address of the Transfer Agent. Otherwise, enter the shipping address of the payer. Left-justify and fill with blanks.
171–210	Payer City, State and ZIP Code	40	REQUIRED. If the TRANSFER AGENT INDICATOR in position 130 is a "1" enter the City, State and ZIP Code of the Transfer Agent. Otherwise, enter the City, State and ZIP Code of the payer. Left-justify and fill with blanks.
211–290	Transmitter Name	80	REQUIRED. (Only if the payer and transmitter are not the same.) Enter the name of the transmitter in the manner in which it is used in normal business. The name of the transmitter must be reported in the same manner throughout the entire file. Left-justify and fill with blanks. If the payer and transmitter are the same, enter blanks in this field.
291–330	Transmitter Mailing Address	40	REQUIRED. (Only if the payer and transmitter are not the same.) Enter the mailing address of the transmitter. Left-justify and fill with blanks. If the payer and transmitter are the same, enter blanks in this field.
331–370	Transmitter City, State and ZIP Code	40	REQUIRED. (Only if the payer and transmitter are not the same.) Enter the City, State and ZIP Code of the transmitter. Left-justify and fill with blanks. If the payer and transmitter are the same, enter blanks in this field.
371–420	Blank	50	Enter blanks. You may enter carriage return/line feed (cr/lf) characters in positions 419–420.

SEC. 5. PAYER/TRANSMITTER "A" RECORD—RECORD LAYOUT

RECORD TYPE	PAYMENT YEAR	REEL SEQUENCE NUMBER	PAYER'S FEDERAL EIN*	PAYER NAME CONTROL*	BLANK
1	2–3	4–6	7–15	16–19	20

COMBINED FEDERAL/STATE FILER	TYPE OF RETURN	AMOUNT INDICATORS	BLANK	MAGNETIC TAPE FILER INDICATOR
21	22	23–31	32–41	42–43

RECORD NAME: PAYER/TRANSMITTER "A" RECORD—Continued

TRANSMITTER CONTROL CODE	FOREIGN CORPORATION INDICATOR	FIRST PAYER NAME*	SECOND PAYER NAME*	TRANSFER AGENT INDICATOR
44-48	49	50-89	90-129	130

PAYER SHIPPING ADDRESS*	PAYER CITY STATE AND ZIP CODE*	TRANSMITTER NAME	TRANSMITTER MAILING ADDRESS
131-170	171-210	211-290	291-330

TRANSMITTER CITY, STATE, AND ZIP CODE	BLANK
331-370	371-420

* When reporting Form 1098 Mortgage Interest Statement, the "A" Record will reflect the name and EIN of the recipient of the interest (the filer). For Form 1099-S, the "A" Record will reflect the person responsible for reporting the transaction.

SEC. 6. PAYEE "B" RECORD—GENERAL FIELD DESCRIPTIONS AND RECORD LAYOUTS

.01 The Payee "B" Record contains the payment information from the individual returns. When filing information documents on magnetic media, the format for the Payee "B" Records will remain constant and is a fixed length of 420 positions. The record layout for positions 1 through 321 is the same for all "B" Records. Positions 322 through 420 vary slightly for Forms 1099-A, 1099-B, 1099-OID, 1099-S and W-2G to accommodate variations within these forms. The individual field definitions follow the Payee ZIP Code field in the "B" Record.

All records must be submitted with a fixed length of 420 positions. In the "A" Record, the Amount Indicator Codes that appear in tape or diskette positions 23 through 31 will be left-justified and blank filled. In the "B" Record, you will allow for all nine payment amount fields. For those fields not used enter zeros (0). For example, if you are reporting on Form 1099-PATR, you will enter a "7" in tape position 22 of the "A" Record, Type of Return Indicator field. If you are reporting payments for Amount Codes 2, 4 and 7, then media positions 23 through 31 of the "A" Record will be "247bbbbbb" (b = blanks). In the Payee "B" Record:

Positions 51 through 60 for Payment Amount 1 will be zeros.

Positions 61-70 will reflect the actual payment amount to be reported for "Nonpatronage distributions."

Positions 71-80 for Payment Amount 3 will be zeros.

Positions 81-90 will reflect the actual payment amount to be reported for "Federal income tax withheld."

Positions 91-110 for Payment Amounts 5 and 6 will be zeros.

Positions 111-120 will reflect the actual payment amount to be reported for "Energy investment credit."

Positions 121-140 for Payment Amounts 8 and 9 will be zeros.

.02 IRS must be able to identify the surname or last name associated with the TIN (SSN or EIN) furnished on a return. The specifications below include a field in the payee records called "Name Control" in which the first four characters of the payee's surname or last name are to be entered by the payer. The surname or last name should appear first in the First Payee Name Line field of all Payee "B" Records.

.03 If payers are unable to determine the first four characters of the surname, the Name Control Field may be left blank; however, compliance with the following will facilitate IRS computer programs in generating the Name Control.

(a) The surname of the payee whose TIN (SSN or EIN) is shown in the Payee "B" Record should always appear first. If, however, your records have been developed using the first name first, you must leave a blank space between the first and last names.

(b) In the case of multiple payees, only the surname of the payee whose TIN (SSN or EIN) is shown in the Payee "B" Record must be present in the First Payee Name Line. Surnames of any other payees in the record may be entered in the Second Payee Name field.

.04 See Part A, Sec. 14 for further information concerning Taxpayer Identification Numbers (TIN).

.05 A field is also provided in these specifications for Special Data Entries. This field may be used to record information required by state or local governments, or for the filer's own personal use. IRS does not use the data provided in the Special Data Entries field; therefore, the IRS program doesn't check the content or format of the data entered in this field. It is the filer's choice whether or not this field is used. If this field is coded, it will not affect the processing of the Payee "B" Records.

.06 Those filers participating in the Combined Federal/State Filing Program *must* code their records appropriately for the state to receive the information. The state code appears in positions 417 and 418 of the "B" Record. The file should also meet the money criteria described in Part A, Sec. 16, Table 2.

.07 Do not code for the states unless prior approval to participate has been granted by IRS. See Part A, Sec. 16, Table 1 for a list of the valid participating state codes. FORMS 1098, 1099-A, 1099-B, 1099-S, AND W-2G CANNOT BE FILED UNDER THE COMBINED FEDERAL/ STATE FILING PROGRAM. Your files must meet all of the requirements specified in Part A, Sec. 16 in order to participate in this program.

.08 All alpha characters entered in the "B" Record should be uppercase.

.09 Do not use decimal points (.) to indicate dollars and cents on magnetic media.

.10 IRS STRONGLY ENCOURAGES FILERS TO REVIEW THEIR DATA FOR ACCURACY BEFORE SUBMISSION TO PREVENT ISSUANCE OF ERRONEOUS NOTICES TO PERSONS FOR WHOM REPORTS ARE FILED. FILERS SHOULD BE ESPECIALLY CAREFUL THAT THEIR TAXPAYER NAMES, SOCIAL SECURITY NUMBERS (SSNs), ACCOUNT NUMBERS, TYPES OF INCOME, AND INCOME AMOUNTS ARE CORRECT.

.11 WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME AND EIN OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (THE BORROWER/ PAYER OF RECORD) AND THE AMOUNT PAID. FOR FORM 1099-S, THE "A" RECORD WILL REFLECT THE PERSON RESPONSIBLE FOR REPORTING THE TRANSACTION. THE "B" RECORD WILL REFLECT THE SELLER.

RECORD NAME: PAYEE "B" RECORD

NOTE: For all fields marked REQUIRED, you must provide the information described under Description and Remarks. For those fields not marked REQUIRED, you must allow for the field but may be instructed to enter blanks or zeros in the indicated position(s) and for the indicated length. All records are a fixed length of 420 positions.

Field Position	Field Title	Length	Description and Remarks
1	Record Type	1	REQUIRED. Enter "B".
2-3	Payment Year	2	REQUIRED. Enter "90".
4-5	Document Specific Code	2	REQUIRED for Forms 1099-R, 1099-MISC, 1099-G and W-2G. FOR ALL OTHER FORMS, OR IF NOT USED, ENTER BLANKS. *For Form 1099-R,* enter the appropriate code(s) for the Distribution Code. More than one code may apply for Form 1099-R; however, if only one code is required, it will be entered in position 4. Position 5 will be blank. NOTE: You MUST enter at least one (1) Distribution Code for Form 1099-R. BLANKS in BOTH positions 4 and 5 are NOT acceptable for Form 1099-R. *For Form 1099-MISC*, position 4 is used to indicate Crop Insurance Proceeds. Position 5 will be blank. *For Form 1099-G*, enter the year of income tax refund in position 4. Position 5 will be blank. *For Form W-2G*, enter the Type of Wager in position 4. Position 5 will be blank.
	Distribution Code (Form 1099-R only)		Use only for reporting on Form 1099-R to identify the Distribution Code. Enter the applicable code from the table that follows. A "0" (zero) is not a valid code for Form 1099-R. A numeric code MUST be entered in all cases except when Code P or D is used. However, when using Code P for an IRA distribution under section 408(d)(4), you may also enter Code 1, if it applies. If you are reporting a total distribution from a plan that includes a distribution of a DEC, you must report two separate "B" Records: one to report the distribution of DEC's; the other to report the distribution from the other part of the plan. In addition, if more than one numeric code is applicable to a distribution, report two separate Payee "B" Records. *Category* (See Note) — *Code* Early (premature) distribution, no known exception* — 1* Early (premature) distribution, exception applies (as defined in Section 72(q), (t), or (v)) other than disability or death* — 2*

Field Position	Field Title	Length	Description and Remarks
			Disability* 3*
			Death (includes payments to a beneficiary)* 4*
			Prohibited transaction* 5*
			Section 1035 Exchange 6
			Normal distribution* 7*
			Excess contributions plus earnings/excess deferrals (and/or earnings) taxable in 1990 8
			PS 58 costs 9
			Excess contributions plus earnings/excess deferrals taxable in 1989 P
			Qualifies for 5-year/10-year averaging A
			Qualifies for death benefit exclusion B
			Category (See Note) *Code*
			Qualifies for both A and B C
			Excess contributions plus earnings/excess deferrals taxable in 1988 D

* If you are reporting an IRA or SEP distribution for Code 1, 2, 3, 4, 5, or 7, you must code a "1" in Position 44 of the Payee "B" Record.

NOTE: For detailed explanations of the distribution codes, see the 1990 "Instructions for Form 1099, 1098, 5498, and W-2G" included in your Magnetic Media Reporting Packages.

Crop Insurance Proceeds (Form 1099-MISC only)

If the payment amount reported for Amount Code 7 is crop insurance proceeds, enter a "1" in Position 4. Position 5 will be blank.

Tax Year of Refund (Form 1099-G only)

Use only for reporting the tax year for which the refund was issued. Enter the NUMERIC year for which the refund was issued (e.g., for 1989, enter 9). However, if the payment amount for Amount Code 2, State or Local Income Tax Refunds, contains a refund, credit or offset that is attributable to an income tax that applies exclusively to income from a trade or business and is not of general application, then enter the ALPHA equivalent of the year for which the refund was issued, from the table below (e.g., for 1989, enter I). This code should appear in position 4. Position 5 will be blank.

Year for Which Trade or Business Refund was Issued	*Alpha Equivalent**
1	A
2	B
3	C
4	D
5	E
6	F
7	G
8	H
9	I
0	J

* To be used for trade or business refunds only.

Type of Wager (Form W-2G only)

Use only for reporting the Type of Wager on Form W-2G. This code will appear in position 4. Position 5 will be blank.

Category	*Code*
Horse Race Track (or Off Track Betting of a Horse Track nature)	1
Dog Race Track (or Off Track Betting of a Dog Track nature)	2
Jai-alai	3
State Conducted Lottery	4
Keno	5

Field Position	Field Title	Length	Description and Remarks
			Casino Type Bingo. DO NOT use this code for any other type of Bingo winnings (e.g., Church or Fire Dept.) 6 Slot Machines 7 Any other type of gambling winnings. (This includes Church Bingo, Fire Dept. Bingo, unlabeled winnings, etc.) 8
6	Blank	1	Enter blank.
7	Corrected Return Indicator	1	Enter blank. Position 7 is used to indicate a corrected return. Refer to Part A, Sec. 13 for specific instructions on how to file corrected returns.
8–11	Name Control	4	Enter the first four (4) characters of the surname (last name) of the payee. The surname of the person whose TIN is being reported in positions 15–23 of the "B" Record MUST be used to determine the Name Control. This is especially important in the case of trustee accounts. IF THE NAME THAT CORRESPONDS TO THE TIN IS NOT INCLUDED IN THE FIRST OR SECOND PAYEE NAME LINE, EVERY EFFORT SHOULD BE MADE TO DEVELOP THE CORRECT NAME CONTROL OF THE NAME THAT CORRESPONDS TO THE TIN. Surnames of less than four (4) characters should be left-justified, filling the unused positions with blanks. Special characters and imbedded blanks should be removed. In the case of a business, use the first four significant characters of the business name. Disregard the word "the" when it is the first word of the name, UNLESS there are only two words in the name. IF THE NAME CONTROL IS NOT DETERMINABLE BY THE PAYER, LEAVE THIS FIELD BLANK. (See Part A, Sec. 14 for information on Name Controls). A dash (-) and ampersand (&) are the only acceptable special characters.

The following examples may be helpful to you in developing the Name Control:

	NAME	*NAME CONTROL*
Individuals:		
	Jane Brown	BROW
	John A. Lee	LEE*
	James P. En, Sr.	EN*
	John O'Neill	ONEI
	Mary Van Buren	VANB
	Juan De Jesus	DEJE
	Gloria A. El-Roy	EL-R
	Mr. John Smith	SMIT
	Joe McCarthy	MCCA

* Name Controls of less than four (4) significant characters must be left-justified and blank filled.

12–13	Blank	2	Enter blanks.
14	Type of TIN	1	REQUIRED. This field is used to identify the Taxpayer Identification Number (TIN) in positions 15–23 as either an Employer Identification Number, a Social Security Number, or that the type is undeterminable. Enter the appropriate code from the following table: *Type of TIN* / *TIN* / *Type of Account* 1 / EIN / A business, organization, or other entity that is not an individual 2 / SSN / An individual blank / N/A / If the type of TIN is undeterminable, enter a blank.
15–23	Taxpayer Identification Number	9	REQUIRED. Enter the valid 9-digit Taxpayer Identification Number of the payee (SSN or EIN, as appropriate). If an identification number has been applied for but not received, enter blanks. DO NOT ENTER HYPHENS, ALPHA CHARACTERS, ALL 9s OR ALL ZEROS.
24–43	Payer's Account Number For Payee	20	DO NOT ENTER A TAXPAYER IDENTIFICATION NUMBER IN THIS FIELD. We strongly encourage the payer to use this field to enter the payee's account number, which can be any account number assigned by the payer to the payee (e.g., checking account or savings account). THIS NUMBER WILL HELP TO DISTINGUISH THE INDIVIDUAL PAYEE'S ACCOUNT WITH YOU AND SHOULD BE UNIQUE FOR EACH DOCUMENT SO AS TO IDENTIFY THE SPECIFIC TRANSACTION MADE WITH THE ORGANIZATION SHOULD MULTIPLE RETURNS BE FILED FOR ONE PAYEE. This information is particularly useful if corrections are filed. This number is also provided with your Invalid/No-TIN notification from the IRS and may help you determine the branch or subsidiary reporting the transaction. YOU ARE STRONGLY ENCOURAGED TO USE THIS FIELD. Do not define data in this field in packed decimal format. If fewer than twenty characters are required, you may either left- or right-justify, filling the remaining positions with blanks.

Field Position	Field Title	Length	Description and Remarks
44	IRA/SEP Indicator	1	*This field is only used when reporting Forms 1099-R.* This field will be coded ONLY if you entered a code 1, 2, 3, 4, 5, or 7 in either Position 4 or 5, Document Specific Code, of the Payee "B" Record, AND you are reporting a distribution from an IRA or SEP. Enter the appropriate indicator from the table below: *Indicator* — *Usage* 1 — You are reporting an IRA or SEP Distribution. Blank — You are NOT reporting an IRA or SEP Distribution.
45–46	Percentage of Total Distribution	2	THIS FIELD IS ONLY USED WHEN REPORTING *FORMS 1099-R*, and ONLY if you are reporting a total distribution to more than one person. This field is only 2 positions in length because when a total distribution is made to more than one person, the figure MUST be 99% or less. If the percentage is 100, leave this field blank. If the percentage is a fraction, round off to the nearest whole number (for example, 10.4% will be 10%; 10.5% or more will be 11%). Enter the percentage received by the person whose TIN is included in positions 15–23 of the "B" Record. This field must be right-justified, and unused positions must be zero filled. If not applicable, enter blanks. You need not enter a percentage for IRA or SEP distributions.
47–50	Blank	4	Enter blanks.
	Payment Amount Fields (Must be numeric)		REQUIRED. *You must allow for all payment amounts.* For those not used you will enter zeros. For example: If position 22 of the Payer/Transmitter "A" Record is "7" (for 1099-PATR) and positions 23–31 are "247bbbbbb" (b = blank), this indicates that you will be reporting 3 actual payment amounts in the following Payee "B" Records. Payment Amount 1 will be all "0" (zeros), Payment Amount 2 will represent Nonpatronage distributions, Payment Amount 3 will be all "0" (zeros), Payment Amount 4 will represent Federal income tax withheld, Payment Amounts 5 and 6 will be all "0" (zeros), Payment Amount 7 will represent Energy investment credit, and Payment Amounts 8 and 9 will be all "0" (zeros). Each payment field must contain 10 numeric characters (see Note). Each payment amount must be entered in U.S. dollars and cents. The rightmost two positions represent cents in the Payment Amount Fields. Do not enter dollar signs, commas, decimal points or NEGATIVE PAYMENTS, except those items that reflect a loss on Form 1099-B. Positive and negative amounts are indicated by placing a "+" or "–" (minus sign) in the leftmost position of the payment amount field. A negative overpunch in the units position may be used, instead of a minus sign, to indicate a negative amount. If a plus sign, minus sign or negative overpunch is not used, the number is assumed to be positive. PAYMENT AMOUNTS MUST BE RIGHT-JUSTIFIED AND UNUSED POSITIONS MUST BE ZERO FILLED. FEDERAL INCOME TAX WITHHELD CANNOT BE REPORTED AS A NEGATIVE AMOUNT ON ANY FORM. NOTE: *If you are reporting a money amount in excess of 9999999999 (dollars and cents), it must be reported as follows: (1) The first Payee "B" Record MUST contain 9999999999.*

Field Position	Field Title	Length	Description and Remarks
			(2) The second Payee "B" Record will contain the remaining money amounts. *DO NOT SPLIT THIS FIGURE IN HALF.*
51-60	Payment Amount 1*	10	The amount reported in this field represents payments for Amount Code 1 in the Payer/Transmitter "A" Record.
61-70	Payment Amount 2*	10	The amount reported in this field represents payments for Amount Code 2 in the Payer/Transmitter "A" Record.
71-80	Payment Amount 3*	10	The amount reported in this field represents payments for Amount Code 3 in the Payer/Transmitter "A" Record.
81-90	Payment Amount 4*	10	The amount reported in this field represents payments for Amount Code 4 in the Payer/Transmitter "A" Record.
91-100	Payment Amount 5*	10	The amount reported in this field represents payments for Amount Code 5 in the Payer/Transmitter "A" Record.
101-110	Payment Amount 6*	10	The amount reported in this field represents payments for Amount Code 6 in the Payer/Transmitter "A" Record.
111-120	Payment Amount 7*	10	The amount reported in this field represents payments for Amount Code 7 in the Payer/Transmitter "A" Record.
121-130	Payment Amount 8*	10	The amount reported in this field represents payments for Amount Code 8 in the Payer/Transmitter "A" Record.
131-140	Payment Amount 9*	10	The amount reported in this field represents payments for Amount Code 9 in the Payer/Transmitter "A" Record.

* If there are discrepancies between these Payment Amount Codes and the boxes on the paper forms, the instructions in this revenue procedure govern.

141-160	Blank	20	Enter blanks.
161	Foreign Country Indicator	1	REQUIRED. If the payee address is in a foreign country enter a "1" in this field. This will allow you to use any format for the Payee Address, City, State and ZIP Code. Address information must not appear in the First or Second Payee Name Line. If the address for the payee is a U.S. address, you must enter a blank in this field. The free address format may only be used for foreign addresses. For U.S. addresses, you must use the U.S. Postal Service state abbreviations in magnetic media positions 311 and 312 of the "B" Record. These abbreviations are provided in Part A, Sec. 18.
162-201	First Payee Name Line	40	REQUIRED. Do not enter address information in this field. Enter the name of the payee (preferably surname (last name) first) whose Taxpayer Identification Number appears in positions 15-23 of the "B" Record. If fewer than 40 characters are required, left-justify and fill unused positions with blanks. If more space is required for the name, utilize the Second Payee Name Line field below. If there are multiple payees, only the name of the payee whose Taxpayer Identification Number has been provided should be entered in this field. The names of the other payees may be entered in the Second Payee Name Line field. NOTE: WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (THE BORROWER/PAYER OF RECORD) AND THE AMOUNT PAID. FOR FORMS 1099-S, THE "B" RECORD WILL REFLECT THE SELLER INFORMATION.

RECORD NAME: PAYEE "B" RECORD—Continued

Field Position	Field Title	Length	Description and Remarks
202-241	Second Payee Name Line	40	If the payee name requires more space than is available in the First Payee Name Line, *enter only the remaining portion of the name in this field.* If there are multiple payees, (*e.g.*, partners or joint owners) we encourage you to use this field for those payees' names not associated with the Taxpayer Identification Number provided in positions 15-23 of the "B" Record. *Do not enter address information in this field.* NOTE: It is important that you provide as much payee information to IRS as possible to identify the owner of the Taxpayer Identification Number. Left-justify and fill unused positions with blanks. FILL WITH BLANKS IF NO ENTRIES ARE PRESENT FOR THIS FIELD.
242-281	Payee Mailing Address	40	REQUIRED. Enter mailing address of payee. Left-justify and fill unused positions with blanks. The address MUST be present. This field MUST NOT contain any data other than the payee's mailing address. Any format can be used in reporting a foreign mailing address.

For U.S. addresses, the Payee City, Payee State and Payee ZIP Code must be reported as a 29, 2 and 9 position field, respectively. For foreign addresses, the Payee City, Payee State (Country) and Payee ZIP Code can be reported as a continuous 40 position field. When reporting a foreign address, the Foreign Country Indicator in position 161 must contain a "1."

282-310	Payee City	29	REQUIRED. Enter the city, left-justified and fill the unused positions with blanks. Do not enter state and ZIP Code information in this field.
311-312	Payee State	2	REQUIRED. Enter the abbreviation for the state as shown in Part A, Sec. 18. You MUST use valid U.S. Postal Service state abbreviations for U.S. addresses.
313-321	Payee ZIP Code	9	REQUIRED. Enter the valid 9 digit ZIP Code assigned by the U.S. Postal Service. If only the first 5 digits are known, left-justify and fill the unused positions with blanks. Use this field for the ZIP Code only. For foreign countries, alpha characters are acceptable as long as you have entered a "1" in the Foreign Country Indicator field, located in position 161 of the "B" Record.

THE FOLLOWING FIELD DEFINITIONS DESCRIBE PAYEE "B" RECORD POSITIONS FOLLOWING THE PAYEE ZIP CODE FOR:

(1) Forms 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R and 5498
(2) Form 1099-A
(3) Form 1099-B
(4) Form 1099-OID
(5) Form 1099-S
(6) Form W-2G

(1) FORMS 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R and 5498 (For detailed explanations of the following fields, see the 1990 "Instructions for Form 1099, 1098, 5498, and W-2G" included in your magnetic media reporting packages.)

NEXT FIELD AFTER PAYEE ZIP CODE:

322-349	Blank	28	Enter blanks.

RECORD NAME: PAYEE "B"
FORMS 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, and 5498

Field Position	Field Title	Length	Description and Remarks
350-416	Special Data Entries	67	This portion of the Payee "B" Record may be used to record information for state or local government reporting or for the filer's own purposes. Payers should contact their state or local revenue departments for their filing requirements. If this field is not utilized, ENTER BLANKS.
417-418	Combined Federal/ State Code	2	If this payee record is to be forwarded to a state agency as part of the Combined Federal/State Filing Program, enter the valid state code from Part A, Sec. 16, Table 1. For those filers or states NOT participating in this program or for Form 1098, ENTER BLANKS.
419-420	Blank	2	Enter blanks, or carriage return/line feed (cr/lf) characters.

SECTION 7. END OF PAYER "C" RECORD

.01 THE "C" RECORD IS A FIXED RECORD LENGTH OF 420 POSITIONS. The Control Total fields are each 15 positions in length.

.02 The End of Payer "C" Record is a summary record for a type of return for a given payer.

.03 The "C" Record will contain the total number of payees and the totals of the payment amount fields filed by a given payer. The "C" Record MUST be written after the last Payee "B" Record for each type of return for a given payer. For each "A" Record and group of "B" Records on the file, there must be a corresponding "C" Record.

.04 In developing the "C" Record, for example, if you used Amount Codes 1, 3 and 6 in the "A" Record, the totals from the "B" Records will appear in Control Totals 1, 3 and 6 of the "C" Record. In this example, positions 26-40, 56-85, and 101-145 would be zero filled. Positions 146-420 would be blank filled.

.05 Payers/Transmitters must verify the accuracy of the totals in the "C" Record and must enter the totals on Forms 4804, 4802 or computer-generated substitute, which will accompany the shipment. The lines used on Forms 4804 and 4802 to record payment amounts correspond with the Amount Codes used in the "A" Record.

.06 Missing or incorrect End of Payer "C" Records will result in the media being returned for correction.

RECORD NAME: END OF PAYER "C" RECORD

Field Position	Field Title	Length	Description and Remarks
1	Record Type	1	REQUIRED. Enter "C".
2-7	Number of Payees	6	REQUIRED. Enter the total number of Payee "B" Records covered by the preceding Payer/Transmitter "A" Record. Right-justify and zero fill.
8-10	Blank	3	Enter blanks.
			REQUIRED. If any corresponding Payment Amount fields are present in the Payee "B" Records, accumulate into the appropriate Control Total fields. CONTROL TOTALS MUST BE RIGHT-JUSTIFIED, AND UNUSED CONTROL TOTAL FIELDS MUST BE ZERO FILLED. Please note that all Control Total fields are 15 positions in length.
11-25	Control Total 1	15	
26-40	Control Total 2	15	
41-55	Control Total 3	15	
56-70	Control Total 4	15	
71-85	Control Total 5	15	
86-100	Control Total 6	15	
101-115	Control Total 7	15	
116-130	Control Total 8	15	
131-145	Control Total 9	15	
146-420	Blank	275	Enter blanks. You may enter carriage return/line feed (cr/lf) characters in positions 419-420.

END OF PAYER "C" RECORD - RECORD LAYOUT

RECORD TYPE	NUMBER OF PAYEES	BLANK	CONTROL TOTAL 1	CONTROL TOTAL 2	CONTROL TOTAL 3
1	2-7	8-10	11-25	26-40	41-55

CONTROL TOTAL 4	CONTROL TOTAL 5	CONTROL TOTAL 6	CONTROL TOTAL 7	CONTROL TOTAL 8	CONTROL TOTAL 9	BLANK
56-70	71-85	86-100	101-115	116-130	131-145	146-420

SECTION 8. STATE TOTALS "K" RECORD

.01 THE "K" RECORD IS A FIXED RECORD LENGTH OF 420 POSITIONS. The Control Total fields are each 15 positions in length.

.02 The State Totals "K" Record is a summary for a given payer and a given state in the Combined Federal/State Filing Program, used ONLY when state reporting approval has been granted.

.03 The "K" Record will contain the total number of payees and the totals of the payment amount fields filed by a given payer for a given state. The "K" Record(s) must be written after the "C" Record for the related "A" Record.

.04 In developing the "K" Record, for example, if you used Amount Codes 1, 3 and 6 in the "A" Record, the totals from the "B" Records coded for this state will appear in Control Totals 1, 3 and 6 of the "K" Record.

.05 There MUST be a separate "K" Record for *each state* being reported.
.06 Refer to Part A, Sec. 16 for the requirements and conditions that MUST be met to file on this program.

RECORD NAME: STATE TOTALS "K" RECORD

Field Position	Field Title	Length	Description and Remarks
1	Record Type	1	REQUIRED. Enter "K".
2–7	Number of Payees	6	REQUIRED. Enter the total number of Payee "B" Records being coded for this state. Right-justify and zero fill.
8–10	Blank	3	Enter blanks.

REQUIRED. If any corresponding Payment Amount fields are present in the Payee "B" Records, accumulate into the appropriate Control Total fields. CONTROL TOTALS MUST BE RIGHT-JUSTIFIED, AND UNUSED CONTROL TOTAL FIELDS MUST BE ZERO FILLED. Please note that all Control Total fields are 15 positions in length.

11–25	Control Total 1	15	
26–40	Control Total 2	15	
41–55	Control Total 3	15	
56–70	Control Total 4	15	
71–85	Control Total 5	15	
86–100	Control Total 6	15	
101–115	Control Total 7	15	
116–130	Control Total 8	15	
131–145	Control Total 9	15	
146–416	Reserved	271	Reserved for IRS use. Enter blanks.
417–418	Combined Federal/ State Code	2	REQUIRED. Enter the code assigned to the state which is to receive the information. (Refer to Part A, Sec. 16 Table 1.)
419–420	Blank	2	Enter blanks, or carriage return/line feed (cr/lf) characters.

STATE TOTALS "K" RECORD - RECORD LAYOUT

RECORD TYPE	NUMBER OF PAYEES	BLANK	CONTROL TOTAL 1	CONTROL TOTAL 2	CONTROL TOTAL 3
1	2–7	8–10	11–25	26–40	41–55

CONTROL TOTAL 4	CONTROL TOTAL 5	CONTROL TOTAL 6	CONTROL TOTAL 7	CONTROL TOTAL 8	CONTROL TOTAL 9

RESERVED	COMBINED FEDERAL/ STATE CODE	BLANK
146–416	417–418	419–420

SECTION 9. END OF TRANSMISSION "F" RECORD

.01 THE "F" RECORD IS A FIXED RECORD LENGTH OF 420 POSITIONS. The "F" Record is a summary of the number of payers in the entire file.

.02 This record should be written after the last "C" Record (or last "K" Record, when applicable) of the *entire* file.

RECORD NAME: END OF TRANSMISSION "F" RECORD

Field Position	Field Title	Length	Description and Remarks
1	Record Type	1	REQUIRED. Enter "F".
2-5	Number of "A" Records	4	You may enter the total number of Payer/Transmitter "A" Records in the entire file. Right-justify and zero fill or enter all zeros.
6-30	Zero	25	Enter zeros.
31-420	Blank	390	Enter blanks.

END OF TRANSMISSION "F" RECORD - RECORD LAYOUT

RECORD TYPE	NUMBER OF "A" RECORDS	ZEROS	BLANK
1	2-5	6-30	31-420

PART C. ELECTRONIC FILING SPECIFICATIONS

SECTION 1. GENERAL

.01 Electronic filing of information returns is being offered by IRS/MCC as an alternative to magnetic media (tape or diskette) or paper filing, but is not a requirement. Electronic filing can be used in place of magnetic media filing by filers who are required to file magnetically and will fulfill the magnetic media requirements. It may also be used by those payers who are under the filing threshold requirement, but would prefer to file their information returns electronically. For Tax Year 1990, any Forms 1098, 1099 series, 5498, and W-2G, both originals and corrections, may be filed electronically.

The electronic filing of information returns is not affiliated with the Form 1040 electronic filing program. These two programs are totally independent of each other, and you must obtain separate approval to participate in each of them. All inquiries concerning the electronic filing of information returns should be directed to IRS/MCC. However, IRS/MCC personnel cannot answer questions or assist taxpayers in the filing of Form 1040 tax returns. Filers with questions of this nature will be directed to the Taxpayer Service toll-free number (1-800-424-1040, 1-800-829-1040 after September 30, 1990) for assistance.

.02 Filers participating in the electronic filing program for information returns will submit their returns to IRS/MCC by way of modems, and not through either magnetic media or paper filing. Upon receipt of Form 4804, the electronically filed data will be released for processing (see Part A, Sec. 9 for further information on submitting Form 4804). Form 4804 must be submitted to IRS/MCC postmarked on or before the due date of the return, or within two (2) workdays of the electronic transmission, whichever is earlier. No return is considered filed until a completed Form 4804 is timely received by IRS/MCC. Filers who transmit unprocessable files will be notified either by telephone or letter within 10 workdays of our receipt of the electronic transmission and associated Form 4804.

.03 Filers who choose to file electronically will be granted, upon request, an extension of time to file for 30 days after the due date of the return being submitted. See Part A, Sec. 11 for specific information on requesting an extension of time. This extension will be liberally granted to electronic filers to avoid the problem of filers not being able to timely transmit their data due to inaccessibility of phone lines. It is suggested, however, that filers transmit their data as soon as possible.

.04 For Tax Year 1990 information filed in calendar year 1991, IRS/MCC will accept electronically filed transmissions using IBM 3780 bisynchronous protocols. In order to make electronic filing as accessible as possible, IRS/MCC is also exploring the possibility of accepting electronic transmission using asynchronous protocols. Asynchronous protocols would allow filers to submit data to IRS/MCC using modems available in many personal computers. When this publication was being revised, the procedure for accepting asynchronous transmissions had not been determined. As soon as this determination is made, IRS/MCC will publish an announcement.

.05 The formats of the "A", "B", "C", "K", and "F" records are the same for electronically filed records as they are for magnetic media. For electronically filed documents, each transmission is considered a separate file; therefore, each transmission MUST have an End of File "F" Record. See Part B, Sec. 4 through 9 for information on the record formats.

SECTION 2. ELECTRONIC FILING PROCEDURE

.01 Filers who want to file electronically, but do not have a Trans-

mitter Control Code (TCC) assigned to them, must submit Form 4419, Application for Filing Information Returns Magnetically/Electronically, prior to transmitting data (see Part A, Sec. 7).

Filers who already have a TCC must submit either Form 4419, or a letter, to indicate that they wish to file information returns electronically. The purpose of this is so IRS/MCC can determine the compatibility of the electronic filing parameters, and another TCC will NOT be assigned to current filers. If a letter is submitted, it must contain the following:

1) Name and address of transmitter.
2) Transmitter Control Code already assigned.
3) Type of modem and communication software that will be used in transmitting the data.
4) Name and phone number of a contact person within your organization to whom a password will be assigned.

.02 Within 30 days of receiving the application or letter, IRS/MCC will send Form 6086, TSO Password Assignment, to the filer which will contain the password to be used for electronic submissions. After a password is received and the acknowledgement returned, the filer may submit a test file.

.03 Upon receipt of Form 6086, the user (person who will actually transmit the data) will separate the acknowledgement from the password. Both the user and the user's manager MUST sign the acknowledgement and mail to:

Chief, Security and Disclosure Branch
IRS, Martinsburg Computing Center
P.O. Box 1208
Martinsburg, WV 25401

THIS SIGNED ACKNOWLEDGEMENT MUST BE RECEIVED AT IRS/MCC PRIOR TO ANY DATA TRANSMISSIONS. The user or filer should retain a copy of the signed acknowledgement for their records. It is the user's responsibility to ensure that the password is not compromised. Access to IRS/MCC computers will not be allowed without a valid password.

.04 For security reasons, at the end of each filing season, all passwords will be obsoleted. In December, filers who filed electronically in the prior year will automatically receive a new password via Form 6086. If electronic filing is to be used again, the filer must respond to IRS/MCC as specified in Part C, Sec. 2.03. If you have any questions relating to the security procedures, and/or you need to report that your password was compromised, contact IRS/MCC as soon as possible (see Part A, Sec. 3).

.05 If filers have no experience with data transmission, they may choose to use a third party to transmit their data electronically. Filers can obtain a list of approved electronic transmitters by contacting IRS/MCC and requesting a copy of the vendor list (see Part A, Sec. 6). Vendors wishing to be included on this list should notify IRS/MCC in writing. An acceptable test file must be submitted prior to being included on the vendor list as an electronic filer.

SECTION 3. TEST FILES

.01 Filers transmitting directly to IRS/MCC are not required to submit a test file. The purpose of test files is to resolve any data or communication problems prior to the filing season. However, if you wish to submit an electronic test file for Tax Year 1990, it MUST be submitted to IRS/MCC between October 15, 1990, and January 15, 1991.

You MUST obtain a password before submitting an electronic test file (see Part C, Sec. 2 for information on obtaining a password). Electronic test files will be processed and filers will be notified as to the acceptability of their data within ten (10) workdays of the date the transmittal Form 4804 is received by IRS/MCC.

.02 Electronic test files must be verified by transmittal Form 4804. Form 4804 can be ordered from IRS/MCC (see Part A, Sec. 3), or it may be computer-generated. If you choose to computer-generate Form 4804, all of the information contained on the original form, including the affidavit, must also be contained on the computer-generated form (see Part A, Sec. 9).

.03 If problems are encountered while transmitting your electronic test file, contact the Electronic Filing Coordinator at IRS/MCC for assistance (see Part A, Sec. 3 for the telephone number).

SECTION 4. ELECTRONIC SUBMISSIONS

.01 After the information returns are electronically filed, a signed Form 4804 must be submitted to IRS/MCC postmarked on or before the due date of the returns, or postmarked within 2 (two) workdays of the transmission, whichever is earlier. The filer whose TCC is used in the Payer/Transmitter "A" Record is responsible for submitting the transmittal Form 4804. Only one (1) TCC can be used per transmission. When transmitting your electronic file to IRS/MCC, you MUST use the password assigned to your organization.

.02 Electronically filed information return data may be transmitted to IRS/MCC 24 hours a day; however, transmissions should be limited to a maximum of 1 1/2 hours duration. This limitation is to prevent line noise problems encountered during longer transmissions. Technical assistance will be available at IRS/MCC between 8:30 AM and 4:30 PM Eastern time.

.03 Actual information return data may be electronically transmitted to IRS/MCC between January 22 and December 31, 1991 (for Tax Year 1990 submissions). However, the due date(s) for electronically filed returns are not extended. (See Part A, Sec. 10.)

.04 Completed transmittal Forms 4804 should be mailed to the following addresses:

If by Postal Service:

IRS-Martinsburg Computing Center
ATTN: Electronic Filing Coordinator
P.O. Box 1359
Martinsburg, WV 25401-1359

If by truck or air freight:

IRS-Martinsburg Computing Center
ATTN: Electronic Filing Coordinator
Route 9 and Needy Road
Martinsburg, WV 25401

.05 Form 4804 submitted for electronically filed information returns may be faxed to IRS/MCC at the following number: (304) 267-3366.

SECTION 5. COMMUNICATION SPECIFICATIONS

.01 Transmissions are made by using IBM 3780 bisynchronous (BSC) protocols and must be in EBCDIC character code. Modems must be compatible with either Bell 208B for 4800 BPS transmissions, or AT&T 2296A for 9600 BPS transmissions. Both modems are dial-up type modems using the Public Switched Telephone Network. IBM 3780 data compression is acceptable for any transmission.

.02 IRS/MCC will accept information returns filed electronically over switched tele-communications network circuits. For 4800 BPS, the circuit will be (304) 267-0807. For 9600 BPS, the circuit will be (304) 267-9572. Both of these circuits are equipped for bisynchronous (BSC) transmission, using the IBM 3780 protocol.

.03 The 4800 BPS line terminates at an AT&T 208BR modem. The AT&T 208BR modem uses phase-shift keying and 8-phase modulation to transmit binary serial data signals over the telephone line in half-duplex mode. The following options have been selected:

—Transmit Level set to -4 dBm
—Compromise Equalizer in (4-dB Slope)
—DSR off in Analog Loop Mode
—Automatic Answer
—Transmitter Internally Timed
—RS-CS Interval of 50 ms

.04 The 9600 BPS line terminates at an AT&T Dataphone II 2296A modem. The AT&T 2296A modem is a full-duplex, CCITT v.32 compatible unit which operates at 9600 BPS or 4800 BPS (fallback). The following options have been selected:

—Receiver Responds to Remote Loopback
—Loss-of-Carrier Disconnect
—Received-Space Disconnect
—Send-Space Disconnect
—Automatic Answer
—Answer on Ring 1
—DTR Interlock
—Retrain Enable
—Internal Timing
—CTS Controlled by RTS
—0 - 1 ms RTS to CTS Delay
—CTS Dependent on Carrier
—RR Indicates Carrier
—9600 Trellis Coding
—4800 BPS Fallback
—4 dB Compromise Equalization

SECTION 6. ELECTRONIC FILING RECORD SPECIFICATIONS

.01 There are two additional identifier records which must be used to transmit data electronically. These records are 420 positions in length, and are the first ($$REQUEST) and second ($$ADD) records sent in an electronic transmission. The purpose of these records is to provide the password and identity of the transmitter. The format of each of these records is as follows:

RECORD NAME: $$REQUEST

Field Position	Field Title	Length	Description and Remarks
1-20	$$REQUEST Identifier Record	20	Enter the following characters: $$REQUEST ID=MSGFILE
21-420	Blank	400	Blank

ELECTRONIC FILING IDENTIFIER $$REQUEST RECORD - RECORD LAYOUT

$$REQUEST IDENTIFIER RECORD	BLANK
1-20	21-420

RECORD NAME: $$ADD

Field Position	Field Title	Length	Description and Remarks
1-9	$$ADD Identifier Record	9	Enter the following characters: $$ADD ID=
10-17	Password	8	Enter the password assigned by IRS/MCC. This password will be provided to you on Form 6806. For more information concerning the password, see Part C, Sec. 2.
18	Blank	1	Enter a blank.
19-26	BATCHID	8	Enter the following characters: BATCHID=

RECORD NAME: $$ADD—Continued

Field Position	Field Title	Length	Description and Remarks
27	Quote	1	Enter a single quote (').
28–43	Transmitter Name	16	Enter the transmitter's name. Should remain consistent in all transmissions. If the transmitter's name exceeds 16 positions, truncate the name.
44	Type of File Indicator	1	Enter the Type of File Indicator from the list below: O = Original filing T = Test File C = Correction file R = Replacement file
45–51	Replacement File Name	7	USE THIS FIELD ONLY IF THIS IS A REPLACEMENT FILE. Enter the replacement file name which IRS/MCC has assigned to this file. This file name will be provided to you in the letter notifying you that a replacement file is necessary. If contact is made by telephone, the replacement file name will be given to you by IRS/MCC at that time. For other than replacement files, this field will contain blanks.
52	Quote	1	Enter a single quote (')
53–420	Blanks	368	Enter blanks.

With the exception of these additional records, the file format for electronic filing is the same as for magnetic media filing.

.02 Upon making contact with IRS/MCC and furnishing a valid password in the $$ADD identifier record, a data transmission session will commence. The transmission will continue until an End of Transmission "F" Record is received. At the end of each transmission, the following message should be received electronically by the filer: "DATA RECEIVED AT MCC." If this message is not received there may be a problem with your electronic submission, and you should contact IRS/MCC immediately. After this message is sent to the filer by IRS/MCC to indicate a successful transmission, the line will be disconnected.

.03 Upon receiving a data file and transmittal Form 4804, IRS/MCC will release the data for further processing. If the data is found to be unprocessable, the filer will be contacted by either letter or telephone and notified that the data must be re-transmitted. For re-transmitted files, the filer will be assigned a replacement file name to be used during the re-transmission. This file name will be provided by IRS/MCC either by letter or telephone, and is to be placed in positions 45-51 of the $$ADD record when the file is re-transmitted.

ELECTRONIC FILING IDENTIFIER $$ADD RECORD - RECORD LAYOUT

$$ADD IDENTIFIER RECORD	PASSWORD	BLANK	BATCHID	QUOTE	TRANSMITTER NAME
1–9	10–17	18	19–26	27	28–43

TYPE OF FILE INDICATOR	REPLACEMENT FILE NAME	QUOTE	BLANKS
44	45–51	52	53–420

PART D. MISCELLANEOUS INFORMATION

SECTION 1. MAGNETIC MEDIA-RELATED FORMS AND PUBLICATIONS AVAILABLE AT THE IRS MARTINSBURG COMPUTING CENTER

.01 IRS/MCC maintains supplies of magnetic media-related forms and publications including:

—Publication 1220, Specifications for Filing Forms 1098, 1099 Series, 5498, and W-2G Electronically or on Magnetic Tape, Tape Cartridge, 5 1/4 and 3 1/2 Inch Diskettes

—Publication 1255, Requirements and Conditions for Filing Forms 1098, 1099 Series, 5498, and W-2G on 8 Inch Magnetic Diskette
—Publication 1187, Requirements and Conditions for Filing Form 1042S, Foreign Person's U.S. Source Income Subject to Withholding, on Magnetic Tape
—Publication 1239, Requirements and Conditions for Submitting Form 8027, Employer's Annual Information Return of Tip Income and Allocated Tips, on Magnetic Tape
—Publication 1245, Magnetic Tape Reporting for Forms W-4
—Publication 1437, Revenue Procedure and File Specifications for Magnetic Tape Filing of Fiduciary Returns Forms 1041, and Partnership Returns Form 1065, for Tax Year 1989
—Instructions for Forms 1099, 1098, 5498, and W-2G
—Form 8508, Request for Waiver from Filing Information Returns on Magnetic Media
—Form 4419, Application for Filing Information Returns Magnetically/Electronically
—Form 8809, Request for Extension of Time to File Information Returns
—Form 4804, Transmittal of Information Returns Reported on Magnetic Media
—Form 4802, Transmittal for Multiple Magnetic Media Reporting
—Form 5064, Media Label
—Notice 210, Preparation Instructions for Media Label, Form 5064
—Form 6466, Transmittal of Magnetic Tape of Form W-4, Employee's Withholding Allowance Certificate
—Form 6467, Multiple Employer Transmittal for Magnetic Tape Reporting of Form W-4
—Form 6468, How to Prepare Form 6469, Tape Label for Form W-4
—Form 6469, Tape Label for Form W-4

.02 To order any of these forms or publications, you may contact IRS/MCC (see Part A, Sec. 3 for the address, telephone number, and hours of operation). You may also call the IRS toll-free forms and publications order number (1-800-424-FORM, 1-800-829-FORM after September 30, 1990), or contact your local IRS office.

SECTION 2. FEDERAL DOLLAR CRITERIA

.01 For your convenience, the federal requirements for reporting the information returns to IRS is provided in Table 1.

TABLE 1. FEDERAL DOLLAR REQUIREMENTS

FORM	DOLLAR CRITERIA
1098	$600
1099-A	ALL
1099-B	ALL
1099-DIV	$10 ($600 for Liquidations)
1099-G	$10 - Unemployment and Tax Refunds
	$600 - All others
1099-INT	$10
	$600 (In some cases)
1099-MISC	$600
	ALL (Fishing boat proceeds)
	$10 (Royalties or Substitute Dividend and Tax-exempt Interest Payments Reportable by Brokers)
	$5,000 - Direct sales indicator
1099-OID	$10
1099-PATR	$10
1099-R	ALL
1099-S	ALL
5498	ALL
W-2G	$600
	$1200 (Bingo or Slot Machines)
	$1500 (Keno)

For specific information, refer to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G."

26 CFR 601.201: Rulings and determination letters.

Rev. Proc. 90-42

SECTION 1. BACKGROUND AND PURPOSE

.01 Rev. Proc. 90-1, 1990-1 C.B. 356, provides procedures for issuing ruling letters involving substantive areas under the jurisdiction of the Associate Chief Counsel (Technical).

.02 Announcement 90-65, 1990-20 I.R.B. 23, states that the "comfort ruling" policy set forth in section 3.01 and section 18.02 of Rev. Proc. 90-1 (the effective date of which was extended by Rev. Proc. 90-13, 1990-1 C.B. 473), will not go into effect and will be replaced with a variety of measures. These measures include specific no-rule areas, model documents, published ruling checklists, and automatic action revenue procedures.

SEC. 2. PROCEDURE

The procedures set forth in sections 3.10 and 18.02 of Rev. Proc. 90-1 are eliminated.

SEC. 3. EFFECT ON OTHER REVENUE PROCEDURES

Rev. Proc. 90-1 is modified by deleting sections 3.10 and 18.02; Rev. Proc. 90-13 is revoked.

SEC. 4. EFFECTIVE DATE

This revenue procedure is effective for all ruling requests received under the procedures of Rev. Proc. 90-1.

---

26 CFR 601.602: Tax forms and instructions.

Rev. Proc. 90-43

NOTE: THIS REVENUE PROCEDURE MAY ONLY BE USED TO PREPARE 8 INCH MAGNETIC DISKETTE FILED SUBMISSIONS FOR TAX YEAR 1990 INFORMATION RETURNS TO INTERNAL REVENUE SERVICE (IRS). UPDATED COPIES ARE PUBLISHED EACH YEAR. PLEASE READ THIS PUBLICATION CAREFULLY. PERSONS REQUIRED TO FILE MAY BE SUBJECT TO A FAILURE TO FILE PENALTY IF THEY DO NOT FOLLOW THE INSTRUCTIONS IN THIS REVENUE PROCEDURE OR FOR FAILURE TO INCLUDE CORRECT INFORMATION. THE REVENUE RECONCILIATION ACT OF 1989 HAS CHANGED THE PENALTY PROVISIONS AND SOME OF THE MAGNETIC MEDIA FILING REQUIREMENTS FOR INFORMATION RETURN REPORTING. FOR FURTHER INFORMATION, PLEASE READ THE CHAPTERS CONCERNING "NATURE OF CHANGES," AND "FILING REQUIREMENTS."

PART D. MISCELLANEOUS INFORMATION

SECTION 1. MAGNETIC MEDIA RELATED FORMS AND PUBLICATIONS AVAILABLE AT THE IRS MARTINSBURG COMPUTING CENTER
SECTION 2. FEDERAL DOLLAR CRITERIA

PART A. GENERAL

SECTION 1. PURPOSE

.01 The purpose of this revenue procedure is to provide the requirements and conditions for filing Forms 1098, 1099, 5498, and W-2G on 8 inch magnetic diskette to Internal Revenue Service (IRS). Publication 1220, "Specifications for Filing Forms 1098, 1099 Series, 5498, and W-2G Electronically or on Magnetic Tape, Tape Cartridge, 5¼ and 3½ Inch Diskettes," contains instructions for filing information returns both electronically, and on certain types of magnetic media, and is not to be used for formatting 8 inch diskettes. THIS REVENUE PROCEDURE IS TO BE USED FOR THE PREPARATION OF 8 INCH DISKETTES FOR 1990 INFORMATION RETURNS ONLY. THIS PROCEDURE IS UPDATED YEARLY TO REFLECT NECESSARY CHANGES. PLEASE READ THIS PUBLICATION CAREFULLY. IF THERE ARE ANY QUESTIONS CONCERNING YOUR FILING, YOU MAY CONTACT THE INTERNAL REVENUE SERVICE (IRS) MARTINSBURG COMPUTING CENTER (MCC) FOR CLARIFICATION. (See Part A, Sec. 3 for address and telephone number.) Specifications for filing the following forms are contained in this procedure:

(a) Form 1098, Mortgage Interest Statement.
(b) Form 1099-A, Information Return for Acquisition or Abandonment of Secured Property.
(c) Form 1099-B, Statement for Recipients of Proceeds From Broker and Barter Exchange Transactions.
(d) Form 1099-DIV, Statement for Recipients of Dividends and Distributions.
(e) Form 1099-G, Statement for Recipients of Certain Government Payments.
(f) Form 1099-INT, Statement for Recipients of Interest Income.
(g) Form 1099-MISC, Statement for Recipients of Miscellaneous Income.
(h) Form 1099-OID, Statement for Recipients of Original Issue Discount.
(i) Form 1099-PATR, Statement for Recipients (Patrons) of Taxable Distributions Received From Cooperatives.
(j) Form 1099-R, Statement for Recipients of Total Distributions From Profit-Sharing, Retirement Plans, Individual Retirement Arrangements, Insurance Contracts, Etc.
(k) Form 1099-S, Statement for Recipients of Proceeds from Real Estate Transactions.
(l) Form 5498, Individual Retirement Arrangement Information.
(m) Form W-2G, Statement for Recipients of Certain Gambling Winnings.

.02 Specifications for filing Forms 1042S and 8027 are contained in separate IRS publications. Specifications for filing Forms W-2 and W-2P on magnetic media are available from the Social Security Administration (SSA) ONLY.

.03 In most cases, the box numbers on the paper forms correspond with the amount codes used to file on magnetic media; however, if discrepancies occur, the instructions in this revenue procedure govern.

.04 The IRS/MCC has the responsibility for processing information returns filed on magnetic media. These information returns include Forms 1098, 1099 series, 5498, and W-2G.

IRS/MCC does NOT process Forms W-2 and W-2P; these forms are to be sent to SSA whether you file paper OR magnetic media returns.

IRS/MCC does, however, process magnetic media waiver requests and extension of time requests for Forms W-2/W-2P.

Therefore, contact IRS/MCC with questions concerning Forms W-2 and W-2P ONLY IF THE QUES-

TIONS PERTAIN TO AN EXTENSION OF TIME TO FILE ON PAPER OR MAGNETIC MEDIA OR MAGNETIC MEDIA WAIVER REQUEST. Questions pertaining to magnetic media filing of forms W-2 or W-2P MUST be directed to SSA. TAX LAW QUESTIONS PERTAINING TO FORMS W-2 OR W-2P SHOULD BE DIRECTED TO IRS TAXPAYER SERVICE at 1-800-424-1040 (1-800-829-1040 after September 30, 1990), or to your local IRS office.

If you contact IRS/MCC with questions concerning Forms W-2/W-2P, and the questions are not pertaining to extensions of time or waivers for Forms W-2/W-2P, we will direct you to either SSA or IRS Taxpayer Service.

.05 Personnel at the IRS/MCC are equipped to answer any questions you may have concerning the magnetic media filing of information returns. Tax law related questions should be directed to IRS Taxpayer Service at 1-800-424-1040 (1-800-829-1040 after September 30, 1990).

.06 This revenue procedure also provides the requirements and specifications for filing 8 inch magnetic diskettes under the Combined Federal/State Filing Program. (Refer to Part A, Sec. 16.)

.07 The following revenue procedures and publications provide more detailed filing procedures for certain information returns:

(a) 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G," provides specific instructions on completing and submitting information returns to IRS. IRS/MCC includes this publication in the magnetic media reporting packages that are mailed to the transmitters who participate in the Magnetic Media Reporting Program (MMRP). These instructions are also available from IRS offices and can be obtained by contacting your local office or by calling 1-800-424-FORM (1-800-829-FORM after September 30, 1990).

(b) Rev. Proc. 84-33, 1984-1 C.B. 502, or other current revenue procedure, regarding the optional method for agents to report and deposit backup withholding.

(c) Publication 1179, Specifications for Paper Document Reporting and Paper Substitutes for Forms 1096, 1098, 1099, 5498 and W-2G.

(d) Publication 1239, Requirements and Conditions for Submitting Form 8027, Employer's Annual Information Return of Tip Income and Allocated Tips, on Magnetic Tape.

(e) Publication 1187, Requirements and Conditions for Filing Form 1042S, Foreign Persons U.S. Source Income Subject to Withholding, on Magnetic Tape.

(f) Publication 1245, Magnetic Tape Reporting for Forms W-4.

(g) Publication 1220, Specifications for Filing Forms 1098, 1099 Series, 5498, and W-2G Electronically or on Magnetic Tape, Tape Cartridge, 5¼ and 3½ inch diskettes.

.08 This procedure supersedes the following:

Rev. Proc. 89-44 published in Publication 1255 (Rev. 7-89) [1989-2 C.B. 532], Requirements and Conditions for Filing Forms 1098, 1099, 5498 and W-2G series on 8 Inch Magnetic Diskette.

.09 Refer to Part A, Sec. 17 for definitions of terms used in this publication.

SEC. 2. NATURE OF CHANGES—CURRENT YEAR (TAX YEAR 1990)

.01 PROGRAMMING CHANGES —PART B—"Magnetic Media Specifications"

Payer/Transmitter "A" Record:

Field Positions 3-4—"Payment Year"—must be incremented by one year (from 89 to 90).

Payee "B" Record:

(a) Field Positions 3-4—"Payment Year"—must be incremented by one year (from 89 to 90).

(b) Field Positions 5-6—"Document Specific Code"

The following categories for Form 1099-R Distribution Codes will now be:

(1) "Early (premature) distribution, no known exception"—Code 1

(2) "Early (premature) distribution, exception applies (as defined in section 72(q), (t), or (v))"—Code 2

(3) "Section 1035 exchange"—Code 6

(4) "Normal distribution"—Code 7

(5) Excess contributions plus earnings/excess deferrals (and/or earnings) taxable in 1990—Code 8

(6) Excess contributions plus earnings/excess deferrals taxable in 1989—Code P

(7) Excess contributions plus earnings/excess deferrals taxable in 1988—Code D

NOTE: IT WILL NO LONGER BE VALID TO CODE BLANKS IN *BOTH* POSITIONS 5 AND 6 OF SECTOR 1 OF THE PAYEE "B" RECORD FOR FORM 1099-R. YOU MUST PROVIDE AT LEAST ONE DISTRIBUTION CODE FOR THIS FORM. ALSO, A NUMERIC CODE MUST BE ENTERED IN ALL CASES EXCEPT WHEN CODE P OR D IS USED. HOWEVER, WHEN USING CODE P OR D FOR AN IRA DISTRIBUTION UNDER SECTION 408(d)(4), YOU MAY ALSO ENTER CODE 1, IF IT APPLIES. IF MORE THAN ONE NUMERIC CODE IS APPLICABLE TO A DISTRIBUTION, YOU WILL NOW NEED TO REPORT TWO SEPARATE PAYEE "B" RECORDS.

(c) Field Positions 25-44—"Payer's Account Number for Payee"—In the past, if you had fewer than 20 characters, you were to left-justify the field. Now, you may EITHER left- or right-justify this field, and fill the remaining positions with blanks.

(d) Field Position 45—"IRA/SEP Indicator"—Starting this year, if you Code a "1", "2", "3", "4", "5", or "7" in either Position 5-6 of the Payee "B" Record (Document Specific Code) for Form 1099-R; AND if you are reporting a distribution for an IRA or SEP, you will code a "1" in Position 45. If you are not reporting an IRA or SEP distribution, code a blank in this field.

End of Payer "C" Record—No changes.

State Totals "K" Record—No changes.

End of Transmission "F" Record—No changes.

.02 EDITORIAL CHANGES—PART A, "GENERAL"

There have been numerous editorial changes due in part to the impact of the Revenue Reconciliation Act of 1989. IRS recommends that you read this publication in its entirety to ensure that you report properly. The changes are as follows:

(a) The Revenue Reconciliation Act of 1989 changed some of the magnetic media reporting requirements and penalty provisions. See Notice 90-15, printed in 1990-1 C.B. 326, for further information.

(b) Starting this year, IRS/MCC will be accepting information returns, both originals and corrections, by way of electronic filing as well as magnetic media. See Publication 1220, "Specifications For Filing Forms 1098, 1099 Series, 5498, and W-2G Electronically or on Magnetic Tape, Tape Cartridge, 5¼ and 3½ Inch Diskettes" for information on electronic filing of information returns.

(c) The title of Publication 1255 has changed to "Requirements and Conditions for Filing Forms 1098, 1099 Series, 5498, and W-2G on 8 Inch Magnetic Diskettes."

(d) Added the IRS toll-free telephone number for those filers with tax law questions in Part A, Sec. 1.05, and Part A, Sec. 3.04(c).

(e) The title for the publication containing the 1099 instructions has changed in 1990 from "Instructions for Forms 1099, 1098, 5498, 1096, and W-2G" to "Instructions for Forms 1099, 1098, 5498, and W-2G." Therefore, the references in this publication have been changed accordingly.

(f) Part A, Sec. 4, "Filing Requirements," has been changed to reflect the impact of the Revenue Reconciliation Act of 1989, including:

(1) All Forms 1098, 1099 series, 5498, and W-2G are to be filed on magnetic media with IRS if you have 250 or more of any of them SEPARATELY. None of the forms will be aggregated.

(2) The "look-back" rule has been rescinded which stated that you are required to file on magnetic media this year if you had the requirement to file in the previous year. You are only required to file this year if you exceed the filing threshold (250) for Tax Year 1990.

(g) Part A, Sec. 6, "Vendor List," has been added to provide information concerning the vendor list that IRS/MCC maintains for those payers who wish to file on magnetic media but are having difficulty finding software companies or service bureaus in their area. This section will provide information on how to order the list if you are a filer, and how to be added to the list if you are a vendor.

(h) In the past, filers were required to apply for different Transmitter Control Codes (TCC) for different types of media. This is no longer necessary. (See Part A, Sec. 7, Form 4419, "Application for Filing Information Returns Magnetically/Electronically.") If you have more than one TCC already assigned to you, you may use any that you wish. Notify IRS/MCC to remove those TCC's not used.

(i) A note was added to Part A, Sec. 7, encouraging filers to submit application Form 4419 at least 30 days before the due date of the returns to allow IRS/MCC time to process the application. However, IRS/MCC will still accept applications up to the filing due date.

(j) A note was added to Part A, Sec. 7, concerning filers who file on magnetic media with IRS/MCC, but still submit Form 1096, Annual Summary and Transmittal of U.S. Information Returns, to the IRS Service Center that processes paper information returns. If you file your information returns on magnetic media with IRS/MCC, use transmittal Form 4804 to submit your data, and NOT Form 1096.

(k) Beginning this year, IRS/MCC will NOT return media to the filers, whether it is test, original, or correction data, after successfully processing the media. (See Part A, Sec. 12, "Processing of Magnetic Media Returns.") Your files will only be returned if a replacement file is necessary.

(l) A note was added to Part A, Sec. 13, "How to File Corrected Returns," concerning filers who submit late filed information returns as correction documents instead of originals (coding a "G" code in the Payee "B" Record).

(m) In the past, if you were correcting a bad payee address, you were instructed to correct the address using two transactions. This has been changed in the chart in Part A, Sec. 13. It now takes only one transaction to correct a bad payee address, UNLESS you are also correcting a bad payee name or TIN with the same correction. It will then still require two transactions to correct the bad address.

(n) Part A, Sec. 13 has information concerning the impact of the Revenue Reconciliation Act of 1989 upon the submission of corrected returns. It also refers you to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" for specific information concerning the due date for filing information returns, and any penalties that may apply to returns considered to be filed late or incorrectly.

(o) Part A, Sec. 14, "Taxpayer Identification Number (TIN)," has been rewritten to remove tax law information and to add information concerning the creation of Name Controls.

(p) The section on contacting IRS/MCC has been moved for easy reference to Part A, Sec. 3, "How to Contact the IRS Martinsburg Computing Center." Information was added to this chapter to instruct filers when it is appropriate to contact IRS/MCC, and if it is not appropriate, where the information can be obtained.

(q) In Part A, Sec. 19, "Major Problems Encountered," five problems were added (numbers 11, 12, 13, 14, and 15).

(r) Added the IRS/MCC Telecommunication Devices for the Deaf (TDD) telephone number in Part A, Sec. 3.03.

(s) Part D, Miscellaneous Information, has been added concerning what magnetic media-related forms and publications are available from IRS/MCC, and to provide a table listing the federal dollar criteria for reporting information returns.

.03 EDITORIAL CHANGES—PART B, "SINGLE DENSITY DISKETTE SPECIFICATIONS"

The following editorial changes were made to Part B, Sec. 1-15:

(a) Part B, Sec. 3, Sector 1, "Payer/Transmitter "A" Record," the following changes were made to the "AMOUNT INDICATOR FIELDS."

(1) For Forms 1099-B, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-OID, and 1099-PATR, the term for "Federal Income Tax Withheld," has been further defined as "Backup Withholding."

(2) For Form 1099-R, a Note 2 has been added referring you to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" for the definition of Federal Income Tax Withheld, and how it is applied to Form 1099-R reporting.

(3) For Forms 1099-B, Amount Code 7 changed to "Unrealized profit or (loss) on open contracts 12/31/89," and Amount Code 8 to "Unrealized profit or (loss) on open contracts—12/31/90."

(4) For Form 1099-DIV, the note has been changed to state that Amount Code 1 MUST equal the sum of Amount Codes 2, 3, 4, and 5.

(5) For Form 1099-INT, Amount Code 5, title changed to "Foreign tax paid."

(6) For Form 1099-MISC, Amount Code 3, title changed to "Prizes, awards, etc."

(7) For Form 1099-OID, Amount Code 1, title changed to "Original issue discount for 1990."

(8) For Form 5498, Amount Code 1, title changed to "Regular IRA contributions made in 1990 and 1991 for 1990." In the Note for Form 5498, any references to calendar years have been incremented by one year.

(b) Positions 45-49, Transmitter Control Code (TCC)—added a sentence instructing filers to NOT enter more than one TCC per file.

(c) Position 50—Foreign Corporation Indicator—added a note that some filers are automatically coding a "1" in this position to indicate a foreign corporation, whether it is or not. Since IRS processes foreign payer information differently from domestic payer information, this has caused processing problems. The payer may be subject to a penalty for providing incorrect information to IRS.

(d) Part B, Sec. 6, Sector 1, "Payee "B" Record," for Form 1099-R, the field title "Document Specific Code" was changed to "Distribution Code." Also, some category titles changed under Description and Remarks to:

(1) Early (premature) distribution, (no known exception)—Code 1

(2) Early (premature) distribution, exception applies (as defined in section 72(q), (t), or (v))—Code 2

(3) Section 1035 Exchange—Code 6

(4) Normal distribution—Code 7

(5) Excess contributions plus earning/excess deferrals (and/or earnings) taxable in 1990—Code 8

(6) Excess contributions plus earnings/excess deferrals taxable in 1989—Code P

(7) Excess contributions plus earnings/excess deferrals taxable in 1988—Code D

(e) Part B, Sec. 6, Sector 1, "Payee "B" Record for Form 1099-R, added a sentence under "Description and Remarks" that you MUST enter at least one numeric code from the table that provides the categories for distribution in positions 5-6 of the Document Specific Code, Payee "B" Record, except when Code P or D is used. Also, if more than one numeric code applies, two separate Payee "B" Records are required.

(f) Positions 25-44—"Payer's Account Number for Payee," the instruction to left-justify and fill remaining positions with blanks has changed to EITHER left-or right-justify, and fill remaining positions with blanks.

(g) Positions 46-47—"Percentage of Total Distribution," a note was added to clarify that the field is only two positions in length since the figure MUST be 99% or less, and includes instructions on how to round off fractions. If the percentage is 100, leave this field blank.

(h) Form 1099-S, Part B, Sec. 11, Sector 4, Field Positions 32-70, "Description", and Part C, Sec. 10, Sector 2, Field Positions 140-178, "Description," added a statement that if you enter the address of the property being reported, include the state and ZIP code where the property is located.

(i) Part B, Sec. 13 and Part C, Sec. 12, End of Payer "C" Record, instructions were added that submitting files with a missing or incorrect End of Payer "C" Record will result in your media being returned for correction.

SEC. 3. HOW TO CONTACT THE IRS MARTINSBURG COMPUTING CENTER

.01 Magnetic media processing for all service centers is centralized at the IRS/MCC. Your magnetic media files containing information returns covered by this revenue procedure, and all requests for IRS magnetic media-related publications, information, undue hardship waivers, requests for extensions of time to file, or magnetic media related forms are to be directed to the following addresses:

If by Postal Service:

IRS-Martinsburg Computing Center
Post Office Box 1359
Martinsburg, WV 25401-1359

or

If by Truck or Air Freight:
IRS-Martinsburg Computing Center
Magnetic Media Reporting Section
Route 9 & Needy Road
Martinsburg, WV 25401

.02 Hours of operation are 8:30 A.M. until 6 P.M. Eastern time. The telephone number is (304) 263-8700 (not a toll-free number). NOTE: IRS/MCC has installed Telecommunication Devices for the Deaf (TDD). The number is 304-267-3367.

.03 Requests for 1099 paper returns, publications or forms not related to magnetic media processing, or paper Forms W-2/W-2P, MUST be requested by calling the "Forms Only Number" listed in the local telephone directory, or by calling the IRS toll-free number 1-800-424-FORM (1-800-829-FORM after September 30, 1990).

.04 Do NOT contact IRS/MCC if:

(a) You have a question concerning filing Forms W-2/W-2P, either on paper or magnetic media, with SSA. You MUST contact your local SSA office for this information.

(b) You want to order paper forms for information return filing, including paper Forms W-2/W-2P. IRS/MCC does NOT stock any paper forms for information return or wage reporting. Call the IRS toll-free number for forms (1-800-424-FORM, 1-800-829-FORM after September 30, 1990), or call your local IRS office to order paper forms.

(c) You have a question concerning the completion of the information return or Form W-2/W-2P. (For example, "How do I report a premature distribution on Form 1099-R?"). Call the IRS toll-free number (1-800-424-1040, 1-800-829-1040 after September 30, 1990) for such information.

(d) You have received a penalty notice and you need additional information, or you are requesting an abatement of the penalty. Most penalty notices contain an IRS representative's name and phone number to contact with questions. This person will be most familiar with your particular case. The letter may instruct you to respond in writing within a certain timeframe. IRS/MCC does NOT issue penalty notices, therefore, it does NOT have the authority to abate penalties. You MUST contact the service center that issued the penalty notice if you have questions, or if you are requesting abatement of the proposed penalty.

SEC. 4. FILING REQUIREMENTS

.01 Section 6011(e)(2)(A) of the Internal Revenue Code as amended by the Revenue Reconciliation Act of 1989 (Public Law No. 101-239 (1989) 103 Stat. 2106, Section 7713), requires any person, including corporations, partnerships, individuals, estates, and trusts, who files 250 or more information returns to file such returns on magnetic media. *This requirement applies separately for each type of form.* The filer also has the option of filing such returns electronically in lieu of magnetic media.

Thus, for example, if a person is required to file 200 returns on Form 1099-INT and 350 returns on Form 1099-DIV for a calendar year, the person is not required to file Forms 1099-INT on magnetic media, but is required to file forms 1099-DIV on magnetic media.

.02 All filing requirements apply individually to each reporting entity as defined by its separate Taxpayer Identification Number (TIN) Social Security Number (SSN), or Employer Identification Number (EIN). For example, if a corporation has several branches or locations and each uses the same EIN, aggregate the total volume of returns to be filed and apply the filing requirements to each type of return accordingly.

.03 The following filing requirements apply separately to both originals and corrections filed on magnetic media:

1098 1099-A 1099-B 1099-DIV 1099-G 1099-INT 1099-MISC 1099-OID 1099-PATR 1099-R 1099-S 5498 W-2G	250 OR MORE OF ANY of these forms require magnetic media or electronic filing with IRS. These are stand alone documents and are not to be aggregated for purposes of determining the 250 threshold. For example, if 100 Forms 1099-B are to be filed, they need not be filed magnetically or electronically since they do not meet the threshold of 250. However, if you have 300 Forms 1099-R, they must be filed magnetically or electronically since they meet the threshold of 250.
W-2/W-2P	250 or more of either form must be filed on magnetic media with SSA.

.04 The above requirements shall not apply if you establish undue hardship (see Part A, Sec. 5).

.05 Filers who are required to submit their information returns on magnetic media may choose to submit their documents by electronic filing instead (See Publication 1220 for information concerning the electronic filing of information returns). Filers who submit their information returns electronically will have satisfied the magnetic media filing requirements.

.06 In the past, if you were required to file on magnetic media for a particular tax year, you were automatically required to file on magnetic media for the following tax year,

regardless of the volume of returns. The Revenue Reconciliation Act of 1989 eliminated this "look-back" rule. Therefore, if you were required to file on magnetic media for Tax Year 1989, and the volume of documents you will be submitting for Tax Year 1990 is less than 250, you are not required to file on magnetic media for Tax Year 1990.

SEC. 5. FORM 8508, REQUEST FOR WAIVER FROM FILING INFORMATION RETURNS ON MAGNETIC MEDIA

.01 If you are required to file on magnetic media but fail to do so, and do not have an approved waiver on record, you may be subject to a failure to file penalty.

.02 Any person required to file original or corrected returns on magnetic media may request a waiver from these filing requirements if such filing would create an undue hardship by submitting Form 8508, Request for Waiver from Filing Information Returns on Magnetic Media, with IRS/MCC.

.03 If a waiver for original documents is approved, a waiver for corrections to these documents will be automatically approved. However, if you submit your original returns on magnetic media but not your corrections, then a waiver must be requested for the corrections only if they exceed the filing threshold of 249 returns.

.04 Generally, only the payer may sign the Form 8508; however, the transmitter may sign if the transmitter has a power-of-attorney from the respective payers, and a copy of the power-of-attorney is attached to the Form 8508.

.05 A separate Form 8508 must be submitted for each payer. Do not submit a list of payers. Specify the type of returns for which the waiver is being requested on the Form 8508 (i.e., 1099-DIV, 1099-A, etc.).

.06 The waiver, if approved, will provide exemption from magnetic media filing for one tax year only. Filers may not apply for a waiver for more than one tax year at a time; application must be made each year a waiver is necessary.

.07 Copies of Form 8508 are included in this publication, or may be obtained from other IRS offices. Form 8508 may be computer-generated as long as it contains all the information requested on the original form, or it may be photocopied.

.08 All requests for magnetic media-related undue hardship exemptions must be submitted to the IRS/MCC at least 90 days before the due date of the return except as stated in Sec. 5.08. *IF A REQUEST IS NOT POSTMARKED AT LEAST 90 DAYS BEFORE THE DUE DATE OF THE RETURNS, IT WILL NOT BE CONSIDERED.* Therefore, for Forms 1098, 1099 series, and W-2G, the waiver request must be submitted to IRS/MCC with a postmark date of November 30. For Forms 5498, the waiver request must be submitted to IRS/MCC with a postmark date of March 2. Any waiver requests received with postmarks after the deadline(s) will be automatically denied.

.09 All magnetic media-related undue hardship requests for Forms W-2/W-2P are to be filed with the IRS/MCC, NOT SSA, and must be postmarked at least 90 days before the due date of the return. Since Forms W-2/W-2P are due to SSA by February 28, the due date for the waiver request is November 30.

.10 Waivers are granted on a case-by-case basis and are approved at the discretion of the IRS/MCC. You must allow a minimum of 30 days for IRS/MCC to respond to a waiver request.

.11 If your waiver request is approved, keep it for your records. DO NOT send a copy of the approved waiver to the IRS with your paper returns.

.12 AN APPROVED WAIVER FROM FILING INFORMATION RETURNS ON MAGNETIC MEDIA DOES NOT PROVIDE EXEMPTION FROM ALL FILING; YOU MUST STILL TIMELY FILE YOUR INFORMATION RETURNS ON ACCEPTABLE PAPER FORMS WITH THE APPROPRIATE SERVICE CENTER.

SEC. 6. VENDOR LIST

.01 IRS/MCC will provide you with a list of vendors who support magnetic media filing upon request. This list contains the names of service bureaus that will produce your files for you on the prescribed types of magnetic media, or via electronic filing. It also contains the names of vendors who can provide software packages for payers who wish to produce magnetic media or electronic files on their own computer systems or personal computers. This list is for filer information only, and in no way implies IRS approval or endorsement of these products or services.

.02 IRS/MCC will provide the vendor list to those filers who contact IRS/MCC at the address and phone number shown in Part A, Sec. 3. IRS/MCC WILL NOT PROVIDE ANY COMPANY NAMES OVER THE TELEPHONE.

.03 If you are a vendor who offers a software package, has the ability to produce magnetic media for your customers, or has the capability to electronically file information returns, and you would like to be included on the list, you MUST submit a written request. The written request must include:

(a) The company name
(b) Address (include the city, state, and ZIP code)
(c) Telephone number (include area code)
(d) Contact person
(e) Type of service provided (for example, service bureau and/or software)
(f) Type(s) of magnetic media offered (for example, ½ inch magnetic tape; tape cartridge; 8 inch, 5¼ inch, and/or 3½ inch diskettes; electronic filing).

.04 You may submit your request to be added to the vendor list at any time. Send the written request to IRS/MCC at the address provided in Part A, Sec. 3. IRS/MCC WILL NOT ACCEPT ANY COMPANY NAMES OVER THE TELEPHONE. The list will be updated once a year, in March, to include new vendors.

SEC. 7. FORM 4419, APPLICATION FOR FILING INFORMATION RETURNS MAGNETICALLY/ ELECTRONICALLY

.01 For purposes of this revenue procedure, the PAYER may be the person making payments; a recipient of mortgage interest payments; a bro-

ker; a barter exchange; a person reporting a real estate transaction; a trustee or issuer of an IRA or SEP; or a lender who acquires an interest in secured property or who has reason to know that the property has been abandoned. The TRANSMITTER is the organization submitting the magnetic media file. The payer and transmitter may be the same organization.

Payers or their transmitters are required to complete Form 4419, Application for Filing Information Returns Magnetically/Electronically, to ensure equipment compatibility. A single Form 4419 should be filed no matter how many types of returns the payer or transmitter will be submitting on magnetic media or by electronic filing. For example, if you plan to file Forms 1099-INT and Forms 1099-DIV on magnetic media, submit one Form 4419. If you later wish to file another type of return on magnetic media in the Form 1099, 1098, 5498 or W-2G series, it is not necessary to submit a new Form 4419.

Copies of Form 4419, for your use, are included in this publication. Please read the instructions on the back of the form very carefully. This form may be photocopied. Requests for additional forms or other information related to magnetic media processing should be addressed to the IRS/MCC. (See Part A, Sec. 3 for the address.)

.02 Form 4419 can be submitted at any time during the year. However, Form 4419 should be submitted to IRS/MCC at least 30 days before the due date of the return(s) you wish to file on magnetic media. This will allow IRS/MCC the minimum amount of time necessary to process your application and send a response back to you. Otherwise, you may not receive your five character alpha/numeric Transmitter Control Code (TCC) in time to code in your Payer/Transmitter "A" Record (see Part B, Sec. 3 for further information). In the event that your computer equipment or software is not compatible with the IRS equipment, a waiver may be granted so that you may file your returns on paper documents for that tax year. If you have more than one TCC, you must use more than one tape or diskette; i.e., you cannot use two TCCs on the same medium. They must be reported separately.

IRS encourages transmitters who file for multiple payers, to submit one application and to use one Transmitter Control Code for all payers. Include a list of all payers and their TINS with the Form 4419. If you file for additional payers in later years, notify IRS in writing providing the additional names and TINS. Do not submit a new application for these additional payers.

Returns submitted on 8 inch diskette may not be filed with IRS until the application has been approved and a TCC assigned. This TCC will be entered in the Transmitter Control Code field of the "A" Record. Magnetic media submitted without a TCC will be held for processing until an application is approved.

.03 Upon approval, a magnetic media reporting package containing the appropriate revenue procedure and necessary transmittals, forms, labels, and instructions will be sent to the attention of the contact person indicated on Form 4419. Thereafter, IRS/MCC will send the transmitter a package containing the updated revenue procedure and forms each year. This package will continue to be sent to the contact person indicated on the Form 4419 unless IRS/MCC has received changes or updates.

.04 If you have your files prepared by a service bureau, you may not need to submit an application to obtain a TCC. Some service bureaus will produce your file using their TCC and send it to IRS/MCC for you.

Other service bureaus will prepare your magnetic media files, then send them to you to submit to IRS/MCC. These service bureaus may require you to submit an application to IRS/MCC to be assigned your own TCC to be coded in the Payer/Transmitter "A" Record. (See Part B, Sec. 3.) Contact your service bureau for further information.

.05 Once approved to file magnetically or electronically, you do not need to reapply each year unless:

(a) You discontinue filing magnetically or electronically for a year. Your TCC may have been reassigned by IRS/MCC.

(b) Your magnetic media files were transmitted in the past by a service agency. However, you now have computer equipment compatible with that of IRS and wish to prepare your own files. You must request your own TCC by filing an application Form 4419.

If any of these conditions apply to you, contact IRS/MCC for clarification.

.06 Also notify IRS/MCC if you had hardware or software changes that would affect the characteristics of the magnetic media submission. Be sure to refer to your current TCC in all correspondence with IRS/MCC.

.07 If you file on several different types of magnetic media (*e.g.*, tape, 8 inch diskette, and 5¼ inch floppy disk), you need only submit one Form 4419. In the past, IRS/MCC required filers submitting different types of media to obtain different TCCs. This is no longer necessary. You may use the same TCC on all of your media. For example, if you submit a magnetic tape, an 8 inch diskette, and a 5¼ inch floppy disk, you may use the same TCC for all 3 types of media. If you already have different TCCs assigned to you, you may choose any of the TCCs to be coded into the Payer/Transmitter "A" Record. It doesn't matter which one you use; however, remember to code only one TCC per medium. Please contact IRS/MCC and indicate which TCC(s) you will not be using so that we can remove them from our files. (See Part A, Sec. 3 for the address and telephone number).

.08 If you are an approved filer on magnetic media and the name, EIN, or address of your organization or contact person changes, please notify IRS/MCC in writing so that your file may be updated to reflect the current information.

.09 In accordance with section 1.6041-7(b) of the Income Tax Regulations, payments by separate departments of a health care carrier to providers of medical and health care services may be reported on separate returns on magnetic media. In this case, the headquarters will be considered the transmitter, and the individual departments of the company filing reports will be considered payers. A single Form 4419 covering all departments filing on magnetic media should be submitted. One TCC may be used for all departments.

.10 Approval to file on magnetic media does not imply endorsement by

the IRS of the computer software or quality of tax preparation services provided.

.11 The magnetic media file must be transmitted with Form 4804 (see Part A, Sec. 9), which will provide IRS with the necessary information. Filing the same information returns either magnetically or electronically, as well as on paper forms, will result in duplicate filing and may result in erroneous penalty notices being sent to the payees.

SEC. 8. TEST FILES

.01 IRS does not require magnetic media filers to submit test files, *except* for those filers who wish to participate in the Combined Federal/State Filing Program (see Part A, Sec. 16 for further information concerning combined federal/state filing).

However, IRS encourages first-time magnetic media filers, and filers of floppy disks or diskettes, to send a test for review prior to the filing season.

IRS will determine whether or not your file is formatted correctly, and will check the content of the records to ensure that it meets the specifications of the current revenue procedure.

For those filers who have submitted magnetic media files in previous tax years, sending a test file provides them the opportunity to ensure that their software reflects the annual programming changes.

.02 If you are a new filer, you must submit a Form 4419 before you send in a "TEST" file. If approved, you will be assigned a five character Alpha/Numeric Transmitter Control Code (TCC). This TCC must be entered in the TCC field of your Payer/Transmitter "A" Record (see Part B, Sec. 3).

.03 All tape and diskette "TEST" files must be submitted between October 1 and December 15 of each year. Do not submit tape or diskette "TEST" files after December 15. Only a hardcopy printout of the tape or diskette that shows a sample of each type of record used (A, B, C and F) may be submitted after December 15 and it must be postmarked before January 15. Clearly mark the hardcopy print as "TEST" data and include identifying information such as name, telephone number, and address of a person who can be contacted to discuss its acceptability. If your "TEST" file is acceptable, we will send you an approval letter.

.04 The information in the "A" Record must be "ACTUAL" information—NOT FICTITIOUS.

.05 Form 4804, Transmittal of Information Returns Reported on Magnetic Media, must accompany your magnetic media test file. Indicate that the file contains test data by marking the "TEST" checkbox in block 1 on Form 4804. Also, write "TEST" on the external media label, Form 5064. The "TEST" data must be programmed according to the current revenue procedure.

.06 Submit a "TEST" file between October 1 and December 15 for the first year you wish to participate in the Combined Federal/State Filing Program. A hardcopy print is NOT an acceptable "TEST" file for this program.

.07 Approved payers or transmitters should send the "TEST" file to the IRS/MCC (see Part A, Sec. 3 for the address).

.08 IRS/MCC will send an acknowledgement in writing to indicate whether your "TEST" file was good or bad. If it was formatted incorrectly, we will indicate what the problems are and your file will be returned to you for replacement and resubmission. The "TEST" must be resubmitted by the deadline of December 15, 1990. After IRS/MCC successfully processes your test file, the diskette will not be returned.

SEC. 9. FILING OF MAGNETIC MEDIA REPORTS AND RETENTION REQUIREMENTS

.01 Form 4804, Transmittal of Information Returns Reported on Magnetic Media, must accompany all magnetic media submissions. This includes original, correction, replacement, and test data.

.02 In many cases, you can program your computer to generate a substitute Form 4804/4802 that contains the pertinent information. IRS encourages you to computer-generate your transmittal forms, as long as you include the necessary information contained on the most current revision of the form. You may also photocopy this form. If you file for multiple payers and have the authority to sign the affidavit on Form 4804, you should also submit Form 4802, "Transmittal for Multiple Magnetic Media Reporting."

.03 The transmitter may code any combination of payers and/or documents on their media. For example, if you are reporting Forms 1099-INT for Bank A, Forms 1099-DIV for Bank B, and Forms 1098 for Bank C, you need not create 3 separate diskettes. All 3 banks and all types of documents can be coded on one diskette. If you do create multiple diskettes, they can all be sent in one package; you need not send a separate package containing each diskette. Be sure to include Form 4804, 4802, or computer-generated substitute with your magnetic media shipment. DO NOT MAIL THE MAGNETIC MEDIA AND THE TRANSMITTAL DOCUMENTS SEPARATELY. Magnetic media files covered by this revenue procedure are to be sent to the IRS/MCC. (See Part A, Sec. 3 for the address.)

.04 IRS/MCC only processes returns filed magnetically or electronically, so paper information returns for information not being filed magnetically or electronically must be submitted to the appropriate service center using Form 1096, Annual Summary and Transmittal of U.S. Information Returns. *DO NOT send information returns filed on paper forms to IRS/MCC.*

.05 DO NOT REPORT DUPLICATE INFORMATION; *I.E.*, IF YOU SUBMIT PART OF YOUR RETURNS ON PAPER AND PART ON MAGNETIC MEDIA, BE SURE THE SAME INFORMATION IS NOT INCLUDED IN BOTH SUBMISSIONS.

.06 Form 4804 contains an affidavit that must be signed by the payer; however, the transmitter, service bureau, paying agent, or disbursing agent (all hereafter referred to as agent), may sign the affidavit on behalf of the person required to file/payer if the agent has the authority to sign the affidavit under an agency agreement (either oral, written, or implied) that is valid under state law and adds the caption "FOR: (name of payer)".

.07 Although a duly authorized agent may sign the affidavit, the payer is responsible for the accuracy of the Form 4804 and the returns filed,

and the payer will be liable for penalties for failure to comply with filing requirements.

.08 If returns from different branches or locations for one payer are submitted on the same file, consolidate each type of information return under one Payer/Transmitter "A" Record. For example, all Forms 1099-INT for the same payer on a single file must be sorted together under one Payer/Transmitter "A" Record followed by the appropriate "B" Records and one "C" Record.

.09 Before shipping magnetic media files, include the following:

(a) A signed Form 4804 (or computer-generated substitute).

(b) A Form 4802 if you transmit for multiple payers and have the authority to sign the affidavit on Form 4804.

(c) The magnetic media with an external identifying label (Form 5064) as described in Part B, Sec. 1.02. Be sure to include the proper sequence on this label.

(d) On the outside of the shipping container, include a Form 4801 or a substitute for the form which reads "DELIVER UNOPENED TO TAPE LIBRARY —MAGNETIC MEDIA REPORTING—BOX __ of __ ." If there is only one container, mark the outside as Box *1* of *1*. For multiple containers, include the sequence (for example, Box 1 of 3, 2 of 3, 3 of 3).

(e) If you were granted an extension, include a copy of the approval letter with the magnetic media shipment. (See Part A, Sec. 11 for information on how to apply for an extension of time to file.)

.10 IRS will not pay for or accept "Cash-on-Delivery" or "Charge to IRS" shipments of reportable tax information that an individual or organization is legally required to submit.

.11 Files may be returned to you due to coding or format errors. These files are to be corrected and returned to IRS within 45 days from the date of notice or the payer may be subject to a penalty. A copy of page 2 of the letter sent by IRS must be returned with the replacement file.

.12 Payers are required to retain a copy of the information returns filed with IRS or to have the ability to reconstruct the data for at least three years from the reporting due date.

SEC. 10. FILING DATES

.01 The dates prescribed for filing paper returns with IRS also apply to magnetic media filing. Magnetic media filing with IRS for Forms 1098, 1099, and W-2G must be on a calendar year basis. Form 5498 is used to report amounts contributed during or after the calendar year but not later than April 15.

.02 Information returns filed on magnetic media for Forms 1098, all types of Forms 1099, and Forms W-2G must be submitted to IRS/MCC postmarked no later than February 28. The due date for furnishing the required copy or statement to the payee is January 31.

.03 Information returns filed on magnetic media for Form 5498 must be submitted to IRS/MCC postmarked no later than May 31. Trustees or issuers of IRAs or SEPs must provide participants with a statement of the value of the participant's account by January 31, in any written format. Statements are due to the participants by May 31 for contributions made to IRAs for the prior calendar year. Form 5498 is filed for contributions to be applied to 1990 that are made between January 1, 1990, and April 15, 1991.

.04 If any due date falls on a Saturday, Sunday, or legal holiday, the due date is extended to the next day that is not a Saturday, Sunday, or legal holiday.

SEC. 11. EXTENSIONS OF TIME TO FILE

.01 A payer may request an extension of time to file information returns by submitting Form 8809, Request for Extension of Time To File Information Returns, to IRS/MCC. This form may be used to request an extension of time for information returns filed on paper; magnetic media; and/or electronically.

.02 A transmitter may request an extension of time to file for multiple payers by attaching a list of their names, addresses, and TINs to Form 8809. Form 8809 may be computer-generated or photocopied; however, be sure that all the pertinent information is included. If you are requesting extensions of time for more than 50 payers, we strongly encourage you to submit the list of payers, addresses, and EINs on tape or diskette. Contact IRS/MCC for the format. (See Part A, Sec. 3 for the address.) Transmitters who submit the extension of time requests on magnetic media will receive one approval letter from IRS/MCC with an attached listing of the payers with approved extensions.

.03 Request an extension of time in increments of 30 days, AS SOON AS YOU ARE AWARE that an extension is necessary but no later than the due date of the return. The request must be sent to IRS/MCC. (See Part A, Sec. 3 for the address.) You must allow a minimum of 30 days for IRS/MCC to respond to an extension request.

.04 Form 8809 must be postmarked no later than the due date of the return(s) for which you are requesting an extension of time. If you are requesting an extension of time to file several types of forms, you may use one Form 8809, but you must submit Form 8809 to IRS/MCC postmarked no later than the earliest due date. For example, if you are requesting an extension of time to file both Forms 1099-INT and Forms 5498, you must submit Form 8809 postmarked on or before February 28. You may submit more than one Form 8809 to avoid this problem.

.05 IRS will process your Form 8809 and respond in writing. If the extension request is granted, a copy of the approval letter only MUST be included with the transmittal Form 1096, Form 4804 (or computer generated substitute) when the file is submitted. INCLUDE ONLY THE APPROVAL LETTER SENT FROM IRS. DO NOT SEND A COPY OF FORM 8809 WITH EITHER YOUR PAPER DOCUMENTS TO THE SERVICE CENTER, OR YOUR MAGNETIC MEDIA FILE TO IRS/MCC. *Also, if you originally requested a 30-day extension and then find you need an additional 30 days, a copy of the first approved extension must accompany your second request.* IRS/MCC will not grant more than two extensions of time for a maximum of 60 days.

.06 You can request an extension for only one tax year on Form 8809.

.07 The extension request must be signed by the payer or a duly authorized representative.

.08 Failure to properly complete and sign the Form 8809 may cause delays in processing the request or result in a denial of your request. Please read the instructions on the back of the Form 8809 very carefully.

.09 Copies of the Form 8809 may be obtained from IRS/MCC (see Part A, Sec. 3 for the address) or from other IRS offices. Form 8809 may also be computer-generated as long as it contains all the information requested on the original form, and it may be photocopied.

SEC. 12. PROCESSING OF MAGNETIC MEDIA RETURNS

.01 All data received at IRS/MCC for processing will be given the same protection as individual returns (Forms 1040). IRS/MCC will process your magnetic media files and check that the records were formatted according to the most current revenue procedure. Please be sure that your record format and coding comply with this revenue procedure, which is to be used for the preparation of Tax Year 1990 information returns only.

.02 Revenue procedures are revised annually to reflect legislative and form changes to the information returns.

.03 If your data is formatted incorrectly, or if the file contains information that will cause invalid conditions in the IRS processing (for example, you code all 9's or all zeros in the field for the TIN), we will return your file for replacement.

.04 To distinguish between a correction and a replacement:

A correction is media submitted by the payer to correct records that were successfully processed by IRS, but contained erroneous information.

A replacement is media that IRS has returned to the payer or transmitter due to format errors encountered during processing. After necessary changes have been made, the media must be returned to IRS/MCC to be re-input.

.05 Beginning with Tax Year 1990, (processed in Calendar Year 1991), IRS/MCC will no longer return your files after processing. Therefore, if IRS/MCC returns your file to you, it is because a replacement is needed. *Open all packages immediately.* Files returned due to format or coding errors must be corrected and returned to IRS/MCC within 45 days from the date of the notice to avoid a failure to file penalty. IRS/MCC will work with magnetic media filers as much as possible to assist with processing problems. If IRS/MCC calls your office, please respond promptly since we may have information that you need to correct your file.

.06 Do not use special shipping containers for transmitting data to IRS/MCC. Because of the high volume of data received and shipping costs involved, they will not be returned.

.07 When submitting your file to IRS/MCC, please keep in mind that:

(a) You may include any of the types of returns covered by this revenue procedure on one diskette. You do not have to separate the different types of forms on different media. For example, one diskette could contain Forms 1098, 1099-INT, 1099-DIV, and 5498 for different payers. You need only identify the different types of returns and payers with different Payer/Transmitter "A" Records which are coded on the magnetic media. (See Part B, Sec. 3 for details.)

(b) You may submit multiple types of media in your shipment. However, submit a separate Form 4804 for each type of media.

(c) Enclose your transmittal Form 4804 with your shipment. Do not send it in a separate mailing. If your shipment is packed in several packages, use label Form 4801 to indicate the number of packages, and put the transmittal in the first package.

(d) IRS/MCC will NOT be returning your magnetic media to you after successfully processing it. Therefore, if you want proof that IRS/MCC received your shipment, you may choose to send your submission using a service with tracing capabilities, or that will provide proof of delivery (for example, U.S. Postal Service Certified Mail, Federal Express or UPS.)

SEC. 13. HOW TO FILE CORRECTED RETURNS

.01 The filing requirement thresholds listed in Part A, Sec. 4 apply separately to both original and corrected returns.

EXAMPLE: If you have 100 Forms 1099-A to be corrected, they can be filed on paper since they fall under the 250 threshold. However, if you have 300 Forms 1099-A to be corrected, they must be filed on magnetic media since they meet the 250 threshold. If for some reason you cannot file these corrections on magnetic media, you must request a waiver (see Part A, Sec. 5) before filing them on paper or you may be subject to a penalty. No waiver is required for corrections that fall under the required threshold.

.02 Corrections for the current year should be aggregated and filed no later than August 1 of each year. However, if you discover errors after August 1, you are still required to file corrections so that you will not be subject to a penalty for intentional disregard of the filing requirements. Failure to correct information returns submitted with erroneous information may result in penalties being assessed for failure to provide correct information.

.03 See the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" for information concerning the due date for filing information returns, and any penalties that may apply to returns considered to be filed late or incorrectly. A copy of these instructions is included in your MMR (Magnetic Media Reporting) package each year. This will also contain specific information concerning the impact of the Revenue Reconciliation Act of 1989 on the penalty provisions for ANY documents, including corrections, which are filed after the original filing due date for the information return.

.04 ALL FIELDS MUST BE COMPLETED WITH THE CORRECT INFORMATION, NOT JUST THE DATA FIELDS NEEDING CORRECTION. If your entire file is in error, contact IRS/MCC immediately. If you file corrected returns on paper forms, submit Copy A to the appropriate service center. Furnish corrected statements to recipients as soon as possible.

.05 There are numerous types of errors. More than one transaction may be required to properly correct the initial error. A "G" in magnetic media position 8 of the "B" Record is used to indicate a corrected return. You are strongly encouraged to read

this ENTIRE section before attempting to make ANY correction.

.06 Corrected returns submitted to IRS on magnetic media, using a "G" coded Payee "B" Record, may be included on the same medium as those corrections without the "G" code; however, separate "A" Records are required. Corrected returns are to be identified as corrections on the transmittal document by marking the appropriate checkbox and also on the EXTERNAL label of the file.

NOTE: If you discover that your original file omitted certain information returns that should have been included, do *not* submit those documents as "corrections," and do not code the Payee "B" Record with the correction "G" code. They will be considered as late filed original documents and may be subject to the penalty.

.07 The instructions that follow will provide information on how to file corrected returns on magnetic media for the current tax year. However, if you discover errors in previous years' files, please send us a letter with the following information:

(a) Name and address of payer
(b) Type of error (Please explain clearly.)
(c) Tax year
(d) EIN
(e) TCC
(f) Number of Payees

This information will be forwarded to the appropriate office and may prevent erroneous notices from being generated against payee accounts. You are also required to furnish corrected statements to the payees.

.08 If you are not required to file your corrections on magnetic media and you file them on paper forms, do not submit the paper returns to IRS/MCC. All paper returns, whether original or corrected, must be filed with the appropriate service center. Corrected returns filed on magnetic media must be filed with IRS/MCC. (Refer to Part A, Sec. 3 for the address.) CORRECTED DISKETTES WILL NOT BE RETURNED AFTER PROCESSING.

.09 Corrected statements to payees should be clearly identified as "CORRECTED" and should be provided to them as soon as possible.

.10 A transmittal Form 4804 (or computer-generated substitute) is used to transmit magnetic media. A Form 4802, "Transmittal for Multiple Magnetic Media Reporting," is a continuation sheet for a Form 4804. Use Form 4802 if you file for multiple payers, or submit multiple types of information returns, AND are an authorized agent for the payers. (See Part A, Sec. 9.05.)

.11 On magnetic media files, the Payee "B" Record provides a 20-position field to enter a Payer's Account Number for the Payee. This same account number may be provided on paper forms. This number will help identify the appropriate incorrect return if more than one return is filed for a particular payee. DO NOT ENTER A TIN (SSN OR EIN). A PAYER'S ACCOUNT NUMBER FOR THE PAYEE MAY BE A CHECKING ACCOUNT NUMBER; SAVINGS ACCOUNT NUMBER; SERIAL NUMBER; OR ANY OTHER NUMBER ASSIGNED TO THE PAYEE BY THE PAYER THAT WILL DISTINGUISH THE SPECIFIC ACCOUNT. THIS NUMBER SHOULD APPEAR ON THE INITIAL RETURN AND ON THE CORRECTED RETURN IN ORDER TO IDENTIFY AND PROCESS THE CORRECTION PROPERLY. THIS NUMBER IS ALSO PROVIDED WITH YOUR INVALID/NO-TIN NOTIFICATION BY THE IRS AND MAY HELP YOU DETERMINE THE BRANCH OR SUBSIDIARY REPORTING THE TRANSACTION.

.12 REVIEW THE CHART THAT FOLLOWS. The types of errors made normally fall under one of the two categories listed. Next to each type of error made, you will find a list of instructions on how to properly file the corrected return for that type of error. READ AND FOLLOW CAREFULLY ALL OF THE INSTRUCTIONS LISTED FOR THE TYPES OF ERRORS MADE ON THE INITIAL RETURN. IN SOME CASES TWO TRANSACTIONS ARE REQUIRED TO PROPERLY FILE CORRECTIONS. IF THE ORIGINAL RETURN WAS FILED AS AN AGGREGATE, YOU MUST CONSIDER THIS IN FILING CORRECTED RETURNS.

Guidelines for Filing Corrected Returns On Magnetic Media

(PLEASE READ SEC. 13.01 THROUGH 13.11 BEFORE MAKING ANY CORRECTIONS)

Error Made on the Original Return Filed on Magnetic Media	How To File the Corrected Return on Magnetic Media
1. Original return was filed with one or more of the following errors: (a) No Payee TIN (SSN or EIN) (b) Incorrect Payee TIN (c) Incorrect Payee Name (e) Wrong type of return indicator TWO SEPARATE TRANSACTIONS ARE REQUIRED TO MAKE THE CORRECTION PROPERLY. READ AND FOLLOW ALL INSTRUCTIONS FOR BOTH TRANSACTIONS 1 AND 2.	TRANSACTION 1: Identify incorrect returns: A. Forms 4804 and 4802 (or computer-generated substitute): 1. Prepare a new transmittal Form 4804 (and 4802 if you file for multiple payers), or a computer-generated substitute, that includes information related to this new file. 2. Mark the Correction box in Block 1 of the new Form 4804. If you submit a computer-generated substitute for Form 4804, indicate "MAGNETIC MEDIA CORRECTION" at the top. 3. Provide ALL requested information correctly.

(PLEASE READ SEC. 13.01 THROUGH 13.11 BEFORE MAKING ANY CORRECTIONS)

Error Made on the Original Return Filed on Magnetic Media	How To File the Corrected Return on Magnetic Media
1. (Continued)	4. If you are a Combined Federal/State filer, it is your responsibility to transmit corrected returns to the state—IRS will not. Do not include "K" Records in your corrected returns. B. 8 Inch Diskette: (Forms 1098, 1099, 5498 or W-2G) 1. Prepare a new file. 2. Use a separate Payer/Transmitter "A" Record for each type of return being reported. The information in the "A" Record will be the same as it was in the original submission. 3. The Payee "B" Record must contain exactly the same information as submitted previously EXCEPT insert a "G" in diskette position 8 of Sector 1 of the "B" Record AND for ALL payment amounts used, enter "0" (zero). 4. Corrected returns submitted to IRS using a "G" coded "B" Record may be on the same diskette as those returns submitted without the "G" code; however, separate "A" Records are required. 5. Mark the EXTERNAL label of the diskette "MAGNETIC MEDIA CORRECTION." 6. Submit the magnetic diskette and the transmittal document(s) to IRS/MCC. (Refer to Part A, Sec. 3 for the address.) TRANSACTION 2: Report the correct information: 8 Inch Diskette: (Forms 1098, 1099, 5498 or W-2G) 1. Provide information on the Form 4804 or 4802 as stated in Transaction 1A. 2. Prepare a new file with the correct information in all records. 3. Use a separate Payer/Transmitter "A" Record for each type of return being reported. 4. Do not "G" code the Payee "B" Record as a corrected return for this type of correction. 5. Submit the new returns as though they were originals. Provide all of the correct information including the TIN (SSN or EIN). 6. Mark the EXTERNAL label of the diskette "MAGNETIC MEDIA CORRECTION." 7. Submit the magnetic diskette and the transmittal document(s) to IRS/MCC. (Refer to Part A, Sec. 3 for the address.)
2. Original return was filed with one or more of the following errors: (a) Incorrect Payment Amount indicator in the Payer "A" Record. (b) Incorrect Payment amounts in the Payee "B" Record. (c) Incorrect Code in the Document Specific Code Field in the Payee "B" Record. (d) Incorrect payee address (See NOTE) NOTE: If the only error to be corrected is an incorrect payee address, only one transac-	A. Forms 4804 and 4802 (or computer-generated substitute) 1. Prepare a *new* Form 4804 (and 4802 if you file for multiple payers), or a computer-generated substitute, that includes information related to this new file. 2. Mark the Correction box in Block 1 of new Form 4804. If you submit a computer-generated substitute for Form 4804, indicate "Magnetic Media Correction" at the top. 3. Provide *ALL* requested information correctly.

Error Made on the Original Return Filed on Magnetic Media	How To File the Corrected Return on Magnetic Media
2. (Continued) tion is required. However, if you are correcting the name and/or TIN along with an incorrect address, then two transactions will be required (See previous information on correcting an incorrect payee name/TIN). REQUIRES ONLY ONE TRANSACTION.	4. If you are a Combined Federal/State filer it is your responsibility to transmit corrected returns to the state—IRS will not. Do not include "K" Records in your corrected returns. B. 8 Inch Diskette: (Forms 1098, 1099, 5498 or W-2G) 1. Prepare a new file. 2. Use a separate Payer/Transmitter "A" Record for each *type* of return being reported. The information in the "A" Record will be the same as it was in the original submission EXCEPT, the correct Amount Indicators will be used. 3. The Payee "B" Record must contain exactly the same information as submitted previously *EXCEPT* insert a "G" in diskette position 8, Sector 1, of the "B" Record AND report the correct information as it should have been reported on the original return. 4. Corrected returns submitted using a "G" coded "B" Record may be on the same diskette as those returns submitted without the "G" code; however, separate "A" Records are required. 5. Mark the EXTERNAL label of the diskette "MAGNETIC MEDIA CORRECTION." 6. Submit the magnetic diskette and the transmittal document(s) to IRS/MCC. (Refer to Part A, Sec. 3.)

SEC. 14. TAXPAYER IDENTIFICATION NUMBERS (TIN)

.01 Section 6109 of the Internal Revenue Code, and the regulations thereunder, require a person whose Taxpayer Identification Number (TIN) must be shown on an information return to furnish his or her TIN to the person required to file the information return. The number must be furnished to the payer whether or not the payee is required to file a tax return or is covered by social security.

.02 The payee's TIN is used to associate and verify amounts reported to IRS with corresponding amounts on tax returns. Therefore, it is particularly important that CORRECT social security and employer identification numbers for payees be provided on magnetic media or paper forms submitted to IRS. DO NOT ENTER HYPHENS, ALPHA CHARACTERS, ALL 9S OR ALL ZEROS. IRS validates the SSN by using the Name Control of the surname (last name) of the individual who has been assigned this number. For this reason, provide the surname in the First Payee Name Line and/or the Name Control in positions 9–12 of the Payee "B" Record (see Part B, Sec. 6). Failure to provide this information may make it impossible for IRS to validate the SSN.

.03 The TIN to be furnished to IRS depends primarily upon the manner in which the account is maintained or set up on the payer's record. The payer and payee names with associated TINs should be consistent with the names and TINs used on other tax returns.

Also, the name and TIN provided must belong to the owner of the account. If the account is recorded in more than one name, furnish the name and TIN of one of the owners of the account. The TIN provided MUST be associated with the name of the payee provided in the first name line of the Payee "B" Record. For individuals, including sole proprietors, the payee TIN is the payee's social security number. For other entities, the payee TIN is the payee's employer identification number.

.04 Failure to provide the correct name with the payee TIN, or failure to provide a valid TIN, could result in an Invalid/No TIN notice (sometimes referred to as "B" notice) being generated for that TIN.

.05 The following charts will help you determine the TIN to be furnished to IRS for those persons for whom you are reporting information (payees).

CHART 1. Guidelines for Social Security Numbers

For this type of account—	In the Taxpayer Identification Number field of the Payee "B" Record, enter the SSN of—	In the First Payee Name Line of the Payee "B" Record, enter the name of—
1. Individual	The individual	The individual
2. Joint account (Two or more individuals, including husband and wife)	The actual owner of the account. (If more than one owner, the first individual on the account)	The individual whose SSN is entered
3. Custodian account of a minor (Uniform Gift or Transfers to Minors Act)	The minor	The minor
4. The usual revocable savings trust account (grantor is also trustee)	The grantor-trustee	The grantor-trustee
5. A so-called trust account that is not a legal or valid trust under state law	The actual owner	The actual owner
6. A sole proprietorship	The owner	The owner, not the business name

CHART 2. Guidelines for Employer Identification Numbers

For this type of account—	In the Taxpayer Identification Number field of the Payee "B" Record, enter the SSN of—	In the First Payee Name Line of the Payee "B" Record, enter the name of—
1. A valid trust, estate, or pension trust	Legal entity[1]	The legal trust, estate, or pension trust
2. Corporate	The corporation	The corporation
3. Association, club, religious, charitable, educational or other tax-exempt organization	The organization	The organization
4. Partnership account held in then name of the business	The partnership	The partnership
5. A broker or registered nominee/middleman	The broker or nominee/middleman	The broker or nominee/middleman
6. Account with the Department of Agriculture in the name of a public entity, (such as a state or local government, school district or prison), that receives agriculture program payments	The public entity	The public entity

[1] Do not furnish the identification number of the personal representative or trustee unless the name of the representative or trustee is used in the account title.

SEC. 15. EFFECT ON PAPER RETURNS

.01 Magnetic media reporting of the information returns listed in Part A, Sec. 4 applies only to the information submitted to IRS (Copy A).

.02 Payers are responsible for providing statements to the payees as outlined in the 1990 "Instructions for Forms 1099, 1098, 5498 and W-2G."

.03 Refer to 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" for instructions and changes to reporting information returns on paper.

.04 Send all information returns filed on paper to the appropriate service center, not to IRS/MCC.

.05 If you file your information returns on magnetic media, *DO NOT* file the same returns on paper, since that will result in duplicate filing. Filing on magnetic media or by electronic filing takes the place of submitting the documents on paper. In some cases, you may want to file your original documents on magnetic media, but submit your corrections on paper documents. This is allowable as long as your corrections do not exceed the filing threshold; if the volume of corrections does exceed the threshold, you MUST have an approved waiver to submit your corrections on paper.

SEC. 16. COMBINED FEDERAL/STATE FILING PROGRAM

.01 The Combined Federal/State Program was established to simplify information returns filing for the taxpayer by providing the tax information to participating states free-of-charge. IRS/MCC will forward this

information to participating states for approved filers so that separate reporting to those states is not necessary. *FORMS 1098, 1099-A, 1099-B, 1099-S, AND W-2G CANNOT BE FILED UNDER THIS PROGRAM.*

.02 To request approval to participate, a "TEST" file coded for this program, MUST be submitted by the transmitter to IRS/MCC between October 1 and December 15 using the revenue procedure that will be used to submit the actual data files.

.03 Attach a letter to the Form 4804 submitted with the "TEST" file which indicates that you wish to participate in this program.

.04 The "TEST" file is only required for the first year. Once you are approved, you need not resubmit tests each year except when notified by IRS. (See Part A, Sec. 8 for general guidelines on submission of "TEST" files.) Each record, both in the "TEST" file and the "ACTUAL" data file, must conform exactly to the revenue procedure for that tax year. Records must be coded using each state's dollar criteria from TABLE 2 of this section for each type of return.

.05 If your "TEST" file is acceptable, we will send you an approval letter and a Form 6847, Consent for Internal Revenue Service to Release Tax Information, which the payer MUST complete, sign, and return to IRS/MCC before any tax information can be released to the state. Be sure to write your TCC on Form 6847. If your "TEST" file is not acceptable, we will return your media with a letter indicating what the problems were, and your replacement "TEST" file must be returned to IRS/MCC postmarked on or before December 15.

.06 A separate Form 6847 is required for each payer; therefore, this form may be photocopied so that you may provide copies to all of the payers for whom you submit magnetic media or electronic files. A transmitter may not combine payers on one Form 6847 even though acting as Attorney-in-Fact for several payers. Form 6847 may be computer-generated as long as it includes all information that is on the original form. If the Form 6847 is signed by an Attorney-in-Fact, the written consent from the payer must clearly indicate that the Attorney-in-Fact is empowered to authorize release of the information.

.07 If you file for multiple payers, code the records only for participating states and for those payers who have properly submitted Form 6847. Do not submit records coded for the Combined Federal/State Program WITHOUT PRIOR APPROVAL from IRS.

.08 If you had applied to participate in this program in the past but did not meet the requirements, you must resubmit a test and the Form 6847 with the proper signatures as specified.

.09 Some participating states require separate notification that you are filing in this manner. Since IRS acts as a forwarding agent only, IT IS YOUR RESPONSIBILITY TO CONTACT THE APPROPRIATE STATES FOR FURTHER INFORMATION.

.10 Approval to participate in the Combined Federal/State Program will be revoked if files submitted do not totally conform to the specifications in this revenue procedure.

.11 IT IS THE FILER'S RESPONSIBILITY TO TRANSMIT CORRECTED RETURNS TO THE STATES.

.12 Participating states and corresponding valid state codes are listed in TABLE 1 of this section. If the state that you wish information released to does not participate in the program, do not code your records for that state. It is the filer's responsibility to file information returns with those states not participating in the Combined Federal/State program.

.13 The appropriate state code MUST be entered for those documents which meet the state's filing requirements (see TABLE 1). DO NOT USE STATE ABBREVIATIONS. It is the filer's responsibility to determine the state code to be used and to obtain the filing requirements from the appropriate state(s).

.14 To simplify filing, several of the participating states have provided lists of their information return reporting requirements (see TABLE 2). It is your responsibility to contact the participating states to verify the criteria provided in this table.

.15 If you have met *ALL* of the above conditions:

(a) You must submit all records coded exactly as required by this revenue procedure.

(b) The "C" Record must be followed by a "K" Record for each state. The "K" Record indicates the number of payees being reported to each particular state.

(c) Payment amount totals and the valid participating state code must be included in the State Totals "K" Record. Refer to Part B, Sec. 8, for a description of the "K" Record.

(d) The last "K" Record is followed by an "A" Record or End of Transmission "F" Record (if this is the last record of the entire file).

TABLE 1. PARTICIPATING STATES AND THEIR CODES

State	Code	State	Code	State	Code
Alabama	01	Iowa	19	New York	36
Arizona	04	Kansas	20	North Carolina	37
Arkansas	05	Maine	23	North Dakota	38
California	06	Massachusetts	25	Oregon	41
Delaware	10	Minnesota	27	South Carolina	45
District of Columbia	11	Mississippi	28	Tennessee	47
Georgia	13	Missouri	29	Wisconsin	55
Hawaii	15	Montana	30		
Idaho	16	New Jersey	34		
Indiana	18	New Mexico	35		

TABLE 2. DOLLAR CRITERIA FOR STATE REPORTING

STATE	1099-DIV	1099-G	1099-INT	1099-MISC	1099-OID	1099-PATR	1099-R	5498
Alabama	$1500	$ NR	$1500	$1500	$1500	$1500	$1500	NR
Arkansas	100	2500	100	2500	2500	2500	2500	[g]
District of Columbia[b]	600	600	600	600	600	600	600	NR
Hawaii	10	g	10[c]	600	10	10	600	[g]
Idaho	10	10	10	600	10	10	600	[g]
Iowa	100	1000	1000	1000	1000	1000	1000	NR
Minnesota	10	10	10	600	10	10	600	[g]
Mississippi	600	600	600	600	600	600	600	NR
Missouri	NR	NR	NR	1200[d]	NR	NR	NR	NR
Montana	10	10	10	600	10	10	600	[g]
New Jersey	1000	1000	1000	1000	1000	1000	1000	NR
New York	NR	600	600	600[e]	NR	600	600	NR
North Carolina	100	100	100	600	100	100	100	[g]
Tennessee	25	NR	25	NR	NR	NR	NR	NR
Wisconsin	NR	NR	NR	600	NR	600	600	NR

NOTE: This cumulative list is for information purposes only and represents dollar criteria. For complete information on state filing requirements, including any changes which may apply, contact the appropriate state tax agencies. Filing requirements for any state in TABLE 1 not shown in TABLE 2 are the same as the Federal requirement.

NR—No filing requirement.

Footnotes:

a. These requirements apply to individuals and business entities.
b. Amounts are for aggregates of several types of income from the same payer.
c. State regulation changing filing requirement from $600 to $10 is pending.
d. The state would prefer those returns filed with respect to non-Missouri residents to be sent directly to the state agency.
e. Aggregate of several types of income.
f. Same as Federal requirement for this type of return.
g. All amounts are to be reported.

SEC. 17. DEFINITIONS OF TERMS

Element	*Description*
b	Denotes a blank position. Enter blank(s) when this symbol is used (do not enter the letter "b"). This appears in numerous areas throughout the record descriptions.
CUSIP Number	A number developed by the Committee on Uniform Security Identification Procedure to serve as a common denominator in communications among users for security transactions and security information.
EIN	A nine-digit number (Employer Identification Number) that has been assigned by IRS to the taxpayer.
Electronic Filing	Submission of information returns using switched telecommunications network circuits. These transmissions use modems, dial-up phone lines, and bi-synchronous protocols. See Publication 1220 for specific information on electronic filing.
File	For purposes of this procedure, a file consists of all records submitted by a Payer or Transmitter, either magnetically or electronically.
Foreign Corporation	Any corporation organized or created other than in or under the laws of the United States or any of its states or territories.
Magnetic Media	For purposes of this procedure, the term "magnetic media" refers to ½ inch magnetic tape; IBM 3480 compatible tape cartridge; or 8 inch, 5¼, or 3½ inch diskette. Magnetic media may be produced on mainframe computer systems; mini- or micro-computer systems; or personal computers.
PS 58 Costs	The current cost of life insurance under a qualified plan taxable under section 72(m) and Regulations section 1.72-16(b). (See Part B, Sec. 6 Payee "B" Record, Document Specific Code, Category of Distribution, Code 9.)

Element	*Description*
Payee	Person or organization receiving payments from the Payer, or for whom an information return must be filed. The payee includes a borrower (Form 1099-A), participant (Form 5498) and a gambling winner (Form W-2G). For Form 1098, the payee is the individual paying the interest. For Form 1099-S, the payee is the seller or other transferor.
Payer	Includes the person making payments, a recipient of mortgage interest payments, a broker, a person reporting a real estate transaction, a barter exchange, a trustee or issuer of an IRA or SEP, or a lender who acquires an interest in secured property or who has reason to know that the property has been abandoned. The payer will be held responsible for the completeness, accuracy and timely submission of magnetic media files.
Special Character	Any character that is not a numeral, an alpha, or a blank.
SSA	Social Security Administration.
SSN	Social Security Number.
Taxpayer Identification Number (TIN)	May be either an EIN or SSN.
Transfer Agent (Paying Agent)	The transfer agent or paying agent is the entity who has been contracted or authorized by the payer to perform the services of paying and reporting backup withholding (Form 941). The payer may be required to submit to IRS a Form 2678, Employer Appointment of Agent Under Section 3504 of the Internal Revenue Code, which notifies IRS of the transfer agent relationship.
Transmitter	Person or organization *submitting* magnetic media file(s). May be Payer or agent of Payer.
Transmitter Control Code (TCC)	A five character alpha/numeric number assigned by IRS to the transmitter prior to actual filing on magnetic media. This number is inserted in the "A" Record of your files and *must* be present before the file can be processed. An application Form 4419 must be filed with IRS to receive this number. (See Part A, Sec. 7.)

SEC. 18. STATE ABBREVIATIONS

.01 You MUST use the following state abbreviations when developing the state code portion of address fields. (This table provides state abbreviations only and does not represent those states participating in the Combined Federal/State Filing Program. For a list of states that participate in the Combined Federal/State Program, refer to Part A, Sec. 16, Table 1.)

State	Code	State	Code	State	Code
Alabama	AL	Kentucky	KY	North Dakota	ND
Alaska	AK	Louisiana	LA	Ohio	OH
American Samoa	AS	Maine	ME	Oklahoma	OK
Arizona	AZ	Mariana Islands	CM	Oregon	OR
Arkansas	AR	Maryland	MD	Pennsylvania	PA
California	CA	Massachusetts	MA	Puerto Rico	PR
Colorado	CO	Michigan	MI	Rhode Island	RI
Connecticut	CT	Minnesota	MN	South Carolina	SC
Delaware	DE	Mississippi	MS	South Dakota	SD
District of Columbia	DC	Missouri	MO	Tennessee	TN
Florida	FL	Montana	MT	Texas	TX
Georgia	GA	Nebraska	NE	Utah	UT
Guam	GU	Nevada	NV	Vermont	VT
Hawaii	HI	New Hampshire	NH	Virgin Islands	VI
Idaho	ID	New Jersey	NJ	Virginia	VA
Illinois	IL	New Mexico	NM	Washington	WA
Indiana	IN	New York	NY	West Virginia	WV
Iowa	IA	North Carolina	NC	Wisconsin	WI
Kansas	KS			Wyoming	WY

.02 You must use the 29-2-9 City, State, and ZIP Code format for U.S. addresses which include American Somoa, Guam, Mariana Islands, Puerto Rico, and the Virgin Islands.

.03 For Foreign Country addresses you may use a 40-position free format in lieu of the 29-2-9 City, State, and ZIP Code format; however, this is only allowable if a "1" appears in the Foreign Country Indicator field of the "B" Record. You may choose to spell out the name of the foreign country or use abbreviations.

.04 When reporting APO/FPO addresses in Payee documents, the following format should be used:

EXAMPLE:	Payee Name	PVT Willard J. Doe		
	Mailing Address	Company F, PSC Box 100	)	
		167 Infantry REGT	)	See NOTE
	Payee City	APO New York		
	Payee State			
	Payee ZIP Code	098010100		

NOTE: Mailing address must be reported as one 40-position field.

SEC. 19. MAJOR PROBLEMS ENCOUNTERED

After preparing your files, we encourage you to verify the format and content of each type of record to ensure the accuracy of your data submission. This may eliminate the need for IRS/MCC to return your file for replacement, and reduce the likelihood of a penalty assessment for incorrect submissions. We strongly urge you to print your data before shipping to make sure you have good data in your records according to the format found in this revenue procedure. This is especially true for those filers who have either had their files prepared by a third party service bureau, or who have purchased pre-programmed software packages. If you purchased your software package for a previous tax year, it will no longer be valid for reporting your tax year 1990 information returns, since there were programming changes.

Following are some of the most frequently encountered problems with magnetic media files submitted to IRS/MCC which result in files being returned to the filer:

---

1. The Payment Amount Fields in the Payee "B" Record do not correspond to the amount indicators in the Payer "A" Record.

If Amount Indicators 2, 4 and 7 appear in Sector 1, positions 24, 25 and 26 of the Payer "A" Record, then the Payee "B" Record must show payment amounts in Fields 2 (Sector 1, position 62–71), 4 (Sector 1, position 82–91) and 7 (Sector 1, position 112–121), right-justified and unused positions zero filled.

EXAMPLE:	"A" RECORD	247bbbbbbb (Sector 1, pos. 24–32)	— (b = blank)
	"B" RECORD	0000867599 (Sector 1, pos. 62–71)	— (Payment Amount 2)
		0000709097 (Sector 1, pos. 82–91)	— (Payment Amount 4)
		0000044985 (Sector 1, pos. 112–121)	— (Payment Amount 7)

---

2. Blanks or invalid characters appear in Payment Amount Fields in the Payee "B" Record.

Money amounts must be right-justified and zero (0) filled. DO NOT USE BLANKS. Each payment amount must be entered in U.S. dollars and cents; however, do not use dollar signs, decimal points, or commas, as these characters are understood. For example, if you are reporting a money amount of $100.00, your payment amount field would be coded "0000010000."

DO NOT ENTER NEGATIVE AMOUNTS EXCEPT for Amount Indicators 2, 6, 7, 8 or 9 of the Form 1099-B. A negative overpunch in the units position may be used instead of a minus sign in the leftmost position to indicate negative amounts. If a minus sign or negative overpunch is not used, the amount is assumed to be positive.

---

3. Data is in prior year's format.

Revenue procedures are updated each year and you must use the current revenue procedure to format your records. DO NOT USE 1989 REVENUE PROCEDURES FOR 1990 FILING.

---

4. Discrepancy between IRS totals and totals in Payer "C" Records.

The Payer "C" Record is a summary record for a type of return for a given payer as reported in the Payee "B" Records. IRS computers automatically compute the total number of payees and total payment amounts in the Payee "B" records and these totals are compared against the totals in the Payer "C" Records. These totals are also manually checked against the totals provided on Forms 4804/4802. Payers should verify the accuracy of the records because imbalances necessitate return of files for correction.

---

5. Incorrect/Invalid EIN in Payer "A" Record.

The Payer's federal EIN reported in Sector 1, positions 8–16 of the Payer "A" Record must be correct in order for IRS to process the media. Be sure the EIN reported on the Form 4804 and Form 4802 matches the EIN reported in the "A" Record. Do not enter blanks, hyphens, alphas, all 9s or all 0s. This field may be left blank for foreign corporations not required to have an EIN if the foreign indicator code is present in the "A" Record. Also, please double check for transposed numbers because an incorrect EIN will cause records to go unpostable; i.e., the records will not post to the Master File.

6. Bad Format.

We receive magnetic tape formatted using 8-inch diskette specifications and vice versa.

BE SURE TO USE THE PROPER REVENUE PROCEDURE FOR FORMATTING YOUR DATA. Use Publication 1220 for formatting magnetic tape, tape cartridge, 5¼ and 3½ inch diskettes, and for electronic filing. Use Publication 1255 for formatting 8-inch diskettes only.

7. Reporting Payments on Form 1099-R, Payer "A" Record.

There is no provision for reporting the Distribution Code (entered in Box 7 on the paper Form 1099-R) in the Payer "A" Record. This information is reported in the Document Specific Code of the Payee "B" Record. Therefore, the Amount Indicators in the Payer "A" Record should be reported as follows if you are reporting all 8 Amount Codes: 12345689b. Amounts are entered in ascending sequence, left-justified, and unused positions blank filled. The Amount Indicators may change from year to year. Please be sure your Payer "A" Record only contains the Amount Indicators specified in the revenue procedure.

8. Block size exceeds 25,200 positions.

Be sure your records do not span blocks. Even though the size was changed from 10,000 to 25,200 positions, filers are still exceeding the block size.

9. Bad or incomplete address in the Payer "A" Record.

The Payer's address in Part B, Sector 2, positions 44–83 and Part C, Sector 1, positions 132–171 of the Payer "A" Record should be left-justified and blank filled, and must agree with the address provided on Forms 4804/4802. Payer's City, State and ZIP must appear in Part B, Sector 2, positions 84–123 and Part C, Sector 1, positions 172–211 and must be left-justified and blank filled.

10. Record length is invalid.

Beginning in Tax Year 1987, the record length was changed from 360 to 420 positions. Some filers are still using old programs that create records of 360 positions, which are now unacceptable.

RECORDS MUST BE A FIXED 420 POSITIONS.

11. The City/State/ZIP Code in the Payee "B" Record is in wrong format.

The Payee City (Part B, Sector 3, positions 43–71 and Part C, Sector 2, positions 43–71), State (Part B, Sector 3, positions 72–73 and Part C, Sector 2, positions 72–73), and ZIP Code (Part B, Sector 3, positions 74–82 and Part C, Sector 2, positions 74–82 and Part C, Sector 2, positions 74–82) in the Payee "B" Record MUST be coded in the correct positions. If your program cannot code this information in the correct fields, you MUST request a deviation in writing from IRS/MCC. Files submitted with the City/State/ZIP Code information coded incorrectly, and for which a deviation has not been approved by IRS/MCC, will be returned for replacement.

12. Invalid type of return indicator.

You must indicate the type of return submitted by inserting the appropriate code in Position 23 of the Payer/Transmitter "A" Record. For example, if the type of return being reported is Form 1099-INT, a code "6" must be inserted in Position 23.

13. Form W-2/W-2P information submitted on same media as Form 1099 information.

Form W-2/W-2P information is processed by the Social Security Administration (SSA). The Social Security Administration has its own magnetic media reporting program for wage information; therefore, the media containing Forms W-2/W-2P is submitted to SSA. Any media received at IRS/MCC which contains Form W-2/W-2P information will be returned to the filer. Contact your local SSA office for information concerning filing Forms W-2/W-2P on magnetic media.

14. Excessive withholding credits.

For most information returns other than Form 1099-R, withholding credits should not exceed 20 percent of the income reported. Validate the total reported in the withholding field against the total income reported.

15. Incorrect format for Taxpayer Identification Numbers (TIN) in the Payee "B" Record.

A check of your Payee "B" Records should be made to ensure the TIN's are formatted correctly. There should be nine digits, no alpha characters, no hyphens or commas. Incorrect formatting of TIN's may result in a penalty.

PART B. SINGLE DENSITY DISKETTE SPECIFICATIONS

SECTION 1. GENERAL

.01 The specifications contained in this part of the revenue procedure define the required format and contents of the records to be included in a single density diskette file and must be strictly adhered to unless deviations have been specifically granted by IRS.

.02 To be compatible, a single density diskette file must meet the following specifications in total:

(a) 8 inches in diameter.

(b) Recorded in EBCDIC.

(c) Contain 77 tracks of which:

(1) Track 0 is the index track (the operating system reserves track 0 for the directory information and writes the file name and location in the directory; data cannot be written in track 0).

(2) Tracks 1 through 73 are data tracks.

(3) Track 74 is unused.

(4) Tracks 75 and 76 are alternate data tracks.

(d) Each Track must contain 26 sectors.

(e) Each Sector must contain 128 bytes.

(f) Data must be recorded on only one side of the diskette.

(g) IRS can process single sided, single density, soft sectored diskettes as well as double sided, double density, soft sectored diskettes. Part C provides specifications for double density diskettes which have sectors of 256 bytes.

(h) An IBM 5360 compatible diskette would meet the above specifications.

(i) Hard sectored diskettes are not compatible.

(j) A diskette should be clearly marked as to which type of data (single sided/single density or double sided/double density) is on each diskette, and preferably, the entire file should consist of either all single sided/single density or all double sided/double density diskettes.

.03 Payers who can substantially conform to these specifications, but require some minor deviations, MUST contact IRS/MCC. Diskettes deviating from the specifications in this revenue procedure must not be submitted without prior approval from IRS. If you file under the Combined Federal/State Filing Program, your files must conform totally to this revenue procedure.

.04 Form 5064, Media Label, must be affixed to each diskette submitted for processing. The following information is needed:

(a) The transmitter's name.

(b) The five character alpha/numeric Transmitter Control Code (TCC).

(c) The tax year of the data (*e.g.*, 1990).

(d) Operating system/software and hardware.

(e) Document types (*e.g.*, 1098, 5498, INT, DIV, MISC, etc.).

(f) The total number of "B" Records on the diskette.

(g) An in-house volume serial number assigned by the transmitter to the diskette, if applicable. (This is optional for those organizations which assign their own numbers to ther media.) If you do not assign media numbers, leave this blank.

(h) The sequence of each diskette (*e.g.*, 001 of 008; 002 of 008, etc.) However, if your file is complete on one diskette (ends with an "F" Record) the sequence will be 001 of 001. The information on the external label, Form 5064, will assist IRS in processing the file, or in locating a file if the transmitter requests its return due to errors.

SEC. 2. DISKETTE HEADER LABEL

The following header label format applies to both single and double density diskettes.

The header label on the diskette must be located in track 0, sector 8 and must be formatted as shown in the following layout. If your system automatically creates a header label, this is not necessary. If the file will consist of multiple diskettes, the Multi-Volume indicator in the diskette header label must contain a "C".

HDR1	Blank	Data Set (File) Name (For Transmitter's Use)	Blank	Sector Length	Blank	Beginning of Data
(a)	(b)	(c)	(b)	(d)	(b)	(e)
1-4	5	6-13	14-22	23-27	28	29-33

Blank	End of Data	Blank	Bypass Data Set	Data Set Accessibility	Write Protect	Blank
(b)	(f)	(b)	(g)	(h)	(i)	(j)
34	35-39	40	41	42	43	44

Multi-Volume (k)	Blank (b)	Expiration Date YYMMDD (l)	Verify Mark (m)	Blank (b)	Next Available Data Position (n)
45	46-66	67-72	73	74	75-79

(a) Header 1—Positions 1 through 4; enter HDR1.

(b) Unused—Any field marked blank is unused and should contain only blanks.

(c) Data Set (File) Name—Positions 6 through 13; you can use this field to identify your data set. The Data Set Name must begin with an alphabetic character and consist of only alphabetic or numeric characters.

(d) Sector Length—Positions 23 through 27; enter the sector length 128 or 256 in positions 25-27 and fill positions 23 and 24 with zeros.

(e) Beginning of Data—Positions 29 through 33; enter the five-digit address designated for the first record of this data set. For example, if the first record is to go in track 01, sector 02, enter 01002, or xx0yy where xx is the track number and yy is the sector number.

(f) End of Data—Positions 35 through 39; enter the five-digit address of the last position of the diskette reserved for this data set. For example, to reserve the entire diskette for a data set, enter 73026.

(g) Bypass Data Set—Position 41; enter B if you want to bypass this data set; otherwise, enter a blank.

(h) Data Set Accessibility—Position 42; enter a blank. Any other character in this field causes the equipment to refuse the diskette.

(i) Write Protect—Position 43; this field defines the protected status of the associated data set. P = read only; blank = read/write. With P in this position, you can only select the Update (U) mode.

(j) Position 44 is blank only for Single Sided/Single Density; enter "e" if Double Sided/Double Density to indicate exchange file.

(k) Multi-Volume—Position 45; this field indicates whether a complete data set is on a diskette. Blank = data set complete; C = data set continued on another diskette; L = last diskette of a multi-diskette data set.

(l) Expiration Date—Positions 67 through 72; may be used to contain the date that the data set expires. The format is YYMMDD where YY is the year, MM is the month and DD is the day.

(m) Verify Mark—Position 73; this single character field shows if the data set is verified. If it is, enter V, if it is not verified, enter a blank.

(n) Next Available Data Position—Enter the address of the next available position after End of Data (f). Positions 75-79; enter the track number in positions 75 and 76, enter a "0" (zero) in position 77 and enter the sector number in positions 78 and 79.

SEC. 3. PAYER/TRANSMITTER "A" RECORD

.01 The Payer/Transmitter "A" Record identifies the payer and transmitter of the diskette and provides parameters for the succeeding Payee "B" Records. IRS computer programs rely on the absolute relationship between the parameters and data fields in the "A" Record and the data fields in the "B" Records to which they apply.

.02 The number of "A" Records appearing on a diskette will depend on the number of payers and the different types of returns being reported. The payment amounts for one payer for one type of return must be consolidated under one "A" Record if submitted on the same file.

.03 Do not submit separate "A" Records for each payment amount being reported. For example, if you are filing Form 1099-DIV to report Amount Codes 1, 2, and 3, all three amount codes must be reported under one "A" Record, not three separate "A" Records. For Payee "B" Records that do not contain payment amounts for all three amount codes, enter zeros for those which have no amount to be reported.

.04 After the header label on the diskette, the first record appearing in the file *must be an "A" Record.* When a single density diskette is used each "A" Record will consist of at least 2 sectors of 128 positions each; however, if you are transmitting for someone other than yourself, 4 sectors are required.

.05 A transmitter may include Payee "B" Records for more than one payer on a diskette; however, each GROUP of Payee "B" Records must be preceded by an "A" Record.

.06 A single diskette may also contain different types of returns, but the returns MUST NOT be intermingled. A separate "A" Record is required for each payer and each type of return being reported. An "A" Record may be blocked with "B" Records; however, the initial record on a file must be an "A" Record. IRS will accept an "A" Record after a "C" Record.

.07 All alpha characters entered in the "A" Record should be uppercase.

.08 WHEN REPORTING FORM 1098, MORTGAGE INTEREST

STATEMENT, THE "A" RECORD WILL REFLECT THE NAME OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (BORROWER/PAYER OF RECORD) AND THE AMOUNT PAID.

NOTE: For all fields marked REQUIRED, you must provide the information described under Description and Remarks. For fields not marked REQUIRED, you must allow for the field but may be instructed to enter blanks or zeros in the indicated diskette position(s) and for the indicated length.

RECORD NAME: PAYER/TRANSMITTER "A" RECORD

SECTOR 1

Diskette Position	Field Title	Length	Description and Remarks
1	Record Sequence	1	REQUIRED. Must be a "1". It is used to sequence the sectors making up a PAYER Record.
2	Record Type	1	REQUIRED. Enter "A".
3–4	Payment Year	2	REQUIRED. Enter "90".
5–7	Diskette Sequence Number	3	Sequence number assigned by the transmitter to each diskette starting with 001. (You may choose to enter blanks or zeros in this field. IRS bypasses this information.) You must indicate the proper sequence on the external label Form 5064.
8–16	Payer's Federal EIN	9	REQUIRED. Must be the valid 9-digit number assigned to the payer by IRS. DO NOT ENTER BLANKS, HYPHENS, ALPHA CHARACTERS, ALL 9's OR ALL ZEROS. (Also see Part A, Sec. 14.) For foreign corporations not required to have an EIN, this field may be left blank. Foreign corporations should have the Foreign Corporation Indicator set to "1". (See Part A, Sec. 17 for the definition of a Foreign Corporation.)
17–20	Payer Name Control	4	The Payer Name Control can be obtained from the mail label on the Package 1099 which is mailed to most payers on record each December. To distinguish between the Package 1099 and Magnetic Media Reporting (MMR) package, the Package 1099 contains instructions for paper filing only and the mail label on the package contains a four (4) character NAME CONTROL. The MMR package contains instructions for filing on magnetic media only, and the mail label DOES NOT contain a name control. Names of less than four (4) characters should be left-justified, filling the unused positions with blanks. If you have not received a Package 1099 or you do not know your Payer Name Control, this field should be blank filled.
21	Blank	1	Enter blank.
22	Combined Federal/ State Filer	1	FORMS 1098, 1099-A, 1099-B, 1099-S AND W2-G CANNOT BE FILED ON THIS PROGRAM. Enter the appropriate code from the following table: *Code* — *Meaning* 1 — Participating in the Combined Federal/State Filing Program blank — Not participating Prior approval is required. A Consent Form 6847 *must* be submitted to IRS before tax information will be released to the states. (Refer to Part A, Sec. 16, Table 2, for money criteria.) Not all states participate in this program. If the Payer/Transmitter is not participating in the Combined Federal/State Filing Program, enter blank. (Refer to Part A, Sec. 16 for the requirements that *must* be met *prior* to actual participation in this program.) Filers participating in this program must incorporate state totals into corresponding "K" Records as described in Part A, Sec. 16.

RECORD NAME: PAYER/TRANSMITTER "A" RECORD—Continued

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
23	Type of Return	1	REQUIRED. Enter appropriate code from table below: *Type of Return* — *Code* 1098 — 3 1099-A — 4 1099-B — B 1099-DIV — 1 1099-G — F 1099-INT — 6 1099-MISC — A 1099-OID — D 1099-PATR — 7 1099-R — 9 1099-S — S 5498 — L W-2G — W
24-32	Amount Indicators	9	REQUIRED. In most cases, the box numbers on paper information returns and the amount codes on magnetic media correspond. However, if discrepancies do occur, the instructions in this revenue procedure govern. For a detailed explanation of the information to be reported in each Amount Code, refer to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G", included in your magnetic media reporting package. The amount indicators entered for a given type of return indicate type(s) of payment(s) which were made. For each Amount Code entered in this field, a corresponding Payment Amount will appear in the Payee "B" Record. EXAMPLE: If Sector 1, position 23 of the Payer/Transmitter "A" Record is "7" (for 1099-PATR) and positions 24-32 are "247bbbbbb", (b = blanks), this indicates that you will be reporting 3 actual Payment Amounts in all of the following Payee "B" Records. The first Payment Amount field in the Payee "B" Record will be all "0" (zeros); the second will represent Nonpatronage distributions; the third will be all "0" (zeros); the fourth will represent Federal income tax withheld; the fifth and sixth will be all "0" (zeros); the seventh will represent Energy investment credit; and, the eighth and ninth will be all "0" (zeros). Enter the Amount Indicators in ASCENDING SEQUENCE (*i.e.,* 247bbbbbb, b = blanks) left-justify, filling unused positions with blanks. For further clarification of the Amount Indicator codes, contact IRS/MCC. (See Part A, Sec. 3)
	Amount Indicators Form 1098—Mortgage Interest Statement		For Reporting Interest Received from Payer(s)/Borrower(s) (Payer of Record) on Form 1098: Amount Code — Amount Type 1 — Mortgage interest received from payer(s)/borrower(s)
	Amount Indicators Form 1099-A—Acquisition or Abandonment of Secured Property		For Reporting the Acquisition or Abandonment of Secured Property on Form 1099-A: Amount Code — Amount Type 2 — Balance of principal outstanding 3 — Gross foreclosure proceeds 4 — Appraisal value

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
	Amount Indicators Form 1099-B—Proceeds from Broker and Barter Exchange Transactions		For Reporting Payments on Form 1099-B: Amount Code — Amount Type 2 — Stocks, bonds, etc. (For Forward Contracts see Note below.) 3 — Bartering (Do not report negative amounts.) 4 — Federal income tax withheld (Backup Withholding) 6 — Profit (or loss) realized in 1990 7 — Unrealized profit (or loss) on open contracts—12/31/89 8 — Unrealized profit (or loss) on open contracts—12/31/90 9 — Aggregate profit (or loss)

NOTE: The Payment Amount field associated with Amount Code 2 may be used to represent a loss when the reporting is for Forward Contracts. Refer to Payee "B" Record—General Field Descriptions, Payment Amount Fields, for instructions on reporting negative amounts. Do not report negative amounts for Amount Codes 3 and 4.

	Amount Indicators Form 1099-DIV—Dividends and Distributions		For Reporting Payments on Form 1099-DIV: Amount Code — Amount Type 1 — Gross dividends and other distributions on stock (See NOTE) 2 — Ordinary dividends (See NOTE) 3 — Capital gain distributions (See NOTE) 4 — Nontaxable distributions (if determinable) (See NOTE) 5 — Investment expenses (See NOTE) 6 — Federal income tax withheld (Backup Withholding) 7 — Foreign tax paid 8 — Cash liquidation distributions 9 — Noncash liquidation distributions (show fair market value)

NOTE: Amount Code 1 MUST equal the sum of amounts reported in Amount Codes 2, 3, 4 and 5.

	Amount Indicators Form 1099-G—Certain Government Payments		For Reporting Payments on Form 1099-G: Amount Code — Amount Type 1 — Unemployment compensation 2 — State or local income tax refunds 4 — Federal income tax withheld (Backup Withholding) 5 — Discharge of indebtedness 6 — Taxable grants 7 — Agriculture payments
	Amount Indicators Form 1099-INT—Interest Income		For Reporting Payments on Form 1099-INT: Amount Code — Amount Type 1 — Earnings from savings and loan associations, credit unions, bank deposits, bearer certificates of deposit, etc.

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks	
			2	Early withdrawal penalty
			3	U.S. Savings Bonds, etc.
			4	Federal Income Tax withheld (Backup Withholding)
			5	Foreign tax paid
	Amount Indicators Form 1099-MISC—Miscellaneous Income		For Reporting Payments on Form 1099-MISC:	
			Amount Code	Amount Type
			1	Rents
			2	Royalties
			3	Prizes, awards, etc.
			4	Federal income tax withheld (Backup Withholding)
			5	Fishing boat proceeds
			6	Medical and health care payments
			7	Nonemployee compensation or Crop Insurance Proceeds (See Note 1)
			8	Substitute payments in lieu of dividends or interest
			9	Direct sales "indicator" (See Note 2)

NOTE 1: Amount Code "7" is normally used to report Nonemployee Compensation. However, Amount Code "7" may also be used to report Crop Insurance proceeds. If both Nonemployee Compensation and Crop Insurance Proceeds are being paid to the same payee, two separate Payee "B" Records are required. See Part B, Sec. 6, Document Specific Code, for instructions on how to indicate Crop Insurance Proceeds.

NOTE 2: Use Amount Code "9" to report the occurrence of sales of $5,000 or more of consumer products to a person on a buy-sell, deposit-commission, or any other commission basis for resale. Refer to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G," for specific instructions. Amount Code "9" actually reflects an indicator of direct sales of $5,000 or more and is not an actual payment amount. The corresponding payment amount field in the payee "B" Record MUST be 0000000100 to reflect direct sales of $5,000 or more. This does not mean that a payment of $1.00 was made or is being reported.

	Amount Indicators Form 1099-OID—Original Issue Discount		For Reporting Payments on Form 1099-OID:	
			Amount Code	Amount Type
			1	Original issue discount for 1990
			2	Other periodic interest
			3	Early withdrawal penalty
			4	Federal income tax withheld (Backup Withholding)
	Amount Indicators Form 1099-PATR—Taxable Distributions Received From Cooperatives		For Reporting Payments on Form 1099-PATR:	
			Amount Code	Amount Type
			1	Patronage dividends
			2	Nonpatronage distributions
			3	Per-unit retain allocations
			4	Federal income tax withheld (Backup Withholding)
			5	Redemption of nonqualified notices and retain allocations
			6	Investment credit (See Note)
			7	Energy investment credit (See Note)
			8	Jobs credit (See NOTE)
			9	Low-income housing credit (See Note)

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks

NOTE: The amounts shown for Amount Indicators 6, 7, 8 and 9 must be reported to the payee; however, they need not be reported to IRS.

Amount Indicators Form 1099-R— Total Distributions from Profit-Sharing, Retirement Plans, Individual Retirement Arrangements, Insurance Contracts, Etc.	For Reporting Payments on Form 1099-R: Amount Code	Amount Type
	1	Gross distribution
	2	Taxable amount (See NOTE 1)
	3	Amount in Amount Code 2 eligible for capital gain election
	4	Federal income tax withheld (See NOTE 2)
	5	Employee contributions or insurance premiums
	6	Net unrealized appreciation in employer's securities
	8	Other
	9	State income tax withheld (See NOTE 3)

NOTE 1: If a distribution is a loss, do not enter a negative amount. For example, if stock is distributed but the value is less than the employee's after tax contribution, enter the value of the stock in Amount Code 1, enter (0) zero in Amount Code 2, and enter the employee's contribution in Amount Code 5.

NOTE 2: See the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" for further information concerning the definition of Federal Income Tax Withheld for Form 1099-R.

NOTE 3: State income tax withheld has been added for the convenience of the payer but need not be reported to IRS.

Amount Indicators Form 1099-S— Proceeds from Real Estate Transactions	For Reporting Payments on Form 1099-S: Amount Code	Amount Type
	2	Gross Proceeds

Amount Indicators Form 5498— Individual Retirement Arrangement Information (See Note)	For Reporting Payments on Form 5498: Amount Code	Amount Type
	1	Regular IRA contributions made in 1990 and 1991 for 1990
	2	Rollover IRA contributions
	3	Life insurance cost included in Amount Code 1
	4	Fair market value of the account

NOTE: Form 5498 is filed for each person for whom you maintained an individual retirement arrangement (IRA) (including an Individual Retirement Arrangement maintained as part of a simplified employee pension (SEP)) during 1990. Amount Code 4 represents the value of the account. Trustees and issuers of IRAs and SEPs must report the value of accounts in existence during the year, even if no contributions were made during the year. However, if a total distribution was made from an IRA during the year and no contributions were made for that year, you need not file Form 5498 to reflect that the fair market value on December 31 was zero. Do not report employer SEP contributions on Form 5498; however, you must report the value of a SEP account. For an IRA, use all applicable Amount Codes. If no IRA contributions were made for 1990, you will only use Amount Code 4. Only IRA contributions to be applied to 1990 that are made between January 1, 1990, and April 15, 1991, are to be reported in Amount Code 1. For further information concerning IRA reporting, see Rev. Proc. 89-52, printed in IR Bulletin 1989-37 on September 11, 1989.

Amount Indicators Form W-2G— Certain Gambling Winnings	For Reporting Payments on Form W-2G: Amount Code	Amount Type
	1	Gross winnings
	2	Federal income tax withheld

RECORD NAME: PAYER/TRANSMITTER "A" RECORD—Continued

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			3 State income tax withheld (see Note) 7 Winnings from identical wagers
NOTE: State income tax withheld has been added for the convenience of the payer but need not be reported to IRS.			
33-44	Blank	12	Enter blanks.
45-49	Transmitter Control Code (TCC)	5	REQUIRED. Enter the five character alpha/numeric Transmitter Control Code assigned by IRS. You must have a TCC to file data on this program. DO NOT ENTER MORE THAN ONE TCC PER FILE.
50	Foreign Corporation Indicator	1	Enter a "1" if the payer is a foreign corporation and income is paid by the corporation to a U.S. resident from sources outside of the United States. (See Part A, Sec. 17 for the definition of a Foreign Corporation.) If the payer is not a Foreign Corporation, enter a blank. (See NOTE.)
NOTE: Some filers are submitting their files with a "1" coded in Position 50 in all of the records contained on the file, whether the payer is a foreign corporation or not. Records that are coded as foreign corporations are processed differently than those that are coded with a blank in Position 50. If your program automatically codes a "1" in Position 50, all of the records on your file will be processed as foreign corporations. If you erroneously report corporations as foreign, you may be subject to a penalty for providing incorrect information to IRS. Therefore, be sure to code only those records as foreign corporations that should be coded as such.			
51-90	First Payer Name	40	REQUIRED. Must be present or files will be returned for correction. Enter the name of the payer whose Federal EIN appears in Sector 1, position 8-16, in the manner in which it is used on other tax returns. Any extraneous information must be deleted from the name line. Left-justify and fill with blanks. (Do not enter the Transfer Agent's name in this field. The Transfer Agent's name should appear in the Second Payer Name field.)
NOTE: WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME AND EIN OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (THE PAYER OF RECORD) AND THE AMOUNT PAID. *For Form 1099-S, the "A" Record will reflect the person responsible for reporting the transaction; the "B" Record will reflect the Seller.*			
91-128	Blank	38	Enter blanks.
SECTOR 2			
1	Record Sequence	1	REQUIRED. Must be a "2". Used to sequence the sectors making up a PAYER Record.
2	Record Type	1	REQUIRED. Enter "A".
3-42	Second Payer Name	40	The contents of this field are dependent upon the TRANSFER AGENT INDICATOR in Sector 2, position 43 of this record. If the Transfer Agent Indicator contains a "1", this field must contain the name of the Transfer Agent. If the Transfer Agent Indicator contains a "0" (zero), this field must contain either a continuation of the First Payer Name field or blanks. Left-justify and fill unused positions with blanks. IF NO ENTRIES ARE PRESENT FOR THIS FIELD, FILL WITH BLANKS. (See Part A, Sec. 17 for a definition of Transfer Agent.)

RECORD NAME: PAYER/TRANSMITTER "A" RECORD—Continued

SECTOR 2 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
43	Transfer Agent Indicator	1	REQUIRED. Identifies the entity in the Second Payer Name field. (See Part A, Sec. 17 for a definition of Transfer Agent.) *Code* — *Meaning* 1 — The entity in the Second Payer Name field is the Transfer Agent, (as defined in Part A, Sec. 17.) 0 (zero) — The entity shown is *not* the Transfer Agent (*i.e.*, the Second Payer Name field contains either a continuation of the First Payer Name field or blanks).
44–83	Payer Shipping Address	40	REQUIRED. If the TRANSFER AGENT INDICATOR in Sector 2, position 43 is a "1," enter the shipping address of the Transfer Agent. Otherwise, enter the shipping address of the payer. Left-justify and fill with blanks.
84–123	Payer City, State and ZIP Code	40	REQUIRED. If the TRANSFER AGENT INDICATOR in Sector 2, position 43 of this Record is a "1", enter the City, State and ZIP Code of the Transfer Agent. Otherwise, enter the City, State and ZIP Code of the payer. Left-justify and fill with blanks.
124–128	Blank	5	Enter blanks.
SECTOR 3	Sectors 3 and 4 are only required if the payer and transmitter are not the same.		
1	Record Sequence	1	REQUIRED. Must be a "3". Used to sequence the sectors making up a PAYER Record.
2	Record Type	1	REQUIRED. Enter "A".
3–82	Transmitter Name	80	REQUIRED. (Only if payer and transmitter are not the same.) Enter the name of the transmitter in the manner in which it is used in normal business. The name of the transmitter *must* be reported in the same manner throughout the entire file. Left-justify and fill with blanks. If the payer and transmitter are the same, enter blanks in this field.
83–122	Transmitter Mailing Address	40	REQUIRED. (Only if payer and transmitter are not the same.) Enter the mailing address of transmitter. Left-justify and fill with blanks. If the payer and transmitter are the same, enter blanks in this field.
123–128	Blank	6	Enter blanks.
SECTOR 4	Sectors 3 and 4 are only required if the payer and transmitter are not the same.		
1	Record Sequence	1	REQUIRED. Must be a "4". Used to sequence the sectors making up a PAYER Record.
2	Record Type	1	REQUIRED. Enter "A".
3–42	Transmitter City, State and ZIP Code	40	REQUIRED. (Only if the payer and transmitter are not the same). Enter the City, State and ZIP Code of the transmitter. Left-justify and fill with blanks. If the payer and transmitter are the same, enter blanks in this field.
43–128	Blank	86	Enter blanks.

SEC. 4. PAYER/TRANSMITTER "A" RECORD—RECORD LAYOUT

Sector 1

RECORD SEQUENCE	RECORD TYPE	PAYMENT YEAR	DISKETTE SEQUENCE NUMBER	PAYER'S FEDERAL EIN	PAYER NAME CONTROL*
1	2	3-4	5-7	8-16	17-20

21	22	23	24-32	33-44

TRANSMITTER CONTROL CODE	FOREIGN CORPORATION INDICATOR	FIRST PAYER NAME*	BLANK
45-49	50	51-90	91-128

Sector 2

RECORD SEQUENCE	RECORD TYPE	SECOND PAYER NAME*	TRANSFER AGENT INDICATOR	PAYER SHIPPING ADDRESS	PAYER CITY STATE AND ZIP	BLANK
1	2	3-42	43	44-83	84-123	124-128

Sector 3

RECORD SEQUENCE	RECORD TYPE	TRANSMITTER NAME	TRANSMITTER MAILING ADDRESS	BLANK
1	2	3-82	83-122	123-128

Sector 4

RECORD SEQUENCE	RECORD TYPE	TRANSMITTER CITY, STATE AND ZIP CODE	BLANK
1	2	3-42	43-128

* WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME AND EIN OF THE RECIPIENT OF THE INTEREST (THE FILER). FOR FORM 1099-S THE "A" RECORD WILL REFLECT THE PERSON RESPONSIBLE FOR REPORTING THE TRANSACTION.

SEC. 5. PAYEE "B" RECORD—GENERAL INFORMATION FOR ALL FORMS

.01 This section contains the general information concerning the Payee "B" Record for all information returns filed on single sided/single density soft-sectored diskettes. For a detailed description of the record refer to the following in Part B:

(a) Sec. 6. PAYEE "B" RECORD—FIELD DESCRIPTIONS FOR SECTORS 1 THROUGH 4 OF FORMS 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, 5498 AND SECTORS 1 THROUGH 3 OF FORMS 1099-A, 1099-B, 1099-OID, 1099-S AND W-2G.

(b) Sec. 7. PAYEE "B" RECORD LAYOUTS FOR SECTORS 1 THROUGH 4 OF FORMS 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, 5498 AND SECTORS 1 THROUGH 3 OF FORMS 1099-A, 1099-B, 1099-OID, 1099-S AND W-2G.

(c) Sec. 8. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAY-

OUT FOR SECTOR 4 OF FORM 1099-A.

(d) Sec. 9. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 4 OF FORM 1099-B.

(e) Sec. 10. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 4 OF FORM 1099-OID.

(f) Sec. 11. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 4 OF FORM 1099-S.

(g) Sec. 12. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 4 OF FORM W-2G.

For tax year 1990 data, all "B" Records will consist of at least 3 sectors of 128 positions each. If you are not a Combined Federal/State filer or if you are not utilizing the Special Data Entries field, Sector 4 can be eliminated for Forms 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, and 5498.

The "B" Record will always consist of 4 Sectors for Forms 1099-A, 1099-B, 1099-OID, 1099-S, and W-2G.

In the "A" Record, the Amount Indicator Codes that appear in diskette positions 24 through 32 of Sector 1 will be left-justified and blank filled. In the "B" Record, allow for all nine payment amount fields. For those fields not used, enter zeros. For example, if you are reporting on Form 1099-PATR, enter a "7" in diskette position 23 of Sector 1 of the "A" Record, Type of Return Indicator field. If you are reporting payments for Amount Codes 2, 4, and 7, then diskette positions 24 through 32 of Sector 1 of the "A" Record will be "247bbbbbb" (b = blanks). In the Payee "B" Record:

Positions 52 through 61 of Sector 1 for Payment Amount 1 will be zeros.

Positions 62-71 of Sector 1 will reflect the actual payment amount to be reported for "Nonpatronage distributions."

Positions 72-81 of Sector 1 for Payment Amount 3 will be zeros.

Positions 82-91 of Sector 1 will reflect the actual payment amount to be reported for "Federal income tax withheld."

Positions 92-111 of Sector 1 for Payment Amounts 5 and 6 will be zeros.

Positions 112-121 of Sector 1 will reflect the actual payment amount to be reported for "Energy investment credit."

Positions 3-22 of Sector 2 for Payment Amounts 8 and 9 will be zeros.

.02 The record layout for Sectors 1, 2 and 3 will be the same for all "B" records. Sector 4, however, will be different for Forms 1099-A, 1099-B, 1099-OID, 1099-S and W-2G. Refer to Part B, Sec. 8, 9, 10, 11 or 12, respectively for the layout of Sector 4 of these records.

.03 IRS must be able to identify the surname or last name associated with the TIN (SSN or EIN) furnished on a return. The specifications below include a field in the payee records called "Name Control" in which the first four characters of the payee's surname or last name are to be entered by the payers. The surname or last name should appear first in the First Payee field of all Payee "B" Records; however, if your records have been developed using the first name first, a blank must appear between the first and last names.

.04 If payers are unable to determine the first four characters of the surname, the Name Control Field may be left blank; however, compliance with the following will facilitate IRS computer programs in generating the Name Control.

(a) The surname of the payee whose TIN (SSN or EIN) is shown in the Payee "B" Record should always appear first. If, however, you enter the first name first, you must leave a blank space between the first and last names.

(b) In the case of multiple payees, only the surname of the payee whose TIN (SSN or EIN) is shown in the Payee "B" Record must be present in the First Payee Name field. Surnames of any other payees in the record may be entered in the Second Payee Name field.

.05 A field is also provided in these specifications for Special Data Entries. This field may be used to record information required by state or local governments or for the filer's own personal use. IRS does not use the data provided in the Special Data Entries field; therefore, the IRS program does not check the content or format of the data entered in this field. It is the filer's choice whether or not this field is used. If this field is coded, it will not affect the processing of the Payee "B" Records.

.06 For those filers participating in the Combined Federal/State Filing Program, positions 70 and 71 of Sector 4 in the Payee "B" Record *must* contain the appropriate state code for the state to receive the information. The file should also meet the money criteria described in Part A, Sec. 16, Table 2.

.07 Do not code for the states unless prior approval to participate has been granted by IRS. (See Part A, Sec. 16) Table 1 for a list of the valid participating state codes.) FORMS 1098, 1099-A, 1099-B, 1099-S AND W-2G CANNOT BE FILED UNDER THE COMBINED FEDERAL/STATE FILING PROGRAM. Your files must meet all of the requirements specified in Part A, Sec. 16, in order to participate in this program.

.08 All alpha characters entered in the "B" Record should be uppercase.

.09 Do not use decimal points (.) to indicate dollars and cents.

.10 IRS STRONGLY ENCOURAGES FILERS TO REVIEW THEIR DATA FOR ACCURACY BEFORE SUBMISSION TO PREVENT ISSUANCE OF ERRONEOUS NOTICES TO PERSONS FOR WHOM REPORTS ARE FILED. FILERS SHOULD BE ESPECIALLY CAREFUL THAT THEIR TAXPAYER NAMES, SOCIAL SECURITY NUMBERS (SSNs), ACCOUNT NUMBERS, TYPES OF INCOME, AND INCOME AMOUNTS ARE CORRECT.

.11 WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME AND EIN OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (THE BORROWER/PAYER OF RECORD) AND THE

AMOUNT PAID. FOR FORMS 1099-S THE "A" RECORD WILL REFLECT THE PERSON RESPONSIBLE FOR REPORTING THE TRANSACTION. THE "B" RECORD WILL REFLECT THE SELLER.

SEC. 6. PAYEE "B" RECORD—FIELD DESCRIPTIONS FOR SECTORS 1 THROUGH 4 OF FORMS 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, 5498 AND SECTORS 1 THROUGH 3 OF FORMS 1099-A, 1099-B, 1099-OID, 1099-S AND W-2G.

.01 For Forms 1099-A, 1099-B, 1099-OID, 1099-S, and W-2G, see Part B, Sec. 8, 9, 10, 11 and 12, respectively for the field descriptions and record layouts for Sector 4 of these records.

NOTE: For all fields marked REQUIRED, you must provide the information described under Description and Remarks. For those fields *not* marked REQUIRED, you must allow for the field but may be instructed to enter blanks or zeros in the indicated position(s) and for the indicated length.

RECORD NAME: PAYEE "B" RECORD

SECTOR 1

Diskette Position	Field Title	Length	Description and Remarks
1	Record	1	REQUIRED. Must be a "1". It is used to sequence the sectors making up a PAYEE Record.
2	Record Type	1	REQUIRED. Enter "B".
3-4	Payment Year	2	REQUIRED. Enter "90".
5-6	Document Specific Code	2	REQUIRED FOR FORMS 1099-R, 1099-MISC, 1099-G, AND W-2G. FOR ALL OTHER FORMS, OR IF NOT USED, ENTER BLANKS. For *Form 1099-R*, enter the appropriate code(s) for the Distribution Code. More than one code may apply for Form 1099-R; however, if only one code is required, it will be entered in position 5. Position 6 will be blank. NOTE: You MUST enter at least one (1) Distribution Code for Form 1099-R. BLANKS in *BOTH* positions 5 and 6 are NOT acceptable for Form 1099-R. For Form *1099-MISC*, position 5 is used to indicate Crop Insurance Proceeds. Position 6 will be blank. For *Form 1099-G*, enter the year of income tax refund in position 5. Position 6 will be blank. For Form *W-2G*, enter the Type of Wager in position 5. Position 6 will be blank.
	Distribution Code (For 1099-R)		Use only for reporting on *Form 1099-R* to identify the Distribution Code. Enter the applicable code from the table below. A "0" (zero) is not a valid code for Form 1099-R. A numeric code MUST be entered in all cases except when Code P or D is used. However, when using Code P for an IRA distribution under section 408(d)(4), you may also enter Code 1, if it applies. In addition, if more than one numeric code is applicable to a distribution, report two (2) separate Payee "B" Records. If you are reporting a total distribution from a plan that includes a distribution of a DEC, you must report two separate "B" Records: one to report the distribution of DECs and the other to report the distribution from the other part of the plan. *Category* (See Note) — *Code* Early (premature) distribution, no known exception* — 1* Early (premature) distribution, exception applies (as defined in section 72(q), (t), or (v)) other than disability or death* — 2* Disability* — 3* Death (includes payments to a beneficiary)* — 4* Prohibited transaction* — 5* Section 1035 Exchange — 6

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks	
			Normal distribution*	7*
			Excess contributions plus earnings/excess deferrals (and/or earnings taxable in 1990)	8
			PS 58 Costs	9
			Excess contributions plus earnings/excess deferrals taxable in 1989	P
			Qualifies for 5-year/10-year averaging	A
			Qualifies for death benefit exclusion	B
			Qualifies for both A and B	C
			Excess Contributions plus earnings/excess deferrals taxable in 1988	D

NOTE: For detailed explanations of the distribution codes, see the 1990 "Instructions for Form 1099, 1098, 5498, and W-2G" included in your magnetic media reporting packages.

*If you are reporting a distribution of an IRA or SEP for Codes 1, 2, 3, 4, 5, or 7, you must code a "1" in position 45 Sector 1 of the Payee "B" Record.

Crop Insurance Proceeds (Form 1099-MISC only)

If the payment amount reported for Amount Code 7 is crop insurance proceeds, enter a "1" in position 5. Position 6 will be blank.

Tax Year of Refund (Form 1099-G only)

Use only for reporting the tax year for which the refund was issued. Enter the NUMERIC Year for which the refund was issued (*i.e.*, for 1989 enter 9). However, if the payment amount for Amount Code 2, State or Local Income Tax Refunds, contains a refund, credit, or offset that is attributable to an income tax which applies exclusively to income from a trade or business and is not of general application, then enter the ALPHA equivalent of the year for which the refund was issued from the table below (i.e., for 1989 enter I). This code should appear in position 5. Position 6 will be blank.

Year for Which Trade or Business Refund was Issued	*Alpha Equivalent**
1	A
2	B
3	C
4	D
5	E
6	F
7	G
8	H
9	I
0	J

*To be used for trade or business refunds only.

Type of Wager (Form W-2G only)

Use only for reporting the Type of Wager on *Form W-2G*. This code will appear in position 5. Position 6 will be blank.

Category	*Code*
Horse Race Track (or Off Track Betting of a Horse Track nature)	1
Dog Race Track (or Off Track Betting of a Dog Track nature)	2
Jai-alai	3
State Conducted Lottery	4
Keno	5

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			Casino Type Bingo. DO NOT use this code for any other type of bingo winnings (*e.g.*, church or fire dept.) 6 Slot Machines 7 Any other type of gambling winnings. (This includes church bingo, fire dept. bingo, unlabeled winnings, etc.) 8
7	Blank	1	Enter blank.
8	Corrected Return Indicator	1	Diskette position 8 is used to indicate a corrected return. Refer to Part A, Sec. 13 for specific instructions on how to file corrected returns.
9-12	Name Control	4	Enter the first four (4) characters of the surname (last name) of the payee. The surname of the person whose TIN is being reported in positions 16-24, Sector 1 of the "B" Record should be used to determine the Name Control. This is especially important in the case of trustee accounts. IF THE NAME THAT CORRESPONDS TO THE TIN IS NOT INCLUDED IN THE FIRST OR SECOND PAYEE NAME LINE, EVERY EFFORT SHOULD BE MADE TO DEVELOP THE CORRECT NAME CONTROL FOR THE NAME THAT CORRESPONDS TO THE TIN. Surnames of less than four (4) characters should be left-justified, filling the unused positions with blanks. Special characters and imbedded blanks should be removed. In the case of a business, use the first four significant characters of the business name. Disregard the word "the" when it is the first word of the name, UNLESS there are only two words in the name. IF THE NAME CONTROL IS NOT DETERMINABLE BY THE PAYER, LEAVE THIS FIELD BLANK. (See Part A, Sec. 14 for information on Name Controls.) A dash (—) and ampersand (&) are the only acceptable special characters.

The following examples may be helpful to you in developing the name control:

	Name	*Name Control*
Individuals:		
	Jane Brown	BROW
	John A. Lee	LEE*
	James P. En, Sr.	EN*
	John O'Neill	ONEI
	Mary Van Buren	VANB
	Juan De Jesus	DEJE
	Gloria A. El-Roy	EL-R
	Mr. John Smith	SMIT
	Joe McCarthy	MCCA
	Pedro Torres-Lopes	TORR
	Maria Lopez Moreno	LOPE
	Binh To La	LA*
	Nhat Thi Pham	PHAM
	Mark D'Allesandro	DALL
Corporations:		
	The First National Bank	FIRS
	The Hideaway	THEH
	A & B Cafe	A&BC

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			Name — *Name Control*
	Sole Proprietor:		
			Jane and Mark Hemlock c/o The Sunshine Club — HEML
	Partnership:		
			Robert Aspen and Bess Willow — ASPE
			Harold Fir, Bruce Elm, and Joyce Spruce et al Ptr — FIR*
	Estate:		
			Frank White Estate — WHIT
			Sheila Blue Estate — BLUE
	Trusts and Fiduciaries:		
			Daisy Corporation Employee Benefit Trust — DAIS
			Trust FBO The Cherryblossom Society — CHER
	Exempt Organization:		
			Laborer's Union, AFL-CIO — LABO
			St. Bernard's Methodist Church Bldg. Fund — STBE
	*Name Controls of less than four (4) significant characters must be left-justified and blank filled.		
13-14	Blank	2	Enter blanks.
15	Type of TIN	1	REQUIRED. This field is used to identify the Taxpayer Identification Number (TIN) in positions 16-24 as either an Employer Identification Number, a Social Security Number, or that the type is undeterminable. Enter the appropriate code from the following table: *Type of TIN* — *TIN* — *Type of Account* 1 — EIN — A business, organization, or other entity that is not an individual 2 — SSN — An individual blank — N/A — If the type of TIN is undeter minable, enter a blank.
16-24	Taxpayer Identification Number	9	REQUIRED. Enter the valid 9-digit Taxpayer Identification Number of the payee (SSN or EIN, as appropriate). If an identification number has been applied for but not received, enter blanks. DO NOT ENTER HYPHENS, ALPHA CHARACTERS, ALL 9's OR ALL ZEROS.
25-44	Payer's Account Number for Payee	20	DO NOT ENTER A TAXPAYER IDENTIFICATION NUMBER IN THIS FIELD. We strongly encourage the payer to use this field to enter the payee's account number which can be any number assigned by the payer to the payee (*e.g.*, checking or savings account number). THIS WILL DISTINGUISH THE INDIVIDUAL PAYEE'S ACCOUNT WITH YOU, AND SHOULD BE UNIQUE FOR EACH DOCUMENT SO AS TO IDENTIFY SPECIFIC TRANSACTIONS IF MULTIPLE RETURNS ARE FILED FOR ONE PAYEE. This information is particularly helpful if corrections are filed. This number is also provided with your Invalid/No-TIN notification from the IRS and may help you determine the branch or subsidiary reporting the transaction. YOU ARE STRONGLY ENCOURAGED TO

RECORD NAME: PAYEE "B" RECORD—Continued

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			USE THIS FIELD. Do not define data in this field in packed decimal format. If fewer than twenty characters are required, you may either left-or right-justify, filling the remaining positions with blanks.
45	IRA/SEP Indicator	1	*THIS FIELD IS ONLY USED WHEN REPORTING FORMS 1099-R.* This field will be coded ONLY if you entered a code "1", "2", "3", "4", "5", or "7" in either Position 5 or 6, Document Specific Code, of Sector 1 of the Payee "B" Record, *AND* you are reporting a distribution of an IRA or SEP. Enter the appropriate indicator from the table below. *Indicator* — *Usage* 1 — You are reporting an IRA or SEP Distribution. Blank — You are NOT reporting an IRA or SEP Distribution.
46-47	Percentage of Total Distribution	2	THIS FIELD IS ONLY USED WHEN REPORTING FORMS 1099-R, and ONLY if you are reporting a total distribution to more than one person. This field is only two (2) positions in length because when a total distribution is made to more than one person, the figure MUST be 99% or less. If the percentage is 100, leave this field blank. If the percentage is a fraction, round off to the nearest whole number (for example, 10.4% will be 10%; 10.5% or more will be 11%). Enter the percentage received by the person whose TIN in included in positions 16-24 of Sector 1 of the "B" Record. This field must be right-justified, and unused positions must be zero filled. If not applicable, enter blanks. You need not enter a percentage for IRA or SEP distributors.
48-51	Blank	4	Enter blanks.
	Payment Amount Fields (Must be numeric)		REQUIRED. You must allow for all payment amounts. For those not used you will enter zeros. For example: If position 23 of Sector 1 of the Payer/Transmitter "A" Record is "7" (for 1099-PATR) and Sector 1, positions 24-32 are "247bbbbbb", this indicates that you will be reporting 3 actual payment amounts in the following Payee "B" Records. *Payment Amount 1 of Sector 1* will be all "0" (zeros); *Payment Amount 2 of Sector 1* will represent Nonpatronage distributions; *Payment Amount 3 of Sector 1* will be all "0" (zeros); *Payment Amount 4 of Sector 1* will represent Federal income tax withheld; *Payment Amounts 5 and 6 of Sector 1* will be all "0" (zeros); *Payment Amount 7 of Sector 1* will be energy investment credit; and, *Payment Amounts 8 and 9 of Sector 2* will be all "0" (zeros). Each payment field must contain 10 numeric characters (see Note). Each payment amount must be entered in U.S. dollars and cents. The rightmost two positions represent cents in the Payment Amount Fields. Do not enter dollar signs, commas, decimal points, or NEGATIVE PAYMENTS, except those items that reflect a loss on Form 1099-B. Positive and negative amounts are indicated by placing a "+" or "−" (minus sign) in the leftmost position of the payment amount field. A negative over-punch in the units position may be used, instead

RECORD NAME: PAYEE "B" RECORD—Continued

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			of a minus sign, to indicate a negative amount. If a plus sign, minus sign, or negative overpunch is not used, the number is assumed to be positive. PAYMENT AMOUNTS MUST BE RIGHT-JUSTIFIED AND UNUSED POSITIONS MUST BE ZERO FILLED. FEDERAL INCOME TAX WITHHELD CANNOT BE REPORTED AS A NEGATIVE AMOUNT ON ANY FORM. NOTE: If any one payment amount exceeds "9999999999" (dollars and cents), it must be reported as follows: (1) The First Payee "B" Record MUST contain 9999999999; (2) The second Payee "B" Record will contain the remaining amounts. DO NOT SPLIT THIS FIGURE IN HALF.
52-61	Payment* Amount 1	10	The amount reported in this field represents payments for Amount Code 1 in the Payer/Transmitter "A" Record.
62-71	Payment* Amount 2	10	The amount reported in this field represents payments for Amount Code 2 in the Payer/Transmitter "A" Record.
72-81	Payment* Amount 3	10	The amount reported in this field represents payments for Amount Code 3 in the Payer/Transmitter "A" Record.
82-91	Payment* Amount 4	10	The amount reported in this field represents payments for Amount Code 4 in the Payer/Transmitter "A" Record.
92-101	Payment* Amount 5	10	The amount reported in this field represents payments for Amount Code 5 in the Payer/Transmitter "A" Record.
102-111	Payment* Amount 6	10	The amount reported in this field represents payments for Amount Code 6 in the Payer/Transmitter "A" Record.
112-121	Payment* Amount 7	10	The amount reported in this field represents payments for Amount Code 7 in the Payer/Transmitter "A" Record.

*If there are discrepancies between these Payment Amount Codes and the boxes on the paper forms, the instructions in this revenue procedure govern.

122-128	Blank	7	Enter blanks.
SECTOR 2			
1	Record Sequence	1	REQUIRED. Must be a "2". It is used to sequence the sectors making up a PAYEE Record.
2	Record Type	1	REQUIRED. Enter "B".
3-12	Payment Amount 8	10	The amount reported in this field represents payments for Amount Code 8 in the Payer/Transmitter "A" Record.
13-22	Payment Amount 9	10	The amount reported in this field represents payments for Amount Code 9 in the Payer/Transmitter "A" Record.
23-42	Blank	20	Enter blanks.
43	Foreign Country Indicator	1	REQUIRED. If the payee address is in a foreign country, enter a "1" in this field. This will allow you to use any format for the Payee Address, City, State and ZIP Code. Address information must not appear in the First or Second Payee Name Lines. If the address for the payee is a U.S. address, you must enter a blank in this field. The free address format may only be used

RECORD NAME: PAYEE "B" RECORD—Continued

SECTOR 2 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			for foreign addresses. For U.S. addresses, you must use the U.S. Postal Service state abbreviations in diskette positions 72 and 73 of Sector 3 of the "B" Record. These abbreviations are provided in Part A, Sec. 18.
44–83	First Payee Name Line	40	REQUIRED. Do not enter address information in this field. Enter the name of the payee (preferably surname (last name) first) whose Taxpayer Identification Number appears in Sector 1, positions 16–24 of the "B" Record. If fewer than 40 characters are required, left-justify and fill unused positions with blanks. If more space is required for the name, utilize the Second Payee Name Line field. If there are multiple payees, only the name of the payee whose Taxpayer Identification Number has been provided may be entered in this field. The names of the other payees should be entered in the Second Payee Name Line field. NOTE: WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME OF THE RECIPIENT OF THE INTEREST (THE FILER). The "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (THE BORROWER/PAYER OF RECORD) AND THE AMOUNT PAID. FOR FORMS 1099-S, THE "B" RECORD WILL REFLECT THE SELLER INFORMATION.
84–123	Second Payee Name Line	40	If the payee name requires more space than is available in the First Payee Name Line, enter only the remaining portion of the name in this field. If there are multiple payees (e.g., partners or joint owners), we encourage you to use this field for those payees' names not associated with the Taxpayer Identification Number in Sector 1, positions 16–24 of the "B" Record. Do not enter address information in this field. IT IS IMPORTANT THAT YOU PROVIDE AS MUCH PAYEE INFORMATION TO IRS AS POSSIBLE TO IDENTIFY THE OWNER OF THE TAXPAYER IDENTIFICATION NUMBER (TIN). Left-justify and fill unused positions with blanks. FILL WITH BLANKS IF NO ENTRIES ARE PRESENT FOR THIS FIELD.
124–128	Blank	5	Enter blanks.
SECTOR 3			
1	Record Sequence	1	REQUIRED. Must be a "3". Used to sequence the sectors making up a PAYEE Record.
2	Record Type	1	REQUIRED. Enter "B".
3–42	Payee Mailing Address	40	REQUIRED. Enter mailing address of payee. Left-justify and fill unused positions with blanks. The address MUST be present. This field MUST NOT contain any data other than the payee's mailing address. Any format can be used in reporting a foreign mailing address.

For U.S. addresses, the Payee City, Payee State and Payee ZIP Code must be reported as a 29, 2 and 9 position field, respectively. For foreign addresses, the Payee City, Payee State (Country) and Payee ZIP Code can be reported as a continuous 40 position field. When reporting a foreign address, the Foreign Country Indicator must contain a "1."

RECORD NAME: PAYEE "B" RECORD—Continued

SECTOR 3 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
43–71	Payee City	29	REQUIRED. Enter the city, left-justified and fill the unused positions with blanks. Do not enter state and ZIP Code information in this field.
72–73	Payee State	2	REQUIRED. Enter the abbreviation for the state as shown in Part A, Sec. 18. You MUST use valid U.S. Postal Service state abbreviations for U.S. addresses.
74–82	Payee ZIP Code	9	REQUIRED. Enter the valid 9 digit ZIP Code assigned by the U.S. Postal Service. If only the first 5 digits are known, left-justify and fill the unused positions with blanks. Use this field for the ZIP Code only. For foreign countries, alpha characters are acceptable as long as you have entered a "1" in the Foreign Country Indicator field which is located in Sector 2, position 43 of the "B" Record.
83–128	Blank	46	Enter blanks.
SECTOR 4	THE FOLLOWING FIELD DESCRIPTIONS DESCRIBE THE RECORD POSITIONS FOR SECTOR 4 OF THE PAYEE "B" RECORD FOR FORMS 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, AND 5498. IF YOU ARE NOT A COMBINED FEDERAL/STATE FILER, OR IF YOU ARE NOT UTILIZING THE SPECIAL DATA ENTRIES FIELD, SECTOR 4 CAN BE ELIMINATED FOR ALL "B" RECORDS EXCEPT FORMS 1099-A, 1099-B, 1099-OID, 1099-S, AND W-2G. SEE PART B, SEC. 8, 9, 10, 11 and 12 FOR THE FIELD DESCRIPTIONS FOR SECTOR 4 OF FORMS 1099-A, 1099-B, 1099-OID, 1099-S AND W-2G.		
1	Record Sequence	1	REQUIRED. Must be a "4". Used to sequence the sectors making up a PAYEE Record.
2	Record Type	1	REQUIRED. Enter "B".
3–69	Special Data Entries	67	This portion of the Payee "B" Record may be used to record information for state or local government reporting or for the filer's own purposes. Payers should contact their state or local revenue departments for filing requirements. If this field is not utilized, ENTER BLANKS.
70–71	Combined Federal/State Code	2	If a payee record is to be forwarded to a state agency as part of the Combined Federal/State Filing Program, enter the valid state code from Part A, Sec. 16, Table 1. For those states NOT participating in this program or for Form 1098, ENTER BLANKS.
72–128	Blank	57	Enter blanks.

SEC. 7. PAYEE "B" RECORD—RECORD LAYOUTS FOR SECTORS 1 THROUGH 4 OF FORMS 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, 5498 AND SECTORS 1 THROUGH 3 OF FORMS 1099-A, 1099-B, 1099-OID, 1099-S, AND W-2G

SEC. 8. PAYEE "B" RECORD— FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 4 OF FORM 1099-A

.01 This section contains information pertaining to Sector 4 of Form 1099-A. For detailed explanations of the 1099-A fields see the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" included in your reporting package.

.02 See Part B. Sec. 6 for field descriptions of Sectors 1, 2 and 3 of the Payee "B" Record for Form 1099-A.

.03 FORM 1099-A CANNOT BE FILED UNDER THE COMBINED FEDERAL/STATE FILING PROGRAM.

RECORD NAME: PAYEE "B" RECORD—Continued
FORM 1099-A—SECTOR 4 ONLY

SECTOR 4			
1	Record Sequence	1	REQUIRED. Must be a "4". Used to sequence the sectors making up a PAYEE Record.
2	Record Type	1	REQUIRED. Enter "B".
3–23	Special Data Entries	21	This portion of the payee "B" Record may be used to record information for state or local government reporting or for the filer's own purposes. Payers should contact their state or local revenue departments for filing requirements. If this field is not utilized, ENTER BLANKS.
24–29	Date of Lender's Acquisition or Knowledge of Abandonment	6	*REQUIRED FOR FORMS 1099-A ONLY.* Enter the date of the acquisition of the secured property or the date you first knew or had reason to know that the property was abandoned in the format MMDDYY (*e.g.*, 102490). DO NOT ENTER HYPHENS OR SLASHES.
30	Liability Indicator	1	*REQUIRED FOR FORM 1099-A ONLY.* Enter the appropriate indicator from the table below: *Indicator* — *Usage* 1 — Borrower is personally liable for repayment of the debt. Blank — Borrower is not liable for repayment of the debt.
31–69	Description	39	*REQUIRED FOR FORM 1099-A ONLY.* Enter a brief description of the property. For example, for real property, enter the address, or if the address does not sufficiently identify the property, enter the section, lot, and block. For personal property, enter the type, make, and model (*e.g.*, Car-1988 Buick Regal or Office Equipment). Enter "CCC" for crops forfeited on Commodity Credit Corporation Loans. If fewer than 39 positions are required, left-justify and fill unused positions with blanks.
70–128	Blank	59	Enter blanks.

SEC. 13. END OF PAYER "C" RECORD

.01 The "C" Record consists of 2 Sectors of 128 positions each. The Control Total fields are each 15 positions in length.

.02 The End of Payer "C" Record is a summary record for a type of return for a given payer.

.03 The "C" Record will contain the total number of payees and the totals of the payment amount fields filed by a given payer. The "C" Record MUST be written after the last Payee "B" Record for each type of return for a given payer. For each "A" Record and group of "B" Records on the file, there must be a corresponding "C" Record.

.04 In developing the "C" Record, for example, if you used Amount Codes 1, 3 and 6 in the "A" Record, the totals from the "B" Records will appear in Control Totals 1, 3 and 6 of the "C" Record. In this example, positions 27–41, 57–86, and 102–116 of Sector 1 and positions 3–32 of Sector 2 would be zero filled.

.05 Payers/Transmitters must verify the accuracy of the totals in the "C" Record and must enter the totals on the Forms 4804, 4802, or computer-generated substitute, which will accompany the shipment. The lines used on Forms 4804 and 4802 to record payment amounts correspond with the Amount Codes used in the "A" Record.

.06 Missing or incorrect End of Payer "C" Records will result in the diskette being returned for correction.

RECORD NAME: END OF PAYER "C" RECORD

SECTOR 1

Diskette Position	Field Title	Length	Description and Remarks
1	Record Sequence	1	REQUIRED. Must be a "1". Used to sequence the sectors making up a PAYER Record.
2	Record Type	1	REQUIRED. Enter "C".
3-8	Number of Payees	6	REQUIRED. Enter the total number of Payee "B" Records covered by the preceding Payer/Transmitter "A" Record. Right-justify and zero fill.
9-11	Blank	3	Enter blanks.

REQUIRED. If any corresponding Payment Amount fields are present in the Payee "B" Records, accumulate into the appropriate Control Total fields. CONTROL TOTALS MUST BE RIGHT-JUSTIFIED, AND UNUSED CONTROL TOTAL FIELDS MUST BE ZERO FILLED. Please note that all Control Total fields are 15 positions in length.

12-26	Control Total 1	15

SEC. 14. STATE TOTALS "K" RECORD

.01 The "K" Record consists of 2 Sectors of 128 positions each. The Control Total fields are each 15 positions in length.

.02 The State Totals "K" Record is a summary for a given payer and type of return to a given state in the Combined Federal/State Filing Program. Use ONLY when state reporting approval has been granted.

.03 The "K" Record will contain the total number of payees and the totals of the payment amount fields filed for a given state. The "K" Record(s) must be written after the "C" Record for the related "A" Record.

.04 In developing the "K" Record, for example, if you used Amount Codes 1, 3 and 6 in the "A" Record, the totals from the "B" Records coded for this state will appear in Control Totals 1, 3, and 6 of the "K" Record.

.05 There MUST be a separate "K" Record for each state being reported.

.06 Refer to Part A, Sec. 16 for the requirements and conditions that *MUST* be met to file on this program.

RECORD NAME: STATE TOTALS "K" RECORD

SECTOR 1

Diskette Position	Field Title	Length	Description and Remarks
1	Record Sequence	1	REQUIRED. Must be a "1". Used to sequence the sectors making up a PAYER Record.
2	Record Type	1	REQUIRED. Enter "K".
3–8	Number of Payees	6	REQUIRED. Enter the total number of Payee "B" Records being coded for this state. Right-justify and zero fill.
9–11	Blank	3	Enter blanks.
	REQUIRED. If any corresponding Payment Amount fields are present in the Payee "B" Records, accumulate into the appropriate Control Total fields. CONTROL TOTALS MUST BE RIGHT-JUSTIFIED, AND UNUSED CONTROL TOTAL FIELDS MUST BE ZERO FILLED. Please note that all Control Total fields are 15 positions in length.

1	2-5	6-30	31-128

PART C. DOUBLE DENSITY DISKETTE SPECIFICATIONS

SECTION 1. GENERAL

.01 The specifications contained in this part of the revenue procedure describe the required format and contents of the records to be included in a double density diskette file. These specifications must be adhered to unless deviations have been specifically granted by IRS.

.02 To be compatible, a double density diskette file must meet the following specifications in total:

(a) 8 inches in diameter.

(b) Recorded in EBCDIC.

(c) Contains 77 cylinders (A cylinder refers to both of the tracks available to the read/write heads at any of the 77 locations on the double sided, double density diskette).

(1) Cylinder 00 is the index cylinder (the operating system reserves cylinder 00 for the directory information and writes the file name and location in the directory; data cannot be written in cylinder 00).

(2) Cylinders 1-74 are the primary data cylinders.

(3) Cylinders 75 and 76 are reserved for alternate cylinder assignment.

(d) Each track contains 26 sectors; therefore, each cylinder contains 52 sectors.

(e) Each sector must contain 256 bytes.

(f) Data may be recorded on both sides of the diskette.

(g) IRS can process single sided, single density, soft sectored diskettes as well as double sided, double density, soft sectored diskettes.

Part B provides specifications for single density diskettes which have sectors of 128 bytes.

(h) An IBM 5360 compatible diskette would meet the above specifications. If using other processors, data should be recorded in the Basic Data Exchange (EBCDIC) format.

(i) Hard sectored diskettes are not compatible.

(j) A diskette should be clearly marked as to which type of data (single sided/single density or double sided/double density) is on each diskette, and preferably, the entire file should consist of either all single sided/single density or all double sided/double density diskettes. .03 Refer to Part B, Sec. 1.03 through Sec. 2 for further information concerning diskette requirements which apply to both single and double density diskettes.

SEC. 2. PAYER/TRANSMITTER "A" RECORD

.01 The Payer/Transmitter "A" Record identifies the payer and transmitter of the diskette and provides parameters for the succeeding Payee "B" Records. IRS computer programs rely on the absolute relationship between the parameters and data fields in the "A" Record and the data fields in the "B" Records to which they apply.

.02 The number of "A" Records appearing on a diskette will depend on the number of payers and the different types of returns being reported. The payment amounts for one payer for one type of return must be consolidated under one "A" Record if submitted on the same file.

.03 Do not submit separate "A" Records for each payment amount being reported. For example, if you are filing Form 1099-DIV to report Amount Codes 1, 2 and 3, all three amount codes must be reported under one "A" Record, not three separate "A" Records. For Payee "B" Records which do not contain payment amounts for all three amount codes, enter zeros for those which have no payment to be reported.

.04 After the header label on the diskette (See Part B, Sec. 2, for format of the header label), the first record appearing in the file MUST be an "A" Record. When a double density diskette is used, each "A" Record will consist of at least one 256 position sector; however, if you are transmitting for someone other than yourself, 2 sectors are required.

.05 A transmitter may include Payee "B" Records for more than one payer on a diskette; however, each GROUP of Payee "B" Records must be preceded by an "A" Record.

.06 A single diskette may also contain different types of returns, but the returns MUST NOT be intermingled. A separate "A" Record is required for each payer and each type of return being reported. An "A" Record may be blocked with "B" Records; however, the initial record on a file must be an "A" Record. IRS will accept an "A" Record after a "C" Record.

.07 All alpha characters entered in the "A" Record should be uppercase.

.08 WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (BORROWER/PAYER OF RECORD) AND THE AMOUNT PAID.

RECORD NAME: PAYER/TRANSMITTER "A" RECORD

NOTE: For all fields marked REQUIRED, you must provide the information described under Description and Remarks. For fields not marked REQUIRED, you must allow for the field but may be instructed to enter blanks or zeros in the indicated diskette position(s) and for the indicated length. When using double density diskettes, each "A"

RECORD NAME: PAYER/TRANSMITTER "A" RECORD—Continued

Record will consist of at least one 256 position sector; however, if you are transmitting for someone other than yourself, two sectors are required.

SECTOR 1

Diskette Position	Field Title	Length	Description and Remarks
1	Record Sequence	1	REQUIRED. Must be "1". It is used to sequence the sectors making up a PAYER Record.
2	Record Type	1	REQUIRED. Enter "A".
3-4	Payment Year	2	REQUIRED. Enter "90".
5-7	Diskette Sequence Number	3	Sequence number assigned by the Transmitter to each diskette starting with 001. You may choose to enter blanks or zeros in this field. IRS bypasses this information. You must indicate the proper sequence on the external label Form 5064.
8-16	Payer's Federal EIN	9	REQUIRED. Must be the valid 9-digit number assigned to the payer by IRS. DO NOT ENTER BLANKS, HYPHENS, ALPHA CHARACTERS, ALL 9's OR ALL ZEROS. (Also see Part A, Sec. 14.) For foreign corporations not required to have an EIN, this field may be left blank. Foreign corporations should have the Foreign Corporation Indicator set to "1." (See Part A, Sec. 17 for the definition of a Foreign Corporation.)
17-20	Payer Name Control	4	The Payer Name Control can be obtained from the mail label on the Package 1099 which is mailed to most payers on record each December. To distinguish between the Package 1099 and the Magnetic Media Reporting (MMR) package, Package 1099 contains instructions for paper filing only and the mail label on the package contains a four (4) character NAME CONTROL. The MMR package contains instructions for filing on magnetic media only, and the mail label DOES NOT contain a name control. Names of less than four (4) characters should be left-justified, filling the unused positions with blanks. If you have not received a Package 1099 or you do not know your Payer Name Control, this field should be blank filled.
21	Blank	1	Enter blank.
22	Combined Federal/State Filer	1	FORMS 1098, 1099-A, 1099-B, 1099-S, AND W-2G CANNOT BE FILED ON THIS PROGRAM. Enter the appropriate code from the table below: Code — Meaning 1 — Participating in the Combined Federal/State Filing Program blank — Not participating Prior approval is required. A Consent Form 6847 must be submitted to IRS before tax information will be released to the states. (Refer to Part A, Sec. 16, Table 2, for money criteria.) Not all states participate in this program. If the Payer/Transmitter is not participating in the Combined Federal/State Filing Program, enter blank. (Refer to Part A, Sec. 16 for the requirements that *must* be met *prior* to actual participation in this program.) Filers who participate in this program must incorporate state totals into corresponding "K" Records as described in Part C, Sec. 13.

RECORD NAME: PAYER/TRANSMITTER "A" RECORD—Continued

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
23	Type of Return	1	REQUIRED. Enter appropriate code from table below: Type of Return — Code 1098 — 3 1099-A — 4 1099-B — B 1099-DIV — 1 1099-G — F 1099-INT — 6 1099-MISC — A 1099-OID — D 1099-PATR — 7 1099-R — 9 1099-S — S 5498 — L W-2G — W
24-32	Amount Indicators	9	REQUIRED. In most cases, the box numbers on paper information returns correspond with the amount codes on magnetic media. However, if discrepancies do occur, the instructions in this revenue procedure govern. For a detailed explanation of the information to be reported in each Amount Code, refer to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G," included in your magnetic media reporting package. The amount indicators entered for a given type of return indicate type(s) of payment(s) which were made. For each Amount Code entered in this field, a corresponding payment amount must appear in the Payee "B" Record. Example: If position 23 of the Payer/Transmitter "A" Record is "7" (for 1099-PATR) and positions 24-32 are "247bbbbbb" (b = blanks), this indicates that you will be reporting 3 actual payment amounts in all of the following Payee "B" Records. The first payment amount field in the Payee "B" Record will be all "0" (zeros); the second will represent Nonpatronage distributions; the third will be all "0" (zeros); the fourth will represent Federal income tax withheld; the fifth and sixth will be all "0" (zeros); the seventh will represent Energy investment credit; and, the eighth and ninth will be all "0" (zeros). Enter the Amount Indicators in ASCENDING SEQUENCE (e.g., 247bbbbbb; b = blanks), left-justify, filling unused positions with blanks. For further clarification of the Amount Indicator codes, contact the IRS/MCC. (See Part A, Sec. 3).
	Amount Indicators Form 1098—Mortgage Interest Statement		For Reporting Interest Received from Payer(s)/Borrower(s) (Payer of Record) on Form 1098- Amount Code — Amount Type 1 — Mortgage interest received from payer(s)/borrower(s)
	Amount Indicators Form 1099-A—Acquisition or Abandonment of Secured Property		For Reporting the Acquisition or Abandonment of Secured Property on Form 1099-A: Amount Code — Amount Type 2 — Balance of principal outstanding

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks	
			3	Gross foreclosure proceeds
			4	Appraisal value
	Amount Indicators Form 1099-B—Proceeds from Broker and Barter Exchange Transactions		For Reporting Payments on Form 1099-B: Amount Code	Amount Type
			2	Stocks, bonds, etc. (For Forward Contracts see Note)
			3	Bartering (Do not report negative amounts.)
			4	Federal income tax withheld (Backup Withholding)
			6	Profit (or loss) realized in 1990
			7	Unrealized profit (or loss) on open contracts—12/31/89
			8	Unrealized profit (or loss) on open contracts—12/31/90
			9	Aggregate profit (or loss)

NOTE: The Payment Amount field associated with Amount Code 2 may be used to represent a loss when the reporting is for Forward Contracts. Refer to Payee "B" Record—General Field Descriptions, Payment Amount Fields, for instructions on reporting negative amounts. Do not report negative amounts for Amount Codes 3 and 4.

	Amount Indicators Form 1099-DIV—Dividends and Distributions		For Reporting Payments on Form 1099-DIV: Amount Code	Amount Type
			1	Gross dividends and other distributions on stock (see Note)
			2	Ordinary dividends (see Note)
			3	Capital gain distributions (see Note)
			4	Nontaxable distributions (if determinable) (see Note)
			5	Investment expenses (see Note)
			6	Federal income tax withheld (Backup Withholding)
			7	Foreign tax paid
			8	Cash liquidation distributions
			9	Noncash liquidation distributions (show fair market value)

NOTE: Amount Code 1 MUST equal the sum of Amounts reported in Amount Codes 2, 3, 4 and 5.

	Amount Indicators Form 1099-G—Certain Government Payments		For Reporting Payments on Form 1099-G: Amount Code	Amount Type
			1	Unemployment compensation
			2	State or local income tax refunds
			4	Federal income tax withheld (Backup Withholding)
			5	Discharge of indebtedness
			6	Taxable grants
			7	Agriculture payments

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
	Amount Indicators Form 1099-INT—Interest Income		For Reporting Payments on Form 1099-INT: Amount Code — Amount Type 1 — Earnings from savings and loan associations, credit unions, bank deposits, bearer certificates of deposit, etc. 2 — Early withdrawal penalty 3 — U.S. Savings Bonds, etc. 4 — Federal income tax withheld (Backup Withholding) 5 — Foreign tax paid
	Amount Indicators Form 1099-MISC—Miscellaneous Income		For Reporting Payments on Form 1099-MISC: Amount Code — Amount Type 1 — Rents 2 — Royalties 3 — Prizes, awards, etc. 4 — Federal income tax withheld (Backup Withholding) 5 — Fishing boat proceeds 6 — Medical and health care payments 7 — Nonemployee compensation or Crop Insurance Proceeds (see Note 1) 8 — Substitute payments in lieu of dividends or interest 9 — Direct sales "indicator" (see Note 2)

NOTE 1: Amount Code "7" is normally used to report Nonemployee Compensation. However, Amount Code "7" may also be used to report Crop Insurance Proceeds. If both Nonemployee compensation and Crop Insurance Proceeds are being paid to the same payee, two separate Payee "B" Records are required. See Part B, Sec. 6, Document Specific Code for instructions on how to indicate Crop Insurance Proceeds.

NOTE 2: Use Amount Code "9" to report the occurrence of sales of $5,000 or more of consumer products to a person on a buy-sell, deposit-commission, or any other commission basis for resale. Refer to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G," for specific instructions. Amount Code "9" actually reflects an indicator of direct sales of $5,000 or more and not the actual payment amount. The corresponding payment amount field in the payee "B" Record MUST be 0000000100 to reflect direct sales of $5,000 or more. This does not mean that a payment of $1.00 was made or is being reported.

	Amount Indicators Form 1099-OID—Original Issue Discount		For Reporting Payments on Form 1099-OID: Amount Code — Amount Type 1 — Original issue discount for 1990 2 — Other periodic interest 3 — Early withdrawal penalty 4 — Federal income tax withheld (Backup Withholding)
	Amount Indicators Form 1099-PATR—Taxable Distributions Received From Cooperatives		For Reporting Payments on Form 1099-PATR: Amount Code — Amount Type 1 — Patronage dividends

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks	
			2	Nonpatronage distributions
			3	Per-unit retain allocations
			4	Federal income tax withheld (Backup Withholding)
			5	Redemption of nonqualified notices and retain allocations
			6	Investment credit (see Note)
			7	Energy investment credit (see Note)
			8	Jobs credit (see Note)
			9	Low income housing credit (see Note)

NOTE: The amounts shown for Amount Indicators 6, 7, 8 and 9 must be reported to the payee; however, they need not be reported to IRS.

Amount Indicators	For Reporting Payments on Form 1099-R:	
Form 1099-R—Total Distributions from Profit-Sharing, Retirement Plans, Individual Retirement Arrangements, Insurance Contracts, Etc.	Amount Code	Amount Type
	1	Gross distribution
	2	Taxable amount (see Note 1)
	3	Amount in Amount Code 2 eligible for capital gain election
	4	Federal income tax withheld (see Note 2)
	5	Employee contributions or insurance premiums
	6	Net unrealized appreciation in employer's securities
	8	Other
	9	State income tax withheld (see Note 3)

NOTE 1: If a distribution is a loss, do not enter a negative amount. For example, if stock is distributed but the value is less than the employee's after tax contribution, enter the value of the stock in Amount Code 1, enter zero (0) in Amount Code 2, and enter the employee's contribution in Amount Code 5.

NOTE 2: See the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" for further information concerning the definition of federal income tax withheld for Form 1099-R.

NOTE 3: State income tax withheld has been added for the convenience of the payer but need not be reported to IRS.

Amount Indicators	For Reporting Payments on Form 1099-S:	
Form 1099-S—Proceeds From Real Estate Transactions	Amount Code	Amount Type
	2	Gross Proceeds

Amount Indicators	For Reporting Payments on Form 5498:	
Form 5498—Individual Retirement Arrangement Information (see Note)	Amount Code	Amount Type
	1	Regular IRA contributions made in 1990 and 1991 for 1990
	2	Rollover IRA contributions
	3	Life insurance cost included in Amount Code 1
	4	Fair market value of the account

NOTE: Form 5498 is filed for each person for whom you maintained an Individual Retirement Arrangement (IRA) (including an Individual Retirement Arrangement maintained as part of a Simplified Employee Pension (SEP)) during 1990. Amount Code 4 represents the value of the account. Trustees and issuers of IRAs and SEPs must report the value of accounts in existence during the year, even if no contributions were made during the year. However, if a total distribution was made from an IRA during the year and no contributions were made for that year, you need not file Form 5498 to reflect that the fair market value on December 31 was zero. Do not report employer SEP contributions

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks

on Form 5498; however, you must report the value of the SEP account. For an IRA, use all applicable Amount Codes. If no IRA contributions were made for 1990, you will only use Amount Code 4. Only IRA contributions to be applied to 1990 that are made between January 1, 1990 and April 15, 1991 are to be reported in Amount Code 1. For further information concerning IRA reporting, see Rev. Proc. 89-52, printed in IR Bulletin 1989-37 on September 11, 1989.

Amount Indicators Form W-2G—Certain Gambling Winnings

For Reporting Payments on Form W-2G:

Amount Code	Amount Type
1	Gross winnings
2	Federal income tax withheld
3	State income tax withheld (see Note)
7	Winnings from identical wagers

NOTE: State income tax withheld has been added for the convenience of the payer but need not be reported to IRS.

33-44	Blank	12	Enter blanks.
45-49	Transmitter Control Code (TCC)	5	REQUIRED. Enter the five character alpha/numeric Transmitter Control Code assigned by IRS. You MUST have a TCC to file data on this program. DO NOT ENTER MORE THAN ONE TCC PER FILE.
50	Foreign Corporation Indicator	1	Enter a "1" if the payer is a foreign corporation and income is paid by the corporation to a U.S. resident from sources outside of the United States. (See Part A, Sec. 17 for the definition of a Foreign Corporation.) If the payer is not a foreign corporation, enter a blank. (See Note).

NOTE: Some filers are submitting their files with a "1" coded in Position 50 in all of the records contained on the file, whether the payer is a foreign corporation or not. Records that are coded as foreign corporations are processed differently than those that are coded with a blank in Position 50. If your program automatically codes a "1" in Position 50, all of the records on your file will be processed as foreign corporations. If you erroneously report corporations as foreign, you may be subject to a penalty for providing incorrect information to IRS. Therefore, be sure to code only those records as foreign corporations that should be coded as such.

51-90	First Payer Name	40	REQUIRED. Must be present or files will be returned for correction. Enter the name of the payer whose Federal EIN appears in positions 8-16 of the "A" Record, in the manner in which it is used on other tax returns. Any extraneous information must be deleted from the name line. Left-justify and fill with blanks. (Do not enter the Transfer Agent's name in this field. The Transfer Agent's name should appear in the Second Payer Name field.) NOTE: WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME AND EIN OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (THE PAYER OF RECORD) AND THE AMOUNT PAID. FOR FORM 1099-S, THE "A" RECORD WILL REFLECT THE PERSON RESPONSIBLE FOR REPORTING THE TRANSACTION; THE "B" RECORD WILL REFLECT THE SELLER.
91-130	Second Payer Name	40	The contents of this field are dependent upon the TRANSFER AGENT INDICATOR in Sector 1, Position 131. If the Transfer Agent Indicator contains a "1", this field must contain the name of the Transfer Agent. If the Transfer Agent Indicator contains a "0" (zero), this field must contain either a continuation of the First Payer Name field or blanks. Left-

RECORD NAME: PAYER/TRANSMITTER "A" RECORD—Continued

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			justify and fill unused positions with blanks. IF NO ENTRIES ARE PRESENT FOR THIS FIELD, FILL WITH BLANKS. (See Part A, Sec. 17 for a definition of Transfer Agent.)
131	Transfer Agent Indicator	1	REQUIRED. Identifies the entity in the Second Payer Name field. (See Part A, Sec. 17 for a definition of Transfer Agent.) Code — Meaning 1 — The entity in the Second Payer Name field is the Transfer Agent. 0 (zero) — The entity shown is not the Transfer Agent (e.g., the Second Payer Name field contains either a continuation of the First Payer Name field or blanks).
132-171	Payer Shipping Address	40	REQUIRED. If the TRANSFER AGENT INDICATOR in Sector 1, position 131 of this record is a "1" enter the shipping address of the Transfer Agent. Otherwise, enter the shipping address of the payer. Left-justify and fill with blanks.
172-211	Payer City, State and ZIP Code	40	REQUIRED. If the TRANSFER AGENT INDICATOR in Sector 1, position 131 of this Record is a "1", enter the City, State and ZIP Code of the Transfer Agent. Otherwise, enter the City, State and ZIP Code of the payer. Left-justify and fill with blanks.
212-256	Blank	45	Enter blanks.
SECTOR 2—Sector 2 need only be used if the Payer and Transmitter are not the same.			
1	Record Sequence	1	REQUIRED. Must be "2". Used to sequence the sectors making up a PAYER Record.
2	Record Type	1	REQUIRED. Enter "A".
3-82	Transmitter Name	80	REQUIRED. (Only if payer and transmitter are not the same.) Enter the name of the transmitter in the manner in which it is used in normal business. The name of the transmitter must be reported in the same manner throughout the entire file. Left-justify and fill with blanks. If the payer and transmitter are the same, enter blanks in this field.
83-122	Transmitter Mailing Address	40	REQUIRED. (Only if payer and transmitter are not the same.) Enter the mailing address of the transmitter. Left-justify and fill with blanks. If the payer and transmitter are the same, enter blanks in this field.
123-162	Transmitter City, State and ZIP Code	40	REQUIRED. (Only if the payer and transmitter are not the same.) Enter the City, State and ZIP Code of the transmitter. Left-justify and fill with blanks. If the payer and transmitter are the same, enter blanks in this field.
163-256	Blank	94	Enter blanks.

* WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME AND EIN OF THE RECIPIENT OF THE INTEREST (THE FILER). FOR FORM 1099-S, THE "A" RECORD WILL REFLECT THE PERSON RESPONSIBLE FOR REPORTING THE TRANSACTION.

SEC. 4. PAYEE "B" RECORD—GENERAL INFORMATION FOR ALL FORMS

.01 This section contains the general information concerning the Payee "B" Record for all information returns filed on double sided/double density soft sectored diskettes. For a detailed description of the record refer to the following in Part C:

(a) Sec. 5. PAYEE "B" RECORD—FIELD DESCRIPTIONS FOR SECTORS 1 AND 2 OF FORMS 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, 5498 AND SECTOR 1 OF FORMS 1099-A, 1099-B, 1099-OID, 1099-S AND W-2G. (See Part C, Sec. 7, 8, 9, 10 and 11 for field descriptions for Sector 2 of Forms 1099-A, 1099-B, 1099-OID, 1099-S and W-2G.)

(b) Sec. 6. PAYEE "B" RECORD LAYOUTS FOR SECTORS 1 AND 2 OF FORMS 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, 5498 AND SECTOR 1 OF FORMS 1099-A, 1099-B, 1099-OID, 1099-S AND W-2G.

(c) Sec. 7. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 2 OF FORM 1099-A.

(d) Sec. 8. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 2 OF FORM 1099-B.

(e) Sec. 9. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 2 OF FORM 1099-OID.

(f) Sec. 10. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 2 OF FORM 1099-S.

(g) Sec. 11. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 2 OF FORM W-2G.

For tax year 1990 data, all "B" Records will consist of two sectors of

256 positions each. In the "A" Record, the Amount Indicator Codes that appear in diskette positions 24 through 32 of Sector 1 will be left-justified and blank filled. In the "B" Record, you will allow for all nine payment amount fields and for those not used, enter zeros. For example, if you are reporting on Form 1099-PATR, you will enter a "7" in diskette position 23 of Sector 1 of the "A" Record, Type of Return Indicator field. If you are reporting payments for Amount Codes 2, 4 and 7, then diskette positions 24 through 32 of Sector 1 of the "A" Record will be "247bbbbbb" (b = blanks). In the Payee "B" Record:

Positions 52 through 61 of Sector 1 for Payment Amount 1 will be zeros.

Positions 62-71 of Sector 1 will reflect the actual payment amount to be reported for "Nonpatronage distributions."

Positions 72-81 of Sector 1 for Payment Amount 3 will be zeros.

Positions 82-91 of Sector 1 will reflect the actual payment amount to be reported for "Federal income tax withheld."

Positions 92-111 of Sector 1 for Payment Amounts 5 and 6 will be zeros.

Positions 112-121 of Sector 1 will reflect the actual payment amount to be reported for "Energy investment credit."

Positions 122-141 of Sector 1 for Payment Amounts 8 and 9 will be zeros.

.02 The record layout for Sector 1 will be the same for all "B" Records. Sector 2, however, will be different for Forms 1099-A, 1099-B, 1099-OID, 1099-S and W-2G. Refer to Part C, Sec. 7, 8, 9, 10 and 11 respectively for the record layouts for Sector 2 of these records.

.03 IRS must be able to identify the surname (last name) associated with the TIN (SSN or EIN) furnished on a statement. The specifications below include a field in the payee records called "Name Control" in which the first four characters of the payee's surname or last name are to be entered by the payers. The surname or last name should appear first in the First Payee Name field of all Payee "B" Records; however, if your records have been developed using the first name first, a blank must appear between the first and last names.

.04 If payers are unable to provide the first four characters of the surname, the Name Control Field may be left blank; however, compliance with the following will facilitate IRS computer programs in generating the Name Control.

(a) The surname of the payee whose TIN (SSN or EIN) is shown in the Payee "B" Record should always appear first. If, however, you enter the first name first, you must leave a blank space between the first and last names.

(b) In the case of multiple payees, only the surname of the payee whose TIN (SSN or EIN) is shown in the Payee "B" Record, must be present in the First Payee Name field. Surnames of any other payees in the record may be entered in the Second Payee Name field.

.05 A field is also provided in these specifications for Special Data Entries. This field may be used to record information required by state or local governments or for the filer's own personal use. IRS does not use the data provided in the Special Data Entries field; therefore, the IRS program doesn't check the content or format of the data entered in this field. It is the filer's choice whether or not this field is used. If this field is coded, it will not affect the processing of the Payee "B" Records.

.06 Those filers participating in the Combined Federal/State Filing Program must code their records appropriately for the state to receive the information. The state code appears in Sector 2, positions 180 and 181. The file should also meet the money criteria described in Part A, Sec. 16, Table 2.

.07 Do not code for the states unless prior approval to participate has been granted by IRS. See Part A, Sec. 16, Table 1 for a list of the participating states.

FORMS 1098, 1099-A, 1099-B, 1099-S AND W-2G CANNOT BE FILED UNDER THE COMBINED FEDERAL/STATE FILING PROGRAM. Your files must meet all of the requirements specified in Part A, Sec. 16 in order to participate in this program.

.08 All alpha characters entered in the "B" Record should be uppercase.

.09 Do not use decimal points (.) to indicate dollars and cents.

.10 IRS STRONGLY ENCOURAGES FILERS TO REVIEW THEIR DATA FOR ACCURACY BEFORE SUBMISSION TO PREVENT ISSUANCE OF ERRONEOUS NOTICES TO PERSONS FOR WHOM REPORTS ARE FILED. FILERS SHOULD BE ESPECIALLY CAREFUL THAT THEIR TAXPAYER NAMES, SOCIAL SECURITY NUMBERS (SSNs), ACCOUNT NUMBERS, TYPES OF INCOME AND INCOME AMOUNTS ARE CORRECT.

.11 WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME AND EIN OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B" RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (BORROWER/PAYER OF RECORD) AND THE AMOUNT PAID.

SEC. 5. PAYEE "B" RECORD—FIELD DESCRIPTIONS FOR SECTORS 1 AND 2 OF FORMS 1098, 1099-DIV, 1099-G, 1099-INT, 1099-MISC, 1099-PATR, 1099-R, 5498 AND SECTOR 1 OF FORMS 1099-A, 1099-B, 1099-OID, 1099-S AND W-2G.

.01 For Forms 1099-A, 1099-B, 1099-OID, 1099-S and W-2G, see Part C, Sec. 7, 8, 9, 10 and 11 respectively for the field descriptions and record layouts for Sector 2 of these records.

RECORD NAME: PAYEE "B" RECORD

NOTE: For all fields marked REQUIRED, you must provide the information described under Description and Remarks. For fields not marked REQUIRED, you must allow for the field but may be instructed to enter blanks or zeros in the indicated diskette position(s) and for the indicated length. When using double density diskettes, each "B"

RECORD NAME: PAYEE "B" RECORD—Continued

Record will consist of two 256 position sectors.

SECTOR 1

Diskette Position	Field Title	Length	Description and Remarks
1	Record Sequence	1	REQUIRED. Must be a "1". It is used to sequence the sectors making up a PAYEE Record.
2	Record Type	1	REQUIRED. Enter "B".
3–4	Payment Year	2	REQUIRED. Enter "90".
5–6	Document Specific Code	2	REQUIRED FOR FORMS 1099-R, 1099-MISC, 1099-G, AND W-2G. FOR ALL OTHER FORMS, OR IF NOT USED, ENTER BLANKS. For Form 1099-R, enter the appropriate code(s) for the Distribution Code. More than one code may apply for Form 1099-R; however, if only one code is required, it will be entered in position 5. Position 6 will be blank. NOTE: You *MUST* enter at least one (1) Distribution Code for Form 1099-R. *BLANKS* in *BOTH* positions 5 and 6 are *NOT* acceptable for Form 1099-R.For Form 1099-MISC, position 5 is used to indicate Crop Insurance Proceeds. Position 6 will be blank. For Form 1099-G, enter the year of income tax refund in position 5. Position 6 will be blank. For Form W-2G enter the Type of Wager in position 5. Position 6 will be blank.
	Distribution Code (Form 1099-R)		Use only for reporting on Form 1099-R to identify the Distribution Code. Enter the applicable code from the following table. A "0" (zero) is not a valid code for Form 1099-R. A numeric code MUST be entered in all cases except when Code P or D is used. However, when using Code P for an IRA distribution under section 408(d)(4), you may also enter Code 1, if it applies. If you are reporting a total distribution from a plan that includes a distribution from a DEC, you must report two separate "B" Records; one to report the distribution of DECs and the other to report the distribution from the other part of the plan. In addition, if more than one numeric code is applicable to a distribution, report two separate Payee "B" Records.

Category (See Note)	Code
Early (premature) distribution, no known exception*	1*
Early (premature) distribution, exception applies (as defined in Sec. 72(q), (t), or (v)) other than disability or death	2*
Disability*	3*
Death (includes payments to a beneficiary)*	4*
Prohibited transaction*	5*
Section 1035 Exchange	6
Normal distribution*	7*
Excess contributions plus earnings/excess deferrals (and/or earnings) taxable in 1990	8
PS58 costs	9
Excess contributions plus earnings/excess deferrals taxable in 1989	P
Qualifies for 5-year/10-year averaging	A
Qualifies for death benefit exclusion	B
Qualifies for both A and B	C
Excess contributions plus earnings/excess deferrals taxable in 1988	D

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks

*If you are reporting a distribution for an IRA or SEP for Codes 1, 2, 3, 4, 5, or 7, you MUST code a "1" in Sector 1, Position 45, of the Payee "B" Record.

NOTE: For detailed explanations of the distribution codes, see the 1990 "Instructions for Form 1099, 1098, 5498, and W-2G" included in your magnetic media reporting packages.

Crop Insurance Proceeds (Form 1099-MISC only)

If the payment amount reported for Amount Code 7 is crop insurance proceeds, enter a "1" in position 5. Position 6 will be blank.

Tax Year of Refund (Form 1099-G only)

Use only for reporting the tax year for which the refund was issued. Enter the NUMERIC year for which the refund was issued (e.g., for 1989 enter 9). However, if the payment amount field associated with Amount Indicator 2, State or Local Income Tax Refunds, contains a refund, credit or offset that is attributable to an income tax which applies exclusively to income from a trade or business and is not of general application, then enter the ALPHA equivalent of the year for which the refund was issued from the table below (e.g., for 1989 enter I). This code should appear in position 5. Position 6 will be blank.

Year for Which Trade or Business Refund was Issued	*Alpha * Equivalent*
1	A
2	B
3	C
4	D
5	E
6	F
7	G
8	H
9	I
0	J

* To be used for trade or business refunds only.

Type of Wager (Form W-2G only)

Use only for reporting the Type of Wager on Form W-2G. This code will appear in position 5. Position 6 will be blank.

Category	Code
Horse Race Track (or Off Track Betting of a Horse Track nature)	1
Dog Race Track (or Off Track Betting of a Dog Track nature)	2
Jai-alai	3
State Conducted Lottery	4
Keno	5
Casino Type Bingo. DO NOT use this code for any other type of bingo winnings (e.g., church or fire dept.)	6
Slot Machines	7
Any other type of gambling winnings. (This includes church bingo, fire dept. bingo, unlabeled winnings, etc.)	8

7	Blank	1	Enter blank.

RECORD NAME: PAYEE "B" RECORD—Continued

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
8	Corrected Return Indicator	1	Diskette position 8 is used to indicate a corrected return. Refer to Part A, Sec. 13 for specific instructions on how to file corrected returns using magnetic media.
9–12	Name Control	4	Enter the first four (4) characters of the surname (last name) of the payee. The surname of the person whose TIN is being reported in positions 16–24 of the "B" Record should be used to determine the Name Control. This is especially important in the case of trustee accounts. IF THE NAME THAT CORRESPONDS TO THE TIN IS NOT INCLUDED IN THE FIRST OR SECOND PAYEE NAME LINE, EVERY EFFORT SHOULD BE MADE TO DEVELOP THE CORRECT NAME CONTROL FOR THE NAME THAT CORRESPONDS TO THE TIN. Surnames of less than four (4) characters should be left-justified, filling the unused positions with blanks. Special characters and imbedded blanks should be removed. In the case of a business, use the first four significant characters of the business name. Disregard the word "the" when it is the first word of the name, UNLESS there are only two words in the name. IF THE NAME CONTROL IS NOT DETERMINABLE BY THE PAYER, LEAVE THIS FIELD BLANK. A dash (-) and ampersand (&) are the only acceptable special characters. (See Part A, Sec. 14 for information on Name Controls.)

The following examples may be helpful to you in developing the name control:

	Name	*Name Control*
Individuals:		
	Jane Brown	BROW
	John A. Lee	LEE*
	James P. En, Sr.	EN*
	John O'Neill	ONEI
	Mary Van Buren	VANB
	Juan De Jesus	DEJE
	Gloria A. El-Roy	EL-R
	Mr. John Smith	SMIT
	Joe McCarthy	MCCA
	Pedro Torres-Lopes	TORR
	Maria Lopez Moreno	LOPE
	Binh To La	LA*
	Nhat Thi Pham	PHAM
	Mark D'Allesandro	DALL

	Robert Aspen and Bess Willow	ASPE
	Harold Fir, Bruce Elm, and Joyce Spruce et al Ptr	FIR*

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			Name — *Name Control*
Estate:			
			Frank White Estate — WHIT
			Sheila Blue Estate — BLUE
Trusts and Fiduciaries:			
			Daisy Corporation Employee Benefit Trust — DAIS
			Trust FBO The Cherryblossom Society — CHER
Labor Organization:			
			Laborer's Union, AFL-CIO — LABO
			St. Bernard's Methodist Church Bldg. Fund — STBE
* Name Controls of less than four (4) significant characters must be left-justified and blank filled.			
13–14	Blank	2	Enter blanks.
15	Type of TIN	1	REQUIRED. This field is used to identify the Taxpayer Identification Number (TIN) in positions 16–24 as either an Employer Identification Number, a Social Security Number, or that the type is undeterminable. Enter the appropriate code from the following table: Type of TIN — TIN — Type of Account 1 — EIN — A business, organization, or other entity that is not an individual 2 — SSN — An individual blank — N/A — If the type of TIN is undeterminable, enter a blank.
16–24	Taxpayer Identification Number	9	REQUIRED. Enter the valid 9-digit Taxpayer Identification Number of the payee (SSN or EIN, as appropriate). If an identification number has been applied for but not received, enter blanks. DO NOT ENTER HYPHENS, ALPHA CHARACTERS, ALL 9's OR ALL ZEROS.
25–44	Payer's Account Number for Payee	20	DO NOT ENTER A TAXPAYER IDENTIFICATION NUMBER IN THIS FIELD. We strongly encourage the payer to use this field to enter the payee's account number which can be any number assigned by the payer to the payee (*e.g.*, checking or savings account number). THIS NUMBER SHOULD BE UNIQUE AND WILL HELP TO DISTINGUISH THE INDIVIDUAL PAYEE'S ACCOUNT, AND WILL HELP IDENTIFY A SPECIFIC TRANSACTION IF MULTIPLE RETURNS ARE FILED FOR ONE PAYEE. This information is helpful if corrected returns are filed. This number is also provided with your Invalid/No-TIN notification from IRS and may help you determine the branch or subsidiary reporting the transaction. YOU ARE STRONGLY ENCOURAGED TO USE THIS FIELD. Do not define data in this field in packed decimal format. If fewer than twenty characters are required, you may either left- or right-justify, filling the remaining positions with blanks.
45	IRA/SEP Indicator	1	*This field is only used when reporting Forms 1099–R.* This field will be coded ONLY if you entered a code 1, 2, 3, 4, 5, or 7 in either Position 5 or 6, Document Specific Code, of Sector 1 of

RECORD NAME: PAYEE "B" RECORD—Continued

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			the Payee "B" Record, AND you are reporting a distribution from an IRA or SEP. Enter the appropriate indicator from the table below: *Indicator* — *Usage* 1 — You are reporting an IRA or SEP Distribution. Blank — You are NOT reporting an IRA or SEP Distribution.
46–47	Percentage of Total Distribution	2	*THIS FIELD IS ONLY USED WHEN REPORTING FORM 1099-R,* and ONLY if you are reporting a total distribution to more than one person. This field is only 2 positions in length because when a total distribution is made to more than one person, the figure MUST be 99% or less. If the percentage is 100, leave this field blank. If the percentage is a fraction, round off to the nearest whole number (for example 10.4% will be 10%; 10.5% or more will be 11%). Enter the percentage received by the person whose TIN is included in positions 16–24, Sector 1, of the Payee "B" Record. This field must be right-justified, and unused positions must be zero filled. If not applicable, enter blanks. You need not enter a percentage for IRA or SEP distribution.
48–51	Blank	4	Enter blanks.
	Payment Amount Fields (Must be numeric)		REQUIRED. You must allow for all payment amounts; for those not used enter ZEROS. For example, if position 23 of Sector 1 of the "A" Record is "7" (for 1099-PATR) and positions 24–32 are "247bbbbbb" (b = blank), this indicates you are reporting 3 actual payment amounts in all of the following Payee "B" Records. Payment Amount 1 will be all "0" (zeros), Payment Amount 2 will represent Nonpatronage distributions, Payment Amount 3 will be all "0" (zeros), Payment Amount 4 will represent Federal income tax withheld, Payment Amounts 5 and 6 will be all "0" (zeros), Payment Amount 7 will represent energy investment credit, and Payment Amounts 8 and 9 will be all "0" (zeros). Each payment field must contain 10 numeric characters (see Note). Each payment amount must be entered in U.S. dollars and cents. The rightmost two positions represent cents in the Payment Amount fields. Do not enter dollar signs, commas, decimal points or NEGATIVE PAYMENTS (except those items that reflect a loss on Form 1099-B). You may *NOT* enter *ANY* negative payments for Form 1099-MISC. Positive and negative amounts are indicated by placing a "+" or "–" (minus sign) in the leftmost position of the payment amount field. A negative overpunch in the units position may be used, instead of the minus sign, to indicate a negative amount. If a plus sign, minus sign, or negative overpunch is not used, the number will be assumed to be positive. PAYMENT AMOUNTS MUST BE RIGHT-JUSTIFIED AND UNUSED POSITIONS MUST BE ZERO FILLED. Federal income tax withheld cannot be reported as a negative amount on any form. NOTE: If you are reporting money amounts in excess of 9999999999 (dollars and cents), it must be reported as follows:

RECORD NAME: PAYEE "B" RECORD—Continued

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			(1) The first Payee "B" Record MUST contain 9999999999. (2) The second Payee "B" record will contain the remaining money amounts. DO NOT SPLIT THIS FIGURE IN HALF.
52–61	Payment* Amount 1	10	The amount reported in this field represents payments for Amount Code 1 in the Payer/Transmitter "A" Record.
62–71	Payment* Amount 2	10	The amount reported in this field represents payments for Amount Code 2 in the Payer/Transmitter "A" Record.
72–81	Payment* Amount 3	10	The amount reported in this field represents payments for Amount Code 3 in the Payer/Transmitter "A" Record.
82–91	Payment* Amount 4	10	The amount reported in this field represents payments for Amount Code 4 in the Payer/Transmitter "A" Record.
92–101	Payment* Amount 5	10	The amount reported in this field represents payments for Amount Code 5 in the Payer/Transmitter "A" Record.
102–111	Payment* Amount 6	10	The amount reported in this field represents payments for Amount Code 6 in the Payer/Transmitter "A" Record.
112–121	Payment* Amount 7	10	The amount reported in this field represents payments for Amount Code 7 in the Payer/Transmitter "A" Record.
122–131	Payment* Amount 8	10	The amount reported in this field represents payments for Amount Code 8 in the Payer/Transmitter "A" Record.
132–141	Payment* Amount 9	10	The amount reported in this field represents payments for Amount Code 9 in the Payer/Transmitter "A" Record.

* If there are discrepancies between these Payment Amount Codes and the boxes on the paper forms, the instructions in this revenue procedure govern.

142–161	Blank	20	Enter blanks.
162	Foreign Country Indicator	1	REQUIRED. If the payee's address is in a foreign country, enter a "1" in this field. This will allow you to use any format for the Payee Address, City, State and ZIP Code. Address information must not appear in the First or Second Payee Name Lines. If the address for the payee is a U.S. address, you must enter a blank in this field. The free address format may only be used for foreign addresses. For U.S. addresses, you must use the U.S. Postal Service state abbreviations in diskette positions 72 and 73 of Sector 2 of the "B" Record. These abbreviations are provided in Part A, Sec. 18.
163–202	First Payee Name Line	40	REQUIRED. Do not enter address information in this field. Enter the name of the payee (preferably surname (last name) first) whose Taxpayer Identification Number appears in positions 16–24 of Sector 1 of the "B" Record. If fewer than 40 characters are required, left-justify and fill unused positions with blanks. If more space is required for the name, utilize the Second Payee Name Line field below. If there are multiple payees, only the name of the payee whose Taxpayer Identification Number has been provided may be entered in this field. The names of the other payees should be entered in the Second Payee Name Line field. NOTE: WHEN REPORTING FORM 1098, MORTGAGE INTEREST STATEMENT, THE "A" RECORD WILL REFLECT THE NAME OF THE RECIPIENT OF THE INTEREST (THE FILER). THE "B"

RECORD NAME: PAYEE "B" RECORD—Continued

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
			RECORD WILL REFLECT THE INDIVIDUAL PAYING THE INTEREST (THE BORROWER/PAYER OF RECORD) AND THE AMOUNT PAID. FOR FORMS 1099-S, THE "B" RECORD WILL REFLECT THE SELLER INFORMATION.
203-242	Second Payee Name Line	40	If the payee name requires more space than is available in the First Payee Name Line, enter only the remaining portion of the name in this field. If there are multiple payees (e.g., partners or joint owners), we encourage you to use this field for those payees' names not associated with the Taxpayer Identification Number in positions 16-24 of Sector 1 of the "B" Record. *Do not enter address information in this field.* NOTE: It is important that you provide as much payee information to IRS as possible to identify the owner of the Taxpayer Identification Number. Left-justify and fill unused positions with blanks. FILL WITH BLANKS IF NO ENTRIES ARE PRESENT FOR THIS FIELD.
243-256	Blank	14	Enter blanks.

SECTOR 2—See Part C, Sec. 7, 8, 9, 10 and 11 for field descriptions for Sector 2 of Forms 1099-A, 1099-B, 1099-OID, 1099-S and W-2G.

Diskette Position	Field Title	Length	Description and Remarks
1	Record Sequence	1	REQUIRED. Must be a "2". Used to sequence the sectors making up a PAYEE Record.
2	Record Type	1	REQUIRED. Enter "B".
3-42	Payee Mailing Address	40	REQUIRED. Enter mailing address of payee. Left-justify and fill unused positions with blanks. The address MUST be present. This field MUST NOT contain any data other than the payee's mailing address. Any format may be used in reporting a foreign mailing address.

For U.S. addresses, the Payee City, Payee State and Payee ZIP Code must be reported as a 29, 2 and 9 position field, respectively. For foreign addresses, the Payee City, Payee State (Country) and Payee ZIP Code may be reported as a continuous 40 position field. When reporting a foreign address, the Foreign Country Indicator must contain a "1."

43-71	Payee City	29	REQUIRED. Enter the city, left-justified, and fill the unused positions with blanks. Do not enter state and ZIP Code information in this field.
72-73	Payee State	2	REQUIRED. Enter the abbreviation for the state as shown in Part A, Sec. 18. You MUST use valid U.S. Postal Service state abbreviations for U.S. addresses.
74-82	Payee ZIP Code	9	REQUIRED. Enter the valid 9 digit ZIP Code assigned by the U.S. Postal Service. If only the first 5 digits are known, left-justify and fill the unused positions with blanks. Use this field for the ZIP Code only. For foreign countries, alpha characters are acceptable as long as you have entered a "1" in the Foreign Country Indicator field, which is located in position 162 of Sector 1 of the "B" Record.
83-112	Blank	30	Enter blanks.

113-122	Special Data Entries	10	This portion of the payee "B" Record may be used to record information for state or local government reporting or for the filer's own purposes. Payers should contact their state or local revenue departments for filing requirements. If this field is not utilized, ENTER BLANKS.
123	Gross Proceeds Reported to IRS Indicator	1	REQUIRED FOR FORM 1099-B ONLY. Enter appropriate indicator from the table below. If this field is not utilized, ENTER BLANKS. Indicator — Usage 1 — Gross Proceeds 2 — Gross Proceeds less commission and option premiums
124-129	Date of Sale	6	REQUIRED FOR FORM 1099-B ONLY. For broker transactions, enter the trade date of the transaction in the format MMDDYY (e.g., 102490). For barter exchanges, enter the date cash, property, a credit, or scrip is actually or constructively received. Enter blanks if this is an aggregate transaction. DO NOT ENTER HYPHENS OR SLASHES.
130-142	CUSIP Number	13	REQUIRED FOR FORM 1099-B ONLY. For broker transactions only, enter the CUSIP (Committee on Uniform Security Identification Procedures) number of the item reported for Amount Indicator "2" (Stocks, bonds, etc.). Enter blanks if this is an aggregate transaction. Enter "0" (zeros) if the number is not available or applicable. For CUSIP numbers with less than 13 characters, right-justify and fill the remaining positions with blanks.
143-181	Description	39	REQUIRED FOR FORM 1099-B ONLY. Enter a brief description of the item or services for which the proceeds are being reported. If fewer than 39 characters are required, left-justify and fill unused positions with blanks. For regulated futures contracts, enter "RFC" and any amount subject to backup withholding. Enter blanks if this is an aggregate transaction.
182-256	Blank	75	Enter blanks.

SEC. 9. PAYEE "B" RECORD—FIELD DESCRIPTIONS AND RECORD LAYOUT FOR SECTOR 2 OF FORM 1099-OID

.01 This section contains the general payment information for Sector 2 of Form 1099-OID. For detailed explanations of the 1099-OID fields see the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G" included in your reporting package.

.02 See Part C, Sec. 5 for field descriptions for Sector 1 of the Payee "B" Record for Form 1099-OID.

RECORD NAME: PAYEE "B" RECORD
FORM 1099-OID—SECTOR 2 ONLY

SECTOR 2

Diskette Position	Field Title	Length	Description and Remarks
1	Record Sequence	1	REQUIRED. Must be a "2". Used to sequence the sectors making up a PAYEE Record.
2	Record Type	1	REQUIRED. Enter "B".
3-42	Payee Mailing Address	40	REQUIRED. Enter mailing address of payee. Left-justify and fill unused positions with blanks. The address MUST be present. This field MUST NOT contain any data other than the payee's mailing address. Any format may be used in reporting a foreign mailing address.

For U.S addresses, the Payee City, Payee State and Payee ZIP Code must be reported as a 29, 2 and 9 position field, respectively. For foreign addresses, the Payee City, Payee State (country) and Payee ZIP Code may be reported as a continuous 40 position field. When reporting a foreign address, the Foreign Country Indicator must contain a "1".

43-71	Payee City	29	REQUIRED. Enter the city, left-justified, and fill the unused positions with blanks. Do not enter state and ZIP Code information in this field.
72-73	Payee State	2	REQUIRED. Enter the abbreviation for the state as shown in Part A, Sec. 18. You MUST use valid U.S. Postal Service state abbreviations for U.S. addresses.
74-82	Payee ZIP Code	9	REQUIRED. Enter the valid 9 digit ZIP Code assigned by the U.S. Postal Service. If only the first 5 digits are known, left-justify and fill the unused positions with blanks. Use this field for the ZIP Code only. For foreign countries, alpha characters are acceptable as long as you have entered a "1" in the Foreign Country Indicator field, which is located in position 162 of Sector 1 of the "B" Record.
83-112	Blank	30	Enter blanks.
113-140	Special Data Entries	28	This portion of the payee "B" Record may be used to record information for state or local government reporting or for the filer's own purposes. Payers should contact their state or local revenue departments for filing requirements. If this field is not utilized, ENTER BLANKS.
141-179	Description	39	REQUIRED. Enter identification number (CUSIP Number) or description of the obligation. The description may include the stock exchange, issuer, coupon rate and year of maturity. If fewer than 39 characters are required, left-justify and fill unused positions with blanks.
180-181	Combined Federal/ StateCode	2	If a payee record is to be forwarded to a state agency as part of the Combined Federal/ State Filing Program, enter the valid state code from Part A, Sec. 16, Table 1. For those filers or states NOT participating in this program, ENTER BLANKS.
182-256	Blank	75	Enter blanks.

SEC. 12. END OF PAYER "C" RECORD

.01 The "C" Record consists of one 256-position sector. The Control Total fields are each 15 positions in length.
.02 The End of Payer "C" Record is a summary record for a type of return for a given payer.
.03 The "C" Record will contain the total number of payees and the totals of the payment amount fields filed by a given payer. The "C" Record MUST be written after the last Payee "B" Record for each type of return for a given payer. For each "A" Record and group of "B" Records on the file, there must be a corresponding "C" Record.
.04 In developing the "C" Record, for example, if you used Amount Codes 1, 3 and 6 in the "A" Record, the totals from the "B" Records will appear in Control Totals 1, 3 and 6 of the "C" Record. In this example, positions 27-41, 57-86 and 102-146 would be zero filled.
.05 Payers/Transmitters must verify the accuracy of the totals in the "C" Record and must enter the totals on the Forms 4804, 4802 or computer generated substitute, which will accompany the shipment. The lines used on Forms 4804 and 4802 to record payment amounts correspond with the Amount Codes used in the "A" Record.
.06 Missing or incorrect End of Payer "C" Records will result in the media being returned for correction.

RECORD NAME: END OF PAYER "C" RECORD

SECTOR 1

Diskette Position	Field Title	Length	Description and Remarks
1	Record Sequence	1	REQUIRED. Must be a "1". Used to sequence the sectors making up a PAYER Record.
2	Record Type	1	REQUIRED. Enter "C".

SECTOR 1 (Continued)

Diskette Position	Field Title	Length	Description and Remarks
3-8	Number of Payees	6	REQUIRED. Enter the total number of Payee "B" Records covered by the preceding Payer/ Transmitter "A" Record. Right-justify and zero fill.
9-11	Blank	3	Enter blanks.

REQUIRED. If any corresponding Payment Amount fields are present in the Payee "B" Records, accumulate into the appropriate Control Total field. CONTROL TOTALS MUST BE RIGHT-JUSTIFIED, AND UNUSED CONTROL FIELDS MUST BE ZERO FILLED. Please note that all Control Total fields are 15 positions in length.

SEC. 13. STATE TOTALS "K" RECORD

.01 The "K" Record consists of one 256-position sector. The Control Total fields are each 15 positions in length.

.02 The State Totals "K" Record is a summary for a given payer and type of return to a given state in the Combined Federal/State Filing Program. Use ONLY when state reporting approval has been granted.

.03 The "K" Record will contain the total number of payees and the totals of the payment amount fields filed for a given state. The "K" Record(s) must be written after the "C" Record for the related "A" Record.

.04 In developing the "K" Record, for example, if you used Amount Codes 1, 3 and 6 in the "A" Record, the totals from the "B" Records coded for this state will appear in Control Totals 1, 3 and 6 of the "K" Record.

.05 There MUST be a separate "K" Record for each state being reported.
.06 Refer to Part A, Sec. 16 for the requirements and conditions that MUST be met to file on this program.

PART D. MISCELLANEOUS INFORMATION

SECTION 1. MAGNETIC MEDIA-RELATED FORMS AND PUBLICATIONS AVAILABLE AT THE IRS MARTINSBURG COMPUTING CENTER

.01 IRS/MCC maintains supplies of magnetic media-related forms and publications including:

-Publication 1220, Specifications for Filing Forms 1098, 1099 Series, 5498, and W-2G Electronically or on Magnetic Tape, Tape Cartridge, 5¼ and 3½ Inch Diskettes
-Publication 1255, Requirements and Conditions for Filing Forms 1098, 1099 Series, 5498, and W-2G on 8 Inch Magnetic Diskette
-Publication 1187, Requirements and Conditions for Filing Form 1042S, Foreign Person's U.S. Source Income Subject to Withholding, on Magnetic Tape
-Publication 1239, Requirements and Conditions for Submitting Form 8027, Employer's Annual Information Return of Tip Income and Allocated Tips, on Magnetic Tape
-Publication 1245, Magnetic Tape Reporting for Forms W-4
-Publication 1437, Revenue Procedure and File Specifications for Magnetic Tape Filing of Fiduciary Returns Forms 1041, and Partnership Returns Form 1065, for Tax Year 1989
-Instructions for Forms 1099, 1098, 5498, and W-2G
-Form 8508, Request for Waiver from Filing Information Returns on Magnetic Media
-Form 4419, Application for Filing Information Returns Magnetically/Electronically
-Form 8809, Request for Extension of Time to File Information Returns
-Form 4804, Transmittal of Information Returns Reported on Magnetic Media
-Form 4802, Transmittal for Multiple Magnetic Media Reporting
-Form 5064, Media Label
-Notice 210, Preparation Instructions for Media Label, Form 5064
-Form 6466, Transmittal of Magnetic Tape of Form W-4, Employee's Withholding Allowance Certificate
-Form 6467, Multiple Employer Transmittal for Magnetic Tape Reporting of Form W-4
-Form 6468, How to Prepare Form 6469, Tape Label for Form W-4
-Form 6469, Tape Label for Form W-4

.02 To order any of these forms or publications, you may contact IRS/MCC (see Part A, Sec. 3 for the address, telephone number, and hours of operation). You may also call the IRS toll- free forms and publications order number (1-800-424-FORM, 1-800-829-FORM after September 30, 1990), or contact your local IRS office.

SEC. 2. FEDERAL DOLLAR CRITERIA

.01 For your convenience, the federal requirements for reporting the information returns to IRS is provided in Table 1.

TABLE 1. FEDERAL DOLLAR REQUIREMENTS

FORM	DOLLAR CRITERIA
1098	$600
1099-A	ALL
1099-B	ALL
1099-DIV	$10 ($600 for Liquidations)
1099-G	$10—Unemployment and Tax Refunds
	$600—All others
1099-INT	$10
	$600 (In some cases)
1099-MISC	$600
	ALL (Fishing boat proceeds)
	$10 (Royalties or Substitute Dividend and Tax-exempt Interest Payments Reportable by Brokers)
	$5,000—Direct sales indicator
1099-OID	$10
1099-PATR	$10
1099-R	ALL
1099-S	ALL
5498	ALL
W-2G	$600
	$1200 (Bingo or Slot Machines)
	$1500 (Keno)

For specific information, refer to the 1990 "Instructions for Forms 1099, 1098, 5498, and W-2G."

Rev. Proc. 90-44

PART A. GENERAL

SECTION. 1. PURPOSE

.01 The purpose of this revenue procedure is to state the requirements for: (1) reproducing paper substitutes of the forms shown below, covering payments made during the 1990 calendar year (for Forms 5498, contributions made for 1990), that are required to be filed with the Internal Revenue Service (IRS), and (2) furnishing substitute statements to form recipients (see Section 4.01 for definition) and paper document reporting. This revenue procedure contains specifications for the following:

(a) Form 1098, Mortgage Interest Statement.
(b) Form 1099-A, Information Return for Acquisition or Abandonment of Secured Property.
(c) Form 1099-B, Statement for Recipients of Proceeds From Broker and Barter Exchange Transactions.
(d) Form 1099-DIV, Statement for Recipients of Dividends and Distributions.
(e) Form 1099-G, Statement for Recipients of Certain Government Payments.
(f) Form 1099-INT, Statement for Recipients of Interest Income.
(g) Form 1099-MISC, Statement for Recipients of Miscellaneous Income.
(h) Form 1099-OID, Statement for Recipients of Original Issue Discount.
(i) Form 1099-PATR, Statement for Recipients (Patrons) of Taxable Distributions Received From Cooperatives.
(j) Form 1099-R, Statement for Recipients of Total Distributions From Profit-Sharing, Retirement Plans, Individual Retirement Arrangements, Insurance Contracts, Etc.
(k) Form 1099-S, Statement for Recipients of Proceeds From Real Estate Transactions.
(l) Form W-2G, Statement for Recipients of Certain Gambling Winnings.
(m) Form 5498, Individual Retirement Arrangement Information.
(n) Form 1096, Annual Summary and Transmittal of U.S. Information Returns.

.02 For the purpose of this revenue procedure, a substitute form is one that is not printed by IRS. For a substitute form to be acceptable to the IRS, it must conform to the official form or the specifications outlined in this revenue procedure. DO NOT submit any substitutes to IRS for APPROVAL. Only those forms that conform to the official form or comply with the specifications set forth herein are acceptable. See Part A, Section 8 for the specifications that apply to form recipient statements (Copy B).

SEC. 2. NATURE OF CHANGES

.01 Numerous editorial changes have been made to the publication.

.02 New legislation changed the penalty provisions and some of the magnetic media requirements for information returns.

.03 Two new boxes, Box 11, State income tax withheld; and Box 12, State/Payer's state number; have been added to the Form 1099-MISC. As a result of this change, other boxes on the form have been repositioned. In addition, two new copies have been added-Copy 1, for filing with a state and Copy 2, for the recipient to attach to the state tax return, when required.

.04 An IRA/SEP checkbox has been added to Box 7 of Form 1099-R.

SEC. 3. REQUIREMENTS FOR ACCEPTABLE SUBSTITUTE FORMS 1096, 1098, 1099, 5498, AND W-2G TO BE FILED WITH IRS (COPY A)

.01 Paper substitutes for Form 1096 and Copy A of Forms 1098, 1099, 5498, and W-2G, that totally conform to the specifications contained in this procedure may be privately printed and filed as returns with the IRS.

If you are uncertain of any specification set forth herein and want that specification clarified, you may submit a letter citing the specification in question, giving your understanding and interpretation of the specification, and enclosing an example of the form with your understanding of the specification to:

Internal Revenue Service
ATTN: R:R:T (IRP Coordinator)
1111 Constitution Avenue, N.W.
Washington, DC 20224

.02 Proposed substitutes for Copy A that do not conform to these specifications are not acceptable.

.03 No IRS office is authorized to allow deviations from this revenue procedure.

.04 IRS approval for the use of chemical transfer paper on Copy A is not required.

.05 Copy B (Form 1098 For Payer, Form 1099-A For Borrower, other Forms 1099 For Recipient, (Form 1099-S For Transferor, Form 5498 For Participant), and Copy C (Form W-2G For Winner's Records) must contain the information specified in section 8 in order to constitute a "statement" or "official form" under the applicable provisions of the Internal Revenue Code. The format of this information is at the discretion of the filer with the exception of the composite Form 1099 statement specified in section 8.04.

.06 Forms 1096, 1098, 1099, 5498, and W-2G are subject to annual review and possible change. Filers are cautioned, therefore, against overstocking supplies of privately printed substitutes. THE SPECIFICATIONS CONTAINED IN THIS REVENUE PROCEDURE APPLY TO 1990 FORMS ONLY.

.07 Copies of the official forms for the reporting year may be obtained from most Internal Revenue offices. The IRS provides only cut sheets (no carbon interleaves) of these forms. If they are not available at your local IRS district office, ask that office to order copies for you. You should receive your order within 10 days. If you prefer, you may order them by calling our toll-free telephone number 1-800-424-FORM(3676) through September 30, 1990. Beginning October 1,1990 the number will be 1-800-829-3676 (TAX-FORM)

.08 Only original or ribbon copies having information typed or machine printed with *black carbon-based ink* should be filed with IRS. Dot Matrix Print must be letter quality 7 x 9 per character minimum. Carbon copies and photocopies are not acceptable.

.09 If you submit forms to IRS that do not meet the specifications in this revenue procedure, you may be subject to a penalty under section 6721 of the Internal Revenue Code. The maximum penalty is $50 for each form (up to $250,000) that the IRS cannot accept as a return because it does not meet the provisions set out in this revenue procedure.

SEC. 4. DEFINITIONS

.01 For individual-form recipients the term "taxpayer identification number" (TIN) means the individual's social security number (SSN). The SSN consists of nine digits separated by hyphens as follows: 000-00-0000. For all other form recipients, the term "taxpayer identification number" means the employer identification number (EIN). The EIN consists of nine digits separated by one hyphen as follows: 00-0000000. For a sole proprietor, use the sole proprietor's SSN and name (not their business name).

.02 In the past the terms payee and recipient were usually synonymous. The addition of new forms to the information returns family requires different terminology to identify the recipient of a copy of the form filed with IRS: i.e., for Form 1098 the recipient is "payer/borrower;" Form 1099-A, "the borrower;" Form 1099-S, "the transferor;" and Form 5498, "the participant." Therefore, to prevent any confusion, the person to whom you are required by law to furnish a copy of the official form or information statement will be referred to as the "form recipient."

.03 The term "filer" means the person or organization required by law to file a form listed in section 1.01 with IRS. Thus, a filer may be a payer, a recipient of mortgage interest payments, a broker, a barter exchange, a person reporting real estate transactions, a trustee or issuer of an individual retirement arrangement (including an IRA or SEP), or a lender who acquires an interest in secured property or who has reason to know that the property has been abandoned.

.04 A corrected and/or amended return is one that corrects previously reported information. (A voided return will not correct previously reported information.)

.05 The term "substitute form" means a paper substitute of Copy A of an official form listed in section 1.01 that totally conforms to the provisions in this revenue procedure.

.06 The term "form recipient statement" means a paper statement of the information reported on a form listed in section 1.01 that must be furnished to a person (form recipient), as so defined under the applicable provisions of the Internal Revenue Code and the applicable regulations.

.07 A composite statement is one form (although the form itself may comprise more than one page) that contains all the requisite Form 1099 information. A composite Form 1099 CANNOT be filed with IRS. If the filer does not use a composite statement, the filer must provide the necessary information to the form recipient separately on each respective form or substitute statement as the case may be. See sections 8.04 and 8.07 for more information on composite statements.

SEC. 5. INSTRUCTIONS FOR PREPARING PAPER FORMS THAT WILL BE FILED WITH THE IRS

.01 The form recipient's name, street address, city, state, and ZIP code information must be TYPED OR MACHINE PRINTED IN BLACK INK on separate lines. The city, state, and ZIP code must be on the same line.

.02 The name of the appropriate form recipient must be shown on the first or second name line in the area on the form provided for the form recipient's name and address. (See section 6, Taxpayer Identification Number, for guidelines on the preferred methods for the form recipient's name and TIN). No descriptive information or other name should precede the form recipient's name. ONLY one form recipient's name should appear on the first line of the form. If more than one form recipient(s) name must be entered, place the responsible form recipient (person or organization whose TIN is provided) on the first line. Place the other form recipient's name on the succeeding name line (up to 2 name lines are allowable). We recognize that certain states require that the entities on trust accounts be provided in a different format. Filers should provide information returns reflecting payments to trust accounts with (1) the trust's TIN in the recipient's TIN area, (2) the trust's name as the recipient's first name line and (3) the trustee as the recipient's second name line.

.03 The box below the form recipient's name and address may be used for the account number. This information is not required; however, special caution must be taken if an account number is being entered. This number must be unique and MUST NOT appear anywhere on the form other than in the box specified for this use. If window envelopes are used, this number must not show through the window because the Postal Service may not accept them if you are using metered mail.

.04 Filers should TYPE OR MACHINE PRINT data entries on the forms, insert data in the middle of blocks well separated from other printing and guidelines, and take other measures to guarantee a clear, dark black, sharp image.

.05 Machine printed forms should be printed using a 6 lines/inch option.

.06 Machine printed forms should be printed in 10 pitch pica (*i.e.*, 10 print positions per inch) or 12 pitch elite (*i.e.*, 12 print positions per inch).

.07 On corrected returns, an "X" must be placed within the check box located at the top of the form to the left of the word "CORRECTED." The accompanying Form 1096 for a submission of corrected returns should also contain an "X" within the "CORRECTED" box at the top of the form. DO NOT type the words CORRECTED RETURN on the Form 1096, 1098, 1099, 5498 or W-2G. All required data blocks must be completed on a corrected return because it replaces and supersedes the information return previously filed. DO NOT intermix corrected and original returns in a submission. Corrected returns should be filed separately. If you make an error while typing or printing a Form 1098, 1099 or 5498, enter an "X" in the "VOID" box at the top of the form. An entry in the "VOID" box will not correct previously filed information returns.

.08 For corrected or voided documents, enter an "X" within the appropriate box using only computer print, typewriter or #2 pencil, or a ball-point pen. DO NOT use a felt tip marker. The machine used to "read" paper forms generally cannot "read" this ink type.

.09 Substitute forms prepared in continuous or strip form must be burst and stripped to conform to the size specified for a single sheet before they are filed with IRS. The size specified *does not include pinfeed holes.* Pinfeed holes MUST NOT be present on forms filed with IRS.

.10 Use decimal points to indicate dollars and cents. DO NOT use dollar signs ($), ampersands (&), asterisks (*), commas (,), or other special characters.

.11 DO NOT FOLD Forms 1096, 1098, 1099, or 5498 mailed to IRS. Mail these forms flat in an appropriately sized envelope or box. Folded documents cannot be readily moved through the scanner transport used in IRS processing.

.12 *DO NOT STAPLE* Forms 1096 to the returns being transmitted. Staple holes in the vicinity of the return code number reduce our ability to machine scan the type of document being processed.

.13 MAIL completed paper forms to the IRS service center specified in the *1990 Instructions for Forms 1099, 1098, 5498 and W-2G.*

SEC. 6. TAXPAYER IDENTIFICATION NUMBER

.01 Under section 6109 of the Internal Revenue Code, a person with respect to whom a return, statement, or other document is required to be made by another person must furnish his taxpayer identification number (TIN) to such other person. The number must be furnished to the filer whether or not the form recipient is required to file a tax return or is covered by Social Security. Section 6109 also requires filers to request the TINs and place them on returns required to be filed with IRS.

.02 Filers must provide correct TINs on all forms submitted. It is particularly important that correct social security and employer identification numbers for form recipients be provided on magnetic media or paper forms submitted to IRS.

.03 Section 6721 of the Internal Revenue Code imposes a tiered penalty on filers for each return filed with an incorrect or a missing TIN for Forms 1099, 1098 and W-2G.

.04 The TIN required to be furnished to the IRS depends primarily on the manner in which the account is maintained in the filer's records. Usually, the TIN provided must be that of the owner of the account. If an account is recorded as a joint account, i.e., more than one person is listed on the account, furnish the TIN and name of the first person listed on the record. For individuals, including sole proprietors, the TIN is the social security number. For other entities, furnish an employer identification number (EIN).

.05 Sole proprietors filing information returns should show their EIN as the filer's TIN on the return if required to have an EIN. If not, they should show their SSN.

.06 The charts below will help you determine the TIN to be furnished to IRS.

Chart 1. Guidelines for Social Security Numbers

Type of Account	For Form Recipient's TIN Enter the Social Security Number of	On the 1st Name Line of the Form Recipient's Portion of the Return Enter the Name of
1. Individual account.	The individual	The individual
2. Joint account (two or more individuals, husband and wife, adult and minor).	The actual owner of account. (If more than one owner, the TIN of the first individual on the account)	The individual whose SSN is entered
3. Account in the name of a guardian or committee for a designated ward, minor, or incompetent person.	The ward, minor, or incompetent person	The individual whose SSN is entered
4. Custodian account of a minor (Uniform Gift (or Transfers) to Minors Act).	The minor	The minor
5. The usual revocable savings trust account (grantor is also trustee).	The grantor-trustee	The grantor-trustee
6. So-called trust account that is not a legal or valid trust under state law.	The actual owner	The actual owner
7. Sole proprietorship.	The sole proprietor owner	The sole proprietor owner, not the sole proprietor's business name

Chart 2. Guidelines for Employer Identification Numbers

Type of Account	For Form Recipient's TIN Enter the Employer Identification Number of	On the 1st Name Line of the Form Recipient's Portion of the Return Enter the Name of
1. A valid trust, estate, or pension trust.	Legal entity. (Do not furnish the identification number of the personal representative or trustee unless the name of the representative or trustee is used in the account title)	The legal trust, estate, or pension trust
2. Corporate	The corporation	The corporation
3. An association, club, religious, charitable, educational, or other tax-exempt organization.	The organization	The organization
4. A partnership account held in the name of the business.	The partnership	The partnership
5. A broker or registered nominee/middleman.	The broker or nominee/middleman	The broker or nominee/middleman
6. Account with the Department of Agriculture in the name of a public entity, such as a state or local government, school district, or prison, that receives agriculture program payments.	The public entity	The public entity

SEC. 7. MAGNETIC MEDIA FILING

.01 IRS encourages all filers including nominees (hereafter collectively referred to as filers) to file information returns on magnetic media instead of paper forms. All forms listed in section 1.01 (except Form 1096) may be filed on magnetic media.

.02 Any person who is required to file 250 or more information returns for one calendar year must file on magnetic media. The 250-or-more requirement applies separately to each type of form. The requirement applies to any person for any period unless such person establishes that

this requirement would result in undue hardship and requests and receives a waiver from the filing requirements. To request a waiver from filing on magnetic media, submit a waiver request on a written statement or Form 8508, Request for Waiver From Filing Information Returns on Magnetic Media, 90 days before the due date of the return and send it to the following address: Internal Revenue Service, Martinsburg Computing Center, P.O. Box 1359, Martinsburg, WV 25401-1359. Requests for undue hardship waivers not received at least 90 days prior to the due date will not be approved. Generally, new brokers and new barter exchanges reporting Form 1099-B data to IRS, may request an undue hardship exception by filing a waiver request by the end of the second month following the month in which they became a broker or barter exchange.

.03 Specifications for filing information returns on magnetic tape, 8 inch, 5¼ inch, and 3½ inch diskette are contained in various revenue procedures relating to requirements and conditions for filing information returns on magnetic media. Copies of these procedures may be obtained from any Internal Revenue district office or by writing to the address in .02 above or calling 1-800-824-FORM though September 30, 1990. Beginning October 1, 1900 the number will be 1-800-829-3676 (TAXFORM). Filers or agents who are required to, or want to, file information returns on magnetic media must file Form 4419, Application for Filing Information Magnetically/Electronically. Forms 4419 must be filed prior to submitting returns magnetically or electronically. IRS will provide a written reply to the applicant and further instructions at the time of approval. The application must be sent to the Martinsburg Computing Center address in .02 above.

.04 Because many states accept information returns filed on magnetic media, savings may be obtained if similar media is used for filing with IRS and state tax agencies. For information regarding state magnetic media filing requirements, filers should contact the respective state tax authority.

SEC. 8. STATEMENTS TO FORM RECIPIENTS AND FORM RECIPIENT COPIES

.01 FURNISHING STATEMENTS TO RECIPIENTS.—Forms 1099-INT, DIV, OID, and PATR. For payments of interest and dividends reportable on Forms 1099-DIV (for dividends reportable under section 6042 of the IRC), 1099-INT (except for interest reportable under section 6041), 1099-OID, or 1099-PATR, an official Form 1099 must be furnished to a form recipient either in a statement mailing by first-class mail or in person. For payments of royalties reportable on Form 1099-MISC, you are also required to furnish the statement in person or in a statement mailing by first-class mail, but the statement need not be the official form. (The statement mailing requirements does not apply to the forms listed in 8.04.) These forms may be mailed or provided to the recipient in one of two ways: (1) in a statement mailing with other Forms 1098, 1099 or 5498 form recipient statements, a check, a letter explaining why no check is enclosed, a statement of the person's account, Forms W-8 and W-9, Forms W-2 and W-2P, and a letter limited to an explanation of the tax consequences of the enclosed form recipient statements. The statement " Important Tax Return Document Enclosed" must appear on the outside of the envelope and on each check, letter, or account statement in a bold and conspicuous manner. A form recipient statement may be perforated to a check with respect to the account reported on the payee statement or to a statement of the payee's specific account if payments on such account are reflected on the form recipient statement. The enclosure to which the form recipient statement is perforated must contain, in a bold and conspicuous type, the legend "Important Tax Return Document Attached." (2) in a separate mailing with other Forms 1098, 1099, or 5498 form recipient statements, Forms W-8 and W-9, Forms W-2 and W-2P, and a letter of the tax consequences of the enclosed form recipient statements. If you make a separate mailing you are not required to include the legend "Important Tax Return Document Enclosed" on the envelope. NOTE: Whether you use method (1) or (2), no other information, such as advertising, promotional material, or a quarterly or annual report, may be mailed with the form recipient statement or provided in person with the form recipient statement without violating these requirements. See Notice 87-17, 1987-1 C.B. 454, and Notice 87-70, 1987-2 C.B. 380, for the rules on how these statements should be provided to form recipients.

.02 SUBSTITUTE STATEMENTS TO RECIPIENTS.—The requirement to furnish form recipients with an official Form 1099-DIV, INT, OID, and PATR, may be met by furnishing Copy B of the official form or by furnishing a substitute Form 1099 (form recipient statement) if it contains the same language as that of the official IRS form, such as the aggregate amount paid to the form recipient, any Federal income tax withheld under IRC section 3406 of the Code, the name, address, and TIN of the person making the return, and any other information required by the official form. Generally, information not required by the official form should not be included on the form because it may violate the mailing requirements (see .01 above). In addition, the form recipient statement for interest, dividends, patronage dividends, and original issue discount must contain the information listed below.

1 Payment boxes, captions and numbers that are applicable must be clearly identified, using the same wording and numbering as on the official form.

2 The form recipient statement must contain all applicable form recipient instructions provided on the front and back of the official IRS form.

3 The form recipient statement must contain the following statement in bold and conspicuous type, "This is important tax information and is being furnished to the Internal Revenue Service. If you are required to file a return, a negligence penalty or other sanction may be imposed on you if this income is taxable and IRS determines that it has not been reported."

4 The caption "Federal income tax withheld" should be in bold face

type on the form recipient statement.

5 The form recipient statement must contain the Office of Management and Budget (OMB) number as shown on the official IRS form.

6 The form recipient statement must show the title and number of the official IRS Form 1099 for which it substitutes.

7 If the form recipient statement contains all the information listed in 1 through 6 above, layout and format of the form is at the discretion of the filer.

.03 COMPOSITE SUBSTITUTE STATEMENTS.—A composite form recipient statement is permitted for reportable payments of interest, dividends, original issue discount, and/or patronage dividends (Forms 1099-INT, DIV, OID or PATR) when one payer is reporting more than one of these payments during a calendar year to the same form recipient. Do not include any other Forms 1099 (i.e. 1098, 1099-A, 1099-B) on a composite state with the forms listed above. This will violate the official form requirements. Although the composite form recipient statement may be on one form, the format of the composite form recipient statement must satisfy the following requirements in addition to the requirements listed in .02 above.

1 All information pertaining to a particular type of payment must be located and blocked together on the form and must be separate from any information covering other types of payments included on the form.

2 The title of the official IRS form or forms for which this form recipient statement substitutes must be shown at the beginning of each appropriate block of information.

3 Any information required by the official IRS form that would otherwise be repeated in each information block is only required to be listed once in the first information block on the composite form. For example, there is no requirement to report the name of the filer in each information block.

.04 SUBSTITUTE STATEMENTS TO RECIPIENTS.—Forms 1098, 1099-A, 1099-B, 1099-G, 1099-MISC, 1099-R, 1099-S, 5498, W-2G (1099-INT and 1099-DIV in certain cases). Statements to form recipients of payments reportable on Forms 1098, 1099-A, 1099-B, 1099-G, 1099-MISC, 1099-R, 1099-S, 5498, 1099-DIV (for section 404(k) dividends reportable under section 6047), and 1099-INT (only for payments reportable under section 6041) should meet the following requirements:

1. The filer and form recipient information required on the official IRS form must be included.
2. All money amounts and information required to be reported to the form recipient must be titled on the form recipient statement in substantially the same manner as those on the official IRS form.
3. Form recipient statements must contain the following:
   (1) Forms 5498 and Form 1099-R—"This information is being furnished to the Internal Revenue Service."
   (2) Forms 1099-B, 1099-DIV, 1099-G, 1099-INT, 1099-MISC and W-2G— "This is important tax information and is being furnished to the Internal Revenue Service. If you are required to file a return, a negligence penalty or other sanction may be imposed on you if this income is taxable and the IRS determines that it has not been reported."
   (3) Form 1099-A—"This is important tax information and is being furnished to the Internal Revenue Service. If you are required to file a return, a negligence penalty or other sanction may be imposed on you if taxable income results from this transaction and the IRS determines that it has not been reported."
   (4) Form 1098—(a) "This is important tax information and is being furnished to the Internal Revenue Service. If you are required to file a return, a negligence penalty or other sanction may be imposed on you if the IRS determines that an underpayment of tax results because you overstated a deduction for this mortgage interest on your return."
   (b) "The amount shown may not be fully deductible by you on your Federal income tax return. Limitations based on the cost and value of the secured property may apply. In addition, you may only deduct an amount of mortgage interest to the extent it was incurred by you, actually paid by you, and not reimbursed by another person."
   (5) Form 1099-S—"This is important tax information and is being furnished to the Internal Revenue Service. If you are required to file a return, a negligence penalty or other sanction may be imposed on you if this item is required to be reported and the IRS determines that it has not been reported." NOTE: You may use a Uniform Settlement Statement (under RESPA) as the written statement if it is conformed by designating on the statement the legend described above and by designating which information is being reported to IRS on Form 1099-S.
4. Appropriate instructions to the form recipient, similar to those on the official IRS form, must be provided to aid in the proper reporting of the items on the form recipient's income tax return. For payments reported on Form 1099-B, the requirement to include on the statement furnished to form recipients instructions that are substantially similar to those on the official IRS form may be satisfied by providing form recipients with a single set of instructions with respect to all statements required to be furnished in a calendar year.

.05 Form recipient statements specified in .04 above may contain information other than that required by the official IRS form. However, if other information is included, such statements cannot be mailed with Forms 1099-DIV, INT, OID, PATR, MISC (for royalty payments) or their

substitutes without violating the statement mailing requirements.

.06 COMPOSITE SUBSTITUTE STATEMENT—A composite form recipient statement for forms specified in .05 is permitted when one filer is reporting any or all of these payments during a calendar year to the same form recipient. A composite statement is not allowable for a combination of forms listed in 8.01 above and forms listed in 8.04. For example, a composite statement of Forms 1098 and 1099-INT (for interest reportable under section 6049) is not allowable. Although the composite form recipient statement may be on one form, the format of the composite form recipient statement must satisfy the requirements listed in items (1), (2), and (3) of .03 above.

PART B—SPECIFICATIONS FOR SUBSTITUTE FORMS TO BE FILED WITH IRS (EXCEPT FORM W-2G)

SEC. 1. GENERAL

.01 The following specifications prescribe the format requirements of Forms 1098 (Copy A), 1099 (Copy A), 5498 (Copy A), and 1096.

.02 The form identifying number (e.g., 9191 for Forms 1099-DIV) must be printed in non-reflective black carbon-based ink in print positions 25 through 29 using an OCR A font. The ballot boxes located to the right of the form identifying number must be 10-point boxes.

SEC. 2. SPECIFICATIONS FOR FORMS 1096 AND COPY A OF FORMS 1098, 1099 AND 5498

.01 The substitute form must be an exact replica of the official IRS reproduction proof with respect to layout and contents. "Spot Carbons" are *not permitted* for Copy A. The Government Printing Office (GPO) symbol must be deleted. Specifications for Copy A are provided in Exhibits A thru N.

.02 Color and quality of paper. Paper for Copy A (cut sheets and continuous pinfeed forms) as specified by JCP Code 0-25, dated November 29, 1978, must be white 100% bleached chemical wood, optical character recognition (OCR) bond produced in accordance with the following specifications:

NOTE: Reclaimed fiber in any percentage is permitted, provided the requirements of this standard are met.

1 Acidity: pH value, average, not less than 4.5

2 Basis Weight 17 x 22
500 cut sheets 18-20
Metric equivalent—g/m2... 75

A Tolerance of +5 pct. shall be allowed.

3 Stiffness: Average, each direction, not less than—milligrams 50

4 Tearing strength: Average, each direction, not less than—grams 40

5 Opacity: Average, not less than—percent 82

6 Thickness: Average—inch—0.0038

Metric equivalent—mm—0.097

A tolerance of +0.0005 inch (0.0127 mm) shall be allowed.

Paper shall not vary more than 0.0004 inch (0.0102 mm) from one edge to the other.

7 Porosity: Average, not less than—seconds 10

8 Finish (smoothness): Average, each side—seconds.. 20-55

For information only, the Sheffield equivalent—units 170-100

9 Dirt: Average, each side, not to exceed—parts per million 8

.03 All printing will be in red OCR dropout ink Sinclair-Valentine J-6983 or an exact match, except for the 4-digit form identifying numbers appearing in the upper middle margin on the official IRS form, which will be printed in non-reflective carbon-based black ink. The screened area of any substitute form should generally correspond to that present on the official form. Separation between fields must be 0.1 inch. The numbered captions are printed as a solid with no screened background.

OCR Specifications

The contractor must have or initiate a quality control program to assure OCR ink density. In addition he or she must have at, or adjacent to the production area either a MacBeth PCM-II tester or a Kidder 082A tester for testing to be accomplished at regular intervals throughout a shift.

Paper and Ink

Readings will be made when printed on approved 20 lb. White OCR bond with a reflectance of not less than 80%. Black ink used must not have a reflectance greater than 15%. These readings are based on requirements of the "REI Input 80 Model C1 & D" Optical Scanner using Sinclair—Valentine J-6983 red ink or equal.

MacBeth PCM II Tester

The tested Print Contrast Signal (PCS) values when using the MacBeth PCM-II tester on the "C" scale must range from .01 minimum to .06 maximum.

Kidder 082A Tester

The tested Print Contrast Signal (PCS) values when using the Kidder 082A tester on the Infra Red (IR) scale must range from .12 minimum to .21 maximum. White calibration disc must be 100%, sensitivity must be set at one (1).

Alternative Tester

If an alternative tester is used it must be approved by the Government so that tested (PCS) values can be established with this equipment. Approval may be obtained by writing to the following address:

Commissioner of Internal Revenue
Attn: HR:F:P:P Room 1237
Tax Forms Procurement Analyst
1111 Constitution Avenue, N.W.
Washington, DC 20224

Printing exceeding the maximum screen density will cause the forms to be nonprocessable. If this happens the filer may be subject to a $50 penalty for each form printed or prepared that is submitted in a nonprocessable format. Thus, the filer should resubmit acceptable forms promptly to reduce or avoid the penalty.

.04 Typography—Type must be substantially identical in size and shape with corresponding type on the official form. All rules are either ½-point or ¾-point. Rules must be identical to that on the official IRS

form. NOTE: The form identifying number must be nonreflective carbon-based black ink in OCR A Font.

.05 Dimension—Three official Forms 1098, 1099 or 5498 (Copy A) are contained on a single page, which is 8 inches wide (exclusive of any snap—stubs and/or pinfeed holes) by 11 inches deep. See exhibits A thru N in this publication for the correct form measurements. If the right and top margins are properly aligned, the left margin for all forms will be correct. All margins must be free of all printing.

.06 The depth of the individual trim size of each form on a page must be the same (3-⅔ inches) as that of the official form.

.07 Perforations are required between forms on all copies except Copy A to enable the separation of individual forms.

.08 The words "For Paperwork Reduction Act Notice and instructions for completing this form, see *Instructions for Forms 1099, 1098, 5498, and W-2G*" must be printed on Copy A and Copy C.

.09 The OMB Number *must* be printed on *each* ply in the same location as on the official form.

.10 *Privately printed continuous substitute forms (Copy A) must be perforated at each 11" (3-on) page depth. No perforations are allowed between the 3-⅔" forms on a single copy page of Copy A.*

.11 The words "*Do NOT Cut or Separate Forms on This Page*" must be printed in red dropout ink (as required by form specifications) between the three forms. NOTE: Perforations are required between all the other individual copies (Copies B and C, and Copies 1 and 2 for Form 1099-R and Form 1099-MISC) included in the set.

.12 The back of a substitute Copy A must be free of all printing.

.13 Carbonized. "*Spot carbons*" are *not permitted* for Copy A. Interleaved carbon must be of good quality to assure legibility of information on all parts to preclude smudging and should be black. "Chemical transfer paper" is permitted without IRS approval.

.14 Printer's symbol—The GPO symbol must not be placed on substitute Copy A. *In place of the GPO symbol,* the employer identification number (EIN) of the forms printer must be printed in the bottom margin on the face of each individual form of Copy A, or the bottom margin on the reverse side of each Form 1096.

.15 A postal indicia may be used if it meets the following criteria:
a) it is printed in the OCR ink color prescribed for the form; b) no part of the indicia is within 1 print position of the scannable area; c) there is a .33 inch head margin from the corrected box; and d) there is a ¼ inch right margin.

PART C. SPECIFICATION FOR SUBSTITUTE FORMS W-2G TO BE FILED WITH IRS

SEC. 1. GENERAL

.01 The following specifications prescribe the format requirements for Form W-2G—COPY A ONLY.

.02 A filer may file a substitute Form W-2G with IRS (hereinafter referred to as substitute Copy A). Substitute forms submitted to IRS must be exact replicas of the official forms with respect to layout and contents. The Government Printing Office symbol must be deleted.

SEC. 2. SPECIFICATIONS FOR COPY A FOR FORMS W-2G

.01 Color and Quality of Paper—Paper for Copy A must be white chemical wood bond, or equivalent, 20 pound (basis 17 X 22-500), plus or minus 5 percent. The paper must consist of principally bleached chemical woodpulp and be free from unbleached or ground woodpulp or recycled printed paper. It also must be suitably sized to accept ink without feathering.

.02 Color and Quality of Ink—All printing must be in a high quality non-gloss black ink. Bar codes should be free from picks and voids.

.03 Typography—Type must be substantially identical in size and shape with corresponding type on the official form. All rules on the document are either ½ point (.007 inch), 1 point (0.015 inch) or 3 point (0.045). Vertical rules must be parallel to the left edge of the document; horizontal rules, parallel to the top edge.

.04 Dimensions—The official form is 8 inches wide x 3-⅔ inches deep, exclusive of a ⅔ inch snap stub on the left side of the form. The snap feature is not required on substitutes. The top and right margins must be ¼ inch plus or minus .0313. If the top and right margins are properly aligned, the left margin for all forms will be correct. All margins must be free of all printing. If the substitute forms are in continuous or strip form, they must be burst and stripped to conform to the size specified for a single form before they are filed with IRS.

1 The width of a substitute Copy A must be 8 inches. The left margin must be free of all printing other than that shown on the official form.

2 The depth of a substitute Copy A must be 3⅔ inches.

.05 Clear Area—The back of Copy A must be free of all printing.

.06 Carbonized forms or "spot carbons"— Carbonized forms and "spot carbons" are not permitted. Interleaved carbons, if used, should be black and good quality to preclude smudging.

.07 Printer's Symbol—The Government Printing Office symbol must not be printed on substitute Forms W-2G. In place thereof, the printer's employer identification number should appear in the same place on such substitute forms.

PART D. ADDITIONAL INSTRUCTIONS FOR FORMS 1098, 1099, 5498, AND W-2G

SEC. 1. OTHER COPIES

.01 Copies 1 and 2, B, C and D are included in the official assembly for the convenience of the filer. Although there is no requirement that privately printed substitute forms include these copies, Copies B and C will satisfy the requirement of law and regulations concerning the statement of information that is required to be furnished to the form recipient. Copies C and D may be desired as a filer record copy. Only Copy A should be filed with IRS.

.02 Arrangement of Assembly The parts of the assembly shall be arranged, from top to bottom, as follows: Form 1098 Copy A, "For Internal Revenue Service Center"; Copy B "For Payer"; Copy C "For Recipient." Forms 1099 (except 1099-A, 1099-R, 1099-MISC, 1099-S, 5498, and W-2G) Copy A, "For Internal Revenue Service Center"; Copy B "For Recipient"; Copy C "For Payer." Form 1099-A Copy A, "For Internal Revenue Service Center"; Copy B "For Borrower"; Copy C

"For Lender." Form 1099-R and 1099-MISC Copy A, "For Internal Revenue Service"; Copy 1, "For State Tax Department"; Copy B, "For Recipient"; Copy 2, "To be filed with recipient's state income tax return when required."; Copy C, "For Payer." Form 1099-S Copy A,"For Internal Revenue Service Center"; Copy B, "For Transferor"; Copy C, "For Filer." Form 5498 Copy A, "For Internal Revenue Service Center"; Copy B "For Participant"; Copy C "For Trustee or Issuer." Form W-2G Copy A, "For Internal Revenue Service Center"; Copy 1, "For State Tax Department"; Copy B and Copy C "For Winner's Records"; Copy 2 "To be filed with winner's state income tax return, if required."; Copy D "For Payer."

SEC. 2. REPRODUCTION PROOFS

.01 Reproduction Proofs—IRS Publication 1192 containing order blanks and a list of items available for reproduction proofs are mailed annually to requesters of record and to other users upon request. Printers and others wishing to obtain reproduction proofs may send their requests to:

Internal Revenue Service
Attn: Repro Coordinator
4300 Carolina Ave
Richmond, VA 23222

.02 Pub. 1192 indicates the appropriate charge for each form, instruction, and publication. Order blanks must be filled out and submitted along with a total payment for all items ordered. Orders will be filled as the reproduction proofs become available. Orders without the correct payment will be returned.

SEC. 3. OMB REQUIREMENTS

.01 Office of Management and Budget (OMB) Requirements for Substitute Forms—Public Law 96-511 requires: (1) OMB approval of Internal Revenue Service tax forms, (2) that each form show (in the upper right corner) the OMB approval number, and (3) the form (or its instructions) state why IRS is collecting the information, how it will be used and whether it must be given to IRS. The official IRS forms or instructions will contain this information.

.02 As it applies to substitute IRS forms this means:

1 All substitute forms must show the OMB number as it appears on the official IRS form.

2 For Copy A, the OMB number must appear exactly as shown on the official IRS form.

3 For any copy other than Copy A, the OMB number must use one of the following formats:

a OMB No. XXXX-XXXX (preferred) or;

b OMB # XXXX-XXXX

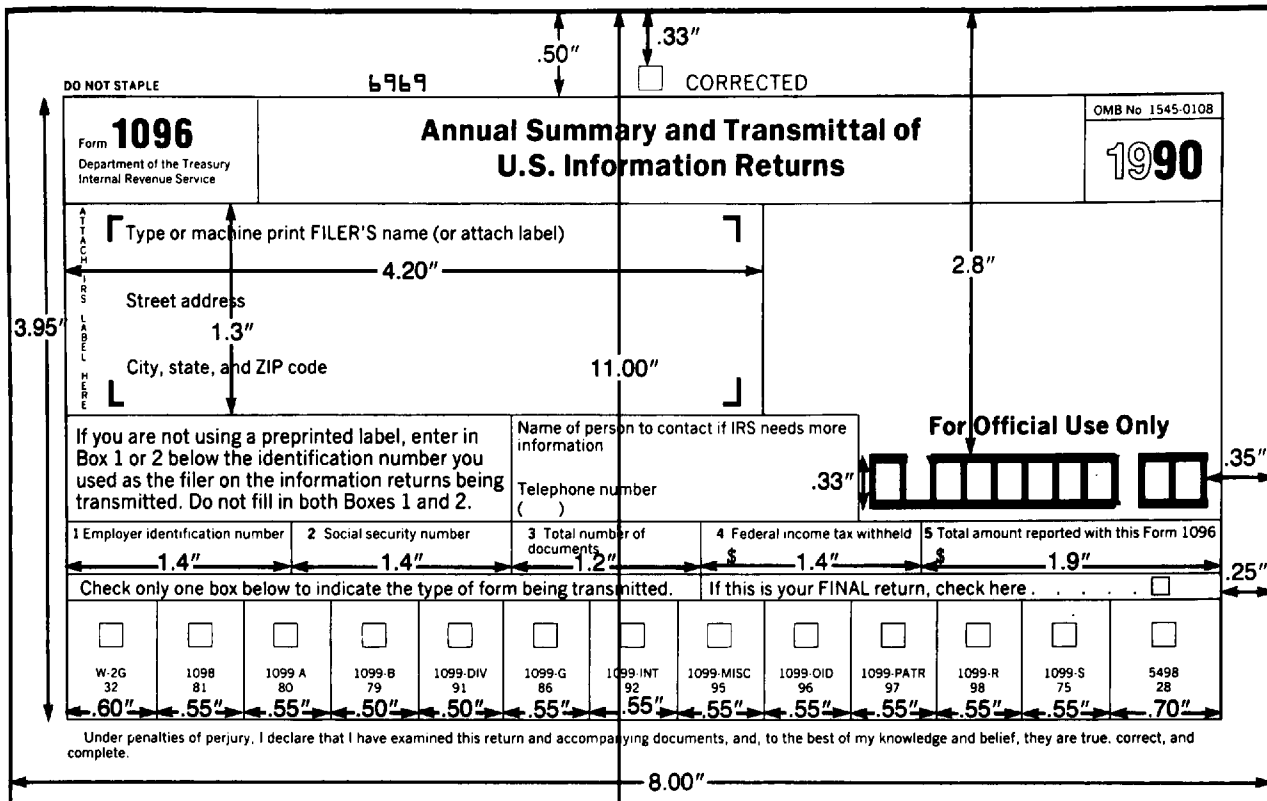
4 You must inform the users of your substitute forms of the reasons for IRS collection, use, and requirements, as stated in the instructions for the IRS form.

5 The official OMB approval numbers may be obtained from reproduction proofs or official IRS printed forms.

SEC. 4. EFFECT ON OTHER REVENUE PROCEDURES

Revenue Procedure 89-42 is superseded.

Exhibit A



Please return this entire page to the Internal Revenue Service. Photocopies are NOT acceptable.

Instructions

Purpose of Form.—Use this form to transmit paper Forms 1099, 1098, 5498, and W-2G to the Internal Revenue Service. DO NOT USE FORM 1096 TO TRANSMIT MAGNETIC MEDIA. See **Form 4804,** Transmittal of Information Returns Reported on Magnetic Media.

Use of Preprinted Label.—If you received a preprinted label from IRS with Package 1099, place the label in the name and address area of this form inside the brackets. Make any necessary changes to your name and address on the label. However, do not use the label if the taxpayer identification number (TIN) shown is incorrect. **Do not prepare your own label. Use only the IRS-prepared label that came with your Package 1099.**

If you are not using a preprinted label, enter the filer's name, address, and TIN in the spaces provided on the form.

Filer.—The name, address, and TIN of the filer on this form must be the same as those you enter in the upper left area of Form 1099, 1098, 5498, or W-2G. A filer includes a payer, a recipient of mortgage interest payments, a broker, a barter exchange, a person reporting real estate transactions, a trustee or issuer of an individual retirement arrangement (including an IRA or SEP), and a lender who acquires an interest in secured property or who has reason to know that the property has been abandoned.

Transmitting to IRS.—Group the forms by form number and transmit each group with a **separate** Form 1096. For example, if you must file both Forms 1098 and Forms 1099-A, complete one Form 1096 to transmit your Forms 1098 and another Form 1096 to transmit your Forms 1099-A.

Box 1 or 2.—Complete only if you are not using a preprinted IRS label. Individuals not in a trade or business must enter their social security number in Box 2; sole proprietors and all others must enter their employer identification number in Box 1. However, sole proprietors who are not required to have an employer identification number must enter their social security number in Box 2.

Box 3.—Enter the number of forms you are transmitting with this Form 1096. Do not include blank or voided forms in your total. Enter the number of correctly completed forms, not the number of pages, being transmitted. For example, if you send one page of three-to-a-page Forms 5498 with a Form 1096 and you have correctly completed two Forms 5498 on that page, enter 2 in Box 3 of Form 1096.

Box 4.—Enter the total Federal income tax withheld shown on the forms being transmitted with this Form 1096.

Box 5.—No entry is required if you are filing Form 1099-A or 1099-G. For all other forms, enter the total of the amounts from the specific boxes of the forms listed below:

Form W-2G	Box 1
Form 1098	Box 1
Form 1099-B	Boxes 2 and 3
Form 1099-DIV	Boxes 1a, 5, and 6
Form 1099-INT	Boxes 1 and 3
Form 1099-MISC	Boxes 1, 2, 3, 5, 6, 7, 8, and 10
Form 1099-OID	Boxes 1 and 2
Form 1099-PATR	Boxes 1, 2, 3, and 5
Form 1099-R	Box 1
Form 1099-S	Box 2
Form 5498	Boxes 1 and 2

For Paperwork Reduction Act Notice, see the separate Instructions for Forms 1099, 1098, 5498, and W-2G. Form **1096** (1990)

26 CFR 601.403: Miscellaneous excise taxes collected by return.
(Also Part 1, Section 4612.)

Rev. Proc. 90-45

SECTION 1. PURPOSE

This revenue procedure provides the interest rates to be used in computing the credit under section 4612(d) of the Internal Revenue Code and the procedures to be followed to claim the credit.

SEC. 2. BACKGROUND

Effective January 1, 1990, section 4612(d) of the Code provides a credit against so much of the tax imposed by section 4611 on crude oil and imported petroleum products as is attributable to the Oil Spill Liability Trust Fund financing rate. The total amount of credit allowable to a taxpayer is equal to the amount paid by the taxpayer before January 1, 1987, into the Offshore Oil Pollution Compensation Fund (Pollution Fund) and the Deepwater Port Liability Trust Fund (Port Fund), plus interest accrued before January 1, 1987, on those amounts.

SEC. 3. PROCEDURE

01. Any person liable under section 4611 of the Code for tax at the Oil Spill Liability Trust Fund financing rate on crude oil (IRS No. 18 on Form 720) or on imported petroleum products (IRS No. 21 on Form 720) may claim a credit against that liability under section 4612(d). The total credit allowable to a taxpayer is equal to the aggregate amount paid by the taxpayer before January 1, 1987, into the Pollution Fund and the Port Fund, plus interest accrued on those amounts before January 1, 1987.

02. The credit is claimed on Form 720, Part II, Line 2, "Adjustments," by following the instructions for Line 2. The statement required by those instructions must include a detailed explanation of how the taxpayer calculated the amount of principal and interest being claimed. The amount of the section 4612(d) credit claimed for any quarter shall not exceed the total amount of tax reportable on IRS No. 18 and IRS No. 21 for that quarter. Any excess credit amount is carried forward until exhausted.

03. For purposes of calculating interest for each calendar year in which an amount was paid into either the Pollution Fund or the Port Fund, the taxpayer shall treat all amounts paid within the calendar year as if paid into the Fund on the mid-point of that year.

04. For purposes of calculating interest accrued, the taxpayer shall assume that payments into the Pollution Fund and the Port Fund accrued interest at the following annual rates:

YEAR	*INTEREST RATE*
1979	5.13%
1980	5.13
1981	9.46
1982	14.13
1983	12.95
1984	11.81
1985	12.51
1986	11.95

05. For purposes of calculating interest accrued, interest may be compounded under any reasonable method consistently applied by the taxpayer.

SEC. 4. EXAMPLE

X, the operator of a United States refinery, is liable for the tax imposed by section 4611 of the Code on crude oil received at the refinery. *X* made payments into the Pollution Fund for liability imposed beginning in January 1985 and ending in March 1989. *X* paid $1,000 in 1985, $1,000 in 1986, $1,000 in 1987, $1,000 in 1988, and $250 in 1989. *X* is eligible to claim $2,000 of the amounts paid into the Pollution Fund (the amounts paid in 1985 and 1986) as a credit against its liability for tax reportable on IRS No. 18 on Form 720. No credit is allowed for amounts paid after December 31, 1986.

X also may claim a credit for the interest accrued before January 1, 1987, on the $2,000 it paid into the Pollution Fund before January 1, 1987. *X* computes the interest accrued as follows. The interest on the payment of $1,000 in 1985 is $1,000 times 12.51 percent times one-half, yielding $62.60 in interest for 1985. The interest rate on the $1,062.60 1985 principal and interest carried over into 1986 is 11.95 percent, yielding $126.98. The interest on the payment of $1,000 in 1986 is $1,000 times 11.95 percent times one-half, yielding $59.80 in interest for 1986. Thus, *X* computes the total interest accrued before January 1, 1987, as $249.38 ($62.60 plus $126.98 plus $59.80).

X is eligible to claim a total credit of $2,249.38 ($249.38 accrued interest plus $2,000 Pollution Fund payments) under section 4612(d) of the Code. *X*'s liability for tax reportable on IRS No. 18 of Form 720 for the quarter ending March 31, 1990, is $1,800. Therefore, *X* may claim only $1,800 on Form 720 for the quarter ending March 31, 1990. All or a portion of the excess amount ($449.38) must be carried over to subsequent Forms 720 on which *X* reports tax liability for IRS No. 18 or IRS No. 21.

SEC. 5. EFFECTIVE DATE

This revenue procedure is effective on January 1, 1990.

TOPIC	PAGES
Procedure for the Magnetic Tape Filing of Forms 1041 and 1065 Returns	6-12
TOPIC	
APPENDIX A (Return File Specifications for Form 1041 Returns)	13-25
APPENDIX B (Return File Specifications for Form 1065 Returns)	25-37
ATTACHMENTS	37-70

SECTION 1. PURPOSE

.01 This Revenue Procedure sets forth the specifications for the 1990 magnetic tape filing program of tax year 1989 U.S. Partnership Return of Income, Form 1065, and U.S. Fiduciary Income Tax Return, Form 1041. 1990 processing includes the following calendar/fiscal year endings:

Fiscal year filers—Fiscal year ending September 30, 1989 through August 31, 1990 (tax periods 8909, 8910, 8911, 9001, 9002, 9003, 9004, 9005, 9006, 9007 and 9008). If necessary, an extension of time to file covering at least a three month period may be filed for fiscal year tax period endings 8909, 8910 and 8911 only.

Calendar year filers—Calendar year ending December 31, 1989 (8912).

.02 Using this system, qualified return filers will submit tax returns to the Internal Revenue Service via magnetic tape.

.03 To participate in this program, filers who did not participate in the Electronic/Magnetic Tape Filing Program of 1989 (tax filing year 1988 of Forms 1065 and 1041), must complete an application (see Attachment II, Form 9041) and agree to follow all requirements and specifications in this Revenue Procedure. They must also successfully complete testing before being accepted in the program.

.04 Filers who were accepted in the Electronic/Magnetic Tape Filing Program for 1989, do not need to submit a new application unless there are changes or additions to the information provided to IRS previously. Last year's participants who wish to participate in the Magnetic Tape Filing Program for 1990 (tax filing year 1989 of Forms 1041 and 1065), should write or call the Philadelphia Service Center (Form 1041 filers) or the Andover Service Center (Form 1065 filers) to inform them of their intention. (See SEC. 3.01.2 for telephones and addresses).

.05 In any case, acceptance for participation will require applicants to successfully test that the files produced by their software conform with the Service's specifications. (See SEC. 3.02 for additional information on testing requirements.)

.06 The Service reserves the right to revoke the magnetic filing privilege of any filer who varies from these requirements and specifications or does not consistently submit error-free returns.

SEC. 2. COMPOSITION OF A MAGNETIC TAPE RETURN

.01 A magnetic tape return consists primarily of data submitted to the Service on magnetic tape and of paper documents which contain information that cannot be submitted on magnetic tape, such as signatures, documents prepared by third parties, etc. In total, a magnetic tape return must contain the same information as a comparable return filed entirely on paper documents.

.02 For the 1990 filing season, data transmitted on magnetic tape is limited to entries from the forms and schedules listed below.

1. FORM 1041

(a)	Form 1041	- U.S. Fiduciary Income Tax Return
(b)	Schedule D (Form 1041)	- Capital Gains and Losses
(c)	Schedule K-1 (Form 1041)	- Beneficiary's Share of Income Deductions, Credits, etc.
(d)	Form 4952	- Investment Interest Expense Deduction
(e)	Form 8656	- Alternative Minimum Tax Computation
(f)	Form W-2	- Wage and Tax Statement (A paper Form W-2 must also be attached to Form 8453-F)
(g)	Form W-2P	- Statement for Recipients of Annuities, Pensions, Retired Pay, or IRA Payments (A paper Form W-2P must also be attached to the Form 8453-F)

2. FORM 1065

(a)	Form 1065	- U.S. Partnership Return of Income
(b)	Schedule D (Form 1065)	- Capital Gains and Losses
(c)	Schedule K-1	- Partner's Share of Income, Credits, Deductions, etc.
(d)	Form 4562	- Depreciation and Amortization
(e)	Form 4797	- Sales of Business Property
(f)	Form 8271	- Investor Reporting of Tax Shelter Registration
(g)	Form 8308	- Report of a Sale or Exchange of Certain Partnership Interests

.03 The non-magnetic tape portion of the return consists of the following:

1. If submitting Form 1041, U.S. Fiduciary Income Tax Return:

Form 8453-F, U.S. Fiduciary Income Tax Declaration for Magnetic Tape/Electronic Filing, which is required for all returns (see SEC. 6.01 for more information). This signature document may optionally be produced in a consolidated format, when a filer is empowered to sign multiple tax returns. (See Attachment I-A.) In addition, Copy B of paper Forms W-2, W2-P and any other documents containing required signatures or supporting information must be attached.

2. If submitting Form 1065, U.S. Partnership Return of Income:

Form 8453-P, U.S. Partnership Declaration for Magnetic Tape/Electronic Filing, which is required for all returns (see SEC. 3.01 for more information). This signature document may optionally be produced in a consolidated format, when an individual is empowered to sign multiple tax returns. (See Attachment I-B.)

Copies of Forms 8453-F/P may be obtained by writing to the Andover Service Center at the address specified in Sec. 3.02 or by calling the Service Center where the magnetic tape files with the returns were filed. Filers submitting Form 1041 magnetic tape files must call the Philadelphia Service Center at (215) 969-7533. Filers submitting Form 1065 magnetic tape files must call the Andover Service Center at (508) 474-9632. Other documents containing required signatures or supporting information must also be attached.

3. Any other documents that
   (a) are not required by the Service,
   (b) are not IRS forms or schedules, or

(c) are not covered in (a) or (b) above, and are voluntarily included by the partnership/filer as supporting material.

.04 Exclusions

The following types of returns are excluded from the 1990 program.

1. For all returns:
   (a) Amended returns
   (b) Returns containing forms or schedules not listed above
   (c) Returns for any calendar/fiscal year ending prior to September 1, 1989 (8909) or calendar/fiscal year ending after August 31, 1990 (9008)
   (d) Returns submitted by a filer not accepted by the Service for magnetic tape filing
   (e) Delinquent returns (except for those returns covered by the extension provision)
   (f) Returns with dollars and cents entries. (Whole dollars only accepted) Round entries to whole dollars only upon output. Computed percentage distributions on Schedules K-1 may not balance due to this rounding.
   (g) Returns with powers of attorney attached
   (h) Returns with changes of accounting period and short period returns due to changes of accounting period, except those mandated by Tax Reform Act of 1986
   (i) Returns containing more than 1 Schedule D
   (j) Returns with foreign addresses
2. Form 1041 returns only:
   (a) Tentative returns
   (b) Family estate trust returns
   (c) Bankruptcy estate returns
   (d) Returns with more than one of each of the Forms 4952 or 8656
   (e) Grantor trusts created later than 12/31/80 who have requested a simplified filing requirement (Revocable Trusts)
   (f) Returns with more than 20 Forms W-2 or W-2P
   (g) Returns filed under Code Section 642(i) (Trusts)
   (h) Returns with refund amounts equal to or greater than $1,000,000
3. Form 1065 returns only:
   (a) Returns filed under Code Sections 6020(b), 501(d)(3), or 761(a)
   (b) Nominee returns
   (c) Returns with any dollar amount equal to or greater than $9,999,999,999
   (d) Returns with remittance
   (e) Inactive returns with no income on pages 1, 2 and 3
   (f) Returns with more than 1 Form 4797 or 3of Form 4562

SEC. 3. PROCEDURE FOR APPLICATION

.01 How to Apply

1. Filers who express interest in participating in the 1990 magnetic tape filing project will be sent an application Form 9041, Application for Electronic/Magnetic Tape Filing of Forms 1041, 1065, 5500-C/R (see Attachment II), a copy of Publication 1437 (Procedure and File Specifications for Magnetic Tape Filing of Fiduciary Returns Forms 1041 and Partnership Returns Forms 1065) and a copy of Publication 1438 (Record Layouts of Forms 1041 and 1065 Return Records for Tax Year 1989).

2. To be considered for participation in the program, filers must submit a completed application (Form 9041) to the Philadelphia Service Center (Form 1041 magnetic tape filers) or to the Andover Service Center (Form 1065 magnetic tape filers) (see exception in SEC. 1.04). Applications must be received no later than 30 calendar days prior to the return due date or extended due date. Applications will be accepted via FAX telecommunication at the following numbers (not toll-free numbers):

Philadelphia Service Center
FAX Number -(215) 969-2677
Andover Service Center
FAX Number -(508) 474-9425

Form 1041 filers must mail their applications to:

Internal Revenue Service
Philadelphia Service Center
11601 Roosevelt Blvd.
Philadelphia, PA 19155
D. P. 115

Form 1065 filers must mail their applications to:

Internal Revenue Service
Andover Service Center
310 Lowell St.
Andover, MA 05501
Electronic Filing Unit
Stop 983

3. Filers must indicate on the application which returns they intend to file.

.02 Testing Requirements

1. After the Internal Revenue Service receives the application, applicants who are developing software will be notified when and how their systems will be tested for acceptability.

2. When Form 1041 filers are ready to test, they should advise the Philadelphia Service Center Electronic Filing Unit at (215) 969-7533. Form 1065 filers should call the Andover Service Center Electronic Filing Unit at (508) 474-9632. Testing dates will be announced by the corresponding Service Center to each filer individually.

3. When several filers use the same software and communications system, that system needs to pass the acceptance testing once. All of the system's accepted filers may then use it for filing actual returns. Such a system must provide identical software capabilities and, if applicable, data communications capabilities to the accepted filers. An accepted filer must submit actual returns using the same system used for the acceptance test.

.03 Acceptance

1. The Service will review the test submissions of magnetic tape filers and provide feedback to the applicant. If the magnetic tape return file submission is not correctly formatted, or if the applicant's test returns contain errors, the Service will notify the applicant of the errors encountered on each return. The applicant must then correct the software to eliminate the indicated errors and resubmit the test file.

2. When applicants are accepted into the program, the Service will issue a letter to the applicant granting official acceptance to participate in the 1990 program. The letter will contain the filer's official Magnetic Tape Identification Number (MTIN, for Philadelphia Service Center magnetic tape filers) or Electronic Filing Identification Number (EFIN, for Andover Service Center magnetic tape filers). Those filers accepted into the program will be notified when they can begin submitting live returns.

SEC. 4. MAGNETIC TAPE FILER'S REQUIREMENTS AND RESPONSIBILITIES

.01 The entities involved in the magnetic tape filing program are listed below. The Service will accept magnetic tape returns only from filers who have been approved and accepted for magnetic tape filing. The Form 8453-F/8453-P must *always be signed by the person authorized to sign paper returns*, and by the paid preparer, if applicable. The categories of magnetic tape filer listed below are not mutually exclusive.

1. **Originator** The originator of a magnetic tape return is a firm, organization, or individual who deals directly with the taxpayer and performs the following:

(a) prepares a tax return or collects tax return data for purpose of having a magnetic tape return produced; and

(b) obtains the taxpayer's signature on Form 8453-F/P.

2. **Software Firm** Develops the software used to prepare returns for the magnetic tape program.

3. **Magnetic Tape Transmitter** Sends the return to the Internal Revenue Service on magnetic tape, in a format that IRS can process.

.02 Types of Magnetic Tape Filers

1. **Magnetic Tape Filer** Can be one or a combination of the categories described in SEC. 4.01.1 through 4.01.3 above depending on the specific function(s) performed in their relation with the taxpayer or IRS. A magnetic tape filer can fall under one or more of the following classifications:

(a) **The Fiduciary or Partnership** Fiduciaries and partnerships can take part in the program directly. If they want, they can develop their own return preparation software, file the returns on magnetic tape, and send in their Forms 8453-F/8453-P. If they prefer, they can use another firm's return preparation software or magnetic tape submission services. The filer is responsible for obtaining the fiduciary's signature on Form 8453-F or the partner's signature on Form 8453-P and sending the form to IRS.

(b) **Preparer** Falls within the definition of "income tax return preparer" in I.R.C. 7701(a)(36) and Treasury Regulation 301.7701-15. A preparer also submits returns to the IRS. If the preparer submits the return, then the preparer is responsible for obtaining the signed Form 8453-F/8453-P and sending it to the IRS.

(c) **Preparer/Magnetic Tape Transmitter** Fills in the return and computes the tax based on the information the taxpayer provides and submits the return on magnetic tape to the IRS.

(d) **Software Firm/Developer** Develops or designs software is used or sold for the purpose of creating and/or transmitting magnetic tape returns for the IRS.

.03 If a magnetic tape filer accepts returns prepared by others solely for purposes of magnetic tape input, this situation will be considered to come under the "mechanical assistance" exception described in Treasury Regulation 301.7701-15(d)(1), and hence the approved firm will not be considered to be a paid preparer for purposes of IRC7701(a)(36). However, the following requirements must be met:

1 The magnetic tape transmitter must obtain the signature of the person authorized to sign for the partnership/fiduciary (and the paid preparer's signature, if applicable), on the Form 8453-F/8453-P.

2 The return must meet all of the consistency tests required for any other magnetic tape return. The fiduciary, partnership, or paid preparer must correct the source material prior to submission. If the magnetic tape transmitter corrects any material, the magnetic transmitter becomes the return preparer.

.04 After a magnetic tape return is accepted by the IRS, it cannot be recalled or intercepted in process. Hence, if either the filer or the fiduciary or the partnership wishes to change any entries after the return has been accepted, an amended or corrected return must be filed on paper and mailed to the appropriate Service Center.

.06 The filer must promptly satisfy the Service's requests to resolve problems relating to missing or unsigned Forms 8453-F and 8453-P and provide copies of such forms within 3 workdays upon request by the Service.

.07 The filer must provide access to the IRS for all materials that the filer is required to maintain for the purpose of ensuring compliance with the requirements of this Revenue Procedure.

SEC. 5. MAGNETIC TAPE SPECIFICATIONS

.01 In most instances, the Service will be able to process any compatible tape files. Compatible tape files must meet the following criteria:

1.	Type of tape	- 0.5 inch (12.7mm) wide, computer-grade, magnetic tape on reels of up to 2400 feet (731.52m)
2.	Tape thickness	- 1.0 or 1.5 mils
3.	Reel diameter	- 10.5 inch (26.67 cm), 8.5 inch (21.59cm), or 7 inch (17.78cm)
4.	Recording density	- 6250 or 1600 bits per inch density
5.	Parity	- Odd
6.	Interrecord gap	- ¾ inch
7.	Recording mode	- 9 channel EBCDIC (Extended Binary Coded Decimal) or ASCII (American Standard Coded Information Interchange)
8.	Track	- 9 Track *unlabeled tape*
9.	Recording format	- Fixed. (See SEC. 5.04 below)
10.	File Format	- Standard Interchange (Variable blocked format)—Records cannot span reels or volumes (See Attachment VIII)

.02 A physical label should be affixed to the exterior of the tape with the following information:

1. NAME OF TRANSMITTER
2. MAGNETIC TAPE IDENTIFICATION NUMBER (MTIN) (FOR PHILADELPHIA SERVICE CENTER FILERS)
   or
   ELECTRONIC FILING IDENTIFICATION NUMBER (EFIN) (FOR ANDOVER SERVICE CENTER FILERS)
3. CHARACTER CODE (ASCII OR EBCDIC)
4. DENSITY (6250 OR 1600 BPI)
5. NUMBER OF TAPES (If multiple tapes indicate sequence number (e.g. "1 of 3", "1 of 2", etc.))
6. NUMBER OF RETURNS WITH REMITTANCES—Give this information for tape files containing Form 1041 returns only

.03 If a filer is submitting more than one type of return (i.e. Forms 1041 and Forms 1065) the different return records must be on separate tapes as separate files and they must be submitted to the appropriate Service Center. Filers submitting returns for Forms 1041 must send their magnetic tape files to the following address:

Internal Revenue Service
Philadelphia Service Center
11601 Roosevelt Blvd.
Philadelphia, PA 19155
D. P. 115

Filers submitting returns for Forms 1065 must send their magnetic tape files to the following address:

Internal Revenue Service
Andover Service Center
310 Lowell St.
Andover, MA 05501
Electronic Filing Unit
Stop 983

.04 Magnetic tape filers must use the fixed record format (see Appendix A for Form 1041 returns or Appendix B for 1065 returns) to write out the various sized logical records. Each logical record length will be fixed by the byte count specified in Publication 1438 (Record Layouts).

.05 Magnetic tape filers will be responsible for the security of all submitted data. Transmittals of tape returns will not be considered filed returns until they successfully pass through the IRS magnetic tape filing preprocessing system, are acknowledged as accepted and a complete and signed Form 8453-F/P is received by the IRS.

.06 Magnetic tape returns submitted at the end of the filing period:

1. To provide adequate time for acknowledgment of returns submitted prior to the return due date, filers will be allowed up to 7 calendar days to successfully *resubmit those returns which rejected when initially submitted timely* to the appropriate Service Center. Seven days should provide ample time to correct and resubmit any rejected returns.

2. If by 7th day following the due date of the return, an acknowledgment of acceptance has not been received for any previously filed or resubmitted return, the magnetic tape filer must immediately contact the Electronic Filing Unit at the Service Center for further instructions.

SEC. 6. HOW TO USE FORMS 8453-F and 8453-P

.01 Prior to submitting a magnetic tape return, the filer (see Part I, Sec 4.01) must obtain the signature of the fiduciary or the person authorized to sign the partnership's return. The filer must obtain the signature on Form 8453-F/8453-P or consolidated Form 8453-F/8453-P (see Attachments I-A and I-B). Once the signature for the 8453-F/P has been obtained the return may be submitted. After submitting a magnetic tape return (see SEC. 6.11 below), if the Service Center acknowledges the return or returns submitted as accepted, the filer must then attach one of the copies of the Acknowledgment Listing of Transmission sent by the Service Center (see Attachment VII), and any other documents described in SEC. 2.03.3(c) above, to the package containing Forms 8453-F/P, or the consolidated Forms 8453-F/P and mail the entire package to the Service Center. Only those Forms 8453-F/P for returns which have been accepted should be sent to the appropriate Service Center (see Sec. 7.03 below).

.02 If a partner/fiduciary is authorized to sign for more than one return, a consolidated 8453-F/8453-P (see Attachments I-A and I-B) may be used. A consolidated Form 8453-F/8453-P should be produced only for returns that are entered as a continuous series on the input file. The consolidated series on the input file must all be grouped together, with the same specific series number indicated in the consolidation indicator field (see Tax Return Record in Appendices A and B). An indicator of 00 indicates a nonconsolidated return. Consequently, there can be up to 99 groups of consolidated returns (01-99). For example, if the same input file were to contain two consolidated series, the first would have an indicator of 01 and the second would have an indicator of 02.

.03 A consolidated Form 8453-F or 8453-P consists of an official Form 8453-F/8453-P with one signature for the consolidated series and a Consolidated 8453-F/8453-P Control Record (see Attachments I-A and I-B). The following statement should be typewritten on the line for "Name of Estate or Trust" of Form 8453-F: SEE ATTACHED CONSOLIDATED 8453-F CONTROL RECORD. The following statement should be typewritten on line for "Name of Partnership" of Form 8453-P: SEE ATTACHED CONSOLIDATED 8453-P CONTROL RECORD.

.04 The attachment to a consolidated Form 8453-F or 8453-P (Consolidated 8453-F Control Record or Consolidated 8453-P Control Record) should include the Employer Identification Number (EIN), the Name Control, money amounts, and the "Partnership Return Information" or "Tax Return Information" as they would be stated on the Form 8453-P or 8453-F for each return submitted. EINs on the listing must correspond to the EINs as they are specified in the related return and Form 8453-F/8453-P. This listing will be used as an attachment document when sending consolidated Forms 8453-P or consolidated Forms 8453-F to the Service.

.05 Each consolidated listing can contain a minimum of 1 return and no more than 50 returns per page per consolidated Form 8453-F/8453-P (with the same consolidated series number).(See Attachment I-A and I-B for the formats of the Consolidated 8453-F Control Record and the Consolidated 8453-P Control Record.)

.06 The Document Locator Number (DLN) assigned by the IRS to each return, should be taken from the Acknowledgment Listing of Transmission and entered in the upper right-hand corner of the Form 8453-F/P. A range of DLNs should be entered for consolidated Forms 8453-F/P. It is important to remember to attach a copy of the Acknowledgment Listing of Transmission to the package containing Forms 8453-F/P, consolidated Forms 8453-F/P and any other documents as described in SEC. 2.03.3(c).

.07 It is incumbent upon the filer, if other than the entity from whom the return is due, to obtain legal authorization from clients to file their returns and, if applicable, to submit such returns on magnetic tape via a third party. To obtain this authorization, the filer must have the client sign either Form 8453-F or 8453-P, as appropriate.

.08 The Form 8453-F/8453-P serves the following purposes:

- authenticates the return;
- provides a transmittal for any associated paper documents that may be stapled to the declaration;
- authorizes the magnetic tape filer to transmit via a third-party transmitter; and
- authorizes the filer to submit the return on behalf of the fiduciary or partnership.

.09 The magnetic tape filer will be required to file a corrected declaration when:

- On Form 1041:

  the Total Income (Page 1, Line 9) on the declaration differs from the corresponding amount on the return by more than $25; or

  the Total Tax (Page 1, Line 23) on the declaration differs from the corresponding amount on the return by more than $5: or

  the Tax Due (Page 1, Line 26) or Overpayment (Page 1, Line 27) on the declaration differs from the amount shown on the return.

- On Form 1065:

  The Ordinary Income (loss) (Page 1 Line 21), Net Income (loss) from Rental Real Estate (Page 3, Line 2), or Net Income from Other Rentals (Page 3, Line 3c) differs from the corresponding amount on the return by more than $25.

.10 Magnetic tape filers must use the official Form 8453-P/8453-F or an approved substitute form which duplicates the official form in format, language, content, color and size. Magnetic tape filers who wish to develop a substitute form must send a sample of the proposed substitute for approval prior to using it to:

Internal Revenue Service
1111 Constitution Avenue, N. W.
Room 6449 ARFB
Washington, D. C. 20224

Attention: Substitute Forms Program Coordinator, R:E:O

Use of unapproved forms could result in suspension from the program.

.11 After the Form 8453-P/8453-F has been properly executed, including all signatures, the filer will transmit the magnetic portion of the tax return or mail the magnetic tape with the tax return data to the Philadelphia Service Center (Form 1041 filers) or the Andover Service Center (Form 1065 Filers) in accordance with Service specifications. By submitting returns using magnetic means, the filer is stipulating that the declaration has been executed and that the official descriptions of all entries of the magnetic tape return apply, i.e., retained copies do not contain any unauthorized caveats. (See SEC. 4 in this publication for signature requirements.)

SEC. 7. HOW THE MAGNETIC TAPE FILING PROCESS STARTS

.01 The Service will advise magnetic tape filers of the starting date for filing magnetic tape returns. Until this notification has been issued, magnetic tape returns will not be accepted by the Service.

.02 If the magnetic tape filing system breaks down for a potentially lengthy period, the Service will provide contingency instructions to magnetic tape filers.

.03 Where to submit material to be filed with the Service.

Participating filers must send to the Service all magnetic media data, all fiduciary or partnership declarations, and all other materials described in SEC. 2.03.3, of this publication. Magnetic tape files and Forms 8453-F that the Form 1041 filer mails must be submitted to the Philadelphia Service Center at the following address:

Internal Revenue Service
Philadelphia Service Center
11601 Roosevelt Blvd.
Philadelphia, PA 19155
D. P. 115

Magnetic tape files and Forms 8453-P that the Form 1065 filer mails must be submitted to the Andover Service Center at the following address:

Internal Revenue Service
Andover Service Center
P O Box 4050
Woburn, MA 01889-9741
Electronic Filing Unit
Stop 983

Any package shipped to the Andover Service Center via courier service must be shipped to the address below to insure receipt within 2 days:

Internal Revenue Service
Andover Service Center
310 Lowell St.
Andover, MA 05501
Electronic Filing Unit
Stop 983

Forms 8453-F/8453-P must be shipped to the Philadelphia Service Center or the Andover Service Center within 5 days after the filer receives the Acknowledgment Listing of Transmission.

.04 Distribution of Copies

1. The filer will maintain the documents referred to in SEC. 2.03, of this publication, and associate them with the related Acknowledgment Listing of Transmission and the consolidated 8453-F/8453-P control record (if applicable) (see Attachments 1-A and 1-B). IRS will send the filer two copies of the acknowledgment list. The filer is to keep one copy and use the other as a transmittal for the Forms 8453-F/8453-P and attachments, as explained in paragraphs 4 and 6 below.

2. The filer will send this material to the Philadelphia Service Center (Form 1041 filers) or the Andover Service Center (Form 1065 filers) in accordance with shipping instructions described in SEC. 7.04.3 through

7.04.7 below. Do not send Forms 8453-F/8453-P to the Service for returns that the Service have not acknowledged as accepted (see SEC. 8, of this publication).

3. A copy of the Acknowledgment Listing of Transmission must accompany each batch of Forms 8453-F/8453-P or Consolidated Forms 8453-F/8453-P. If the filer is submitting a Consolidated Form 8453-F/8453-P, and a return has been rejected or not acknowledged by the Service, (see SEC. 8, of this publication) line through the EIN and the Name Control on the Consolidated Form 8453-F/8453-P Control Record for each item which has not been accepted.

4. The filer must create the Consolidated Form 8453-F/8453-P Control Record prior to submitting the return file and should review it thoroughly to avoid duplication of EINs.

5. Place one copy of the Acknowledgment Listing of Transmission and the Consolidated Form 8453-F/8453-P Control Record (if applicable) at the front of the batch of Forms 8453-F/8453-P and secure with a rubber band or string. The paper documents in each batch must be in the same order the returns appear on the Acknowledgment Listing of Transmission.

6. Prepare batches of declarations for shipping, using envelopes or cartons, as volume or preference dictates. Send mailed packages to the address specified in SEC. 7.03 above.

7. Method of delivery is optional. However, declarations must be received by the service center within one week of receiving the Acknowledgment Listing of Transmission.

.05 To Be Retained By The Filer:

The filer must retain a copy of the Form 8453-F/8453-P. The filer copy of the magnetic tape return may be retained on computer media. In addition, the filer should retain any acknowledgment lists or files received from the Service for a period of 3 months to facilitate inquiries. If the filer is also the paid preparer, fiduciary, or the partnership, the normal retention periods for tax return information in the Internal Revenue Code will apply.

.06 To Be Provided To The Entity From Which The Return Is Due:

The filer must furnish each client fiduciary or partnership with a copy of all material filed with the Service covered in SEC. 2.02 and SEC 2.03, of this publication. In addition, the filer should advise any client to retain copies of materials which the fiduciary or partnership provided to the filer. The copy of the magnetic return described in SEC. 2.02 can be replicas of official forms or in a format designed by the filer, in which each data item refers to the line entries on the official forms.

SEC. 8. ACKNOWLEDGMENT OF RETURNS

.01 Each transmission of a file of magnetic tape returns will normally be acknowledged within 7 days, by a hardcopy printout specifying which returns have been accepted and which returns have been rejected. Any return not acknowledged as received by the Service will be considered not filed.

.02 If filers do not receive a hardcopy of an Acknowledgment Listing of Transmission within 7 workdays, or if they receive acknowledgments for returns which were *not submitted on the designated magnetic tape file transmission* they should immediately contact the Philadelphia Service Center (Form 1041 filers) or the Andover Service Center (Form 1065 filers).

.03 The acknowledgment file shows which returns have been accepted, rejected or identified as duplicates of earlier accepted returns (see Appendix A, SEC. 12). If the filer receives acknowledgment for returns not submitted, contact the Philadelphia Service Center (Form 1041 filers) or the Andover Service Center (Form 1065 filers) for further instructions (see paragraph .05, below for telephone).

.04 The filer should immediately match the acknowledgment file back to the original file submitted. Any tax return submitted *that is not acknowledged as either accepted (A), rejected (R) or duplicated (D)* will have been bypassed by the Service due to magnetic tape submission or file format problems and must be resubmitted to be considered a filed return. Tax returns that have been acknowledged as rejected (R) or duplicated (D) must be resubmitted until they are acknowledged as accepted (A).

.05 If a return has been rejected after three attempts, contact the Philadelphia Service Center Electronic Filing Unit (Form 1041 filers) at (215) 969-7533 or the Andover Service Center Electronic Filing Unit (Form 1065 filers) at (508) 474-9632.

SEC. 9. SPECIAL INSTRUCTIONS FOR FORM 1041 RETURNS WITH REMITTANCES

When remittances are sent with balance due Form 1041 returns, special instructions must be followed:

.01 All balance due returns that are to be accompanied with or without remittances must be submitted on a separate tape. Remittances may not be split between returns on separate tapes.

.02 Each remittance may cover up to 100 returns and multiple remittances may be received for the same magnetic tape.

.03 For each remittance, a remittance register (Attachment VI) must be prepared. The original remittance register, a duplicate, and an adding machine tape for the total of each remittance register must be sent to the Philadelphia Service Center at the address specified in SEC. 7.03, of this publication.

.04 Remittances and all appropriate backup material must accompany the magnetic tape submission.

SEC. 10. ADVERTISING STANDARDS

.01 Advertising Restrictions

Preparers/transmitters of magnetic tape returns, with respect to their capability to file returns on magnetic tape, shall comply with the advertising and solicitation provisions of 31 C.F.R. Part 10 (Treasury Department Circular No. 230). Such provisions prohibit the use in any way or participation in the use of any form of public communication containing a false, fraudulent, misleading, deceptive, unduly influencing, coercive, or unfair statement or claim. The prohibition includes, but is not limited to, statements pertaining to the quality of services rendered unless subject to factual verification, claims of specialized expertise not authorized by State or Federal agencies having jurisdiction over the preparer/transmitter, and statements or suggestions that the ingenuity and/or prior record of a preparer/transmitter rather than the merit of the matter

are principal factors likely to determine the result of the matter. *In addition, advertising must not imply a special relationship with the Internal Revenue Service.*

.02 Communications

Communications, including fee information, shall be limited to professional lists, telephone directories, print media, permissible mailings, radio, and television. In the case of radio and television broadcasting, the broadcast shall be prerecorded and the practitioner shall retain a recording of the actual audio transmission.

.03 IRS Endorsement Must Not Be Implied

Approval to participate in the program *does not imply* that the Internal Revenue Service endorses the computer software or quality of services provided. Therefore, any public communication in which a participant's magnetic tape filing .pa capability is referenced, whether through publication or broadcast, *must* clearly indicate that IRS acceptance of the participant for magnetic tape filing does not constitute an endorsement or approval of the quality of tax preparation services provided.

SEC. 11. MONITORING

.01 The Service monitors the quality of each participant's submissions to ensure that quality is kept at an acceptable level. IRS will counsel the filer about quality, if necessary.

.02 Participants must conform to the requirements of this revenue procedure.

.03 If a filer does not maintain an acceptable level of quality, the magnetic tape filing authorization may be revoked.

.04 The following conditions can lead to suspension:

1. Deterioration in the format of individual submissions
2. Unacceptable cumulative error rate
3. Violation of advertising standards
4. Unethical practices in return preparation
5. Untimely receipt of Forms 8453-F/8453-P, or illegible, missing or unapproved substitute Forms 8453-F/8453-P

.05 When suspended, IRS will counsel the filer about the requirements for reacceptance to the magnetic tape program.

SEC. 12. ADMINISTRATIVE REVIEW PROCESS

.01 An magnetic tape applicant who has been denied participation, or a filer who has been suspended, has the right to administrative review.

.02 Requests for administrative review of ineligibility or suspension decisions should be directed to the Office of the Director of Practice (HR:DP), 1111 Constitution Ave., NW, Washington, DC 20224.

SEC. 13. EFFECT ON OTHER DOCUMENTS

Publication 1437 (Specifications for Electronic/Magnetic Tape Filing of Fiduciary Returns Forms 1041 for Tax Year 1988) dated April 15, 1989 and Publication 1438 (Specifications for Electronic/Magnetic Tape Filing of Partnership Returns Forms 1065 for Tax Year 1988) dated March 10, 1989 are superseded.

APPENDIX A

Return File Specifications for Form 1041

SECTION	TITLE	PAGE
1	Overview	13
2	General Description	13
3	Field Specifications	14
4	Record Length Description	15
5	Trans Record	15
6	Return Record	15
7	Schedule Record	16
8	Form Record	16
9	Statement Record	16
10	Summary Record of Form 1041	18
11	Recap Record	19
12	The Acknowledgment Report	19
13	Data Validation and Rejection Criteria	29
14	Special Instructions for Entering Fiduciary's Name and Address	23
15	Special Instructions for Entering Tax Period Field	24

Note: A vertical line (|)on the right margin denotes a change. A delete (—|) denotes a deletion of text, field or fields. A "b" in the field description of a record layout denotes a blank space.

SECTION. 1. OVERVIEW

.01 The sequence of record submission is as follows:

1. The original TRANS record (this record identifies the magnetic tape transmitter).
2. Return records including the return (RET), schedule records other than the schedule K-1 (SCH), forms (FRM), statements other than Schedule K-1 statements (STM), Schedule K-1 (K1), statements for Schedule K-1 (STM), and summary records (SUM).
3. RECAP record.

.02 For all filers, a hardcopy acknowledgment report, separately identifying accepted and rejected returns, will be mailed. (See SEC. 12 in this appendix and Attachment VII).

.03 If the entire magnetic tape is rejected, the acknowledgment will

consist of information defining an acceptance code field with a value of "T" and all the reject error related to the magnetic tape submission.(See SEC. 12 in this appendix and Attachment VII).

SEC. 2. GENERAL DESCRIPTION

.01 All the data must be in ASCII or EBCDIC format. No binary fields may be transmitted.

.02 One four-byte, decimal-constant counter must precede each logical record within a block. The byte count must contain the length of the record plus the length of the byte count. Record byte counts are provided in these specifications as the first constant field preceding the Record ID and this byte count (which is not part of the record) is to be used only if the ANSI byte count convention is not used.

NOTE: IBM BYTE COUNT MUST NOT BE USED

.03 All records must be submitted in the fixed format.

.04 The first record on a magnetic tape file (the TRANS record) contains information regarding the filer, the transmission itself and the type of return records in the file. This record should be followed by the records comprising the tax returns being transmitted. The last record on a submitted file (the RECAP record) will provide balancing counts of all returns.

.05 A return file will consist of a variable number of fixed-length records. The size and format of the logical record for each page of each form, schedule etc., are specified herein. Maximum block size is limited to 28,672 characters per block. See Attachment VIII for examples of the variable blocking format.

.06 The logical records described herein may not be broken between physical records (i.e. "blocks"). Files must not be spanned.

.07 Each logical record within a submission must be preceded by a four-byte field (if the ANSI byte count convention is not used), that will be a record byte count containing a count of the number of bytes within the logical record—including the four bytes for the counter itself and the Start of Record Sentinel (****) .

.08 Every logical record must have as its last significant byte the record terminus character ("#"). Note that provisions have been made to allow for non-significant padding following the record terminus character, if the block contains only one logical record (blank padding should never separate logical records within a block). This padding is permitted to accommodate all the different computer systems being used to format the data.

.09 Each logical record should contain all data fields pertaining to one printed page of an official form or schedule. Continuation statements are allowed for certain fields that have been marked with an ampersand ("@") or an asterisk ("*"). The continuation statements are composed of line records corresponding to the print lines of a complete statement. Each line of a continuation statement ("STMbnn") is a logical record (see SEC. 9 for more details).

.10 The complete tax return of Form 1041 must consist of all logical records pertaining to it in the following sequence:

Return records, schedule records other than Schedule K-1 records, form records, statement records not related to Schedule K-1 records, Schedule K-1 records, statements for Schedule K-1 records, and summary records.

The only exception to this rule is that one series of statement line records for a single continuation statement that pertains to a Schedule K-1 must directly follow the applicable Schedule K-1. Schedules must be in alphabetical sequence and forms must be in alpha, then numeric, sequence.

All records must appear in the proper sequence, with the proper control information, and the counts of the schedules and forms must match the accumulators in the Summary Record. Otherwise, the return will be rejected. Return, schedule, form and statement records may contain additional sequential page records if they consist of more than one printed page. (Pages are numbered only within a form, schedule or statement, not across the return.)

.11 *Every return page must have a logical record present. Only the pages of other schedules or forms (in the proper sequence) which contain significant data, need to have a logical record present.* Therefore, a page need not be generated, if there are no entries on the page record of a form (except Form 1041) or schedule (see Sec. 13.02.4 below, for exception rules). Also, if page 2 of a form is generated, page 1 of the form must also be generated.

.12 The Return Type and Tax Period fields are Field Numbers 2 and 5 of the Return Record (see Appendix A, Sec. 6 below) respectively, included in each page of the return.

.13 If the number of data bytes appearing on the same line exceeds the number that can be contained in the space provided on the printed form or schedule, the data must be provided on a separate continuation statement (STM) record. Only fields preceded by an ampersand (@) or and asterisk (*) may contain statement ("STMbnn") references. There is a maximum of 2 pages per statement, 50 lines per page and 98 statement page records per tax return in total. Returns with more than 98 statement page records will be rejected. Schedule K-1 statements are not limited to 98 statement page records. Nevertheless, Schedule K-1 records are limited to two pages per statement and 50 lines per page. If "STMbnn" is used, no data should be entered in the base return. See Appendix A, Sec. 9 for specific details.

.14 Assign a 7-digit number to each Schedule K-1 (Field 010) in ascending order.

.15 A summary record will be the final record for each return. This record will contain magnetic tape filer identification data; counts of the schedules, forms and statements included in the return; and indicators for paper documents retained by the magnetic tape filer for subsequent submission to the IRS.

.16 The end of the logical record submission will be signaled by the recognition of the record terminus character of the RECAP record as the last logical record submitted.

.17 In magnetic tape files, the recognition of the Record Terminus character("#") followed by an End of Volume (EOV) marker (one tape mark), will indicate that there are still more tapes to be read. A return cannot be split between tapes. Otherwise, the recognition of the Record Terminus character followed by End of File (EOF) marker (two tape

marks), will indicate the last record of the tape file.

.18 The file should be unlabeled (no standard header or trailer records), and each file must contain only complete returns.

.19 Returns with the same calendar/fiscal year ending may be submitted on the same magnetic tape.

SEC. 3. FIELD SPECIFICATIONS

.01 Numeric Fields

1. All money fields:
   (a) in Form 1041 are 12 characters, 11 numerics followed by the sign character;
   (b) containing no significant data *must* be filled with zeros.
   (c) The significant numeric characters should be right-justified and zero-filled. Dollar signs, decimal points, or other non-numeric characters are not permitted.
   (d) Money fields must be all whole dollars (no cents).
2. The right-most position of any negative money field must contain the negative sign; for positive fields this position is always blank.

   Note: Fields that can contain either gain (income) or loss amounts, such as Line 4 Net Short-Term Capital Gain or Loss from Schedule D, or Form 1041, Line 6, Capital Gain or Loss, must have the applicable sign character, (i.e., blank for positive amounts and minus for negative amounts).

   Fields that can only contain loss amounts such as Schedule D (Form 1041), Line 5, Short-Term Capital Loss Carryover, must be positive fields.
3. All percentage fields must have five positions, left-justified and zero-filled. Do not enter the decimal point on the record. The decimal point will be assumed to be between the left-most and the second left-most positions. If percentage is less than 100%, precede the figure with a zero. For example, 25.32% would be entered as "02532" and 105% would be entered as "10500". If there is no percentage enter spaces.
4. Other numeric fields must all be numeric, right-justified and zero-filled. If the numeric field has no significant data it must be zero-filled (exceptions are ZIP Code date and Employer Identification Number (EIN) fields).
5. ZIP Codes must be a 5 or 9 character numeric fields, left-justified and blank-filled.
6. All dates must be entered in the MMDDYY, MMYY or YYMM format. If there is no date, enter spaces.

   Examples:

MMDDYY	December 15, 1988	- 121588
YYMM	Calendar/Fiscal Year Ending, December, 1989	- 8912
MMYY	Date placed in Service, December, 1989	- 1289

7. The EIN fields (for other than the Employer Identification Number of the Estate or Trust) and/or the SSN number must be blank filled if there is no entry.

.02 Alphanumeric fields

1. Except where designated, do not enter spaces etc. between data elements.
2. All alphabetic data must be in upper case only.
3. Special characters may be valid for specific fields as noted in the record specifications.
4. Literal fields must contain one of the exact character strings, as specified in the record specifications, or blanks.
5. Data fields without any information must be blank-filled unless otherwise specified.

.03 A "b" in the format description of a record layout denotes a blank space.

SEC. 4. RECORD LENGTH DESCRIPTION

.01 Logical return records must be submitted in a fixed format. All records within a return must be submitted exactly as defined with all the fields present. (See specifications throughout Appendix A and in record layouts in Publication 1438).

Each record must end with a Record Terminus Character ("#").

.02 The fixed ANSI byte count constant or the fixed constant shown as the first field in each record within Publication 1438, must be present always.

SEC. 5. TRANS RECORD

The first record on each file is the TRANS record, which will contain the following information. All participating filers that have been accepted into the Magnetic Tape Filing Program will be assigned an Magnetic Tape Identification Number, or MTIN. Fields 2, 3, and 6 pertain to the entity which has been accepted by the Philadelphia Service Center as a magnetic tape filer.

Field Identification		Length	Format
	Byte Count	4	Value "0168"
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	5	Value "TRANS"
(2)	EIN of Filer	9	Numeric
(3)	Filer Name	35	Alphanumeric
(4)	Processing Site	1	Alphanumeric Value = "C"
(5)	Transmission Date	6	Numeric MMDDYY

Field	Identification	Length	Format
(6)	Magnetic Tape Identification Number plus Filer's User Code	8	Numeric Value = NNNNNNnn NNNNNN = MTIN nn = Filer's user code; may be zero-filled
(7)	Julian Date of Transmissin	3	Numeric
(8)	Transmission Sequence Number for Julian Day in (7)	2	Numeric
(9)	Reserved for EF	3	Alphanumeric Values = Blanks
(10)	Paper Check Indicator (for Remittance Returns with paper checks attached, else Blank	1	Value = "1" if Paper Check
(11)	Return Form Type	5	Value = "1041b" left-justified
(12)	Filler	1	Alphanumeric Values = Blank
(13)	Address	35	Alphanumeric
(14)	City	24	Alphanumeric
(15)	State	2	Alphanumeric
(16)	Zip Code	9	Numeric Values for ZIP Code = nnnnnnnnn or nnnnnbbbb n = 0-9
(17)	Area Code, Telephone Number	10	Numeric
(18)	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 6. RETURN RECORD

Page 01 and 02 for each Form 1041 return will start with the following first 9 fields preceded by a byte count and the Start of Record Sentinel Characters. Each page of the return will have a new page record with the page number incremented.

Field	Identification	Length	Format
	Byte Count, Page 1 and 2	4	"0043" plus length of data fields
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	4	Alphanumeric Value = "RETb"
(2)	Return Type	6	Alphanumeric Value = "1041bb"
(3)	Consolidation indicator for Forms 8453-F	2	Numeric (00-99) (00 = nonconsolidated, 01-99 = consolidated)
(4)	Page Number	5	Alphanumeric Value = PGnnb, Valid range for nn = 01 to 02
(5)	Tax Period	4	Numeric, YYMM
(6)	Filler	1	Alphanumeric Value = Blank
(7)	Employer ID Number (EIN)	9	Numeric
(8)	Filler	1	Alphanumeric Value = Blank
(9)	Master File Tax Code	2	Numeric Value = 05
(10)	Data Fields	various	Page data fields
	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 7. SCHEDULE RECORD

The second record or series of records is the schedule record. Each page of a schedule will have a new schedule record with the page number incremented by 1, preceded by the byte count.

Field	Identification	Length	Format
	Byte Count, Page 1 and 2	4	"0037" plus length of data
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	4	Alphanumeric Value = "SCHb"
(2)	Schedule Type	3	Alphanumeric (left-justified) Values = "Dbb" or "K1b"
(3)	Schedule Sequence Number	7	Numeric Range = (0000001-9999999)

Field	Identification	Length	Format
(4)	Page Number	5	Alphanumeric Value = "PGnnb" Valid ranges for nn = 01—02
(5)	Employer Identification Number (EIN)	9	Numeric
(6)	Data Fields	Various	Page data fields
	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 8. FORM RECORD

The third series of records after returns and schedules are the group of form records. They should appear in the sequence specified in Appendix A, SEC. 13.02.2. Each page of a form will have a new form record, preceded by the byte count, Start of Record Sentinel with the page number incremented.

Field	Identification	Length	Format
	Byte Count, Page 1 and 2 of data	4	"0040" plus length of data
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	4	Alphanumeric Value = "FRMb"
(2)	Form Number	6	Alphanumeric (left justified) Values: "4952bb", "8656bb", "W-2bbb" and "W-2Pbb"
(3)	Form Sequence Number	7	Numeric Range = (0000001-0000020)
(4)	Page Number	5	Alphanumeric Value = "PGnnb" Valid range for nn = 01 to 02
(5)	Employer ID Number (EIN)	9	Numeric
(6)	Data fields	various	Page data fields
	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 9. STATEMENT RECORD

.01 The statement record is the fourth series of records after returns, schedules and forms. Statement records are used to continue a field or related series of fields that *appear on the same print line. (A print line is all the fields that would appear as a single line item on a printed version of the form. An example is Form 1041, line 15(a)).* Each statement is given a sequential number from 01 to 99. References to statements on the tax return must be in ascending numerical sequence and must be referenced in the same sequence as the transmission sequence of the forms.

1. The first line entry for the continued item on the base form or schedule record itself shall read "STMbnn" ("nn" being the applicable statement number). All of the applicable entries must then be on the statement record and cannot be split between the continued item record(s) and the statement.
2. The first statement record may contain a literal description of the item continued.

   Example: (Fixed format for LNO1)

   0116****STM 01 PGO1 LNO1 128888888 (20 blanks) OTHER DEDUCTIONS LINE 15A FORM 1041 (blanks up to 80 characters) #

   Note: Blanks inserted before and after the title of the example statement record listed above, are present for readability and may be determined by the filer.

3. The second statement record for all continuations of tabular data may contain the column headings spaced with the headings as they would appear on the printed form they continue. The tabular column titles will be spaced in the same format as would be printed on a blank continuation page. (This record may be blank or may also be used for non-tabular data if appropriate).

   Example: (Fixed format for LNO2)

   0116****STM 01 PG01 LNO2 128888888 (5 blanks) DESCRIPTION (30 blanks) AMOUNT (blanks up to 80 characters)#

   Note: Blanks between title header columns must be inserted for readability but number of spaces may be determined by filer.

4. The third statement record ("LN03") and beyond, may contain, left justified, the related data fields in the same order as they appear in the base layout.

   Contiguous fields related to tabulated titles from LN02, that would have appeared as a single print line on the basic form or schedule shall also appear on the same statement line record, left-justified, beginning with the third line record ("LN03"). The first data field for a table or a group of related line entries must contain the "STMbnn" for the entire table (i.e., part of the table cannot appear on the form and part in a statement).

   Example: (Fixed format for LN03-LN50)

   0116****STM 01 PG01 LNO3 128888888(6 blanks) LEGAL FEES (30 blanks) 0000002500 (blanks up to 80 characters) #

   0116****STM 01 PG01 LNO4 128888888(6 blanks) AUTO EXPENSES (27 blanks) 0000002500 (blanks up to 80 characters) #

   0116****STM 01 PG01 LNO5 128888888(25 blanks) TOTAL (5

blanks) 0000005000 (blanks up to 80 characters) #

Note: Data should be entered as it would be entered on the form. Alphanumeric fields should be left-justified and blank-filled. Money amount fields (11 numerics followed by a blank if the amount is positive or a (−) if the amount is negative) should be right-justified and zero-filled. Lines 4 through 50 would be entered if needed.

5. If the statement data does not require tabulation, free format is allowed.
6. Statements can only be used by the filer when the open-ended item cannot be contained in the space provided on the printed form or schedule.

.02 The 80 characters of data corresponding to any statement record within the return, containing non tabular data, may begin with line 2. Data should appear left-justified as a continuous print line. The same statement may be continued with additional lines, consecutively numbered, until a maximum of 50 lines have been formatted for the first page or the end of the information needed to be formatted as a statement has been reached, whichever comes first. If additional lines are needed to complete a statement, an additional page with a maximum of 50 lines may be formatted continuing with the numbering sequence from page 1.

.03 Only fields marked with an asterisk (*) in the record layout may contain "STMbnn". Fields marked with an "@" sign in the record layout *must* contain "STMbnn" if corresponding fields contain significant data, (otherwise the fields should contain blanks) and the data fields(s) must appear on a statement record. The length of the data fields in these statements may be up to 80 characters.

.04 An "@" sign will precede any field that *must* contain a statement reference when significant. In the record layout (Publication 1438), an asterisk (*) will precede any field which may contain a statement reference (STMbnn), if necessary. A statement reference indicates that either the first entry of a line or a table of related items is to be continued on a statement record. A plus sign (+) marks the first entry field of a line or table following a field preceded by an asterisk (*) that has been referenced as a statement record (STMbnn). If the field referenced with an asterisk contains "STMbnn", the related field(s) marked with a "+" should be blank; all the information for the table or related items should be entered on the statement.

In some cases, the related statement fields require more than the maximum 80 positions allowed. An asterisk followed by a plus sign (*+) indicates the first field of a separate statement record which continues the required fields from the previous statement record. In other words, fields normally included in one statement record have been divided between two statement records because the maximum of 80 characters per statement record has been surpassed. The statement record containing the additional items relating to the first statement should be referenced by (*+). A "Continuation Statement" should be referenced only when the preceding asterisked field is equal to "STMbnn". See SEC. 9 for the format of the Statement Record.

SEC. 9. STATEMENT RECORD (Continued)

	Field Identification	Length	Format
	Byte Count	4	Value "0116"
	Start of Record Sentinel	4	Alphanumeric Value = "****"
	******* For Schedule K-1 add 8 to Byte Counts *******		
(1)	Record Name	4	Alphanumeric Value = "STMb"
(2)	Statement Number	2	Numeric Range = (01-99) (99 for Schedule K-1 only)
(3)	Reserved for EF	2	Alphanumeric Value = Blanks
(4)	Page Number	5	Alphanumeric Value = "PGnnb" nn = 01-02
(5)	Line Number	5	Alphanumeric Value = LNnnb, nn = 01-50
(6)	EIN	9	Numeric
	*******Fields # 7 and 8 in Schedule K-1 Statements only********		
(7)	K-1 Sequence #	7	Numeric This field must be significant for Schedule K-1 only. Range = (0000001-9999999)
(8)	K-1 Sequence # Filler	1	Alphanumeric Value = Blank
	********** All statements **********		
(9)	Data Record	80	See SEC. 9
	Record Terminus Character	1	Alphanumeric Value = "#"

Note: Refer to Appendix A, SEC. 2, paragraph 13, for restrictions on the use of statement records. Data cannot be split between a return, schedule, or form record and a statement record. If more entries are required than are provided for in Publication 1438 (Record Layouts) enter "STMbnn" in the field or the first of a series of fields on the return, schedule, or form record and put the specific data entries on the statement record (refers to field names marked with "@" or an "*" as specified in Publication 1438, Record Layouts of Forms 1041 and 1065, only).

SEC. 10. SUMMARY RECORD OF FORM 1041

The final record for each tax return (Form 1041) is the summary record. (A "1" in the paper document indicator field shows that the paper document specified is a part of the return and has been attached to the fiduciary/beneficiary declaration, Form 8453-F. Otherwise, enter "0".) The format is as follows:

Field	Identification	Length	Description
	Byte Count	4	Value "0212"
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	4	Alphanumeric Value = "SUMb"
(2)	Reserved	13	Alphanumeric Value = Blanks
(3)	Employer Identification Number of the Trust or Estate	9	Numeric (EIN)
(4)	Name of the Magnetic Tape Filer	35	Alphanumeric
(5)	Filer's EIN or SSN	9	Numeric
(6)	Preparer Self-Employment Indicator	1	Alphanumeric Values = "X" or blank "X" = Self-employed
(7)	Preparer Firm EIN	9	Numeric
(8)	Preparer Firm Name	35	Alphanumeric
(9)	Firm/Filer City	20	Alphanumeric
(10)	Firm/Filer State (Abbr.)	2	Alphanumeric
(11)	Firm/Filer ZIP Code	9	Numeric nnnnnnnnn or nnnnnbbbb
(12)	Number of Logical Records in Tax Return (including Summary Record)	7	Numeric Range = 0000003-9999999
(13)	Number of Forms W-2	2	Numeric Range = 00-20
(14)	Number of Forms W-2P	2	Numeric Range = 00-20
(15)	Reserved for EF	8	Blanks
(16)	Number of Schedule Records (excluding Schedule K-1 records)	7	Numeric Range = (0000000-0000002)

SEC. 10. SUMMARY RECORD OF FORM 1041 (Continuation)

Field	Identification	Length	Description
(17)	Number of Form Records (Excluding W-2 and W-2P records)	3	Numeric Range = (000-003)
(18)	Number of Statement Records (excluding Schedule K-1 statement records)	4	Numeric Range = (0000-9999)
(19)	Number of Schedule K-1 Records	7	Numeric Range = (0000000-9999999)
(20)	Number of Statement Records for Schedule K-1 Records	7	Numeric Range = (0000000-9999999)
(21)	Reserved	7	Alphanumeric Value = Blanks
(22)	Paper Document Ind 1	1	Alphanumeric Value = "1" if Form W-2 attached else "0"
(23)	Paper Document Ind 2	1	Alphanumeric Value = "1" if Form W-2P attached else "0"
(24)	Paper Document Ind 3	1	Alphanumeric Value = "1" if other paper attached else "0"
	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 11. RECAP RECORD

The final record on each file is the RECAP record.

Field	Identification	Length	Format
	Byte Count	4	Value "0072"
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	5	Value "RECAP"
(2)	Reserved for IRS only	8	Numeric Value = 00000000
(3)	Reserved	6	Numeric Value = 000000
(4)	Total Return Count	6	Numeric
(5)	Magnetic Tape Identification Number plus Filer's User Code	8	Numeric Value = NNNNNNnn NNNNNN = MTIN nn = Filer's user code; may be zero-filled

Field	Identification	Length	Format
(6)	Julian Date of Transmission	3	Numeric
(7)	Transmission Sequence Number for Julian Day in (6)	2	Numeric
(8)	Reserved	24	Numeric (Zero-filled)
(9)	Filler	1	Alphanumeric Value = Blank
	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 12. THE ACKNOWLEDGMENT REPORT

.01 The acknowledgment report (Acknowledgment Listing of Transmission, see Attachment VII) is generated by the IRS. It will contain information describing the filer, and the return file as specified in the TRANS record. In addition, the report will include the Document Locator Number (DLN) assigned by the IRS to each accepted return, the Employer Identification Number (EIN) for each return and the acceptance codes. Also, counts for accepted, rejected, and duplicate records will be listed.

Filers who have transmitted processable data will receive by mail, 2 hardcopies of the acknowledgment report within 7 days of submission of the return files.

.02 If the Acceptance Code field for a return on the report contains an "R", the return has been rejected due to a an error involving the return format, internal consistency, or data errors in a key field. Returns that have been rejected must be corrected and resubmitted to the IRS to be considered as filed returns. Additional information about the reasons that will cause the return to be rejected may be found in SEC. 13 below.

.03 If the Acceptance Code field for a return on the report contains a "D", the return has been identified as a duplicate record: i.e., a return record was previously submitted and accepted for that EIN; therefore, the return has been rejected.

.04 If the Acceptance Code field for a return on the report contains a "T", the entire transmission has been rejected.

.05 The error information on the acknowledgment report will contain data defining the form (see Attachment IV), the page number for multipage entries, the error field number, and the error code defining the specific error encountered. This information will be present for up to twelve error records. Each error record contains 8 reject codes for a possible maximum total of 96 reject codes per return.

.06 Any return with an "A" in the Acceptance Code field on the report, has been accepted as a filed return and will be processed from that point in the same manner as paper return documents. Acceptance of a return does not imply that the return will pass all IRS service center validity checks or post to the IRS Master File without delays.

.07 Reject Code Explanation

1. Up to 96 reject codes per return may be furnished to the magnetic tape filer on the acknowledgment report. Filers should use these codes to determine the source of the error causing the return or the entire return file to reject. If more than the maximum number of reject conditions (96) are identified, the 96th reject code will be listed as "999".
2. The reject codes and brief explanations of the conditions that cause the codes to be assigned are listed in Attachment III. Filers should use this information to resolve reject conditions. When a condition cannot be resolved with the information provided, the filer should contact the Magnetic Tape Filing Unit at the Philadelphia Service Center for assistance.

SEC. 13. DATA VALIDATION AND REJECTION CRITERIA

.01 The exclusions listed in Section 2 of the Procedure of this publication must be adhered to or the return shall be rejected.

.02 If the following data controls are not complied with, the entire return file or the return shall be rejected:

1. The following conditions must exist or the entire submission of returns will be rejected:
   (a) the data records of the submission must be in the following sequence: TRANS Record, Return records and the RECAP Record; or
   (b) the format of the TRANS Record and/or RECAP Record must correspond exactly to the record layouts specified above; or
   (c) there should be no duplicate submissions of any record file; or
   (d) there should be no unrecognizable or inconsistent control data in the TRANS and/or RECAP records.
2. The data records must be in the following sequence:
   (a) Return records (Page 1 and 2);
   (b) Schedule records other than Schedule K-1 (optional);
   (c) Form records—in ascending numeric order (optional);
   (d) Form W-2
   (e) Form W-2P
   (f) Statement Records (statements not related to Schedule K-1 optional);
   *(g) Schedule K-1 records (optional);
   *(h) Statement for Schedule K-1 records (optional);
   (i) Summary record (must be final record for each return)
   *Record pairs g and h above are repeated for each Schedule K-1 in the return.
3. Page (Pgnn) records must be consecutive and sequential.
4. Both pages of multiple page schedules or forms must be present with the exception of Page 2 of Schedule D, which need not be transmitted if there are no entries for that page. However, Page 2 of this schedule must not be present without Page 1.

5. All fields must contain the type of data specified under the columnar heading "Format" in the record description. Alphanumeric fields must be left-justified unless otherwise specified. (For further clarification on validation criteria see Appendix A, SEC. 3, Field Specifications of this publication).

6. Significant money fields must be right-justified and zero-filled. Money fields must be all whole dollars (no cents). All other significant numeric fields must entered as specified in SEC. 3.01.4 through 3.01.7. Significant percentage fields must be left-justified and zero-filled. All nonsignificant money fields must be zero-filled. All other nonsignificant fields must be blank unless otherwise specified in the Record Layouts. (See Appendix A, SEC. 3, Field Specifications of this publication).

7. All records must follow the ANSI byte count convention or have a byte count field which must precede the Record ID field for each page record and the count must be equal to the total number of characters contained in the page record. (Reminder: Byte Count includes the Byte Count field, Start of Record Sentinel, Record ID field, all other record fields, and the terminus character (#)).

8. The fields on a statement line (LN) record must be in the same format and sequence as they appear in the record layouts, and only one group of related fields can be entered per statement line (LN) record. Statement references in the tax return must be in ascending numerical sequence. (See Sec. 9, Statement Record, for detailed requirements)

9. The Employer Identification Number (EIN) must be nine numeric characters and must be consistent in all data records for a tax return. The first two digits of the EIN cannot be any one of the following: 00, 07, 08, 09, 10, 12, 15, 17, 18, 19, 20, 21, 24, 26, 27, 28, 29, 30, 32, 40, 44, 49, 50, 53, 60, 67, 69, 70, 78, 79, 80, 89, 90, 96, and 97.

10. The format and content of the Record Identification information (Record ID), which begins each type of record, must always be present and exactly as stated in the input specifications.

11. The Tax Period (Field #5 in the Return Record) must fall within the ranges specified in SEC. 1 of the Procedure in this publication. Fiscal year filers for a fiscal year ending September 30, 1989 (8909), October 31, 1989 (8910), or November 30, 1989 (8911) wishing to participate in the magnetic tape filing of Form 1041 must file for an extension of time (see "Extension of Time to File", Page 2 of instructions attached to official Form 1041) until March 1, 1990. Otherwise, fiscal year filers (Tax Period 8909-8911) for Form 1041 must file a paper document with the appropriate service center. For special instructions about entering the Calendar/Fiscal Year Ending field, see Appendix A, SEC. 15, of this publication.

12. A return will be rejected if program accumulators, maintained while the returns are processed do not match the counters in the SUMMARY record.

13. Foreign address returns are not permitted.

14. The Name Control field must be present.

15. Address data must be present.

16. All "total" fields must have a significant entry when there are amounts leading to the total. Similarly, any "total" field which has a significant entry must have at least one significant entry leading to that amount. Otherwise, the processing of the return will be delayed to resolve the discrepancy.

17. The following checks should be made in relation to Schedule K-1 and statement for Schedule K-1:

(a) Total of count of Schedule K-1 records should match total count found in Summary Record;

(b) The sequence number in the Schedule K-1 statement records should match the sequence numbers of the related Schedule K-1 records.

18. All pages of return Form 1041 must be present. Even if there are no entries on page 2 of Form 1041, the pages must be generated with a significant Return Record ID field.

19. Statement records do not have to be consecutive but must be in ascending sequence. Each statement number reference occurring in a data field ("STMbnn") must have a corresponding statement. Each statement may be referenced only once, except for Schedule K-1 statements (which are always number 99). There may be no more than 98 statement page records, except Schedule K-1 statement records, with any return. For each statement record, at least LN01, LN02, and LN03 must be present, and all line numbers must be in ascending numeric sequence.

Note: The Schedule K-1 Statement record should always contain the statement number (STMb99), and an additional 7 character field containing (0000001-9999999), which is the Schedule Sequence Number (Field #007) assigned to the Schedule K-1 to which it relates.

20. The Form/Schedule Sequence Number in the Record ID of related schedule or form records must be significant and in ascending numerical sequence for all schedule and form records. The sequence number must not be greater than that permitted for the particular form or schedule.

21. There *must be no* significant data present for the following fields from the Form 1041 record:

Form	Title	Field #	Line #
Form 1041	Bankruptcy estate	100	Upper Left
Form 1041	Family estate trust	110	Upper Left
Form 1041	Amended return Box	150	Upper Left
Form 1041	Amended return Stmnt.	160	Upper Left
Form 1041	Nonexempt charitable	260	Upper Right
Form 1041	Split interest trust	270	Upper Right
Form 1041	Box 1, 2, and 3	280	Upper Right

Form	Title	Field #	Line #
Form 1041	Net rent and royalty income or loss	340	4
Form 1041	Net business and farm income	350	5
Form 1041	Ordinary gain or loss	370	7
Form 1041	Treated as credited to trust beneficiaries	600	24b
Form 1041	Taxes paid amount	620	24d
Form 1041	Tax paid with Ext. Form 2758 Box	630	24d
Form 1041	Form 8736 Box	640	24d
Form 1041	Form 8800 Box	650	24d
Form 1041	Form 2439 amount	680	24f
Form 1041	Form 4136 amount	690	24g
Form 1041	Other	700	24h
Form 1041	Total	710	24i
Form 1041	Form penalty amount	780	29
Form 1041	Other tax	1150	G-1b
Form 1041	Description of other tax	1160	G-1b
Form 1041	Foreign tax credit	1180	G-2a
Form 1041	Nonconventional fuel credit	1190	G-2b
Form 1041	Form 3800 Box	1200	G-2c
Form 1041	Form (Specify)—Box	1210	G-2c
Form 1041	Form (Specify)	1215	G-2c
Form 1041	General business credit 1260	G-2c	
Form 1041	Credit for prior minimum tax	1270	G-2d
Form 1041	Total Credits	1280	G-3
Form 1041	Recapture taxes	1300	G-5
Form 1041	Form 4255 Box	1310	G-5
Form 1041	Form 8611 Box	1320	G-5
Form 1041	Name/address change	1350	O/I-1
Form 1041	Passive activity (Yes)	1400	O/I-3

22. Form records of tax return Form 1041 must be in ascending numeric sequence followed by alpha sequence.

(a) Form 4952

(b) Form 8656

(c) W-2

(d) W-2P

23. The capital loss limitation (Field #1750) on Schedule D must not exceed $3000.

24. The following lines and field numbers on the return records for Form 1041 must always be positive amounts:

On Form 1041:

(a) Deduction lines 10-16 and 19-20 (Field #s 420, 430, 440, 450, 460, 480, 485, 486, 490, 530 and 540).

(b) Income Lines 1 and 2, (Field #s 300 and 310).

(c) Total tax line 23 (Field #570), Charitable deductions (Field #950), and Total (Schedule G, Field #1340).

(d) Payment amount (Field #580)

(e) Federal Income Tax Withheld (Field #670)

(f) Total Field (Field #720)

(g) Credited to 1990 (Field #750)

(h) Refunded amount (Field #760)

(i) Alternative minimum tax (Field #1330)

On Schedule D:

(a) Computation of capital loss, from Line 18 above as a positive amount (Field #1770).

(b) Loss shown on Line 6, Line 24 (Field #1794)

(c) Net loss from line 17, Line 18 (Field #1750)

On Form 8656:

(a) Alternative tax net operating loss (Field #350)

(b) Combine lines 4a through 4d (Field #100)—

25. In the return records of Form 1041 there must be no significant entry in the following fields of the following forms and schedules:

Form/Schedule	Title	Line #	Field #
Form 4952	Phase-In Adj.	3	080
Form 8656	Tax shelter farm loss	5i	190
Form 8656	Passive activity loss	5j	200
Form 8656	Foreign Tax Credit	III(9)	590
Form 8656	Sec. 644 tax	III(11c)	620
Schedule D	Short-term gain from Form 6252	2	750
Schedule D	Long-term gain from Form 6252	8	1580
Schedule D	Capital gain distribution	10	1600
Schedule D	Capital gain from Form 4797	11	1610

26. The following fields must be equal:

Field#	Title	Line# =	Sch/Form	Field #	Title	Line #
	Line From 1041 Record					
540	Exemption	20 =	Sched D	1780	Amount from line 20	1041
	Note: this is true only when Field #1780 is significant.					
450	Charitable deduction	13 =	Sched A	950	Total char deductions	6
500	Adjusted	17 =	Sched B	960	Adjusted total income	1
570	Total Tax	23 =	Sched G	1340	Total tax (lines 4-6)	7
980	Net gain	3 =	Sched D	1710	Net gain	17(a)
990	Amount from Schedule A	B(4)=	Sched A	920	Net short-term	4
1330	Alternative minimum Tax Line from Form 8656	G-6 =	Form 8656	640	Alternative minimum Tax	Pt III line 12
400	Fiduciary's share of alternative minimum taxable income	Pt I 12 =	Form 8656	530	Amount from line 12 Part I	III(1)
420	Alternative minimum taxable income	Pt II =1	Form 8656	360	Adjusted alternative minimum taxable income	I(1)

27. The following are the permissible exemption amounts for the fiduciary codes.

(a) If an "X" appears in the following fields, the exemption amount, line 20, Field #540, may be as shown:

(i) Decedent Estate Box (Field #050) - $600

(ii) Simple Trust Box (Field #060) $100 or $300

(iii) Complex Trust Box (Field #070) $100 or $300

(iv) Taxable Grantor Type Trust (Field #080) - $100 or $300

(v) Non-Taxable Grantor Type Trust (Field #080) - Blanks

(vi) Final Return (Field #170) Blanks (Estates or Trust)

Note: If any of Field Numbers 050, 060, 070, 080 is/are significant, then Field #540 can be any amount from zero up to the money amount specified, or blank.

28. The following fields must be present:

(a) Name Control (Field #030) (if Name Control is from a GNMA or FNMA, it must not contain leading zero/zeroes;

(b) Estate/Trust Name line (Field #180);

(c) Fiduciary Name line (Field #200).

29. Fiduciary Code: at least one of Fields 050, 060, 070 or 080 must be present.

30. Address data (Fields 220, 230, 240, 250) must be present.

31. In Fields 050-080:

(a) If Decedent estate Field #050) is "X", Field #060, 070, and 080 must be blank.

(b) If Simple trust (Field #060) is "X", Field #050 and 070 must be blank.

(c) If Complex trust (Field #070) is "X", Field #050 and 060 must be blank.

(d) If Grantor type trust (Field #080) is "X", Field #050 must be blank.

32. Entries for Income distribution (Field #510) on Form 1041 must be supported by Schedules K-1.

33. If Capital gain/loss (Field #360) on Form 1041 is negative, it must equal Net loss (Sch D, Field #1750) which represents a loss of not more than $3000. If Capital gain/loss is positive, it must equal Total net gain (Sch D, Field #1730).

34. Refund Amount (Field #760) cannot be equal or greater than $1,000,000.

35. Preparer's TIN (Field #830 or #810) cannot be equal to EIN (Field #040).

36. If Final Return Box (Field #170) = "X", then Credited to 1990 (Field #750) must be equal to zeros.

37. If Tax due (Field #730) and Overpayment (Field #740) on Form 1041 must not both be equal to zeros.

Note: See Attachment III for explanations of reject codes. Reject codes are assigned to conditions that cause the return or the entire return file to be rejected. They are based on criteria set forth in the above section and elsewhere in this Revenue Procedure.

SEC. 14. SPECIAL INSTRUCTIONS FOR ENTERING THE FIDUCIARY'S NAME AND ADDRESS

These instructions must be followed carefully to avoid delaying returns for error conditions. They must be included in the filer's programs as consistency tests and in the data entry instructions. The return must not contain a foreign address. Foreign addresses are from other than the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, Caroline Islands, Federated States of Micronesia, Northern Mariana Islands, Marshall Islands, and Palau Islands.

.01 *Name Line 1*

1. Only alphabetic characters, numbers, spaces and the special characters ampersand (&), slash (/), and hyphen (-) may appear in the Estate/Trust name line.

2. Only one intervening space may separate any component of a name line.

3. All apostrophes, and any other punctuation characters except the hyphen, must be omitted from names, and the alphabetic characters must be shifted to the left in their place (e.g., O'Shea = OSHEA).

4. Numeric characters in name components must be replaced by alphabetic Roman numerals (e.g., Charles 3rd = CHARLES III).

.02 *Instructions for Street Address and Name Line 2*

1. Only alphabetic and numeric characters, ampersand (&), slash (/), hyphen (-), percent (%), and spaces appear in the street address and fiduciary/beneficiary name line fields. If no data is available for Name Line 2, enter blanks.
2. Only one intervening space may separate any two components of any name line, the street address lines. Periods should be deleted from these lines.
3. For the street address, enter the house number and street, route number, post office box, or box number.
4. Abbreviate words requiring standard abbreviations unless the word is a proper name.

Examples	Enter As
South Court Street	S COURT ST
Circle Drive	CIRCLE DR
Lane Building	LANE BLDG
Northeast Street	NORTHEAST ST
Third Street	THIRD ST
3 Ave.	3RD AVE

5. Enter college, building, or post office branch as the address if no mailing address is given.
6. If "In Care Of" is the mailing address, use the symbol "%" followed by a space.

Example:	John James Trust In Care of Alice B. Smith 801 Brown St.	
Enter As:	JOHN JAMES TRUST % ALICE SMITH EXEC 801 BROWN ST	(Name of Estate or Trust) (Estate/Trust Name Line) (Street Address)

7. Do not use the "#" symbol, "No.", or "Number" as a prefix to a house, apartment., route, or P.O. Box.
8. Always add st, nd, rd, th, to a numbered street or avenue. Examples: 1 = 1ST; 2 = 2ND; 3 = 3RD, etc.
9. Enter ½ as ½ (no spaces).
10. Plurals for street, road, avenue, apartment, etc., will be entered as STS, RDS, AVES, APTS, etc.
11. Omit the letters "APO" and "FPO" in the address. (Include always as part of the CITY field).
12. The following standard abbreviations are preferred:

WORD	ABBR.
and	&
Air Force Base	AFB
Apartment	APT
Avenue	AVE
Boulevard	BLVD
Building	BLDG
Care of, or In care of	%
Circle	CL
Court	CT
Drive	DR
East	E
General Delivery	GEN DEL
Highway	HWY
Lane	LN
North	N
Northeast, N.E.	NE
Northwest, N.W.	NW
Parkway	PKY
Place	PL
Post Office Box, P.O. Box	PO BOX
Route, Rte.	RT
Road	RD
R.D., Rural Delivery, RFD, R.F.D., R.R. or Rural Route	R D
South	S
Southeast, S.E.	SE
Southwest, S.W.	SW
Street	ST
Terrace	TER
West	W
One-Half	½ (all fractions, space before and after the number, i.e., 1012 ½ ST)

.03 *Instructions for City, State and ZIP Code Fields*

1. The City field may contain alphanumeric characters. The only special character allowed is the blank. If the name of a city contains two words or more, only one intervening space is allowed between consecutive words (e.g., New York)
2. Standard abbreviations for STATE CODE are listed Attachment V.
3. ZIP Code MUST be transcribed as five digits or nine digits. (See Attachment V)

.04 *Special Instructions for Determining the IRS Name Control Field*

1. The Name Control (Field #030) for a trust should be determined from the information specified on the Name of the estate or trust line (Field #180). The Name Control consists of the first four characters of the surname, corporation name, trust name or number.

   The Name Control field for estates should be derived from the first four characters of the last name of the decedent.

Examples:

Trusts/Estates	Name Control
Appletree Trust Co. Trustees U/W OF Kate B. *Crab*apple Dec'd (FBO Edna M. Rose)	CRAB
Treas. of the State of NC in Tr. for *Jas*mine Ins. Co.	JASM
GNMA Pool No. 00*8619* Chicago Bank TTEE	8619
*Welf*are Fund of International/Union of Operating Engineers/Locals 436 & 436B AFL-CIO Locals 436 & 436B TTEE	WELF
Tstmtry. Trust UW Maggie *Plum* for Claudia Ivy & Warren Iris W. Verbena & Charles Plum c/o Willow & Plum	PLUM

2. Disregard blanks between letters in the last name. Omit punctuation marks, titles and suffixes. Exclude the word "the" when followed by more than one word.

3. For Indian tribes, use the name of the tribe.

4. For FNMA or GNMA Mortgage Backed Securities, use the first four digits of the trust number, disregarding any leading zeros. If there are fewer than four numbers, use the letters "GNMA" or "FNMA" for GNMA and FNMA Pools respectively to complete the name control.

Example:

GNMA Pool No. 00100, use 100G as the Name Control.

FNMA Pool No. 00100, use 100F as the Name Control.

5. Before you determine the name control, take the following into consideration.

(a) The first position can only be alpha and numeric characters, A-Z and 0-9.

(b) Positions 2, 3, and 4 can be alpha and numeric characters A-Z and 0-9; the ampersand (&) and the hyphen (-) and blanks are the only special characters allowed.

Example: John A *El-R*ose — Example: Wayne Elm Mary *Al*

(c) Intervening spaces between characters are not allowed.

6. Consider certain foreign suffixes as part of the last name (i.e. Armah-Bey, Paz-Ayala, Allar-Sid). Particular attention must be given to those names which incorporate a mother's maiden name as a suffix to the last name. This practice is common in names of Spanish extraction. Consider the mother's maiden name as part of the surname for Name Control purposes.

Examples

Individual Name	*Name Control*
John Brown	BROW
John Lea-Smith	LEA-
John Di Angelo	DIAN

Examples

Individual Name	*Name Control*
John O'Neil	ONEI
John En, Sr.	EN
Pedro Paz-Ayala	PAZ-
Abdullah Allar-Sid	ALLA
Joe McCarty	MCCA
Juan de la Rosa Y Obregon	DELA

Individual Name	*Name Control*
Jose Alvarado Nogales	ALVA
Donald Vander Neut	VAND
Otto Von Wodtke	VONW
Mary Smith & John Jones	SMIT

SEC. 15. SPECIAL INSTRUCTIONS FOR ENTERING THE TAX PERIOD ENDING

The Tax Period, Field #5 in the Return Record is composed of numeric month and year of the calendar/fiscal year ending for which the return is being filed. The format is YYMM (YY = year and MM = month). For example, a return with a calendar/fiscal year ending of February 15, 1989, will be assigned a Tax Period of 8902. Returns filed under the 52-53 week rule may end not more than 6 days before or more than 3 days after the close of the month. They should be assigned a calendar/fiscal year ending based on that month (i.e. if the ending date is October 3, 1989, the Tax Period field will be 8909 or if the ending date is October 25, 1989, the Tax Period is 8910).

APPENDIX B

Return File Specifications for Form 1065

Section	Title	Page
1	Overview	25
2	General Description	25
3	Field Specifications	26
4	Record Length Description	27
5	Trans Record	27
6	Return Record	27
7	Schedule Record	28
8	Form Record	28
9	Statement Record	28
10	Summary Record of Form 1065	30
11	Recap Record	31
12	The Acknowledgment Report	31
13	Data Validation and Rejection Criteria	32
14	Special Instructions for Entering Partnership's Name and Address	35
15	Special Instructions for Entering Tax Period	36

SECTION 1. OVERVIEW

.01 The sequence of record submission is as follows:

1. The original TRANS record (this record identifies the magnetic tape transmitter).
2. Return records including the return (RET), and all related schedules other than K-1 (SCH), forms other than Form 8308 (FRM), statements other than Schedule K-1 statements (STM), Schedule K-1 (K1), statements for Schedule K-1 (STM), Form 8308 (FRM), and summary records (SUM).
3. RECAP record.

.02 For all filers, a hardcopy acknowledgment report, separately identifying accepted and rejected returns, will be mailed. (See SEC. 12 in this appendix and Attachment VII).

.03 If the entire magnetic tape is rejected, the acknowledgment will consist of information defining an acceptance code field with a value of "T" and all the reject errors related to the magnetic tape submitted. (SEC. 12 in this appendix and Attachment VII).

SEC. 2. GENERAL DESCRIPTION

.01 All the data must be in ASCII or EBCDIC format. No binary fields may be transmitted.

.02 One four-byte, decimal-constant counter must precede each logical record within a block. The byte count contains the length of the record plus the length of the byte count. Record byte counts are provided in these specifications as the first constant field preceding the Record ID and this byte count (which is not part of the record) is to be used only if the ANSI byte convention is not used.

NOTE: IBM BYTE COUNT MUST NOT BE USED.

.03 All records must be submitted in the fixed format.

.04 The first record on a transmitted file (the TRANS record) contains information regarding the transmitter and the file format. This record should be followed by the records comprising the returns being submitted. The last record on a submitted file (the RECAP record) will provide balancing counts of all returns.

.05 A return file will consist of a variable number of fixed-length records. The size and format of the logical record for each page of each form, schedule etc., are specified herein. Maximum block size is limited to 28,672 characters. See Attachment VIII for examples of variable blocking format.

.06 The logical records described herein may not be broken between physical records (i.e. "blocks"). Files must not be spanned.

.07 Each logical record within a submission must be preceded by a four-byte field (if the ANSI byte count convention is not used), that will be a record byte count containing a count of the number of bytes within the logical record—including the four bytes for the counter itself.

.08 Every logical record must have as its last significant byte the record terminus character ("#"). Note that provisions have been made to allow for non-significant padding to exist following the record terminus character, if the block contains one logical record (blank padding should never separate logical records within a block). This padding is permitted to accommodate all the different computer systems being used to format the data.

.09 Each logical record should contain all data fields pertaining to one printed page of an official form or schedule. Statements are allowed for certain fields that have been marked with an ampersand ("@") or an asterisk ("*"). The continuation statements are composed of line records corresponding to the print lines of a complete statement. Each line of a continuation statement ("STMbnn") is a logical record (see SEC. 9 for more details).

.10 The complete tax return of Form 1065 must consist of all logical records pertaining to it, in the following sequence:

> *Return records, schedule records other than Schedule-K-1, form records other than Form 8308 records, statement records other than statement records for Schedule K-1, Schedule K-1 records, statement records for Schedule K-1, Form 8308 records, and summary records.*

The only exception to this rule is that one series of statement line records for a single continuation statement that pertains to a Schedule K-1 must directly follow the applicable Schedule K-1. Schedules must be in alphabetical sequence and forms must be in alpha, then numeric, sequence.

All records must appear in the proper sequence, with the proper control information, and the counts of the schedules and forms must match the accumulators in the Summary Record. Otherwise, the return will be rejected. Return, schedule, form and statement records may contain additional sequential page records if they consist of more than one printed page. (Pages are numbered only within a form, schedule or statement, not across the return.)

.11 *Every return page must have a logical record present. Only the pages of other schedules or forms (in the proper sequence) which contain significant data, need to have a logical record present.* Therefore, a page need not be generated, if there are no entries on the page record of a form (except Form 1065) or schedule (see Sec. 13.01.4 below, for exception rules). Also, if page 2 of a form is generated, page 1 of the form must be also be generated.

.12 The Return Type and Tax Period fields are Field Numbers 2 and 5 of the Return Record (see Appendix B, SEC. 6 below) respectively, included in each page of the return.

.13 If the number of data bytes appearing on the same line exceeds the number that can be contained in the space provided on the printed form or schedule, the data must be provided on a separate continuation statement (STM) record. Only fields preceded by an ampersand (@) or an asterisk (*) may contain statement ("STMbnn") references. There is a maximum of 2 pages per statement, 50 lines per page and 98 statement page records per tax return in total. Returns with more than 98 statement page records will be rejected. Schedule K-1 statements are not limited to 98 statement page records. Nevertheless, Schedule K-1 records are limited to two pages per statement and 50 lines per page. If "STMbnn" is used, no data should be entered in the base return. See Appendix B, SEC. 9 for specific details.

.14 Assign a 7-digit number to each Schedule K-1 (Field 010) in ascending order (a 7-digit number must be assigned to each Form 8308 also).

.15 A summary record will be the final record for each return. This record will contain magnetic tape filer identification data; counts of the schedules, forms and statements included in the return; and indicators for paper documents retained by the magnetic tape filer for subsequent submission to the IRS.

.16 The end of the logical record submission will be signaled by the recognition of the record terminus character of the RECAP record as the last logical record submitted.

.17 The recognition of the Record Terminus character ("#") followed by an End of Volume (EOV) marker (one tape mark) will indicate that there are still more tapes to be read. A return cannot be split between tapes. Otherwise, the recognition of the Record Terminus character followed by End of File (EOF) marker (two tape marks) will indicate the last record of the tape file.

.18 The file should be unlabeled (no standard header or trailer records), and each file must contain only complete returns.

.19 Returns with different calendar/fiscal year ending may be submitted on the same magnetic tape.

SEC. 3. FIELD SPECIFICATIONS

.01 Numeric Fields

1. All money fields:
   (a) in Form 1065 are 11 characters, 10 numerics followed by the sign character;
   (b) containing no significant data must be filled with zeros.
   (c) The significant numeric characters should be right-justified, and zero-filled. Dollar signs, decimal points, or other non-numeric characters are not permitted.
   (d) Money fields must be all whole dollars (no cents).
2. The right-most position of any negative money field must contain the negative sign; for positive fields this position is always blank.

   Note: Fields that can contain either gain (income) or loss amounts, such as Schedule K (Form 1065), Line 4(d) Net Short-Term Capital Gain or Loss, must have the applicable sign character, (i.e., blank for positive amounts and minus for negative amounts).
3. All percentage fields must have five positions, left-justified and zero-filled. Do not enter the decimal point on the record. The decimal point will be assumed to be between the left-most and the second left-most positions. If percentage is less than 100%, precede the figure with a zero. For example, 25.32% would be entered as "02532" and 105% would be entered as "10500". If there is no percentage enter spaces.

   Exception: Schedule K-1 (Fields #250-300) of Form 1065 require six positions following the decimal point. When these fields are significant, do not enter the leading zero. The decimal point will be assumed to precede the left-most position. For example, if the partner's percentage of loss sharing at the end of the year equals .00038 percent, enter as "000004".
4. Other numeric fields such as in Form 4562, Total miles driven during the year, Part III Sec B 29(a), must all be numeric, right-justified, and zero-filled. If the numeric field has no significant data it must be zero-filled (exceptions are ZIP Code EIN, SSN and date fields).
5. ZIP Codes must be 5 or 9 character numeric fields, left-justified and blank-filled.
6. All dates must be entered in the MMDDYY, MMYY or YYMM format.

Examples:

MMDDYY	February 15, 1988	- 021588
YYMM	Calendar/Fiscal Year Ending December, 1989	- 8912
MMYY	Date placed in service December, 1989	- 1289

If there is no date, enter spaces.

7. EIN (for other than the Partnership's Employer Identification Number) and/or SSN numbers must be blank-filled if there is no entry.

.02 Alphanumeric fields

1. Except where designated, do not enter spaces etc. between data elements.
2. All alphabetic data must be in upper case only.
3. Special characters may be valid for specific fields as noted in the record specifications.
4. Literal fields must contain one of the exact character strings, as specified in the record specifications, or blanks.
5. Data fields without any information must be blank-filled unless otherwise specified.
6. A "b" in the format description of a record layout denotes a blank space.

SEC. 4. RECORD LENGTH DESCRIPTION

.01 Logical return records must be submitted in a fixed format. All records within a return must be submitted exactly as defined with all the fields present. (See specifications throughout Appendix B and in record layouts in Publication 1438).

Each record must end with a Record Terminus Character ("#").

.02 The fixed ANSI byte count constant or the fixed constant shown as the first field in each record within Publication 1438, must be present always.

SEC. 5. TRANS RECORD

The first record on each file is the TRANS record, which will contain the following information. All participating filers that have been accepted into the Electronic Filing Program will be assigned an Electronic Filer Identification Number, or EFIN. Fields 2, 3, and 6 pertain to the entity which has been accepted by the Andover Service Center as a magnetic tape filer.

Field	Identification	Length	Format
	Byte Count	4	Value "0168"
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	5	Value "TRANS"
(2)	EIN of Filer	9	Numeric
(3)	Filer Name	35	Alphanumeric
(4)	Processing Site	1	Alphanumeric "C" = Andover
(5)	Transmission Date	6	Numeric MMDDYY
(6)	Electronic Filer Identification Number plus Filer's User Code	8	Numeric Value = NNNNNNnn NNNNNN = EFIN nn = Filer's user code; may be zero-filled
(7)	Julian Date of Transmission	3	Numeric
(8)	Transmission Sequence Number for Julian Day in (7)	2	Numeric
(9)	Reserved for EF	4	Alphanumeric Values = Blanks
(10)	Return Form Type	5	Value = "1065b" left-justified
(11)	Filler	1	Alphanumeric Values = Blank
(12)	Address	35	Alphanumeric
(13)	City, State, Zip Code	35	Alphanumeric Values for ZIP Code = nnnnnnnnn or nnnnnbbbb n = 0-9
(14)	Area Code, Telephone Number	10	Numeric
(15)	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 6. RETURN RECORD

Page 01, 02, 03 and 04 for each Form 1065 return will start with the following first 9 fields preceded by a byte count and Start of Record Sentinel. Each page of the return will have a new page record with the page number incremented. These records will each begin with Fields 1-9 below.

Field	Identification	Length	Format
	Byte Count, Page 1, 2, 3, and 4	4	"0043" plus length of data fields
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	4	Alphanumeric Value = "RETb"
(2)	Return Type	6	Alphanumeric; Valid Values = "1065bb"
(3)	Consolidation indicator for Forms 8453-P	2	Numeric (00-99) (00 = nonconsolidated, 01-99 = consolidated)
(4)	Page Number	5	Alphanumeric Value = PGnnb, Valid range for nn = 01 to 04
(5)	Tax Period	4	Numeric, YYMM
(6)	Filler	1	Alphanumeric Value = Blank
(7)	Employer Identification Number (EIN)	9	Numeric
(8)	Filler	1	Alphanumeric Value = Blank
(9)	Master File Tax Code	2	Numeric Value = 06
(10)	Data Fields	various	Page data fields
	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 7. SCHEDULE RECORD

The second record or series of records is the schedule record. Each page of a schedule will have a new schedule record with the page number incremented by 1, preceded by the byte count.

Field	Identification	Length	Format
	Byte Count, Page 1 and 2	4	"0037" plus length of data
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	4	Alphanumeric Value = "SCHb"
(2)	Schedule Type	3	Alphanumeric (left-justified) Values = "Dbb" or "K1b"
(3)	Schedule Sequence Number	7	Numeric Range = (0000001-9999999)
(4)	Page Number	5	Alphanumeric Value = "PGnnb" Valid ranges for nn = 01-02
(5)	Employer Identification Number (EIN)	9	Numeric
(6)	Data Fields	Various	Page data fields
	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 8. FORM RECORD

The third series of records after returns and schedules is the group of form records. They should appear in the sequence specified in SEC. 13.02.2 of Appendix B. Each page of a form will have a new form record, preceded by the byte count, the Start of Record Sentinel with the page number incremented.

Field	Identification	Length	Format
	Byte Count, Page 1 and 2	4	"0040" plus length of data
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	4	Alphanumeric Value = "FRMb"
(2)	Form Number	6	Alphanumeric (left justified) Values = "4562bb", "4797bb", "8308bb", "8271bb"
(3)	Form Sequence Number	7	Numeric Range = (0000000-9999999)
(4)	Page Number	5	Alphanumeric Value = "PGnnb" Valid range for nn = 01 to 02
(5)	Employer Identification Number (EIN)	9	Numeric
(6)	Data fields	various	Page data fields
	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 9. STATEMENT RECORD

.01 The statement record is the fourth series of records after returns, schedules and forms. Statement records are used to continue a field or related series of fields that *appear on the same print line. (A print line is all the fields that would appear as a single line item on a printed version of the form. An example is Schedule Form 1065 line 19).* Each statement is given a sequential number from 01 to 99. References to statements on the tax return must be in ascending numerical sequence and must be referenced in the same sequence as the transmission sequence of the forms.

1. The first line entry for the continued item on the base form or schedule record itself shall read "STMbnn" ("nn" being the applicable statement number). All of the applicable entries must then be on the statement record and cannot be split between the continued item record(s) and the statement.

2. The first statement record may contain a literal description of the item continued.

Example: (Fixed format for LNO1)

0116****STM 01 PGO1 LNO1 128888888 (20 blanks) OTHER DEDUCTIONS LINE 19 FORM 1065 (blanks up to 80 characters) #

Note: Blanks inserted before and after the title of the example statement record listed above, are present for readability and may be determined by the filer.

3. The second statement record for all continuations of tabular data may contain the column headings spaced with the headings as they would appear on the printed form they continue. The tabular column titles will be spaced in the same format as would be printed on a blank continuation page. (This record may be blank or may also be used for non-tabular data if appropriate).

Example: (Fixed format for LNO2)

0116****STM 01 PG01 LNO2 128888888 (5 blanks) DESCRIPTION (30 blanks) AMOUNT (blanks up to 80 characters) #

Note: Blanks between title header columns must be inserted for readability but number of spaces may be determined by filer.

4. The third statement record ("LN03") and beyond, may contain, left justified, the related data fields in the same order as they appear in the base layout.

Contiguous fields related to tabulated titles from LN02, that would have appeared as a single print line on the basic form or schedule shall also appear on the same statement line record, left-justified, beginning with the third line record ("LN03"). The first data field for a table or a group of related line entries must contain the "STMbnn" for the entire table (i.e., part of the table

cannot appear on the form and part in a statement).

Example: (Fixed format for LN03–LN50)

0116****STM 01 PG01 LNO3 128888888(6 blanks) LEGAL FEES (30 blanks) 0000002500 (blanks up to 80 characters) #

0116****STM 01 PG01 LNO4 128888888(6 blanks) AUTO EXPENSES (27 blanks) 0000002500 (blanks up to 80 characters) #

0116****STM 01 PG01 LNO5 128888888(25 blanks) TOTAL (5 blanks) 0000005000 (blanks up to 80 characters) #

Note: Data should be entered as it would be entered on the form. Alphanumeric fields should be left-justified and blank-filled. Money amount fields (10 numerics followed by a blank if the amount is positive or a (–) if the amount is negative) should be right-justified and zero-filled. Lines 4 through 50 would be entered if needed.

5. If the statement data does not require tabulation, free format is allowed.
6. Statements can *only* be used by the magnetic filer when the open-ended item *cannot* be contained in the space provided on the printed form or schedule.

.02 The 80 characters of data corresponding to any statement record within the return, containing non tabular data, may begin with line 2. Data should appear left-justified as a continuous print line. The same statement may be continued with additional lines, consecutively numbered, until a maximum of 50 lines have been formatted for the first page or the end of the information needed to be formatted as a statement has been reached, whichever comes first. If additional lines are needed to complete a statement, an additional page with a maximum of 50 lines may be formatted continuing with the numbering sequence from page 1.

.03 Only fields marked with an asterisk (*) in the record layout may contain "STMbnn". Fields marked with an "@" sign in the record layout must contain "STMbnn" if corresponding fields contain significant data, (otherwise the fields should contain blanks) and the data fields(s) must appear on a statement record. The length of the data fields in these statements may be up to 80 characters.

.04 An "@" sign will precede any field that must contain a statement reference when significant. In the record layout (Publication 1438), an asterisk (*) will precede any field which may contain a statement reference (STMbnn), if necessary. A statement reference indicates that either the first entry of a line or a table of related items is to be continued on a statement record. A plus sign (+) marks the first entry field of a line or table following a field preceded by an asterisk (*) that has been referenced as a statement record (STMbnn). If the field referenced with an asterisk contains "STMbnn", the related field(s) marked with a "+" should be blank; the information or related items should be entered on the statement.

In some cases, the related statement fields require more than the maximum 80 positions allowed. An asterisk followed by a plus sign (*+) indicates the first field of a separate statement record which continues the required fields from the previous statement record. In other words, fields normally included in one statement record have been divided between two statement records because the maximum of 80 characters per statement record has been surpassed. The statement record containing the additional items relating to the first statement should be referenced as a "Continuation Statement" and will be preceded by (*+). A "Continuation Statement" should be referenced only when the preceding asterisked field is equal to "STMbnn". See SEC. 9 for the format of the Statement Record.

SEC. 9. STATEMENT RECORD (Continuation)

	Field Identification	Length	Format
	Byte Count if fixed format	4	Value "0116"
	******* For Schedule K-1 add 8 to Byte Counts *******		
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	4	Alphanumeric Value = "STMb"
(2)	Statement Number	2	Numeric Range = (01–99) (99 for Schedule K-1 only)
(3)	Reserved for EF	2	Alphanumeric Value = Blanks
(4)	Page Number	5	Alphanumeric Value = "PGnnb" nn = 01–02
(5)	Line Number	5	Alphanumeric Value = LNnnb, nn = 01–50
(6)	EIN	9	Numeric
	*******Fields #7 and 8 in Schedule K-1 Statements only********		
(7)	K-1 Sequence #	7	Numeric This field must be significant for Schedule K-1 only. Range = (0000001–9999999) else bbbbbbb
(8)	K-1 Sequence # Filler	1	Alphanumeric Value = blank
	********** All statements **********		

Field	Identification	Length	Format
(9)	Data Record	80	See SEC. 9
	Record Terminus Character	1	Alphanumeric Value = "#"

Note: Refer to Appendix B, SEC. 2, paragraph 13, for restrictions on the use of statement records. Data cannot be split between a return, schedule, or form record and a statement record. If more entries are required than are provided for in Publication 1438 (Record Layouts) enter "STMbnn" in the field or the first of a series of fields on the return, schedule, or form record and put the specific data entries on the statement record (refers to field names marked with "@" or an "*" as specified in Publication 1438, Record Layouts of Form 1041 and 1065, only).

SEC. 10. SUMMARY RECORD OF FORM 1065

The final record for each tax return is the summary record. (A "1" in the paper document indicator field shows that the paper document specified is a part of the return, and has been attached to the partnership's declaration, Form 8453-P. Otherwise, enter "0".)

The format is as follows:

Field	Identification	Length	Format
	Byte Count	4	Value "0212"
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	4	Alphanumeric Value = "SUMb"
(2)	Reserved	13	Alphanumeric Blanks
(3)	Partnership's EIN	9	Numeric
(4)	Name of Magnetic Tape Filer	35	Alphanumeric
(5)	Filer's EIN or SSN	9	Numeric
(6)	Preparer Self-Employment Indicator	1	Alphanumeric Value = "X" if self-employed otherwise blank
(7)	Preparer Firm EIN	9	Numeric
(8)	Preparer Firm Name	35	Alphanumeric
(9)	Firm/Filer's City	20	Alphanumeric
(10)	Firm/Filer's State Abbr.	2	Alphanumeric
(11)	Firm/Filer's ZIP Code	9	Numeric
(12)	Number of Logical Records in Return (including Summary record)	7	Numeric Range = (0000007-9999999)
(13)	Filler	3	Alphanumeric Value = Blanks
(14)	Number of Form 8271 records	3	Numeric Range = 000-999
(15)	Number of Schedule Records (Excluding Schedule K-1 records)	7	Numeric Range = (0000000-0000001)
(16)	Number of Form Records (excluding Forms 8308 and 8271 records)	3	Numeric Range = (000-008)
(17)	Number of Statement Records (Excluding Statement records)	4	Numeric Range = (0000-4900)
(18)	Number of Schedule K-1 records	7	Numeric Range = (0000004-9999999)
(19)	Number of Statement records for Schedule K-1 records	7	Numeric Range = (0000000-9999999)
(20)	Total Number of Form 8308 records	7	Numeric Range = (0000000-9999999)
(21)	Reserved for EF	8	Alphanumeric Value = Blanks
(22)	Paper Document Indicator 1	1	Alphanumeric Value = "1" if other paper is attached, else "0"
	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 11. RECAP RECORD

The final record on each file is the RECAP record.

Field	Identification	Length	Format
	Byte Count	4	Value "0072"
	Start of Record Sentinel	4	Alphanumeric Value = "****"
(1)	Record Name	5	Value "RECAP"
(2)	Reserved for IRS only	8	Numeric Value = 00000000
(3)	Reserved	6	Numeric Value = 000000
(4)	Total Return Count	6	Numeric
(5)	Electronic Filer's Identification Number plus Filer's User Code	8	Numeric Value = NNNNNNnn NNNNNN = EFIN nn = Filer's user code; may be zero-filled
(6)	Julian Date of Transmission	3	Numeric
(7)	Transmission Sequence Number for Julian Day in (6)	2	Numeric
(8)	Reserved	24	Numeric (Zero-filled)
(9)	Filler	1	Alphanumeric Value = Blank
	Record Terminus Character	1	Alphanumeric Value = "#"

SEC. 12. THE ACKNOWLEDGMENT REPORT

.01 The acknowledgment report (Acknowledgment Listing of Transmission, see Attachment VII) is generated by IRS. It will contain information describing the magnetic tape filer, and the return file as specified in the TRANS record. In addition, the report will include the Document Locator Number (DLN) assigned by the IRS to each accepted return, the Employer Identification Number (EIN) for each return and acceptance codes. Also, counts for accepted, rejected, and duplicate records will be listed.

All magnetic tape filers who have submitted processable data will receive by mail, 2 hardcopies of the acknowledgment report within 7 days of submission of the return files.

.02 If the Acceptance Code field for a return on the report contains an "R", the return has been rejected due to a an error involving the return format, internal consistency, or data errors in a key field. Returns that have been rejected must be corrected and resubmitted to the IRS to be considered as filed returns. Additional information about the reasons that will cause the return to be rejected may be found in SEC. 13 below.

.03 If the Acceptance Code field for a return on the report contains a "D", the return has been identified as a duplicate record: i.e., a return record was previously submitted and accepted for that EIN; therefore, the return has been rejected.

.04 If the Acceptance Code field for a return on the report contains a "T", the entire transmission has been rejected.

.05 The error information on the acknowledgment report will contain data defining the form (see Attachment IV) the page number for multipage entries, the error field number, and the error code defining the specific error encountered. This information will be present for up to twelve error records. Each error record contains 8 reject codes for a possible maximum total of 96 reject codes per return.

.06 Any return with an "A" in the Acceptance Code field on the report, has been accepted as a filed return and will be processed from that point in the same manner as paper return documents. Acceptance of a return does not imply that the return will pass all IRS service center validity checks or post to the IRS Master File without delays.

.07 Reject Code Explanation

1. Up to 96 reject codes per return may be furnished to the magnetic tape filer on the acknowledgment report. Filers should use these codes to determine the source of the error causing the return or the entire return file to reject. If more than the maximum number of reject conditions (96) are identified, the 96th reject code will be listed as "999".
2. The reject codes and brief explanations of the conditions that cause the codes to be assigned are listed in Attachment III. Filers should use this information to resolve reject conditions. When a condition cannot be resoived with the information provided, the filer should contact the Electronic Filing Unit at the Andover Service Center for assistance.

SEC. 13. DATA VALIDATION AND REJECTION CRITERIA

.01 The exclusions listed in SEC. 2.03 of the Procedure in this publication must be adhered to or the return shall be rejected.

.02 If the following data controls are not complied with, the entire return file or the return shall be rejected:

1. The following conditions must exist or the entire submission of returns will be rejected:
   (a) the data records of the submission must be in the following sequence: TRANS Record, Return records and the RECAP Record;
   (b) the format of the TRANS Record and/or RECAP Record must correspond exactly to the record layouts specified above; or
   (c) there should be no duplicate submissions of any record file; or
   (d) There should be no unrecognizable or inconsistent control data in the TRANS and/or RECAP records.
2. The data records must be in the following sequence:
   (a) Return records (Page 1, 2, 3 and 4);
   (b) Schedule records other than Schedule K-1 (optional);
   (c) Form records other than Form 8308 (in ascending numeric order)—optional;

(d) Statement Records (statements not related to Schedule K-1—optional);

* (e) Schedule K-1 records (at least 2 are required);

* (f) Statement for Schedule K-1 records (optional)

(g) Form 8308 Records (Form 1065) (optional).

(h) Summary record (must be final record for each return)

* Record pairs e and f above are repeated for each Schedule K-1 in the return.

3. Page (Pgnn) records must be consecutive and sequential.

4. Both pages of multiple page schedules or forms must be present, with the following exceptions:

(b) Page 2 of Form 4562, and Form 4797 and Schedule K-1 need not be transmitted if there are no entries for that page. However, Page 2 of these schedules/forms must not be present without Page 1.

5. All fields must contain the type of data specified under the columnar heading "Format" in the record description. Alphanumeric fields must be left-justified unless otherwise specified. (For further clarification on validation criteria see Appendix B, SEC. 3, Field Specifications).

6. Significant money fields must be right-justified and zero-filled. Money fields must be all whole dollars (no cents). All other significant numeric fields must be as specified in SEC. 3.01.4 through 3.01.7. Significant percentage fields must be left-justified and zero-filled. All nonsignificant money fields must be zero-filled. All other nonsignificant fields must be blank unless otherwise specified in the Record Layouts. (See Appendix B, SEC. 3, Field Specifications)

7. All records must follow the ANSI byte count convention or have a byte count field which must precede the Record ID field for each page record and the count must be equal to the total number of characters contained in the page record. (Reminder: Byte Count includes the Byte Count field, Start of Record Sentinel, Record ID field, all other record fields, and the terminus character (#)).

8. The fields on a statement line (LN) record must be in the same format and sequence as they appear in the record layouts, and only one group of related fields can be entered per statement line (LN) record. Statement references in the tax return must be in ascending numerical sequence. (See Appendix B, SEC. 9, Statement Record, for detailed requirements)

9. The Employer Identification Number (EIN) must be nine numeric characters and must be consistent in all data records for a partnership return. The first two digits cannot begin with 00, 07, 08, 09, 10, 12, 15, 17, 18, 19, 20, 21, 24 26, 27, 28, 29, 30, 32, 40, 44, 49, 50, 53, 60, 67, 69, 70, 78, 79, 80, 89, 90, 96, and 97.

10. The format and content of the Record Identification information (Record ID) which begins each type of record, must always be present and exactly as stated in the input specifications.

11. The Tax Period (Field #5 of the Return Record) must fall within the ranges specified in SECTION 2.03.2 in the Procedure, of this publication. Fiscal year filers for a fiscal year ending September 30, 1989 (8909). October 31. 1989 (8910), or November 30, 1989 (8911) wishing to participate in magnetic tape filing of Form 1065 must file for an extension of time (see "When to File", Page 1 of instructions attached to official Form 1065) until March 1, 1990. Otherwise, 8909-8911 tax period fiscal year filers of Form 1065 must file a paper document with the appropriate service center. For special instructions about entering the Calendar/Fiscal Year Ending field see Appendix B, Section 15 of this publication.

12. A return will be rejected if program accumulators maintained while the returns are processed, do not match the counters in the SUMMARY record.

13. Foreign address returns are not permitted.

14. The Name Control field must be present.

15. Address data must be present.

16. All "total" fields must have a significant entry when there are amounts leading to the total. Similarly, any "total" field which has a significant entry must have at least one significant entry leading to that amount. Otherwise, the processing of the return will be delayed to resolve the discrepancy.

17. The following checks should be made in relation to Schedule K-1 and statement records for Schedule K-1 Forms 8308 and 8271:

(a) Total of count of Schedule K-1 and Forms 8271 and 8308 records should match total count found in the Summary Record;

(b) The sequence number in the Schedule K-1 statement records should match the sequence numbers of the related Schedule K-1 records.

18. All pages of return Form 1065 must be present. Even if there are no entries on pages 2, 3, and 4 of Form 1065, the pages must be generated with a significant Return Record ID field.

19. Statement records do *not* have to be consecutive but *must* be in ascending sequence. Each statement number reference occurring in a data field ("STMbnn") must have a corresponding statement record. Each statement record may be referenced only once, except for Schedule K-1 statements (which are always number 99). There may be no more than 98 statement page records, except Schedule K-1 statement records, with any return. For each statement record, at least, LN01, LN02, and LN03 must be present, and all line numbers must be in ascending numeric sequence.

Note: The Schedule K-1 statement record should always contain the statement number (STMb99), an additional 7 character field containing (0000001-9999999), which is the sequential Schedule Sequence Number (Field #007) assigned to the Schedule K-1 to which it relates and a blank K-1 Sequence # Filler field.

20. The Form/Schedule Sequence Number of the related schedule or form record must be significant and in ascending numerical sequence. The sequence number must not be greater than that permitted for the particular form or schedule.

21. In the return records of Form 1065 there must be no significant entry in the following fields of the following forms:

Form/Schedule	Title	Line #	Field #
Form 4797	Gain from Form 4684	I3	438
Form 4797	Section 1231 gain	I4	440
Form 4797	Net gain or loss from Form 4684: LOSS	II 14	940
Form 4797	Net gain or loss from Form 4684: GAIN	II 14	950
Form 4797	Ordinary gain from installment sales	II 15	960
Form 4797	Individual return loss	II 18 b(1)	1010
Form 4797	Individual return loss or gain	II 18 b(2)	1020
Form 4797	Section 291 amt. Property A	26f A	1500
Form 4797	Section 291 amt. Property B	26f B	1570
Form 4797	Section 291 amt. Property C	26f C	1640
Form 4797	Section 291 amt. Property D	26f D	1710
Form 4797	Section 1252 soil, water and land expenses Property A	III 27 a A	1730
Form 4797	Section 1252 27a times applicable percentage Property A	III 27 b A	1740
Form 4797	Section 1252 smaller of line 24 or 27b Property A	III 27 c A	1750
Form 4797	Section 1252 Soil, Water and Land Expenses Property B	III 27 a B	1760
Form 4797	Section 1252 27a times applicable percentage Property B	III 27 b B	1770
Form 4797	Section 1252 smaller of line 24 or 27b Property B	III 27 c B	1780
Form 4797	Section 1252 Soil, Water and Land expenses Property C	III 27 a C	1790
Form 4797	Section 1252 27a times applicable percentage Property D	III 27 b C	1800
Form 4797	Section 1252 1810 smaller of 24 or 27b Property C	III 27 c C	1810
Form 4797	Section 1252 Soil, Water and Land expenses Property D	III 27 a D	1820
Form 4797	Section 1252 27a times applicable percentage Property D	III 27 b D	1830
Form 4797	Section 1252 smaller of line 24 or 27b Property D	III 27 c D	1840
Form 4797	Check for election out of install method	33	2040
Form 4797	Face amount of Note	34	2050
Form 4797	% of evaluation	35	2060

22. Form records of return Form 1065 must be in ascending numeric sequence.
23. There *must be no* significant data present for the following fields from the Form 1065 record:

Field #	Title	Line #
180	Change in address	G(3)
190	Amended return	G(4)
500	Net farm profit	5
960	LIFO inventory	A-8b
1940	Low income housing credit	K-12b(1)
1945	Other	K-12b(2)
2040	Gross farming or fishing income	K-14b

24. There must be no significant data present for the following fields from Schedule K-1:

Field #	Title	Line #
380	Amended K-1	J
630	Low income housing credit	12b(1)
640	Low income housing credit (other)	12b(2)
720	Gross farming or fishing income	14(b)
950	Low income housing credit	19(a)
960	Low income housing credit	19(b)

25. There must be no significant entry for the fields of the schedule specified below.

Sch/Form	Title	Line #	Field #
Sch. D	Short-Term Capital Gain from Form 6252	2	390
Sch. D	Long-Term Capital Gain from Form 6252	6	780

26. The following fields must be equal (comparison of bottom line of schedule or form with return carry-forward line):

		Line From Form 1065 Record				
Field	# Title	Line #	Sch/Form	Field #	Title	Line #
460	Cost of goods sold and/or operations	2	Sch A	890	Cost of goods sold	7
510	Net gain (loss)	6	4797	1000	Combine gain/losses	18
1790	Net short-term capital gain/ loss	K(4d)	Sch D	410	Net short-term gain/loss from lines 1-3	4
1800	Net long-term capital gain/ loss	K(4e)	Sched. D	810	Net long-term gain/loss from lines 5-8	9

27. Business Code Number (Field #140) and the Number of Partners (Field #200) must be present.

28. If Tax Period (Field #5 of the Return Record) is significant, the entry must be equal one of the tax periods specified in Part I, Section 1.01.1 of this document.

29. If Question N—no (Field #3226) is "X" or Total Assets (Field #150) is significant, then Sch. L and M must not be blank.

30. If Depreciation (Field #630) is significant, Form 4562 must be attached.

31. Number of Partners (Field #200) must be greater than, or equal to, 2.

32. There may be multiple Schedules K-1, Form 8271, and Forms 8308 (0000001-9999999), but only one Schedule D, Form 4797, and no more than 3 Forms 4562.

Note: With multiple schedules or forms, the page number must be sequential within the Schedule Sequence Number of a schedule or the Form Sequence Number of the form.

33. If any of the following fields are blank, the return will be rejected.

Form/Schedule	Line Title	Field #	Ln Number
1065	Employer Id #	070	D
1065	Name Control	030	
1065	Name Line 1	050	
1065	Street Address	090	
1065	City	110	
1065	State	120	
1065	ZIP Code	130	
1065	Business Code Number	140	C
1065	Number of Partners	200	I

34. If Tax Shelter Registration Number (Field #320) is significant in Schedule K-1, Form 8271, Investor Reporting of Tax Shelter Registration must be submitted.

NOTE: See Attachment III for explanations of reject codes. Reject Codes are assigned to conditions that cause the return or the entire return file to be rejected. They are based on criteria set forth in the above section and elsewhere in this Revenue Procedure.

SEC. 14. SPECIAL INSTRUCTIONS FOR ENTERING PARTNERSHIP'S NAME AND ADDRESS

These instructions must be followed carefully to avoid delaying returns for error conditions. They must be included in magnetic tape filers' programs as consistency tests and in the data entry instructions. The return must not contain a foreign address. Foreign addresses are from other than the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, Caroline Islands, Federated States of Micronesia, Northern Mariana Islands, Marshall Islands, and Palau Islands.

.01 *Name Line 1*

1. Only alphabetic characters, numbers, spaces and the special characters ampersand (&), slash (/), and hyphen (-) may appear in the Partnership name line.
2. Only one intervening space may separate any component of a name line or street address.
3. All apostrophes, and any other punctuation characters except the hyphen, must be omitted from names and the alphabetic characters must be shifted to the left in their place (e.g., O'Shea = OSHEA).
4. Numeric characters in name components must be replaced by alphabetic Roman numerals (e.g., Charles 3rd = CHARLES III).

.02 *Instructions for Street Address and Name Line 2*

1. Only alphabetic and numeric characters, ampersand (&), slash (/), hyphen (-), percent (%), and spaces appear in the street address and partnership name line fields.
2. Only one intervening space may separate any two components of any name line, the street address lines, or the city lines. Periods should be deleted from these lines.
3. The name and title of the Partnership will be used for the Partnership name line (Field #050).
4. For the street address, enter the house number and street, route number, post office box, or box number.
5. Abbreviate words requiring standard abbreviations unless the word is a proper name.

Examples	Enter As
South Court Street	S COURT ST
Circle Drive	CIRCLE DR
Lane Building	LANE BLDG
Northeast Street	NORTHEAST ST
Third Street	THIRD ST
3 Ave.	3RD AVE

6. Enter college, building, or post office branch as the address if no mailing address is given.
7. If "In Care Of" is the mailing address, use the symbol "%" followed by a space.

Example: J. Lamb & H. Lamb Ptrs
In Care of Alice B. Smith
801 Brown St.

Enter As: J LAMB & H LAMB PTRS (Name of Partnership)
% ALICE B SMITH (Partnership Name Line)
801 BROWN ST (Street Address)

8. Do not use the "#" symbol, "No.", or "Number" as a prefix to a house, apartment., route, or P.O. Box.
9. Always add st, nd, rd, th, to a numbered street or avenue. Examples: 1 = 1ST; 2 = 2ND; 3 = 3RD, etc.
10. Enter ½ as ½ (no spaces).
11. Plurals for street, road, avenue, apartment, etc., will be entered as STS, RDS, AVES, APTS, etc.
12. Omit the letters "APO" and "FPO" in the address. ZIP Code MUST be transcribed as five digits or nine digits.
13. The following standard abbreviations are preferred:

WORD	ABBR.
and	&
Air Force Base	AFB
Apartment	APT
Avenue	AVE
Boulevard	BLVD
Building	BLDG
Care of, or In care of	%
Circle	CL
Court	CT
Drive	DR
East	E
General Delivery	GEN DEL
Highway	HWY
Lane	LN
North	N
Northeast, N.E.	NE
Northwest, N.W.	NW
Parkway	PKY
Place	PL
Post Office Box, P.O. Box	PO BOX
Route, Rte.	RT
Road	RD
R.D., Rural Delivery, RFD, R.F.D., R.R. or Rural Route	R D
South	S
Southeast, S.E.	SE
Southwest, S.W.	SW
Street	ST
Terrace	TER
West	W
One-Half	½ (all fractions, space before and after the number, i.e., 1012½ ST)

14. If there is no information for Name Line 2, enter blanks.

.03 *Instructions for City, State and ZIP Code Fields*

1. The City field may contain alphanumeric characters. The only special character allowed is the blank. If the name of a city

contains two words or more, only one intervening space is allowed between consecutive words (e.g., New York)

2. Standard abbreviations for STATE CODE are listed Attachment V.
3. There cannot be two consecutive blanks within significant data.

.04 *Special Instructions for Determining the IRS Name Control Field*

1. The Name Control consists of the first four significant characters of the first individual's last name if the partnership's name is a series of individuals' names, or the first four significant characters of the name of the partnership if the name is a business name. Disregard blanks between letters in the last name. Omit punctuation marks, titles and suffixes. Exclude the word "the" when followed by more than one word.

Examples (Form 1065)

Partnership Name	Name Control
Shamrock, Shinleaf and Smartweed	SHAM
Bones and Bones Attorneys at Law	BONE
James En & Robert Yee	EN
J. Lamb & H. Lamb Ptrs.	LAMB
En, En Yee & Yee	EN
James, Mary, and John Grey	GREY
Black and White Associates	BLAC
Bernard Black Associates	BERN
Three Stars Legal Services	THRE
J & H Lamb, Attorneys at Law	LAMB
Alley and Avenue Realtors	ALLE

The name control consists of the first four positions. Valid characters are A–Z, 0–9, hyphen (-), ampersand (&), and blank. The first position cannot be blank, nor can there be intervening blanks between characters. Partnership names are reported in several ways. Following are some examples of partnership names and the corresponding name controls.

Type of Name	Name Control
Trade name or or "doing business as" (dba)	*Flow*er Diner
Partnership name	*Green* Brothers Partnership
List of partners	J. *Apple*, T. Banana, et al.
General partnership	D. *Dahl*ia, General Partner, et al.

2. *Before* you determine the name control, take the following into consideration.

(a) The first position can only be alpha and numeric characters, A–Z and 0–9.

(b) Positions 2, 3, and 4 can be alpha and numeric characters A–Z and 0–9; the ampersand (&) and the hyphen (-) and blanks are the only special characters allowed.

Example: John A *El-R*ose

Example: Wayne *Elm* Mary Al

3. Consider certain foreign suffixes as part of the last name (i.e. Armah-Bey, Paz-Ayala, Allar-Sid). Particular attention must be given to those names which incorporate a mother's maiden name as a suffix to the last name. This practice is common in names of Spanish extraction. Consider the mother's maiden name as part of the surname for Name Control purposes.

Examples

Individual Name	*Name Control*
John Brown	BROW
John Lea-Smith	LEA-
John Di Angelo	DIAN
John O'Neil	ONEI
John En, Sr.	EN
Pedro Paz-Ayala	PAZ-
Abdullah Allar-Sid	ALLA
Joe McCarty	MCCA
Juan de la Rosa Y Obregon	DELA
Jose Alvarado Nogales	ALVA
Donald Vander Neut	VAND
Otto Von Wodtke	VONW
Mary Smith & John Jones	SMIT

SEC. 15. SPECIAL INSTRUCTIONS FOR ENTERING CALENDAR/FISCAL YEAR ENDING

The Tax Period (Field #5 in the Return Record) field is composed of numeric month and year of the calendar/fiscal year ending for which the return is being filed. The format is YYMM (YY = year and MM = month). For example, a return with a calendar/fiscal year ending of February 15, 1989, will be assigned a tax period of 8902. Returns filed under the 52–53 week rule may end not more than 6 days before or more than 3 days after the close of the month. They should be assigned a tax period based on that month (i.e. if the ending date is October 3, 1989, the tax period field will be 8909, or if the ending date is October 25, 1989, the tax period is 8910).

Paperwork Reduction Act Notice.—We ask for this information to carry out the Internal Revenue laws of the United States. We need it to ensure that taxpayers are complying with these laws and to allow us to figure and collect the right amount of tax. You are required to give us this information.

The time needed to complete and file this form will vary depending on individual circumstances. The estimated average time is:

Recordkeeping	7 min.
Learning about the law or the form	1 min.
Preparing the form	13 min.
Copying, assembling, and sending the form to IRS	20 min.

If you have comments concerning the accuracy of these time estimates or suggestions for making this form more simple, we would be happy to hear from you. You can write to the Internal Revenue Service, Washington, DC 20224, Attention: IRS Reports Clearance Officer, T:FP; or the Office of Management and Budget, Paperwork Reduction Project (1545-0967), Washington, DC 20503.

Purpose of Form.—Use Form 8453-F to: (1) authenticate the magnetic tape/electronic filing of Form 1041, U.S. Fiduciary Income Tax Return; (2) serve as a transmittal for any associated paper documents that may be stapled to the declaration; and (3) authorize the magnetic tape/electronic filer to transmit via a third party transmitter.

Who Must File.—Every estate or trust wishing to file a 1989 Form 1041 via magnetic tape or electronically must complete Form 8453-F.

Where To File.—The fiduciary of the estate or trust should give Form 8453-F to the third party transmitter. The third party transmitter should send the form to: Internal Revenue Service, Andover Service Center, 310 Lowell Street, Andover, MA ~~01812~~ 05501, Attention: Electronic Filing Unit, Stop 981.

When To File.—The third party transmitter should send Form 8453-F to the Andover Service Center within 5 days of receipt of the Acknowledgment File. Do not send Form 8453-F for a return that has not been acknowledged as accepted by IRS.

Document Locator Number (DLN)

The DLN is a 14-digit number assigned by the IRS to each return. Get the number from the Acknowledgement Listing of Transmission and enter it in the box in the upper right-hand corner of this form. Only returns that have been accepted by IRS will have a DLN.

Note: *For consolidated Forms 8453-F, enter two DLNs to show the range of numbers in the batch being transmitted. See the instructions in* Pub. 1437, *Revenue Procedure and File Specifications for Electronic/Magnetic Tape Filing of Fiduciary Return Forms 1041 and Partnership Return Forms 1065 for Tax Year 1989.*

Purpose of Form.—Use Form 8453-P to: (1) authenticate the magnetic tape/electronic filing of Form 1065, U.S. Partnership Return of Income; (2) serve as a transmittal for any associated paper documents that may be stapled to the declaration; and (3) authorize the magnetic tape/electronic filer to transmit via a third-party transmitter.

Who Must File.—Every partnership wishing to file a 1989 Form 1065 via magnetic tape or electronically must complete Form 8453-P.

Where To File.—Send Form 8453-P to: Internal Revenue Service, Andover Service Center, 310 Lowell Street, Andover, MA 01812, Attention: Electronic Filing Unit, Stop 981.

When To File.—Send Form 8453-P to the Andover Service Center within 5 days of receipt of the Acknowledgment File. Do not send Form 8453-P for a return that has not been acknowledged as accepted by IRS.

Document Locator Number (DLN)

The DLN is a 14-digit number assigned by the IRS to each return. Get the number from the Acknowledgement Listing of Transmission and enter it in the box in the upper right-hand corner of this form. Only returns that have been accepted by IRS will have a DLN.

Note: *For consolidated Forms 8453-P, enter two DLNs to show the range of numbers in the batch being transmitted. See the instructions in Pub. 1437, Revenue Procedure and File Specifications for Electronic/Magnetic Tape Filing of Fiduciary Return Forms 1041 and Partnership Return Forms 1065 for Tax Year 1989.*

Form 9041 (Rev. October 1989)

Department of the Treasury - Internal Revenue Service

Application for Electronic/Magnetic Tape Filing of Forms 1041, 1065, or 5500-C/R

OMB Number 1545-1079 Expires: 07-31-92

1.

a. Firm name (See instructions.)

b. Employer identification number (EIN must have 9 digits.)

c. P.O. Box and street address

d. Contact person's name

City | State | ZIP Code

e. Daytime telephone number (Include area code)

( ) _____

2. This application is filed by those who desire to participate in the electronic/magnetic tape filing program for the following forms: *(Check each appropriate box.)*

- ☐ Form 1041, U.S. Fiduciary Income Tax Return
- ☐ Form 1065, U.S. Partnership Return of Income
- ☐ Form 5500-C/R, Return/Report of Employee Benefit Plan (with fewer than 100 Participants)

3.

a. Have you ever had an electronic identification number (EFIN)? ☐ Yes ☐ No

b. If yes to 3a, when did you have it? Year ____

c. If yes to 3a, please provide your EFIN.

4.

a. Will you transmit returns directly to the IRS? ☐ Yes ☐ No ☐ Not sure at this time

b. Will you transmit returns electronically? ☐ Yes ☐ No ☐ Not sure at this time

c. Will you transmit or send data to another office, through which the data is transmitted to IRS? ☐ Yes ☐ No ☐ Not sure at this time

d. Will you develop or modify software that prepares returns for electronic/magnetic tape filing? ☐ Yes ☐ No ☐ Not sure at this time

e. Will you file on magnetic tape? ☐ Yes ☐ No ☐ Not sure at this time

f. Will you obtain appropriate signatures for the electronic/magnetic tape returns? ☐ Yes ☐ No, another filer will

5. May we give your name and address to firms that offer services related to electronic/magnetic tape filing? (See instructions) ☐ Yes ☐ No

6.

a. Are you a plan administrator (Form 5500-C/R)? (See instructions) ☐ Yes ☐ No ☐ Not applicable

b. If 6a is yes, please provide:

Name of plan administrator

Plan administrator EIN (must have 9 digits)

Street address

Plan administrator phone number (Include area code)

City | State | ZIP Code

( ) _____

7. Which software and transmission service will you use? Write their names below. (See instructions.)

Paperwork Reduction Act Notice

We ask for this information to carry out the Internal Revenue laws of the United States. We need it to process your application for electronic or magnetic tape filing of Forms 1041, 1065, or 5500-C/R. You must give us this information if you wish to participate in the electronic/magnetic tape filing program for these forms.

The time needed to complete this form will vary depending upon individual circumstances. The estimated average time is 18 minutes. If you have comments concerning the accuracy of this time estimate or suggestions for making this form more simple, we would be happy to hear from you. You can write to the Internal Revenue Service, Washington, DC 20224, Attention: IRS Reports Clearance Officer T:FP; or write Office of Management and Budget, Paperwork Reduction Project (1545-1079), Washington, DC 20503.

Instructions

Purpose of form.- File Form 9041 if you would like to take part in the electronic/magnetic tape filing program for Forms 1041, 1065, or 5500-C/R. Only filers who did not participate in last year's electronic/magnetic tape filing program need apply.

When to file.- To ensure complete and timely review of your application, file Form 9041 at least 30 calendar days before the end of the accounting period for which the entity files. IRS uses the postmark date on the envelope to determine whether the application was filed timely.

Where to file.- Send the completed Form 9041 to-

Internal Revenue Service Center
310 Lowell Street
Andover, MA 05501
ATTN: EFU-Stop 981

Line 1a.- Enter the name as shown on the return filed for the entity.

Line 1c.- If you have both a post office box and street address, enter both addresses for the firm's main office. We need both addresses in case we need to send information to you by overnight mail.

Line 1d and 1e.- If this information changes, please notify the Andover Service Center.

Line 5.- Complete this section if you would like your name and address given to vendors of services related to electronic/magnetic tape filing. This will give you an opportunity to receive electronic/magnetic tape filing information from vendors who either have applied or have participated in the program.

Line 6.- Complete this section if you file Form 5500-C/R and you are a plan administrator. Please enter the plan administrator information as shown on the Form 5500-C/R.

Line 7.- If this information changes, please notify the Andover Service Center. If you do not know what software company or transmitter you will use, or if you will use you own software or communication equipment, please indicate this in the space provided.

ATTACHMENT III

Reject Codes and Explanations

Note: Reject code explanations marked with an (*) mean that, if such a condition exists, the entire return file is rejected.

001-499 Reserved

500 Employer Identification Number (EIN) on the return record is not consistent on all schedules, forms, or statements.

501 Key numeric data field is not in the prescribed form as follows:

a. In Form 1041, money amount fields must be 12 characters, 11 numerics followed by the sign character; in Form 1065, money amount fields must be 11 characters, 10 numerics followed by the sign character. Negative sign should be used for the negative amounts and a blank space for positive amounts.

b. Money amount fields must be numeric, zero-filled and justified to the right; whole dollars, no cents.

c. All percentage fields must have five positions, left-justified and zero-filled. No decimal points are allowed. There is no entry, blanks must be present.

Exception: Schedule K-1 (for Form 1065) Fields #250-300 require six positions.

d. All dates must be in the MMDDYY, MMYY or YYMM format (see Publication 1438 - Record Layouts for specific date fields.

e. Other numeric fields must not contain any non-numerics, are zero-filled and justified to the right; significant percentage fields must be left-justified and zero-filled (Exceptions, ZIP Codes, dates, SSN, and the EIN fields).

f. ZIP Codes must be 5 or 9 digit numeric fields, left-justified and blank-filled.

g. SSN and/or EIN fields must be blank for no entry.

Reject Codes and Explanations

502 Calendar/Fiscal Year Ending (Field #020) of return record is not valid.

503 Field #800 Capital gain distribution, Schedule D of Form 1065 is negative.

504 Any of following fields have negative money amount entries in the return record for Form 1041:

Form 1041:

(a) Deduction lines 10-16 and 19-20 (Field #s 420-460, 480, 485, 486, 490, 530-540

(b) Income lines 1 and 2, Field #s 300-310

(c) Total Tax line 23, (Field #570), Charitable deductions (Field #950), and Total (Schedule G, Field #1340)

(d) Payments amount (Field #580)

(e) Federal income tax withheld amount (Field #670)

(f) Total (Field #720)

(g) Credited to 1990 (Field #750)

(h) Refunded amount (Field #760)

(i) Alternative minimum tax (Field #1330)

Schedule D:

(a) Computation of capital loss, from Line 18 above as positive amount (Field #1770)

(b) Loss shown on line 6 (Field #1794)

(c) Net loss from line 17 (Field #1750)

Form 8656

(a) Combine lines 4a through 4d (Field #100)

(b) Alternative tax net operating loss (Field #350)

Reject Codes and Explanations

505 Name Control (Field #030) of return record is not present, or is in invalid format.

506 Address Data (Fields #090, 110, 120, 130 in Form 1065 and Fields 220-250 in Form 1041) record is not present, or is in invalid format.

507 The return is duplicated or any page on the return is duplicated.

508 Not all alpha characters are in upper case, or alphanumeric fields are not in proper left-justified format.

509 ZIP Code of the return is not within the valid range of ZIP Codes.

510 Name Line 1 (Field #050) in Form 1065 record is not present, or is in invalid format.

511 Number of Partners (Field #200) is missing from Form 1065.

512 Reserved

513 Total count of Forms W-2, or W-2P (Fields #13 and 14 of the Summary Record) does not match total Form W-2 and W-2P computed by IRS program.

514 Tax Period (Field #5) in the Return Record is invalid.

515 Form 1065, Page(s) 1, 2, 3, or 4 is/are missing or out of sequence from the Tax Return records. Record ID field(s) (Field #000, Field #800, Field #1690 or Field #2470) is/are missing from the return.

516 The return record of Form 1065 is not in sequence of, schedules in ascending alpha sequence, forms other than Form 8308 in numeric sequence, statements (for forms and schedules other than Schedule K-1), schedules K-1 in sequential number order, statements for K-1s, Forms 8308 in sequential number order and summary record; or pages within any of the forms and schedules are not consecutive and sequential.

517-518 Reserved

Reject Codes and Explanations

519 Total Logical Record Count field value on the summary record does not equal the total logical record count computed by the IRS program.

520 Total Statement Line Record Count field value on the summary record does not equal the total statement line record count computed by the IRS program.

521 Number of Schedule Page Records field value on the summary record does not equal the total schedule records count computed by the IRS program.

522 Number of Form Page Records field value on the summary record does not equal the total forms records count computed by the IRS program.

523 Required statement field is significant and does not contain "STMbnn", or there is no corresponding statement record for a given statement reference; or any one of LN01, LN02, or LN03 is missing from a statement record.

524 Statement reference for a given statment record is used more than once or if the number of actual referenced statement records exceeds the number of fields marked with"@" or "*".

525 Number of actual referenced statement records exceeds limitations (these limits do not apply to Schedule K-1 statements):

- the number of fields (fields in which a statement reference is allowed cannot exceed 98 for all forms and schedules except Schedule K-1 and corresponding statements) and/or;
- statement record exceeds 2 pages and/or;
- a page of the statement record contains more than 50 lines and/or;
- line numbers are not in ascending numeric sequence.

526 For return Form 1041 there are more than:

one Schedule D
one Form 4952 or 8656
twenty Forms W-2 or W-2P

Reject Codes and Explanations

527 Return records of Form 1041 contain records other than:

Form 1041, Schedule D, Schedule K-1, Form 4952, 8656, W-2 and W-2P

528 The Filer's SSN field and the Preparer's Firm EIN field are absent from the summary record or either the Paid Preparer's SSN field or Preparer's Firm EIN field is invalid. (SSN is a 9-digit numeric field that cannot be all zeros or all nines).

529 Return submitted is a short period return due to a a change in the accounting period.

530 One of the following fields of Form 1065 return record is significant and should not have an entry:

Form 1065:	Field #
Change in address	180
Amended returns	190
Net farm profit	500
LIFO Inventory	960
Low income housing credit	1940
Other	1945
Gross farming or fishing income	2040
Schedule K-1	
Amended K-1 Low income housing	380
Credit	630-640
Gross farming or fishing income	720
Low income housing Credit	950-960

Reject Codes and Explanations

530 (Continuation)

Schedule D

Short-term capital gain	390
Long-term capital gain	780

531 Number of K-1 Page Records field value on summary record is not equal to computed total Schedule K-1 records count computed by the IRS program.

532 For Return Form 1065 there are more than one Schedule D, one Form 4797, or three Forms 4562

533 Return records of Form 1065 contain records other than :

Form 1065, Schedule D, Schedule K-1, Forms 4562, 4797, 8271 and/or 8308.

534 Employer Identification Number (Field #070 in Form 1065 and Field #040 in Form 1041) is not numeric; or EIN is equal to blanks, all zeros or all nines; or first two digits are:

00, 07, 08, 09, 10, 12, 15, 17, 18, 19, 20, 21, 24, 26, 27, 28, 29, 30, 32, 40, 44, 49, 50, 53, 60, 67, 69, 70, 78, 79, 80, 89, 90, 96 or 97.

535 In Form 1065, Depreciation (Field #630) is significant and Form 4562 is missing.

536 In Form 1065, Question-N (No), (Field #3226), is "X" or Total assets (Field #150) is significant and Schedules L and M are blank.

537 Cost of goods sold and/or operations (Field #460), from Form 1065, is not equal to Cost of goods sold (Field #890) from Schedule A.

538 Net gain/loss, (Field #510), from Form 1065, is not equal to Combine gain/losses (Field #1000), from Form 4797.

Reject Codes and Explanations

539 Net short-term gain/loss (Field #410) from Sched D, is not equal to Net Short-term capital gain/loss (Field #1790) from Form 1065.

725 In Form 1041 if:

(a) (Field #050) Decedent Estate is "X", and Fields #060, 070 and 080 are not blank.
(b) (Field #060) Simple Trust is "X", and Field #070 is not blank.
(c) (Field #070) Complex Trust is "X", and Fields #050 and 060 are not blank.
(d) (Field #080) Grantor Type Trust is "X", and Field # #050 is not blank.

726 There is an entry for Income Distribution (Field #510) on Form 1041 and no Schedules K-1 are attached.

727 A "total field" that should have an entry (there is at least one amount field leading to the total) is blank.

728-729 Reserved

730 In Form 1041

(a) Capital gain/loss (Field #360) is negative, and does not equal to the entry in Net loss (Schedule D, Field #1750) or not more than $3000 loss;
(b) Capital gain/loss is positive and does not equal Total net gain (Schedule D, Field #1730).
(C) Capital gain/loss (Field #360) = 0 and Field # 1750 > 0 .

731 Reserved.

732 Form 1041 Page 1 or 2 is missing or out of sequence from the return record, or the Return Record ID (Field #000 and 860) is missing from either page.

733 The return record of Form 1041 is not in sequence of, schedules in ascending alpha sequence, forms other than W-2 or W-2P in ascending numeric sequence, Form W-2, Form W-2P, statements, schedules K-1 in sequential number order, statements for K-1s, and summary record; or pages within any of the forms and schedules are not consecutive and sequential.

734 If Tax Due (Field #730) and Overpayment (Field #740 are both greater than zeros.

735-799 Reserved

Reject Codes and Explanations

800 Disallowed fiscal year Form 1041 return under the present Tax Law.

801-821 Reserved

* 822 Duplicate submission of return file.

* 823 The entire submission of returns has been rejected due to unrecognizable or inconsistent control data.

824 Reserved

* 825 Submitted data is not in the proper sequence of the TRANS record, Return record(s), and the RECAP record or record format of TRANS or Recap record is incorrect.

26 CFR 601.701: Publicity of information.

Rev. Proc. 90-47

SECTION 1. PURPOSE

The purpose of this revenue procedure is to notify officers and employees of Federal, state, and local agencies administering certain programs under the Social Security Act, the Food Stamp Act of 1977, and State unemployment compensation laws of the manner, time and place by which they may obtain certain return information from the Internal Revenue Service in accordance with Section 6103(l)(7)(B) of the Internal Revenue Code.

SEC. 2. BACKGROUND

01. Section 6103(l)(7) of the Internal Revenue Code was amended by Section 651 of the Deficit Reduction Act of 1984, P.L. 98-369 (1984-3 C.B. (Vol. 1) 1), to enable agencies administering certain programs under the Social Security Act, the Food Stamp Act and State unemployment laws to receive from the Service current return information with respect to unearned income for the purpose of determining eligibility for or the correct amount of benefits under these programs.

02. The return information will be extracted from the Wage and Information Returns (IRP) File—Treas/IRS 22.061, hereafter referred to as the Information Return Master File (IRMF) for the latest processing year. This file contains information returns filed by payers of income such as interest and dividends reported on Forms 1099-INT and 1099-DIV. The information will be extracted on a monthly basis using magnetic tapes submitted by the Coordinating State Agency or the Federal agency with oversight responsibility for the particular program. The information will likewise be on magnetic tape when it is provided to the appropriate agency.

03. The program to extract the information from the IRMF was operational on July 1, 1985.

SEC. 3. AUTHORITY

Section 6103(l)(7)(B) of the Internal Revenue Code requires the Service, upon written request, to disclose unearned income information to Federal, state, and local agencies administering the following programs:

(i) Aid to Families with Dependent Children (AFDC) provided under a State Plan approved under Part A of Title IV of the Social Security Act;

(ii) Medical assistance provided under a State plan approved under Title XIX of the Social Security Act;

(iii) Supplemental Security Income benefits provided under Title XVI of the Social Security Act, and federally administered supplementary payments of the type described in Section 1616(a) of such Act (including payments pursuant to an agreement entered into under Section 212(a) of Public Law 93-66, 87 Stat. 155);

(iv) Any benefits provided under a State plan approved under Titles I, X, XIV, or XVI of the Social Security Act (as those titles apply to Puerto Rico, Guam, and the Virgin Islands);

(v) Unemployment compensation provided under a State law as described in Section 3304 of the Internal Revenue Code;

(vi) Assistance provided under the Food Stamp Act of 1977; and

(vii) State-administered supplementary payments of the type described in Section 1616(a) of the Social Security Act (including payments pursuant to an agreement entered into under Section 212(a) of Public Law 93-66 [1973-2 C.B. 439]).

Information may be disclosed by the Service only for the purposes of, and to the extent necessary in, determining eligibility for or the correct amount of benefits under the aforementioned programs.

SEC. 4. DEFINITIONS

Element	*Description*
DM-1 File	SSA file of all validly issued SSNs and their related names.
EBCDIC	Extended Binary Coded Decimal Interchange
EIN	Employer Identification Number which has been assigned by the Internal Revenue Service to the reporting entity.
File	For the purpose of this Revenue Procedure, a file consists of all magnetic media records submitted by a requesting agency.
IRMF	Wage and Information Returns (IRP), Treas/IRS 22.061, commonly referred to as Information Return Master File.
Payee	Person(s) or organization(s) receiving payments from the reporting entity or for whom an information return must be filed.
Payer	Person or organization, including paying agent, making payments or is otherwise required to issue an information return.
SSA	Social Security Administration.
SSN	Social Security Number assigned by SSA.
TIN	Taxpayer Identification Number which may be either an EIN or SSN.

SEC. 5. APPLICATION FOR INCLUSION IN PROGRAM

01. Disclosures by the Service will be made on a reimbursable basis. This will be a magnetic media project in which the return information is accessed by magnetic tape supplied by the requesting agencies and return information about identified individuals is provided on magnetic tape by the Service. Input by paper will not be accepted and no disclosures will be made on paper.

02. Agencies wishing to receive data under Section 6103(l)(7)(B) of the Code should submit their applications to:

Internal Revenue Service
Director, Office of Disclosure
Room 1603 EX:D
1111 Constitution Ave., NW
Washington, D.C. 20224

03. The application must be made in writing and be signed by the head of the Federal, state, or local agency.

04. The application must contain the following information:

1) an overview of how the information will be used, the programs for which the information will be used, who will conduct the eligibility verification, if any counties will have access to the information, and any other relevant information as to how the receiving agency will use the tax information;
2) the authorizing statute by which the agency qualifies to receive the information;
3) the name(s) and title(s) of the official(s) who is (are) authorized to request return information;
4) the actions which will be taken by the agency to comply with the safeguard and reporting requirements of Section 6103(p)(4) of the Code (see Section 8 of this Revenue Procedure and Internal Revenue Service Publication 1075, *Tax Information Security Guidelines);*
5) a statement certifying that the safeguards to be employed will be in place at the time the agency makes its initial request for return information;
6) the name(s) and title(s) of the official(s) in the agency who has (have) responsibility for safeguarding the return information, and;
7) if appropriate, whether the agency will be acting as the Coordinating State Agency for purposes of requesting information or if it is an agency for whom a Coordinating State Agency will make requests for information (see Sections 10.02-10.04). The agency should identify these other State agencies which are participating in that State's consolidated effort to obtain return information.

SEC. 6. MATCHING AGREEMENTS

01. Upon receipt and approval of an application from an agency, the Service will prepare a matching agreement in accordance with the Computer Matching and Privacy Protection Act of 1988, P.L. 100-503. The agreements will specify in detail the following information:

1) the purpose and legal authority for conducting the match program;
2) justification for the match program and anticipated results;
3) description of the records to be matched;
4) projected starting and completion dates of the match program;
5) procedures for providing notice to individuals that information provided by them may be subject to verification through matching programs;
6) procedures for verifying information produced in matching programs;
7) procedures for the retention and timely destruction of identifiable records created by the recipient agency in the matching program;
8) procedures for ensuring the administrative, technical, and physical security of the records matched and the results of such programs;
9) prohibitions on duplication and redisclosure of records;
10) procedures governing the use by a recipient agency of records provided in the matching program including return or destruction of records;
11) information on assessments made regarding the accuracy of the records used in the matching program, if available; and
12) that the Comptroller General may have access to all records of a recipient agency necessary in order to monitor or verify compliance with the agreement.

02. The requesting agency will be provided two original copies of the prepared matching agreement for signature by the agency head or other delegated official authorized to request data. Both copies of the matching agreement must have an original signature.

03. The Service will receive the signed agreement from the agency. After the signature of the Service's approving official is obtained and copies are forwarded to the appropriate Congressional Committees, a copy of the agreement will be returned to the requesting agency.

04. The agreement will remain in effect for a period not to exceed 12 months, will cover one processing year and shall be effective 30 days after the date copies are provided pursuant to Section 6.03.

05. Matches may not take place until agreements have been signed by both agencies, copies provided to the appropriate Congressional Committees and notice published in the Federal Register. In addition, all matches must be approved by the Department of Treasury Data Integrity Board.

SEC. 7. REIMBURSEMENT

01. All work done by the Service for agencies administering will be performed on a reimbursable basis. Billing will be based on the number of data records processed as work is completed on a quarterly basis. The cost per data record is 1 cent per record submitted. The cost per Service tape, if used, will be $12. These charges are subject to change. Billings will be made directly to each agency that requests return information.

02. In addition to the matching agreement, the Service will prepare Form 5181, Agreement Covering Reimbursable Services upon receipt of and approval of an application from an agency. The requesting agency will be provided an original and copy of the prepared agreement.

03. The requesting agency will complete boxes 5a, 5b, and 5c and 9a, 9b, and 9c of Form 5181. Federal agencies must provide their Agency Location Code (ALC) in block 6b. The person indicated in box 5a will be the person coordinating requests and receipt of data from the Service. The address in 5B will be the address to

which the magnetic tapes will be shipped. The signature in box 9a must be that of the agency head or other delegated official authorized to request data. Both the original and copy of Form 5181 must have an original signature.

04. The Service will receive the signed documents from the agency. After the signature of the Service's approving official is obtained, a copy of the matching agreement and Form 5181 will be returned to the requesting agency. The Service will also provide an agency code to be used when making requests.

05. Upon receipt of the signed matching and reimbursable agreements, the agency may begin requesting return information in accordance with Sections 10, 11 and 12 of this Revenue Procedure.

SEC. 8. SAFEGUARDS AND RECORDKEEPING REQUIREMENTS

01. Return information which is obtained by an agency under Section 6103(l)(7) of the Code is subject to the safeguard, recordkeeping, and reporting requirements of Section 6103(p)(4) of the Code. If the return information becomes a part of the agency case file regarding a specific taxpayer, because physical separation is impractical, the case file must be safeguarded. These files should be clearly labeled to indicate that Federal tax information is included and care should be taken to remove all such Federal tax data to preclude access by unauthorized persons.

02. An agency which receives return information pursuant to Section 6103(l)(7) of the Code must submit a *Safeguard Procedures Report* within 30 days of initial receipt of the return information. The report will detail the security accorded the information, the individuals who may request and have access to the information, the flow of the information once the agency has received it, as well as other information which will give a comprehensive picture of the need for, the use of, and the disposal of the return information. Publication 1075 (Rev. 1-86), *Tax Information Security Guidelines*, gives additional information about the *Safeguard Procedures Report* and may be obtained by writing to the IRS official listed in Section 5.02.

03. The *Safeguard Procedures Report* will be submitted to the Federal agency which has oversight responsibility for the program(s). The address of the specific office the report must be sent to will be provided by the Service upon approval of the agency's application. The report is due within 30 days from the date the agency first receives return information pursuant to Section 6103(l)(7) of the Code.

04. The agency must also submit an annual *Safeguard Activity Report* giving current information on its safeguard procedures. The information required for this report is also detailed in Publication 1075. The report will be submitted annually to the same Federal agency to whom the Safeguard Procedures Report is to be sent.

05. The Federal agency which receives these reports is responsible for insuring that all information required for the reports is included. Problems or concerns which cannot be resolved between the Federal agency and the agency which has the return information will be referred to the Director, Office of Disclosure, for resolution.

06. The oversight Federal agency is responsible for monitoring safeguard procedures employed by requesting agencies and reporting to the Service, on an annual basis, about its oversight of safeguards employed by the requesting agencies.

07. Pursuant to Section 6103(p)(4) of the Code, the Service has the authority to conduct its own safeguard reviews at the Federal, State, and local levels.

SEC. 9. LIMITATIONS

01. Officers and employees who are entitled to access return information generally must not disclose this information to any party outside the agency other than the taxpayer to whom the information relates, the taxpayer's duly appointed representative who has the explicit authority to obtain the return information, or employees of the Federal agency charged with oversight of the particular program the State or local agency is administering. However, to the extent such disclosure is necessary to verify the eligibility for and the correct amount of benefits, including past benefits, under the programs listed in Section 3 of this Revenue Procedure, such disclosures may be made only when there is no other means of verifying the unearned income information and only to the extent necessary to verify the unearned income information.

02. Officers and employees who are entitled to access return information must not disclose this information to any other officer or employee within the agency whose official duties do not require this information to determine eligibility for, or the correct amount of, benefits under these programs.

03. Officers and employees of Federal, state, and local agencies who disclose return information in a manner or for a purpose not authorized by Section 6103(l)(7) are subject to the criminal penalty provisions of Section 7213 of the Code. Federal agencies and officers and employees of State and local agencies who disclose return information in a manner or for a purpose not authorized by Section 6103(l)(7) are also subject to the civil damages provisions of Section 7431 of the Code.

04. Any unauthorized disclosure of return information must be reported to the nearest Internal Revenue Service Regional Inspector. The name, address, and telephone number of this individual may be obtained from the Disclosure Officer at the Internal Revenue Service district in which the agency is located.

05. Return information may be disclosed by the Service only for the purpose of, and to the extent necessary in, determining eligibility for, or the correct amount of, benefits for the programs listed in Section 3 of this Revenue Procedure.

06. Agencies which receive return information pursuant to Section 6103(l)(7) may not reduce, suspend, terminate or deny aid or benefits until the agency has taken steps to independently verify the information, as provided for by the Deficit Reduction Act of 1984.

SEC. 10. TAPE SUBMISSIONS

01. Tape submissions must be received by specific dates in order for the Service to run an agency's tape in the corresponding month. The processing schedule is listed in Exhibit 1. If the tape shipment is received after the deadline for the monthly extract, the Service will run the tape the following month.

02. The Service will only accept magnetic tapes from coordinating State agencies, the Social Security Administration (which will administer the Supplemental Security Income program) and those Federal agencies charged with oversight responsibility for the eligible programs who must use the information to review those programs to insure that State and local agencies are paying out the correct amount of benefits.

03. If there is more than one agency administering the programs listed in Section 3 of this Revenue Procedure, the Coordinating State Agency will consolidate the requests from the requesting agencies within the State and submit a single tape file, on a monthly basis, to the Service.

04. The Coordinating State Agency is the single State agency responsible for tape submissions requesting return information to be used in any of the programs covered by Section 6103(l)(7) of the Code. If there is more than one agency in the State that wishes return information, one of the agencies must be designated as the Coordinating State Agency. However, each agency must sign the matching agreement to receive information.

05. Each magnetic tape submitted in accordance with this revenue procedure must have an external label that contains the following information:

a) Tape Identification or Volume Serial Number;
b) Agency Name;
c) Assigned Agency Code Number;
d) Project Identification of "DIFSLA"; and
e) Reel Sequence (e.g., 1/2, 2/2); and
f) Number of records on entire file.

Note: Files submitted without a record count of the file will be returned to agency unprocessed.

06. Agencies submitting requests for return information under IRC Section 6103(l)(7)(B) must ship magnetic tape submissions to:

Internal Revenue Service
Martinsburg Computing Center
Route 9 and Needy Road
Martinsburg, WV 25401
ATTN: Chief, Tape Library

07. Each tape submission must have an accompanying transmittal letter from the requesting agency, prepared in the format detailed in Exhibit 2, that contains the following information:

a) Project Name;
b) Requesting Agency;
c) Assigned Agency Code;
d) Number of tapes in each shipment;
e) Identification Number of each tape;
f) Exact number of records on the entire file; and
g) Name and Telephone Number of an individual within the requesting agency who can aid in reconciling shipping problems.

NOTE: Do not ship the transmittal letter and tapes separately.

08. The tape shipment must follow the specifications and format in Sections 11 and 12 of this Revenue Procedure. Tapes which do not meet these specifications will be returned to the submitting agency unprocessed.

09. If more than one State agency is to receive return information, the output tape will be sent to the Coordinating State Agency and the Coordinating State Agency will send the individual agencies their own particular data.

10. An agency should provide at least six magnetic tapes, to be maintained as blank stock, for the initial output when making the initial input shipment and at regular intervals. Each shipment of blank tapes must have an accompanying transmittal letter specifying the project name, the requesting agency, the assigned agency code, and the number of tapes in the shipment. See Exhibit 3 for the format for the transmittal letter. If agency tapes are not supplied and Service tapes must be used to provide output, new tapes will be used. The cost of these tapes will be reflected in the agency billing.

11. An agency's input tape will be retained for approximately 90 days. After that time, the input tape will be scratched (electro-magnetically erased) and the tape will be used for the agency's next output. Note: When the input file is scratched the agency's file identification number will be replaced with a new identification number assigned by the Service.

SEC. 11. INPUT MAGNETIC TAPE SPECIFICATIONS

01. The magnetic tape specifications contained in this section of the Revenue Procedure define the required characteristics of the magnetic tape file. These specifications must be adhered to unless deviations have been specifically granted by the Service in writing. In most instances, the Service will be able to process any compatible tape files.

02. Tape File Format:

1) 9 channel;
2) Standard Label, EBCDIC;
3) A file name of "DIFSLA";
4) ODD parity; and
5) A density of 6250 BPI.

03. Tape File Characteristics:

1) Type of tape: 0.5 inch (12.7 mm) wide, computer grade magnetic tape on reels of up to 2400 feet (731.52 m);
2) Tape thickness: 1.0 or 1.5 mils;
3) Reel diameter: 10.5 inches (26.67 cm), 8.5 inches (21.59 cm), or 7 inches (17.78 cm); and
4) Interrecord Gap: 3/4 inch.

04. Input Record Length - The tape records may be blocked or unblocked, subject to the following:

1) A FIXED RECORD OF 92 POSITIONS IS REQUIRED.
2) All records except the Header and Trailer Labels may be blocked.
3) If records are blocked, we recommend a block size of 100. The maximum block size must be 9,200 tape positions in length.
4) When the block results in a short block (less than 20 records), all remaining positions of the block may be filled with 9's. Do not pad a block with blanks.

05. Options for Filing. For the purposes of this Revenue Procedure the following conventions must be used:

1) Header Label:
   a) Agencies may use standard headers provided they begin with 1HDR, HDR1, VOL1, or VOL2; and
   b) Consist of a maximum of 80 positions.
   c) Data Set Name: DIFSLA
2) Trailer Label:
   a) Standard trailer labels may be used provided that they begin with 1EOR, 1EOF, EOR1, EOV1, or EOV2; and
   b) Consist of a maximum of 80 positions.
3) Tape Mark:
   a) Used to signify the physical end of the recording on tape.

b) May follow the header label and precede and/or follow the trailer label.

06. External File Label

1) Tape Identification or Volume Serial Number;
2) Agency Name;
3) Assigned Agency Code Number;
4) Project Identification of "DIFSLA";
5) Reel Sequence (e.g., 1/2, 2/2); and
6) Number of Records

SEC. 12. AGENCY REQUESTS - INPUT RECORD LAYOUT

01. Agency Request Record

Tape Position	*Field Title*	*Field Length*	*Field Description*
1-3	Agency Code	3	REQUIRED. This identifies the agency which originated the request. The number is supplied by the Service when a formal application is made to the Office of Disclosure.
4	Constant	1	REQUIRED. Insert a "0" (numeric) into this position.
5-13	Primary SSN	9	REQUIRED. Enter the SSN of the requested individual. This field must be ALL NUMERICS.
14-22	Secondary SSN	9	OPTIONAL. Enter the SSN of individual's spouse. This field must be ALL NUMERICS if present. Otherwise zero fill.
23	Constant	1	REQUIRED. Enter a "1" (numeric) into this position.
24-25	Constant	2	REQUIRED. Enter "99" into these positions.
26-32	Welfare Codes	7	REQUIRED. Enter the code(s) for the welfare program(s) requesting information. Left justify and blank fill.

Code	*Welfare Program*
1	AFDC
2	Medicaid
3	SSI Benefits
4	Cash Assistance
5	Unemployment Compensation
6	Food Stamps
7	State Supplementary Payments
8	Veterans' Benefits
9	Federal Quality Control

NOTE: Federal agencies requesting information for quality control purposes should use code 9 and the code representing the assistance program being monitored.

33-36	Name Control 1	4	REQUIRED. Enter the first four letters of the last name. Left justify and blank fill if the name is less than four letters.
37-40	Name Control 2	4	OPTIONAL. If the Secondary SSN is present in positions 14-22, Name Control 2 is REQUIRED. Enter the first four letters of the spouse's last name. Left justify and blank fill if the name is less than four letters. Otherwise, blank fill.
41-61	Agency	21	OPTIONAL. Agency supplied for Requester agency use. It is an optional Information field which will be returned on the IRS tape at the end of each record.
62	Program Code	1	REQUIRED. Enter a "1" (numeric) in this position.
63-92	IRS Use Only	30	Must be blank (alpha) filled.

02. The agency requests must follow this format exactly. The tapes are processed through a diagnostic program to assure that they meet the format requirements. Tapes which do not meet the format requirements will be returned to the submitting agency unprocessed.

03. Each tape file returned to the requesting agency unprocessed will have a machine generated external label (Exhibit 4) that reflects information from processing. The file identification will be 405 D1 01—NN (where "NN" represents the last two digits of the Assigned Agency Code number).

04. Each tape file shipment will be accompanied by Form 3220, Mass Storage Media. This document (Exhibit 5) is used to ensure receipt of tape files. The recipient agency must sign and date the Form 3220 and return one copy to the Service at the address noted to acknowledge receipt of the tape file shipment.

SEC. 13. OUTPUT MAGNETIC TAPE SPECIFICATIONS

01. The magnetic tape specifications contained in this section of the Revenue Procedure define the format and contents of the records to be included in the files which will be returned to the requesting agencies.

02. Tape File Format

1) 9 track;
2) IBM Standard Label, EBCDIC;
3) ODD Parity; and
4) A density of 6250 BPI.

03. Tape File Characteristics

1) Type of tape: 0.5 inch (12.7 mm) wide computer grade magnetic tape of reels of up to 2400 feet (731.52 m);
2) Tape thickness: 1.0 or 1.5 mils;
3) Reel diameter: 10.5 inches (26.67 cm); 8.5 inches (21.50) inches; or 7 inches (17.78 cm); and
4) Interrecord Gap: 3/4 inch.

04. Record Length

1) All records except the Header and Trailer Labels will be blocked; and
2) When the block results in a short block (less than 20 records) all remaining positions of the block will be filled with 9's.

3) INVALID REQUEST Records Format
   a) Blocked 100;
   b) Fixed Record of 92 positions; and
   c) The block will be 9,200 tape positions.
4) DOCUMENT INFORMATION Records Format
   a) Blocked 20;
   b) Fixed Record of 1011 positions; and
   c) The block will be 20,220 tape positions.

p1 05. Tape File Labels - Reel labels will be as follows: ("NN" represents the last two digits of the Assigned Agency Code number and "NNN" represents the full three digits of the Assigned Agency Code number.)

1) Invalid Requests File
   a) External Label = 405 D3 11—NN b) Internal File Name = 405D311- -NNN
2) Document Information Records
   a) External Label = 405 D7 11—NN
   b) Internal File Name = 405D711- -NNN

3) Project Identification: DIFSLA

06. The Service will initially validate all SSNs and Name Controls provided by the requesting agency, against the DM-1 file prior to running the agency's requests against the IRMF. All records that do not pass the diagnostic or validation processes will be returned on one file (Invalid Requests) while names of individuals matched against the IRMF will be returned on another tape file (Document Information Records). See Sections 14 and 15, respectively, for output record formats.

07. Each tape file will be accompanied by Form 3220, Mass Storage Media. This document (Exhibit 5) is used to ensure receipt of tape files.

08. The recipient agency must sign and date the Form 3220 and return one copy to the Service at the address noted to acknowledge receipt of the tape file(s).

SEC. 14. INVALID REQUESTS - RECORD LAYOUT

01. Invalid Requests - These records are not processed against the IRMF. All information except position 66 is duplicated from the agency request record.

Tape Position	*Field Title*	*Field Length*	*Field Description*
1-3	Agency Code	3	The agency which originated the request.
4	Constant	1	"0" (numeric).
5-13	Primary SSN	9	SSN of the requested individual.
14-22	Secondary SSN	9	SSN of spouse if present.
23	Constant	1	"1" (numeric).
24-25	Constant	2	"99"
26-32	Welfare Codes	7	The welfare program(s) for which the request is being made. Duplicated from positions 26-32 of the request record.
33-36	Name Control 1	4	The first four letters of the last name associated with the primary SSN.
37-40	Name Control 2	4	First four (4) letters of spouse's last name if Secondary SSN present.
41-61	Agency Requester Information	21	Agency supplied information for agency use. Duplicated from the request record.
62	Program Code	1	"1" (numeric).
63-65	Agency Code	3	Agency which originated the request. Duplicated from positions 1-3 for sorting purposes.
66	Error Code	1	Code explaining the type of error that was encountered during the diagnostic or SSN validation process.

Tape Position	*Field Title*	*Field Length*	*Field Description*
	Code	*Explanation*	
	1	Invalid Agency Code	
	2	Primary SSN not all numeric	
	3	RESERVED FOR FUTURE USE	
	4	Primary Name Control missing or in error	
	5	Invalid Program Code	
	6	Invalid Primary SSN	
	7	Primary Name Control does not match Primary SSN	
67-92	Reserved	26	IRS Use Only

SEC. 15. INFORMATION DOCUMENT - RECORD LAYOUT

01. Information Records - These records were matched against the IRMF. These records represent return information reported by the payers.

Tape Position	*Field Title*	*Field Length*	*Field Description*
1-9	Payee TIN	9	Primary SSN from request record.
10-13	Payee Name	4	Name Control from information document for identified individual.
14-16	Agency Code	3	Assigned Agency Code.
17-18	Tax Year	2	The year in which the income was paid. For requests received July 1990 through June 1991, the Tax Year is "89".
19-20	Document Type	2	The document on which the income was reported.
		Document Type	*Document Name*
		32	Form W-2G
		65	Form 1065 Schedule K-1
		66	Form 1041 Schedule K-1
		67	Form 1120S Schedule K-1
		75	Form 1099-S
		79	Form 1099-B
		80	Form 1099-A
		86	Form 1099-G
		91	Form 1099-DIV
		92	Form 1099-INT
		95	Form 1099-MISC
		96	Form 1099-OID
		97	Form 1099-PATR
		98	Form 1099-R
		**	No matched record on IRMF
21-40	Account Number Payee	20	The number assigned by the payer to the payee's account.
41-80	Payee Name Line 1	40	The name of the payee whose TIN is contained in positions 962-970 as reported on the information document. If less than 40 characters, left justified and blank filled.
81-120	Payee Name Line 2	40	If the payee name required more than 40 characters or if there are other payees, this field will contain these names, left justified and blank filled.
121-160	Payee Mailing Address	40	The mailing address of the payee, left justified and blank filled.
161-200	Payee City	40	The payee's city, left justified and blank filled.
201-202	Payee State	2	The payee's state as abbreviated by the U. S. Postal Service.

Tape Position	*Field Title*	*Field Length*	*Field Description*
203-211	Payee ZIP Code	9	The payee's ZIP Code, left justified and blank filled if it is only 5 digits.
212-220	Payer TIN	9	The Payer's EIN or SSN.
221-260	Payer Name Line 1	40	The payer's name, left justified and blank filled.
261-300	Payer Name Line 2	40	Any additional payer name(s) information, left justified and blank filled.
301-340	Payer Address	40	The payer's address, left justified and blank filled.
341-380	Payer City/ State/Zip Code	40	The payer's city, state and zip code. Left justified and blank filled.
381-382	Reserved	2	Blank (alpha) filled.
(Money fields - all amounts are in dollars only, however, a "-" may appear in the first position of the field to indicate a negative amount.)			
383-394	Other Taxable Income	12	Other taxable income reported on Schedule K-1 of Forms 1065 and 1120S.
395-406	Interest	12	Interest reported on Forms 1099-INT, 1099-OID and Schedule K-1 of Forms 1041, 1065 and 1120S.
407-418	Dividends	12	Dividends reported on Forms 1099-DIV and Schedule K-1 of Forms 1041, 1065 and 1120S.
419-430	Patronage Dividends	12	Patronage dividends reported on Form 1099-PATR.
431-442	Non-Patronage Dividends	12	Non-patronage dividends reported on Form 1099-PATR.
443-454	Per-Unit Retain Allocations	12	Allocations reported on Form 1099-PATR.
455-466	Redemption of Non-Qualified and Retain Allocations	12	Redemption amounts reported on Form 1099-PATR.
467-478	Reserved	12	0 (numeric) filled.
479-490	Reserved	12	0 (numeric) filled.
491-502	Reserved	12	0 (numeric) filled.
503-514	Unemployment Compensation	12	Unemployment compensation reported on Form 1099-G.
515-526	State/Local Tax Refund	12	State and local tax refunds reported on Form 1099-G.
527-538	Discharge of Indebtedness	12	Discharge amounts reported on Form 1099-G.
539-550	Reserved	12	0 (numeric) filled.
551-562	Agricultural Subsidies	12	Agricultural subsidy payments reported on Form 1099-G.
563-574	Reserved	12	0 (numeric) filled.
575-586	Reserved	12	0 (numeric) filled.
587-598	Cash Liquidation Distribution	12	Cash liquidations reported on Form 1099-DIV.
599-610	Non-Cash Liquidation Distribution	12	Non-cash liquidations reported on Form 1099-DIV.
611-622	Reserved	12	0 (numeric) filled.
623-634	Gross Winnings	12	Gambling winnings reported on Form W-2G.

Tape Position	*Field Title*	*Field Length*	*Field Description*
635-646	Additional Winnings	12	Additional winnings from identical wager reported on Form W-2G.
647-658	Savings Bonds	12	U.S. savings bond and Treasury bills, bonds, and notes as reported on Form 1099-INT.
659-670	Interest Forfeiture	12	Interest forfeiture reported on Forms 1099-INT and 1099-OID.
671-682	Substitute Payments	12	Substitute payments reported on Form 1099-MISC.
683-694	Stocks and Bonds	12	Sales of securities reported on Form 1099-B.
695-706	Reserved	12	0 (numeric) filled.
707-718	Aggregate Profit & Loss	12	Total profit/loss from regulated futures or foreign currency contracts as reported on Form 1099-B.
719-730	Profit and Loss Realized	12	Profit/loss reported on Form 1099-B.
731-742	Reserved	12	0 (numeric) filled.
743-754	Reserved	12	0 (numeric) filled.
755-766	Rents	12	Rental income reported on Form 1099-MISC.
767-778	Royalties	12	Royalty income reported on Form 1099-MISC.
779-790	Prizes and Awards	12	Prizes and awards reported on Form 1099-MISC.
791-802	Reserved	12	0 (numeric) filled.
803-814	Reserved	12	0 (numeric) filled.
815-826	Reserved	12	0 (numeric) filled.
827-838	Original Issue Discount	12	Original issue discount reported on Form 1099-OID.
839-850	Total Pension Distribution	12	Lump sum distribution from a retirement plan as reported on Form 1099-R.
851-862	Other Pension Distribution	12	Actuarial value of annuity contract or retirement bond; retirement account exchange or death benefit payment as reported on Form 1099-R.
863-874	Reserved	12	0 (numeric) filled.
875-886	Reserved	12	0 (numeric) filled.
887-898	Reserved	12	0 (numeric) filled.
899-910	Real Estate Sales	12	Proceeds from real estate sales reported on Form 1099-S.
911-922	Reserved	12	0 (numeric) filled.
923-934	Debt Outstanding	12	Balance of principal of debt reported on Form 1099-A.
935-946	Debt Satisfied	12	Gross foreclosure proceeds from sale of property to satisfy debt reported on Form 1099-A.
947-958	Fair Market Value	12	Appraised value of real property that supported loan amount reported on Form 1099-A.
959-960	Blanks	2	Blank filled.
961	Amended Return	1	1 (numeric) if the information return was amended, otherwise Indicator blank.
962-970	Select SSN	9	SSN used to obtain unearned income information.
971-977	Welfare Codes	7	Same as Request Welfare Codes.

Tape Position	*Field Title*	*Field Length*	*Field Description*
978-981	Name Control 1	4	Name Control #1 from information document.
982-985	Name Control 2	4	Same as the Request Name Control #2.
986-1006	Agency Requester Information	21	Requesting Agency Information as forwarded in positions 41-61 of the input record.
1007-1010	Blanks	4	Blank filled.
1011	Error Code	1	Code explaining the type of error that was encountered when the Secondary SSN was validated.

Code	*Explanation*
A	Secondary SSN not all numeric
B	Name Control #2 missing or in error
C	Secondary SSN invalid
D	Name Control #2 does not match SSN #2
E	Welfare Code Invalid

Note: An error code of A, B, C or D may appear in this field although income information is provided.

SEC. 16. INQUIRIES

01. Any questions regarding the material in this Revenue Procedure may be addressed to the Director, Office of Disclosure, at the address listed in Section 5.02 of this Revenue Procedure.

02. Questions concerning tape receipt and shipping can be addressed to:

Internal Revenue Service
Production Control Officer
Systems Operations Division
Martinsburg Computing Center
P.O. Box 1208
Martinsburg, WV 25401

SEC. 17. EFFECTIVE DATE

This Revenue Procedure is effective July 1990 through June 1991.

SEC. 18. DRAFTING INFORMATION

The principal author of this Revenue Procedure is Gwen Collins of the Office of Disclosure. For further information regarding the specifications in this Revenue Procedure contact Ms. Collins on (202) 535-9749 (not a toll-free call).

Exhibit 1

DIFSLA Processing Schedule

July 1990 - June 1991

Tax Year 1989

	PROCESSING CYCLE	*REQUEST DUE DATE*	*RUN DATE*	*SHIPPING DATE*
JUL	8929	07/13/90	07/15/90	07/29/90
AUG	8933	08/10/90	08/12/90	08/26/90
SEP	8937	09/07/90	09/09/90	09/23/90
OCT	8941	10/05/90	10/07/90	10/21/90
NOV	8945	11/02/90	11/04/90	11/18/90

JUN	8926	06/22/91	06/24/91	07/08/91

There will be no January run of the IRMF. Tapes received after the cutoff date will be processed in the next monthly run. Tapes with matching data will be shipped approximately two weeks after the Run Date.

Tapes will not be processed until all requirements of the Computer Matching and Privacy Protection Act of 1988 are satisfied.

NOTE: If output magnetic tapes are not received within 2 weeks of the Shipping Date, please contact the IRS Program Coordinator immediately.

Rev. Proc. 90-48

PART A. GENERAL

SEC. 1. PURPOSE

.01 The purpose of this revenue procedure is to provide general rules for filing and to state the requirements of the Internal Revenue Service (IRS) and the Social Security Administration (SSA) relating to reproducing paper substitutes for Form W-2, Wage and Tax Statement; Form W-2P, Statement for Recipients of Annuities, Pensions, Retired Pay, or IRA Payments; and Form W-3, Transmittal of Income and Tax Statements, for amounts paid during the 1990 calendar year.

.02 For the purpose of this revenue procedure, a substitute form is one that is not printed by the IRS. A substitute Form W-2, W-2P, or W-3 must conform to the specifications in this revenue procedure to be acceptable to the IRS. Preparers should also refer to the instructions for preparing and filing Forms W-2, W-2P, and Form W-3 for additional guidelines on how to complete these forms. See Part B, Sec. 1.03, below, for information on ordering the official IRS forms and instructions.

.03 NOTE: For Tax Year 1991, Form W-2P will be combined with Form 1099-R, Statement for Recipients of Total Distributions From Profit-Sharing, Retirement Plans, Individual Retirement Arrangements, Insurance Contracts, Etc. The new combined form will be filed with IRS. The layout of the new combined form will be 2 forms per page.

.04 This revenue procedure supersedes Rev. Proc. 89-41, 1989-2 C.B. 454 (Reprinted as Publication 1141, Revised 7-89).

SEC. 2. NATURE OF CHANGES

.01 Various editorial changes were made. Several requirements received added emphasis to help payers avoid errors.

.02 The exhibits were updated for tax year 1990. The layout and content of Form W-2 was revised for tax year 1990 (see Exhibit A), reflecting the increase to a half-page format for Copy A.

.03 Minimum size requirements are set forth for the substitute Form W-2, Employee's copy (Copy B, etc.). The maximum allowable size was expanded. These new size requirements apply for tax year 1990 only and are subject to change for future years. See Part B, Sec 2., below.

.04 The Revenue Procedure is clarified to state that both magnetic media filers and paper filers (of Form W-2, Copy A) may use substitute employee copies (Copy B, etc.) that meet the requirements set forth in this document.

.05 Instructions similar to those contained on the back of Copy C of the official form are now required to be provided to each employee (recipient). These instructions must include the exact language concerning the Earned Income Credit (EIC) as contained on the official form. The requirement for instructions on the back of Copy D has been eliminated.

.06 The new penalty provisions that apply to Forms W-2 and other information returns are provided. See Sec. 3.07, below.

SEC. 3. GENERAL RULES FOR FILING FORMS W-2 AND W-2P

.01 Employers and payers (hereafter and where applicable collectively referred to as payers) MUST use magnetic media for filing if the payer will file 250 or more 1990 Forms W-2 (Copy A) or W-2P (Copy A) with SSA. This requirement applies unless:

1 The payer can establish that filing on magnetic media will result in undue hardship, AND

2 The payor is granted a waiver of the requirement by the IRS.

To request a *one year* waiver of the magnetic media filing requirement, submit Form 8508, Request for Waiver From Filing Information Returns on Magnetic Media, to:

Internal Revenue Service
Martinsburg Computing Center
P.O. Box 1359
Martinsburg, WV 25401-1359

Please use this address (with the P.O. Box number) whenever possible. However, for requests sent by a courier who will not deliver to a P.O. Box number, the street address is: Route 9 and Needy Road, Martinsburg, WV 25401. Form 8508 may be obtained by calling 1-800-424-FORM (3676) until October 1, 1990. On October 1, 1990, the number will change to 1-800-829-3676. Form 8508 also may be obtained directly from the IRS Martinsburg Computing Center (IRS/MCC) at the above address or by calling (304) 263-8700 (not a toll-free call). Completed requests for waivers (Form 8508) must be submitted at least 90 days before the due date of the return (see Sec. 3.06, below). The requestor will receive an approval or denial letter from IRS, but must allow at least 30 days for IRS to respond. If you have any questions concerning Form 8508, contact IRS/MCC at the address or phone number shown above. Payers who do not comply with the magnetic media filing requirement and who are not granted a waiver will be subject to certain penalties. See Sec. 3.07, below, for an explanation of the new penalties that apply if Forms W-2 are not filed on magnetic media when required. PAYERS WHO FILE FORMS W-2 AND W-2P INFORMATION ON MAGNETIC MEDIA WITH SSA MUST NOT SEND THE SAME DATA TO SSA ON PAPER FORMS W-2 AND W-2P. This would result in duplicate reporting and may subject the filer to penalties imposed by the IRS. Since many states and local governments accept Forms W-2 and W-2P data on magnetic media, savings may be obtained if magnetic media is used for filing with both SSA and state or local governments. You must contact each individual state or local taxing agency to receive approval and make arrangements to file on magnetic media.

.02 Payers can design their own statements to give to employees, pensioners, annuitants, recipients of retired pay, recipients of IRA (Individual Retirement Arrangement) payments, and recipients of disability income (hereafter and where applicable collectively referred to as payees). This applies to both payers who file with SSA on magnetic media or submit paper Forms W-2, Copy A. Payers who file paper Copy A, Form W-2, with SSA continue to be required to use the official IRS printed form or a substitute that exactly meets the specifications set forth in this Revenue Procedure for submission to SSA. Payee statements de-

signed by payers must comply with the requirements shown in Parts B and C, below, of this Revenue Procedure. NOTE: Magnetic media users who use the official IRS printed form or any other pre-printed form are advised not to print Copy A or, if printed, to discard it to prevent duplicate information from being submitted in error, as stated in .01, above. Copy A is not needed by SSA when documents are filed on magnetic media.

.03 TIB-4, "Magnetic Media Reporting, Submitting Annual W-2 and W-2P Copy A Information to the Social Security Administration," contains the specifications and procedures for filing Forms W-2 (Copy A) and W-2P (Copy A) on magnetic media with SSA. Specifications for both tape and diskette reporting for Forms W-2 and W-2P are included in this Technical Instructions Bulletin (TIB-4).

.04 TIB-4 may be obtained by writing to the Social Security Administration, Reports Preparation Section, P.O. Box 2317, Baltimore, MD 21235. Payers using magnetic media are cautioned to obtain the most recent revision of the TIB-4 and supplements due to possible changes in the specifications and procedures. TIB-4 will be revised in the fall of 1990.

.05 Payers not using magnetic media must file Copy A of Form W-2 or Copy A of Form W-2P with SSA on either an official form or a privately printed substitute paper form that exactly meets the specifications shown in Parts B and C, below, of this Revenue Procedure.

.06 1990 Forms W-2 and W-2P, whether filed on magnetic media or paper, must be submitted to SSA on or before February 28, 1991. In addition, the payee copies must be provided to the taxpayer on or before January 31, 1991. Failure to timely file with SSA or to timely provide the taxpayer copies may subject the payer to penalties. See Sec. 3.07, below, concerning which penalties apply if correct Forms W-2 are not filed with SSA or provided to the payee by the due date. Payers needing additional time to file Copy A of Form W-2 or Copy A of Form W-2P with SSA may request an extension of time to file by submitting Form 8809, Request for Extension of Time To File Information Returns, to the IRS/MCC, at the address (or alternative address) listed in Sec. 3.01, above. The extension request should be filed as early as possible, but must be postmarked no later than the due date of the forms (February 28, 1991).

NOTE: APPROVAL OF THE EXTENSION IS NOT AUTOMATIC. Approval or denial is based on administrative criteria and guidelines. The requestor will receive an approval or denial letter from IRS and must allow at least 30 days for IRS to respond. Form 8809 may be obtained by calling 1-800-424-FORM (3676) (1-800-829-3676 after September 30, 1990), or by contacting IRS/MCC (See the address and phone number in Sec. 3.01, above).

.07 New penalty provisions apply to Forms W-2 (and certain other information returns), effective with tax year 1989 returns filed in 1990. Generally, penalties will be assessed for payers who fail to file correct information returns by the due date. The penalties will apply if information returns:

1 Are not filed by the due date (as stated in Sec. 3.06, above);

2 Are filed with incorrect information;

3 Do not include all of the required information;

4 Are submitted on paper when they are required to be filed on magnetic media (as stated in Sec. 3.01, above);

5 Are filed with incorrect or missing Taxpayer Identification Numbers (TINs); or

6 Are filed in a manner that does not allow them to be processed or read by machine.

The amount of the penalty is graduated, based on when the correct Form W-2 (or other information return) is filed, as follows:

— $15 per return if the forms are filed correctly within 30 days of the due date (March 30 for returns due February 28). The maximum penalty is $75,000 per year ($25,000 for small businesses, as defined later);

— $30 per return if the forms are filed correctly more than 30 days after the due date, but on or before August 1. The maximum penalty is $150,000 per year ($50,000 for small businesses);

— $50 per return if the forms are filed after August 1 or if the returns are not filed as required. The maximum penalty is $250,000 per year ($100,000 for small businesses).

The lower maximum penalties for small businesses (as shown above) apply if a business had average annual gross receipts for the 3 most recent tax years (or years in existence, if shorter), ending before the calendar year in which the information returns were due, of $5,000,000 or less.

A penalty also applies to payee statements (or statements for recipients) if:

1 The payee statement is not provided by January 31 (as stated in Sec. 3.06, above);

2 If a statement furnished to payees includes incorrect information; or

3 If a statement is furnished to payees that does not include all the required information. The penalty is $50 per return with a maximum of $100,000 per year. There is no reduction in the penalty for providing a correct information return to the payee after the due date.

The penalties as stated here will not apply if the payer can show that the failure was due to reasonable cause and not to willful neglect.

NOTE: For tax year 1989 returns only, penalties will be waived if incorrect returns, which were filed timely, are corrected by October 1, 1990.

SEC. 4. GENERAL RULES FOR FILING FORM W-3

.01 Employers and payers (hereafter and where applicable collectively referred to as payers) submitting Forms W-2 or W-2P (Copy A) on paper to SSA must transmit Form W-2 or W-2P with Form W-3.

.02 Form W-3 must be the same width (i.e. 7 inches, 7.5 inches, or 8 inches) as the Forms W-2 or W-2P filed.

.03 Form W-3 should only be used to transmit paper Forms W-2 (Copy A) or Forms W-2P (Copy A). Magnetic media filers do not file Form W-3. Payers using magnetic media must transmit Form W-2 or W-2P data with Form 6559, Transmitter Report of Magnetic Media Filing, along with either Form 6560, Employer Summary of Form W-2 Magnetic Media Wage Information, or Form 6561, Payer Summary of Form

W-2P Magnetic Media Pension Information. A set of these forms (Form 6559, 6560, and 6561) are provided by SSA to all approved magnetic media filers in the TIB-4 instructions. The forms may also be obtained by calling IRS at 1-800-424-FORM (3676) (1-800-829-3676 after September 30, 1990).

PART B. REQUIREMENTS FOR FILING PAPER SUBSTITUTES

SEC. 1. GENERAL RULES FOR FILING "PAPER SUBSTITUTES" FOR FORMS W-2, W-2P, AND W-3

.01 Paper substitutes that conform totally to the specifications contained in this revenue procedure may be privately printed without the prior approval of the IRS. SUBSTITUTE FORMS THAT DO NOT CONFORM TOTALLY TO THESE SPECIFICATIONS ARE NOT ACCEPTABLE. This applies to both paper substitutes that are filed with SSA and those that are given to employees. Forms should *not* be submitted to IRS or SSA for general approval. However, if you are uncertain of any specification set forth herein and want that specification clarified, you may submit a letter citing the specification in question, your interpretation of that specification, and an example of the how the form would appear if produced using your understanding of the specification to:

Internal Revenue Service
ATTN: Substitute Form W-2 Coordinator
R:R:T, Room 7300
1111 Constitution Avenue, N.W.
Washington, DC 20224

NOTE: You should allow at least 45 days for the IRS to respond.

.02 Forms W-2, W-2P, and W-3 are subject to annual review and possible change. Payers are cautioned against overstocking supplies of privately printed substitutes.

.03 Copies of the current year, official Forms W-2, W-2P, and W-3 and the instructions for these forms may be obtained from most IRS offices or by calling 1-800-424-FORM (3676) (1-800-829- 3676 after September 30, 1990). The IRS provides only cut sheet sets with no carbon interleaves for Forms W-2, W-2P, and W-3. Reproduction proofs of the official Forms W-2, W-2P, and W-3 are also available. See Part C, Sec. 4, below, for information on ordering reproduction proofs.

.04 Substitute Forms W-2, W-2P, and W-3 transmitted to SSA should generally contain only data provided to payees and summary data as requested by the instructions for the form.

.05 If it is necessary to report more than three items in Box 17 of Form W-2, filers of paper forms (Copy A) should use a second Form W-2 to report the additional items. Box 17 may be enlarged on employee copies (Copy B, etc.), so long as the substitute used is in compliance with the specifications contained herein (see Secs. 2 and 3, below). If a second Form W-2 is provided to report additional items in Box 17, other wage and tax data must not be duplicated on the second form.

.06 Substitute Forms W-2, W-2P, and W-3 may be redesigned as to the spacing for state and local tax data as long as the vertical and horizontal spacing for all federal payment and data boxes are in compliance with the specifications contained herein.

.07 All ballot boxes on Forms W-2 (Copy A), W-2P (Copy A), and W-3 must be 8-point boxes. NOTE: If a box is marked, more than 50% of the applicable ballot box must be covered by an "X".

SEC. 2. REQUIREMENTS FOR SUBSTITUTE FORMS FURNISHED TO PAYEES (COPIES B, C, AND 2 OF FORMS W-2 AND W-2P)

.01 All payers (including payers who file on magnetic media and do not file a paper Copy A) must furnish payees with at least two statements (three statements are appropriate for payees required to file a state, city, or local income tax return). The dimensions of these copies may be expanded from the dimensions of the official form to allow space for conveying additional information such as additional entries required for Boxes 17 or 18, withholding from pay for health insurance, union dues, bonds, charity, etc. This may permit the payer to eliminate other statements or notices which would otherwise be furnished to payees.

1 The MAXIMUM allowable dimensions are:

(a) depth should be no more than 6.5 inches;

(b) width should be no more than 8.0 inches.

2 The MINIMUM allowable dimensions are:

(a) 2.67 inches by 5.0 inches.

(b) horizontal or vertical format is permitted.

NOTE: These minimum and maximum size specifications are for 1990 only and are subject to change.

.02 The paper for all copies should be white. The substitute Copy B (or its equal), that payees are instructed to attach to their Federal income tax return, must be at least 12-pound paper (basis 17 x 22-500), while the other copies furnished the payee should be at least 9-pound paper (basis 17 x 22-500).

.03 Interleaved carbon and chemical transfer paper for payee copies must meet the following standards:

1 All copies must be CLEARLY LEGIBLE;

2 All copies must have the capability to be photocopied; and

3 Fading must not be of such a degree as to preclude legibility and the ability to photocopy.

The Service prefers that forms not be printed with iron based inks used for magnetic character reading (MICR) or any other specialty inks having magnetic properties. Similarly, forms should not be imaged by any process that employs magnetic toners.

In general, black chemical transfer inks are preferred; other colors are permitted only if the above standards are met. "Spot carbons" are NOT permitted (See Sec. 3.15, below for standards for chemical transfer paper for Copy A.)

.04 Substitute forms for payees need contain only the payment boxes and captions that are applicable. Certain other boxes contained on the official form may be omitted. In all *cases*, the following boxes must be present:

1 The payee name, address, Social Security Number (SSN);

2 The payer name, address, and Employer Identification Number (EIN);

3 The tax year;

4 Federal income tax withheld; and

5 Wage, tips, other compensation.

Payment boxes and captions that are applicable must be clearly identified, using, where possible, the same wording as on the official form. On Form W-2, Copy B, payers are required to identify the amount of Federal income tax withheld as "Box 9" and the amount of wages, tips, other compensation as "Box 10." On Form W-2P, Copy B, payers are required to identify the taxable amount as "Box 10" and the amount of Federal income tax withheld as "Box 11". These same payment boxes on Copy B are required to be outlined in bold 2-point rule (see Exhibit M) or identified in some manner to distinguish these boxes from the rest of the form. If Form W-2 contains additional data (e.g., saving bonds withholding, retirement withholding, or payroll savings.), there should be a special highlighting of the areas pertaining to (1) Federal income tax withheld, (2) Wages, tips, and other compensation, and (3) Advance EIC (Earned Income Credit) payment.

.05 Substitute forms for payees (Copies B, C, and 2 of Forms W-2 and W-2P) must meet the following requirements:

1 All copies of Forms W-2 and W-2P must clearly show the form number, the form title, and the tax year. The title of Form W-2 is "Wage and Tax Statement." The title of Form W-2P is "Statement for Recipients of Annuities, Pensions, Retired Pay, or IRA Payments."

2 If the substitute forms are not labeled as to the disposition of the copies, then written notification must be provided to each payee as specified below:

(a) The first copy of the form (Copy B) should be filed with the employee's (or recipient's) Federal tax return.

(b) The second copy of the form (Copy C) is for the employee's (or recipient's) records.

(c) If applicable, the third copy (Copy 1) of the form should be filed with the employee's state, city, or local income tax return.

3 If the substitute forms are labeled, then the forms must contain the applicable description:

(a) "Copy B, to be filed with employee's Federal tax return", "Copy C, for employee's records", and the designation "Form W-2, Department of the Treasury - Internal Revenue Service", OR

(b) "Copy B, file with recipient's Federal tax return," "Copy C, for recipient's records," and the designation "Form W-2P Department of the Treasury - Internal Revenue Service."

(c) For this purpose, the word "Department" may be abbreviated as "Dept." as on the official, IRS printed forms. The reference to the Department of the Treasury - Internal Revenue Service should be omitted from other copies provided in the set.

4 Instructions similar to those contained on the back of Copy C of the official form MUST be provided to each employee (recipient). These instructions must include the exact language concerning the Earned Income Credit (EIC) as is contained on the official form. For Form W-2, the Social Security (FICA) rates applicable for the current tax year must appear either on the front or the back of the copy (Copy C) retained by the employee; or be communicated to the employee via a separate statement. NOTE: IF you are a Federal employer or a state or local government employer with employees covered only under Medicare, you must provide the current rate for hospital insurance benefits (Medicare) for those employees.

5 Payees should be advised that substitute wage and tax statements are acceptable for filing with their Federal income tax returns.

SEC. 3. REQUIREMENTS FOR SUBSTITUTE "PRIVATELY PRINTED" FORMS SUBMITTED TO SSA (FORMS W-2 (COPY A), FORMS W-2P (COPY A), AND FORMS W-3)

.01 Payers may file privately printed substitute Forms W-2, W-2P, and W-3 with SSA. The substitute form must be an exact replica of the official reproduction proof with respect to layout and contents because it will be read by machine. The dimensions of a substitute form may differ as far as width (see Sec. 3.05, below). The printing of the Government Printing Office (GPO) symbol must be deleted (see Sec. 3.16, below). The specifications and allowable tolerances for the Copy A of substitute Forms W-2 and W-2P are provided later in this Revenue Procedure. See Exhibits A, D, and E for Form W-2 specifications and Exhibits B, F, and G for Form W-2P specifications. The specifications and allowable tolerances for Forms W-3 are provided in Exhibits C, H, and I.

NOTE: *Printers of Forms W-2 or W-2P that are wider than 7 inches must provide Forms W-3 that are the same width as the Forms W-2 or W-2P (i.e., 7 1/2" Forms W-3 with 7 1/2" width Forms W-2 or W-2P; 8" width Forms W-3 with 8" width Forms W-2 or W-2P).*

.02 Paper for substitute Copy A (of Forms W-2 and W-2P) and Form W-3, (cut sheets and continuous pinfeed forms), that are to be filed with SSA must be white 100% bleached chemical wood, optical character recognition (OCR) bond produced in accordance with the specifications shown as follows:

1 Acidity: pH value, average, not less than 4.5

2 Basis Weight 17 x 22
500 cut sheets 18-20
Metric equivalent grams
per. sq. meter 60-75
A tolerance of ±5 pct. shall be allowed.

3 Stiffness: Average, each direction, not less than Gurley milligrams..cross direction 50
...machine direction..... 80

4 Tearing Strength: Average, each direction, not less than—grams 40

5 Opacity: Average, not less than—percent 82
Reflectivity average not less than 68 percent.

6 Thickness: Average.....inch 0.0038
Metric equivalent ...mm 0.097
A tolerance of +0.0005 inch (0.0127mm) shall be allowed. Paper shall not vary more than 0.0004 inch (0.012mm) from one edge to the other.

7 Porosity: Average, not less than..seconds..... 10

8 Finish (smoothness): Average, each side—seconds 20-55
For information only, the Sheffield equivalent—unit.....170-d100

9 Dirt: Average, each side, not to exceed—parts per million ... 8

NOTE: Reclaimed fiber in any percentage is permitted, provided the

requirements of this standard are met.

.03 All printing for Copy A (of Forms W-2 and W-2P) and Form W-3 will be in red OCR dropout ink, as specified, except for the form identifying numbers '22222,' '55555,' or '33333' at the top of the form and the descriptive information at the bottom (see Exhibits J, K, and L) that will be printed in nonreflective black ink. All other printing will be in red OCR dropout ink meeting, or comparable to, the specifications in this paragraph. The screened area of any substitute form (Copy A of Form W-2 and W-2P, and the Form W-3 that is sent to SSA) should generally correspond to that present on the official form. Vertical rules require screening of .05 inches on each side of an inside rule. Horizontal screening should follow the standard format and allow for typewriter spacing. All screened areas are to be printed in red OCR dropout ink. The numbered captions are printed as a solid with no screened background (see Exhibits). Sinclair and Valentine (U.S.) red OCR dropout ink number J-25083 is the preferred ink because it is easier for the forms preparer to read.

NOTE: Printing in any other red OCR dropout ink must be cleared by contacting Manager of Sales Support, Recognition Equipment, Inc., P.O. Box 660204, Dallas, TX 75266, telephone number (214) 579-6927.

.04 Type must be substantially identical in size and shape with corresponding type on the official form. NOTE: The form identifying number must be in OCR A font.

1 On Copy A of Forms W-2 and W-2P and for Form W-3, all the perimeter rules must be 1-point (0.014 inch), while all other rules must be one-half point (0.007 inch).

2 Vertical rules must be parallel to the left edge of the form; horizontal rules parallel to the top edge.

.05 Two official Forms W-2 (Copy A), three official Forms W-2P (Copy A), or one official Form W-3 are contained on a single page that is 7 inches wide (exclusive of any snap-stubs) by 11 inches deep. The form identifying number for the official forms (7 inches wide) is '22222' for Form W-2; '55555' for Form W-2P; and '33333' for Form W-3. Although adherence to the size of the official page is preferred, the width of privately printed substitute pages may be 7 inches, 7 1/2 inches, or 8 inches exclusive of any left or right snap-stubs, or pin-feed holes. If a 7 inch form is produced, the image must be an exact copy of the official reproduction proof. If the width of the substitute page is increased, the width of specified fields on the substitute page must be increased in accordance with Exhibits D, E, F, G, H, and I. The top margin for all forms must be .25 inch, the right margin must be .15 inch, and the left margin .35 inch, plus or minus .0313 inch. Margins must be free of all printing. For Forms W-2 (Copy A), W-2P (Copy A), and W-3 the combination width of Box 1, "Control number", and the box containing the form identifying number must always be 2.2 inches.

1 When the width of Copy A is increased to 8 inches, exclusive of any left or right snap-stubs or pin-feed holes, the form identifying number must be shown as 222 for Form W-2, 555 for Form W-2P, or 333 for Form W-3. This number tells the scan equipment used by SSA which information document it is reading, the width size and the position of individual data fields (see Exhibits D, F, and H).

2 When the width of Copy A is increased to 7 1/2 inches, exclusive of any left or right snap-stubs or pin-feed holes, the form identifying must be shown as 2222 for Form W-2, 5555 for Form W-2P, or 3333 for Form W-3. This number tells the scan equipment used by SSA which information document it is reading, the width size and the position of individual data fields (see Exhibits E, G, and I).

.06 The depth of the individual image on a page must be the same as that of the official reproduction proof. For Form W-2, the depth is 5.5 inches (see Exhibit A). For Form W-2P the depth is 3 2/3 inches (see Exhibit B). The depths of the Form W-3 on a page must be 3.37 inches (see Exhibit C). The depths are the same for the 7 inch, 7 1/2 inch, and 8 inch wide forms.

.07 The words *"Do Not Cut or Separate Forms on This Page"* must be printed in red OCR dropout ink between the two Forms W-2 (Copy A) or the three Forms W-2P (Copy A) (see Exhibits A and B) and must also be present on 7 1/2 inch and 8 inch wide substitute Forms W-2 or W-2P. Perforations are required on all copies (except Copy A) to enable the separation of individual forms.

.08 The words "For Paperwork Reduction Act Notice, see separate instructions." *must* be printed on Forms W-2 (Copy A) and W-2P (Copy A) (see Exhibits A and B for format and location) and must also be present on 7 1/2 inch and 8 inch wide substitute Forms W-2 and W-2P.

.09 The Office of Management and Budget (OMB) Number must be printed on *each* ply of Form W-2, W-2P, and W-3 (see Exhibits A, B, and C for format and location) and *must* also be present on 7 1/2 inch and 8 inch wide substitute Forms W-2, W-2P, or W-3.

.10 The statement *"Please return this entire page with the accompanying Forms W-2 or W-2P to the Social Security Administration address for your state, as listed below. Household employers filing Forms W-2 for household employees should send the forms to the Albuquerque Data Operations Center."* and the list of SSA addresses *must* be printed on Forms W-3 (*see* Exhibit C), whether Forms W-3 are 7 inches wide, 7 1/2 inches wide, or 8 inches wide.

.11 The Paperwork Reduction Act Notice must be printed on Form W-3 (see Exhibit C for format and location), whether Forms W-3 are 7 inches wide, 7 1/2 inches wide, or 8 inches wide.

.12 *Privately printed continuous substitute Forms W-2 (Copy A) and W-2P (Copy A) must be perforated at each 11" (3-on Forms W-2P and 2-on Forms W-2) page depth. No perforations are allowed between the individual forms (5 1/2 inch Forms W-2 or 3 2/3 inch Forms W-2P) on a single copy page of Copy A.* NOTE: Perforations are required between all the other *individual* copies on a page (Copy 1, B, C, 2, and D) included in the set.

.13 The back of a substitute Copy A and Form W-3 (page 1) must be free of all printing.

.14 Spot carbons are NOT permitted for Copy A of Forms W-2 or W-2P or for Form W-3. Interleaved carbon should be black and must be of good quality to assure legibility of information on all copies and to preclude smudging.

.15 Chemical transfer paper is permitted for Copy A only if the following standards are met:

(1) Only *chemically backed* paper is acceptable for Copy A.

(2) Carbon coated forms *are not* permitted. Front and back chemically treated paper cannot be processed properly by machine.

.16 The GPO symbol must not be placed on substitute Copy A of Forms W-2 and W-2P. In the place of the GPO symbol, the Employer Identification Number (EIN) of the forms printer must be printed in the bottom margin on the face of each individual sheet of Copy A. In addition, the EIN of the forms printer must be printed on the face of the substitute Form W-3 that is filed with SSA.

PART C. ADDITIONAL INSTRUCTIONS

SEC. 1. INSTRUCTIONS FOR FORMS PRINTERS

.01 Except as provided below, if magnetic media is not used for filing with SSA, the substitute copies of Forms W-2 and W-2P assembly should be arranged in the same order as the official Forms W-2 and W-2P. Copy A should be first, followed sequentially by perforated sets (Copies 1, B, C, 2, and D). The substitute form to be filed by the payer with SSA must carry the designation "Copy A." NOTE: Magnetic media filers do not need to print Copy A since it is not needed by SSA for processing. (See the caution in Part A, Sec. 3.02, above.)

1 It is not a requirement that privately printed substitute forms contain a copy to be retained by payers (Copy D). However, payers must be prepared to verify or duplicate this information if it is requested by the IRS or SSA. Paper filers that do not keep Copy D should be able to generate a facsimile of Copy A in case of loss. The requirement that instructions be printed on the back of Copy D has been eliminated.

2 Except as provided in the arrangement of the official assemblies, additional copies that may be prepared by payers shall not be placed ahead of the copy "For employee's records," Form W-2 (Copy C) or "For Recipient's Records," Form W-2P (Copy C).

3 Instructions similar to those contained on the back of Copy C of the official form MUST be provided to each employee (recipient). For Form W-2, the social security (FICA) rates applicable for the current tax year must appear either on the front or the back of the copy (Copy C) retained by the employee; or be communicated to the employee via a separate statement.

NOTE: Federal, state and local government employers with employees covered only under Medicare, must provide the current rate for hospital insurance benefits (Medicare) for employees.

.02 All privately printed Forms W-2 (Copy A) and W-2P (Copy A) must have the tax year printed on the bottom face of each form using identical type to that of the official format.

.03 The substitute Copy B (or its equal), which payees are instructed to attach to their Federal income tax return, must be at least 12-pound paper (basis 17 x 22-500), while the other copies furnished to payees should be at least 9-pound paper (basis 17 x 22-500).

.04 The OCR bond Form W-3 that is filed with SSA must have no printing on the reverse side.

.05 Instructions similar to those provided as part of the official form must be provided as part of any substitute Form W-3.

.06 All privately printed Forms W-3 must have the tax year printed on the bottom face of each substitute Form W-3, using identical type to that of the official format.

.07 The copy of the substitute Form W-3 that contains the instructions and is to be retained by the employer should be at least 18-pound paper (basis 17 x 22-500).

SEC. 2. INSTRUCTIONS FOR PAYERS

.01 Only originals or ribbon copies of Copy A (Forms W-2 and W-2P) and Form W-3 may be filed with SSA. *Carbon copies and photocopies are not acceptable.*

.02 Payers should type or machine print entries on forms whenever possible and provide good quality data entries by using black ribbon, inserting data in the middle of blocks, well separated from other printing and guidelines, and taking any other measures that will guarantee clear, sharp images. The payer must provide a machine scannable form for Copy A and payee copies (Copies B, C, and 2) that are legible and capable of being photocopied (by the recipient).

.03 The Employer Identification Number (EIN) may be entered anywhere in Box 2 along with the Payer's name and address on Copy A of Forms W-2 and W-2P. (If this is done, the EIN need not be entered in Box 3 of either Form W-2 or W-2P.) For Forms W-3, the EIN must be entered where prescribed by the Form W-3 instructions.

.04 The payer's name, address, and EIN may be pre-printed.

.05 The optional employer's state number may be pre-printed in the employer's (payer's) name, address, and ZIP code box. If this is done, Box 4 of Forms W-2 and W-2P need not be completed, so long as the applicable state taxing authority does not object.

.06 The preparation and filing instructions for Forms W-2 and W-2P are contained in the 1990 instructions for Forms W-2 and W-2P. The preparation and filing instructions for Form W-3 are contained as part of the 1990 Form W-3 snap set assembly.

.07 To avoid confusion and questions by payees, payers are encouraged to delete the following items from copies for Forms W-2 and W-2P provided to payees:

1 Form identifying number (e.g., 22222, 55555);

2 The words "subtotal" and "void" and their boxes;

3 Any other captions or box number that would not be of any informational use to payees.

.08 Payers are encouraged to use the IRS supplied labels on all Forms W-3 filed with SSA.

SEC. 3. OFFICE OF MANAGEMENT AND BUDGET (OMB) REQUIREMENTS FOR SUBSTITUTE FORMS

.01 Public Law 96-511 requires: (1) OMB approval of IRS tax forms, (2) that each form (all copies) show the OMB approval number and, when appropriate, the form's expiration date, and (3) that the form (or its instructions) state why IRS is collecting the information, how we will use it and whether it must be given to us. The official IRS form (or instructions) will contain this information.

.02 As it applies to substitute IRS forms, this means:

1. All substitute forms (all copies) must show the OMB number and any expiration date as they appear on the official IRS form (see Exhibits A, B, and C).

2. The OMB number must be in one of the following formats:

OMB No. 1545-0008 (preferred),
or
OMB #. 1545-0008

3. You must inform the users of your substitute forms of the reasons for IRS collection, use, and requirements, as stated in the instructions for the official IRS form.

SEC. 4. REPRODUCTION PROOFS

.01 Order blanks for reproductions proofs (repro-proofs) are mailed annually to requestors of record, and on request to other users. Reproduction copies of Forms W-2, W-2P, and W-3 each consist of two parts. Part 1 is line art, i.e., type and rule. Part 2 is a black solid that should be photographically screened by the user to allow a 10%-20% dot pattern when printed in red OCR dropout ink. In some cases, where the production method requires the use of something other than a standard dot pattern, the printed value of part 2 must still be 10%-20%. Printers and others wishing to obtain reproduction proofs should call the toll-free number and ask for Publication 1192, which has order blanks for obtaining reproduction proofs. Written requests for Publication 1192 may be sent to: Internal Revenue Service, Eastern Area Distribution Center, ATTN: Repro Coordinator, 4300 Carolina Ave, Richmond, VA 23222.

.02 Publication 1192 contains information and the individual costs for each reproduction copy. Payment must be submitted with each request.

SEC. 5 EFFECT ON OTHER REVENUE PROCEDURES

.01 Rev. Proc. 89-41, 1989-2 C.B. 454, is superseded.

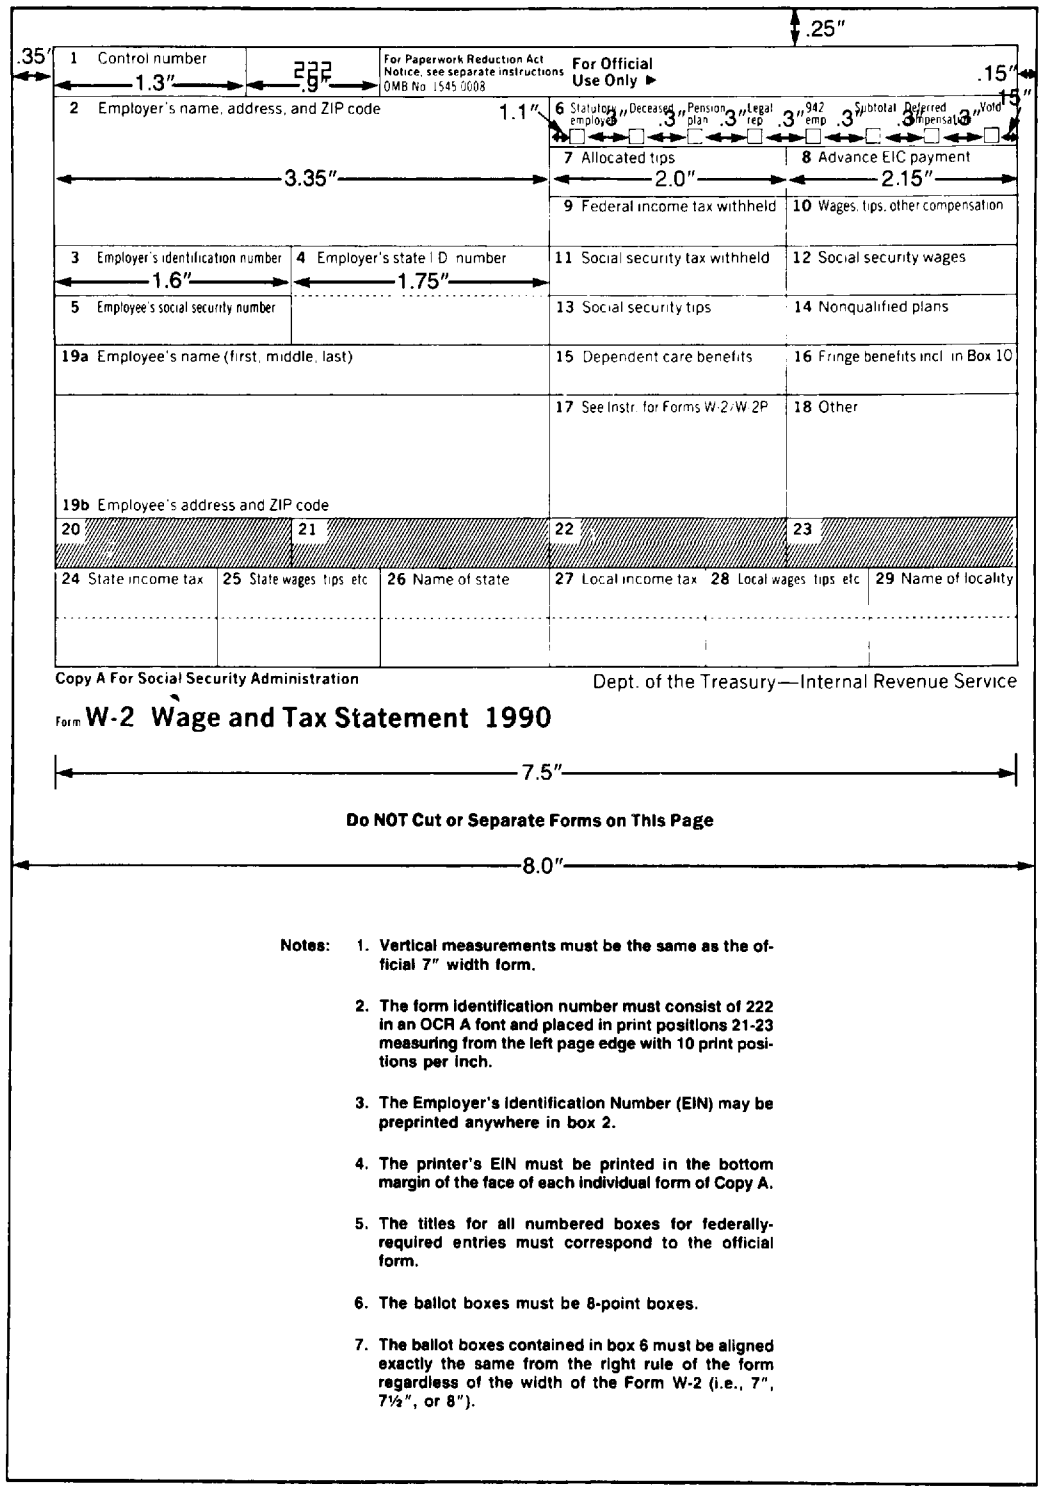
Paperwork Reduction Act Notice.—We ask for this information to carry out the Internal Revenue laws of the United States. We need it to ensure that taxpayers are complying with these laws and to allow us to figure and collect the right amount of tax. You are required to give us this information.

The time needed to complete and file this form will vary depending on individual circumstances.

The estimated average time is 26 minutes. If you have comments concerning the accuracy of this time estimate or suggestions for making this form more simple, we would be happy to hear from you. You can write to the **Internal Revenue Service,** Washington, DC 20224, Attention: IRS Reports Clearance Officer T:FP; or the **Office of Management and Budget,** Paperwork Reduction Project (1545-0008), Washington, DC 20503.

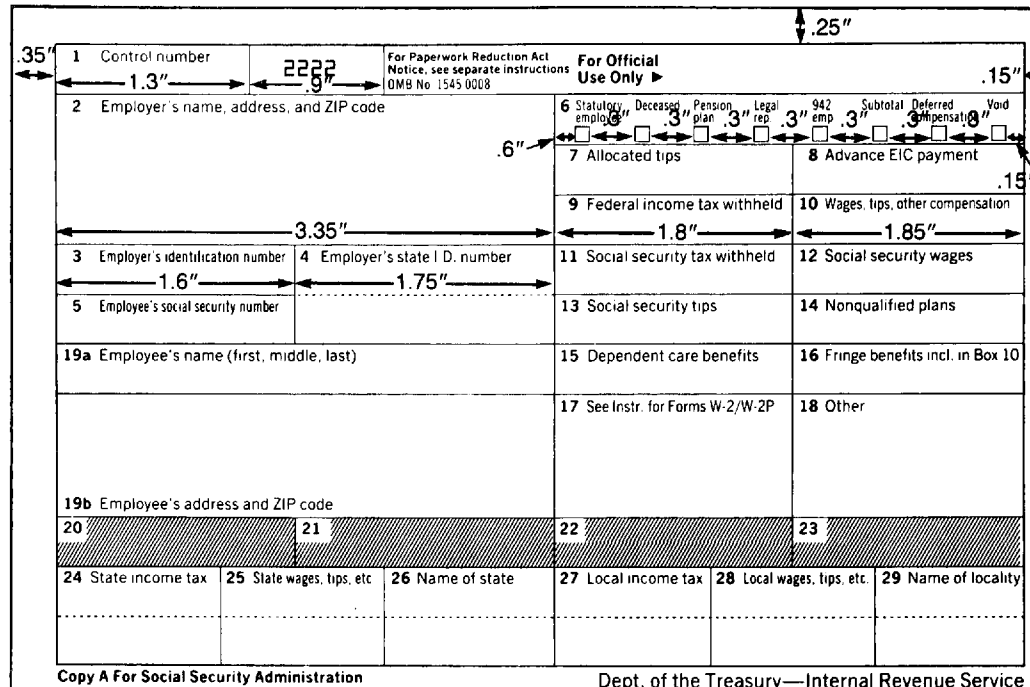
Exhibit D Form W-2 8″ Width



Notes:

1. **Vertical measurements must be the same as the official 7″ width form.**
2. **The form identification number must consist of 222 in an OCR A font and placed in print positions 21-23 measuring from the left page edge with 10 print positions per inch.**
3. **The Employer's Identification Number (EIN) may be preprinted anywhere in box 2.**
4. **The printer's EIN must be printed in the bottom margin of the face of each individual form of Copy A.**
5. **The titles for all numbered boxes for federally-required entries must correspond to the official form.**
6. **The ballot boxes must be 8-point boxes.**
7. **The ballot boxes contained in box 6 must be aligned exactly the same from the right rule of the form regardless of the width of the Form W-2 (i.e., 7″, 7½″, or 8″).**

Exhibit E Form W-2 7½" Width

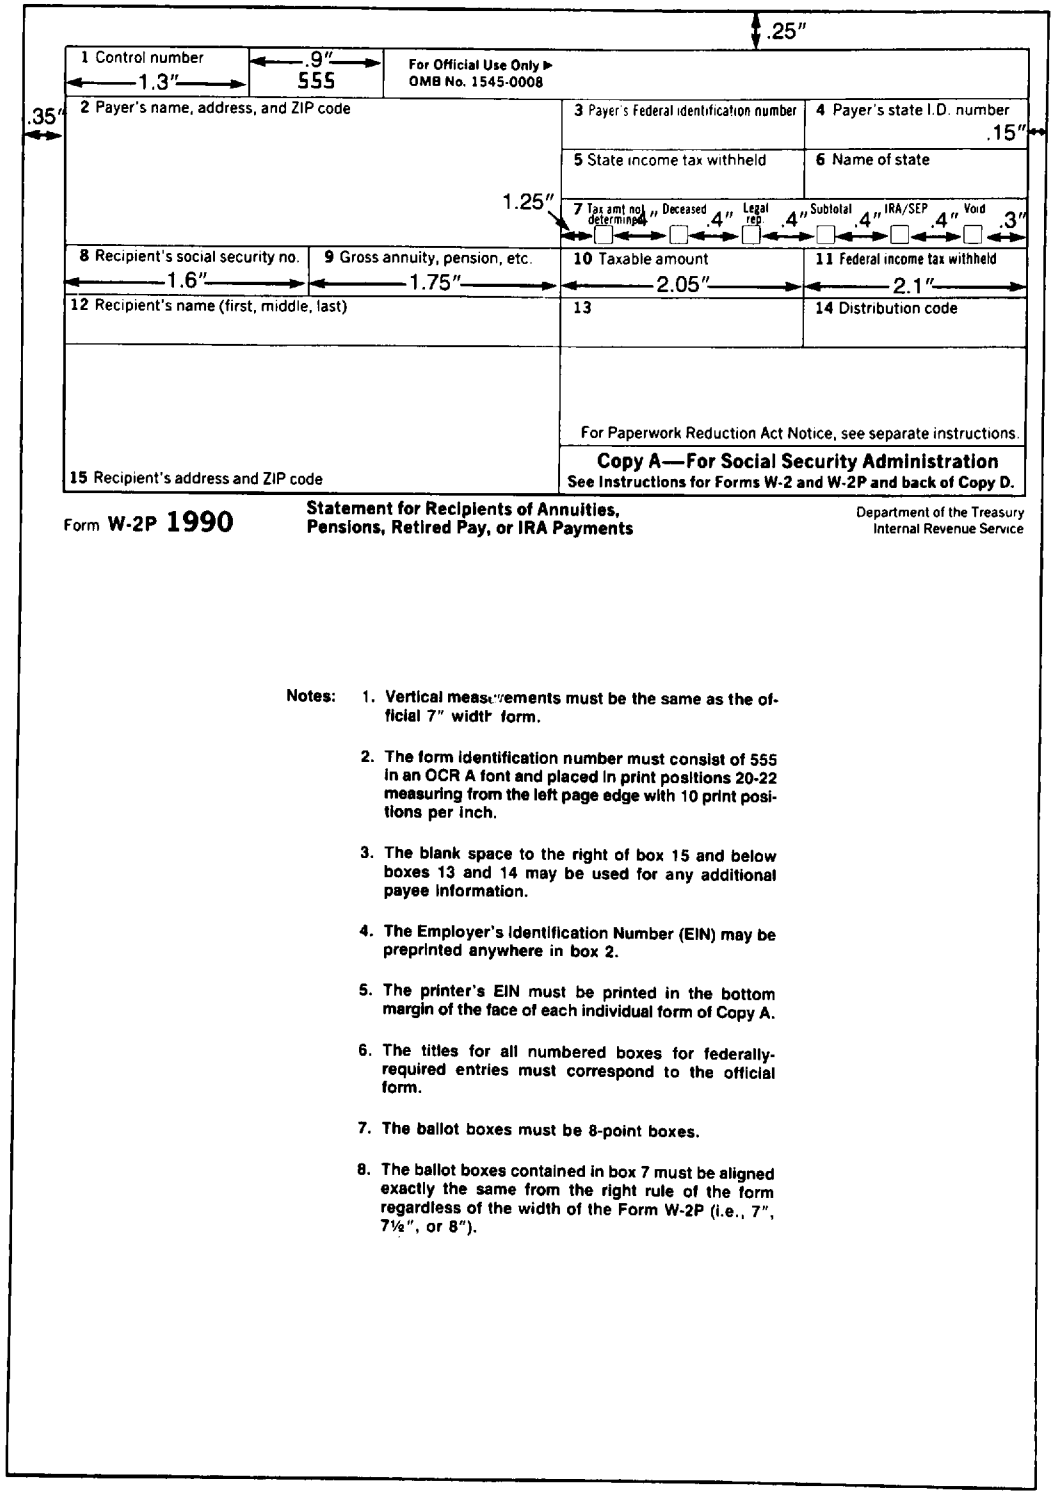


Do NOT Cut or Separate Forms on This Page

Notes:

1. **Vertical measurements must be the same as the official 7" width form.**
2. **The form identification number must consist of 2222 in an OCR A font and placed in print positions 20-23 measuring from the left page edge with 10 print positions per inch.**
3. **The Employer's Identification Number (EIN) may be preprinted anywhere in box 2.**
4. **The printer's EIN must be printed in the bottom margin of the face of each individual form of Copy A.**
5. **The titles for all numbered boxes for federally-required entries must correspond to the official form.**
6. **The ballot boxes must be 8-point boxes.**
7. **The ballot boxes contained in box 6 must be aligned exactly the same from the right rule of the form regardless of the width of the Form W-2 (i.e., 7", 7½", or 8").**

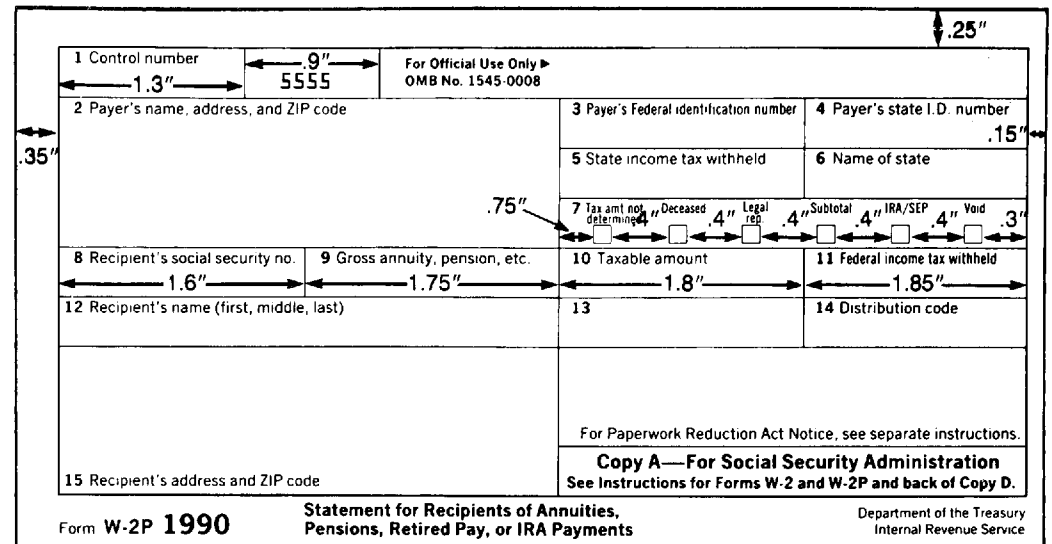
Exhibit F Form W-2P 8″ Width



Notes:

1. Vertical measurements must be the same as the official 7″ width form.
2. The form identification number must consist of 555 in an OCR A font and placed in print positions 20-22 measuring from the left page edge with 10 print positions per inch.
3. The blank space to the right of box 15 and below boxes 13 and 14 may be used for any additional payee information.
4. The Employer's Identification Number (EIN) may be preprinted anywhere in box 2.
5. The printer's EIN must be printed in the bottom margin of the face of each individual form of Copy A.
6. The titles for all numbered boxes for federally-required entries must correspond to the official form.
7. The ballot boxes must be 8-point boxes.
8. The ballot boxes contained in box 7 must be aligned exactly the same from the right rule of the form regardless of the width of the Form W-2P (i.e., 7″, 7½″, or 8″).

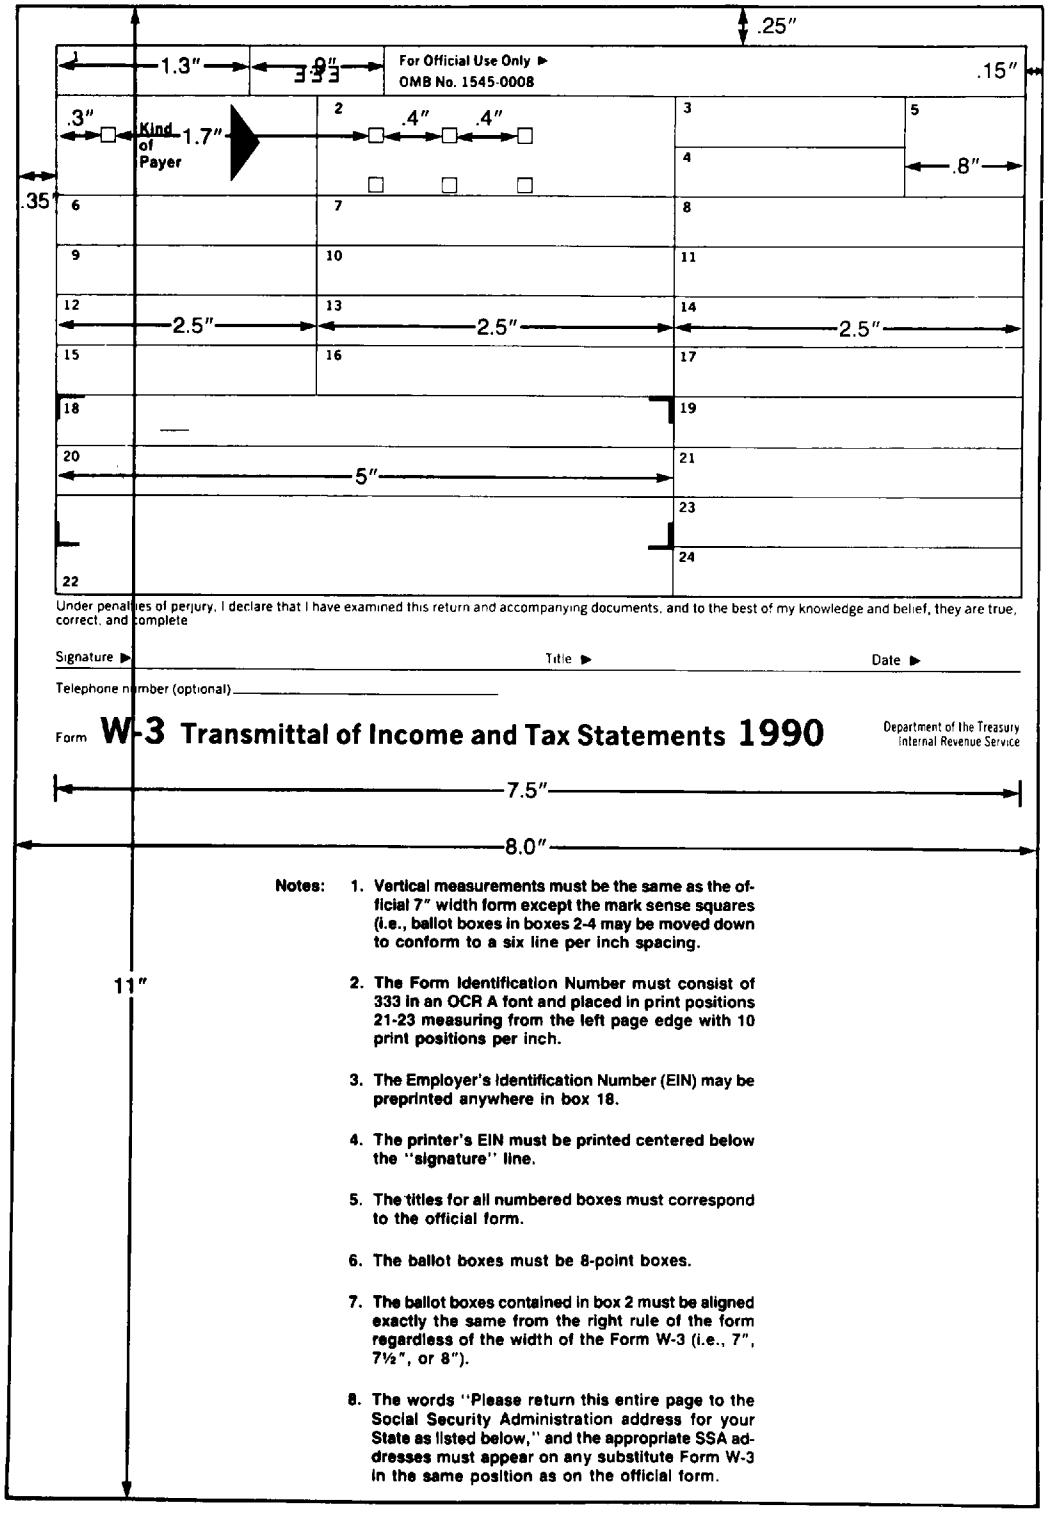
Exhibit G Form W-2P 7½" Width



Notes:

1. **Vertical measurements must be the same as the official 7" width form.**
2. **The form identification number must consist of 5555 in an OCR A font and placed in print positions 19-22 measuring from the left page edge with 10 print positions per inch.**
3. **The blank space to the right of box 15 and below boxes 13 and 14 may be used for any additional payee information.**
4. **The Employer's Identification Number (EIN) may be preprinted anywhere in box 2.**
5. **The printer's EIN must be printed in the bottom margin of the face of each individual form of Copy A.**
6. **The titles for all numbered boxes for federally-required entries must correspond to the official form.**
7. **The ballot boxes must be 8-point boxes.**
8. **The ballot boxes contained in box 7 must be aligned exactly the same from the right rule of the form regardless of the width of the Form W-2P (i.e., 7", 7½", or 8").**

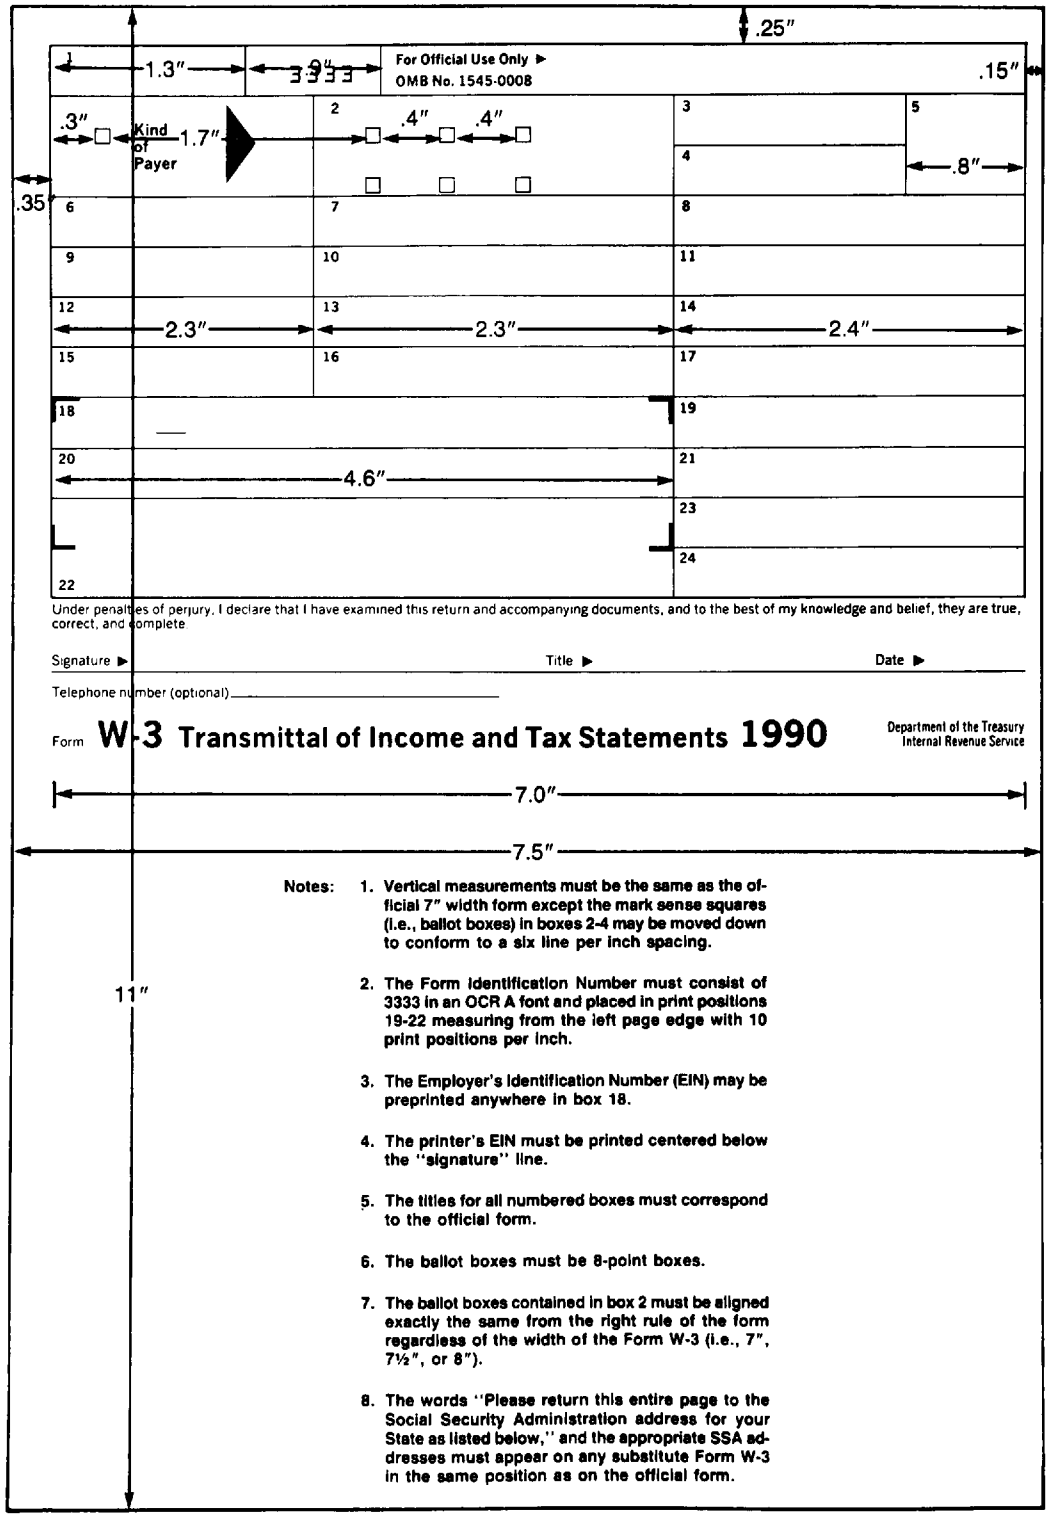
Exhibit H Form W-3 8" Width



Notes:

1. Vertical measurements must be the same as the official 7" width form except the mark sense squares (i.e., ballot boxes in boxes 2-4 may be moved down to conform to a six line per inch spacing.
2. The Form Identification Number must consist of 333 in an OCR A font and placed in print positions 21-23 measuring from the left page edge with 10 print positions per inch.
3. The Employer's Identification Number (EIN) may be preprinted anywhere in box 18.
4. The printer's EIN must be printed centered below the "signature" line.
5. The titles for all numbered boxes must correspond to the official form.
6. The ballot boxes must be 8-point boxes.
7. The ballot boxes contained in box 2 must be aligned exactly the same from the right rule of the form regardless of the width of the Form W-3 (i.e., 7", 7½", or 8").
8. The words "Please return this entire page to the Social Security Administration address for your State as listed below," and the appropriate SSA addresses must appear on any substitute Form W-3 in the same position as on the official form.

Exhibit I Form W-3 7½" Width



Notes:

1. Vertical measurements must be the same as the official 7" width form except the mark sense squares (i.e., ballot boxes) in boxes 2-4 may be moved down to conform to a six line per inch spacing.
2. The Form Identification Number must consist of 3333 in an OCR A font and placed in print positions 19-22 measuring from the left page edge with 10 print positions per inch.
3. The Employer's Identification Number (EIN) may be preprinted anywhere in box 18.
4. The printer's EIN must be printed centered below the "signature" line.
5. The titles for all numbered boxes must correspond to the official form.
6. The ballot boxes must be 8-point boxes.
7. The ballot boxes contained in box 2 must be aligned exactly the same from the right rule of the form regardless of the width of the Form W-3 (i.e., 7", 7½", or 8").
8. The words "Please return this entire page to the Social Security Administration address for your State as listed below," and the appropriate SSA addresses must appear on any substitute Form W-3 in the same position as on the official form.

Department of the Treasury
Internal Revenue Service

26 CFR 601.201: Rulings and determination letters.

Rev. Proc. 90-49

SECTION 1. PURPOSE AND SCOPE

.01 The purpose of this revenue procedure is to modify and replace Rev. Proc. 89-35, 1989-1 C.B. 917, in order to extend the effective date to contributions made for plan years beginning after December 31, 1989, to change the deadline for requesting rulings under the revenue procedure, to revise the information requirements for a ruling request made under the revenue procedure, to furnish a worksheet for actuarial computations, and to provide a special rule under which certain *de minimis* nondeductible employer contributions to a qualified defined benefit plan may be returned to the taxpayer without a formal ruling or disallowance from the Service.

.02 This revenue procedure applies to employer contributions to a qualified defined benefit pension plan that are made to satisfy the quarterly contributions requirement of section 412(m) of the Code for the plan years beginning after December 31, 1989 (see section 5).

.03 In general, contributions to which this revenue procedure apply must be effectively disallowed by obtaining a ruling letter, as described in section 3.06 of this revenue procedure, before the nondeductible contributions may be returned to the employer. However, there is an exception for contributions described in section 4.

SEC. 2. BACKGROUND INFORMATION

.01 Section 401(a)(2) of the Internal Revenue Code generally requires a trust forming part of a pension, profit-sharing, or stock bonus plan to prohibit the diversion of corpus or income for purposes other than the exclusive benefit of the employees or their beneficiaries.

.02 Section 412(m) of the Code provides that for plan years beginning after December 31, 1988, quarterly estimated contributions must be made to any plan (other than a multiemployer plan) that is subject to the minimum funding requirements of section 412.

.03 Section 4972 of the Code provides that a 10 percent tax is to be imposed on nondeductible plan contributions. However, the section 4972 tax does not apply to the extent that contributions are returned to the taxpayer no later than the time prescribed by law for filing the tax return for such taxable year (including extensions filed for and granted).

.04 In Rev. Rul. 77-200, 1977-1 C.B. 98, the Service held that plan language providing for the return of employer contributions under certain limited circumstances may be included in a plan intended to qualify under the Internal Revenue Code. One of those circumstances addresses situations in which the employer contribution is conditioned on its deductibility under section 404 of the Code and the deduction is disallowed by the Secretary of the Treasury. Under Rev. Rul. 77-200, the return to the employer must take place within one year from the date of disallowance of the deduction.

.05 Rev. Proc. 90-4, 1990-1 C.B. 410, sets forth the general procedures of the Service relating to the issuance of rulings, determination letters, opinion letters, and notification letters on employee plans and exempt organization matters.

.06 Rev. Proc. 90-17, 1990-1 C.B. 479, sets forth the procedures relating to the payment of user fees for requests to the Service for rulings, opinion letters , determination letters, and similar requests. (The user fee for a request under this revenue procedure is $100 pursuant to section 6.03 of Rev. Proc. 90-17.)

.07 Notice 89-52, 1989-1 C.B. 692, provides guidance with respect to the quarterly estimated payments required by section 412(m).

.08 Rev. Proc. 89-35, 1989-1 C.B. 917, sets forth a procedure by which a plan administrator or plan sponsor of a qualified defined benefit pension plan may under certain circumstances satisfy the requirement that a deduction under section 404 of the Code be disallowed by the Secretary of the Treasury, thereby fulfilling a condition under which nondeductible contributions made for the plan year beginning in 1988 or made to satisfy the quarterly contributions requirement of section 412(m) of the Code for the first plan year beginning after December 31, 1988, may revert to the employer without adversely affecting the plan's qualified status. Rev. Proc. 89-35 did not apply to plan years commencing after December 31, 1989.

SEC. 3. REQUESTS FOR RULING LETTERS TO DISALLOW THE DEDUCTIBILITY OF A CONTRIBUTION

.01 Who May Submit—Only a plan administrator (within the meaning of section 414(g) of the Code), plan sponsor, or the authorized representative of either may make a request for a determination that the employer contribution to which this revenue procedure applies would be nondeductible if claimed as a deduction for purposes of determining whether such contribution may be returned to the employer in accordance with Rev. Rul. 77-200 without adversely affecting the qualified status of the plan.

.02 Where To Submit—Such requests with the appropriate user fee for a ruling pursuant to Rev. Proc. 90-17 shall be submitted to the Internal Revenue Service; Assistant Commissioner (Employee Plans and Exempt Organizations); Attention: E:EP:PA, P.O. Box 14073, Ben Franklin Station; Washington, DC 20044. The request must be made no later than the later of (1) 2 1/2 months after the close of, or (2) 6 months after the valuation date which has or will be reported on the Schedule B of Form 5500 for, the plan year for which the disallowance of the deductibility of the employer contribution is requested.

.03 Procedural Rules—The request must satisfy all of the requirements of Rev. Proc. 90-4, 1990-1 C.B. 410, including deletion instructions in compliance with section 6110 of the Code. Also, attention is called to section 8.02 of Rev. Proc. 90-4 which provides that a request for a ruling must contain a declaration in the following form: "Under the penalties of perjury, I declare that I have examined this request, including accompanying documents, and to the best of my knowledge and belief, the facts presented in support of the request are true, correct, and complete." This declaration must be signed by the taxpayer (e.g., an au-

thorized officer of a corporation). The signature of an individual with a power of attorney will not suffice for the declaration.

.04 Information Required—In addition to any information required by Rev. Proc. 90-4, the following information shall accompany the request:

(1) The location of the office of the District Director of Internal Revenue having jurisdiction over the plan, the employer identification number, the plan name and number, and the name and address of the plan administrator or plan sponsor.

(2) A copy of the last actuarial valuation report, and a copy of the last Schedule B of Form 5500, including attachments thereto, that has been filed with the Internal Revenue Service.

(3) The plan year for which the request is made (e.g., January 1, 1990 - December 31, 1990).

(4) A list of the employer contributions actually paid in each month, from the twelfth month prior to the beginning of the plan year for which the disallowance is requested through the date of the request and the plan year to which the contributions were applied.

(5) A worksheet, signed by the enrolled actuary for the plan, following the format of the worksheet included as Appendix II of this revenue procedure. This worksheet includes the calculation of the full funding limitation, the amount of the reversion due to the employer as a result of the disallowance of the deduction of the employer contribution, and a certification by the enrolled actuary attesting to the accuracy of this information. The maximum amount which may be returned to the employer is the excess of (1) the amount contributed over (2) the amount that would have been contributed had the contribution been limited to the amount that is deductible. Earnings attributable to the excess contribution may not be returned to the employer, but losses attributable thereto must reduce the amount to be so returned.

(6) A copy of the current plan document, and a reference to the appropriate section in the plan document which permits the return of employer contributions.

(7) Documentation must be provided that employer contributions are conditioned on deductibility. A copy of a board resolution will suffice for such documentation as will plan language providing that employer contributions are conditioned on deductibility.

(8) A statement as to whether the contributions for which a disallowance is being requested have been deducted on any tax return of the employer.

.05 Within 90 days from the receipt of a complete request, the National Office will either contact the applicant to obtain more information or will issue a form letter approving the request.

.06 The Service may request additional information as needed.

.07 Approval Letter.

(1) If the request described in section 3.01 is approved, a form letter will be issued. A copy of this approval letter must be attached to the Schedule B of the Form 5500 that is filed for the plan year for which the disallowance is effective (see Appendix I—Form Letter). The form letter will contain the caveat that the Service has considered the disallowance of employer contributions solely for the purpose of applying Rev. Rul. 77-200.

(2) The National Office will send a copy of the form letter to the Key District Director having jurisdiction over the plan.

.08 If the request for the disallowance of a nondeductible employer contribution is approved under this revenue procedure, and if the contribution in question is returned to the employer before the Schedule B for the plan year in which the contribution was made is filed, the contribution is not reported on the Schedule B. If the nondeductible contribution is returned to the employer after the Schedule B for the plan year in question is filed, the contribution must be reported and credited under section 412 of the Code on that Schedule B. However, the nondeductible contribution for which the funding standard account was credited under section 412 creates an offsetting charge to the funding standard account on the Schedule B for the year in which the nondeductible contribution is returned.

SEC. 4. SPECIAL RULES FOR DE MINIMIS NONDEDUCTIBLE CONTRIBUTIONS

.01 Employer contributions to a qualified defined benefit plan that are conditioned on deductibility may be treated as disallowed by the Secretary of the Treasury if they are treated as *de minimis* under section 4.02 and if the conditions on actuarial certification under section 4.03 are satisfied. This treatment is solely for the purpose of applying Rev. Rul. 77-200 to allow the return of the nondeductible contribution to the employer.

.02 A nondeductible contribution is not considered *de minimis* unless the requirements listed below are satisfied.

(1) The amount of the nondeductible contributions is less than $25,000.

(2) The terms of the plan must specifically allow for the return of contributions to the employer if they are determined by the Service to be nondeductible.

(3) Prior to, or concurrent with, the date when the nondeductible contribution is made to the plan, the contribution is specifically conditioned on deductibility in writing either (i) in the plan or (ii) in the plan in combination with a certified corporate board resolution. A contribution is not treated as specifically conditioned on deductibility unless the plan language or board resolution conditioning the contributions explicitly states that the contributions in question *are* conditioned on deductibility. For example, plan language stating that nondeductible contributions *must* or *shall* be returned to the employer meets requirement (3)(i). However, plan language stating that nondeductible contributions *may* be returned to the employer must be combined *with* a board resolution that specifically conditions the contributions on deductibility to meet requirement (3)(ii).

.03 A contribution may not be returned to the taxpayer unless the actuarial certification requirements of this section are satisfied. An actuarial certification that a return of the nondeductible contribution is appropriate must be signed by the enrolled actuary for the plan. This actuarial certification must follow the form of the actuarial worksheet set forth in section 3.04(5) and included in Appendix II of this revenue procedure. The

return of the nondeductible contribution must be made no later than one year from the date of the certification. If not returned by the employer's tax filing date, including extensions filed for and granted, the tax under section 4972 of the Code would apply.

.04 A copy of this actuarial certification, as well as a copy of the applicable plan language or board resolution, must be attached to the Schedule B of the Form 5500 that is filed for the plan year in which the nondeductible contribution was made. The employer who receives the return of contributions must also attach a certification to the Schedule B. The employer must certify that the contributions which are being returned have not been deducted on a tax return of the employer or, if deducted, an amended return has been filed.

.05 Plan sponsors, plan administrators, and plan trustees who make use of this *de minimis* rule are cautioned that the requirement that the contributions have been conditioned (at or prior to the time they were made) on deductibility must be satisfied. Thus, for example, plan contributions must be expressly conditioned on deductibility at the time made, unless the terms of the plan specify that all contributions are conditioned on deductibility. A return of contributions that were not properly conditioned on deductibility will result in the loss of plan qualification under section 401 of the Code.

SEC. 5. EFFECTIVE DATE

This revenue procedure is effective for contributions made to satisfy the quarterly installments requirement for a plan year commencing on or after January 1, 1990.

SEC. 6. EFFECT ON OTHER REVENUE PROCEDURES

Rev. Proc. 89-35 is superseded.

APPENDIX I—FORM LETTER

Significant Index No. 0404.00-00

In re: Plan Name
(Plan No. ____)
EIN:

Dear _____ :

This letter is in response to your request with respect to the above-referenced defined benefit pension plan pursuant to Revenue Procedure 90-49 for the plan year commencing _____ .

Rev. Proc. 90-49 sets forth the procedure whereby, under certain circumstances, a disallowance of the deduction of employer contributions to a qualified defined benefit pension plan may be obtained; thereby, fulfilling a condition under which such contributions could revert to the employer.

Based upon the information submitted, we have determined that contributions amounting to $ _____ , which were made for the plan year commencing _____ , may be considered as disallowed solely for the purpose of applying Rev. Rul. 77-200. Therefore, the return of contributions not exceeding $ _____ would not adversely affect the qualified status of the plan, provided this reversion occurs no later than one year from the date of this letter. (However, if it is not returned by your tax filing date, including extensions filed for and granted, the tax under section 4972 would apply.) In granting this approval, we are not expressing any opinion as to the accuracy or acceptability of any calculations or other material submitted with your request.

When filing Form 5500 for the plan year commencing _____ , a copy of this letter must be attached to the Schedule B (Actuarial Information). A copy of this letter should be furnished to the enrolled actuary for the plan. We have sent a copy to the Key District Director in _____ .

Sincerely yours,

James E. Holland, Jr.
Chief, Pension Actuarial Branch

APPENDIX II—ACTUARIAL CERTIFICATION

Section 1. *Full Funding Limitation Calculation*

Valuation Date: _____

I. Full Funding Limitation without regard to current liability

1. Accrued Liability: _____
2. Normal Cost as of _____ : _____

Rev. Proc. 90-50

SECTION 1. PURPOSE

This revenue procedure sets forth procedures under which a taxpayer who has elected the cost sharing method under section 936(h)(5)(C)(i) of the Internal Revenue Code may change to the profit split method permitted under section 936(h)(5)(C)-(ii) of the Code or the method permitted under section 936(h)(1) through (h)(4) for years to which the amendments made to section 936 by section 1231(a)(1) of the Tax Reform Act of 1986 (Act), 1986-3 C.B. (Vol. 1) 478, apply.

SEC. 2. BACKGROUND

Section 1231(a)(1) of the Act amended section 936(h)(5)(C)(i)(I) of the Code to increase the amount of the cost sharing payment to the greater of (1) 110 percent of the cost of product area research multiplied by the amount which possession sales of the product bears to the total sales of the affiliated group of all products in the product area; or (2) the inclusion or payment which would be required under section 367(d)(2)(A)(ii) or section 482 if the section 936 corporation were a foreign corporation. In view of the changes made by section 1231(a)(1) of the Act, Notice 87-27, 1987-1 C.B. 471, Notice 88-97, 1988-2 C.B. 421, and Notice 89-82, 1989-2 C.B. 402, permitted taxpayers who had elected cost sharing for a taxable year beginning before January 1, 1987, to change to the profit split method or the method permitted under section 936(h)(1) through (h)(4) for years to which the changes made to section 936 by the Act apply. Rev. Proc. 89-61, 1989-2 C.B. 782, amplified Notices 87-27, 88-97, and 89-82, by permitting not only taxpayers who have made a cost sharing election for taxable years beginning prior to January 1, 1987, to change their cost sharing election, but also taxpayers who have made a cost sharing election for a taxable year beginning after December 31, 1986.

SEC. 3. PROCEDURE FOR CHANGING METHOD OF ELECTION UNDER SECTION 936(h)

A taxpayer who has elected the cost sharing method under section 936(h)(5)(C)(i) of the Code for taxable years beginning before January 1, 1987, may elect to change to the profit split method under section 936(h)(5)(C)(ii) or to the method under section 936(h)(1) through (h)(4) on an amended return for the possessions corporation's first taxable year beginning after December 31, 1986, if such amended return is filed not later than the due date (including extensions) for the possessions corporation's tax return for its fourth taxable year beginning after December 31, 1986. In the case of cost sharing elections made for a taxable year beginning on or after January 1, 1987, the amended return must be filed no later than the due date (including extensions) for the possessions corporation's tax return for its last taxable year beginning before January 1, 1991. The change will apply to the first applicable taxable year beginning after December 31, 1986, and all subsequent taxable years. The change can only be made if the provisions of section 4 of this revenue procedure relating to the waiver of the statute of limitations are satisfied. Except as amended by this revenue procedure, the conditions prescribed by Notice 87-27 for changing the election continue to apply.

SEC. 4. WAIVER OF STATUTE OF LIMITATIONS

.01 No change of method of election described in section 3 of this revenue procedure may be made unless, at the time the change of method of election is made, the statute of limitations on assessment for the taxable years subject to such change of the persons described in section 4.02 of this revenue procedure will expire no earlier than two years from the time such change of method of election is made. Any extension of the statute of limitations necessary under section 6501(c)(4) of the Code must cover all issues arising under section 936 and related or correlative items. If the requirements of this section are not satisfied, then no change of method of election can be made for any taxable year beginning after December 31, 1986, without the consent of the Commissioner. Any subsequent action by the taxpayer to shorten the statute of limitations specified in this section may, in the discretion of the Commissioner, result in the invalidation of the change of method of election for all applicable years.

.02 The persons described in this section are (a) the possessions corporation(s); (b) the appropriate affiliate(s) determined under section 1.936-6(a)(5), Q&A 1, of the Income Tax Regulations; (c) in the case of a change to the profit split method under section 936(h)(5)(C)(ii) of the Code, the appropriate affiliate(s) determined under section 1.936-6(b)(1), Q&A 13, of the regulations; and (d) in the case of a change to the method under sections 936(h)(1) through (h)(4), the U.S. shareholders described in section 1.936-4, Q&A 1. Where the appropriate affiliate(s) or U.S. shareholder is a member of an affiliated group that files a consolidated return, see section 1.1502-77.

SEC. 5. COMMENTS OR INQUIRIES

Comments or inquiries regarding this revenue procedure should be addressed to the Associate Chief Counsel (International), Attention CC:INTL:Br2, Internal Revenue Service, 1111 Constitution Ave., N.W., Washington, D.C. 20224

SEC. 6. EFFECT ON OTHER DOCUMENTS

This revenue procedure modifies Notices 87-27, 88-97, 89-82, and Rev. Proc. 89-61.

---

26 CFR 601.201: Rulings and determination letters.
(Also Part I, Sections 25, 103, 143; 1.25-3T, 1.103-1, 6a.103A-2.)

Rev. Proc. 90-51

SECTION 1. PURPOSE

This revenue procedure adds average area purchase price safe harbor limitations for Guam and Puerto Rico to Rev. Proc. 89-59, 1989-2 C.B. 771, as modified by Rev. Proc. 90-24, 1990-1 C.B. 510.

SEC. 2. BACKGROUND

.01 Issuers of qualified mortgage bonds, as defined in section 143(a) of the Internal Revenue Code, and mortgage credit certificates, as defined in section 25(c), must satisfy several requirements if the interest on the bonds is to be excludable from gross income under section 103(a) or the credit attributable to the certificates is to be allowable against federal income tax. One of the requirements is that the cost of each residence financed must not exceed a certain percentage of the average area purchase price applicable to the residence. The average area purchase price with respect to any residence is the average purchase price of single-family residences in the statistical area in which the residence is located that were purchased during the most recent 12-month period for which sufficient statistical information is available.

.02 Prior to the enactment of the Tax Reform Act of 1986 (1986 Act), section 1301, 1986-3 (Vol. 1) C.B. 519, former section 103A(f) of the Code provided that the acquisition cost of each residence could not exceed 110 percent (120 percent for a targeted area residence) of the average area purchase price. The 1986 Act repealed section 103A(f) and replaced it with section 143(e), which provides that the acquisition cost can not exceed 90 percent (110 percent for a targeted area residence) of the average area purchase price. The 1986 Act generally is effective with respect to bonds issued after August 15, 1986. The Revenue Reconciliation Act of 1989, section 7104(a)-(b), 1990-1 C.B. 210, 216, extended the qualified mortgage bond provisions to bonds issued through September 30, 1990, and extended the mortgage credit certificate provisions for elections made for periods through that date.

.03 Current average area purchase price safe harbor limitations for the states and the District of Columbia are contained in Rev. Proc. 89-59. Safe harbor limitations for the most recent prior periods were set forth in Rev. Proc. 88-48, 1988-2 C.B. 635, *obsoleting* Rev. Proc. 87-20, 1987-1 C.B. 713, *obsoleting* Rev. Proc. 85-42, 1985-2 C.B. 496.

.04 Prior to the present revenue procedure, average area purchase

price safe harbor limitations for Guam and Puerto Rico were set forth in Rev. Proc. 89-27, 1989-1 C.B. 892, which supplemented Rev. Proc. 88-48.

.05 The average area purchase price safe harbor limitations for the Commonwealth of the Northern Mariana Islands were published in Rev. Proc. 87-19, 1987-1 C.B. 712, which supplemented Rev. Proc. 85-42.

SEC. 3. APPLICATION

The average area purchase price safe harbor limitations for Guam and Puerto Rico are set forth in Table 1. These limitations have not been adjusted to reflect either the 90 percent of the average area purchase price described in section 143(e)(1) of the Code or the 110 percent of the average area purchase price described in section 143(e)(5).

Rev. Proc. 90-51, Table 1

STATE AND AREA DESIGNATION	*AVERAGE AREA PURCHASE PRICE SAFE HARBOR LIMITATIONS FOR SINGLE-FAMILY RESIDENCES*	
	NEW	*EXISTING*
Guam		
All Areas	$66,000	$66,000
Puerto Rico		
All Areas	$55,800	$55,800

SEC. 4. EFFECT ON OTHER REVENUE PROCEDURES

Rev. Proc. 89-59 is supplemented. The safe harbor limitations for Guam and Puerto Rico, as added to Rev. Proc. 88-48 by Rev. Proc. 89-27, are obsolete except as provided in section 5.02 of this revenue procedure.

SEC. 5. EFFECTIVE DATES

.01 The average area purchase price safe harbor limitations contained in this revenue procedure must be used to compute the housing cost/income ratio under section 143(f)(5) of the Code and to satisfy the purchase price requirement under section 143(e) for commitments to provide financing that are made, or (if the purchase precedes the financing commitment) for residences that are purchased, in the period specified in the following sentence. The period begins on October 9, 1990, the date of publication of this revenue procedure in the Internal Revenue Bulletin, and ends on the date as of which these average area purchase price safe harbor limitations are rendered obsolete by a new revenue procedure. If an issuer computes different average area purchase price limitations for Guam or Puerto Rico based on more accurate and comprehensive data for the purpose of computing the housing cost/income ratio, the issuer must use data from a 12-month period that does not begin earlier than July 1, 1988, or end later than June 30, 1990.

.02 Issuers of qualified mortgage bonds and mortgage credit certificates in Guam and Puerto Rico may continue to rely on the average area purchase price safe harbor limitations added to Rev. Proc. 88-48 by Rev. Proc. 89-27 with respect to bonds sold (and bond authority exchanged for authority to issue mortgage credit certificates) before November 8, 1990, 30 days after publication of this revenue procedure in the Internal Revenue Bulletin, if the commitments to provide financing for mortgages and the commitments to issue the certificates are made before January 7, 1991, 90 days after publication of this revenue procedure in the Internal Revenue Bulletin.

.03 Issuers of qualified mortgage bonds and mortgage credit certificates in the Commonwealth of the Northern Mariana Islands may continue to rely on the average area purchase price safe harbor limitations added to Rev. Proc. 85-42 by Rev. Proc. 87-19.

SEC. 7. EFFECT ON OTHER DOCUMENTS p. 636

PART I—PROCEDURES

SECTION 1. PURPOSE

The purpose of this revenue procedure is to set forth in a checklist questionnaire the information that must be included in a request for a ruling under section 332 of the Internal Revenue Code relating to complete liquidations of controlled subsidiary corporations. This revenue procedure updates and supersedes Rev. Proc. 81-68, 1981-2 C.B. 723.

SEC. 2. BACKGROUND

Problems from incomplete ruling requests

.01 The Internal Revenue Service receives many requests for rulings in which the information relating to the proposed transaction is not sufficient to permit a determination to be made. In those cases, it is necessary to obtain additional information from the taxpayer before the request for a letter ruling can be considered. Obtaining this additional information is time consuming for both Service personnel and taxpayers, delays issuance of the ruling letter, and may result in the taxpayer being required to pay an additional user fee. See Rev. Proc. 90-1, 1990-1 C.B. 356, section 3.18.

Checklist to facilitate a complete submission

.02 This checklist will facilitate the filing and processing of requests for rulings under section 332 of the Code by specifying information and representations to be included so that the requests will be as complete as possible when initially filed.

Additional information may be required

.03 Because the information and representations necessary to rule on a particular transaction depend upon all the facts and circumstances, information or representations in addition to those set forth in this revenue procedure may be required.

Rev. Proc. 90-1 standard procedures

.04 The authority and general procedures of the National Office of the Internal Revenue Service and of the Office of the District Directors of Internal Revenue with respect to the issuance of letter rulings and determination letters are outlined in Rev. Proc. 90-1, or its successor. Note section 3.04 of Rev. Proc. 90-1, as modified by Rev. Proc. 90-17, 1990-1 C.B. 479, dealing with the payment of user fees by taxpayers requesting certain types of Service advice including private letter rulings. See also Rev. Proc. 90-3, 1990-1 C.B. 402, or its successor, relating to areas in which advance rulings generally will not be issued. These revenue procedures along with this checklist revenue procedure are subject to periodic updating by the Service. Therefore, careful attention should be given to ensure usage of the most current procedures.

Taxpayers to exercise care in preparing ruling requests

.05 Careful attention to all requirements of these revenue procedures will aid in the timely processing of letter ruling requests.

SEC. 3. CHANGES TO REV. PROC. 81-68

.01 Section 1 is modified to indicate that the purpose of the revenue procedure is to update and supersede Rev. Proc. 81-68.

.02 Section 2 is modified to state that representations are now required, and to update references to revenue procedures cited.

.03 Section 4 is substantially altered. Certain sections have been renumbered, and the taxpayer must now submit standard representations using the precise language specified herein, or submit an explanation why the representations cannot be made in the requested form. To properly reflect applicable changes, some citations to Code sections and to revenue rulings and procedures have been added or deleted. Changes include:

1. Section 4.01(6) now requires taxpayers to submit information concerning any prior ruling requests submitted by the taxpayer (or predecessor) that were withdrawn in which the identical or similar issue was present.

2. Section 4.02(2)(b)(2)(C) of Rev. Proc. 81-68, which primarily dealt with issues under former section 334(b)(3)(C) of the Code, has been deleted.

3. Section 4.02(2)(b)(6) has been added to request certain information regarding the applicability of section 338.

4. Section 5 requests certain general information and now includes a cross reference to the information and statements required for all ruling requests pursuant to Rev. Proc. 90-1, and requires taxpayers to list the specific rulings being requested using the precise language desired in the issued ruling and the authorities supporting the rulings.

5. Section 6 is similar to prior section 5 modified to substitute "Associate Chief Counsel (Technical)" for "Assistant Commissioner (Technical)."

6. Section 7 is similar to prior section 6 modified to state that Rev. Proc. 81-68 is superseded.

SEC. 4. SPECIFIC INFORMATION TO BE INCLUDED IN REQUESTS FOR RULINGS UNDER SECTION 332 OF THE CODE

All material facts and relevant representations must be submitted

Each of the items in this section should be specifically dealt with in the letter ruling request. If an item is not applicable, so state and briefly explain why. Standard representations are set forth throughout this section and are highlighted by the word "representation" in boldface type. These representations are of equal importance with the other factual information requested herein. The representations function to ensure that specific statutory and judicial requirements and administrative ruling guidelines are satisfied. Each representation set forth in this section should be submitted in the precise language requested. If a representation cannot be submitted as requested, an explanation must be given. Variations of the language of the representations may delay processing the ruling request and will not be accepted unless reasons satisfactory to the Service are submitted. Submission of the information and representations should follow the format of this revenue procedure as closely as possible, with appropriate descriptive headings. Care must be taken to ensure that all the facts relating to the transaction are submitted.

Information regarding the corporation being liquidated and the corporation receiving the distribution

.01 *Information regarding the corporation being liquidated ("Subsidiary" or "S") and the corporation receiving the liquidating distribution ("Parent" or "P").*

Identification of Parent and Subsidiary

1. Provide names, taxpayer identification numbers, and places and dates of incorporation of Subsidiary and Parent. State whether Parent and Subsidiary are domestic or foreign corporations.

International transactions

2. If a foreign corporation is involved consider whether the issues raised fall primarily within the jurisdiction of the Associate Chief Counsel (International) so that the ruling request should be submitted to the attention of that office (CC:INTL). See, for example, sections 367 and 897 of the Code and the regulations thereunder. See, also, Rev. Proc. 90-19, 1990-1 C.B. 495, and section 2.03 of Rev. Proc. 90-1.

Type of business

3. Provide brief descriptions of the businesses of Subsidiary and Parent.

Applicable District Office

4. Identify the District Office that will have audit jurisdiction over the returns of Subsidiary and Parent.

Identical issue within audit jurisdiction of District Director

5. State whether to the best knowledge of Parent (referred to below as "taxpayer") and the taxpayer's representatives, if any, the identical issue is in a return of the taxpayer (or in a return for any year of a related taxpayer within the meaning of section 267 of the Code, or of a member of an affiliated group of which the taxpayer is also a member within the meaning of section 1504). If so, the statement must specify whether the issue (1) is being examined by a District Director, (2) has been examined and (a) the statutory period of limitation either on assessment or for filing a claim for refund or credit of tax has not expired, or (b) a closing agreement covering the issue or liability has not been entered into by a District Director, (3) is being considered by an Appeals Office in connection with the taxpayer's return for an earlier period, (4) has been considered by an Appeals Office and (a) the statutory period of limitation either on assessment or for filing a claim for refund or credit of tax has not expired, or (b) a closing agreement covering the issue or liability has not been entered into by an Appeals Office, or (5) is pending in litigation in a case involving the taxpayer or a related taxpayer.

Prior ruling request regarding same or similar issue

6. The request also must contain a statement whether, to the best knowledge of the taxpayer and the taxpayer's representatives, if any, the identical or a similar issue has been (i) submitted to the Service by the taxpayer or its predecessors but withdrawn before a ruling was issued, or (ii) ruled on by the Service to the taxpayer or to the taxpayer's predecessor. If so, the statement must specify (i) the date of submission, (ii) the date of withdrawal or issuance, and (iii) details of the Service's consideration of the issue.

Taxpayer to alert IRS National and District Offices to current status

7. If, after the request is filed but before a ruling is issued, the taxpayer knows that an examination of the issue by a District Director has been started, the taxpayer must notify the National Office of this action. If a return is filed before a ruling is received from the National Office concerning the issue, a copy of the pending request for ruling must be attached to the return. This alerts the District Office and avoids premature District action on the issue.

Capital structure and ownership of Subsidiary stock

.02 *Description of, and ownership of, stock and securities of Subsidiary.*

Capital structure of Subsidiary

1. Furnish a complete description of each class of Subsidiary stock outstanding on the date of adoption of the plan of liquidation, setting forth the rights and privileges of each class, including the presence or absence of voting rights, dividend and liquidation preferences or limitations, rights to convert or redeem or acquire additional stock, and whether classified as common or preferred stock. With regard to each class of stock, specifically state whether the stock confers the right to vote for directors, and, also, whether voting rights have been, or will be, suspended, and, if so, under what conditions and for how long. With regard to the voting stock of Subsidiary held by Parent, state whether the right to vote the stock has been, or will be, held by someone other than Parent. If voting stock has been, or will be, exchanged for nonvoting stock, or vice versa, state when this has, or will have, occurred. Also, describe all other outstanding interests (bonds, debentures, notes, warrants, options, etc.) and, taking into account all relevant factors (including those listed in section 385(b) of the Code), briefly explain why each of these items should or should not be considered a stock interest other than preferred stock described in section 1504(a)(4).

Ownership of Subsidiary stock

2. Ownership of stock prior to distribution.

Stock held by minority shareholders

(a) Set forth the number of shares and the percentage of each class of outstanding stock owned by each minority shareholder of Subsidiary (or, if the minority interest is widely held, describe the minority holding in general terms).

Stock held by Parent, type and acquisition date

(b) Describe each block of each class of Subsidiary stock held by Parent and provide the date Parent acquired such stock.

Subsidiary stock acquired by option

(1) If the Subsidiary stock was acquired by exercise of an option, provide full particulars as to the date the option was acquired, the party from whom the option was acquired, and the date the option was exercised.

Transaction in which Subsidiary was acquired

(2) Describe the transaction (purchase, exchange, etc.) in which the Subsidiary stock was acquired, and the amount and kind of consideration given.

Subsidiary stock with carryover basis

(3) State whether the basis of the stock in the hands of Parent is the same, in whole or in part, as the basis in the hands of the party from whom Parent acquired the stock.

Anticipated change in ownership of Subsidiary stock

(4) State whether there is any plan or intent to sell or otherwise dispose of any Subsidiary stock prior to the liquidation, or for Subsidiary to issue any additional shares of Subsidiary stock.

Section 332(b)(1) control

(5) Submit one of the following two representations. (i) If Subsidiary has outstanding only a single class of stock, submit the following REPRESENTATION: *P, on the date of adoption of the plan of liquidation, and at all times until the final liquidating distribution is completed, will be the owner of at least 80 percent of the single outstanding class of S stock.* (ii) If Subsidiary has more than one class of stock outstanding, submit the following REPRESENTATION: *P, on the date of adoption of the plan of liquidation, and at all times until the final liquidating distribution is completed, will be the owner of at least 80 percent of the total combined voting power of all classes of stock of S entitled to vote and the owner of at least 80 percent of the total value of all classes of stock (excluding nonvoting stock that is limited and preferred as to dividends and otherwise meets the requirements of section 1504(a)(4) of the Code).*

Applicability of section 338

(6) State whether the acquisition of Subsidiary stock by Parent constituted a "qualified stock purchase" (QSP) within the meaning of section 338(d)(3) of the Code, and, if so, whether any elections under section 338 were made with respect to such acquisition.

QSP of Subsidiary affiliate

(A) State whether Parent made a qualified stock purchase of any Subsidiary target affiliate (as defined in section 338(h)(6) of the Code) during the consistency period defined in section 338(h)(4), and, if so, whether Parent made any elections under section 338 with respect to its acquisition of the affiliate stock. See Rev. Proc. 89-40, 1989-2 C.B. 453.

Deemed section 338 election

(B) State whether Parent acquired any asset of Subsidiary or a Subsidiary target affiliate (as defined in section 338(h)(6) of the Code) during the consistency period defined in section 338(h)(4). See section 338(e).

Prior redemptions

3. Provide information as to prior redemptions.

Redemptions within 3 years

(a) If shares of Subsidiary stock have been redeemed during the 3 years preceding the adoption of the plan of complete liquidation of Subsidiary, state the number of shares of Subsidiary stock redeemed, the dates of the redemptions, the number of shares of stock of both Subsidiary and Parent owned by the redeemed shareholders at the time of the redemptions, and the property distributed in exchange for the stock.

No redemption within 3 years

(b) If no shares of Subsidiary stock will have been redeemed during this 3-year period, submit the following REPRESENTATION: *No shares of S stock will have been redeemed during the 3 years preceding the adoption of the plan of complete liquidation of S.*

Facts showing complete liquidation

.03 *Facts necessary to show complete liquidation.*

Adoption of plan of liquidation

1. Specify all dates relevant to determining the date of adoption of the plan of liquidation, including dates of any of the following actions: (i) adoption by the directors or shareholders of Subsidiary of a resolution authorizing Subsidiary to distribute all (or substantially all) its assets; (ii) formal adoption by Subsidiary's shareholders of a plan of complete liquidation (or a plan of merger of Subsidiary into Parent); (iii) filing with the District Director of Form 966 (and any supplement or amendment thereto) as required by section 1.6043-1(a) of the regulations; and (iv) recordation of relevant actions in Subsidiary's official record books. State whether Parent or Subsidiary took any action (including entering into negotiations or agreements) prior to the formal shareholder adoption of the plan that could be interpreted as indicating a prior informal adoption of a plan of liquidation for Subsidiary. See Rev. Rul. 75-521, 1975-2 C.B. 120; Rev. Rul. 70-106, 1970-1 C.B. 70; Rev. Rul. 65-235, 1965-2 C.B. 88.

Distributions in liquidation.

2. Give the dates of the first and the final liquidating distributions. If all distributions will occur within a single taxable year, submit the following REPRESENTATION: *All distributions from S to P pursuant to the plan of complete liquidation will be made within a single taxable year of S.* Alternatively, if all distributions will not be made within a single taxable year of Subsidiary, submit the following REPRESENTATION: *S has adopted a plan of liquidation specifying that the final liquidating distribution is to be completed within 3 years from the close of the taxable year of S in which the first liquidating distribution is made.* See section 332(b)(3) of the Code and section 1.332-4(a)(1) of the regulations. See section 5.02(2) of this revenue procedure as to submission of a copy of the plan of liquidation.

Status of liquidation

3. Submit the following REPRESENTATION: *As soon as the first liquidating distribution has been made, S will cease to be a going concern and its activities will be limited to winding up its affairs, paying its debts, and distributing its remaining assets to its shareholders.*

Dissolution of Subsidiary

4. Provide facts as to dissolution of Subsidiary.

Redemption and cancellation of Subsidiary stock

(a) State whether all the stock in Subsidiary will be redeemed and cancelled and Subsidiary dissolved. If not, give reasons.

Will Subsidiary retain assets

(b) State whether Subsidiary will retain any assets following the final liquidating distribution.

No assets retained by Subsidiary

(1) If no assets will be retained, submit the following REPRESENTATION: *S will retain no assets following the final liquidating distribution.*

Some assets retained by Subsidiary

(2) If assets are to be retained, state the nature of the assets, their fair market value, the maximum length of time they will be retained, the purpose for retention, and whether this same purpose could have been achieved equally well and with no significant additional cost or difficulty through use of other means such as a liquidating trust. See Rev. Rul. 80-150, 1980-1 C.B. 316, and Rev. Rul. 72-137, 1972-1 C.B. 101.

Charter and minimum capital retained by Subsidiary

(3) State whether Subsidiary will retain minimum assets and remain in existence for the purpose of either retaining its corporate identity and/or selling its corporate charter.

Subsidiary charter, legal existence, etc. to be preserved

(A) If Parent will retain the stock of Subsidary with Subsidiary remaining in existence and retaining a nominal amount of assets solely for the purpose of preserving Subsidiary's legal existence, its corporate identity, and/or its corporate charter, explain why this is necessary and submit the following REPRESENTATION: *S will remain in existence as an inactive subsidiary of P solely for the purpose of enabling P to protect the corporate charter, legal existence, and/or identity of S. S will retain its corporate charter and only those assets required under local law to maintain corporate existence (minimum capital). S will engage in no activity other than action required under local law to preserve its charter, legal existence, and/or identity.* See section 1.332-2(c) of the regulations.

Subsidiary charter to be sold

(B) If Parent will retain the stock of Subsidiary solely for the purpose of selling Subsidiary's corporate charter, comply with these three requirements.

(i) Describe the assets being retained, why it is necessary for Subsidiary to retain them, and submit the following REPRESENTATION: *S will retain its corporate charter and only those assets required under local law to maintain corporate existence (minimum capital).*

(ii) Describe fully the expected sale by Parent of the Subsidiary stock and furnish the name of the acquiring party, and the consideration expected to be received. Submit the following REPRESENTATION: *The sole reason that S will not be dissolved under local law is to isolate the value of S's charter for resale to a purchaser that is not related to S, P, or their shareholders. For purposes of this representation a purchaser that is not related is a purchaser that does not own, actually or constructively pursuant to section 318(a) of the Code as modified by section 304(c)(3), any stock of S or P or their shareholders.*

(iii) Describe whether the sale of the charter will be accompanied by the sale or dissolution of Subsidiary and submit the following REPRESENTATION: *As soon as reasonably possible, and in any event within no more than 12 months from the date of the final liquidating distribution, S will be dissolved under local law or sold to an unrelated purchaser.*

Constructive distribution and reincorporation in New Subsidiary

(C) If Subsidiary will remain in existence and retain its corporate charter and only those assets necessary to maintain its corporate existence for either of the purposes specified in (A) and (B) above, then to comply with the complete-liquidation requirement of section 332(a) of the Code and the distribution-of-all-the-property requirement of section 332(b)(2) and (3), the assets retained by Subsidiary will be treated as having been distributed to Parent in the final liquidating distribution and then transferred by Parent to a new corporation. See Rev. Proc. 89-50, 1989-2 C.B. 631, which indicates that such a deemed distribution and reincorporation is consistent with established law regarding *de facto* dissolutions. Submit the following REPRESENTATION: *S and P will treat the charter and minimum capital as distributed to P in the final liquidating distribution and then contributed by P to the capital of a new corporation (New S). S will be treated for federal tax purposes as New S and will obtain a new employer identification number.*

Transfers of assets

.04 Transfers of assets to and from Subsidiary.

Acquisitions of assets by Subsidiary in nontaxable transactions

1. If Subsidiary will not have acquired any assets in a non-taxable transaction, except for acquisitions occurring more than 3 years prior to adoption of the liquidation plan, submit the following REPRESENTATION: *S will not have acquired assets in any nontaxable transaction at any time, except for acquisitions occurring more than 3 years prior to the date of adoption of the plan of liquidation.* Alternatively, if Subsidiary will have acquired assets in a nontaxable transaction during this 3-year period, provide full details.

Dispositions of Subsidiary assets

2. Submit the following REPRESENTATION: *No assets of S have been, or will be, disposed of by either S or P except for dispositions in the ordinary course of business and dispositions occurring more than 3 years prior to adoption of the plan of liquidation.* Alternatively, if any Subsidiary assets have been or will be disposed of by either Subsidiary or Parent, other than in the ordinary course of business, briefly describe the transaction and furnish the following:

(i) Name of acquiring party;

(ii) Description of the assets;

(iii) Consideration received.

Description of overlapping stock ownership in Subsidiary and another coporation receiving Subsidiary's assets

3. If, in the liquidation or in the 3-year period prior thereto, any assets of Subsidiary will have been acquired by a corporation, other than Parent, except by sales in the normal course of business, set forth the number of shares and the percentage of each class of the acquiring corporation's stock owned actually and constructively (within the meaning of section 318 of the Code as modified by section 304(c)(3)) by Subsidiary, Parent, and Parent's shareholders, and the number of shares and the percentage of each class of Parent stock owned actually and constructively by the acquiring corporation and its shareholders.

No liquidation-reincorporation

4. Submit the following REPRESENTATION: *The liquidation of S will not be preceded or followed by the reincorporation in, or transfer or sale to, a recipient corporation (Recipient) of any of the businesses or assets of S, if persons holding, directly or indirectly, more than 20 percent in value of the S stock also hold, directly or indirectly, more than 20 percent in value of the stock in Recipient. For purposes of this representation, ownership will be determined by application of the constructive ownership rules of section 318(a) of the Code as modified by section 304(c)(3).*

Distributions to Parent prior to adoption of liquidation plan

5. Describe prior distributions to Parent.

Distributions in normal course

(a) If prior distributions were made only in the normal course of business, submit the following REPRESENTATION: *Prior to adoption of the liquidation plan, no assets of S will have been distributed in kind, transferred, or sold to P, except for (i) transactions occuring in the normal course of business and (ii) transactions occuring more than 3 years prior to adoption of the liquidation plan.*

Other distributions

(b) If there will have been asset transfers not meeting the representation in (a) above, describe the assets so transferred, including their bases and fair market value, the transaction in which they were transferred, the date of transfer, and the reason for the transaction.

Unreported income of Subsidiary

6. Provide facts showing that Subsidiary holds no assets representing earned but unreported income, or submit the following REPRESENTATION: *S will report all earned income represented by assets that will be distributed to its shareholders such as receivables being reported on a cash basis, unfinished construction contracts, commissions due, etc.*

Liabilities of Subsidiary

.05 *Liabilities.*

Solvency

1. In order to demonstrate solvency, submit the following REPRESENTATION: *The fair market value of the assets of S will exceed its liabilities both at the date of the adoption of the plan of complete liquidation and immediately prior to the time the first liquidating distribution is made.*

Intercorporate indebtedness

2. State the amount and provide complete details concerning the debt, if any, owed by Subsidiary to Parent or by Parent to Subsidiary, how and when it was created, the cost and tax basis of the creditor, and how debts have been or will be cancelled, forgiven, or discounted during the period commencing 3 years prior to adoption of the plan of liquidation (or since the initial acquisition by Parent of stock of Subsidiary, if that is later) and ending with the final liquidating distribution. If no intercorporate debt exists and none has been cancelled, forgiven, or discounted, submit the following REPRESENTATION: *There is no intercorporate debt existing between P and S and none has been cancelled, forgiven, or discounted, except for transactions that occurred more than 3 years prior to the date of adoption of the liquidation plan (or, alternatively, if such date is later) except for transactions occurring prior to the date P initially acquired S stock.*

Tax-exempt Parent

.06 *State whether or not Parent is tax-exempt.*

Not tax-exempt

1. If Parent is not tax-exempt, submit the following REPRESENTATION: *P is not an organization that is exempt from federal income tax under section 501 or any other provision of the Code.*

Tax-exempt exceptions

2. If Parent is tax-exempt, is an exception to section 337(b)(2)(A) of the Code applicable (i) as a result of Parent being a cooperative described in section 521, or (ii) as a result of the income from the distributed property being subject to tax under section 511(a)?

Distribution to minority shareholders of Subsidiary

.07 *If Subsidiary has minority shareholders, provide additional material as indicated below.*

Pro rata distribution at fair market value

1. If the distribution is pro rata, submit the following REPRESENTATION: *The fair market value of the consideration received by P and by the minority shareholders for each share of S stock will approximately equal the fair market value of that stock.* Alternatively, if the distribution is not pro rata, explain why the Service should not treat the transaction as a pro rata distribution followed by an intershareholder transfer of the non-pro-rata portion. See Rev. Rul. 79-10, 1979-1 C.B. 140.

Statutory merger involving minority shareholders

2. State whether, and explain the reasons why, it is expected that the transaction will constitute a statutory merger with regard to minority shareholders.

Treatment of minority

(a) If rulings are requested as to the tax treatment of minority shareholders, as a result of the transaction constituting a statutory merger, provide a brief description of the assets being distributed to minority shareholders and submit the requisite information and representations (see Rev. Proc. 77-37, 1977-2 C.B. 568, as amplified by Rev. Proc. 86-42, 1986-2 C.B. 722).

Treatment of Subsidiary, section 361(c)(1) applicability

(b) Explain why it is expected that section 361(c)(1) of the Code will, or will not, apply to the distribution by Subsidiary to its minority shareholders. State whether the property distributed to the minority shareholders includes property other than "qualified property" within the meaning of section 361(c)(2)(B).

Distributions taxable to Subsidiary

3. If the distribution to the minority shareholders is taxable (as a liquidation under section 331 of the Code to which section 336 applies or as a reorganization under section 368 to which section 361(c)(1) does not apply), provide information as follows.

Description of assets distributed to minority

(a) Provide relevant details concerning the amount and kind of assets to be distributed to minority shareholders in exchange for their Subsidiary stock. State which of these assets has a fair market value greater than its basis in the hands of Subsidiary. State whether Subsidiary is distributing to its minority shareholders (i) any installment obligations (section 453B of the Code), (ii) any property described in the recapture provisions of the Code, including (but not limited to) sections 47, 291(a), 341(f), 617(d), 897(d), 904(f), 1245(a), 1248(f), 1250(c), 1252(a), 1254, or 1255, (iii) any property for which Subsidiary obtained a deduction (see *Hillsboro National Bank v. Commissioner,* 460 U.S. 370 (1983), 1983-1 C.B. 50; Rev. Rul. 85-186, 1985-2 C.B. 84; Rev. Rul. 74-396, 1974-2 C.B. 106; Rev. Rul. 61-214, 1961-2 C.B. 60); or (iv) any property described in sections 1256 or 1276.

Installment obligations

(b) If installment obligations will be distributed, describe the nature and terms of the obligations. State how the shareholders intend to treat payments received on the installment obligations. State the effect of sections 453(h) and 453B(d) of the Code on Subsidiary's distribution.

Assets-distributed representation

(c) Delete any inapplicable provisions and then submit the applicable portion of the following REPRESENTATION: *None of the assets being distributed by S to the minority shareholders (i) has a fair market value greater than its basis in the hands of S, (ii) is an installment obligation, (iii) is property described in the recapture provisions of the Code, or (iv) is property for which S obtained a deduction.*

PART II—GENERAL

SEC. 5. GENERAL INSTRUCTIONS TO, AND INFORMATION FOR, TAXPAYERS

Related transactions

.01 *Discuss impact of related transactions.* State whether there have been, or will be, any related transactions, and, if so, briefly describe these other transactions and fully explain their relationship to, and impact on, the present transaction. See section 3.07 of Rev. Proc. 90-1. Other than transfers already discussed in the ruling request, have there been, or will there be, any transfers of assets between Parent and Subsidiary? Even if a transaction is thought to be unrelated, a brief description of the transaction should be submitted if (i) it involves Parent, Subsidiary, or a direct or indirect subsidiary of Subsidiary, and (ii) it occurs contemporaneously with, or in conjuction with, the proposed liquidation of Subsidiary. For instance, describe any plan or intent to merge or liquidate Parent. Submit the following REPRESENTATION: *All other transactions undertaken contemporaneously with, in anticipation of, in conjunction with, or in any way related to, the proposed liquidation of S have been fully disclosed.*

Documents to be submitted with request

.02 *Submit copies of all relevant documents.*

Financial information

1. Submit the latest separate balance sheets for both Subsidiary and Parent.

Plan of complete liquidation

2. Submit a copy of the plan of liquidation of Subsidiary, and all amendments thereto. Alternatively, state why a copy is not available. If the plan of liquidation will not be reduced to writing, explain why and the Service should consider the plan to be adopted. See section 1.332-6 of the regulations.

Additional statements required, including penalties of perjury and proposed section 6110 deletions

.03 *See Rev. Proc. 90-1, or its successor, dealing with generally applicable procedural requirements.* In accord with Rev. Proc. 90-1, provide additional information and statements that must be submitted with all ruling requests, including statements required relating to penalties of perjury and relating to deletions under section 6110 of the Code.

Taxpayer to state every ruling in precisely the desired language

.04 *List every ruling being requested.* For each requested ruling state the ruling in exactly the language desired in the issued ruling letter and provide the Code and regulation sections or other authority supporting issuance of the ruling.

Taxpayer to submit legal memorandum

.05 *Submit legal memorandum.* See section 3.14 of Rev. Proc. 90-1, or its successor, requiring the taxpayer to (i) state the taxpayer's view as to the tax result of the transaction, (ii) explain the legal grounds for this result, and (iii) describe the relevant legal authorities. In order to facilitate an early resolution of problems, taxpayers are advised that if they are taking a position that either lacks substantial authority or is contrary to the published position of the Service, they are encouraged to disclose this in the memorandum.

SEC. 6. COMMENTS OR INQUIRIES

Comment or inquiries regarding this revenue procedure should refer to its number and should be addressed to the Associate Chief Counsel (Technical), Attention: CC:CORP:5, Internal Revenue Service, Washington, D.C. 20224.

SEC. 7. EFFECT ON OTHER DOCUMENTS

Rev. Proc. 81-68 is superseded.

---

26 CFR 601.201: Rulings and determination letters.
(Also Part I, Section 1504; 1.1504-1.)

Rev. Proc. 90-53

SECTION 1. PURPOSE

.01 This revenue procedure grants certain taxpayers a waiver of the general rule of section 1504(a)(3)(A) of the Internal Revenue Code, which generally provides that a corporation that ceased to be a member of a consolidated group is prohibited from being included in a consolidated return of that group (or of another affiliated group with the same common parent) for five years after the corporation ceased to be a member of the group.

.02 If a corporation qualifies to use this revenue procedure, then this revenue procedure is the exclusive procedure available for obtaining a waiver of the general rule of section 1504(a)(3)(A) of the Code.

SEC. 2. BACKGROUND

.01 Section 60 of the Tax Reform Act of 1984, 1984-3 (Vol. 1) C.B. 1, 85, amended section 1504(a) of the Code by, among other things, adding section 1504(a)(3).

.02 Section 1504(a)(3)(A) of the Code provides that (1) if a corporation is included (or required to be included) in a consolidated return filed by an affiliated group for a taxable year which includes any period after December 31, 1984, and (2) the corporation ceases to be a member of the affiliated group in a taxable year beginning after December 31, 1984, the corporation (and any successor of the corporation) may not be included in any consolidated return filed by the affiliated group (or by another affiliated group with the same common parent or a successor of the common parent) before the 61st month beginning after its first taxable year in which it ceased to be a member of the affiliated group.

.03 Section 1504(a)(3)(B) of the Code provides that the Secretary may waive the application of section 1504(a)(3)(A) to any corporation for any period subject to such conditions as the Secretary may prescribe.

SEC. 3. APPLICATION

In accordance with section 1504(a)(3)(B) of the Code, a waiver is hereby granted to any corporation described in section 4 of this revenue procedure that complies with the requirements set forth in sections 5 and 6 of this revenue procedure so that the corporation may join in the filing of a consolidated return with the affiliated group of which it is a member.

SEC. 4. SCOPE

.01 This revenue procedure applies to any corporation (1) that was a member of a consolidated group, (2) that subsequently ceased to be a member of the group, and (3) that rejoined the *same* group before the 61st month beginning after its first taxable year in which it ceased to be a member of the group. For purposes of this revenue procedure, the *same* group means a group that remains in existence within the meaning of section 1.1502-75(d) of the Income Tax Regulations.

.02 This revenue procedure also applies to any corporation that was a member of a consolidated group (the old group) and that ceased to be a member of the old group solely as a result of a transaction in which

(1) A nonmember corporation acquired the assets of the common parent of the old group in a reorganization described in section 368(a)(1)(A), (C), or (D) of the Code (but only if the requirements of section 354(b)(1)(A) and (B) are met) and, immediately after the acquisition, the acquiring corporation is the common parent of another affiliated group (the new group) or

(2) a member of the old group acquired (a) the assets of a nonmember corporation in a reorganization described in section 368(a)(1)(A), (C), or (D) (but only if the requirements of section 354(b)(1)(A) and (B) are met) or (b) the stock of a nonmember corporation, and the acquisition was a reverse acquisition described in section 1.1502-75(d)(3) of the regulations in which the old group ceased to exist.

This section 4.02 only applies if all the members of the old group (other than the common parent if its assets are acquired) immediately before the acquisition are members of the new group immediately after the acquisition.

.03 Section 1504(a)(3)(A) and this revenue procedure do not apply to any corporation (including the common parent) that was a member of a consolidated group (the old group) and that ceased to be a member of the old group solely because of the acquisition of

(1) the assets of the common parent of the old group by a member other than the common parent of another affiliated group (the new group) or

(2) the stock of the common parent of the old group.

Section 1504(a)(3)(A) does not apply to these situations because the common parent of the new group neither was the common parent of the old group nor is a successor of the common parent of the old group, and therefore a waiver is not required to join in the filing of a consolidated return of the new group. If the new group filed (or was required to file) a consolidated return for the taxable year immediately preceding the year of the acquisition, the new group is required to file a consolidated return for the year of acquisition that includes the members acquired from the old group, unless it has obtained consent to an election to discontinue filing consolidated returns under section 1.1502-75(c) of the regulations. In the case of a corporation described in both section 4.01 and this section 4.03, however, a waiver is necessary. For example, if a corporation (S) was a member of a consolidated group

(Group P) and all the stock of S was purchased by the common parent (X) of another consolidated group (Group X), and subsequently, all the stock of X was purchased by P, a waiver is required in order for S to be permitted to join in the filing of a consolidated return with Group P.

.04 A waiver will be granted pursuant to this revenue procedure only to a corporation which (pursuant to this revenue procedure) joins in the filing of a consolidated return beginning with the taxable year of the affiliated group in which the corporation rejoins (or, in the case of a transaction described in section 4.02, joins) the affiliated group.

SEC. 5. MANNER OF ACQUIRING A WAIVER UNDER SECTION 1504(a)(3)(B) OF THE CODE

.01 The common parent of the affiliated group of which the corporation seeking the waiver is a member must attach a statement to the consolidated return of the group, filed under penalties of perjury, which includes all the information set forth in section 5.02. However, in the case of a corporation described solely in section 4.02 of this revenue procedure, the statement must include only the information set forth in section 5.02(1), (2), (3), (5), and (6).

.02 The information required under section 5.01 of this revenue procedure is as follows:

(1) The following heading typed or legibly printed at the top of the statement: "WAIVER OF THE APPLICATION OF SECTION 1504(a)(3) FILED PURSUANT TO REV. PROC. 90-53";

(2) The name, address, and employer identification number of the corporation for which the waiver is requested;

(3) The year in which the consolidated group of which the corporation is now a member elected to file consolidated returns;

(4) The date on which the corporation ceased to be a member of the consolidated group;

(5) The date on which the corporation rejoined (or, in the case of a corporation described in section 4.02, joined) the affiliated group;

(6) A description of the manner by which the corporation ceased to be a member of the consolidated group and the manner by which the corporation joined the new group or rejoined the same group (redemption of stock, new issuance of stock, *etc.*). This statement should include the business purpose of the transactions that caused the disaffiliation and reaffiliation and whether the transactions were with a related party;

(7) The taxable income of the consolidated group for (a) the taxable year prior to the taxable year in which the corporation left the consolidated group, (b) the taxable year in which the corporation left the consolidated group, (c) all taxable years subsequent to the taxable year in which the corporation left the consolidated group but before the corporation rejoined the consolidated group, and (d) the taxable year in which the corporation rejoined the consolidated group;

(8) The taxable income, or separate taxable income as defined in section 1.1502-12 of the regulations, as the case may be, of the corporation for all periods described in section 5.02(7);

(9) An analysis of the effect of the disaffiliation and reconsolidation on the consolidated group and the corporation for all periods described in section 5.02(7) on the following items:

(a) Taxable income;

(b) Deferred gains and losses;

(c) Excess loss accounts;

(d) Tax liability;

(e) Net operating loss carryovers;

(f) Capital loss carryovers; and

(g) Investment and foreign tax credits; and

(10) A representation that neither the consolidated group, the corporation, nor any other person will secure or has secured the benefit of a reduction in income, increase in loss, or any other deduction, credit, or allowance that it would not otherwise secure or have secured had the disaffiliation and reconsolidation not occurred, including, but not limited to, the use of a net operating loss or credit that would have otherwise expired.

SEC. 6. EFFECT OF WAIVER

.01 A waiver under section 1504(a)(3)(B) of the Code granted pursuant to this revenue procedure is binding on the consolidated group upon the filing of the consolidated return which includes the statement required by section 5.01 and may not be revoked by the taxpayer. The waiver shall be binding for all subsequent taxable years after the granting of the waiver in which the corporation remains a member of the consolidated group, unless permission is granted under section 1.1502-75(c)(3) of the regulations for the entire group to cease filing a consolidated return.

.02 Notwithstanding section 6.01, if it is determined that the information provided pursuant to this revenue procedure is incorrect, the Service may revoke the waiver granted pursuant to this revenue procedure at any time. The revocation will be effective beginning with the first taxable year for which the waiver was granted.

SEC. 7. TIME FOR FILING A REQUEST FOR WAIVER UNDER SECTION 1504(a)(3)(B) OF THE CODE

A request for waiver under section 1504(a)(3)(B) of the Code pursuant to this revenue procedure must be attached to the consolidated return of the affiliated group filed on or before the due date (including extensions of time) of the consolidated return.

SEC. 8. CORPORATIONS OUTSIDE THE SCOPE OF THE REVENUE PROCEDURE OR WHICH CANNOT SATISFY ITS REQUIREMENTS

If a corporation either is outside the scope of this revenue procedure or cannot satisfy its requirements, a waiver under section 1504(a)(3)(B) of the Code must be requested in a ruling request filed in accordance with Rev. Proc. 90-1, 1990-1 C.B. 356, by the common parent of the affiliated group of which the corporation is now a member on or before the due date (including extensions of time) of the consolidated return of the affiliated group for the tax year with respect to which the waiver is requested. The ruling request should include the information set forth in section 5.02 of this revenue procedure. *See* Rev. Proc. 90-17, 1990-1 C.B. 479, for information regarding user fees.

SEC. 9. EFFECTIVE DATE

This revenue procedure is effective for any group for which the due date (including extensions of time) of its consolidated return for the taxable year of the group in which the corporation rejoins (or, in the case of a transaction described in section 4.02, joins) the group is on or after October 15, 1990, the date of publication of this revenue procedure in the Internal Revenue Bulletin.

26 CFR 601.201: Rulings and determination letters.

Rev. Proc. 90-54

SECTION 1. BACKGROUND

Rev. Proc. 90-3, 1990-1 C.B. 402, sets forth areas under the jurisdiction of the Associate Chief Counsel (Technical) in which advance rulings or determination letters will not be issued by the Service. Section 3 of Rev. Proc. 90-3 is entitled "Areas In Which Rulings or Determination Letters Will Not Be Issued."

SEC. 2. PROCEDURE

Rev. Proc. 90-3 is amended by adding to section 3 the following new paragraphs:

Section 125.—Benefits Under a Cafeteria Plan—Whether amounts used to provide group-term life insurance under section 79, accident and health benefits under sections 105 and 106, and dependent care assistance program under section 129 are includible in the gross income of participants and considered "wages" for purposes of sections 3401, 3121 and 3306 when the benefits are offered through a cafeteria plan.

Section 425.—Substitution or Assumption of Incentive Stock Options—Whether the substitution of a new Incentive Stock Option ("ISO") for an old ISO, or the assumption of an old ISO, by an employer by reason of a corporate transaction constitutes a modification which results in the issuance of a new option by reason of failing to satisfy the spread test requirement of section 425(a)(1) of the Code or the ratio test requirement of section 1.425-1(a)(4) of the regulations. We will continue to rule on the issue of whether the new ISO or the assumption of the old ISO gives the employee additional benefits not present under the old option within the meaning of section 425(a)(2).

SEC. 3. EFFECTIVE DATE

This revenue procedure applies to all ruling requests received by the Service on or after the date of publication of this revenue procedure in the Internal Revenue Bulletin.

SEC. 4. EFFECT ON OTHER REVENUE PROCEDURES

Rev. Proc. 90-3 is amplified.

26 CFR 601.105: Examination of returns and claims for refund, credit, or abatement; determination of correct tax liability.
(Also Part I, Section 911; 1.911-1.)

Rev. Proc. 90-55

SECTION 1. PURPOSE

.01 This revenue procedure provides information to any individual who fails to meet the foreign residency requirements of section 911(d)(1) of the Internal Revenue Code for eligibility for the exclusion from gross income under section 911(a) of foreign earned income and housing cost amounts because adverse conditions in a foreign country precluded the individual from meeting those requirements.

.02 Rev. Proc. 86-39, 1986-2 C.B. 701, which supplements Rev. Proc. 81-23, 1981-1 C.B. 693, lists countries for which the foreign residency requirements of section 911(d)(1) of the Code are waived under section 911(d)(4) because of adverse conditions in those countries during the time periods stated. This revenue procedure relists countries where the adverse conditions are still in effect, adds countries where periods of adverse conditions occurred after the publication of the list in Revenue Procedure 86-39, and removes countries where the adverse conditions ended before the publication of Rev. Proc. 86-39. Rev. Proc. 86-39 and Rev. Proc. 81-23 remain in full force and effect; the older periods listed therein are omitted from this revenue procedure solely for brevity, because they now apply to few open year returns.

SEC. 2. BACKGROUND

.01 Section 911(a) of the Code allows foreign earned income and housing cost amounts to be excluded from the gross income of a "qualified individual" as defined in section 911(d)(1).

.02 Section 911(d)(1) of the Code defines the term "qualified individual" as an individual whose tax home is in a foreign country and who is (A) a citizen of the United States and establishes to the satisfaction of the Secretary of the Treasury that the individual has been a bona fide resident of a foreign country or countries for an uninterrupted period that includes an entire taxable year, or (B) a citizen or resident of the United States who, during any period of 12 consecutive months, is present in a foreign country or countries during at least 330 full days.

.03 Section 911(d)(4) of the Code provides an exception to the residency requirements of section 911(d)(1). An individual who for any period is a bona fide resident of, or is present in, a foreign country, and who leaves that foreign country after August 31, 1978, will be treated as a qualified individual with respect to the period the individual was a bona fide resident of, or was present in, the foreign country if the departure occurred during a period for which the Secretary of the Treasury, after consultation with the Secretary of State, determines that individuals were required to leave the foreign country because of war, civil unrest, or similar adverse conditions in the foreign country that precluded the normal conduct of business by those individuals. An individual must establish that but for those conditions the individual could reasonably have been expected to meet the residency requirements. Further, an individual must have established residency or have been physically present in the foreign country on or prior to the date that the Secretary of Treasury determines that individuals were required to leave the foreign country. Individuals who establish residency or are first physically present in the foreign country after the date that the Secretary prescribes, but during the period for which the Secretary determines that individuals were required to leave the foreign country, shall not be treated as quali-

fied individuals under section 911(d)(4).

.04 For purposes of section 911 of the Code, an individual who left one of the following countries during the specified period shall be treated as a qualified individual with respect to the period during which that individual was a bona fide resident of, or present in, that foreign country if the individual establishes a reasonable expectation of meeting the requirements of section 911(d) but for those conditions.

Country	*On or After*	*On or before*
Afghanistan	April 23, 1979	(still in effect)
Burma	September 9, 1988	October 24, 1988
China	June 7, 1989	August 9, 1989
Colombia	November 13,1984	April 25, 1988
	August 29, 1989	November 22, 1989
El Salvador	September 24, 1979	July 31, 1988
Haiti	April 30, 1987	February 26, 1988
Iran	September 1, 1978	(still in effect)
Iraq	August 31, 1979	January 1, 1987
	August 3, 1990	(still in effect)
Kuwait	August 3, 1990	(still in effect)
Lebanon	August 31, 1979	(still in effect)
Liberia	June 1, 1990	(still in effect)
Libya	August 31, 1979	(still in effect)
Panama	May 12, 1989	November 6, 1989
Peru	July 3, 1986	April 2, 1988
Sudan	October 17, 1985	November 26, 1986
Yemen	August 20, 1990	(still in effect)

SEC. 3. INQUIRIES

A taxpayer who needs assistance on how to claim this exclusion, or on how to file an amended return, should contact a local IRS Office or, for a taxpayer residing or traveling outside the United States, the nearest overseas IRS office.

---

26 CFR 601.201: Rulings and determination letters.
(Also Part I, Sections 351, 368; 1.351-1, 1.368-2.)

Rev. Proc. 90-56

SECTION 1. BACKGROUND

Section 3 of Rev. Proc. 90-3, 1990-1 C.B. 402, lists areas of the Internal Revenue Code under the jurisdiction of the Associate Chief Counsel (Technical) in which the Internal Revenue Service will not issue advance rulings or determination letters. To enable the Service to use its resources more efficiently, this revenue procedure adds several no-rule areas to the list, including most holding company formations, acquisitive mergers, and reorganizations under section 368(a)(1)(F).

SEC. 2. PROCEDURE

Rev. Proc. 90-3 is amplified by adding the following to section 3.01:

Section 351. — Transfer to Corporation Controlled By Transferor. — Whether section 351 of the Code applies to an exchange of stock for stock in the formation of a holding company, and whether the taxpayer is subject to the consequences of qualification under that section (such as nonrecognition and basis consequences) that are adequately addressed by a statute, regulation, decision of the Supreme Court, tax treaty, revenue ruling, revenue procedure, notice, or other authority published in the Internal Revenue Bulletin.

For purposes of this provision, if such an exchange qualifies under both section 351 and another corporate restructuring provision and the other provision is not covered by this revenue procedure, the Service will treat any request for a qualification ruling under the other provision as a request for a qualification ruling under section 351. A taxpayer or the taxpayer's representative (as the Service deems appropriate) seeking a qualification ruling for such an exchange under any such other provision must accordingly state that to the best of his/her knowledge and belief the exchange does not qualify under section 351.

The Service will not rule on the qualification of an exchange of stock under section 351, even if it is an integral part of a larger transaction that involves other issues upon which the Service will rule and it is impossible to determine the tax consequences of the larger transaction without making a determination with regard to the exchange of stock. However, in such event, the Service will rule on the tax consequences of the larger transaction, provided the taxpayer or the taxpayer's representative (as the Service deems appropriate) represents that to the best of his/her knowledge and belief the exchange will (or will not) qualify under section 351. If the Service issues a ruling on the larger transaction the ruling will state that no opinion is expressed as to whether or not the exchange qualifies under section 351.

Section 368(a)(1)(A). — Definitions Relating to Corporate Reorganizations. — Whether a transaction constitutes a corporate reorganization within the meaning of section 368(a)(1)(A) of the Code, including a transaction that qualifies under section 368(a)(1)(A) by reason of section 368(a)(2)(D) or section 368(a)(2)(E), and whether the taxpayer is subject to the consequences of qualification under that section (such as nonrecognition and basis consequences) that are adequately addressed by a statute, regulation, decision of the Supreme Court, tax treaty, revenue ruling, rev-

enue procedure, notice, or other authority published in the Internal Revenue Bulletin.

For purposes of this provision, if a transaction qualifies under both section 368(a)(1)(A) and another corporate restructuring provision other than section 368(a)(1)(G), and the other provision is not covered by this revenue procedure, the Service will treat any request for a qualification ruling under the other provision as a request for a qualification ruling under section 368(a)(1)(A). A taxpayer or the taxpayer's representative (as the Service deems appropriate) seeking a qualification ruling under any such other provision must accordingly state that to the best of his/her knowledge and belief the transaction does not qualify under section 368(a)(1)(A). The Service will continue to rule on transactions that qualify under section 368(a)(1)(G), even if they also qualify under section 368(a)(1)(A).

The Service will not rule on the qualification of a reorganization under section 368(a)(1)(A), even if it is an integral part of a larger transaction that involves other issues upon which the Service will rule and it is impossible to determine the tax consequences of the larger transaction without determining the tax consequences of the reorganization. However, in such event, the Service will rule on the tax consequences of the larger transaction, provided the taxpayer or the taxpayer's representative (as the Service deems appropriate) represents that to the best of his/her knowledge and belief the reorganization will (or will not) qualify under section 368(a)(1)(A). If the Service issues a ruling on the larger transaction the ruling will state that no opinion is expressed as to whether or not the reorganization qualifies under section 368(a)(1)(A). For example, the Service will not rule on whether a transaction constitutes a corporate reorganization within the meaning of section 368(a)(1)(A), even if the larger transaction also involves the issue of whether a prior distribution of stock in a subsidiary containing assets unwanted by the acquiring corporation qualifies under section 355. See Rev. Rul. 78-251, 1978-1 C.B. 89. However, in such event, if the taxpayer or the taxpayer's representative (as the Service deems appropriate) represents that the merger qualifies under section 368(a)(1)(A), the Service will rule as to whether the prior stock distribution qualifies under section 355. Such ruling will state that no opinion is expressed as to whether or not the reorganization qualifies under section 368(a)(1)(A).

Additionally, the Service will have the discretion to rule on significant subissues that must be resolved to determine whether the transaction qualifies under section 368(a)(1)(A) (including transactions qualifying by reason of section 368(a)(2)(D) or section 368(a)(2)(E)). However, the Service will only rule on such subissues if in the view of the Service they are significant and not clearly and adequately addressed by a statute, regulation, decision of the Supreme Court, tax treaty, revenue ruling, revenue procedure, notice, or other authority published in the Internal Revenue Bulletin. To obtain a ruling on such a subissue, the taxpayer must explain the significance of the subissue, set forth the authorities most closely related to the subissue, and explain why the subissue is not resolved by these authorities. The taxpayer or the taxpayer's representative (as the Service deems appropriate) will also be required to state that to the best of his/her knowledge and belief the transaction will (or will not) qualify under section 368(a)(1)(A) if the Service rules as the taxpayer proposes on the subissue. Taxpayers may seek a presubmission conference to determine whether a subissue ruling can be obtained under this section. *See* sections 6.08 and 16.01, Rev. Proc. 90-1, 1990-1 C.B. 356, 373, 380. If the Service issues a ruling on a subissue the ruling will state that no opinion is expressed as to whether or not the transaction in question qualifies under section 368(a)(1)(A).

Section 368(a)(1)(B). — Definitions Relating to Corporate Reorganizations. — Whether the acquisition of stock in the formation of a holding company constitutes a corporate reorganization within the meaning of section 368(a)(1)(B) of the Code, and whether the taxpayer is subject to the consequences of qualification under that section (such as nonrecognition and basis consequences) that are adequately addressed by a statute, regulation, decision of the Supreme Court, tax treaty, revenue ruling, revenue procedure, notice, or other authority published in the Internal Revenue Bulletin.

For purposes of this provision, if such an acquisition of stock qualifies under both section 368(a)(1)(B) and another corporate restructuring provision, and the other provision is not covered by this revenue procedure, the Service will treat any request for a qualification ruling under the other provision as a request for a qualification ruling under section 368(a)(1)(B). A taxpayer or the taxpayer's representative (as the Service deems appropriate) seeking a qualification ruling for such an acquisition under any such other provision must accordingly state that to the best of his/her knowledge and belief the acquisition does not qualify under section 368(a)(1)(B).

The Service will not rule on the qualification of an acquisition of stock under section 368(a)(1)(B), even if it is an integral part of a larger transaction that involves other issues upon which the Service will rule and it is impossible to determine the tax consequences of the larger transaction without determining the tax consequences of the acquisition. However, in such event, the Service will rule on the tax consequences of the larger transaction, provided the taxpayer or the taxpayer's representative (as the Service deems appropriate) represents that to the best of his/her knowledge and belief the acquisition will (or will not) qualify under section 368(a)(1)(B). If the Service issues a ruling on the larger transaction the ruling will state that no opinion is expressed as to whether or not the acquisition qualifies under section 368(a)(1)(B).

Section 368(a)(1)(F). — Definitions Relating to Corporate Reorganizations. — Whether a transaction constitutes a reorganization within the meaning of section 368(a)(1)(F) of the Code, and whether the taxpayer is subject to the consequences of qualification under that section (such as nonrecognition and basis consequences) that are adequately addressed by a statute, regulation, decision of the Supreme Court, tax treaty, revenue ruling, revenue procedure, notice, or other authority published in the Internal Revenue Bulletin.

For purposes of this provision, if a transaction qualifies under both sec-

tion 368(a)(1)(F) and another corporate restructuring provision, and the other provision is not covered by this revenue procedure, the Service will treat any request for a qualification ruling under the other provision as a request for a qualification ruling under section 368(a)(1)(F). A taxpayer or the taxpayer's representative (as the Service deems appropriate) seeking a qualification ruling under any such other provision must accordingly state that to the best of his/her knowledge and belief the transaction does not qualify under section 368(a)(1)(F).

The Service will not rule on the qualification of a reorganization under section 368(a)(1)(F), even if it is an integral part of a larger transaction that involves other issues upon which the Service will rule and it is impossible to determine the tax consequences of the larger transaction without determining the tax consequences of the reorganization. However, in such event, the Service will rule on the tax consequences of the larger transaction, provided the taxpayer or the taxpayer's representative (as the Service deems appropriate) represents that to the best of his/her knowledge and belief the reorganization will (or will not) qualify under section 368(a)(1)(F). If the Service issues a ruling on the larger transaction the ruling will state that no opinion is expressed as to whether or not the reorganization qualifies under section 368(a)(1)(F).

SEC. 3. COLLATERAL AND OTHER ISSUES

Although the Service will not rule on the consequences of qualification under the foregoing provisions if the consequences are adequately addressed by a statute, regulation, decision of the Supreme Court, tax treaty, revenue ruling, revenue procedure, notice, or other authority published in the Internal Revenue Bulletin, it will rule where the consequences of qualification are not adequately addressed by such authorities. For example, the Service will issue a section 381(c)(4) ruling in connection with a section 368(a)(1)(A) or section 368(a)(1)(F) reorganization. To obtain a ruling on a collateral issue, the taxpayer or the taxpayer's representative (as the Service deems appropriate) must state that to the best of his/her knowledge and belief the transaction qualifies under the applicable no-rule section, set forth the authorities most closely related to the collateral issue, and explain why the collateral issue is not resolved by these authorities. If the Service issues a ruling on a collateral issue the ruling will state that no opinion is expressed as to whether or not the transaction in question qualifies under the applicable no-rule provision.

The Service will also continue to rule on issues that arise in connection with a no-rule transaction but do not depend upon or affect qualification under the applicable no-rule provision.

SEC. 4. MODIFICATIONS

Six months from the publication date of this revenue procedure, the Service will assess the resource burden of issuing rulings on subissues under sections 368(a)(1)(A), 368(a)(2)(D), and 368(a)(2)(E). Based on such assessment, the Service may revise this revenue procedure, as appropriate, to eliminate the practice of issuing subissue rulings or to expand the practice to the other no-rule areas covered by this revenue procedure.

SEC. 5. EFFECTIVE DATE

This revenue procedure is effective with regard to all ruling requests postmarked more than 30 days after December 3, 1990, the date of publication of this revenue procedure in the Internal Revenue Bulletin.

SEC. 6. EFFECT ON OTHER DOCUMENTS

Rev. Proc. 90-3 is amplified.

---

26 CFR 601.602: Tax forms and instructions. (Also Part I, Section 6049; 1.6049-4.)

Rev. Proc. 90-57

SECTION 1. PURPOSE

This revenue procedure explains both the procedure otherwise required by the regulations (the "standard procedure") and an acceptable alternative procedure for preparing and filing Forms 1099-INT, Statement for Recipients of Interest Income, in certain situations where a corporation acquires substantially all the assets and assumes substantially all the liabilities of another corporation. The revenue procedure facilitates information reporting in these situations and assures that amounts are reported once and only once.

SEC. 2. BACKGROUND

.01 Section 6011(a) of the Internal Revenue Code provides that, when required by regulations, any person made liable for any tax imposed by the Code, or for the collection of the tax, must make a return or statement according to the forms and regulations prescribed by the Secretary.

.02 Section 3406 of the Code provides that payors of interest reportable under section 6049(a) must, in certain circumstances, deduct and withhold tax equal to 20 percent of the payments. Section 3406(a) identifies the circumstances that require the withholding of tax.

.03 Section 6049(a) of the Code provides that every person who pays interest, as defined in section 6049(b), aggregating $10 or more to any other person during a calendar year, or who receives interest payments as a nominee and makes payments aggregating $10 or more during a calendar year, to another person with respect to interest so received, must make a return according to forms or regulations prescribed by the Secretary.

.04 Section 1.6049-4(b) of the Income Tax Regulations provides that persons required to make information returns under section 6049(a) of the Code must file Forms 1099 for the calendar year. Those returns must show the aggregate amount of the interest payments; the name, address, and taxpayer identification number of the person to whom paid; and the amount of tax deducted and withheld under the provisions concerning backup withholding.

SEC. 3. SCOPE

.01 This revenue procedure applies only when all of the following conditions are met:

(1) One corporation (the "successor") acquires substantially all the assets and assumes substantially all the liabilities of another corporation (the "predecessor");

(2) During the pre-acquisition portion of the calendar year in which the acquisition occurs, the predecessor

makes payments of interest within the meaning of section 6049(b); and

(3) During the post-acquisition portion of that year, the predecessor does not make any such interest payments.

.02 This revenue procedure does not apply in the circumstances described in Rev. Rul. 69-556, 1969-2 C.B. 242, which relates to the absorption of one corporation by another corporation pursuant to a merger agreement.

SEC. 4. STANDARD PROCEDURE

Pursuant to section 6049(a) of the Code and section 1.6049-4 of the regulations, each person that makes interest payments is responsible for information reporting of those payments. Thus, unless the alternative procedure set forth below is used, both the predecessor and the successor must file Forms 1099-INT with respect to interest payments made in the calendar year in which the acquisition occurs (the "acquisition year"). The predecessor must perform all reporting duties with respect to the interest payments that it made during that year, and the successor must do the same with respect to the interest payments it made during the year.

SEC. 5. ALTERNATIVE PROCEDURE

.01 In order to use the alternative procedure, the predecessor and successor must agree that the successor assumes the predecessor's entire obligation to file Forms 1099-INT with respect to interest payments made in the acquisition year.

.02 If the predecessor and successor so agree, and if the successor satisfies the predecessor's obligation described in section 5.01 of this revenue procedure, the predecessor is relieved of the obligation. The successor then must combine (1) the interest payments made to a person by the predecessor in the acquisition year with (2) the interest payments made to that person by the successor in that year, and must report the aggregate amount on the Form 1099-INT for that person for that year. The successor may include with this form additional information explaining to the recipient the aggregate reporting of interest paid.

.03 The successor also must combine the amount of any tax withheld for a person by the predecessor in the acquisition year pursuant to section 3406(a) with the amount of tax withheld for that person by the successor in that year and must report the aggregate amount on the Form 1099-INT for the year.

.04 If the alternative procedure described in this section is used, the successor must file a statement with the Service indicating that Forms 1099-INT are being filed on a combined basis in accordance with the provisions of this revenue procedure. This statement is needed to assist the Service in processing the forms filed under the alternative procedure. For example, if any tax has been withheld by the predecessor pursuant to section 3406(a) during the acquisition year and reported by the predecessor on Form 941, Employer's Quarterly Federal Tax Return, the total of the withholding amounts shown on the successor's Forms 1099-INT for that year will exceed the total of the withholding amounts shown on the successor's Forms 941.

.05 The statement required by section 5.04 of this revenue procedure must include the name, address, and taxpayer identification numbers of both the successor and predecessor corporations. The statement must be filed separately from the Forms 1099-INT for the acquisition year and must be mailed to the following address on or before the date those forms are due: Internal Revenue Service, Martinsburg Computing Center, P.O. Box 1359, Attention: Chief, Magnetic Media 2, Martinsburg, WV 25401-1359

SEC. 6. EFFECTIVE DATE

This revenue procedure is effective for Forms 1099-INT filed after December 24, 1990. In addition, if a successor filed Forms 1099-INT on or before December 24, 1990, in the circumstances described in section 3 of this revenue procedure, the predecessor's filing obligations are deemed to have been satisfied with respect to amounts shown on those forms if the predecessor and successor have substantially complied with all the requirements of section 5 of this revenue procedure (except for the statement requirement of section 5.04).

Rev. Proc. 90-58

SECTION I. PURPOSE

The purpose of this revenue procedure is to provide guidance regarding application of the failure-to-deposit penalty under section 6656 of the Internal Revenue Code as a result of changes made to the penalty provisions by the Revenue Reconciliation Act of 1989 ("1989 Act"), Pub. L. No. 101-239, 1990-1 C.B. 210. This revenue procedure describes how federal tax deposits will be credited in the determination of whether a failure-to-deposit penalty should apply. This procedure will apply with respect to all taxes required to be deposited under section 6302 of the Code and underlying regulations that are reported on the following Internal Revenue Service forms:

Form 720, Quarterly Federal Excise Tax Return
Form 940, Employer's Annual Federal Unemployment (FUTA) Tax Return
Form 941, Employer's Quarterly Federal Tax Return
Form 943, Employer's Annual Tax Return for Agricultural Employees
Form CT-1, Employer's Annual Railroad Retirement and Unemployment Repayment Tax Return
Form 1042, Annual Withholding Tax Return for U.S. Source Income of Foreign Persons

SEC. II. BACKGROUND

In subtitle G (section 7742) of the 1989 Act, Congress revised the penalty provisions under section 6656 of the Code, effective with respect to any failure-to-deposit made after December 31, 1989. Under revised section 6656, the penalty rate is 2 percent of the deposit underpayment ("underdeposit") if the failure is for not more than 5 days, 5 percent if the failure is for more than 5 days but not more than 15 days, and 10 percent if the failure is for more than 15

days. The penalty rate increases to 15 percent if the tax is not paid on or before the earlier of (i) the day 10 days after the date of the first delinquency notice to the taxpayer under section 6303, or (ii) the day on which notice and demand for immediate payment is given under section 6861 or 6862 or the last sentence of section 6331(a).

SEC. III. SERVICE METHOD FOR APPLYING DEPOSITS (AND OTHER CREDITS)

.01 *MANNER IN WHICH DEPOSITS WILL BE APPLIED.* Effective for deposit liability periods beginning after March 31, 1991, deposits will be applied in date-made order against deposit liabilities in due-date order. Thus, a deposit will first be applied to satisfy any past due underdeposits within the same return period, with the oldest underdeposit being satisfied first. Other credits to the taxpayer's account, such as an overpayment from the previous quarter, will be similarly applied. Amounts delivered to an Internal Revenue Service Office are not treated as deposits but will be credited to the taxpayer's account.

The following employment tax example illustrates how deposits will be applied in due-date order. This ordering rule is similarly applicable to deposits under section 6302 of the Code of railroad retirement taxes, FUTA taxes, excise taxes, and income tax withheld from nonresident aliens and foreign corporations:

Example 1: On Wednesday, April 3, 1991, the close of an employer's eighth-monthly deposit liability period, Employer *A* has a deposit liability of $10,000. Under section 31.6302(c)-1(a)(1)(i) of the Employment Tax Regulations, the $10,000 must be deposited by Monday, April 8, 1991, three banking days after the close of the April 1-3 eighth-monthly period.* During the next eighth-monthly period running from Thursday, April 4, 1991, through Sunday, April 7, 1991, *A* incurs an additional deposit liability of $15,000. Under section 31.6302(c)-1(a)(1)(i), the $15,000 must be deposited by Wednesday, April 10, 1991, three banking days after the close of the April 4-7 eighth-monthly period. *A* deposits $7,000 on April 8 and $15,000 on April 10. The $7,000 deposit partially satisfies the $10,000 liability due April 8 resulting in a $3,000 underdeposit. The $15,000 deposited on April 10 is first applied to satisfy the $3,000 underdeposit on April 8 and the remainder is applied to the deposit liability due April 10. *A* will incur a 2% penalty on the April 8 underdeposit because the failure-to-deposit was for not more than 5 days. *A* also has a $3,000 underdeposit on April 10, thereby incurring a failure-to-deposit penalty on that amount. The penalty rate will depend on when that liability is satisfied.

.02 *DEPOSITS OF TAXES (OTHER THAN EXCISE TAXES) USING "SAFE-HAVEN" RULES.* Both the deposits of (1) employment taxes by employers and (2) withheld income taxes by agents withholding from nonresident aliens and foreign corporation are subject to certain "safe-haven" rules. In the case of employment taxes, no failure-to-deposit penalty will apply if at least 95% of the required deposit is timely made and the remainder is timely deposited as required by the regulations. The same is true in the case of those who withhold from nonresident aliens and foreign corporations, except that a 90% threshold is used. In each case the make-up deposit must be deposited with the first deposit otherwise required after the 15th day of the following month, unless the safe-haven underdeposit occurs in the last month of the return period in which case the balance is due by the return due date. Section 1.6302-2(a)(1)(ii) of the Income Tax Regulations and section 31.6302(c)-1-(a)(1)(i)(b) of the Employment Tax Regulations. The following employment tax examples illustrate how deposits will be applied in the case of those employers and withholding agents who deposit on a "safe-haven" basis.

Example 2: For the April-June calendar quarter of 1991 Employer *B* makes deposits of employment taxes taking into account the 95% safe-haven rule found in section 31.6302(c)-1(a)(1)(i) of the Employment Tax Regulations. For each eighth-monthly period in April 1991, *B* has an employment tax liability of $5,000. *B* makes timely deposits of $4,750 with respect to each eighth-monthly period. In May 1991, *B* again has a $5,000 liability for each of the first three eighth-monthly periods and makes timely deposits of $4,750 with respect to each such period. For the fourth eighth-monthly period of May 1991, (i.e., May 12-15) *B* not only has a periodic $5,000 liability but also a $2,000 liability for safe-haven underdeposits from April (8 deposit periods × $250 underdeposit). This is so because, under section 31.6302(c)-1(a)(1)(i)(b) of the Employment Tax Regulations, the safe-haven underdeposits must be deposited with the first deposit otherwise required after the 15th day of the month following the month in which the 95% safe-haven deposits were made. On May 20, 1991, three banking days after May 15, *B* deposits $6,500. The Service will apply that deposit to first satisfy the $2,000 in safe-haven underdeposits from April since they were the oldest of the liabilities due May 20, and the remaining amount, $4,500, will be applied against the $5,000 liability incurred in the May 12-15 eighth-monthly period. The $4,500 fails to satisfy the 95% safe-haven rule and the $500 underdeposit is subject to the section 6656 failure-to-deposit penalty. The rate of penalty will depend upon when that underdeposit is satisfied.

Example 3: The facts are the same as in Example 2 except that *B* fails to make any deposit with respect to the May 8-11 eighth-monthly period. That $5,000 amount was required to be deposited by May 15, 1991. The $6,500 deposited by *B* on May 20 will first be applied to satisfy the $5,000 liability that was due by May 15, 1991, since that amount was due first. The remaining $1,500 will be used to partially satisfy the $2,000 in safe-haven underdeposits due May 20. The remaining amounts due May 20 (i.e., $500 in safe-haven underdeposits and the $5,000 underdeposit with respect to the May 12-15 eighth-monthly period) will be subject to penalties. The penalty rates will depend upon when those underdeposits are satisfied.

.03 *DEPOSITS OF EXCISE TAXES USING "SAFE-HAVEN" RULES.* Depositors of excise taxes

*For purposes of the examples in this revenue procedure, banking days are assumed to include all calendar days except Saturdays, Sundays and Federal holidays.

reportable on Form 720 also are subject to certain "safe-haven" rules. However, in the case of these excise taxes, the safe-haven underdeposit due date is not related to the due date of an otherwise required deposit. Underdeposits of excise taxes have their own specific due dates. Accordingly, such safe-haven underdeposits will be credited in due date order.

.04 *APPLICATION OF OTHER CREDITS TO TAXPAYER ACCOUNTS.* As indicated above, other credits to the taxpayer's account will be applied in the same manner as deposits. The following examples illustrate how other credits to the taxpayer's account will be applied:

Example 4: On April 4, 1991, three banking days after the close of the March 26-31 eighth-monthly period and the close of the first quarter employment tax return period, Employer *C* makes a payroll tax deposit of $10,000 to satisfy *C*'s March 26-31 deposit liability. This results in an overdeposit for the quarterly return period of $3,500. For the eighth-monthly period April 1-3, 1991, the beginning of the second quarter return period, *C* incurs a deposit liability of $3,000. Because the $3,500 overdeposit made April 4 was designated as a deposit for the first quarter, it cannot be applied on April 4 to satisfy the $3,000 deposit liability for the April 1-3 eighth-monthly period because, under section 31.6302(c)-1(a)(1)(i)(b)(2) of the Employment Tax Regulations, an overdeposit from one return period cannot be applied forward to satisfy a succeeding deposit liability in the next return period. On April 30, 1991, the due date for *C*'s Form 941 for the first quarter of 1991, *C* files the form and reports an overpayment of $3,500. *C*'s second quarter account will be credited by the amount of the overpayment on the due date of the first quarter return, April 30. On April 30, the Service will use that amount to satisfy any liabilities for the second quarter to date, with the oldest liability being satisfied first.

Example 5: During the eighth-monthly period May 1-3, 1991, Employer *D* incurs an employment tax liability of $5,000, thus requiring a deposit within 3 banking days. On May 8, 1991, the deposit due date, *D* hand-delivers a check in the amount of $5,000 to the local Internal Revenue Service District Office, rather than depositing the check in an authorized depository as required by section 31.6302(c)-1(a)(2) of the regulations. Because the $5,000 amount has not been deposited, *D* incurs a failure-to-deposit penalty under section 6656 of the Code. However, the Service will apply the $5,000 to *D*'s account as of May 8, 1991. Thus, the amount may be used to satisfy any existing underdeposit in that calendar quarter, with the oldest liability being satisfied first. Since the $5,000 was credited to the taxpayer's account and is, thus, not an amount due at the time the quarterly return was required to be filed, the 15 percent penalty under section 6656 cannot apply with respect to that underdeposit, and the highest rate of penalty that can apply to *D* on the failure-to-deposit is 10 percent.

SEC. IV. EFFECTIVE DATE

This revenue procedure is effective with respect to deposit periods beginning after March 31, 1991.

---

26 CFR 601.105: Examination of returns and claims for refund, credit, or abatement; determination of correct tax liability.
(Also Part I, Sections 62, 162, 274, 1016; 1.62-2, 1.162-17, 1.274-5T, 1.1016-3.)

Rev. Proc. 90-59

SECTION 1. PURPOSE

This revenue procedure updates Rev. Proc. 89-66, 1989-2 C.B. 792, as amplified, by providing optional standard mileage rates for employees, self-employed individuals, or other taxpayers to use in computing the deductible costs paid or incurred on or after January 1, 1991, of operating a passenger automobile for business, charitable, medical, or moving expense purposes. This revenue procedure also provides rules under which the amount of ordinary and necessary expenses of local travel or transportation away from home that are paid or incurred by an employee will be deemed substantiated under section 1.274-5T of the temporary Income Tax Regulations when a payor (the employer, its agent, or a third party) provides a mileage allowance under a reimbursement or other expense allowance arrangement to pay for such expenses. Use of a method described in this revenue procedure is not mandatory and a taxpayer may use actual allowable expenses if the taxpayer maintains adequate records or other sufficient evidence for proper substantiation.

SEC. 2. BACKGROUND

.01 Section 162(a) of the Internal Revenue Code allows a deduction for all the ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business. Under that provision, an employee or self-employed individual may deduct the cost of operating a passenger automobile to the extent that it is used in a trade or business. However, under section 262, no portion of the operating cost that is attributable to personal use is deductible.

.02 Section 274(d) of the Code provides, in part, that no deduction shall be allowed under section 162 with respect to any listed property (as defined in section 280F(d)(4) to include passenger automobiles and any other property used as a means of transportation) unless the taxpayer complies with certain substantiation requirements. The section further provides that regulations may prescribe that some or all of the substantiation requirements do not apply to an expense that does not exceed an amount prescribed by such regulations.

.03 Section 1.274-5T(g) of the temporary regulations, in part, grants the Commissioner the authority to prescribe rules relating to mileage allowances for ordinary and necessary expenses of local travel and transportation away from home. Pursuant to this grant of authority, the Commissioner may prescribe rules under which such allowances, if in accordance with reasonable business practice, will be regarded as (1) equivalent to substantiation, by adequate records or other sufficient evidence, of the amount of such travel and transportation expenses for purposes of section 1.274-5T(c), and (2) satisfying the requirements of an adequate accounting to the employer of the amount of such expenses for purposes of section 1.274-5T(f).

.04 Section 62(a)(2)(A) of the Code allows an employee, in determining adjusted gross income, a deduction for the expenses allowed by Part VI (section 161 and following), sub-

chapter B, chapter 1 of the Code, paid or incurred by the employee in connection with the performance of services as an employee under a reimbursement or other expense allowance arrangement with a payor.

.05 Section 62(c) of the Code provides that an arrangement will not be treated as a reimbursement or other expense allowance arrangement for purposes of section 62(a)(2)(A) if it—

(1) does not require the employee to substantiate the expenses covered by the arrangement to the payor, or

(2) provides the employee with the right to retain any amount in excess of the substantiated expenses covered under the arrangement.

Section 62(c) further provides that the substantiation requirements described therein shall not apply to any expense to the extent that, under the grant of regulatory authority prescribed in section 274(d), the Commissioner has provided that substantiation is not required for such expense.

.06 Under section 1.62-2(c)(1) of the regulations, a reimbursement or other expense allowance arrangement satisfies the requirements of section 62(c) of the Code if it meets the requirements of business connection, substantiation, and returning amounts in excess of expenses as specified in the regulations. Section 1.62-2(e)(2) specifically provides that substantiation of certain business expenses in accordance with rules prescribed under the authority of section 1.274-5T(g) will be treated as substantiation of the amount of such expenses for purposes of section 1.62-2. Under section 1.62-2(f)(2), the Commissioner may prescribe rules under which an arrangement providing mileage allowances will be treated as satisfying the requirement of returning amounts in excess of expenses, even though the arrangement does not require the employee to return the portion of such an allowance that relates to miles of travel substantiated and that exceeds the amount of the employee's expenses deemed substantiated pursuant to rules prescribed under section 274(d), provided the allowance is reasonably calculated not to exceed the amount of the employee's expenses or anticipated expenses and the employee is required to return any portion of such an allowance that relates to miles of travel not substantiated.

.07 Section 1.62-2(h)(2)(i)(B) of the regulations provides that if a payor pays a mileage allowance under an arrangement that meets the requirements of section 1.62-2(c)(1), the portion, if any, of the allowance that relates to miles of travel substantiated in accordance with section 1.62-2(e), that exceeds the amount of the employee's expenses deemed substantiated for such travel pursuant to rules prescribed under section 274(d) of the Code and 1.274-5T(g), and that the employee is not required to return, is subject to withholding and payment of employment taxes. See sections 31.3121(a)-3, 31.3231(e)-3, 31.3306(b)-2, and 31.3401(a)-4. Because the employee is not required to return this excess portion, the reasonable period of time provisions of section 1.62-2(g) (relating to the return of excess amounts) do not apply to this excess portion.

.08 Under section 1.62-2(h)(2)-(i)(B)(4) of the regulations, the Commissioner may, in his discretion, prescribe special rules regarding the timing of withholding and payment of employment taxes on mileage allowances.

SEC. 3. DEFINITIONS

.01 *Standard mileage rate.* The term "standard mileage rate" means the applicable amount provided by the Service for optional use by employees or self-employed individuals in computing the deductible costs of operating passenger automobiles owned by them (including vans, pickups, or panel trucks) for business purposes, or by taxpayers in computing the deductible costs of operating passenger automobiles for charitable, medical, or moving expense purposes.

.02 *Transportation expenses.* The term "transportation expenses" means the expenses of operating a passenger automobile for local travel or transportation away from home.

.03 *Mileage allowance.* The term "mileage allowance" means a payment under a reimbursement or other expense allowance arrangement that meets the requirements specified in section 1.62-2(c)(1) of the temporary regulations and that is

(1) paid with respect to the ordinary and necessary business expenses incurred, or which the payor reasonably anticipates will be incurred, by an employee for transportation expenses in connection with the performance of services as an employee of the employer,

(2) reasonably calculated not to exceed the amount of the expenses or the anticipated expenses, and

(3) is paid at the applicable standard mileage rate, a flat rate or stated schedule, or in accordance with any other Service-specified rate or schedule.

.04 *Flat rate or stated schedule.* A mileage allowance is paid at a flat rate or stated schedule if it is provided on a uniform and objective basis with respect to the expenses described in section 3.03. Such allowance may be paid periodically at a fixed rate, at a cents-per-mile rate, at a variable rate based on a stated schedule, at a rate that combines any of these rates, or on any other basis that is consistently applied and in accordance with reasonable business practice. Thus, for example, a periodic payment at a fixed rate to cover the fixed costs (including depreciation, insurance, registration and license fees, and personal property taxes) of driving an automobile in connection with the performance of services as an employee of the employer, coupled with a periodic payment at a cents-per-mile rate to cover the operating costs (including gasoline and all taxes thereon, oil, tires, and routine maintenance and repairs) of using an automobile for such purposes, is an allowance paid at a flat rate or stated schedule. Likewise, a periodic payment at a variable rate based on a stated schedule for different locales to cover the costs of driving an automobile in connection with the performance of services as an employee is an allowance paid at a flat rate or stated schedule.

SEC. 4. BUSINESS STANDARD MILEAGE RATE

.01 *In general.* The standard mileage rate for transportation expenses paid or incurred or after January 1, 1991, is 27.5 cents per mile for all miles of use for business purposes. This business standard mileage rate will be adjusted annually (to the ex-

tent warranted) by the Service, and any such adjustment will be applied prospectively.

.02 *Use of the business standard mileage rate.* A taxpayer may, on a yearly basis, deduct an amount equal to either the business standard mileage rate times the number of business miles traveled or the actual costs (both operating and fixed) paid or incurred by the taxpayer that are allocable to traveling those business miles.

.03 *Business standard mileage rate in lieu of operating and fixed costs.* A deduction computed using the standard mileage rate for business miles is in lieu of operating and fixed costs of the automobile allocable to business purposes. Such items as depreciation, maintenance and repairs, tires, gasoline (including all taxes thereon), oil, insurance, and registration fees are included in operating and fixed costs.

.04 *Parking fees, tolls, interest, and taxes.* Parking fees and tolls attributable to use of the automobile for business purposes may be deducted as separate items. Likewise, interest relating to the purchase of the automobile as well as state and local taxes (other than those included in the cost of gasoline) may be deducted as separate items, but only to the extent that the interest and taxes are allowable deductions under section 163 or 164 of the Code, respectively. If the automobile is operated less than 100 percent for business purposes, an allocation is required to determine the business and nonbusiness portion of the taxes and interest deduction allowable. However, section 163(h)(2)-(A) expressly provides that interest is nondeductible personal interest when it is paid or accrued on indebtedness properly allocable to the trade or business of performing services as an employee. Section 164 also expressly provides that state and local taxes that are paid or accrued by a taxpayer in connection with an acquisition or disposition of property will be treated as part of the cost of the acquired property or as a reduction in the amount realized on the disposition of such property.

.05 *Depreciation.* For automobiles placed in service for business purposes after December 31, 1979, and for which the business standard mileage rate has been used for any year, depreciation will be considered to have been allowed at the rate of 7 cents a mile for 1980 and 1981, 7.5 cents a mile for 1982, 8 cents a mile for 1983, 1984, and 1985, 9 cents a mile for 1986, 10 cents a mile for 1987, 10.5 cents a mile for 1988, and 11 cents a mile for 1989, 1990, and 1991 for those years in which the standard mileage rate was used. If actual costs were used for one or more of those years, the rates above will not apply to any year in which such costs were used. The depreciation described above will reduce the basis of the automobile (but not below zero) in determining adjusted basis as required by section 1016 of the Code.

.06 *Limitations.*

(1) The business standard mileage rate may not be used to compute the deductible expenses of (a) vehicles used for hire, such as taxicabs, (b) two or more automobiles used simultaneously (such as in fleet operations), or (c) any vehicle that is leased, rather than owned, by the taxpayer.

(2) The business standard mileage rate may not be used if (a) the automobile has previously been depreciated using a method other than straight-line for its estimated useful life, (b) additional first-year depreciation has been claimed, or (c) the taxpayer has used the Accelerated Cost Recovery System (ACRS) under section 168 of the Code. By using the business standard mileage rate, the taxpayer has elected to exclude the automobile from ACRS pursuant to section 168(f)(1). If, after using the business standard mileage rate, the taxpayer uses actual costs, the taxpayer must use straight-line depreciation for the automobile's estimated useful life (subject to the applicable depreciation deduction limitations under section 280F for any passenger automobile).

SEC. 5. RURAL MAIL CARRIER SPECIAL MILEAGE RATE

.01 *Special mileage rate.* For taxable years beginning after December 31, 1987, section 6008 of the Technical and Miscellaneous Revenue Act of 1988, 1988-3 C.B. 347, allows employees of the United States Postal Service to use a special mileage rate in computing the amount allowable as a deduction for business use of an automobile in performing qualifying services. Qualifying services are services involving the collection and delivery of mail on a "rural route," as that term is defined by the Postal Service. The special mileage rate is equal to 150 percent of the business standard mileage rate, and is 41.25 cents per mile for transportation expenses paid or incurred on or after January 1, 1991 (150 percent of the business standard mileage rate of 27.5 cents per mile). The special mileage rate applies to all business use of an automobile while performing qualifying services. It will be adjusted annually (to the extent warranted) by the Service to reflect changes in the business standard mileage rate, and any such adjustment will be applied prospectively.

.02 *Depreciation.* In determining the adjusted basis of an automobile used to perform qualifying services, depreciation will be computed as provided in section 4.05, except as provided in section 5.03.

.03 *Special depreciation rules.* The special mileage rate is not available for any automobile if, for any taxable year beginning after December 31, 1987, the employee claims depreciation for such automobile. For this purpose, claiming depreciation means the deduction of any amount under sections 167, 168, or 179 of the Code (including any such deduction attributable to use in a trade or business that does not involve the performance of qualifying services). The availability of the special mileage rate is not affected by depreciation claimed for taxable years beginning before January 1, 1988. Thus, the special mileage rate is available even if the automobile was fully depreciated in taxable years beginning before January 1, 1988, and regardless of the year the automobile was placed in service.

.04 *Rural mail carrier special mileage rate in lieu of operating and fixed costs.* The rules provided under section 4.03 also apply to use of the special mileage rate.

.05 *Parking fees, tolls, interest, and taxes.* The rules provided under section 4.04 also apply to the use of the special mileage rate.

SEC. 6. CHARITABLE, MEDICAL, AND MOVING STANDARD MILEAGE RATE

.01 *Charitable.* Section 170(j) of the Code provides a standard mileage rate of 12 cents per mile for purposes

of computing the charitable deduction for use of a passenger automobile in connection with rendering gratuitous services to a charitable organization under section 170.

.02 *Medical and moving.* The standard mileage rate is 9 cents per mile for use of a passenger automobile (a) to obtain medical care described in section 213 of the Code, or (b) as part of a move for which the expenses are deductible under section 217. The standard mileage rates for medical and moving transportation expenses will be adjusted annually (to the extent warranted) by the Service, and any such adjustment will be applied prospectively.

.03 *Charitable, medical, or moving expense standard mileage rate in lieu of operating expenses.* A deduction computed using the applicable standard mileage rate for charitable, medical, or moving expense miles is in lieu of operating expenses (including gasoline and oil) of the automobile allocable to such purposes. Costs for such items as depreciation, maintenance and repairs, tires, insurance, and registration fees are not deductible, and are not included in such standard mileage rates.

.04 *Parking fees, tolls, interest, and taxes.* Parking fees and tolls attributable to the use of the automobile for charitable, medical, or moving expense purposes may be deducted as separate items. Likewise, interest relating to the purchase of the automobile as well as state and local taxes (other than those included in the cost of gasoline) may be deducted as separate items, but only to the extent that the interest and taxes are allowable deductions under sections 163 or 164 of the Code, respectively.

SEC. 7. FIXED AND VARIABLE RATE ALLOWANCE

.01 *In general.*

(1) The ordinary and necessary expenses paid or incurred by an employee in driving an automobile in connection with the performance of services as an employee of the employer will be deemed substantiated (in an amount determined under section 8) when a payor reimburses such expenses with a mileage allowance using a flat rate or stated schedule that combines periodic fixed and variable rate payments that meet all the requirements of this section (a FAVR allowance).

(2) The amount of a FAVR allowance must be based on data that (a) is derived from the base locality, (b) reflects retail prices paid by consumers, and (c) is reasonable and statistically defensible in approximating the actual expenses of employees receiving the allowance.

.02 *Definitions.*

(1) *FAVR allowance.* A FAVR allowance includes periodic fixed payments and periodic variable payments. A payor may maintain more than one FAVR allowance. A FAVR allowance that uses the same payor, standard automobile (or an automobile of the same make and model that is comparably equipped), retention period, and business use percentage is considered one FAVR allowance, even though other features of the allowance may vary. A FAVR allowance also includes any optional high mileage payments; however, such optional high mileage payments are included in the employee's gross income, are reported as wages or other compensation on the employee's Form W-2, and are subject to withholding and payment of employment taxes when paid. See section 8.05. An optional high mileage payment covers the additional depreciation for a standard automobile attributable to business miles driven and substantiated by the employee for a calendar year in excess of the annual business mileage for that year. If an employee is covered by the FAVR allowance for less than the entire calendar year, the annual business mileage may be prorated on a monthly basis for purposes of the preceding sentence.

(2) *Periodic fixed payment.* A periodic fixed payment covers the projected fixed costs (including depreciation, insurance, registration and license fees, and personal property taxes) of driving a standard automobile in connection with the performance of services as an employee of the employer in a base locality, and must be paid at least quarterly. A periodic fixed payment may be computed by (a) dividing the total projected fixed costs for the standard automobile for all years of the retention period, determined at the beginning of the retention period, by the number of periodic fixed payments in the retention period, and (b) multiplying the resulting amount by the business use percentage.

(3) *Periodic variable payment.* A periodic variable payment covers the projected operating costs (including gasoline and all taxes thereon, oil, tires, and routine maintenance and repairs) of driving a standard automobile in connection with the performance of services as an employee of the employer in a base locality, and must be paid at least quarterly. The rate of a periodic variable payment for a computation period may be computed by dividing the total projected operating costs for the standard automobile for the computation period, determined at the beginning of the computation period, by the computation period mileage. A computation period can be any period of a year or less. Computation period mileage is the total mileage (business and personal) a payor reasonably projects a standard automobile will be driven during a computation period and equals the retention mileage divided by the number of computation periods in the retention period. For each business mile substantiated by the employee for the computation period, the periodic variable payment must be paid at a rate that does not exceed the rate for that computation period.

(4) *Base locality.* A base locality is the particular geographic locality or region of the United States in which the costs of driving an automobile in connection with the performance of services as an employee of the employer are generally paid or incurred by the employee. Thus, for purposes of determining the amount of fixed costs, the base locality is generally the geographic locality or region in which the employee resides. For purposes of determining the amount of operating costs, the base locality is generally the geographic locality or region in which the employee drives the automobile in connection with the performance of services as an employee of the employer.

(5) *Standard automobile.* A standard automobile is the automobile selected by the payor on which a specific FAVR allowance is based.

(6) *Standard automobile cost.* The standard automobile cost for a calendar year may not exceed 95 per-

cent of the sum of (a) the retail dealer invoice cost of the standard automobile in the base locality, and (b) state and local sales or use taxes applicable on the purchase of such an automobile. Further, the standard automobile cost may not exceed $22,500.

(7) *Annual mileage.* Annual mileage is the total mileage (business and personal) a payor reasonably projects a standard automobile will be driven during a calendar year. Annual mileage equals the annual business mileage divided by the business use percentage.

(8) *Annual business mileage.* Annual business mileage is the mileage a payor reasonably projects a standard automobile will be driven by an employee in connection with the performance of services as an employee of the employer during the calendar year, but may not be less than 6,250 miles for a calendar year. Annual business mileage equals the annual mileage multiplied by the business use percentage.

(9) *Business use percentage.* A business use percentage is determined by dividing the annual business mileage by the annual mileage. The business use percentage may not exceed 75 percent. In lieu of demonstrating the reasonableness of the business use percentage based on records of total mileage and business mileage driven by the employees annually, a payor may use a business use percentage that is less than or equal to the following percentages for a FAVR allowance that is paid for the following annual business mileage:

Annual business mileage	*Business use percentage*
6,250 or more but less than 10,000	45 percent
10,000 or more but less than 15,000	55 percent
15,000 or more but less than 20,000	65 percent
20,000 or more	75 percent

(10) *Retention period.* A retention period is the period in calendar years selected by the payor during which the payor expects an employee to drive a standard automobile in connection with the performance of services as an employee of the employer before the automobile is replaced. Such period may not be less than two calendar years.

(11) *Retention mileage.* Retention mileage is the annual mileage multiplied by the number of calendar years in the retention period.

(12) *Residual value.* The residual value of a standard automobile is the projected amount for which it could be sold at the end of the retention period after being driven the retention mileage. The Service will accept the following safe harbor residual values for a standard automobile computed as a percentage of the standard automobile cost:

Retention period	*Residual value*
2-year	70 percent
3-year	60 percent
4-year	50 percent

.03 *FAVR allowance in lieu of operating and fixed costs.*

(1) Except as provided in section 7.03(2), a deduction computed using a FAVR allowance is in lieu of all the operating and fixed costs paid or incurred by an employee in driving the automobile in connection with the performance of services as an employee of the employer.

(2) Parking fees and tolls attributable to an employee driving the standard automobile in connection with the performance of services as an employee of the employer are not included in fixed and operating costs and may be deducted as a separate items. Similarly, interest relating to the purchase of the standard automobile may be deducted as a separate item, but only to the extent that the interest is an allowable deduction under section 163 of the Code.

.04 *Depreciation.*

(1) A FAVR allowance may not be paid with respect to an automobile for which the employee has claimed (a) depreciation using a method other than straight-line for its estimated useful life, (b) additional first-year depreciation, or (c) depreciation using ACRS under section 168 of the Code. If an employee uses actual costs for an automobile that has been covered by a FAVR allowance, the employee must use straight-line depreciation for the automobile's estimated useful life (subject to the applicable depreciation deduction limitations under section 280F for any passenger automobile).

(2) The total amount of the depreciation component for the retention period taken into account in computing the periodic fixed payments for that retention period may not exceed the excess of the standard automobile cost over the residual value of the standard automobile. In addition, the total amount of such depreciation component may not exceed the sum of the annual section 280F limitations on depreciation (in effect at the beginning of the retention period) that apply to the standard automobile during the retention period.

(3) The depreciation included in each periodic fixed payment portion of a FAVR allowance paid with respect to an automobile will reduce the basis of the automobile (but not below zero) in determining adjusted basis as required by section 1016 of the Code. See section 7.07(2) for the requirement that the employer report the depreciation component of a periodic fixed payment to the employee.

.05 *FAVR allowance limitations.*

(1) A FAVR allowance may be paid only to an employee who substantiates to the payor for a calendar year at least 5,000 miles driven in connection with the performance of services as an employee of the employer or, if greater, 80 percent of the annual business mileage of that FAVR allowance. If the employee is covered by the FAVR allowance for less than the entire calendar year, these limits may be prorated on a monthly basis.

(2) A FAVR allowance may not be paid to a control employee (as defined in section 1.61-21(f)(5) and (6) of the regulations, excluding the $100,000 limitation in paragraph (f)(5)(iii)).

(3) At no time during a calendar year may a majority of the employees covered by a FAVR allowance be management employees.

(4) At all times during a calendar year at least 10 employees of an employer must be covered by one or more FAVR allowances.

(5) A FAVR allowance may be paid only with respect to an automobile (a) owned by the employee receiving the payment, (b) the cost of which, when new, is at least 90 percent of the standard automobile cost taken into account for purposes of determining the FAVR allowance for the first calendar year the employee receives the allowance with respect to

that automobile, and (c) the model year of which does not differ from the current calendar year by more than the number of years in the retention period.

(6) The insurance cost component of a FAVR allowance must be based on the rates charged in the base locality for insurance coverage on the standard automobile during the current calendar year without taking into account such rate-increasing factors as poor driving records or young drivers.

(7) A FAVR allowance may be paid only to an employee whose insurance coverage limits on the automobile with respect to which the FAVR allowance is paid are at least equal to the insurance coverage limits used to compute the periodic fixed payment under that FAVR allowance.

.06 *Employee reporting.* Within 30 days after an employee's automobile is initially covered by a FAVR allowance, or is again covered by a FAVR allowance if such coverage has lapsed, the employee by written declaration must provide the payor with the following information: (a) the make, model, and year of the automobile owned by the employee, (b) written proof of the insurance coverage limits on the automobile, (c) the odometer reading of the automobile, (d) the purchase price of the automobile, and (e) whether the employee has claimed depreciation with respect to the automobile using any of the depreciation methods prohibited by section 7.04(1). The information described in (a), (b), and (c) of the preceding sentence also must be supplied by the employee to the payor within 30 days after the beginning of each calendar year that the employee's automobile is covered by a FAVR allowance.

.07 *Payor recordkeeping and reporting.*

(1) The payor or its agent must maintain written records setting forth (a) the statistical data and projections on which the FAVR allowance payments are based, and (b) the information provided by the employees pursuant to section 7.06.

(2) Within 30 days of the end of each calendar year, the employer must provide each employee covered by a FAVR allowance during that year with a statement listing the amount of depreciation included in each periodic fixed payment portion of the FAVR allowance paid during that calendar year and explaining that by receiving a FAVR allowance the employee has elected to exclude the automobile from ACRS pursuant to section 168(f)(1) of the Code.

.08 *Failure to meet section 7 requirements.* If an employee receives a mileage allowance that fails to meet one or more of the requirements of section 7, the employee may not be treated as covered by any FAVR allowance of the payor during the period of such failure. Nevertheless, the expenses to which that mileage allowance relates may be deemed substantiated using the method described in sections 4, 8.01(1), and 8.02 to the extent the requirements of those sections are met.

SEC. 8. APPLICATION

.01 If a payor pays a mileage allowance in lieu of reimbursing actual transportation expenses incurred or to be incurred by an employee, the amount of the expenses that is deemed substantiated to the payor is either

(1) for any mileage allowance other than a FAVR allowance, the lesser of the amount paid under the mileage allowance or the applicable standard mileage rate in section 4.01 or 5.01 multiplied by the number of business miles substantiated by the employee; or

(2) for a FAVR allowance, the amount paid under the FAVR allowance less the sum of (a) any periodic variable rate payment that relates to miles in excess of the business miles substantiated by the employee and that the employee fails to return to the payor although required to do so, (b) any portion of a periodic fixed payment that relates to a period during which the employee is treated as not covered by the FAVR allowance and that the employee fails to return to the payor although required to do so, and (c) any optional high mileage payments.

.02 If the amount of transportation expenses is deemed substantiated under the rules provided in section 8.01, and the employee actually substantiates to the payor the elements of time, place (or use), and business purpose of the transportation expenses in accordance with paragraphs (b)(2) (travel away from home), (b)(6) (listed property, which includes passenger automobiles and any other property used as a means of transportation), and (c) of section 1.274-5T of the temporary regulations, the employee is deemed to satisfy the adequate accounting requirements of section 1.274-5T(f), as well as the requirement to substantiate by adequate records or other sufficient evidence for purposes of section 1.274-5T(c). See section 1.62-2(e)(1) for the rule that an arrangement requires business expenses to be substantiated to the payor within a reasonable period of time.

.03 An arrangement providing mileage allowances will be treated as satisfying the requirement of section 1.62-2(f)(2) of the regulations with respect to returning amounts in excess of expenses as follows:

(1) For a mileage allowance other than a FAVR allowance, the requirement to return excess amounts will be treated as satisfied if the employee is required to return within a reasonable period of time (as defined in section 1.62-2(g)) any portion of such an allowance that relates to miles of travel not substantiated by the employee, even though the arrangement does not require the employee to return the portion of such an allowance that relates to the miles of travel substantiated and that exceeds the amount of the employee's expenses deemed substantiated. For example, assume a payor provides an employee an advance mileage allowance of $60 based on an anticipated 200 business miles at 30 cents per mile (at a time when the applicable business standard mileage rate is 27.5 cents per mile), and the employee substantiates 120 business miles. The requirement to return excess amounts will be treated as satisfied if the employee is required to return the portion of the allowance that relates to the 80 unsubstantiated business miles ($24), even though the employee is not required to return the portion of the allowance ($3.00) that exceeds the amount of the employee's expenses deemed substantiated under section 8.01 ($33.00) for the 120 substantiated business miles. However, the $3.00 excess portion of the allowance is treated as paid under a nonaccountable plan as discussed in section 8.05.

(2) For a FAVR allowance, the requirement to return excess amounts will be treated as satisfied if the employee is required to return within a reasonable period of time (as defined in section 1.62-2(g)), (a) the portion (if any) of the periodic variable payment received that relates to miles in excess of the business miles substantiated by the employee, and (b) the portion (if any) of a periodic fixed payment that relates to a period during which the employee was not covered by the FAVR allowance.

.04 An employee is not required to include in gross income the portion of a mileage allowance received from a payor that is less than or equal to the amount deemed substantiated under section 8.01, provided the employee substantiates in accordance with section 8.02. See section 1.274-5T(f)(2)(i) of the temporary regulations. In addition, such portion of the allowance is treated as paid under an accountable plan, is not reported as wages or other compensation on the employee's Form W-2, and is exempt from the withholding and payment of employment taxes. See section 1.62-2(c)(2) and (c)(4).

.05 An employee is required to include in gross income only the portion of a mileage allowance received from a payor that exceeds the amount deemed substantiated under section 8.01, provided the employee substantiates in accordance with section 8.02. See section 1.274-5T(f)(2)(ii) of the temporary regulations. In addition, the excess portion of the allowance is treated as paid under a nonaccountable plan, is reported as wages or other compensation on the employee's Form W-2, and is subject to withholding and payment of employment taxes. See section 1.62-2(c)(3)(ii), (c)(5), and (h)(2)(i)(B).

.06 If the amount of the expenses deemed substantiated under the rules provided in section 8.01 is less than the amount of the employee's business transportation expenses, the employee may claim an itemized deduction for the amount by which the business transportation expenses exceed the amount that is deemed substantiated, provided the employee substantiates all the business transportation expenses, includes on Form 2106, Employee Business Expenses, the deemed substantiated portion of the mileage allowance received from the payor, and includes in gross income the portion (if any) of the mileage allowance received from the payor that exceeds the amount deemed substantiated. See section 1.274-5T(f)(2)(iii) of the temporary regulations. However, for purposes of claiming this itemized deduction, substantiation of the amount of the expenses is not required if the employee is claiming a deduction that is equal to or less than the applicable standard mileage rate multiplied by the number of business miles substantiated by the employee minus the amount deemed substantiated under section 8.01. The itemized deduction is subject to the 2-percent floor on miscellaneous itemized deductions provided in section 67.

.07 An employee may deduct an amount computed pursuant to section 4.01 or 5.01 only as an itemized deduction. This itemized deduction is subject to the 2-percent floor on miscellaneous itemized deductions provided in section 67 of the Code.

.08 A self-employed individual may deduct an amount computed pursuant to section 4.01 or 5.01 in determining adjusted gross income under section 62(a)(1) of the Code.

.09 If a payor's reimbursement or other expense allowance arrangement evidences a pattern of abuse of the rules of section 62(c) of the Code and the regulations thereunder, all payments under the arrangement will be treated as made under a nonaccountable plan. Thus, such payments are included in the employee's gross income, are reported as wages or other compensation on the employee's Form W-2, and are subject to withholding and payment of employment taxes. See section 1.62- 2(c)(3), (c)(5), and (h)(2).

SEC. 9. WITHHOLDING AND PAYMENT OF EMPLOYMENT TAXES

.01 The portion of a mileage allowance (other than a FAVR allowance), if any, that relates to the miles of business travel substantiated and that exceeds the amount deemed substantiated for those miles under section 8.01(1) is subject to withholding and payment of employment taxes. See section 1.62-2(h)(2)(i)(B).

(1) In the case of a mileage allowance paid as a reimbursement, the excess described in this section 9.01 is subject to withholding and payment of employment taxes in the payroll period in which the payor reimburses the expenses for the business miles substantiated. See section 1.62-2(h)(2)(i)(B)(*2*).

(2) In the case of a mileage allowance paid as an advance, the excess described in this section 9.01 is subject to withholding and payment of employment taxes no later than the first payroll period following the payroll period in which the business miles with respect to which the advance was paid are substantiated. See section 1.62-2(h)(2)(i)(B)(*3*). If some or all of the business miles with respect to which the advance was paid are not substantiated within a reasonable period of time and the employee does not return the portion of the allowance that relates to those miles within a reasonable period of time, the portion of the allowance that relates to those miles is subject to withholding and payment of employment taxes no later than the first payroll period following the end of the reasonable period. See section 1.62-2(h)(2)(i)(A).

(3) In the case of a mileage allowance that is not computed on the basis of a fixed amount per mile of travel (e.g., a mileage allowance that combines periodic fixed and variable rate payments, but that does not satisfy the requirements of section 7), the payor must compute the amount, if any, that exceeds the amount deemed substantiated under section 8.01(1) periodically (no less frequently than quarterly) by comparing the total mileage allowance paid for the period to the applicable standard mileage rate in section 4.01 or 5.01 multiplied by the number of business miles substantiated by the employee for the period. Any excess is subject to withholding and payment of employment taxes no later than the first payroll period following the payroll period in which the excess is computed. See section 1.62-2(h)(2)(i)(B)(*4*).

(4) For example, assume an employer pays its employees a mileage allowance at a rate of 30 cents per mile (when the business standard mileage rate is 27.5 cents per mile). The employer does not require the return of the portion of the allowance

(2.5 cents) that exceeds the business standard mileage rate for the business miles substantiated. In June, the employer advances an employee $150 for 500 miles to be traveled during the month. In July, the employee substantiates to the employer 400 business miles traveled in June and returns $30 to the employer for the 100 business miles not traveled. The amount deemed substantiated for the 400 miles traveled is $110 and the employee is not required to return the remaining $10. No later than the first payroll period following the payroll period in which the 400 business miles traveled are substantiated, the employer must withhold and pay employment taxes on $10.

.02 The portion of a FAVR allowance, if any, that exceeds the amount deemed substantiated for those miles under section 8.01(2) is subject to withholding and payment of employment taxes. See section 1.62-2(h)(2)-(i)(B).

(1) Any periodic variable rate payment that relates to miles in excess of the business miles substantiated by the employee and that the employee fails to return within a reasonable period, and any portion of a periodic fixed payment that relates to a period during which the employee is treated as not covered by the FAVR allowance and that the employee fails to return within a reasonable period, is subject to withholding and payment of employment taxes no later than the first payroll period following the end of the reasonable period. See section 1.62-2(h)(2)(i)(A).

(2) Any optional high mileage payments are subject to withholding and payment of employment taxes when paid.

SEC. 10. EFFECT ON OTHER DOCUMENTS

Rev. Proc. 89-66, 1989-2 C.B. 792, as amplified by Rev. Proc. 90-34, 1990-1 C.B. 552, is hereby superseded for mileage allowances paid to an employee on or after January 1, 1991, with respect to transportation expenses paid or incurred on or after January 1, 1991, and, for purposes of computing the amount allowable as a deduction, for transportation expenses paid or incurred on or after January 1, 1991.

26 CFR 601.105: Examination of returns and claims for refund, credit, or abatement; determination of correct tax liability.
(Also Part I, Sections 62, 162, 267, 274; 1.62-2, 1.162-17, 1.274-5T.)

Rev. Proc. 90-60

SECTION 1. PURPOSE

This revenue procedure updates Rev. Proc. 89-67, 1989-2 C.B. 797, as amplified, modified, and clarified, by providing rules under which the amount of ordinary and necessary business expenses of an employee for lodging, meal, and/or incidental expenses incurred while traveling away from home will be deemed substantiated under section 1.274-5T of the temporary Income Tax Regulations when a payor (the employer, its agent, or a third party) provides a per diem allowance under a reimbursement or other expense allowance arrangement to pay for such expenses. This revenue procedure also provides an optional method for employees and self-employed individuals to use in computing the deductible costs of business meal and incidental expenses paid or incurred while traveling away from home. Use of a method described in this revenue procedure is not mandatory and a taxpayer may use actual allowable expenses if the taxpayer maintains adequate records or other sufficient evidence for proper substantiation.

SEC. 2. BACKGROUND

.01 Section 162(a) of the Internal Revenue Code allows a deduction for all the ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business. Under that provision, an employee or self-employed individual may deduct expenses paid or incurred while traveling away from home in pursuit of a trade or business. However, under section 262, no portion of such travel expenses that is attributable to personal, living, or family expenses is deductible.

.02 Section 274(d) of the Code provides, in part, that no deduction shall be allowed under section 162 for any traveling expense (including meals and lodging while away from home) unless the taxpayer complies with certain substantiation requirements. The section further provides that regulations may prescribe that some or all of the substantiation requirements do not apply to an expense that does not exceed an amount prescribed by such regulations.

.03 Section 1.274-5T(g) of the temporary regulations, in part, grants the Commissioner the authority to prescribe rules relating to reimbursement arrangements or per diem allowances for ordinary and necessary expenses paid or incurred while traveling away from home. Pursuant to this grant of authority, the Commissioner may prescribe rules under which such arrangements or allowances, if in accordance with reasonable business practice, will be regarded (1) as equivalent to substantiation, by adequate records or other sufficient evidence, of the amount of such travel expenses for purposes of section 1.274-5T(c), and (2) as satisfying the requirements of an adequate accounting to the employer of the amount of such travel expenses for purposes of section 1.274-5T(f).

.04 Section 1.274-5T(j) of the temporary regulations grants the Commissioner the authority to establish a method under which a taxpayer may elect to use a specified amount for meals paid or incurred while traveling away from home in lieu of substantiating the actual cost of meals.

.05 For purposes of determining adjusted gross income, section 62(a)(2)(A) of the Code allows an employee a deduction for expenses allowed by Part VI (section 161 and following), subchapter B, chapter 1 of the Code, paid or incurred by the employee in connection with the performance of services as an employee under a reimbursement or other expense allowance arrangement with a payor.

.06 Section 62(c) of the Code provides that an arrangement will not be treated as a reimbursement or other expense allowance arrangement for purposes of section 62(a)(2)(A) if it—

(1) does not require the employee to substantiate the expenses covered by the arrangement to the payor, or

(2) provides the employee with the right to retain any amount in excess of the substantiated expenses covered under the arrangement.

Section 62(c) further provides that the substantiation requirements described therein shall not apply to any expense

to the extent that, under the grant of regulatory authority prescribed in section 274(d), the Commissioner has provided that substantiation is not required for such expense.

.07 Under section 1.62-2(c)(1) of the Income Tax Regulations, a reimbursement or other expense allowance arrangement satisfies the requirements of section 62(c) of the Code if it meets the requirements of business connection, substantiation, and returning amounts in excess of expenses as specified in the regulations. Section 1.62-2(e)(2) specifically provides that substantiation of certain business expenses in accordance with rules prescribed under the authority of section 1.274-5T(g) or (j) will be treated as substantiation of the amount of such expenses for purposes of section 1.62-2. Under section 1.62-2(f)(2), the Commissioner may prescribe rules under which an arrangement providing per diem allowances will be treated as satisfying the requirement of returning amounts in excess of expenses, even though the arrangement does not require the employee to return the portion of such an allowance that relates to days of travel substantiated and that exceeds the amount of the employee's expenses deemed substantiated pursuant to rules prescribed under section 274(d), provided the allowance is reasonably calculated not to exceed the amount of the employee's expenses or anticipated expenses and the employee is required to return any portion of such an allowance that relates to days of travel not substantiated.

.08 Section 1.62-2(h)(2)(i)(B) of the regulations provides that if a payor pays a per diem allowance that meets the requirements of section 1.62-2(c)(1), the portion, if any, of the allowance that relates to days of travel substantiated in accordance with section 1.62(e), that exceeds the amount of the employee's expenses deemed substantiated for such travel pursuant to rules prescribed under section 274(d) of the Code and 1.274-5T(g), and that the employee is not required to return, is subject to withholding and payment of employment taxes. See sections 31.3121(a)-3, 31.3231(e)-3, 31.3306(b)-2, and 31.3401(a)-4. Because the employee is not required to return this excess portion, the reasonable period of time provisions of section 1.62-2(g) (relating to the return of excess amounts) do not apply to this portion.

.09 Under section 1.62-2(h)-(2)(i)(B)(*4*) of the regulations, the Commissioner may, in his discretion, prescribe special rules regarding the timing of withholding and payment of employment taxes on per diem allowances.

SEC. 3. DEFINITIONS

.01 *Per diem allowance.* The term "per diem allowance" means a payment under a reimbursement or other expense allowance arrangement that meets the requirements specified in section 1.62-2(c)(1) of the regulations and that is

(1) paid with respect to ordinary and necessary business expenses incurred, or which the payor reasonably anticipates will be incurred, by an employee for lodging, meal, and/or incidental expenses for travel away from home in connection with the performance of services as an employee of the employer,

(2) reasonably calculated not to exceed the amount of the expenses or the anticipated expenses, and

(3) paid at the applicable Federal per diem rate, a flat rate or stated schedule, or in accordance with any other Service-specified rate or schedule.

.02 *Federal per diem rate.*

(1) *General rule.* The Federal per diem rate is equal to the sum of the Federal lodging expense rate and the Federal meal and incidental expense (M&IE) rate for the locality of travel. The Federal per diem rate, the Federal lodging expense rate, and the Federal M&IE rate for a locality in the continental United States ("CONUS") are set forth in Appendix A of 41 C.F.R., Chapter 301. See 41 C.F.R. Part 301-7 (1990) for specific rules regarding these Federal rates. The Federal per diem rates for nonforeign localities outside the continental United States ("OCONUS") (including Alaska, Hawaii, Puerto Rico, the Northern Mariana Islands, and the possessions of the United States) are established by the Secretary of Defense and listed in Civilian Personnel Per Diem Bulletins published periodically in the *Federal Register. See, e.g.*, Civilian Personnel Per Diem Bulletin Number 153, 55 Fed. Reg. 50,864 (December 11, 1990). The Federal per diem rates for foreign OCONUS localities are established by the Secretary of State and published, together with the rates for nonforeign OCONUS localities, in the Per Diem Supplement to the Standardized Regulations (Government Civilians, Foreign Areas). *See, e.g.*, Maximum Travel Per Diem Allowances for Foreign Areas, PD Supplement 319, issued December 1, 1990.

(2) *Outside CONUS.* For OCONUS travel away from home, if a separately identified Federal lodging expense rate or Federal M&IE rate does not exist for the OCONUS locality of travel, 60 percent of the applicable Federal per diem rate for that locality of travel is treated as equivalent to the Federal lodging expense rate for that locality and 40 percent of the applicable Federal per diem rate for that locality of travel is treated as equivalent to the Federal M&IE rate for that locality. If a separately identified Federal lodging expense rate or Federal M&IE rate is adopted for an OCONUS locality of travel for which no such separately identified rate previously existed, that rate shall apply to all travel within such locality beginning 30 days after its publication.

(3) *Locality of travel.* The term "locality of travel" means the locality where an employee traveling away from home in connection with the performance of services as an employee of the employer stops for sleep or rest.

(4) *Incidental expenses.* The term "incidental expenses" includes, but is not limited to, expenses for laundry, cleaning and pressing of clothing, and fees and tips for services, such as for waiters and baggage handlers. The term "incidental expenses" does not include taxicab fares or the costs of telegrams or telephone calls.

.03 *Flat rate or stated schedule.*

(1) *In general.* Except as provided in section 3.03(2), an allowance is paid at a flat rate or stated schedule if it is provided on a uniform and objective basis with respect to the expenses described in section 3.01. Such allowance may be paid with respect to the number of days away from home in connection with the performance of services as an employee or on any other basis that is

consistently applied and in accordance with reasonable business practice. Thus, for example, an hourly payment to cover meal and incidental expenses paid to a pilot or flight attendant who is traveling away from home in connection with the performance of services as an employee is an allowance paid at a flat rate or stated schedule. Likewise, a payment based on the number of miles traveled (*e.g.*, cents per mile) to cover meal and incidental expenses paid to an over-the-road truck driver who is traveling away from home in connection with the performance of services as an employee is an allowance paid at a flat rate or stated schedule.

(2) *Limitation.* For purposes of this revenue procedure, an allowance that is computed on a basis similar to that used in computing the employee's wages or other compensation (e.g., the number of hours worked, miles traveled, or pieces produced) does not meet the business connection requirement of section 1.62-2(d), is not a per diem allowance, and is not paid at a flat rate or stated schedule, unless, as of December 12, 1989, (a) the allowance was identified by the payor either by making a separate payment or by specifically identifying the amount of the allowance, or (b) an allowance computed on that basis was commonly used in the industry in which the employee is employed. See section 1.62-2(d)(3)(ii) of the regulations.

SEC. 4. PER DIEM SUBSTANTIATION METHOD

.01 *Per diem allowance.* If a payor pays a per diem allowance in lieu of reimbursing actual expenses for lodging, meal, and incidental expenses incurred or to be incurred by an employee for travel away from home, the amount of the expenses that is deemed substantiated for each calendar day (or part of the calendar day, see section 6.04) is equal to the lesser of the per diem allowance for such day or the amount computed at the Federal per diem rate for the locality of travel for such day (or part of such day, see section 6.04).

.02 *Meals only per diem allowance.* If a payor pays a per diem allowance only for meal and incidental expenses in lieu of reimbursing actual expenses for meal and incidental expenses incurred or to be incurred by an employee for travel away from home, the amount of the expenses that is deemed substantiated for each calendar day (or part of the calendar day, see section 6.04) is equal to the lesser of the per diem allowance for such day or the amount computed at the Federal M&IE rate for the locality of travel for such day (or part of such day, see section 6.04). A per diem allowance is treated as paid only for meal and incidental expenses if (1) the payor pays the employee for actual expenses for lodging, (2) the payor provides the lodging in kind, (3) the payor pays the actual expenses for lodging directly to the provider of the lodging, or (4) the payor does not have a reasonable belief that lodging expenses were or will be incurred by the employee.

.03 *Optional method for meals only deduction.* In lieu of using actual expenses, employees and self-employed individuals, in computing the amount allowable as a deduction for ordinary and necessary meal and incidental expenses paid or incurred for travel away from home, may use an amount computed at the Federal M&IE rate for the locality of travel for each calendar day (or part thereof, see section 6.04) the employee or self-employed individual is away from home. Such amount will be deemed substantiated for purposes of paragraphs (b)(2) (travel away from home) and (c) of section 1.274-5T of the temporary regulations, provided the employee or self-employed individual substantiates the elements of time, place, and business purpose of the travel expenses in accordance with those regulations.

.04 *Special rules for transportation industry.*

(1) *In general.* This section 4.04 applies to (a) a payor that pays a per diem allowance only for meal and incidental expenses for travel away from home as described in section 4.02 to an employee in the transportation industry, or (b) an employee or self-employed individual in the transportation industry who computes the amount allowable as a deduction for meal and incidental expenses for travel away from home in accordance with section 4.03.

(2) *Rates.* A taxpayer described in section 4.04(1) may treat $30 as the Federal M&IE rate for any locality of travel in CONUS, and/or $34 as the Federal M&IE rate for any locality of travel OCONUS. A payor that uses either (or both) of these special rates with respect to an employee must use these special rate(s) for all amounts subject to section 4.02 paid to that employee for travel away from home within CONUS and/or OCONUS, as the case may be, during the calendar year. Similarly, an employee or self-employed individual that uses either (or both) of these special rates must use these special rate(s) for all amounts computed pursuant to section 4.03 for travel away from home within CONUS and/or OCONUS, as the case may be, during the calendar year.

(3) *Periodic rule.* A payor described in section 4.04(1) may compute the amount of the employee's expenses that is deemed substantiated under section 4.02 periodically (not less frequently than monthly), rather than daily, by comparing the total per diem allowance paid for the period to the sum of the amounts computed at the Federal M&IE rate(s) for the localities of travel for the days (or partial days, see section 6.04) the employee is away from home during the period. For example, assume an employee in the transportation industry travels away from home within CONUS on 17 days (including partial days under section 6.04) during a calendar month and receives a per diem allowance only for meal and incidental expenses from a payor that uses the special rule under section 4.04(2). The amount deemed substantiated under section 4.02 is equal to the lesser of the total per diem allowance paid for the month or $510 (17 days at $30 per day).

(4) *Transportation industry defined.* For purposes of this section 4.04, an employee or self-employed individual is "in the transportation industry" only if the employee's or individual's work (a) is of the type that directly involves moving people or goods by airplane, barge, bus, ship, train, or truck, and (b) regularly requires travel away from home which, during any single trip away from home, usually involves travel to localities with differing Federal M&IE rates. For purposes of the preceding

sentence, a payor must determine that an employee or a group of employees is "in the transportation industry" by using a method that is consistently applied and in accordance with reasonable business practice.

SEC. 5. HIGH-LOW SUBSTANTIATION METHOD

.01 *General rule.* If a payor pays a per diem allowance in lieu of reimbursing actual expenses for lodging, meal, and incidental expenses incurred or to be incurred by an employee for travel away from home and the payor uses the high-low substantiation method described in this section 5 for travel within CONUS, the amount of the expenses that is deemed substantiated for each calendar day (or part of the calendar day, see section 6.04) is equal to the lesser of the per diem allowance for such day or the amount computed at the rate set forth in section 5.02 for the locality of travel for such day (or part of such day, see section 6.04). This high-low substantiation method may be used in lieu of the per diem substantiation method provided in section 4.01, but may not be used in lieu of the meals only substantiation method provided in section 4.02 or 4.03.

.02 *Specific high-low rates.* The rate set forth in this section 5.02 is $130 for any "high-cost locality" specified in section 5.03, or $88 for any other locality within CONUS. Whichever rate applies, it is applied as if it were the Federal per diem rate for the locality of travel. For purposes of applying the high-low substantiation method, the Federal M&IE rate shall be treated as $34 for a high-cost locality and $26 for any other locality within CONUS, and the Federal lodging expense rate shall be treated as $96 for a high-cost locality and $62 for any other locality within CONUS.

.03 *High-cost localities.* The following localities with a Federal per diem rate of $109 or more are high-cost localities:

Key City	*County and other defined location*
California	
Death Valley	Inyo
Los Angeles	Los Angeles, Kern, Orange, and Ventura Counties; Edwards Air Force Base; Naval Weapons Center and Ordnance Test Station, China Lake
San Diego	San Diego
San Francisco	San Francisco
Santa Barbara	Santa Barbara
Colorado	
Aspen	Pitkin
Vail	Eagle
District of Columbia	
Washington, D.C	Washington, D.C.; the cities of Alexandria, Falls Church, and Fairfax, and the counties of Arlington, Loudoun, and Fairfax in Virginia; and the counties of Montgomery and Prince Georges in Maryland.
Florida	
Key West	Monroe
Georgia	
Atlanta	Clayton, De Kalb, Fulton, and Cobb
Illinois	
Chicago	Du Page, Cook, and Lake
Maryland	
Annapolis	Anne Arundel
Columbia	Howard
Ocean City	Worcester
Massachusetts	
Andover	Essex
Boston, Lowell, and Quincy	Suffolk, Middlesex, and Norfolk
Martha's Vineyard/Nantucket	Dukes and Nantucket
Plymouth	Plymouth
Michigan	
Detroit	Wayne
New Jersey	
Atlantic City	Atlantic
Newark	Bergen, Essex, Hudson, Passaic, and Union
Ocean City/Cape May	Cape May
Princeton/Trenton	Mercer

Key City	*County and other defined location*
New York	
New York City	The boroughs of Bronx, Brooklyn, Manhattan, Queens, and Staten Island; Nassau and Suffolk Counties
White Plains	Westchester
Pennsylvania	
Philadelphia	Philadelphia; city of Bala Cynwyd in Montgomery County
Rhode Island	
Newport	Newport
South Carolina	
Hilton Head	Beaufort

.04 *Changes to section 5.03 for 1991.* For 1991, San Diego, California, Key West, Florida, and Detroit, Michigan have been added to the list of high-cost localities. Palm Springs, California, Conway, New Hampshire, and Dallas/Fort Worth, Texas are no longer included in the list of high-cost localities for 1991.

.05 *Specific limitation.* A payor that uses the high-low substantiation method with respect to an employee must use that method for all amounts paid to that employee for travel away from home within CONUS during the calendar year. However, with respect to that employee, the payor may still reimburse actual expenses or use the meals only per diem method described in section 4.02 for any travel away from home, and may use the per diem substantiation method described in section 4.01 for any OCONUS travel away from home.

SEC. 6. LIMITATIONS AND SPECIAL RULES

.01 *In general.* The Federal per diem rate, the Federal lodging expense rate, and the Federal M&IE rate described in section 3.02 for the locality of travel will be applied in the same manner as applied under the Federal Travel Regulations, 41 C.F.R. Part 301-7 (1990), except as provided in sections 6.02 through 6.04.

.02 *Federal per diem or lodging expense rate.* A receipt for lodging expenses is not required in order to apply the Federal per diem rate or the Federal lodging expense rate for the locality of travel.

.03 *Federal per diem or M&IE rate.* A payor is not required to reduce the Federal per diem rate or the Federal M&IE rate for the locality of travel for meals provided in kind, provided the payor has a reasonable belief that meal and incidental expenses were or will be incurred by the employee. In addition, the 6-hour/$6 limitation formerly provided in 41 C.F.R. Part 301-7.6(c)(2)(iii) (1990) of the Federal Travel Regulations has been eliminated, effective December 1, 1990.

.04 *Proration of the Federal per diem or M&IE rate.* Pursuant to the Federal Travel Regulations, in determining the Federal per diem rate or the Federal M&IE rate for the locality of travel, the full applicable Federal M&IE rate is available for a full day of travel from 12:01 a.m. to 12:00 midnight. For purposes of determining the amount deemed substantiated under section 4 or 5 with respect to partial days of travel away from home, either of the following methods may be used to prorate the Federal per diem rate or the Federal M&IE rate:

(1) Such rate may be prorated using the method prescribed by the Federal Travel Regulations under which one- fourth of the applicable Federal M&IE rate is allowed for each 6-hour quarter of the day (i.e., midnight to 6 a.m., 6 a.m. to noon, noon to 6 p.m., and 6 p.m. to midnight) during any portion of which the employee or self-employed individual is traveling away from home in connection with the performance of services as an employee or self-employed individual; or

(2) Such rate may be prorated using any method that is consistently applied and in accordance with reasonable business practice. For example, if an employee travels away from home from 9 a.m. one day to 5 p.m. the next day, a method of proration that results in an amount equal to 2 times the Federal M&IE rate will be treated as being in accordance with reasonable business practice (even though only 1 1/2 times the Federal M&IE rate would be allowed under the Federal Travel Regulations). Similarly, if a self-employed individual travels away from home from 7 p.m. one day to 9 p.m. the next day, a method of proration that results in an amount equal to 1 1/2 times the Federal M&IE rate will be treated as being in accordance with reasonable business practice (even though only 1 1/4 times the Federal M&IE rate would be allowed under the Federal Travel Regulations).

.05 *Application of the 80-percent limitation on meal expenses.* When a per diem allowance is paid only for meal and incidental expenses or when an amount for meal and incidental expenses is computed pursuant to section 4.03, an amount equal to the lesser of the per diem allowance for each calendar day (or part of the calendar day, see section 6.04) or the Federal M&IE rate for the locality of travel for such day (or part of such day, see section 6.04) is treated as an expense for food and beverages. When a per diem allowance is paid for lodging, meal, and incidental expenses, the payor must treat an amount equal to the Federal M&IE rate for the locality of travel for each calendar day (or part of the calendar day, see section 6.04) the employee is away from home as an expense for food and beverages. For purposes of the preceding sentence, when a per diem allowance for lodging, meal and incidental expenses for a full day of travel is paid at a rate that is less than the Federal per diem rate for the locality of travel, the payor may treat an amount equal to 40 percent of

such per diem allowance for a full day of travel as the Federal M&IE rate for the locality of travel.

.06 *No double reimbursement or deduction.* If a payor pays a per diem allowance in lieu of reimbursing actual expenses for lodging, meal, and/or incidental expenses in accordance with section 4 or 5, any additional payment with respect to such expenses is treated as paid under a nonaccountable plan, is included in the employee's gross income, is reported as wages or other compensation on the employee's Form W-2, and is subject to withholding and payment of employment taxes. Similarly, if an employee or self-employed individual computes the amount allowable as a deduction for meal and incidental expenses for travel away from home in accordance with section 4.03 or 4.04, no other deduction is allowed to the employee or self-employed individual with respect to such expenses. For example, assume an employee receives a per diem allowance from a payor for lodging, meal, and/or incidental expenses incurred while traveling away from home. During that trip, the employee pays for dinner for the employee and two business associates. The payor reimburses as a business entertainment meal expense the meal expense for the employee and the two business associates. Because the payor also pays a per diem allowance to cover the cost of the employee's meals, the amount paid by the payor for the employee's portion of the business entertainment meal expense is treated as paid under a nonaccountable plan, is reported as wages or other compensation on the employee's Form W-2, and is subject to withholding and payment of employment taxes.

.07 *Related parties.* The provisions of this revenue procedure will not apply in any case in which a payor and an employee are related within the meaning of section 267(b) of the Code, but for this purpose the percentage of ownership interest referred to in section 267(b)(2) shall be 10 percent.

SEC. 7. APPLICATION

.01 If the amount of an expense is deemed substantiated under the rules provided in section 4 or 5, and the employee actually substantiates to the payor the elements of time, place, and business purpose of the travel expenses in accordance with paragraphs (b)(2) (travel away from home) and (c) (other than subparagraph (2)(iii)(A) thereof) of section 1.274-5T of the temporary regulations, the employee is deemed to satisfy the adequate accounting requirements of section 1.274-5T(f) as well as the requirement to substantiate by adequate records or other sufficient evidence for purposes of section 1.274-5T(c). See section 1.62-2(e)(1) for the rule that an arrangement require business expenses to be substantiated to the payor within a reasonable period of time.

.02 An arrangement providing per diem allowances will be treated as satisfying the requirement of section 1.62-2(f)(2) of the regulations with respect to returning amounts in excess of expenses if the employee is required to return within a reasonable period of time (as defined in section 1.62-2(g)) any portion of such an allowance that relates to days of travel not substantiated, even though the arrangement does not require the employee to return the portion of such an allowance that relates to days of travel substantiated and that exceeds the amount of the employee's expenses deemed substantiated. For example, assume a payor provides an employee an advance per diem allowance for meal and incidental expenses of $200, based on an anticipated 5 days of business travel at $40 per day to a locality for which the Federal M&IE rate is $34, and the employee substantiates 3 full days of business travel. The requirement to return excess amounts will be treated as satisfied if the employee is required to return within in a reasonable period of time (as defined in section 1.62-2(g)) the portion of the allowance that is attributable to the 2 unsubstantiated days of travel ($80), even though the employee is not required to return the portion of the allowance ($18) that exceeds the amount of the employee's expenses deemed substantiated under section 4.02 ($102) for the 3 substantiated days of travel. However, the $18 excess portion of the allowance is treated as paid under a nonaccountable plan as discussed in section 7.04.

.03 An employee is not required to include in gross income the portion of a per diem allowance received from a payor that is less than or equal to the amount deemed substantiated under the rules provided in section 4 or 5 if the employee substantiates the business travel expenses covered by the per diem allowance in accordance with section 7.01. See section 1.274-5T(f)(2)(i) of the temporary regulations. In addition, such portion of the allowance is treated as paid under an accountable plan, is not reported as wages or other compensation on the employee's Form W-2, and is exempt from the withholding and payment of employment taxes. See section 1.62-2(c)(2) and (c)(4).

.04 An employee is required to include in gross income only the portion of the per diem allowance received from a payor that exceeds the amount deemed substantiated under the rules provided in section 4 or 5 if the employee substantiates the business travel expenses covered by the per diem allowance in accordance with section 7.01. See section 1.274-5T(f)(2)(ii) of the temporary regulations. In addition, the excess portion of the allowance is treated as paid under a nonaccountable plan, is reported as wages or other compensation on the employee's Form W-2, and is subject to withholding and payment of employment taxes. See section 1.62-2(c)(3)(ii), (c)(5), and (h)(2)(i)(B).

.05 If the amount of the expenses that is deemed substantiated under the rules provided in section 4.01, 4.02, or 5 is less than the amount of the employee's business expenses for travel away from home, the employee may claim an itemized deduction for the amount by which the business travel expenses exceed the amount that is deemed substantiated, provided the employee substantiates all the business travel expenses, includes on Form 2106, Employee Business Expenses, the deemed substantiated portion of the per diem allowance received from the payor, and includes in gross income the portion (if any) of the per diem allowance received from the payor that exceeds the amount deemed substantiated. See section 1.274-5T(f)(2)(iii) of the temporary regulations. However, for purposes of claiming this itemized deduc-

tion with respect to meal and incidental expenses, substantiation of the amount of the expenses is not required if the employee is claiming a deduction that is equal to or less than the amount computed under section 4.03 minus the amount deemed substantiated under section 4.02 and section 7.01. The itemized deduction is subject to the 80-percent limitation on meal and entertainment expenses provided in section 274(n) of the Code and the 2-percent floor on miscellaneous itemized deductions provided in section 67.

.06 An employee who does not receive a per diem allowance for meal and incidental expenses may deduct an amount computed pursuant to section 4.03 only as an itemized deduction. This itemized deduction is subject to the 80-percent limitation on meal and entertainment expenses provided in section 274(n) of the Code and the 2-percent floor on miscellaneous itemized deductions provided in section 67.

.07 A self-employed individual may deduct an amount computed pursuant to section 4.03 in determining adjusted gross income under section 62(a)(1) of the Code. This deduction is subject to the 80-percent limitation on meal and entertainment expenses provided in section 274(n) of the Code.

.08 If a payor's reimbursement or other expense allowance arrangement evidences a pattern of abuse of the rules of section 62(c) of the Code and the regulations thereunder, all payments under the arrangement will be treated as made under a nonaccountable plan. Thus, such payments are included in the employee's gross income, are reported as wages or other compensation on the employee's Form W-2, and are subject to withholding and payment of employment taxes. See section 1.62-2(c)(3), (c)(5), and (h)(2).

SEC. 8. WITHHOLDING AND PAYMENT OF EMPLOYMENT TAXES

.01 The portion of a per diem allowance, if any, that relates to the days of business travel substantiated and that exceeds the amount deemed substantiated for those days under section 4.01, 4.02, or 5 is subject to withholding and payment of employment taxes. See 1.62-2(h)(2)(i)(B).

(1) In the case of a per diem allowance paid as a reimbursement, the excess described in this section 8.01 is subject to withholding and payment of employment taxes in the payroll period in which the payor reimburses the expenses for the days of travel substantiated. See section 1.62-2(h)(2)(i)(B)(*2*).

(2) In the case of a per diem allowance paid as an advance, the excess described in this section 8.01 is subject to withholding and payment of employment taxes no later than the first payroll period following the payroll period in which the days of travel with respect to which the advance was paid are substantiated. See section 1.62-2(h)(2)(i)(B)(*3*). If some or all of the days of travel with respect to which the advance was paid are not substantiated within a reasonable period of time and the employee does not return the portion of the allowance that relates to those days within a reasonable period of time, the portion of the allowance that relates to those days is subject to withholding and payment of employment taxes no later than the first payroll period following the end of the reasonable period. See section 1.62-2(h)(2)(i)(A).

(3) In the case of a per diem allowance only for meal and incidental expenses for travel away from home paid to an employee in the transportation industry by a payor that uses the rule in section 4.04(3), the excess of the per diem allowance paid for the period over the amount deemed substantiated for the period under section 4.02 (after applying section 4.04(3)), is subject to withholding and payment of employment taxes no later than the first payroll period following the payroll period in which the excess is computed. See section 1.62-2(h)(2)(i)(B)(*4*).

(4) For example, assume that a payor pays an employee a per diem allowance to cover business expenses for meals and lodging for travel away from home at a rate of 120 percent of the Federal per diem rate for the localities to which the employee travels. The employer does not require the employee to return the 20 percent by which the reimbursement for those expenses exceeds the Federal per diem rate. The employee substantiates six days of travel away from home: 2 days in a locality in which the Federal per diem rate is $100 and 4 days in a locality in which the Federal per diem rate is $125. The employer reimburses the employee $840 for the 6 days of travel away from home (2 x (120% x $100) + 4 x (120% x $125)), and does not require the employee to return the excess payment of $140 ((2 days x $20 ($120-$100) + 4 days x $25 ($150-$125)). For the payroll period in which the employer reimburses the expenses, the employer must withhold and pay employment taxes on $140.

SEC. 9. EFFECT ON OTHER DOCUMENTS

Rev. Proc. 89-67, 1989-2 C.B. 795, as amplified, modified, and clarified by Rev. Proc. 90-15, 1990-1 C.B. 476, and Rev. Proc. 90-38, page 363, this Bulletin, is hereby superseded for per diem allowances paid to an employee on or after January 1, 1991, with respect to lodging, meal, and/or incidental expenses paid or incurred for travel while away from home on or after January 1, 1991, and, for purposes of computing the amount allowable as a deduction, for meal and incidental expenses paid or incurred by an employee or self-employed individual for travel while away from home on or after January 1, 1991.

26 CFR 601.701: Publicity of information. (Also Part I, Sections 901, 902, 905; 1.901-1, 1.902-1, 1.905-3T)

Rev. Proc. 90-61

SECTION 1. PURPOSE

The purpose of this revenue procedure is to clarify and amplify section 3.05 of Rev. Proc. 80-18, 1980-1 C.B. 623.

SEC. 2. BACKGROUND

Article 23(1) of the United States-United Kingdom Income Tax Convention, 1980-1 C.B. 394 (the "Convention"), incorporates into the Convention the principles of sections 901 and 902 of the Internal Revenue Code of 1986, and allows United States citizens and residents a credit against their United States tax liability for certain taxes (including Advance Corporation Tax, or "ACT")

that they or corporations whose stock they own pay to the United Kingdom. The amount of the credit allowed under Article 23 and section 902 of the Code for taxes paid by subsidiary corporations depends on the amount of dividends paid by the subsidiaries directly or indirectly to the United States shareholder.

Rev. Proc. 80-18 provides rules under the Convention for computing the amounts of dividends and resulting foreign tax credits in various factual settings. Section 3.05 of Rev. Proc. 80-18 deals with the proper treatment of ACT refunds paid by the United Kingdom to United States shareholders of United Kingdom corporations, including United Kingdom corporations having United Kingdom subsidiaries. The fourth paragraph of section 3.05 provides:

> For purposes of Articles 10 and 23 of the Convention, refunded ACT offset against the United Kingdom subsidiary's mainstream tax is a deemed distribution from such subsidiary to the United Kingdom parent corporation (and from the parent to the U.S. shareholder) only if and to the extent that such refunded ACT was not useable by the parent (inasmuch as the parent owes no mainstream tax) and was imposed with respect to profits distributed by the subsidiary to the parent and which were then immediately redistributed to the U.S. shareholder. In all other cases, refunded ACT is a deemed dividend distribution only from the United Kingdom parent corporation to the U.S. shareholder.

SEC. 3. PROCEDURE

The fourth paragraph of section 3.05 of Rev. Proc. 80-18 is deleted and replaced with the following paragraphs:

> For purposes of determining a U.S. shareholder's indirect foreign tax credit arising under Articles 10 and 23 of the Convention, ACT that is paid by a United Kingdom parent corporation and refunded to the U.S. shareholder but that offset the United Kingdom subsidiary's mainstream tax is a deemed dividend distribution from the subsidiary to the United Kingdom parent (and from the parent to the U.S. shareholder) only if and to the extent that the refunded ACT is attributable to profits distributed by the subsidiary to the parent during the same taxable year as the distribution by the parent to the U.S. shareholder on which the refunded ACT was actually paid. In all other cases, refunded ACT is a deemed dividend distribution only from the United Kingdom parent corporation to the U.S. shareholder. Further, to the extent that the refund of ACT is considered to be a deemed dividend distribution from the United Kingdom subsidiary to the United Kingdom parent, the United Kingdom parent has not contributed to the capital of the United Kingdom subsidiary an amount equal to unrefunded ACT.
>
> To determine the allowable U.S. foreign tax credit in this situation, the shareholder must compute the portion of the dividend that is deemed to originate with the United Kingdom subsidiary in order to apply section 902. The amount (including refunded ACT) deemed originally to have been paid as a dividend by the United Kingdom subsidiary to its United Kingdom parent corporation will be based on (1) the rate at which ACT liability is computed, (2) the amount of ACT transferred by the United Kingdom parent to be offset against the United Kingdom subsidiary's liability, and (3) the amount actually distributed by the United Kingdom subsidiary without incurring ACT liability on the distribution. When a United Kingdom subsidiary distributes a dividend (the "actual dividend") to its United Kingdom parent corporation without paying ACT during the same taxable year in which the parent corporation distributes a dividend to its United States corporate shareholder and pays ACT, and the parent transfers to the subsidiary the right to offset that ACT against the subsidiary's mainstream tax liability, then, for purposes of computing the U.S. foreign tax credit available to the parent's qualifying U.S. shareholder under Articles 10 and 23 of the Convention, the subsidiary will be deemed to have paid a dividend to the parent in an amount computed under the following rules (in which the rate of ACT is a/b). If the amount of ACT transferred by the U.K. parent to the U.K. subsidiary is greater than or equal to $(a/a+b)$ of the amount of the actual dividend paid by the subsidiary, then the subsidiary is deemed to have paid a dividend to the parent equal to the excess of the amount of the actual dividend over $[a/2(a+b)]$ of that amount. If the amount of ACT transferred by the U.K. parent to the U.K. subsidiary is less than $(a/a+b)$ of the amount of the actual dividend, then the subsidiary is deemed to have paid a dividend equal to the excess of the amount of the actual dividend over one-half of the amount of the ACT transferred by the parent to the subsidiary.
>
> For example, assume that the rate of ACT is 1/3. The subsidiary distributes a dividend of 60 to the parent but pays no ACT. During the same taxable year, the parent distributes a dividend of 90 to the shareholder and pays ACT of 30 ($1/3 \times 90$), all of which is transferred to the subsidiary. Since 30, the amount of ACT transferred by the U.K. parent, is greater than 15 ($1/(1+3) \times 60$), the subsidiary is deemed to have paid a dividend of 52.50 ($60 - (1/8 \times 60)$). In essence, the 60 dividend paid by the U.K. subsidiary is treated as a dividend of 45 coupled with a payment of 15 of ACT, 7.50 of which will ultimately be refunded to the shareholder and treated as an additional dividend from the subsidiary. If, instead, the subsidiary had distributed a dividend of 125 to the parent without paying ACT, the 30 of ACT transferred by the U.K. parent would be less than 31.25 ($1/(1+3) \times 125$), and the subsidiary would be deemed to have paid a total dividend of 110 ($125 - (30/2)$). In essence, the actual dividend of 125 paid by the U.K. subsidiary would be treated as two dividends: a dividend of 90 on which the subsidiary paid 30 of ACT, and a dividend of 5 on which the subsidiary paid no ACT. Thus 15 of the ACT of 30 ultimately refunded to the shareholder will be treated as an additional dividend from the subsidiary.
>
> After a taxpayer determines the amount of the dividend deemed distributed by the subsidiary, sec-

tion 902 of the Internal Revenue Code will be applied to determine the foreign taxes deemed paid under that section.

SECTION 1. PURPOSE

This revenue procedure informs those who participate in the electronic filing program for Form 1040, U.S. Individual Income Tax Return, of their obligations to the Internal Revenue Service, taxpayers, and other participants.

SEC. 2. BACKGROUND

.01 Section 1.6012-5 of the Income Tax Regulations provides that the Commissioner may authorize the use, at the option of a person required to make a return, of a composite return in lieu of any form specified in 26 CFR Part 1 (Income Tax), subject to the conditions, limitations, and special rules governing the preparation, execution, filing, and correction thereof as the Commissioner may deem appropriate. The composite return shall consist of a form prescribed by the Commissioner and an attachment or attachments of magnetic tape or other approved media.

.02 An electronically filed Form 1040 is a composite return consisting of electronically transmitted data and certain paper documents. The non-electronic portion of the return consists of Form 8453, U.S. Individual Income Tax Declaration for Electronic Filing, and other paper documents that cannot be electronically transmitted. Form 8453 must be received by the Service before any electronically filed return is complete. An electronically filed return must contain the same information that a return filed completely on paper contains. See section 7 for procedures for completing Form 8453.

.03 The Service will periodically issue a publication that lists the forms and schedules that can be electronically transmitted, as well as the forms, schedules, and other information that cannot be electronically filed.

.04 In general, a tax return with a balance due cannot be electronically filed. However, the Service is conducting a limited test program for filing balance due returns that is fully described in Procedures for Electronic Filing of Individual Income Tax Returns, Publication 1345. Issues unique to balance due returns are not addressed in this revenue procedure.

.05 A tax return cannot be electronically filed after August 15, notwithstanding the fact that the taxpayer has been granted an extension to file. Form 4868, Application for Automatic Extension of Time To File U.S. Individual Income Tax Return, cannot be electronically filed.

.06 An amended tax return cannot be electronically filed. A taxpayer must file an amended tax return on paper in accordance with the instructions for Form 1040X, Amended U.S. Individual Income Tax Return.

SEC. 3. ELECTRONIC FILING PARTICIPANTS—DEFINITIONS

.01 After acceptance into the Electronic Filing Program, as described in section 4, a participant is referred to as an "Electronic Filer."

.02 An Electronic Filer is categorized as follows:

(1) ELECTRONIC RETURN ORIGINATOR. An "electronic return originator" (ERO) is either: (a) an "electronic return preparer" who prepares tax returns, including Forms 8453, for taxpayers who wish to have their returns electronically filed; or (b) an "electronic return collector" who accepts completed tax returns, including Forms 8453, from taxpayers who wish to have their returns electronically filed.

(2) SOFTWARE DEVELOPER. A "software developer" develops software for the purposes of (a) formatting returns according to the Service's electronic return specifications; and/or (b) transmitting electronic returns directly to the Service. A Soft-

ware Developer may also sell its software.

(3) TRANSMITTER. A "transmitter" transmits electronic returns directly to the IRS Series/1 Communications processor. The transmitter may also accept tax returns from Electronic Filers and directly transmit those tax returns to the Service.

03. The Electronic Filer categories are not mutually exclusive. For example, an ERO can, at the same time, be considered a Transmitter or Software Developer depending on the function(s) performed.

SEC. 4. ACCEPTANCE IN THE ELECTRONIC FILING PROGRAM

To be accepted into the Electronic Filing Program, any potential Electronic Filer must:

(1) file a properly completed Form 8633, Electronic Filer Application to File 19____ Individual Income Tax Returns Electronically with each service center to which the potential Electronic Filer intends to transmit returns.

(2) successfully complete the necessary testing at the appropriate service center(s) if the potential Electronic Filer intends to transmit electronic returns or has developed software for formatting or transmitting electronic returns; and

(3) pass a suitability check.

SEC. 5. RESPONSIBILITIES OF AN ELECTRONIC FILER

.01 To ensure that complete returns are accurately and efficiently filed, an Electronic Filer must comply with all the publications and notices of the Electronic Filing Systems Office. Currently, these publications and notices include:

(1) Procedures for Electronic Filing of Individual Income Tax Returns, Publication 1345;

(2) Electronic Return File Specifications and Record Layouts for Individual Income Tax Returns, Publication 1346; and

(3) Electronic Filing Systems Bulletin Board (EFS Bulletin Board).

.02 An Electronic Filer must maintain a high degree of integrity, compliance, and accuracy.

.03 An Electronic Filer may only accept returns for electronic filing directly from taxpayers or from another Electronic Filer.

.04 If an Electronic Filer charges a fee for the electronic transmission of a tax return, the fee may not be based on a percentage of the refund amount. An Electronic Filer may not charge a separate fee for Direct Deposit. See section 9 for a discussion of Direct Deposit.

.05 A potential Electronic Filer may not stockpile returns for electronic transmission prior to receiving official acceptance into the Electronic Filing Program. An Electronic Filer may not stockpile returns at any time. Stockpiling means collecting returns from taxpayers or from another Electronic Filer prior to official acceptance into the Electronic Filing Program, or waiting more than a few days to transmit a return after receiving the information necessary for an electronic transmission of a tax return.

.06 A previously accepted Electronic Filer must submit a revised Form 8633 to each service center where the Electronic Filer previously filed a Form 8633 to update information when there is a change to:

(1) the Firm name or Doing Business As (DBA) name:

(2) the organization's ownership structure;

(3) the electronic filing functions performed;

(4) the address, telephone or contact representative at the main office;

(5) the control or branch address-(es), contact person(s) and telephone number(s); or

(6) control or branch office(s).

.07 A previously accepted Electronic Filer must file a revised Form 8633 with the Cincinnati and/or Ogden Service Centers to transmit balance due returns.

.08 An Electronic Filer must ensure that an electronic return is filed on or before the due date of the return. A tax return is not considered filed until the electronic portion of the tax return has been acknowledged as accepted for processing and a signed Form 8453 has been received by the Service. However, if the electronic portion of a return is initially transmitted on or shortly before the due date and the Electronic Filer complies with section 7.01 of this revenue procedure, the return will be deemed timely filed.

.09 If an acknowledgement of acceptance for processing has not been received by the Electronic Filer within two work days of transmission or if an Electronic Filer receives an acknowledgement for a return that was not transmitted on the designated transmission, the Electronic Filer must immediately contact the Electronic Filing Unit at the appropriate service center for further instructions.

.10 An Electronic Filer who functions as an ERO must:

(1) comply with the procedures for securing Forms 8453 described in section 7 of this revenue procedure;

(2) furnish copies of the signed Forms 8453 and non-electronic portions of the electronic returns to the taxpayer; and

(3) retain the following material until the end of the calendar year of the electronic filing unless otherwise notified by the Service:

(a) a copy of the signed Form 8453 and the non-electronic portion of the electronic return;

(b) a complete copy of an electronically transmitted return (may be retained on magnetic media);

(c) the acknowledgement file received from the Service or from a third party transmitter.

.11 An ERO who is the paid preparer of an electronic tax return must also retain for the prescribed amount of time the materials described in section 1.6107-1(b) of the regulations that are required to be kept by an income tax return preparer.

.12 If the electronic portion of a taxpayer's return is acknowledged as rejected by the Service, the ERO must immediately advise the taxpayer that the taxpayer's return has not been filed. If the taxpayer chooses not to have the previously rejected return retransmitted or if the return cannot be accepted for processing, the taxpayer must file a paper return by the due date of the return. If the due date of the return has passed, the taxpayer must file a paper return as soon as possible with an explanation of why the return is being filed after the due date.

.13 An Electronic Filer who functions as a Transmitter must:

(1) transmit all electronic returns within a few days of receipt, retrieve

the acknowledgement file within two work days of transmission, and forward the file to the ERO within five calendar days;

(2) match the acknowledgement file to the original transmission file and resubmit those returns that are not acknowledged as accepted for processing after corrections are made;

(3) contact the appropriate service center Electronic Filing Unit for assistance if a return has been rejected after three transmission attempts, or if an acknowledgement is received for a return that was not in the original submission;

(4) ensure the security of all transmitted data; and

(5) promptly correct any transmission error that causes an electronic return to be rejected.

.14 A Transmitter who provides transmission services to another Electronic Filer must, in addition to the items covered in 5.13, also:

(1) only accept an electronic return for transmission to the IRS Series/1 Communications processor from an accepted Electronic Filer; and

(2) provide each client with the acknowledgement file for the transmitted return within five days after receipt of the acknowledgement from the Service.

.15 An Electronic Filer who functions as a Software Developer must:

(1) promptly correct any software error which causes an electronic return to be rejected;

(2) promptly distribute any software correction; and

(3) ensure that any software package that will be used to transmit any returns from multiple Electronic Filers has the capability of combining returns from these Electronic Filers into one Service transmission file taking into acount the sorting requirements of the Declaration Control Number (DCN).

SEC. 6. PENALTIES

.01 Penalties for Disclosure or Use of Information.

(1) An Electronic Filer, except a Software Developer, is a tax return preparer under the definition of section 301.7216-1(b) of the Regulations on Procedure and Administration. An Electronic Filer is subject to a criminal penalty for disclosure or use of tax return information, as described in section 301.7216-1(a). In general, that regulation provides that any preparer who discloses or uses any tax return information for a purpose other than preparing, assisting in preparing, or obtaining or providing services in connection with the preparation of a tax return is guilty of a misdemeanor. Section 6713 of the Internal Revenue Code also provides for civil penalties that may be assessed against a preparer who makes an unauthorized disclosure or use of tax return information.

(2) Under section 301.7216-2(h) of the regulations, disclosure among accepted Electronic Filers for the purpose of preparing a return is permissible. For example, it is permissible for an ERO to pass on tax return information to a Transmitter for the purpose of having an electronic return formatted and transmitted to the Service. However, if the tax return information is disclosed or used in any other way, the Transmitter may be guilty of a misdemeanor as described in paragraph (1) above.

.02 Other Preparer Penalties.

(1) Preparer penalties may be asserted against an individual or firm who meets the definition of an income tax return preparer under section 7701(a)(36) of the Code and 301.7701-15 of the regulations. Examples of preparer penalties that may be asserted under appropriate circumstances include, but are not limited to, those set forth in sections 6694, 6695, and 6713.

(2) Section 301.7701-15(d) of the regulations provides that Electronic Return Collectors, Transmitters, and Software Developers are not income tax return preparers for the purpose of assessing most preparer penalties as long as their services are limited to "typing, reproduction, or other mechanical assistance in the preparation of a return or claim for refund."

(3) If an Electronic Return Collector, Transmitter, or Software Developer alters the return information in a nonsubstantive way, this alteration will be considered to come under the "mechanical assistance" exception described in section 301.7701-15(d)(1) of the regulations. A nonsubstantive change is a correction or change limited to a transposition error, misplaced entry, spelling error, or arithmetic correction that falls within the following tolerances:

(a) the Total Tax amount, Withholding amount, Refund amount, or Amount Owed shown on Form 8453 differs from the corresponding amount on the electronic tax return by no more than $5;

(b) the Total Income amount shown on Form 8453 differs from the corresponding amount on the electronic tax return by no more than $25; or

(c) Dropping cents and rounding to whole dollars.

(4) If a Transmitter or an Electronic Return Collector alters the return information in a substantive way, rather than having the taxpayer alter the return, the Transmitter or Electronic Return Collector will be considered to be a paid preparer for purposes of section 7701(a)(36) of the Code.

(5) If it can be determined that the role of an Electronic Return Collector or Transmitter, or that the product of a Software Developer, goes beyond mechanical assistance, any of these parties may be held liable for income tax return preparer penalties. Rev. Rul. 85-189, 1985-2 C.B. 341, describes a situation where a Software Developer was determined to be an income tax return preparer and subject to certain preparer penalties.

.03 In addition to the above specified provisions, the Service reserves the right to assert all appropriate preparer, nonpreparer, and disclosure penalties against an Electronic Filer as warranted under the circumstances.

SEC. 7. FORM 8453, U.S. INDIVIDUAL INCOME TAX DECLARATION FOR ELECTRONIC FILING

.01 Procedures for Completing Form 8453.

(1) An ERO prepares the return for electronic filing, computes the tax based on the information that the taxpayer provides, and accepts the return for the purposes of electronic filing, or collects an already prepared

tax return for the purposes of electronic filing.

(2) After the return has been prepared and before the return is electronically transmitted, the taxpayer must verify the information on the electronic return and on Form 8453 and sign Form 8453. Both spouses' signatures are required on a joint return prior to the electronic transmission of the tax return. A file copy of the prepared return must be provided to the taxpayer at the time of signature.

(3) An Electronic Filer must submit the taxpayer's Form 8453 to the appropriate service center one working day after the Electronic Filer receives acknowledgment that the electronic portion of the taxpayer's return has been accepted for processing.

(4) An Electronic Filer must ensure that the Service receives by April 22 all taxpayers' Forms 8453 for all transmissions the Electronic Filer has made as of April 15, whether or not acknowledged by the Service.

(5) If an Electronic Filer functions as an ERO, the Electronic Filer must sign the ERO's Declaration on Form 8453.

(6) If the Electronic Filer is also the paid preparer, the Electronic Filer must sign the Paid Preparer's Declaration on Form 8453.

.02 Corrections to Form 8453.

(1) If the ERO changes an electronic return after Form 8453 has been signed by the taxpayer, but before it is transmitted, the ERO must have all the necessary parties described above sign a new Form 8453 with the corrections if either of the following applies:

(a) the "Total Income" (Form 8453, line 1) differs from the amount on the electronic tax return by more than $25; or

(b) the "Total Tax" (Form 8453, line 2), the "Refund" (Form 8453, line 4), or the "Amount you owe" (Form 8453, line 5), differs from the amount on the electronic tax return by more than $5.

(2) A new Form 8453 is not required for a nonsubstantive change. A nonsubstantive change is limited to a correction within the above tolerances for arithmetic errors, a transposition error, a misplaced entry, and a spelling error. The incorrect nonsubstantive information must be neatly lined through on the Form 8453 and the correct data entered next to the lined-through entry. Also, enter the initials or the name of the person making the correction.

(3) Dropping cents and rounding to whole dollars does not constitute a substantive change or alteration to the return unless the amount differs by more than the above tolerances. All rounding should be accomplished in accordance with the instructions in the Form 1040 tax package.

.03 If the Service determines that a Form 8453 is missing, the ERO must provide the Service with either a copy of the signed Form 8453 from the ERO's records or obtain a new Form 8453 from the taxpayer within five working days of the Service's request for this form.

.04 If a substitute Form 8453 is used, it must be approved by the Service prior to use. See Rev. Proc. 90-8, 1990-1 C.B. 434.

SEC. 8. INFORMATION AN ELECTRONIC FILER MUST PROVIDE TO THE TAXPAYER

.01 The ERO must furnish the taxpayer with a paper copy of the electronic material that was transmitted to the Service. This information can be contained on a replica of an official form or on an unofficial form. However, on an unofficial form, data entries must be referenced to the line numbers on an official form.

.02 The ERO must also provide the taxpayer with a paper copy of the paper portion of the taxpayer's return.

.03 The ERO must advise the taxpayer to retain a complete copy of a return and any supporting material.

.04 The ERO must advise the taxpayer that an amended return, if needed, must be filed as a paper return and mailed to the service center that would handle the taxpayer's paper return.

.05 The ERO must, upon request, provide the taxpayer with the Declaration Control Number (DCN) and the date the electronic portion of the taxpayer's return was acknowledged as accepted for processing by the Service.

SEC. 9. DIRECT DEPOSIT OF REFUNDS

.01 The Service does not guarantee a specific date that a refund will be directly deposited into the taxpayer's financial institution account. Because of disclosure laws, the Service cannot provide information to the Electronic Filer about any delay or denial of a Direct Deposit without proper written authorization.

.02 Neither the Internal Revenue Service nor Financial Management Service (FMS) is responsible for the misapplication of a Direct Deposit that is caused by error or negligence on the part of the taxpayer, Electronic Filer, financial institution, or any of their agents.

.03 An ERO must:

(1) ensure that the taxpayer is aware of all the general information regarding a Direct Deposit;

(2) not charge a separate fee for a Direct Deposit;

(3) accept any Direct Deposit election to any eligible financial institution designated by the taxpayer;

(4) ensure that the taxpayer is eligible to choose Direct Deposit;

(5) verify that the taxpayer has entered the Direct Deposit information requested on Part II of Form 8453 correctly and that the information entered is the information transmitted with the electronic portion of the return;

(6) caution the taxpayer that once an electronic return has been accepted for processing by the Service, the Direct Deposit election cannot be rescinded nor can the Routing Transit Number "RTN" of the account number be changed;

(7) notify the taxpayer if the Direct Deposit request will not be honored by the Service;

(8) advise the taxpayer of the procedures to be followed if there is a need to contact the Service about a Direct Deposit request;

(9) inform the taxpayer if the electronic portion of a return was acknowledged as accepted for processing by the Service, but the Direct Deposit request was not honored during initial processing; and

(10) not mislead the taxpayer about why a Direct Deposit was denied.

SEC. 10. REFUND ANTICIPATION LOANS (RALS)

.01 An Electronic Filer may assist a taxpayer in applying for a RAL. The RAL must be made by the financial institution designated to receive the Direct Deposit of the anticipated refund. The Service has no involvement in RALs. This is a contract between the taxpayer and the financial institution.

.02 An Electronic Filer may charge a flat fee to assist a taxpayer in applying for a RAL. The fee must be identical for all taxpayers and must not be related to the amount of the refund or RAL. The Electronic Filer cannot accept a fee from a financial institution for any service connected with an RAL that is contingent upon the amount of the refund or RAL.

.03 An Electronic Filer may disclose tax information to the lending financial institution in connection with an application for a RAL only with the taxpayer's written consent as specified in section 301.7216-3(b) of the regulations.

.04 After an Electronic Filer has been informed that the Direct Deposit request will be granted, the request may be subsequently rejected due to special processing needs of the Service. The RAL must not guarantee the date the refund will be issued or the amount of the refund. An Electronic Filer must advise the taxpayer that if a Direct Deposit is not timely, the taxpayer may be liable for interest on the RAL.

.05 An Electronic Filer that is also the return preparer, and the financial institution making the RAL, or any other entity that makes a loan based on or related to a taxpayer's anticipated refund, may not be related taxpayers within the meaning of section 267 or section 707 of the Code.

.06 An income tax return preparer may not endorse or otherwise negotiate a refund check or Direct Deposit for any other taxpayer. A preparer that is also a financial institution may not negotiate a refund check as part of the check-clearing process through the financial system after initial endorsement. Any income tax return preparer that violates this provision may be suspended from the Electronic Filing Program. In addition, section 6695(f) of the Code states that the preparer shall be subject to a penalty of $500 for each prohibited endorsement or negotiation of a refund check.

SEC. 11. ADVERTISING STANDARDS FOR AN ELECTRONIC FILER AND A FINANCIAL INSTITUTION

.01 An Electronic Filer shall comply with the advertising and solicitation provisions of 31 C.F.R. Part 10 (Treasury Department Circular No. 230). This circular prohibits the use or participation in the use of any form of public communication containing a false, fraudulent, misleading, deceptive, unduly influencing, coercive, or unfair statement or claim. The prohibition includes, but is not limited to, statements pertaining to the quality of services rendered unless subject to factual verification, claims of specialized expertise not authorized by state or federal agencies having jurisdiction over the Electronic Filer, and statements or suggestions that the ingenuity and/or prior record of an Electronic Filer rather than the merit of the matter are principal factors likely to determine the result of the matter. In addition, advertising must not imply a special relationship with the Service, FMS, or the Treasury Department. Claims for faster refunds by virtue of electronic filing must be consistent with the language in official Service publications.

.02 The use of the Service's name, "Internal Revenue Service," or "IRS" within a firm's name may result in immediate suspension from the Electronic Filing Program.

.03 The use of improper or misleading advertising in relation to the Electronic Filing Program (including the time frames for refunds and RALS) is grounds for suspension or rejection from the Electronic Filing Program.

.04 Use of Direct Deposit name and logo.

(1) The name "Direct Deposit" will be used with initial capital letters or all capital letters.

(2) The logo/graphic for Direct Deposit will be used whenever feasible in advertising copy.

(3) The color or size of the Direct Deposit logo/graphic may be changed when used in advertising pieces.

.05 Advertising materials may not carry the FMS or Treasury Seals.

.06 Advertising for a cooperative electronic return project (public/private sector) must clearly state the names of all cooperating parties.

.07 In advertising the availability of a RAL, an Electronic Filer and a financial institution must refer to or describe the funds being advanced as a loan, not a refund; that is, it must be made clear in the advertising that the taxpayer is borrowing against the anticipated refund and not obtaining the refund itself from the financial institution.

.08 Media communications, including fee information, shall be limited to professional lists, telephone directories, print media, permissible mailings, radio, and television. In the case of radio and television broadcasting, the broadcast shall be prerecorded and the Electronic Filer shall retain a recording of the actual audio transmission until the end of the calendar year in which the transmission is made.

.09 Acceptance to participate in the Electronic Filing Program does not imply endorsement by the Service or FMS of the software or quality of services provided.

SEC. 12. MONITORING AND SUSPENSION OF AN ELECTRONIC FILER

.01 The Service will monitor an Electronic Filer for conformity with this revenue procedure. The Service will issue a warning letter that describes specific corrective action for deviations from this revenue procedure.

.02 The Service will monitor the timely receipt of Forms 8453, as well as monitoring their overall legibility (especially the recording of the Declaration Control Number (DCN)).

.03 The Service will monitor the quality of an Electronic Filer's transmissions throughout the filing season. The Service will also monitor electronic returns and tabulate rejections, errors, and other defects. If quality deteriorates, the Electronic Filer will receive a warning from the Service.

.04 The Service will monitor branch offices and advise an Electronic Filer of any problems the Service has en-

countered that originate in a branch office. If there are repeated or continuing problems with electronic filing from a particular branch office, the "parent" Electronic Filer will be required to drop that office from the Electronic Filing Program. Failure to take corrective action with the problem branch will lead to the initiation of suspension against the "parent" Electronic Filer. If the Service initiates suspension action, it will apply to all returns filed by the "parent" Electronic Filer, including the branch offices.

.05 The Service will monitor complaints about an Electronic Filer and issue a warning or suspension letter as appropriate.

.06 The Service reserves the right to rescind the electronic filing privilege of any Electronic Filer who violates any provision of this revenue procedure or who does not consistently transmit accurate returns. When suspended, the Electronic Filer will be counseled concerning the requirements for reacceptance into the Electronic Filing Program. The following conditions may lead to warning letters and/or suspension of an Electronic Filer from the Electronic Filing Program (this list is not all-inclusive):

(1) conviction of any criminal offense under the revenue laws of the United States, or of any offense involving dishonesty or breach of trust;

(2) failure to file timely and accurate tax returns, both business and personal;

(3) failure to pay personal or business tax liabilities;

(4) assessment of penalties;

(5) suspension/disbarment from practice before the Service;

(6) other facts or conduct of a disreputable nature that would reflect adversely on the Electronic Filing Program;

(7) misrepresentation on an application;

(8) deterioration in the format of individual transmissions;

(9) unacceptable cumulative error rate;

(10) unethical practices in return preparation;

(11) untimely received, illegible, missing, or unapproved substitute Forms 8453;

(12) stockpiling returns prior to official acceptance into the Electronic Filing Program or at any time while participating in the Electronic Filing Program;

(13) a transmitter not providing preparer clients with acknowledgement files within five calendar days after receipt from the Service; or

(14) significant complaints about an Electronic Filer.

SEC. 13. ADMINISTRATIVE REVIEW PROCESS FOR DENIAL OF PARTICIPATION IN, OR SUSPENSION FROM, THE ELECTRONIC FILING PROGRAM

.01 An applicant who has been denied participation in the Electronic Filing Program, or a participant who has been suspended from the program, has the right to administrative review.

.02 An appeal for administrative review must be made to the Director of Practice, Internal Revenue Service, within 60 days from the date of denial or the date of suspension. A copy of the denial or suspension letter and a copy of the firm's Electronic Filing Application, Form 8633, should be attached. Requests for Administrative Review should be faxed to (202)535-6795 or mailed to:

Director of Practice HR:DP
Internal Revenue Service
1111 Constitution Avenue, N.W.
Washington, DC 20224

SEC. 14. EFFECT ON OTHER DOCUMENTS

Rev. Proc. 89-57, 1989-2 C.B. 644, is superseded.

SEC. 15. EFFECTIVE DATE

This revenue procedure is effective January 1, 1991.

---

26 CFR 601.204: Changes in accounting period and in methods of accounting.
(Also Part I, Sections 165, 167, 263, 263A, 446, 481; 1.165-2, 1.167(a)-3, 1.263(a)-2, 1.263A-1T(a)(5), 1.446-1, 1.481-5.)

Rev. Proc. 90-63

SECTION 1. PURPOSE

.01 This revenue procedure provides the exclusive procedure for taxpayers to obtain consent from the Commissioner to change their method of accounting for package design costs. It revokes Rev. Proc. 89-16, 1989-1 C.B. 822, and Rev. Proc. 89-17, 1989-1 C.B. 827. It describes three alternative methods of accounting for package design costs: (1) capitalization (see section 5.01), (2) design-by-design capitalization and 60-month amortization (see section 5.02), and (3) pool-of-cost capitalization and 48-month amortization (see section 5.03). It also provides the procedure for taxpayers to obtain consent from the Commissioner to change to each of the alternative methods, including rules relating to the availability of each of the alternative methods of accounting, and the limitations, terms and conditions the Commissioner deems necessary to change to each of the alternative methods.

.02 In accordance with section 1.446-1(e)(3)(ii) of the regulations, the Commissioner waives the 180-day rule, and, in accordance with section 1.446-1(e)(2)(i), hereby grants consent to any taxpayer not described in section 9.01(2) (concerning certain taxpayers that changed (or received permission to change) their method of accounting for package design costs during the six tax years prior to the year of change) to change its method of accounting for package design costs provided the taxpayer complies with the provisions and conditions of this revenue procedure. This consent is granted for the tax year (year of change) for which the taxpayer requests a change by filing a current Form 3115 (Application for Change in Accounting Method) in the manner described in sections 9.01(1), 9.02 or 9.03. Taxpayers that are not using an acceptable method and do not voluntarily change their method of accounting for package design costs will be required to do so on audit. The Commissioner may require them to change to the capitalization method described in section 5.01 rather than one of the two amortization methods described in sections 5.02 and 5.03. *See* section 6.08. A taxpayer filing its first return may, in accordance with section 1.446-1(e)(1), adopt any one of the three alternative methods of accounting for package design costs provided in section 5.

.03 Because this revenue procedure provides the exclusive procedure for taxpayers to change their method of

accounting for package design costs, a taxpayer may not use Rev. Proc. 84-74, 1984-2 C.B. 736, to change its method of accounting for package design costs. However, this revenue procedure incorporates by reference certain provisions of Rev. Proc. 84-74.

.04 A taxpayer that makes a change in method of accounting for package design costs without complying with the conditions of this revenue procedure has made a change in method of accounting without obtaining the consent of the Commissioner as required under section 446(e) of the Code.

SEC. 2. DEFINITIONS

For purposes of this revenue procedure, the terms "package design" and "package design cost" have the meanings provided in Rev. Rul. 89-23, 1989-1 C.B. 85. If the taxpayer develops the package design, the term includes the cost of materials, labor, and overhead associated with the design, including all design exploration and study (for example, the development of any related design which, although abandoned, advances the development of the design selected), refinement of the basic design selected, testing, and preparation of the final master comprehensive design. If an independent contractor performs the work, the term includes all billings related to the development of the particular package, including all design exploration and study (for example, the development of any related design which, although abandoned, advances the development of the design selected), refinement of the basic design selected, testing, and preparation of the final master comprehensive design. If the taxpayer purchases the package, the term includes the purchase price. The costs associated with coupon inserts, refund offers, and other short-lived promotion-related changes are specifically excepted from the definition of "package design cost."

SEC. 3. BACKGROUND

.01 Section 263(a) of the Code provides that no deduction is allowed for any amount paid for new buildings or for permanent improvements or betterments made to increase the value of any property or estate. Section 1.263(a)-2 of the regulations includes in its examples of capital expenditures the costs of acquiring property having a useful life substantially beyond the tax year.

.02 An expenditure generally must be capitalized under section 263 of the Code if the expenditure creates, enhances, or is part of the cost of acquiring a tangible or intangible asset having a useful life that extends substantially beyond the end of the tax year in which the expenditure is incurred. *See Commissioner v. Lincoln Savings and Loan Association*, 403 U.S. 345 (1971), 1971-2 C.B. 116; *Central Texas Savings and Loan Association v. United States*, 731 F.2d 1181 (5th Cir. 1984); *Ellis Banking Corp. v. Commissioner*, 688 F.2d 1376 (11th Cir. 1982), *cert. denied*, 463 U.S. 1207 (1983); and *Cleveland Electric Illuminating Company v. United States*, 7 Cl. Ct. 220 (1985). Generally, taxpayers must capitalize package design costs incurred prior to January 1, 1987, under section 263 because those costs create intangible assets having useful lives that extend substantially beyond the end of the tax year in which the costs are incurred. *See* Rev. Rul. 89-23.

.03 Section 263A of the Code, enacted by the Tax Reform Act of 1986, provides, in part, for the capitalization of certain direct and indirect costs with respect to real or tangible personal property produced by the taxpayer. All costs that are incurred with respect to real or tangible personal property that the taxpayer produces are to be capitalized with respect to the property. The term "produce" includes construct, build, install, manufacture, develop, improve, create, raise, or grow. For purposes of section 263A, "tangible personal property" includes a film, sound recording, video tape, book, or similar property embodying words, ideas, concepts, images, or sounds (*see* 2 H.R. Conf. Rep. No. 841, 99th Cong., 2d Sess. II-308 (1986), 1986-3 (Vol. 4) C.B. 308) without regard to whether the property is treated as tangible or intangible under other provisions of the Code. *See* section 1.263A-1T(a)(5)(iii) of the regulations. Section 263A and the regulations thereunder require that costs incurred after December 31, 1986, in connection with the development and design of product packages must be capitalized. *See* Rev. Rul. 89-23.

.04 As stated in Rev. Rul. 89-23, package designs generally do not have an ascertainable useful life, and thus no depreciation or amortization is allowed under section 167 of the Code and the regulations thereunder. *See* section 1.167(a)-3 of the regulations. Only when such a package design is abandoned may the capitalized costs be deducted. *See* section 165 of the Code and section 1.165-2(a) of the regulations.

.05 Thus, taxpayers are generally required under the Code and regulations to use the capitalization method of accounting for package design costs described in section 5.01. However, to minimize disputes regarding the accounting for package design costs, the Internal Revenue Service, as a matter of administrative convenience, will allow a taxpayer that complies with the requirements of this revenue procedure to choose one of two alternative methods of accounting for package design costs: (1) the capitalization and 60-month amortization method described in section 5.02, determined on a design-by-design basis for all package designs or; (2) the capitalization and 48-month amortization method described in section 5.03, determined on a pool-of-cost basis for all package design costs.

.06 Section 446(e) of the Code provides that, except as otherwise provided, a taxpayer that changes the method of accounting on the basis of which it regularly computes its income in keeping its books shall, before computing its taxable income under the new method, secure the consent of the Secretary. Section 1.446-1(e)(2)(ii)(*a*) of the regulations provides that a change in method of accounting includes a change in the overall plan of accounting for gross income or deductions or a change in the treatment of any material item used in the overall plan. Section 1.446-1(e)(2)(ii)(*a*) defines a material item as any item that involves the proper time for the inclusion of the item in income or the taking of a deduction. Section 1.446-1(e)(3)(i) provides generally that in order to obtain the consent of the Commissioner for an accounting method change, a taxpayer must file an application on Form 3115, Application for Change in Accounting Method, within 180 days after the beginning of the

tax year for which the proposed change is to be made. Section 1.446-1(e)(3)(ii) authorizes the Commissioner to prescribe administrative procedures setting forth the limitations, terms, and conditions deemed necessary to permit taxpayers to obtain consent to change their method of accounting in accordance with section 446(e).

.07 Section 481(a) of the Code provides that if a taxpayer's taxable income for any tax year is computed under a method of accounting different from the method used to compute taxable income in the preceding tax year, the taxpayer must take into account those adjustments necessary to prevent amounts from being duplicated or omitted by reason of the change in method. Section 481(a) and section 1.481-5 of the regulations provide that the adjustments required by section 481(a) may be taken into account in determining taxable income in the manner and subject to the conditions agreed to by the Commissioner and the taxpayer.

SEC. 4. SCOPE

This revenue procedure applies to any taxpayer that desires or is required to change its method of accounting for package design costs. A change in method of accounting for package design costs made pursuant to this revenue procedure does not affect the taxpayers method of accounting for intangible property other than package designs described in section 2. This revenue procedure includes special rules for taxpayers:

(i) contacted for examination where the package design issue has not been raised (see section 6.02);

(ii) before an appeals office where the package design issue has not been raised (see section 6.03);

(iii) before a federal court where the package design issue has not been raised (see section 6.04);

(iv) the subject of a criminal investigation or proceeding (see section 6.05);

(v) under examination, before an appeals office, or before a federal court where the package design issue was raised before March 6, 1989 (see section 6.06);

(vi) under examination, before an appeals office, or before a federal court where the package design issue is raised on or after March 6, 1989, but on or before the due date of the taxpayer's tax return for its first tax year ending on or after release of this revenue procedure (see section 6.07); and

(vii) under examination, before an appeals office, or before a federal court where the package design issue is raised after the due date of the taxpayer's tax return for its first tax year ending on or after release of this revenue procedure (see section 6.08).

SEC. 5. ALTERNATIVE METHODS OF ACCOUNTING

.01 *The Capitalization Method.*

(1) *Description of Method.* The treatment of the costs of developing new package designs or modifying existing designs in accordance with the capitalization method constitutes a permissible method of accounting. Under the capitalization method, the taxpayer must capitalize the costs of developing (or modifying) any package design if the asset created by those costs has no ascertainable useful life or an ascertainable useful life that extends substantially beyond the end of the tax year in which the costs are incurred. If the asset created by the costs has an ascertainable useful life, the taxpayer may amortize the costs ratably over the useful life, beginning with the month the package design (or modification to the design) is placed in service. If the asset created by the costs has no ascertainable useful life, the taxpayer may deduct the costs only upon the disposition or abandonment of the package design (or modification to the design). *See* Rev. Rul. 89-23.

(2) *Computation of Basis.* The basis of each package design (or modification to the design) subject to capitalization is determined by applying the provisions of section 263 of the Code and the regulations thereunder to costs incurred prior to January 1, 1987, and section 263A and the regulations thereunder to costs incurred after December 31, 1986 (regardless of the tax year the design (or modification to the design), is placed in service). The costs required to be capitalized are described in section 2.

.02 *The Design-by-Design Capitalization and 60-month Amortization Method.*

(1) *Description of Method.* The treatment of the costs of developing new package designs or modifying existing designs in accordance with the design-by-design capitalization and 60 month amortization method constitutes a permissible method of accounting. Under the design-by-design capitalization and 60-month amortization method, the taxpayer must capitalize the costs of developing (or modifying) any package design if the asset created by those costs has no ascertainable useful life or an ascertainable useful life that extends substantially beyond the end of the tax year in which the costs are incurred. The taxpayer must amortize the basis of any package design (or modification to the design) subject to capitalization over a period of 60 months. Thus, in computing taxable income, the basis of each package design (or modification to the design) subject to capitalization is allowed as a deduction ratably over a 60-month period, beginning with the month the design (or modification to the design) is treated as placed in service. *See* section 5.02(3) below. If the package design (or modification to the design) is disposed of or abandoned within the 60-month period, the taxpayer is permitted to deduct the unamortized portion of the basis of the design (or modification to the design) in the tax year of disposition or abandonment.

(2) *Computation of Basis.* Under the design-by-design capitalization and 60-month amortization method, the basis of each package design (or modification of the design) subject to capitalization must be determined by applying the provisions of section 263 of the Code and the regulations thereunder to costs incurred prior to January 1, 1987, and section 263A and the regulations thereunder to costs incurred after December 31, 1986, (regardless of the tax year the design (or modification to the design) is placed in service). The costs required to be capitalized are described in section 2.

(3) *Half-year Convention.* Under the design-by-design capitalization and 60-month amortization method, the amortization allowance for each package design (or modification to the design) subject to capitalization must be determined by treating a

design (or modification to the design) placed in service during the tax year as placed in service on the mid-point of the tax year. If the tax year in which the package design (or modification to the design) is placed in service is 12 full months, the design (or modification to the design) is treated as placed in service on the first day of the seventh month of the tax year. For guidance in computing the amortization allowance under the design-by-design capitalization and 60-month amortization method when a package design (or modification to the design) is placed in service in a taxable year of less than 12 months (a short taxable year), see Rev. Proc. 89-15, 1989-1 C.B. 816.

(4) *Eligibility.* The design-by-design capitalization and 60-month amortization method is a rule of administrative convenience which may only be adopted on the taxpayer's first return or pursuant to the provisions of this revenue procedure.

.03 *The Pool-of-Cost Capitalization and 48-month Amortization Method.*

(1) *Description of Method.* The treatment of the costs of developing new package designs or modifying existing designs in accordance with the pool-of-cost capitalization and 48-month amortization method constitutes a permissible method of accounting. Under the pool-of-cost capitalization and 48-month amortization method, the taxpayer must capitalize all of its package design costs and amortize the costs over a period of 48 months. Thus, in computing taxable income, package design costs incurred during the tax year are allowed as a deduction ratably over a 48-month period, beginning with the month the costs are treated as incurred. *See* section 5.03(3) below. The taxpayer may not deduct the unamortized portion of the cost of a package design (or modification to the design) if the design (or modification to the design) is never placed in service or is disposed of or abandoned within the 48-month period.

(2) *Costs Subject to Capitalization.* All package design costs are subject to capitalization without regard to whether the costs create a package design (or modification to the design) having an ascertainable useful life that extends substantially beyond the end of the tax year in which the costs are incurred. Thus, all package design costs incurred prior to January 1, 1987, that would be capitalized under section 263 of the Code and the regulations thereunder but for the fact that the costs create a package design (or modification to the design) having an ascertainable useful life that does not extend substantially beyond the end of the tax year in which the costs are incurred must be capitalized. All package design costs incurred after December 31, 1986, that would be capitalized under section 263A of the Code and the regulations thereunder but for the fact that the costs create a package design (or modification to the design) having an ascertainable useful life that does not extend substantially beyond the end of the tax year in which the costs are incurred must be capitalized. The costs required to be capitalized are described in section 2.

(3) *Half-year Convention.* Under the pool-of-cost capitalization and 48-month amortization method, the amortization allowance for package design costs must be determined by treating all package design costs incurred during the tax year as incurred on the mid-point of the tax year. If the tax year in which the package design costs are incurred is 12 full months, the costs are treated as incurred on the first day of the seventh month of the tax year. For guidance in computing the amortization allowance under the pool-of-cost capitalization and 48-month amortization method when package design costs are incurred in a taxable year of less than 12 months (a short taxable year), see Rev. Proc. 89-15.

(4) *Eligibility.* The pool-of-cost capitalization and 48-month amortization method is a rule of administrative convenience which may only be adopted on the taxpayer's first return or pursuant to the provisions of this revenue procedure.

SEC. 6. AVAILABILITY OF ALTERNATIVE METHODS OF ACCOUNTING

.01 *In General.*

(1) *Availability.* Except as provided in sections 6.02 through 6.08 below (relating to special rules for taxpayers who are under examination, are before an appeals office, are before a federal court, or are the subject of a criminal investigation or proceeding), the rules in this section 6.01 apply to a taxpayer that desires to change its method of accounting for package design costs. Provided the requirements of this revenue procedure are satisfied, the taxpayer is permitted to change its method of accounting for package design costs to any one of the three alternative methods of accounting provided in section 5. The year of change is determined under section 6.01(2) below. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in sections 9.01 (general procedure) and section 9.02(1) (special procedure for taxpayers changing for their first tax year ending on or after the date of release).

(2) *Year of Change.*

(a) If the Form 3115 required by section 9 is filed on or before the date that is 180 days after the beginning of the taxpayer's third tax year ending on or after December 18, 1990, the date of release of this revenue procedure, the year of change is the first tax year ending on or after December 18, 1990. The effect of this rule is to preclude a taxpayer from changing its method of accounting for package design costs for its second or third tax years ending on or after December 18, 1990. If the tax return for its first tax year ending on or after December 18, 1990, has already been filed, the taxpayer must make the change on (and attach the Form 3115 to) an amended return for that year filed on or before the date that is 180 days after the beginning of its third tax year ending on or after December 18, 1990. The taxpayer must also reflect the change in method of accounting on amended returns filed for tax years subsequent to the year of change for which returns have already been filed. *See* section 9.02(1).

(b) If the Form 3115 required by section 9 is filed after the date that is 180 days after the beginning of the taxpayer's third tax year ending on or after December 18, 1990, the date of release of this revenue procedure, the

year of change is the applicable tax year under section 1.446-1(e)(3) of the regulations that would apply at the time the Form 3115 is filed.

.02 *Taxpayer Contacted for Examination but Package Design Issue Not Raised.* Except as provided in sections 6.02(1) through 6.02(4) below, if the taxpayer has been contacted in any manner by a representative of the Service for the purpose of scheduling an examination of its federal income tax return for any year and the package design issue has not been raised by the Service, the taxpayer is not permitted to change its method of accounting for package design costs.

(1) *First Taxable Year Window.* A taxpayer described in section 6.02 above is permitted to change its method of accounting for package design costs to any one of the three alternative methods of accounting provided in section 5 provided the taxpayer is changing for its first tax year ending on or after December 18, 1990, the date of release of this revenue procedure. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in section 9.02(2).

(2) *Taxpayer Using Permissible Method; Special Consent from Examining Agent.* A taxpayer described in section 6.02 above that is using one of the three alternative methods of accounting provided in section 5 is permitted to change its method of accounting for package design costs to another of the three alternative methods of accounting if the taxpayer obtains an agreement (which must be attached to the Form 3115) from the examining agent that there is no objection to the proposed change in method of accounting. The year of change is the applicable tax year that would apply under section 6.01 of this revenue procedure at the time the Form 3115 is filed if the taxpayer had not been under examination. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in section 9.01 or section 9.02(1).

(3) *120-Day Window After Receipt of A Basic Report.* A taxpayer described in section 6.02 above is permitted to change its method of accounting for package design costs to any one of the three alternative methods of accounting provided in section 5 during the 120-day period following the date of issuance by the Service of either a letter stating that there is no change in tax liability or a basic report form (a report of Individual Income Tax Examination Changes, a report of Income Tax Examination Changes, a report of Income Tax Audit Changes, or an Unagreed and Excepted Agreed report) giving notice of results of an examination by the Service of the taxpayer's liability for certain tax years. However, this section 6.02(3) does not apply (1) if the package design issue is included as an item of adjustment in a basic report form as a result of the examination by the Service, (2) if the package design issue is placed in suspense by the Service, or (3) if the taxpayer has, before the end of the 120-day period and prior to the filing of the Form 3115, received written notification from the examiner(s) that the package design issue is under consideration for the tax year under examination. The year of change is the applicable tax year that would apply under section 6.01 of this revenue procedure at the time the Form 3115 is filed if the taxpayer had not been under examination. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in sections 9.01 and 9.02(1).

(4) *30-Day Provision for Continuous Audit.* A taxpayer described in section 6.02 above is permitted to change its method of accounting for package design costs to any one of the three alternative methods of accounting provided in section 5 during the first 30 days of any tax year if (1) the taxpayer has been precluded under section 6.02 from changing its method of accounting for package design costs for at least 18 consecutive months prior to the 30-day period and (2) the taxpayer has not received written notification from the examiner that the package design issue is under consideration prior to the 30-day period. The year of change is the applicable tax year that would apply under section 6.01 of this revenue procedure at the time the Form 3115 is filed if the taxpayer had not been under examination. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in sections 9.01 and 9.02(1).

.03 *Taxpayer Before an Appeals Office but Package Design Issue Not Raised.* Except as provided in sections 6.03(1) and 6.03(2) below, if the taxpayer is under consideration by an appeals office of the Service with respect to an examination and the package design issue has not been raised by the Service, the taxpayer is not permitted to change its method of accounting for package design costs.

(1) *First Taxable Year Window.* A taxpayer described in section 6.03 above is permitted to change its method of accounting for package design costs to any one of the three alternative methods of accounting provided in section 5 if the taxpayer is changing for its first tax year ending on or after December 18, 1990, the date of release of this revenue procedure. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in section 9.02(2).

(2) *Special Consent from Appeals Officer.* A taxpayer described in section 6.03 above is permitted to change its method of accounting for package design costs to any one of the three alternative methods of accounting provided in section 5 if the taxpayer obtains an agreement (which must be attached to the Form 3115) from the Appeals Officer that there is no objection to the proposed change in method of accounting. The year of change is the applicable tax year that would apply under section 6.01 of this revenue procedure at the time the Form 3115 is filed if the taxpayer had not been before appeals. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in sections 9.01 and 9.02(1). The Appeals Officer ordinarily will grant its consent to the proposed change. *See* IRM 8653, MT 8-188 (Jan. 22, 1990).

.04 *Taxpayer Before a Federal Court but Package Design Issue Not Raised.* Except as provided in sections 6.04(1) and 6.04(2) below, if the taxpayer is before any federal court with respect to an income tax issue arising in any tax year and the package design issue has not been raised by the Service, the taxpayer is not permitted to change its method of accounting for package design costs.

(1) *First Taxable Year Window.* A taxpayer described in section 6.04 above is permitted to change its method of accounting for package design costs to any one of the three alternative methods of accounting provided in section 5 if the taxpayer is changing for its first tax year ending on or after December 18, 1990, the date of release of this revenue procedure. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in sections 9.02(2).

(2) *Special Consent from Counsel.* A taxpayer described in section 6.04 above is permitted to change its method of accounting for package design costs to any one of the three alternative methods of accounting provided in section 5 if the taxpayer obtains an agreement (which must be attached to the Form 3115) from counsel for the government that there is no objection to the proposed change in method of accounting. The year of change is the applicable tax year that would apply under section 6.01 of this revenue procedure at the time the Form 3115 is filed if the taxpayer had not been before a federal court. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in sections 9.01 and 9.02(1).

.05 *Taxpayer Subject to a Criminal Investigation or Proceeding.* If the taxpayer is the subject of a criminal investigation or proceeding concerning, directly or indirectly, (a) the taxpayer's federal tax liability for any year, or (b) the possibility of false or fraudulent statements made by the taxpayer with respect to any issue relating to its federal tax liability for any year, the taxpayer is not permitted to change its method of accounting for package design costs.

.06 *Taxpayer Under Examination, Before an Appeals Office, or Before a Federal Court; Package Design Issue Raised Before March 6, 1989.*

(1) *Availability.* If the taxpayer is under examination, before an appeals office, or before a federal court with respect to a tax year in which the package design issue has been raised before March 6, 1989, the taxpayer is permitted to change its method of accounting for package design costs to any one of the three alternative methods of accounting provided in section 5. The year of change is determined under section 6.06(2) below. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in section 9.03.

(2) *Year of Change.*

(a) If the taxpayer is under examination with respect to a tax year in which the package design issue has been raised, the year of change is the most recent tax year that is being examined by the Service during the examination of the taxpayer's returns, but not later than the most recent tax year for which a federal income tax return has been filed as of the date the examination began. However, if the package design issue has been raised for the first year in which the erroneous method of accounting for package design costs was used by the taxpayer (i.e., the issue has been raised for the year in which the erroneous method was initiated by the taxpayer or the year in which the taxpayer changed to the erroneous method without the consent of the Commissioner), the year of change is the year in which the erroneous method was first used by the taxpayer.

(b) If the taxpayer is before an appeals office with respect to a tax year in which the package design issue has been raised, the year of change is the earliest open year before appeals in which the issue has been raised.

(c) If the taxpayer is before a federal court with respect to a tax year in which the package design issue has been raised, the year of change is the earliest year before the court in which the issue has been raised.

(d) Notwithstanding subparagraphs (a), (b), and (c) of this section 6.06(2), if the taxpayer is under examination, before an appeals office, or before a federal court for different tax years in which the package design issue has been raised, the year of change is the earliest of the years provided in subparagraphs (a), (b), and (c) of this section 6.06(2).

.07 *Taxpayer Under Examination, Before an Appeals Office, or Before a Federal Court; Package Design Issue Raised On or After March 6, 1989 but On or Before the Due Date of Taxpayer's Tax Return for Its First Tax Year Ending On or After*

Release. If the taxpayer is under examination, before an appeals office, or before a federal court with respect to a tax year in which the package design issue has been raised on or after March 6, 1989, but on or before the due date (determined with regard to extensions) of the taxpayer's federal income tax return for its first tax year ending on or after December 18, 1990, the date of release of this revenue procedure, the taxpayer is permitted to change its method of accounting for package design costs to any one of the three alternative methods of accounting provided in section 5. The year of change is the first tax year ending on or after December 18, 1990. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01 for a change to capitalization; section 8.02 for a change to design-by-design capitalization and 60-month amortization; and section 8.03 for a change to pool-of-cost capitalization and 48-month amortization. The procedure for effecting the change is set forth in section 9.03.

.08 *Taxpayer Under Examination, Before an Appeals Office, or Before a Federal Court; Package Design Issue Raised After the Due Date of Taxpayer's Tax Return for Its First Tax Year Ending On or After Release.*

(1) *Availability.* If the taxpayer is under examination, before an appeals office, or before a federal court with respect to a tax year in which the package design issue has been raised after the due date (determined with regard to extensions) of the taxpayer's federal income tax return for its first tax year ending on or after December 18, 1990, the date of release of this revenue procedure, the taxpayer is permitted to change its method of accounting for package design costs only to the capitalization method. The year of change is determined under section 6.08(2) below. The rules for computing the section 481(a) adjustment and determining the adjustment period are set forth in section 8.01. The procedure for effecting the change is set forth in section 9.03.

(2) *Year of Change.*

(a) If the taxpayer is under examination with respect to a tax year in which the package design issue has been raised, the year of change is the earliest open year under examination in which the issue has been raised.

(b) If the taxpayer is before an appeals office with respect to a tax year in which the package design issue has been raised, the year of change is the earliest open year before appeals in which the issue has been raised.

(c) If the taxpayer is before a federal court with respect to a tax year in which the package design issue has been raised, the year of change is the earliest year before the court in which the issue has been raised.

(d) Notwithstanding subparagraphs (a), (b), and (c) of this section 6.08(2), if the taxpayer is under examination, before an appeals office, or before a federal court for different tax years in which the package design issue has been raised, the year of change is the earliest of the years provided in subparagraphs (a), (b), and (c) of this section 6.08(2).

SEC. 7. SPECIAL RULES RELATING TO RAISED ISSUE

For purposes of this revenue procedure, the package design issue is considered raised when the taxpayer receives written notification that the issue is under consideration (*e.g.*, by an examination plan or an information document request). If the package design issue has been raised in more than one audit cycle, the applicability of sections 6.06, 6.07, and 6.08 is determined by reference to when the issue was first raised.

SEC. 8. SECTION 481(a) ADJUSTMENT

.01 *Change to the Capitalization Method.*

(1) *Computation of the Section 481(a) Adjustment.* If the taxpayer is changing its method of accounting for package design costs to the capitalization method, the section 481(a) adjustment (which will be positive) will restore to income the total amounts deducted or amortized in tax years prior to the year of change with respect to all package designs (or modifications to designs) subject to capitalization and not abandoned as of the first day of the tax year of change, less the amounts that would have been amortized during the tax years prior to the year of change with respect to designs (or modifications to designs) which had an ascertainable useful life on the date the designs (or modifications to the designs) were placed in service. The section 481(a) adjustment is the difference at the beginning of the tax year of change between the basis of all such package designs (or modifications to designs) determined under the taxpayer's present method of accounting and the basis redetermined under the capitalization method.

(2) *Section 481(a) Adjustment Period.*

(a) *Change from Impermissible Method.* If the taxpayer is changing to the capitalization method of accounting for package design costs from a method other than the design-by-design capitalization and 60-month amortization method or the pool-of-cost capitalization and 48-month amortization method, the adjustment period is determined in accordance with sections 8.01(2)(a)(i) and 8.01(2)(a)(ii) below.

(i) The portion of the adjustment referred to in section 8.01(1) that is attributable to costs incurred after December 31, 1986, is to be taken into account in full in computing taxable income in the tax year of change.

(ii) Except as provided in sections 8.01(2)(a)(ii)(*a*) and 8.01(2)(a)(ii)(*b*) below, the portion of the adjustment referred to in section 8.01(1) that is attributable to costs incurred before January 1, 1987, is to be taken into account in accordance with the rules set forth in the following sections of Rev. Proc. 84-74: section 5.06(1)(a) (attributable to the immediately preceding tax year rule), section 5.06(1)(b) (67-percent rule), and section 5.06(1)(e) (rule for all other situations).

(*a*) If a taxpayer described in section 6.01 (relating to taxpayers not contacted for examination, not before an appeals office, not before a federal court, and not subject to a criminal investigation or proceeding), 6.02 (relating to taxpayers contacted for examination where the package design issue has not been raised), 6.03 (relating to taxpayers before an ap-

peals office where the package design issue has not been raised), or 6.04 (relating to taxpayers before a federal court where the package design issue has not been raised) files the Form 3115 required by sections 9.01 or 9.02 after the due date (determined with regard to extensions) of the taxpayer's federal income tax return for its first tax year ending on or after December 18, 1990, the date of release of this revenue procedure, then the adjustment period otherwise determined in section 8.01(2)(a)(ii) above cannot exceed 3 tax years.

(*b*) If a taxpayer described in section 6.08 (relating to taxpayers under examination, before an appeals office, or before a federal court where the package design issue is raised after the due date of its tax return for its first tax year ending on or after release) is changing its method of accounting for package design costs, the portion of the adjustment referred to in section 8.01(2)(a)(ii) is also to be taken into account in computing taxable income in the year of change.

(b) *Change from Permissible Method.* If the taxpayer is changing to the capitalization method of accounting for package design costs from the design-by-design capitalization and 60-month amortization method or the pool-of-cost capitalization and 48-month amortization method, the adjustment referred to in section 8.01(1) is to be taken into account in accordance with the rules set forth in the following sections of Rev. Proc. 84-74: section 5.06(1)(a) (attributable to the immediately preceding tax year rule), section 5.06(1)(b) (67-percent rule), and section 5.06(1)(e) (rule for all other situations).

.02 *Change to the Design-by-Design Capitalization and 60-month Amortization Method.*

(1) *Computation of the Section 481(a) Adjustment.* If the taxpayer is changing its method of accounting for package design costs to the design-by-design capitalization and 60-month amortization method, the section 481(a) adjustment is equal to the total amounts deducted or amortized in tax years prior to the year of change with respect to all package designs (or modifications to designs) subject to capitalization and not abandoned as of the first day of the tax year of change, less the amounts that would have been amortized during the tax years prior to the year of change with respect to such designs (or modifications to designs) had the design-by-design capitalization and 60-month amortization method been used.

(2) *Section 481(a) Adjustment Period.*

(a) *Change from Impermissible Method.* If the taxpayer is changing to the design-by-design capitalization and 60-month amortization method of accounting for package design costs from a method other than the pool-of-cost capitalization and 48-month amortization method or the capitalization method, the total amount of the adjustment referred to in section 8.02(1) is to be taken into account in computing taxable income in the year of change.

(b) *Change from Permissible Method.* If the taxpayer is changing to the design-by-design capitalization and 60-month amortization method of accounting for package design costs from the pool-of-cost capitalization and 48-month amortization method or the capitalization method, the adjustment referred to in section 8.02(1) is to be taken into account in accordance with the rules set forth in the following sections of Rev. Proc. 84-74: section 5.06(1)(a) (attributable to the immediately preceding tax year rule), section 5.06(1)(b) (67-percent rule), and section 5.06(1)(e) (rule for all other situations).

.03 *Change to the Pool-of-Cost Capitalization and 48-month Amortization Method.*

(1) *Computation of the Section 481(a) Adjustment.* If the taxpayer is changing its method of accounting for package design costs to the pool-of-cost capitalization and 48-month amortization method, the section 481(a) adjustment is equal to the total amounts deducted or amortized in tax years prior to the year of change with respect to all package design costs treated as incurred during the tax years prior to the year of change, less the amounts that would have been amortized during the tax years prior to the year of change with respect to such costs had the pool-of-cost capitalization and 48-month amortization method been used.

(2) *Section 481(a) Adjustment Period.*

(a) *Change from Impermissible Method.* If the taxpayer is changing to the pool-of-cost capitalization and 48-month amortization method of accounting for package design costs from a method other than the design-by-design capitalization and 60-month amortization method or the capitalization method, the total amount of the adjustment referred to in section 8.03(1) is to be taken into account in computing taxable income in the year of change.

(b) *Change from Permissible Method.* If the taxpayer is changing to the pool-of-cost capitalization and 48-month amortization method of accounting for package design costs from the design-by-design capitalization and 60-month amortization method or the capitalization method, the adjustment referred to in section 8.03(1) is to be taken into account in accordance with the rules set forth in the following sections of Rev. Proc. 84-74: section 5.06(1)(a) (attributable to the immediately preceding tax year rule), section 5.06(1)(b) (67-percent rule), and section 5.06(1)(e) (rule for all other situations).

.04 *Insufficient Information to Compute Section 481(a) Adjustment.* In applying section 8, if a taxpayer's books and records do not contain sufficient information to compute the section 481(a) adjustment that would have been required if the same change had been made at the beginning of the preceding 1-, 2-, or 3-tax-year period, the taxpayer may reasonably estimate these amounts. The taxpayer must attach the computations upon which the estimates are based and the perjury statement provided in section 5.06(2) of Rev. Proc. 84-74 to the Form 3115.

.05 *Ceasing to Engage in the Trade or Business.* If the taxpayer ceases to engage in the trade or business to which the adjustment referred to in section 8 relates at any time prior to the expiration of the adjustment period referred to in section 8, the balance of the adjustment not previously taken into account in computing taxable income is to be taken into account in that year. See section 5.09 of Rev. Proc. 84-74 for rules relating to the acceleration of a section 481(a) adjustment when a corporation, partnership, or sole proprietor is deemed

to cease operation of its trade or business.

.06 *Limiting Terms and Conditions With Respect to Net Operating Losses and Credits.* The limiting terms and conditions relating to net operating losses and credits provided in sections 5.15(1)(a) (net operating loss—negative section 481(a) adjustment), 5.15(1)(b) (net operating loss—positive section 481(a) adjustment), and 5.15(2) (credit carryover—positive section 481(a) adjustment) of Rev. Proc. 84-74 apply to all changes in method of accounting made pursuant to this revenue procedure.

SEC. 9. MANNER OF EFFECTING THE CHANGE

01. *Package Design Issue Not Raised By the Service.*

(1) *In General.* Except as provided in sections 9.01(2) and 9.02 below, if the package design issue has not been raised by the Service, the taxpayer applying for a change in method of accounting pursuant to this revenue procedure must use the following "automatic procedure." The taxpayer must complete a current Form 3115. The original of the Form 3115 must be attached to the taxpayer's timely filed (determined with regard to extensions) federal income tax return for the year of change. A copy of the Form 3115 must be filed with the National Office addressed to the Commissioner of Internal Revenue, P.O. Box 14095, Benjamin Franklin Station, Washington, D.C. 20224, within 180 days after the beginning of the tax year of change. However, if the taxpayer is changing its method of accounting for package design costs pursuant to the 120-day provision described in section 6.02(3), the copy of the Form 3115 must be filed with the National Office within the 120-day period. If the taxpayer is changing its method of accounting for package design costs pursuant to the 30-day provision described in section 6.02(4), the copy of the Form 3115 must be filed with the National Office within the 30-day period. No user fee is required for a filing under this section 9.01(1).

(2) *Change During Prior Six Years.* Except as provided in section 9.02 below, if a taxpayer described in section 9.01(1) above (concerning taxpayers applying for a change in method of accounting where the package design issue has not been raised) changed its method of accounting for package design costs during the six tax years prior to the year of change or received permission from the National Office to change its method of accounting for package design costs for any of its six tax years immediately preceding the year of change but did not effect the requested change, the taxpayer may not use the "automatic procedure" described in section 9.01(1) above. The taxpayer must request permission to change by filing a complete current Form 3115 with the National Office addressed to the Commissioner of Internal Revenue, P.O. Box 7604, Benjamin Franklin Station, Washington, D.C. 20224, within 180 days after the beginning of the tax year of change. Consent to the change will be granted only upon a showing of extraordinary circumstances. A user fee is required for a filing under this section 9.01(2).

02. *Package Design Issue Not Raised By the Service; Special Procedures for Taxpayers Changing for Their First Tax Year Ending On or After Release.*

(1) *In General.* Except as provided in section 9.02(2) below, if the package design issue has not been raised by the Service, a taxpayer changing its method of accounting for its first tax year ending on or after December 18, 1990, the date of release of this revenue procedure, must use the following "automatic procedure." The taxpayer must attach a complete current Form 3115 to the taxpayer's timely filed (determined with regard to extensions) federal income tax return for the year of change. If the tax return for the year of change has already been filed, the taxpayer must attach a complete current Form 3115 to an amended return for the year of change filed on or before 180 days after the beginning of its third tax year ending on or after December 18, 1990. However, if the taxpayer is changing its method of accounting for package design costs pursuant to the 120-day provision described in section 6.02(3), the amended return to which the Form 3115 is attached must be filed within the 120-day period. If the taxpayer is changing its method of accounting for package design costs pursuant to the 30-day provision described in section 6.02(4), the amended return to which the Form 3115 is attached must be filed within the 30-day period. If the taxpayer is changing its method of accounting for package design costs pursuant to one of the special consent provisions described in sections 6.02(2) (special consent from examining agent), 6.03(2) (special consent from appeals officer), or 6.04(2) (special consent from counsel for the government), the amended return to which the Form 3115 is attached must be filed within the time period agreed to by the taxpayer and the examining agent, appeals officer, or counsel for the government. The taxpayer must reflect the change in method of accounting on the amended return for the year of change and on amended returns filed for tax years subsequent to the year of change for which returns have already been filed. No user fee is required for a filing under this section 9.02(1).

(2) *First Taxable Year Window.* If a taxpayer described in sections 6.02, 6.03, or 6.04 (relating to taxpayers contacted for examination, before an appeals office, or before a federal court where the package design issue has not been raised) is changing its method of accounting pursuant to sections 6.02(1), 6.03(1), or 6.04(1) (relating to first taxable year window), the taxpayer must use the following "automatic procedure." The taxpayer must attach a complete current Form 3115 to the taxpayer's timely filed (determined with regard to extensions) federal income tax return for the year of change. The taxpayer is not permitted to make the change in method of accounting on an amended return. No user fee is required for a filing under this section 9.02(2).

.03 *Package Design Issue Raised By the Service.* If the taxpayer is under examination, before an appeals office, or before a federal court with respect to a tax year in which the package design issue has been raised, the taxpayer applying for a change in method of accounting pursuant to this revenue procedure must use the following "automatic procedure." The taxpayer must provide the examining agent, appeals officer, or counsel for the government with the original and one copy of a complete current Form 3115. The examining agent, appeals officer, or counsel for

the government will verify that the amount of the section 481(a) adjustment is correct and that the year of change and the adjustment period have been determined in accordance with sections 6 and 8. The Form 3115 will not be accepted unless the examining agent, appeals officer, or counsel for the government and the taxpayer are in agreement with respect to the year of change, the amount of the section 481(a) adjustment, and the adjustment period. If the examining agent, appeals officer, or counsel for the government and the taxpayer cannot agree as to these items, a technical advice request may be submitted to the National Office in accordance with Rev. Proc. 90-2, 1990-1 C.B. 386. If agreement is reached as to these items, the examining agent, appeals officer, or counsel for the government will associate the original of the Form 3115 with the taxpayer's federal income tax return for the year of change and forward the copy of the Form 3115 and pertinent comments to the National Office addressed to Commissioner of Internal Revenue, P.O. Box 14095, Benjamin Franklin Station, Washington, D.C. 20224. The taxpayer must reflect the change in method of accounting on amended returns filed for tax years subsequent to the year of change for which returns have already been filed. No user fee is required for a filing under this section 9.03.

.04 *Additional Information, Representations and Conditions.*

(1) If the taxpayer is changing its method of accounting for package design costs to the capitalization method or the design-by-design capitalization and 60-month amortization method, the taxpayer must attach a statement to its timely filed Form 3115. The statement must provide a description of each package design, the date on which each was placed in service, and the cost basis of each (as determined under sections 5.01(2) or 5.02(2)).

(2) In addition to including all the information required on the Form 3115 and the additional information required by section 9.04(1) above, the taxpayer must: (1) state that it agrees to all the conditions of Rev. Proc. 90-63 and that it proposes to take the section 481(a) adjustment into account over the appropriate period required by section 8.01(2), 8.02(2) or 8.03(2) (whichever is applicable); and (2) indicate the period over which the section 481(a) adjustment will be taken into account and the basis for that conclusion.

(3) In order to assist in the processing of these changes in method of accounting and to insure proper handling, reference to this revenue procedure must be made a part of the Form 3115. If the taxpayer is described in sections 9.01(1) or 9.02 above (concerning taxpayers applying for a change in method of accounting where the package design issue has not been raised) and except as otherwise provided, the taxpayer must type or legibly print the following statement at the top of page 1 of Form 3115: "AUTOMATIC CHANGE FILED UNDER REV. PROC. 90-63." If a taxpayer described in sections 9.01(1) or 9.02 is changing its method of accounting pursuant to the 120-day provision described in section 6.02(3), the taxpayer must type or legibly print the following statement at the top of page 1 of Form 3115: "AUTOMATIC CHANGE FILED UNDER REV. PROC. 90-63 / 120-DAY PROVISION." If a taxpayer described in sections 9.01(1) or 9.02 is changing its method of accounting pursuant to the 30-day provision described in section 6.02(4), the taxpayer must type or legibly print the following statement at the top of page 1 of Form 3115: "AUTOMATIC CHANGE FILED UNDER REV. PROC. 90-63 / 30-DAY PROVISION." If a taxpayer described in sections 9.01(1) or 9.02 is changing its method of accounting for package design costs pursuant to one of the special consent provisions described in sections 6.02(2) (special consent from examining agent), 6.03(2) (special consent from appeals officer), or 6.04(2) (special consent from counsel for the government), the taxpayer must type or legibly print the following statement at the top of page 1 of Form 3115: "AUTOMATIC CHANGE FILED UNDER REV. PROC. 90-63 / SPECIAL CONSENT PROVISION." If a taxpayer described in sections 9.01(1) or 9.02 is changing its method of accounting pursuant to the early application procedure described in section 9.05, the taxpayer must type or legibly print the following statement at the top of page 1 of Form 3115: "AUTOMATIC CHANGE FILED UNDER REV. PROC. 90-63 / EARLY APPLICATION PROCEDURE." If the taxpayer is described in section 9.01(2) above (concerning taxpayers that changed or received permission to change their method of accounting for package design costs during the six tax years prior to the year of change), the taxpayer must type or legibly print the following statement at the top of page 1 of Form 3115: "NONAUTOMATIC CHANGE FILED UNDER REV. PROC. 90-63." If a taxpayer described in section 9.01(2) is changing its method of accounting pursuant to the early application procedure described in section 9.05, the taxpayer must type or legibly print the following statement at the top of page 1 of Form 3115: "NONAUTOMATIC CHANGE FILED UNDER REV. PROC. 90-63 / EARLY APPLICATION PROCEDURE." If the taxpayer is described in section 9.03 above (concerning taxpayers under examination, before an appeals office, or before a federal court where the package design issue has been raised), the taxpayer must type or legibly print the following statement at the top of page 1 of Form 3115: "AUTOMATIC CHANGE FILED UNDER REV. PROC 90-63 / ISSUE RAISED BY SERVICE."

(4) The signature of the person requesting the change in method of accounting and authorized to sign the Form 3115 must appear in the space provided for it on the Form 3115. For example, an officer must sign on behalf of a corporation, a general partner on behalf of a partnership, a trustee on behalf of a trust, or the individual taxpayer on behalf of a sole proprietorship. See the signature requirements set forth in the General Instructions attached to a current Form 3115 for those who are to sign.

(5) If the taxpayer is a member of an affiliated group that has elected to file a consolidated federal income tax return, a Form 3115 submitted on behalf of the taxpayer must be signed by a duly authorized officer of the common parent. See section 1.1502-77 of the regulations.

(6) If an agent is authorized to represent the taxpayer before the Service, to receive the original or copy of correspondence concerning the re-

quest, or to perform any other act(s) regarding the Form 3115 on behalf of the taxpayer, a power of attorney reflecting that authorization must be attached to the form. A taxpayer's representative without a power of attorney to represent the taxpayer as indicated in this subsection will not be given any information regarding the Form 3115 application.

(7) A taxpayer changing its method of accounting for package design costs pursuant to this revenue procedure must reconcile its books and records at the end of the year of change and at the end of later tax years to show the accounting method granted.

.05 *Early Applications.* To implement a change in method of accounting for package design costs for a tax year subsequent to its third tax year ending on or after December 18, 1990 (see section 6.01(2) which precludes a taxpayer from making the change for its second or third tax years ending on or after December 18, 1990), the date of release of this revenue procedure, a taxpayer must complete a current Form 3115 and file a copy of it with the National Office within the first 180 days after the beginning of the year of change. A qualified application for a change in method of accounting for package design costs filed after the 180th day of a tax year and before the beginning of the next tax year will be considered to be timely filed for the next tax year (year of change) for purposes of this revenue procedure. The taxpayer must file a copy of the perfected Form 3115 with the National Office addressed to the Commissioner of Internal Revenue, P.O. Box 14095, Benjamin Franklin Station, Washington, within the first 180 days after the beginning of the year of change. The original of the perfected Form 3115 must be attached to the taxpayer's timely filed (determined with regard to extensions) federal income tax return for the year of change. Unlike the early application procedure under Rev. Proc. 84-74, the taxpayer will not be notified if the early application has not been perfected.

A taxpayer described in section 9.01(2) (concerning certain taxpayers that changed or received permission to change their method of accounting for package design costs during the six tax years prior to the year of change) must file the original of the perfected Form 3115 with the National Office addressed to the Commissioner of Internal Revenue, P.O. Box 7604, Benjamin Franklin Station, Washington, D.C. 20224, within the first 180 days after the beginning of the year of change. The taxpayer will be notified if the early application has not been perfected.

SEC. 10. ESTIMATED TAXES

For purposes of any required quarterly installments made on or before January 30, 1991, no penalty shall be assessed for underpayment of estimated taxes under sections 6654 or 6655 of the Code to the extent an underpayment results from the treatment of package design costs.

SEC. 11. INQUIRIES

Inquiries regarding this revenue procedure may be addressed to the Commissioner of Internal Revenue, CC:IT&A, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

SEC. 12. EFFECT ON OTHER DOCUMENTS

Rev. Proc. 89-16 and Rev. Proc. 89-17 are revoked. Any request for change in method of accounting filed under the provisions of Rev. Proc. 89-16 and any election filed under Rev. Proc. 89-17 will be disregarded. Any request for change in method of accounting filed under the provisions of Rev. Proc. 84-74 which is pending as of December 18, 1990, the date of release of this revenue procedure, will be returned. Rev. Rul. 89-23 is modified to delete the identification of the ruling as a designated ruling pursuant to section 5.12(2) of Rev. Proc. 84-74.

SEC. 13. EFFECTIVE DATE

.01 All the provisions of this revenue procedure, except as provided in section 13.02 below, are effective with respect to Forms 3115 filed for tax years ending on or after December 18, 1990, the date of release of this revenue procedure.

.02 With respect to taxpayers described in section 9.03 (concerning taxpayers under examination, before an appeals office, or before a federal court where the package design issue has been raised), the provisions of this revenue procedure are effective for Forms 3115 filed on or after December 18, 1990, the date of release of this revenue procedure.

26 CFR 601.602: Tax forms and instructions. (Also Part I, Sections 1, 32, 63, 135, 151, 6012, 6013; 1.1-1, 1.43-2, 1.63-1, 1.151-4, 1.6012-1, 1.6013-1)

Rev. Proc. 90-64

SECTION 1. PURPOSE

This revenue procedure sets forth the following inflation adjusted items for taxable years beginning in 1991:

1. the tax rate tables for individuals and for estates and trusts;
2. the basic standard deduction amounts for different filing statuses, the limitation on the standard deduction in the case of certain dependents, and the additional standard deductions for the aged and blind;
3. the personal exemption;
4. the earned income credit;
5. the amounts allowed against unearned income in computing the "kiddie tax," which taxes a minor child's net unearned income at the marginal rate that applies to the income of the child's parent; and
6. the limitations on the exclusion of income from the redemption of United States savings bonds for taxpayers who pay qualified higher education expenses.

SEC. 2. 1991 TAX RATE TABLES

The following adjusted tax rate tables are prescribed in lieu of the tables in subsections (a), (b), (c), (d), and (e) of section 1 of the Code with respect to taxable years beginning in 1991.

TABLE 1 - Section 1(a). — MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES

If Taxable Income Is:	The Tax Is:
Not Over $34,000	15% of the taxable income
Over $34,000, but not over $82,150	$5,100 plus 28% of the excess over $34,000
Over $82,150	$18,582 plus 31% of the excess over $82,150

TABLE 2 - Section 1(b). — HEADS OF HOUSEHOLDS

If Taxable Income Is:	The Tax Is:
Not Over $27,300	15% of the taxable income
Over $27,300 but not over $70,450	$4,095 plus 28% of the excess over $27,300
Over $70,450	$16,177 plus 31% of the excess over $70,450

TABLE 3 - Section 1(c). — UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS)

If Taxable Income Is:	The Tax Is:
Not Over $20,350	15% of the taxable income
Over $20,350 but not over $49,300	$3,052.50 plus 28% of the excess over $20,350
Over $49,300	$11,158.50 plus 31% of the excess over $49,300

TABLE 4 - Section 1(d). — MARRIED INDIVIDUALS FILING SEPARATE RETURNS

If Taxable Income Is:	The Tax Is:
Not Over $17,000	15% of the taxable income
Over $17,000 but not over $41,075	$2,550 plus 28% of the excess over $17,000
Over $41,075	$9,291 plus 31% of the excess over $41,075

TABLE 5 - Section 1(e). — ESTATES AND TRUSTS

If Taxable Income Is:	The Tax Is:
Not Over $3,450	15% of the taxable income
Over $3,450 but not over $10,350	$517.50 plus 28% of the excess over $3,450
Over $10,350	$2,449.50 plus 31% of the excess over $10,350

SEC. 3. 1991 STANDARD DEDUCTION

.01 The following adjusted standard deduction amounts are prescribed in lieu of the amounts set forth in section 63(c)(2) of the Code with respect to taxable years beginning in 1991.

Filing Status	*Standard Deduction*
MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES	$5,700
HEADS OF HOUSEHOLDS	$5,000
UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS)	$3,400
MARRIED INDIVIDUAL FILING A SEPARATE RETURN	$2,850

.02 Under section 63(c)(5) of the Code, the standard deduction for an individual who may be claimed as a dependent by another taxpayer for a taxable year beginning in the calendar year in which the individual's taxable year begins, cannot exceed the greater of (A) $550 or (B) the amount of the individual's earned income.

.03 The additional standard deduction amount for the aged and blind allowed under section 63(f) of the Code for taxable years beginning in 1991 is $650. That amount is increased to $850 if the individual is also unmarried and not a surviving spouse.

SEC. 4. 1991 PERSONAL EXEMPTION

.01 Section 151(b) of the Code generally allows a taxpayer an exemption for himself or herself. Section 151(c) generally allows a taxpayer additional exemptions for dependents as defined in section 152. The personal exemption for tax years beginning in 1991 is $2,150.

.02 Section 151(d) of the Code provides for the phaseout of the tax benefit of the personal exemptions allowed by section 151. For 1991 the threshold amounts at which that phaseout begins are as follows:

Section 1(a)	$150,000
Section 1(b)	$125,000
Section 1(c)	$100,000
Section 1(d)	$ 75,000
Section 1(e)	- - - -

Under section 151(d)(4) of the Code, these threshold amounts will be adjusted for inflation for taxable years beginning in 1992 and thereafter.

SEC. 5. 1991 EARNED INCOME CREDIT

.01 Section 32 of the Code provides a "basic earned income credit" which for 1991 is allowed at a rate of 16.7 percent for a taxpayer with one qualifying child and 17.3 percent for a taxpayer with two or more qualifying children. This credit may be increased by a "supplemental young child credit" which is allowed at a rate of 5 percent for a taxpayer with a qualifying child who has not attained age 1 as of the close of the calendar year. In addition, a "health insurance credit" is allowed at a rate of 6 percent for certain health insurance expenses.

.02 For calendar years beginning in 1991, these credits will be allowed on the first $7,140 of earned income. These credits will be phased out if the taxpayer's adjusted gross income (or, if greater, earned income) exceeds $11,250.

.03 For calendar years beginning in 1991, the maximum basic earned income credit will be $1,192 [.167 x $7,140] for a taxpayer with one qualifying child and $1,235 [.173 x $7,140] for a taxpayer with two or more qualifying children. The credit phases out at a rate of 11.93 percent for a taxpayer with one qualifying child and 12.36 percent for a taxpayer with two or more qualifying children and will phase out completely at $21,242 of adjusted gross income, or earned income, as the case may be.

.04 For calendar years beginning in 1991, the maximum supplemental young child credit will be $357 [.05 x $7,140]. The credit phases out at a rate of 3.57 percent and will phase out completely at $21,244 of adjusted gross income, or earned income, as the case may be.

.05 For calendar years beginning in 1991, the maximum health insurance credit will be $428 [.06 x $7,140]. The credit phases out at a rate of 4.285 percent and will phase out completely at $21,248 of adjusted gross income, or earned income, as the case may be.

SEC. 6. UNEARNED INCOME OF MINOR CHILDREN TAXED AS IF PARENT'S INCOME (THE "KIDDIE TAX")

.01 Section 1(i) of the Code provides that the tax on the net unearned income of a child under the age of 14 is computed at the marginal rate of the child's parent. Under section 1(i)(4)(A)(ii) net unearned income generally equals unearned income less the sum of (I) the amount in effect for the taxable year under section 63(c)(5)(A), plus (II) the greater of the amount described in (I) or certain itemized deductions.

.02 The amount in effect for 1991 under section 63(c)(5)(A) is $550. See section 3.02. Accordingly, for tax years beginning in 1991 net unearned income will generally equal unearned income less the greater of $1,100 or $550 plus certain itemized deductions.

SEC. 7. INCOME FROM UNITED STATES SAVINGS BONDS FOR TAXPAYERS WHO PAY QUALIFIED HIGHER EDUCATION EXPENSES

.01 Section 135 of the Code provides an exclusion for income from the redemption of United States savings bonds for taxpayers who pay qualified higher education expenses. The exclusion is phased out under section 135(b)(2) if the taxpayer's modified adjusted gross income exceeds $40,000 ($60,000 in the case of a joint return). The amount of a reduction is calculated by multiplying the amount otherwise excludable by a fraction. The numerator of the fraction is the excess of the modified adjusted gross income over the threshold amount and the denominator is $15,000 ($30,000 in the case of a joint return). For tax years beginning in 1991, the exclusion phases out if a taxpayer's modified adjusted gross income exceeds $41,950 ($62,900 in the case of a joint return) and the denominator of the fraction is $15,750 ($31,450 in the case of a joint return).

SEC. 8. COMPUTATION OF INFLATION ADJUSTMENTS

.01 Section 1(f)(1) of the Code provides that not later than December 15 of each calendar year, the Secretary shall prescribe inflation-adjusted tax rate tables that apply in lieu of the tax rate tables in section 1 with respect to taxable years beginning in the succeeding calendar year.

Under section 1(f)(3) of the Code, the inflation adjustment for a calendar year is the percentage (if any) by which the Consumer Price Index (CPI) for the preceding calendar year exceeds the CPI for the calendar year 1989. For purposes of computing the inflation adjustment, section 1(f)(4) defines the CPI as the average of the 12 monthly CPIs for the 12-month period ending on August 31 of such calendar year. Under section 1(f)(5), the CPI is that for all-urban consumers published by the Department of Labor.

Section 1(f)(2)(A) of the Code provides that the inflation adjustment is reflected in the tax rate tables by increasing the minimum and maximum amounts subject to the 15%, 28%, and 31% tax brackets. Under section 1(f)(6), an adjusted bracket amount is "rounded down" to the nearest multiple of $50 ($25 in the case of married individuals filing separately).

.02 Under section 63(c)(4) of the Code, the standard deduction amounts (including the limitation for certain dependents and the additional standard deduction for the aged or blind) are adjusted for inflation under the method described in section 1(f)(3), except that the preceding calendar year's CPI is compared with the CPI for the calendar year 1987. Under section 1(f)(6) an adjusted amount is "rounded down" to the nearest multiple of $50 ($25 in the case of married individuals filing separately).

.03 Section 151(d)(3) of the Code provides that the personal exemption amount is adjusted for inflation under the method described in section 1(f)(3) except that the preceding calendar year's CPI is compared with the CPI for the calendar year 1988. The adjusted exemption is "rounded down" to the nearest multiple of $50 under section 1(f)(6).

.04 Section 32(i) of the Code provides that the dollar amounts of the limitations applicable to the earned income credit are adjusted for inflation under the method described in section 1(f)(3), except that the preced-

ing calendar year's CPI is compared with the CPI for the calendar year 1984. Under section 32(i)(3), an adjusted amount is rounded to the nearest multiple of $10 (or, if the adjusted amount is a multiple of $5, it is increased to the next highest multiple of $10).

.05 Section 135(b)(2)(B) of the Code provides that the limitation on the exclusion of income from the redemption of United States savings bonds for taxpayers who pay qualified higher education expenses is adjusted for inflation under the method described in section 1(f)(3). The preceding calendar year's CPI is compared with the CPI for the calendar year 1989. The adjusted limitation is rounded to the nearest multiple of $50 (if the adjusted figure is a multiple of $25, it is increased to the next highest multiple of $50) under section 135(b)(2)(C).

SEC. 9. INFLATION ADJUSTMENT FACTORS

.01 Tax rate tables and qualified higher education expense exclusion — The CPI for 1990 is 128.0583333333 and the CPI for 1989 is 122.1500000000. Based on these figures, the inflation adjustment factor for the tax rate tables and the qualified higher education expense exclusion for taxable years beginning in 1991 is 1.0483694911.

.02 Standard deduction — The CPI for 1990 is 128.0583333333 and the CPI for 1987 is 111.9833333333. Based on these figures, the inflation adjustment factor for the standard deductions for taxable years beginning in 1991 is 1.1435481470.

.03 Personal exemption — The CPI for 1990 is 128.0583333333 and the CPI for 1988 is 116.6166666667. Based on these figures, the inflation adjustment for the personal exemption for taxable years beginning in 1991 is 1.0981134772.

.04 Earned income credit — The CPI for 1990 is 128.0583333333 and the CPI for 1984 is 102.4916666667. Based on these figures, the inflation adjustment for the earned income credit for taxable years beginning in 1991 is 1.2494511749.

SEC. 10. EFFECTIVE DATE

This revenue procedure is applicable for all taxable years beginning in 1991.

---

26 CFR 601.105: Examination of returns and claims for refund, credit, or abatement; determination of correct tax liability.
(Also Part I, Section 953.)

Rev. Proc. 90-65

SECTION 1. PURPOSE

This revenue procedure provides additional guidance under section 953(d) of the Internal Revenue Code of 1986 for corporations whose election under section 953(d) for the first taxable year beginning after December 31, 1987, was due before September 15, 1989, and who failed to make a timely election under section 953(d) for that year. This revenue procedure applies only to a corporation that upon making a section 953(d) election becomes a member of an affiliated group that files a consolidated return on the basis of a fiscal year.

SEC. 2. BACKGROUND

Notice 89-79, 1989-2 C.B. 392, provides guidance to certain foreign corporations concerning the election to be treated as a domestic corporation under section 953(d) of the Code. Notice 89-79 provides that, to be effective for a taxable year, an election under section 953(d) must be filed by the due date prescribed in section 6072(b) (with extensions) for the federal income tax return that is filed for the first year the election is in effect. Under Notice 89-79 and section 843, an electing corporation must use a calendar year annual accounting period unless it becomes an includible corporation in an affiliated group that files a consolidated return on the basis of a fiscal year.

Generally, an electing corporation that satisfies the stock ownership requirements of section 1504(a) of the Code will become an includible corporation in an affiliated group when it is first treated as a domestic corporation under section 953(d). See Section 1504(b)(2) and (c)(1) for exceptions applicable to life insurance companies. For any taxable year of the electing corporation beginning after December 31, 1987, for which an election under section 953(d) is filed, the electing corporation will first be treated as a domestic corporation on the day following the close of its prior taxable year. If the electing corporation becomes a member of a consolidated group upon the effective date of the election, the electing corporation must report its income on the consolidated return for the taxable year of the group in which or with which the electing corporation's taxable year begins. The consolidated return should report the income of the electing corporation for the portion of the year for which it was a member of the consolidated group, from the day following the close of its prior taxable year to the close of the group's taxable year. Section 1.1502-76(b) of the Income Tax Regulations.

The extended due date for the return of the calendar year electing corporation, for its first taxable year beginning after December 31, 1987, was September 15, 1989. The extended due date for the consolidated returns of certain fiscal year affiliated groups on which electing corporations would report income for their first taxable year beginning after December 31, 1987, may have been prior to July 24, 1989, the date Notice 89-79 was issued by the Internal Revenue Service.

SEC. 3. PROCEDURE

.01 If a corporation was unable to make a timely election under section 953(d) for its first taxable year beginning after December 31, 1987, and the final date for making its election for such year was prior to September 15, 1989, such corporation may make a section 953(d) election pursuant to the provisions of this revenue procedure, effective as of the first day of the electing corporation's first taxable year beginning after December 31, 1987, as provided herein. A late election, described in the preceding sentence, cannot be made unless the electing corporation has filed an effective election under section 953(d) for the second taxable year for which an election can be made if the date for making an election for such second taxable year precedes the date when an election is made pursuant to this revenue procedure. The final date for making an election pursuant to this revenue procedure is March 15, 1991. The procedure for making such election is described in section 3.02, .03 and .04, below.

.02 A corporation to which this revenue procedure applies can make an election under section 953(d) of the Code, effective for the electing

corporation's first taxable year beginning after December 31, 1987, by mailing an original election statement to: Internal Revenue Service, Assistant Commissioner (International), IN:C:C:51, 950 L'Enfant Plaza South, S.W., Washington D.C. 20024. The election statement must be in the form provided in Notice 89-79 except that it should be entitled "FOREIGN INSURANCE COMPANY ELECTION UNDER SECTION 953(d) PURSUANT TO REV. PROC. 90-65." If the electing corporation has previously made an election for the second taxable year for which a section 953(d) election can be made, such corporation should attach a copy of its previous election statement to the election statement for this retroactive election.

.03 A corporation that makes an election pursuant to this revenue procedure must report its income for its first taxable year beginning after December 31, 1987, on the amended consolidated income tax return of the affiliated group for the taxable year of the affiliated group in which or with which such taxable year of the electing corporation commences. A copy of the election statement filed pursuant to this revenue procedure and any previously filed section 953(d) election statement, as described in section 3.02, above, must be attached to the amended consolidated return. The amended consolidated return of the affiliated group must be filed by March 15, 1991, at the following address: Internal Revenue Service, P.O. Box #245, Ben Salem, PA 19020, D.P. 102C.

.04 The electing corporation should also amend any United States income tax return it previously filed that reported income that should have been reported on the consolidated return and indicate on the amended return the tax identification number of the affiliated group that it is joining. Any return of the electing corporation amended pursuant to this revenue procedure must be filed by March 15, 1991, at the address provided in section 3.03, above.

.05 If an electing corporation amends a United States income tax return that reported income that should have been reported on the consolidated return, as provided in section 3.04, above, any refund of tax paid with respect to the income reported on such amended return may be applied to the tax due on the amended consolidated return. If an electing corporation previously paid the tax due under section 953(d)(6) for a section 953(d) election made for the second taxable year for which an election can be made, the amount paid may be applied to the amount due under section 953(d)(6) for an election made pursuant to this revenue procedure. The amended consolidated return should indicate the name and tax identification number of the electing corporation and the tax year of the return of the electing corporation from which the payment of tax is to be applied.

.06 The extension of time provided by this revenue procedure for making an election under section 953(d) of the Code does not operate to extend the time for payment of the tax due, including the additional tax due under section 953(d)(6). Accordingly, interest will be imposed under section 6601 on any amount of such tax due that is not paid on or before the date prescribed for payment. Additions to tax under section 6651(a)(1) and (2) and section 6653(a) for any tax due with respect to the inclusion of the electing corporation's income on the amended consolidated return, will not be imposed if such tax is paid by March 15, 1991. The penalty for underpayment of estimated tax under section 6655 for installment payments due for the amended consolidated return will not be waived.

SEC. 4. EFFECT ON OTHER DOCUMENTS

Notice 89-79 is amplified.

SEC. 5. EFFECTIVE DATE

This revenue procedure is effective for the first taxable year beginning after December 31, 1987, of a corporation specified in section 953(d)(1) of the Code, if such corporation's due date for making an election under section 953(d) for such first taxable year was prior to September 15, 1989.

Notice of Proposed Rulemaking

Notice of Proposed Rulemaking

Consolidated Return Regulations—Coordination with Section 833

CO-26-89

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In *** [T.C. 8310, page 205, this Bulletin], the Internal Revenue Service is issuing temporary regulations that add a new §1.1502-75T(d)(5) of the consolidated return regulations by providing rules relating to the removal of the tax-exempt status of organizations described in section 833 of the Internal Revenue Code. The rules are needed because such organizations are, for taxable years beginning after 1986, includible corporations under section 1504(b). The text of the temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES: Written comments and requests for a public hearing must be received by November 6, 1990.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (CC:CO-26-89), Room 4429, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations published in *** [T.D. 8310, page 205, this Bulletin] add a new §1.1502-75T(d)(5) to Part 1 of Title 26 of the Code of Federal Regulations. For the text of the new temporary regulations, see T.D. 8310, published in *** [page 205, this Bulletin]. The preamble to the temporary regulations explains the regulations.

Special Analyses

It has been determined that these proposed rules will not be major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments And Requests For A Public Hearing

Before these temporary regulations are adopted as final regulations, consideration will be given to any written comments that are submitted (preferably nine copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Michael J. Murphy,
Acting Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on August 30, 1990, 11:30 a.m., and published in the issue of the Federal Register for September 5, 1990, 55 F.R. 36290)

Notice of Proposed Rulemaking

Regulations under Section 382 of the Internal Revenue Code of 1986; Limitations on Corporate Net Operating Loss Carryforwards

CO-62-89

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed amendments to §1.382-2T of the temporary Income Tax Regulations and §1.382-3 of the proposed Income Tax Regulations under section 382 of the Internal Revenue Code of 1986. The amendments provide option attribution rules for purposes of determining stock ownership in order to determine whether certain transactions in title 11 or similar cases qualify under section 382(l)(5). The rules are necessary to limit relief under section 382(l)(5) to ownership changes in which pre-change shareholders and qualified creditors maintain a substantial continuing interest in the loss corporation following the title 11 or similar case.

DATES: Written comments and requests for a public hearing must be received by November 6, 1990.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attention CC:CORP:T:R [CO-62-89], Room 4429, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to Part 1 of Title 26 of the Code of Federal Regulations (CFR) under section 382 of the Code. The proposed regulations relate to the operation of option attribution rules in determining when an ownership change occurs in a title 11 or similar case and whether the transaction qualifies under section 382(l)(5). Section 382 was amended by section 621 of the Tax Reform Act of 1986 (Pub. L. No. 99-514, 100 Stat. 2085 (1986)) [1986-3 C.B. (Vol. 1) 1, 171] and subsequent acts. Temporary regulations regarding the determination of an ownership change were added to the CFR as §1.382-2T by T.D. 8149, published in the Federal Register on August 5, 1987 (52 FR 29668) [1987-2 C.B. 85]. Proposed regulations were issued under section 382(l)(5) by a notice of proposed rulemaking published in the Federal Register on August 14, 1990 (55 FR 33137) [CO-77-89, page 682, this Bulletin].

Explanation of Provisions

Overview of relevant provisions of the Code and regulations.

Under section 382(a) of the Code, as amended, if an ownership change occurs with respect to a loss corporation (as defined in section 382(k)(1) and §1.382-2T(f)(1) of the temporary Income Tax Regulations), the amount of the loss corporation's taxable income for a post-change year that may be offset by the pre-change net operating losses (and certain built-in losses) of the loss corporation cannot exceed the section 382 limitation. The section 382 limitation for a post-change year is generally equal to the fair market value of the loss corporation's stock immediately before the ownership change multiplied by the applicable long-term tax-exempt rate published in the Internal Revenue Bulletin.

In general, an ownership change involves an increase of more than 50 percentage points in stock ownership by 5-percent shareholders during the testing period (usually the three-year period ending on the date on which a transaction is tested for an ownership change).

Ownership of stock for these purposes is determined by applying option attribution rules set forth in section 382(l)(3)(A) of the Code and §1.382-2T(h) of the temporary regulations. Section 382(l)(3)(A)(iv) provides that, except to the extent provided in regulations, an option to acquire stock is treated as exercised if the exercise results in an ownership change. Under §1.382-2T(h)(4), subject to certain exceptions, the owner of an option (or similar interest) to acquire stock is treated as acquiring the underlying stock on a testing date if that treatment would result in an ownership change.

Section 382(l)(5) of the Code provides that the limitation imposed by section 382(a) does not apply after an ownership change of a loss corporation if (1) the corporation is under the jurisdiction of a court in a title 11 or similar case immediately before the ownership change, and (2) the corporation's pre-change shareholders and qualified creditors (determined immediately before the ownership change) own at least 50 percent of the value and voting power of the loss corporation's stock (or stock of a controlling corporation if also in bankruptcy) immediately after the ownership change and as a result of being pre-change shareholders or qualified creditors immediately before the ownership change. Section 382(l)(5) applies only to a transaction that is ordered by a court or is pursuant to a plan approved by a court. *See* H.R. Rep. 841, 99th Cong., 2d Sess. II-192 (1986), 1986-3 C.B. (Vol. 4) 192. Although the limitation imposed by section 382(a) does not apply, the loss corporation may be required to reduce a portion of its pre-change losses and credits following a transaction qualifying under section 382(l)(5).

The proposed regulations.

Section 382(l)(5) of the Code is intended to provide relief from the application of the section 382 limitation only for bankruptcy reorganizations in which pre-change shareholders and qualified creditors maintain a substantial continuing interest in the loss corporation. Because the continuity requirement contemplated by the statute may be easily circumvented through the issuance of options, the Internal Revenue Service has determined that the application of option attribution rules is necessary to limit relief under section 382(l)(5) to ownership changes in which pre-change shareholders and qualified creditors do, in fact, maintain a substantial continuing interest. Without option attribution rules, a loss corporation could emerge from a bankruptcy reorganization with no limitation on its use of pre-change losses, even though more than 50 percent of the ownership interest in the loss corporation is effectively transferred to new investors as a result of a plan of bankruptcy reorganization.

The proposed regulations therefore provide option attribution rules that apply for purposes of determining whether the stock ownership requirements of section 382(l)(5) of the Code are satisfied. Under these rules, options (and similar interests) are generally deemed exercised if their exercise would cause the pre-change shareholders and qualified creditors to own less than the requisite amount of stock. The rules are proposed to be effective as of [Insert date that the Treasury Decision adopting this notice of proposed rulemaking is filed with the Federal Register] and to be applicable to ownership changes occurring on or after September 5, 1990.

Options created pursuant to the plan of reorganization in a title 11 or similar case are subject to the option attribution rules of §1.382-2T(h)(4)(i) of the temporary regulations upon confirmation of the plan by the court. The proposed regulation, however, adds new §1.382-2T(h)(4)(x)(J) to provide that the option attribution rules of §1.382-2T(h)(4)(i) do not apply to an option created by the confirmation of a plan of reorganization in a title 11 or similar case (including an option created under the plan), but only until the time that the plan of reorganization becomes effective. The amendment to §1.382-2T is proposed to be effective as of [Insert date that the Treasury Decision adopting this notice of proposed rulemaking is filed with the Federal Register] and to be applicable for any testing date occurring on or after September 5, 1990.

No inference should be drawn from the proposed regulations as to the application of option attribution rules for any other purpose or as to future regulations concerning section 1504(a)(5) of the Code.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these proposed regulations, and therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and seven copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time

and place for the hearing will be published in the Federal Register.

List of Subjects in 26 CFR 1.301-1 through 1.383-3

Corporate adjustments, Corporate distributions, Corporations, Income taxes, Reorganizations.

Proposed Amendments to the Regulations

The notice of proposed rulemaking (to amend 26 CFR Part 1) that was published on August 14, 1990 (55 FR 33137) is amended and additional amendments to 26 CFR Part 1 are proposed as follows:

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citations to read in part:

Authority: 26 U.S.C. section 7805; *** §1.382-2T also issued under 26 U.S.C. 382(g)(4)(C), and 26 U.S.C. 382(m), and §1.382-3 also issued under 26 U.S.C. 382(l)(3)(A) and 382(m).

Par. 2. A new §1.382-2T(h)(4)(x)(J) is added to read as set forth below:

§1.382-2T Definition of ownership, change under section 382 as amended by the Tax Reform Act of 1986 (temporary).

* * * * *

(h) ***

(4) ***

(x) *Options not subject to attribution.* ***

(J) *Title 11 or similar case.* Any option created by the confirmation of a plan of reorganization in a title 11 or similar case (within the meaning of section 368(a)(3)(A)), but only until the time that the plan becomes effective. This paragraph (h)(4)(x)(J) applies to any testing date occurring on or after September 5, 1990.

Par. 3. Section 1.382-3, as proposed on August 14, 1990 (55 FR 33137), is amended by revising paragraphs (c) and (d) to read as follows:

§1.382-3 Special rules under section 382 for a corporation in a title 11 or similar case.

* * * * *

(c) *Option attribution*—(1) *Determination of stock ownership for purposes of section 382(l)(5)(A)(ii).* Solely for purposes of determining whether the stock ownership requirements of section 382(l)(5)(A)(ii) and §1.382-3(a)(2) are satisfied at the time of an ownership change, stock of the loss corporation (or of a controlling corporation if also in bankruptcy) that is subject to an option is treated as acquired at that time, pursuant to an exercise of the option by its owner, if such deemed exercise would cause the pre-change shareholders and qualified creditors of the loss corporation to own (after such ownership change and as a result of being pre-change shareholders or qualified creditors immediately before such change) less than an amount of such stock sufficient to satisfy the ownership requirements of section 382(l)(5)(A)(ii) and §1.382-3(a)(2). An option that is owned as a result of being a pre-change shareholder or qualified creditor and that, if exercised, would result in the ownership of stock by a pre-change shareholder or qualified creditor will not be treated as exercised under this section. For purposes of this paragraph, rules similar to the rules of paragraphs (iii), (iv), (v), (vii), and (x)(A), (B) (except with respect to a debt instrument that was issued after the filing of the petition of the title 11 or similar case), (D), (E), (G), (H), (J), and (Z) of §1.382-2T(h)(4) (relating to certain rules regarding option attribution rules for purposes of determining whether an ownership change occurs) apply. Rules similar to the rules of §1.382-2T(h)(4)(viii) also apply with respect to an option except to the extent any person owning the option at any time on or after the change date acquires additional stock or an option to acquire additional stock during the period of time on or after the ownership change and on or before the lapse or forfeiture of the option.

(2) *Examples.*

Example 1. L is a loss corporation in a title 11 case. The plan of reorganization of L approved by the bankruptcy court provides for the cancellation of all existing L stock, the issuance of 100 shares of new L common stock to qualified creditors, and the issuance of an option to a new investor to acquire, at any time during the next 3 years, 90 shares of new L common stock from L at its fair market value on the date the plan is effective. Under paragraph (c)(1) of this section, upon the effective date of the plan, the option held by the new investor is deemed exercised if the exercise would cause the qualified creditors of L to own less than 50 percent of the total voting power or value of the L stock after the ownership change. Because the qualified creditors would receive at least 50 percent of the voting power and value of the new L common stock even if the option were deemed exercised, the stock ownership requirements of section 382(l)(5)(A)(ii) are satisfied.

Example 2. The facts are the same as in Example (1), except that L issues an option to the new investor to acquire 110 shares of new L common stock. This option is deemed exercised under paragraph (c)(1) of this section upon the effective date of the plan, because, as a result of the deemed exercise, the qualified creditors would receive only 100 of 210 shares of the new L common stock (approximately 48 percent) after the ownership change. Accordingly, the stock ownership requirements of section 382(l)(5)(A)(ii) are not satisfied and section 382(a) applies to the ownership change.

(3) *Effective date.* This paragraph (c) applies to ownership changes occurring on or after September 5, 1990.

(d) *Coordination with the definitions and nomenclature used in section 382*—(1) *In general.* Terms and nomenclature used in this section, and not otherwise defined herein, have the same respective meaning as in section 382 and the regulations thereunder.

(2) *Pre-change shareholders.* [reserved]

(3) *Qualified creditors.* [reserved]

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on September 5, 1990, 8:45 a.m., and published in the issue of the Federal Register for September 6, 1990, 55 F.R. 36657)

Notice of Proposed Rulemaking

Acquisitions Made to Evade or Avoid Income Tax; Use of Corporate Tax Attributes Following an Ownership Change

CO-77-89

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed income tax regulations providing guidance relating to acquisitions made to evade or avoid income tax under section 269 of the Internal Revenue Code of 1986 (the "Code"). This document also contains proposed income tax regulations which provide guidance relating to the use

of certain corporate tax attributes following an ownership change within the meaning of section 382(g)(1) to which section 382(l)(5) applies. Section 382 was amended in relevant part by the Tax Reform Act of 1986 (the "1986 Act") and the Revenue Act of 1987 (the "1987 Act").

DATES: Written comments and requests for a public hearing must be received by September 28, 1990. The proposed regulations would apply generally to any ownership change, as defined under section 382 of the Code, occurring after December 31, 1986.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, Attn: CC: CORP:T:R (CO-77-89), Room 4429, P.O. Box 7604, Ben Franklin Station, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Background

This document contains a notice of proposed rulemaking which proposes additions to Part 1 of Title 26 of the Code of Federal Regulations ("CFR") under sections 269 and 382 of the Code. The proposed regulations provide guidance under sections 269, 382, and 383 relating to acquisitions made to evade or avoid income tax and to the use of pre-change corporate tax attributes following an ownership change with respect to which section 382(l)(5) applies. Section 382 was amended in relevant part by section 621 of the 1986 Act (Pub. L. No. 99-514; 100 Stat. 2085 [1986-3 C.B. (Vol. 1) 1, 171]) and by section 10225 of the 1987 Act (Pub. L. No. 100-1203; 101 Stat. 1330-413 [1987-3 C.B. 1, 133]).

Explanation of Provisions

Overview of the relevant statutory provisions.

Under section 382(a) of the Code, as amended, if an ownership change occurs with respect to a loss corporation (as defined in section 382(k)(1) and §1.382-2T(f)(1) of the Income Tax Regulations), the amount of the loss corporation's taxable income for a post-change year that may be offset by the pre-change net operating losses (and certain built-in losses) of the loss corporation cannot exceed the section 382 limitation. The section 382 limitation for a post-change year is generally equal to the fair market value of the loss corporation's stock immediately before the ownership change multiplied by the applicable long-term tax exempt rate as published in the Internal Revenue Bulletin. In general, an ownership change involves an increase of more than 50 percentage points in stock ownership by 5-percent shareholders during the testing period (usually the three-year period ending on the date on which a transaction is tested for an ownership change).

Section 382(c) of the Code reduces the section 382 limitation to the amount of certain recognized built-in gains and any excess limitation carried over from prior years if the loss corporation does not continue its business enterprise at all times during the two-year period following the ownership change. The continuity of business enterprise requirement under section 382(c) is the same continuity of business enterprise requirement that must be satisfied in order for a transaction to qualify as a tax-free reorganization under section 368. H.R. Conf. Rep. No. 841, 99th Cong., 2nd Sess., II-189 (1986), 1986-3 (Vol. 4) C.B. 194 (the "Conference Report"). Thus, a loss corporation or its successor must either continue the loss corporation's historic business or use a significant portion of the loss corporation's historic business assets in a business. *See* §1.368-1(d).

Section 382(l)(5) of the Code provides that section 382(a) does not apply after an ownership change of a loss corporation if (1) the corporation is under the jurisdiction of a court in a title 11 or similar case immediately before the ownership change, and (2) the corporation's pre-change shareholders and qualified creditors (determined immediately before the ownership change) own at least 50 percent of the value and voting power of the loss corporation's stock (or stock of a controlling corporation if also in bankruptcy) immediately after the ownership change and as a result of being pre-change shareholders or qualified creditors immediately before the ownership change. Section 382(l)(5) applies only to a transaction that is ordered by the court or is pursuant to a plan approved by the court. Conference Report at II-192. Although the limitation imposed by section 382(a) does not apply, the loss corporation may be required to reduce a portion of its pre-change losses and credits following a transaction qualifying under section 382(l)(5).

Under section 383 of the Code and §1.383-1T, the section 382 limitation for a post-change year also applies to limit the amount of capital gain or tax liability that may be offset, respectively, by capital losses and excess credits (excess foreign taxes carried over under section 904(c), unused general business credits carried over under section 39, and unused minimum tax credits under section 53) of the loss corporation that are attributable to the pre-change period.

Section 269 of the Code may also affect a corporation's ability to use losses and credits following a change in ownership. Under section 269, if a person acquires control of a corporation, or a corporation acquires property in a carryover basis transaction from another corporation not controlled by the acquiring corporation or its shareholders, and the principal purpose of the acquisition is the evasion or avoidance of Federal income tax by securing the benefit of a deduction, credit, or allowance which would otherwise be unavailable, the Commissioner may disallow all or a portion of the deduction, credit, or allowance.

Relationship of section 269 to sections 382 and 383 after the Tax Reform Act of 1986—In General.

The amendments to sections 382 and 383 of the Code by the 1986 Act do not alter the continuing application of section 269 to acquisitions made for the principal purpose of evasion or avoidance of Federal income tax. Conference Report at II-194. Accordingly, the proposed regulations address the application of section 269 in situations in which section 382 or 383 also apply.

The proposed regulations provide, in general, that section 269 of the Code may be applied to disallow a deduction, credit, or other allowance the use or amount of which is limited or reduced under section 382 or 383 and the regulations thereunder. Nevertheless, because the limitations on the use of a deduction, credit, or other allowance under section 382(a)

or 383 may significantly reduce the value of the deduction, credit, or other allowance to an acquirer, the proposed regulations provide that the application of these limitations following an acquisition is relevant to the determination of whether, for purposes of section 269, the principal purpose of the acquisition was to evade or avoid Federal income taxes by securing the benefit of the deduction, credit, or other allowance.

Ownership changes to which section 382(l)(5) applies.

The proposed regulations clarify that the continuity of business enterprise requirement of section 382(c) of the Code does not apply to ownership changes to which section 382(l)(5) applies. In enacting section 382(l)(5), however, Congress neither explicitly nor implicitly excused bankruptcy reorganizations with a principal purpose of tax evasion or avoidance from its general direction that section 269 continue to apply in situations in which section 382(a) or section 383 also apply. Because the rate at which a corporation's surviving losses and credits may be used is not limited following an ownership change that qualifies under section 382(l)(5), the potential for tax evasion or avoidance is greater in a bankruptcy reorganization to which section 382(l)(5) applies. For example, when the corporation to be reorganized has substantial unused losses or credits but does not carry on more than an insignificant amount of an active trade or business, the principal purpose of reorganizing the corporation is likely to be to permit its creditors to recoup their losses, in part, through the tax system. The proposed regulations therefore provide that, absent strong evidence to the contrary, a requisite acquisition of control or property in connection with an ownership change to which section 382(l)(5) applies is considered to be made for the principal purpose of evasion or avoidance of Federal income tax unless the corporation carries on more than an insignificant amount of an active trade or business during and subsequent to the title 11 or similar case.

The Internal Revenue Service requests comments on whether there are other circumstances in which the acquisition of control or property of the reorganized corporation should or should not be considered to be made for the principal purpose of tax avoidance for purposes of section 269 of the Code.

The time of acquisition of control.

The proposed regulations clarify that, for purposes of section 269 of the Code, control is acquired when one or more persons acquire beneficial ownership of the requisite amount of stock. The proposed regulations further provide that, although insolvency or bankruptcy may cause the interests of creditors to predominate as a practical matter, creditor interests do not constitute beneficial ownership of the corporation's stock for purposes of section 269. As a result, creditors of a corporation in bankruptcy ordinarily will be considered to have acquired control for purposes of section 269 no earlier than the confirmation of the plan of reorganization. This result is required even though, under the rule of *Helvering v. Alabama Asphaltic Limestone Co.*, 315 U.S. 179 (1942), the interest of the creditors has taken on an equity-like character sufficient to satisfy the non-statutory continuity of proprietary interest test for corporate reorganizations. *See Helvering v. Southwest Consolidated Corp.*, 315 U.S. 194 at 202 (1942) ("[I]t is one thing to say that the bondholders 'stepped into the shoes of the old stockholders' so as to acquire the proprietary interest in the insolvent company. It is quite another to say that they were the 'stockholders' within the purview of the [statutory provision].")

Relationship of section 269 to 11 U.S.C. §1129(d).

Section 1129(d) of the Bankruptcy Code provides that, upon request of a party in interest that is a governmental unit (such as the Internal Revenue Service), the bankruptcy court may not confirm a plan of reorganization if the principal purpose of the plan is the avoidance of taxes. In any hearing under 11 U.S.C. §1129(d), the Government has the burden of proof on the issue of tax avoidance. In contrast, when the Government asserts in the course of income tax litigation that an acquisition was undertaken for the principal purpose of evading or avoiding Federal income tax, the position of the Commissioner generally is presumed to be correct and the burden of proving to the contrary is on the taxpayer.

Because the burden of proof is reversed in a proceeding under 11 U.S.C. §1129(d), the proposed regulations provide that in determining for purposes of section 269 of the Internal Revenue Code whether an acquisition pursuant to a plan of reorganization in a case under title 11 of the United States Code was made for the principal purpose of evasion or avoidance of Federal income tax, the fact that a governmental unit did not seek a determination under 11 U.S.C. §1129(d) is not taken into account and any determination by a court order 11 U.S.C. §1129(d) that the principal purpose of the plan is not avoidance of taxes is not controlling.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Code, the proposed regulations are being sent to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Request for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearing will be published in the Federal Register.

List of Subjects

26 CFR Sections 1.61-1 through 1.281-4

Deductions, Exemptions, Income Tax, Taxable Income.
26 CFR Sections 1.301–1 through 1.385–6

Income taxes, Corporate distributions, Corporations, Corporate adjustments, Reorganizations.

Proposed Amendments to the Regulations

The proposed amendments to 26 CFR, Chapter 1, Part 1 are as follows:

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citations:

Authority: 26 U.S.C. 7805; * * * Section 1.382–3 also issued under 26 U.S.C. 382(m).

Par. 2. Section 1.269–1 is amended to remove "1.269–6" from the first sentence and add "1.269–7" in lieu thereof.

Par. 3. Section 1.269–3 is amended as follows:

1. The last sentence of paragraph (a) is removed.

2. New paragraphs (d) and (e) are added to read as follows:

(d) *Ownership changes to which section 382(l)(5) applies; transactions indicative of purpose to evade or avoid tax.* Absent strong evidence to the contrary, a requisite acquisition of control or property in connection with an ownership change to which section 382(l)(5) applies is considered to be made for the principal purpose of evasion or avoidance of Federal income tax unless the corporation carries on more than an insignificant amount of an active trade or business during and subsequent to the title 11 or similar case (as defined in section 382(l)(5)(G)). The determination of whether the corporation carries on more than an insignificant amount of an active trade or business is based on all the facts and circumstances. These facts and circumstances may include, for example, the amount of business assets that continue to be used or the number of employees in the work force who continue employment. Where the corporation continues to utilize a significant amount of the historic business assets or work force, however, the requirement of carrying on more than an insignificant amount of an active trade or business may be met even though all trade or business activities temporarily cease.

(e) *Relationship of section 269 to 11 U.S.C. §1129(d).* In determining for purposes of section 269 of the Internal Revenue Code whether an acquisition pursuant to a plan of reorganization in a case under title 11 of the United States Code was made for the principal purpose of evasion or avoidance of Federal income tax, the fact that a governmental unit did not seek a determination under 11 U.S.C. §1129(d) is not taken into account and any determination by a court under 11 U.S.C. §1129(d) that the principal purpose of the plan is not avoidance of taxes is not controlling.

Par. 4. Section 1.269–5 is revised to read as follows:

§1.269–5 Time of acquisition of control.

(a) *In general.* for purposes of section 269, an acquisition of control occurs when one or more persons acquire beneficial ownership of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote or at least 50 percent of the total value of shares of all classes of stock of the corporation.

(b) *Application of general rule to certain creditor acquisitions.* For purposes of section 269, creditors of an insolvent or bankrupt corporation (by themselves or in conjunction with other persons) acquire control of the corporation when they acquire beneficial ownership of the requisite amount of stock. Although insolvency or bankruptcy may cause the interests of creditors to predominate as a practical matter, creditor interests do not constitute beneficial ownership of the corporation's stock. For purposes of section 269, creditors of a bankrupt corporation are treated as acquiring beneficial ownership of stock of the corporation no earlier than the time a bankruptcy court confirms a plan of reorganization.

Example. Corporation *L* files a petition under chapter 11 of the Bankruptcy Code on January 5, 1987. A creditors' committee is formed. On February 22, 1987, and upon the request of the creditors, the bankruptcy court removes the debtor-in-possession from business management and operations and appoints a trustee. The trustee consults regularly with the creditors' committee in formulating both short-term and long-term management decisions. After three years, the creditors approve a plan of reorganization in which the outstanding stock of Corporation *L* is cancelled and its creditors receive shares of stock constituting all of the outstanding shares. The bankruptcy court confirms the plan of reorganization on March 23, 1990, and the plan is put into effect on May 25, 1990. For purposes of section 269, the creditors acquired control of Corporation *L* no earlier than March 23, 1990. Similarly, the determination of whether the creditors acquired control of Corporation *L* with the principal purpose of evasion or avoidance of Federal income tax is made by reference to the creditors' purposes as of no earlier than March 23, 1990.

Par. 5. The heading of §1.269–6 is revised to read as follows:

§1.269–6 Relationship of section 269 to section 382 before the Tax Reform Act of 1986.

Par. 6. New §1.269–7 is added to read as follows:

§1.269–7 Relationship of section 269 to sections 382 and 383 after the Tax Reform Act of 1986.

Section 269 and §§1.269–1 through 1.269–5 may be applied to disallow a deduction, credit, or other allowance notwithstanding that the utilization or amount of a deduction, credit, or other allowance is limited or reduced under section 382 or 383 and the regulations thereunder. However, the fact that the amount of taxable income or tax that may be offset by a deduction, credit, or other allowance is limited under section 382(a) or 383 and the regulations thereunder is relevant to the determination of whether the principal purpose of an acquisition is the evasion or avoidance of Federal income tax.

Par. 7. New §1.382–3 is added to read as follows:

§1.382–3 Special rules under section 382 for corporations under the jurisdiction of a court in a title 11 or similar case.

(a) *Introduction.* Under section 382(l)(5), section 382(a) does not apply to any ownership change if—

(1) the old loss corporation is (immediately before the ownership change) under the jurisdiction of the court in a title 11 or similar case, and

(2) the pre-change shareholders and qualified creditors of the old loss corporation (determined immediately before the ownership change) own (after the ownership change and as a result of being shareholders or creditors immediately before the ownership change) stock of the new loss corporation (or stock of a controlling corporation if also in bankruptcy)

that meets the requirements of section 1504(a)(2) (determined by substituting "50 percent" for "80 percent" each place it appears). Section 382(l)(5) applies only to a transaction that is ordered by the court or is pursuant to a plan approved by the court.

(b) *Continuity of business requirement.* If section 382(l)(5) and this section apply to an ownership change of a loss corporation, section 382(c) and the regulations thereunder do not apply with respect to the ownership change.

(c) [Reserved]

(d) *Coordination with definitions and nomenclature used in section 382.* Terms and nomenclature used in this section, and not otherwise defined herein, have the same respective meanings as in section 382 and the regulations thereunder.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on August 13, 1990, 8:45 a.m., and published in the issue of the Federal Register for August 14, 1990, 55 F.R. 33137)

Notice of Proposed Rulemaking

Returns Relating to Certain Changes in Corporate Control or Capital Structure

CO-5-90

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: If any person acquires control of a corporation or if a corporation has a recapitalization or other substantial change in capital structure, section 6043(c) of the Internal Revenue Code (Code) provides that, when required by the Secretary, the corporation shall make a return setting forth the identity of the parties to the transaction, the fees involved, the changes in the capital structure involved, and such other information as the Secretary may require with respect to such transaction. Section 6043(c) was added to the Code by the Omnibus Budget Reconciliation Act of 1989 [Pub. L. 101-239, 1990-1 C.B. 210]. This document contains proposed regulations under section 6043(c) concerning reporting requirements under that section.

DATES: Written comments and requests for a public hearing must be received by August 6, 1990. The regulations are proposed to apply to transactions occurring after March 31, 1990.

ADDRESS: Send comments or requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attention: CC:CORP:T:R [CO-005-90], Room 4429, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. §3504(h)). Comments on the collection of information and suggestions for reducing the burden should be sent to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attention: IRS Reports Clearance Officer T:FP, Washington, DC 20224.

The collection of information requirement in these regulations is in proposed §1.6403-4(a), reflected in the requirement that certain corporations file a return on Form 8820. This information is needed by the Internal Revenue Service to implement section 6043(c) of the Code. The respondents will be certain corporations for which there has been a transaction of $10,000,000 or more involving a substantial change in the corporation's capital structure or an acquisition of control of the corporation.

The estimated total reporting burden and the estimated average burden per respondent will be reflected on Form 8820. Response will be on occasion and the estimated annual number of respondents is 10,000.

Background

This document proposes regulations to be added to the Income Tax Regulations (26 CFR Part 1) and the Procedure and Administration Regulations (26 CFR Part 301) under section 6043(c) of the Code. The regulations are proposed to be issued under the authority of section 6043(c), as added by section 7208(b)(1) of the Omnibus Budget Reconciliation Act of 1989, Pub. L. No. 101-239, and under the authority of section 7805(a).

Explanation of Provisions

Section 6043(c) provides that if any person acquires control of a corporation, or if a corporation has a recapitalization or other substantial change in capital structure, the corporation, when required by the Secretary, shall make a return setting forth the identity of the parties to the transaction, the fees involved, the changes in the capital structure involved, and such other information as the Secretary may require with respect to such transaction.

A. Transactions to be Reported

The proposed regulations require that a corporation file a return on Form 8820 setting forth certain required information. As proposed, the form must be filed on or before the 15th day of the fourth month following the month in which a reportable transaction occurs or, if later, 120 days after the date of the Internal Revenue Bulletin in which the Internal Revenue Service has announced that Form 8820 is available to the public. The proposed regulations provide that a reportable transaction is either an acquisition of control of the corporation or a substantial change in the capital structure of the corporation. The proposed regulations further provide that a related transaction means (i) in the case of an acquisition of control by a person, any other acquisition of stock of the corporation, directly or indirectly, by the person or the corporation during the 365-day period ending on the date on which control is acquired; or (ii) in the case of a substantial change in capital structure, any other change in capital structure during the 365-day period ending on the date of the substantial change in capital structure.

The proposed regulations define control by reference to section 304(c)(1). In determining whether an

acquisition of control has occurred, the proposed regulations apply the constructive ownership rules of section 318(a) (except that section 318(a)(4), which provides for constructive ownership through an option to acquire stock, does not apply), as modified by section 304(c)(3)(B).

No return would be required for an acquisition of control if, during the 365-day period ending on the date on which control is acquired, the fair market value of the stock acquired in that transaction and any related transactions, as of the date or dates on which stock is acquired, aggregates to less than $10,000,000. In addition, no return would be required for an acquisition of control if the acquisition consists of the receipt of stock upon the organization of the corporation in a single transaction or series of transactions ending no more than 365 days after the first issuance of stock by the corporation.

As proposed, a corporation undergoes a substantial change in capital structure if (i) the corporation undergoes a change in capital structure, as defined in the proposed regulation; and (ii) the total fair market value of stock and value of debt (as defined in the proposed regulation), as of the date or dates on which the stock or debt is issued or distributed, is $10,000,000 or more.

A corporation undergoes a change in capital structure under the proposed regulations if the corporation (i) exchanges its stock for its debt or for its stock; (ii) exchanges its debt for its stock; (iii) distributes stock in a transaction described in section 305(b); (iv) distributes stock described in section 306(c); (v) distributes its stock or its debt, or the stock or debt of a controlled corporation (within the meaning of section 355) in a reorganization under section 368(a)(1) or a transaction under section 355; or (vi) has a significant net issuance of debt.

As proposed, a corporation has a significant net issuance of debt if, as of a date on which debt is issued, the value of the debt issued by the corporation during the 365-day period ending on that date exceeds the value of its debt retired during the same period by more than 50 percent of the value of the corporation's total long-term debt and owners' equity, as shown on the corporation's applicable statement of financial position. The applicable statement of financial position means a statement, for any date during the 365-day period, determined under principles similar to those of section 56(f)(3)(A) and (C). If the corporation has 2 or more statements described in the clause or subclause of section 56(f)(3)(A) with the lowest numerical designation, the applicable statement of financial position would be the one showing the lowest value of total long-term debt and owners' equity. The proposed regulations provide that certain debt incurred in the ordinary course of business, and in acquiring certain property, will not be taken into account in determining whether a significant net issuance of debt has occurred.

The proposed regulations provide that the Internal Revenue Service may specify by revenue procedure additional transactions for which returns on Form 8820 will be required. Reporting requirements established by revenue procedure will apply only to transactions completed more than 30 days after the date on which the revenue procedure is published in the Internal Revenue Bulletin.

The proposed regulations provide that a reportable transaction, and any related transaction, shall not be taken into account in determining whether a return on Form 8820 is required for any transaction subsequent to the reportable transaction. Furthermore, it is intended that if, by reason of acquiring control of a corporation, a person also indirectly acquires control of a corporation controlled by the first corporation, only the first corporation is required to file Form 8820 with respect to the transaction.

For the penalties for failure to file Form 8820 (including provision for waiver of those penalties), see section 6652(1). In addition, as is true generally with respect to reporting obligations, the criminal penalties of sections 7203, 7206 and 7207 would, in appropriate cases, apply to violations involving Form 8820.

B. Form 8820

It is expected that Form 8820 will require the following information: (i) the identities (including the employer identification or taxpayer identification numbers) of the corporation that has undergone the transaction giving rise to the filing requirement, of any other parties to the transaction or related transactions (other than public shareholders or debtholders who do not actively participate in the transaction), and if any common parent of a group (as defined in the instructions) of which any of these entities is a member; (ii) an indication of the type of transaction for which the return is filed (e.g., stock purchase, debt issuance, etc.); (iii) a schedule of stock or debt transferred, issued, distributed, or redeemed in the transaction or in related transactions, including the fair market value of the stock or value of the debt, and other identifying information with respect to that stock or debt; (iv) a description, including the amount and form, of fees paid to persons who provided services in connection with the transaction or related transactions, including but not limited to merchant bankers, investment bankers, underwriters, consultants, persons who appraised or valued any property or stock in connection with the transaction, attorneys, accountants, and investment advisors; and (v) an identification of any parties to the transaction or related transactions (other than public shareholders or debtholders who do not actively participate in the transaction) that are foreign persons or tax-exempt entities.

Special Analyses

It has been determined that these proposed regulations are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are

submitted (preferably an original and eight copies) to the Internal Revenue Service. In addition to any other comments the public may wish to make on the proposed regulations, the Service is particularly interested in comments concerning (i) the types of information proposed to be required by Form 8820, and (ii) the types of transactions for which the regulations require reporting. In this connection, the Service is considering, and requests comment on, whether additional reporting requirements under section 6043(c) are needed with respect to corporations in bankruptcy, in order to identify leveraging transactions not otherwise covered by the proposed regulations. All comments will be available for public inspection and copying. A public hearing will be held upon written request by any person who has submitted written comments. If a public hearing is held, notice of time and place will be published in the Federal Register.

List of Subjects

26 CFR Part 1.6001-1—1.6109-2

Income taxes, Administration and procedure, Filing requirements.

List of Subjects

26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Penalties, Pensions, Statistics, Taxes, Disclosure of information, Filing requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR Parts 1 and 301 are proposed to be amended as follows: PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1986

Paragraph 1. The authority citation for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805; *** §1.6043-4 also issued under 26 U.S.C. 6043(c).

Par. 2. A new §1.6043-4 is added in the appropriate place to read as follows:

§1.6043-4 Information returns relating to certain changes in corporate control or capital structure.

(a) *General rule.* Except as otherwise provided in this section, a corporation shall file a return on Form 8820, setting forth such information as the form shall require, if a reportable transaction occurs. A reportable transaction is either an acquisition of control of the corporation, as defined in paragraph (c) of this section, or a substantial change in capital structure of the corporation, as defined in paragraph (d) of this section. The return is due on or before the 15th day of the fourth month following the month in which the reportable transaction occurred (or, if later, 120 days after the date of the Internal Revenue Bulletin in which the Internal Revenue Service announces that Form 8820 is available to the public).

(b) *Excluded corporations.* No return is required under this section for an acquisition of control or a substantial change in capital structure of—

(1) Any regulated investment company within the meaning of section 851,

(2) Any real estate investment trust within the meaning of section 856, and

(3) Any foreign corporation, unless 25 percent or more of its gross income from all sources for the 3-year period preceding the reportable transaction (or for the part of that period during which the corporation was in existence) was effectively connected (or treated as effectively connected, other than income described in section 884(d)(2)) with the conduct of a trade or business in the United States.

(c) *Acquisition of control of a corporation*—(1) *In general.* For purposes of this section, control of a corporation is acquired by a person if—

(i) before an acquisition of stock of the corporation, directly or indirectly, by the person or by the corporation, the person does not have control (as defined in the first sentence of section 304(c)(1)) of the corporation, and

(ii) after the acquisition, the person does have control (as defined in the first sentence of section 304(c)(1)) of the corporation.

(2) *Constructive ownership.* For purposes of this paragraph (c), the constructive ownership rules of section 318(a) (except for section 318(a)(4), providing for constructive ownership through an option to acquire stock), modified as provided in section 304(c)(3)(B), shall apply.

(3) *Person includes group.* For purposes of this paragraph (c), when two or more persons act together for the purpose of acquiring stock or control of a corporation, those persons shall be treated as a single person.

(4) *Exceptions*—(i) *Organization of corporation.* No return is required under this section for an acquisition of control of a corporation if the transaction consists of the receipt of stock upon the organization of the corporation in a single transaction or series of transactions ending no more than 365 days after the first issuance of stock by the corporation.

(ii) *Acquisitions involving less than $10,000,000.* No return is required under this section for an acquisition of control of a corporation if the fair market value of the stock acquired in the transaction and in any related transactions (as defined in paragraph (e) of this section), as of the date or dates on which the stock was acquired, is less than $10,000,000.

(d) *Substantial change in capital structure*—(1) *In general.* A corporation has a substantial change in capital structure if it has a change in capital structure (as defined in paragraph (d)(2) of this section) and the sum of the fair market value of stock and the value of debt issued or distributed in the transaction and in any related transactions (as defined in paragraph (e) of this section), as of the date or dates on which the stock or debt is issued or distributed, is $10,000,000 or more. For purposes of this paragraph (d), the value of debt is the greater of its fair market value or—

(i) its stated principal amount, if there is adequate stated interest (as defined in section 1274(c)(2)), or

(ii) its imputed principal amount (as defined in section 1274(b)).

(2) *Change in capital structure*—(i) *In general.* For purposes of this section, a corporation has a change in capital structure if the corporation—

(A) exchanges its stock for its debt or for its stock;

(B) exchanges its debt for its stock;

(C) distributes stock in a transaction described in section 305(b);

(D) distributes stock described in

section 306(c);

(E) distributes its stock or its debt, or stock or debt of a controlled corporation (within the meaning of section 355), in a reorganization under section 368(a)(1) or a transaction under section 355; or

(F) has a significant net issuance of debt, as defined in paragraph (d)(2)(ii) of this section.

(ii) *Significant net issuance of debt*—(A) *In general.* For purposes of this paragraph (d)(2), a corporation has a significant net issuance of debt if, during the 365-day period ending on a date on which debt is issued, the value of the debt issued by the corporation exceeds the value of the debt retired by the corporation (in each case as of the date or dates of issuance or retirement) by more than 50 percent of the sum of the corporation's long-term debt (determined without regard to paragraph (d)(2)(ii)(B) of this section) and owners' equity, as shown on the corporation's applicable statement of financial position. The applicable statement of financial position means a statement of financial position, determined according to principles similar to those of section 56(f)(3)(A) and (C), for any date during the 365-day period. If the corporation has 2 or more statements of a type described in the clause (or subclause) of section 56(f)(3)(A) with the lowest number designation, the applicable statement of financial position is the one that shows the smallest sum of long-term debt and owners' equity.

(B) *Certain debt not taken into account.* For purposes of this paragraph (d)(2)(ii), debt does not include—

(*1*) debt incurred in the ordinary course of business to acquire or carry goods or services, to the extent that the aggregate value of the debt does not exceed the fair market value of the goods or services, if—

(*i*) the debt is incurred substantially contemporaneously with the acquisition of the goods or services, and

(*ii*) the debt is reasonably expected to be repaid in full by the corporation within one year from the date on which it was incurred;

(*2*) debt incurred in the ordinary course of business and secured by accounts receivable, to the extent that the aggregate value of the debt does not exceed the fair market value of the accounts receivable;

(*3*) debt incurred in acquiring, constructing, or substantially improving any asset (other than stock of the corporation) and secured by that asset, to the extent that the aggregate value of the debt does not exceed the fair market value of the asset (or, in the case of a substantial improvement, does not exceed the cost of the improvement); or

(*4*) debt resulting from the refinancing of debt meeting the requirements of this paragraph (d)(2)(ii)(B) (including this paragraph (d)(2)(ii)-(B)(*4*)), provided that—

(*i*) the value of the debt resulting from the refinancing does not exceed the value of the refinanced debt on the date of the refinancing;

(*ii*) in the case of any initial or subsequent refinancing of a debt that was described in paragraph (d)(2)(ii)-(B)(*2*) or (*3*) of this section, the refinanced debt is secured by the asset described in paragraph (d)(2)(ii)(B)(*2*) or (*3*) of this section; and

(*iii*) in the case of any initial or subsequent refinancing of a debt that was described in paragraph (d)(2)(ii)-(B)(*1*) of this section, the refinanced debt is reasonably expected to be repaid in full by the corporation within one year of the date on which the original debt was incurred.

(3) *Stock.* For purposes of this paragraph (d), stock includes all rights to acquire stock.

(e) *Related transaction.* For purposes of this section, the term related transaction means—

(1) in the case of an acquisition of control of a corporation, any other acquisition of stock of the corporation, directly or indirectly, by the person acquiring control or by the corporation, during the 365-day period ending on the date of the acquisition of control; or

(2) in the case of a change in capital structure (as defined in paragraph (d)(2) of this section), any other change in the capital structure (as defined in paragraph (d)(2) of this section) of the corporation during the 365-day period ending on the date of the change in capital structure.

(f) *No double-counting of transactions.* No reportable transaction or any related transaction shall be taken into account in determining whether a return on Form 8820 is required for any transaction subsequent to the reportable transaction.

(g) *Additional transactions specified in revenue procedure.* The Internal Revenue Service may by revenue procedure specify transactions, in addition to those described in this regulation, for which returns on Form 8820 will be required. Reporting requirements established under this paragraph (g) will apply only to transactions completed more than 30 days after the date of the Internal Revenue Bulletin in which the revenue procedure setting forth the filing requirement is published.

(h) *Penalties for failure to file.* For the penalties for failure to file Form 8820, see section 6652(1). In addition, as is true generally with respect to reporting obligations, the criminal penalties of sections 7203, 7206 and 7207 would, in appropriate cases, apply to violations involving Form 8820.

(i) *Effective date.* This section applies to transactions occurring after March 31, 1990.

PART 301—PROCEDURE AND ADMINISTRATION

Par. 3. The authority citation for Part 301 is amended by adding the following citation:

Authority: 26 U.S.C. 7805; *** §301.6043(c)-1 is also issued under 26 U.S.C. 6043(c).

Par. 4. A new §301.6043(c)-1 is added in the appropriate place to read as follows:

§301.6043(c)-1 Information returns relating to certain changes in corporate control or capital structure.

For provisions relating to the requirement that a corporation file a return of information if control of the corporation is acquired by a person or if the corporation has a substantial change in capital structure, see §1.6043-4 of this chapter (Income Tax Regulations).

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on July 3, 1990, 8:45 a.m., and published in the issue of the Federal Register for July 5, 1990, 55 F.R. 27648)

Notice of Proposed Rulemaking

Proposed Regulations Under Section 108 of the Internal Revenue Code; Discharge of Indebtedness

CO-76-90

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations under section 108(e)(8)(A) of the Internal Revenue Code of 1986 ("the Code"). Section 108(e)(8)(A) was added by the Bankruptcy Tax Act of 1980 and amended by section 11325 of the Revenue Reconciliation Act of 1990. The proposed regulations provide rules for determining whether stock issued in exchange for indebtedness is nominal or token under section 108(e)(8)(A) of the Code.

DATES: Written comments and requests for a public hearing must be received by February 4, 1991.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, CC:CORP:T:R [CO-76-90], Room 4429, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Background

This document concerns section 108(e)(8)(A) of the Code and adds proposed regulations §1.108-1. Section 108(e)(8)(A) was added by section 2(a) of the Bankruptcy Tax Act of 1980 (Pub. L. No. 96-589, 94 Stat. 3389) and amended by section 11325 of the Revenue Reconciliation Act of 1990 (Pub. L. No. 101-508, 104 Stat. 1388).

The regulations are proposed to be effective on December 6, 1990, and are proposed to apply to exchanges on or after December 6, 1990. Although the regulations are not proposed to apply to exchanges occurring before December 6, 1990, no inference is intended concerning the interpretation of section 108(e)(8)(A) prior to the effective date of these regulations. The Internal Revenue Service will apply the principles underlying the rules of the proposed regulations to exchanges occurring before December 6, 1990, in testing whether the stock transferred is "nominal or token" within the meaning of section 108(e)(8)(A).

Explanation of Provisions

(a) *Overview of Section 108*

Under section 61(a)(12) of the Code, gross income includes income from the discharge of indebtedness. Discharge of indebtedness income to a debtor generally arises when a creditor accepts less than full payment for an amount of indebtedness. Section 108 provides certain rules with respect to discharge of indebtedness income occurring in a title 11 case or when the debtor is insolvent. In general, insolvent debtors exclude discharge of indebtedness income from gross income to the extent of their insolvency (defined in section 108(d)(3)) while title 11 debtors exclude all income arising from a discharge of indebtedness pursuant to a plan approved by the bankruptcy court (section 108(d)(2)). Under section 108(b), title 11 and insolvent debtors must reduce certain tax attributes in an amount equal to the excluded amount of discharge of indebtedness income. If the amount of discharge of indebtedness income exceeds the amount of tax attributes, the excess is disregarded. S. Rep. No. 1035, 96th Cong., 2d. Sess. 2 (1980), 1980-2 C.B. 626.

Section 108(e)(10)(A) of the Code provides that a debtor corporation that transfers stock to a creditor in satisfaction of indebtedness is treated as having satisfied the indebtedness with an amount of money equal to the fair market value of the stock. As a result, debtor corporations subject to section 108(e)(10)(A) realize discharge of indebtedness income to the extent the amount of the indebtedness exceeds the fair market value of the stock issued in exchange for the indebtedness. Under section 108(e)(10)-(B)(i), section 108(e)(10)(A) does not apply to any transfer of stock (other than disqualified stock) by a debtor corporation in a title 11 case or to the extent the debtor is insolvent. Disqualified stock, as defined in section 108(e)(10)(B)(ii), is stock with a stated redemption price if (a) the stock has a fixed redemption date, (b) the issuer of such stock has the right to redeem such stock at one or more times, or (c) the holder of such stock has the right to require its redemption at one or more times.

As a consequence of the exclusion in section 108(e)(10)(B)(i) of the Code, title 11 and insolvent debtors remain eligible for the common law exception to the realization of discharge of indebtedness income where a debtor corporation issues stock, other than disqualified stock, to its creditors in exchange for debt ("the stock-for-debt exception"). If the stock-for-debt exception applies, gross income does not arise from the exchange, the exclusion under section 108(a) of the Code does not apply since there is no gross income to exclude and, therefore, no reduction of tax attributes occurs under sections 108(b) and 1017.

Section 108(e)(8) of the Code prevents the application of the stock-for-debt exception in certain "*de minimis*" cases. Section 108(e)(8)(A) provides that the stock-for-debt exception does not apply to the issuance of nominal or token shares. The flush language of section 108(e)(8), which was added by the Revenue Reconciliation Act of 1990 (Pub. L. No. 101-508), provides that disqualified stock is not treated as stock in determining whether shares are nominal or token. Section 108(e)(8)(B) provides that the stock-for-debt exception does not apply with respect to an unsecured creditor, where the ratio of the value of the stock received by the unsecured creditor to the amount of its indebtedness canceled or exchanged for stock in the workout is less than 50 percent of a similar ratio computed for all unsecured creditors participating in the workout.

Thus, the stock-for-debt exception is available in the case of an insolvent or title 11 debtor only if the exchange of stock for debt satisfies the *de minimis* rules of section 108(e)(8) of the Code. If, for example, stock is considered nominal or token under section 108(e)(8)(A), the debtor is treated as having satisfied the indebtedness with an amount of money equal to the fair market value of the stock. Any resulting discharge of indebtedness income is excluded from gross income to the extent provided under section 108(a), but attribute reduction is required under section 108(b).

(b) *Overview of proposed regulations*

The legislative history of section 108(e)(8)(A) of the Code indicates that a facts and circumstances inquiry must be made to ensure that the stock-for-debt exception is not circumvented by the issuance of nominal or token shares to a creditor who has no real equity interest in the corporation. S. Rep. No. 1035, 96th Cong., 2d. Sess. 17, 1980-2 C.B. 628. The proposed regulations provide a nonexclusive list of facts and circumstances to be taken into account in determining if stock is nominal or token. The factors are generally taken into account with respect to the issuance of stock to a creditor in exchange for indebtedness held by that creditor.

For purposes of making the nominal or token analysis, section 1.108-1(a)(2) of the Proposed Regulations adopts the flush language in section 108(e)(8) of the Code which provides that "disqualified stock" under section 108(e)(10)(B)(ii) will not be considered to be stock for purposes of section 108(e)(8). H. Rep. No. 964, 101st Cong., 2d Sess. 1099. Section 1.108-1(a)(2) does not apply to stock that is not disqualified stock under the effective date provisions of section 11325(c) of the Revenue Reconciliation Act of 1990. Accordingly, such stock is treated as stock for purposes of the Proposed Regulations.

In applying the facts and circumstances test, Prop. Reg. §1.108-1(b)-(1)(i) provides that the most important factor is the ratio of the fair market value of the stock issued to the creditor to the allocable indebtedness treated as exchanged for the stock ("Stock to Debt Ratio"). The transfer to a creditor of stock with a fair market value that is low relative to the allocable indebtedness that is discharged is evidence that the shares are nominal or token. The second factor, described in Prop. Reg. §1.108-1(b)(1)(ii), is a comparison of the fair market value of stock received by a creditor to the fair market value of the total consideration received by the creditor in the exchange ("Stock to Total Consideration Ratio"). If the fair market value of the stock is low compared to the fair market value of the total consideration received by the creditor, that is evidence that the shares are nominal or token. The third factor, described in Prop. Reg. §1.108-1(b)(1)(iii), is a comparison of the fair market value of the stock issued to the creditors as a group and the total fair market value of the outstanding stock after the bankruptcy reorganization or insolvency workout ("Stock to Total Stock Ratio"). The fact that the fair market value of the stock issued to the creditors as a group is low in comparison to the fair market value of all of the debtor corporation's outstanding stock is evidence that the shares are nominal or token. Whether a ratio described in Prop. Reg. §1.108-1(b)(1) is low depends upon the particular ratio and whether other facts and circumstances, including the other ratios, indicate that the stock transferred is nominal or token.

The proposed regulations provide special rules for calculating the Stock to Debt Ratio where a debtor issues preferred stock in exchange for outstanding debt. (These rules do not apply to stock that is "disqualified stock" under §1.108-1(a)(2) of the Proposed Regulations.) "Preferred stock," as described in Prop. Reg. §1.108-1(b)(2)(i), is stock that has a limited or fixed redemption price or liquidation preference and does not have a meaningful right to participate in corporate growth. For this purpose, a liquidation preference exists if the stock's right to share in liquidation proceeds is limited and preferred. In addition, a meaningful right to participate in corporate growth is not established by (i) a right to convert preferred stock into a class of stock other than preferred stock or (ii) the fact that the redemption price or liquidation preference exceeds the fair market value of the preferred stock. A meaningful right to participate in corporate growth generally denotes a higher degree of participation than a right to participate in corporate growth to any significant extent as used in other provisions of the Code.

The Stock to Debt Ratio is determined separately for each class of preferred stock; other classes of stock ("other stock") are aggregated in determining the Stock to Debt Ratio. Preferred stock is tested separately from other stock because preferred stock, unlike other stock, qualifies for the stock-for-debt exception only to the extent of the lesser of its redemption price or liquidation preference.

The proposed regulations provide that, in determining the Stock to Debt Ratio with respect to preferred stock, the fair market value of each class of preferred stock issued to the creditor is compared to the portion of the discharged indebtedness that is allocable to the preferred stock. In general, the amount of indebtedness allocable to a class of preferred stock is the lesser of the redemption price or liquidation preference of the preferred stock. The indebtedness that is allocable to a class of preferred stock may not be less than the fair market value of the preferred stock nor greater than the total amount of the indebtedness discharged. The determination of redemption price and liquidation preference is made with reference to the lowest redemption price or liquidation preference of the preferred stock for any period after its issuance established at the time of its issuance. Based on this comparison and other relevant factors, such as the Stock to Total Consideration Ratio and the Stock to Total Stock Ratio, a determination is made as to whether the issuance of the preferred stock to a given creditor is nominal or token.

If both common stock and preferred stock are issued by a debtor to a creditor, the Stock to Debt Ratio is determined separately for stock other than preferred stock. In determining the ratio with respect to other stock, the fair market value of all classes of other stock issued to a creditor is compared to the portion of the discharged indebtedness that is allocable to the other stock. The amount of the indebtedness allocable to the other stock is the adjusted issue price of the indebtedness discharged by the creditor, reduced by the amount of other consideration, if any, transferred to the creditor in exchange for the indebtedness. Accordingly, the adjusted issue price of the indebtedness discharged by a creditor is reduced by the sum of (i) the amount of money paid to the creditor, (ii) the issue price of new indebtedness issued to the creditor, (iii) the amount of indebtedness properly allocable to preferred stock issued to the creditor, and (iv) the fair market value of other property, including disqualified stock under section 108(e)(10)(B)(ii), transferred to the creditor in exchange for the indebtedness. The

amount of indebtedness allocable to preferred stock is generally determined in accordance with the rules described in the preceding paragraph. If preferred stock is determined to be nominal or token, however, the amount of allocable indebtedness is limited to the stock's fair market value. Based on a comparison of the fair market value of the other stock to the allocable indebtedness and other relevant factors, such as the Stock to Consideration Ratio and the Stock to Total Stock Ratio, a determination is made as to whether the other stock is nominal or token.

(c) *Proposed Standards*

The Service is also considering issuing a revenue procedure or other appropriate guidance setting forth specific circumstances in which shares issued to discharge indebtedness will not be considered nominal or token. The Service requests comments on the proposed standards set forth in the following paragraphs.

Under the proposed standards, stock (within the meaning of section 108(e)(8) of the Code) that is issued in exchange for indebtedness would not be nominal or token if:

(1) The fair market value of stock transferred to the creditor is at least 10% of the amount of the allocable indebtedness discharged (i.e., Stock to Debt Ratio is at least 10% for each class of stock for which a separate ratio is calculated) and the fair market value of the stock transferred to the creditor is at least 25% of the total fair market value of all consideration transferred in exchange for the debt (i.e., Stock to Total Consideration Ratio for that creditor is at least 25%);

(2) The fair market value of the stock transferred to the creditor is at least 25% of the total fair market value of all consideration transferred in exchange for the debt (i.e., Stock to Total Consideration Ratio for that creditor is at least 25%), and the fair market value of the stock transferred to the creditor is at least 25% of the total fair market value of all outstanding stock of the debtor after the bankruptcy reorganization or insolvency workout (i.e., Stock to Total Stock Ratio for that creditor is at least 25%); or

(3) The only consideration transferred in exchange for debt held by unsecured creditors is stock (i.e., Stock to Total Consideration Ratio for unsecured creditors as a group is 100%), and the stock transferred to the unsecured creditors as a group is 90% of the outstanding stock of the corporation after the bankruptcy reorganization or insolvency workout (i.e., Stock to Total Stock Ratio is 90%).

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. A Regulatory Flexibility Analysis is therefore not required under the Regulatory Flexibility Act (5 U.S.C. Chapter 6). Pursuant to section 7805(f) of the Internal Revenue Code, these proposed regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. In particular, the Service invites comments on the proposed standards for determining when stock is more than nominal or token under section 108(e)(8)(A) of the Code. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearing will be published in the Federal Register.

Deductions, Exemptions, Income tax, Taxable income.

Proposed Amendments to the Regulations

Accordingly, Title 26, Chapter 1, Part 1 of the Code of Federal Regulations, are proposed to be amended as follows. PART 1—[Amended]

Paragraph 1. The authority citation for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805; * * * Section 1.108-1 also issued under 26 U.S.C. sections 108(e)(8) and 108(e)(10)(B).

Par. 2. New §1.108-1 is added to read as set forth below.

§1.108-1 *Nominal or token shares issued to discharge indebtedness.*

(a) *Overview*—(1) *In general.* Under section 108(e)(10)(A), if a debtor corporation transfers stock to a creditor in satisfaction of its indebtedness, the corporation generally is treated as satisfying the indebtedness with an amount of money equal to the fair market value of the stock. Section 108(e)(10)(B) provides that this rule does not apply to any transfer of stock (other than disqualified stock) by a debtor corporation in a title 11 case or by any other debtor but only to the extent the debtor is insolvent. A title 11 or insolvent debtor does not realize discharge of indebtedness income to the extent the common law stock-for-debt exception applies. Section 108(e)(8), as added by the Bankruptcy Tax Act of 1980 and amended by the Revenue Reconciliation Act of 1990, prevents the application of the stock-for-debt exception in certain "*de minimis*" cases. Section 108(e)(8)(A) provides that the stock-for-debt exception does not apply if the shares of stock issued in exchange for the indebtedness are nominal or token.

(2) *Disqualified stock.* The flush language of section 108(e)(8) provides that "disqualified stock" (as defined in section 108(e)(10)(B)(ii)) is not treated as stock for purposes of section 108(e)(8). Section 108(e)(10)(B)-(ii) defines disqualified stock as stock with a stated redemption price if the stock has a fixed redemption date, the issuer of such stock has the right to redeem such stock at one or more times, or the holder of such stock has the right to require its redemption at one or more times. Accordingly, disqualified stock is not considered stock for purposes of this section. This paragraph (a)(2) applies generally to stock, to which section 108(e)(10)(B)-(ii) applies, that is transferred after October 9, 1990, in satisfaction of any indebtedness.

(b) *Facts and circumstances to be considered in determining nominal or token shares*—(1) *In general.* All relevant facts and circumstances must be considered in determining whether shares of stock issued to a creditor are nominal or token. Set forth below is a nonexclusive list of relevant factors to be taken into account in making this determination.

(i) *Stock to debt ratio.* A comparison of the fair market value of stock transferred to a creditor to the amount of discharged indebtedness allocable to that stock ("Stock to Debt Ratio") is relevant to the determination of whether shares of stock issued to the creditor are nominal or token. A low Stock to Debt Ratio is evidence that the shares issued in exchange for the discharged indebtedness are nominal or token. The Stock to Debt Ratio is the most important factor in making the determination of whether shares are nominal or token.

(ii) *Stock to total consideration ratio.* A comparison of the fair market value of stock transferred to a creditor to the fair market value of the total consideration received by the creditor in the exchange ("Stock to Total Consideration Ratio") is relevant to the determination of whether shares of stock are nominal or token. A low Stock to Total Consideration Ratio is evidence that the shares issued in exchange for the discharged indebtedness are nominal or token.

(iii) *Stock to total stock ratio.* A comparison of the fair market value of the stock transferred to the creditors as a group to the total fair market value of all of the outstanding stock of the corporation after the bankruptcy reorganization or insolvency workout ("Stock to Total Stock Ratio") is relevant to the determination of whether shares of stock are nominal or token. A low Stock to Total Stock Ratio is evidence that the shares issued in exchange for the discharged indebtedness are nominal or token.

(2) *Special rules*—(i) *Preferred stock.* For purposes of applying paragraph (b)(1)(i) of this section, the allocable indebtedness of each creditor that is discharged by each class of preferred stock issued to the creditor is equal to the lesser of the redemption price or liquidation preference of the respective class of preferred stock. This determination is made with reference to the lowest redemption price or liquidation preference of the preferred stock for any period after its issuance as established at the time of issuance. However, the allocable indebtedness may not be less than the fair market value of the preferred stock nor greater than the total amount of the indebtedness discharged. "Preferred stock" is stock that has a limited or fixed redemption price or liquidation preference and does not have a meaningful right to participate in corporate growth. For this purpose, a liquidation preference exists if the stock's right to share in liquidation proceeds is limited and preferred. In addition, solely for purposes of applying the tests of this section, a meaningful right to participate in corporate growth is not established by a right to convert preferred stock into stock other than preferred stock or the fact that the redemption price or liquidation preference exceeds the fair market value of the preferred stock.

(ii) *Other stock.* For purposes of paragraph (b)(1)(i) of this section, the allocable indebtedness of each creditor discharged by all stock other than preferred stock ("other stock") issued to the creditor is the adjusted issue price of the indebtedness discharged by the creditor, reduced by the amount of other consideration, if any, transferred to the creditor in exchange for the indebtedness, including:

(A) The amount of any money,

(B) The issue price of any new indebtedness,

(C) The amount of any indebtedness allocable to preferred stock under paragraph (b)(2)(i) of this section, and

(D) The fair market value of any other property, including any disqualified stock described in section 108(e)(10)(B)(ii).

For purposes of this section, the amount of indebtedness allocable to preferred stock is limited to the fair market value of the preferred stock if the preferred stock is determined to be nominal or token.

(iii) *Analysis of ratios.* Whether a ratio described in paragraph (b)(1) of this section is low depends upon the particular ratio and whether other facts and circumstances, including the other ratios, indicate that the stock transferred is nominal or token.

(iv) *Example.*

(a) Z Corporation is under the jurisdiction of a court in a case under title 11 of the United States Code. Creditor holds debt of Z with an adjusted issue price of $100x. Pursuant to a plan approved by the court, Z issues preferred stock with a redemption price and liquidation preference of $37x and a fair market value of $35x, common stock with a fair market value of $30x and $3x of cash to Creditor in discharge of the indebtedness of $100x. The preferred stock is first redeemable more than five years after its issuance and is not disqualified stock under section 108(e)(10)(B)(ii).

(b) Under paragraph (b)(2)(i) of this section, the fair market value of the preferred stock, $35x, is compared to the amount of allocable indebtedness. Allocable indebtedness is equal to the redemption price and liquidation preference of $37x.

(c) Under paragraph (b)(2)(ii) of this section, the fair market value of the other stock, $30x, is compared to the allocable portion of the indebtedness. Assuming the preferred stock is not nominal or token, the allocable indebtedness is the adjusted issue price of the indebtedness, $100x, less the sum of the amount of indebtedness allocated to the preferred stock under paragraph (b)(1)(i) of this section, $37x, and $3x, the amount of cash paid. Thus, the allocable indebtedness for determining whether the common stock is nominal or token is $60x ($100x-$37x-$3x).

(c) *Effective Date.* The proposed regulations apply to exchanges that occur on or after December 6, 1990.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on December 6, 1990, 8:45 a.m., and published in the issue of the Federal register for December 7, 1990, 55 F.R. 50568)

Notice of Proposed Rulemaking

Limitations on Corporate Net Operating Loss Carryforwards

CO-81-90

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed amendments to §1.382-2T of the temporary Income Tax Regulations under section 382 of the Internal Revenue Code of 1986 ("the Code"). The proposed amendments provide for the aggregation of stock ownership in certain cases. Section 382 was amended by section 621 of the Tax Reform Act of 1986. Section 382 was further amended by section 10225 of the Revenue Act of 1987 (the "1987 Act"), sections 1006, 4012 and 5077 of the Technical and Miscellaneous Revenue Act of 1988 (the "1988 Act"), and sections 7205, 7304, 7811, 7815, and 7841 of the Revenue Reconciliation Act of 1989 (the "1989 Act").

DATES: Written comments and requests for a public hearing must be received by January 22, 1991. The proposed amendments to the temporary regulations are generally applicable to testing dates (as determined by applying the amendments) occurring on or after November 20, 1990. A special effective date is provided for groups that act pursuant to a plan prior to November 20, 1990. No inference should be drawn as to the effect of present law on the treatment of such entities.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, CC:CORP:T:R [CO-81-90], Room 4429, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to Part 1 of Title 26 of the Code of Federal Regulations ("CFR") under section 382 of the Code. The amendments relate to the aggregation and segregation of certain ownership interests. Section 382 was amended by section 621 of the Tax Reform Act of 1986 (Pub. L. No. 99-514, 100 Stat. 2085 (1986) [1986-3 C.B. (Vol. 1) 1]). Section 382 was further amended by section 10225 of the 1987 Act (Pub. L. 100-203, 101 Stat. 1330 [1987-3 C.B. 1]), sections 1006, 4012 and 5077 of the 1988 Act (Pub. L. No. 100-647, 102 Stat. 3342), and sections 7205, 7304, 7811, 7815, and 7841 of the 1989 Act (Pub. L. No. 101-239, 103 Stat. 2106 [1990-1 C.B. 210]).

Explanation of Provisions

Overview of relevant provisions of the Code and regulations

Under section 382(a) of the Code, as amended, if an ownership change occurs with respect to a loss corporation (as defined in section 382(k)(1) and §1.382-2T(f)(1) of the Income Tax Regulations), the amount of the loss corporation's taxable income for a post-change year that may be offset by the pre-change losses (and certain built-in losses) of the loss corporation cannot exceed the section 382 limitation. The section 382 limitation for a post-change year is generally equal to the fair market value of the loss corporation's stock immediately before the ownership change multiplied by the applicable long-term tax-exempt rate as published in the Internal Revenue Bulletin.

In general, an ownership change involves an increase of more than 50 percentage points in stock ownership by 5-percent shareholders during the testing period (usually the three-year period ending on the date on which a transaction is tested for an ownership change). A 5-percent shareholder generally is an individual who owns, directly or pursuant to certain attribution rules, five percent or more of the stock of a loss corporation or individuals and entities separately owning less than five percent of the loss corporation that are aggregated into a group (referred to as a "public group") pursuant to certain aggregation rules under the temporary regulations.

As previously indicated, stock ownership is determined pursuant to certain attribution rules. These attribution rules are used to determine the ultimate beneficial owners of the loss corporation. For example, entity attribution rules require that stock be attributed from an entity owning (directly or indirectly by attribution) five percent or more of the loss corporation to the owners of the entity in proportion to their respective ownership interests.

To apply the aggregation rules, the loss corporation must identify each entity that owns (directly or indirectly by attribution) five percent or more of its stock. With respect to each such entity, the loss corporation must aggregate all owners of the entity that individually are attributed less than five percent of the loss corporation's stock. If these shareholders who, by attribution, each own less than five percent of the loss corporation (the "less-than-5-percent shareholders") own as a group five percent or more of the loss corporation, they are treated as a separate public group which is itself a 5-percent shareholder. A group of less-than-5-percent shareholders with direct ownership of the loss corporation is aggregated into a public group that is treated as a 5-percent shareholder regardless of whether it owns five percent or more of the loss corporation. Transfers of loss corporation stock among members of public groups generally are not taken into account in determining whether an ownership change has occurred.

The rule disregarding transfers of a loss corporation's stock among members of public groups is a rule of convenience designed to alleviate the burden of tracking trades among less-than-5-percent shareholders. Congress, however, recognized that there are situations in connection with transfers of stock involving less-than-5-percent-shareholders in which it is feasible to identify changes in ownership by these shareholders because, unlike in public trading, the changes occur as part of a single, integrated transaction. With respect to these transactions, Congress intended that, where identification of changes in ownership is reasonably feasible or a reasonable presumption can be applied, regulations should provide that the changes should be taken into account in determining whether an ownership change has occurred. Conf. Rep. No. 841, 99th Congress, 2d Sess., Part II at 176 (1986).

Proposed Amendments to §1.382-2T

For purposes of section 382 and the regulations thereunder, the temporary regulations define the term "entity" as "any corporation, estate, trust, association, company, partnership, or similar organization." Consequently, where an entity is or becomes a 5-percent shareholder, a loss corporation is required to identify changes in ownership by that entity that occur during the testing period.

An identifiable shift in the ownership of a loss corporation also occurs when a group of persons acting pursuant to a plan acquires five percent or more of the stock of the loss corporation. The temporary regulations are amended to make clear that the definition of the term "entity" includes a group of persons acting pursuant to a plan. Under the amendment, a group of persons must be aggregated into a separate public group where, pursuant to a plan, the group owns five percent or more of the loss corporation's stock in the aggregate, even though each member of the group individually owns less than five percent of such stock. Any shift in ownership by the group must be taken into account for purposes of determining whether an ownership change has occurred.

Pursuant to §1.382-2T(k)(1) of the regulations, with respect to stock that is subject to regulations of the Securities and Exchange Commission ("SEC"), the loss corporation may rely on the existence and absence of filings with the SEC to identify a group that, acting pursuant to a plan, acquires or owns five percent or more of the stock. However, where the loss corporation has actual knowledge that such a group exists, the presumption in §1.382-2T(k)(1) is inapplicable and the loss corporation must determine the amount of the loss corporation stock owned by the group for purposes of identifying its 5-percent shareholders.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these proposed regulations, and therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and seven copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearing will be published in the Federal Register.

List of Subjects in 26 CFR Sections 1.301-1—1.383-3

Income taxes, Corporations, Corporate distributions, Corporate adjustments, Reorganizations.

Proposed Amendments to the Regulations

The notice of proposed rulemaking (to amend 26 CFR Part 1) that was published on August 11, 1987, (52 FR 29704) [LR-106-86, 1987-2 C.B. 1035] is amended and additional amendments to 26 CFR Part 1 are proposed as follows:

PART 1—AMENDED

Paragraph 1. The authority for Part 1 is amended by adding the following citations to read in part:

Authority: 26 U.S.C. Section 7805, *** §1.382-2T issued under 26 U.S.C. 382(g)(4)(C), 26 U.S.C. 382(i), 26 U.S.C. 382(k)(1), 26 U.S.C. 382(k)(6), 26 U.S.C. 382(1)(3), and 26 U.S.C. 382(m).

Par. 2. Section 1.382-2T is amended as follows:

1. Paragraph (f)(7) is amended by adding a new sentence as set forth below.

2. Examples (*5*) and (*6*) are added to paragraph (g)(4) as set forth below.

3. Paragraph (m)(10) is added as set forth below.

§1.382-2T Definition of ownership change under section 382, as amended by the Tax Reform Act of 1986 (temporary).

*****

(f) Definitions. ***

(7) *Entity.* *** An entity includes a group of persons acting pursuant to a plan.

*****

(g) 5-percent shareholders. ***

(4) Examples. ***

Example (*5*)—(i) L corporation has 1,000 shares of common stock outstanding. For the three-year period ending on October 1, 1991, L's stock was owned by unrelated individuals, none of whom owned five percent or more of L. A group of 20 individuals ("Group") agree among themselves to acquire more than five percent of L's stock. Group is not a corporation trust, association, partnership, or company. On October 1, 1991, pursuant to their plan, the members of Group purchases 600 shares of L common stock from the old shareholders of L (a total of 60 percent of L stock), with each member purchasing 30 shares.

(ii) Before the members of Group acquired L's stock on October 1, 1991, no individual or entity owned, directly or indirectly, five percent or more of the stock of L. As a result, all shareholders were aggregated into a public group and L was considered to be owned by a single 5-percent shareholder ("Public L") in accordance with paragraphs (g)(1) and (j)(1) of this section.

(iii) Under paragraph (f)(7) of this section, the agreement among members of Group constitutes a plan and Group is, therefore, an entity. Thus, the acquisition of more than five percent of the stock of L on October 1, 1991, by members of Group is not disregarded under paragraph (e)(1)(ii) of this section. Because no member of Group owns, directly or indirectly, five percent or more of the stock of L, paragraphs (g)(1) and (j)(1) require that the members of Group be aggregated into a separate public group, which will be presumed to consist of persons unrelated to the members of Public L. Because there is a shift of more than fifty percentage points in the ownership of L stock, an ownership change occurs on October 1, 1991, as a result of Group's purchase of the 600 shares.

Example (*6*)—(i) Prior to October 1, 1991, L's 1,000 shares of outstanding stock were owned by unrelated individuals, none of whom own five percent or more of the stock of L. L's management is concerned that L may become subject to a takeover bid. In separate meetings, L's management convinces 15 investors friendly to management to each acquire 4 percent of L's outstanding stock. Each investor is aware that L's management is meeting with other friendly investors. There is no formal or informal agreement between the 15 investors. On October 1, 1991, each investor purchases 4 percent of L's stock.

(ii) Under paragraph (f)(7) of this section, the group of investors ("Group") are treated as an entity because they are acting pursuant to a plan devised by L. Paragraphs (g)(1) and (j)(1) of this section require that on October 1, 1991, the Group be aggregated into a separate public group, which has increased its ownership of L stock by 60 percentage points over its lowest level of ownership in the three-year period ending on October 1, 1991. Accordingly, an ownership change occurs on that date.

*****

(m) Effective date. ***

(10)(i) In general. The second sentence of paragraph (f)(7) of this section and examples (5) and (6) of paragraph (g)(4) of this section apply

for testing dates (determined by applying such sentence and examples) on or after November 20, 1990, but with respect to any group of persons that acts pursuant to a plan before November 20, 1990, only if the group increases or reduces pursuant to the plan its ownership of stock of the loss corporation relative to its percentage ownership interest at the close of the day preceding November 20, 1990, by five percentage points or more on or after November 20, 1990.

(ii) Example—Prior to December 1, 1989, L, a loss corporation, is owned entirely by 1,000 unrelated individuals, none of whom owns as much as five percent of the stock of L ("Public L"). On December 1, 1989, 15 individuals ("Group") each acquired 3 percent, or 45 percent, in total, of L stock pursuant to a plan. Group is not a corporation, trust, association, partnership or company. On November 1, 1991, six members of Group each purchased an additional one percent of L stock, or 6 percent, in total, pursuant to the plan. Accordingly, Group increased its ownership in L by 51 percentage points over the testing period. No other 5-percent shareholder has increased his percentage interest of L stock during the testing period. As a result, an ownership change of L occurs on November 1, 1991.

Fred T. Goldberg, Jr.,
Commissioner of
Internal Revenue.

(Filed by the Office of the Federal Register on November 20, 1990, 8:45 a.m., and published in the issue of the Federal Register for November 21, 1990, 55 F.R. 48639)

Notice of Proposed Rulemaking

Corporations; Consolidated Returns—Special Rules Relating to Dispositions and Deconsolidations of Subsidiary Stock

CO-93-90

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed §§1.337(d)-2 and 1.1502-20. These regulations implement aspects of the repeal of the *General Utilities* doctrine by limiting losses of consolidated groups with respect to the stock of subsidiaries. Proposed §1.1502-20 also eliminates the duplication of loss with respect to consolidated groups. Final §1.337(d)-1 and temporary §1.337(d)-2T appear in *** [T.D. 8319, page 57, this Bulletin].

DATES: These regulations are proposed to be effective December 26, 1990. Section 1.337(d)-2 is proposed to generally apply to dispositions and deconsolidations of a subsidiary's stock after November 18, 1990, and before the effective date of §1.1502-20. Section 1.1502-20 is proposed to generally apply to dispositions and deconsolidations of a subsidiary's stock after January 31, 1991. Written comments must be delivered by January 15, 1991. A public hearing on these proposed regulations will be held Friday, January 25, 1991, beginning at 10:00 a.m. See the notice of public hearing on these proposed regulations elsewhere in *** [Announcement 90-139, 1990-51 I.R.B. 39].

ADDRESS: Send comments to: Internal Revenue Service, Attention: CC:CORP:T:R (CC:CO-93-90), Room 4429, P.O. Box 7604, Ben Franklin Station, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

A. Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, D.C. 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, D.C. 20224.

The collection of information in this regulation is in §§1.337(d)-2(b)-(4), 1.337(d)-2(c)(1), 1.1502-20(b)(4), 1.1502-20(c)(3), 1.1502-20(g)(5), and 1.1502-20(h)(2). This information is required by the Internal Revenue Service to comply with sections 337(d) and 1502 and the regulations thereunder. This information will be used to determine that the proper amount of tax was reported by the taxpayer and whether, and to what extent, the taxpayer's return should be audited. The likely respondents are affiliated groups of corporations filing (or required to file) consolidated returns.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Estimated total annual reporting burden: 6000 hours.

The estimated average annual reporting burden per respondent is 2 hours.

Estimated number of respondents: 3000.

Estimated annual frequency of responses: 1.

B. Introduction

T.D. 8294, filed with the Federal Register on March 9, 1990, and published in the Federal Register on March 14, 1990 [1990-1 C.B. 66], added temporary §§1.1502-20T and 1.337(d)-1T to Part 1 of Title 26 of the Code of Federal Regulations.

Section 1.1502-20T added to the consolidated return regulations a general rule that disallowed all consolidated group losses on the disposition of a subsidiary's stock (the "loss disallowance rule"). The regulations also provided a number of related rules, including a basis reduction rule applicable on deconsolidation of a subsidiary's stock and an anti-stuffing rule applicable to transfers of property between members in connection with the disposition or deconsolidation of a subsidiary's stock. Also provided was a rule that permitted reattribution of a subsidiary's losses to the common parent to the extent loss would otherwise be disallowed to the consolidated group on the disposition of a subsidiary's stock. The rules added by §1.1502-20T generally applied to any disposition or deconsolidation of a subsidiary's stock on or after March 9, 1990.

Section 1.337(d)-1T added a transitional rule that generally limited loss on the disposition of a subsidiary's stock after January 6, 1987, if the subsidiary became a member of the

group after that date (a "transitional subsidiary") and the disposition was not subject to §1.1502-20T. Unlike §1.1502-20T, these regulations permitted the loss to the extent the group established that the loss was not attributable to the recognition of "built-in gain" on the disposition of assets owned by the subsidiary (or any lower tier subsidiary). Moreover, although §1.1502-20T reduced the basis of subsidiary stock on its deconsolidation, §1.337(d)-1T continued to treat the stock as subject to loss disallowance on later disposition.

Sections 1.1502-20T and 1.337(d)-1T implemented Notice 87-14, 1987-1 C.B. 445, in which the Internal Revenue Service announced its intention to publish regulations that would prevent utilization of §§1.1502-32 and 1.1502-33(c) (the "investment adjustment rules") to circumvent the repeal of the *General Utilities* doctrine by the Tax Reform Act of 1986 [Pub. L. 99-514, 1986-3 (Vol. 1) C.B. 1]. The loss disallowance rule of §1.1502-20T addressed another problem relating to the investment adjustment rules by preventing a subsidiary's losses from being duplicated as investment losses of the parent when the parent disposes of the subsidiary's stock.

Also filed with the Federal Register on March 9, 1990 and published on March 14, 1990, was a notice of proposed rulemaking (CO-78-87 [1990-1 C.B. 558]) that incorporated by cross reference the text of §§1.1502-20T and 1.337(d)-1T. Many written comments were received, and a public hearing was held on June 26, 1990.

After full consideration of the written comments and the testimony at the public hearing, the following actions are being taken:

1. Proposed §1.337(d)-1 is amended and promulgated as a final regulation, replacing temporary §1.337(d)-1T. See T.D. 8319, published in *** [page 57, this Bulletin], adding §1.337(d)-1.

2. New §1.337(d)-2T is promulgated as a temporary regulation. See T.D. 8319. Commentators characterized §1.1502-20T as far broader than required by Notice 87-14 and requested that taxpayers retain the ability to dispose of subsidiary stock under the more limited approach of §1.337(d)-1T until the rules of § 1.1502-20T are revised. Section 1.337(d)-2T continues the principles of §1.337(d)-1 by adding another transitional rule applicable to all subsidiary stock (not just stock of transitional subsidiaries and transitional parents). The new rule allows groups to establish that loss is not attributable to the recognition of built-in gain, but only if the group's entire equity interest in the subsidiary is disposed of in one or more transactions to unrelated persons before the effective date of new §1.1502-20. Section 1.337(d)-2T also provides basis reduction rules for subsidiary stock that is deconsolidated and anti-stuffing rules. The text of §1.337(d)-2T set forth in T.D. 8319 also serves as the text of proposed §1.337(d)-2, cross referenced in this document.

3. Section 1.1502-20T is withdrawn by T.D. 8319.

4. This document withdraws proposed §1.1502-20 as added by (CO-78-87) and adds new proposed §1.1502-20.

5. A Revenue Procedure will be issued as a consequence of these rules setting forth procedures under which the Internal Revenue Service will grant permission for all of the members of a group to discontinue filing consolidated returns. Conditions will be included to restrict reconsolidation of any member (or successor) for at least 5 years.

C. Revision of Loss Disallowance Rule

The preamble to §§1.337(d)-1T and 1.1502-20T, published on March 14, 1990, sets forth the rationale for adopting the loss disallowance rule. The rule was adopted in response to the direction in section 337(d) that regulations be prescribed to ensure that the purposes of the repeal of the *General Utilities* doctrine "may not be circumvented through the use of any provision of law or regulations (including the consolidated return regulations . . .)."

That preamble describes the various approaches considered and the reasons for rejecting approaches other than the loss disallowance rule. The preamble identified the principal purpose of the repeal of the *General Utilities* doctrine as being to require payment of a corporate-level tax in a transaction that results in stepping up the basis of corporate assets. The preamble notes that the most accurate method of achieving this goal would have been to require appraisals of assets (including assets of any lower tier subsidiary) at the time a subsidiary's stock is acquired, in order to determine the amount of built-in gain and loss attributable to each asset and liability, and to eliminate positive investment adjustments attributable to recognized built-in gain. This method, referred to as "tracing," was rejected because of the compliance and administrative burdens it would impose on taxpayers and the Internal Revenue Service and because it would rely heavily on appraisals. Other approaches were also rejected because they entailed either tracing or permitting the basis of corporate assets to be stepped up without payment of corporate-level tax.

By disallowing the stock loss, the loss disallowance rule also prevented the duplication of losses. Loss duplication occurs when the stock loss is also reflected in the basis of the subsidiary's assets or its loss carryovers.

After consideration of taxpayer comments, the Treasury Department and the Internal Revenue Service continue to believe that the loss disallowance rule is an appropriate means of implementing *General Utilities* repeal by preventing the elimination of corporate-level tax; that alternative methods of implementing *General Utilities* repeal are not acceptable, either because of the compliance and administrative burdens they would impose on taxpayers and the Internal Revenue Service or because they would not effectively prevent elimination of corporate-level tax; and that eliminating duplication of loss is an appropriate exercise of consolidated return regulation authority.

The Treasury Department and the Internal Revenue Service have determined, however, that the loss disallowance rule can be modified, consistent with implementation of *General Utilities* repeal, to permit loss to a limited extent. The modifications to the rule are intended to distinguish loss of unrealized built-in gain from both loss attributable to recognized built-in gain and loss duplication. In order to avoid tracing, the modified rule necessarily operates by the use of presumptions. Consistent with the single entity principles reflected in the investment adjustment rules and other

consolidated return regulations, the effect of the presumptions in the modified rule will generally be to phase in the loss disallowance rule based on the benefits of consolidation enjoyed by the group and the subsidiary. Thus, the modified rule provides a transition from separate return to consolidated status, phasing in loss disallowance as the group and the subsidiary operate in consolidated form and it becomes more appropriate to view the group's investment in the subsidiary as an investment in its assets and operations rather than in its stock.

D. Principal Comments on Original Proposed §1.1502-20

Many comments on original §1.1502-20 suggested alternative approaches to the loss disallowance rule.

1. Economic Loss

Virtually all commentators criticized §1.1502-20 for disallowing loss on the sale of subsidiary stock when the loss results from the subsidiary's decline in value rather than from investment adjustments attributable to recognition of built-in gain. The commentary centered on Example (6) in the preamble, which provided the following illustration:

> Corporation S has one asset with a basis of $0 and a value of $100. Corporation P buys all the stock of S for $100 and P and S elect to file consolidated returns. S's asset declines in value and is sold for $0. Because S's sale of its asset results in no gain or loss, P's basis in S remains $100. P then sells S for $0 and recognizes a loss of $100. The loss is disallowed by the loss disallowance rule.

The preamble states that, while it may be argued that loss should be allowed under these facts, an exception would require appraisals of assets (including assets of any lower tier subsidiary) and tracing of built-in gains and losses, thus imposing the very compliance and administrative burdens on taxpayers and the Internal Revenue Service that the loss disallowance rule was designed to avoid. The commentators maintained that disallowance of loss in this situation is unwarranted because the parent corporation has realized an economic loss, no self-help is available to recognize the loss, and the parent corporation has derived no benefit—through investment adjustments or otherwise—from filing consolidated returns with the subsidiary.

a. Tracing

To allow the deduction of economic loss, many commentators proposed abandoning the loss disallowance rule in favor of some form of tracing. Most of the commentators recognized that pure tracing would introduce many complexities and therefore suggested various ameliorative presumptions and limitations. However, these commentators generally would permit taxpayers to avoid use of presumptions and limitations that produce a detrimental result by electing back into tracing.

The Treasury Department and the Internal Revenue Service have reexamined the feasibility of tracing and confirmed their earlier determinations that a tracing system would be too burdensome for taxpayers and the Internal Revenue Service. The following are among the problems that would be presented by a tracing system:

(1) At the time a subsidiary was acquired, the assets of the subsidiary (and any lower tier subsidiary) would have to be valued on an asset-by-asset basis in order to prevent the netting of built-in gain and built-in loss and to trace economic loss with respect to each asset.

(2) To properly administer the system, it would be necessary to assign an earnings and profits basis to each asset based on its value at the time of acquisition and to adjust that basis (with corresponding adjustments to stock basis) to reflect earnings and profits depreciation and amortization. This would require establishing an additional set of earnings and profits books.

(3) If an acquired subsidiary owned the stock of any lower tier subsidiary, duplicate earnings and profits records would have to be maintained for each lower tier subsidiary's assets—one based on the value of the assets at the time of the acquisition and one based on the basis of the lower tier subsidiary's stock at the time of acquisition. Earnings and profits adjustments based on the value of the assets at the time of the acquisition would be used to determine gain or loss on the sale of the subsidiary stock that was acquired by purchase, and earnings and profits adjustments based on the basis of the lower tier subsidiary's stock at the time of the acquisition would be used to determine gain or loss on the disposition of that stock.

(4) Despite its complexity, a tracing system would not accurately measure economic loss to the extent a subsidiary's assets declined in value at a faster or slower rate than reflected by the earnings and profits depreciation and amortization. To achieve reasonable accuracy, assets would have to be revalued and assigned a new earnings and profits basis whenever values declined below the initial earnings and profits basis, as adjusted, but this would substantially increase compliance and administrative burdens.

The various presumptions and limitations proposed by commentators to mitigate these problems are less accurate than tracing and do not significantly ameliorate the compliance and administrative burdens of tracing. If a taxpayer is permitted to elect tracing when advantageous, the taxpayer will have to maintain the necessary books and records to evaluate the tracing alternative. Thus, even taxpayers generally relying on presumptions to determine loss would be subject to the burdens of tracing. Similarly, the Internal Revenue Service would be required to audit valuations and earnings and profits adjustments when tracing is used. Moreover, while an elective tracing system would entail most of the burdens of a pure tracing system, it would invariably operate to the detriment of the government because presumptions would be used only when favorable to taxpayers.

b. Loss Limitation

Many commentators proposed modifying the loss disallowance rule to allow loss based on objective factors reflecting the extent to which the group has benefited from filing consolidated returns with the subsidiary. Although the modifications necessarily increase the compliance and administrative burdens for taxpayers and the Internal Revenue Service, the Treasury Department and the Internal Revenue Service have determined that relief is appropriate to the extent the factors establish that loss cannot be attributable to recognized built-in

gain. Following is a summary of the principal proposals and the extent to which they have been adopted.

Positive Basis Adjustments. A number of commentators proposed that loss be disallowed only to the extent of positive investment adjustments, because loss attributable to recognized built-in gain cannot exceed the amount of positive adjustments. This proposal has been taken into account in modifying the loss disallowance rule. Subject to the loss duplication limitation described below, the modified rule allows loss on the disposition of subsidiary stock to the extent the loss exceeds the sum of:

(1) The aggregate gain attributable to the subsidiary's "extraordinary gain dispositions" after November 18, 1990, for all consolidated return years of the group (and any prior group from which the stock was acquired other than by purchase), and

(2) The aggregate positive investment adjustments and distributions from current earnings and profits (determined without regard to extraordinary gain dispositions) for all consolidated return years of the group (and any other group from which the stock was acquired other than by purchase).

The revised rules take into account extraordinary gain dispositions in addition to positive investment adjustments because not all recognized built-in gain results in positive investment adjustments. For example, a recognized built-in gain may be offset by an equal amount of recognized post-acquisition loss. Although the gain does not increase the basis of the stock, it prevents the post-acquisition loss from reducing the basis of the stock. Consequently, a stock loss exists because of the built-in gain, and it is comparable to stock loss resulting from positive adjustments attributable to built-in gain.

The modified rule permits netting of profits and losses arising in the same taxable year in determining investment adjustments, but does not permit netting of a positive and negative investment adjustment from different taxable years. In addition, losses from extraordinary dispositions may be netted with other sources of income in determining investment adjustments for a taxable year, but may not be taken into account in determining gain from extraordinary gain dispositions. These rules are based on the presumption that the positive adjustments, distributions from current earnings and profits, and gain from extraordinary gain dispositions may be attributable to built-in gain, but losses and deductions may be attributable to post-acquisition loss.

The netting of profits and losses within the same year for determining investment adjustments represents a compromise. Consistent with the desire to limit the compliance and administrative burdens associated with tracing (*e.g.*, differentiating built-in deductions and losses from post-acquisition deductions and loss), taxpayers are permitted to offset built-in gain with post-acquisition loss within the same year for purposes of determining positive adjustments.

Dispositions before November 19, 1990, are disregarded in determining gain from extraordinary gain dispositions.

Wasting Assets. A number of commentators proposed that the loss disallowance rule be revised to disregard investment adjustments attributable to the consumption of built-in gain assets through operations ("wasting assets") because such adjustments are outside the scope of preventing circumvention of *General Utilities* repeal. This problem was illustrated by Example (3) in the March 14, 1990, preamble. The revised rules do not adopt this proposal, and all positive investment adjustments are taken into account (whether from dispositions or consumption of wasting assets). Consumption of wasting assets is not outside the scope of *General Utilities* repeal because dispositions and consumption may produce identical investment adjustments, as illustrated by Examples (2) and (3) in that preamble. Failing to take wasting assets into account would treat taxpayers in similar economic circumstances differently.

Rates of Return. Because some of a subsidiary's earnings may be attributable to post-acquisition income rather than built-in gain, other commentators proposed that loss be disallowed only to the extent positive investment adjustments (and distributions from current earnings and profits) exceed a specified rate of return. Commentators argued that an artificial rate of return could be used to identify earnings not properly attributable to built-in gain.

This proposal has not been adopted in the revised rules. A rate of return approach requires selecting an appropriate rate despite the wide variances in rates of return in different industries, and determining the appropriate base against which the rate of return is applied. Appraisals may be required if a subsidiary is acquired in a carryover basis transaction, is a lower tier subsidiary of the acquired subsidiary, or is engaged in more than one industry, and may be required again if there are subsequent corporate contributions or contractions. A variety of special rules also would be required to address the treatment of tax-free business combinations.

Moreover, permitting any rate of return effectively presumes that subsidiaries whose stock has declined in value nevertheless have positive rates of return, and that, contrary to the tax laws generally (such as depreciation and amortization rules), the returns from an investment are first attributable to earnings on, rather than recovery of, the investment.

Caps on Disallowed Loss. A number of commentators also proposed an overall limitation on the disallowance of loss. Many of the commentators proposed an overall limitation based on net built-in gain in the subsidiary's assets at the time its stock is acquired. Net built-in gain would equal the excess of (1) the sum of stock purchase price and liabilities of the subsidiary (and any lower tier subsidiary) over (2) the sum of the aggregate tax basis and loss carryovers of the subsidiary (and any lower tier subsidiary).

This proposal has not been adopted in the revised rules because it would permit groups acquiring subsidiaries with both built-in gains and built-in losses to circumvent *General Utilities* repeal by selectively recognizing gross built-in gain in excess of the net built-in gain. The recognized built-in gain would produce positive investment adjustments without corresponding increases in the subsidiary's value, and would therefore permit the group to offset the gain with loss on disposition of the subsidiary's stock.

Other commentators proposed an overall limitation on the disallowance of loss based on actual gross built-in gain. This proposal was not adopted in the revised rules because it would require each of the subsidiary's assets

(including assets of any lower tier subsidiary) to be appraised at the time the subsidiary's stock is acquired. For reasons discussed under "Tracing" above, an appraisal-based system would be too burdensome for both taxpayers and the Internal Revenue Service.

The appraisal problem was avoided in other proposals by limiting loss disallowance based on the maximum potential built-in gain—the aggregate purchase price of the subsidiary's stock plus the aggregate amount of the liabilities of the subsidiary (and any lower tier subsidiary). This approach would generally provide relief only if the subsidiary is owned for a substantial period and would be inconsistent with the general approach of the revised rules, which is to phase out separate return treatment as the group and the subsidiary enjoy the benefits of consolidation.

2. Duplication of Loss

By denying all loss on the disposition of subsidiary stock, the loss disallowance rule eliminates the ability of consolidated groups to duplicate any loss reflected in a subsidiary's assets and loss carryovers. Commentators generally opposed the elimination of loss duplication. They argued that (1) loss duplication is available in the separate return context and should therefore be eliminated only by Congress, (2) loss duplication is beyond the scope of *General Utilities* repeal, and (3) new restrictions on loss duplication are unnecessary because an acquirer's use of the subsidiary's loss may be limited by sections 269, 382, 383(b) and 384, and §§1.1502-21(c) and 1.1502-22(c). Commentators who conceded that eliminating loss duplication is within the scope of authority under section 1502 nonetheless argued that it was inappropriate for the Service to eliminate it in connection with *General Utilities* repeal. For the reasons discussed below, the revised rules retain the elimination of loss duplication.

a. Gain and Loss Duplication in Consolidated Returns

In the separate return context, a subsidiary's earnings and profits (or deficits in earnings and profits) do not cause adjustments to its parent's basis in the subsidiary's stock. Consequently, the subsidiary's gains and losses may be recognized a second time (in effect, duplicated) when the parent sells the subsidiary's stock.

By contrast, the consolidated return regulations have, over the years, developed an extensive system of rules for adjusting the basis of subsidiary stock to reflect the subsidiary's earnings and profits. The primary effect of these rules is to reduce duplication of gain and loss.

Reduction of loss duplication in the consolidated return context began with *Charles Ilfeld Co. v. Hernandez*, 292 U.S. 62 (1934). In that case, the parent corporation deducted its subsidiaries' losses on the group's consolidated return and claimed a second loss on the dissolution of the subsidiaries. The Supreme Court rejected the parent's claimed loss on its investment in the subsidiaries, stating that it "would be the practical equivalent of double deduction." The principle of the *Ilfeld* decision was incorporated in the consolidated return regulations, but the regulations did not otherwise permit positive and negative adjustments to the basis of subsidiary stock.

In 1966, the consolidated return regulations were revised to incorporate an extensive system of positive and negative adjustments measured by earnings and profits of the subsidiary. These investment adjustment rules shifted the taxation of investment in a subsidiary significantly toward single entity treatment. A primary objective of the 1966 regulations was to eliminate the duplication of gain and loss at the parent and subsidiary levels. The regulations generally eliminated gain and loss duplication only if a subsidiary's assets are disposed of before its stock.

Changes in the tax law since 1966 have called into question the remaining loss duplication permitted under the current investment adjustment rules. There has been a general statutory shift in favor of single entity treatment of consolidated groups. See, *e.g.*, section 267(f). In addition, section 338(h)(10) has increased the ability of taxpayers to avoid gain duplication. Recent changes to the consolidated return regulations have consistently reflected this policy shift in favor of single entity treatment.

The repeal of the *General Utilities* doctrine compelled a major change in the investment adjustment rules. New proposed §1.1502-20 retains the elimination of loss duplication as an appropriate exercise of authority that simplifies the rules necessary for preventing circumvention of *General Utilities* repeal. It is not possible to differentiate between loss attributable to built-in gain and duplicated loss without resorting to tracing.

Commentators arguing for a tracing rule instead of loss disallowance argued that tracing could be used to eliminate investment adjustments attributable to built-in gain that cause loss but not those that reduce gain. This position is based on the proposition that gain duplication is inconsistent with the principles of consolidated returns. Loss duplication is equally inconsistent with these principles.

Although eliminating loss duplication deprives consolidated groups of a benefit they would enjoy had they filed separate returns, filing consolidated returns provides many benefits that are not available to corporations filing separate returns. Corporations electing to file consolidated returns are not entitled to retain all of the benefits of separate returns while availing themselves of the benefits of consolidated returns. Electing corporations, in fact, have historically suffered detriments unrelated to the benefits of consolidation. For example, a subsidiary's losses incurred while a member of a consolidated group cause negative investment adjustments, eliminating loss duplication, even if the loss is used against income arising before the subsidiary became a member. Similarly, dividend distributions cause negative investment adjustments even if the distributions are out of earnings and profits accumulated before the subsidiary became a member.

Eliminating loss duplication is consistent with the historic concerns under the consolidated return regulations and is an appropriate exercise of authority under section 1502.

b. Overlap of Loss Duplication with Other Loss Restrictions

The Code and regulations provide several limitations on the transfer of tax benefits, including sections 269, 382, 383(b), and 384, and the separate return limitation year rules under the consolidated return regulations. These provisions may limit a transferee's deductions following the disposition of stock at a loss for which the loss disallowance rule denies a deduction. Commentators argued that be-

:ause of these limitations, the ability o duplicate loss should not be a ;ignificant concern. However, these imitations focus on trafficking in tax benefits rather than duplication of loss at the corporate level. The limitations may apply in circumstances where there is no duplication and may not apply where there is duplication. Moreover, even if the limitations apply in a loss duplication case, they may not significantly limit the duplicated loss. Accordingly, these limitations do not solve the problem presented by loss duplication.

3. Scope of General Utilities Repeal

a. Time Limitation for Application of Rules

Commentators argued that loss (or positive investment adjustments) should be limited only for a specified period of time following a corporate acquisition. This argument assumes that Notice 87-14, which was issued soon after the effective date of the repeal of the *General Utilities* doctrine, was directed at so-called son-of-mirror transactions occurring in connection with acquisitions. Time periods suggested by commentators ranged from 2 years (by analogy to section 1059) to 10 years (by analogy to section 1374).

The repeal of the *General Utilities* doctrine applies to all corporations, not just those that have been held for less than a specified period, and is directed at elimination of corporate-level tax, not simply at son-of-mirror transactions. Where, as in section 1374, Congress intended to limit the period in which a corporate-level tax is imposed, it specifically did so by statute. It provided no such statutory limit in section 337(d), which directed the issuance of regulations to prevent circumvention of *General Utilities* repeal in the consolidated return context. It would thus be inconsistent with Congressional intent to limit the time period for disallowance of loss (or positive investment adjustments) on disposition of subsidiary stock.

b. Post-1986 Investment Adjustments

Commentators also argued that pre-1987 basis should be grandfathered because adjustments reflected in that basis are attributable to income and gain recognized before the effective date of *General Utilities* repeal. Under this theory, even though a post-1986 loss attributable to such basis may result in elimination of corporate-level gain, the events that gave rise to the loss occurred before 1987 when such elimination was permissible and should therefore be allowed. The legislative history of the Tax Reform Act of 1986 does not provide any evidence that Congress intended to allow elimination of corporate-level tax attributable to pre-1987 investment adjustments. The focus of the repeal was on preserving the corporate income tax and the legislation generally applies after December 31, 1986.

It is also questionable whether use of loss attributable to built-in gain was consistent with the corporate tax provisions as they existed prior to *General Utilities* repeal. Positive investment adjustments were generally intended to prevent duplication, not to permit elimination, of corporate-level gain. Since 1969, corporations have been increasingly required to recognize corporate-level gain with respect to non-liquidating distributions of appreciated property to shareholders. Because most dispositions of built-in gain assets that produce investment adjustments are non-liquidating distributions, it has long been questionable whether it was appropriate to permit all adjustments attributable to such dispositions to eliminate corporate-level gain. Accordingly, it would be inconsistent with Congressional intent to grandfather pre-1987 investment adjustments.

E. Explanation of New Proposed §1.1502-20

New proposed §1.1502-20 retains most of the provisions of former proposed §1.1502-20. Although loss on the sale by a member of stock of a subsidiary is generally disallowed, a new paragraph (c) has been added to permit the member to claim loss in certain circumstances.

1. Loss Disallowance Rule

No deduction is allowed under paragraph (a) for any loss recognized by a member with respect to the disposition of stock of a subsidiary. The rule does not affect the use by the group of "inside" losses of the subsidiary, such as operating losses. Disallowance is deferred with respect to deferred transactions under the consolidated return regulations. The loss disallowance rule takes precedence over other loss disallowance and deferral rules of the Code and regulations, however, and these other rules apply only to the extent loss is not disallowed under the loss disallowance rule. An exception is provided to the loss disallowance rule to the extent gain is taken into account by the group with respect to common stock of the same subsidiary that is sold to the same purchaser pursuant to a single plan.

2. Basis Reduction on Deconsolidation

The basis of a subsidiary's stock is reduced under paragraph (b) to its fair market value immediately before the subsidiary's stock is deconsolidated. Stock that remains outstanding is treated as deconsolidated when it is no longer owned by a member of any consolidated group of which the subsidiary is also a member.

The basis reduction rule complements the loss disallowance rule by eliminating loss that is built into the basis of the subsidiary's stock immediately before the stock ceases to be subject to the loss disallowance rule. For example, assume that a group sells 25 percent of a subsidiary's stock to a nonmember, thus disaffiliating the subsidiary. The group has a built-in loss in the subsidiary's stock that it continues to own, but because the stock is no longer subject to the loss disallowance rule, the basis of the stock is reduced to its fair market value to eliminate the loss. Because stock must remain outstanding to be subject to the basis reduction rule, transactions such as section 332 liquidations are not deconsolidation events.

A special rule applies to cases in which the basis of subsidiary stock is reduced, and the group realizes a loss on the disposition of the stock within 2 years after the basis reduction. The taxpayer must attach a statement to the return for the year of the disposition, disclosing information with respect to the disposition and prior basis reduction. If the statement is not attached to the return, no deduction is allowed for any loss claimed on the disposition. Dispositions after the 2-year period that are pursuant to an agreement, option, or other arrangement entered into within the period are treated as though they occurred within the 2-year period for

purposes of the information statement requirement.

3. Allowed loss

In order to allow only economic loss, paragraph (c) identifies those factors that contribute to avoidance of corporate-level tax. Loss disallowance and basis reduction do not apply to stock of a subsidiary to the extent the loss or reduction exceeds a share's allocable part of the sum of the following factors:

(i) Earnings and profits, net of directly related expenses, from extraordinary gain dispositions.

(ii) The aggregate amount of positive adjustments for earnings and profits for all consolidated return years to the extent not included in the extraordinary gain disposition factor.

(iii) The amount of any duplicated loss.

These factors are explained more fully below.

a. Extraordinary Gain Dispositions

Extraordinary gain dispositions are dispositions after November 18, 1990, resulting in gain for purposes of computing earnings and profits, of capital assets, property used in a trade or business, and specified bulk asset dispositions. Discharge of indebtedness is also treated as an extraordinary gain disposition.

All applicable dispositions producing gain are presumed to be attributable to built-in gain. Dispositions producing gains are not offset by dispositions producing losses. These rules are necessary to avoid tracing. The amount included under this factor may be derived from tax return entries and associated work papers.

b. Positive Investment Adjustments

All positive adjustments are presumed to be attributable to built-in gain, including built-in gain recognized through the wasting of built-in gain assets. Netting is not permitted between the positive adjustments for years with earnings and the negative adjustments for years with deficits, but is permitted with respect to positive and negative adjustments within the same year.

Because the distribution of current earnings and profits does not eliminate the effect of recognized built-in gain, even though the distribution may eliminate a positive adjustment, such distributions are also included under this factor. Assume, for example, that a subsidiary recognizes $100 of built-in gain. If no distribution is made in the year the gain is recognized, the subsidiary's stock basis increases by $100 without a corresponding increase in value. By contrast, if $100 is distributed, the basis remains unchanged but the subsidiary's value declines by $100.

c. Duplicated Loss

Duplicated loss is the excess of (A) the sum of the aggregate asset basis and the aggregate loss carryovers of the subsidiary (and any lower tier subsidiary), over (B) the value of the subsidiary's assets. For this purpose, aggregate asset basis does not include any stock and securities in another subsidiary, and loss carryovers include deferred deductions. The value of the subsidiary's assets is measured by the value of the subsidiary's stock, any liabilities of the subsidiary (and any lower tier subsidiary), and other relevant items. If 80 percent or more of the subsidiary's stock is purchased in a single transaction, the stock's value is no greater than its grossed-up purchase price.

d. Dispositions and Adjustments in Prior Consolidated Groups

The extraordinary dispositions and positive investment adjustment factors include amounts attributable to prior consolidated groups, but only if these amounts continue to be reflected in the basis of the subsidiary's stock.

This factor would apply, for example, if a target is acquired from another consolidated group, and the target has a lower tier subsidiary that also becomes a member of the acquiring group, because the basis of the lower tier subsidiary continues to reflect any such amounts from the prior group.

4. Anti-Stuffing Rule

Paragraph (e) provides an anti-stuffing rule, in order to prevent a group from transferring assets after March 8, 1990, so as to avoid the recognition of gain or impact of the loss disallowance rule. The rule applies if the transfer occurs within 2 years of a direct or indirect disposition or deconsolidation of subsidiary stock. The proposed regulations clarify that, if an asset is transferred with the requisite view to avoid the recognition of gain or impact of the loss disallowance rule, it is not necessary for the transfer to be related to a subsequent disposition or deconsolidation of stock provided the disposition or deconsolidation occurs within the 2-year period.

Increases to the basis of subsidiary stock resulting from the recognition of built-in gain can have the effect of deferring tax on unrealized post-acquisition appreciation of a subsidiary's assets when its stock is sold. A comparable benefit can be achieved without post-acquisition appreciation if, for example, appreciated assets are transferred to the subsidiary or one subsidiary's appreciated stock is transferred to another subsidiary. To prevent this benefit, the rule requires reduction of the basis of the subsidiary's stock to the extent necessary to cause recognition of the amount of gain that would have been recognized if the stuffing transaction had not occurred.

5. Investment Adjustments and Earnings and Profits

The proposed regulations clarify that the earnings and profits of a member are reduced by the amount of a loss recognized on the sale of a subsidiary's stock, even though the loss is disallowed.

The proposed regulations also provide that a member's earnings and profits are reduced by the amount of any basis reduction required on the deconsolidation of a subsidiary's stock. This rule is needed because the basis reduction eliminates a future recognition of the loss (and the associated future reduction in earnings and profits).

Under the investment adjustment system, these reductions in earnings and profits tier up and cause disallowed losses and basis reductions on deconsolidation to be reflected as reductions in the basis of higher tier members. Coordination rules are provided to prevent overlapping investment adjustments.

The proposed regulations also make clear that, for purposes of the consolidated return regulations, a basis reduction under this section is generally treated as a negative investment adjustment under §1.1502-32(e)(1). Thus, for example, the consolidated return rules applying to investment adjustments generally apply to basis reductions under §1.1502-20(b). However, any basis reduction under this section is not treated as a §1.1502-32(e)(1) adjustment for pur-

poses of determining the amount of any basis reduction account with respect to the stock under §1.1502-32T(a).

6. Election to Retain Losses of Subsidiary

A common parent may elect to reattribute to itself a portion of the net operating loss carryovers and net capital loss carryovers attributable to a subsidiary (or to any lower tier subsidiary) that is leaving the group. If the election is made, the reattributed losses are not apportioned to the subsidiary under §1.1502-79. Instead, they remain part of the loss carryovers of the group. Reattribution is available only to the extent that a member is otherwise subject to loss disallowance with respect to the subsidiary's stock. This reattribution is not permitted with respect to the basis reduction of stock of a subsidiary that is deconsolidated.

The common parent may elect to retain particular losses of a subsidiary (or any lower tier subsidiary), without regard to their character or the year in which they arose and whether or not they arose within the consolidated group. Retained losses may not be carried back to any prior taxable year of the common parent. If a disallowed loss arises from a worthless stock deduction and the subsidiary whose losses are reattributed remains a member of the group, the subsidiary need not join in the common parent's election.

Reattribution is not permitted to the extent that a subsidiary and all higher tier subsidiaries are insolvent within the meaning of section 108(d)(3) at the time of the disposition. To the extent of its insolvency, the subsidiary's losses are not reattributable because they are deemed to be borne by creditors. For purposes of determining insolvency, preferred stock of the subsidiary not owned by members is treated as a liability to the extent of the preferred stock's liquidation preference.

Solely for the purpose of the investment adjustment and earnings and profits rules, a loss that is reattributed to the common parent is treated as absorbed by the subsidiary (or lower tier subsidiary), thereby causing a reduction in the stock basis and earnings and profits of the subsidiary whose losses are reattributed. These adjustments reduce the subsidiary's stock basis and earnings and profits to reflect the loss. The adjustments reduce or eliminate the member's loss on the disposition of the subsidiary's stock, thus reducing or eliminating the effect of the loss disallowance rule on the disposition.

7. Effective Dates

The loss disallowance and the basis reduction rules generally apply with respect to dispositions and deconsolidations after January 31, 1991. However, taxpayers may irrevocably elect to accelerate the application of these rules, in lieu of §1.337(d)-2, to all dispositions and deconsolidations after November 18, 1990. Any such election will not accelerate the date that the extraordinary gain disposition rule described in §1.1502-20(c)(2)(i) applies.

F. Explanation of Transitional Rules

1. General Rules

In response to comments, the effective date of §1.1502-20 has been deferred and new §1.337(d)-2 provides a transitional rule carrying forward the rules of 1§.337(d)-1 that allow loss to the extent the group establishes the loss is not attributable to the recognition of built-in gain. For a description of the provisions of §1.337(d)-1, see T.D. 8294, published on March 14, 1990, and T.D. 8319, published on November 26, 1990.

For purposes of §1.337(d)-2, gain recognized by a consolidated group (or a prior consolidated group) on the disposition of an asset is built-in gain to the extent the asset has an excess of value over basis attributable to a separate return year (as defined in §1.1502-1(e)) with respect to the consolidated group (or prior consolidated group).

Unlike §1.337(d)-1, §1.337(d)-2 is a prospective rule which taxpayers may take into account when planning transactions. Accordingly, §1.337(d)-2 contains a deconsolidation rule and an anti-stuffing rule similar to those contained in proposed §1.1502-20, in order to limit circumvention of the basic loss limitation rule. The deconsolidation and anti-stuffing rules are described in part E, above.

2. Effective Dates

Section 1.337(d)-2 generally applies with respect to dispositions and deconsolidations after November 18, 1990. However, a group may establish that loss is not attributable to the recognition of built-in gain only if the group's entire equity interest in a subsidiary is disposed of in one or more transactions to unrelated persons before February 1, 1991 (the effective date of §1.1502-20). Thus, it does not apply if only a portion of the stock held by the group is disposed of, or if the stock is sold to a related party. The ability to establish that loss is not attributable to built-in gain is limited under §1.337(d)-2 in order to avoid the need for continued application of these rules to deconsolidated subsidiaries for a substantial period.

Special Analysis

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required.

It is hereby certified that these rules do not have a significant impact on a substantial number of small entities. The rules will primarily affect affiliated groups of corporations filing (or required to file) consolidated returns, which tend to be larger businesses. It will not significantly alter the reporting or recordkeeping duties of small entities. Therefore, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. Chapter 6) is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking for the regulations was submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety.

A public hearing will be held on Friday, January 25, 1991, beginning at 10:00 a.m., in the Internal Revenue Service Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington D.C. For further information, see the notice of public hearing on these proposed regulations

in *** [Announcement 90-139, 1990-51 I.R.B. 39].

List of Subjects

26 CFR 1.301-1 through 1.383-3

Corporate adjustments, Corporate distributions, Corporations, Income taxes, Reorganizations.

26 CFR 1.1501-1 through 1.1564-1

Income taxes, Controlled group of corporations, Consolidated returns.

Proposed Amendments to the Regulations

The proposed amendments to 26 CFR Chapter I are as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1986

Paragraph 1. The authority citation for Part 1 is amended by adding the following citations:

Authority: 26 U.S.C. 7805; *** §1.337(d)-2 also issued under 26 U.S.C. 337 (d); *** §1.1502-20 also issued under 26 U.S.C. 337(d) and 1502.

Par. 2. The temporary regulation §1.337(d)-2T, published in *** [T.D. 8319, page 57, this Bulletin], is hereby also proposed as a final regulation under section 337(d) of the Internal Revenue Code of 1986, except that paragraph (c)(1)(i) is revised to read as follows:

§1.337(d)-2T Loss limitation window period (temporary).

* * * * *

(c) * * *

(1) * * *

(i) The consolidated group disposes (in one or more transactions), before February 1, 1991, of its entire equity interest in the subsidiary to persons not related to any member of the consolidated group within the meaning of sections 267(b) and 707(b)(1) (substituting "10 percent" for "50 percent" each place that it appears), and

* * * * *

Par. 3. The notice of proposed rulemaking published March 14, 1990 (55 FR 9463) by cross reference to T.D. 8294 is withdrawn.

Par. 4. New §1.1502-20 is added to read as follows:

§1.1502-20 Disposition or deconsolidation of subsidiary stock.

(a) *Loss disallowance*—(1) *General rule.* No deduction is allowed for any loss recognized by a member with respect to the disposition of stock of a subsidiary.

(2) *Disposition.* "Disposition" means any event in which gain or loss is recognized, in whole or in part.

(3) *Single entity treatment of gain and loss*—(i) *Timing.* If loss with respect to the disposition of a subsidiary's stock is deferred, paragraph (a)(1) of this section does not apply until the loss is taken into account. For this purpose, the amount of the loss deferred and when the loss is taken into account are determined under §§1.1502-13, 1.1502-13T, 1.1502-14, and 1.1502-14T, without the application of any other provision of the Code or regulations, such as section 267(f), that provides for disallowance or deferral of the loss.

(ii) *Netting.* Paragraph (a)(1) of this section does not apply to the extent gain is taken into account by members with respect to common stock of the same subsidiary that is sold to the same purchaser pursuant to a single plan. Gain to which this paragraph (a)(3)(ii) applies is taken into account with respect to shares on which loss is recognized under the plan in proportion to the amount of the loss deduction that would have been disallowed under paragraph (a)(1) with respect to each share if this paragraph did not apply.

(4) *Coordination with loss deferral rules.* If paragraph (a)(1) of this section applies to a loss subject to deferral or disallowance under any other provision of the Code or the regulations, the other provision applies to the loss only to the extent it is not disallowed under paragraph (a)(1).

(5) *Examples.* For purposes of the examples in this section, unless otherwise stated, the group files consolidated returns on a calendar year basis, the facts set forth the only corporate activity, and all sales and purchases are with unrelated buyers or sellers. The basis of each asset is the same for determining earnings and profits adjustments and taxable income. Tax liability and its effect on basis, value, and earnings and profits are disregarded. "Investment adjustment system" means the rules of §§1.1502-32 and 1.1502-33(c). The principles of this paragraph (a) are illustrated by the following examples:

Example (1). Loss attributable to recognized built-in gain. P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200. Five years later, P sells all the stock of T for $100 and recognizes a loss of $100. Under paragraph (a)(1) of this section, no deduction is allowed to P for the $100 loss.

Example (2). Effect of post-acquisition appreciation. P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200. T reinvests the proceeds of the sale in an asset that appreciates in value to $180. Five years after the sale, P sells all the stock of T for $180 and recognizes a $20 loss. Under paragraph (a)(1) of this section, no deduction is allowed to P for the $20 loss.

Example (3). Disallowance of duplicated loss. P forms S with a contribution of $100 in exchange for all the shares of S stock, and S becomes a member of the P group. S has an operating loss of $60. The group is unable to use the loss, and the loss becomes a net operating loss carryover attributable to S. Five years later, P sells the stock of S for $40, recognizing a $60 loss. Under paragraph (a)(1) of this section, P's $60 loss on the sale of the S stock is disallowed. (See paragraph (g) of this section for the elective reattribution of S's $60 net operating loss to P in connection with the sale.)

Example (4). Deemed asset sale election. (i) P forms S with contribution of $100 in exchange for all the S stock, and S becomes a member of the P group. S buys an asset for $100, and the value of the asset declines to $40. P sells all the stock of S to Pl for $40. Under paragraph (a)(1) of this section, P's $60 loss on the sale of the S stock is disallowed.

(ii) If P and Pl instead elect deemed asset sale treatment under section 338(h)(10), T is treated as selling all of its assets, and no loss is recognized by P on its sale of the T stock. As a result of the recharacterization of the stock sale as an asset sale, the $60 loss in the asset is recognized. Under the section 338(h)(10) regulations, T is treated as liquidating into P following the deemed asset sale, and the $60 loss is inherited by P.

Example (5). Gain and loss recognized with respect to stock sold pursuant to a single plan. P, the common parent of a group, owns 50 shares of the stock of T with an aggregate basis of $50, and S, a wholly owned subsidiary of P, owns the remaining 50 shares of T with an aggregate basis of $100. All of the stock of T has the same terms. P and S sell all the stock of T to the public for $140. P therefore recognizes a gain of $20 and S recognizes a loss of $30. For purposes of paragraph (a)(3)(ii) of this section, the public is considered to be 1 purchaser and the sale of the T stock by P and S is considered to be pursuant to a single plan. Accordingly, the amount of S's $30 loss disallowed under paragraph (a)(1) of this section is limited to $10 ($30 reduced by P's $20 gain on T stock taken into account in a sale to the same purchaser pursuant to a single plan).

Example (6). Deferred loss and recognized gain. (i) P, the common parent of a group, owns 50 shares of the stock of T with an aggregate basis of $10, and S, a wholly owned subsidiary of P, recently purchased the remaining 50 shares of T stock in which it has an aggregate basis of $50. T has an asset with a basis of $40 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases from $10 to $40, and S's basis in the T stock increases from $50 to $80. S sells its block of T stock to P for $50 in a deferred intercompany transaction, and S liquidates 2 years later. P subsequently sells all the stock of T for $100 to X, a member of the same controlled group (as defined in section 267(f)) as P but not a member of the P consolidated group.

(ii) Under paragraph (a)(3)(i) of this section, the application of paragraph (a)(1) of this section to S's $30 loss is deferred, because S's loss is deferred under §1.1502-13(c) (determined without the application of any other provision of the Code or regulations that provides for disallowance or deferral of the loss).

(iii) S's deferred $30 loss is inherited by P under §1.1502-13(c)(6) following the liquidation of S. When the T stock is sold to X (a member of the same controlled group but not a member of the P consolidated group), the inherited deferred $30 loss is taken into account under §1.1502-13(f) and paragraph (a)(3) of this section.

(iv) In the same transaction that S's $30 deferred intercompany loss is taken into account, P recognizes a $10 gain with respect to its block of historic T stock. Under paragraph (a)(3)(ii) of this section, the gain reduces by $10 the application of paragraph (a)(1) of this section to the $30 loss. Consequently, only $20 of the $30 loss is disallowed. The remaining $10 loss to which paragraph (a)(1) does not apply is subject to section 267(f).

(b) *Basis reduction on deconsolidation*—(1) *General rule.* If a member's basis in a share of stock of a subsidiary exceeds its value immediately before a deconsolidation of the share, the basis of the share is reduced at that time to an amount equal to its value. If both a disposition and a deconsolidation occur with respect to a share in the same transaction, paragraph (a) of this section applies and, to the extent necessary to effectuate the purposes of this section, this paragraph (b) applies following the application of paragraph (a).

(2) *Deconsolidation.* "Deconsolidation" means any event that causes a share of stock of a subsidiary that remains outstanding to be no longer owned by a member of any consolidated group of which the subsidiary is also a member.

(3) *Value.* "Value" means fair market value.

(4) *Loss within 2 years after basis reduction*—(i) *In general.* If the basis of a share of stock is reduced under this paragraph (b) and a direct or indirect disposition of the stock occurs within 2 years after the date of the basis reduction, a separate statement entitled "STATEMENT PURSUANT TO SECTION 1.1502-20(b)(4)" must be filed with the taxpayer's return for the year of disposition. If the taxpayer fails to file the statement as required, no deduction is allowed for any loss recognized on the disposition. A disposition after the 2-year period described in this paragraph (b)(4) that is pursuant to an agreement, option, or other arrangement entered into within the 2-year period is treated as a disposition within the 2-year period for purposes of this section.

(ii) *Contents of statement.* The separate statement required under paragraph (b)(4)(i) of this section must contain—

(A) The name and employer identification number (E.I.N.) of the subsidiary.

(B) The amount of prior basis reduction with respect to the stock of the subsidiary under paragraph (b)(1) of this section.

(C) The basis of the stock of the subsidiary immediately before the disposition.

(D) The amount realized on the disposition.

(E) The amount of the deduction not disallowed under paragraph (b)(4)(i) of this section.

(F) The amount of loss disallowed under paragraph (b)(4)(i) of this section.

(5) *Examples.* The principles of this paragraph (b) are illustrated by the following examples:

Example (1). Simultaneous application of loss disallowance rule and basis reduction rule to stock of the same subsidiary. (i) P forms S with $100 in exchange for all 100 shares of S stock, and S becomes a member of the P group. The value of S declines from $100 to $50, and P sells 60 shares of S stock for $30. The sale causes a deconsolidation of the remaining 40 shares held by P.

(ii) Under paragraph (b)(1) of this section, P must reduce the basis of the 40 shares of S stock it continues to own from $40 to $20, the value of the shares immediately before the deconsolidation.

(iii) Although P's disposition of the 60 shares also causes a deconsolidation of these shares, paragraph (b)(1) of this section provides that, if both paragraph (a) and paragraph (b) of this section apply to a share in the same transaction, paragraph (a) applies first and paragraph (b) applies only to the extent necessary to effectuate the purposes of this section. Under paragraph (a)(1), P's $30 loss on the sale of the 60 shares is disallowed. Under the facts of this example, it is not necessary to also apply paragraph (b) of this section to the 60 shares in order to effectuate the purposes of this section.

Example (2). Deconsolidation of subsidiary stock on contribution to a partnership. P buys all the stock of T for $100, and T becomes a member of the P group. P later transfers all the stock of T to partnership M in exchange for a partnership interest in M, in a transaction to which section 721 applies. At the time of the exchange, P's basis in the T stock is $100 and the T stock's value is $75. Under paragraph (b)(1) of this section, the transfer to M causes a deconsolidation of the T stock, and P must reduce its basis in the T stock, immediately before the transfer to M, from $100 to the stock's $75 value at that time. As a result, P has a basis of $75 in its interest in M, and M has a basis of $75 in the stock of T.

Example (3). Simultaneous application of loss disallowance rule and basis reduction rule to stock of different subsidiaries. (i) P owns all the stock of S, which in turn owns all the stock of S1, and S and S1 are members of the P group. P's basis in the S stock is $100 and S's basis in the S1 stock is $100. S1 buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, S1's basis in the T stock, S's basis in the S1 stock, and P's basis in the S stock each increase from $100 to $200. S then sells all the S1 stock for $100 and recognizes a loss of $100.

(ii) Under paragraph (a)(1) of this section, S's $100 loss on the sale of the S1 stock is disallowed.

(iii) If S1 and T are not members of a consolidated group immediately after the sale of the stock of S1, the T stock is deconsolidated, and under paragraph (b)(1) of this section, S1 must reduce the basis of the T stock to $100, its value immediately before the sale.

(iv) If S1 and T are members of a consolidated group immediately after the sale of the S1 stock, the T stock is not deconsolidated, and no reduction is required under paragraph (b)(1).

Example (4). Extending the time period for dispositions. (i) In Year 1, P, the common parent of a group, buys all 100 shares of the stock of T for $100. T's only asset has a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases from $100 to $200. At the beginning of Year 5, P causes T to issue 30 additional shares of stock to the public for $30. This issuance causes a deconsolidation of the T stock owned by P, and paragraph (b)(1) of this section requires P to reduce its basis in the T stock from $200 to $100.

(ii) Within 2 years, P agrees to sell all of its T stock for $90 at the end of Year 7. Under paragraph (b)(1), P's disposition of the T stock at the end of Year 7 is treated as occurring within the 2-year period following the deconsolidation of the T stock, because the disposition is pursuant to an agreement reached within 2 years after the deconsolidation. Accordingly,

P's $10 loss may not be deducted unless P files the statement required under paragraph (b)(4) of this section. This result is reached whether or not the agreement is in writing. P's disposition would also have been treated as occurring within the 2-year period if the disposition were pursuant to an option issued within the period.

(c) *Allowable loss*—(1) *General rule.* The amount of loss disallowed under paragraph (a)(1) of this section and the amount of basis reduction under paragraph (b)(1) of this section with respect to a share of stock shall not exceed the sum of the following amounts—

(i) *Extraordinary gain dispositions.* The share's allocable part of any member's earnings and profits, net of directly related expenses, from extraordinary gain dispositions.

(ii) *Positive investment adjustments.* Earnings and profits, other than those included in paragraph (c)(1)(i) of this section, which result in adjustments with respect to the share under §1.1502-32(b)(1)(i) and (c)(1).

(iii) *Duplicated loss.* The amount of duplicated loss with respect to the share.

(2) *Operating rules.* For purposes of applying paragraph (c)(1)—

(i) *Extraordinary gain dispositions defined.* An "extraordinary gain disposition" is an actual or deemed disposition after November 18, 1990, resulting (net of directly related expenses) in a gain for purposes of computing earnings and profits, of—

(A) A capital asset as defined in section 1221 (determined without the application of any other provision of the Code or regulations).

(B) Property used in a trade or business as defined in section 1231(b) (determined without the application of any holding period requirement).

(C) An asset described in section 1221(1), (3), (4), or (5), if substantially all the assets in such category from the same trade or business are disposed of in 1 transaction (or series of related transactions).

(D) Assets disposed of in an applicable asset acquisition under section 1060(c).

A discharge of indebtedness is also treated as an extraordinary gain disposition. Federal income taxes are not directly related expenses unless reflected as negative investment adjustments with respect to the share under §1.1502-32 and not reimbursed.

(ii) *Investment adjustments.* Earnings and profits are treated as resulting in adjustments with respect to a share if they would have resulted in such adjustments but for distributions with respect to the share. If the adjustments with respect to a share are modified pursuant to §1.1502-32(c)(3), the adjustments taken into account under paragraph (c)(1)(ii) of this section shall be appropriately modified.

(iii) *Duplicated loss.* "Duplicated loss" equals the excess (if any) of—

(A) The sum of—

(*1*) The aggregate adjusted basis of the assets of the subsidiary (and any other subsidiary in which the subsidiary owns stock) other than any stock and securities that the subsidiary owns in another subsidiary, and

(*2*) Any losses attributable to the subsidiary (and any lower tier subsidiary) and carried to the subsidiary's first taxable year following the disposition or deconsolidation, and

(*3*) Any deferred deductions (such as deductions deferred under section 469) of the subsidiary (and any lower tier subsidiary), over

(B) The sum of—

(*1*) The value of the subsidiary's stock, and

(*2*) Any liabilities of the subsidiary (and any lower tier subsidiary), and

(*3*) Any other relevant items.

If 80 percent or more in value of the stock of a subsidiary is acquired by purchase (as defined in paragraph (c)(2)(iv)(B) of this section) in a single transaction (or in a series of related transactions during any 12-month period), the value of the subsidiary's stock is no greater than the purchase price of the stock divided by the percentage of the stock (by value) so purchased.

(iv) *Applicable periods*—(A) *Consolidated return years of the group.* Amounts described in paragraph (c)(1) of this section include all consolidated return years of the group and are determined as of the date of the disposition or deconsolidation in accordance with the group's application of the principles of §1.1502-32.

(B) *Prior consolidated groups.* Amounts described in paragraph (c)(1)(i) and (ii) of this section include any such amounts with respect to the share that are attributable to any separate return year following the most recent purchase of the share or deconsolidation of the share subject to §1.337(d)-2(b) or paragraph (b) of this section. Stock is acquired by "purchase" if the transferee is not related to the transferor within the meaning of sections 267(b) and 707(b)(1), substituting "10 percent" for "50 percent" each place that it appears, and the transferee's basis in the stock is determined wholly by reference to the consideration paid for such stock.

(3) *Statement of allowed loss.* Paragraph (c)(1) of this section applies only if the separate statement required under this paragraph (c)(3) is filed with the taxpayer's return for the year of the disposition or deconsolidation. The statement must be entitled "ALLOWED LOSS UNDER SECTION 1.1502-20(c)," and contain—

(i) The name and employer identification number (E.I.N.) of the subsidiary.

(ii) The basis of the stock of the subsidiary immediately before the disposition or deconsolidation.

(iii) The amount realized on the disposition and the amount of fair market value on the deconsolidation.

(iv) The amount of the deduction not disallowed under paragraph (a)(1) of this section by reason of this paragraph (c) and the amount of basis not reduced under paragraph (b)(1) of this section by reason of this paragraph (c).

(v) The amount of loss disallowed under paragraph (a)(1) of this section and the amount of basis reduced under paragraph (b)(1) of this section.

(4) *Examples.* For purposes of the examples in this paragraph, unless otherwise stated, the group files the statement required under paragraph (c)(3) of this section. The principles of this paragraph (c) are illustrated by the following examples:

Example (1). Allowed loss attributable to lost built-in gain. (i) Individual A forms T. P buys all the stock of T from A for $100, and T becomes a member of the P group. T has a capital asset with a basis of $0 and a value of $100. The value of the asset declines, and T sells the asset for $40. Under the investment adjustment system, P's basis in the T stock increases to $140. P then sells all the stock of T for $40 and recognizes a loss of $100.

(ii) The amount of the $100 loss disallowed under paragraph (a)(1) may not exceed the amount determined under paragraph (c)(1) of this section. The $40 of T's earnings and

profits is from an extraordinary gain disposition, as defined in paragraph (c)(2)(i), and therefore is described in paragraph (c)(1)(i). (No amount is described under paragraph (c)(1)(ii) because T has no earnings and profits resulting in positive investment adjustments with respect to the share when the earnings and profits are determined without regard to extraordinary gain dispositions.) Because this amount is the only amount described in paragraph (c)(1), the amount of P's $100 loss that is disallowed under paragraph (a)(1) is limited to $40.

Example (2). Extraordinary gain dispositions. (i) Individual A forms T. P buys all the stock of T from A for $100 in Year 1, and T becomes a member of the P group. T owns a capital asset, asset 1, with a basis of $0 and a value of $100. T sells asset 1 for $100 in Year 1 and invests the proceeds in a trade or business asset, asset 2. During Year 2, asset 2 produces $30 of gross operating income and $20 of cost recovery deductions. At the end of Year 2, asset 2 has an $80 adjusted basis and T disposes of asset 2 for $85; however, because T incurs $20 of expenses directly related to the sale of asset 2, the disposition produces a $15 loss for computing earnings and profits. Under the investment adjustment system, P's basis in the T stock increases by $95, to $195, because T has $110 of earnings and a $15 loss. P sells the T stock for $95 in Year 5 and recognizes a $100 loss.

(ii) The amount of loss disallowed under paragraph (a)(1) may not exceed the amount determined under paragraph (c)(1) of this section. The $100 of earnings and profits from the disposition of asset 1 is from an extraordinary gain disposition, as defined in paragraph (c)(2)(i), and therefore is described in paragraph (c)(1)(i). This amount is not reduced by the $15 loss on the sale of asset 2 because that sale is not an extraordinary gain disposition when determined net of directly related expenses. (No amount is described under paragraph (c)(1)(ii) because T would have no earnings and profits which result in positive investment adjustments with respect to the share when the earnings and profits are determined without regard to extraordinary gain dispositions.) Because the $100 amount described under paragraph (c)(1)(i) equals P's $100 loss from the disposition of T stock, all of the loss is disallowed.

Example (3). Positive investment adjustments. (i) Individual A forms T. S, a member of the P group, buys all the stock of T from A for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. The asset earns $100 of operating income in Year 1 and declines in value to $0. T invests the operating income in another asset which produces a $25 operating deficit during Year 2. Under the investment adjustment system, S's basis in the T stock increases to $175. S sells all the stock of T for $75 in Year 5 and recognizes a loss of $100.

(ii) The amount of loss disallowed under paragraph (a)(1) may not exceed the amount determined under paragraph (c)(1) of this section. No amount is described under paragraph (c)(1)(i) because T had no extraordinary gain dispositions. The $100 of earnings and profits from operations in Year 1 is earnings and profits which are described in paragraph (c)(1)(ii). This amount is not reduced by the $25 deficit from operations in Year 2. Because the $100 amount described under paragraph (c)(1)(ii) equals S's $100 loss from the disposition of T stock, all of the loss is disallowed.

(iii) The result would have been the same if, prior to the decline in the value of the first asset (the value of the T stock was $200, $100 cash and a $100 asset), S had sold the T stock to P for $200 at no gain or loss, and P then sold the T stock to the unrelated buyer for $75 (after the asset declined in value by $100) and recognized a $100 loss. The stock had $100 of positive investment adjustments during the P group's consolidated return years, and, as a result, the investment adjustments are considered to be described in paragraph (c)(1)(ii) even if the adjustments are not reflected in the basis of the T stock at the time of the disposition to the unrelated buyer.

Example (4). Treatment of net operating income as attributable to built-in gain. (i) Individual A forms T. P buys all the stock of T from A for $100, and T becomes a member of the P group. T has a capital asset with a basis of $0 and a value of $100. The asset declines in value to $40. The asset earns $100 of operating income unrelated to its $60 decline in value. Under the investment adjustment system, P's basis in the T stock increases to $200. P then sells all the stock of T for $140 (land worth $40 and $100 cash) and recognizes a loss of $60.

(ii) The amount of loss disallowed under paragraph (a)(1) may not exceed the amount determined under paragraph (c)(1) of this section. The $100 adjustment to the basis of the T stock is an amount described in paragraph (c)(1)(ii). Because this amount exceeds the amount of loss otherwise disallowed under paragraph (a)(1), P's entire $60 loss from the disposition of T stock is disallowed.

Example (5). Carryover basis transactions—amounts attributable to separate return years. (i) Individual A forms T. S purchases all the stock of T from A for $100, and T becomes a member of the S group. T has a capital asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, S's basis in the T stock increases to $200. P buys all of the stock of S for $100, and both S and T become members of the P group. S then sells the T stock for $100 and recognizes a loss of $100.

(ii) The amount of loss disallowed under paragraph (a)(1) may not exceed the amount determined under paragraph (c)(1) of this section. Under paragraph (c)(2)(iv)(B) of this section, the $100 adjustment to S's basis in the T stock while a member of the S group is an amount described in paragraph (c)(1)(ii) with respect to the P group. Because this amount equals the loss otherwise disallowed under paragraph (a)(1), S's $100 loss from the disposition of T stock is disallowed.

Example (6). Duplicated loss. (i) Individual A forms T with a contribution of $100 in exchange for all of the T stock. Individual B forms T1 with a contribution of land that has a $90 basis and $100 value. T buys all the stock of T1 from B for $100. P buys all the stock of T from A for $100, and both T and T1 become members of the P group. The value of T1's land declines to $40. P sells all of the T stock for $40 and recognizes a loss of $60.

(ii) The amount of loss disallowed under paragraph (a)(1) may not exceed the amount determined under paragraph (c)(1) of this section. Under paragraph (c)(1)(iii) of this section, the amount of duplicated loss is $50. This is computed under paragraph (c)(2)(iii) as the excess of (A) the $90 aggregate adjusted basis of the assets of T and T1 (other than stock and securities of T1 owned by T), over (B) the $40 fair market value of the T stock (determined under paragraph (c)(2)(iv)). Because this amount is the only amount described in paragraph (c)(1), the amount of P's $60 loss disallowed under paragraph (a)(1) is limited to $50.

(iii) The result would be the same if the value of T1's property did not decline and T1 instead had an operating loss of $60 (attributable to borrowed funds) which the P group was unable to use. In that case, the $50 excess of the sum of (A) the $90 aggregate adjusted basis of the assets of T and T1 (other than stock and securities of members of the P group), plus the $60 net operating loss attributable to T1 and carried to its first taxable year following the disposition, over (B) the sum of the $40 fair market value of the T stock, plus the $60 of T1 liabilities, is an amount described in paragraph (c)(1)(iii). (See paragraph (g) of this section for the elective reattribution of T1's $60 net operating loss to P in connection with the sale.)

(d) *Successors*—(1) *General rule.* This section applies, to the extent necessary to effectuate the purposes of this section, to any property the basis of which is determined, directly or indirectly, in whole or in part, by reference to the basis of a subsidiary's stock.

(2) *Examples.* The principles of this paragraph (d) are illustrated by the following examples:

Example (1). Status of successor as member. (i) P, the common parent of a group, buys all the stock of T for $100. T's only asset has a basis of $0 and a value of $100. T sells the asset for $100, and buys another asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200, and the earnings and profits of P increase by $100. P later transfers all the stock of T to an unrelated consolidated group in exchange for 10 percent of the stock of X, the common parent of that group, in a transaction described in section 368(a)(1)(B). At the time of the exchange, the value of the X stock received by P is $80.

(ii) Under section 358, P has a basis of $200 in the X stock it receives in exchange for T. Under section 362, X has a $200 basis in the T stock.

(iii) Neither paragraph (a)(1) nor (b)(1) of this section applies to the stock of T on P's transfer of the stock to the X group, because no gain or loss is recognized on the transfer, and the transfer is not a deconsolidation of the stock of T under paragraph (b)(2) of this section.

(iv) The X stock owned by P after the reorganization is a successor interest to the T stock because P's basis in the X stock is determined by reference to P's basis in the T stock. The purposes of this section require that, notwithstanding T's status as a member of the X group, the reorganization exchange be treated as a deconsolidation event. Because X is not a member of the P group, a failure to reduce the basis of the X stock owned by P to its fair market value would permit the P group

to recognize and deduct the loss attributable to the T stock. The transfer of T stock to X therefore constitutes a deconsolidation of the T stock and P must reduce its basis in the T stock immediately before the transfer from $200 to its $80 value at that time.

Example (2). Continued application after deconsolidation. (i) P, the common parent of a group, buys all the stock of T for $100. T's only asset has a basis of $0 and a value of $100. T sells the asset for $100, and buys another asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200. P later transfers all the stock of T to partnership M in exchange for a partnership interest in M, in a transaction to which section 721 applies. The value of the T stock immediately before the transfer to M is $100. Less than 2 years later, P sells its interest in M for $80.

(ii) Under paragraph (b)(1) of this section, because the stock of T is deconsolidated on the transfer to M, immediately before the transfer to M, P reduces its basis in the T stock to the stock's $100 value immediately before the transfer. As a result, P has a basis of $100 in its interest in M, and M has a basis of $100 in the T stock.

(iii) When P sells its interest in M for $80, it recognizes a $20 loss. Because the basis of P's interest in M is determined by reference to P's basis in the T stock, and the reporting requirements could otherwise be circumvented, P's partnership interest in M is a successor interest to the T stock. Under paragraph (b)(4) of this section, P is required to file a statement with its return for the year of its disposition of its interest in M in order to deduct its loss. If P does not file the required statement described in paragraph (b)(4) of this section, P's loss on the disposition of its interest in M is disallowed.

(e) *Anti-stuffing rule*—(1) *Application.* This paragraph (e) applies if—

(i) A transfer of any asset (including stock and securities) after March 8, 1990, is followed within 2 years by a direct or indirect disposition or a deconsolidation of stock, and

(ii) The transfer is with a view to avoiding, directly or indirectly, in whole or in part—

(A) The disallowance of loss on the disposition or the basis reduction on the deconsolidation of stock of a subsidiary, or

(B) The recognition of the unrealized gain on the transferred asset. A disposition after the 2-year period described in this paragraph (e)(1) that is pursuant to an agreement, option, or other arrangement entered into within the 2-year period is treated as a disposition within the 2-year period for purposes of this section.

(2) *Basis reduction.* If this paragraph (e) applies, the basis of the stock is reduced, immediately before the disposition or deconsolidation, to cause recognition of gain in an amount equal to the loss disallowance or basis reduction, or the gain recognition, otherwise avoided by reason of the transfer.

(3) *Examples.* The principles of this paragraph (e) are illustrated by the following examples:

Example (1). Basic stuffing case. (i) In Year 1, P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases from $100 to $200. In Year 5, P transfers to T an asset with a basis of $0 and a value of $100 in a transaction to which section 351 applies, with the view described in paragraph (e)(1) of this section. In Year 6, P sells all the stock of T for $200.

(ii) Under paragraph (e)(2) of this section, P must reduce the basis in its T stock by $100 immediately before the sale. This basis reduction causes a $100 gain to be recognized on the sale.

(iii) The $100 basis reduction also would be required if the T stock is deconsolidated in Year 6 instead of being sold. P must reduce the basis in its T stock by $100 immediately before the deconsolidation.

(iv) The $100 basis reduction also would be required if the P stock were acquired at the beginning of Year 6 by the M group, even though the asset transfer took place outside the M group. Paragraph (e)(1) requires only that the transferor have the view at the time of the transfer.

Example (2). Stacking rules. (i) In Year 1, P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases from $100 to $200. In Year 5, when the value of the T stock remains $100, P transfers to T an asset with a basis of $0 and a value of $100 in a transaction to which section 351 applies, with the view described in paragraph (e)(1) of this section. Thereafter, the value of the contributed asset declines to $10. In Year 6, P sells all the T stock for $110.

(ii) Because the transferred asset declined in value by $90, the transfer enabled P to avoid the disallowance of loss on the sale of T only to the extent of $10. Under paragraph (e)(2) of this section, P must reduce the basis in its T stock immediately before the sale to cause recognition of gain in an amount equal to the loss disallowance otherwise avoided by reason of the transfer. The amount of this basis reduction is $100, causing a $10 gain to be recognized on the sale.

(iii) Assume, instead, that the transferred asset does not decline in value and that T reinvests the $100 in proceeds from the asset sale in another asset that appreciates in value to $190. In Year 6, P sells T for $290. Because the new asset appreciated in value by $90, the transfer enabled P to avoid the disallowance of loss on the sale of T only to the extent of $10. Under paragraph (e)(2) of this section, P must reduce the basis in its T stock immediately before the sale to cause recognition of gain in an amount equal to the loss disallowance otherwise avoided by reason of the transfer. The amount of this basis reduction is $10, causing a $100 gain to be recognized on the sale.

Example (3). Contribution of built-in loss asset. (i) In Year 1, P forms S with a contribution of $100 in exchange for all of S's stock, and S becomes a member of the P group. S buys an asset for $100, and the asset appreciates in value to $200. P then buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100, and under the investment adjustment system P's basis in the T stock increases from $100 to $200. In Year 5, when the value of the T stock remains $100, P transfers the T stock to S in a transaction to which section 351 applies, with the view described in paragraph (e)(1) of this section. The transfer causes P's basis in the S stock to increase from $100 to $300 and the value of S to increase from $200 to $300. In Year 6, P sells the S stock for $300.

(ii) Under paragraph (e)(2) of this section, P must reduce the basis in its S stock immediately before the sale to cause recognition of gain in an amount equal to the gain recognition otherwise avoided by reason of the transfer. The amount of this basis reduction is $100, causing a $100 gain to be recognized on the sale.

Example (4). Absence of view. (i) In Year 1, P forms S with a contribution of $100, and S becomes a member of the P group. S buys 2 assets, asset 1 with a basis of $50, which appreciates to $100, and asset 2 with a basis of $50 which declines in value to $0. S sells asset 1 for $100. Under the investment adjustment system, P's basis in the S stock increases from $100 to $150. In Year 5, S transfers asset 2 to P in a transaction to which §1.1502-14(a) applies, with a view to having the group retain the loss inherent in the asset. This transfer reduces P's basis in the S stock from $150 to $100. In Year 6, P sells all the stock of S for $100.

(ii) The transfer from S to P achieves a result that could have been obtained by other methods that would not have been prevented by this section. The transfer therefore is not with the view described in paragraph (e)(1) of this section, P is not required to reduce the basis of its S stock under paragraph (e)(2) of this section. P is in substantially the same position holding asset 2 as it would be if S sold the asset and the resulting loss was available to the P group (either through S or by reattribution under paragraph (g) of this section).

Example (5). Extending the time period for dispositions. (i) In Year 1, P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases from $100 to $200. At the beginning of Year 5, P transfers to T an asset with a basis of $0 and a value of $100 in a transaction to which section 351 applies, with the view described in paragraph (e)(1) of this section. Within 2 years, P agrees to sell all the stock of T for $200 at the end of Year 7.

(ii) Under paragraph (e)(1) of this section, P's disposition of the T stock at the end of Year 7 is treated as occurring within the 2-year period following P's transfer of the asset to T, because the disposition is pursuant to an agreement reached within 2 years after the transfer. Accordingly, under paragraph (e)(2) of this section, P must reduce the basis in its T stock by $100 immediately before the sale. This result is reached whether or not the agreement is in

writing. P's disposition would also have been treated as occurring within the 2-year period if the disposition were pursuant to an option issued within the period.

(f) *Investment adjustments and earnings and profits*— (1) *Effect on investment adjustments and earnings and profits*—(i) *General rule.* For purposes of determining investment adjustments under §1.1502-32 and earnings and profits under §1.1502-33(c) with respect to a member that owns stock in a subsidiary, any deduction that is disallowed, or any amount by which basis is reduced, under this section is treated as a loss absorbed by the member in the tax year in which the disallowance or basis reduction occurs.

(ii) *Example.* (A) In Year 1, P forms S with a contribution of $100, and S becomes a member of the P group. S buys all the stock of T for $100. T has an asset with a basis of $0 and a value of $100. In Year 2, T sells the asset for $100. Under the investment adjustment system, S's basis in the T stock increases to $200, and P's basis in the S stock increases to $200. In Year 6, S sells all the stock of T for $100, and S's recognized loss of $100 is disallowed under paragraph (a)(1) of this section.

(B) Under paragraph (f)(1) of this section, the earnings and profits of S for Year 6 are reduced by $100, the amount of the loss disallowed under paragraph (a)(1). P's basis in the S stock is reduced from $200 to $100 under the investment adjustment system. Correspondingly, P's earnings and profits for Year 6 are reduced by $100, the amount of the loss disallowed under paragraph (a)(1) of this section.

(2) *Coordination rules*—(i) *Order of adjustments.* Deconsolidation of a share is treated as a disposition of the share for purposes of determining when investment adjustments are made to the share.

(ii) *No tiering up of certain adjustments.* If the basis of stock of a subsidiary owned by a member (the "owning member") is reduced under this section on the deconsolidation of the stock, no corresponding adjustment is made under §1.1502-32 to the basis of the stock of the owning member (or any higher tier member) if a disposition or deconsolidation occurs in the same transaction with respect to all the stock of the owning member. In the case of a disposition or deconsolidation in the same transaction of less than all the stock of the owning member, appropriate adjustments shall be made under §1.1502-32 with respect to the stock of the owning member (or any higher tier member).

(iii) *Example.* (A) P, the common parent of a group, owns all the stock of S, S owns all the stock of S1, and S1 owns all the stock of S2. P's basis in the S stock is $100, S's basis in the S1 stock is $100, and S1's basis in the S2 stock is $100. In Year 1, S2 buys T for $100. T has an asset with a basis of $0 and a value of $100. In Year 2, T sells the asset for $100. Under the investment adjustment system, the basis of each subsidiary's stock increases from $100 to $200. In Year 6, S sells all the stock of S1 for $100 to A, an individual, and recognizes a loss of $100. S1, S2, and T are not members of a consolidated group immediately after the sale because the new S1 group does not file a consolidated return for its first taxable year.

(B) Under paragraph (a)(1) of this section, no deduction is allowed to S for its loss on the sale of the S1 stock. Under paragraph (f)(1) of this section, S's earnings and profits for Year 6 are reduced by the $100 loss that is disallowed. Correspondingly, under the investment adjustment system, S's reduction in earnings and profits causes a reduction in P's basis in the S stock, and a reduction in P's earnings and profits for Year 6.

(C) Under paragraph (b)(1) of this section, because the stock of T and S2 is deconsolidated, S2 must reduce the basis of the T stock from $200 to $100 (its value immediately before the deconsolidation), and S1 must reduce the basis of the S2 stock from $200 to $100 (its value immediately before the deconsolidation). Under paragraph (f) (1), S2's earnings and profits for Year 6 are reduced by the $100 reduction to the basis of the T stock, and S1's earnings and profits are reduced by the $100 reduction to the basis of the S2 stock. Under paragraph (f)(2)(ii) of this section, because the stock of S2 is deconsolidated in the same transaction, the basis reduction to the T stock does not cause any corresponding investment adjustment to the stock of S2, or to the stock of any higher tier subsidiary. Similarly, because the stock of S1 is disposed of in the same transaction, the reduction to the basis of the S2 stock does not cause an investment adjustment to the stock of S1, or the stock of any higher tier subsidiary.

(iv) *Basis reduction treated as investment adjustment.* For purposes of the consolidated return regulations, the amount of any basis reduction to stock under this section is generally treated as a net negative adjustment under §1.1502-32(e) (in addition to the adjustment otherwise required under §1.1502-32(e)) with respect to the stock. The amount of the basis reduction is not treated as a net negative adjustment for purposes of §1.1502-32T(a), however.

(g) *Reattribution of subsidiary's losses to common parent*—(1) *Reattribution rule.* If a member disposes of stock of a subsidiary and the member's loss would be disallowed under paragraph (a)(1) of this section, the common parent may make an irrevocable election to reattribute to itself any portion of the net operating loss carryovers and net capital loss carryovers attributable to the subsidiary (and any lower tier subsidiary) without regard to the order in which they were incurred, provided the amount reattributed does not exceed the amount that would be disallowed if an election under this paragraph (g) were not made. The common parent succeeds to the reattributed losses as if the losses were succeeded to on the day of the disposition in a transaction to which section 381 applies. Any owner shift of the subsidiary (including any deemed owner shift resulting from section 382(g)(4)(D) or 382(l)(3)) in connection with the disposition will not be taken into account under section 382 with respect to the reattributed losses.

(2) *Insolvency limitation.* Losses of a subsidiary may not be reattributed under this paragraph (g) to the extent that the subsidiary and all higher tier subsidiaries are insolvent within the meaning of section 108(d)(3) at the time of the disposition. For purposes of determining insolvency, preferred stock of a subsidiary that is not owned by members is treated as a liability to the extent of the amount of preferred distributions to which the stock would be entitled if the subsidiary were liquidated on the date of the disposition.

(3) *Investment adjustments.* Any losses reattributed under this paragraph (g) are treated for purposes of determining investment adjustments under §1.1502-32 and earnings and profits under §1.1502-33(c) as absorbed by the subsidiary (or lower tier subsidiary) immediately before the disposition. The losses, however, are not treated as absorbed for other tax purposes, such as section 172 or section 1212.

(4) *Examples.* The principles of this paragraph (g) are illustrated by the following examples:

Example (1). Basic reattribution case. (i) P, the common parent of a group, forms S with a contribution of $100. S has an operating loss of $60, which produces a deficit in earnings and profits that reduces P's basis in the S stock by $60 under the investment adjustment system. The group is unable to use the loss, and the loss becomes a net operating loss carryover attributable to S. Under the investment adjustment system, P's basis in the S stock is increased by $60, the amount of the unused loss, thus preserving P's $100 basis in the S stock. The remaining assets of S appreciate in value, and P sells all the stock of S for $55. But for an election to reattribute losses under this paragraph (g), P would have a $45 loss on the sale of S that would be disallowed.

(ii) P elects under paragraph (g)(1) of this section to reattribute to itself $45 of S's losses (the maximum amount permitted). As a result, $45 of the $60 net operating loss carryover attributable to S is reattributed to P. This reattributed loss may be included in the net operating loss carryover to subsequent consolidated return years of the P group. The remaining $15 of net operating loss carryover attributable to S is carried over to the first separate return year of S.

(iii) The $45 reattributed loss is treated, solely for purposes of the investment adjustment system, as absorbed by S immediately before the disposition. This reduces P's basis in the S stock to $55 immediately before the disposition. As a result, P does not recognize any gain or loss on the disposition. However, this deemed absorption for purposes of determining investment adjustments does not affect the use of the loss by the P group.

(iv) Assume that $20 of S's losses arose in Year 1 and $40 in Year 2, and that P elects to reattribute all $40 from Year 2 and $5 from Year 1. These losses retain their character as ordinary losses arising in Years 1 and 2. The losses continue to be subject to any limitations originally applicable to S, but P succeeds to them and may absorb the losses independently of S. (For example, P's use of the Year 2 losses does not depend on S's use of the Year 1 losses that were not reattributed to P.)

Example (2). Lower tier subsidiary. (i) P, the common parent of a group, forms S with a contribution of $100. S then forms T with a contribution of $40, and T borrows $60 from an unrelated lender. S has a net operating loss of $30. T has a net operating loss of $55 and is insolvent by $15. The group is unable to use these losses and the losses become net operating loss carryovers attributable to T and S. Under the investment adjustment system, S's basis in the T stock remains $40 and P's basis in the S stock remains $100. P sells all of the S stock for $30 ($100 invested, less S's $30 net operating loss and S's $40 unrealized loss on its investment in T stock). But for an election to reattribute losses under this paragraph (g), P would have a $70 loss on the sale of the S stock that would be disallowed.

(ii) S's $30 portion of the net operating loss carryover may be reattributed to P under paragraph (g)(1) of this section. Because T is insolvent by $15, paragraph (g)(2) of this section provides that only $40 of its $55 portion of the net operating loss carryover may be reattributed to P under paragraph (g)(1). There is no limitation, however, on which $40 of T's $55 loss may be reattributed.

(iii) P elects under paragraph (g)(1) of this section to reattribute to itself $40 of T's losses (the maximum amount permitted). P does not elect, however, to reattribute to itself any of S's losses. As a result, $40 of the $85 net operating loss carryover is reattributed to P. This reattributed loss may be included in the net operating loss carryover to subsequent consolidated return years of the P group. Of the $45 remaining net operating loss carryover, the $15 attributable to T and $30 attributable to S are carried over to their first separate return years.

(iv) The loss reattributed from T is treated, solely for purposes of the investment adjustment system, as absorbed by T immediately before the disposition. This reduces P's basis in the S stock to $60 immediately before the disposition. As a result, P recognizes only a $30 loss on the disposition of its S stock ($30 sale proceeds and $60 basis). However, this deemed absorption for purposes of determining investment adjustments does not affect the use of the loss by the P group.

Example (3). Separate return limitation year losses. (i) P, the common parent of a group, buys the stock of S for $100. S has a net operating loss carryover of $40 from a separate return limitation year, and assets with a value and basis of $100. The assets of S decline in value by $40, and P sells all the stock of S for $60. But for an election to reattribute losses under this paragraph (g), P would have a $40 loss on the sale of S that would be disallowed.

(ii) S's $40 loss carryover from a separate return limitation year is included in the P group's net operating loss carryovers and may be reattributed to P under paragraph (g)(1) of this section.

(iii) P elects under paragraph (g)(1) of this section to reattribute to itself S's $40 loss (the maximum amount permitted). Following the reattribution, the loss is included in the net operating loss carryover to subsequent consolidated return years of the P group.

(iv) The loss reattributed from S is treated, solely for purposes of the investment adjustment system, as absorbed by S immediately before the disposition. This reduces P's basis in the S stock to $100 immediately before the disposition. As a result, P recognizes no gain or loss on the disposition of its S stock. However, this deemed absorption for purposes of determining investment adjustments does not affect the use of the loss by the P group.

(5) *Time and manner of making the election*—(i) *In general.* The election described in paragraph (g)(1) of this section must be made in a separate statement entitled "THIS IS AN ELECTION UNDER SECTION 1.1502-20(g)(1) TO REATTRIBUTE LOSSES OF [insert names and employer identification numbers (E.I.N.) of each subsidiary whose losses are reattributed] TO [insert name and employer identification number of common parent]." The statement must include the following information—

(A) For each subsidiary, the amount of each net operating loss and net capital loss, and the year in which each arose, that is reattributed to the common parent, and

(B) If a subsidiary ceases to be a member, the name and employer identification number of the person acquiring the subsidiary's stock.

The statement must be signed by the common parent, and by each subsidiary with respect to which loss is reattributed under this paragraph (g) that does not remain a member of the common parent's group immediately following the disposition. The statement must be filed with the group's income tax return for the tax year of the disposition and, if the subsidiary (or lower tier subsidiary) ceases to be a member, a copy delivered on or before the time that return is required to be filed by the acquirer. If the acquirer is a subsidiary in a consolidated group, the name and employer identification number of the common parent of the group must be included in the statement, and a copy of the statement must also be delivered to the common parent.

(ii) *Filing of subsidiary's copy of statement.* The subsidiary whose losses are reattributed (or the common parent of any consolidated group that acquires the subsidiary or lower tier subsidiary) must attach its copy of the statement described in paragraph (g)(5)(i) of this section to its return for the first year ending after the due date, including extensions, of the return in which the election required by paragraph (g)(5)(i) is to be filed.

(h) *Effective dates*—(1) *General rule.* This section is effective December 26, 1990. Except as otherwise provided in this paragraph (h), this section applies with respect to dispositions and deconsolidations after January 31, 1991. For this purpose, dispositions deferred under §§1.1502-13, 1.1502-13T, 1.1502-14, and 1.1502-14T are deemed to occur at the time the deferred gain or loss is taken into account unless the stock was deconsolidated before February 1, 1991. If stock of a subsidiary became worthless during a taxable year including February 1, 1991, the disposition with respect to the stock is treated as occurring on the date the stock became worthless.

(2) *Election to accelerate effective date*—(i) *In general.* A group may make an irrevocable election to apply this section to all its members, in lieu of §1.337(d)-2, with respect to all dispositions and deconsolidations after November 18, 1990.

(ii) *Time and manner of making the election—in general.* The election described in paragraph (h)(2) of this section must be made in a separate statement entitled "THIS IS AN ELECTION UNDER SECTION 1.1502-20(h)(2) TO ACCELERATE THE APPLICATION OF §1.1502-20 TO THE CONSOLIDATED GROUP OF WHICH [insert name and em-

ployer identification number of common parent] IS THE COMMON PARENT." The statement must be signed by the common parent and filed with the group's income tax return for the tax year of the first disposition or deconsolidation to which the election applies. If the separate statement required under this paragraph (h)(2)(ii) is to be filed with a return the due date (including extensions) of which is before April 16, 1991, the statement may be filed with an amended return for the year of the disposition or deconsolidation. Any other filings required under this §1.1502-20, such as the statement required under §1.1502-20(c)(3), which ordinarily cannot be made with an amended return, must be made at such time and in such manner as permitted by the Commissioner.

(3) *Binding contract rule.* For purposes of this paragraph (h), if a disposition or deconsolidation is pursuant to a binding written contract entered into before March 9, 1990, and in continuous effect until the disposition or deconsolidation, the date the contract became binding is treated as the date of the disposition or deconsolidation.

(4) *Cross reference.* For transitional loss limitation rules, see §§1.337(d)-1 and 1.337(d)-2.

Par. 5. Section 1.267(f)-3T is redesignated as §1.267(f)-3, and is revised to read as follows:

§1.267(f)-3 Disposition or deconsolidation of subsidiary stock.

For purposes of applying section 267(f)(2) to the sale or exchange of the stock of one member of a consolidated group by another member, see §§1.337(d)-1(a), 1.337(d)-2(a), and 1.1502-20(a). For purposes of this section, the definitions in §1.1502-1 apply.

Par. 6. Paragraph (e)(1) of §1.337(d)-1 is revised to read as follows:

§1.337(d)-1 Transitional loss limitation rule.

* * * * *

(e) *Effective dates*—(1) *General rule.* This section is effective November 19, 1990, and applies with respect to dispositions after January 6, 1987. After November 18, 1990, however, this section applies only if the stock was deconsolidated (as that term is defined in §1.337(d)-2(b)(2)) before November 19, 1990, and only to the extent the disposition is not subject to §1.337(d)-2 or §1.1502-20.

* * * * *

Par. 7. Paragraph (r) of §1.1502-12 is revised to read as follows:

§1.1502-12 Separate taxable income.

* * * * *

(r) For rules relating to loss disallowance or basis reduction on the disposition or deconsolidation of stock of a subsidiary, see §§1.337(d)-1, 1.337(d)-2 and 1.1502-20.

* * * * *

Par. 8. The last sentence of §1.1502-32(a) is revised to read as follows:

§1.1502-32 Investment adjustment.

(a) *** For rules relating to loss disallowance or basis reduction on the disposition or deconsolidation of stock of a subsidiary, see §§1.337(d)-1, 1.337(d)-2 and 1.1502-20.

* * * * *

Par. 9. The last sentence of §1.1502-33(c)(6) is revised to read as follows:

§1.1502-33 Earnings and profits.

* * * * *

(c) * * *

(6) * * * For rules relating to the effect on earnings and profits of loss disallowance or basis reduction on the disposition or deconsolidation of stock of a subsidiary, see §§1.337(d)-1, 1.337(d)-2 and 1.1502-20.

* * * * *

Par. 10. Section 1.1502-79 is amended by adding paragraph (a)(1)(iii) to read as follows:

§1.1502-79 Separate return years.

(a) * * *

(1) * * *

(iii) For rules permitting the reattribution of losses of a subsidiary to the common parent in the case of loss disallowance or basis reduction on the disposition or deconsolidation of stock of the subsidiary, see §1.1502-20.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on November 19, 1990, 3:43 p.m., and published in the issue of the Federal Register for November 26, 1990, 55 F.R. 49075)

Notice of Proposed Rulemaking

Nondiscrimination Requirements for Qualified Plans

EE-61-88

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document amends previously proposed regulations under the nondiscrimination requirements for qualified retirement plans under section 401(a)(4) and the average benefit percentage test under section 410(b)(2)(A)(ii) of the Internal Revenue Code. The amendments delay the effective dates in those proposed regulations. These amendments will provide the public with extra time to comply with the regulations and will affect sponsors of and participants in tax-qualified retirement plans.

DATES: Written comments must be delivered by February 1, 1991.

ADDRESSES: Send written comments to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attention: CC:CORP:T:R (EE-61-88), Washington, D.C. 20044. In the alternative, comments may be hand delivered to: Internal Revenue Building, Room 4429, 1111 Constitution Ave., N.W., Attention: CC:CORP:T:R (EE-61-88), Washington, D.C.

SUPPLEMENTARY INFORMATION:

Statutory Authority

This document amends previously proposed regulations under sections 401(a)(4) and 410(b) of the Internal Revenue Code. These regulations are proposed to be issued under the authority contained in sections 401(a)(4), 410(b), and 7805 of the Code.

Explanation of Provisions

On May 14 and September 14, 1990, the Treasury Department and the Internal Revenue Service published proposed comprehensive nondiscrimination regulations for qualified retirement plans under section 401(a)(4) and the average benefit percentage test under section 410(b)(2)(A)(ii) (55 FR 19897 [EE-61-88, 1990-1 C.B. 573] and 55 FR 37888 [EE-49-90, page 714, this Bulletin].

The proposed regulations contain a number of requirements that are satisfied by reasonable, good faith compliance for plan years beginning before 1991. Since publication, the Treasury and the Service have received many comments requesting a delay of the effective date and an extension of the period in which reasonable, good faith compliance is permitted. After studying the issue, the Treasury and the Service have decided to delay the effective date of these regulations from plan years beginning on or after January 1, 1991, to plan years beginning on or after January 1, 1992. This extension is limited to the provisions specified in this document and does not apply to other regulations under sections amended or added by the Tax Reform Act of 1986.

In addition, consistent with the change in the effective date for the average benefit percentage test, employers may choose to test employee stock ownership plans separately for purposes of that test for plan years beginning before January 1, 1992, in conformity with §1.410(b)-7(e) prior to its amendment by the September 14, 1990, proposed regulations. Further, employers that meet the reasonable, good faith requirement of §1.401(a)(4)-13 for the 1989, 1990, and 1991 plan years by operating their plans in accordance with the proposed regulations as published on May 14, 1990, need not take into account for those years the transitional rules provided for proposed §1.401(a)(4)-13(c). However, the provisions of §1.401(a)(4)-13(c) are proposed to be effective for those plans for the first plan year beginning on or after January 1, 1992.

This document is part of a coordinated package of guidance allowing employers an additional period to make amendments for certain requirements of the Tax Reform Act of 1986. It is issued concurrently with Notice 90-73, *** [page 353, this Bulletin] which (1) extends the expiration date of the remedial amendment period under section 401(b) until the end of the first plan year beginning after December 31, 1991, for certain disqualifying provisions and (2) extends the transitional date for the safe harbors under section 403(b)(12) in Notice 89-23, 1989-1 C.B. 654.

The amendments to the proposed regulations delay the time of required compliance with the proposed regulations. Accordingly, this document amends the sections of the proposed regulations published on May 14 and September 14, 1990, that are listed below, to delay the effective date and extend the reasonable, good faith compliance period for the proposed regulations under section 401(a)(4) and the average benefit percentage test under section 410(b)(2)(A)(ii).

Regulation section	*Subject*
1.401(a)-4, A-1(a)(1)	Optional forms of benefit
1.401(a)(4)-3	Nondiscrimination in amount of benefits
1.401(a)(4)-6	Defined benefit plans with employee contributions
1.401(a)(4)-7	Effect of section 401(l) permitted disparity
1.401(a)(4)-8	Conversion of contributions and benefits
1.401(a)(4)-13	Effective dates
1.410(b)-10(d)	Effective dates and transition rules
1.411(d)-4, A-1(b)(1)	Section 411 protected benefits

For plan years in which the amendments made by section 1112(a) of TRA '86 apply to a plan, but before the proposed effective date, a plan must be operated in accordance with a reasonable, good faith interpretation of the requirements of section 401(a)(4). Whether compliance is reasonable and in good faith will generally be determined on the basis of facts and circumstances, including the extent to which the employer has consistently resolved all unclear issues in its favor. Reasonable, good faith compliance will be deemed to exist, however, if a plan is operated in accordance with the proposed regulations.

Reliance on These Proposed Regulations

Taxpayers may rely on these proposed regulations for guidance pending issuance of final regulations. If future regulations are more restrictive, they will be applied without retroactive effect.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Written Comments

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety.

List of Subjects

26 CFR 1.401-0 through 1.425-1

Employee benefit plans, Employee stock ownership plans, Income taxes, Individual retirement accounts, Pensions, Stock options.

Proposed Amendments to the Regulations

The notice of proposed rulemaking (to amend 26 CFR Part 1) that were published on May 14, 1990 (55 FR 19897), and September 14, 1990 (55 FR 37888), are amended as follows:

INCOME TAX REGULATIONS
(26 CFR Part 1)

Paragraph 1. The authority citation for Part 1 is amended by adding the following citations:

Authority: 26 U.S.C. 7805. *** §§1.401(a)-4, 1.401(a)(4)-3, 1.401(a)(4)-6, 1.401(a)(4)-7, 1.401(a)(4)-8, and 1.401(a)(4)-13 also issued under 26 U.S.C. 401(a)(4), §1.410(b)-10 also issued under 26 U.S.C. 410(b).

Par. 1a. The authority citation for Part 1 is further amended by revising the citation for §1.411(d)-4 as follows:

Authority: *** §1.411(d)-4 also issued under 26 U.S.C. 411(d)(6).

Par. 2. Section 1.401(a)-4 as proposed to be amended on May 14, 1990 (55 FR 19907), is amended by revising the last sentence of A-1(a)(1) to read as follows:

§1.401(a)-4 Optional forms of benefit.

*****

A-1: (a) *In general*—(1) *Scope.* *** See §1.401(a)(4)-4(d) for the definition of an optional form of benefit for plan years beginning after December 31, 1991.

*****

Par. 3. Section 1.401(a)(4)-3 as proposed on May 14, 1990 (55 FR 19912), is amended by revising the last sentence of paragraphs (c)(3)(iii) and the last sentence of paragraph (c)(3)(iv)(A) to read as follows:

§1.401(a)(4)-3 Nondiscrimination in amount of benefits.

*****

(c) *General test for nondiscrimination in amount of benefits provided.* ***

(3) *Determining accrual rates.* ***

(iii) *Accrued-to-date method.* *** This method may, but need not, be applied solely with respect to benefits accrued and participation in plan years beginning after a selected date no later than December 31, 1991.

(iv) *Projected accrual rate method*—(A) *In general.* *** This method may, but need not, be applied solely with respect to benefits accrued and participation in plan years beginning after a selected date no later than December 31, 1991.

*****

Par. 4. Section 1.401(a)(4)-6 as proposed on May 14, 1990 (55 FR 19920), is amended as follows:

1. Paragraph (b)(3)(ii) is revised to read as set forth below.

2. Paragraph (b)(5) is revised to read as set forth below.

3. Paragraph (c)(4)(iii) is revised to read as set forth below.

§1.401(a)(4)-6 Defined benefit plans with employee contributions.

*****

(b) *Determination of employer-derived and employee-derived benefits* ***

(3) *Minimum benefit method* ***

(ii) *Minimum benefit.* A plan satisfies this paragraph (b)(3)(ii) if it provides that in plan years beginning after December 31, 1991, each employee will accrue a benefit that equals or exceeds the sum of—

(A) The accrued benefit derived from employee contributions made for plan years beginning after December 31, 1991, determined in accordance with section 411(c) and

(B) Fifty percent of the total benefit accrued in plan years beginning after December 31, 1991, as determined under the plan benefit formula without regard to that portion of the formula designed to satisfy the minimum benefit requirement of this paragraph (b)(3)(ii).

*****

(5) *Cessation of employee contributions method.* If a plan provides that no employee contributions, other than employee contributions allocated to separate accounts, may be made to the plan for plan years beginning after December 31, 1991, the plan may treat all benefits under the plan (other than benefits attributable to employee contributions allocated to separate accounts) as employer-derived.

(c) *Employee contributions not allocated to separate accounts* ***

(4) *Grandfather rule for plans in existence on May 14, 1990.* ***

(iii) For plan years beginning after December 31, 1991, all employees under the plan are permitted to make employee contributions at a uniform rate with respect to all compensation under the plan; and

*****

Par. 5. Section 1.401(a)(4)-7 as proposed on May 14, 1990 (55 FR 19921), is amended by revising the first sentence of paragraph (d)(4)(i) to read as follows:

§1.401(a)(4)-7 Effect of section 401(l) permitted disparity.

*****

(d) *Special rules* ***

(4) *Transition rules*—(i) *Scope.* This paragraph (d)(4) provides rules that are applicable to a plan that was in existence prior to the first plan year beginning before January 1, 1989, that uses either the accrued-to-date method or the projected method under paragraph (c)(5)(iii) or (iv) of this section to impute disparity, and that applies such methods solely with respect to benefits accrued and participation in plan years beginning after a selected date no later than December 31, 1991. ***

*****

Par. 6. Section 1.401(a)(4)-8 as proposed on May 14, 1990 (55 FR 19924), is amended by revising the last sentence of paragraph (b)(3)(i) to read as follows:

§1.401(a)(4)-8 Conversion of contributions and benefits.

*****

(b) *Nondiscriminatory benefits under a defined contribution plan.* ***

(3) *Option to use accrued-to-date method*—(i) *In general.* *** The method provided in this paragraph (b)(3)(i) may, but need not, be applied solely with respect to participation, and adjusted account balances attributable to allocations accrued, in plan years beginning after a selected date no later than December 31, 1991, which date is the same for all employees in the plan.

*****

Par. 7. Section 1.401(a)(4)-13 as proposed on May 14, 1990 (55 FR 19930), and amended on September 14, 1990 (55 FR 37899), is amended by revising the first sentence of paragraph (a) and by revising paragraph (c)(6)(ix) to read as follows:

§1.401(a)(4)-13 Effective dates.

(a) *In general.* Sections 1.401(a)(4)-1 through 1.401(a)(4)-13 apply to plan years beginning on or after January 1, 1992. ***

*****

(c) *Transitional rules for certain defined benefit plans* ***

(6) *Definitions* ***

(ix) *Reconstructed compensation for the freeze year.* The term "reconstructed compensation for the freeze year" means an employee's compensation for the freeze year determined under the following method in the same manner for every employee in the plan: First, select a single plan year beginning after the close of the freeze year but beginning not later than December 31, 1992; second, determine the employee's compensation for the selected plan year under the same compensation definition used to determine the employee's compensa-

tion for the current plan year under paragraph (c)(6)(ii)(A)(*3*) of this section; third, multiply the employee's compensation for the selected plan year by a fraction, the numerator of which is the employee's compensation for the freeze year determined under the same compensation definition used to determine the employee's frozen accrued benefit, and the denominator of which is the employee's compensation for the selected plan year determined under the compensation definition used to determine the employee's frozen accrued benefit.

Par. 8. Section 1.410(b)-10(d), as proposed on May 14, 1990 (55 FR 19934), is amended by revising the first sentence to read as follows:

§1.410(b)-10 Effective dates and transition rules.

*****

(d) *Effective date for average benefit percentage test.* Section 1.410(b)-5 applies to plan years beginning on or after January 1, 1992. ***

Par. 9. Section 1.411(d)-4, as proposed to be amended on May 14, 1990 (55 FR 19935), is amended by revising the last sentence of A-1(b)(1) to read as follows:

§1.411(d)-4 Section 411(d)(6) protected benefits.

*****

A-1: ***

(b) *Optional forms of benefit—*(1) *In general.* *** See §1.401(a)(4)-4(d) for the definition of an optional form of benefit for plan years beginning on or after January 1, 1992. *****

John D. Johnson,
Acting Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on November 30, 1990, 8:45 a.m., and published in the issue of the Federal Register for December 3, 1990, 55 F.R. 49906)

Notice of Proposed Rulemaking

Nondiscrimination Requirements for Qualified Plans; Application of Average Benefit Percentage Test to ESOPs

EE-49-90

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains amendments to two sets of previously proposed regulations. The amendments to the first set revise and amplify certain rules under the nondiscrimination requirements for qualified retirement plans under section 401(a)(4) of the Internal Revenue Code. The amendments to the second set change the rules governing the application of the average benefit percentage test under section 410(b) of the Code to employee stock ownership plans. In addition to reflecting changes made by the Tax Reform Act of 1986 (TRA '86), these proposed regulations interpret the section 401(a)(4) requirement that contributions or benefits provided under a tax-qualified retirement plan not discriminate in favor of highly compensated employees and the related section 410(b) minimum coverage requirements. These regulations will provide the public with guidance necessary to comply with the law and will affect sponsors of and participants in tax-qualified retirement plans.

DATES: Written comments must be received by November 13, 1990.

ADDRESSES: Send comments to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (EE-49-90), Room 4429, Washington, D.C. 20044. In the alternative, to ensure timely receipt by the Service, comments can be hand-delivered to: Internal Revenue Service, Attn: CC:CORP:T:R (EE-49-90) Room 4429, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

SUPPLEMENTARY INFORMATION:

Statutory Authority

This document contains amendments of previously proposed regulations under sections 401(a)(4), 401(a)(5), 401(l), and 410(b) of the Internal Revenue Code. These regulations and amendments are proposed to conform the regulations to sections 1111, 1112(a), and 1114 of TRA '86. These regulations are to be issued under the authority contained in sections 401(a)(4), 401(l), 410(b), and 7805 of the Code.

Amendments to Certain Nondiscrimination Rules

On May 14, 1990, the Treasury Department and the Internal Revenue Service published proposed comprehensive nondiscrimination regulations for qualified plans under section 401(a)(4) and certain other related Code sections. Since publication, the Treasury and the Service have received many comments and have continued to analyze the proposed regulations to ensure that they function as intended. In the course of this ongoing review, the Treasury and the Service have become aware of certain issues on which immediate guidance would be helpful. This document therefore amends proposed §§1.401(a)(4)-2, 1.401(a)(4)-3, and 1.401(a)(4)-9 published on May 14, 1990 (55 FR 19897) [EE-61-88, 1990-1 C.B. 573], and proposed §1.401(l)-3 published on November 15, 1988 (53 FR 45917) [EE-159-86, 1988-2 C.B. 798], and amended on May 14, 1990 (55 FR 19947) [EE-22-90, 1990-1 C.B. 617], to clarify and amplify certain nondiscrimination rules under those sections of the proposed regulations. The Treasury and the Service are still evaluating comments received on additional aspects of the proposed regulations. Therefore, no inference should be drawn from the fact that an issue is not addressed in this document or from the fact that only certain aspects of an issue are addressed.

1. *Use of safe harbors not precluded by certain plan provisions*

The proposed regulations published May 14, 1990, provide two safe harbors for defined contribution plans with uniform formulas and three safe harbors for defined benefit plans with uniform formulas. These safe harbors can be used to establish nondiscrimination with respect to the amount of contributions or benefits. In response to numerous inquiries, this document clarifies that many common plan provisions, such as limits on compensation or service taken into account, do not prevent use of the safe harbors.

2. *Safe harbor for defined contribution plans with a uniform formula weighted for age or service*

Proposed regulations §1.401(a)(4)-2(b)(3) provides a safe harbor for defined contribution plans with a uni-

form allocation formula weighted for age or service. Under the safe harbor, the dollar amount of allocations may vary solely on account of compensation, age, years of service, or years of plan participation. This document makes clear that a common feature of such plans—weighing allocations by whole increments of compensation—is permissible under the safe harbor. In line with the traditional design of these plans, compensation can be taken into account in uniform increments of up to $200, with the same weight assigned to every increment. Of course, an employee's actual compensation must be used to determine average allocation rates under the second prong of the safe harbor.

3. *Safe harbor for unit credit formula using fractional rule accrual*

A number of commentators suggested amending proposed §1.401(a)-(4)-3(b)(2)(iv) which provides a safe harbor for defined benefit plans with uniform unit credit formulas under which benefits accrue under the fractional accrual rule. Under the safe harbor, no employee can accrue in any 1 year more than 133⅓ percent of the benefit that any other employee can accrue, disregarding employees with projected service in excess of 40 years. Because an employee who accrues the maximum benefit over 40 years accrues it at a rate of 2.5 percent annually, no other employee can accrue the maximum benefit at a rate of more than 3.33 percent annually (133⅓ percent of 2.5 percent) over 30 years. In contrast, under the flat benefit plan safe harbor, the maximum benefit can be accrued over 25 years. Commentators suggested that these two safe harbors be made parallel. In response to these comments, the proposed regulations have been amended to permit an employer to disregard employees with years of projected service in excess of 33 years in determining whether the plan satisfies this requirement of the safe harbor. This permits the maximum benefit for plans using the unit credit fractional rule safe harbor to be accrued over no less than 25 years, as is the case with plans using the flat benefit safe harbor.

Of course, an integrated plan that uses the unit credit fractional rule safe harbor must still satisfy section 401(l) in form, including the uniformity requirement under section 401(l). A unit credit fractional accrual plan, like a flat benefit fractional accrual plan, would violate the uniformity requirement under section 401(l) unless the maximum benefit is accrued over a period of at least 35 years.

4. *Grouping of allocation or accrual rates*

In response to a number of inquiries, this document clarifies the operation of the grouping rules for allocation and accrual rates under proposed §§1.401(a)(4)-2(c)(5) and 1.401(a)(4)-3(c)(3)(v). The effect of the amendments is to clarify the intended flexibility available to employers applying the grouping rules.

5. *Compensation for the plan year*

Under the proposed regulations, compensation for the entire plan year is taken into account in determining whether a defined contribution plan satisfies section 401(a)(4) with respect to the amount of contributions. A number of commentators have suggested that, in the case of defined contribution plans, it is consistent with the principle of nondiscrimination to measure compensation by reference to the portion of the plan year during which an employee is a plan participant. The Treasury and the Service agree. This document therefore amends the proposed regulations to implement this suggestion.

Under the proposed regulations, in determining whether a defined benefit plan satisfies section 401(a)(4) with respect to the amount of benefits, compensation must generally be based on the plan year. Alternatively, compensation can be based on any consecutive period of at least 12 months (36 months in the case of a plan using the special compensation rule in §1.401(a)(4)-3(f)(2)), provided the period over which compensation is determined ends within the plan year being tested. A number of commentators have asked whether the requirement that the period end within the plan year precludes the use of a final average pay formula that determines an employee's accrual based on the employee's highest compensation over a specified number of years if those years do not end within the plan year being tested. This document clarifies the proposed regulations to provide specifically that a final average pay plan may use an employee's highest average compensation for a specified period even if that period does not end within the current plan year. This rule for final average pay plans is only available if the specified period in which the highest compensation is determined includes at least 36 consecutive months and compensation for a period ending within the current plan year is considered in determining the employee's highest paid period.

This document also modifies §1.401(a)(4)-3(f)(2) to provide that a career average plan that bases an employee's total benefit on compensation for a period of at least 36 consecutive months (or the employee's period of employment, if shorter) will satisfy the requirements of that section even if the plan determines an employee's benefit based on each year of service separately, using compensation separately calculated for each year, and sums the benefit for each year to determine the total retirement benefit.

6. *Calculating, restructuring, and testing most valuable accrual rates*

In order to establish nondiscrimination in the amount of benefits, the proposed regulations require a defined benefit plan not using a safe harbor to demonstrate that no highly compensated employee has a most valuable accrual rate that exceeds that of any nonhighly compensated employee in the plan. Many commentators have pointed out the difficulty some plans have in satisfying this requirement.

A number of factors contribute to this difficulty. First, in contrast to normal accrual rates, most valuable accrual rates are especially sensitive to differences in the demographic characteristics of individual employees. Second, the manner in which most valuable accrual rates are calculated—particularly under the annual method—tends to accentuate these differences. Third, under the proposed regulations, a plan cannot be restructured on the basis of most valuable accrual rates. Finally, if the plan is also tested for normal accrual rates and is restructured under the rate segment method, difficulties may be experienced when segments of the most valuable accrual rate are allocated to corresponding segments of the normal accrual rate.

Some of these difficulties stem from the use in the proposed regulations of the actuarial methods employed in Rev. Rul. 81-202, 1981-2 C.B. 93, and from the interaction of those actuarial methods with aspects of the proposed regulations that are entirely new. These issues are under active review by the Treasury and the Service, and both agencies are committed to their prompt resolution.

This document contains several changes that affect the calculation, restructuring, and testing of most valuable accrual rates. First, the proposed regulations are amended to permit a plan to freeze an employee's highest most valuable accrual rate for testing purposes. This modification is designed to prevent the decrease in an employee's most valuable accrual rate that otherwise occurs after the employee passes the age at which the maximum subsidy is provided under the plan. Second, the annual method is amended to prevent decreases in the most valuable accrual rate from resulting in negative rates of accrual. Third, as discussed in greater detail below, the restructuring rules are amended to permit restructuring on the basis of most valuable accrual rates and to permit sequential restructuring of normal and most valuable accrual rates.

The Treasury and the Service acknowledge that these amendments may not provide a complete solution to the difficulties described above. The agencies are therefore considering more comprehensive approaches to resolving these issues. Comments from interested taxpayers on these issues are welcomed.

7. *Restructuring generally*

The proposed regulations permit plans to be restructured into component plans that separately satisfy sections 401(a)(4) and 410(b). These rules are intended to permit employers to provide benefits under one plan that previously could have been provided only under multiple plans. The Treasury and the Service have determined that certain limitations in the proposed regulations on the use of restructuring are not necessary to accomplish this purpose and have therefore amended the proposed regulations to permit greater flexibility in restructuring in the manner described below. These amendments generally allow plans to be restructured under either of the two rate-based methods by reference to employees' most valuable retirement benefits (while retaining the existing restructuring alternatives based on normal retirement benefits), and to allow sequential restructuring using the same or, in certain cases, a different method. They do not permit inconsistent restructuring, under which different component plans are created depending on which benefits are being tested. Although some commentators have requested this rule, it is not compatible with the purposes of restructuring noted above.

The first amendment permits plans to be restructured on the basis of either normal or most valuable accrual or allocation rates under the total rates and rate segments methods. As originally issued, the proposed regulations require that the total rates and rate segments methods be applied only on the basis of normal accrual or allocation rates. This limitation may present a problem in those cases where the restructured plan must satisfy section 401(a)(4) with respect to both normal and most valuable accrual or allocation rates. Under defined benefit plans with features such as subsidized early retirement, a variety of most valuable accrual rates is generally associated with each level of normal accrual rates. The first amendment therefore lifts the prohibition on applying the total rates and rate segments methods on the basis of most valuable accrual or allocation rates. This amendment also has the effect of permitting defined benefit plans with uniform formulas that are subject to testing only on the basis of most valuable accrual rates to be restructured and tested on that same basis.

The second amendment permits sequential restructuring of plans. As originally issued, the proposed regulations prohibited more than one method of restructuring from being applied to a plan in any one plan year and also prohibited any one of these methods from being applied more than once in that year. This restriction made it difficult to restructure plans with complex benefit structures into component plans satisfying section 401(a)(4), even in cases where the same benefits could have been provided through separate plans that individually satisfied that section.

For example, an employer could have two defined benefit plans, one covering employees at plant X under a safe harbor formula (Plan X) and the other covering employees at plant Y under a formula that does not satisfy any of the safe harbors (Plan Y). Under the proposed regulations the employer could test Plan X under the applicable safe harbor and at the same time apply the total rate method of restructuring to test Plan Y under the general rules. If the two plans were combined, however, the employer would be forced to apply a single method of restructuring to the entire plan and to apply it only once. Thus, if the employer used the employee group method to restructure the plan into two component plans, one covering employees at plant X and the other covering employees at plant Y, the employer could take advantage of the safe harbor for the first component plan, but would not be able to test the second component plan using total rate restructuring. On the other hand, if the total rate method were used, the employer would have to apply that method to the whole plan and could not restructure out the first component plan under the employee group method to take advantage of the safe harbor.

The second amendment therefore generally permits component plans to be further restructured to the same extent as plans or aggregated plans. The requirements of sections 401(a)(4) and 410(b) are then applied to the smallest resulting component plans. For example, the plan described above could first be restructured into two component plans covering employees at plants X and Y respectively using the employee group method. The first component plan could then be tested under a safe harbor, while the second component plan could be further restructured using the total rate method. Furthermore, the total rate method could be applied more than once to the second component plan, so that, if the second component plan provided two levels of normal retirement benefits and two levels of most valuable benefits, the plan could be restructured first on the basis of employees' normal accrual rates into two new component plans providing the same normal retirement benefits. It could then be restructured further on the basis of employees'

most valuable accrual rates into a total of four new component plans, each providing the same normal and most valuable benefits to employees in that component and each satisfying the requirements of section 410(b).

As noted above, a number of commentators have also suggested that employers be permitted to use different component plans to satisfy section 401(a)(4) with respect to normal and most valuable accrual or allocation rates. Similarly, still different component plans could be used to test benefits, rights, and features. The proposed regulations do not permit inconsistent restructuring of this type because it would conflict with the objective of allowing a plan to be restructured only into components that would satisfy section 401(a)(4) if they were separate plans.

In addition to these amendments, the Treasury and the Service are considering a number of other amendments to the restructuring rules to make them simpler and easier to apply. For example, some commentators have suggested that the rules for allocating most valuable accrual rates among rate segments under the rate segments method need to be clarified. Another amendment that has been suggested to lessen complexity in the rate-based restructuring methods is the elimination of these methods altogether while, at the same time, significantly expanding the employee group method by eliminating certain limitations that currently apply to it, for example, the commonality requirement described in section 8 of this preamble and the reasonableness prong of the nondiscriminatory classification test under section 410(b). Comments are requested on these and other possible ways to simplify the restructuring rules.

8. *Restructuring plans subject to section 401(k) and (m)*

Although the proposed regulations permit plans subject to section 401(k) and (m) to be restructured on the basis of employee groups, these plans may not use the total rate or rate segment methods of restructuring. While the proposed regulations do not impose explicit requirements for determining permissible restructured employee groups, they do, by necessary inference, require that restructured employee groups share some common attribute other than that of a similar accrual or allocation rate. The restriction on the use of total rate or rate segment restructuring would be meaningless if the only common attributes shared by the employee group were similar accrual or allocation rates. Other elements of the restructuring rules also reflect the fact that the employee groups used under the employee groups methods differ from groups of employees with similar accrual or allocation rates. For example, although different definitions of compensation may be used to determine allocation or accrual rates within each employee group, the same definition of compensation must be used for all employees under the total rates and rate segments methods. Similarly, accrual or allocation rates may be grouped within separate employee groups, but must be grouped for all employees before creating component plans based on total rates or rate segments.

Common attributes that provide a basis for employee group restructuring include, for example, employment at the same work site or in the same job classification. Similarly, permissible common attributes arise where employees work for the same division or subsidiary, work for a unit acquired in a specific merger or acquisition, or have been hired during a specified period. Restructuring may also be done on the basis of employee groups whose common attribute is coverage under the same contribution or benefit formula. In contrast, employee classifications that are based on total rates or rate segments or are created solely because they produce results similar to the total rate or rate segment methods do not constitute employee groups. Thus, for example, the proposed regulations therefore do not allow plans subject to section 401(k) or (m) to be restructured into two component plans, one of which consists of employees deferring 5 percent or more of their compensation and the other consisting of all other employees. Similarly, plans cannot be restructured into components on the basis of whether employees made elective deferrals in the current or prior plan years.

A number of comments have requested clarification of the requirement that an employee group share common attributes. These comments have led the Treasury and the Service to consider whether the employee groups method may contain inherent uncertainties and may therefore be difficult to apply. Any such uncertainties would cause particular problems for plans subject to section 401(k) and (m), which cannot benefit from the restructuring rules unless they satisfy the commonality requirement. The comments also indicate that, without objective standards, the employee groups method may provide a means to circumvent the actual deferral and actual contribution percentage tests and may therefore be inconsistent with the statutory requirements applicable to these plans.

As a result of these comments, the Treasury and the Service believe that it may be appropriate to develop more objective limits on the ability to restructure plans subject to section 401(k) and (m). A number of options are under consideration, including the following: (1) prohibiting restructuring for plans subject to section 401(k) or (m); (2) prohibiting restructuring, but permitting an employer to disregard nonhighly compensated employees not needed to satisfy the 70 percent ratio test of section 410(b)(1)(B), or some higher level of coverage, in applying the actual deferral and actual contribution percentage tests; (3) requiring that employee groups be designated in advance in the plan document; and (4) defining more precisely the employee groups that can serve as the basis of component plans. It is anticipated that any such changes would also apply to plans that are restructured to satisfy the special age and service safe harbor in proposed §1.401(a)(4)-2(b)(3) or the alternative flat benefit safe harbor in proposed §1.401(a)(4)-3(b)(4). Comments are specifically requested on these and other possible limitations on plan restructuring.

In accordance with the preamble to the proposed regulations, any new limitations on restructuring of plans subject to section 401(k) and (m) or using the safe harbors cited above will apply only to plan years beginning after the date of publication of future regulations. Pending publication of future regulations, plans subject to section 401(k) and (m) and plans using the cited safe harbors may therefore continue to be restruc-

tured in the manner provided in the proposed regulations.

9. *Transitional rules for defined benefit plans*

Commentators have expressed interest in amending plans to satisfy the requirements of the defined benefit safe harbors in situations where plan benefits previously accrued under a nonuniform formula. In addition, commentators have requested rules permitting use of the defined benefit safe harbors in appropriate situations by plans with potentially nonuniform current accruals representing updates of pre-effective date accrued benefits to reflect compensation increases.

In response to these concerns, and in order to facilitate access to the defined benefit safe harbors, this document amends the proposed regulations to provide employers that wish to use safe harbor testing for existing defined benefit plans with several transition rule alternatives. These options, which are provided in §1.401(a)(4)-13(c), include approaches that freeze pre-effective date accrued benefits as well as approaches that disregard potentially nonuniform current accruals that result from the wear-away of benefits accrued under a prior formula or from compensation increases with respect to such prior accrued benefits. These transition rules focus on the immediate transition issues faced by plans with respect to the 1989, 1990 and 1991 plan years. Consideration is being given to the extent to which similar ongoing transition rules should be provided for subsequent plan amendments.

The same transition rules also apply for purposes of applying the annual method of determining accrual rates under §1.401(a)(4)-3(c)(3)(ii), as proposed on May 14, 1990. This modification makes it clear that an existing defined benefit plan may not use the annual method to disguise compensation updates of benefits accrued in prior years under a now frozen formula in a manner that discriminates in favor of highly compensated employees.

Amendments to Minimum Coverage Requirements

This document also amends proposed §1.410(b)-7 published on May 18, 1989 (54 FR 21437), and §1.410(b)-5 published on May 14, 1990 (55 FR 19897), to require that employee stock ownership plans ("ESOPs") be aggregated with other qualified plans of an employer in applying the average benefit percentage test of section 410(b)(2)(A)(ii) (the "average benefit percentage test"). At the same time, this document reaffirms the separate testing requirement for ESOPs for all other purposes under section 410(b) as well as for purposes of section 401(a)(4) and (5). In addition, this document clarifies the operation of the disaggregation rules under proposed §1.410(b)-7 generally.

1. *Separate Testing of ESOPs*

An ESOP is a qualified stock bonus plan, or a combination of a qualified stock bonus plan and a qualified money purchase pension plan, that is designed to invest primarily in employer securities and that meets the other requirements prescribed in the Code and regulations for recognition as an ESOP. The regulatory requirements applicable to recognition of a plan as an ESOP are set forth in final regulations under §54.4975-11. These regulations were proposed in 1976 and finalized in 1977 and 1978.

Section 54.4975-11(e)(1) of the regulations prohibits an ESOP from being considered together with any other plan for purposes of applying section 410(b) or section 401(a)(4) and (5). This separate testing requirement is intended to prevent an ESOP, except in very limited circumstances, from being aggregated with another plan to determine whether the employees covered under the ESOP (or the other plan) constitute a minimum coverage group under section 410(b), or to determine whether the ESOP (or the other plan) satisfies the nondiscrimination requirements of section 401(a)(4) and (5). Together with the other rules applicable to ESOPs (including the prohibition on integration with social security), the separate testing requirement furthers the Congressional purpose of encouraging widespread employee stock ownership through ESOPs. See H.R. Rep. No. 1280, 93d Cong., 2d Sess. 313 (1974) (Conference Report to the Employee Retirement Income Security Act of 1974). In the context of section 410(b), the separate testing requirement ensures that an ESOP covers a minimum coverage group without relying on any other plan and that other plans cover minimum coverage groups without relying on the ESOP. Congress explicitly endorsed the separate testing requirement for ESOPs in the Conference Report to the Tax Reform Act of 1976. H.R. Rep. No. 1515, 94th Cong., 2d Sess. 541 (1976).

The prohibition on considering an ESOP (including a tax credit employee stock ownership plan described in section 409 of the Code) with another plan for purposes of the minimum coverage rules is reflected in the proposed regulations under section 410(b) that were published on May 18, 1989. Section 1.410(b)-7(c)(2) provides that the portion of a plan that is an ESOP and the portion of the plan that is not an ESOP are treated as separate plans for purposes of section 410(b). Section 1.410(b)-7(e) specifically provides that ESOPs must separately satisfy the average benefit percentage test. Comments received on the proposed regulations under section 410(b) have questioned whether the separate testing requirement should apply under the average benefit percentage test in particular and under section 410(b) in general.

a. *Average benefit percentage test*

The Treasury and the Service have reexamined the application of the separate testing requirement under the average benefit percentage test in light of the requirement's purpose as well as the statutory language and legislative history of the average benefit percentage test. Based on this review, the Treasury and the Service have determined that existing law is best read as requiring the aggregation of ESOPs with all other qualified plans of the employer in performing the average benefit percentage test.

Under the law in effect prior to TRA '86, section 410(b) required a qualified plan to cover a group of employees described in former section 410(b)(1)(A) or (B). The tests set forth in those provisions were known respectively as the "percentage" test and the "nondiscriminatory classification" test. In TRA '86, Congress amended section 410(b) to replace the existing percentage tests with the per-

centage and ratio tests of current section 410(b)(1)(A) and (B) respectively. The 410(b) regulations published May 18, 1989, incorporate these two tests into the ratio percentage test of proposed §1.410(b)-2(b)-(2). In addition, Congress required that the average benefit percentage test be satisfied in order for a plan to be tested under the nondiscriminatory classification test in periods following the effective date of TRA '86. This latter requirement is reflected in current section 410(b)(2).

The ratio percentage test and the nondiscriminatory classification test focus on the group of employees covered under a plan and establish minimum criteria that the group must satisfy. In contrast, the average benefit percentage test does not describe a minimum group of employees that must be covered under a plan and imposes no direct restrictions on the group's composition. Instead, the test focuses on the relative level of contributions or benefits provided to highly and nonhighly compensated employees under all qualified plans of the employer. Under the test, all nonexcludable employees of the employer are taken into account, regardless of which plan they are covered under or, indeed, whether they are covered under any plan at all. In this sense, the average benefit percentage test is not a minimum coverage test. Rather, as described above, it is more properly viewed as a precondition to use of the nondiscriminatory classification test in periods following the effective date of TRA '86. Because the average benefit percentage test is not a minimum coverage test, the policy behind the separate testing requirement for ESOPs does not compel extending that requirement to the average benefit percentage test.

Furthermore, the statutory language and the legislative history to TRA '86 are best read as requiring the aggregation of ESOPs with all other qualified plans of the employer for purposes of the average benefit percentage test. Section 410(b)(2)(C) defines the benefit percentage used in the average benefit percentage test as the employer-derived contribution or benefit of an employee under "all qualified plans maintained by the employer." Section 410(b)(2)(E) in turn provides that the term "qualified plan" includes any plan that meets the requirements of section 401(a). In explaining how benefit percentages are calculated under the average benefit percentage test, the TRA '86 Conference Report states, "In no case may an employer disregard any qualified plan in determining benefit percentages." H.R. Rep. No. 841, 99th Cong., 2d Sess. II-414 (1986).

For the reasons set forth above, the Treasury and the Service have decided to reverse the position taken in the regulations proposed on May 18, 1989, and to eliminate the separate testing requirement for ESOPs for purposes of the average benefit percentage test. These proposed regulations therefore amend proposed §1.410(b)-7 to provide that ESOPs must be aggregated with all other plans of the employer for purposes of the average benefit percentage test. A conforming amendment is also made to the average benefit percentage test regulations under proposed §1.410(b)-5.

b. *Sections 401(a)(4), 401(a)(5), and other provisions of section 410(b)*

After carefully reviewing the relevant provisions in the statute, legislative history, and regulations, the Treasury and the Service have determined that Congress intended the separate testing requirement to continue to apply for all purposes under sections 410(b) and 401(a)(4) and (5) other than the average benefit percentage test. The Conference Report to TRA '86 indicates that Congress was well aware of the regulatory prohibition on considering an ESOP together with another plan for purposes of the nondiscrimination rules under sections 410(b) and 401(a)(4) and (5). See H.R. Rep. No. 841, 99th Cong., 2d Sess. II-411 n.1 (1986). Further, nowhere in the legislative history did Congress indicate any dissatisfaction with the separate testing requirement in §54.4975-11(e). Given the earlier explicit endorsement of the separate testing requirement in the Conference Report to the Tax Reform Act of 1976 and the explicit recognition of the requirement in the Conference Report to TRA '86, the Treasury and the Service have concluded that, for purposes other than the average benefit percentage test, it would be inconsistent with Congressional intent to permit an ESOP to be tested together with another plan except in the limited circumstances permitted under §54.4975-11(e). Thus, the proposed regulations under section 410(b) have not been amended to eliminate the separate testing requirement for ESOPs under the ratio percentage and nondiscriminatory classification tests.

2. *Clarification of disaggregation rules generally*

The Treasury and the Service have received inquiries about how the mandatory disaggregation rules of proposed §1.410(b)-7(c) apply to separate plans. This document clarifies that the rules apply not only to portions of the same plan but also to separate plans. Thus, two or more separate plans that would be subject to disaggregation if they were portions of the same plan cannot be aggregated. An analogous rule is provided under the mandatory aggregation rule of proposed §1.410(b)-7(e) for purposes of the average benefit percentage test.

This document also clarifies that the transition rule in proposed §1.410(b)-7(c)(2) provided for an ESOP that is a portion of a larger plan does not apply to an ESOP that is a separate plan. The transition rule was provided solely because some taxpayers had interpreted the regulations under §54.4975-11(e)(1) as not requiring the disaggregation of an ESOP that was a portion of a larger plan from other portions of the same plan. In contrast, no similar ambiguity existed regarding application of the separate testing requirement under §54.4975-11(e)(1) in the case of an ESOP that is a separate plan. Therefore, no transitional rule was needed for ESOPs that are separate plans.

Effective Date

The amended portions of the section 401(a)(4), 401(l), and 410(b) regulations are proposed to be effective as previously set forth in the prior notices of proposed rulemaking to which they relate. Solely for purposes of the mandatory aggregation of ESOPs with other plans of an employer for purposes of the average benefit percentage test, employers may choose to test ESOPs separately under that test for plan years beginning before January 1, 1991, in conformity with proposed §1.410(b)-7(e)

prior to its amendment by this document.

Consistent with the statement in the preamble to the proposed regulations that future regulations that are more restrictive will be applied prospectively, employers that meet the reasonable, good faith requirement of §1.401(a)(4)-13 for the 1989 and 1990 plan year by operating their plans in accordance with the proposed regulations as published on May 14, 1990, need not take into account for those years the transitional rules provided in proposed §1.401(a)(4)-13(c). However, the provisions of §1.401(a)(4)-13(c) are proposed to be effective for those plans for the first plan year beginning on or after January 1, 1991.

Reliance on These Proposed Regulations

Taxpayers may rely on these proposed regulations for guidance pending issuance of final regulations. If future regulations are more restrictive, such guidance will be applied without retroactive effect.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. Written comments must be received by November 13, 1990. All comments will be available for public inspection and copying in their entirety.

These regulations can be discussed at the public hearing concerning Nondiscrimination Requirements for Qualified Plans (EE-61-88), Miscellaneous Regulations for Qualified Plans (EE-22-90), Minimum Participation (EE-44-87), and Definition of Compensation (EE-129-86) proposed regulations that were published on May 14, 1990. The public hearing is scheduled for Wednesday, September 26, 1990, at 10:00 a.m., and continuing at 10:00 a.m. each day, if necessary, on Thursday, September 27, 1990, and Friday, September 28, 1990, in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Ave., N.W., Washington, D.C. Individuals who have requested to speak at that hearing do not need to submit a separate request, nor do they need to amend any previously submitted outline of oral comments in order to speak on this document at the hearing. If necessary, a separate additional hearing may be held on issues addressed in this document. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Comments on Previously Proposed Regulations

Although the preamble to the regulations proposed on May 14, 1990, requested that comments be submitted by July 13, 1990, the Treasury and the Service welcome additional comments. Individuals who have previously submitted comments are specifically encouraged to submit additional comments on the modifications contained in this document or to modify the comments they have already submitted. Comments submitted on these regulations, or on the regulations proposed on May 14, 1990, will be considered if they are received by November 13, 1990. The Treasury and the Service will also attempt to consider comments submitted after that date.

Employee benefit plans, Employee stock ownership plans, Income taxes, Individual retirement accounts, Pensions, Stock options.

Proposed Amendments to the Regulations

The notices of proposed rulemaking (to amend 26 CFR Part 1) that were published on May 18, 1989 (54 FR 21437), and May 14, 1990 (55 FR 19897 and 55 FR 19947), are amended as follows:

INCOME TAX REGULATIONS
(26 CFR Part 1)

Paragraph 1. The authority citation for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805.*** §§1.401(a)(4)-2, 1.401(a)(4)-3, and 1.401(a)(4)-9 also issued under 26 U.S.C. 401(a)(4), §1.401(l)-3 also issued under 26 U.S.C. 401(l) and §§1.410(b)-5 and 1.410(b)-7 also issued under 26 U.S.C. 410(b).

Par. 2. Section 1.401(a)(4)-2 as proposed on May 14, 1990 (55 FR 19911), is amended as follows:

1. Paragraphs (b)(2), (b)(3)(i), and (b)(3)(ii) are revised to read as set forth below.

2. Paragraph (b)(4) is added as set forth below.

3. Paragraphs (c)(2), (c)(5), (e)(1), and (f) are revised to read as set forth below.

§1.401(a)(4)-2 Nondiscrimination in amount of contributions.

* * * * *

(b) *Safe harbors for defined contribution plans****

(2) *Safe harbor for defined contribution plans with a uniform allocation formula.* A defined contribution plan satisfies this safe harbor if the plan allocates all amounts taken into account under paragraph (c)(2) of this section for the plan year under a single uniform formula that allocates the same percentage of compensation or the same dollar amount to every employee under the plan.

(3) *Safe harbor for defined contribution plans with a uniform allocation formula weighted for age or service.****

(i) The plan allocates all amounts taken into account under paragraph (c)(2) of this section for the plan year under a single uniform formula weighted for age or service. A single uniform formula weighted for age or service is one that would allocate to each employee in the plan the same percentage of compensation or the same dollar amount, if every employee in the plan had the same age and the same number of years of service or plan participation. Solely for purposes of this paragraph (b)(3)(i), a formula is deemed to allocate the

same percentage of compensation to each employee in the plan if the formula determines allocations under a weighing system that takes into account compensation in uniform increments no greater than $200 and that assigns the same weight to every increment. Thus, the dollar amount of allocations under a single uniform formula weighted for age or service may vary solely on account of compensation, age, years of service, or years of plan participation. The factors used to produce these variations must apply uniformly to all employees in the plan and must meet the effective availability requirement of §1.401(a)(4)-4.

(ii) The average of the allocation rates for highly compensated employees in the plan does not exceed the average of the allocation rates for nonhighly compensated employees in the plan. For this purpose, allocation rates are determined in accordance with paragraph (c) of this section, without taking into account the disparity permitted under paragraph (c)(4) of this section and §1.401(a)(4)-7, and without grouping allocation rates under paragraph (c)(5) of this section.

(4) *Use of safe harbors not precluded by certain plan provisions*—(i) *In general.* A plan does not fail to satisfy the requirements of paragraph (b)(2) or (b)(3) of this section merely because the plan contains a provision described in this paragraph (b)(4). Unless otherwise provided, the provision must apply uniformly to all employees in the plan.

(ii) *Section 409(n) limits.* The formula limits allocations to employees in accordance with section 409(n) (or section 1042(b)(3) of the Internal Revenue Code of 1954 as in effect immediately prior to the Tax Reform Act of 1986).

(iii) *Section 415 limits.* The formula limits allocations to employees in accordance with section 415.

(iv) *Certain other limits on allocations.* The formula limits allocations otherwise provided under the formula to a maximum dollar amount or a maximum percentage of compensation, or limits the amount of compensation or the number of years of service or plan participation taken into account in determining the amount of allocations. These limits must apply uniformly to all employees in the plan or, alternatively, to all highly compensated employees in the plan.

(v) *Certain conditions on allocations.* The formula provides that allocations to an employee for the plan year are conditioned on the employee's employment on the last day of the plan year or on the employee's completion of a minimum number of hours of service during the plan year (not to exceed 1,000).

(vi) *Section 401(l) permitted disparity.* The formula takes permitted disparity into account in a manner allowed under section 401(l), provided that every employee in the plan has the same integration level, the same base contribution percentage, and the same excess contribution percentage. For definitions of these terms, see §1.401(l)-1(b)(5), (b)(10), and (b)(11). This paragraph (b)(4)(vi) applies solely for purposes of paragraph (b)(2) of this section.

(vii) *Entry dates.* The plan provides one or more entry dates during the plan year in accordance with section 410(a)(4).

(viii) *Dollar allocation per hour of service.* Rather than determining allocations based on the same percentage of compensation or the same dollar amount, the formula determines allocations based on the same dollar amount per hour of service performed by each employee under the plan during the plan year.

(c) *General test for nondiscrimination in amount of contributions provided****

(2) *Allocations taken into account.* The amounts taken into account in determining allocation rates include all employer contributions and forfeitures that are treated as allocated to the account of an employee for the plan year, other than amounts listed in paragraph (c)(3) of this section. In the case of a defined contribution plan subject to section 412, the amount of employer contributions taken into account is the amount of employer contributions required to be allocated under the plan to the employee's account for the plan year, even if all or part of the required contribution is not actually made. For purposes of this paragraph (c)(3), amounts that would be treated as allocated to the account of an employee for the plan year but for the limits of section 409(n) (or section 1042(b)(3) of the Internal Revenue Code of 1954 as in effect immediately prior to the Tax Reform Act of 1986) are treated as allocated to the account of the employee.

* * * * *

(5) *Grouping of allocation rates.* An employer may treat all employees who have allocation rates within a range of no more than 5 percent (not 5 percentage points) above or below a midpoint rate chosen by the employer as having an allocation rate equal to that midpoint rate. If allocation rates are determined as a percentage of compensation, an employer may, as an alternative, treat all employees who have allocation rates within a range of no more than one-quarter of a percentage point above or below a midpoint rate chosen by the employer as having an allocation rate equal to that midpoint rate. Allocation rates within a given range may be grouped under this paragraph (c)(5) only if the allocation rates of highly and nonhighly compensated employees are dispersed throughout the range in a reasonably comparable manner and the range does not overlap with any other range chosen by the employer. An employer may choose to group the allocation rates of some employees into ranges and not to group the allocation rates of other employees into ranges, provided that the allocation rates of all employees within each range chosen by the employer are grouped within that range. If allocation rates are determined as a percentage of compensation, an employer may apply either grouping method described in this paragraph (c)(5) and, in addition, may apply one method with respect to one group of employees and the other method with respect to another group of employees, provided that only one method is applied with respect to any given employee or group of employees.

* * * * *

(e) *Alternative methods for satisfying this section*—(1) *In general.* A plan that is not subject to section 401(k) or (m) and that does not satisfy any of the tests in paragraph (b) or (c) of this section satisfies the requirements of this section if it does so using one or more of the alternative testing methods set forth in paragraphs (e)(2) through (4) of this section.

* * * * *

(f) *Period for determining compensation with respect to a plan year*—(1) *In general.* For purposes of this section, compensation for a plan year is determined by measuring compensation during any one of the periods described in paragraph (f)(2) through (4) of this section. Whichever period is selected must be applied uniformly to determine the compensation of every employee in the plan.

(2) *Plan year.* This period consists of the plan year.

(3) *Calendar year ending in plan year.* This period consists of the calendar year ending within the plan year.

(4) *Period of plan participation during the plan year.* This period consists of the portion of the plan year during which the employee is a participant in the plan. This rule may be used to determine compensation for the plan year in which participation begins, the plan year in which participation ends, or both. Selection of this period must be made on a reasonably consistent basis from plan year to plan year in a manner that does not discriminate in favor of highly compensated employees. Discrimination might arise, for example, where this period is selected in all plan years except a plan year in which a highly compensated employee enters the plan at midyear.

Par. 3. Section 1.401(a)(4)-3 as proposed on May 14, 1990 (55 FR 19912), is amended as follows:

1. Paragraphs (b)(2)(ii)(B), (b)(2)(iv), (b)(2)(v) Examples 3, 4, and 5, and (b)(3)(ii)(A) are revised to read as set forth below.

2. Paragraph (b)(3)(iii) is removed and paragraph (b)(3)(iv) is redesignated as (b)(3)(iii).

3. The last sentence of (b)(4) is revised to read as set forth below.

4. A new paragraph (b)(5) is added as set forth below.

5. Paragraphs (c)(3)(ii) and (c)(3)(v) are revised to read as set forth below.

6. A new paragraph (c)(3)(vii) is added as set forth below.

7. Paragraphs (e)(1), (f)(2)(i)(A), (f)(2)(ii) Introductory text, and (f)(7) are revised and in paragraph (f)(2)(ii) the current example is designated Example 1 and new Example 2 is added to read as set forth below.

§1.401(a)(4)-3 Nondiscrimination in amount of benefits.

* * * * *

(b) *Safe harbors for defined benefit plans with uniform formulas* * * *

(2) *Safe harbor for unit credit plans* ***

(ii) *Uniform unit credit formula* ***

(B) The benefit formula provides that the same dollar amount or the same percentage of compensation will be accrued for the current and subsequent plan years by all employees in the plan who have the same number of years of service credited under the plan for purposes of benefit accruals. In making this determination, the effect of the limits under section 415 is disregarded.

* * * * *

(iv) *Unit credit formula using fractional rule accrual.* A unit credit plan that provides that benefits are accrued under the fractional accrual rule of section 411(b)(1)(C) satisfies the requirements of this paragraph (b)(2) only if under the formula no employee in the plan can accrue, in any one year, more than 133⅓ percent of the benefit (expressed as a percentage of compensation or a dollar amount) that any other employee in the plan can accrue, disregarding employees with projected service in excess of 33 years. (Of course, employees with projected service in excess of 33 years are still taken into account for all other purposes, including the determination of whether all employees in the plan are subject to the same benefit formula.) Such a plan need not satisfy section 411(b)(1)(B) or paragraph (b)(2)(ii)(B) of this section. For purposes of the rule in this paragraph (b)(2)(iv), if a plan provides a disparity that by its terms satisfies section 401(l), an employee can be treated as accruing benefits either at the excess benefit percentage rate in the case of an excess plan or at the rate prior to reduction by the offset in the case of an offset plan. Section 1.401(l)-1(b) defines "excess plan," "offset plan," and "excess benefit percentage."

(v) *Examples.****

Example 3. Plan C provides for a benefit equal to 1.6 percent of compensation times each year of service up to 25. Plan C further provides that an employee's accrued benefit as of a given year equals the benefit projected as of normal retirement age multiplied by the ratio of the employee's years of service as of the year to the employee's projected years of service as of normal retirement age (i.e., the plan benefits accrue under the fractional rule of section 411(b)(1)(C)). The greatest benefit that an employee can earn in any one year is 1.6 percent of compensation (this is the case for any employee in the plan who will have 25 or fewer years of projected service at normal retirement age). The lowest benefit that will accrue for an employee in the plan with no more than 33 projected years of service is 1.212 percent (this is the case for any employee in the plan with 33 years of projected service under the formula). Since 1.6 percent is not more than 133⅓ percent of 1.212 percent, Plan C satisfies the rule in paragraph (b)(2)(iv) of this section.

Example 4. Plan D satisfies section 401(l) and provides for a benefit equal to 1.0 percent of compensation up to the integration level, and 1.6 percent of compensation over the integration level, times each year of service up to 35. Plan D further provides that an employee's accrued benefit as of a given year equals the benefit projected as of normal retirement age multiplied by the ratio of the employee's years of service as of the year to the employee's projected years of service as of normal retirement age (i.e., the plan benefits accrue under the fractional rule of section 411(b)(1)(C)). For purposes of satisfying the 133⅓ percent rule in paragraph (b)(2)(iv) of this section, all employees in the plan can be assumed to accrue benefits at the excess rate of 1.6 percent. Thus, the greatest benefit that an employee can earn in any one year is 1.6 percent of pay (this is the case for any employee in the plan who will have 35 or fewer years of projected service at normal retirement age). The lowest benefit that will accrue for an employee under the plan with no more than 33 projected years of service is 1.6 percent (this is the case of an employee in the plan with 33 years of projected service under the formula). Since 1.6 percent is not more than 133⅓ percent of 1.6 percent, Plan D satisfies the rule in paragraph (b)(2)(iv) of this section.

Example 5. Plan E provides for a benefit equal to 4 percent of compensation times each year of service up to 10 and 1 percent of compensation times each year of service in excess of 10 and not in excess of 30. Plan E further provides that an employee's accrued benefit as of a given year equals the benefit projected as of normal retirement age multiplied by the ratio of the employee's years of service as of the year to the employee's projected years of service as of normal retirement age (i.e., the plan benefits accrue under the fractional rule of section 411(b)(1)(C)). The greatest benefit that an employee can earn in any one year is 4 percent of compensation (this is the case for any employee who will have 10 or fewer years of projected service at normal retirement age). The lowest benefit that will accrue for an employee with no more than 33 projected years of service is 1.82 percent (this is the case of an employee with 33 years of projected service under the formula). Since 4 percent is more than 133⅓ percent of 1.82 percent, Plan E fails to satisfy the rule in paragraph (b)(2)(iv) of this section.

(3) *Safe harbor for flat benefit plans****

(ii) *Uniform flat benefit formula.* ***

(A) All employees in the plan are

subject to the same benefit formula providing the same flat benefit.

* * * * *

(4) *Alternative safe harbor for flat benefit plans.* * * * For purposes of this paragraph (b)(4), the normal accrual rate is determined in the same manner as under paragraph (c)(3)(ii) of this section, except that accrual rates may not be grouped under paragraph (c)(3)(v) of this section.

(5) *Use of safe harbors not precluded by certain plan provisions*—(i) *In general.* A plan does not fail to satisfy the requirements of paragraph (b)(2), (b)(3), or (b)(4) of this section merely because the plan contains a provision described in this paragraph (b)(5). Unless otherwise provided, the provision must apply uniformly to all employees in the plan.

(ii) *Pre-effective date accrued benefits.* The plan provides for benefits that were accrued in plan years beginning before the effective date applicable to the plan under §1.401(a)(4)-13(a) or (b) and that were accrued under a formula that does not satisfy any of the safe harbors in this paragraph (b). This paragraph (b)(5)(ii) applies solely to plans that satisfy the transitional rules of §1.401(a)(4)-13(c).

(iii) *Section 415 limits.* The formula limits accruals in accordance with section 415 or provides for increases in accrued benefits based solely on adjustments under section 415(d)(1) in the maximum benefit permitted under section 415(b)(1).

(iv) *Certain other limits on accruals.* The formula limits accruals to a maximum dollar amount or a maximum percentage of compensation, or limits the amount of compensation or the number of years of service or plan participation taken into account in determining the amount of accruals. The formula must apply these limits uniformly to all employees in the plan or, alternatively, all highly compensated employees in the plan.

(v) *Certain conditions on accruals.* The formula provides that accruals by an employee for the plan year are less than a full accrual (including a zero accrual) because of a plan provision permitted by section 411(b)(4) for employees who do not complete a full year of service.

(vi) *Section 401(l) permitted disparity.* The formula takes permitted disparity into account in a manner allowed under section 401(l).

(vii) *Entry dates.* The plan provides one or more entry dates during the plan year in accordance with section 410(a)(4).

(viii) *Dollar accrual per hour of service.* Rather than accruing the same percentage of compensation or the same dollar amount, each employee with the same number of years of service accrues the same dollar amount per hour of service performed by the employee during the plan year. This rule applies solely for purposes of paragraph (b)(2) of this section and solely with respect to a plan that satisfies the accrual rule of section 411(b)(1)(B) (the 133⅓ percent rule).

(c) *General test for nondiscrimination in amount of benefits provided* ***

* * * * *

(3) *Determining accrual rates****

(ii) *Annual accrual method*—(A) *In general.* Under the annual accrual method of determining the normal and most valuable accrual rates, the accrual rate for an employee in the plan for a plan year is the percentage amount (not less than zero) determined by subtracting:

(*1*) The employee's relevant benefit (i.e., normal retirement benefit or most valuable annuity) accrued as of the close of the prior plan year, expressed as a percentage of the employee's compensation as of the close of that prior year, from

(*2*) The employee's relevant benefit accrued as of the close of the plan year, expressed as a percentage of the employee's compensation as of the close of that year.

(B) *Requirements for plans with pre-effective date accrued benefits.* If a plan provides benefits that were accrued in plan years beginning before the effective date applicable to the plan under §1.401(a)(4)-13(a) and (b) and that were accrued under a formula that differs from the formula used to determine benefit accruals in the current plan year, the plan can determine an employee's accrual rate under paragraph (c)(3)(ii)(A) of this section only if the plan satisfies the transitional rules of §1.401(a)(4)-13(c). A plan described in the preceding sentence that does not satisfy those transitional rules can only determine the normal and most valuable annual accrual rate for an employee in the plan for the plan year as the percentage amount (not less than zero) determined by:

(*1*) Subtracting the employee's relevant benefit accrued as of the close of the prior plan year from the employee's relevant benefit accrued as of the close of the plan year, and

(*2*) Dividing this difference by the employee's compensation for the plan year.

(C) *Effect of past service credit.* In calculating the relevant accrued benefit as of the close of the plan year, amounts attributable to a past service credit described in §1.401(a)(4)-5(b)(1) are not taken into account. Of course, the past service credit must satisfy the requirements of §1.401(a)(4)-5.

* * * * *

(v) *Grouping of accrual rates.* An employer may treat all employees who have accrual rates within a range of no more than 5 percent (not 5 percentage points) above or below a midpoint rate chosen by the employer as having an accrual rate equal to that midpoint rate. If accrual rates are determined as a percentage of compensation, an employer may, as an alternative, treat all employees who have accrual rates within a range of no more than one-twentieth of a percentage point above or below a midpoint rate chosen by the employer as having an accrual rate equal to that midpoint rate. Accrual rates within a given range may be grouped under this paragraph (c)(3)(v) only if the accrual rates of highly and nonhighly compensated employees are dispersed throughout the range in a reasonably comparable manner and the range does not overlap with any other range chosen by the employer. An employer may choose to group the accrual rates of some employees into ranges and not to group the accrual rates of other employees into ranges, provided that the accrual rates of all employees within each range chosen by the employer are grouped within that range. If accrual rates are determined as a percentage of compensation, an employer may use either grouping method described in this paragraph (c)(3)(v) and, in addition, may use one method with respect to one group of employees and the other method with respect to another group of employees, provided

that only one method is used with respect to any given employee or group of employees.

* * * * *

(vii) *Floor on most valuable accrual rate.* The most valuable accrual rate of an employee calculated under the three methods in this paragraph (c)(3) may, at the option of the employer, be calculated for all employees under the plan using the rule described in this paragraph (c)(3)(vii). An employee's most valuable accrual rate for any year is not less than the highest most valuable accrual rate for that employee in any prior year, provided that the decrease in the employee's most valuable accrual rate in years subsequent to that prior year results merely from an increase in the employee's age. This paragraph (c)(3)(vii) is illustrated by the following example:

Example. Plan X provides normal retirement benefits of 1 percent per year of service at age 65 and unreduced retirement benefits for employees who attain age 55 with 30 years of service. The plan determines accrual rates under the accrued to date method. Employee A was hired at age 25, and Employee B was hired at age 26. Employee A's and Employee B's most valuable accrual rate would therefore be determined at ages 55 and 56, respectively. Under the rule in this paragraph (c)(3)(vii), Plan X may treat Employee A's most valuable accrual rate determined in the year when A is age 55 as A's most valuable accrual rate in subsequent years. Similarly, Employee B's most valuable accrual rate determined when B is age 56 may be used in subsequent years.

* * * * *

(e) *Alternative methods for satisfying this section*—(1) *In general.* A plan that does not satisfy any of the tests in paragraph (b) or (c) of this section satisfies the requirements of this section if it does so using one or more of the alternative testing methods set forth in paragraphs (e)(2) through (5) of this section.

* * * * *

(f) *Special rules****

(2) *Compensation formulas*—(i) *Special rule.* In general, a compensation formula satisfies the requirements of this paragraph (f)(2) if:

(A) The formula bases benefits on compensation for a period of at least 3 consecutive years or 3 consecutive 12-month periods (or the employee's period of employment, if shorter), or the formula determines an employee's benefit based on each year of service separately, using compensation separately calculated for each year, and sums the benefit for all years to determine the total retirement benefit.

* * * * *

(ii) *Examples.* The special rule of this paragraph (f)(2) is illustrated by the following examples:

*Example 1.****

Example 2. Plan B is a career average pay plan that bases an employee's benefit for each plan year on compensation earned within that plan year. Thus, an employee's total accrued benefit under the plan is equal to the sum of the benefits accrued in each individual plan year that the employee is a participant in the plan. Because the employee's total accrued benefit under the plan equals the sum of benefits computed separately for each plan year based on compensation for that year, the plan satisfies the requirements of paragraph (f)(2) of this section.

* * * * *

(7) *Computation of compensation on other than plan year basis*—(i) *In general.* For purposes of this section, compensation is generally determined based on the plan year, except as otherwise provided in paragraph (f)(7)(ii) of this section. Nevertheless, an employer may, but need not, determine compensation on the basis of any consecutive period ending within the plan year as long as it is at least 12 months in duration and is used uniformly for all employees in the plan for that plan year. Any 12 month period permitted under the rules of this paragraph (f)(7) can be used for purposes of satisfying the requirements of paragraph (f)(2) of this section provided the formula bases benefits on a total period of compensation that satisfies the duration requirements of paragraph (f)(2) of this section.

(ii) *Special rule for highest average pay plans.* A definition of compensation will satisfy the requirements of paragraphs (f)(2)(i)(A) and (f)(7) of this section if it provides that the accruals for all employees are based on an employee's highest compensation determined over a specified period (e.g., a final average pay plan that bases benefits for an employee on the average of the employee's highest 3 consecutive years' compensation), even though the period of highest compensation does not end within the plan year. This rule may be used only if the highest paid period includes at least 36 consecutive months (or the employee's period of employment, if shorter) and, in determining an employee's highest years of compensation, the 12-month period ending within the plan year is taken into account. The rules in this paragraph (f)(7)(ii) are illustrated by the following example:

Example. Plan M is a final average pay plan that bases benefits for all employees on the average of each employee's high 3 consecutive calendar years' compensation. The plan year is a fiscal year from July 1 to June 30. In determining an employee's high 3 years, the plan takes into account compensation earned in all calendar years including the calendar year ending within the plan year. Employee A, who was hired on January 1, 1990, has compensation for calendar years 1990 through 1994 of $100,000, $130,000, $100,000, $90,000 and $90,000, respectively. Therefore, for the plan year beginning July 1, 1994, Employee A's high 3-year average is the average of the compensation earned in 1990, 1991 and 1992 ($110,000). The definition of compensation satisfies the requirements of paragraph (f)(7)(i) of this section because, even though Employee A's benefit accrual is based on compensation for a period not ending within the plan year, the plan formula took into account compensation ending within the plan year in determining A's 3 highest years of compensation.

Par. 4. §1.401(a)(4)-9, as proposed on May 14, 1990 (55 FR 19926) is amended as follows:

1. Paragraphs (d)(2)(i)(B) and (d)(2)(i)(C) are revised to read as set forth below.

2. Paragraphs (d)(2)(ii) through (d)(2)(v) are redesignated as paragraph (d)(2)(iii) through (d)(2)(vi).

3. A new paragraph (d)(2)(ii) is added to read as set forth below.

4. Redesignated paragraphs (d)(2)(iii), (d)(2)(iv) and (d)(2)(v) are revised to read as set forth below.

5. Paragraph (d)(3) is revised to read as set forth below.

§1.401(a)(4)-9 Definition of a plan, plan aggregation, and restructuring.

* * * * *

(d) *Plan restructuring****

(2) *Identification of component plans*—(i) *Permissible bases for restructuring****

* * * * *

(B) *Total rates.* A plan or aggregated plan (other than a plan subject to section 401(k) or (m)) may be restructured into component plans, each consisting of normal accrual or allocation rates equal to a different specified rate (or within a different specified range), and all benefits, rights, and features provided under the plan or aggregated plan to employees having normal accrual or allocation rates equal to the specified rate (or within the specified range). Alternatively, a plan or aggregated plan (other than a

plan subject to section 401(k) or (m)) may be restructured into component plans, each consisting of most valuable accrual or allocation rates equal to a different specified rate (or within a different specified range) and all normal retirement benefits and other benefits, rights and features provided under the plan or aggregated plan to employees having most valuable accrual or allocation rates equal to the specified rate (or within the specified range). An employee can be included in only one such component plan. Further, a component plan consisting of rates equal to a specified rate (or within a specified range) must include all the rates equal to the specified rate (or all rates within the specified range) under the plan or aggregated plan. Thus, for example, a plan benefiting employees A and B, both of whom have 1 percent normal accrual rates, cannot be restructured under this method into one component plan containing A's 1 percent rate and another containing B's 1 percent rate.

(C) *Rate segments.* A plan or aggregated plan (other than a plan subject to section 401(k) or (m)) may be restructured into component plans, each consisting of a different incremental segment of employees' normal accrual or allocation rates, the associated most valuable accrual or allocation rates, and all associated benefits, rights, and features. Alternatively, a plan or aggregated plan may be restructured into component plans, each consisting of a different incremental segment of employees' most valuable accrual or allocation rates, the associated normal accrual or allocation rates, and all associated benefits, rights and features. An employee can be included in more than one such component plan, but only with respect to different incremental segments of the employee's total rate under the plan or aggregated plan. Incremental segments are not permitted to overlap, and a component plan consisting of a specified incremental segment of employees' accrual or allocation rates must include this segment of all employees' rates. Thus, for example, a plan under which employees A, B, and C have normal accrual rates of 1, 1, and 2 percent, respectively, may not be restructured under this method into one component plan containing A's 1 percent rate and the first 1 percent of C's rate, and another competent plan containing B's 1 percent rate and the remaining 1 percent of C's rate.

* * * * *

(ii) *Sequential restructuring.* A component plan identified under one of the methods in paragraph (d)(2)(i) of this section may be further restructured into smaller component plans, to the same extent as a plan or aggregated plan, using the same method. In addition, one or more component plans created using the employee group method (other than a plan subject to section 401(k) or (m)) may be further restructured using the total rate or rate segment methods. If component plans are restructured in this manner, the requirements of section 401(a)(4) are applied, pursuant to paragraph (d)(1) of this section, to the smallest resulting component plans rather than to any intermediate component plans.

(iii) *Consistency rules.* A portion of a plan that is treated as part of one component plan for a plan year may not be treated as part of another component plan for the same plan year. For purposes of this paragraph (d)(2)(iii), only the ultimate component plans into which a plan or aggregated plan is restructured are taken into account. Thus, intermediate component plans that are further restructured into smaller component plans pursuant to paragraph (d)(2)(ii) are ignored.

(iv) *Application of grouping rules.* If the grouping rules in §1.401(a)(4)-2(c)(5) or 1.401(a)(4)-3(c)(3)(v) are used in combination with the employee group method in paragraph (d)(2)(i)(A) of this section, the grouping rules can be applied only after restructuring. If the grouping rules are used in combination with the total rate or rate segment method in paragraph (d)(2)(i)(B) or (C) of this section, the grouping rules can be applied only before restructuring. In no event may the grouping rules be applied more than once to any portion of a plan or aggregated plan restructured under this paragraph (d).

(v) *Application of uniformity requirement for definitions of compensation.* The uniformity requirement applicable to the definition of compensation under §1.401(a)(4)-12(a) and to a compensation formula under §§1.401(a)(4)-2(f), 1.401(a)(4)-3(f)(2)-(i)(B), and 1.401(a)(4)-3(f)(7) is applied only after restructuring in the case of a plan or aggregated plan that uses the employee group method of paragraph (d)(2)(i)(A) of this section, and only before restructuring in the case of a plan or aggregated plan that uses the total rate or rate segment method of paragraph (d)(2)(i)(B) or (C) of this section. The same rule applies for purposes of the consistency rule of §1.414(s)-1T(b).

* * * * *

(3) *Satisfaction of section 401(a)(4) by a component plan.* The rules applicable in determining whether a component plan satisfies section 401(a)(4) are the same as those applicable to a plan or aggregated plan, except as provided in paragraph (d)(2) of this section. Thus, for example, in the case of a defined benefit plan, the normal and most valuable benefits tested under §1.401(a)(4)-3 must generally be separately identified with respect to each component plan. However, if a defined benefit plan has a uniform formula, as described in §1.401(a)(4)-3(c)(1)(ii), only the most valuable benefits tested under §1.401(a)(4)-3(c)(1)(ii) need be separately identified with respect to each component plan. Similarly, a component plan that consists of a uniform formula under a defined benefit plan that satisfies one of the safe harbors in §1.401(a)(4)-3(b) may be tested under the safe harbor, even if the other component plans are tested under the general test of §1.401(a)(4)-3(c). Further, if a component plan includes portions of two plans, the special rules for aggregated plans in paragraph (c) of this section must be satisfied.

* * * * *

Par. 5. Section 1.401(a)(4)-13, as proposed on May 14, 1990 (55 FR 19930), is amended by adding new paragraph (c) to read as follows:

§1.401(a)(4)-13 Effective dates.

* * * * *

(c) *Transitional rules for certain defined benefit plans—(1) In general.* For purposes of the defined benefit safe harbors and the annual accrual method referred to in §1.401(a)(4)-3(b)(5)(ii) and (c)(3)(ii)(B), respectively, a defined benefit plan satisfies the transitional rules of this paragraph (c) if it satisfies either paragraph (c)(2),

(c)(3), or (c)(4) of this section with respect to the treatment of pre-effective date accrued benefits. Certain definitions applicable for purposes of this paragraph (c) are provided in paragraph (c)(6) of this section.

(2) *Section 401(l) plans.* A defined benefit plan satisfies this paragraph (c)(2) if the plan satisfies section 401(l), including the effective date and transition rules of §1.401(l)-3(l). In addition, if the plan is adjusting accrued benefits under §1.401(l)-3(l)-(7), then the plan must provide meaningful coverage as of the close of the freeze year and meaningful benefit accruals in the current plan year.

(3) *Non-section 401(l) plans that freeze all pre-effective date accrued benefits.* A defined benefit plan not satisfying section 401(l) satisfies this paragraph (c)(3) if the plan freezes all pre-effective date accrued benefits in accordance with one of the formulas set forth in paragraph (c)(5) of this section.

(4) *Non-section 401(l) plans that provide current accruals with respect to pre-effective date accrued benefits.* A defined benefit plan not satisfying section 401(l) satisfies this paragraph (c)(4) if:

(i) The plan provides meaningful coverage as of the close of the freeze year;

(ii) The plan provides meaningful benefit accruals in the current plan year;

(iii) The plan provides current accruals with respect to pre-effective date accrued benefits solely in accordance with one of the formulas set forth in paragraph (c)(5) of this section;

(iv) As of May 9, 1990 (or an earlier date selected by the employer but not before December 13, 1988), and without regard to any amendments to the plan adopted after that date, the plan contained a benefit formula under which increases in an employee's pre-effective date accrued benefits would have been determined by reference to the employee's compensation in plan years beginning after the close of the freeze year;

(v) For purposes of §1.401(a)(4)-3(b), if applicable, the formula used to determine benefit accruals in the current plan year does not take into account the disparity permitted under section 401(l); and

(vi) For purposes of determining accrual rates under §1.401(a)(4)-3(c)-(3)(ii), if applicable, the plan does not take into account the disparity permitted under §1.401(a)(4)-7 unless the plan makes the minimum benefit adjustment set forth in paragraph (c)(6)(ii) of this section.

(5) *Formulas for plans that do not satisfy section 401(l)*—(i) *In general.* For purposes of paragraph (c)(3) and (c)(4) of this section, an employee's accrued benefit under the plan must be determined as of the first plan year beginning after the freeze year under one of the formulas set forth in paragraph (c)(5)(ii), (iii), or (iv) of this section. The same formula must be adopted in accordance with paragraph (c)(3) or (c)(4) of this sec-tion and must be applied with respect to all employees who have pre-effective date accrued benefits under the plan and who have at least one hour of service with the employer in a plan year beginning after the freeze year. For this purpose, two or more plans are treated as a single plan if they are aggregated and treated as a single plan for purposes of sections 401(a)(4) and 410(b). Solely for purposes of paragraph (c)(4) of this section, these formulas are applied by substituting the employee's "adjusted accrued benefit" for the employee's "frozen accrued benefit."

(ii) *Formula without wear-away.* An employee's accrued benefit under the plan is equal to the sum of:

(A) The employee's frozen accrued benefit, and

(B) The employee's accrued benefit determined under the formula applicable to benefit accruals in the current plan year as applied to years of credited service after the freeze year.

(iii) *Formula with wear-away.* An employee's accrued benefit under the plan is equal to the greater of:

(A) The employee's frozen accrued benefit, or

(B) The employee's accrued benefit determined under the formula applicable to benefit accruals in the current plan year as applied to the employee's total years of credited service for the employer.

(iv) *Formula with extended wear-away.* An employee's accrued benefit under the plan is equal to the greater of:

(A) The sum determined under paragraph (c)(5)(ii) of this section, or

(B) The employee's accrued benefit determined under the formula applicable to benefit accruals in the current plan year as applied to the employee's total years of credited service for the employer.

(6) *Definitions*—(i) *In general.* In addition to the definitions set forth in §1.401(a)(4)-12, the following definitions apply for purposes of this paragraph (c) and §1.401(a)(4)-3(b)(5)(ii) and (c)(3)(ii)(B).

(ii) *Adjusted accrued benefit*—(A) *General rule.* The term "adjusted accrued benefit" means an employee's frozen accrued benefit multiplied by a fraction (not less than 1) determined under one of the following methods that is the same for every employee in the plan:

(*1*) The numerator is the employee's compensation for the current plan year determined under the compensation definition used to determine the frozen accrued benefit (subject to section 401(a)(17)), and the denominator is the employee's compensation for the freeze year determined under the same compensation definition used for the numerator;

(*2*) The numerator is the employee's compensation for the current plan year determined under a compensation definition that satisfies §1.401(a)(4)-3(f)(2), and the denominator is the employee's compensation for the freeze year determined under the same compensation definition used for the numerator; or

(*3*) The numerator is the employee's compensation for the current plan year determined under a compensation definition that satisfies §1.401(a)(4)-3(f)(2), and the denominator is the employee's reconstructed compensation for the freeze year.

If a plan makes a minimum benefit adjustment for purposes of paragraph (c)(4)(vi) of this section, an employee's frozen accrued benefit is first adjusted in the same manner as provided in §1.401(l)-3(l)(7)(ii)(C) and then multiplied by the fraction determined under one of the preceding methods.

(B) *Permissible compensation definitions.* Any compensation definition used for purposes of this paragraph (c)(6)(ii) must be the same for every employee with pre-effective date ac-

crued benefits under the plan. The definition may, but need not, be the same as the compensation definition used in the current plan year for other purposes under section 401(a)(4).

(C) *Option to make less than the full permitted adjustment.* In lieu of the adjustment described in the first sentence of paragraph (c)(6)(ii)(A) of this section (and, if applicable, after the minimum benefit adjustment described in the last sentence of that paragraph has been made), the frozen accrued benefit of every employee in the plan may be increased by adding to the frozen accrued benefit the product determined by multiplying the frozen accrued benefit by the product of two percentages. The first percentage is the single percentage designated in the plan for this purpose (not to exceed 100 percent). The second percentage is determined by finding the difference between the numerator and the denominator of the fraction determined for the employee under one of the methods described in the first sentence of paragraph (c)(6)(ii)(A) of this section and then by dividing that difference by the denominator of the employee's fraction. In addition, a plan may impose a uniform maximum dollar amount on the adjusted accrued benefit of every employee in the plan. Furthermore, the plan can, at any time, terminate all future adjustments permitted under this paragraph (c)(6)(ii).

(iii) *Benefit accruals in the current plan year.* The term "benefit accruals in the current plan year" means benefit accruals in the current plan year other than increases in pre-effective date accrued benefits.

(iv) *Freeze year.* The term "freeze year" means the last plan year in which pre-effective date accrued benefits were accrued under the plan. Notwithstanding the preceding sentence, for purposes of paragraph (c)(2) of this section, the term "freeze year" means the last plan year beginning before January 1, 1989 (or, in the case of a collectively bargained plan, the applicable effective date under section 401(l)).

(v) *Frozen accrued benefit.* The term "frozen accrued benefit" means an employee's accrued benefit under the plan determined as of the close of the freeze year, as if the employee terminated employment with the employer on that date, and without regard to any amendment to the plan adopted after May 9, 1990 (or an earlier date selected by the employer but not before December 13, 1988). For this purpose, service for the employer after the date on which the employee is deemed to have terminated employment is nonetheless still taken into account for purposes of vesting and determining eligibility for benefits (including any optional form of benefit) with respect to the frozen accrued benefit. In addition, the plan may provide for increases in the frozen accrued benefit of every employee in the plan based solely on the adjustments under section 415(d)(1) in the maximum benefit permitted under section 415(b)(1). Notwithstanding the preceding three sentences, for purposes of paragraph (c)(2) of this section, the term "frozen accrued benefit" means the frozen accrued benefit as defined in §1.401(l)-3(l)(7)(ii)(B).

(vi) *Meaningful benefit accruals in the current plan year.* The term "meaningful benefit accruals in the current plan year" means benefit accruals in the current plan year that are meaningful in comparison to the rate at which pre-effective date accrued benefits accrued in the freeze year and preceding plan years.

(vii) *Meaningful coverage as of the close of the freeze year.* A plan provides meaningful coverage as of the close of the freeze year if the group of employees with frozen accrued benefits under the plan as of the close of the freeze year satisfies the minimum coverage requirements of section 410(b) as in effect on that date (including the average benefit percentage test, if applicable). In order to satisfy the requirement in the preceding sentence, an employer can amend the plan to grant past service credit under the formula in effect as of the close of the freeze year to nonhighly compensated employees, provided that the amount of past service granted them is reasonably comparable, on average, to the amount of past service highly compensated employees have under the plan. An amendment described in the preceding sentence is not considered as adopted after May 9, 1990 (or the earlier date selected by the employer), for purposes of paragraph (c)(4)(iv) or (c)(6)(v) of this section. Benefits granted nonhighly compensated employees under the amendment are also treated as pre-effective date accrued benefits for purposes of paragraph (c)(6)(viii) of this section.

(viii) *Pre-effective date accrued benefits.* The term "pre-effective date accrued benefits" means benefits that were accrued in plan years beginning before the effective date applicable to the plan under paragraph (a) or (b) of this section and that were accrued under a formula that is different from the formula used to determine benefit accruals in the current plan year.

(ix) *Reconstructed compensation for the freeze year.* The term "reconstructed compensation for the freeze year" means an employee's compensation for the freeze year determined under the following method in the same manner for every employee in the plan: First, select a single plan year beginning after the close of the freeze year but beginning not later than December 31, 1991; second, determine the employee's compensation for the selected plan year under the same compensation definition used to determine the employee's compensation for the current plan year under paragraph (c)(6)(ii)(A)(3) of this section; third, multiply the employee's compensation for the selected plan year by a fraction, the numerator of which is the employee's compensation for the freeze year determined under the same compensation definition used to determine the employee's frozen accrued benefit, and the denominator of which is the employee's compensation for the selected plan year determined under the compensation definition used to determine the employee's frozen accrued benefit.

Par. 6. Section 1.401(l)-3, as proposed on November 15, 1988 (53 FR 45928), and amended on May 14, 1990 (55 FR 19953), is amended by revising paragraphs (l)(7)(i), (l)(7)(ii)-(C), and (l)(7)(ii)(D)(2), and adding new paragraphs (l)(7)(ii)(D)(3) and (l)(8) to read as follows:

§1.401(l)-3 Permitted disparity with respect to employer-derived benefits.

* * * * *

(l) *Effective dates and transitional rules****

(7) *Special rule*—(i) *In general.* A plan that satisfies the requirements of paragraph (l)(7)(iii) of this section will

not fail to satisfy the requirements of paragraph (l)(1) of this section solely because, for purposes of applying paragraphs (l)(2), (3), and (4) of this section, the plan uses the adjusted accrued benefit calculated under paragraph (l)(7)(ii) of this section in lieu of the participant's accrued benefit, determined under the plan as of the close of the last plan year beginning before January 1, 1989, as if the participant terminated employment with the employer.

(ii) *Calculation of adjusted accrued benefit****

(C) *Minimum benefit adjustment*—(1) *Excess or offset plans.* In the case of an excess plan, each employee's frozen accrued benefit is adjusted so that the base benefit percentage is not less than 50 percent of the excess benefit percentage. In the case of an offset plan, each employee's offset applied to determine the frozen accrued benefit is adjusted so that it does not exceed 50 percent of the benefit determined without regard to application of the offset.

(*2*) *Other plans.* In the case of a plan that is neither an excess nor an offset plan, each employee's frozen accrued benefit is adjusted in a manner that is economically equivalent (taking into account the plan's benefit formula, accrual rate, and relevant employee factors, such as period of service) to the adjustment required for excess and offset plans under paragraph (l)(7)(ii)(C)(1) of this section.

(D) *Final pay adjustment****

(*2*) *Alternative adjustment.* In lieu of the adjustment described in paragraph (l)(7)(ii)(D)(*1*) of this section, and after the minimum benefit adjustment described in paragraph (l)(7)(ii)(C) of this section has been made, the frozen accrued benefit of every employee under the plan may be increased in the same manner as provided in §1.401(a)(4)-13(c)(6)(ii)-(A)(2) or (3) for adjusting accrued benefits for plans that do not satisfy section 401(l).

(*3*) *Option to make less than the full permitted adjustments.* In lieu of the adjustment described in paragraph (l)(7)(ii)(D)(1) of this section and after the minimum benefit adjustment described in paragraph (l)(7)(ii)(C) of this section has been made, the frozen accrued benefit of every employee in the plan may be increased by adding to the frozen accrued benefit the product determined by multiplying the frozen accrued benefit by the product of two percentages. The first percentage is the single percentage designated in the plan for this purpose (not to exceed 100 percent). The second percentage is determined by finding the difference between the numerator and the denominator of the fraction determined for the employee under paragraph (l)(7)(ii)(D)(1) and then by dividing that difference by the denominator of the employee's fraction. In addition, a plan may impose a uniform maximum dollar amount on the adjusted accrued benefit of every employee in the plan. Furthermore, the plan can, at any time, terminate all future final pay adjustments permitted under this paragraph (l)(7)(ii)(D).

* * * * *

(8) *Additional rule.* Paragraphs (l)(2), (3), and (7) of this section require the determination of an employee's accrued benefit under the plan as of the close of the last plan year beginning before January 1, 1989, as if the employee terminated employment with the employer on that date (the employee's "frozen accrued benefit" as defined in paragraph (l)(7)(ii)(B) of this section). For this purpose, service with the employer after the date on which the employee is deemed to have terminated employment is nonetheless still taken into account for purposes of vesting and determining eligibility for benefits (including any optional form of benefit) with respect to the accrued benefit so determined. In addition, a plan may provide for increases in those accrued benefits based solely on adjustments under section 415(d)(1) in the maximum benefit permitted under section 415(b)(1).

Par. 7. Section 1.410(b)-5(d), as proposed on May 14, 1990 (55 FR 19931), is amended by revising the second sentence of paragraph (d)(1) to read as follows:

§1.410(b)-5 Average benefit percentage test.

* * * * *

(d) *Calculation of employee benefit percentages*—(1) *In general.**** These rules are generally the same as the rules used for calculating allocation and accrual rates under an aggregated plan under section 401(a)(4), except that plans (or portions of plans) that are ESOPs or that are subject to section 401(k) or (m) are taken into account.***

* * * * *

Par. 8. Section 1.410(b)-7, as proposed on May 18, 1989 (54 FR 21448), is amended by revising paragraphs (c)(2), (d)(1), (d)(2), (e)(1), and (e)(2) to read as follows:

§1.410(b)-7 Definition of plan and rules governing plan disaggregation and aggregation.

* * * * *

(c) *Mandatory disaggregation of certain plans* * * *

(2) *ESOPs and non-ESOPs.* The portion of a plan that is an employee stock ownership plan described in section 4975(e)(7) or section 409 (an ESOP) and the portion of the plan that is not an ESOP are treated as separate plans for purposes of section 410(b) except as otherwise permitteddunder §54.4975-11(e). Notwithstanding §§1.410(b)-10 and 54.4975-11(a)-(5), an employer may treat the rule in this paragraph (c)(2) as not effective for plan years beginning before January 1, 1990.

* * * * *

(d) *Permissive aggregation for ratio percentage and nondiscriminatory classification tests*—(1) *In general.* For purposes of applying the ratio percentage and nondiscriminatory classification tests of §1.410(b)-2, except as provided in paragraphs (d)(2) and (d)(3) of this section, an employer may elect to designate two or more separate plans (determined after application of paragraph (b) of this section) of the employer as a single plan. If an employer elects to treat two or more of its separate plans as a single plan under this paragraph, the plans must be treated as a single plan for all purposes under sections 401(a)(4) and 410(b). See §§1.401(k)-1(b)(5)(i) and 1.401(m)-1(b)(4)(i) for special aggregation rules applicable to plans subject to section 401(k) or (m) and related plans that are treated as part of the same plan for purposes of those sections.

(2) *Rules of disaggregation apply.* An employer cannot elect to aggregate portions of a plan that are disaggregated under the rules of paragraph (c) of this section. Similarly, an employer also cannot elect to aggregate two or more separate plans that would be disaggregated under the

rules of paragraph (c) of this section if they were portions of the same plan. (For purposes of the preceding sentence, the special transitional rule in paragraph (c)(2) of this section does not apply.) In addition, an employer cannot elect to aggregate an ESOP with another plan (including another ESOP) except as permitted under §54.4975-11(e).

* * * * *

(e) *Mandatory aggregation for average benefit percentage test*—(1) *In general.* In determining whether a plan satisfies §1.410(b)-2(b)(3), it is necessary to determine whether the average benefit percentage test of §1.410(b)-5 is satisfied. For purposes of applying the average benefit percentage test, all qualified plans of the employer must be taken into account to form a deemed single plan, including plans (or portions of plans) that are ESOPs or that are subject to section 401(k) or (m).

(2) *Rules of disaggregation.* Once all qualified plans of the employer have been aggregated to form a deemed single plan under paragraph (e)(1) of this section, that deemed single plan must be disaggregated under the rules in paragraphs (c)(1), (c)(5), and (c)(6) of this section and may, at the option of the employer, be disaggregated under the rules of paragraph (c)(4) of this section. Each deemed separate plan that includes a plan (or a portion of a plan) that does not satisfy the ratio percentage test of §1.410(b)-2(b)(2) must separately satisfy the average benefit percentage test of §1.410(b)-5.

Fred T. Goldberg, Jr.,
Commissioner of
Internal Revenue.

(Filed by the Office of the Federal Register on September 12, 1990, 8:45 a.m., and published in the issue of the Federal Register for September 14, 1990, 55 F.R. 37888)

Notice of Proposed Rulemaking

Minimum Funding Requirements—Plan Restoration

EE-86-90

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In *** [T.D. 8317, page 72, this Bulletin], the Internal Revenue Service is issuing temporary regulations relating to the minimum funding requirements of section 412 of the Internal Revenue Code of 1986 as they apply to plans that are restored by the Pension Benefit Guaranty Corporation. The text of those temporary regulations also serves as the text for this Notice of Proposed Rulemaking. These regulations provide the public with guidance necessary to comply with the law. They will affect sponsors of and participants in pension plans covered under Title IV of the Employee Retirement Income Security Act ("ERISA").

DATES: Written comments and requests for a public hearing must be delivered or mailed by December 24, 1990.

ADDRESSES: Send comments and requests for a public hearing to: Internal Revenue Service. P.O. Box 7604, Ben Franklin Station, Attention: CC:CORP:T:R (EE-86-90) Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations in *** [T.D. 8317, page 72, this Bulletin] amend 26 CFR by adding a new §1.412(c)(1)-3T to Part 1 of Title 26 of the Code of Federal Regulations to provide guidance with respect to the minimum funding requirements in situations involving plans restored by the Pension Benefit Guaranty Corporation pursuant to its authority in section 4047 of the Employee Retirement Income Security Act of 1974 ("ERISA"). The regulations are proposed to be issued under the authority contained in section 7805 of the Code (26 U.S.C. 7805). For the text of the temporary regulations, see T.D. 8317 published in *** [page 72, this Bulletin].

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Fred T. Goldberg, Jr.,
Commissioner of
Internal Revenue.

(Filed by the Office of the Federal Register on October 22, 1990, 8:45 a.m., and published in the issue of the Federal Register for October 23, 1990, 55 F.R. 42728)

Notice of Proposed Rulemaking

Bad Debt Reserves of Banks

FI-81-86

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed income tax regulations relating to the repeal of bad debt reserves for large banks. The proposed regulations implement section 585(c) of the Internal Revenue Code.

DATES: Written comments and requests for a public hearing must be received by February 11, 1991.

ADDRESSES: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (FI-81-86), Room 4429, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collections of information contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collections of information should be sent to the Office of Management and Budget, Attn: Desk Officer for Department of the Treasury, Office of Information and Regulatory Affairs, Washington, D.C. 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer T:FP, Washington, D.C. 20224.

The collections of information in these regulations are in §1.585-8. This information is required by the Internal Revenue Service in connection with making or revoking an election. This information will be used to monitor elections made by respondents. The likely respondents are banks.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Estimated total reporting burden: 625 hours.

The estimated burden per respondent varies from 10 minutes to 20 minutes, depending on individual circumstances, with an estimated average of 15 minutes.

Estimated number of respondents: 2,500.

Estimated number of responses per respondent: 1.

Background

This document provides proposed regulations on the repeal, for large banks, of the reserve method of accounting for bad debts that is allowed by section 585 of the Internal Revenue Code. These regulations reflect Code section 585(c), which was added by section 901 of the Tax Reform Act of 1986, Pub. L. No. 99-514, 100 Stat. 2085, 2375-2380 (1986) [1986-3 C.B. (Vol. 1) 1, 292], and amended by section 1009(a) of the Technical and Miscellaneous Revenue Act of 1988, Pub. L. No. 100-647, 102 Stat. 3342, 3445 (1988) [1988-3 C.B. 1, 105]. When finalized, these proposed regulations will supersede related portions of 26 CFR 5h.5, which provides temporary regulations on the time and manner of making various elections under the Tax Reform Act of 1986.

Explanation of Provisions

New Code section 585(c) provides that large banks may not use the reserve method of section 585 for taxable years beginning after December 31, 1986. After this date, large banks must use the specific charge-off method of accounting for bad debts. Section 585(c) also provides procedures for changing from the reserve method of section 585 to the specific charge-off method. Section 585(c)(3) provides a recapture method of change, and section 585(c)(4) provides an elective cut-off method of change.

The regulations contained in this document propose to implement section 585(c) by adding new §§1.585-5 through 1.585-8 and by making conforming amendments in §§1.585-1, 1.585-2 and 1.585-3. Proposed §1.585-5 states the general rule of denial of bad debt reserves for large banks and provides guidance on determining whether an institution is a large bank. Proposed §§1.585-6, 1.585-7 and 1.585-8 provide guidance for large banks on changing from the reserve method of section 585 to the specific charge-off method. The regulations are proposed to be effective for taxable years beginning after December 31, 1986.

§1.585-5: Denial of bad debt reserves for large banks

Proposed §1.585-5(a) states the general rule of denial of bad debt reserves for large banks. This section also requires a large bank to change in its "disqualification year" to the specific charge-off method of accounting for bad debts. Proposed §1.585-5(d)(1) defines the term "disqualification year" for this purpose.

Pursuant to proposed §1.585-5(a), a large bank that maintained a bad debt reserve under section 585 for the taxable year immediately before its disqualification year must follow the rules prescribed in proposed §1.585-6 or §1.585-7 for changing to the specific charge-off method. However, these rules do not apply to a large bank that maintained a reserve under section 593 for the taxable year immediately before its disqualification year.

Proposed §1.585-5(b) provides rules for determining whether an institution is a large bank. Proposed §1.585-5(b)(1) states the $500 million test of section 585(c)(2). Under this test, a bank is a large bank if — for the current taxable year or for any preceding taxable year beginning after December 31, 1986 — the bank has average total assets in excess of $500 million or the bank is a member of a parent-subsidiary controlled group that has average total assets in excess of $500 million.

Proposed §1.585-5(c) provides rules for determining the average total assets of a bank or group for any taxable year. Under proposed §1.585-5(c)(1), this average is based on the total assets held by the bank or group on each "report date" during the year. Proposed §1.585-5(c)(2) defines the term "report date" for this purpose. Proposed §1.585-5(c)(3) provides that the amount of assets held by a bank or group is the adjusted bases of the assets for Federal income tax purposes. Proposed §1.585-5(c)(4) provides a method of estimating the adjusted tax bases of assets for this purpose.

Proposed §§1.585-5(b)(2) and 1.585-5(b)(3) also provide rules for determining whether an institution is a large bank. Under proposed §1.585-5(b)(2), certain banks that receive assets from a large bank and remain under that bank's control are treated as large banks. Under proposed §1.585-5(b)(3), certain banks that acquire substantially all of the assets of a large bank also are treated as large banks. Comments are requested on the scope of these rules.

§1.585-6: Recapture method of change

Proposed §1.585-6 provides guidance on using the recapture method set forth in section 585(c)(3). Under this method, a bank includes the balance of its bad debt reserve in income over a four-year period, and recapture is suspended for any taxable years in which the bank is financially troubled.

Proposed §1.585-6(a) provides general rules for using the recapture

method. If a bank follows the rules prescribed in proposed §1.585-6, its change to the specific charge-off method will be treated as made with the consent of the Commissioner. Proposed §1.585-6(b) specifies the portion of the reserve to be included in income in each year of the recapture period.

Proposed §1.585-6(c) explains the consequences of a disposition of loans by a large bank that is using the recapture method. Pursuant to proposed §1.585-6(c)(1), such a disposition generally does not affect the bank's obligation to recapture its reserve under proposed §1.585-6. However, if the bank ceases to engage in the business of banking before it completes recapture of its reserve, it must include the remaining amount of the reserve in income at that time. Pursuant to proposed §1.585-6(c)(3), if a bank transfers loans to another corporation in a section 381 transaction, the acquiring corporation steps into the transferor's shoes with respect to completing the recapture method.

Proposed §1.585-6(d) provides guidance for financially troubled banks. Proposed §1.585-6(d)(1) requires suspension of recapture for any taxable year in which a bank is financially troubled. Proposed §1.585-6(d)(2) allows a bank that is financially troubled for its disqualification year to elect to recapture more than 10 percent of its reserve. This election may be made for the bank's disqualification year, for the first taxable year after the disqualification year in which the bank is not financially troubled, or for any intervening taxable year. Proposed §1.585-6(d)(3) explains when a bank is considered financially troubled.

Proposed §1.585-6(d)(4) implements section 585(c)(3)(C), which provides relief from certain penalties for failure to pay estimated tax. Essentially this section waives the penalty for failure to pay estimated tax in cases where a bank that is financially troubled in one quarter (and therefore does not pay quarterly estimated tax attributable to recapture) is not financially troubled for the year as a whole (and thus has underpaid its estimated tax). In effect, proposed §1.585-6(d)(4) provides that the determination of whether a bank is financially troubled, for purposes of waiving the penalty for failure to pay an installment of estimated tax, is to be made as of the last day prescribed for payment of the installment, based on the portion of the taxable year that precedes and includes that day.

§1.585-7: Elective cut-off method of change

Proposed §1.585-7 provides guidance on using the cut-off method set forth in section 585(c)(4). Under this method, a bank continues to maintain its reserve for loans that it held when it became a large bank ("pre-disqualification loans"), but it may not deduct new additions to the reserve. If the reserve balance at the end of any taxable year exceeds the amount of the bank's outstanding pre-disqualification loans, the bank must include the amount of the excess in income for that year.

Proposed §1.585-7(a) provides general rules for using the cut-off method. Proposed §1.585-7(b) provides guidance on maintaining the reserve for pre-disqualification loans, and proposed §1.585-7(c) provides guidance on including excess amounts of the reserve in income.

Proposed §1.585-7(d) explains the consequences of a disposition of loans by a large bank that is using the cut-off method. Generally the bank reduces the balance of its outstanding pre-disqualification loans by the amount of the loans disposed of. However, proposed §1.585-7(d)(2) provides a special rule for section 381 transactions, and proposed §1.585-7(d)(3) addresses dispositions that are intended to change the status of pre-disqualification loans.

§1.585-8: Making and revoking elections

Proposed §1.585-8 provides rules on making and revoking the elections allowed under section 585(c). These are the election to recapture more than 10 percent of a bank's bad debt reserve and the election to use the cut-off method of change instead of the recapture method.

Proposed §1.585-8(a) provides rules on the time of making elections. Under proposed §1.585-8(a)(1), any election under section 585(c) must be made by the later of the date that is 60 days after the proposed regulations are published as final regulations, or the due date (taking extensions into account) of the electing bank's tax return for the year for which the election is made. Proposed §1.585-8(a)(2) waives the penalty for certain failures to pay estimated tax that result from making or revoking an election.

Proposed §1.585-8(b) provides rules on the manner of making elections. For tax returns filed after the proposed regulations are published as final regulations, proposed §1.585-8(b)(1) requires an election to be made by attaching a statement to the electing bank's tax return for the year for which the election is made. This section also describes the information to be included in the statement.

Proposed §1.585-8(c) provides rules on revoking elections. An election allowed under section 585(c) may be revoked without the consent of the Commissioner on or before the final date for making the election. After this date, the election may be revoked only with the Commissioner's consent. Proposed §1.585-8(c) also provides rules on the manner of revoking an election.

Proposed §1.585-8(d) addresses elections relating to banks that are members of parent-subsidiary controlled groups. Such an election is to be made by the bank. An election made by one member of a group is not binding on any other member.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Request for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably an original and eight copies) to the Internal Revenue Service. All comments will be avail-

able for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearing will be published in the Federal Register.

Elections under various public laws, Income taxes.

Proposed Amendments to the Regulations

Accordingly, Title 26, Chapter 1, Parts 1 and 5h of the Code of Federal Regulations are proposed to be amended as follows.

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805 * * * Sections 1.585-5 through 1.585-8 also issued under 26 U.S.C. 585(b)(4).

Par. 2. Section 1.585-1 is amended as follows:

1. The first sentence of paragraph (a) is amended by removing "166(c)" and inserting in lieu thereof "585(a) (or, for taxable years beginning before January 1, 1987, section 166(c))".

2. The seventh sentence of paragraph (a) is amended by removing "166(c) and the regulations thereunder" and inserting in lieu thereof "585 (or, for taxable years beginning before January 1, 1987, section 166(c)) and the regulations under section 166".

3. The tenth sentence of paragraph (a) is amended by removing "(a), (b), and (c)".

4. The following new sentence is added at the end of paragraph (a): "For rules relating to large banks, see §§1.585-5 through 1.585-8.".

5. Paragraph (b) is revised to read as follows:

§1.585-1 Reserve for losses on loans of banks.

* * * *

(b) *Application of section* — (1) *In general.* Except as provided in paragraph (b)(2) of this section, section 585 and this section apply to the following financial institutions:

(i) Any bank (as defined in section 581 and the regulations thereunder) other than a mutual savings bank, domestic building and loan association, or cooperative bank, to which section 593 applies, and

(ii) Any corporation to which paragraph (b)(1)(i) of this section would apply except for the fact that it is a foreign corporation and in the case of any such foreign corporation, the rules provided by section 585, this section, §§1.585-2, 1.585-3, and 1.585-4 apply only with respect to loans outstanding the interest on which is effectively connected with the conduct of a banking business within the United States.

(2) *Exception.* For taxable years beginning after December 31, 1986, section 585(a) and (b) and this section do not apply to any large bank (as defined in §1.585-5(b)). For these years, a large bank may not deduct any amount under section 585 or any other section for an addition to a reserve for bad debts.

Par. 3. In §1.585-2, the last sentence of paragraph (d)(3) is amended by adding "585(a)(1) or former section" immediately before "166(c)".

Par. 4. Section 1.585-3 is amended as follows:

1. The first sentence of paragraph (a) is amended by removing "166(c)" and inserting in lieu thereof "585(a) (or, for taxable years beginning before January 1, 1987, section 166(c))".

2. The first sentence of paragraph (b) is amended by removing "166(c)" and inserting in lieu thereof "585(a) (or, for taxable years beginning before January 1, 1987, section 166(c))".

3. The second and third sentences of paragraph (b) are amended by removing "166(c)" and inserting in lieu thereof "585(a) (or former section 166(c))".

Par. 5. New §§1.585-5, 1.585-6, 1.585-7 and 1.585-8 are added to read as follows:

§1.585-5 Denial of bad debt reserves for large banks.

(a) *General rule.* For taxable years beginning after December 31, 1986, a large bank (as defined in paragraph (b) of this section) may not deduct any amount under section 585 or any other section for an addition to a reserve for bad debts. However, for these years, except as provided in §1.585-7, a large bank may deduct amounts allowed under section 166(a) for specific debts that become worthless in whole or in part. Any large bank that maintained a reserve for bad debts under section 585 for the taxable year immediately preceding its disqualification year (as defined in paragraph (d)(1) of this section) must follow the rules prescribed in §1.585-6 or §1.585-7 for changing from the reserve method of accounting for bad debts that is allowed by section 585, to the specific charge-off method of §1.585-5(b)(2)accounting for bad debts, in its disqualification year. However, the rules prescribed in §§1.585-6 and 1.585-7 do not apply to a large bank that maintained a reserve for bad debts under section 593 for the taxable year immediately preceding its disqualification year.

(b) *Large bank* — (1) *General definition.* For purposes of this section, a large bank is any institution described in §1.585-1(b)(1)(i) or (ii) if, for the taxable year (or for any preceding taxable year beginning after December 31, 1986)—

(i) the average total assets of the institution (determined under paragraph (c) of this section) exceed $500,000,000, or

(ii) the institution is a member of a parent-subsidiary controlled group (as defined in paragraph (d)(2) of this section) and the average total assets of the group exceed $500,000,000.

(2) *Large bank resulting from transfer by large bank where control is retained.* If a large bank (as defined in paragraph (b)(1) or (b)(3) of this section) transfers a significant portion of its assets directly or indirectly to another corporation (the "transferee") and, after the transfer, more than 50 percent (in voting power or value) of the outstanding stock of the transferee is owned by the §1.585-5(b)(3)(i) bank, the transferee is treated as a large bank for any taxable year ending after the date of the transfer in which it is an institution described in §1.585-1(b)(1)(i) or (ii). For this purpose, stock of a transferee is considered owned by a transferor bank if it is owned by any member of a parent-subsidiary controlled group (as defined in paragraph (d)(2) of this section) of which the bank is a member, by any related

party within the meaning of section 267(b) or 707(b), or by any person that received the stock in a transaction to which section 355 applies.

(3) *Large bank resulting from transfer of substantially all the assets of large bank* — (i) *In general.* If a corporation acquires substantially all of the assets of a large bank (as defined in paragraph (b)(1) or (b)(2) of this section) and the acquiring corporation's method of accounting for bad debts with respect to its banking business (determined under paragraph (b)(3)(ii) of this section) immediately after the acquisition is the method used immediately before the acquisition by the large bank whose assets are acquired, the acquiring corporation is treated as a large bank for any taxable year ending after the date of the acquisition in which it is an institution described in §1.585-1(b)(1)(i) or (ii). See §§1.585-6(c)(3) and 1.585-7(d)(2) for rules on the treatment of assets acquired from large banks in section 381(a) transactions.

(ii) *Determination of method.* An acquiring corporation's method of accounting for bad debts, determined under this paragraph (b)(3)(ii), is the method determined by applying §1.381(c)(4)-1, regardless of whether section 381(a) applies to the acquisition. In applying §1.381(c)(4)-1 for this purpose, the following rules apply: (1) a large bank whose assets are acquired is considered to be on the specific charge-off method with respect to all of its assets immediately before the acquisition; (2) if an acquiring corporation has more than one banking business immediately after the acquisition, all such businesses are treated as one integrated business; and (3) if an acquiring corporation's banking business does not have a principal method of accounting for bad debts under §1.381(c)(4)-1, the business's method is considered to be the method used immediately before the acquisition by the bank whose assets are acquired.

(4) *Examples.* The following examples illustrate the principles of this paragraph (b):

Example 1. Bank M, a calendar year taxpayer, is an institution described in §1.585-1(b)(1)(i). For its taxable year beginning on January 1, 1987, M has average total assets of $600 million. Since M's average total assets for 1987 exceed $500 million, M is a large bank for that year. Pursuant to §1.585-5(d)(1), 1987 is M's disqualification year. If M maintained a bad debt reserve under section 585 for its immediately preceding taxable year (1986), M must change in 1987 to the specific charge-off method of accounting for bad debts, in accordance with §1.585-6 or §1.585-7.

Example 2. Assume the same facts as in Example 1. Also assume that in 1988 M disposes of a portion of its assets and, as a result, M's average total assets for taxable year 1988 fall to $400 million. M remains a large bank for taxable year 1988 and succeeding taxable years, since its average total assets for a preceding taxable year (1987) beginning after December 31, 1986, exceeded $500 million.

Example 3. Bank P, a calendar year taxpayer, is an institution described in §1.585-1(b)(1)(i). P has average total assets of $300 million for its taxable year beginning on January 1, 1988. For the same year, P is a member of a parent-subsidiary controlled group (within the meaning of §1.585-5(d)(2)) that has average total assets of $800 million. In February 1989, the group sells its stock in P to several individual investors. P is a large bank for taxable year 1988 because it is a member of a group described in §1.585-5(b)(1)(ii) for that year. P also is a large bank for taxable year 1989 and succeeding taxable years because it was a member of a group described in §1.585-5(b)(1)(ii) for a preceding taxable year (1988) beginning after December 31, 1986.

Example 4. Bank Q is a large bank, within the meaning of §1.585-5(b)(1), for its taxable year beginning on January 1, 1988, and hence for all later years. On March 1, 1989, Q transfers $200 million of its $600 million of assets to Bank R, a newly created subsidiary, in a transaction to which section 351 applies; these assets are R's only assets. On the same day, Q then spins off R in a transaction to which section 355 applies. After these transactions, the shareholders of Q own more than 50 percent of R's outstanding stock. Although R's average total assets do not exceed $500 million, R becomes a large bank on March 1, 1989, pursuant to §1.585-5(b)(2). These transactions do not affect Q's status as a large bank.

Example 5. Bank S is a large bank, within the meaning of §1.585-5(b)(1)(ii), for its taxable year beginning on January 1, 1987. As a result, S changes to the specific charge-off method of accounting for bad debts in that year. Bank T, which is not a large bank under §1.585-5(b)(1) or §1.585-5(b)(2), uses the reserve method of accounting for bad debts. On June 30, 1988, T acquires substantially all of S's assets in a transaction to which section 381(a) does not apply. Immediately before the acquisition, S's banking business has total assets of $200 million, and T's has total assets of $250 million. To determine whether T is a large bank under §1.585-5(b)(3), it is necessary to determine under §1.585-5(b)(3)(ii) T's method of accounting for bad §1.585-5(c)(2)(i)debts with respect to its banking business immediately after the acquisition. This determination requires an application of §1.381(c)(4)-1. For this purpose, T's original and acquired banking businesses are treated as an integrated business. Applying §1.381(c)(4)-1(c)(2)(iii), it is determined that the business's principal method of accounting for bad debts immediately after the acquisition is the reserve method. Hence, the acquisition does not cause T to become a large bank under §1.585-5(b)(3).

(c) *Average total assets* — (1) *In general.* For purposes of paragraph (b)(1) of this section, the average total assets of an institution or group for any taxable year are determined by —

(i) computing, for each report date (as defined in paragraph (c)(2) of this section) within the taxable year, the amount of total assets (as defined in paragraph (c)(3) of this section) held by the institution or group as of the close of business on the report date;

(ii) adding these amounts; and

(iii) dividing the sum of these amounts by the number of report dates within the taxable year.

(2) *Report date* — (i) *Institutions.* A report date for an institution generally is the last day of the regular period for which the institution must report to its primary Federal regulatory agency. However, an institution that is required to report to its primary Federal regulatory agency more frequently than quarterly may choose the last day of the calendar quarter as its report date, and an institution that is required to report to its primary Federal regulatory §1.585-5(c)(2)(iii) agency less frequently than quarterly must choose the last day of the calendar quarter as its report date. If an institution does not have a Federal regulatory agency, its primary State regulatory agency is considered its primary Federal regulatory agency for purposes of this paragraph (c)(2)(i). In the case of a short taxable year that does not otherwise include a report date, the last day of the taxable year is the institution's report date for the year.

(ii) *Groups.* A report date for a parent-subsidiary controlled group is the report date, determined under paragraph (c)(2)(i) of this section, for any one member of the group that is an institution described in §1.585-1(b)(1)(i) or (ii). The same report date must be used in applying paragraph (b)(1)(ii) of this section to all members of a parent-subsidiary controlled group for a taxable year.

(iii) *Member of group for only part of taxable year.* If an institution is a member of a parent-subsidiary controlled group for only part of a taxable year, paragraph (b)(1)(ii) of this section is applied to the institution for that year on the basis of the group's average total assets for the portion of the year that the institution is a member of the group. Thus, only the group's report dates that are

included in that portion of the year are taken into account in determining the group's average total assets for purposes of applying paragraph (b)(1)(ii) to the institution. If no §1.585-5(c)(4)(i) report date of the group is included in that portion of the year, the first or last day of that portion of the year must be treated as the group's report date for purposes of this paragraph (c)(2)(iii).

(3) *Total assets.* The amount of total assets held by an institution or group is the amount of cash, plus the sum of the adjusted bases of all other assets, held by the institution or group. For this purpose, the adjusted basis of an asset is its basis for Federal income tax purposes, determined under sections 1012, 1016 and other applicable sections of the Internal Revenue Code. In determining the amount of total assets held by a group, any asset of a member of the group that is an interest in another member of the group is not to be counted.

(4) *Estimated adjusted tax bases* — (i) *In general.* The amount of the adjusted Federal income tax bases ("tax bases") of assets held on a report date may be estimated, for purposes of applying paragraph (c)(3) of this section. This estimate must be based on the adjusted bases of the assets on that date as determined by reference to the asset holder's books and records maintained for financial reporting purposes ("book bases"). The estimate must reflect any change in the ratio between the asset holder's tax and book bases of assets that occurs during the taxable year, and the estimate must assume that this change occurs §1.585-5(c)(4)(ii) ratably. If an institution or group member estimates the tax bases of assets held on any report date during a taxable year, it must do so for all assets (other than cash) held on that report date, and it must do so for all other report dates during the year. However, the tax bases of assets may not be estimated for any report date that is the first or last day of the taxable year.

(ii) *Formulas.* The estimated amount of the tax bases of assets held on any report date during a taxable year is based on the following variables: the total book bases of the assets on the report date ("B"); the asset holder's "tax/book ratio" as of the close of the preceding taxable year ("R"); and the result (whether positive or negative) obtained when R is subtracted from the asset holder's "tax/book ratio" as of the close of the current taxable year ("Y"). For purposes of determining R and Y, an asset holder's "tax/book ratio" is the ratio of (1) the total tax bases of all of the holder's assets (other than cash) to (2) the total book bases of those assets. If an asset holder's taxable year is the calendar year and its report date is the last day of the calendar quarter, its estimated tax bases of assets held on the first three report dates of the year are determined under the following formulas:

1st Report Date = B x (R + ¼Y)
2nd Report Date = B x (R + ½Y)
3rd Report Date = B x (R + ¾Y)

For an example illustrating the application of these formulas, see Example 2 in paragraph (c)(5) of this section.

(5) *Examples.* The following examples illustrate the principles of this paragraph (c):

Example 1. Bank U is a fiscal year taxpayer, and its fiscal year ends on January 31. U reports to its primary Federal regulatory agency as of the last day of the calendar quarter. Thus, U's report dates under §1.585-5(c)(2)(i) are March 31, June 30, September 30, and December 31. For its taxable year beginning on February 1, 1987, U has total assets (within the meaning of §1.585-5(c)(3)) of $480 million on March 31, $490 million on June 30, $510 million on September 30, and $540 million on December 31. Thus, pursuant to §1.585-5(c)(1), U's average total assets for its taxable year beginning on February 1, 1987, are $505 million.

Example 2. Bank W is a calendar year taxpayer, and its report date (within the meaning of §1.585-5(c)(2)(i)) is the last day of the calendar quarter. The adjusted tax bases of all of W's assets (other than cash) are $450z on December 31, 1989, and $480z on December 31, 1990. The book bases of those assets are $500z on December 31, 1989; $520z on March 31, 1990; $540z on June 30, 1990; $560z on September 30, 1990; and $600z on December 31, 1990. Applying the formulas provided in §1.585-5(c)(4)(ii), W's "tax/book ratio" as of the close of 1989 ("R"), is 0.9 (450z/500z). W's "tax/book ratio" as of the close of 1990 is 0.8 (480z/600z). Thus, "Y" is -0.1. The estimated adjusted tax bases of all of W's assets (other than cash) on the first three report dates of 1990 are as follows:

1st = B x (R + ¼Y)
= $520z x [0.9 + ¼(−0.1)]
= $455z
2nd = B x (R + ½Y)
= $540z x [0.9 + ½(−0.1)]
= $459z
3rd = B x (R + ¾Y)
= $560z x [0.9 + ¾(−0.1)]
= $462z

(d) *Definitions.* The following definitions apply for purposes of this section and §§1.585-6, 1.585-7 and 1.585- 8:

(1) *Disqualification year.* A bank's disqualification year is its first taxable year beginning after December 31, 1986, for which the bank is a large bank within the meaning of paragraph (b) of this section.

(2) *Parent-subsidiary controlled group.* A parent-subsidiary controlled group includes all of the members of a controlled group of corporations described in section 1563(a)(1). The members of such a group are determined without regard to whether any member is an "excluded member" described in section 1563(b)(2), a foreign entity, or a commercial bank.

§1.585-6 Recapture method of changing from the reserve method of section 585.

(a) *General rule.* This section applies to any large bank (as defined in §1.585-5(b)) that maintained a reserve for bad debts under section 585 for the taxable year immediately preceding its disqualification year (as defined in §1.585-5(d)(1)) and that does not elect the cut-off method set forth in §1.585-7. Except as otherwise provided in paragraphs (c) and (d) of this section, any bank to which this section applies must include in income the amount of §1.585-6(b)(2) its net section 481(a) adjustment (as defined in paragraph (b)(3) of this section) over the four-year period beginning with the bank's disqualification year. If a bank follows the rules prescribed in this section, its change to the specific charge-off method of accounting for bad debts in its disqualification year will be treated as a change in accounting method that is made with the consent of the Commissioner. Paragraph (b) of this section specifies the portion of the net section 481(a) adjustment to be included in income in each year of the recapture period; paragraph (c) provides rules on the effect of disposing of loans; and paragraph (d) provides rules on the suspension of recapture by financially troubled banks.

(b) *Four-year spread of net section 481(a) adjustment* — (1) *In general.* If a bank to which this section applies does not make the election allowed by paragraph (b)(2) of this section, the

bank must include in income the following portions of its net section 481(a) adjustment in each year of the four-year recapture period: 10 percent in the bank's disqualification year; 20 percent in the first taxable year after its disqualification year; 30 percent in the second taxable year after its disqualification year; and 40 percent in the third taxable year after its disqualification year.

(2) *Election to include more than 10 percent in disqualification year.* A bank to which this section applies §1.585-6(b)(3) may elect to include in income, in its disqualification year, any percentage of its net section 481(a) adjustment that is larger than 10 percent. Any such election must be made at the time and in the manner prescribed by §1.585-8. If a bank makes such an election, the bank must include in income the remainder, if any, of its net section 481(a) adjustment in the following portions: 2/9 of the remainder in the first taxable year after the bank's disqualification year; 1/3 of the remainder in the second taxable year after its disqualification year; and 4/9 of the remainder in the third taxable year after its disqualification year. For this purpose, the remainder of a bank's net section 481(a) adjustment is any portion of the adjustment that the bank does not elect to include in income in its disqualification year.

(3) *Net section 481(a) adjustment.* For purposes of this section, the amount of a bank's net section 481(a) adjustment is the amount of the bank's reserve for bad debts as of the close of the taxable year immediately preceding its disqualification year. Since the change from the reserve method of section 585 is initiated by the taxpayer, the amount of the bank's bad debt reserve for this purpose is not reduced by amounts attributable to taxable years beginning before 1954.

(4) *Examples.* The following examples illustrate the principles of this paragraph (b):

Example 1. Bank M is a large bank within the meaning of §1.585-5(b). M's disqualification year is its taxable year beginning on January 1, 1989, and M maintained a bad debt reserve under section 585 for the preceding taxable year. Pursuant to §1.585-5(a), M must change from the reserve method of accounting for bad debts to the specific charge-off method in its disqualification year. M does not elect the cut-off method set forth in §1.585-7. Thus, M must follow the recapture method set forth in this §1.585-6. M's net section 481(a) adjustment, as defined in §1.585-6(b)(3), is $2 million. M does not make the election allowed by §1.585-6(b)(2). Pursuant to §1.585-6(b)(1), M must include the following amounts in income: $200,000 in taxable year 1989; $400,000 in 1990; $600,000 in 1991; and $800,000 in 1992.

Example 2. Assume the same facts as in Example 1, except that M elects under §1.585-6(b)(2) to recapture 55 percent of its net section 481(a) adjustment in its disqualification year. Pursuant to §1.585-6(b)(2), M must include the following amounts in income: $1,100,000 in taxable year 1989; $200,000 in 1990; $300,000 in 1991; and $400,000 in 1992.

(c) *Effect of disposing of loans* — (1) *In general.* Except as provided in paragraphs (c)(2) and (c)(3) of this section, if a bank to which this section applies sells or otherwise disposes of any of its outstanding loans on or after the first day of its disqualification year, the disposition does not affect the bank's obligation under this section to include in income the amount of its net section 481(a) adjustment, and the disposition does not affect the amount of this adjustment.

(2) *Cessation of banking business.* If a bank to which this section applies ceases to engage in the business of §1.585-6(c)(3) banking before it is otherwise required to include in income the full amount of its net section 481(a) adjustment, the bank must include in income the remaining amount of the adjustment in the taxable year in which it ceases to engage in the business of banking. For this purpose, a bank is not considered to have ceased engaging in the business of banking if the cessation is the result of a transaction to which section 381(a) applies.

(3) *Section 381 transactions.* If a bank to which this section applies transfers outstanding loans to another corporation on or after the first day of the bank's disqualification year (and before it has included in income the full amount of its net section 481(a) adjustment) in a transaction to which section 381(a) applies, the acquiring corporation steps into the shoes of the transferor with respect to using the recapture method prescribed in this §1.585-6. The unrecaptured balance of the transferor's net section 481(a) adjustment carries over in the transaction to the acquiring corporation, and this corporation must complete the four-year recapture procedure begun by the transferor. In the section 381(a) transaction, the acquiring corporation assumes all of the transferor's rights and obligations under paragraph (b) of this section. However, if an acquiring corporation that is not a large bank (within the meaning of §1.585-5(b)) establishes a bad §1.585-6(c)(4) debt reserve for loans received in the section 381(a) transaction, the section 481(a) adjustment carried over in the transaction is at least partially offset by a new negative section 481(a) adjustment attributable to the reserve. See §1.381(c)(4)-1.

(4) *Examples.* The following examples illustrate the principles of this paragraph (c):

Example 1. Bank P is a bank to which this §1.585-6 applies. P's disqualification year is its taxable year beginning on January 1, 1989, and P recaptures 10 percent of its net section 481(a) adjustment in that year pursuant to §1.585-6(b)(1). In 1990 P disposes of a portion of its loan portfolio in a transaction to which section 381(a) does not apply, and P continues to engage in the business of banking. Pursuant to §1.585-6(c)(1), the disposition does not affect P's obligation under §1.585-6(b)(1) to recapture the remainder of its net section 481(a) adjustment in 1990, 1991 and 1992. Nor does the disposition affect the amount of the adjustment.

Example 2. Assume the same facts as in Example 1, except that P ceases to engage in the business of banking in 1990, and this cessation is not the result of a transaction to which section 381(a) applies. Pursuant to §1.585-6(c)(2), in 1990 P must include in income the remaining 90 percent of its net section 481(a) adjustment.

Example 3. Assume the same facts as in Example 1, except that P's 1990 disposition of loans is a transaction to which section 381(a) applies. Thus, in the transaction, P transfers substantially all of its loans to an acquiring corporation (Q). Q may be treated as a large bank, pursuant to §1.585-5(b)(2) or §1.585-5(b)(3), for taxable years ending after the date of the transaction. If so, and if Q was on the reserve method of accounting immediately before the section 381(a) transaction, it must change to the specific charge-off method for all of its loans. Regardless of whether Q is a large bank, pursuant to §1.585-6(c)(3) Q steps into P's shoes with respect to using the recapture method prescribed in §1.585-6. The unrecaptured balance of P's net section 481(a) adjustment carries over to Q in the section 381(a) transaction, and Q must complete the four-§1.585-6(d)(2) year recapture procedure begun by P. However, if Q is not a large bank and Q establishes a bad debt reserve for loans received in the transaction, the section 481(a) adjustment that is carried over is at least partially offset by a new negative section 481(a) adjustment.

(d) *Suspension of recapture by financially troubled banks* — (1) *In general.* Except as provided in paragraph (d)(2) of this section, a bank that is financially troubled (within the meaning of paragraph (d)(3) of this

section) for any taxable year shall not include any amount in income under paragraphs (a) and (b) of this section for that taxable year and must disregard that taxable year in applying paragraphs (a) and (b) to other taxable years. See paragraph (d)(4) of this section for rules on determining estimated tax payments of financially troubled banks, and see paragraph (d)(5) for examples illustrating this paragraph (d).

(2) *Election to recapture.* A bank that is financially troubled (within the meaning of paragraph (d)(3) of this section) for its disqualification year may elect to include in income, in one taxable year, any percentage of its net section 481(a) adjustment that is greater than 10 percent. This election may be made for the bank's disqualification year, for the first taxable year after the disqualification year in which the bank is not financially troubled (within the meaning of paragraph (d)(3) of this section), or for any intervening taxable year. Any such election must be made at §1.585-6(d)(3)(i) the time and in the manner prescribed by §1.585-8. A bank that makes this election shall include an amount in income under paragraphs (a) and (b) of this section in the year for which the election is made ("election year") and shall not disregard this year in applying paragraphs (a) and (b) to other taxable years. Such a bank must follow the rules of paragraph (b)(2) of this section in applying paragraph (b) to later taxable years, treating the election year as the disqualification year for purposes of applying paragraph (b)(2). However, if the bank is financially troubled for any year after its election year, the bank shall not include any amount in income under paragraphs (a) and (b) of this section for the later year and must disregard the later year in applying paragraphs (a) and (b) to other taxable years.

(3) *Definition of financially troubled* — (i) *In general.* For purposes of this section, a bank is considered financially troubled for any taxable year if the bank's nonperforming loan percentage for that year exceeds 75 percent. For this purpose, a bank's nonperforming loan percentage is the percentage determined by dividing (1) the sum of the outstanding balances of the bank's nonperforming loans (as defined in paragraph (d)(3)(iii) of this section) as of the close of each quarter of the taxable year, by (2) the sum of the amounts of the bank's equity (as defined in paragraph (d)(3)(iv) of this section) as of the close of §1.585-6(d)(3)(ii) each such quarter. If a taxable year consists of less than 3 months, the last day of the taxable year is treated as the last day of a quarter. In lieu of determining its nonperforming loan percentage on the basis of loans and equity as of the close of each taxable quarter, a bank may, for all years, determine this percentage on the basis of loans and equity as of the close of each report date (as defined in §1.585-5(c)(2)). In the case of a bank that is a foreign corporation, all nonperforming loans and equity of the bank are taken into account, including loans and equity that are not effectively connected with the conduct of a banking business within the United States.

(ii) *Parent-subsidiary controlled groups.* If a bank is a member of a parent-subsidiary controlled group (as defined in §1.585-5(d)(2)) for the taxable year, the nonperforming loans and the equity of all members of the group that are financial institutions within the meaning of section 265(b)(5) (or comparable foreign financial institutions) are treated as the nonperforming loans and the equity of the bank for purposes of paragraph (d)(3)(i). However, any asset of a member financial institution that represents an equity interest in another member financial institution is not to be counted. Likewise, any nonperforming loan of a member financial institution that is a loan to another member financial institution is not to be counted.

(iii) *Nonperforming loan.* For purposes of this section, a nonperforming loan is any loan that is considered to be nonperforming by the holder's primary Federal regulatory agency (or, if the holder does not have a Federal regulatory agency, any loan that would be considered nonperforming under the standards prescribed by the Federal Financial Institutions Examination Council).

(iv) *Equity.* For purposes of this section, the equity of a bank or other financial institution is its equity (*i.e.*, assets minus liabilities) as determined by the institution's primary Federal regulatory agency (or, if the institution does not have a Federal regulatory agency, by its primary State regulatory agency). The balance in a reserve for bad debts is not treated as equity.

(4) *Estimated tax payments of financially troubled banks.* If a bank is financially troubled (within the meaning of paragraph (d)(3) of this section) for any quarter of a taxable year, it must be determined, for purposes of applying section 6655(e)(2)(A)(i) with respect to the installment of estimated tax for the quarter (and any later quarter of the taxable year), whether the bank is required to include an amount in income under paragraphs (a) and (b) of this section for the taxable year. This determination is to be made as of the last day prescribed for payment of the installment, based on the portion of the taxable year that §1.585-7(a) precedes and includes that day. That is, the determination is to be made as if the last day prescribed for payment were the last day of the taxable year.

(5) *Examples.* The following examples illustrate the principles of this paragraph (d):

Example 1. Bank R is a bank to which this §1.585-6 applies. R's disqualification year is its taxable year beginning on January 1, 1987. R is not financially troubled (within the meaning of §1.585-6(d)(3)) for taxable year 1987 or for any taxable year after 1989, but it is financially troubled for taxable years 1988 and 1989. Since R is not financially troubled for its disqualification year, R must include an amount in income under §1.585-6(a) and (b) for that year (taxable year 1987). R may make the election allowed by §1.585-6(b)(2) for that year. Since R is financially troubled for taxable years 1988 and 1989, pursuant to §1.585-6(d)(1) R does not include any amount in income under §1.585-6(a) and (b) for these years, and it treats taxable years 1990, 1991 and 1992 as the first, second and third taxable years after its disqualification year for purposes of applying §1.585-6(a) and (b).

Example 2. Assume the same facts as in Example 1, except that R is financially troubled for taxable year 1987 (its disqualification year). R may make the election allowed by §1.585-6(d)(2) for 1987 (the disqualification year), for 1990 (the first year after the disqualification year in which R is not financially troubled), or for 1988 or 1989 (the intervening years). R elects to include 60 percent of its net section 481(a) adjustment in income in 1987. Thus, the remainder of the adjustment, for purposes of applying the rules of §1.585-6(b)(2), is 40 percent. R must include in income 2/9 of the remainder in 1990, 1/3 of the remainder in 1991, and 4/9 of the remainder in 1992.

§1.585-7 Elective cut-off method of changing from the reserve method of section 585.

(a) *General rule.* Any large bank (as defined in §1.585-5(b)) that maintained a reserve for bad debts under §1.585-7(a) section 585 for the taxable year immediately preceding its disqualification year (as defined in §1.585-5(d)(1)) may elect to use the cut-off method set forth in this section. Any such election must be made at the time and in the manner prescribed by §1.585-8. If a bank makes this election, the bank must maintain its bad debt reserve for its pre-disqualification loans, as prescribed in paragraph (b) of this section, and the bank must include in income any excess balance in this reserve, as required by paragraph (c) of this section. The bank may not deduct, for its disqualification year or any subsequent taxable year, any amount allowed under section 166(a) for pre-disqualification loans (as defined in paragraph (b)(2) of this section) that become worthless in whole or in part, except as allowed by paragraph (b)(1) of this section. However, except as provided in paragraph (d)(3) of this section, the bank may deduct, for its disqualification year or any subsequent taxable year, amounts allowed under section 166(a) for loans that the bank originates or acquires on or after the first day of its disqualification year and that become worthless in whole or in part. If a bank makes the election allowed by this paragraph (a), its change to the specific charge-off method of accounting for bad debts in its disqualification year is not a change in accounting method to which the provisions of section 481 apply.

(b) *Maintaining reserve for pre-disqualification loans* — (1) *In general.* A bank that makes the election allowed by paragraph (a) of this section must maintain its bad debt reserve for its pre-disqualification loans (as defined in paragraph (b)(2) of this section). Except as provided in paragraph (d)(3) of this section, the bank must charge against the reserve the amount of any losses resulting from these loans (including losses resulting from the sale or other disposition of these loans), and the bank must add to the reserve the amount of recoveries with respect to these loans. In general, the reserve must be maintained in the manner provided by former section 166(c) of the Internal Revenue Code and the regulations thereunder. However, after the balance in the reserve is reduced to zero, the bank is to account for any losses and recoveries with respect to outstanding pre-disqualification loans under the specific charge-off method of accounting for bad debts, as if the bank always had accounted for these loans under this method. See paragraph (d)(2) of this section for rules on the obligation to maintain a reserve under this paragraph (b) when a bank transfers loans in a section 381 transaction.

(2) *Definition of pre-disqualification loans.* For purposes of this section, a pre-disqualification loan of a bank is any loan that the bank held on the last day of its §1.585-7(d)(2) taxable year immediately preceding its disqualification year (as defined in §1.585-5(d)(1)).

(c) *Amount to be included in income when reserve balance exceeds loan balance.* If, as of the close of any taxable year, the balance in a bank's reserve that is maintained under paragraph (b) of this section exceeds the balance of the bank's outstanding pre-disqualification loans, the bank must include in income the amount of the excess for the taxable year. The balance in the reserve is then reduced by the amount of this excess. See paragraph (d) of this section for rules on the application of this paragraph (c) when a bank disposes of loans.

(d) *Effect of disposing of loans* — (1) *In general.* Except as provided in paragraphs (d)(2) and (d)(3) of this section, if a bank that makes the election allowed by paragraph (a) of this section sells or otherwise disposes of any of its outstanding pre-disqualification loans, the bank is to reduce the balance of its outstanding pre-disqualification loans by the amount of the loans disposed of, for purposes of applying paragraph (c) of this section.

(2) *Section 381 transactions.* If a bank that makes the election allowed by paragraph (a) of this section transfers outstanding pre-disqualification loans to another corporation in a transaction to which section 381(a) applies, the acquiring corporation steps into the shoes of §1.585-7(d)(3) the transferor with respect to using the cut-off method of change, unless the acquiring corporation is not a large bank (within the meaning of §1.585-5(b)) and uses a reserve method of accounting for bad debts attributable to the pre-disqualification loans received in the transaction. If an acquiring corporation steps into the transferor's shoes with respect to using the cut-off method, the transferor's bad debt reserve immediately before the section 381(a) transaction carries over to the acquiring corporation, and this corporation must complete the cut-off method begun by the transferor. For purposes of completing the transferor's cut-off method, the acquiring corporation's balance of outstanding pre-disqualification loans immediately after the section 381(a) transaction is the balance of these loans that it receives in the transaction, and the acquiring corporation assumes all of the transferor's rights and obligations under this section. See §1.381(c)(4)-1.

(3) *Dispositions intended to change the status of pre-disqualification loans.* This paragraph (d)(3) applies if a bank that makes the election allowed by paragraph (a) of this section sells, exchanges, or otherwise disposes of a significant amount of its pre-disqualification loans (as defined in paragraph (b)(2) of this section) and the transaction has as one of its principal purposes the avoidance of the provisions of this section by increasing §1.585-7(e) the amount of loans for which deductions are allowable under the specific charge-off method. If this paragraph (d)(3) applies, the District Director may disregard the disposition for purposes of paragraphs (b)(1) and (d)(1) of this section or treat the replacement loans as pre-disqualification loans. If loans are so treated as pre-disqualification loans, no deductions are allowable under the specific charge-off method for the loans, except as provided in paragraph (b)(1) of this section, and the disposition that causes the loans to be so treated may be disregarded for purposes of paragraphs (b)(1) and (d)(1) of this section. For purposes of paragraph (d)(3) if a bank sells pre-disqualification loans and uses the proceeds of the sale to originate new loans, this paragraph (d)(3) does not apply to the transaction.

(e) *Examples.* The following examples illustrate the principles of this section:

Example 1. Bank M is a bank that properly elects to use the cut-off method set forth in this §1.585-7. M's disqualification year is its taxable year beginning on January 1, 1987. On December 31, 1986, M had outstanding loans of $700 million (pre-disqualification loans), and the balance in its bad debt reserve was $10 million. M must maintain its reserve for its pre-disqualification loans in accordance with §1.585-7(b), and it may not deduct any addition to this reserve for taxable year 1987 or any later year. For these years, M may deduct amounts allowed under section 166(a) for loans that it originates or acquires after December 31, 1986, and that become worthless in whole or in part.

Example 2. Assume the same facts as in Example 1. Also assume that in 1987 M collects $150 million of its pre-disqualification loans, M determines that $2 million of its pre-disqualification loans are worthless, and M recovers $1 million of pre-disqualification loans that it had previously charged against the reserve as worthless. On December 31, 1987, the balance in M's bad debt reserve is $9 million ($10 million $2 million + $1 million), and the balance of its outstanding pre-disqualification loans is $548 million ($700 million $150 million $2 million).

Example 3. Assume the same facts as in Examples 1 and 2. Also assume that on December 31, 1990, the balance in M's bad debt reserve is $5 million and the balance of its outstanding pre-disqualification loans is $25 million. In 1991 M collects $21 million of its outstanding pre-disqualification loans and determines that $1 million of its outstanding pre-disqualification loans are worthless. Thus, on December 31, 1991, the balance in M's bad debt reserve is $4 million ($5 million - $1 million), and the balance of its outstanding pre-disqualification loans is $3 million ($25 million - $21 million - $1 million). Accordingly, M must include $1 million ($4 million $3 million) in income in taxable year 1991, pursuant to §1.585-7(c). On January 1, 1992, the balance in M's reserve is $3 million ($4 million $1 million).

Example 4. Assume the same facts as in Examples 1 through 3. Also assume that in 1992 M transfers substantially all of its assets to another corporation (N) in a transaction to which section 381(a) applies, and N is treated as a large bank under §1.585-5(b)(3) for taxable years ending after the date of the transaction. Pursuant to §1.585-7(d)(2), N steps into M's shoes with respect to using the cut-off method. M's bad debt reserve immediately before the section 381(a) transaction carries over to N, and N must complete the cut-off procedure begun by M. For this purpose, N's balance of outstanding pre-disqualification loans immediately after the section 381(a) transaction is the balance of these loans that it receives from M.

§1.585-8 Rules for making and revoking elections under §§1.585-6 and 1.585-7.

(a) *Time of making elections* — (1) *In general.* Any election under §1.585-6(b)(2), §1.585-6(d)(2) or §1.585-7(a) must be made on or before the later of

(i) [*Insert date that is 60 days after this regulation is published as a final regulation in the Federal Register*], §1.585-8(b)(1)or

(ii) the due date (taking extensions into account) of the electing bank's original tax return for its disqualification year (as defined in §1.585-5(d)(1)) or, for elections under §1.585-6(d)(2), the year for which the election is made.

(2) *No extension of time for payment.* Payments of tax due must be made in accordance with Chapter 62 of the Internal Revenue Code. However, if an election under §1.585-6(b)(2), §1.585-6(d)(2) or §1.585-7(a) is made or revoked on or before [*Insert date that is 60 days after this regulation is published as a final regulation in the Federal Register*] and the making or revoking of the election results in an underpayment of estimated tax (within the meaning of section 6655(a)) with respect to an installment of estimated tax due on or before the date the election was so made or revoked, no addition to tax will be imposed under section 6655(a) with respect to the amount of the underpayment attributable to the making or revoking of the election.

(b) *Manner of making elections* — (1) *In general.* Except as provided in paragraph (b)(2) of this section, an electing bank must make any election under §1.585-6(b)(2), §1.585-6(d)(2) or §1.585-7(a) by attaching a statement to its tax return (or amended return) for its disqualification §1.585-8(b)(2) year or, for elections under §1.585-6(d)(2), the year for which the election is made. This statement must contain the following information:

(i) the name, address and taxpayer identification number of the electing bank;

(ii) the nature of the election being made (i.e., whether the election is to include in income more than 10 percent of the bank's net section 481(a) adjustment under §1.585-6(b)(2) or (d)(2) or to use the cut-off method under §1.585-7); and

(iii) if the election is under §1.585-6(b)(2) or (d)(2), the percentage being elected.

(2) *Certain tax returns filed before [Insert date that this regulation is published as a final regulation in the Federal Register].* A bank is deemed to have made an election under §1.585-6(b)(2) or (d)(2) if the bank evidences its intent to make an election under section 585(c)(3)(A)(iii)(I) or section 585(c)(3)(B)(ii) for its disqualification year (or, for elections under §1.585- 6(d)(2), the election year), by designating a specific recapture amount on its tax return or amended return for this year (or attaching a statement in accordance with §5h.5(a)(3)(i)), and this return is filed before [*Insert date that this regulation is published as a final regulation in the Federal Register*]. A bank is deemed to have made an §1.585-8(c)(1)(iii) election under §1.585-7(a) if the bank evidences its intent to make an election under section 585(c)(4) for its disqualification year by attaching a statement in accordance with §5h.5(a)(3)(i) to its tax return or amended return for this year, and this return is filed before [*Insert date that this regulation is published as a final regulation in the Federal Register*].

(c) *Revocation of elections* — (1) *On or before final date for making election.* An election under §1.585-6(b)(2), §1.585-6(d)(2) or §1.585-7(a) may be revoked without the consent of the Commissioner on or before the final date prescribed by paragraph (a)(1) of this section for making the election. To do so, the bank that made the election must file an amended tax return for its disqualification year (or, for elections under §1.585-6(d)(2), the year for which the election was made) and attach a statement that —

(i) includes the bank's name, address and taxpayer identification number;

(ii) identifies and withdraws the previous election; and

(iii) if the bank is making a new election under §1.585-6(b)(2), §1.585-6(d)(2) or §1.585-7(a), contains the information described in paragraphs (b)(1)(ii) and (b)(1)(iii) of this section.

(2) *After final date for making election.* An election under §1.585-6(b)(2), §1.585-6(d)(2) or §1.585-7(a) may be revoked only with the consent of the Commissioner after the final date prescribed by paragraph (a)(1) of this section for making the election. The Commissioner will grant this consent only in extraordinary circumstances, such as circumstances that would justify granting an extension of time under §1.9100-1 for making an

election. See Revenue Procedure 79-63, 1979-2 C.B. 578, for factors considered in applying §1.9100-1.

(d) *Elections by banks that are members of parent-subsidiary controlled groups.* In the case of a bank that is a member of a parent-subsidiary controlled group (as defined in §1.585-5(d)(2)), any election under §1.585-6(b)(2), §1.585-6(d)(2) or §1.585-7(a) with respect to the bank is to be made separately by the bank. An election made by one member of such a group is not binding on any other member of the group.

PART 5h—[AMENDED]

Paragraph 6. The authority for Part 5h is amended by removing the following citations: "585(c)(3)(A)-(iii)(I), 585(c)(4),".

Par. 7. Section 5h.5 is amended as follows:

1. The table in paragraph (a)(1) is amended by removing each line, from each column, that relates to section 901(a) of the Act and to section 585(c)(3)(A)(iii)(I) or 585(c)(4) of the Code.

2. Paragraph (a)(4)(ii) is amended by removing "901(a) (Code sections 585(c)(3)(B)(ii) and 585(c)(4)),".

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue

(Filed by the Office of the Federal Register on December 11, 1990, 8:45 a.m., and published in the issue of the Federal Register for December 12, 1990, 55 F.R. 51124)

Notice of Proposed Rulemaking

Exception from the Prohibition of Federal Guarantees—Permitted Investments of Tax-Exempt Bond Proceeds

FI-84-90

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In *** [T.D. 8313, page 37, this Bulletin], the Internal Revenue Service is issuing temporary regulations relating to the prohibition of federal guarantees with respect to bonds the interest on which is excludable from gross income. The temporary regulations provide that investments in obligations issued by the Resolution Funding Corporation pursuant to the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 are excepted from the prohibition of federal guarantees. The text of the temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES: Written comments and requests for a public hearing must be received by December 14, 1990. These regulations are proposed to be effective for investments made on or after October 2, 1990.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC: CORP:T:R (FI-84-90), Room 4429, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations published in *** [T.D. 8313, page 37, this Bulletin] add new §1.149(b)(3)-1T to the Income Tax Regulations (26 CFR Part 1). The new temporary regulations permit investments of tax-exempt bond proceeds in obligations issued by the Resolution Funding Corporation. The text of the new temporary regulations serves as a comment document for this notice of proposed rulemaking.

For the text of the temporary regulations, see T.D. 8313 published in *** [page 37, this Bulletin].

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before the adoption of these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Internal Revenue Service by any person who also submits written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Proposed Amendments to the Regulations

The temporary regulations, T.D. 8313, published in *** [page 37, this Bulletin], are hereby also proposed as final regulations under section 149 of the Internal Revenue Code.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on October 10, 1990, 11:51 a.m., and published in the issue of the Federal Register for October 15, 1990, 55 F.R. 41695)

Notice of Proposed Rulemaking

Backup Withholding and Due Diligence

IA-224-82

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document provides proposed regulations that relate to backup withholding under section 3406(a)(1)(A), (B), (C), and (D) of the Internal Revenue Code of 1986 (the "Code") when a payee fails to provide a taxpayer identification number in the manner required to a person required to make an information return, when the Internal Revenue Service or a broker notifies a payor or broker that a payee has furnished an incorrect taxpayer identification number, when a payee is subject to notified payee underreporting, or when a payee fails to certify, under penalties of perjury, that the

payee is not subject to backup withholding due to notified payee underreporting. These proposed regulations also reference the provisions of the Temporary Employment Tax Regulations under the Interest and Dividend Tax Compliance Act of 1983 (Part 35a) that were published in the Federal Register in question and answer format (Part 35a) on October 4, 1983 (48 FR 45362), November 25, 1983 (48 FR 53106), December 20, 1983 (48 FR 56332), February 28, 1984 (49 FR 7227), August 22, 1984 (49 FR 33237, 33240), April 23, 1987 (52 FR 13430), November 23, 1987 (52 FR 44861), and April 11, 1989 (54 FR 14341) concerning the actions that payors must take to establish the due diligence defense to the penalty under section 6676(b) for filing an information return with a missing or an incorrect taxpayer identification number.

Changes to the applicable tax law that are reflected in this document were made by the Interest and Dividend Tax Compliance Act of 1983 (97 Stat. 369), the Tax Reform Act of 1984 (98 Stat. 494), and the Tax Reform Act of 1986 (100 Stat. 2748). These regulations do not address the changes in law made by the Omnibus Budget Reconciliation Act of 1989 (103 Stat. 2106). These regulations affect payors, brokers, and payees of certain reportable payments and provide them with the guidance necessary to comply with the law.

DATES: Written comments and requests for a public hearing must be received by January 25, 1991. These regulations are proposed to be generally effective with respect to reportable payments made and transactions occurring after December 31, 1983.

ADDRESSES: Send comments and requests for a public hearing to: Internal Revenue Service, CC:CORP:T:R (IA-224-82) LR-224-82, Room 4429, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection-of-information requirements contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget in accordance with the requirements of the Paperwork Reduction Act (44 U.S.C. 3504 (h)). Comments on the collection-of-information requirements should be sent to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, D.C. 20503, with copies to the Internal Revenue Service, ATTN: IRS Reports Clearance Officer T:FP, Washington, D.C. 20224.

The collection-of-information requirements in this regulation are in §31.3406(a)-1; §31.6011(a)-11; §31.6051-4(a); §31.6302(c)-1(a)(1)(i)-(d) and §31.6413(a)-3. This information is required by the Internal Revenue Service to enable the Internal Revenue Service to enforce sections 3406, 6011, 6051, 6302, and 6413 of the Code. This information will be used to encourage compliance with respect to the reporting and payment of taxes on interest and dividend income and other reportable payments. The likely respondents and/or recordkeepers are: individuals, State or local governments, businesses, other for-profit institutions, Federal agencies, nonprofit institutions, and small businesses or organizations.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents/recordkeepers may require greater or less time, depending on their particular circumstances. Estimated total annual reporting and/or recordkeeping burden: 98,582 hours.

The estimated average annual burden per respondent/recordkeeper is approximately 1 hour. Estimated number of respondents and/or recordkeepers: 105,000.

Estimated annual frequency of responses: 17.

Submission to Small Business Administration

Pursuant to section 7805(f) of the Code, the rules proposed in this document will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

BACKGROUND

This document contains proposed regulations relating to the requirement that a payor or broker withhold 20 percent from any reportable payment under section 3406(a)(1)(A) or (a)(1)(B), or 20 percent from any reportable interest or dividend payment under section 3406(a)(1)(C) or (a)(1)(D) of the Code. These provisions were added to the Code by section 104 of the Interest and Dividend Tax Compliance Act of 1983 (Pub. L. 98-67, 97 Stat. 369, 371). These proposed regulations are proposed to be issued under the authority contained in section 3406(a), (b), (c), (e), (g), (h), and (i), section 6042(c), section 6044(e), section 6049(c), section 6103(q), section 6109, section 6302(c), section 6676, and section 7805 of the Code.

On October 4, 1983, the Federal Register published Temporary Employment Tax Regulations under the Interest and Dividend Tax Compliance Act of 1983 (26 CFR Part 35a) under sections 3406 and 6676(b) of the Internal Revenue Code of 1954 (26 CFR Part 35a.9999-1; T.D. 7916, 48 FR 45362 [1983-2 C.B. 272], as amended on November 25, 1983, by T.D. 7922, 48 FR 53111 [1983-2 C.B. 282], on November 23, 1987, by T.D. 8163, 52 FR 44861 [1987-2 C.B. 226], and on April 11, 1989, by T.D. 8248, 54 FR 14341 [1989-1 C.B. 280]). Additional temporary regulations were published in the Federal Register on November 25, 1983 (26 CFR Part 35a.9999-2; T.D. 7922, 48 FR 53106 [1983-2 C.B. 282], as amended on December 20, 1983, by T.D. 7929, 48 FR 56342 [1984-1 C.B. 285], on March 13, 1984, by T.D. 7922, 49 FR 9417, and on November 23, 1987, by T.D. 8163, [1987-2 C.B. 226] and on April 11, 1989, by T.D. 8248, 54 FR 14341 [1989-1 C.B. 280]), on December 20, 1983 (26 CFR Part 35a.9999-3; T.D. 7929, 48 FR 56332, as amended on January 3, 1984, by T.D. 7933, 49 FR 63 [1984-1 C.B. 300], on August 22, 1984, by T.D. 7966, 49 FR 33236 [1984-2 C.B. 324], on November 23, 1987, by T.D. 8163, 52 FR 44861, and on April 11, 1989, by T.D. 8248, 54 FR 14341), on February 28, 1984 (26 CFR Part 35a.9999-3A; T.D. 7946, 49 FR 7227 [1984-1 C.B. 302]), on August 22, 1984 (26 CFR Part 35a.9999-4T, T.D. 7966, 49 FR 33237, as amended on August 29, 1984, by T.D. 7972, 49 FR 34340 [1984-2 C.B. 327]; and 26 CFR Part 35a.9999-5, T.D. 7967, 49 FR 33240 [1984-2 C.B. 329], as

amended on September 19, 1984, by T.D. 7973, 49 FR 36645 [1984-2 C.B. 170], on August 20, 1985, by T.D. 8046, 50 FR 33526 [1985-2 C.B. 61], on April 3, 1986, by T.D. 8046, 51 FR 11447, and on December 19, 1986, by T.D. 8110, 51 FR 45453 [1987-1 C.B. 81], on May 19, 1988, by T.D. 8202, 53 FR 17927 [1988-1 C.B. 78]), on April 23, 1987 (26 CFR Part 35a.3406-2; T.D. 8137, 52 FR 13430 [1987-1 C.B. 302]), and on November 23, 1987 (26 CFR Part 35a.3406-1; T.D. 8163, 52 FR 44861 [1987-2 C.B. 226], as amended on April 11, 1989, by T.D. 8248, 54 FR 14341 [1989-1 C.B. 280]). Those regulations were published primarily to provide guidance under the Interest and Dividend Tax Compliance Act of 1983.

Explanation of Provisions

On August 31, 1983, after a news release was issued soliciting comments on backup withholding, a hearing was held at the Internal Revenue Service. The Service received numerous comments, all of which were carefully considered in preparation of both these proposed regulations and the temporary regulations that were published in question and answer format during 1983 and subsequently.

These proposed regulations generally reorganize and restate, in traditional regulation form, the rules contained in the previously published temporary regulations on backup withholding with changes in several areas where commentators have sought clarification. The Service recognizes that the proposed regulations are lengthy, but believes this is needed in order to provide clear guidance for the numerous situations where backup withholding is or is not applicable. In addition, an extensive table of contents has been added to make the regulations more accessible to readers.

General rules. These proposed regulations require withholding by a payor or broker at a 20 percent rate in certain situations. In general, payments that are subject to backup withholding include: (1) payments of rents, commissions, fees, or other forms of compensation for services and other fixed or determinable gains, profits, or income payments that are subject to reporting under section 6041 or 6041A(a); (2) payments of dividends that are subject to reporting under section 6042; (3) payments of patronage dividends that are subject to reporting under section 6044; (4) payments of interest and original issue discount that are subject to reporting under section 6049; (5) payments of certain fishing boat operators that are subject to reporting under section 6050A; (6) certain transactions effectuated by brokers and barter exchanges that are subject to reporting under section 6045; and (7) payments of royalties that are subject to reporting under section 6050N.

With respect to payments of interest, original issue discount, dividends, or patronage dividends (hereafter, "reportable interest or dividend payments"), backup withholding is required in four situations. First, backup withholding is required if a payee does not provide a taxpayer identification number to the payor in the manner required. An individual's taxpayer identification number is the individual's social security number. A nonindividual's taxpayer identification number is the entity's employer identification number. The term "nonindividual" means a trust, estate, corporation, or similar entity. With respect to pre-1984 accounts or instruments, the payee is required to provide his taxpayer identification number, either in writing or orally. With respect to accounts established or instruments acquired after 1983, the payee is required to certify, under penalties of perjury, that the payee's taxpayer identification number is correct. Second, backup withholding is required if the Internal Revenue Service or a broker notifies the payor that the payee's taxpayer identification number is incorrect. Third, backup withholding is required if the Internal Revenue Service or a broker notifies the payor that the payee is subject to backup withholding due to notified payee underreporting. Fourth, with respect to accounts established or instruments acquired after 1983, backup withholding is required if a payee fails to certify, under penalties of perjury, that the payee is not subject to backup withholding due to notified payee underreporting.

With respect to other reportable payments, backup withholding is required only in two situations. First, backup withholding applies if the payee does not provide a taxpayer identification number in the manner required. With respect to post-1983 brokerage or barter exchange relationships, the customer is required to certify, under penalties of perjury, that the taxpayer identification number provided is correct. With respect to all remaining types of reportable payments (e.g., rents, royalties, commissions, rents, pension or annuity distributions, etc.), the taxpayer identification number is not required to be certified under penalties of perjury. Second, backup withholding is required if the Internal Revenue Service or a broker notifies the payor that the payee's taxpayer identification number is incorrect.

Clarification and modifications. With respect to a "window transaction" as defined in these proposed regulations, backup withholding applies only if the payee fails to furnish a taxpayer identification number. The payee does not have to certify, under penalties of perjury, that the number provided is correct. In addition, commentators have questioned whether backup withholding is required with respect to a window transaction if the Internal Revenue Service notifies the payor to withhold either because of an incorrect taxpayer identification number under section 3406(a)(1)(B) or a notified payee underreporting under section 3406(a)(1)(C). Because requiring backup withholding on window transactions due to notification from the Service to withhold would create administrative problems for payors, these proposed regulations provide that the payor is required to withhold only on redemptions of United States savings bonds, or payments on interest coupons, commercial paper, or banker's acceptances, any of which are in definitive form, if the payee fails to provide a taxpayer identification number. Thus, payors of window transactions are not required to check their records to determine if the payee is subject to backup withholding under section 3406(a)(1)(B) or (C). Many commentators questioned the meaning of "in definitive form"; these proposed regulations provide a definition.

A person who furnishes a number that does not contain nine digits or contains an alpha character (*i.e.*, an obviously incorrect number) is treated

as failing to provide a taxpayer identification number. Thus, backup withholding applies to payments made to any payee who furnishes an obviously incorrect number. Commentators have questioned whether a number that contains nine identical digits (e.g., 999-99-9999) or nine sequential digits (e.g., 012-345-678) is a number with respect to which they should impose backup withholding on the account or instrument. Payors should not impose backup withholding when a payee furnishes such numbers because an obviously incorrect number for purposes of backup withholding is one that does not contain nine numerals. While the Service recognizes that these other numbers are likely to be erroneous, administrative problems for payors would result if the payor were required to determine whether a number containing nine digits is correct.

Backup withholding will apply with respect to numbers with nine numerals only when the Service notifies the payor that the number is incorrect. In this connection, payors are required to backup withhold only if the payor receives a notice of an incorrect number from the Internal Revenue Service under section 3406(a)(1)(B) on or after January 1, 1990.

Backup withholding only applies to reportable payments that are not withheld upon under another provision of the Code. Thus, payors are not required to withhold on a payment under more than one section of the Code.

Commentators requested clarification on the amount of a payment subject to backup withholding. These proposed regulations provide generally that the reporting threshold is to be ignored in determining the amount subject to backup withholding. Backup withholding, therefore, applies to the first dollar of any payment. There are limited exceptions to this rule, however, that are described in these proposed regulations. For example, a payor can elect not to withhold on reportable interest or dividend payments of $10 or less and which on an annualized basis would be $10 or less. This minimal payment rule means that payors look at the amount on a payment-by-payment basis. Thus, payors are not required to add the payments that they have made thus far in the year to determine whether the payee was paid more than $10 during the year. Payors are, however, required to annualize each payment. Annualization means that payors determine the amount the payment would have been for a 1-year period rather than for the period for which it is paid. For example, with respect to a savings account that pays interest quarterly, payors would not have to withhold on any quarterly payment that is $2.50 or less.

These proposed regulations do not require that a separate annualization computation be made for payments made on accounts opened between a payor's customary paying date. Because this could create administrative and programming problems for payors, these proposed regulations provide that, with respect to accounts opened during the payment cycle, a payor will be allowed to assume that the payment was made for the entire payment cycle.

Barter exchanges or brokers who effect sales of securities where the amount of the gross proceeds or other reportable payment under section 6045 is not more than $10 are also not required to withhold on those minimal amounts if the barter exchange or broker so elects. In addition, any window transaction that aggregates $10 or less is not subject to withholding if the payor so elects. Brokers, barter exchanges, or payors with respect to window transactions are not required to annualize the payments.

Commentators have requested guidance on whether backup withholding applies in instances where the sale of a fractional share results in less than $20 of gross proceeds that are not otherwise subject to information reporting under §5f.6045-1(c)(3)(ix). Although section 3406 permits backup withholding regardless of the amount that must be paid before an information return is required to be made, these regulations provide that gross proceeds of less than $20 resulting from the sale of a fractional share will not be subject to backup withholding.

With respect to taxable reinvestment plans, the regulations allow payors to ignore fees, commissions, or any discount in the purchase price of the shares in determining the amount subject to withholding.

A payor may elect to reduce the amount of interest subject to withholding when a premature withdrawal penalty is imposed with respect to a time savings account, a certificate of deposit, or similar deposit.

These proposed regulations describe the procedures for determining the amount of original issue discount subject to backup withholding. Commentators have questioned whether a subsequent holder of a short-term discount obligation is required to certify, under penalties of perjury, that the purchase price is correct. These proposed regulations provide that the holder is not required to certify such information.

With respect to payments that are subject to reporting under sections 6041 or 6041A(a) (e.g., rents, commissions, nonemployee compensation), the payor is generally not required to withhold on payments that aggregate less than $600 during a calendar year. Once the payment or payments aggregate $600, however, backup withholding applies to the entire payment that causes the amount to equal or exceed $600 and to any subsequent payments made to the payee during the year. For example, if a payor pays nonemployee compensation of $550 to a person on February 25 and pays $50 on December 3, these proposed regulations clarify that the payor is only required to withhold 20 percent of $50 even though $600 of reportable payments were paid during the year. Exceptions to the $600 rule exist if the payor was required to make an information return for the preceding calendar year or the payor was required to impose backup withholding during the preceding calendar year. In these instances, the payor is required to withhold on the first dollar of any payment to the payee.

In the case of a corporate reorganization where a payee is required to exchange stock held in the former corporation for stock in the new corporation before the dividends which have been paid with respect to the stock in the new corporation will be provided to the payee, the temporary regulations provide that the dividend is considered paid for purposes of backup withholding on the payment date without regard to when the payee actually exchanges the stock and receives the dividend. Commentators

have stated, however, that current industry practice for paying and recordkeeping purposes is to treat the dividend as paid on the date that the shares are exchanged since that is the date the payee receives the dividend. Thus, these proposed regulations provide that in the case of a corporate reorganization, the dividends are treated as paid for purposes of backup withholding on the date that the payee actually exchanges the stock in the former corporation and receives the dividend.

The temporary regulations and these proposed regulations provide similar rules for a person who is awaiting a taxpayer identification number and set forth the requirements for such a payee to qualify for a 60-day exemption period. Both regulations also provide that the exemption does not apply to window transactions. These proposed regulations provide further that the exemption does not apply to the redemption of a bearer bond that is subject to reporting under section 6045. As with window transactions, the payor with respect to a bearer bond would not have funds on which to withhold after the 60-day period if the payee did not provide a taxpayer identification number. Thus, these proposed regulations provide that a person who presents a bearer bond after September 27, 1990, will be subject to backup withholding unless the person provides a certified taxpayer identification number.

Moreover, with respect to other reportable gross proceeds under section 6045, the regulations provide that when a payee instructs a broker to sell or retire an obligation and the customer does not have a taxpayer identification number, the broker may allow the payee to furnish the number in the manner required within 60 days of the sale provided the customer provides an awaiting-TIN certificate and does not withdraw or reinvest more than 80 percent of the gross proceeds. If the broker does not receive the customer's taxpayer identification number in the manner required on or before the 60th day after the sale or redemption, the broker is required to withhold 20 percent of the gross proceeds.

Commentators have also requested a definition of a readily tradable instrument. Accordingly, these regulations provide a definition. In addition, with respect to a readily tradable instrument acquired through a broker and not held in street name, the regulations clarify that a payor may assume that the taxpayer identification number and other information received from a broker are correct. The broker is generally required only to notify the payor if the payee failed to provide a certification to the broker that the taxpayer identification number is correct or that the payee is not subject to backup withholding due to notified payee underreporting. The payor may ignore a notice from the broker that the payee has failed to make the certification to the broker, however, if the payor has received the certification directly from the payee.

The payor of an instrument acquired through a broker is required to send a notice to the payee if (1) the broker notifies the payor of the readily tradable instrument that the payee failed to provide the certifications (and the payor has not received that certification from the payee directly) or (2) the broker notifies the payor that the Internal Revenue Service notified the broker that the payee is subject to backup withholding or the Internal Revenue Service notifies the payor to impose backup withholding. Whenever the payor is required to notify the payee that backup withholding has commenced or will commence with respect to a readily tradable instrument, the notice must inform the payee of the condition or conditions for imposing backup withholding and explain what the payee must do to stop backup withholding. These proposed regulations amend the language of the notice that the payor sends to notify the payee that backup withholding has commenced or will commence as a result of a certification failure. With respect to the notice that a payor is required to send after being notified by the Service or a broker that a payee is subject to backup withholding under section 3406(a)(1)(B) or section 3406(a)(1)(C), these proposed regulations incorporate those requirements set forth in the temporary regulations.

Special rules exist when an account is established directly with, or an instrument is acquired directly from, the payor by means of electronic or mail communication. The temporary regulations provide that, at the payor's option, the payee may be given 30 days to provide the required certifications as long as the payee furnishes a taxpayer identification number at the time of acquisition. Many commentators asked whether this special rule in the temporary regulations is limited to mutual funds. These proposed regulations clarify that these special rules apply to an account or other readily tradable instrument that is established directly with, or acquired directly from, any payor, including bank deposits, certificates of deposit, or repurchase agreements, provided the account or instrument is established or acquired by means of electronic or mail communication. In addition, these proposed regulations clarify that a broker who holds an instrument as nominee for a payee (*i.e.*, in street name) is considered a payor. Accordingly, these special rules apply where an instrument is acquired from a broker by means of electronic or mail communication and the broker holds the instrument in street name for a payee.

With respect to a post-1983 brokerage account through which a readily tradable instrument is sold by electronic means (*i.e.*, by telephone or wire instruction), commentators requested clarification of the special rule that the broker may permit the customer to furnish the required certification that his taxpayer identification number is correct within 30 days of the sale, provided the customer furnishes his taxpayer identification number at the time of the sale and does not withdraw or reinvest more than 80 percent of the gross proceeds before furnishing the certification. Although the temporary regulations provide that reinvestment of up to 80 percent of the gross proceeds in other securities will not be considered a withdrawal, commentators objected to the provision that withdrawal of any amount of cash results in immediate imposition of backup withholding. These proposed regulations alter that rule and provide that as long as at least 20 percent of the gross proceeds are held in cash, the broker may permit the customer to furnish the required certification within 30 days of the sale. If no certified number is received within 30 days of the sale or if the customer withdraws or

reinvests more than 80 percent of the gross proceeds before the broker receives the certification, however, the broker must withhold 20 percent of the reportable gross proceeds at that time. Thus, the broker rules more closely parallel the special 30-day rule with respect to reportable interest or dividends.

In the case of an issuer or its paying agent of a taxable interest coupon who receives an envelope or "shell" used for processing the coupon signed by the payee stating that the interest is exempt from taxation under section 103(a) (relating to interest on certain State or local governmental obligations), commentators requested clarification of whether the amount is subject to backup withholding if the interest is not, in fact, tax-exempt. Because the middleman payor (e.g., bank or broker) may only treat the interest as tax-exempt by receiving a properly completed "shell" or envelope from the payee (including the payee's name, address, and taxpayer identification number) under §1.6049-5(b)(2), the issuer will not be required to withhold even if the interest is taxable because the shell or envelope will contain the payee's taxpayer identification number. If the middleman payor does not receive a properly completed shell or envelope from the payee, including the payee's taxpayer identification number, the middleman payor is not permitted to treat the interest as tax-exempt. Accordingly, the middleman payor would be required to impose backup withholding if the interest is not, in fact, tax-exempt and the payee did not furnish his taxpayer identification number.

Many commentators questioned whether specific transactions are subject to broker reporting under section 6045. Examples provided in these regulations show that certain transactions are covered under section 6045 and thus are subject to backup withholding. Please note, however, that real estate transactions subject to information reporting by a real estate reporting person, as defined under section 6045(e)(2), are not subject to backup withholding (pursuant to section 3406(h)(5)(D)) except as provided in regulations. These proposed regulations do not contain backup withholding requirements with respect to real estate transactions.

Many commentators also questioned whether they were required to obtain a certificate each time a payee opens a new account or brokerage relationship even if the payor already has a certificate from the payee. These proposed regulations clarify that a payor, at its option, may require a payee to file only one Form W-9 for all accounts or instruments of the payee. If the payor elects this option and already has a certificate on file with respect to the payee, the payor is not required to obtain another certificate from the payee.

Many commentators questioned whether the payor or broker must provide the Form W-9 instructions to the payee with respect to new accounts or brokerage relationships where the payor or broker devises a substitute Form W-9. These proposed regulations provide that the instructions or the substance of those instructions do not have to be furnished to the payee. With respect to such accounts, the payee need only be instructed to strike out the language of the certification that relates to payee underreporting if the payee is subject to backup withholding due to notified payee underreporting.

Many commentators questioned whether a payee, who has never furnished a taxpayer identification number with respect to a pre-1984 account or a brokerage account other than a post-1983 brokerage account, must certify, under penalties of perjury, that his number is correct if the payee furnishes his taxpayer identification number for the first time after 1983. These proposed regulations clarify that the payee is not required to certify that his taxpayer identification number is correct if he is furnishing the number with respect to a pre-1984 account or a brokerage relationship other than a post-1983 brokerage account.

Clarification has also been requested with respect to how backup withholding applies to accrued interest. The regulations under section 6049 provide that when a bond is purchased between interest payment dates, the portion of the purchase price attributable to accrued interest is not reportable under section 6049. If a broker is involved in the transfer of the obligation, however, the broker is required to report the gross proceeds of the sale. Accrued interest is a portion of the proceeds of the sale. The regulations under section 6045 provide that, in reporting the total gross proceeds, the broker is required to file a Form 1099-INT showing the amount of accrued interest and is required to file a Form 1099-B showing the remainder of the proceeds of the sale. Therefore, backup withholding will apply to the gross proceeds of the sale (including the accrued interest portion) if the payee does not provide a taxpayer identification number in the manner required or the Internal Revenue Service notifies the broker that the payee's number is incorrect.

Based on the questions received relating to the treatment of grantor trusts, these proposed regulations adopt the rule in the temporary regulations in the Federal Register on April 11, 1989 (54 FR 14341) that relate to grantor trusts with ten or fewer grantors. Accordingly, these proposed regulations provide that a grantor trust with ten or fewer grantors is not a payor for purposes of backup withholding. Such grantor trust is not required to impose backup withholding when it receives a reportable payment. However, the trustee of a grantor trust having ten or fewer grantors may not certify, under penalties of perjury, that the trust is not subject to backup withholding due to notified payee underreporting or that the taxpayer identification number provided by the trustee is correct unless each grantor has furnished the trustee with such certifications, and the trustee uses the taxpayer identification numbers provided by the grantors on the Form 1041 filed by the trustee. Grantor trusts that have more than ten grantors are considered payors of such payments to each grantor (payee), in proportion to each grantor's ownership of the trust.

Many commentators requested clarification in the depositing procedures for amounts withheld under backup withholding. These proposed regulations provide that the payor must remit the amounts withheld under backup withholding in the same manner that an employer remits social security and income tax withheld from wages. Thus, the eighth-monthly trigger procedures are used. A payor may aggregate amounts withheld for backup withholding with

amounts withheld from wages to determine when to remit the withheld amounts. Alternatively, a payor may elect to remit amounts withheld under backup withholding separately from amounts withheld from wages. Regardless of the manner in which the payor elects to treat withheld amounts for purposes of determining the time within which such amounts are required to be deposited, a payor must report the amounts withheld under section 3406 on the same Form 941 that the payor uses to report the employment taxes deposited. The Form 941 has been revised to include a Schedule A to report amounts deposited for backup withholding. If the payor decides to treat backup withholding as a separate tax, the payor should mark 945 on the FTD coupon (Federal Tax Deposit coupon) in remitting backup withholding, should complete Schedule A, and should attach the schedule to Form 941 when the payor (employer) reports to the Internal Revenue Service the amounts remitted during the quarter. With respect to a payor who has a paying agent, the Service has issued Rev. Proc. 84-33 explaining the procedures for an agent to use in depositing and reporting withheld amounts.

Clarification also has been requested with respect to the refund of amounts erroneously withheld under section 3406. These proposed regulations provide that a payor may refund the amount erroneously withheld from the payee during the same calendar year. Payors must retain a receipt of the amount refunded. A cancelled check or a notation on the payee's statement will be treated as the required receipt.

With respect to erroneous withholding on a payment to a middleman payor, the regulations provide that the middleman payor may adjust deposits of the tax which the middleman payor is required to make, by claiming a credit for the amount of tax withheld by the upstream payor. The middleman payor would pay the full amount to the payee if no condition for imposing backup withholding exists with respect to its payee.

For purposes of information reporting under section 6041 and backup withholding, a reportable gambling winning is any winning (other than from keno, bingo, or slot machines) that is $600 or more and that is based on betting odds of 300 to 1, or higher. Reportable gambling winnings will be subject to backup withholding if tax is not actually withheld under section 3402(q) and the payee does not provide a taxpayer identification number.

Effect of the Tax Reform Act of 1984 on Backup Withholding. The Tax Reform Act of 1984 (98 Stat. 494) made three material technical corrections relating to backup withholding under section 3406. First, section 6042 was amended to provide that payments made to exempt recipients (as defined in section 6049(b)(4)) are not subject to information reporting under section 6042. Because such payments are not subject to information reporting, backup withholding will not apply to such payments of dividends. These proposed regulations, unlike the temporary regulations, do not expand the class of payees to which backup withholding will not apply. For example, if the payment is reportable because it is made to a payee who is not an exempt recipient (determined under the applicable reporting section), then backup withholding will apply unless the payment is made to an organization exempt from taxation under section 501(a) or an individual retirement plan, the United States, a State, a foreign government, an international organization, or any wholly owned agency or instrumentality of the foregoing). Because backup withholding is intended to be the enforcement mechanism of the information reporting system, these regulations do not provide any additional exempt recipients under section 3406(g)(1)(A) for purposes of backup withholding.

Second, the Act contains a technical correction to provide rules under section 643 to deal with the allocation of credit for amounts withheld from reportable payments to trusts, estates, and their beneficiaries.

Finally, the Act has a technical correction to coordinate pension and annuity withholding under section 3405 with information reporting under section 6041 and backup withholding under section 3406. The applicable regulations in this document concerning pension and annuity payments will continue to apply for such payments made prior to December 31, 1984, unless the payor elected otherwise, and to certain distributions made after June 30, 1984. See §31.3406(g)-2(c)(1).

Effect of the Tax Reform Act of 1986 on Backup Withholding. The Tax Reform Act of 1986 ("the 1986 Act") made two significant changes in the law relating to backup withholding that are reflected in these proposed regulations. First, the 1986 Act added section 6050N to the Internal Revenue Code to require information reporting on royalty payments. Under prior law, royalty payments were reported under section 6041 to the extent the payments totaled $600 or more during a calendar year. These payments were treated as reportable under section 6041 and hence subject to backup withholding if one of the two conditions for imposing backup withholding existed. In addition, royalty payments under section 6041 were treated as "reportable" for backup withholding purposes if the payor was required to make an information return under section 6041 for the immediately preceding calendar year with respect to payments to the payee or if the payor was required to withhold during the preceding calendar year with respect to payments to the payee that were reportable under section 6041. In either of these two events the payor was required to withhold whether or not the payor's payments to the payee equalled or exceeded $600 for the year. After the enactment of section 6050N, however, royalty payments are only subject to information reporting and, hence, to backup withholding if the payments aggregate $10 or more during the calendar year.

The 1986 Act also imposes a statement mailing requirement for payee statements of royalties reportable under section 6050N(a), and it amends the separate mailing provisions under prior law by imposing an identical statement mailing requirement on payee statements of dividends, patronage dividends, and interest under sections 6042(c), 6044(e), and 6049(c). The Internal Revenue Service issued guidance to the public on the statement mailing requirement in Notice 87-17, 1987-1 C.B. 454. That notice specifically provided that the payee statement could not be perforated to a permissible enclosure in a statement mailing. Many commentators objected to this limitation and stated that

the purpose of the liberalization of the separate mailing requirement was, in part, to permit a perforated statement. Upon reconsideration, the Internal Revenue Service issued Notice 87-70, 1987-2 C.B. 380, to permit the statement to be perforated to a check or statement of a payee's account. These proposed regulations reflect the statement-mailing rules in Notice 87-17 as modified by Notice 87-70. The proposed rules in this document containing the statement-mailing requirements will amend earlier proposed regulations on information reporting that were published in the Federal Register on February 29, 1988 (53 FR 5991).

Effect of the Omnibus Budget Reconciliation Act of 1989 on Due Diligence. These proposed regulations reference the questions and answers in the temporary regulations relating to the due diligence requirement under section 6676, which imposed a $50 penalty on a payor filing an information return with a missing TIN or an incorrect TIN unless the payor exercised due diligence. However, effective for information returns filed with respect to the 1989 calendar year and thereafter, the Act repealed section 6676. The questions and answers referenced in these proposed regulations thus apply only to information returns with respect to calendar years prior to 1989. These proposed regulations do not provide guidance with respect to the penalty under section 6721 for filing an information return with a missing or an incorrect taxpayer identification number.

Changes from the Temporary and Proposed Regulations Issued under Section 3406(a)(1)(B), Backup Withholding due to an Incorrect TIN. The rules and regulations section of this issue of the Federal Register contains amendments to temporary regulation §35a.3406-1, which provides rules for backup withholding under section 3406(a)(1)(B). The substance of that regulation, as amended, is included in these proposed regulations.

One amendment made to §35a.3406-1 exempts certain fiduciary and nominee accounts from backup withholding under section 3406(a)(1)(B) until final regulations are issued. Under these proposed regulations, such accounts would not be exempt from backup withholding under section 3406(a)(1)(B) following receipt of a "B" notice after final regulations are issued. The Service invites comments from payors on how fiduciary and nominee accounts can be formatted on information returns so that the correct name/TIN combination can be identified and backup withholding can be avoided.

Changes from the Temporary Regulations Issued under Section 3406(a)(1)(C), Notified Payee Underreporting. The proposed regulations on backup withholding due to notified payee underreporting as set forth in §31.3406(c)-1 of this document incorporates those rules in the temporary regulations on this subject that were published in the Federal Register on April 23, 1987 (52 FR 13430), with several changes. This document clarifies the rules in the temporary regulations and adds examples to illustrate how some of the substantive provisions should apply.

For instance, the Internal Revenue Service received several inquiries concerning how a paying agent must impose backup withholding under section 3406(a)(1)(C). The inquiry arises because a paying agent may remit reportable interest or dividend payments on behalf of a payor to a payee who also maintains a separate account with the paying agent that pays reportable interest or dividends. Thus, the question that has arisen is whether the paying agent must search its own accounts as well as the accounts of the instructing payor to impose backup withholding on the payee under section 3406(a)(1)(C). The proposed regulations in this document provide that the paying agent is only required to search the accounts of the payor stated on the notice using that payor's taxpayer identification number.

Payors also asked whether they must check their records each time a payee opens a new post-1983 account paying reportable interest or dividends and makes the certification required under section 3406(a)(1)(D). These proposed regulations clarify that payors do not have an affirmative duty to search their records in this circumstance.

Several payors were concerned about which information they should use to locate the accounts of a payee subject to backup withholding under section 3406(a)(1)(C) in those circumstances in which the notice from the Service instructing the payor to commence backup withholding under section 3406(a)(1)(C) lists information from a joint account. Because of this concern, the provisions in §31.3406(c)-1 of these proposed regulations on joint accounts are clarified. In addition, these proposed regulations provided examples to show the application of backup withholding on a joint account.

Finally, the regulations under proposed §31.3406(c)-1 provide that a payor who fails to send the notice required under section 3406(a)(4) to a payee subject to backup withholding under section 3406(a)(1)(C) may be subject to civil or criminal penalties.

Certain Reportable Payments Made Outside the United States by Foreign Persons, Foreign Offices of United States Banks and Brokers, and Others. The temporary regulations state that the applicability of the backup withholding rules to certain reportable payments made outside the United States is under consideration. *See* §35a.9999-3(A-34),(A-36);§35a.9999-4(A-1), (A-5). It has been decided not to require backup withholding with respect to such reportable payments unless the payor has actual knowledge that the payee is a United States person, and the proposed regulations reflect this decision at §31.3406(g)-1(e).

Concluding Comments

The Internal Revenue Service, in proposing these regulations, has strived to provide as much flexibility as possible to payors in complying with the backup withholding rules. For example, many payors commented that they would need time to process taxpayer identification numbers or certificates that they receive from their payees. The regulations provide them with the needed flexibility by requiring that payors process a number or certificate within 30 days of filing, but permitting payors to process them sooner if they choose.

Many payors requested that they be able to prepare and provide certificates to their payees. The proposed regulations allow payors to devise their own certificates that may be incorporated into account signature cards or other instrument purchase

agreements as long as the payor complies with the specifications of Rev. Proc. 83-89, 1983-2 C.B. 613. The Service has also given payors the authority to refuse to accept forms or certificates the payor itself has not prepared, so long as the payor promptly furnishes to the payee an acceptable form.

In response to requests by some payors, the proposed regulations provide that due to the volume of certificates payors receive, payors are permitted to retain only a microfilm or microfiche copy of the certificate and to destroy the paper certificates.

The temporary regulations provide that, with respect to the proceeds of a broker or barter exchange transaction, backup withholding applies on the sale date (*i.e.*, the date the transaction is entered on the books of the broker or barter exchange). Several commentators have indicated that this rule is difficult to administer because payment often occurs after the sale date. Accordingly, the proposed regulations provide that the obligation to backup withhold arises on the sale date, but that the broker or barter exchange is not required to satisfy its backup withholding liability until payment is made.

The proposed regulations describe exempt recipients and allow them to be treated as exempt recipients at the option of the payor even though they have not filed a certificate claiming exempt status with the payor. This rule is provided because some payors explained that they do not have the capability of determining whether the payee is an exempt recipient. Thus, the regulations provide that a payor may refuse to treat a payee as exempt unless the payee files a certificate and may treat a payee who does not file a certificate as a payee who is not an exempt recipient. Further, many payors commented on the problems that would result if the payor withheld on such an exempt recipient. As a result of these concerns, if a payor withholds on an exempt recipient because the payee fails to provide a certificate, the proposed regulations allow a payor, at its option, to treat the amount as erroneously withheld and refund it to the exempt recipient.

With respect to a payment in property, the proposed regulations allow the payor to withhold from an alternative source. If the alternative account or source is not payable to the person or persons listed on the account subject to backup withholding, then the payor must obtain a written statement from the non-common owner(s) of the alternative source property allowing the payor to withhold from the alternative account or source. Additionally, payors expressed concern about their liability for backup withholding on a payment in property when there is no alternative source of cash available to withhold upon. Thus, these proposed regulations provide that, except with respect to prizes, awards and gambling winnings, the obligation to backup withhold may be deferred, at the payor's option, until the payor makes a cash payment to the account subject to backup withholding or cash is otherwise deposited in the account.

Finally, the Internal Revenue Service recognizes that there may be industry-specific business and regulatory constraints that make it difficult for certain types of payors to comply with certain backup withholding procedures. Accordingly, the Internal Revenue Service requests comments on these and other areas in which payors need additional flexibility. The Internal Revenue Service will attempt to accommodate such needs to the extent that doing so is consistent with the statute and would not unduly burden effective tax enforcement and administration.

Special Analyses

These proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. Although this document is a notice of proposed rulemaking that solicits public comments, the notice and public procedure requirements of 5 U.S.C. §553 do not apply because the regulations proposed herein are interpretative. Therefore, an initial Regulatory Flexibility Analysis is not required by the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably nine copies) to the Commissioner of Internal Revenue. Interested parties are encouraged to submit written comments by mail and to make oral comments on both the substantive and operational aspects of backup withholding under section 3406 and the penalty under section 6676 at any hearing that might be scheduled. All written comments will be available for public inspection and copying. A public hearing will be held upon written request to the Internal Revenue Service by any person who has submitted written comments. The Internal Revenue Service anticipates scheduling one hearing to accommodate requests (1) under this notice of proposed rulemaking, and (2) under the amendments to the temporary regulations under section 3406(a)(1)(B) concerning the imposition of backup withholding due to an incorrect taxpayer identification number in this issue of the Federal Register. Notice of the time and place of the public hearing will be published in the Federal Register.

List of Subjects

26 CFR 1.6001-1—1.6109-2

Income taxes, Administration and procedure, Filing requirements, Reporting and Recordkeeping requirements.

26 CFR Part 31

Employment taxes, Income taxes, Lotteries, Railroad retirement, Social security, Unemployment tax, Withholding, Interest and Dividend Tax Compliance Act of 1983.

26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Penalties, Pensions, Reporting and Recordkeeping requirements, Statistics, Taxes, Disclosure of information, Filing requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Proposed amendments to the regulations

The proposed amendments to 26 CFR Parts 1, 31, 301, and 602 read as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. Authority for Part 1 continues to read in part:

Authority: 26 U.S.C. 7805***

Par. 2. Section 1.6042-5, as proposed on February 29, 1988 (53 FR 5995), is amended by adding the text of paragraph (c)(2) to read as set forth below:

§1.6042-5 Official statements to recipients of dividends paid after December 31, 1983.

* * * * *

(c) *Manner of providing the official statement to the recipient.* * * *

(2) *Statement mailing requirement for forms to be filed after October 22, 1986*—(i) *In general.* With respect to a Form 1099 that is required to be filed after October 22, 1986 (without regard to extensions), the mailing of a Form 1099 to a payee-recipient required under section 6042(c) must qualify as a statement mailing. A statement mailing shall contain the required Form 1099 (written statement). In addition, the mailing may contain the following enclosures:

(A) A check with respect to the account reported on the written statement,

(B) A letter explaining why a check with respect to such account is not enclosed with the written statement (for example, because a dividend has not been declared payable),

(C) A statement of the taxpayer's specific account with the payor if payments on such account are reflected on the written statement,

(D) A letter limited to an explanation of the tax consequences of the information set forth on the enclosed written statement,

(E) Payee statements related to other Forms 1099, Form 1098, and Form 5498 (or the account balance on a Form 5498), Forms W-2 and W-2P, and

(F) Any documents concerning the solicitation of the Form W-9 and Form W-8. Further, to qualify as a statement mailing, the outside of the envelope in which the written statement is mailed and each nontax enclosure enclosed in the envelope must contain, in a bold and conspicuous type, the legend: "Important Tax Return Document Enclosed". For purposes of this paragraph, a nontax enclosure is any item listed in paragraph (c)(2)(i)(A), (B), or (C) of this section. A statement mailing includes a separate mailing as described under paragraph (c)(1) of this section. However, a payor is not required to include the legend on the outside of an envelope containing a separate mailing. The requirement to provide the written statement in person or by first-class mail may be satisfied by sending the written statement and any enclosures described in this paragraph by intra-office mail, provided that intra-office mail is used by the payor in sending account activity, balance information, and other correspondence to the payee. If a payor does not personally deliver the written statement (*i.e.*, Form 1099) to the recipient or mail it to the recipient in a statement mailing as described in this paragraph, the payor shall be considered to have failed to mail the statement required under section 6042(c) and will be subject to the penalty under section 6722.

(ii) *Limitation on enclosures.* No enclosures, other than those permitted under paragraph (c)(2)(i) of this section, and no promotional or advertising material are permitted in the mailing of the written statement. Even a *de minimis* amount of such material violates the statement mailing requirement. However, a logo on the envelope containing the written statement and on nontax enclosures as described in paragraph (c)(2)(i) of this section does not violate the written statement requirement.

(iii) *Perforated written statement.* The written statement required under section 6042(c) and paragraph (c)(2) of this section may be perforated to a check or to a statement of the payee's specific account with the payor as described in paragraph 6042(c)(2)(i)-(A) or (C). The enclosure to which the written statement is perforated must contain, in a bold and conspicuous type, the legend: "Important Tax Return Document Attached".

* * * * *

Par. 3. Section 1.6044-6, as proposed on February 29, 1988 (53 FR 5996), is amended by adding the text of paragraph (c)(2) to read as set forth below:

§1.6044-6 Official statements to recipients for payments after December 31, 1983.

* * * * *

(c) *Manner of providing the official statement to the recipient.****

(2) *Statement mailing requirement for forms to be filed after October 22, 1986*—(i) *In general.* With respect to a Form 1099 that is required to be filed after October 22, 1986 (without regard to extensions), the mailing of a Form 1099 to a payee-recipient required under section 6044(e) must qualify as a statement mailing. A statement mailing shall contain the required Form 1099 (written statement). In addition, the mailing may contain the following enclosures:

(A) A check with respect to the account reported on the written statement,

(B) A letter explaining why a check with respect to such account is not enclosed with the written statement (for example, because a dividend has not been declared payable),

(C) A statement of the taxpayer's specific account with the payor if payments on such account are reflected on the written statement,

(D) A letter limited to an explanation of the tax consequences of the information set forth on the enclosed written statement,

(E) Payee statements related to other Forms 1099, Form 1098, and Form 5498 (or the account balance on a Form 5498), Forms W-2 and W-2P, and

(F) Any documents concerning the solicitation of the Form W-9 and Form W-8.

Further, the outside of the envelope in which the written statement is mailed and each nontax enclosure included in the envelope must contain, in a bold and conspicuous type, the legend: "Important Tax Return Document Enclosed". For purposes of this paragraph, a nontax enclosure is any item listed in paragraph (c)(2)(i)(A), (B), or (C) of this section. A statement mailing includes a separate mailing as described under paragraph (c)(1) of this section. However, a payor is not required to include the legend on the outside of an envelope containing a separate mailing. The requirement to provide the written statement in person or by first-class mail may be satisfied by sending the written statement and any enclosures described in this paragraph by intra-office mail, provided that intra-office mail is used by the payor in sending account activity, balance

information, and other correspondence to the payee. If a payor does not personally deliver the written statement (*i.e.*, the Form 1099) to the recipient or mail it to the recipient in a statement mailing as described in this paragraph, the payor shall be considered to have failed to mail the statement required under section 6044(e) and will be subject to the penalty under section 6722.

(ii) *Limitation on enclosures.* No enclosures, other than those permitted under paragraph (c)(2)(i) of this section, and no promotional or advertising material are permitted in the mailing of the written statement. Even a de minimis amount of such material violates the statement mailing requirement. However, a logo on the envelope containing the written statement and on any enclosure as described in paragraph (c)(2)(i) of this section does not violate the written statement requirement.

(iii) *Perforated written statement.* The written statement required under section 6044(e) and paragraph (c)(2) of this section may be perforated to a check or to a statement of the payee's specific account with the payor as described in paragraph 6044(c)(2)(i)-(A) or (C). The enclosure to which the written statement is perforated must contain, in a bold and conspicuous type, the legend: "Important Tax Return Document Attached".

* * * * *

Par. 4. Section 1.6049-6(e), as proposed on February 29, 1988 (53 FR 6009), is amended by adding paragraphs (e)(5)(ii), (iii), and (iv) to read as set forth below:

§1.6049-6 Statements to recipients of interest payments and holders of obligations as to which there is attributable original issue discount.

* * * * *

(e) *Official statement to recipient for payments made after December 31, 1983.* * * *

* * * * *

(5) *Manner and time of providing the official statement to the recipient.* ***

* * * * *

(ii) *Statement mailing requirement for forms to be filed after October 22, 1986.* With respect to a Form 1099 that is required to be filed after October 22, 1986 (without regard to extensions), the mailing of a Form 1099 to a payee-recipient required under section 6049(c) must qualify as a statement mailing. A statement mailing shall contain the required Form 1099 (written statement). In addition, the mailing may contain the following enclosures:

(A) A check with respect to the account reported on the written statement,

(B) A letter explaining why a check with respect to such account is not enclosed with the written statement (for example, because interest on the account has not been paid or credited to the account),

(C) A statement of the taxpayer's specific account with the payor if payments on such account are reflected on the written statement,

(D) A letter limited to an explanation of the tax consequences of the information set forth on the enclosed written statement,

(E) Payee statements related to other Forms 1099, Form 1098, and Form 5498 (or the account balance on a Form 5498), Forms W-2 and W-2P, and

(F) Any documents concerning the solicitation of the Form W-9 and Form W-8.

Further, to qualify as a statement mailing, the outside of the envelope in which the written statement is mailed and each nontax enclosure included in the envelope must contain, in a bold and conspicuous type, the legend: "Important Tax Return Document Enclosed". For purposes of this paragraph, a nontax enclosure is any item listed in paragraph (e)(5)(ii)(A), (B), or (C) of this section. A statement mailing includes a separate mailing as described under paragraph (e)(5)(i) of this section. However, a payor is not required to include the legend on the outside of an envelope containing a separate mailing. The requirement to provide the written statement in person or by first-class mail may be satisfied by sending the written statement and any permissible enclosures by intra-office mail, provided that intra-office mail is used by the payor in sending account activity, balance information, and other correspondence to the payee. If a payor does not personally deliver the written statement (*i.e.*, Form 1099) to the recipient or mail it to the recipient in a statement mailing as described in this paragraph, the payor shall be considered to have failed to mail the statement required under section 6049(c) and will be subject to the penalty under section 6722.

(iii) *Limitation on enclosures.* No enclosures, other than those permitted under paragraph (e)(5)(ii) of this section, and no promotional or advertising material are permitted in the mailing of the written statement. Even a *de minimis* amount of such material violates the statement mailing requirement. However, a logo on the envelope containing the written statement and on any enclosure as described in paragraph (e)(5)(ii) of this section does not violate the written statement requirement.

(iv) *Perforated written statement.* The written statement required under section 6049(c) and paragraph (e)(5)(ii) of this section may be perforated to a check or to a statement of the payee's specific account with the payor as described in paragraph (e)(5)(ii)(A) or (C). The enclosure to which the written statement is perforated must contain, in a bold and conspicuous type, the legend:

"Important Tax Return Document Attached".

* * * * *

Par. 5. A new §1.6050N-1 is added to read as follows:

§1.6050N-1 Statement to recipients of royalties paid after December 31, 1986.

(a) *In general*—(1) *Manner of providing the official statement to the payee.* With respect to a Form 1099 that is required to be filed after December 31, 1986 (without regard to extensions), reporting the payment of royalties under section 6050N, the payor making such payments is required under section 6050N(b) to furnish a written statement to each person whose name is required to be shown on the Form 1099 (recipient). The written statement shall be furnished either in person or in a statement mailing by first class mail. The requirement to furnish a written statement shall be met by furnishing an official Form 1099 to the recipient. The official Form 1099 shall be the form prescribed by the Secretary for the calendar year. For purposes of section 6050N(b) and this paragraph (a), a payor may use a form that contains provisions that are substantially similar to those of the official Form 1099 if the payor complies with

all applicable revenue procedures relating to substitute Forms 1099. The mailing of a Form 1099 to a recipient required under section 6050N(b) must qualify as a statement mailing.

(i) *Statement mailing requirement.* A statement mailing shall contain the required Form 1099 (written statement). In addition, the mailing may contain the following enclosures:

(A) A check with respect to the account reported on the written statement,

(B) A letter explaining why a check with respect to such account is not enclosed with the written statement (for example, because a royalty payment has not been made),

(C) A statement of the taxpayer's specific account with the payor if payments on such account are reflected on the written statement,

(D) A letter limited to an explanation of the tax consequences of the information set forth on the enclosed written statement,

(E) Payee statements related to other Forms 1099, Form 1098, and Form 5498 (or the account balance on a Form 5498), Forms W-2 and W-2P), and

(F) Any documents concerning the solicitation of the Form W-9 and Form W-8.

Further, to qualify as a statement mailing, the outside of the envelope in which the written statement is mailed and each nontax enclosure included in the envelope must contain, in a bold and conspicuous type, the legend: "Important Tax Return Document Enclosed". For purposes of this paragraph, a nontax enclosure is any item listed in paragraph (a)(1)(i)(A), (B), or (C) of this section. However, a payor is not required to include the legend on the outside of an envelope that contains a mailing that would qualify as a separate mailing. See §1.6042-5(c)(1). The requirement to provide the written statement in person or by first-class mail may be satisfied by sending the written statement and any enclosures described in this paragraph by intra-office mail, provided that intra-office mail is used by the payor in sending account activity, balance information, and other correspondence to the payee. If a payor does not personally deliver the written statement (*i.e.*, the Form 1099) to the recipient or mail it to the recipient in a statement mailing as described in this paragraph, the payor shall be considered to have failed to mail the statement required under section 6050N(b) and will be subject to the penalty under section 6722.

(ii) *Limitation on enclosures.* No enclosures, other than those permitted under paragraph (a)(1)(i) of this section, and no promotional or advertising material are permitted in the mailing of the written statement. Even a *de minimis* amount of such material violates the statement mailing requirement. However, a logo on the envelope containing the written statement and on any enclosure as described in paragraph (a)(1)(i) of this section does not violate the written statement requirement.

(2) *Perforated written statement.* The written statement required under section 6050N(b) and paragraph (a)(1) of this section may be perforated to a check or to a statement of the payee's specific account with the payor as described in paragraph (a)(1)(i)(A) or (C). The enclosure to which the written statement is perforated must contain, in a bold and conspicuous type, the legend: "Important Tax Return Document Attached".

(b) *Penalty.* For provisions relating to the penalty provided for failure to furnish a statement under this section, see section 6722.

PART 31—EMPLOYMENT TAXES AND COLLECTION OF INCOME TAX AT SOURCE

Par. 6. The authority for Part 31 is amended by adding following citation:

Authority: 26 U.S.C. 7805 *** Section 31.3406(a)-1 also issued under 26 U.S.C. 3406(a), (b), (c), (e), (g), (h), and (i); 26 U.S.C. 6103(g); and 26 U.S.C. 6302(c).

Par. 7. The following sections 31.3406-0 through 31.3406(i)-1 are added to read as follows:

§31.3406-0 Outline of the backup withholding regulations. This section lists paragraphs contained in §§31.3406-0 through 31.3406(i)-1.

§31.3406(a)-1 Withholding requirement on reportable payments made after December 31, 1983.

§31.3406 (a)-2 The obligation of payors to backup withhold.

(a) In general.
(b) Middlemen treated as payors.
(c) Exceptions.
(d) Examples.

§31.3406(a)-3 Accounts subject to backup withholding.

§31.3406(a)-4 Time when payments are considered to be paid and subject to backup withholding.

(a) Reportable interest or dividend payments.
(b) Other reportable payments.
(c) Middleman payor.
(1) In general.
(2) Special rule for common trust funds.
(d) Special rule for grantor trusts.
(e) Examples.

§31.3406(b)(1)-1 Reportable payment.

(a) In general.
(b) Reportable interest or dividend payment defined.
(c) Other reportable payment defined.

§31.3406(b)(2)-1 Reportable interest payment.

(a) Interest subject to withholding.
(1) In general.
(2) Special rule for tax-exempt interest.
(3) Examples.
(b) Amount subject to withholding.
(1) In general.
(2) Withholding adjustment for penalty for premature withdrawal.
(i) Special rule.
(ii) Examples.

§31.3406(b)(2)-2 Original issue discount.

(a) Original issue discount subject to withholding.
(b) Time and amount subject to backup withholding with respect to short-term obligations.
(1) No payment prior to maturity.
(2) Payment prior to maturity.
(c) Transferred short-term obligations.
(1) Subsequent holder may establish purchase price.
(2) If subsequent holder is unable to establish purchase price.
(3) If obligation is transferred.
(d) Time and amount subject to withholding with respect to long-term obligations.
(1) No payments prior to maturity.
(2) Registered long-term obligations with payments prior to maturity.

(3) Bearer long-term obligations with payments prior to maturity.
(i) Payments prior to maturity.
(ii) Payments at maturity.
(e) Transferred long-term obligations.
(1) Subsequent holder.
(2) If obligation is transferred.
(f) Examples.

§31.3406(b)(2)-3 Window transactions.

(a) Requirement to withhold.
(b) Window transaction defined.
(c) Manner of furnishing taxpayer identification number in the case of a window transaction.
(d) Examples.

§31.3406(b)(2)-4 Reportable dividend payment.

(a) Dividends subject to withholding.
(b) Examples.
(c) Dividends not subject to withholding.
(d) Amount subject to withholding.
(1) In general.
(2) Reasonable estimate of amount of dividend subject to withholding.
(3) Reinvested dividends.

§31.3406(b)(2)-5 Reportable patronage dividend.

(a) Patronage dividends subject to withholding.
(b) Examples.
(c) Amount subject to withholding.
(1) Failure to provide taxpayer identification number or notification of incorrect taxpayer identification number.
(2) Notified payee underreporting or payee certification failure.
(3) Examples.

§31.3406(b)(3)-1 Reportable payments of rents, commissions, nonemployee compensation, etc.

(a) Payments subject to withholding.
(b) Amount subject to withholding.
(1) In general.
(2) Special rule with respect to payments aggregating $600 or more for the calendar year.
(3) Determination of whether payments aggregate $600 or more.
(4) Exceptions.
(5) Examples.

§31.3406(b)(3)-2 Reportable barter exchanges and gross proceeds of sales of securities or commodities by brokers.

(a) Transactions subject to withholding.
(b) Examples.
(c) Amount subject to withholding.
(1) In general.
(2) Foreign currency contracts, forward contracts, or regulated futures contracts.
(3) Security sales made through a margin account.
(4) Security short sales.
(i) Amount subject to backup withholding.
(ii) Time of withholding.
(5) Fractional shares.
(6) Examples.

§31.3406(b)(3)-3 Reportable payments by certain fishing boat operators.

(a) Payments subject to withholding.
(b) Examples.
(c) Amount subject to withholding.
(1) In general.
(2) Examples.

§31.3406(b)(3)-4 Reportable payments of royalties.

(a) Royalty payments subject to withholding.
(b) Amount subject to withholding.

§31.3406(b)(4)-1 Exemption for certain minimal payments.

(a) In general.
(b) Manner of making the election.
(c) Annualization.
(1) Reportable interest or dividend payment.
(2) Window transaction, original issue discount, and broker reporting.
(d) Examples.

§31.3406(c)-1 Notified payee underreporting of reportable interest or dividend payments.

(a) Requirement to withhold.
(1) In general.
(2) Definition of notified payee underreporting.
(3) Definition of a payee underreporting.
(b) Notice to payors and brokers reporting backup withholding.
(1) Notice from the Internal Revenue Service.
(2) Notice from a broker.
(3) Accounts subject to backup withholding.
(c) Notice from payors of backup withholding due to a payee underreporting.
(1) In general.
(2) Form of the notice to the payee with respect to notified payee underreporting.
(3) Exceptions.
(4) Penalty for failure to provide notice.
(d) Notice to stop backup withholding.
(1) In general.
(2) Date notice to stop withholding will be provided.
(i) Underreporting corrected or bona fide dispute.
(ii) No underreporting or undue hardship.
(e) Period during which withholding is required.
(1) In general.
(2) Stop date.
(i) Underreporting corrected or bona fide dispute.
(ii) No underreporting or undue hardship.
(iii) Payor election to shorten or eliminate grace period.
(iv) Examples.
(f) Notice to payees from the Internal Revenue Service.
(1) Notice period.
(2) Payee subject to withholding.
(3) Disclosure of names of payors and brokers.
(4) Backup withholding certification.
(g) Determination by the Internal Revenue Service that backup withholding should not start or should be stopped.
(1) In general.
(2) No underreporting.
(3) Correcting any payee underreporting.
(i) Before issuance of a statutory notice of deficiency.
(ii) After issuance of a statutory notice of deficiency.
(4) Undue hardship.
(5) Bona fide dispute.
(h) Requests for determinations.
(1) In general.
(2) Determinations made during the notice period.
(3) Determinations made after the notice period.
(i) Reserved.

(j) Payees filing a joint return.
(1) In general.
(2) Exceptions.
(i) Innocent spouse.
(ii) Examples.
(iii) Divorced or legally separated payee.
(k) Penalties.
(1) Failure to withhold.
(2) False certification.
(i) Criminal penalty under section 7205(b).
(ii) Civil penalty under section 6682.
(A) In general.
(B) Waiver of penalty.
(C) Procedure for seeking a waiver.
(3) Delay of assessment.

§31.3406(d)-1 Manner required for furnishing a taxpayer identification number.

(a) Requirement to withhold.
(b) Reportable interest or dividend account.
(1) Manner required for furnishing a taxpayer identification number with respect to a pre-1984 account or instrument.
(2) Determination of pre-1984 account or instrument.
(i) In general.
(ii) Account or instrument automatically acquired on the maturity or termination of an account.
(iii) Special rule for short-term discount instrument acquired before January 1, 1985.
(iv) Insurance policies.
(v) Acquisitions and mergers.
(3) Manner required for furnishing a taxpayer identification number with respect to an account or instrument that is not a pre-1984 account.
(4) Special rule with respect to the acquisition of a readily tradable instrument in a transaction between parties unrelated to the payor if the parties act without the assistance of a broker.
(5) Examples.
(c) Brokerage account.
(1) Manner required for furnishing a taxpayer identification number with respect to a brokerage relationship that is not a post-1983 brokerage account.
(i) In general.
(ii) Definition of a brokerage account that is not a post-1983 brokerage account.
(iii) Definition of a post-1983 brokerage account.
(2) Manner required for furnishing a taxpayer identification number with respect to a post-1983 brokerage account.
(3) Examples.
(d) Rents, commissions, nonemployee compensation, and certain fishing boat operators, etc.
(1) Manner required.
(2) Example.

§31.3406(d)-2 Payee certification failure.

(a) Requirement to withhold.
(b) Exceptions.

§31.3406(d)-3 Special 30-day rules for certain reportable payments.

(a) Account or readily tradable instrument acquired directly from the payor (including a broker who holds an instrument in street name).
(1) Account or instrument acquired directly from the payor by electronic means.
(2) Account or instrument acquired directly from payor by mail communication.
(3) Examples.
(b) Special rule with respect to the sale of an instrument for a customer pursuant to a telephone or wire instruction.
(1) Special rule.
(2) Example.

§31.3406(d)-4 Special rules for readily tradable instruments acquired through a broker.

(a) Readily tradable instruments acquired through a broker who is not a payor.
(1) Instrument acquired through post-1983 brokerage accounts.
(2) Transactions entered into through a brokerage account that is not a post-1984 brokerage account.
(3) Payor must notify payee.
(i) Failure to provide certification.
(ii) Notified payee underreporting and incorrect taxpayer identification numbers.
(b) Notices.
(1) Form of notice by broker to payor.
(2) Form of notice by payor to payee.
(c) Payors' reliance on information from broker.
(1) In general.
(2) Amount subject to withholding.
(3) Examples.

§31.3406(d)-5 Backup withholding when the Service or a broker notifies the payor to withhold because the payee's taxpayer identification number is incorrect.

(a) Requirement that a payor backup withhold due to notification of an incorrect taxpayer identification number.
(1) In general.
(2) Definition of reportable payment.
(i) In general.
(ii) Exceptions.
(3) Transitional exclusion for payments to a fiduciary or nominee account.
(4) Definition of incorrect taxpayer identification number.
(5) Definition of account.
(b) Notice regarding an incorrect taxpayer identification number.
(1) Notice from the Internal Revenue Service to payors and brokers.
(2) Notice from a broker to a payor.
(3) Accounts subject to backup withholding.
(4) Joint accounts.
(i) In general.
(ii) Exception.
(iii) Change in order of names.
(5) Payor determination of the account or accounts of the payee that contain the incorrect taxpayer identification number.
(i) Payors.
(ii) Brokers.
(c) Notice from payors of backup withholding due to an incorrect taxpayer identification number.
(1) In general.
(2) Procedures.
(i) In general.
(ii) Two or more notices for a payee in the same calendar year.
(3) Requirements of substitute notice to the payee.
(4) Payor must use newly provided certified number.

(d) Period during which backup withholding is required due to notification of an incorrect taxpayer identification number.
(1) In general.
(2) Grace periods.
(i) Starting backup withholding.
(ii) Stopping backup withholding.
(e) Manner required for payee to furnish certified taxpayer identification number.
(f) Notification of two incorrect taxpayer identification numbers within a 3-year period.
(1) In general.
(2) Notice to payee who has provided two incorrect taxpayer identification numbers within 3 years.
(3) Period during which backup withholding is required due to a second notification of an incorrect number within 3 years.
(4) Grace periods.
(i) Starting backup withholding.
(ii) Stopping backup withholding.
(g) Procedure for furnishing a correct taxpayer identification number to the Internal Revenue Service.
(h) Notice from the Internal Revenue Service to stop backup withholding.
(i) Reserved.
(j) Examples.

Appendix to §31.3406(d)(5)—("B" Notice)

§31.3406(e)-1 Period during which withholding is required.

(a) In general.
(b) Special rule for determining when the payor receives a taxpayer identification number or certificate from a payee.
(c) Failure to furnish taxpayer identification number in the manner required.
(d) Payee certification failure.
(e) Notification of incorrect taxpayer identification number.
(f) Notified payee underreporting.
(g) Examples.

§31.3406(f)-1 Confidentiality of information.

(a) Confidentiality and liability for violation— In general.
(b) Permissible use of information.
(1) In general.
(2) Window transactions.
(c) Specific restrictions on the use of information.
(d) Examples.

§31.3406(g)-1 Exception for payments to certain payees and certain other payments.

(a) Exempt recipients.
(1) In general.
(2) Payments subject to reporting under section 6041 or 6041A (a).
(3) Determination of whether a person is described in paragraph (a)(1) of this section.
(4) Prepaid or advance premium life-insurance contracts.
(5) Examples.
(b) Middleman.
(c) International organizations.
(d) United States deposits and accounts of foreign payees.
(e) Certain reportable payments made outside the United States by foreign persons, foreign offices of United States banks and brokers, and others.

§31.3406(g)-2 Exception for reportable payments for which withholding is otherwise required.

(a) In general.
(b) Payment of wages.
(c) Distribution from a pension, annuity, or other plan of deferred compensation.
(1) In general.
(2) Special rule.
(3) Distributions not subject to backup withholding.
(4) Examples.
(d) Payment with respect to an oil or gas interest.
(e) Gambling winnings.
(1) In general.
(2) Definition of a reportable gambling winning and determination of amount subject to backup withholding.
(f) Real estate transactions.
(g) Limited exception for certain payments immediately after a merger or an acquisition of accounts.
(h) Certain gross proceeds.

§31.3406(g)-3 Exemption while payee is awaiting for a taxpayer identification number.

(a) In general.
(1) Withholding not required for 60 days.
(2) Withholding during 60-day period on accounts paying reportable interest or dividends.
(i) Effective for awaiting-TIN certificates received after December 31, 1987, and before July 1, 1988.
(ii) Effective for awaiting-TIN certificates received on or after July 1, 1988.
(b) Special rule for readily tradable instruments.
(c) Exceptions.
(1) In general.
(2) Special rule for amounts subject to reporting under section 6045 other than redemptions of bearer obligations.
(d) Awaiting-TIN certificate.
(e) Form for certificate.
(f) Examples.

§31.3406(h)-1 Definitions.

(a) Taxpayer identification number
(1) In general.
(2) Obviously incorrect number.
(b) Examples.
(c) Broker.
(d) Readily tradable instrument.

§31.3406(h)-2 Special rules.

(a) Special rule for joint payees.
(1) In general.
(2) Special rule with respect to joint foreign persons.
(3) Examples.
(b) Withholding from an alternative source.
(1) In general.
(2) Payments made in property.
(3) Barter exchanges.
(4) Examples.
(c) Special rules for trusts.
(1) In general.
(2) Grantor trust with ten or fewer grantors.
(3) Grantor trust with more than ten grantors.
(d) Conditions for a trustee of a grantor trust with more than ten grantors to impose backup withholding.
(e) Examples.
(f) Adjustment of prior withholding.
(1) In general.
(2) Example.
(g) Conversion of amounts paid in foreign currency into United States dollars.
(1) Convertible foreign currency.

(2) Nonconvertible foreign currency. [Reserved]

(h) Coordination with other sections.

(i) Penalties.

(j) To whom a payor is liable for amount withheld.

§31.3406(h)–3 Certificates.

(a) Prescribed form.

(b) Prescribed form to furnish a noncertified taxpayer identification number.

(c) Forms prepared by payors or brokers.

(1) Substitute forms; in general.

(2) Taxpayer identification number.

(3) Notified payee underreporting.

(4) Substitute form for both certifications.

(5) Form for exempt recipients.

(d) Special rule for brokers.

(e) Reasonable reliance on certificate.

(f) Who may sign the certificate.

(1) In general.

(2) Notified payee underreporting.

(g) Retention of certificate.

(1) Accounts or instruments that are not pre-1984 accounts or instruments and brokerage relationships that are post-1983 brokerage accounts.

(2) Accounts or instruments that are pre-1984 accounts or instruments and brokerage relationships that are not post-1983 brokerage accounts.

§31.3406(i)–1 Transitional rules.

§31.3406(a)–1 Withholding requirement on reportable payments made after December 31, 1983.

Except as provided in section 3406(g) and §§31.3406(g)–1, 31.3406(g)–2, and 31.3406(g)–3, every payor (as defined in section 3406(h)(4) and §31.3406(a)–2) is required to deduct and withhold 20 percent of—

(a) Any reportable payment as defined in section 3406(b) and §31.3406(b)(1)–1 made after December 31, 1983, if—

(1) The payee does not furnish a taxpayer identification number (as defined in §31.3406 (h)–1(a)) in the manner required to the person required to file an information return with respect to such payment (as described in section 3406(a)(1)(A) and §31.3406(d)–1), or

(2) The Internal Revenue Service or a broker (as defined in section 3406(h)(5) and §31.3406(h)–1(c)) notifies such payor that the taxpayer identification number that the payee furnished is incorrect (as described in section 3406(a)(1)(B) and §31.3406(d)–5, or

(b) Any reportable interest or dividend payment (as defined in section 3406(b)(2) and §31.3406(b)(1)–1(b)) made after December 31, 1983, if—

(1) The Internal Revenue Service or a broker notifies the payor that there has been payee underreporting (as described in section 3406(a)(1)(C) and §31.3406(c)–1), or

(2) The payee fails to provide a certification to the person required to file a return with respect to the payment (as described in section 3406(a)(1)(D) and §31.3406(d)–2).

Persons required to file an information return with respect to reportable payments subject to backup withholding are considered payors for purposes of backup withholding. Paragraph (a)(2) of this section provides a definition of persons considered payors for purposes of backup withholding and who therefore have an obligation to backup withhold if one of the conditions for imposing backup withholding exists with respect to a reportable payment. The payments which are subject to backup withholding are described in section 3406(b) and §31.3406(b)(1)–1. See §31.3406(d)–1 for the rules regarding how a payee may furnish a taxpayer identification number in the manner required and certify that he is not subject to backup withholding due to notified payee underreporting. The period for which backup withholding under section 3406 is required is described in section 3406(e) and §31.3406(e)–1. Exemptions from and exceptions to backup withholding are described in §§31.3406(g)–1, 31.3406(g)–2, and 31.3406(g)–3. Sections 31.3406(h)–1, 31.3406(h)–2, and 31.3406(h)–3 provide certain definitions and special rules relating to backup withholding.

§31.3406(a)–2 The obligation of payors to backup withhold.

(a) *In general.* A payor of an instrument or account is required to deduct and withhold the tax imposed by section 3406. The term "payor" means any person who is required to make an information return with respect to any reportable payment under section 6041, 6041A(a), 6042, 6044, 6045, 6049, 6050A, or 6050N as described in §31.3406(b)(1)–1(a), including any middleman payor as described in paragraph (b) of this section. Thus, for example, with respect to reportable payments under section 6045, the payor is the broker having the closest contact with the payee (in terms of payments or crediting of gross proceeds) because that broker is required to file an information return with respect to reportable payments made to the payee.

(b) *Middlemen treated as payors.* Except as provided in paragraph (c) of this section, any person who receives or collects a reportable payment on behalf of or for the account of any other person shall be treated as the payor with respect to such payment. Such persons include—

(1) A custodian of a payee's account, such as a bank, financial institution or brokerage firm acting as custodian of an account,

(2) A nominee, including the joint owner of an account or instrument, except if such joint owners are husband and wife or if the payment is actually owned by another person whose name is also shown on the information return filed with respect to such payment,

(3) A broker holding a security (including stock) for a customer in "street name",

(4) A grantor trust with more than ten grantors,

(5) A common trust fund,

(6) Any partnership or S corporation that makes a reportable payment, and

(7) Any other person making a reportable payment and who is required to make an information return under the applicable information reporting section with respect to such payments.

(c) *Exceptions.* The following persons are not treated as payors for purposes of section 3406 if the person is not treated as a middleman, payor, or otherwise does not have a reporting obligation under the section on information reporting to which the payment relates:

(1) An agent of the payor which is acting on behalf of the payor in making the payment and who has not entered into an agreement with the payor pursuant to Revenue Procedure 84-33, 1984-1 C.B. 502, such as a bank that acts as a paying agent in making a payment of dividends on behalf of a corporation (although payments made by the agent are considered to be payments made by the payor, and thus are subject to backup withholding, reporting, and the depositing requirements pertaining to section 3406 as if they were made by the payor itself),

(2) A trust (other than a grantor trust with ten or more grantors) that files a Form 1041 and furnishes a beneficiary a Form K-1 containing information required to be shown on an information return, including amounts withheld under section 3406, or shown on an information return, including amounts withheld under section 3406, or

(3) A partnership making a distributive share to a partner of the partnership.

(d) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). Individual A presents a United States savings bond to be cashed at Bank M and fails to provide a social security number to M. Bank M is required to make an information return under section 6049. M is considered the payor with respect to such interest and is required to withhold under section 3406 because A has failed to provide M with a social security number.

Example (2). Bank N pays interest on a savings account held by Trust O which is an irrevocable trust required to include its items of income, deduction, and credit on a Form 1041. O is not an exempt recipient described in §1.6049-4(c)(1)(ii). N is required to make an information return under section 6049. N is considered the payor and is required to withhold if any condition for imposing backup withholding exists with respect to O. O as record owner is required to file a fiduciary return and furnishes a Schedule K-1 to each beneficiary. Therefore, O is not required to make an information return under §1.6049-4(c)(2). Thus, O is not considered a payor and is not required to withhold when O distributes income to a beneficiary because the payment does not constitute a reportable payment.

Example (3). In 1984, Corporation P pays dividends to Broker Q, a dealer in securities and registered as such under the laws of the United States. Q holds stock as nominee for Individual B. Q is considered an exempt recipient under section 6042(b)(2) and does not provide its employer identification number to P. Thus, P is not required to make an information return under section 6042 showing the amount of dividends P pays Q. B has not furnished a social security number to Q. When Q pays or credits B's account with the dividends, Q is required to make an information return under section 6042 and §1.6042-2(a)(1)(ii). Q is considered the payor and is required to withhold under section 3406 since B failed to provide Q with a social security number.

Example (4). Individual C instructs Broker R to sell securities. C is a customer of R and has furnished R with an obviously incorrect social security number. R instructs Broker S to sell the securities. R is required to make an information return under section 6045 since R is the initiating broker who receives the instructions from C to sell the securities. Thus, R is considered the payor and is required to withhold on the gross proceeds under section 3406.

Example (5). Issuer T pays interest to Bank V with respect to obligations that Bank V holds in a custodial account for Individual D who has failed to furnish a social security number to V. T is not required to make an information return under section 6049 because it is making payment to an exempt recipient described in §1.6049-4(c)(1)(ii). Consequently, T is not considered a payor. V is required to make an information return under section 6049 with respect to the interest it receives for D's custodial account. V is considered the payor and is required to withhold under section 3406 since D failed to provide a social security number to V.

Example (6). W, a partnership, holds debentures of Corporation X. On June 30, 1984, X makes a payment of stated interest on the bonds held by W. X is required to make an information return under section 6049 showing the interest paid to W. X is considered a payor and is required to withhold if any of the four conditions for imposing backup withholding exists with respect to W. W makes a distribution of partnership income to its partners on December 31, 1984. W is not required to make an information return under section 6049. Thus, W is not considered a payor and is not required to withhold when W distributes each partner's distributive share of income on December 31, 1984, because the distribution does not constitute a reportable payment.

Example (7). Individual E owns property that Individual F leases. E has an agreement with Bank Y which provides that Y will collect the rental payments from F on behalf of E and will credit E's account with those amounts. Y's functions are limited solely to the receipt and crediting of those payments to E's account. Y is not required to make an information return under §1.6041-3(p); thus, Y is not considered a payor. F is required to make an information return under section 6041 showing the rental payments made to E if F makes the rental payments in the course of F's trade or business. Accordingly, F would be considered a payor and would be required to withhold if one of the two conditions for imposing backup withholding on the reportable payment exists with respect to E (as described in §31.3406(b)(3)-1).

Example (8). Assume the same facts as in *Example (7)* except that Y not only collects the payment for E but pays other expenses for taxes, repairs, commissions, etc., and credits the net amount to E's account. Y's responsibilities are greater than the performance of a collection agent. Thus, Y is required to make an information return under section 6041 if F's payments to E are made in the course of F's trade or business. Y is considered the payor and is required to withhold if one of the two conditions for imposing backup withholding exists with respect to E (as described in §31.3406(b)(3)-1).

Example (9). G and H own real estate and hire Z to manage the property. Z is a real estate agent for G and H. Lessees I, J, and K make rental payments to Z, and Z pays costs incidental to the property and pays commissions to L, an independent agent who locates tenants. Z pays the net amount of the rental payments to G and H. I, J, and K are not required to make an information return under §1.6041-3(e) with respect to the rental payments to Z because Z is a real estate agent; but Z is required to make an information return under section 6041 showing payment to G and H. Thus, Z is considered a payor and is required to withhold if one of the two conditions for imposing backup withholding exists with respect to G or H (as described in §31.3406(b)(3)-1). Z's payment of commissions to L also is subject to reporting under section 6041, withholding, and the depositing requirements under section 3406 (as described in §31.3406(a)-2(c)(1)).

§31.3406(a)-3 Accounts subject to backup withholding.

A payor who is required to backup withhold under §31.3406(a)-1 is required to impose backup withholding on the specific account subject to withholding under §31.3406(a)-1(a)(1) or (b)(2) and, with respect to withholding under §31.3406(a)-1(a)(2) or (b)(1), on the accounts and according to the manner described respectively under §31.3406(d)-5 (relating to notification of incorrect TIN) or §31.3406(c)-1 (relating to notified payee underreporting).

§31.3406(a)-4 Time when payments are considered to be paid and subject to backup withholding.

(a) *Reportable interest or dividend payments.* With respect to a reportable interest or dividend payment (as defined in section 3406(b)(2) and §31.3406(b)(1)-1)b)), backup withholding under section 3406 shall apply when the payor pays interest, dividends, patronage dividends, or original issue discount to an account that is subject to backup withholding. Amounts are paid when they are credited to the account of, or set apart for, the payee. Amounts are not considered paid solely because they are posted (e.g., an informational notation on the payee's passbook) or because they may be withdrawn by the payee, so long as they are not actually credited to the payee's account. They are paid, however, upon withdrawal or crediting to the payee's

account. When bonds are sold between interest payment dates, the portion of the sales price representing interest accrued to the date of sale is not considered to be a payment of interest for purposes of section 6049, but is considered as a portion of a reportable payment of gross proceeds under section 6045 (provided that the accrued interest is not tax-exempt as described in section 103(a), relating to certain governmental obligations). In the case of stock for which the record date is earlier than the payment date, the dividends are considered paid on the payment date. In the case of a corporate reorganization, if a payee is required to exchange stock held in the former corporation for stock in the new corporation before the dividends which have been paid with respect to the stock in the new corporation will be provided to the payee, the dividend is considered paid on the date the payee actually exchanges the stock and receives the dividend.

(b) *Other reportable payments.* With respect to any other reportable payment (as defined in section 3406(b)(3) and §31.3406(b)(1)-1(c)), except amounts reportable under section 6045, backup withholding under section 3406 shall apply at the time the payment is made. In the case of a transaction reportable under section 6045, except in the case of forward contracts, regulated futures contracts, foreign currency contracts, and security short sales, the obligation to backup withhold arises on the date the sale is entered on the books of the broker or the date the exchange occurs as provided in §1.6045-1(f)(3). However, a broker is not required to satisfy its backup withholding liability until payment is made. See §31.3406(b)(3)-2(c) for special rules applicable to forward contracts, regulated futures contracts, foreign currency contracts, and security short sales.

(c) *Middleman payor*—(1) *In general.* Any middleman payor (as described in §31.3406(a)-2(b)) shall withhold under section 3406 at the time the reportable payment is received by or credited to the middleman payor. If the middleman payor makes or credits the reportable payment to the payee prior to the middleman payor's receipt of the corresponding payment, the middleman payor may withhold at the time the reportable payment is made or credited to the payee.

(2) *Special rule for common trust funds.* A common trust fund, as defined in section 584, shall withhold at the time the reportable payment is received by or credited to the common trust fund as provided in paragraph (c)(1) of this section, on the date on which the assets of the common trust fund are valued, or at the time the common trust fund pays or credits the reportable payment to the beneficiary of the common trust fund.

(d) *Special rule for certain grantor trusts.* With respect to certain grantor trusts (as described in §31.3406(h)-2(c)(3)), reportable amounts (except gross proceeds subject to reporting under section 6045) are treated as paid to the grantor on the date that the distribution is made to the grantor by the trustee. Paragraph (b) of this section applies to a grantor trust with respect to when gross proceeds subject to reporting under section 6045 are subject to withholding.

(e) *Examples.* The application of the provisions of this section may be illustrated by the following examples in which it is assumed that the payee may be subject to backup withholding under section 3406(a)(1)(A):

Example (1). Bank P computes interest on savings account deposits by compounding the interest on a daily basis but credits the amount of interest that has accrued during a calendar quarter to the savings account on the last day of the quarter. Backup withholding under section 3406 applies at the time P credits interest to the accounts (*i.e.*, the end of each quarter).

Example (2). Credit Union Q computes dividends on regular share accounts by compounding the dividends on a daily basis. It credits the amount of dividends accrued during a calendar quarter on the last day of the quarter unless the account is closed, in which case it credits accrued dividends on the date the account is closed. A, an individual, opens a regular share account at Q on July 1, 1984. Backup withholding under section 3406 applies when Q credits accrued dividends to the account on September 30, 1984. If A closes the account on October 21, 1984, a payment would be considered to be made on October 2l when Q credits accrued dividends to A's account and A withdraws the dividends. Thus, backup withholding will apply on October 2l.

Example (3). Corporation R declares a dividend on September 1, 1984, to its record holders as of September 15, 1984. The dividend on its stock is payable on October 1, 1984. Trust Company S holds stock of R in trust for Individual B. S credits the dividend to the account of the trust for B on October 1, even though in the normal course of business S may not receive the money until several days thereafter. At the discretion of S, backup withholding under section 3406 will apply when S credits the dividend on October 1, or when the money is actually received by S. See §31.3406(a)-4(c)(1).

Example (4). Money Market Fund T declares dividends on its shares daily and credits the dividends to the investor's account on the last day of the month regardless of whether any shares have been redeemed during the month. Backup withholding under section 3406 applies to a reportable dividend payment made on the last day of the month when T credits the investor's account.

Example (5). The facts are the same as in *Example (4)* except that T credits the dividends to the investor's account daily. Backup withholding under section 3406 applies daily when T credits the investor's account.

Example (6). On January 1, 1984, Individual C buys a 10-year corporate bond with attached semiannual interest coupons of $500 that may be cashed on January 1 and July 1 of each year. C sells the bond for $12,250 on April 1, 1984, to Bank U. Although $250 of the purchase price is attributable to accrued interest, it is not considered to be a reportable interest payment for purposes of section 6049. If U is a broker required to make an information return under 6045 with respect to a sale of a security, the gross proceeds of $12,250 (including the $250 accrued interest) are subject to backup withholding on April 1, 1984.

Example (7). On April 1, 1984, Bank U sells the bond it purchased in *Example (6)* to Individual D. On July 1, 1984, D cashes the interest coupon for that date at U. Backup withholding under section 3406 applies on July 1 (the date the interest coupon is presented) to the $500 reportable interest payment.

Example (8). Bank V credits interest to its checking accounts on a quarterly basis. On August 3, 1984, Bank V accepts for payment a check which has been drawn on the account of E. E does not have sufficient funds posted in the account to pay the amount of the check. However, E's account has accrued interest since V's last crediting date which, net of withholding, is sufficient to pay the amount of the check. V pays the check after posting the interest that has accrued since V's last crediting date to E's account. Backup withholding under section 3406 applies on August 3, 1984, when V posts the accrued interest to E's account and before V pays the check. If the interest, net of withholding, were insufficient to pay the amount of the check, V would be required to impose backup withholding prior to paying the check, provided the interest is credited to E's account.

Example (9). F presents a Series E savings bond to Bank W to be cashed on July 1, 1984. Backup withholding under section 3406 applies on that date.

Example (10). On December 1, 1970, G purchases a $500 Series E savings bond. The amount paid for the bond is $375. On August 1, 1985, the bond is reissued by the Bureau of Public Debt by deleting G's name and inserting the name of G's child. At the time of reissue, the redemption value of the bond is $1,015.80. The accrued interest is $640.80 (i.e., $1,015.80—$375). The reissue is a taxable transaction, and G must include in income the accrued interest at the time of reissue. Backup withholding under section 3406 applies on the date of the reissuance (August 1, 1985) to $640.80 (the amount of accrued interest).

Example (11). Assume the same facts as in *Example (10)* except that G exchanges the bond for a Series HH savings bond in the amount of $1,000 issued in G's name. The exchange is tax-deferred under section 1037. A check in the amount of $15.80 is delivered to G. Backup withholding under section 3406 applies on the date of the exchange but only to the extent of $15.80, the amount subject to information reporting under §1.6049-4(d)(9).

Example (12). Assume the same facts as in *Example (11)* except that the Series HH savings bond is reissued in the name of G's child. Accordingly, the exchange is not a tax-deferred exchange under section 1037 and backup withholding under section 3406 applies to $640.80 (the amount of accrued interest) on the date that the bond is exchanged.

Example (13). Broker H sells stock for Individual I and enters the transaction on H's books on September 24, 1990. Payment is made on September 28, 1990. The sale occurs on the date the sale is entered on the books. Accordingly, the obligation to backup withhold arises on September 24, 1990. However, H is not required to satisfy its backup withholding liability until September 28, 1990.

Example (14). Individual K is the trustee of Trust M, which is not a grantor trust as described in §31.3406(h)-2(c)(3) or an exempt recipient as described in §1.6049-4(c)(1)(ii) . The corpus of the trust is stock of Corporation N. On August 31, 1984, N pays a dividend to M and is required to withhold 20 percent of the payment. On September 30, 1984, K makes a distribution of M's income to the beneficiaries of M. K is not required to withhold the tax under section 3406 on September 30, 1984, when K distributes M's income, because the payment is not a reportable payment and the trust is not a payor as described in §31.3406(a)-2.

Example (15). L, an individual trustee of a grantor trust with 150 grantors, holds stock of Corporation T. L has provided the taxpayer identification number of L to T. B, a grantor of the trust, fails to provide a taxpayer identification number to L. T pays dividends on July 1 and is not required to withhold under section 3406 because no condition for imposing backup withholding exists with respect to L. L is required to withhold under section 3406, however, on the date that L distributes the reportable payment to B.

Example (16). O, a partnership, holds bonds of Corporation P. On July 1, 1984, P makes a payment of stated interest on the bonds held by O and is required to withhold 20 percent of the payment. O makes a distribution of income to its partners on December 31, 1984. O is not required to withhold under section 3406 on July 1, 1984, when it receives the payment of interest from P since O is not a middleman payor with respect to any reportable payment; O is the payee. In addition, O is not required to withhold under section 3406 on December 31, 1984, when O distributes income to its partners because the distribution is not a reportable payment.

Example (17). On February 28, 1985, Corporation R declares a dividend on its stock payable on April 1, 1985, to holders of record as of March 3, 1985. On March 1, 1985, Broker Q sells stock in Corporation R which it held in "street name" on behalf of B to Broker S. S purchases the stock on behalf of Individual C. R's stock transfer agent does not record the transfer until March 4, 1985. Accordingly, on April 1, 1985, R's paying agent pays the dividend declared by R to Q. R does not withhold under section 3406 since Q is an exempt recipient described in section 6042(b)(2)(B). Because Q is not able to identify immediately the owner of the dividend, Q places the dividend in a suspense account. On the same date, S credits C's account with the amount of the dividend payable by R on that date. On April 30, 1985, S makes a claim on Q for the amount of the dividend Q received on R's stock and Q pays the dividend to S. Q does not withhold under section 3406 since S is an exempt recipient. Unless C furnishes his social security number to S, S is required to withhold under section 3406 when it receives the dividend from Q on April 30, 1984, or, in its discretion, at the time it credits the dividend to C's account on April 1, 1984.

Example (18). On January 2, 1992, individual D signs an agreement with Insurance Company Z. The agreement specifies that D will make one initial payment on the date the agreement is signed and Z will pay all future premiums when due by using a portion of D's previous payment including interest Z agrees to pay under the agreement. D does not furnish his social security number to Z. The yearly premiums are payable every July 1. Z credits the interest accruing during the year on the policy's anniversary date (July 1). Z is required to withhold 20 percent of the annual increase in value of the "prepaid premium" on July 1 (the date that the interest is credited to pay the premium due).

§31.3406(b)(1)-1 Reportable payment.

(a) *In general.* For purposes of backup withholding under section 3406, the term "reportable payment" means—

(1) Any reportable interest or dividend payment (as defined in section 3406(b)(2) and paragraph (b) of this section), and

(2) Any other reportable payment (as defined in section 3406(b)(3) and paragraph (c) of this section).

The determination of whether a payment is reportable and thus subject to withholding under section 3406 is made without regard to the amount of the payment. A payor may elect under §31.3406(b)(4)-1, however, not to withhold from certain minimal payments.

(b) *Reportable interest or dividend payment defined.* The term "reportable interest or dividend payment" means—

(1) Interest subject to reporting under section 6049 (as described in §31.3406(b)(2)-1),

(2) Original issue discount subject to reporting under section 6049 (as described in §31.3406(b)(2)-2),

(3) Window transactions subject to reporting under section 6049 (as described in §31.3406(b)(2)-3),

(4) Dividends subject to reporting under section 6042 (as described in §31.3406(b)(2)-4), and

(5) Certain patronage dividends subject to reporting under section 6044 (as described in §31.3406(b)(2)-5).

(c) *Other reportable payment defined.* The term "other reportable payment" means—

(1) Rents, commissions, nonemployee compensation, and other payments subject to reporting under section 6041 or 6041A(a)(as described in §31.3406(b)(3)-1),

(2) Barter exchange or broker transactions subject to reporting under section 6045 (as described in §31.3406 (b)(3)-2),

(3) Certain payments by certain fishing boat operators subject to reporting under section 6050A (as described in §31.3406(b)(3)-3), and

(4) Payments of royalties subject to reporting under section 6050N (as described in §31.3406(b)(3)-4).

§31.3406(b)(2)-1 Reportable interest payment.

(a) *Interest subject to withholding*—(1) *In general.* Backup withholding under section 3406 is required with respect to any payment of a kind, and to a payee, that is required to be reported under section 6049 (relating to returns regarding interest and original issue discount), subject to the special rules of §31.3406(b)(2)-2 (relating to original issue discount), and §31.3406(b)(2)-3 (relating to window transactions). If the payment is not of a kind subject to reporting because the payment is not defined as "interest" in section 6049(b) and in §1.6049-5(a) and (b), then the payment is not subject to backup withholding. Additionally, if the payment is not to a payee subject to reporting under section 6049 because it is made to a person described in section 6049(b)(4) or §1.6049-4(c)(1)(ii), the payment is not subject to backup withholding. After a determination is made under section 6049 that an information return is required, the payor is required to deduct and withhold the tax under section 3406 if any of the four conditions for imposing backup withholding exists with respect to a payee (as described in §31.3406(a)-1(a) and (b)). The amount subject to backup withholding under section 3406 is described in

paragraph (b) of this section. Notwithstanding the provisions of this section, a payor is not required to withhold on any payment described in §31.3406(g)-1.

(2) *Special rule for tax-exempt interest.* When an issuer is required to make an information return under §1.6049-4(d)(8) because a payee incorrectly provided a signed written statement on the envelope or "shell" claiming that the interest was exempt from taxation under section 103(a) (as described in §1.6049-5(b)(2)), the issuer is not required to impose backup withholding under section 3406.

(3) *Examples.* The application of the provisions of this paragraph (a) may be illustrated by the following examples:

Example (1). Bank M pays interest to A, an individual, on a deposit that A maintains with M. Since the payment is of a kind that is subject to reporting under section 6049 and §1.6049-5(a)(3) and the payee is not an exempt recipient as defined in §31.3406(g)-1, M is required to withhold under section 3406 if any of the four conditions for imposing backup withholding exists with respect to A.

Example (2). Assume the same facts as in *Example (1)* except that Bank M pays such interest to Corporation X. The payment to X is not subject to information reporting under section 6049 since M is making payment to a person described in §1.6049-4(c)(1)(ii)(A). Accordingly, M is not required to withhold even if one of the four conditions for imposing backup withholding under section 3406 exists with respect to X.

Example (3). Individual B presents an interest coupon from a tax-exempt obligation to Bank N. B properly completes the "shell" used for processing the coupon (*i.e.*, he includes his name, address, and taxpayer identification number on the shell) and claims that the interest is exempt from taxation (as required by §1.6049-5(b)(2)). N is not required to make an information return under section 6049 because the payment is not of a kind subject to reporting under section 6049 (as described in §1.6049-5(b)(2)). Accordingly, N is not required to withhold even if one of the four conditions for imposing backup withholding under section 3406 exists with respect to B. In addition, under paragraph (a)(2) of this section, the issuer who receives the shell is not required to withhold even if the interest is not exempt from taxation. If, however, B did not properly complete the shell, by including his taxpayer identification number, N may not treat the interest as tax-exempt and N is required to withhold because B did not include his taxpayer identification number on the shell.

Example (4). Credit Union O pays "dividends" that are considered interest under section 6049 to nonresident alien individual C on a deposit C has with O. C certifies on Form W-8 (or other permissible form as described in §1.6049-5(g)) that he is not a United States citizen or resident. If O is required to make an information return under section 6049 with respect to the payment to C as required by §1.6049-5(e)(2), O is not required to withhold under section 3406 as provided in §31.3406(g)-1(d).

Example (5). Individual D places money in escrow with P to guarantee performance on a contract. P is not a financial institution that pays interest subject to reporting under section 6049(b)(1)(B) or (C) and §1.6049-5(a)(2) or (3). P is not required to make an information return under section 6049 because the payment is not of a kind subject to reporting under section 6049 (as described in §§1.6049-5(b)(3) or 1.6049-5(b)(5)). Accordingly, P is not required to withhold even if one of the four conditions for imposing backup withholding under section 3406 exists with respect to D. If, however, P is a financial institution that pays interest described in section 6049(b)(1)(B) or (C) and §1.6049-5(a)(2) or (3), P would be required to withhold under section 3406 if any of the four conditions for imposing backup withholding exists.

(b) *Amount subject to withholding*—(1) *In general.* The amount of interest subject to withholding under section 3406 is the amount subject to reporting under section 6049 except as provided in paragraph (b)(2) of this section.

(2) *Withholding adjustment for penalty for premature withdrawal*—(i) *Special rule.* Solely for purposes of computing the amount subject to backup withholding, the payor may elect not to withhold from the portion of any interest payment that is not received by the payee because of the imposition of a penalty for premature withdrawal of funds deposited in a time savings account, certificate of deposit, or similar class of deposit.

(ii) *Examples.* The application of the provisions of this paragraph (b)(2) may be illustrated by the following examples:

Example (1). A, an individual, deposits $10,000 in a 4-year savings account with Bank M on January 2, 1985, which earns 10.75 percent interest per annum payable quarterly. A does not provide M with a social security number. A must pay a penalty equal to the previous 3 months' interest if the funds are withdrawn prior to January 2, 1989. On March 31, 1985, A's funds earn $268.75 in interest. Backup withholding under section 3406 will apply to the amount of interest ($268.75) paid on that date. The fact that M may impose a penalty on A after the interest is paid and the tax is withheld should A prematurely withdraw the funds is irrelevant because M has not, in fact, imposed a penalty.

Example (2). Assume the same facts as in Example (1) except that A withdraws the funds on September 30, 1985. A penalty in the amount of $280.43 (*i.e.*, an amount equal to the previous 3 months' interest earned by A) is imposed on A. M is not required to withhold any amount on that date since the penalty imposed on A is equal to the interest earned by A that quarter. At M's option, however, M may withhold 20 percent of the $280.43 payment of interest. In either event, M is not relieved of the requirement under section 6049 to report the $280.43 of quarterly interest payment made to A.

§31.3406(b)(2)-2 Original issue discount.

(a) *Original issue discount subject to withholding.* Under section 6049(d)(6) and §1.6049-5(k), original issue discount is treated as a payment of interest. The amount of original issue discount subject to backup withholding under section 3406 is the amount subject to reporting under section 6049, but is limited to the amount of cash paid. In addition, if an original issue discount obligation, subject to reporting under section 6045, is sold prior to maturity and a condition exists for imposing backup withholding on such gross proceeds, then backup withholding under §31.3406(b)(3)-2 applies to the gross proceeds of the sale reportable under section 6045.

(b) *Time and amount subject to backup withholding with respect to short-term obligations*—(1) *No payment prior to maturity.* In the case of an obligation with a fixed maturity date not exceeding 1 year from the date of issue (a "short-term obligation") with respect to which there is no interest payable prior to maturity, backup withholding under section 3406 applies to the amount of original issue discount which is includible in the gross income of the holder. Backup withholding applies at the maturity of the obligation when the face amount of the obligation is paid.

(2) *Payment prior to maturity.* In the case of a short-term obligation with respect to which there is interest payable prior to maturity, backup withholding under section 3406 applies only to the actual interest payments made prior to maturity and not to any amount of original issue discount. Backup withholding shall be computed on the stated interest payment, and 20 percent of the actual interest payment shall be withheld at the time the interest is paid. At maturity, the amount subject to backup withholding shall be the sum of any interest payment made at that time and the total original issue discount that is includible in gross income of the holder and shall be withheld upon at that time.

(c) *Transferred short-term obligations*—(1) *Subsequent holder may establish purchase price.* At maturity of

a short-term obligation, a subsequent holder (*i.e.*, any person who purchased the obligation after the obligation was issued to the original holder) may establish the price at which the subsequent holder purchased the obligation. The purchase price paid by such a subsequent holder shall then be treated as the original issue price for purposes of computing the amount of original issue discount subject to backup withholding under section 3406. The purchase price of an obligation may be established by confirmation receipt or other record of a similar type or, if the obligation is redeemed by or through the person from which the obligation was purchased, by the records of the person from which or through which the obligation was purchased. The subsequent holder is not required to certify under penalties of perjury that the purchase price is correct.

(2) *If subsequent holder is unable to establish purchase price.* If a subsequent holder fails to establish the purchase price of the obligation (as provided in paragraph (c)(1) of this section), then the person redeeming the obligation shall determine the amount subject to backup withholding under section 3406 as though the obligation had been purchased by the holder on the date of issue. If the person redeeming the obligation is the issuer of the obligation, then the issuer shall determine the amount subject to backup withholding through its records. If the person redeeming the obligation is a person other than the issuer of the obligation, then the person shall determine the amount subject to backup withholding by using the issue price indicated in the Internal Revenue Service publication of publicly-traded original issue discount obligations or in standard financial sources. (See §1.6049-5(k)). In the case of a Treasury bill, the purchase price shall be assumed to be the noncompetitive price of a Treasury bill having the earliest issue date of all Treasury bills with the same CUSIP number and the same maturity date as the bill being redeemed.

(3) *If obligation is transferred.* If a short-term obligation is transferred, no part of the purchase price is considered a reportable interest payment under section 6049. Backup withholding under section 3406 applies, however, to the gross proceeds of the sale of the obligation if the transfer is subject to reporting under section 6045 and a condition exists for imposing backup withholding. For the rules regarding backup withholding where an amount is subject to reporting under section 6045, see §31.3406(b)(3)-2.

(d) *Time and amount subject to withholding with respect to long-term obligations*—(1) *No payments prior to maturity.* In the case of an obligation with a fixed maturity date that is more than 1 year from the date of issue (a "long-term obligation") with respect to which there are no cash payments (whether consisting of interest or principal) prior to maturity, backup withholding applies only at maturity and only with respect to the original issue discount includible in the income of the holder during the calendar year in which the obligation matures. For purposes of this section, the term "cash payments" includes checks and other monetary media of exchange.

(2) *Registered long-term obligations with payments prior to maturity.* In the case of a long-term obligation that is in registered form and that provides for cash payments (whether consisting of interest or principal) prior to maturity, the amount subject to backup withholding under section 3406 shall be the sum of the amount of stated interest paid and the amount of original issue discount that is includible in the gross income of the holder for that calendar year in which the cash payments are made. Backup withholding applies at the time the cash payments are made. The amount required to be withheld at the time of any cash payment, however, shall not exceed the amount of the cash payment made. If more than one payment is made during a calendar year, the tax that is required to be withheld with respect to original issue discount shall be allocated among all the cash payments in the ratio that each cash payment bears to the total of the cash payments. Thus, if two equal cash payments of stated interest are made during the calendar year, one-half of the original issue discount includible in gross income of the holder for that calendar year shall be taken into account in computing the tax which must be withheld from each cash payment.

(3) *Bearer long-term obligations*—(i) *Payments prior to maturity.* In the case of a long-term obligation that is in bearer form and with respect to which there is stated interest payable prior to maturity, backup withholding applies only to the stated interest payment and not to any amount of original issue discount. Backup withholding applies to the stated interest payment at the time the stated interest is paid.

(ii) *Payments at maturity.* Backup withholding applies to the sum of any stated interest payment made at maturity and the total amount of original issue discount that is includible in the gross income of the holder during the calendar year of maturity.

(e) *Transferred long-term obligations*—(1) *Subsequent holder.* In the case of a long-term obligation that is transferred after its issuance from the original holder, the amount subject to backup withholding is the amount of original issue discount includible in the gross income of all holders during the calendar year (without regard to any amount paid by a subsequent holder at the time of transfer). If the person redeeming the obligation at maturity is the issuer of the obligation, then the issuer shall determine the amount subject to backup withholding through its records by treating the holder as if he were the original holder. If the person redeeming the obligation at maturity is a person other than the issuer of the obligation, then the person shall determine the amount subject to backup withholding by using the original issue price indicated in the Internal Revenue Service publication of publicly-traded original issue discount obligations or in standard financial sources. (See §1.6049-5(k)).

(2) *If obligation is transferred.* If a long-term obligation is transferred after original issuance, no part of the purchase price is considered a reportable interest payment under section 6049. Backup withholding under section 3406 applies, however, to the gross proceeds of the sale of the obligation if the transfer is subject to reporting under section 6045 and a condition exists as described in §31.3406(a) for imposing backup withholding on such gross proceeds.

For the rules regarding backup withholding where an amount is subject to reporting under section 6045, see §31.3406(b)(3)-2.

(f) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). On January 1, 1980, Individual A purchases at original issue, for $7,000 cash, X Corporation's 5-year bond which has a stated redemption price at maturity of $10,000. A does not furnish a social security number to X. The bond does not provide for any interest or principal payments prior to maturity. The ratable monthly portion of original issue discount determined under section 1272(a)(1) is $50. If A holds the bond for 12 months of his taxable year, A must include $600 (*i.e.*, $50 x 12 months) in his gross income for that year and in each subsequent year that he holds the bond for the entire 12 months. No amount of the $600 of original issue discount includible in A's gross income each year is subject to backup withholding under section 3406 since no amount of cash has been paid. Assume that A holds the bond until maturity on December 31, 1984, and the bond is redeemed for $10,000 on that date. Since A has not furnished a social security number to X, backup withholding applies to the amount of original issue discount includible in A's gross income during the calendar year ($600). X is not required to make an information return under section 6045 (*i.e.*, the retirement is described in §5f.6045-1(c)(3)-(x)). X is required to withhold only on the $600 (the amount of original issue discount includible in A's gross income).

Example (2). Assume the same facts as in *Example (1)* except that A does not hold the bond until maturity but rather sells it to B on January 1, 1984, for $9,540. The gross proceeds of the sale are subject to backup withholding if the sale is required to be reported under section 6045. See §31.3406(b)(3)-2. When X redeems the bond at maturity, the amount subject to backup withholding is the $600 of original issue discount accrued during 1984 even though B paid more for the bond than the sum of the original issue price and the amount of the original issue discount includible in A's gross income. Under paragraph (e)(1) of this section, B, as a subsequent holder, is treated the same as the original holder for purposes of determining the amount subject to withholding on redemption.

Example (3). Assume the same facts as in *Example (2)* except that the sale occurs on March 1, 1984, and B provides a social security number to X. Even though $100 (*i.e.*, $50 x 2 months) of original issue discount has accrued with respect to A (who has not provided a social security number to X) during 1984, no amount of original issue discount is subject to backup withholding at maturity since B has provided a social security number to X.

Example (4). On January 1, 1984, Individual D purchases a Treasury bill with a maturity of 52 weeks at the original issue price of $8,736. At maturity on December 31, 1984, D redeems the bill for $10,000 but fails to furnish a social security number. The amount subject to backup withholding on the date of maturity is $1,264 (the difference between the stated redemption price at maturity, $10,000, and D's purchase price for the obligation, $8,736).

Example (5). Assume the same facts as in Example (4) except that D sells the Treasury bill on March 1, 1984, to Individual E through Broker Y. E does not furnish a social security number to Y. E pays $8,940 for the bill. Although no part of the purchase price is a reportable interest payment under section 6049, Y is required to report the sales proceeds under section 6045. Consequently, Y is required to withhold 20 percent of the $8,940 gross proceeds paid to D under §31.3406(b)(3)-2 if D does not furnish a social security number to Y. E redeems the Treasury bill through Y at maturity. E establishes through Y's records that E paid $8,940 for the Treasury bill on March 1, 1984. The amount subject to backup withholding at maturity is $1,060 (the difference between the stated redemption price at maturity, $10,000, and E's purchase price of $8,940).

Example (6). On January 1, 1985, F, an individual, purchases at original issue, for $7,500 cash, Z Corporation's 30-year bond which has a stated redemption price at maturity of $10,000. The bond provides for annual interest payments of $1,000. F does not furnish Z with a social security number. Assuming F holds the bond for all of calendar year 1985, the amount of original issue discount which is includible in F's gross income during 1985 is $7.83. On December 31, 1985, Z makes its $1,000 interest payment to F. Z must withhold $201.56 (i.e., 20 percent of $1,007.83) on that date.

Example (7). Broker G acquires a bond issued in 1960 by the United States Treasury through the Bureau of Public Debt. Broker G sells interests in the bond to the public after December 31, 1982. A purchaser may acquire an interest in any interest payment falling due under the bond or an interest in the principal of the bond. Under section 1273, each bond component is treated as an obligation issued with original issue discount equal to the excess of the stated redemption price at maturity over the purchase price of the bond component. The interests sold by G are obligations of a type offered to the public. The bond is held by Custodian H for the benefit of the persons acquiring these interests. On receipt of interest and principal payments under the bond, Custodian H transfers the amount received to the person whose ownership interest corresponds to the bond component giving rise to the payment. On January 1, 1984, Individual J, a calendar year taxpayer, purchases from G, for $826.45 cash, a $1,000 interest coupon payable on December 31, 1985. J does not provide G or H with a social security number. During 1984, J must include $82.65 in income (i.e., the amount of original issue discount accruing during 1984). No amount, however, is subject to backup withholding under section 3406 since no cash payment is made. During 1985, J must include $90.90 in income (i.e., the amount of original issue discount accruing during 1985). On December 31, 1985, H is required to withhold $18.18 (20 percent of $90.90) and then pays J $981.82 ($1,000 minus $18.18).

§31.3406(b)(2)-3 Window transactions.

(a) *Requirement to withhold.* Backup withholding under section 3406 applies to a "window transaction" as defined in section 3406(b)(7) and paragraph (b) of this section only where the payee does not furnish a taxpayer identification number to the payor in the manner required in paragraph (c) of this section. Backup withholding does not apply to a "window transaction" when the Internal Revenue Service notifies the payor of an incorrect taxpayer identification number or notified payee underreporting. The payee in a window transaction also is not required to certify under penalties of perjury that the payee is not subject to backup withholding due to notified payee underreporting (as described in §31.3406(d)-2(b)(2)).

(b) *Window transaction defined.* The term "window transaction" means a payment of interest with respect to any of the following obligations:

(1) An interest coupon which is subject to taxation (*i.e.*, other than interest described in §1.6049-5(b)(2)),

(2) A United States savings bond, or

(3) A discount obligation having a maturity at issue of 1 year or less, including commercial paper and bankers' acceptances that are in definitive form (*i.e.*, evidenced by a paper document other than a confirmation receipt) but not including short-term government obligations (as defined in section 1271(a)(3)(B)).

(c) *Manner of furnishing taxpayer identification number in the case of a window transaction.* A payee must furnish his taxpayer identification number to the payor with respect to a window transaction either orally or in writing. The payee is not required to certify, under penalties of perjury, that the taxpayer identification number provided is correct. The number must be furnished at the time that the window transaction occurs. See §31.3406(g)-3(c)(1)(i), which provides that a payee may not claim he is awaiting receipt of a taxpayer identification number with respect to a window transaction. Thus, a payor is required to withhold 20 percent of a reportable interest payment paid in a window transaction as described in this paragraph only if the payee fails to furnish a taxpayer identification number or furnishes an obviously incorrect number as described in §31.3406(h)-1(a)(2).

(d) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). Individual A presents five Series EE savings bonds to Bank X for payment on January 3, 1984. Bank X is required to make an information return under section 6049 if $10 or more of interest is paid. A provides orally to X a social security number containing nine digits. A does not certify under penalties of perjury that the number provided is his correct social security number. X is not required to withhold on such payment because payments of interest on United States savings bonds are window transactions and A has furnished a taxpayer identification number to X.

Example (2). Assume the same facts as in *Example (1)* except that A has other accounts with X and the Internal Revenue Service has notified X that the taxpayer identification number that A furnished on a savings account A maintains with X is incorrect (pursuant to section 3406(a)(1)(B)). X is not required to withhold on the payment on the savings bonds. X is not required to check its records to determine whether A has provided the taxpayer identification number which it has been notified is incorrect. X is only required to withhold if A does not provide a taxpayer identification number or provides an obviously incorrect number.

Example (3). Individual B presents a taxable interest coupon to Bank Y for payment. Bank Y is required to make an information return under section 6049 if the coupon represents $10 or more of interest. B maintains other accounts with Y and requests Y to deposit the amount of the interest coupon to his account. The Internal Revenue Service has notified Y that B is subject to backup withholding pursuant to section 3406(a)(1)(C). B furnishes a social security number to Y at the time of the window transaction. Because payments on interest coupons are window transactions, B is not required to certify that his taxpayer identification number is correct or that he is not subject to backup withholding due to notified payee underreporting. Y is also not required to check its records to see whether B is subject to backup withholding. Consequently, Y is not required to withhold on the coupon because B furnished his social security number in the manner required in paragraph (c) of this section.

Example (4). Partnership M requests that Bank Z redeem an interest coupon at maturity that Z is holding as a custodian for M and deposit the funds into M's account. Z is required to make an information return under section 6049 if $10 or more of interest is paid. Z asks M for its employer identification number, and M provides a nine-digit number. M does not certify its taxpayer identification number or certify that it is not subject to backup withholding due to notified payee underreporting. Z is not required to withhold since M has furnished its taxpayer identification number to Z. The payment on the interest coupon is considered a window transaction even though M does not present the interest coupon at a bank window for payment.

§31.3406(b)(2)-4 Reportable dividend payment.

(a) *Dividends subject to withholding.* Except as provided in paragraph (c) of this section, backup withholding under section 3406 is required with respect to any payment of a kind, and to a payee, that is required to be reported under section 6042 (relating to returns regarding payments of dividends and corporate earnings and profits). If the payment is not of a kind subject to reporting under section 6042 because it is not defined as a "dividend" under section 6042(b) or §1.6042-3, then the payment is not subject to backup withholding. Additionally, if the payment is not to a payee subject to reporting under section 6042 because, for example, it is made to a payee that is excluded from the definition of a person (as described in §1.6042-2(a)(2)) to whom a payment is subject to reporting under section 6042, the payment is not subject to backup withholding. After the determination is made under section 6042 that an information return is required, the payor is required to deduct and withhold the tax under section 3406 if any of the four conditions for imposing backup withholding exists (as described in §31.3406(a)-1(a) and (b)). The amount subject to backup withholding under section 3406 is described in paragraph (d) of this section. Notwithstanding the provisions of this section, a payor is not required to withhold on any payment made to a payee described in §31.3406(g)-1(a) (relating to exempt recipients).

(b) *Examples.* The application of the provisions of paragraph (a) of this section may be illustrated by the following examples:

Example (1). Corporation Z makes a distribution to individual shareholder E who has not furnished a social security number to Z. The distribution is a dividend as defined in section 316 and is subject to reporting under section 6042(b)(1)(A) and §1.6042-3(a)(1). Since Z is required to make an information return under section 6042 and E has not provided a social security number, Z is required to withhold under section 3406.

Example (2). Assume the same facts as in *Example (1)* except that Z makes payment to State Q. State Q is not a person (as defined in §1.6042-2(a)(2)) a payment to whom is subject to reporting under section 6042. Since Z is not required to make an information return under section 6042, Z also is not required to withhold under section 3406 even if one of the four conditions for imposing backup withholding under section 3406 exists with respect to Q.

Example (3). Assume the same facts as in *Example (1)* except that the distribution is not from current or accumulated earnings and profits but rather a return of capital. Because the distribution is not a dividend subject to reporting under section 6042, Z is not required to make an information return under section 6042. Accordingly, Z is not required to withhold even if one of the four conditions for imposing backup withholding under section 3406 exists with respect to E.

Example (4). Corporation S makes payment to foreign Corporation T. The payment is subject to withholding under section 1442 or would be subject to withholding under section 1442 but for the provisions of a treaty. The payment is not subject to reporting under section 6042 because it is excepted from the definition of a dividend subject to reporting under §1.6042-3(b)(2). Because S is not required to make an information return under section 6042, S is not required to withhold even if one of the four conditions for imposing backup withholding under section 3406 exists.

(c) *Dividends not subject to withholding.* Except as provided in §31.3406(b)(3)-2 (relating to transactions reportable under section 6045), backup withholding under section 3406 shall not apply to—

(1) Any amount treated as a taxable dividend by reason of section 302 (relating to redemptions of stock);

(2) Any amount treated as a taxable dividend by reason of section 306 (relating to disposition of certain stock);

(3) Any amount treated as a taxable dividend by reason of section 356 (relating to receipt of additional consideration in connection with certain reorganizations);

(4) Any amount treated as a taxable dividend by reason of section 1081(e)(2) (relating to certain distributions pursuant to an order of the Securities and Exchange Commission);

(5) Any exempt-interest dividend, as defined in section 852(b)(5)(A), paid by a regulated investment company;

(6) Any amount paid or treated as paid during a year by a regulated investment company provided that the payor reasonably estimates, as provided in paragraph (d)(2) of this section, that 95 percent or more of all dividends paid or treated as paid during the year are exempt-interest dividends; or

(7) Effective for distributions before 1986, any dividend that is reinvested pursuant to a qualified plan in stock of a public utility. For this purpose, the amount of the reinvested dividend paid to any person, the identity of the recipient, and whether the recipient makes the election required by section 305(e)(2)(B) are irrelevant.

(d) *Amount subject to withholding*—(1) *In general.* The amount of a dividend subject to withholding under section 3406 is generally the amount subject to reporting under section 6042, including any dividend which is reinvested pursuant to a plan under which a shareholder may elect to receive stock as a dividend instead of property. Except as otherwise provided in this paragraph (d), backup withholding applies to the entire amount of the distribution.

(2) *Reasonable estimate of amount of dividend subject to withholding.* Pursuant to section 6042(b)(3) and §1.6042-3(c), if the payor is unable to determine the portion of a distribution that is a dividend, the entire amount of the distribution shall be treated as a dividend for information reporting under section 6042. Hence, backup withholding applies to the entire amount of the distribution. If a payor is able reasonably to estimate under section 6042 and §1.6042-3(c) the portion of a distribution that is not a dividend, however, the payor shall not withhold on that portion (which is not considered a dividend). A payor making a payment, all or a portion of which may not be a dividend, may use previous experience to estimate the portion of the payment which is not a dividend. An estimate of the portion of a distribution that is not a dividend shall be considered reasonable if—

(i) The estimate does not exceed the proportion of the distributions made by the payor during the most recent calendar year for which Form 1099 was required to be filed which was not reported by the payor as a dividend, and

(ii) The payor has no basis to expect that the proportion of the distribution that is not a dividend will be substantially different for the current year.

(3) *Reinvested dividends.* In the case of a dividend paid pursuant to a dividend reinvestment plan (other than a dividend described in paragraph (c)(7) of this section), backup withholding under section 3406 shall apply, pursuant to §31.3406(a)-4(a), at the time the dividend is made available to the shareholder or credited to the shareholder's account. Backup withholding applies to the amount made available to the shareholder or credited to the shareholder's account. At the discretion of the payor, backup withholding under section 3406 need not be applied to any excess of the fair market value of the shares of stock received by the shareholder or credited to the shareholder's account over the purchase price of such shares (including shares acquired by the shareholder at a discount in connection with the dividend distribution) or to any fee that is paid by the payor in the nature of a broker's fee for purchase of the stock or service charge for maintenance of the shareholder's account. Thus, the payor is not required to impose backup withholding on any amount in excess of the actual cash value of the dividend declared that the payee would have received had the payee not been a participant in the dividend reinvestment plan. The payor must, however, treat any excess amounts and fees on a consistent basis for each calendar year.

§31.3406(b)(2)-5 Reportable patronage dividend.

(a) *Patronage dividends subject to withholding.* Except as otherwise provided in paragraph (c) of this section, backup withholding under section 3406 is required with respect to any payment of a kind, and to a payee, that is required to be reported under section 6044 (relating to returns regarding patronage dividends). If the payment is not of a kind subject to reporting under section 6044 because it is not described in section 6044(b) and §1.6044-3, then such payment is not subject to backup withholding. Additionally, if the payment is not subject to reporting under section 6044 because it is made to a payee that is excluded from the definition of a person (as described in §1.6044-2(a)(2)) to whom a payment is subject to reporting under section 6044, the payment is not subject to backup withholding. After the determination is made under section 6044 that an information return is required, the payor is required to deduct and withhold the tax under section 3406 if any of the four conditions for imposing backup withholding exists with respect to the payee (as described in §31.3406(a)-1(a) and (b)). The amount subject to withholding under section 3406 is described in paragraph (c) of this section. Notwithstanding the provisions of this section, a payor is not required to withhold on any payment made to a payee described in §31.3406(g)-1(a) (relating to exempt recipients).

(b) *Examples.* The application of the provisions of paragraph (a) of this section may be illustrated by the following examples:

Example (1). Cooperative K pays Individual F a patronage dividend (as defined in section 1388(a)). The payment is an amount subject to reporting under section 6044 and §1.6044-3(a)(1)(i). Since K is required to make an information return under section 6044, K is required to withhold 20 percent of the amount described in paragraph (c) of this section if any of the four conditions for imposing backup withholding exists with respect to F.

Example (2). Assume the same facts as in *Example (1)* except that the payment is made to a political subdivision of the United States, which is not a person (as defined in §1.6044-2(a)(2)) a payment to whom is subject to reporting under section 6044. K is not required to make an information return under section 6044 because K does not make payment to a payee subject to reporting. Accordingly, K is not required to withhold under section 3406 even if one of the four conditions for imposing backup withholding exists with respect to the political subdivision.

(c) *Amount subject to withholding*—(1) *Failure to provide taxpayer identification number or notification of incorrect taxpayer identification number.* Except as provided in paragraph (c)(2) of this section, the amount of a payment of a kind and to a payee that is subject to withholding under section 3406 is the amount subject to reporting under section 6044, but only to the extent such payment is made in money. For purposes of this paragraph, money includes cash or a qualified check (as defined in section 1388(c)(4)). Thus, the payor shall, when required, withhold 20 percent of the amount required to be reported under section 6044, but only if it is paid in cash or by qualified check.

(2) *Notified payee underreporting or payee certification failure.* For purposes of section 3406(a)(1)(C) and (D), the amount of a payment that is subject to backup withholding under section 3406 is the amount subject to withholding under paragraph (c)(1) of this section, but only if 50 percent or more of that reportable amount is paid in money. Therefore, in the case where there has been a notified payee underreporting described in section 3406(c) or §31.3406(c)-1 or there has been a payee certification failure described in section 3406(d) or

§31.3406(d)-2 and the payor makes a payment subject to reporting under section 6044 of which 50 percent or more is made in cash or by qualified check, the payor is required to withhold 20 percent of the cash or qualified check. If less than 50 percent of the payment is made in cash or by qualified check, no amount is subject to backup withholding.

(3) *Examples.* The application of the provisions of paragraph (c) of this section may be illustrated by the following examples:

Example (1). Cooperative L pays Individual G a $500 patronage dividend consisting of $100 in cash and $400 in a qualified written notice of allocation (as defined in section 1388(c)(1)(B)). G does not furnish his taxpayer identification number to L. L is required to withhold $20 (20 percent of $100, the amount paid in cash or by qualified check).

Example (2). Assume the same facts as in *Example (1)* except that Individual G fails to certify with respect to a membership established on or after January 1, 1984, that he is not subject to backup withholding due to notified payee underreporting. In the case where there has been a payee certification failure, L is not required to withhold under section 3406 because less than 50 percent of the reportable payment is made in cash or by qualified check.

Example (3). Assume the same facts as in *Example (1)* except that G receives a $500 per-unit retain (as defined in section 1388(f)) as a qualified per-unit retain certificate (as defined in section 1388(g)) instead of cash or a qualified written notice of allocation. L is not required to withhold even though G failed to furnish his taxpayer identification number because backup withholding is limited to the amount paid in cash or by qualified check.

Example (4). Cooperative M pays Individual H a patronage dividend consisting of $350 in cash, $250 by a qualified check, and $400 in a qualified written notice of allocation. H fails to certify with respect to a membership established on or after January 1, 1984, that he is not subject to backup withholding due to notified payee underreporting. Accordingly, M is required to withhold $120 (20 percent of $600, the amount paid in cash or by qualified check).

Example (5). Assume the same facts as in *Example (4)* except that the patronage dividend consists of $100 in cash, $250 by a qualified check, and $650 in a qualified written notice of allocation. M is not required to withhold even though there is a payee certification failure because less than 50 percent of the patronage dividend is paid in cash or by qualified check.

§31.3406(b)(3)-1 Reportable payments of rents, commissions, nonemployee compensation, etc.

(a) *Section 6041 and 6041A(a) payments subject to withholding.* Backup withholding under section 3406 is required with respect to any payment of a kind, and to a payee, that is required to be reported under section 6041 (relating to information reporting of rents, salaries, commissions, etc.) or with respect to any payment of a kind, and to a payee, that is required to be reported under section 6041A (a) (relating to information reporting of payments to nonemployees for services). If the payment is not subject to reporting under section 6041A(b) (relating to information reporting of direct sales), the payment is not subject to backup withholding. If the payment is not of a kind subject to reporting under section 6041 as described in §1.6041-3, then the payment is not subject to backup withholding. Additionally, if the payment is not to a payee that is subject to reporting under section 6041 or 6041A(a), then the payment is not subject to backup withholding. See §31.3406(g)-1(a)(3) for provisions relating to how a payor determines that a payee is exempt from information reporting under section 6041 or 6041A(a). Except as provided in paragraph (b)(2) of this section, after the determination is made that an information return is required under section 6041 or 6041A(a), the payor is required to deduct and withhold the tax under section 3406 if the payee does not furnish his taxpayer identification number to the payor in the manner required in §31.3406(d)-1 or the Internal Revenue Service notifies the payor that the taxpayer identification number that the payee furnished the payor is incorrect as described in §31.3406(d)-5. The amount subject to withholding under section 3406 is described in paragraph (b) of this section. Notwithstanding the provisions of this section, a payor is not required to withhold on any payment made to a payee described in §31.3406(g)-1(a) (relating to exempt recipients).

(b) *Amount subject to withholding*—(1) *In general.* Except as otherwise provided in paragraph (b) of this section, the amount subject to backup withholding under section 3406 is the amount subject to reporting under section 6041 or section 6041A(a). For purposes of this paragraph, any amount that is specifically excluded from information reporting under section 6042(a)(1), 6047(a), 6049(a), or 6050N(a) and the regulations issued thereunder is not thereby subject to backup withholding under §31.3406(b)(3)-1.

(2) *Special rule with respect to payments aggregating $600 or more for the calendar year.* In making the determination of whether an information return is required to be made under section 6041 or 6041A(a), the payor shall determine whether the aggregate amount of the current payment and all previous payments to the payee during the calendar year aggregate $600 or more. See paragraph (b)(3) of this section for determining whether reportable payments aggregate $600. If payments to any person that are subject to reporting under section 6041 or 6041A(a) aggregate $600 or more during the calendar year, the payor is required to make an information return and correspondingly may be required to deduct and withhold 20 percent under section 3406. The amount subject to withholding is the entire amount of the payment that causes the total amount paid to the payee to equal $600 or more and the amount of any subsequent payments made to the payee until the payee furnishes or corrects the taxpayer identification number. If, however, the payor was required to make an information return under section 6041 or 6041A(a) for the preceding calendar year with respect to payments to the payee or the payor was required to withhold under section 3406 during the preceding calendar year with respect to payments to the payee that were reportable under section 6041 or 6041A(a), then the payor shall deduct and withhold 20 percent of any payment made to the payee during the calendar year, regardless of whether the payor's payments to the payee equal or exceed $600 for the year, until the payee furnishes or corrects the taxpayer identification number. See §31.6051-4 for the requirement to furnish a statement to the recipient in all cases where tax is withheld under section 3406. The $10 minimal payment exception described in §31.3406(b)(4)-1 does not apply with respect to payments subject to reporting under section 6041 or 6041A(a). This paragraph (b)(2) does not apply to gambling winnings (as provided in §31.3406(g)-2(e)(1)).

(3) *Determination of whether payments aggregate $600 or more.* In making the determination of whether payments to a payee aggregate $600 or more during a calendar year for purposes of backup withholding, the payor must aggregate only payments

of the same kind made to the same payee. For this purpose, payments are of the same kind if they are of the same type, not if they are reportable under the same section. For example, a payor is not required to aggregate rental payments to a payee with premium payments to the same payee even though both payments are reportable under section 6041. In addition, a payor with different paying departments making reportable payments of the same kind is not required to aggregate payments made by all the departments unless it is the payor's customary method to aggregate those payments. A payor may, in its discretion, aggregate—

(i) Payments not of the same kind to the same payee, reportable under either section 6041 or 6041A(a), and/or

(ii) Payments reportable under section 6041 with payments reportable under section 6041A(a).

(4) *Exceptions.* Backup withholding does not apply to net commissions paid to unincorporated special agents with respect to insurance policies that are subject to reporting under section 6041, provided that no cash is actually paid by the payor to the special agent.

(5) *Examples.* The application of the provisions of this paragraph (b) may be illustrated by the following examples:

Example (1). A, in the course of his trade or business, pays rent to B, an individual who is not a real estate agent. A pays B $200 on June 30, 1984, and $200 on December 31, 1984. B does not furnish his taxpayer identification number to A. A has not made any rental payments to B in the preceding year. A is not required to make an information return under section 6041 since the aggregate payments to B do not exceed $600 during the calendar year. A is not required to withhold 20 percent of the payments under section 3406 because A is not required to make an information return under section 6041 and A did not make any payments to B in the preceding year that would have required A to withhold in 1984.

Example (2). Assume the same facts as in *Example (1)* except that A also pays $400 to B during 1984 as nonemployee compensation which is reportable under section 6041A(a). A is not required to aggregate the payments made to B under section 6041 with the payments made to B under section 6041A(a). Thus, the result is the same as in Example (1) because A did not pay B $600 or more during 1984 in payments of a type which are reportable under the same section. A may, however, aggregate the payments. If A aggregates the payments, A would be required to withhold under section 3406.

Example (3). Assume the same facts as in *Example (1)* except that A paid B over $600 of rental payments during 1983 (the preceding calendar year). A was required to make an information return for 1983. Even though A did not pay B $600 or more during calendar year 1984, A is required under section 3406 to withhold 20 percent of each $200 payment made to B in 1984 because A did not receive B's taxpayer identification number. A is required to continue to withhold on the rental payments made to B, including payments made in the subsequent calendar year, until A receives B's taxpayer identification number. A is required to file an information return with respect to the payments made to B in 1984 (even though such payments do not equal or exceed $600) because A backup withheld on those amounts.

Example (4). C, in the course of his trade or business, pays D $200 for machine hire on January 1, $100 on February 1, $50 on March 1, $75 on April 1, $115 on May 1, $60 on June 1, and $150 a month on the first day of each month from July through December of 1984. D does not furnish a taxpayer identification number to C at any time during 1984. C did not make any machine hire payments to D in the preceding calendar year. C is required to withhold 20 percent of the $60 payment made on June 1 (i.e., the payment that causes the aggregate payments to D to equal or exceed $600) and of every payment made thereafter until C receives D's taxpayer identification number.

Example (5). Assume the same facts as in Example (4) except that C receives D's taxpayer identification number on March 19, 1984. C is not required to withhold 20 percent of the payments made during the year since C receives D's taxpayer identification number before C paid $600 of machine hire payments to D.

Example (6). Assume the same facts as in *Example (4)* except that C receives D's taxpayer identification number on June 15, 1984. C is required to withhold 20 percent of the payment on June 1 because D does not receive D's taxpayer identification number prior to the time that C's payments to D equal $600 for the calendar year. C is not required to withhold under section 3406 on any subsequent payments to D during the calendar year.

§31.3406(b)(3)–2 Reportable barter exchanges and gross proceeds of sales of securities or commodities by brokers.

(a) *Transactions subject to withholding.* Backup withholding under section 3406 is required with respect to any amount of a kind, and to a payee, that any broker (as defined in section 6045(c) and §1.6045–1(a)(1)) or any barter exchange (as defined in section 6045(c) and §1.6045–1(a)(4)) is required to report under section 6045. If the amount is not of the kind subject to reporting under section 6045 (as described in §1.6045–1(c)(3)), then that amount is not subject to backup withholding. Additionally, if the amount is not subject to reporting under section 6045 because it is made with respect to an exempt recipient (as described in §5f.6045–1(c)(3)(i)) or it is made with respect to an exempt foreign person (as described in §1.6045–1(g)), that amount is not subject to backup withholding. After the determination is made under section 6045 that an information return is required, the broker or barter exchange is required to deduct and withhold the tax under section 3406 if the payee does not furnish his taxpayer identification number to the broker or the barter exchange in the manner required in §31.3406(d)–1 or the Internal Revenue Service notifies the broker or barter exchange that the taxpayer identification number the payee furnished to the broker or barter exchange is incorrect as described in §31.3406(d)–5. The amount subject to withholding under section 3406 is described in paragraph (c) of this section. See §31.3406(i)–1 for a special rule regarding the furnishing of taxpayer identification numbers after January 1, 1984, with respect to certain accounts.

(b) *Examples.* The application of the provisions of paragraph (a) of this section may be illustrated by the following examples:

Example (1). Broker M effects the sale of a security for Individual E who is M's customer. M is required to make an information return under section 6045 showing the gross proceeds of the sale because E is a payee with respect to whom an information return is required. Since M is required to make an information return under section 6045, M is required to withhold 20 percent of the gross proceeds under section 3406 if E does not furnish a taxpayer identification number to M in the manner required in §31.3406(d)–1 or the Internal Revenue Service notifies M that E's taxpayer identification number is incorrect.

Example (2). Assume the same facts as in *Example (1)* except that M effects a sale for Corporation O which is M's customer. M is not required to make an information return under section 6045 showing the gross proceeds since O is an exempt recipient for purposes of broker reporting under §5f.6045–1(c)(3)(i). Because M is not required to make an information return under section 6045, M is not required to withhold 20 percent of the gross proceeds even if one of the conditions for imposing backup withholding under section 3406 exists.

Example (3). Assume the same facts as in *Example (1)* except that Individual E is a person who has signed a statement as required in §1.6045–1(g)(3)(i), effective for the calendar year in question, that he is an exempt foreign person. M is not required to make an information return under section 6045 because the amount is not paid to a payee subject to information reporting. Because M is not required to make an information return under section 6045, M is not required to withhold 20 percent of the gross proceeds even if one of the conditions for imposing backup withholding under section 3406 exists.

Example (4). Broker N retires a Treasury bill (*i.e.*, a short-term government discount obligation as defined in section 1271(a)(3)(B)) for Individual F. N is not required to make an information return under section 6045 showing the gross proceeds because that amount is a kind of payment excepted from broker reporting under §5f.6045-1(c)(3)(vi)(C). The amount of the original discount included in the income of the holder is subject to reporting at maturity, however, under section 6049. See §31.3406(b)(2)-2 for the requirement to withhold on the amount subject to reporting at maturity under section 6049.

Example (5). Assume the same facts as in *Example (4)* except that F instructs Broker N to sell F's Treasury bill before maturity for $9,800. Broker N is required to make an information return under section 6045 showing $9,800 as the gross proceeds of the sale since that amount is of a kind subject to reporting under section 6045. Because N is required to make an information return under section 6045, N is required to withhold 20 percent of $9,800 (the gross proceeds) under section 3406 if F does not furnish a taxpayer identification number to N in the manner required in §31.3406(d)-1 or the Internal Revenue Service notifies N that F's taxpayer identification number is incorrect.

Example (6). Individual G asks Broker O to redeem shares of a mutual fund (other than a redemption at issue price described in §5f.6045-1(c)(3)(v)). O is required to make an information return under section 6045 and, accordingly, is required to withhold 20 percent of the gross proceeds if G does not furnish a taxpayer identification number to O in the manner required in §31.3406(d)-1 or the Internal Revenue Service notifies O that G's taxpayer identification number is incorrect.

Example (7). Individual H asks Broker P to redeem a tax-exempt municipal bond at maturity with a redemption value of $10,000. A $500 interest coupon is also attached to the bond that is payable on the date of maturity. P is required to make an information return under section 6045 showing gross proceeds of $10,000. Correspondingly, P is required to withhold 20 percent of the gross proceeds ($10,000) if a condition for imposing backup withholding exists with respect to the gross proceeds under paragraph (a) of this section. If H properly completes the "shell" or envelope (i.e., he includes his name, address, and taxpayer identification number) used for processing the coupon and states that the interest is exempt from taxation under section 103(a) (as provided in §1.6049-5(b)(2)), P is not required to make an information return showing the tax-exempt interest portion ($500) of the gross proceeds because that amount is not required to be reported under either section 6045 or 6049. Accordingly, P is not required to withhold 20 percent of the $500 tax-exempt interest payment.

Example (8). Individual I instructs Broker Q to transfer a corporate debenture to J for $15,000 (of which $2,000 represents accrued interest). Q is required to make an information return under §1.6045-1(d)(5) on Form 1099-B showing $13,000 of gross proceeds. Q is also required to make an information return under §1.6045-1(d)(3) on Form 1099-INT showing $2,000 of interest. Both the $13,000 of gross proceeds and the $2,000 of interest are subject to backup withholding if I does not furnish his taxpayer identification number to Q or the Internal Revenue Service notifies Q that I's taxpayer identification number is incorrect. Because the accrued interest element is not a reportable interest payment under section 6049, Q is not required to withhold if the Internal Revenue Service notifies Q under section 3406(a)(1)(C) relating to notified payee underreporting or if I fails to make the certification required in §31.3406(d)-2. The interest component of the gross proceeds is reportable as interest pursuant to §1.6045-1(d)(3) but in the manner and at the time required by Form 1099 and section 6049.

Example (9). Individual K requests Bank R to redeem a nontransferable certificate of deposit issued by R. The certificate of deposit is a book entry obligation with respect to which the relevant books and records indicate that no interim transfers have occurred. R is not required to make an information return under §5f.6045-1(c)(3)(x), and, accordingly, R is not required to withhold on the gross proceeds at maturity. R, however, is required to make an information return under section 6049 with respect to the interest on the obligation and is required to withhold on the reportable interest payment if any of the four conditions for imposing backup withholding under section 3406 exists (as described in §31.3406(a)-1(a) and (b)).

Example (10). Depositary Trust S, which regularly acts as an escrow agent in corporate acquisitions, is the agent for Corporation W in a tender offer by W for the stock of Corporation T. Partnership L tenders T stock to S and is paid the tender offer price by S. Under section 6045, S is required to make an information return showing the gross proceeds paid by S to L for T stock. Consequently, S is required to withhold 20 percent of the gross proceeds under section 3406 if L does not furnish a taxpayer identification number in the manner required in §31.3406(d)-1 or the Internal Revenue Service notifies S that L's taxpayer identification number is incorrect.

Example (11). Issuer A arranges for Transfer Agent X to act as its disbursing agent with respect to dividends paid on its stock under its dividend reinvestment plan. The issuer has the reporting obligation for the dividends paid to the plan because it has the legal obligation to make those payments and hence any backup withholding liability that might exist. Thus, upon the reinvestment of the dividends to the plan by the holder, X has no reporting obligation under section 6042. Nor does X have a reporting obligation under section 6045. Although X is a broker under §1.6045-1(a)(1) of the regulations, since it stands ready to purchase or redeem shares of Issuer A's stock, there is no "sale" with respect to the holder of Issuer A's stock on the reinvestment of the dividends. However, if Issuer A's stock is redeemed by instruction from the holder to X and X will pay the holder redeemed, then X must report the gross proceeds under section 6045.

Example (12). Individual AA instructs Broker V to redeem shares of a qualified dividend reinvestment plan of a public utility. Although reinvested dividends of that plan are not subject to backup withholding under §31.3406(b)(2)-4(c)(7) (with respect to distributions before 1986), V is required to make an information return under section 6045 showing the gross proceeds of the shares redeemed. Correspondingly, V is required to withhold 20 percent of the gross proceeds if AA does not furnish a taxpayer identification number to V in the manner required in §31.3406(d)-1 or the Internal Revenue Service notifies V that AA's taxpayer identification number is incorrect.

(c) *Amount subject to withholding*—(1) *In general.* Except as provided in paragraph (c)(2), (3), (4), and (5) of this section and §31.3406(b)(4)-1, the amount subject to withholding under section 3406 is the amount subject to reporting under section 6045. The amount subject to withholding with respect to broker reporting is the amount of gross proceeds (as determined under §1.6045-1(d)(5)). The amount subject to withholding with respect to barter exchanges is the amount received by any member or client (as determined under §1.6045-1(f)(4)).

(2) *Foreign currency contracts, forward contracts, or regulated futures contracts.* If a customer is subject to backup withholding with respect to foreign currency contracts (as defined in section 1256(g) and reportable under §1.6045-1(c)(5)) or with respect to an account through which forward contracts or regulated futures contracts are disposed of or acquired, the broker must withhold 20 percent of both of the following amounts:

(i) All cash or property withdrawn from the account by the customer during the relevant year. A withdrawal includes the use of money (including both gross proceeds and variation margin) or property in the account to purchase any property other than property acquired in connection with the closing of a contract. For this purpose, the acceptance of a warehouse receipt or other taking of delivery to close a contract is in connection with the closing of a contract only if the property acquired is disposed of by the close of the seventh trading day following the trading day that the customer takes delivery under the contract. In addition, making delivery to close a contract is in connection with the closing of a contract only if the broker is able to determine that the property used to close the contract was acquired no earlier than the seventh trading day prior to the trading day on which delivery is made. Withdrawals do not include repayments of debt incurred in connection with making or taking delivery that meets the requirements of this paragraph (c)(2). Withdrawals

also do not include payments of commissions, fees, transfers of cash from the account to another futures account that is subject to this paragraph (c)(2) or cash withdrawals traceable to dispositions of property other than futures (not including profit on the contract separately reportable under §1.6045-1(c)(5)(i)(b)); and

(ii) The amount of cash in the account available for withdrawal by the customer at the relevant year-end (including both gross proceeds and variation margin).

The determination of whether the customer is subject to backup withholding with respect to an account containing forward contracts or regulated futures contracts shall be made at the time of the cash or property withdrawals or the relevant year-end, whichever is applicable.

(3) *Security sales made through a margin account.* The amount subject to backup withholding in the case of a security sale made through a margin account (as defined in 12 CFR section 220 (Regulation T)) is the gross proceeds (as defined in §1.6045-1(d)(5)) of such sale. The amount required to be withheld with respect to such a sale, however, is limited to the amount of cash available for withdrawal by the customer immediately after the settlement of the sale. For this purpose, the amount available for withdrawal by the customer does not include amounts required to satisfy margin maintenance under: Regulation T, rules and regulations of the National Association of Securities Dealers and national securities exchanges, and generally applicable self-imposed rules of the margin account carrier.

(4) *Security short sales*—(i) *Amount subject to backup withholding.* The amount subject to backup withholding with respect to a short sale of securities is the gross proceeds (as defined in §1.6045-1(d)(5)) of such short sale. At the option of the broker, however, the amount subject to backup withholding may be the gain upon the closing of the short sale (if any); consequently, the obligation to withhold would be deferred until the closing transaction. A broker may use this alternative method of determining the amount subject to backup withholding with respect to a short sale only if at the time the short sale is initiated the broker expects that the amount of gain realized upon the closing of the short sale will be determinable from the broker's records. If, due to events unforeseen at the time the short sale was initiated, the broker is unable to determine the basis of the property used to close the short sale, the property shall be assumed to have a basis of zero.

(ii) *Time of withholding.* The determination of whether a short seller is subject to backup withholding shall be made on the date of the initiation or closing, as the case may be, or on the date that the initiating or closing, as the case may be, is entered on the broker's books and records.

(5) *Fractional shares.* A broker is not required to withhold under section 3406 with respect to a sale of a fractional share of stock resulting in less than $20 of gross proceeds (as described in §5f.6045-1(c)(3)(ix)).

(6) *Examples.* The application of the provisions of this paragraph (c) may be illustrated by the following examples in each of which it is assumed that the payee failed to provide a taxpayer identification number in the manner required by §31.3406(d)-1:

Example (1). A instructs Broker M to sell 200 shares of Corporation X's stock for $100 per share. The amount of gross proceeds subject to reporting under section 6045 and thus subject to backup withholding under section 3406 is $20,000.

Example (2). B instructs Broker N to retire a long-term bond at maturity where the stated redemption price at maturity is $10,000. The amount of gross proceeds subject to reporting under section 6045 and thus subject to backup withholding under section 3406 is $10,000.

Example (3). Assume the same facts as in *Example (2)* except that the bond has a $50 final interest coupon attached. The amount of gross proceeds subject to reporting under section 6045 and thus subject to withholding under section 3406 is $10,000. The $50 interest coupon is subject to reporting under section 6049 and, accordingly, is subject to backup withholding as described in §31.3406(b)(2)-1.

Example (4). On March 1, 1984, C enters into a futures contract through O, a futures commission merchant. C deposits initial margin with O in the form of a $10,000 Treasury bill. The futures contract is closed on September 1, 1984, at a net profit of $5,000. In addition, on October 1, 1984, the Treasury bill matures, and O credits C's account with $10,000. C seeks to withdraw the $15,000 from the account on November 1, 1984. The amount subject to backup withholding is $5,000 (i.e., the amount which is a withdrawal under paragraph (c)(2)(i) of this section). The $10,000 proceeds from the redemption of the Treasury bill is not considered a withdrawal because the proceeds are traceable to the disposition of property other than futures contracts. The amount paid with respect to the maturity of the Treasury bill is subject to reporting under section 6049. See §31.3406(b)(2)-2 for the amount subject to backup withholding at maturity of the Treasury bill.

Example (5). Assume the same facts as in *Example (4)* except that the futures contract is not closed on September 1. On December 31, 1984 (the end of C's taxable year), the cash available for C's withdrawal from the account is $2,000 due to a positive balance in the variation margin account. The amount subject to backup withholding is $2,000 under paragraph (c)(2)(ii) of this section.

Example (6). D maintains an account with Broker P through which D enters into forward contracts. D authorizes P to withdraw $50,000 cash from the account on April 1, 1984, in order to take delivery to close a forward contract. The amount subject to backup withholding is $50,000 under paragraph (c)(2)(i) of this section if the property delivered pursuant to the contract is not disposed of by the close of the seventh trading day following the trading day that the customer took delivery under the contract. Thus, for example, in a case where the property delivered pursuant to the contract is not disposed of until the tenth trading day following the trading day that the customer took delivery under the contract, Broker P must withhold $10,000 (20 percent of $50,000, the amount subject to backup withholding). If, however, property was disposed of by the close of the seventh trading day following the trading day that the customer took delivery under the contract, the total amount withdrawn would not have been subject to backup withholding.

Example (7). E maintains an account with Broker Q through which E engages in margin transactions. In order to satisfy the applicable margin requirements, Q sells $500 worth of stock for E's account. No amount of the $500 proceeds is subject to backup withholding under paragraph (c)(3) of this section since the entire amount of the proceeds is necessary to meet the margin requirement. Q would be required to withhold, however, to the extent, if any, that the proceeds of such a forced sale exceeded the amount needed to meet the margin requirements.

Example (8). F enters into a short sale through Broker R with respect to 100 shares of Corporation Y's stock for $50 a share. The amount subject to backup withholding is $5,000 under paragraph (c)(4) of this section. R may elect, however, to defer withholding until the short sale is closed, if at the time the short sale was initiated, R expected that the gain realized from the sale would be determinable from R's records. If R elects and R's records show the amount of the gain, the amount subject to backup withholding would be the gain realized on closing. If the amount of the gain cannot be determined from R's records at the time of closing, the property used to close the short sale must be assumed to have a basis of zero. Consequently, the amount of gain subject to backup withholding is $5,000.

§31.3406(b)(3)-3 Reportable payments by certain fishing boat operators.

(a) *Payments subject to withholding.* Backup withholding under section 3406 is required with respect to any amount of a kind, and to a payee, that is required to be reported

under section 6050A (relating to information reporting by certain fishing boat operators). If the payment is excepted from the definition of wages subject to wage withholding under section 3402, then that payment is subject to reporting under section 6050A and backup withholding. If the payment is not subject to reporting under section 6050A because the payee is treated as an employee performing services described in section 3121(b)(20) and §31.3121(b)(20)-1, that payment is not subject to backup withholding because the payment is wages subject to wage withholding under section 3402. After the determination is made under section 6050A that an information return is required, the fishing boat operator is required to deduct and withhold the tax under section 3406 if the payee does not furnish his taxpayer identification number to the fishing boat operator in the manner required in §31.3406(d)-1 or the Internal Revenue Service notifies the fishing boat operator that the taxpayer identification number that the payee furnished to the fishing boat operator is incorrect. The amount subject to withholding under section 3406 is described in paragraph (c) of this section.

(b) *Examples.* The application of the provisions of paragraph (a) of this section may be illustrated by the following examples:

Example (1). K, an owner of a fishing boat, normally operates the boat with a captain and eight others performing services as crew members of the boat solely for cash representing a share of the catch. K is required to make an information return under section 6050A. Accordingly, K is required to withhold 20 percent of the amount described in paragraph (c) of this section if a crew member does not furnish his taxpayer identification number to the fishing boat operator in the manner required in §31.3406(d)-1 or the Internal Revenue Service notifies the fishing boat operator that the taxpayer identification number that the crew member furnished the fishing boat operator is incorrect.

Example (2). Assume the same facts as in *Example (1)* except that K does not pay the crew members a share of the catch but rather pays them cash remuneration as wages for services performed. The payment is subject to income tax withholding under section 3402. Thus, K is not required to make an information return under section 6050A and, accordingly, K is not required to withhold under section 3406. K may be required to file a statement under section 6051(d).

(c) *Amount subject to withholding*—(1) *In general.* The amount subject to withholding under section 3406 is the amount subject to reporting under section 6050A, but only to the extent the amount is paid in money and represents a share of the proceeds of the catch. Thus, while the fair market value of the share of the catch that the payee receives generally must be reported under section 6050A, the fishing boat operator shall withhold under section 3406 only on the dollar amount the individual receives as his share of the proceeds of the catch (*i.e.*, the amount required to be included on Form 1099 under section 6050A and §1.6050A-1(a)(5)).

(2) *Examples.* The application of the provisions of paragraph (c)(1) of this section may be illustrated by the following examples:

Example (1). L, an owner of a fishing boat, normally employs nine people to work as the crew members of the boat. The only remuneration that L pays each crew member is his respective share of the catch in kind. L is required to make an information return under section 6050A showing the type and weight of the crew member's share of the catch and, if ascertainable, the fair market value of the catch. L is not required to withhold under section 3406, however, because backup withholding is limited to the extent of the cash received with respect to amounts subject to reporting under section 6050A.

Example (2). Assume the same facts as in example (1) except that L pays each crew member his share of the proceeds of the catch. L is required to make an information return under section 6050A showing the dollar amount paid to each crew member. L is required to withhold under section 3406 on the dollar amount paid to a crew member who does not furnish a taxpayer identification number to L or with respect to whom the Internal Revenue Service has notified L that an incorrect taxpayer identification number has been furnished.

Example (3). Assume the same facts as in example (1) except that, in addition to receiving a share of the catch, each crew member is entitled to receive $3 per hour for repairing nets, constructing new nets, splicing cable, and other incidental work while in port. Since each crew member is entitled to receive payment other than a share of the catch, he is considered an employee and thus subject to wage withholding under section 3402. Accordingly, none of L's payments to the crew members are reportable under section 6050A. Thus, L is not required to withhold under section 3406.

§31.3406(b)(3)-4 Reportable payments of royalties.

(a) *Royalty payments subject to withholding.* Backup withholding under section 3406 is required with respect to any payment of a kind, and to a payee, that is required to be reported under section 6050N (relating to information reporting of payments of royalties). If the payment is not of a kind subject to reporting under section 6050N, then the payment is not subject to backup withholding. Additionally, if the payment is not to a payee that is subject to reporting under section 6050N, then the payment is not subject to backup withholding. See section 6050N(c) for those payees that are not subject to information reporting under section 6050N and thus are not subject to withholding under this paragraph. After the determination is made that an information return is required under section 6050N, the payor is required to deduct and withhold the tax under section 3406 if the payee does not furnish his taxpayer identification number in the manner required in §31.3406(d)-1 or the Internal Revenue Service notifies the payor that the taxpayer identification number that the payee furnished the payor is incorrect as described in §31.3406(d)-5. The amount subject to withholding under section 3406 is described in paragraph (b) of this section. Notwithstanding the provisions of this section, a payor is not required to withhold on any payment made to a payee described in §31.3406(g)-1(a) (relating to exempt recipients).

(b) *Amount subject to withholding.* The amount subject to backup withholding under section 3406 is the amount subject to reporting under section 6050N.

§31.3406(b)(4)-1 Exemption for certain minimal payments.

(a) *In general.* A payor is required to withhold under section 3406 with respect to any payment that is of a kind and to a payee that is subject to information reporting if any condition for imposing backup withholding exists (as described in §31.3406(a)-1). A payor of reportable interest or dividends (as defined in §31.3406(b)-(1)-1(b)) may elect, however, not to withhold from a payment which does not exceed $10 and which on an annualized basis does not exceed $10 (as computed in paragraph (c) of this section). In addition, a broker or barter exchange may elect not to withhold on gross proceeds of $10 or less. The broker or barter exchange is not required to annualize the amount of the gross proceeds. If a payor, broker, or barter exchange elects to withhold on amounts of $10 or less, the payor, broker, or barter exchange is required to make an information return under §31.6051-1. A payment

of more than $10 is subject to withholding under this section, regardless of the period for which the payment is made if any relevant condition for imposing backup withholding under section 3406 exists (as described in §31.3406(a)-1). Therefore, the annualization computation of paragraph (c) of this section should not be performed for any payment exceeding $10.

(b) *Manner of making the election.* The election not to withhold from payments that do not exceed $10 can be made only for a reportable interest or dividend payment (as defined in §31.3406(b)(1)-1(b)), for a royalty payment (as defined in §31.3406(b)(3)-4), or by a broker or barter exchange with respect to gross proceeds (as described in §31.3406(b)(3)-2). Thus, a payor of any other reportable payment (as defined in §31.3406(b)(1)-1(c)) except royalty payments is required to withhold regardless of the amount except as provided in §31.3406(b)(3)-1 with respect to amounts subject to reporting under section 6041 or 6041A(a). The minimal payment election is made with respect to a particular payment by complying with all the requirements of this section. The election not to withhold on payments that do not exceed $10 need not be made consistently, but may be made on a payment-by-payment basis.

(c) *Annualization*—(1) *Reportable interest or dividend payment.* Except as provided in paragraph (c)(2) of this section, with respect to any reportable interest or dividend payment (other than an amount paid in a window transaction or an amount that is original issue discount), the payor shall annualize the payments made. With respect to a payor who maintains records which reflect multiple holdings of one payee and the payor makes an aggregate payment with respect to all the payee's holdings (such as a dividend check that reflects payment on all stock owned by the payee), the payor shall annualize the aggregate payment made. To annualize a reportable interest or dividend payment, the payor shall calculate what the amount of the payment would be if it were paid for a 1-year period (instead of the period for which it actually is paid). The annualized amount shall be determined by dividing the amount of the payment by the number of days in the period for which it is being paid and then multiplying that result by the number of days in the year. If the annualized amount is $10 or less, the payor may elect not to apply backup withholding to that payment regardless of whether more than $10 may be or has been paid to the payee in other reportable payments during the calendar year. Conversely, if the annualized amount is more than $10, backup withholding applies even if $10 or less is actually paid to the payee during the calendar year. For purposes of computing the annualized amount, the payor may assume either that February always consists of 28 days and that the year consists of 365 days or that each month always consists of 30 days and that the year consists of 360 days. For amounts that are deposited with a payor in a new account or certificate between the dates on which the payor customarily pays or credits interest, the payor may assume that the period for which the interest is paid is the payor's customary period for paying or crediting interest.

(2) *Window transactions, original issue discount, and broker reporting.* No annualization is required for window transactions (as defined in §31.3406(b)(2)-3(b)), original issue discount, or a broker reporting gross proceeds under section 6045. With respect to a window transaction, however, the payor is required to aggregate all payments made in the same transaction (*e.g.*, payments made with respect to coupons or obligations presented for payment at the same time as described in §1.6049-4(e)(4)). A payor is not required to annualize any amount that is original issue discount on an obligation regardless of the period of time for which the payment is made. Thus, original issue discount (as described in §31.3406(b)(2)-2) is subject to withholding under section 3406 only if it exceeds $10.

(d) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). A, an individual to whom payments are subject to backup withholding, maintains a savings account at Bank M. M credits interest on the account at the end of each calendar quarter. M credits $2.60 of interest to A's account on March 31, and $2.00 of interest on June 30, September 30, and December 31. The annualized amount for the payment credited on March 31 exceeds $10 determined for a 1-year period (*i.e.*, $2.60 (actual payment) divided by 90 (number of days in the quarter) multiplied by 360 is $10.40). Consequently, the payment to A is not a minimal payment, and M may not elect not to impose backup withholding on the payment. Therefore, M must withhold 52 cents ($2.60 multiplied by 20 percent) from the amount credited to A on March 31. M is not required to withhold on June 30, September 30, or December 31, because the annualized amount for each of the payments does not exceed $10 ($2.00 divided by 90 multiplied by 360 is $8.00).

Example (2). Assume the same facts as in *Example (1)* except that the payments on September 30 and December 31 are $3.00 each. The result is the same as in *Example (1)* with respect to the payments on March 31 and on June 30. M is required to withhold on the payments made on September 30 and December 31 since the annualized amount credited on each date exceeds $10 (*i.e.*, $3.00 divided by 90 multiplied by 360 is $12.00). Even though the total payments made to B during the 1-year period exceed $10, M is not required to withhold on June 30. M is not required to withhold more than 20 percent from the third or fourth quarterly payment to compensate for the earlier payment that was not subject to withholding.

Example (3). Individual C presents two Series EE savings bonds at Bank N to cash, on each of which $3 of interest has accrued. C also presents an interest coupon for a corporate bond on which $10 of interest is payable. Thus, the total amount of interest paid to C in the transaction is $16. N is required to withhold if C does not furnish a taxpayer identification number. If only the two savings bonds were presented, however, N would not be required to withhold since not more than $10 would be paid to C in the transaction. N is not required to annualize the payment under paragraph (b) of this section because it is a window transaction (as defined in §31.3406(b)(2)-3).

Example (4). Corporation X pays quarterly dividends on shares owned by Individual D. Each quarter X pays D $2.75 of dividends for all the shares D owns. X is required to withhold on each quarterly dividend because the annualized amount of each quarterly dividend exceeds $10 (*i.e.*, $2.75 divided by 90 multiplied by 360 is $11).

Example (5). Individual E opens a new savings account at O Bank on February 2, 1984, and fails to make the certifications required in §31.3406(d)-1 or §31.3406(d)-2. O customarily credits interest to accounts of this type at the end of each calendar quarter. On March 31, O credits $2.00 of interest to D's account. O may annualize the payment by dividing $2 by 59 (the number of days in the period for which the interest actually is paid) and multiplying that amount by 360. In that event, the annualized amount would be $12.20, and O would be required to withhold. Alternatively, O may treat the payment as made for the entire calendar quarter. Accordingly, O would annualize the payment by dividing $2 by 90 and multiplying that amount by 360, in which case the annualized amount would be $8.00 and O could elect not to withhold.

Example (6). Q is a middleman payor (as defined in §31.3406(a)-2(b)(3)) with respect to dividends that are paid quarterly. Q maintains separate records for each instrument of the same issue owned by Individual F, who fails to furnish a social security number. Q pays $9 of dividends to F with respect to Y company stock

and $2 of dividends to F with respect to Z company stock. While Q is not required to aggregate the two payments, Q is required to annualize each payment. Thus, Q must withhold on the quarterly dividend of $9 paid with respect to Y stock since the annualized amount exceeds $10 (i.e., $9 divided by 90 multiplied by 360 is $36). Q is not required to withhold on the quarterly dividend of $2 paid with respect to Z stock since the annualized amount does not exceed $10 ($2.00 divided by 90 multiplied by 360 is $8).

Example (7). Assume the same facts as in *Example (6)* except that Q maintains records which reflect F's multiple holdings in Y and Z issues and Q makes an aggregate payment of $11.00 to C. Since the payment is more than $10, backup withholding applies.

§31.3406(c)-1 Notified payee underreporting of reportable interest or dividend payments.

(a) *Requirement to withhold*—(1) *In general.* Backup withholding under section 3406(a)(1)(C) is required with respect to any reportable interest or dividend payment (as defined in section 3406(b)(2) and §31.3406(b)(1)-1(b)) made to a payee if the Internal Revenue Service or a broker (as defined in section 3406(h)(5) and §31.3406(h)-1(c) and pursuant to section 3406(d)(2)(B)(ii)(III)) notifies a payor (as defined in section 3406(h)(4) and §31.3406(a)-2) that the payee is subject to backup withholding due to a notified payee underreporting (as defined in paragraph (a)(2) of this section). The payor is required under section 3406(c)(4) and paragraph (c)(1) of this section to inform the payee that backup withholding under section 3406(a)(1)(C) has begun. The requirements for the notice that a payor must send to a payee are set forth in paragraph (c)(2) and (3) of this section. The period for which backup withholding is required due to a notified payee underreporting is described in section 3406(e)(3)(A) and in paragraph (e)(1) of this section. See section 3406(c)(3) and paragraph (g) of this section for the rules regarding how a payee may obtain a determination from the Internal Revenue Service that withholding under section 3406(a)(1)(C) be stopped or not started.

(2) *Definition of notified payee underreporting.* The term "notified payee underreporting" means that the Internal Revenue Service has—

(i) Determined that there was a payee underreporting as defined in paragraph (a)(3) of this section,

(ii) Mailed at least four notices to the payee (over a period of at least 120 days) with respect to the underreporting as prescribed in paragraph (f)(1) of this section, and

(iii) Assessed any deficiency attributable to the underreporting in the case of any payee who has filed a return.

(3) *Definition of a payee underreporting.* The term "payee underreporting" means that the Internal Revenue Service has determined, for a taxable year, that—

(i) A payee failed to include in his return of tax under chapter 1 of the Internal Revenue Code for such year any portion of a reportable interest or dividend payment required to be shown on such tax return, or

(ii) A payee may be required to file a return for such year and to include a reportable interest or dividend payment in such return, but failed to file such return.

Reportable minimal payments (*i.e.*, small payments described in section 3406(b)(5) to the extent reported on an information return), patronage dividends, original issue discount, and window payments shall be taken into account in determining whether underreporting as defined in paragraph (a)(3) of this section has occurred, even though such payments may not be defined as reportable interest or dividend payments under section 3406(b)(2) and §31.3406(b)(1)-1(b) or even though backup withholding under section 3406(a)(1)(C) may not apply to such payments.

(b) *Notice to payors and brokers regarding backup withholding*—(1) *Notice from the Internal Revenue Service.* The Internal Revenue Service will notify—

(i) Payors to begin backup withholding on reportable interest or dividend payments due to a notified payee underreporting pursuant to section 3406(a)(1)(C); and

(ii) Brokers pursuant to section 3406(c)(5) that a payee is subject to backup withholding under section 3406(a)(1)(C).

(2) *Notice from a broker.* A broker who receives a notice from the Internal Revenue Service that a payee is subject to backup withholding due to a notified payee underreporting and through whom the payee subsequently acquires a readily tradable instrument (as defined in section 3406(h)(6)) with respect to which the broker is not the payor is required to notify the payor of that instrument that the payee is subject to backup withholding under section 3406(a)(1)(C) in the time and manner provided in §31.3406(d)-4(a).

(3) *Accounts subject to backup withholding*—(i) *Existing accounts.* After receiving notice from the Internal Revenue Service or from a broker, as provided in section 3406(d)-(2)(B) and paragraphs (b)(l)(i) and (2) of this section, that a payee is subject to backup withholding under section 3406 (a)(l)(C), payors are required to withhold 20 percent of all reportable interest or dividend payments subject to backup withholding made with respect to all existing accounts of the payee (and all subsequent accounts that are thereafter opened by the payee which the payor treats as under one primary account) with that payor (i.e., with the payor's Taxpayer Identification Number).

(ii) *New accounts; reliance on certification.* If paragraph (b)(3)(iii) of this section does not apply to a new account of a payee, then a payor may rely on a certification made by a payee under penalties of perjury as described in section 3406(a)(1)(D) and §31.3406(d)-2 that he is not subject to backup withholding due to notified payee underreporting. A payor, however, may not rely on the certification if in the course of processing the certification or in administering the account to which the certification relates, the payor discovers that such certification is false (because the payor was notified by the Internal Revenue Service that the payee is subject to backup withholding under section 3406(a)(1)(C) and no notice was received to stop backup withholding pursuant to section 3406(c)(3) and §31.3406(c)-1(d)(1) prior to the time the new account is opened). See §31.3406(d)-2. After discovering that the certification is false, the payor must commence backup withholding on the next interest or dividend payment to the account that is subject to backup withholding. Backup withholding is required under section 3406(a)(1)(C) on the account until the payor receives a notice from the Internal Revenue Service or a copy of the certification provided to the payee pursuant to section 3406(c)(3).

(iii) *Joint accounts.* Payors are required to withhold on joint accounts

if the payee subject to backup withholding under section 3406(a)(1)(C)—

(A) Is the first person listed on the account for tax purposes on the date that the payor receives the notice to begin backup withholding,

(B) Effective [DATE THAT IS 60 DAYS AFTER THE DATE THIS DOCUMENT IS PUBLISHED AS A TREASURY DECISION], was the first person listed on the account at any time during the 120-day period prior to the day the payor received the notice described in paragraph (b)(1) or (2) of this section to begin backup withholding, or

(C) Effective [DATE THAT IS 60 DAYS AFTER THE DATE THIS DOCUMENT IS PUBLISHED AS A TREASURY DECISION], should be the first person listed on the account for tax purposes on the date that the payor receives the notice to begin backup withholding and the payor has actual knowledge that the payee should be so listed.

Backup withholding shall apply to reportable interest and dividend payments made to a joint account, if required, even if the order of the names on the account is subsequently changed, so long as the name of the payee subject to backup withholding remains on the account.

(iv) *Withholding exception.* Payors are not required to withhold on reportable interest or dividend payments made with respect to an account of the payee that could not be located with reasonable care. The payor will be considered to have exercised reasonable care—

(A) If the payor uses the name and taxpayer identification number or names and taxpayer identification numbers (if a joint return was filed by the payees) provided on the notice from the Internal Revenue Service or from a broker as prescribed in paragraph (b)(1)(i) and (2) of this section and in certain circumstances identified in this paragraph (b)(3)(iv) any account numbers provided by the Internal Revenue Service in locating all accounts of a payee or payees;

(B) If the payor, using records kept in the ordinary course of business, can associate another surname with the name of the payee provided on the notice and the payor uses both surnames of a payee to locate accounts of a payee (*i.e.*, when the payee uses a different name on the account from the names stated in the notice from the Internal Revenue Service or from a broker, for instance due to marriage or adoption);

(C) If the payor uses any account numbers provided by the Internal Revenue Service or a broker to identify the payee and the payee's taxpayer identification number when the taxpayer identification number is not provided to the payor by the Internal Revenue Service or broker, or when the taxpayer identification number provided by the Internal Revenue Service or a broker does not match the taxpayer identification number of the payee on the records that the payor maintains in the ordinary course of business. The name of the payee and the payee's taxpayer identification number obtained as described in the preceding sentence must be used by the payor to locate other accounts of the payee and by the broker to locate the payors with respect to whom the payee subsequently acquires a readily tradable instrument through the broker; and

(D) If a payor that has several branches or divisions, each of which uses the same Taxpayer Identification Number for information reporting purposes, searches for the accounts of the payee pursuant to the rules described in paragraph (b)(3)(iv)(A), (B), or (C) of this section at all branches or divisions of the payor within a reasonable geographic area of the mailing address of the payee (*e.g.*, if the payor lives in a city, all branches or divisions within the metropolitan area).

(v) *Examples.* The provisions of this paragraph (b) may be illustrated by the following examples:

Example (1). Corporation X declares a reportable dividend on its common stock and uses Bank A as its paying agent in making the dividend payments. The Internal Revenue Service notifies X to commence backup withholding under section 3406(a)(1)(C) due to notified payee underreporting of reportable interest and dividend payments by several of its payees. The notice contains X's employer identification number (EIN) to further identify the payor who has the obligation to impose backup withholding under section 3406(a)(1)(C). X sends the notice to its paying agent, A, and instructs A to commence backup withholding on the named payees. The payees subject to withholding also maintain savings accounts with A that pay reportable interest. A was not notified by the Internal Revenue Service with respect to the named payees. In determining which accounts are subject to backup withholding, A must review all the accounts it maintains for X with X's EIN. A does not have to review any of its accounts on which it is the payor or other accounts for which it acts as a paying agent.

Example (2). Assume the same facts in *Example (1)* except that A receives the notice to begin backup withholding due to payee underreporting from the Internal Revenue Service and the notice contains A's EIN. In determining which accounts are subject to backup withholding, A must review all of its accounts containing the EIN specified on the notice. A does not have to review other accounts it maintains as a paying agent.

Example (3). Bank B received notice from the Internal Revenue Service to begin backup withholding due to payee underreporting with respect to all accounts of C making reportable interest or dividend payments. The notice specifies C's name, taxpayer identification number, address, and an account number. While searching for other accounts, B discovers that C has a joint account with D, an individual. The account lists D's name first, but contains C's taxpayer identification number. If the account information reflects that C is the primary owner of the account and his name is reported first on information returns filed with the Internal Revenue Service, then B must withhold on that account. If, however, C's name is not reported first for information reporting, then, absent actual knowledge that C should, in fact, be the person listed first on the account, B should not withhold on that account because the name and taxpayer identification number information set forth in the notice from the Internal Revenue Service and such information set forth for the first named person on the account are not the same.

Example (4). Assume the same facts as in *Example (3)* except that the account number specified on the Internal Revenue Service notice concerns the joint account mentioned above. D's name is listed first on the account on B's records, and it is listed first for information reporting. B must withhold on the specified account but review its business records to determine whether the taxpayer identification number corresponds with D's or C's name and then use that information (name and taxpayer identification number) in locating other accounts that should be subject to backup withholding.

(c) *Notice from payors of backup withholding due to a payee underreporting*—(1) *In general.* A payor is required under section 3406(c)(4) to notify the payee in accordance with paragraph (c)(2) of this section that backup withholding has begun because of a notified payee underreporting. Payors who are notified by a broker that a payee is subject to backup withholding under section 3406(a)(1)(C) are also required to send the notice in accordance with paragraph (c)(2) of this section. As a result, the notice requirements provided in §31.3406(d)-4(b)(2) shall not apply to those payors notified by a broker that a payee is subject to backup withholding under section 3406(a)(1)(C). The payor must send the notice required by paragraph

(c)(2) of this section to the payee no later than 15 days after the date that the payor makes the first payment subject to backup withholding under section 3406(a)(1)(C). The payor must send the notice of backup withholding by first-class mail to the payee at his last known address.

(2) *Form of the notice to the payee with respect to notified payee underreporting.* The notice to the payee required by paragraph (c)(1) of this section must state—

(i) That the Internal Revenue Service has given notice that the payee has underreported reportable interest or dividends;

(ii) That, as a result of such underreporting, the payor is required under section 3406(a)(1)(C) of the Internal Revenue Code to withhold 20 percent of reportable interest and dividend payments made to the payee no later than the close of the day 30 days after the date that the payor received the notice;

(iii) The date that the payor received the notice to begin backup withholding under section 3406(a)(1)(C);

(iv) Effective [DATE THAT IS SIXTY DAYS AFTER THIS DOCUMENT IS PUBLISHED AS A TREASURY DECISION], the account number(s) that will be subject to backup withholding due to notified payee underreporting;

(v) That the payee must obtain a determination from the Internal Revenue Service in order to stop the backup withholding under section 3406(a)(1)(C); and

(vi) That while the payee is subject to backup withholding due to payee underreporting, the payee may not certify to a payor making reportable interest or dividend payments (or to a broker acquiring a readily tradable instrument for the payee) that the payee is not subject to backup withholding under section 3406(a)(1)(C). (See section 3406(a)(1)(D) and §31.3406(d)-2 for the backup withholding rules with respect to a payee's failure to make the certification under section 3406(a)(1)(D)).

(3) *Exceptions.* A notice provided to a payee on or before April 23, 1987, will be deemed to satisfy the provisions of paragraph (c)(2) of this section if it informs the payee that the payor has been instructed by the Internal Revenue Service to start backup withholding on reportable interest or dividend payments to the payee. If a payor who has started backup withholding due to notified payee underreporting on or before April 23, 1987, has not provided adequate notice to the payee on or before April 23, 1987, then the payor must provide notice to the payee in the manner prescribed in paragraph (c)(2) of this section by June 8, 1987.

(4) *Penalty for failure to provide notice.* A payor who fails to provide the notice required under section 3406(c)(4) to a payee (as described in paragraph (c)(2) of this section) may be subject to civil or criminal penalties as a result of that failure.

(d) *Notice to stop backup withholding*—(1) *In general.* The Internal Revenue Service will provide written certification to a payee that backup withholding is to stop and will notify payors who were contacted pursuant to paragraph (b) of this section to stop withholding after the Internal Revenue Service has made a determination under paragraph (g) of this section that backup withholding with respect to a payee should stop. The Internal Revenue Service will also notify brokers who were contacted pursuant to paragraph (b) of this section that the payee is no longer subject to backup withholding under section 3406(a)(1)(C) and that the brokers are no longer obligated to provide notices to payors under paragraph (b)(2) of this section. A broker who receives a notice from the Internal Revenue Service or a copy of the certification provided to a payee by the Internal Revenue Service is not required to notify any payors to whom the broker has previously provided the notice required under paragraph (b)(2) of this section that the payee is no longer subject to backup withholding under section 3406(a)(1)(C).

(2) *Date notice to stop withholding will be provided*—(i) *Underreporting corrected or bona fide dispute.* If the Internal Revenue Service makes a determination as set forth in paragraph (g)(1)(ii) or (iv) of this section during the 12-month period ending on October 15 of any calendar year, the Internal Revenue Service will provide the certification and notice required by paragraph (d)(1) of this section no later than December 1 of such calendar year.

(ii) *No underreporting or undue hardship.* If the Internal Revenue Service makes a determination as set forth in paragraph (g)(1)(i) or (iii) of this section, the Internal Revenue Service will provide the notices required by paragraph (d)(1) of this section no later than the 45th day after the day on which the Internal Revenue Service makes its determination.

(e) *Period during which withholding is required*—(1) *In general.* Upon receiving notice from the Internal Revenue Service after April 23, 1987, to begin backup withholding under section 3406(a)(1)(C) or notification from a broker stating that the payee is subject to backup withholding under section 3406(a)(1)(C), the payor must impose backup withholding on all reportable interest and dividend payments made to the payee during the period beginning after the close of the 30th day after the day on which the payor receives the notice provided in paragraph (b)(1)(i) or (2) of this section and ending as of the close of the day before the stop date (as described in paragraph (e)(2) of this section). Pursuant to section 3406(e)(5)(C), the payor may elect to begin backup withholding at any time during the 30-day period described in this paragraph.

(2) *Stop date*—(i) *Underreporting corrected or bona fide dispute.* In the case of a determination that the underreporting has been corrected or that a bona fide dispute exists (as defined in paragraph (g)(1)(ii) or (iv) of this section), the stop date is—

(A) January 1 following the 12-month period ending on October 15th of any calendar year in which the determination has been made or, if later,

(B) The day that is 30 days after the earlier of—

(*1*) The date on which the payor receives written notification from the Internal Revenue Service (under paragraph (d)(2) of this section) that withholding is to stop, or

(*2*) The date on which the payor receives a copy of the written certification provided to the payee by the Internal Revenue Service that withholding is to stop.

(ii) *No underreporting or undue hardship.* In the case of a determination that no payee underreporting occurred or that an undue hardship exists or could exist (as defined in

paragraph (g)(1)(i) or (iii) of this section), the stop date is the date specified in paragraph (e)(2)(i)(B) of this section.

(iii) *Payor election to shorten or eliminate grace period.* The payor with respect to any payee may elect to determine the stop date without regard to the grace period provided in section 3406(e)(5)(B) (i.e., without regard to the words "the day that is 30 days after" in paragraph (e)(2)(i)(B) of this section) or by substituting a shorter grace period.

(iv) *Examples.* The provisions of this paragraph (e)(2) may be illustrated by the following examples:

Example (1). The Internal Revenue Service makes a determination by October 15, 1987, that any underreporting with respect to A has been corrected. X, a payor who has been notified to backup withhold on payments of interest to A due to notified payee underreporting, receives written notice from the Internal Revenue Service on December 1, 1987, informing X that A is no longer subject to backup withholding under section 3406(a)(1)(C) and that X must stop backup withholding as of the close of December 31, 1987, or, if later, the earlier of the close of the day 30 days after receipt of the notice from the Internal Revenue Service or receipt of the copy of the written certification provided to the payee by the Internal Revenue Service. The stop date, as provided in paragraph (e)(2)(i)(A) of this section, is January 1, 1988, and the payor must stop backup withholding as of the close of December 31, 1987.

Example (2). Assume the same facts as in *Example (1)* except that X, due to a change of address or for other reasons, does not receive the notice from the Internal Revenue Service to stop backup withholding until December 15, 1987. In addition, A does not provide X with a copy of the certification that was provided to A by the Internal Revenue Service until December 15, 1987. The stop date, as provided in paragraph (e)(2)(i)(B) of this section, is January 14, 1988 (30 days after December 15, 1987), because that date is later than January 1, 1988. However, if a payor elects pursuant to section 3406(e)(5)(C) and paragraph (e)(2)(iii) of this section to determine the stop date without regard to that 30-day grace period, the stop date is January 1, 1988.

Example (3). Assume the same facts as in *Example (2)* except that on December 10, 1987 (rather than on December 15, 1987), A provides X with a copy of the certification from the Internal Revenue Service. The stop date, as provided in paragraph (e)(2)(i)(B) of this section, is January 9, 1988 (30 days after December 10, 1987), because that date is earlier than January 14, 1988 (30 days after the day X received notice from the Internal Revenue Service), but later than January 1, 1988. However, if a payor elects pursuant to section 3406(e)(5)(C) and paragraph (e)(2)(iii) of this section to determine the stop date without regard to that 30-day grace period, the stop date is January 1, 1988.

(f) *Notice to payees from the Internal Revenue Service*—(1) *Notice period.* After the Internal Revenue Service determines that a payee underreporting exists as defined in paragraph (a)(3) of this section, the Internal Revenue Service, pursuant to section 3406(c)(1)(B), will mail to the payee at least four notices over a period of at least 120 days (the "notice period") before payors and brokers will be notified that the payee is subject to backup withholding due to a notified payee underreporting as provided in paragraph (b)(1) of this section. The notices may be incorporated with other notices provided to the payee by the Internal Revenue Service.

(2) *Payee subject to withholding.* After the Internal Revenue Service provides the notices described in paragraph (f)(1) of this section, the Internal Revenue Service will send the notices required by paragraph (b) of this section unless—

(i) A payee obtains a determination under paragraph (g) of this section, or

(ii) In the case of a payee who has filed a tax return, the Internal Revenue Service has not assessed the deficiency attributable to the underreporting.

(3) *Disclosure of names of payors and brokers.* The Internal Revenue Service pursuant to section 3406(c)(5) may require a payee subject to backup withholding due to a notified payee underreporting to disclose the names of all of his payors of reportable interest or dividend payments and the names of all of the brokers with whom the payee has accounts which may involve reportable interest or dividend payments. To the extent required in the request from the Internal Revenue Service, the payee shall also provide his account numbers and other information necessary to identify the payee's accounts.

(4) *Backup withholding certification.* After a payee receives a final notice from the Internal Revenue Service notifying him that his reportable interest or dividend payments are subject to backup withholding due to notified payee underreporting under section 3406(a)(1)(C), the payee shall not certify to any payor or broker, under penalties of perjury, that he is not subject to backup withholding under section 3406(a)(1)(C). See paragraph (k)(2) of this section for the penalties that will apply to a payee who makes a false certification. The payee may not make the certification until the payee receives the certification provided in paragraph (d)(1) of this section from the Internal Revenue Service advising the payee that he is no longer subject to backup withholding under section 3406(a)(1)(C) (as provided in §31.3406(h)-3(f)(2)). See §31.3406(d)-2 for the rule applicable to a payor who makes reportable interest or dividend payments to a payee who fails to certify that he is not subject to backup withholding due to notified payee underreporting.

(g) *Determination by the Internal Revenue Service that backup withholding should not start or should be stopped*—(1) *In general.* A payee may prevent backup withholding from starting or stop it once it has started if, for the taxable year with respect to which there is a notified payee underreporting and any other taxable years for which there is any payee underreporting, the payee—

(i) Shows that there was no payee underreporting (as provided in paragraph (g)(2) of this section);

(ii) Corrects any payee underreporting (as provided in paragraph (g)(3) of this section);

(iii) Shows that backup withholding will cause or is causing an undue hardship (as defined in paragraph (g)(4) of this section) and that it is unlikely that the payee will underreport interest or dividend payments again; or

(iv) Shows that a bona fide dispute exists as to whether any underreporting has occurred (as provided in paragraph (g)(5) of this section).

(2) *No underreporting.* A payee may show that no underreporting of interest or dividends exists by presenting receipts or other satisfactory documentation to the Internal Revenue Service showing that all taxes relating to such payments were reported or evidence showing that the payee did not have to file a return for the taxable year in question or that the underreporting determination is based upon a factual, clerical, or other mistake.

(3) *Correcting any payee underreporting*—(i) *Before issuance of a statutory notice of deficiency.* Before a statutory notice of deficiency is issued to a payee pursuant to section 6212, the payee may correct underreporting—

(A) By filing a return if one was not previously filed,

(B) By filing an amended return in the event a return was filed, or

(C) By consenting to the additional assessment according to applicable notices and forms sent to the payee by the Internal Revenue Service with respect to such underreporting, and paying taxes, penalties, and interest due with respect to any underreported interest or dividend payments.

(ii) *After issuance of a statutory notice of deficiency.* After a statutory notice of deficiency is issued to a payee, the payee may correct underreporting—

(A) At any time by filing a return if one was not previously filed and paying the entire deficiency and any other taxes including penalties and interest attributable to any payee underreporting of interest or dividend payments, or

(B) After the mailing of the statutory notice of deficiency but before the expiration of the 90-day or 150-day period described in section 6213(a), or, if a petition is filed with the United States Tax Court, before the decision of the Tax Court is final by making a remittance to the Internal Revenue Service of the amounts described in paragraph (g)(3)(ii)(A) of this section specifically designating in writing that the remittance is a "deposit in the nature of a cash bond." The payee will not be deemed to have corrected the payee underreporting under this paragraph (g)(3)(ii)(B) after the remittance is returned to the payee as described in subparagraph 2 of section 4.01 of Rev. Proc. 84-58, 1984-2 C.B. 501. Once the remittance is returned to the payee, the procedures under §31.3406(c)-1 will apply. However, if the Internal Revenue Service previously contacted payors of the payee to commence backup withholding with respect to the payee underreporting, the Internal Revenue Service will recontact such payors to commence backup withholding under section 3406(a)(1)(C) and §31.3406(c)-1(b) with respect to such payee underreporting without regard to section 3406(c)(1) and §31.3406(c)-1(f) of this section.

For example, under paragraph (g)(3)(ii)(A) of this section a payee may correct underreporting after assessment of a deficiency by paying the entire assessment of all taxes, penalties, and interest with respect to that deficiency for the taxable year and any other taxes including penalties and interest attributable to any payee underreporting of interest or dividend payments for other taxable years.

(4) *Undue hardship.* A determination of undue hardship will be based on the overall impact to the payee of having 20 percent of reportable interest and dividend payments withheld. Factors that will be considered in determining whether backup withholding causes undue hardship include, but are not limited to, the following:

(i) Whether estimated tax payments, and other credits for current tax liabilities, or amounts withheld on employee wages or pensions, in addition to backup withholding, would cause significant over-withholding;

(ii) The payee's health, including the payee's ability to pay foreseeable medical expenses;

(iii) The extent of the payee's reliance on interest and dividend payments to meet necessary living expenses and the existence, if any, of other sources of income;

(iv) Whether other income of the payee is limited or fixed (e.g., social security, pension, and unearned income);

(v) The payee's ability to sell or liquidate stocks, bonds, bank accounts, trust accounts, or other assets, and the consequences of doing so;

(vi) Whether the payee reported and timely paid the most recent year's tax liability, including interest and dividend income; and

(vii) Whether the payee has filed a bankruptcy petition with the United States Bankruptcy Court.

In addition to the above factors, the Internal Revenue Service must conclude that it is unlikely that any payee underreporting will occur again.

(5) *Bona fide dispute.* The Internal Revenue Service may make a determination under this paragraph if there is a dispute between the payee and the Internal Revenue Service on a question of fact or law that is material to a determination under paragraph (g)(1)(i) and, based upon all the facts and circumstances, the Internal Revenue Service finds that the dispute is asserted in good faith by the payee and there is a reasonable basis for the payee's position. See the example provided in paragraph (j)(2)(ii) of this section for an illustration of this provision.

(h) *Requests for determinations*—(1) *In general.* A payee may request a determination under one or more of the provisions of paragraph (g) of this section. Following its review of a request for a determination under paragraph (g) of this section, the Internal Revenue Service will either provide the payee with a written certification as prescribed in paragraph (d) of this section if the evidence presented warrants the requested determination or will provide the payee with a written notice informing him that a determination was not made.

(2) *Determinations made during the notice period.* In general, if a determination is made during the notice period as defined in paragraph (f)(1) of this section, then the payee will not be subject to backup withholding due to a notified payee underreporting with respect to any taxable year for which a determination was made.

(3) *Determinations made after the notice period.* If a determination is made after the notice period, as defined in paragraph (f)(1) of this section, the Internal Revenue Service will provide a notice to payors and brokers, and a certification to the payee as provided in paragraph (d)(1) of this section.

(i) [Reserved].

(j) *Payees filing a joint return*—(1) *In general.* For purposes of section 3406(a)(1)(C), if payee underreporting is found to exist with respect to a joint return then the provisions of this section shall apply to both payees (i.e., the husband and wife). As a result, both payees will be subject to backup withholding on accounts in their individual names as well as accounts in their joint names. Either or both payees may satisfy the criteria for a determination that no payee underreporting exists, that the underreporting has been corrected, or that a bona fide dispute exists (as provided in paragraph (g)(1)(i), (ii), or (iv) of this section). Both payees, however, must satisfy the criteria for a determination that backup withholding will cause or is causing undue hardship (as provided in paragraph (g)(1)(iii) of this section).

(2) *Exceptions*—(i) *Innocent spouse.* A spouse who files a joint

return may obtain a determination that withholding should stop or not start with respect to payments made to his or her individual accounts, if the spouse—

(A) Shows that he or she did not underreport income because he or she is an innocent spouse as described in section 6013(e), or

(B) Shows that there is a bona fide dispute as to whether he or she is an innocent spouse and hence did not underreport income.

(ii) *Example.* The provisions of paragraph (j)(2)(i) may be illustrated by the following example:

Example. H and W filed a joint return in 1986 on which H failed to include $2,000 of interest income. In 1987, the Internal Revenue Service determined that a payee underreporting exists with respect to H and W for the 1986 tax year. After properly notifying H and W of the underreporting and assessing the tax, the Internal Revenue Service sent notices to payors to begin backup withholding on the joint and individual accounts of H and W and to brokers informing them that H and W are subject to backup withholding under section 3406(a)(1)(C) on their joint and individual accounts. W claims that she is an innocent spouse and requests a determination that she did not underreport interest or dividend income so that her individual accounts will not be subject to backup withholding.

The Internal Revenue Service questions her status as an innocent spouse. If the Internal Revenue Service determines, based upon all the facts and circumstances, that there is a reasonable basis for W's claim to be an innocent spouse and that the claim is made in good faith, W will have a bona fide dispute with the Internal Revenue Service. Consequently, the individual accounts of W will not be subject to further backup withholding due to a notified payee underreporting as provided in paragraph (g)(5) of this section.

The Internal Revenue Service will notify W's payors to stop backup withholding under section 3406(a)(1)(C) and will notify brokers that W is no longer subject to backup withholding under section 3406(a)(1)(C) on W's individual accounts. Backup withholding will not restart on those accounts unless the Internal Revenue Service ultimately determines that W is not an innocent spouse. In that event the Internal Revenue Service will notify the payors to start backup withholding under section 3406(a)(1)(C) and will notify the brokers that W is subject to backup withholding under section 3406(a)(1)(C) with respect to the individual accounts of W.

(iii) *Divorced or legally separated payee.* A payee who, at the time of the request for a determination under paragraph (g) of this section, is divorced or separated under State law may obtain a determination that undue hardship exists (or would exist) under paragraph (g)(1)(iii) of this section with respect to reportable interest and dividend payments made to his or her individual accounts if the divorced or legally separated payee satisfies the criteria for a determination under paragraph (g)(4) of this section.

(k) *Penalties*—(1) *Failure to withhold.* See §31.3406(h)-2(i) for the penalties applicable to a payor who fails to withhold on reportable interest and dividend payments made to a payee subject to backup withholding.

(2) *False certification*—(i) *Criminal penalty under section 7205(b).* If any individual willfully makes a false certification under section 3406(d)(1) or (2), then that individual shall, in addition to any other penalty provided by law, upon conviction thereof, be fined not more than $1,000, or imprisoned not more than 1 year, or both.

(ii) *Civil penalty under section 6682*—(A) *In general.* In addition to any criminal penalty provided by law, if any individual makes a statement under section 3406 which results in a decrease in the amounts deducted and withheld under chapter 24 of the Internal Revenue Code and, as of the time the statement was made, there was no reasonable basis for the statement, the individual shall pay a penalty of $500 for the statement. The penalty is due upon notice and demand and pursuant to section 6682 collection is not subject to the deficiency procedures of subchapter B of chapter 63 of the Internal Revenue Code. See section 6682.

(B) *Waiver of penalty.* The payee may obtain a waiver (in whole or part) of the penalty imposed under section 6682(a) and paragraph (k)(2)(ii)(A) of this section if it is established to the satisfaction of the Internal Revenue Service that the taxes imposed under subtitle A of the Internal Revenue Code with respect to the payee for the taxable year in which the false certification was made are equal to or less than the sum of—

(*1*) The credits against taxes allowed by part IV of subchapter A of chapter 1 of the Internal Revenue Code, and

(*2*) The payments of estimated tax which are considered payments on account of such taxes.

(C) *Procedure for seeking a waiver.* To request a waiver under section 6682(b) and paragraph (k)(2)(ii)(B) of this section, the payee must submit to the Internal Revenue Service a written statement with supporting documents to establish all the facts necessary in order to obtain the waiver. The statement must be signed by the person who otherwise would be subject to the penalty imposed by section 6682(a) and paragraph (k)(2)(ii)(A) of this section and must contain a declaration that it is made under penalties of perjury.

(3) *Delay of assessment.* If a payee institutes or maintains a suit with the United States Tax Court primarily to delay assessment and the payee's position is frivolous or groundless, or the payee unreasonably failed to pursue available administrative remedies, the court may award up to $5,000 in damages under section 6673. The damages will be assessed against and collected from the payee in the same manner as the underlying tax.

§31.3406(d)-1 Manner required for furnishing a taxpayer identification number.

(a) *Requirement to withhold.* Backup withholding under section 3406(a)(1)(A) is required with respect to any reportable payment (as defined in §31.3406(b)(1)-1(a)) if the payee does not furnish his taxpayer identification number to the payor in the manner required by this section. The period for withholding is described in §31.3406(e)-1(c). See §31.3406(d)-3(a) for special rules when an account is established directly with, or an instrument is acquired directly from, the payor by means of electronic or mail communication or an instrument is sold through a broker by means of electronic transmission (*i.e.*, telephone or wire instruction), and see §31.3406(d)-4 for special rules relating to the acquisition of a readily tradable instrument through a broker. See also §31.3406(g)-3 for rules as to when a payee is awaiting receipt of a taxpayer identification number. See the applicable information reporting sections and section 6109 and the regulations thereunder to determine whose taxpayer identification number should be provided.

(b) *Reportable interest or dividend account*—(1) *Manner required for furnishing a taxpayer identification number with respect to a pre-1984 account or instrument.* A payee shall furnish his taxpayer identification number to the payor with respect to any obligation, deposit, certificate, share, membership, contract, account, or other relationship or instru-

ment established or acquired on or before December 31, 1983 (a "pre-1984 account"). The manner of determining whether an account or an instrument is a pre-1984 account is described in paragraph (b)(2) of this section. The payee of a pre-1984 account may furnish his taxpayer identification number to the payor orally or in writing. The payee is not required to certify under penalties of perjury that the taxpayer identification number is correct.

(2) *Determination of pre-1984 account or instrument*—(i) *In general.* An account that is in existence before January 1, 1984, will be considered a pre-1984 account, regardless of whether additional deposits are made to the account on or after January 1, 1984. Accounts established as an expansion of a credit union prime account in existence prior to January 1, 1984, shall constitute a pre-1984 account. If funds taken from one account in existence prior to January 1, 1984, are used to create a new account on or after such date, however, the new account so created does not constitute a pre-1984 account except as provided in the preceding sentence. For example, with respect to a disposition of shares in a mutual fund and the purchase of shares of another fund within a group of mutual funds which occurs after December 31, 1983, the shares acquired in the second fund may not be treated as a pre-1984 account unless the payee owned shares in the second fund prior to January 1, 1984. An instrument acquired prior to January 1, 1984, is a pre-1984 account. An instrument negotiated in a window transaction as defined in §31.3406(b)(2)-3(b) after December 23, 1987, is treated as an instrument acquired after December 31, 1983. However, an obligation in bearer form, whenever acquired, that is redeemed after December 31, 1983, and subject to reporting under section 6045, is not a pre-1984 account. Any instrument, whenever acquired, that is held in a brokerage account shall be considered a pre-1984 account if the brokerage account is not a post-1983 brokerage account (as described in paragraph (c)(1) of this section). If shares of a corporation are held before January 1, 1984 (or considered held before such date by operation of this rule), and additional shares are acquired by the holder, irrespective of whether such shares are received by reason of a stock dividend, investing new cash, or otherwise, the new shares, in the discretion of the payor, may be considered a pre-1984 account. In the case of a qualified employee trust that distributes instruments in kind, any instrument distributed from the trust will be considered a pre-1984 account with respect to employees who were participants in the trust before 1984. Similarly, when a payor offers participants in a plan the opportunity to purchase stock of the payor after a specified time, using the money that the payee invested during that period of time, the stock so purchased after December 31, 1983, shall be considered a pre-1984 account with respect to participants in the plan who either owned shares or invested money in the plan before January 1, 1984.

(ii) *Account or instrument automatically acquired on the maturity or termination of an account.* When an account is opened, or an instrument is acquired, automatically on the maturity or termination of an account that was in existence or an instrument that was held before January 1, 1984 (or considered to have been in existence or held before such date by operation of this rule), without the participation of the payee, the new account or instrument will be considered to be a pre-1984 account, in the discretion of the payor. For purposes of the preceding sentence, a payee shall not be considered to have participated in the acquisition of the new account or instrument solely because the payee failed to exercise a right to withdraw funds at the maturity or termination of the old account or instrument.

(iii) *Special rule for short-term discount instruments acquired before January 1, 1985.* Where a discount instrument with a maturity not exceeding one year (a "short-term instrument") is acquired from the same payor immediately upon the maturity of the short-term instrument, the participation of the payee in the acquisition of the newly-acquired instrument shall not be taken into account, and the new instrument shall be considered to have been acquired automatically, unless the new instrument is acquired after December 31, 1984.

(iv) *Insurance policies.* In the case of insurance policies in effect on December 31, 1983, the election of a dividend accumulation option pursuant to which interest is paid (as defined in §1.6049-5(a)(4)), or the creation of an "account" in which proceeds of a policy are held for the policy beneficiary, may, in the payor's discretion, be treated as a pre-1984 account.

(v) *Acquisitions and mergers.* In the case of any acquisition or merger including a tax-free reorganization under section 368, the acquiring-payor shall treat those persons who (A) held accounts or instruments in another payor immediately before the acquisition or merger of such payor and who (B) receive an account or instrument in the acquiring payor immediately after such acquisition or merger, as having the same status in the acquiring payor for information reporting, backup withholding, and related tax provisions as existed with respect to the payor whose accounts or instruments were acquired. In the event that the acquiring payor cannot determine the status of the acquired accounts or instruments from the business records of the payor from whom the accounts or instruments were acquired, then the acquiring payor shall treat such accounts or instruments as pre-1984 accounts or instruments.

(3) *Manner required for furnishing a taxpayer identification number with respect to an account or instrument that is not a pre-1984 account.* Except as provided in (b)(4) of this section, a payee is required to certify under penalties of perjury that the taxpayer identification number the payee furnishes to the payor is the payee's correct taxpayer identification number with respect to any account or instrument that is not a pre-1984 account as described in paragraph (b)(2) of this section. The certificate on which the certification shall be made is described in §31.3406(h)-3. With respect to an account or instrument that is not a pre-1984 account, see §31.3406(d)-2 for the requirement that the payee must certify under penalties of perjury that the payee is not subject to backup withholding due to notified payee underreporting. See also the special rule in §31.3406(d)-3(a) with respect to an account established directly with, or

an instrument acquired directly from, the payor by electronic or mail communication. See also the rules in §31.3406(d)-4 applicable to readily tradable instruments acquired through a broker.

(4) *Special rule with respect to the acquisition of a readily tradable instrument in a transaction between parties unrelated to the payor if the parties act without the assistance of a broker.* When a readily tradable instrument is at any time acquired by a payee without the assistance of a broker, and the payee is unrelated to the payor of reportable payments on the instrument, the payee must furnish his taxpayer identification number to the payor prior to the time reportable payments are made on the instrument, but the payee is not required to certify under penalties of perjury that the number is correct. A broker shall be considered to be involved in the transaction if the person effecting the transaction would be required to make an information return under section 6045 if the instrument were sold. See §31.3406(d)-4 for the rules relating to an acquisition of a readily tradable instrument when a broker is involved.

(5) *Examples.* The application of the provisions this paragraph (b) may be illustrated by the following examples:

Example (1). Individual A maintains an interest bearing account with Bank Q that has been in existence since 1981. Because the account was in existence before January 1, 1984, the account is a pre-1984 account under paragraph (b)(2) of this section. A furnishes a taxpayer identification number to Q but does not certify under penalties of perjury that the number is his correct taxpayer identification number. A has furnished his taxpayer identification number in the manner required in paragraph (b)(1) of this section. Thus, withholding under section 3406(a)(1)(A) does not apply to any reportable interest payment on that account.

Example (2). Individual B, a shareholder of Corporation X, enrolls before January 1, 1984, in X's dividend reinvestment program to purchase additional shares of X stock and orally furnishes his taxpayer identification number to X at that time. The shares that B receives after December 31, 1983, may be considered payable to a pre-1984 account, in X's discretion. X decides to treat the account as a pre-1984 account as described in paragraph (b)(2)(i) of this section. Even if B does not certify his number, B has furnished his taxpayer identification number in the manner required in paragraph (b)(1) of this section with respect to a pre-1984 account. Thus, withholding under section 3406(a)(1)(A) does not apply to any reportable payment made with respect to the account.

Example (3). Assume the same facts as in *Example (2)* except that X does not treat the new shares as a pre-1984 account. B has not furnished his taxpayer identification number in the manner required in paragraph (b)(3) of this section with respect to accounts or instruments that are not a pre-1984 account. Thus, withholding under section 3406(a)(1)(A) applies to any reportable payment on the new shares until B certifies that the taxpayer identification number is correct. See §31.3406(d)-4(c)(2) for rules applicable to aggregate payments made with respect to certain accounts.

Example (4). Individual C purchased 100 shares of Y Corporation stock directly from Y in 1982. Y did not receive C's certified taxpayer identification number at the time the stock was acquired. On April 16, 1984, C furnished the number orally to Y and did not certify under penalties of perjury that the number is correct. Since the 100 shares of stock are considered a pre-1984 account under paragraph (b)(2) of this section, C has furnished his taxpayer identification number in the manner required. Thus, Y is not required to withhold under section 3406(a)(1)(A) on reportable payments made after April 16, 1984, as described in §31.3406(e)-1.

Example (5). Public Utility Company Z offers an investment program to consumers to invest in Z's stock. Under the plan, a consumer will invest $100 a month. At the end of the year, the money invested in the plan will be used to purchase shares of Z stock. Individual D participates in the plan during 1983. The shares acquired by D are considered a pre-1984 account under paragraph (b)(2) of this section. Accordingly, D is not required to certify his taxpayer identification number to Y. If D does not provide a taxpayer identification number to Z, however, withholding under section 3406(a)(1)(A) applies to reportable payments made with respect to the account until C furnishes his taxpayer identification number.

Example (6). E, an individual, transfers a bond issued by Corporation N to Individual F without the assistance of a broker (as defined in §1.6045-1(a)). F furnishes his taxpayer identification number to N, but does not certify under penalties of perjury that it is his correct number. L, a transfer agent for N, is instructed to register the bond in F's name. Since the transaction is effected without the assistance of a broker and the parties are unrelated to the payor, F is not required to certify his taxpayer identification number. Thus, F has furnished his taxpayer identification number in the manner required in paragraph (b)(4) of this section. Consequently, N is not required to withhold under section 3406(a)(1)(A) on reportable payments made on the bond to E.

Example (7). Assume the same facts as in *Example (6)* except that E maintains a custodial account with Bank K that is not a pre-1984 account under paragraphs (b)(2)(i) and (c)(1) of this section. E instructs K to transfer the bond in the custodial account to F. K effects the transfer and instructs L to register the bond in F's name. K is considered a broker under section 6045. Since the transaction is effected with the assistance of a broker, F is required to certify his taxpayer identification number to K who is required to notify L if F fails to certify his number (as described in §31.3406(d)-4). If F does not furnish his taxpayer identification number in the manner required in paragraph (c) of this section, L is required to withhold under section 3406(a)(1)(A).

(c) *Brokerage account*—(1) *Manner required for furnishing a taxpayer identification number with respect to a brokerage relationship that is not a post-1983 brokerage account*—(i) *In general.* With respect to any instrument, investment, or deposit made through a brokerage account that is not a post-1983 brokerage account, the payee shall furnish his taxpayer identification number to the broker either orally or in writing. The payee is not required to certify under penalties of perjury that the taxpayer identification number is correct. See §31.3406(d)-1(b)(2)(i) for the rule that any instrument, whenever acquired, that is held in a brokerage account that is not a post-1983 brokerage account, shall be considered held in such account.

(ii) *Definition of a brokerage account that is not a post-1983 brokerage account.* A brokerage account that was established by a payee before January 1, 1984, through which during 1983 the broker either bought or sold securities for the payee or held securities on behalf of the payee as a nominee, is an account that is not a post-1983 brokerage account.

(iii) *Definition of a post-1983 brokerage account.* A brokerage account established after December 31, 1983, (or before January 1, 1984, and through which during 1983 the broker neither bought nor sold securities nor held securities on behalf of the payee in street name) is a post-1983 brokerage account.

(2) *Manner required for furnishing a taxpayer identification number with respect to a post-1983 brokerage account.* Except as provided in §31.3406(d)-3(b), the payee is required to certify under penalties of perjury that the taxpayer identification number furnished to a broker is correct with respect to a post-1983 brokerage account as described in paragraph (c)(1) of this section.

(3) *Examples.* The application of the provisions of this paragraph (c) may be illustrated by the following examples:

Example (1). Individual D established an account with Broker K before January 1, 1984, in which K held readily tradable securities in street name for D during 1983. The account is not a post-1983 brokerage account under paragraph (c)(1)(ii) of this section and instruments held in the account, whenever acquired, are pre-1984 accounts under paragraph (b)(2)(i) of

this section. D furnishes his taxpayer identification number orally to K before January 1, 1984. D is treated as furnishing his taxpayer identification number in the manner required in paragraphs (c)(1) and (b)(1) of this section. Thus, withholding under section 3406(a)(1)(A) shall not apply to any sale of any instrument in the account that is subject to reporting under section 6045 nor shall withholding apply to any reportable interest or dividend payment made with respect to any instrument in the account.

Example (2). Individual E established an account with Broker L before January 1, 1984, and furnished his taxpayer identification number to L. L neither bought nor sold instruments for E nor did L act as nominee for E anytime during 1983. The account is a post-1983 account under paragraph (c)(1)(iii) of this section. Although E furnished a taxpayer identification number to L, E did not certify under penalties of perjury that it was his correct taxpayer identification number. E has not, therefore, furnished his taxpayer identification number to L in the manner required in paragraph (c)(2) of this section. Thus, withholding under section 3406(a)(1)(A) shall apply to any sale of an instrument through that account that is subject to reporting under section 6045 unless E certifies to L prior to the sale of any instrument that E's taxpayer identification number is correct. (See §31.3406(d)-3(b) for the special rule if the instruction to sell was by means of telephone or wire instruction.) Since L did not act as nominee for E, L would not be making any reportable interest or dividend payments to E that would be subject to withholding under section 3406(a)(1)(A) because E did not furnish his taxpayer identification number to L in the manner required in paragraphs (b)(1) and (c)(1) of this section. If any instrument was placed in the account after December 31, 1983, i.e., L holds the instrument in street name, the instrument would not be a pre-1984 account under paragraph (b)(2)(i) of this section. Thus, payments made with respect to the instrument would be subject to withholding under section 3406(a)(1)(A) because E did not furnish his taxpayer identification number to L in the manner required in paragraph (b)(3) of this section.

Example (3). F opens a brokerage account with Broker M on August 1, 1984. F does not certify under penalties of perjury that his taxpayer identification number furnished is correct. The account is a post-1983 brokerage account under paragraph (c)(1)(iii) of this section. F has not furnished his taxpayer identification number in the manner required in paragraph (c) of this section, and withholding under section 3406(a)(1)(A) shall apply to any gross proceeds that are subject to reporting under section 6045. Thus, if Broker M sold securities for F through the account on August 1, 1984, the gross proceeds would be subject to withholding. (See §31.3406(d)-3(b) for the special rule if the instruction to sell was by means of telephone or wire instruction.)

Example (4). Assume the same facts as in *Example (3)* except that F opens the account and purchases readily tradable instruments. M holds the instruments in street name for F. The instruments will pay reportable dividends on September 30, 1984. Since M is holding the instruments in street name for F, M is considered the payor of the reportable dividends (as defined in §31.3406(a)-2). Because the account is a post-1983 brokerage account described in paragraph (c)(1)(iii) of this section, the instruments held in the account are not considered a pre-1984 account under paragraph (b)(2)(i) of this section regardless of when the instrument was acquired. Consequently, if F does not certify under penalties of perjury that his taxpayer identification number is correct before September 30, 1984, M is required to withhold under section 3406(a)(1)(A) on the reportable dividend payment on such date. (See §31.3406(d)-3(a) for the special rule if the acquisition is effected by telephone, wire, or mail.)

(d) *Rents, commissions, nonemployee compensation, and certain fishing boat operators, etc.*—(1) *Manner required for furnishing a taxpayer identification number.* With respect to accounts, contracts, or relationships where the payor is required to make an information return under section 6041 (relating to information reporting at source on rents, royalties, salaries, etc.), section 6041A(a) (relating to information reporting of payments for nonemployee services), section 6050A (relating to information reporting by certain fishing boat operators), or section 6050N (relating to information reporting of payments of royalties), the payee shall furnish his taxpayer identification number to the payor either orally or in writing. The payee is not required to certify under penalties of perjury that the taxpayer identification number is correct regardless of when the account, contract, or relationship is established.

(2) *Example.* The application of the provisions of this paragraph (d) may be illustrated by the following example:

Example. E performs services as a nonemployee to Y who pays $1,000 to E. Y's payment to E is reportable under section 6041A(a). E furnishes his taxpayer identification number to Y but does not certify under penalties of perjury that it is his correct number. E has furnished his taxpayer identification number in the manner required in paragraph (d) of this section. It is not relevant whether the relationship is or is not a pre-1984 account. Thus, withholding under section 3406(a)(1)(A) does not apply to the reportable payment to E.

§31.3406(d)-2 Payee certification failure.

(a) *Requirement to withhold.* Except as provided in paragraph (b) of this section, §31.3406(d)-3(a), and §31.3406(d)-4, backup withholding under section 3406(a)(1)(D) (relating to a payee certification failure) is required with respect to a reportable interest or dividend payment (as defined in section 3406(b)(2) and §31.3406(b)(1)-1(b)) if, and only if, the payee fails to certify to the payor, under penalties of perjury, that the payee is not subject to backup withholding due to notified payee underreporting under section 3406(a)(1)(C). Special rules are provided in §31.3406(d)-3(a) when an account is established directly with, or an instrument is acquired directly from, the payor through electronic or mail communication. See §31.3406(c)-1(b)(3)(ii) for rules with respect to a payor's reliance on a payee certification for a new account following notified payee underreporting. See §31.3406(d)-4 for rules applicable to readily tradable instruments acquired through a broker. The certificate on which the certification should be made is described in §31.3406(h)-3. The period for which withholding is required is described in §31.3406(e)-1(d).

(b) *Exceptions.* Backup withholding under section 3406(a)(1)(D) and paragraph (a) of this section does not apply in the case of—

(1) A reportable interest or dividend payment with respect to a pre-1984 account (as defined in §31.3406(d)-1(b)(1));

(2) A reportable interest payment made in a window transaction (as defined in §31.3406(b)(2)-3(b)); or

(3) A reportable interest or dividend payment made with respect to a readily tradable instrument that is described in §31.3406(d)-4(a)(2).

§31.3406(d)-3 Special 30-day rules for certain reportable payments.

(a) *Accounts or readily tradable instruments acquired directly from the payor (including a broker who holds an instrument in street name)*—(1) *Account or instrument acquired directly from the payor by electronic means.* In the case of an account established directly with, or a readily tradable instrument acquired directly from, the payor by means of electronic transmission (*e.g.*, telephone or wire), the payor may permit the payee to furnish the certifications required in §31.3406(d)-1(b)(3) (relating to certification that the payee's taxpayer identification number is correct) and §31.3406(d)-2 (relating to certification of notified payee underreporting) within 30 days after the establishment or acquisition, provided that the payee furnishes a taxpayer identification number to the payor at the time of the acquisition or establishment and the payee does not make any with-

drawals before the certifications are received. For purposes of this section, an account or instrument shall be considered "acquired directly from the payor" if the instrument was acquired by the payee without the assistance of a broker or the instrument was acquired directly from a broker who holds the instrument as nominee for the payee (*i.e.*, in street name) and who is considered a payor under §31.3406(a)-2. If the payee makes any withdrawals before the certifications are received, the payor must withhold 20 percent of the amounts withdrawn to the extent of any reportable interest or dividend payments made to the payee during the 30-day period. In addition, the payor must commence withholding on all reportable interest or dividend payments made with respect to the account or instrument on and after the 31st day following acquisition or establishment if the payee has not provided the required certifications to the payor by that date. The rules of this paragraph (a)(1) also apply with respect to a payee from whom the payor is required to obtain a Form W-8 or substitute form (as described in §1.6049-5(g)) or is to obtain other evidence of foreign status (as described in §1.6049-5(h)), provided the payee represents to the payor, orally or otherwise, before or at the time of the acquisition or establishment that the payee is not a United States citizen or resident. A payee described in the preceding sentence is not required to furnish a taxpayer identification number at the time of establishment of the account or acquisition of the instrument in order for the special rule under this paragraph to apply.

(2) *Accounts or readily tradable instruments acquired directly from payor by mail communication.* The rules of paragraph (a)(1) of this section also apply to accounts established with, or instruments acquired directly from, the payor that are effected by mail before January 1, 1985. With respect to accounts established directly with, or instruments acquired directly from, the payor by mail on or after January 1, 1985, the payor is required to impose backup withholding on the reportable interest or dividend payments if the payee has not provided the required certifications by the time that a reportable payment is made (as described in §31.3406(a)-4).

(3) *Examples.* The application of the provisions of this paragraph (a) may be illustrated by the following examples:

Example (1). G opens a new interest bearing account at Bank N on March 7, 1984, by appearing at N in person. Bank N will pay interest on the account at the end of each month. G provides his taxpayer identification number at the time that G opens the account but fails to certify under penalties of perjury that he is not subject to backup withholding due to notified payee underreporting as required in §31.3406(d)-2. N is required to withhold 20 percent of the payment made on March 31, 1984.

Example (2). Assume the same facts as in *Example (1)* except that G opens the account by calling Bank N and wiring the initial deposit by electronic funds transfer. G provides his taxpayer identification to N during the telephone call. N is not required to withhold on the March 31 payment date since G provided his taxpayer identification number on the date of acquisition (as provided in paragraph (a)(1) of this section). G provides the required certifications on April 6. Thus, N also is not required to withhold on the April 30 payment date since N received G's certifications within 30 days of opening the account and prior to the payment.

Example (3). Assume the same facts as in *Example (2)* except that G closes the account on April 2 and does not provide any certification before withdrawal. Under paragraph (a)(1) of this section, N is required to withhold 20 percent of the reportable interest payment made on March 31 as well as any reportable payment made at the time the account is closed and the funds are withdrawn (April 2).

Example (4). H purchases new shares in Mutual Fund O on February 14, 1984, that will pay reportable dividends daily. H acquires the shares by wiring money from his bank account to the mutual fund. H does not provide his taxpayer identification number at the time of acquisition. O is required to withhold 20 percent of any reportable amounts paid after February 14 until O receives H's certifications. Even if O receives H's taxpayer identification number after February 14, 1984, O is required to withhold from payments made to H because H did not furnish his taxpayer identification number at the time of acquisition as required in paragraph (a)(1) of this section. O may stop withholding only when O receives the required certifications from H.

Example (5). Assume the same facts as in *Example (4)* except that H provides his taxpayer identification number on February 14 (date of acquisition). On March 1, before providing the required certifications, H withdraws $5000. Two hundred dollars of dividends have been paid prior to that date. Four thousand eight hundred dollars are gross proceeds for the shares redeemed. O is required to withhold 20 percent of the reportable amount ($5000) on March 1, the date of withdrawal. The $200 is reportable under section 6042 and the $4800 is reportable under section 6045. O is required to withhold on the $200 under paragraph (a)(1) of this section since the $200 is assumed to be a reportable interest or dividend payment. O is also required to withhold on the $4800 since that amount is subject to reporting under section 6045 and H has not furnished his taxpayer identification number in the manner required in §31.3406(d)-1(c)(2).

(b) *Special rule with respect to the sale of an instrument for a customer pursuant to a telephone or wire instruction*—(1) *Special rule.* In the case of a sale of an instrument through a post-1983 brokerage account (as described in §31.3406(d)-1(c)(1)) by means of electronic transmission (*e.g.*, telephone or wire), a broker who is required to report the gross proceeds of the sale under section 6045 (as described in §31.3406(b)(3)-2) may permit the customer to furnish the certification described in §31.3406(d)-1(c)(2) (relating to certification that the customer's taxpayer identification number is correct) within 30 days after the sale, provided that the customer furnishes his taxpayer identification number to the broker before the sale and the customer does not withdraw or reinvest more than 80 percent of the proceeds of the sale before the required certification is provided. Thus, if at all times at least 20 percent of all gross proceeds reportable under section 6045 are held in cash by the broker, the gross proceeds of the sale will not be subject to backup withholding for 30 days. If the customer desires to withdraw or reinvest more than 80 percent of the proceeds of the sale before the 31st day and before the certification is received, the broker is required to withhold 20 percent of the reportable gross proceeds at the time of the withdrawal or reinvestment (or, if later, the time the proceeds are paid). If the customer does not provide the required certification within 30 days of the date of the sale, the broker must withhold 20 percent of the reportable gross proceeds on the 31st day after the date of the sale. The rules of this paragraph (b)(1) also apply with respect to a customer from whom the broker is required to obtain a Form W-8 (or substitute form) in accordance with §1.6045-1(g)(1)(i)-(A) or is required to obtain other evidence of foreign status in accordance with §1.6045-1(g)(1)(i)(B) or (C) provided the customer represents to the broker before the sale, orally or otherwise, that the customer is not a United States citizen or resident.

(2) *Examples.* The application of the provisions of this paragraph (b)

may be illustrated by the following examples:

Example (1). Individual G establishes an account with Broker N on August 1, 1984, by calling N and wiring money to the account. N purchases shares of Y Corporation stock that N will hold in street name for G. G provides his taxpayer identification number but does not certify under penalties of perjury that it is his correct taxpayer identification number. The account is a post-1983 brokerage account under §31.3406(d)-1(c)(2). On October 12, 1984, G telephones N and instructs N to sell all of the Y stock for $10,000 and to send him a check for $5,000. N is required to make an information return under section 6045 showing the $10,000 of gross proceeds. N, at its option, is not required to withhold $2,000 on October 12, 1984, even though G has not provided a certified taxpayer identification number. Under paragraph (b)(1) of this section, N may permit G to furnish the certification within 30 days since G has furnished his taxpayer identification number and G did not withdraw more than 80 percent of the proceeds of the sale. If N does not receive the certification by November 12, N is required to withhold $2,000 from G's account on November 13.

Example (2). Assume the same facts as in *Example (1)* except that G does not provide his taxpayer identification number prior to, or on October 12 (the date of the sale). Because G did not furnish his taxpayer identification number, N is not permitted under paragraph (b)(1) of this section to give G 30 days to furnish the certification. Thus, N is required to withhold $2,000 on October 12.

Example (3). Assume the same facts as in *Example (1)* except that G instructs N to sell the Y stock and reinvest $9,000 of the proceeds in stock of Z Corporation. Even though G has furnished his taxpayer identification number, N is required to withhold on October 12 because under paragraph (b)(1) of this section N may only permit G to furnish the required certification within 30 days of the sale if G does not withdraw more than 80 percent of the proceeds. The reinvestment is a withdrawal under paragraph (b)(1) of this section. Because G desired to withdraw (in the form of reinvestment) more than 80 percent of the gross proceeds, N is required to withhold $2,000 before purchasing Z stock for G. If G desired to withdraw (or reinvest) only $8,000 of the gross proceeds, N would not be required to withhold on October 12.

§31.3406(d)-4 Special rules for readily tradable instruments acquired through a broker.

(a) *Readily tradable instruments acquired through a broker who is not a payor*—(1) *Instruments acquired through post-1983 brokerage accounts.* When a readily tradable instrument is acquired through a post-1983 brokerage account (as defined in §31.3406(d)-1(c)(2)) and the broker is not the payor of the instrument (as defined in §31.3406(a)-2(b)(3)), the broker must—

(i) Obtain the certifications described in §31.3406(d)-2(a) and §31.3406(d)-1(b)(3) and (c)(2) from the payee (relating to certification of payee underreporting and taxpayer identification number, respectively), but the broker is required to obtain the certifications only once with respect to each account;

(ii) Furnish the payee's taxpayer identification number to the payor; and

(iii) Notify the payor to impose backup withholding if the payee fails to make either of the required certifications to the broker or if the broker has been notified by the Internal Revenue Service before the acquisition of the instrument that the payee is subject to backup withholding due to notified payee underreporting under section 3406(a)(1)(C) or that the payee is subject to backup withholding because the payee's taxpayer identification number is incorrect (as described in §31.3406(d)-5).

The broker is required to give the information required by paragraph (a)(1)(ii) and (iii) of this section to the payor in connection with the transfer instructions for the acquisition. The term "transfer instructions" includes the "fanfold" documents and account registration instructions transmitted by a broker in the case of acquisitions of shares in a mutual fund. A notice including the information described in paragraph (b)(1) of this section shall satisfy the broker's requirement to give notice to the payor. Once the broker transmits the transfer instructions containing the information required by this section, the broker has no further responsibility to obtain a missing taxpayer identification number or missing certification or to provide additional notices to the payee or payor with respect to the acquisition of the instrument. Upon receiving the notice from a broker, the payor must impose backup withholding on the account pursuant to §31.3406(a)-1.

(2) *Transactions entered into through a brokerage account that is not a post-1983 brokerage account.* When a readily tradable instrument is acquired through a brokerage account that is not a post-1983 brokerage account (as defined in §31.3406(d)-1(c)(1)) and the broker is not the payor of the instrument (as defined in §31.3406(a)-2(a)), the broker is required to furnish the payee's taxpayer identification number to the payor. In addition, if the broker has been notified by the Internal Revenue Service that the payee is subject to backup withholding under section 3406 either because of an incorrect taxpayer identification number (as described in §31.3406(d)-5) or due to notified payee underreporting under section 3406(a)(1)(C), the broker must notify the payor (in connection with the transfer instructions) to impose backup withholding with respect to that payee. A notice that contains the information described in paragraph (b)(1) of this section shall satisfy the broker's requirement to give notice to the payor. After a payor receives a notice from a broker pursuant to section 3406(d)(2)(B) and this paragraph, the payor must impose backup withholding on any accounts of the payee paying reportable interest or dividends as defined in §31.3406(b)(1)-1(b) in accordance with §31.3406(a)-1.

(3) *Payor must notify payee*—(i) *Failure to provide certifications.* If a payor is notified by a broker, as required in paragraph (a) of this section, that a payee is subject to backup withholding because the payee failed to provide the certifications, as described in §31.3406(d)-2(a) and §31.3406(d)-1(b)(3) and (c)(1), then the payor is required to notify the payee that backup withholding has commenced (or will commence) no later than 15 days after the payor makes the first payment to the payee that is subject to backup withholding under section 3406. A notice that contains the information described in paragraph (b)(2) of this section shall satisfy the payor's requirement to give notice to the payee. If the broker notifies the payor that the payee failed to make a required certification and the payor has received the certification from the payee, the payor may disregard the the notice from the broker.

(ii) *Notified payee underreporting and incorrect taxpayer identification number.* The payor is also required to notify the payee under this section when the Internal Revenue Service or a broker notifies the payor to withhold either because of an incorrect taxpayer identification number under section 3406(a)(1)(B) (as described in §31.3406(d)-5) or due to notified payee underreporting under section 3406(a)(1)(C) (as described in

§31.3406(c)-1). Whenever there is notification including notification from the Internal Revenue Service through a broker with respect to a readily tradable instrument, the payor may not ignore the notice even if the payor has received the required certification from the payee. See §31.3406(d)-5(c)(1) and (2) and (f)(2) for requirements of the notice that a payor must provide to a payee when a payor is notified by the Internal Revenue Service or a broker that a payee is subject to backup withholding under section 3406(a)(1)(B) because the payee has furnished an incorrect taxpayer identification number as described in §31.3406(d)-5(a)(4). See §31.3406(c)-1(c)(2) for the requirements of the notice that a payor must provide to a payee when a payor is notified by the Internal Revenue Service or a broker that a payee is subject to backup withholding under section 3406(a)(1)(C) due to a notified payee underreporting.

(b) *Notices*—(1) *Form of notice by broker to payor.* A broker who is required under paragraph (a)(1)(iii) and (2) of this section to notify the payor with respect to a readily tradable instrument shall include in the notice—

(i) The payee's name, address, and taxpayer identification number (if provided to the broker), and

(ii) A statement that the payee is subject to backup withholding under section 3406(a)(1)(A), (B), (C), or (D) of the Internal Revenue Code, whichever section applies, and

(iii) When applicable, a statement that the broker was notified by the Internal Revenue Service that the payee is subject to backup withholding under section 3406(a)(1)(B) or (C). The broker may notify the payor in connection with the transfer instructions by means of magnetic media, machine readable document, or any other medium, provided that the notice includes the information described in the preceding sentence.

(2) *Form of notice by payor to payee.* A payor who receives notice from the broker or the Internal Revenue Service that the payee is subject to backup withholding shall notify the payee as required in paragraph (a)(3) of this section. The notice to the payee shall be substantially similar to the following:

(i) For a notification concerning a failure to provide a taxpayer identification number in the required manner under section 3406(a)(1)(A) or a failure to make the certifications described in section 3406(a)(1)(D):

Recently, you purchased (identify security acquired). Because of the existence of one or more of the following conditions, payments of interest, dividends, and other reportable amounts that are made to you will be subject to backup withholding of tax at a 20 percent rate: (specify the condition or conditions, described below, that are applicable)

(1) You failed to provide a taxpayer identification number, or failed to provide such number under penalties of perjury, in connection with the purchase of the acquired security. (An individual's taxpayer identification number is his or her social security number.)

(2) You failed to certify, under penalties of perjury, that you are not subject to backup withholding due to notified payee underreporting as required under section 3406(a)(1)(D) of the Internal Revenue Code.

If condition (1) applies, you may stop withholding by providing your taxpayer identification number on the enclosed Form W-9, signing the form, and returning it to us. If you do not have a taxpayer identification number, but have (or will soon) apply for one, you may so indicate on the Form W-9. Backup withholding may apply during the 60-day period you are awaiting for your taxpayer identification number. You must provide us with your taxpayer identification number promptly after you receive it in order to avoid withholding after the end of the 60-day period or to stop backup withholding if it has already begun. Certain persons, described on the enclosed Form W-9, are exempt from withholding. Follow the instructions on that form if applicable to you. If condition (2) applies, you may stop withholding by certifying on the enclosed Form W-9 that you are not subject to backup withholding due to notified payee underreporting, signing the form, and returning it to us.

If more than one condition applies, you must remove ALL applicable conditions to stop withholding.

Please address any questions concerning this notice to: [Insert Payor Identifying Information].

(Do not address questions to the broker who purchased the securities for you.)

(ii) For the form of the notice concerning imposition of backup withholding due to an incorrect taxpayer identification number under section 3406(a)(1)(B), see §31.3406(d)-5 and (f)(2).

(iii) For the form of the notice concerning the imposition of backup withholding due to a notified payee underreporting, see §31.3406(c)-1(c)(2).

(c) *Payors' reliance on information from broker*— (1) *In general.* A payor of an instrument acquired by a payee through a broker may rely on the information that the payor receives from the broker pursuant to paragraphs (a) and (b) of this section. Thus, if the broker's transfer instructions to the payor include a taxpayer identification number and do not inform the payor that the payee failed to make a required certification, the payor is not required to impose backup withholding. If the broker's notice informs the payor that the payee failed to make a required certification, however, and the payor has not received the certification from the payee, the payor is required to impose backup withholding. In addition, if the broker's notice informs the payor that the payee is subject to backup withholding due to notification from the Internal Revenue Service, the payor is required to withhold during the period described in §31.3406(c)-1(e) and (f).

(2) *Amount subject to withholding.* The payor is required to withhold depending on the payor's customary method of making payment on an instrument or instruments owned by a payee. For example, if it is the practice of a payor to combine in one account all readily tradable instruments of the same issue owned by a payee and if certain of those instruments are subject to backup withholding and others are not subject to backup withholding, the payor is required to withhold 20 percent of the aggregate payment made with respect to all the instruments in the account. If it is not the practice of the payor to combine in one account all readily tradable instruments of the same issue owned by a payee, the payor is required only to withhold 20 percent of the payment made on the instrument or instruments with respect to which the payee is subject to backup withholding.

(3) *Examples.* The application of the provisions of this paragraph (c) may be illustrated by the following examples:

Example (1). Individual A owns 100 shares of X Corporation stock which were purchased directly from X in 1983. On July 1, 1985, A instructs Broker M to purchase 200 additional shares of X stock and have the shares registered in A's name. The 200 shares are acquired through a post-1983 brokerage account with M. X has received A's social security number, but A has not certified under penalties of perjury that the number provided is correct or certified that A is not subject to backup withholding due to notified payee under-reporting. A fails to make the required certifications to M, and M notifies X of that fact as required in paragraph (a)(1)(iii) of this section. X, in accordance with its customary practice, com-

bined in one account all 300 shares owned by A and made an aggregate payment with respect to all the instruments. X is required to withhold 20 percent of all reportable amounts under paragraph (c)(2) of this section.

Example (2). Assume the same facts as in *Example (1)* except that X, in accordance with its customary practice, separates the shares into two accounts. Under paragraph (c)(2) of this section, X is only required to withhold 20 percent of the reportable payments made with respect to the 200 shares of stock that A acquired through M because the 100 shares of X stock were acquired before January 1, 1984, directly from X.

Example (3). Assume the same facts as in *Example (1)* except that X received A's certifications that A's social security number was correct and that A was not subject to backup withholding due to notified payee underreporting. Even though M notified X that A failed to make the required certifications, X is not required to withhold since X has received the necessary certifications from A (as described in §31.3406(d)-2(a)). Under paragraph (a)(3) of this section, because X has received the required certifications from A, X is not required to notify A.

Example (4). Assume the same facts as in *Example (1)* except that M does not notify X that A failed to make any certifications nor does M include A's taxpayer identification number. Since X already has A's taxpayer identification number, X is not required to withhold assuming no other condition for imposing backup withholding exists with respect to A.

§31.3406(d)-5 Backup withholding when the Service or a broker notifies the payor to withhold because the payee's taxpayer identification number is incorrect.

(a) *Requirement that a payor backup withhold due to notification of an incorrect taxpayer identification number*—(1) *In general.* Except as otherwise provided in paragraph (a)(2)(ii) of this section, backup withholding under section 3406(a)(1)(B) applies to any reportable payment (as defined in section 3406(b) and paragraph (a)(2) of this section) made to an account (as defined in paragraph (a)(5) of this section) of a payee if, after December 31, 1989, the Internal Revenue Service or a broker notifies a payor that the payee's taxpayer identification number is incorrect (as defined in paragraph (a)(4) of this section) and such incorrect taxpayer identification number is used with respect to such account of the payee. The payor is required under section 3406(h)(8) and paragraph (c) of this section to send a copy of the notice received by the payor (from the Internal Revenue Service or a broker) to inform the payee that he has furnished an incorrect taxpayer identification number and that, as a result, he may be subject to backup withholding under section 3406(a)(1)(B). The requirements for the notice that a payor must send to a payee are set forth in paragraph (c)(3) of this section. An example of the notice required by paragraph (c)(3) is set forth in the Appendix to this section. The period for which backup withholding applies due to notification of an incorrect taxpayer identification number is described in paragraph (d) of this section. See paragraph (e) of this section for the rules regarding how a payee may prevent backup withholding from starting or to stop it once it has begun. See paragraph (f) of this section for the applicable rules when the Internal Revenue Service or a broker notifies a payor twice within 3 calendar years that a payee has furnished an incorrect taxpayer identification number. See section 6721 for the penalty that may be imposed on a payor for providing an incorrect taxpayer identification number on an information return filed with the Internal Revenue Service unless there is reasonable cause for the error.

(2) *Definition of reportable payment*—(i) *In general.* See section 3406(b) and §31.3406(b)(1)-1 for the definition of reportable payments.

(ii) *Exceptions.* For the payments that are not "reportable payments" for purposes of section 3406(a)(1)(B), see §31.3406(b)(2)-1 through §31.3406(b)(4)-1. Also see §31.3406(g)-1 through §31.3406(g)-3 for other exceptions.

(3) *Transitional exclusion for payments to a fiduciary or nominee account.* Reportable payments to a fiduciary or nominee account are not subject to backup withholding for purposes of section 3406(a)(1)(B). For purposes of this paragraph (a)(3), a fiduciary or nominee account means an account with respect to which at least one person named in the registration is identified as acting in the capacity as nominee or of administrator, conservator, custodian, receiver, tutor, curator, committee, executor, guardian, trustee, or other fiduciary capacity recognized under governing law. This paragraph (a)(3) does not apply with respect to a notice from the Internal Revenue Service or a broker under paragraph (b)(1) or (2) of this section that is received by a payor after [THE DATE THAT THIS DOCUMENT IS PUBLISHED AS A TREASURY DECISION.]

(4) *Definition of incorrect taxpayer identification number.* An incorrect taxpayer identification number is any number that, at the time the Internal Revenue Service makes a determination that the taxpayer identification number is incorrect—

(i) Is not assigned under section 6109 to any surname of the payee, or

(ii) Is not assigned by the Internal Revenue Service to the name of a non-individual such as a corporation, estate, partnership, or trust, and that was provided on an information return filed with respect to a payee.

(5) *Definition of account.* The term "account" means any account, instrument, or other relationship with a payor.

(b) *Notice regarding an incorrect taxpayer identification number*—(1) *Notice from the Internal Revenue Service to payors and brokers.* The Internal Revenue Service will notify—

(i) Payors that a payee's taxpayer identification number is incorrect and that the payor must commence backup withholding as required under section 3406(a)(1)(B) and paragraphs (d) and (f) of this section on reportable payments made to accounts of the payee as defined in paragraph (a)(5) of this section that contain such incorrect taxpayer identification number, and

(ii) Brokers that a payee's taxpayer identification number is incorrect and that the broker must notify a payor that the payee is subject to backup withholding under section 3406(a)(1)(B) on accounts of the payee as defined in paragraph (a)(5) of this section that contain that incorrect taxpayer identification number.

The Internal Revenue Service will furnish the payor or broker with a copy of the notice and the payor shall furnish such copy, or an acceptable substitute copy, to the payee as described in paragraph (c) of this section.

(2) *Notice from a broker to a payor.* A broker who receives a notice from the Internal Revenue Service pursuant to paragraph (b)(1)(ii) of this section that a payee has furnished an incorrect taxpayer identification number and through whom the payee subsequently acquires a readily tradable instrument with respect to which the broker is not the payor must

notify the payor of that instrument of the following information:

(i) The fact that the broker was notified by the Internal Revenue Service that the payee furnished an incorrect taxpayer identification number and the date set forth on such notice from the Internal Revenue Service,

(ii) The name and taxpayer identification number of the payee with respect to whom the broker was notified, and

(iii) The fact that the named payee is subject to backup withholding under section 3406(a)(1)(B).

The broker is required to provide this information to the payor of the instrument in the time and manner provided in §31.3406(d)-4. See paragraph (b)(5)(ii) of this section for accounts of the payee with respect to which the broker is required to notify a payor under this paragraph (b)(2).

(3) *Accounts subject to backup withholding.* After receiving notice from the Internal Revenue Service or from a broker, as provided in paragraph (b)(1) and (2) of this section, the payor is required to notify the payee in accordance with paragraph (c) of this section and to institute backup withholding as prescribed in paragraph (d) of this section on all reportable payments subject to backup withholding that are made to the account or accounts of the payee containing the incorrect taxpayer identification number. See paragraph (f) of this section for the rules that apply when a payor has received two notifications of an incorrect taxpayer identification number with respect to an account of the payee from the Internal Revenue Service or a broker within 3 calendar years. See paragraph (b)(5) of this section for the determination of the account or accounts of the payee containing the incorrect taxpayer identification number.

(4) *Joint accounts*—(i) *In general.* Generally, payors are required to backup withhold on reportable payments made to the account of joint payees if the payee subject to backup withholding under section 3406(a)(1)(B) is the first person listed on the account at the time the payor receives the notice under paragraph (b)(1) or (2) of this section.

(ii) *Exception.* In the case where the first person listed on the account is an exempt foreign person for information reporting purposes under the applicable information reporting provisions and the account contains the names of persons who are not foreign persons, the payor is required to backup withhold on the account if the incorrect taxpayer identification number matches the name and number combination of the person on the account used for information reporting.

(iii) *Change in order of names.* If the account of a payee may be subject to backup withholding as described in paragraph (b)(4) of this section, backup withholding shall apply, if required, even though the order of the names on the account is subsequently changed, provided that the incorrect taxpayer identification number giving rise to backup withholding remains on the account.

(5) *Payor determination of the account or accounts of the payee that contain the incorrect taxpayer identification number*—(i) *Payors.* If an account number or designation is provided in the notice received under paragraph (b)(1) or (2) of this section, the payor need only determine whether the account or accounts corresponding to that number or designation contain the same name and incorrect taxpayer identification number provided in the notice. If no account number or designation is provided in the notice received under paragraph (b)(1) or (2) of this section, the payor must locate, using reasonable care, all accounts of the payee containing the same name and incorrect taxpayer identification number provided in the notice. A payor who satisfies the following two-part facts-and-circumstances test will be considered to have exercised reasonable care.

(A) Part one of the test is satisfied if a payor identifies and uses the appropriate computer or other record system on which to locate accounts of the payee subject to backup withholding under section 3406(a)(1)(B). A payor with a centralized and fully integrated computer system containing all product lines of the payor that pay reportable payments will have identified and used the appropriate system if the payor searches on such system for all accounts of the payee described in paragraph (a)(5) of this section that are subject to backup withholding. A payor whose product lines paying reportable payments are on separate computer or records systems will have identified and used the appropriate system if the payor searches for accounts of the payee on the computer or record system that contains the product line with respect to which the payor received a notification of an incorrect taxpayer identification number pursuant to paragraph (b)(1) or (2) of this section.

(B) Part two of the test is satisfied if the payor uses or inputs the appropriate data or criteria into the system that is correctly identified under paragraph (b)(5)(i)(A) of this section. In general, a payor who uses or inputs the name and taxpayer identification number, provided on the notice from the Internal Revenue Service or a broker as described in paragraph (b)(1) or (2) of this section will satisfy part two of the test. In some cases the system of a payor cannot utilize the data enumerated in the preceding sentence for locating all accounts of the payee subject to backup withholding under section 3406(a)(1)(B). In such cases the payor must use or input the appropriate data or criteria, as determined by the capability of the payor's computer or record system.

(ii) *Brokers.* Brokers are required to use the information and follow the procedures described in paragraph (b)(5)(i) to locate accounts of the payee with respect to which a broker is required to notify a payor pursuant to paragraph (b)(2) of this section.

(c) *Notice from payors of backup withholding due to an incorrect taxpayer identification number*—(1) *In general.* If the name and taxpayer identification number listed on the notice from the Internal Revenue Service or a broker as described in paragraph (b)(1) or (2) of this section matches the name and taxpayer identification number used on the payee's account at the time the payor receives the notification of an incorrect taxpayer identification number—

(i) The payor who receives a notice from the Internal Revenue Service is required under section 3406(h)(8) to send a copy of the notice required by paragraph (b)(1) of this section or a substitute notice as described in paragraph (c)(3) of this section to the payee of the account in accordance with paragraph (c)(2) of

this section (an example of the notice from the Internal Revenue Service required by section 3406(h)(8) and paragraph (b)(1) of this section is set forth in the Appendix to this §31.3406(d)-5), and

(ii) The payor who receives notification of an incorrect taxpayer identification number from a broker as described in paragraph (b)(2) of this section must send a substitute notice as described in paragraph (c)(3) of this section to the payee in accordance with paragraph (c)(2) of this section.

However, a payor is not required to send a notice as described in this paragraph (nor backup withhold under paragraph (d) of this section) with respect to any account of a payee where, due to an error of the payor, the taxpayer identification number on such account is not the number that was provided to the payor on the applicable Form W-9 (or acceptable substitute form) because, for example, the payor transposed the taxpayer identification number when incorporating it into its business records. If a payor sends a substitute notice, such notice must include all the information set forth in paragraph (c)(3) of this section, or must be identical to the notice set forth in the appendix to this §31.3406(d)-5, or must be an acceptable substitute of the notice set forth in the Appendix to this §31.3406(d)-5. In addition to the copy of the notice required by paragraph (b)(1) of this section or the substitute notice described in paragraph (c)(3) of this section, the payor must include a Form W-9 or an acceptable substitute form (as described in §31.3406(h)-(3)(c)(2)) with the notice for the payee to use to provide his name and taxpayer identification number and to certify that the taxpayer identification number is correct, or to provide his name and taxpayer identification number that was originally furnished and to certify that such taxpayer identification number is correct. The payor is required to include a reply envelope (self-addressed) with the notice to the payee which may be, but is not required to be, postage prepaid. The envelope containing the notice and the Form W-9 (or an acceptable substitute form) must state on the outside in a bold and conspicuous manner: "Important Tax Document Enclosed". The mailing may not include any material other than the notice, the Form W-9 (or an acceptable substitute form), any documents of the payor that are necessary to change the name or taxpayer identification number (or both) on the account of the payee, and the reply envelope of the payor. The notice required by paragraph (c) of this section shall also apply to those payors notified by a broker that a payee is subject to backup withholding under section 3406(a)(1)(B). For purposes of this section, the date set forth on the notice from the Internal Revenue Service (or a broker) shall be considered the date of receipt by and of notification to the payor. However, in the case of a dispute, if the payor demonstrates to the satisfaction of the Internal Revenue Service that the date of actual receipt of the notice is later than the date on the notice, the actual date shall be considered the date of receipt by and of notification to the payor.

(2) *Procedures*—(i) *In general.* The payor must send the notice described in paragraph (c) of this section to the payee within 15 business days after the date that the Internal Revenue Service or a broker notifies the payor pursuant to paragraph (b)(1) or (2) of this section. The payor must mail the notice to the payee's last known address by first-class mail. If it is the customary practice of the payor not to mail any correspondence to a payee, the payor may furnish the notice by personal delivery, by intra-office mail, or by any other means reasonably expected to furnish the notice to the payee promptly. A payor is not required to send the notice to the payee if there is currently a "do not mail" or a "stop mail hold" instruction with respect to the payee's account subject to backup withholding under section 3406(a)(1)(B). However, the payor must handle the notice in the same manner that the payor handles other correspondence of the payee.

(ii) *Two or more notices for a payee in the same calendar year.* A payor who receives, under the same payor employer identification number (or social security number), two or more notices described in paragraph (b)(1) or (2) of this section in a calendar year with respect to a payee may satisfy the requirements of this paragraph (c) with respect to such notices by sending one notice to the payee that satisfies the requirements of paragraph (c)(3) of this section.

(3) *Requirements of substitute notice to the payee.* If the payor does not send a copy of the notice received from the Internal Revenue Service pursuant to paragraph (b)(1) of this section or if the payor is notified by a broker as described in paragraph (b)(2) of this section that the payee provided an incorrect taxpayer identification number, the payor may send a substitute notice as provided for in this paragraph (c)(3). A notice to the payee will satisfy the requirements of section 3406(h)(8) and paragraph (c)(1) of this section if the notice is identical to the one set forth in the appendix to this §31.3406(d)-5, is an acceptable substitute thereof, or if the notice—

(i) Informs the payee that the payor has been notified that the taxpayer identification number furnished by the payee is an incorrect taxpayer identification number (as defined in paragraph (a)(4) of this section);

(ii) Advises the payee of the name and taxpayer identification number combination that the Internal Revenue Service has determined to be incorrect;

(iii) Informs the payee that the payee must either—

(A) Correct the surname (or business name) or taxpayer identification number (or both) and certify, under penalties of perjury, that the newly provided taxpayer identification number is correct, or

(B) State—

(*1*) Under penalties of perjury that the taxpayer identification number originally furnished to the payor is correct and provide that number and the corresponding listed surname (or business name),

(*2*) That the Social Security Administration (or the local office of the Internal Revenue Service in the case of an incorrect employer identification number) has been contacted by the payee to resolve the problem giving rise to the notification of an incorrect taxpayer identification number, or

(C) In the case of a notification of an incorrect taxpayer identification number of an individual payee due to a name change by the payee when the

payee has not communicated the change of name to the Social Security Administration—

(*1*) Contact the Social Security Administration and reassign the taxpayer identification number to the surname that is used on the account with the payor, certify under penalties of perjury, that the existing taxpayer identification number shown on the account is correct (and provide the corresponding surname used with that number), and provide a statement that the Social Security Administration has been contacted to reassign the taxpayer identification number to the surname shown on the account, or

(*2*) Use both surnames on the account with the payor (the surname currently shown on the account and the surname shown on the payee's Social Security Administration card if the payee is unable to contact the Social Security Administration at this time), provide the surnames, and certify under penalties of perjury that the furnished taxpayer identification number is correct, and

(*3*) Follow either paragraph (c)(3)(iii)(C)(*1*) or (*2*) of this section consistently with respect to all accounts with the payor;

(iv) Advises the payee of other necessary documentation (*i.e.*, account creation documents) that the payee must provide to the payor in order to change the name or taxpayer identification number (or both) on the account and how to provide such information and the information described in paragraph (c)(3)(iii) of this section to the payor;

(v) Advises the payee to contact the Social Security Administration to obtain a social security card if the payee was never assigned a social security number or to obtain a replacement social security card if the payee lost his card and does not remember his social security number;

(vi) Advises the payee that as a result of providing an incorrect taxpayer identification number, the payor is required under section 3406(a)(1)(B) of the Internal Revenue Code to begin backup withholding 20 percent of the reportable payments made to the account of the payee no later than after the close of the day 30 business days after the date that the payor is notified of the incorrect taxpayer identification number by the Internal Revenue Service or a broker if the payor has not received the required Form W-9 (or an acceptable substitute form) as described in paragraph (e) of this section;

(vii) Gives the payee the date that the payor received the notice that the payee provided an incorrect taxpayer identification number; and

(viii) States that the payee must complete and return the enclosed Form W-9 (or an acceptable substitute form), and, if necessary, other documents of the payor as described in paragraph (c)(3)(iv) of this section, and the statement that the payee contacted the Social Security Administration (or the Internal Revenue Service) before the time described in paragraph (c)(3)(vi) of this section in order to prevent backup withholding under section 3406(a)(1)(B) from starting, or after the time described in paragraph (c)(3)(vi) of this section to stop backup withholding once it has begun and to avoid the imposition of the penalty for failure to provide a correct taxpayer identification number.

(4) *Payor must use newly provided certified number.* If the payor receives a certified Form W-9 (or an acceptable substitute form) from the payee in the manner required in paragraph (e) of this section before the end of a calendar year, the payor shall use the name and certified taxpayer identification number on the Form W-9 (or acceptable substitute form) on information returns that the payor is required to file for reportable payments made with respect to the payee for that year and subsequent calendar years. A payor who uses the name and certified taxpayer identification number on an information return as described in this paragraph will satisfy the requirement to provide this information to the Internal Revenue Service as prescribed in section 3406(h)(9).

(d) *Period during which backup withholding is required due to notification of an incorrect taxpayer identification number*—(1) *In general.* Except as provided in paragraph (d)(2) of this section, upon receiving a notice described in paragraph (b)(1) or (2) of this section, the payor must impose backup withholding on all reportable payments made to the account of the payee that are subject to backup withholding after the close of the 30th business day after the date the payor receives the notice described in paragraph (b)(1) or (2) of this section and on or before the close of the 30th calendar day after the day the payor receives from the payee the certified Form W-9 (or acceptable substitute form) as described in paragraph (e) of this section.

(2) *Grace periods*—(i) *Starting backup withholding.* Pursuant to section 3406(e)(5)(A), the payor may elect, on a payee-by-payee basis or in general, to begin backup withholding at any time during the 30-business-day period described in paragraph (d)(1) of this section.

(ii) *Stopping backup withholding.* Pursuant to section 3406(e)(5)(B), the payor may elect, on a payee-by-payee basis or in general, to treat the certified Form W-9 or acceptable substitute form described in paragraph (e) of this section as having been received at any time within 30 calendar days after it is provided by the payee and to stop backup withholding at any time within such 30-day period. See section 3406(e)(5)(B) and §31.3406(e)-1(b) for the application of the rules contained in this paragraph (d)(2).

(e) *Manner required for payee to furnish certified taxpayer identification number.* A payee with respect to whom the payor has been notified (as described in paragraph (b) of this section) that the payee's taxpayer identification number is incorrect is required to provide his name and taxpayer identification number and to certify, under penalties of perjury, that the taxpayer identification number being provided to the payor on a Form W-9 (or acceptable substitute form) is correct in order to prevent backup withholding from starting or to stop it once it has begun. Additionally, the payee may be required to state on the notice provided to the payor, as described in paragraph (c)(3)(iii)(C)(*1*) of this section, that the Social Security Administration (or the Internal Revenue Service) was contacted by the payee within 30 calendar days from the date of the notice from the payor. In general, the payee is require to provide the information described in this paragraph for each account, including any pre-1984 account or instrument (as defined in §31.3406(d)-1(b)(2) and (c)(1)(ii)) that contains the incorrect taxpayer identification number identi-

fied by the Internal Revenue Service pursuant to paragraph (b)(1) or (2) of this section unless §31.3406(h)(3)(a) applies with respect to the accounts of a payee. See §31.3406(h)-3(a), (c), and (f) which respectively provide that the Form W-9 is the prescribed form for the payee to make the certification, permit the use of substitute forms, and explain who may sign the form. See paragraph (f)(1) of this section for the rules on obtaining a certified taxpayer identification number after a payor is notified twice within 3 calendar years that a payee's taxpayer identification number is incorrect.

(f) *Notification of two incorrect taxpayer identification numbers within a 3-year period*—(1) *In general.* If a payor receives a notification as described in paragraph (b)(1) or (2) of this section twice within 3 calendar years, and in each case the payor pursuant to paragraph (b)(5) of this section identifies the same account as containing the incorrect taxpayer identification number, then the payor shall—

(i) Disregard any future certifications (described in paragraph (e) of this section) furnished by the payee with respect to the account;

(ii) Send the notice described in paragraph (f)(2) of this section to the payee (and not the notice required under paragraph (c) of this section) within 15 business days after the date that the payor receives the second notice described in this paragraph (f), and

(iii) Impose backup withholding on the account containing the incorrect the taxpayer identification number for the period described in paragraph (f)(3) of this section.

For purposes of this paragraph (f), a payor shall not count any notice as a first notice unless the payor was required to notify the payee about the incorrect taxpayer identification number pursuant to paragraph (c)(1) of this section. Additionally, a payor shall treat the receipt of two or more notices in a calendar year as described in paragraph (b)(1) or (2) of this section with respect to the same payee as the receipt of one notice for purposes of this paragraph. The preceding sentence applies only with respect to a payor who received such two or more notices under the same payor employer identification number (or social security number). The payor who receives such two or more notices may satisfy the requirements of this paragraph (f) by sending one notice to the payee that contains all the information described in paragraph (f)(1) of this section. The payor shall maintain sufficient records to determine whether the payor has received notices described in this paragraph and paragraph (b)(1) or (2) of this section twice within 3 calendar years with respect to a payee as described in this paragraph (f). The envelope containing the notice must state on the outside in a bold and conspicuous manner: "Important Tax Document Enclosed". The payor is not required to include a Form W-9, nor is the payor required to include a reply envelope in the mailing of the notice to the payee. The payor may not include any material in the mailing of the notice described in this paragraph (f). The notice requirements provided in this paragraph (f) shall apply to a payor notified by a broker that a payee is subject to backup withholding under section 3406(a)(1)(B). The mailing procedure described in paragraph (c)(2) of this section shall apply to the mailing of the notice described in paragraph (f) of this section. A payor is not required to send a notice described in paragraph (f)(2) of this section (nor backup withhold under paragraph (f)(3) of this section) with respect to any account of a payee where, due to an error of the payor, the taxpayer identification number on such account is not the number that was provided to the payor on the applicable Form W-9 (or acceptable substitute form) because, for example, the payor transposed the taxpayer identification number when incorporating it into its business records.

(2) *Notice to payee who has provided two incorrect taxpayer identification numbers within 3 years.* The notice to the payee required by paragraph (f)(1) of this section must list, in a bold and conspicuous manner, the date the payor was notified of the second incorrect taxpayer identification number, the payee's name, address (including street, city, state (or country), and zip (or mailing) code), and such other information that may be required by revenue procedures and revenue rulings. In addition the notice must state that—

(i) The payor has been notified that the taxpayer identification number furnished by the payee is incorrect, setting forth the name and taxpayer identification number that the Internal Revenue Service has determined to be incorrect and the specific account number that contains the incorrect taxpayer identification number;

(ii) The payor has been notified twice within 3 calendar years that the payee has furnished an incorrect taxpayer identification number on the account with the payor;

(iii) The payor is required to disregard any future taxpayer identification numbers, whether or not certified under penalties of perjury, received from the payee with respect to the account unless the Internal Revenue Service has notified the payor that such taxpayer identification number is correct;

(iv) As a result of providing an incorrect taxpayer identification number, the payor is required under section 3406(a)(1)(B) to begin backup withholding 20 percent of reportable payments made to the account of the payee no later than after the close of the day 30 business days after the date that the payor is notified of the incorrect taxpayer identification number if the Internal Revenue Service has not notified the payor that the payee provided a correct taxpayer identification number to the Internal Revenue Service as described in paragraph (h) of this section; and

(v) The payee must contact the Internal Revenue Service Center where the payee is required to file his income tax return in order to prevent backup withholding under section 3406(a)(1)(B) from starting or to stop it once it has begun.

(3) *Period during which backup withholding is required due to a second notification of an incorrect number within 3 years.* Upon receiving the second notice of an incorrect taxpayer identification number from the Internal Revenue Service or a broker as described in paragraph (f)(1) of this section, the payor must backup withhold on all reportable payments subject to backup withholding made to the account of the payee after the close of the 30th business day after the day on which the payor receives a notice described in paragraph (b)(1) or (2) of this section and on or before

the close of the 30th calendar day after the payor receives the notification from the Internal Revenue Service as described in paragraph (h) of this section.

(4) *Grace periods*—(i) *Starting backup withholding.* Pursuant to section 3406(e)(5)(A), the payor may elect, on a payee-by-payee basis or in general, to begin backup withholding at any time during the 30-business-day period described in paragraph (f)(3) of this section.

(ii) *Stopping backup withholding.* Pursuant to section 3406(e)(5)(B), the payor may elect, on a payee-by-payee basis or in general, to treat the notification from the Internal Revenue Service as described in paragraph (h) of this section as having been received at any time within 30 calendar days after such notification is provided by the Internal Revenue Service and to stop backup withholding at any time within 30 calendar days of receiving such notice. See §31.3406(e)-1(b) for the application of the rule contained in this paragraph (f)(4)(ii).

(g) *Procedure for furnishing a correct taxpayer identification number to the Internal Revenue Service.* The procedure that a payee must follow after the Internal Revenue Service or a broker has notified a payor twice within 3 calendar years that the payee provided an incorrect taxpayer identification number with respect to the same account as described in paragraph (f)(1) of this section will be provided in a revenue procedure published by the Internal Revenue Service.

(h) *Notice from the Internal Revenue Service to stop backup withholding.* A payor who received a notice pursuant to paragraph (f) of this section will be notified by the Internal Revenue Service to stop backup withholding after the Internal Revenue Service receives a correct taxpayer identification number from the payee. A broker who received a notice pursuant to paragraph (b) of this section will be notified by the Internal Revenue Service that the payee is no longer subject to backup withholding under section 3406(a)(1)(B) and that the broker is no longer required to provide notices to payors under paragraph (b)(2) of this section. A broker who receives a notice under this paragraph (h) from the Internal Revenue Service is not required to provide the notice to any payor to which the broker has previously provided the notice required under paragraph (b)(2) of this section. The Internal Revenue Service will notify a payor or a broker pursuant to this paragraph by providing the payee with a Form W-9 on which the payee has certified, under penalties of perjury, that his taxpayer identification number is correct. The Form W-9 will bear an official stamp of the Internal Revenue Service verifying that the taxpayer identification number on the Form W-9 is correct as associated with the listed surname or business name. A payee may provide a copy of the Form W-9 to his payors or brokers in order to prevent backup withholding under paragraph (f)(3) of this section from beginning or to stop it under paragraph (f)(4)(ii) once it has begun. In lieu of receiving a copy of the Form W-9 described in this paragraph, in its discretion, a payor or broker may require the payee to set forth his name and certify, under penalties of perjury, that his taxpayer identification number is correct (as set forth on the Form W-9 verified by the Internal Revenue Service) on the payor's or broker's substitute Form W-9 in order to prevent backup withholding under paragraph (f)(3) from beginning or to stop it under paragraph (f)(4)(ii) once it has begun.

(i) [Reserved]

(j) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). D opened an account with Bank O prior to 1984 and furnished a taxpayer identification number to O at the time he opened the account. O is open for business Monday through Friday. O pays interest on the account at the end of each calendar month, and the account is a pre-1984 account as described in §31.3406(d)-1(b)(2) and (c)(1)(ii). On October 1, 1990, the Internal Revenue Service notifies Bank O that the taxpayer identification number provided by D is incorrect. O timely sends the notice information to D as required in paragraph (c)(1) of this section. O does not receive a certified Form W-9 or an acceptable substitute form (hereinafter "certification") from D as described in paragraph (e) of this section. O is required to backup withhold 20 percent of all reportable payments made after November 14, 1990 (which is 30 business days after the date the Internal Revenue Service notified O). Therefore, O is not required to backup withhold on the reportable payment made on October 31, 1990, but is required to backup withhold on the reportable payment made on November 30, 1990. O is required to continue to backup withhold under section 3406(a)(1)(B) until O receives the certification described in paragraph (e) of this section from D.

Example (2). Assume the same facts as in *Example (1)* except that D furnishes a new taxpayer identification number to O on November 1, 1990, but does not certify, under penalties of perjury, that it is his correct taxpayer identification number as required in paragraph (e) of this section. Even though the account is a pre-1984 account, O is required to withhold 20 percent of all reportable payments made after November 14, 1990 (which is 30 business days after the date the Internal Revenue Service notified O), and before the date O receives the certification as described in paragraph (e) of this section from D.

Example (3). Assume the same facts as in *Example (2)* except that D provides O with the certification described in paragraph (e) of this section on November 20, 1990. D elects pursuant to paragraph (d)(2)(ii) of this section to treat the certification as received on November 20, 1990. Even though D did not provide the certification to O within 30 business days after the Internal Revenue Service notified O that D provided an incorrect taxpayer identification number, O is not required to backup withhold under section 3406(a)(1)(B) because O did not make any reportable payment to D after 30 business days after notification of an incorrect taxpayer identification number and before O received D's certification in the manner required in paragraph (e) of this section. Pursuant to section 3406(e)(5)(B), O may elect to treat the certification as having been received at any time within the 30 calendar days after it is provided by D.

Example (4). Individual F has two post-1983 accounts with Bank R that pay reportable interest: a savings account and a money market account. The money market account was opened in 1986, and the savings account was opened on February 1, 1991. R treats each of these accounts as a separate account with the Bank. F provided R with the certifications as described under §31.3406(a)-1 at the time each account was opened. On October 1, 1990, the Internal Revenue Service notified R pursuant to paragraph (b)(1) of this section that F furnished an incorrect taxpayer identification number with respect to the money market account. R timely sends F the notice required under paragraph (b)(1) of this section and receives the certification required under paragraph (e) of this section from F on November 1, 1990. On October 1, 1991, the Internal Revenue Service notifies R that F furnished an incorrect taxpayer identification number with respect to the money market account. Further, R determines from its business records that two notifications of an incorrect taxpayer identification number have been received with respect to the money market account within 3 calendar years. R must send F the notice required under paragraph (f)(2) of this section and must commence backup withholding on reportable interest paid on the money market account pursuant to paragraph (f)(3) of this section after November 14, 1991, which is 30 business days after R received the second notice. R must continue to backup withhold on the money market account until R receives from the payee a copy of the notice that was provided to the payee by the Internal Revenue Service as described in paragraph (h) of this section. R is not required to backup withhold on the savings account until it receives notice under paragraph (b)(1) or (2) of this section with respect to the savings account.

Appendix to §31.3406(d)-5

A notice required by paragraph (c)(3) of this section shall be substantially similar in content to the following.

Date _____

IMPORTANT TAX INFORMATION—PLEASE READ CAREFULLY

YOU MUST PROVIDE US WITH A FORM W-9 (EVEN IF WE ALREADY HAVE ONE ON FILE FOR YOU)

Notice of Backup Withholding

We received a notice from the Internal Revenue Service (IRS) stating that the taxpayer identification number (TIN) on your account with us is incorrect. A TIN is incorrect if either the name or number shown on an account does not match a name and number combination shown on the records of the Social Security Administration (SSA) or IRS. You must act to correct this problem within 30 calendar days from the date shown above. Otherwise, we may be required to withhold 20% of the interest, dividends, and certain other payments that we make to your account.

Section 3406 of the Internal Revenue Code requires that we withhold 20% in tax, called backup withholding, when you do not give us your correct TIN. Further, you may be subject to a $50 penalty by the IRS under section 6723 of the Internal Revenue Code for failing to provide us with your correct TIN. This notice provides you with instructions to correct your account record in order to avoid backup withholding and the possible imposition of the penalty.

INSTRUCTIONS FOR INDIVIDUALS

For individuals, the TIN is the social security number (SSN). Very often a TIN is incorrect because of a name change due to marriage, divorce, adoption or some other reason that has not been communicated to the Social Security Administration (SSA) and recorded on its records. Alternatively, the account may not contain the correct SSN of the actual owner. For example, an account in a child's name may contain a parent's SSN. An account should be titled in the name of the actual owner of the account with that person's SSN.

What to Do

To determine what actions you should take to correct your TIN, compare the name and SSN on your account with us (listed on page (insert the correct page number)) with the name and SSN shown on your social security card and then follow the chart below to determine what action you should take. (If you have never been assigned an SSN by SSA or if you lost your card and do not know your SSN, contact your local SSA office to apply for an original or a replacement SSN card, whichever is required. Also, if you have never been assigned an SSN, *read* the enclosed Form W-9, write the words "applied for" on the form according to its instructions, and return the form to us. You do not need to follow the chart below. You must send us your name and SSN, as shown on the SSN card that you get from SSA, on a Form W-9 within 60 days.)

IF—	*THEN—*
1. The last name and SSN on your account agree with the last name and SSN on your social security card—	1. Contact your local SSA office to ascertain why the information on SSA's records is different from that on your social security card and to resolve that problem. Also, put your name and SSN on the enclosed Form W-9 according to its instructions. Sign the Form W-9 and the statement below that you contacted SSA. Send both forms to us.
2. The SSN on your account is different from the SSN on your social security card, but the last name is the same—	2. Put your name and SSN, as shown on your social security card, on the enclosed Form W-9 according to its instructions, sign it and send it to us. No contact with SSA is necessary.
3. The last name on your account is different from the last name on your social security card, but the SSN is the same on both—	3. Take one of the following steps (but not all): If the last name on your account is correct, (a) Contact SSA to correct the name on your social security card. Put your SSN and name shown on your account on the enclosed Form W-9 according to its instructions, sign it and the statement that you contacted SSA. Send both forms to us. (b) If you are not able to contact SSA at this time, you can provide us with both last names. Put your SSN and the name shown on your social security card plus the last name shown on your account (in that order) on the enclosed Form W-9 according to its instructions, sign it, and return it to us. For example, if your social security card lists your maiden name, you can provide us with your SSN and your name in the following order: First/maiden/married name. Please note, however, that you should contact SSA as soon as possible. If the last name on your social security card is correct,

IF—	THEN—
4. Both the last name and SSN on your account are different from the last and SSN on your social security card—	(c) Put that name and your SSN on the enclosed Form W-9 according to its instructions, sign it, and return it to us. No contact with SSA is necessary. 4. If the last name and SSN on your social security card name are correct, (a) put that name and SSN on the enclosed Form W-9 according to its instructions, sign it, and send it to us. No contact with SSA is necessary. If the last name on your account and the SSN on your social security card are correct, (b) Follow procedures in section 3(a) or (b) above. Be sure to put the name shown on your social security card on the Form W-9.

You must be consistent with the name and number (SSN) that you furnish (1) to us for all of your accounts and (2) to your other payors in order to avoid a problem in the future. If you must visit SSA, take this notice, your social security card, and other relevant documents with you. You should call SSA first so they can explain to you what other documents you need to bring to the SSA office.

Instructions for Nonindividuals

For most nonindividuals (such as trusts, estates, partnerships, and similar entities), the taxpayer identification is the employer identification number (EIN). The EIN on your account may be incorrect because it does not contain the number of the actual owner of the account. For example, an account of an investment club or bowling league should reflect the organization's own EIN and name, rather than the SSN of a member. (The account of a sole proprietor who may have both an EIN and an SSN should reflect the individual name of the sole proprietor and his or her SSN.) Please put the name and EIN on the enclosed Form W-9, sign it, and send it to us.

Remember

YOU MUST SEND US A SIGNED FORM W-9 WITHIN 30 CALENDAR DAYS FROM THE DATE SHOWN AT THE TOP OF PAGE 1 even if the name and number (SSN or EIN) on your account with us match the name and number (SSN or EIN) on your social security card or the document issuing you an EIN. If we do not receive your Form W-9, any other documents that are necessary for us to change the name or TIN (or both) on your account to reflect the name and number on the newly provided Form W-9, and, if necessary, the statement that you contacted SSA or IRS within the 30-day period, we may be required to withhold 20% from any reportable payment that we pay to your account until we receive the necessary documents.

Please complete the form below if you are required to contact SSA or the IRS.

Detach and Return to Us

Statement of SSA or IRS Contact

I hereby state that I have contacted the Social Security Administration concerning my social security number (SSN) or the Internal Revenue Service concerning my employer identification number (EIN) to resolve the problem with my name or number which resulted in my being notified of an incorrect taxpayer identification number.

§31.3406 (e)-1 Period during which withholding is required.

(a) *In general.* A payor shall withhold 20 percent of any reportable payment (as defined in §31.3406(b)(1)-1(a)) made to a payee during the period described in this section. A payor shall continue to withhold until no condition for imposing backup withholding exists with respect to the payee. A payor shall not withhold more than 20 percent of any reportable payment irrespective of the number of conditions for imposing backup withholding that exist with respect to the payee.

(b) *Special rule for determining when the payor receives a taxpayer identification number or certificate from a payee.* In determining whether a payee has failed to provide a taxpayer identification number or any certification to a payor (including a Form W-8 or substitute form), a payor is required to process the taxpayer identification number or certification within 30 days after the payee or broker furnishes the taxpayer identification number or certification to the payor. Thus, the payor may take up to 30 days to treat the number or certificate as having been received. The payor, at its option, may treat the taxpayer identification number or certificate as having been received at any time within 30 days after the payee or broker furnishes the number or certification to the payor.

(c) *Failure to furnish taxpayer identification number in the manner required.* A payor is required to withhold 20 percent of any reportable payment (as defined in §31.3406(b)(1)-1(a)) made to a payeeif—

(1) The payor has not received the payee's taxpayer identification number in the manner required in §31.3406(d)-1, or

(2) The payor has received notice from a broker (as required by §31.3406(d)-4(a)(1)(iii)) with respect to a readily tradable instrument that the payee did not furnish a taxpayer identification number to the broker in the manner required in §31.3406(d)-1 and the payor has

not received the taxpayer identification number from the payee in such manner.

The payor shall continue to withhold 20 percent of any reportable payments made to the payee until the payor receives the taxpayer identification number from the payee in the manner required in §31.3406(d)-1. Once the payor receives the taxpayer identification number in the manner required, the payor must stop withholding under section 3406(a)(1)(A) within 30 days after receiving the taxpayer identification number.

(d) *Payee certification failure.* A payor is required to withhold 20 percent of any reportable interest or dividend payment (as defined in §31.3406(b)(1)-1(b)) made to a payee if—

(1) The payor has not received the certification required in §31.3406(d)-2, or

(2) The payor has received notice from a broker (as required in §31.3406(d)-4(a)(1)(iii)) that the payee did not make the required certification and the payor has not received the required certification from the payee.

The payor shall continue to withhold 20 percent of any reportable payments made to the payee until the payor receives the required certification from the payee. Once the payor receives the required certification from the payee, the payor must stop withholding under section 3406(a)(1)(D) within 30 days after the certification is received.

(e) *Notification of an incorrect taxpayer identification number.* See §§31.3406(d)-5(d) and (f)(3) for the period for which backup withholding is required in the case of notification of an incorrect taxpayer identification number.

(f) *Notified payee underreporting.* See §31.3406(c)-1(e) for the period for which backup withholding is required in the case of Internal Revenue Service notification of payee underreporting.

(g) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). Individual A has maintained an interest bearing account with Bank M since 1981. M credits interest on the account on the first day of each month. A furnished a taxpayer identification number to M at the time that A opened the account, but A has not certified under penalties of perjury that the number is correct. Because the account is a pre-1984 account (as defined in §31.3406(d)-1(b)(2)(i)), A has provided his taxpayer identification number in the manner required by §31.3406(d)-1. Moreover, no other condition for imposing backup withholding exists. Consequently, M is not required to withhold under section 3406 on payments made to A with respect to this account.

Example (2). Assume the same facts as in Example (1) except that A did not furnish a taxpayer identification number to M when A opened the account. A does not furnish his social security number to M until February 24, 1984. Under paragraph (b) of this section, M has up to 30 days in which to treat the number as having been received. M is required to withhold 20 percent of the reportable payment made on February 1. If M does not treat the number as having been received by March 1, M may withhold 20 percent of the reportable payment made on March 1. M may not, however, withhold 20 percent of the payment made on April 1.

Example (3). Individual B opens an interest bearing checking account with Bank N on January 9, 1984. N will pay interest on the account quarterly. B does not furnish his taxpayer identification number to N and also does not certify that he is awaiting receipt of a taxpayer identification number (as described in §31.3406(g)-3). N is required to withhold under section 3406 on payments made to B until N receives B's taxpayer identification number and certification under penalties of perjury that B's taxpayer identification number is correct and that B is not subject to backup withholding due to notified payee underreporting. N is required to withhold only 20 percent under section 3406 on any reportable payments made to B even though two conditions for imposing backup withholding exist.

Example (4). Assume the same facts as in *Example (3)* except that B furnishes his taxpayer identification number and the required certifications to M on March 15, 1984. Under paragraph (b) of this section, M has up to 30 days to treat the certifications as having been received. If N treats the number and certifications as received before March 31, N is not required to withhold under section 3406 on the March 31 quarterly interest payment. If N does not treat the certifications as received before March 31, however, N is required to withhold on the March 31 interest payment. See §31.6413(a)-3(a) which provides that N may treat the amount withheld on March 31 as erroneously withheld and may refund the withheld amount to B. N is required to withhold only 20 percent of any reportable payments made to B even though two conditions for imposing backup withholding exist.

Example (5). Assume the same facts as in Example (4) except that B furnishes his taxpayer identification number and certifies, under penalties of perjury, that it is his correct number, but B does not certify that he is not subject to backup withholding due to notified payee underreporting as required under §31.3406(d)-2. N treats the number as having been received on March 15, 1984. Even though B furnished his taxpayer identification number in the manner required in §31.3406(d)-1 and N has received the number, N is required to withhold 20 percent of the March 31 interest payment because M has not received certification from B that B is not subject to backup withholding due to notified payee underreporting. N is required to continue to withhold until N receives such a certification from B.

Example (6). C opens a new account with Broker P on March 19, 1984, to purchase a readily tradable instrument of Corporation Z. P holds the instrument in street name for C. Payments of $1000 of stated interest on the instrument will be made on June 30 and December 31. C does not certify his taxpayer identification number or that C is not subject to backup withholding due to notified payee underreporting until July 1, 1984. Because the instrument is held in street name, P is the payor of the interest to C (as defined in §31.3406(a)-2). Under paragraph (b) of this section, P treats the certifications as having been received on July 31, 1984. P is required to withhold $200 (20 percent of $1000 paid on June 30) under section 3406 even though two conditions for imposing backup withholding under section 3406 exist with respect to C. P is not required to withhold under section 3406 on the December 31 interest payment because P has received C's certifications and no other condition for imposing backup withholding exists.

Example (7). Assume the same facts as in *Example (6)* except that P does not hold the instrument in street name for C. Thus, P is not the payor of the reportable interest payment (as defined in §31.3406(a)-2). P is required under §31.3406(d)-4(a)(l)(iii) to notify Z in connection with the transfer instructions that C failed to make the required certifications. Z is required to notify C as described in §31.3406(d)-4(a)(3), is required to seek the missing certifications, and is required to withhold 20 percent of any reportable payments made to C until Z receives C's certifications.

Example (8). Assume the same facts as in *Example (7)* except that C furnishes the required certifications to Z on June 1, 1984. Under paragraph (b) of this section, Z has up to 30 days to treat the certifications as having been received. If Z treats the certifications as having been received before June 30, 1984, Z is not required to withhold on the June 30 interest payment. If Z does not treat the certifications as having been received before June 30, Z is required to withhold 20 percent of the June 30 interest payment.

Example (9). Assume the same facts as in *Example (7)* except that before P's notification Z had already received the required certifications from C because C had acquired other instruments directly from Z. Z is not required to withhold due to P's notification since Z has received the required certifications from C.

Example (10). Assume the same facts as in *Example (7)* except that in addition to acquiring the Z instrument through P, C subsequently acquired additional Z instruments through Broker Q. Q does not hold the instruments in street name for C so Q is not the payor as defined in §31.3406(a)-2. Q is required under §31.3406(d)-4 to notify Z in connection with the transfer instructions if C fails to make any required certifications. Q's transfer instructions to Z include C's taxpayer identification number and do not inform Z of any payee certification failure. Unless Z has received the certifications

from C, Z may not assume that there is no reason to solicit the certifications required by P's notification even though Q's transfer instructions did not inform Z of any certification failure. Z is required to seek the missing certifications (based on P's transfer instructions to Z), and Z is required to withhold 20 percent of any reportable payments made to C until Z receives C's certifications. Another broker's transfer instructions to a payor do not relieve the payor's responsibility with respect to an earlier broker's transfer instructions. Once one broker notifies the payor that there is a payee certification failure, the payor must withhold until the payor receives the certification from the payee. See §31.3406(d)-4(c)(2) which provides that if Z makes an aggregate payment with respect to all Z Corporation instruments owned by C, Z is required to withhold 20 percent of the aggregate reportable payment.

§31.3406(f)-1 Confidentiality of information.

(a) *Confidentiality and liability for violation—In general.* No person may use any information obtained under section 3406 for any purpose except for the purpose of complying with the requirements of section 3406 or for purposes permitted under section 6103 (subject to the safeguards of section 6103). See section 7431 for civil damages for violating the confidential use of such information.

(b) *Permissible use of information*—(1) *In general.* A payor or broker may transmit information on a Form W-9 or other acceptable form relating to backup withholding to the department, institution, or firm (or to any employee therein) that is responsible for withholding or processing of taxpayer identification numbers, certifications described in §31.3406(h)-3, or other substitute forms. In addition, a broker may notify the payor with respect to a readily tradable instrument of the requirement to withhold and the condition or conditions for imposing backup withholding (as described in §31.3406(d)-4) that exist with respect to the payee. A payor or broker may, without violating the Internal Revenue Code, close an account of, refuse to open an account for, or issue an instrument to, or redeem an instrument for, a person who fails to furnish his taxpayer identification number in the manner required in §31.3406(d)-1.

(2) *Window transactions.* In the case of a window transaction (as defined in §31.3406(b)(2)-3(b)), a payor may, without violating the Internal Revenue Code, refuse to redeem or may refuse to make payment if the payee fails to provide a taxpayer identification number regardless of when the obligation was issued or acquired.

(c) *Specific restrictions on the use of information.* A payor or broker is not permitted to refuse to open an account or to issue an instrument if the person fails to certify, under penalties of perjury, that the person is not subject to withholding under section 3406(a)(1)(C) (relating to notified payee underreporting). A payor or broker is not permitted to use information obtained under section 3406, including a payee's failure or inability to certify that he is not subject to backup withholding due to notified payee underreporting or the fact that the account is subject to backup withholding, to surcharge an account, to open or close an account, to issue or redeem an instrument, or in deciding whether to extend credit to the payee. A payor or broker has surcharged an account if the payor or broker charged an account more than the fee charged a similar account that was not subject to backup withholding. If a payor or broker in good faith reasonably believes use of the information is permissible under this section, the payor or broker will not be liable under section 7431.

(d) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). A, an individual, attempts to open a savings account at Bank M on January 1, 1988. A fails to certify that he is not subject to backup withholding due to notified payee underreporting under section 3406(a)(1)(D) and §31.3406(d)-2. M refuses to open an account for A. A has a cause of action against M under section 7431 for an unauthorized use of information obtained under section 3406.

Example (2). Corporation N receives a notice from the Internal Revenue Service, pursuant to section 3406(a)(1)(B) and §31.3406(d)-5, concerning an incorrect taxpayer identification number provided by B, a shareholder of N. N imposes backup withholding on reportable dividends paid to B and imposes a surcharge of $10 to cover the cost of backup withholding on B's account. B has a cause of action against N under section 7431 for an unauthorized use of information obtained by N under section 3406.

Example (3). Credit Union O receives a notice from the Internal Revenue Service, pursuant to section 3406(a)(1)(C), that C, a depositor of O, is subject to backup withholding due to notified payee underreporting. Based on this information, O refuses to approve C's credit application. C has a cause of action against O under section 7431 for an unauthorized use of information obtained pursuant to section 3406.

Example (4). Cooperative P receives a notice from the Internal Revenue Service, pursuant to section 3406(a)(1)(C), notifying P to withhold on payments made to E due to notified payee underreporting. P, pursuant to section 3406(c)(4), then provides notice to E of withholding at the time P begins withholding. E does not have a cause of action against P under section 7431, because this notice to E is an authorized use of information obtained pursuant to section 3406.

Example (5). Corporation Q receives notice from Broker R of the requirement to withhold with respect to F, a shareholder, who failed to certify that his taxpayer identification number was correct. Q provides notice to F of such withholding (as required in §31.3406(d)-4(a)(3)). F does not have a cause of action against either Q or R for an unauthorized use of information obtained pursuant to section 3406.

§31.3406(g)-1 Exception for payments to certain payees and certain other payments.

(a) *Exempt recipients*—(1) *In general.* A payor of any reportable payment (as defined in §31.3406(b)(1)-1(a)) shall not withhold under section 3406 if the payee is—

(i) A tax exempt organization as described in §1.6049-4(c)(1)(ii)(B),

(ii) An individual retirement plan as described in §1.6049-4(c)(1)(ii)(C),

(iii) The United States as described in §1.6049-4(c)(1)(ii)(D),

(iv) A State as described in §1.6049-4(c)(1)(ii)(E),

(v) A foreign government as described in §1.6049-4(c)(1)(ii)(F), or

(vi) An international organization as described in §1.6049-4(c)(1)(ii)(G).

(2) *Payments subject to reporting under section 6041 or 6041A(a).* In determining whether a payment is not reportable under section 6041 and 6041A(a) because it is made to a payee that is not subject to reporting under section 6041 or 6041A(a), the payor shall use the procedures provided in §1.6049-4(c)(1)(ii) to determine whether an information return is required.

(3) *Determination of whether person is described in paragraph (a)(1) of this section.* The determination of whether a person is described in paragraph (a) of this section shall be made as provided in the applicable provision of §1.6049-4(c)(1)(ii). A payor, even if permitted to treat a person as an exempt recipient without requiring a certificate under the provisions of §1.6049-4(c)(2)(ii), may require a payee not required to file a certificate as to its exempt status to file a certificate and may treat a payee who fails to file such a certificate as a person who is not an exempt recipient. See §31.3406(h)-3 for a description of the form or a substitute

form prescribed under section 3406 for a person to claim exempt status.

(4) *Prepaid or advance premium life-insurance contracts.* A payor of a reportable payment (as defined in §31.3406(b)(1)-1(a)) may, but is not required to withhold under section 3406 on reportable payments made from January 1, 1984, to December 31, 1991, on prepaid or advance premium life-insurance contracts to a payee who is the owner for tax purposes of the prepaid or advance premium life-insurance contract. However, a payor, at its discretion, may withhold on such payments. For purposes of this exception from backup withholding, a prepaid or advance premium life-insurance contract is one entered into on or before June 30, 1984, by the payee and under which the increment in value of the prepaid or advance premium is used for the payment of premiums during the period in which the exception from backup withholding applies.

(5) *Examples.* The application of the provisions of this paragraph (a) may be illustrated by the following examples:

Example (1). Corporation M pays $1000 to Broker N for services N performs for M. M's payment to N is in the course of M's trade or business. M is required to make an information return under section 6041 or 6041A(a) because the payment is of a kind (*i.e.*, nonemployee compensation paid in the course of a payor's trade or business) and to a payee subject to reporting (*i.e.*, payments to registered securities dealers are not excepted under §1.6041-3 from information reporting under section 6041 or 6041A(a)). Thus, M is required to withhold under section 3406 if any of the two conditions for imposing backup withholding exists with respect to N as described in §31.3406(b)(3)-1. N is also not an exempt recipient from backup withholding because N is not described in paragraph (a)(1) of this section.

Example (2). Assume the same facts as in *Example (1)* except that M pays the nonemployee compensation to P Co. While a payment to a corporation is excepted from information reporting under section 6041 or 6041A(a) and §1.6041-3(c), M may not treat P Co. as exempt from information reporting without receiving a Form W-9 or substitute form from P Co. certifying that it is an exempt recipient. Because a payor may not treat a payee with "Co." in its name as an exempt recipient under §1.6049-4(c)(1)(ii) without receiving a Form W-9 or substitute form from the payee, M, as payor of payments subject to reporting under section 6041 or 6041A(a), may not treat a payee with "Co." in its name as exempt from backup withholding without receiving a Form W-9 certifying as to its exempt status (as provided in paragraph (a)(2) of this section). If M does not receive a Form W-9 or acceptable substitute from P Co., M is required to make an information return under section 6041 or 6041A(a) and would be required to withhold under section 3406 if any condition for imposing backup withholding exists with respect to P (as described in §31.3406(b)(3)-1) because P is not an exempt recipient described in paragraph (a) (1) of this section.

Example (3). Assume the facts as in *Example (2)* except that P's name is P Corp. M may treat P as an exempt recipient under section 6041 or 6041A(a) and §1.6041-3(c) because P can be treated as a person described in §1.6049-4(c)(1)(ii) without filing a certificate as to its exempt status. Since the payment to P Corp. is not subject to information reporting under section 6041 or 6041A(a), M is not required to withhold under section 3406 even though P is not described in paragraph (a)(1) of this section.

Example (4). Assume the same facts as in *Example (3)* except that P Corp. is a corporation engaged in providing medical and health care services or engaged in the billing and collection of payments in respect of medical and health care services (other than certain tax-exempt or governmental facilities described in §1.6041-3(c)(1) and (2)). Notwithstanding paragraph (a)(2) of this section, M is required to make an information return under section 6041 because payments to such corporations are not excepted from information reporting under section 6041 or 6041A(a). Moreover, M would be required to backup withhold on the payments to P if P failed to provide its taxpayer identification number because P is not described in paragraph (a)(1) of this section.

Example (5). Corporation Q becomes a member of Barter Exchange R in 1984. Q provides goods for another member of R and receives a credit on the books of R for such goods. During 1984 members of R engage in more than 100 similar barter transactions. Consequently, R is required to make an information return with respect to the transaction engaged in by Q. Q fails to furnish its taxpayer identification number to R, under penalties of perjury, as required in §31.3406(d)-1. Q is not exempt from information reporting under section 6045 as provided in §1.6045-1(e). Q is also not exempt from backup withholding under section 3406 because Q is not described in paragraph (a)(1) of this section.

(b) *Middleman.* The transfer by a middleman (as defined by §1.6049-4(f)(4)(i)) from within the United States of an interest coupon or discount obligation on behalf of a payee for presentation, payment, or collection outside the United States, although subject to information reporting under §1.6049-4(b)(3)(ii), shall not be subject to backup withholding under section 3406. Thus, the middleman is not required to withhold under section 3406 with respect to the transfer.

(c) *International organizations.* An international organization as described in §1.6049-4(c)(1)(ii)(G) (or a paying, transfer or other agent that is not also a payee's agent) is not required to withhold under section 3406 on interest or principal paid with respect to an obligation issued by the international organization, provided the international organization is an organization of which the United States is a member and which enjoys immunity or exemption from any liability or obligation to pay, withhold, or collect tax pursuant to an international agreement having full force and effect in the United States.

(d) *United States deposits and accounts of foreign payees.* A payor of a reportable payment (as defined in §31.3406(b)(1)-1(a)) is not required to withhold under section 3406 on amounts described in §1.6049-5(e)(2).

(e) *Certain reportable payments made outside the United States by foreign persons, foreign offices of United States banks and brokers, and others.* A payor of a reportable payment (as defined in §31.3406(b)(1)-1(a)) is not required to withhold under section 3406 if the reportable payment is made outside of the United States, the payor does not have actual knowledge that the payee is a United States person, and the payment is of—

(1) Interest described in §1.6049-5(e)(1) (regarding interest payments made or collected by a person in the commercial banking business with respect to an account or deposit maintained at an office of such person outside the United States);

(2) Dividends that would be described in §1.6042-3(b)(2) (regarding dividends from sources outside the United States that are distributed or paid outside the United States) but for the fact that they are actually owned by a United States person;

(3) Amounts that would be described in §1.6045-1(g)(1)(i)(B) (regarding sales effected by a broker at an office of the broker outside the United States) but for the fact that the customer is a United States person; or

(4) Interest described in §1.6049-5(f)(1) (regarding payments outside the United States by a middleman that, as an agent of the payee, collects the amount for or on behalf of the payee).

§31.3406(g)-2 Exception for reportable payments for which withholding is otherwise required.

(a) *In general.* A payor of a reportable payment (as defined in §31.3406(b)(1)-1(a)) shall not withhold under section 3406 if tax is

actually withheld from the payment under any other provision of the Code.

(b) *Payment of wages.* A payor who is required to make an information return under section 6041 with respect to a payment of wages (as defined in section 3401) because the employee makes a certification under section 3402(n) (relating to employees incurring no income tax liability) shall not withhold 20 percent of the wages under section 3406.

(c) *Distribution from a pension, annuity, or other plan of deferred compensation*—(1) *In general.* For payments prior to December 31, 1984, a payor who is required to make an information return under section 6041 with respect to a distribution from or under a pension, annuity, or other deferred compensation arrangement shall not withhold 20 percent of the distribution under section 3406 if tax is actually withheld from the distribution under section 3405 because the payee did not make an election under section 3405(a)(2) (relating to an election with respect to periodic distributions) or under section 3405(b)(3) (relating to an election with respect to nonperiodic distributions). Additionally, if tax is not actually withheld from the distribution under section 3405 because the payee made an applicable election or because the amount of the distribution is less than the minimum amount subject to withholding under section 3405 and if the payee does not provide a taxpayer identification number to the payor, then, except as provided in paragraph (c)(2) of this section, backup withholding shall apply to the distribution if any of the two conditions for imposing backup withholding exist (as described in §31.3406(b)(3)-1).

(2) *Special rule.* If the annual distributions subject to reporting under section 6041 to a payee total $5,400 or less (in which case withholding on periodic payments under section 3405 generally is not required), and if the payor has no taxpayer identification number for the payee, the payor shall not impose backup withholding until the first payment made after June 30, 1984. If the payee does not provide a taxpayer identification number by that date backup withholding applies as described in §31.3406(b)(3)-1 to distributions made after June 30, 1984.

(3) *Distributions not subject to backup withholding.* Backup withholding applies only to distributions from a pension, annuity, or other plans of deferred compensation that are subject to reporting under section 6041 and does not apply to distributions that are not reportable under section 6041. Thus, backup withholding does not apply to—

(i) Distributions from an individual retirement account (subject to reporting under sections 408(i) and 6047(d)),

(ii) Distributions from an owner-employee plan (subject to reporting under section 6047(b)),

(iii) Certain surrenders of life insurance contracts (subject to reporting under section 6047(e)), and

(iv) Distributions from a qualified bond purchase plan (subject to reporting under section 6047(c)).

(4) *Examples.* The application of the provisions of this paragraph (c) may be illustrated by the following examples:

Example (1). Corporation X maintains a qualified retirement plan for its employees and their beneficiaries. Distributions to retirees and beneficiaries are made by an employees' trust described in section 401(a) that is exempt under section 501(a). Individual A is an employee of Corporation X who has accrued substantial pension benefits. In June 1983, A dies and her beneficiary, Individual B, elects to receive the pension benefits from the retirement plan accrued on behalf of A in the form of an annuity, beginning January 1, 1984. The payments to B that are includible in B's gross income will aggregate approximately $10,000 per calendar year. In accordance with the requirements of section 3405 (relating to withholding from pensions, annuities, and other deferred income), X provided a notice to B of the right to elect out of withholding under section 3405. B returned the election form indicating that he did not want income tax withheld from his distributions, but B did not furnish his taxpayer identification number to X. Consequently, X is required to withhold 20 percent from all reportable payments made to B after December 31, 1983, under section 3406 until B furnishes a taxpayer identification number to X.

Example (2). Assume the same facts as in *Example (1)* except that the payments to B from the retirement plan that are includible in B's gross income will aggregate only $5000 per calendar year. In addition, assume that B did not return the form to elect out of withholding under section 3405. Under section 3405(a)(4), if no exemption certificate electing out of withholding is filed, the amount withheld is determined by treating the payee as a married individual claiming three withholding exemptions. Therefore, for 1984, the payments to B are not subject to withholding under section 3405 since the payments aggregate less than $5400 per year. Because B has not furnished X a taxpayer identification number, however, X must withhold 20 percent of the payments made after June 30, 1984, under section 3406 until B furnishes a taxpayer identification number to X. If B provides his taxpayer identification number to X before July 1, 1984, however, no withholding under section 3406 is required (as described in paragraph (c)(2) of this section).

Example (3). Bank Y sponsors an individual retirement account (as defined under section 408(a)) on behalf of Individual C. C has attained the age of 59 1/2 and requests scheduled payments from his IRA of $500 per month (or $6000 per year) beginning on January 1, 1984. Y reports such distributions under section 408(i) and section 6047(d). Because these distributions are not reportable under section 6041, Y is not required to withhold 20 percent of each payment under section 3406, even if C elects out of withholding under section 3405 and does not furnish a taxpayer identification number to Y.

(d) *Payment with respect to an oil or gas interest.* A payor who is required to make an information return under section 6041 with respect to a calendar year ending before January 1, 1987, or under section 6050N with respect to a calendar year ending after December 31, 1986, with respect to an oil or gas payment (including payments for working interests, delayed rental, or lease bonuses) shall not withhold 20 percent of such payment under section 3406 if the payor actually withholds windfall profit tax under section 4986. If windfall profit tax is not actually withheld from the payment (because, for example, payment is made with respect to "exempt royalty oil" (as defined in section 4994(f)), the payment is subject to backup withholding if any of the two conditions for imposing backup withholding exists (as described in §31.3406(b)(3)-1). The amount subject to backup withholding under section 3406 is the net amount the payee receives (*i.e.*, the gross proceeds less production related taxes such as State severance tax). If the payor customarily makes an aggregate payment with respect to both an oil and gas payment to a payee, and windfall profit tax is actually withheld only upon the portion representing the oil interest, the aggregate payment is *not* subject to backup withholding. The payor shall not be liable to any person other than the United States for the amount of tax withheld as described in §31.3406(h)-2(h).

(e) *Gambling winnings*—(1) *In general.* A payor of a reportable gambling winning shall not withhold 20

percent of the gambling winning under section 3406 if tax is actually withheld from the gambling winning under section 3402(q) (relating to the extension of withholding to certain gambling winnings). See paragraph (e)(2) of this section for the determination of a reportable gambling winning. If the reportable gambling winning is not withheld upon under section 3402(q), backup withholding shall apply to the gambling winning if, and only if, the payee does not furnish a taxpayer identification number to the payor. Section 31.3406(b)(3)-1(b)(2) does not apply to a reportable gambling winning. Thus, the payor of a reportable gambling winning is not required to aggregate all such winnings made to a payee during a calendar year, nor is the payor required to determine whether an information return was required to be made with respect to such payee for the preceding calendar year.

(2) *Definition of a reportable gambling winning and determination of amount subject to backup withholding.* For purposes of backup withholding, a reportable gambling winning is any gambling winning subject to information reporting under section 6041. The amount of a reportable gambling winning is—

(i) The amount paid with respect to the amount of the wager reduced, at the option of the payor, by

(ii) The amount of the wager.

Amounts paid with respect to identical wagers are treated as paid with respect to a single wager for purposes of calculating the amount paid with respect to the wager. The determination of whether wagers are identical shall be made under §31.3402(q)-1(c)(1)(ii). In addition, until further regulations are issued under section 6041 or section 3406, a gambling winning (other than a winning from bingo, keno, or slot machines) is a reportable gambling winning only if the amount paid with respect to the wager is in excess of $600 and is based on betting odds of 300 to 1, or higher. See §7.6041-1 to determine whether a winning from bingo, keno, or slot machines is a reportable gambling winning and thus subject to backup withholding.

(f) *Certain real estate transactions.* A real estate reporting person (the so-called "broker") as defined in section 6045(e)(2) shall not withhold under section 3406 on a payment made with respect to a real estate transaction that is subject to reporting under section 6045(a) and (e) and §1.6045.

(g) *Limited exception for certain payments after a merger or an acquisition of accounts.* A payor who acquires accounts or instruments of another payor by acquisition or merger and who is unable to determine from the business records of the merged payor or of the payor whose accounts or instruments were acquired whether any or all of such accounts or instruments are pre-1984 or post-1983 accounts or instruments may treat such accounts as pre-1984 accounts or instruments and may commence backup withholding under section 3406(a)(1)-(A) and §31.3406(d)-1 on any such accounts or instruments for which the payor does not have a taxpayer identification number from the payee or has an obviously incorrect taxpayer identification number as defined in §31.3406(h)-1(a)(2) no later than sixty days following the date of the merger or acquisition of such accounts or instruments.

(h) *Certain gross proceeds.* No backup withholding is required with respect to any portion of the original issue discount on an instrument or security that is subject to backup withholding as reportable gross proceeds of such instrument or security under section 6045.

§31.3406(g)-3 Exemption while payee is waiting for a taxpayer identification number.

(a) *In general*—(1) *Withholding not required for 60 days.* Except as provided in paragraphs (b) and (c) of this section, a payor shall not withhold for 60 days if the payee is awaiting receipt of a taxpayer identification number unless the payee (or a joint payee in the case of a joint account) makes a withdrawal from an account described in paragraph (a)(2) of this section during the 60-day period. In order to qualify for the exemption, the payee must comply with paragraph (d) of this section which requires the payee to provide the payor a certification signed under penalties of perjury (an "awaiting-TIN certificate"). The payor must withhold under section 3406 from 60 days after the date that the payor receives an "awaiting-TIN certificate" described in paragraph (d) of this section if the payor has not received a taxpayer identification number from the payee in the manner required in §31.3406(d)-1 by that date. Regardless of whether the payee provides an awaiting-TIN certificate to a payor, the payor is required to withhold on reportable interest or dividend payments as described in §31.3406(d)-2 if the payee fails to certify, under penalties of perjury, that the payee is not subject to backup withholding due to notified payee underreporting as required in §31.3406(d)-2.

(2) *Withholding during 60-day period on accounts paying reportable interest or dividends*—(i) *Effective for awaiting-TIN certificates received after December 31, 1987, and before July 1, 1988.* A payor is required to withhold on reportable interest and dividend payments made during the 60-day period after the receipt of an awaiting-TIN certificate (which receipt occurs after December 31, 1987, and before July 1, 1988) if the payee made a withdrawal from the account after the close of 7 business days after the date the awaiting-TIN certificate is received and before the earlier of—

(A) The date that the payor receives a certified Form W-9 from the payee or an acceptable substitute form,

(B) The date the account is closed, or

(C) After the expiration of the 60-day exemption period when backup withholding applies.

For purposes of this paragraph (a)(2), a payor is also required to backup withhold on any reportable interest or dividend payment made at the time the account or relationship is closed or at a time of the sale or redemption of an instrument. For purposes of this paragraph (a)(2), all cash withdrawals, in an amount up to the reportable payments, made from the day after the date of receipt of an awaiting-TIN certificate to the date of withdrawal are treated as reportable payments.

(ii) *Effective for awaiting-TIN certificates received on or after July 1, 1988.* On a payee-by-payee basis or in general, a payor may withhold on reportable interest or dividends—

(A) As described in paragraph (a)(2)(i) of this section, or

(B) As described in such paragraph but limiting the definition of cash to currency or a check issued to close out the account of a payee (For purposes of this paragraph (a)(2)(ii)-(B) the term does not include a cash disbursement from an automatic teller machine or an electronic transfer.), or

(C) On the account no later than 7 business days after the date that the payor receives the awaiting-TIN-certification on reportable interest and dividend payments thereafter made to the account whether or not the payee makes a cash withdrawal and before the earliest of—

(*1*) The date that the payor receives a certified Form W-9 from the payee or an acceptable substitute form,

(*2*) The date the account is closed, or

(*3*) After the expiration of the 60-day exemption period when backup withholding applies.

Effective August 16, 1988, a payor who has elected to withhold under paragraph (a)(2)(ii)(C) of this section must refund the amounts withheld during the 60-day period in accordance with and to the extent permitted by the procedures described in §31.6413(a)-3 if the payor receives the certified taxpayer identification number from the payee on or after August 16, 1988, and within the 60-day period provided that the payee is not subject to backup withholding under section 3406(a)(1)(C) or (D) during any part of such period. For purposes of the preceding sentence, amounts withheld are deemed to be withheld erroneously as described in §31.6413(a)-3. If a certified taxpayer identification number is not received by the payor within the 60-day period, the amounts withheld shall not be refunded unless the amounts are erroneously withheld without regard to paragraph (a)(2)(ii)(C) of this section. The payor is also required to backup withhold after the 60-day period until a certified taxpayer identification number is received from the payee or the account is closed.

(b) *Special rule for readily tradable instruments.* The 60-day awaiting-TIN exemption described in paragraph (a)(1) of this section applies to payments made with respect to readily tradable instruments only if the payee provides an awaiting-TIN certificate directly to the payor. Thus, the payee does not qualify for the exemption by providing an awaiting-TIN certificate to a broker who effects a purchase of a readily tradable instrument for a payee (unless the instrument is held in street name). If a broker acquires a readily tradable instrument through a post-1983 brokerage account (as described in §31.3406(d)-1(c)(2)) for a payee who has no taxpayer identification number, the broker must advise the payor as required in §31.3406(d)-4(a)(1) that the payee failed to provide a taxpayer identification number under penalties of perjury, regardless of whether the payee provides an awaiting-TIN certificate to the broker. Once a payor is notified by a broker that a payee failed to provide a taxpayer identification number in the required manner, or that the payee is subject to backup withholding under section 3406(a)(1)(B) or (C), the payor must impose backup withholding for the appropriate period described in §31.3406(e)-1.

(c) *Exceptions*—(1) *In general.* The 60-day awaiting-TIN exemption described in paragraph (a) of this section does not apply to—

(i) Window transactions (as defined in §31.3406(b)(2)-3(b)),

(ii) Redemptions of bearer obligations that are subject to reporting under section 6045 after September 27, 1990), or

(iii) Other amounts that are subject to reporting under section 6045 (except as described in paragraph (c)(2) of this section).

(2) *Special rule for amounts subject to reporting under section 6045 other than proceeds of redemptions of bearer obligations.* In any case in which a broker's customer does not provide a taxpayer identification number to the broker and the broker effects a sale that is subject to reporting under section 6045 (other than a redemption of a bearer obligation), §31.3406(d)-3(b)(1) shall apply, whether or not the sale is pursuant to a telephone or wire instruction, if the customer provides an awaiting-TIN certificate to the broker before the sale, except that the 30-day period provided in §31.3406(d)-3(b)(1) shall be a 60-day period.

(d) *Awaiting-TIN certificate.* A payee qualifies for the 60-day awaiting-TIN exemption provided in paragraph (a) of this section if the payee furnishes a written statement to the payor, signed under penalties of perjury, that the payee has not been issued a taxpayer identification number, that the payee has applied for a taxpayer identification number or intends to apply for a number in the near future, and that the payee understands that if the payee does not provide a number to the payor within 60 days, the payor is required to withhold 20 percent of any reportable payment thereafter made to the payee until the payor receives a number, or 20 percent of any withdrawal to the extent of reportable payments made to the payee during the 60-day period, as described in paragraph (a)(2) of this section. Language that is substantially similar to the following will satisfy the requirements of this paragraph: "I certify, under penalties of perjury, that a taxpayer identification number has not been issued to me, and that I mailed or delivered an application to receive a taxpayer identification number to the appropriate Internal Revenue Service Center or Social Security Administration Office (or I intend to mail or deliver an application in the near future). I understand that if I do not provide a taxpayer identification number to the payor within 60 days, the payor is required to withhold 20 percent of all reportable payments thereafter made to me or 20 percent of any withdrawal to the extent of reportable payments made to me during the 60 day period, until I provide a number."

(e) Form for awaiting-TIN certificate. A payor may use Form W-9 for the awaiting-TIN certificate, or a payor may include the language described in paragraph (d) of this section on any other document for the awaiting-TIN certification. See §31.3406(h)-3 which provides that Form W-9 is the prescribed form but permits use of substitute forms, and specifies how long the payor is required to retain the form. If Form W-9 is used, the payee should write "Applied For" in the space reserved for the taxpayer identification number.

(f) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). Individual A opens a new account at Bank M on January 7, 1984, that pays reportable interest. A furnishes an awaiting-TIN certificate to M on January 7 (the date that he opened the account) and A also certifies, under penalties of perjury, that

he is not subject to backup withholding due to notified payee underreporting as required in §31.3406(d)-2(a). M treats the awaiting-TIN certificate as though received on such date as permitted in §31.3406(e)-1(b). If M does not receive a taxpayer identification number from A within 60 days (March 7), M is required to withhold on payments made to A on or after such date until M receives a taxpayer identification number from A in the manner required in §31.3406(d)-1.

Example (2). Assume the same facts as in *Example (1)* except that A does not certify, under penalties of perjury, that he is not subject to backup withholding due to notified payee underreporting as required in §31.3406(d)-2(a). Notwithstanding that A provided an awaiting-TIN certificate to M, M is required to withhold because A failed to make the payee certification required in §31.3406(d)-2(a).

Example (3). Individual B establishes a brokerage relationship with Broker O that is not a post-1983 brokerage account (as described in §31.3406(d)-1(c)(1)). B has never furnished his social security number to O. No reportable payments have been made with respect to any instruments in B's brokerage account until August 13, 1984, when B instructs O to sell stock of Z Corporation for $30,000. On that date B states that he is awaiting receipt of a social security number. Under paragraph (c)(2) of this section, B will be exempt from backup withholding for a 60-day period provided O receives an awaiting-TIN certificate from B (as described in paragraph (d) of this section). O receives B's awaiting-TIN certificate on August 13, 1984, as permitted in §31.3406(e)-1(b). If B desires to withdraw or reinvest more than 80 percent of the proceeds of the sale (i.e., $24,000) during the 60 days after the sale and before B certifies under penalties of perjury that his social security number furnished to O is correct, O is required to withhold 20 percent of the reportable gross proceeds on the date of withdrawal. (See §31.3406(d)-3(b) for whether reinvestment will be considered a withdrawal.)

Example (4). Assume the same facts as in *Example (3)* except that, on October 12, 1984, B instructs O to send him a check for $10,000. Under paragraph (c)(2) of this section, B is exempt from withholding from August 13 to October 13 (60 days) provided B does not withdraw or reinvest more than 80 percent of the gross sale proceeds. Because B has not withdrawn more than 80 percent of the gross proceeds, O may not withhold on October 12 when B withdraws $10,000 (as provided in paragraph (a) of this section).

Example (5). Assume the same facts as in *Example (4)* except that, on September 12, 1984, B instructs O to reinvest all the gross proceeds of the sale in stock of R Corporation. Under §31.3406(d)-3(b) the reinvestment is considered a withdrawal. Because B has not furnished his social security number certified under penalties of perjury before withdrawing more than 80 percent of the gross proceeds, O is required to withhold $6,000 (*i.e.*, 20 percent of $30,000) on October 12 (the date of withdrawal) even though within the 60-day exemption period described in paragraph (a) of this section.

Example (6). Individual C presents a taxable interest coupon on a corporate bond to Bank P after December 31, 1983. The payment is defined as a window transaction in §31.3406(b)(2)-3(b). C furnishes an awaiting-TIN certificate to P at the time of the transaction. Under paragraph (c) of this section, the 60-day awaiting-TIN exemption does not apply with respect to the window transaction. Thus, P is required to withhold 20 percent of the payment made to C.

Example (7). Partnership D instructs Broker N to purchase Corporation Y's debentures on April 15 and instructs N to have them registered in D's name. Stated interest on the debentures will be paid on June 30 and December 31. D provides N on April 15 an awaiting-TIN certificate and certification that it is not subject to backup withholding due to notified payee underreporting. Under §31.3406(d)-4(a) and paragraph (b) of this section, N is required to notify Y that D failed to furnish a taxpayer identification number. If Y does not receive either a taxpayer identification number in the manner required by §31.3406(d)-1 or an awaiting-TIN certificate directly from D by June 30, Y is required to withhold 20 percent of the payment made on June 30.

Example (8). Assume the same facts as in *Example (7)* except that Y receives an awaiting-TIN certificate directly from D on May 1. Y must not withhold on June 30 because reportable payments made to D with respect to the instrument are exempt from backup withholding during the period from May 1 to June 30 (60 days). If Y does not receive a taxpayer identification number in the manner required by §31.3406(d)-1 from D after June 30 and before December 31, however, Y is required to withhold 20 percent of the payment made on December 31.

§31.3406(h)-1 Definitions.

(a) *Taxpayer identification number*—(1) *In general.* The term "taxpayer identification number" shall mean the identifying number assigned to a person under section 6109 (relating to identifying numbers). Thus, the number for an individual is generally his social security number and the number for a corporation, estate, trust, or partnership is generally an employer identification number. The proper number of digits is nine for both the social security number and the employer identification number. An obviously incorrect number shall not be considered to be a taxpayer identification number. Thus, a payor shall treat the payee as having failed to furnish a taxpayer identification number if the payee furnishes an obviously incorrect number. See §§31.6011(b)-2 and 301.6109-1 for provisions relating to obtaining a taxpayer identification number.

(2) *Obviously incorrect number.* The term "obviously incorrect number" means a number that does not contain nine digits or a number that includes an alpha character as one of the nine digits.

(b) *Examples.* The application of the provisions of paragraph (a) of this section may be illustrated by the following examples:

Example (1). Individual A provides Bank O with a social security number as 605-62-599. The number provided by A, because it does not contain nine digits, is an obviously incorrect number. Consequently, A is treated as not furnishing a taxpayer identification number.

Example (2). Individual B provides Bank P with a social security number as 605-6W-6599. The number provided by B, because it contains an alpha character, is an obviously incorrect number. Consequently, B is treated as not furnishing a taxpayer identification number.

Example (3). Partnership X provides its employer identification number as 12-2764. The number provided by X, because it does not contain nine digits, is an obviously incorrect number. Consequently, X is treated as not furnishing its taxpayer identification number.

Example (4). Individual C provides Bank Q with a social security number as lll-ll-llll. The number provided by C, because it contains nine digits, is not an obviously incorrect number. Consequently, C is treated as furnishing a taxpayer identification number.

Example (5). Company Y provides Bank P with a employer identification number as 12-3456789. The number provided by Y, because it contains nine digits, is not an obviously incorrect number. Consequently, Y is treated as furnishing its taxpayer identification number.

(c) *Broker.* The term "broker" shall have the meaning given to such term by section 6045(c)(1) and §1.6045-1(a)(1). If there could be more than one broker with respect to any acquisition, only the broker having the closest contact with the payee shall be treated as a broker. The rules of §5f.6045-1(c)(3)(ii) and (iii) shall apply to determine the broker with the closest contact with the payee. In the case of any instrument, the term "broker" shall not include any person who is the payor with respect to such instrument as described in §31.3406(a)-2.

(d) *Readily tradable instrument.* The term "readily tradable instrument" means—

(1) Any instrument which is part of an issue any portion of which is traded on an established securities market (within the meaning of section 453(f)(5)), or

(2) Any instrument which is regularly quoted by brokers or dealers making a market.

Thus, the term may include, but is not limited to, bonds, debentures, notes, certificates, and other evidences of indebtedness regardless of how denominated, repurchase agreements, stocks, shares in a mutual fund, United States government securities, State and local government obligations, and deposits with persons carrying on

the banking business and persons that are mutual savings banks, cooperative banks, building and loan associations, homestead associations, credit unions, or similar organizations.

§31.3406(h)-2 Special rules.

(a) *Special rule for joint payees—*(1) *In general.* Except as provided in paragraph (a)(2) of this section, for purposes of information reporting and backup withholding, any payment made to joint payees shall be treated as if the entire payment were made to the first person listed on the account or instrument giving rise to the payment. Therefore, except as provided in paragraph (a)(2) of this section, for purposes of information reporting and backup withholding, the taxpayer identification number that is required to be furnished is the number for the first person listed on the account or instrument. However, if the payor knows that the first person listed on the account is not the owner of the account for tax purposes and the payor does not treat such payee as the owner of the account, then the taxpayer identification number required to be provided is that of the owner (identified by the payor) listed on the account even though such owner is not listed first on that account. The requirement to provide the taxpayer identification number of the actual owner (as described in the immediately preceding sentence) is effective for accounts for which backup withholding under this section would begin [DATE THAT IS 60 DAYS AFTER THIS DOCUMENT IS PUBLISHED AS A TREASURY DECISION].

Payors are required to withhold on joint accounts if the payee subject to backup withholding is the first person listed on the account at the time the payor determines that the payee is required to provide a taxpayer identification number on the certificates described in §31.3406(d)-2 to the payor and in the case where the payor is notified under section 3406(a)(1)(B) or (C), if the payee is the first person on the account at the time of such notification. Thus, for example, if the first person listed on the account or instrument does not provide a taxpayer identification number to the payor in the manner required in §31.3406(d)-1, the payor shall withhold 20 percent of the payment under section 3406. A payor is required to withhold even if the order of the names on the account is subsequently changed, provided the name of the payee subject to backup withholding remains on the account.

(2) *Special rule with respect to joint foreign payees.* If the first payee listed on an account or instrument provides the penalties of perjury statement as to its foreign status (as described in §1.6049-5(g) with respect to interest and original issue discount and §1.6045-1(g)(3)(i) with respect to brokers), backup withholding shall apply unless—

(i) Every joint payee provides the statement as to foreign status, or

(ii) Any one of the joint payees who has not established foreign status provides a taxpayer identification number to the payor in the manner required in §31.3406(d)-1.

If any one of the joint payees who has not established foreign status provides a taxpayer identification number under paragraph (a)(2)(ii), such number is the taxpayer identification number that is required to be furnished for purposes of information reporting and backup withholding.

(3) *Examples.* The application of the provisions of paragraph (a) of this section may be illustrated by the following examples:

Example (1). G and H, United States citizens, jointly own an instrument of Corporation X. G is the first person listed on the account giving rise to the payment and does not provide a taxpayer identification number to X. X is required to withhold 20 percent of any reportable payment with respect to such instrument even if H provided a taxpayer identification number in the manner required in §31.3406(d)-1 to X.

Example (2). Assume the same facts as in *Example (1)* except that G is a foreign person and provides a written certification to that effect on Form W-8. In order for backup withholding not to apply to the jointly held instrument, X must receive H's taxpayer identification number or awaiting-TIN certification.

(b) *Withholding from an alternative source*—(1) *In general.* Except with respect to a payment in property (as described in paragraph (b)(2) of this section) or a barter exchange (as described in paragraph (b)(3) of this section), a payor may not withhold from a source maintained by the payor other than the source with respect to which there exists a liability to withhold with respect to the payee. See section 3403 and §31.3403-1 that provides that the payor is liable for the amount required to be withheld regardless of whether the payor withholds.

(2) *Payments made in property.* (i) In the case of a payment that is made in property (other than money), the payor is required under section 3406 to withhold 20 percent of the fair market value of the property determined immediately before or on the date of payment. The payor may withhold from the principal amount being deposited with the payor, or the payor may withhold from another source maintained by the payee with the payor. The source from which the tax is withheld must be payable to at least one of the persons listed on the account subject to backup withholding. If the account or source is not payable to, and only to, the same person or persons listed on the account subject to backup withholding, then the payor must obtain a written statement from all other persons to whom the account or source is payable authorizing the payor to withhold from the alternative account or source. A payor that elects to withhold from an alternative source may determine the account or source from which the tax is to be withheld, or, in its discretion, the payor may allow the payee to designate the alternative source. However, a payee may not require a payor to withhold from a specific alternative source.

(ii) If the payor cannot locate, using reasonable care, an alternative source of cash out of which the payor may satisfy its withholding obligation pursuant to paragraph (b)(2)(i) of this section, the payor may elect to defer its obligation to withhold until the payor makes a cash payment to the account subject to backup withholding or cash is otherwise deposited in the account. For purposes of this paragraph (b)(2)(ii), a payor is considered to exercise reasonable care in locating an alternative source of cash if the payor follows procedures substantially similar to those set forth in §31.3406(d)-5(b)(5)(i)(A) and (B). This paragraph (b)(2)(ii) does not apply to reportable payments of property made in connection with prizes, awards, or gambling winnings.

(3) *Barter exchanges.* In the case of a barter exchange that issues scrip to, or credits the account of, a member or client of the exchange in payment for property or services, the barter

exchange may withhold from the credit or scrip, or, alternatively, the barter exchange may withhold from any other source maintained by the exchange for the member or client. If the barter exchange elects to withhold from the credit or scrip, such credit or scrip must be converted to cash in order to satisfy the deposit requirements of section 6302 and §31.6302(c)-1(a)(1). In the case of a barter exchange that does not provide for payment for property or services by means of a credit on the books of the barter exchange or scrip issued by the barter exchange, the barter exchange may withhold from an alternative source in the manner described in paragraph (b)(1) of this section.

(4) *Examples.* The application of the provisions of paragraph (b) of this section may be illustrated by the following examples:

Example (1). Individuals A and B maintain a joint checking account at Bank M. A also maintains a savings account at M. Payments to A are subject to backup withholding under section 3406. On December 31, 1984, M credits A's savings account with a $50 interest payment. Because the payment giving rise to the liability to withhold was not made in property, M may not withhold the tax imposed by section 3406 on the amount credited to A's savings account from A's and B's joint checking account. M is liable under section 3403 and §31.3403-1 for the tax required to be withheld from the savings account under section 3406 regardless of whether M withholds from accounts maintained by A.

Example (2). Individual C opens an interest-bearing savings account in 1984 at Bank N with respect to which C will receive property in lieu of interest. C has a joint checking account at N with Individual D. C and D are not foreign persons. C is the first person listed on the checking account. When C opens the interest-bearing savings account and receives the property, C fails to certify that his taxpayer identification number is correct or that he is not subject to backup withholding due to notified payee underreporting. N is required to withhold under section 3406 at the time the reportable payment is made to C (*i.e.*, the time that N pays C the "interest" as described in §31.3406(a)-2(a)). N may elect to withhold the tax from the principal C has deposited with N in the interest-bearing savings account, or N may elect to withhold the tax imposed by section 3406 from C's and D's joint checking account, provided that N obtains a written statement from D permitting N to withhold the tax from C's and D's joint checking account. N is liable under section 3403 and §31.3403-1 for the tax required to be withheld under section 3406 regardless of whether N withholds.

Example (3). Broker O provides a payment of property as a dividend to Individual D whose stock has been borrowed in connection with a short sale. D does not provide O with a social security number. O may elect to withhold the tax imposed by section 3406 by creating a liability on the margin account that D maintains with O, or O may withhold from any alternative source D maintains with O. O is liable under section 3403 and §31.3403-1 for the tax required to be withheld under section 3406 regardless of whether O withholds.

Example (4). Corporation E, a member of Barter Exchange P, provides goods for another member of P and receives a credit on the books of P for such goods. During the same calendar year, members of P engage in over 100 similar barter transactions. Consequently, P is required to make an information return (Form 1099-B) with respect to the transaction engaged in by E. Corporation E fails to provide its taxpayer identification number to P. See §§1.6045-1(e) and 31.3406(g)-1(a) which provides that corporate members of barter exchanges are not exempt from backup withholding. Accordingly, P is required to withhold 20 percent of the fair market value of the credit received by E. P may elect to withhold from the credit or from any alternative source maintained by P for E. If P elects to withhold on the credit, the credit must be converted to cash. P is liable under section 3403 and §31.3403-1 for the tax required to be withheld under section 3406 regardless of whether P withholds.

Example (5). Individual F, an independent travel agent, receives an airline ticket as an award for performing nonemployee services for Company X. F is not an employee of X as defined in section 3121(d). X is required to make an information return under section 6041 showing the fair market value of the airline ticket under §1.6041-1(d)(3) and (e). F does not furnish a social security number to X. Because the reportable payment is made in property, X may elect to withhold from an alternative source with F under paragraph (b)(1) of this section. X is liable under section 3403 and §31.3403-1 for the tax required to be withheld under section 3406 regardless of whether X withholds. If F does not maintain another account with X, X may withhold by reducing the amount of the award by the 20 percent tax required to be withheld.

(c) *Special rules for trusts*—(1) *In general.* Backup withholding shall apply to a payment to a trust if any of the conditions for imposing backup withholding apply to the trust. Generally, a trust is not a payor. Therefore, except as provided in paragraph (3) of this section, a trust will not be required to withhold on reportable payments that the trust makes to a beneficiary who is subject to backup withholding. In addition, the trustee of a trust may certify that the trust's taxpayer identification number is correct and that the trust is not subject to backup withholding due to notified payee underreporting, without regard to the status of the individual beneficiaries of the trust.

(2) *Grantor trusts with ten or fewer grantors.* Backup withholding will apply to a reportable payment to a grantor trust with ten or fewer grantors that was established on or after January 1, 1984, if one of the conditions for imposing backup withholding exists with respect to the trust. The trustee of a grantor trust with ten or fewer grantors may not certify either that the trust is not subject to backup withholding due to notified payee underreporting or that the trust's taxpayer identification number provided by the trustee is correct unless each grantor has furnished the trustee with certifications, signed under penalties of perjury, that the grantor is not subject to backup withholding due to notified payee underreporting and that the grantor's taxpayer identification number provided to the trustee is correct, and the trustee uses such taxpayer identification numbers provided by the grantors on the Form 1041 that is filed by the trustee pursuant to section 671. A trustee of a grantor trust with ten or fewer grantors is not considered a payor as provided in §31.3406(a)-2(a). Therefore, distributions by the trust of amounts to beneficiaries will not be considered payments of reportable amounts subject to backup withholding.

(3) *Grantor trust with more than ten grantors.* Trustees of a grantor trust with more than ten grantors are considered payors of reportable payments received by such trust for purposes of backup withholding. Payments of all reportable amounts (except gross proceeds reportable under section 6045) made to such trust are considered payments of the same kind made by the trust, as payor, to each grantor, as payee, in proportion to each grantor's ownership of the trust. Each grantor of such a trust is treated as having received his or her proportionate share of the reportable payment on the day the payment is received by the trust. Accordingly, any reportable payment made to the trust is treated as a reportable payment made by the trust to the grantor or grantors and is subject to backup withholding if one of the conditions specified in paragraph (d) of this section exists with respect to a grantor. If the reportable amount of the distribution is greater than the amount distributed, the trustee may, in its discretion, withhold on the entire reportable amount.

(d) *Conditions for a trustee of a grantor trust with ten or more grantors to impose backup withholding.* The trustee is required to withhold under section 3406 on the amount of

any reportable payment (except gross proceeds reportable under section 6045) received by a trust attributable to a grantor if—

(1) The grantor fails to provide a taxpayer identification number to the trustee in the manner required in §31.3406(d)-1,

(2) The grantor fails to certify to the trustee with respect to reportable interest or dividend payments (as defined in §31.3406(b)(1)-1(b)) that he is not subject to backup withholding due to notified payee underreporting when required under §31.3406(d)-2,

(3) The trustee is required to impose backup withholding under the rules applicable to readily tradable instruments which were not purchased from the issuer and are not held in "street name" by a broker, or

(4) The Internal Revenue Service notifies the trustee that the grantor provided an incorrect taxpayer identification number or that the grantor is subject to backup withholding due to notified payee underreporting.

The trustee of a grantor trust having more than ten grantors may certify that the trust's taxpayer identification number is correct and that the trust is not subject to backup withholding due to notified payee underreporting without regard to the status of, or certifications provided by, the grantors of the trust.

(e) *Examples.* The application of the provisions of paragraph (d) of this section may be illustrated by the following examples:

Example (1). Grantor Trust R has 100 grantors. R holds debentures of Corporation X that will pay stated interest. M is the trustee. A, one grantor of the trust, fails to provide the required certification to M that A's taxpayer identification number is correct and that A is not subject to backup withholding due to notified payee underreporting. Even though an individual grantor of the trust has failed to make the required certification, M certifies to X as described in paragraph (d) of this section as to R's taxpayer identification number and that R is not subject to backup withholding due to notified payee underreporting. X pays $100,000 of interest to R on July 1, 1984, and does not withhold. On September 30, 1984, M distributes $900 to each grantor (after deducting certain expenses). On September 30, 1984, M is required to withhold 20 percent of the $900 payment to A and any other grantor who is subject to backup withholding. M may withhold 20 percent of the amount reportable ($1,000).

Example (2). Assume the same facts in *Example (1)* except that R is a trust with 10 or fewer grantors. Under paragraph (c)(2) of this section, M may not certify that R's taxpayer identification number is correct or that the trust is not subject to backup withholding due to notified payee underreporting because the trustee has not received such certification from each grantor. Thus, X is required to withhold 20 percent of $100,000 payment on July 1, 1984. Because R has 10 or fewer grantors, R is not a payor under §31.3406(a)-2, and M is not required to impose backup withholding on payments to A or any other grantor.

Example (3). Grantor Trust S is an oil royalty trust with 100 grantors. N is the trustee of the trust and B, a grantor of the trust, fails to furnish B's taxpayer identification number to N. On August 1, 1987, S receives a $1,000,000 oil royalty payment from X, an oil producer, subject to reporting under section 6050N. X does not withhold on the payment because N provided a taxpayer identification number to X. N distributes $8,000 to each grantor on December 31, 1984 (after deducting certain production-related taxes and expenses). On December 31, 1987, N is required to withhold 20 percent of the $8,000 payment made to B and to any other grantor who does not provide a taxpayer identification number to N.

Example (4). Trust T has 50 beneficiaries none of whom are grantors. Trust T maintains a savings account with Bank O that pays reportable interest. T has provided its taxpayer identification number to O. On August 16, 1987, Bank O makes a reportable interest payment to T. T has no information reporting obligation with respect to the interest it distributes to its beneficiaries because T is not a payor as described in §31.3406(a)-2.

(f) *Adjustment of prior withholding by middlemen*—(1) *In general.* A middleman payor (as defined in §31.3406(a)-2(b)) who receives a payment from which tax has been erroneously withheld under section 3406 may seek a refund of the tax withheld by the payor from whom the middleman payor received the payment (referred to as the "upstream payor"). Alternatively, the middleman payor may obtain a refund of the tax by claiming a credit for the amount of tax withheld by the upstream payor against the deposit of any tax imposed by this chapter which the middleman payor is required to withhold and deposit (as described in section 6413 and §31.6413(a)-2). In either case, the middleman payor shall pay or credit the gross amount of the payment (including the tax withheld) to its payee as though it had received the gross amount of the payment from the upstream payor and shall withhold the tax imposed by section 3406 only if one of the conditions for imposing backup withholding exists with respect to its payee. If its payee is not subject to backup withholding under section 3406, the middleman payor shall pay or credit the full amount of the payment to the payee. See §31.6413(a)-3 regarding repayment by a payor of tax erroneously collected from a payee.

(2) *Example.* The application of the provisions of this paragraph (f) may be illustrated by the following example:

Example. Broker M holds stock in Corporation N in "street name" for Individual A, who is not subject to backup withholding. M does not certify to N that M is not subject to backup withholding under section 3406 as N requires in order to treat M as an exempt recipient. Accordingly, N withholds 20 percent of its dividend payment to M. Rather than seek a refund of the erroneously withheld tax from N, M elects to credit the amount of tax withheld by N against any tax that M is required to withhold and deposit under section 6413 and §31.6413(a)-2. Because A is not subject to backup withholding under section 3406, M pays the gross amount of the dividend payment to A.

(g) *Conversion of amounts paid in foreign currency into United States dollars*—(1) *Convertible foreign currency.* In the event that an amount is paid in convertible foreign currency, the amount shall be converted into United States dollars and the amount subject to withholding under section 3406 shall be computed on *that* amount expressed in United States dollars as of the date of the payment or crediting. The amount withheld shall be deposited in United States dollars. For purposes of this paragraph (g)(1), the term "convertible foreign currency" means currency of a foreign country that either is readily convertible into United States dollars or, effective from the date specified in a rule-related notice published in the Federal Register, is of a type the Secretary determines is to be treated as convertible foreign currency.

(2) *Nonconvertible foreign currency.* [Reserved]

(h) *Coordination with other sections.* For purposes of section 31, chapter 24 (other than section 3402(n)) of subtitle C of the Code (relating to employment taxes and collection of income tax at source) and so much of subtitle F (other than section 7205) of the Code (relating to procedure and administration) as relates to this chapter, and the regulations thereunder—

(1) An amount required to be withheld under section 3406 shall be treated as a tax required to be withheld under section 3402;

(2) An amount withheld under section 3406 shall be treated as an

amount withheld under section 3402. Thus, an amount withheld under section 3406 shall be allowed to the payee of a reportable payment as a credit under section 31 against the tax imposed by subtitle A of the Code;

(3) The term "wages" includes the gross amount of any reportable payment (as defined in §31.3406(b)(1)-1)) except for purposes of section 6014 (relating to election by the taxpayer not to compute the tax on his annual return);

(4) The term "employer" includes a payor who is required to withhold the tax under section 3406 (as defined in §31.3406(a)-2(a)) with respect to any reportable payment (as defined in §31.3406(b)(1)-1);

(5) The term "employee" includes a payee of any reportable payment; and

(6) The term "payroll period" includes the period described in §31.3406(e)-1 during which the payor is required to withhold the tax imposed by section 3406.

Thus, the general procedures for withholding, deposit, payment, and reporting of Federal tax withheld shall apply to reportable payments and amounts withheld under section 3406. For example, section 6205 provides that an employer (payor) who makes an undercollection of income tax required to be withheld shall correct such error for the return period in which the undercollection is discovered. Section 6205 thus requires a payor to withhold amounts from subsequent payments to a payee that should have been withheld from prior payments, whether or not the subsequent payments are subject to backup withholding under section 3406. Accordingly, a payor who does not impose backup withholding under section 3406 when required must withhold from a subsequent payment to the payee even though the conditions for imposing backup withholding may not exist at the time the subsequent payment is made to the payee. See §31.6302(c)-1 for the rules relating to the timing for depositing withheld amounts.

(i) *Penalties.* A payor is subject to the same penalties for failing to impose backup withholding under section 3406 as an employer making a payment of wages. Consequently, under section 3403 and §31.3403-1, a payor is liable for the tax required to be withheld whether or not the payor withholds the tax from a payee who is subject to backup withholding. A payor may be relieved of liability for an amount that was required to be withheld if the payor proves that the tax has been paid by the payee, as provided in section 3402(d) and §31.3402(d)-1. The fact that a payor may be relieved of the liability for an amount that was required to be withheld will not relieve the payor of liability for any civil or criminal penalty. Additionally, a payor may be subject to civil and criminal penalties, including penalties under section 6651 (addition to the tax for failure to file certain tax returns and to pay any tax), section 6721 (failure to file certain information returns), section 6656 (failure to make deposit of taxes), section 6672 (failure to collect and pay over tax), section 6676 (failure to supply identifying numbers), section 6722 (failure to furnish certain statements), 6682 (false information with respect to withholding), section 7201 (willfully attempting to evade or defeat any tax or the payment of any tax), section 7202 (willful failure to collect or pay over any tax), section 7203 (willful failure to pay tax), section 7206(2) (aid or assistance of fraud or false statement), section 7207 (fraudulent returns, statements, or other documents), and section 7215 (offenses with respect to collected taxes). In addition, a broker is subject to the penalty under section 6705 (failure of a broker to provide notice to a payor).

(j) *To whom payor is liable for amount withheld.* The payor is not liable to any person for any withheld amount under section 3406. The payor shall be liable only to the United States for an amount that was required to be withheld as provided in §313403-1.

§31.3406(h)-3 Certificates.

(a) *Prescribed form to furnish information under penalties of perjury.* Except as provided in paragraph (c) of this section, Form W-9 is the form prescribed under section 3406 on which the payee may certify, under penalties of perjury, that—

(1) The taxpayer identification number furnished to the payor is correct (as required in §31.3406(d)-1 and §31.3406(d)-5),

(2) The payee is not subject to backup withholding due to notified payee underreporting (as required in §31.3406(d)-2), (3) The payee is an exempt recipient (as described in §31.3406(g)-1), or (4) The payee is awaiting receipt of a taxpayer identification number (as described in §31.3406(g)-3).

The Form W-9 shall be prepared in accordance with the instructions applicable thereto and shall set forth fully and clearly the data called for therein. A valid Form W-9 shall include the name, address, and taxpayer identification number of the payee. An obviously incorrect number shall not be considered to be a taxpayer identification number (see §31.3406(h)-1(a)). Except as provided in paragraph (b) of this section, the payee must sign under penalties of perjury and date Form W-9 in order to satisfy the requirements of this section. Blank copies of Form W-9 will be supplied to payors, payees, and brokers upon request to the district director. A payor or broker may require a payee to furnish a separate Form W-9 for each obligation, deposit, certificate, share, membership, contract, or other instrument. Alternatively, a payor or broker may require a payee to furnish one Form W-9 for all the payee's obligations or relationships with the payor or broker. For example, a bank may permit a payee to file one Form W-9 for all savings, interest-bearing checking, or other accounts the payee has with the bank. In addition, a payee of a mutual fund that has a common investment advisor or common principal underwriter with other mutual funds may be permitted, in the discretion of the mutual fund, to provide one Form W-9 with respect to shares acquired or owned in any of the funds.

(b) *Prescribed form to furnish a noncertified taxpayer identification number.* With respect to accounts or other relationships where the payee is not required to certify, under penalties of perjury, that the taxpayer identification number being furnished is correct, the payor or broker may use Form W-9 or a substitute form, but the payee is not required to sign the form. Alternatively, the payor or broker may use any other document or may obtain the taxpayer identification number orally.

(c) *Forms prepared by payors or brokers*—(1) *Substitute forms; in general.* A payor or broker may prepare and use a form that contains provisions which are substantially similar to those of the official Form W-9 as described in paragraph (c)(2) and (3) of this section. A payor or broker may use any document relating to the transaction, such as the signature card for an account, so long as the certifications are clearly set forth. A payor or broker who uses a substitute form may furnish orally or in writing the instructions for Form W-9 that relate to the account. A payor or broker may refuse to accept certifications (including the official Form W-9) that are not made on the form or forms provided by the payor or broker. A payor or broker may refuse to accept a certification provided by a payee only if the payor or broker furnishes the payee with an acceptable form immediately upon receipt of an unacceptable form or within 5 business days of receipt of an unacceptable form. An acceptable form for this purpose must contain a notice that the payor or broker has refused to accept the form submitted by the payee and that the payee must submit the acceptable form provided by the payor in order for the payee not to be subject to backup withholding. If the payor or broker requires the payee to furnish a form for each account of the payee, the payor or broker is not required to furnish an acceptable form until the payee furnishes the payor or broker with the payee's account numbers. A payor or broker may use separate substitute forms to have a payee certify under penalties of perjury that—

(i) The payee's taxpayer identification number is correct, and

(ii) The payee is not subject to backup withholding due to notified payee underreporting, provided the language is substantially similar to the language in paragraph (c)(2) and (3) of this section or paragraph (c)(4) of this section if the payor or broker uses a single substitute form for both certifications.

(2) *Taxpayer identification number.* A payor or broker may use a substitute form for the payee to certify, under penalties of perjury, that the taxpayer identification number being furnished is correct, provided the language of the certification is substantially similar to the following: "Under penalties of perjury, I certify that the taxpayer identification number furnished on this form is my correct taxpayer identification number."

(3) *Notified payee underreporting.* A payor or broker may use a substitute form for the payee to certify, under penalties of perjury, that such payee is not subject to backup withholding due to notified payee underreporting under section 3406(a)(1)(C), provided the language of the certification is substantially similar to the following: "Under penalties of perjury, I certify that I am not subject to backup withholding either because I have not been notified that I am subject to backup withholding as a result of a failure to report all interest or dividends, or because the Internal Revenue Service has notified me that I am no longer subject to backup withholding."

(4) *Substitute form for both certifications.* A payor or broker may use a substitute form for both certifications described in paragraph (c)(2) and (3) of this section, provided the language of the certification is substantially similar to the following: "Under penalties of perjury, I certify that the taxpayer identification number shown on this form is my correct taxpayer identification number and that I am not subject to backup withholding either because I have not been notified that I am subject to backup withholding as a result of a failure to report all interest or dividends, or because the Internal Revenue Service has notified me that I am no longer subject to backup withholding." If a payor or broker uses a single substitute form for both certifications which does not follow the Form W-9 format, the substitute form must contain an instruction to the payee to strike out the language certifying that the payee is not subject to backup withholding due to notified payee underreporting if the payee has been notified that he or she is subject to backup withholding due to notified payee underreporting, and if the payee has not received a notice from the Internal Revenue Service advising the payee that backup withholding due to notified payee underreporting has terminated.

(5) *Form for exempt recipients.* A payor or broker may use a substitute form for the payee to certify, under penalties of perjury, that the payee is an exempt recipient (described in §31.3406(g)-1 or described in the respective reporting section), provided the form contains provisions that are substantially similar to those of the official Form W-9 relating to exempt recipients. A certificate shall be prepared in accordance with the instructions applicable to exempt recipients on Form W-9, and shall set forth fully and clearly the data called for therein. If a payor will treat the payee as an exempt recipient only if the payee files a certificate as to its exempt status, the certificate is valid only if it contains the payee's taxpayer identification number. Thus, a payee must include his taxpayer identification number on a certificate that a payor requires to be made in order to treat the payee as an exempt recipient.

(d) *Special rule for brokers.* A broker may act as the payee's agent for purposes of furnishing a taxpayer identification number or certification to a payor with respect to any readily tradable instrument (as defined in §31.3406(h)-1(d)) provided the payee provides a taxpayer identification number or Form W-9 or other acceptable substitute form to the broker. The payor may rely on a taxpayer identification number provided by the broker unless the broker notifies the payor that the number was not certified when certification is required (as described in §31.3406(d)-4).

(e) *Reasonable reliance on certificate.* A payor shall not be liable for the tax imposed under section 3406 if the payor's failure to deduct and withhold the tax is due to reasonable reliance on the taxpayer identification number provided by the payee or a broker which is in effect with respect to the payee at the time such tax is required to be deducted and withheld under section 3406. A payor or broker may reasonably rely on a Form W-9 or other acceptable substitute form only if the form contains a name and taxpayer identification number (or contains a name and states that the payee is awaiting receipt of a taxpayer identification number (*i.e.*, "an awaiting-TIN certificate") and is signed and dated by a payee. A payor or broker is not required to determine whether the statements made on the form are

true. Any deletion of the jurat or other similar provisions of the statement by which the payee certifies or affirms the correctness of the information contained on the form that relates to the payee means, however, that the form may not be reasonably relied upon by the payor or broker. If a payor or broker receives a form that cannot be reasonably relied upon, the payor or broker shall treat the payee as if no form were provided.

(f) *Who may sign the certificate*—(1) *In general.* A Form W-9 or other acceptable form may be signed by any person who is authorized to sign a declaration under penalties of perjury on behalf of the payee as provided in section 6061 and the regulations thereunder (relating to who may sign generally for an individual, which includes certain agents who may sign returns and other documents), section 6062 and the regulations thereunder (relating to who may sign corporate returns), and section 6063 and the regulations thereunder (relating to who may sign partnership returns).

(2) *Notified payee underreporting.* Any payee who has not been notified that he is subject to backup withholding as a result of notified payee underreporting can make the certification related to notified payee underreporting. In addition, a payee who was subject to backup withholding due to notified payee underreporting may certify that he is not subject to backup withholding due to notified payee underreporting if the Internal Revenue Service has provided the payee with written certification that backup withholding due to notified payee underreporting has terminated.

(g) *Retention of certificate*—(1) *Accounts or instruments that are not pre-1984 accounts and brokerage relationships that are post-1983 brokerage accounts.* With respect to an account or instrument that is not a pre-1984 account (as described in §31.3406(d)-1(b)(3)) or with respect to a brokerage relationship that is a post-1983 brokerage account (as described in §31.3406(d)-1(c)(2)), the payor or broker who receives a Form W-9 or other acceptable substitute form related to backup withholding shall retain the form in its records for the same period of time that the payor or broker retains other account-creation or instrument-purchase agreements. The form may be retained on microfilm or microfiche in accordance with any applicable revenue procedures.

(2) *Accounts or instruments that are pre-1984 accounts and brokerage relationships that are not post-1983 brokerage accounts.* With respect to a pre-1984 account (as described in §31.3406(d)-1(b)(1)) or with respect to a brokerage relationship that is not a post-1983 brokerage account (as described in §31.3406(d)-1(c)(1)), the payor or broker is not required to retain any Form W-9 or other acceptable substitute form on which—

(i) The payee has certified the correctness of the payee's taxpayer identification number,

(ii) The payee has certified that he is awaiting receipt of a taxpayer identification number ("an awaiting-TIN certificate" as described in §31.3406(g)-3), or

(iii) The payee has certified that the payee is an exempt recipient described in §31.3406(g)-1, provided the payor or broker can establish the existence of procedures that are reasonably calculated to ensure that a payee who has so certified is accurately identified in the payor's or broker's records. If, however, the payor or broker requires the payee to file only one Form W-9 or substitute form for all accounts or instruments of the payee, the payor or broker must retain the single form in the manner and for the period of time described in paragraph (g)(1) of this section if that form relates to any account or instrument that is not a pre-1984 account or relates to a post-1983 brokerage account.

§31.3406(i)-1 Transitional rules.

In general, the following transitional rules apply for the 1984 calendar year. In this connection, Question and answer 1 concerns certain payees of pre-1984 accounts or relationships who did not furnish a taxpayer identification number before January 1, 1984. Question and answer 2 concerns payments of gross proceeds before April 1984 and other similar payments.

Q-1. Did a special rule exist with respect to a payee who had not furnished a taxpayer identification number to a payor before January 1, 1984, with respect to a pre-1984 account (as described in §31.3406(d)-1(b)(l)), a brokerage account that is not a post-1983 brokerage account (as described in §31.3406(d)-1(c)(1)), or other relationships established (as described in §31.3406(d)-1(d)) before January 1, 1984?

A-1. Yes. All payees of such accounts, instruments or relationships were treated as if they were waiting for receipt of a taxpayer identification number, without any action on their part, until January 16, 1984. The payor was required to withhold 20 percent of any payment made after January 16, 1984, unless (1) the payee had certified that the payee was waiting for receipt of a taxpayer identification number (as provided in §31.3406(g)-3) or (2) the payor received a taxpayer identification number from the payee. If, however, a payor had been provided with a Form W-9 (or substitute form) with an "Applied For" designation by a payee on an account, instrument, or relationship established before January 1, 1984, the form was valid for 60 days notwithstanding the fact that the supplemental instruction referred to in §31.3406(h)-3 was not provided to the payee.

Assume, for example, that the payee of an account established before January 1, 1984, delivered an awaiting-TIN certification to the payor on December 30, 1983, and the payor processed the certification that day as permitted in §31.3406(e)-1(b). The payor should not impose backup withholding on payments made to the payee prior to February 29, 1984, because the payee is treated under this paragraph as having provided a taxpayer identification number during that period. If the payor did not receive a number in the manner required in §31.3406(d)-1 from the payee prior to February 29, 1984, the payor would be required to withhold 20 percent of any payment made to the payee on or after February 29, and before the payee provided a number. As another example, assume that a payee of an account established before January 1, 1984, delivered an awaiting-TIN certification to the payor on January 12, 1984, and processed it that day. The payor should not impose backup withholding on payments made between January 1 and 12 because the payee would be treated during that period as if he had provided a taxpayer identification number under the rule set forth

above. Moreover, backup withholding would not apply to payments made during the 60 days following January 12, because the payee on that date delivered an awaiting-TIN certification. Backup withholding would begin only if the payor had not received a taxpayer identification number within that 60-day period. (See §31.3406(e)-1(b), however, for the rules relating to the dates on which the payor may be treated as having received the certificate or the taxpayer identification number.)

Q-2. Did transition rules apply to backup withholding on gross proceeds reportable by brokers under section 6045 (as described in §31.3406(b)(3)-2)?

A-2. Yes. The following transition rules applied until April 1, 1984. First, for purposes of backup withholding on gross proceeds reportable by brokers, the penalties of perjury certification required by §31.3406(d)-1(c)(2) (for post-1983 accounts) may be waived at the broker's option until April 1, 1984. A customer who opens an account after December 31, 1983, and who consummates a sale prior to April 1, 1984, will not be subject to backup withholding provided that the customer furnishes a taxpayer identification number to the broker prior to the sale. The gross proceeds from sales made through post-1983 accounts after March 31, 1984, however, will be subject to backup withholding if the customer does not provide a taxpayer identification number certified under penalties of perjury. See §31.3406(d)-3(b) for special rules applicable when a sale is made pursuant to a telephone or wire instruction.

Second, until April 1, 1984, the gross proceeds from a sale made through a pre-1984 account (as described in §31.3406(d)-1(c)(1)) by a customer who has not provided a taxpayer identification number will not be subject to backup withholding at the broker's option provided that (1) the customer furnishes his number to the broker within 30 days after the date of the sale and (2) the customer does not withdraw the proceeds of the sale prior to the time his taxpayer identification number is furnished to the broker (or backup withholding is applied). For purposes of the preceding sentence, an investment of the cash proceeds in other property shall not be considered a withdrawal by the customer if, at all times during the 30-day period, at least 20 percent of all gross proceeds reportable under section 6045 are held in cash within the customer's account by the broker. If the customer does not furnish his taxpayer identification number within 30 days after the date of sale, the broker must withhold 20 percent of all reportable gross proceeds on the 31st day after the date of the sale.

If, with respect to forward contracts, regulated futures contracts, security short sales, or issuer payment of debt securities, the broker applies backup withholding on a date other than the sale date (see §31.3406(b)(3)-2(c)) the rules of this paragraph shall apply as if any date on which the broker determines whether backup withholding applies were the sale date.

Par. 8. Section 31.601(a)-5(a) is amended by adding the phrase "or §31.6011(a)-11" immediately after the phrase "§31.6011(a)-1 or §31.6011(a)-(4)" wherever the latter phrase appears, and by adding the phrase "or payor" immediately after the term "employer" wherever it appears.

Par. 9. Section 31.6011(a)-6 is amended by revising the heading and the first and third sentences of paragraph (a)(1) to read as follows:

§31.6011(a)-6 Final returns.

(a) *In general*—(1) *Federal Insurance Contributions Act; income tax withheld from wages and certain reportable payments.* An employer or payor who is required to make a return on a particular form pursuant to §31.6011(a)-1, §31.6011(a)-4, §31.6011(a)-5, or §31.6011(a)-11, and who in any return period ceases to pay wages or other reportable payments in respect of which he is required to make a return on such form, shall make such return for such period as a final return. * * * Every such person filing a final return (other than a final return on Form 942 or Form 943) shall furnish information showing the date of the last payment of wages, as defined in section 3121(a) or section 3401(a), and, if appropriate, the date of the last payment of certain reportable payments as defined in section 3406.***

* * * * *

Par. 10. A new §31.601(a)-11 is added to read as follows:

§31.6011(a)-11 Returns of income tax withheld from any reportable payment.

(a) *Quarterly returns.* Except as otherwise provided in §31.6011(a)-5, every payor or broker required to withhold taxes from any reportable payment pursuant to section 3406 shall make a return on Form 941 or Form 941E, whichever is the prescribed form regarding those taxes, for the first calendar quarter in which the payor or broker is required to deduct and withhold such tax and for each subsequent calendar quarter (whether or not the payor or broker is required to deduct and withhold the tax imposed by section 3406 during the quarter) until it has filed a final return in accordance with §31.6011(a)-6.

(b) Information returns on Form 1099. See sections 6041, 6041A, 6042, 6044, 6045, 6049, and 6050A for requirements regarding information returns on Form 1099 with respect to any reportable payment.

(c) *Time and place for filing returns.* For provisions relating to the time and place for filing returns required under this section, see §31.6071(a)-1 and §31.6091-1, respectively.

(d) *Monthly returns.* The provisions of §31.6011(a)-5 regarding monthly returns shall apply, as appropriate, to a payor or broker.

(e) *Final returns.* The provisions of §31.6011(a)-6(a)(1) regarding final returns shall apply, as appropriate, to a payor or broker.

Par. 11. A new §31.6051-4 is added to read as follows:

§31.6051-4 Statements required in case of backup withholding.

(a) *Statements required from payor.* Every payor of any reportable payment (as defined in section 3406(b) and §§31.3406(b)(1)-1) who is required to deduct and withhold tax under section 3406 shall furnish to the payee a written statement containing the information required by paragraph (c) of this section.

(b) *Prescribed form.* The prescribed form for the statement required by this section shall be Form 1099. In the case of any reportable interest or dividend payment as de-

fined in §31.3406(b)(1)-1(b), the prescribed form shall be the official Form 1099 required in §1.6042-5 (relating to payments of dividends), §1.6044-6 (relating to payments of patronage dividends), or §1.6049-6(e) (relating to payments of interest or original issue discount). Statements required to be furnished by this section shall be treated as statements required by the respective sections with respect to any reportable payment, except that the statement required under this section shall include the amount of tax withheld under section 3406. In no event shall a statement be required under this section if a statement with the same information is required to be furnished to the recipient under another section. Thus, a payor is not required to furnish two statements of the same information to a recipient.

(c) *Information required.* Each statement on Form 1099 shall show the following:

(1) The name, address, and taxpayer identification number of the person receiving any reportable payment;

(2) The amount subject to reporting under section 6041, 6041A(a), 6042, 6044, 6045, 6049, 6050A, or 6050N whether or not the amount of the reportable payment is less than the amount for which an information return is required, if tax is withheld under section 3406 relating to backup withholding. If tax is withheld under section 3406, the statement shall show the amount of the payment withheld upon;

(3) The amount of tax deducted and withheld under section 3406;

(4) The name and address of the person filing the form;

(5) A legend stating that such amount is being reported to the Internal Revenue Service; and

(6) Such other information as is required by the form.

(d) *Time for furnishing statements.* The statement shall be furnished to the payee no later than January 31 of the year following the calendar year in which the payment was made.

(e) *Aggregation.* The payor or broker may combine the information required to be shown under this section with information required to be shown under another section even if they do not relate to the same type of reportable payment.

(f) *Cross references.* For provisions relating to the failure to file certain statements, see section 6722. For provisions relating to the penalties provided for the willful furnishing of a false or fraudulent statement, or for the willful failure to furnish a statement, see sections 6656, 6682 and 7215. For additional provisions relating to the inclusion of identification numbers and account numbers in statements on Form 1099, see §§31.6109-1 and 301.6109-1. For provisions relating to the penalty for failure to report an identification number or an account number, as required by §31.6109-1 or §301.6109-1, see section 6676 for statements required for 1988 or earlier calendar years and section 6721 for statements required for 1989 or later calendar years.

Par. 12. Section 31.6071(a)-1 is amended by revising the heading of paragraph (a) and the first sentence of paragraph (a)(1) to read as follows:

§31.6071(a)-1 Time for filing returns and other documents.

(a) *Federal Insurance Contributions Act and income tax withheld from wages and certain reportable payments*—(1) *Quarterly or annual returns.* Except as provided in paragraph (a)(4) of this section, each return required to be made under §31.6011(a)-1 in respect of the taxes imposed by the Federal Insurance Contributions Act, or required to be made under §31.6011(a)-4 in respect of income tax withheld from wages, or required to be made under §31.6011(a)-11 in respect of income tax withheld from certain reportable payments, shall be filed on or before the last day of the first calendar month following the period for which it is made.***

* * * * *

Par. 13. Section 31.6302(c)-1 is amended by adding a new paragraph (a)(1)(i)(*d*), removing the term "and" at the end of paragraph (a)(1)(iii)(*b*), by adding the term ", and" at the end of paragraph (a)(1)(iii)(*c*), and by adding new paragraph (a)(1)(iii)(d). The added provisions read as follows:

§31.6302(c)-1 Use of Government depositaries in connection with taxes under Federal Insurance Contributions Act and income tax withheld.

(a) *Requirement*—(1) *In general.* *(i)****

* * * * *

(*d*) A payor who withholds income tax with respect to reportable payments under section 3406 may elect, in accordance with the instructions provided with Form 941, to deposit such taxes under the rules of paragraphs (a)(1)(i)(*a*) or (*b*) of this section without taking into account the undeposited taxes described in paragraphs (a)(1)(iii)(*a*), (*b*), or (*c*) of this section for purposes of determining when taxes withheld under section 3406 must be deposited. A payor who makes this election shall not take tax withheld under section 3406 into account for purposes of determining when taxes described in paragraphs (a)(1)(iii)(*a*), (*b*), or (*c*) of this section must be deposited under paragraphs (a)(1)(i)(*a*) or (*b*) of this section.

* * * * *

(iii) ***

(*d*) The income tax withheld under section 3406, relating to backup withholding with respect to reportable payments. (See paragraph (a)(1)(i)(*d*) of this section concerning the election payors may make regarding deposits of tax withheld under section 3406).

Par. 14. A new §31.6413(a)-3 is added to read as follows:

§31.6413(a)-3 Repayment by payor of tax erroneously collected from payee.

(a) *In general.* If a payor or broker withholds from a payee in error or withholds more than the proper amount of the tax under section 3406, the payor or broker may refund the amount erroneously withheld as provided in section 6413 and this section. A payor or broker shall be considered to have withheld erroneously only if the amount is withheld because of an error by the payor or broker (*e.g.*, an error in "flagging" or identifying an account that is subject to backup withholding under section 3406) or the Internal Revenue Service directs the payor to refund an amount withheld pursuant to section 3406(a)(1)(C). If the payor or broker requires a payee described in §31.3406(g)-1(a) or the respective reporting section (*e.g.*, a corporation)

to certify that it is an exempt recipient, the payee fails to make the required certification, and the payor or broker subsequently withholds the tax imposed by section 3406 from a payment to such payee, the payor or broker may, in its discretion, treat the amount withheld as an amount erroneously withheld and refund it to the payee. The same rule applies if the payor or broker does not require such a payee to certify concerning its exempt status and the payor or broker withholds. If a payor or broker withholds from a payee after the payee provides a taxpayer identification number or required certification (including the certification relating to foreign status described in §1.6049-5(g) or §1.6045-1(g)(3)(i)) to the payor, but before the payor or broker treats the number or required certification as having been received under §31.3406(e)-1(b), the payor or broker may, in its discretion, treat the amount withheld as an amount erroneously withheld and refund it to the payee. If a payor or broker withholds, however, because the payor or broker has not received a taxpayer identification number or required certification and the payee subsequently provides a taxpayer identification number or a required certification to the payor, the payor or broker may not refund the amount to the payee because the payor or broker has not erroneously withheld under section 3406.

(b) *Manner of refunding amounts erroneously withheld.* If a payor or broker withholds from a payee in error or withholds more than the correct amount under section 3406 as described in paragraph (a) of this section, the payor or broker may refund the amount erroneously withheld to the payee so long as the refund is made prior to the end of the calendar year and prior to the time the payor or broker furnishes a Form 1099 to the payee with respect to the payment for which the erroneous withholding occurred. If the amount of the erroneous withholding is refunded to the payee, the payor or broker shall keep as part of its records a receipt showing the date and amount of refund and the payor or broker must provide a copy or such receipt to the payee. For this purpose, a cancelled check or an entry in a statement is sufficient provided that the check or statement contains a specific notation that it is a refund of tax erroneously withheld. If the payor or broker has not deposited the amount of the tax prior to the time that the refund is made to the payee, the payor or broker shall not deposit the amount erroneously withheld. If the amount erroneously withheld has been deposited prior to the time that the refund is made to the payee, the payor or broker may adjust any subsequent deposit of the tax collected under chapter 24 of the Code which the payor or broker is required to make in the amount of the tax which has been refunded to the payee. A payor or broker shall not report on a Form 1099 as tax withheld any amount which the payor or broker has refunded to a payee.

(c) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). A, an individual, maintains an interest-bearing checking account with Bank M. A has not furnished a social security number to M. On March 31, 1984, M credits a payment of interest to A's account and withholds 20 percent of the payment pursuant to section 3406. On April 7, 1984, A receives a quarterly statement from M showing the tax withheld, provides M with a social security number, and requests that M refund the tax withheld. Since M did not have A's social security number on the date M made a payment to A, M has not erroneously withheld the tax imposed by section 3406 and may not refund the tax to A.

Example (2). B, an individual, has an interest-bearing share account with Credit Union N. Although B has provided a social security number to N, N has failed to associate B's number with the account B maintains with N. N credits a payment of interest to B's account on February 1, 1984, and withholds 20 percent of the payment. When B receives a quarterly statement from N showing the tax withheld, B requests that N refund the amount of tax withheld. Upon examining its records, N determines that the tax was withheld because of its error in associating B's social security number with B's account. Accordingly, N may treat the amount as erroneously withheld under paragraph (a) of this section and refund the amount withheld to B as provided in section 6413 and paragraph (b) of this section.

Example (3). State C maintains an investment account with Bank O. C does not have a taxpayer identification number on file with O. Although O requires persons who are exempt from backup withholding under section 3406 to certify their exempt status to O, C fails to do so. O credits a payment of interest to C's account on January 31, 1984, and withholds 20 percent of the payment. On February 2, 1984, O realizes it has withheld the tax imposed by section 3406 from a payment to C. O may treat the amount withheld from C as an amount erroneously withheld under paragraph (a) of this section and refund the amount withheld to C as provided in section 6413 and paragraph (b) of this section.

Par. 15. Section 31.6682-1 is amended by revising the first sentence and by adding two new sentences after the second sentence of paragraph (a) to read as follows:

§31.6682-1 False information with respect to withholding.

(a) *Civil penalty.* If any individual makes a statement under section 3402 (relating to income tax collected at source) or section 3406 (relating to backup withholding) which results in a lesser amount of income tax actually deducted and withheld than is properly allowable under section 3402 or section 3406 and, at the time the statement was made, there was no reasonable basis for the statement, the individual shall pay a penalty of $500 for the statement. *** There was a reasonable basis for a statement on a Form W-9 if the person included his correct taxpayer identification number assigned under section 6109 and, with respect to a reportable interest or dividend payment (as defined in §31.3406(b)(1)-1)(b), that person had a reasonable basis to certify under penalties of perjury that he was not subject to backup withholding if, prior to the time that the person made the statement, he had not been notified that he was subject to backup withholding as a result of notified payee underreporting. Additionally, a person who was subject to backup withholding due to notified payee underreporting had a reasonable basis to certify that he was not subject to backup withholding due to notified payee underreporting if, prior to the time that the person made the statement, the Service provided him with written certification that backup withholding due to notified payee underreporting had terminated. ***

* * * * *

PART 301—PROCEDURE AND ADMINISTRATION

Par. 16. The authority citation for Part 301 is amended by adding the following citation:

Authority: 26 U.S.C. 7805 *** §301.6109-1 also issued under 26 U.S.C. 6109.

Par. 17. Section 301.6109-1 is amended by revising paragraphs (a)(1) and (g), by redesignating paragraph (h) as paragraph (i), and by adding a new paragraph (h) to read as follows:

§301.6109-1 Identifying numbers.

(a) *In general*—(1) *Social security numbers and employer identification numbers.* Generally, there are two types of taxpayer identifying numbers: social security numbers and employer identification numbers. Social security numbers take the form 000-00-0000, while employer identification numbers take the form 00-0000000. Social security numbers identify individual persons while employer identification numbers identify corporations, partnerships, nonprofit associations, trusts, estates of decedents, and similar nonindividual persons. Both types of taxpayer identifying numbers are used by individuals who are employers or who are engaged in trade or business as sole proprietors, as required by returns, statements or other documents and their related instructions. Such documents often require an individual's own social security number in connection with his individual taxes, and his employer identification number in connection with his business taxes. See paragraph (g) of this section for the rules with respect to the use of a taxpayer identification number for nonresident aliens.

* * * * *

(g) *Nonresident aliens.* In general, nonresident aliens who are treated as residents under section 6013(g) or (h) must obtain a taxpayer identification number in the same form and manner that is required of U.S. residents. However, nonresident aliens with income effectively connected with a U.S. trade or business, or nonresident aliens who do not have such income but who must file a Form 1040NR to obtain a refund of tax withheld, must obtain a taxpayer identification number that takes the form 9xx-xx-xxxx. This number may be obtained from the Internal Revenue Service Center located in Philadelphia, Pennsylvania. Other nonresident aliens are not required to obtain a taxpayer identification number.

(h) *Other foreign persons.* A foreign corporation, foreign partnership, or foreign private foundation is not required to obtain a taxpayer identification number if it does not have income effectively connected with the conduct of a trade or business within the United States and does not have an office or place of business or fiscal or paying agent in the United States.

* * * * *

Par. 18. A new §301.6676-2 is added to read as follows:

§301.6676-2 Due diligence defense.

For purposes of section 6676, the following questions and answers (Q/A's) concerning the actions that payors must take to establish due diligence are hereby referenced in this §301.6676-2:

(a) Q/A-1, through Q/A-29, Q/A-31, Q/A-34 through Q/A-36, Q/A-38 through Q/A-42 B, and Q/A-48 through Q/A-56 of §35a.9999-1;

(b) Q/A-1 through Q/A-9, Q/A-17 through Q/A-18, and Q/A-20 through Q/A-23 of §35a.9999-2;

(c) Q/A-1, Q/A-3 through Q/A-4, Q/A-20, Q/A-29, Q/A-33 through Q/A-37, Q/A-41, Q/A-46, Q/A-48, Q/A-51 through Q/A-97, and Q/A-99 through Q/A-104 of §35a.9999-3; and

(d) Q/A-3 and Q/A-5 of §35a.9999-4T.

Par. 18(a). Sections 35a.3406-1 and 35a.3406-2 are removed.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 19. The authority for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 20. Section 602.101(c) is amended by inserting the following in the appropriate place in the table "§31.3406 . . . 1545-0112 and 1545-0979".

Fred T. Goldberg, Jr.,
Commissioner of
Internal Revenue.

(Filed by the Office of the Federal Register on September 20, 1990, 10:53 a.m., and published in the issue of the Federal Register for September 27, 1990, 55 F.R. 39427)

Notice of Proposed Rulemaking

Economic Performance Requirement

IA-258-84

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the requirement that economic performance occur in order for an amount to be incurred by a taxpayer using an accrual method of accounting. Changes to the applicable law were made by the Tax Reform Act of 1984. The regulations affect all taxpayers that use an accrual method of accounting, and are necessary to provide them with guidance needed to comply with these changes.

DATE: Written comments and requests for a public hearing must be delivered by August 6, 1990.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, Office of Chief Counsel, Attn: CC:CORP:T:R (IA-258-84), P.O. Box 7604, Ben Franklin Station, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) to provide rules under section 461(h) of the Internal Revenue Code of 1986 (Code). Section 461(h) was added to the Code by section 91(a) of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 598) [1984-3 C.B. (Vol. 1) 1, 106].

Explanation of Statutory Provisions

Section 461(h) adds a third requirement to the "all events test" for determining the taxable year in which an item may be treated as incurred by a taxpayer using an accrual method of accounting. As in effect before the enactment of section 461(h), the all events test was satisfied when (1) all the events occurred that determined the fact of a liability and (2) the amount of the liability could be determined with reasonable accuracy. Section 461(h) provides that the all events test shall not be treated as met any earlier than the taxable year in which "economic performance" occurs with respect to the liability. Sec-

tion 461(h) applies to any item allowable as a cost, expense, or deduction, except for certain items for which the Code provides alternative timing rules.

Section 461(h)(2) provides that, except as otherwise provided in regulations prescribed by the Secretary, the following general principles determine when economic performance occurs. If the liability of a taxpayer arises out of the provision of property or services to the taxpayer by another person, economic performance occurs as the property or services are provided. If the liability of a taxpayer arises out of the use of property by the taxpayer, economic performance occurs as the taxpayer uses such property. If the liability of a taxpayer requires the taxpayer to provide property or services, economic performance occurs as the taxpayer provides the property or services. If the liability of a taxpayer requires payment to another person and arises under a workers' compensation act or arises out of any tort, economic performance occurs as the payments to such person are made. Finally, in the case of any other liability of a taxpayer, economic performance occurs at the time determined under regulations prescribed by the Secretary.

Although section 461(h) generally requires economic performance to occur before an item may be treated as incurred, section 461(h)(3) provides an exception to this general rule ("the recurring item exception"). Under the recurring item exception, an item may be treated as incurred in the taxable year before economic performance occurs, but only if the following four conditions are satisfied. First, the all events test, without regard to economic performance, must be satisfied with respect to the item during the taxable year. Second, economic performance must occur with respect to the item within a reasonable period (but in no event more than 8 1/2 months) after the close of the taxable year. Third, the item must be recurring in nature, and the taxpayer must, from year to year, consistently treat items of that type as incurred in the taxable year in which the all events test (without regard to economic performance) is satisfied. Fourth, either (a) the item must not be a material item, or (b) the accrual of the item in the taxable year in which the all events test (without regard to economic performance) is satisfied must result in a better matching of the item with the income to which it relates than would result from accruing the item in the taxable year in which economic performance occurs. The recurring item exception does not apply to liabilities arising under a workers' compensation act or out of any tort.

Explanation of Regulatory Provisions

Economic performance with respect to property and services

The proposed regulations modify and clarify the statutory rules concerning when economic performance occurs in the case of property, services, or the use of property provided to or by a taxpayer. First, in the case of a liability of a taxpayer arising from the provision by another person of property or services to the taxpayer, the statute provides that economic performance occurs as the property or services are provided to the taxpayer. The regulations provide rules designed to lessen the burden on a taxpayer incident to determining when property or services are provided to the taxpayer. For example, the regulations provide that a taxpayer may treat property or services as provided to the taxpayer as the taxpayer makes payment for the property or services. However, this treatment is available only if the taxpayer can reasonably expect the property or services to be provided by the other person within 3 1/2 months after the payment is made. Thus, for example, if a taxpayer pays for the cost of property or services, the taxpayer may not deduct the costs or add them to basis upon payment if economic performance is not reasonably expected to occur within 3 1/2 months of the payment. Nonetheless, the costs will be treated as incurred for purposes of determining production expenditures that attract interest required to be capitalized under section 263A(f). See §1.263A-1T(b)(2)(iv)(C).

Second, in the case of a liability of a taxpayer to provide property or services, the regulations provide that economic performance occurs as the taxpayer incurs (within the meaning of section 461(h) and the regulations thereunder) costs in connection with such a liability. Thus, for example, if an equipment manufacturer contracts to provide a machine to a corporation, the manufacturer incurs costs (i.e., economic performance occurs) as property, services, and the use of property necessary to make the machine are provided to the manufacturer, rather than as the manufacturer provides the machine to the corporation. This rule was adopted because these costs, and not the underlying "liability" to provide property or services, generally are allowable as a cost, deduction, or expense for Federal income tax purposes.

Third, the regulations provide that in the case of liabilities for property or services that are attributable to long-term contracts, economic performance occurs as the property or services are provided, or as the taxpayer makes payment for the property or services, whichever is earlier.

The Internal Revenue Service invites comments on the interaction between the economic performance requirement and employee benefit provisions including sections 83, 404, and 419.

Liabilities for which payment is economic performance

The regulations identify six types of liabilities, in addition to liabilities arising under a workers' compensation act or out of a tort, for which payment must be made in order for economic performance to occur. These liabilities are (1) liabilities arising out of a breach of contract; (2) liabilities arising out of a violation of law; (3) rebates and refunds; (4) awards, prizes, and jackpots; (5) amounts paid for insurance, warranty, and service contracts; and (6) taxes other than creditable foreign taxes. The regulations provide that creditable foreign taxes are incurred under the rules in effect before the enactment of section 461(h). This rule is provided in order to preserve the matching principles underlying the foreign tax credit provisions.

The proposed regulations also provide that if section 461(h) or the regulations thereunder do not otherwise provide economic performance rules for a liability, economic performance occurs as payment is made to the person to which the liability is owed. The vast majority of liabilities

either involve the provision of property or services by or to a taxpayer, or are specifically designated in the statute or the proposed regulations as payment liabilities. Thus, it is anticipated that few liabilities will fall into this "catch-all" category.

Payment to another person

The proposed regulations also provide guidance on what constitutes payment to another person for purposes of section 461(h). The regulations provide that whether payment has occurred is to be determined under the principles applicable to a taxpayer using the cash method of accounting. Thus, the furnishing of a note or other evidence of indebtedness of a taxpayer, or a promise of a taxpayer to provide property or services in the future, is not payment for purposes of section 461(h). In addition, a payment is not an amount transferred as a loan, deposit, or contingent payment with respect to which the taxpayer may receive a refund or credit. Finally, the regulations provide that payment has not been made to another person unless a cash basis taxpayer in the position of that person would be treated as having actually or constructively received the amount of the payment under the principles of section 451. Thus, for example, the purchase of an annuity contract or other asset does not constitute payment to another person unless the ownership of the annuity contract or other asset is transferred to that person.

Persons to which payment constitutes economic performance

In general, in the case of liabilities requiring payment, economic performance occurs when payment is made to the person to which the liability is owed. For example, in the case of a liability arising under a workers' compensation act, payment must be made to the person entitled to payment under the workers' compensation act. Generally, a payment to a trust, escrow account, fund, or any person other than the person to which a liability is owed does not constitute economic performance.

However, payments to certain third persons constitute economic performance. For example, under section 468B, payment to a designated settlement fund constitutes economic performance in the case of certain tort liabilities. The regulations essentially extend the availability of section 468B treatment to certain other payment liabilities by providing that a payment to a "qualified fund" constitutes economic performance. Provisions in the regulations relating to this qualified fund generally conform to the provisions of section 468B. The Internal Revenue Service invites comments as to additional guidance that may be appropriate with respect to the operation of qualified funds and, more generally, the manner and extent to which the Service should exercise its authority to prescribe rules under section 468B(g) (relating to the taxation of certain funds).

In addition, the regulations provide, in connection with the sale of a trade or business by a taxpayer, that if the purchaser agrees to assume a liability of the taxpayer arising out of the trade or business, the taxpayer is treated as making deemed payments on the liability for purposes of section 461(h) as the amount of the liability is included in the amount realized on the transaction by the taxpayer. The regulations define "trade or business" using principles drawn from section 355(b) and the regulations thereunder. It is expected that case law developed with respect to the relevant portions of section 355(b) and the regulations thereunder will apply for purposes of the trade or business definition of the regulations under section 461(h).

Finally, the regulations provide that qualified assignments under section 130, relating to certain personal injury liability assignments, constitute economic performance.

The Internal Revenue Service invites comments on the scope of these exceptions to the rule that payment must be made to the person to which a liability is owed, and comments that identify additional appropriate exceptions. In particular, the Service invites comments identifying the circumstances in which it would be appropriate to provide an additional exception under which economic performance with respect to a liability of a taxpayer would be deemed to occur as the taxpayer pays an unrelated party to assume legal responsibility for satisfying that liability.

Recurring item exception

The regulations modify the recurring item exception of section 461(h)(3) by requiring that economic performance occur by the earlier of (1) 8 1/2 months after the close of a taxable year as of the end of which the all events test is met (determined without regard to the economic performance requirement); or (2) the date the taxpayer files a timely return for that taxable year. However, if economic performance with respect to an item occurs after the taxpayer files the return, but within the 8 1/2 month period, the taxpayer may file an amended return treating the item as incurred under the recurring item exception. Furthermore, the regulations identify liabilities, in addition to workers' compensation and tort, to which the recurring item exception does not apply. Finally, the regulations provide that the matching requirement of the recurring item exception is deemed satisfied in the case of the following liabilities: (1) rebates and refunds, (2) awards, prizes and jackpots, (3) amounts paid for insurance, warranty, and service contracts, and (4) taxes.

Other timing rules

The proposed regulations clarify that section 461(h) and the regulations thereunder merely provide rules for determining when a liability may be treated as incurred under the all events test. Other rules determine the manner in which the liability is taken into account for Federal income tax purposes. Liabilities generally are taken into account in the taxable year incurred, whether, for example, as a deduction from gross income under section 162 in the case of deductible liabilities, or through capitalization under section 263 or section 263A in the case of liabilities that relate to the creation of a capital asset. Furthermore, liabilities required to be capitalized may later affect the computation of taxable income through depreciation or otherwise, in accordance with applicable Code sections and guidance published by the Secretary.

Taxation of amounts transferred under section 461(f)

The proposed regulations also provide rules relating to the taxation of amounts transferred to an escrowee,

trustee, or court in connection with a contested liability within the meaning of section 461(f). The Internal Revenue Service invites comments relating to the application of section 461(f) to liabilities for which the regulations designate payment as economic performance.

Subdivided real estate

Finally, because economic performance must occur in order for a liability to be taken into account, the estimated cost of future improvements to subdivided real estate may not be added to the basis of lots sold if economic performance has not occurred with respect to those costs. Therefore, the statute and regulations override Rev. Proc. 75-25, 1975-1 C.B. 720, but only for taxable years beginning after December 31, 1989, pursuant to section 7805(b).

Effective dates

In general, the regulations are proposed to apply to liabilities that would, under the law in effect before the enactment of section 461(h), be allowable as a deduction or otherwise incurred after July 18, 1984. In the case of amounts transferred to an escrowee, trustee, or court under section 461(f) to provide for the satisfaction of an asserted liability, the regulations are proposed to apply to amounts transferred on or after June 7, 1990. In the case of certain liabilities that require payment to another person in order for economic performance to occur, and in the case of liabilities to make future improvements to subdivided real estate, the regulations are proposed to apply to liabilities that would, under the law in effect before the enactment of section 461(h), be allowable as a deduction or otherwise incurred for taxable years beginning after December 31, 1989. Although portions of the proposed regulations are effective only for taxable years beginning after December 31, 1989, taxpayers are reminded that section 461(h) of the Code became effective after July 18, 1984, and that for the period beginning after July 18, 1984, taxpayers are not entitled to rely on regulations or rulings that are inconsistent with the general principles of economic performance or with the generic exception for recurring items. *See* Conf. Rep. No. 861, 98th Cong., 2d Sess. 876 (1984).

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, a copy of the rules will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Internal Revenue Service by any person who submits written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

List of Subjects

26 CFR 1.61-1 through 1.281-4

Deductions, Exemptions, Income tax, Taxable income. 26 CFR 1.441-1 through 1.483-2

Income taxes, Accounting, Deferred compensation plans.

Proposed Amendments to the Regulations

For the reasons set forth in the preamble, 26 CFR Part 1 is proposed to be amended as follows:

Part 1—Income Tax Regulations [AMENDED]

Paragraph 1. The authority for Part 1 is amended by removing the following citation:

Section 1.461-3T also issued under 26 U.S.C. 461(h).

Par. 2. The authority for Part 1 is amended by adding the following citation:

Authority: Sec. 7805, 68A Stat. 917: 26 U.S.C. 7805. * * * Section 1.446-1, §1.461-1, §1.461-2, §1.461-4, §1.461-5, §1.461-6, and §1.461-7T also issued under 26 U.S.C. 461(h). Section 1.461-2 and §1.461-6(c) also issued under 26 U.S.C. 468B(g). Section 1.461-4(d) also issued under 26 U.S.C. 460.

Par. 3. Section 1.446-1 is amended by revising paragraph (c)(1)(ii) to read as follows:

§1.446-1 General rule for methods of accounting.

* * * * *

(c) * * *

(1) * * *

(ii) *Accrual method.* (A) Generally, under an accrual method, income is to be included for the taxable year when all the events have occurred that fix the right to receive the income and the amount of the income can be determined with reasonable accuracy. Under such a method, a liability is incurred, and generally is taken into account for Federal income tax purposes, in the taxable year in which all the events have occurred that establish the fact of the liability, the amount of the liability can be determined with reasonable accuracy, and economic performance has occurred with respect to the liability. (See paragraph (a)(2)(iii)(A) of §1.461-1 for examples of liabilities that may not be taken into account until after the taxable year incurred, and see §§1.461-4 through 1.461-6 for rules relating to economic performance.) Applicable provisions of the Code, the Income Tax Regulations, and other guidance published by the Secretary prescribe the manner in which a liability that has been incurred is taken into account. For example, section 162 provides that a deductible liability generally is taken into account in the taxable year incurred through a deduction from gross income. As a further example, under section 263 or 263A, a liability that relates to the creation of an asset having a useful life extending substantially beyond the close of the taxable year is taken into account in the taxable year incurred through capitalization (within the meaning of §1.263A-1T(a)(5)), and may later affect the computation of taxable income through depreciation or otherwise over a period including subsequent taxable years, in accord-

ance with applicable Code sections and guidance published by the Secretary.

(B) The term "liability" includes any item allowable as a deduction, cost, or expense for Federal income tax purposes. In addition to allowable deductions, the term includes any amount otherwise allowable as a capitalized cost, as a cost taken into account in computing cost of goods sold, as a cost allocable to a long-term contract, or as any other cost or expense. Thus, for example, an amount that a taxpayer expends or will expend for capital improvements to property must be incurred before the taxpayer may take the amount into account in computing its basis in the property. The term "liability" is not limited to items for which a legal obligation to pay exists at the time of payment. Thus, for example, amounts prepaid for goods or services and amounts paid without a legal obligation to do so may not be taken into account by an accrual basis taxpayer any earlier than the taxable year in which those amounts are incurred.

(C) The method used by the taxpayer in determining when income is to be accounted for will be acceptable if it accords with generally accepted accounting principles, is consistently used by the taxpayer from year to year, and is consistent with the Income Tax Regulations. For example, a taxpayer engaged in a manufacturing business may account for sales of the taxpayer's product when the goods are shipped, when the product is delivered or accepted, or when title to the goods passes to the customers, whether or not billed, depending on the method regularly employed in keeping the taxpayer's books.

Par. 4. New §1.461-0 is added in the appropriate place.

§1.461-0 Table of contents.

This section lists the captions that appear in the regulations under section 461 of the Code.

§1.461-1 General rule for taxable year of deduction.

(a) General rule.
  (1) Taxpayer using cash receipts and disbursements method.
  (2) Taxpayer using an accrual method.
  (3) Effect in current taxable year of improperly accounting for a liability in a prior taxable year.
  (4) Deductions attributable to certain foreign income.
(b) Special rule in case of death.
(c) Accrual of real property taxes.
  (1) In general.
  (2) Special rules.
  (3) When election may be made.
  (4) Binding effect of election.
  (5) Apportionment of taxes on real property between seller and purchaser.
  (6) Examples.
(d) Limitation on acceleration of accrual of taxes.
(e) Dividends or interest paid by certain savings institutions on certain deposits or withdrawable accounts.
  (1) Deduction not allowable.
  (2) Computation of amounts not allowed as a deduction.
  (3) When amounts allowable.

§1.461-2 Contested liabilities.

(a) General rule.
  (1) Taxable year of deduction.
  (2) Exception.
  (3) Refunds includible in gross income.
  (4) Examples.
  (5) Transfers to provide for the satisfaction of a liability described in paragraph (g) of §1.461-4 [Reserved].
(b) Contest of asserted liability.
  (1) Asserted liability.
  (2) Definition of the term "contest."
  (3) Example.
(c) Transfer to provide for the satisfaction of an asserted liability.
  (1) In general.
  (2) Examples.
(d) Contest exists after transfer.
(e) Deduction otherwise allowed.
  (1) In general.
  (2) Example.
(f) Treatment of money or property transferred to an escrowee, trustee, or court and treatment of any income attributable thereto.
(g) Effective dates.

§1.461-3 Prepaid interest.

[Reserved].

§1.461-4 Economic performance.

(a) Introduction.
(b) Exceptions to the economic performance requirement.
(c) Definitions.
  (1) Liability.
  (2) Payment.
(d) Liabilities arising out of the provision of services, property, or the use of property.
  (1) In general.
  (2) Services and property provided to the taxpayer.
  (3) Use of property provided to the taxpayer.
  (4) Services and property provided by the taxpayer.
  (5) Rules relating to the provision of services or property to a taxpayer.
  (6) Examples.
(e) Interest.
(f) Liabilities under notional principal amount contracts. [Reserved].
(g) Certain liabilities for which payment is economic performance.
  (1) In general.
    (i) Person to which payment must be made.
    (ii) Payment to person to which liability is owed.
    (iii) Person.
    (iv) Assignments.
  (2) Liabilities arising under a workers' compensation act or out of any tort, breach of contract, or violation of law.
  (3) Rebates and refunds.
  (4) Awards, prizes, and jackpots.
  (5) Insurance, warranty, and service contracts.
  (6) Taxes.
  (7) Other liabilities.
  (8) Examples.
(h) Liabilities arising under the Nuclear Waste Policy Act of 1982.
(i) [Reserved].
(j) Special effective dates and transitional rules.

§1.461-5 Recurring item exception.

(a) In general.
(b) Requirements for use of the exception.
  (1) General rule.
  (2) Amended returns.
  (3) Items that are recurring in nature.
  (4) Materiality requirement.
  (5) Matching requirement.

(c) Types of items not eligible for treatment under the recurring item exception.

(d) Time and manner of adopting the recurring item exception.

(e) Examples.

§1.461-6 Economic performance when certain liabilities are assigned or are extinguished by the establishment of a fund.

(a) Qualified assignments of certain personal injury liabilities under section 130.

(b) Section 468B.

(c) Payment to a qualified fund.

(d) Payments to other funds or persons that constitute economic performance. [Reserved].

(e) Effective dates.

§1.461-7T Questions and answers relating to the effective dates of section 461(h).

Par. 5. Section 1.461-1 is amended by revising paragraph (a)(2) and the heading and text of paragraph (a)(3) to read as follows:

§1.461-1 General rule for taxable year of deduction.

(a) * * *

(2) *Taxpayer using an accrual method*—(i) *In general.* Under an accrual method of accounting, a liability (as defined in §1.446-1(c)(1)(ii)(B)) is incurred, and generally is taken into account for Federal income tax purposes, in the taxable year in which all the events have occurred that establish the fact of the liability, the amount of the liability can be determined with reasonable accuracy, and economic performance has occurred with respect to the liability. (See paragraph (a)(2)(iii)(A) of this section for examples of liabilities that may not be taken into account until a taxable year subsequent to the taxable year incurred, and see §§1.461-4 through 1.461-6 for rules relating to economic performance.) Applicable provisions of the Code, the Income Tax Regulations, and other guidance published by the Secretary prescribe the manner in which a liability that has been incurred is taken into account. For example, section 162 provides that a deductible liability generally is taken into account in the taxable year incurred through a deduction from gross income. As a further example, under section 263 or 263A, a liability that relates to the creation of an asset having a useful life extending substantially beyond the close of the taxable year is taken into account in the taxable year incurred through capitalization (within the meaning of §1.263A-1T(a)(5)), and may later affect the computation of taxable income through depreciation or otherwise over a period including subsequent taxable years, in accordance with applicable Code sections and guidance published by the Secretary. The principles of this paragraph (a)(2) also apply in the calculation of earnings and profits and accumulated earnings and profits.

(ii) *Uncertainty as to the amount of a liability.* While no liability shall be taken into account before economic performance and all of the events that fix the liability have occurred, the fact that the exact amount of the liability cannot be determined does not prevent a taxpayer from taking into account that part of the amount of the liability which can be computed with reasonable accuracy within the taxable year. For example, A renders services to B during the taxable year for which A charges $10,000. B admits a liability to A for $6,000 but contests the remainder. B may take into account only $6,000 as an expense for the taxable year in which the services were rendered. See §1.461-2 for rules that apply if a taxpayer transfers money or other property to provide for the satisfaction of certain contested liabilities.

(iii) *Alternative timing rules.* (A) If any provision of the Code requires a liability to be taken into account in a taxable year later than the taxable year provided in paragraph (a)(2)(i) of this section, the liability is taken into account as prescribed in that Code provision. See, for example, section 267 (transactions between related parties), section 404 (employee benefits), and section 464 (farming syndicates).

(B) If the liability of a taxpayer is subject to section 165 (losses), section 170 (charitable contributions), section 192 (black lung benefit trusts), section 194A (employer liability trusts), section 468 (mining and solid waste disposal reclamation and closing costs), or section 468A(a) (certain nuclear decommissioning costs), the liability is taken into account as determined under that section and not under section 461 or the regulations thereunder.

(C) Section 461 and the regulations thereunder do not apply to any amount allowable under a provision of the Code as a deduction for a reserve for estimated expenses.

(3) *Effect in current taxable year of improperly accounting for a liability in a prior taxable year.* Each year's return should be complete in itself, and taxpayers shall ascertain the facts necessary to make a correct return. The expenses, liabilities, or loss of one year generally cannot be used to reduce the income of a subsequent year. A taxpayer may not take into account in a return for a subsequent taxable year liabilities that, under the taxpayer's method of accounting, should have been taken into account in a prior taxable year. If a taxpayer ascertains that a liability should have been taken into account in a prior taxable year, the taxpayer should, if within the period of limitation, file a claim for credit or refund of any overpayment of tax arising therefrom. Similarly, if a taxpayer ascertains that a liability was improperly taken into account in a prior taxable year, the taxpayer should, if within the period of limitation, file an amended return and pay any additional tax due. However, except as provided in section 905(c) and the regulations thereunder, if a liability is properly taken into account in an amount based on a computation made with reasonable accuracy and the exact amount of the liability is subsequently determined in a later taxable year, the difference, if any, between such amounts shall be taken into account for the later taxable year.

* * * * *

Par. 6. Section 1.461-2 is amended by revising the heading, adding and reserving a new paragraph (a)(5), removing paragraphs (f), (g) and (h), and adding new paragraphs (f) and (g) to read as follows:

§1.461-2 Contested liabilities.

(a) * * *

(5) *Transfers to provide for the satisfaction of a liability described in paragraph (g) of §1.461-4. [Reserved].*

* * * * *

(f) *Treatment of money or property transferred to an escrowee, trustee,*

or court and treatment of any income attributable thereto—(1) *In general.* This paragraph (f) applies to any transfer of money or property by a taxpayer to an escrowee, trustee, or court (see paragraph (c)(1)(ii) and (iii) of this section) that is deductible under section 461(f) and paragraph (a)(1) of this section. A transfer to which this paragraph (f) applies creates a "461(f) fund," the taxation of which is governed solely by this paragraph (f). If more than one taxpayer transfers amounts to the same escrowee, trustee, or court in connection with the same contested liability, there is created for each transferor a separate 461(f) fund to which the rules of this paragraph (f) are separately applied.

(2) *Applicable rules.* The following rules apply to a 461(f) fund:

(i) Any transfer of property to a 461(f) fund is, for purposes of section 1001, a disposition of that property by the taxpayer for fair market value on the date of the transfer. Likewise, any transfer of property from a 461(f) fund to any person (including the taxpayer) is, for purposes of section 1001, a disposition of that property by the taxpayer for fair market value on the date of the transfer. For purposes of this paragraph (f)(2)(i), any money or property held by the 461(f) fund after the final resolution of the contest for the benefit of any person other than the person asserting the liability is treated as transferred to the taxpayer during the taxable year of the taxpayer in which the contest is resolved.

(ii) A taxpayer is considered the owner of any 461(f) fund created by a transfer of money or property by the taxpayer. Thus, any income, deductions, or credits of the fund are taken into account in the computation of the taxpayer's taxable income as if no transfer had occurred (except as otherwise provided in this paragraph (f)(2)).

(iii) A taxpayer is not permitted to deduct (or otherwise take into account) any income attributable to the transferred money or property ("fund income"), or the amount of any payment (including a payment of fund income) made from a 461(f) fund to the person asserting the liability.

(iv) A taxpayer must include in gross income the amount of any payment from a 461(f) fund (including a payment of fund income) made to the taxpayer or any other person except—

(A) Amounts paid to the person asserting the liability in satisfaction of the asserted liability;

(B) The amount of any taxes (other than Federal income taxes) attributable to fund income that are paid by the fund; and

(C) An amount equal to transfers to the fund that meet the requirements of a "recovery exclusion" under §1.111-1(a) (relating to recovery of tax benefit items).

(v) Any taxes (including Federal income taxes, whether paid by the taxpayer or paid by the fund and included in the taxpayer's gross income under paragraph (f)(2)(iv) of this section) that are attributable to fund income are considered transferred to the 461(f) fund, and thus deductible under paragraph (a) of this section. For any taxable year, the amount of this deduction equals the excess (if any) of—

(A) The tax that would be imposed on the taxpayer for the taxable year determined by taking into account fund income; over

(B) The tax that would be imposed on the taxpayer for the taxable year, determined without regard to fund income.

(vi) Any refund of taxes attributable to fund income is treated as a payment from the fund to the taxpayer and is included in gross income under paragraph (f)(2)(iv) of this section.

(3) *Example.* The following example illustrates the principles of this paragraph (f):

X, an accrual basis, calendar year taxpayer, contests a $9,000 liability asserted against X by Y for hazardous waste disposal services rendered by Y during 1990. In January 1991, X transfers assets having a fair market value of $9,000 and an adjusted basis of $7,000 to a trust in a transaction that satisfies the requirements of §1.461-2(c). Under section 461(f), X is allowed a $9,000 deduction for 1991. In addition, the asset transfer is considered a disposition of the assets for fair market value for purposes of section 1001. Thus, for 1991, X recognizes a $2,000 gain from the transfer and has a new basis of $9,000 in the assets.

During 1991, the fund assets earn $600, which is included in X's gross income for 1991. X pays, and takes a deduction for, taxes attributable to this amount. The only other deduction X is allowed with respect to the fund is a deduction for administrative expenses.

The fair market value of the transferred assets remains the same. In 1992, the contest is settled and assets having a fair market value of $8,000 are transferred from the fund to Y. X must include in gross income for the 1992 taxable year the $1,600 remaining in the fund. Any amounts earned by the fund in 1992 must also be included in X's gross income for 1992. The transfer to Y of assets having a fair market value of $8,000 is considered a disposition of the assets for purposes of section 1001. Because the fair market value of the assets has not changed, the disposition does not require X to recognize additional gain or loss for 1992.

(g) *Effective dates.* Paragraphs (a) through (e) of this section apply to transfers of money or property made in taxable years beginning after December 31, 1953, and ending after August 16, 1954. Paragraph (f) of this section applies to amounts transferred by a taxpayer on or after June 7, 1990.

Par. 7. Section 1.461-3T is redesignated as §1.461-7T.

Par. 8. Section 1.461(h)-4T is removed.

Par. 9. The following new sections are added immediately after §1.461-2 to read as follows:

§1.461-3 Prepaid interest.

[Reserved]

§1.461-4 Economic performance.

(a) *Introduction*—(1) *In general.* For purposes of determining whether an accrual basis taxpayer can treat the amount of any liability (as defined in §1.446-1(c)(1)(ii)(B)) as incurred, the all events test is not treated as met any earlier than the taxable year in which economic performance occurs with respect to the liability.

(2) *Overview.* Paragraph (b) of this section lists exceptions to the economic performance requirement. Paragraph (c) of this section locates the definitions of certain terms for purposes of section 461 (h) and the regulations thereunder. Paragraphs (d) through (j) of this section and §1.461-6 provide rules for determining when economic performance occurs. Section 1.461-5 provides rules relating to an exception under which certain recurring items may be incurred for the taxable year before the year during which economic performance occurs.

(b) *Exceptions to the economic performance requirement.* Paragraph (a)(2)(iii)(B) of §1.461-1 provides examples of liabilities that are taken into account under rules that operate without regard to the all events test (including economic performance).

(c) *Definitions.* The following cross-references identify certain terms defined for purposes of section 461(h) and the regulations thereunder:

(1) *Liability.* See paragraph (c)(1)(ii)(B) of §1.446-1 for the definition of "liability."

(2) *Payment.* See paragraph (g)(1)(ii) of this section for the definition of "payment."

(d) *Liabilities arising out of the provision of services, property, or the use of property*—(1) *In general.* The principles of this paragraph (d) determine when economic performance occurs with respect to liabilities arising out of the performance of services, the transfer of property, or the use of property. This paragraph (d) does not apply to liabilities described in paragraph (e) (relating to interest expense) or paragraph (g) (relating to breach of contract, worker's compensation, tort, etc.) of this section. In addition, except as otherwise provided in guidance published by the Secretary, this paragraph (d) does not apply to amounts paid pursuant to a notional principal amount contract.

(2) *Property or services provided to the taxpayer*—(i) *In general.* If the liability of a taxpayer arises out of the providing of property or services to the taxpayer by another person, economic performance occurs as the property or services are provided.

(ii) *Long-term contracts.* In the case of any liability of a taxpayer described in paragraph (d)(2)(i) of this section that is an expense attributable to a long-term contract with respect to which the taxpayer uses the percentage of completion method, economic performance occurs—

(A) As the property or services are provided; or, if earlier,

(B) As the taxpayer makes payment in satisfaction of the liability to the person providing the property or services.

(iii) *Cross-references.* See examples 5 through 9 of paragraph (d)(6) of this section. See paragraph (a)(2)(iii)(A) of §1.461-1, and example 1 of paragraph (d)(6) of this section, for illustration of the interaction between section 461(h) and employee benefit provisions including sections 404, 404A, and 419. See paragraph (d)(5) of this section for rules relating to when a taxpayer may treat property or services as provided to the taxpayer.

(3) *Use of property provided to the taxpayer.* If the liability of a taxpayer arises out of the use of property by the taxpayer, economic performance occurs ratably over the period of time the taxpayer is entitled to the use of the property. See examples 7 and 10 of paragraph (d)(6) of this section.

(4) *Services and property provided by the taxpayer*—(i) *In general.* If the liability of a taxpayer requires the taxpayer to provide services or property to another person, economic performance occurs as the taxpayer incurs costs (within the meaning of §1.446-1(c)(1)(ii)) in connection with the satisfaction of the liability. See examples 2 through 4 of paragraph (d)(6) of this section.

(ii) *Barter transactions.* If the liability of a taxpayer requires the taxpayer to provide services, property, or the use of property, and arises out of the use of property by the taxpayer, or out of the provision of property or services to the taxpayer by another person, economic performance occurs to the extent of the lesser of—

(A) The cumulative extent to which the taxpayer incurs costs (within the meaning of §1.446-1(c)(1)(ii)) in connection with its liability to provide the property or services; or

(B) The cumulative extent to which the property or services are provided to the taxpayer.

(5) *Rules relating to the provision of property or services to a taxpayer.* The following rules apply for purposes of this paragraph (d):

(i) Property and services provided to a taxpayer include property and services provided to another person at the direction of the taxpayer.

(ii) A taxpayer is permitted to treat property or services as provided to the taxpayer as the taxpayer makes payment to the person providing the property or services (as defined in paragraph (g)(1)(ii) of this section), if the taxpayer can reasonably expect the person to provide the property or services within 3 1/2 months after the date of payment.

(iii) A taxpayer is permitted to treat property as provided to the taxpayer when the property is delivered or accepted, or when title to the property passes. The method used by the taxpayer to determine when property is provided is a method of accounting that must comply with the rules of §1.446-1(e). Thus, the method of determining when property is provided must be used consistently from year to year, and cannot be changed without the consent of the Commissioner.

(iv) If different services or items of property are required to be provided to a taxpayer under a single contract or agreement, economic performance generally occurs over the time each service is provided and as each item of property is provided. However, if a service or item of property to be provided to the taxpayer is incidental to other services or property to be provided under a contract or agreement, the taxpayer is not required to allocate any portion of the total contract price to the incidental service or property. For purposes of this paragraph (d)(5)(iv), property or services are treated as incidental only if—

(A) The cost of the property or services is treated on the taxpayer's books and records as part of the cost of the other property or services provided under the contract; and

(B) The aggregate cost of the property or services does not exceed 10 percent of the total contract price.

(6) *Examples.* The following examples illustrate the principles of this paragraph (d). For purposes of these examples, it is assumed that the requirements of the all events test other than economic performance have been met, and that the recurring item exception is not used.

Example 1. X corporation, a calendar year, accrual method taxpayer, maintains a vested vacation pay plan pursuant to which the employees of X are unconditionally entitled to vacation pay based on the amount of work performed during any taxable year. During 1990 the employees of X, who all use a calendar taxable year and the cash method of accounting, earn $150,000 of vacation pay. X pays $25,000 of the vacation pay on or before March 15, 1991. The remainder of the vacation pay is paid after March 15, 1991.

Under paragraph (d)(2) of this section, economic performance with respect to the liability for vacation pay occurs as the employees provide services to X. Thus, $150,000 is incurred by X for the 1990 taxable year.

However, amounts paid after March 15, 1991, may be deferred compensation subject to section 404(a)(5), depending on the facts and circumstances (see §1.404(b)-1T, Q&A-2). Assuming that section 404(a)(5) applies, the $125,000 that X does not pay until after March 15, 1991, is not deductible until the taxable year in which the vacation pay is includible in the gross income of employees participating in the plan, even though economic performance has occurred with respect to the amount. The result would be the same if X maintained this plan for the benefit of calendar year, cash-basis

independent contractors. See section 404(d).

Example 2. X corporation, a calendar year, accrual method taxpayer, is an oil company. During March 1990, X enters into an oil and gas lease. In November 1990, X installs a platform and commences drilling. The lease obligates X to remove its offshore platform and well fixtures upon abandonment of the well or termination of the lease. During 1998, X removes the platform and well fixtures at a cost of $200,000.

Under paragraph (d)(4) of this section, economic performance with respect to X's liability to remove the offshore platform and well fixtures occurs as X incurs costs in connection with that liability. X incurs these costs in 1998 as, for example, X's employees provide X with removal services (see paragraph (d)(2) of this section). Consequently, X incurs $200,000 for the 1998 taxable year. Alternatively, assume that during 1990 X pays Z $130,000 to remove the platform and fixtures, and that Z performs these removal services in 1998. Under paragraph (d)(2) of this section, X does not incur this cost until Z performs the services. Thus, economic performance with respect to the $130,000 X pays Z occurs in 1998.

Example 3. W corporation, a calendar year, accrual method taxpayer, sells tractors under a three-year warranty that obligates W to make any reasonable repairs to each tractor it sells. During 1990, W sells ten tractors. In 1992 W repairs, at a cost of $5,000, two tractors sold during 1990.

Under paragraph (d)(4) of this section, economic performance with respect to W's liability to perform services under the warranty occurs as W incurs costs in connection with that liability. W incurs these costs in 1992 as, for example, replacement parts are provided to W (see paragraph (d)(2) of this section). Consequently, $5,000 is incurred by W for the 1992 taxable year.

Example 4. W corporation, a calendar year, accrual method taxpayer, manufactures machine tool equipment. In November 1990, W contracts to provide X corporation with certain equipment on January 1, 1993. The contract is not a long-term contract under section 460 or §1.451-3. In December 1990, W pays Y corporation $100,000 for certain parts necessary to manufacture the equipment. The parts are provided to W in May 1991. W's employees provide W with services necessary to manufacture the equipment during 1991, for which W pays $150,000 compensation in 1991. In December 1990, W pays Z corporation $50,000 to lease from Z, for the one-year period beginning on January 1, 1991, testing equipment to perform quality control tests required by the agreement with X.

Under paragraph (d)(4) of this section, economic performance with respect to W's liability to provide the equipment to X occurs as W incurs costs in connection with that liability. W incurs these costs during 1991, as services, property, and the use of property necessary to manufacture the equipment are provided to W (see paragraphs (d)(2) and (d)(3) of this section). Thus, $300,000 is incurred by W for the 1991 taxable year. See section 263A and the regulations thereunder for rules relating to the capitalization and inclusion in inventory of these incurred costs.

Alternatively, assume that the agreement with X is a long- term contract as defined in section 460(f), and that W takes into account all items with respect to such contracts under the percentage of completion method as described in section 460(b)(1). Under paragraph (d)(2)(ii) of this section, the $100,000 W pays in 1990 for parts is incurred for the 1990 taxable year, for purposes of determining the percentage of completion under section 460(b)(1)(A). W's other costs under the agreement are incurred for the 1991 taxable year for this purpose.

Example 5. LP1, a calendar year, accrual method limited partnership, owns the working interest in a parcel of property containing oil and gas. During December 1990, LP1 enters into a turnkey contract with Z corporation pursuant to which LP1 pays Z $200,000 and Z is required to provide a completed well by the close of 1992. In May 1992, Z commences drilling the well, and, in December 1992, the well is completed.

Under paragraph (d)(2) of this section, economic performance with respect to LP1's liability for drilling and development services provided to LP1 by Z occurs as the services are provided. Consequently, $200,000 is incurred by LP1 for the 1992 taxable year.

Example 6. X corporation, a calendar year, accrual method taxpayer, is an automobile dealer. On January 15, 1990, X becomes a member of N, a non-profit corporation that provides advertising and promotional activities with respect to automobiles sold by X and other member dealers. As a member of the non-profit corporation, X agrees to pay an additional $10 to Y, the manufacturer of the automobiles, for each automobile purchased by X from Y. Y, acting as an agent for the member dealers, has agreed to remit this amount to N to be used by N for advertising and promotional activities.

During 1990, X purchases from Y 1,000 new automobiles and pays to Y an additional $10,000 as provided in the membership agreement. Y, in turn, pays the $10,000 to N. N uses this $10,000 to provide advertising and promotional activities during 1992.

Under paragraph (d)(2) of this section, economic performance with respect to X's liability for advertising and promotional services provided to X by N occurs as the services are provided. Consequently, $10,000 is incurred by X for the 1992 taxable year.

Example 7. V corporation, a calendar year, accrual method taxpayer, charters aircraft. On December 20, 1990, V leases a jet aircraft from L for the four-year period that begins on January 1, 1991. The lease obligates V to pay L a base rental of $500,000 per year. In addition, the lease requires V to pay $25 to an escrow account for each hour that the aircraft is flown. The escrow account funds are to be used by L to make necessary repairs to the aircraft. Any amount remaining in the escrow account upon termination of the lease is payable to V. During 1991, the aircraft is flown 1,000 hours and V pays $25,000 to the escrow account. The aircraft is repaired by L in 1993. In 1994, $20,000 is released from the escrow account to pay L for the repairs.

Under paragraph (d)(3) of this section, economic performance with respect to V's base rental liability occurs ratably over the period of time V is entitled to use the jet aircraft. Consequently, the $500,000 rent is incurred by V for the 1991 taxable year and for each of the next three taxable years. Under paragraph (d)(2) of this section, economic performance with respect to the liability to place amounts in escrow occurs as the aircraft is repaired. Consequently, V incurs $20,000 for the 1993 taxable year.

Example 8. The facts are the same as in Example 7, except that on December 10, 1991, one of the aircraft's engines fails. On December 15, 1991, $20,000 is released from the escrow account to L in payment for repairs to the engine that V reasonably expects L to perform in January 1992. Economic performance with respect to V's liability to L for repair services occurs as L provides the services. However, under paragraph (d)(5)(ii) of this section, V is permitted to treat the repair services as provided to V as V pays L for the services. If V so treats the services as provided, V incurs $20,000 for the 1991 taxable year.

Example 9. W corporation, a calendar year, accrual method taxpayer, is an investment banking firm. W has an ongoing contract with Z, an office supply vendor, under which Z is obligated to provide office supplies to W. On December 15, 1990, W pays Z $2,000 for office supplies that W reasonably expects Z to deliver by the end of January 1991. Economic performance with respect to W's liability for property to be provided by Z occurs as Z provides the property. However, under paragraph (d)(5)(ii) of this section, W is permitted to treat the supplies as provided to W as W makes payment to Z for the supplies. If W so treats the property as provided, W incurs $2,000 for the 1990 taxable year.

Example 10. X corporation, a calendar year, accrual method taxpayer, manufactures and sells electronic circuitry. On November 15, 1990, X enters into a contract with Y that entitles X to the exclusive use of a patent owned by Y for the five-year period beginning on January 1, 1991. Pursuant to the contract, X pays Y $100,000 on December 30, 1990.

Under paragraph (d)(3) of this section, economic performance with respect to X's liability for the use of property occurs ratably over the period of time X is entitled to use the patent. Consequently, $20,000 is incurred by X for 1991 and for each of the succeeding four taxable years.

(e) *Interest.* In the case of interest, economic performance occurs as the interest cost economically accrues, in accordance with the principles of relevant provisions of the Code.

(f) *Liabilities under notional principal amount contracts.* [Reserved]

(g) *Certain liabilities for which payment is economic performance—* (1) *In general—*(i) *Person to which payment must be made.* In the case of liabilities described in paragraphs (g)(2) through (7) of this section, economic performance occurs when, and to the extent that, payment is made to the person to which the liability is owed. Thus, except as otherwise provided in §1.461-6, economic performance does not occur as a taxpayer makes payments in connection with such a liability to any other person, including a trust, escrow account, court-administered

fund, or any similar arrangement, unless the payments constitute payment to the person to which the liability is owed under paragraph (g)(1)(ii)(B) of this section. Instead, economic performance occurs as payments (including payments of investment income attributable to transferred amounts) are made from that other person or fund to the person to which the liability is owed. For example, economic performance occurs as payments are made from a court-administered fund to a plaintiff prevailing in a tort suit. For rules relating to the taxation of amounts transferred to a fund, see section 468B(g) and the regulations thereunder.

(ii) *Payment to person to which liability is owed.* Paragraph (d)(5) of this section provides that in certain cases a taxpayer may treat services or property as provided to the taxpayer as the taxpayer makes payments to the person providing the services or property. In addition, this paragraph (g) provides that in the case of certain liabilities of a taxpayer, economic performance occurs as the taxpayer makes payment to persons specified therein. For these and all other purposes of section 461(h) and the regulations thereunder:

(A) *Payment.* The term "payment" has the same meaning as for determining whether a taxpayer using the cash receipts and disbursements method of accounting has made a payment. Thus, for example, payment includes the furnishing of cash or cash equivalents. Payment does not include the furnishing of a note or other evidence of indebtedness of the taxpayer, whether or not the evidence is guaranteed by any other instrument (including a standby letter of credit) or by any third party (including a government agency). As a further example, payment does not include a promise of the taxpayer to provide property or services in the future (whether or not the promise is evidenced by a contract or other written agreement). In addition, payment does not include an amount transferred as a loan, refundable deposit, or contingent payment with respect to which the taxpayer may be, or become, entitled to receive a refund or credit.

(B) *Person to which payment is made.* Payment to another person is accomplished if paragraph (g)(1)(ii)(A) of this section is satisfied and a cash basis taxpayer in the position of that person would be treated as having actually or constructively received the amount of the payment as gross income under the principles of section 451 (without regard to section 104(a) or any other provision that specifically excludes the amount from gross income). Thus, for example, the purchase of an annuity contract or any other asset generally does not constitute payment to the person to which a liability is owed unless the ownership of the contract or other asset is transferred to that person.

(C) *Payment in the case of liabilities that are assumed in connection with the sale of a trade or business—(1) In general.* If, in connection with the sale or exchange of a trade or business by a taxpayer, the purchaser expressly assumes a liability arising out of the trade or business that the taxpayer (but for the economic performance requirement) would have been entitled to incur as of the date of the sale, the taxpayer is deemed to make payments with respect to the liability as the amount of the liability is included in the amount realized on the transaction by the taxpayer. See §1.1001-2 for rules relating to the inclusion in amount realized from a discharge of liabilities resulting from a sale or exchange.

(2) Trade or business. For purposes of this paragraph (g)(1)(ii)(C), a trade or business is a specific group of activities carried on by the taxpayer for the purpose of earning income or profit if every operation that is necessary to the process of earning income or profit is included in such group. Thus, for example, such a group of activities generally must include the collection of income and the payment of expenses.

(3) Tax avoidance. This paragraph (g)(1)(ii)(C) does not apply if the district director determines that tax avoidance is one of the taxpayer's principal purposes for the sale of a trade or business.

(iii) *Person.* For purposes of this paragraph (g), "person" has the same meaning as in section 7701(a)(1), except that it also includes any foreign state, the United States, any State or political subdivision thereof, any possession of the United States, or any agency or instrumentality of any of the foregoing.

(iv) *Assignments.* If a person that has a right to receive payment in satisfaction of a liability described in paragraphs (g)(2) through (5) of this section makes a valid assignment of that right to a second person, or if the right is assigned to the second person through operation of law, then payment to the second person in satisfaction of that liability constitutes payment to the person to which the liability is owed.

(2) *Liabilities arising under a workers' compensation act or out of any tort, breach of contract, or violation of law.* If the liability of a taxpayer requires a payment or series of payments to another person and arises under any workers' compensation act or arises out of any tort, breach of contract, or violation of law, economic performance occurs as payment is made to the person to which the liability is owed. See examples 1 and 2 of paragraph (g)(8) of this section. For purposes of this paragraph (g)(2)—

(i) A liability to make payments for services, property, or other consideration provided under a contract is not a liability arising out of a breach of that contract unless the payments are in the nature of incidental, consequential, or liquidated damages; and

(ii) A liability arising out of a tort, breach of contract, or violation of law includes a liability arising out of the settlement of a dispute in which a tort, breach of contract, or violation of law is alleged.

(3) *Rebates and refunds.* If the liability of a taxpayer is to pay a rebate or refund to another person (whether paid in property, money, or as a reduction in the price of goods or services to be provided in the future by the taxpayer), economic performance occurs as payment is made to the person to which the liability is owed. This paragraph (g)(3) applies to all rebates, refunds and payments or transfers in the nature of a rebate or refund regardless of whether they are characterized as a deduction from gross income, an adjustment to gross receipts or total sales, or an adjustment or addition to cost of goods sold. In the case of a rebate or refund made as a reduction in the price of goods or services to be provided in

the future by the taxpayer, "payment" is deemed to occur as the taxpayer would otherwise be required to recognize income resulting from a disposition at an unreduced price. For purposes of determining whether the recurring item exception of §1.461-5 applies, a liability that arises out of a tort, breach of contract, or violation of law is not considered a rebate or refund. See example 3 of paragraph (g)(8) of this section.

(4) *Awards, prizes, and jackpots.* If the liability of a taxpayer is to provide an award, prize, jackpot, or other similar payment to another person, economic performance occurs as payment is made to the person to which the liability is owed. See examples 4 and 5 of paragraph (g)(8) of this section.

(5) *Insurance, warranty, and service contracts.* If the liability of a taxpayer arises out of the provision to the taxpayer of insurance, or a warranty or service contract, economic performance occurs as payment is made to the person to which the liability is owed. See examples 6 through 9 of paragraph (g)(8) of this section. For purposes of this paragraph (g)(5)—

(i) A warranty or service contract is a contract that a taxpayer enters into in connection with property bought or leased by the taxpayer, pursuant to which the other party to the contract promises to replace or repair the property under specified circumstances.

(ii) The term "insurance" has the same meaning as for purposes of determining the deductibility of amounts paid or incurred for insurance under section 162.

(6) *Taxes*—(i) *In general.* Except as otherwise provided in this paragraph (g)(6), if the liability of a taxpayer is to pay a tax, economic performance occurs as the tax is paid to the governmental authority that imposed the tax. For purposes of this paragraph (g)(6), a tax does not include a charge collected by a governmental authority for specific extraordinary property or services provided to a taxpayer by the governmental authority. Examples of such a charge include the purchase price of a parcel of land sold to a taxpayer by a governmental authority and a charge for labor engaged in by government employees to improve that parcel. In certain cases, a liability to pay a tax is permitted to be taken into account in the taxable year before the taxable year during which economic performance occurs under the recurring item exception of §1.461-5. See example 10 of paragraph (g)(8) of this section.

(ii) *Licensing fees.* If the liability of a taxpayer is to pay a licensing or permit fee required by a governmental authority, economic performance occurs as the fee is paid to the governmental authority, or as payment is made to any other person at the direction of the governmental authority.

(iii) *Exceptions*—(A) *Real property taxes.* If a taxpayer has made a valid election under section 461(c), the taxpayer's accrual for real property taxes is determined under section 461(c). Otherwise, economic performance with respect to a property tax liability occurs as the tax is paid, as specified in paragraph (g)(6)(i) of this section.

(B) *Certain foreign taxes.* If the liability of a taxpayer is to pay an income, war profits, or excess profits tax that is imposed by the authority of any foreign country or possession of the United States and is creditable under section 901 (including a creditable tax described in section 903 that is paid in lieu of such a tax), economic performance occurs when the requirements of the all events test (as described in §1.446-1(c)(1)(ii)) other than economic performance are met, whether or not the taxpayer elects to credit such taxes under section 901(a).

(7) *Other liabilities.* In the case of a taxpayer's liability for which economic performance rules are not provided elsewhere in this section, economic performance occurs as the taxpayer makes payments in satisfaction of the liability to the person to which the liability is owed. This paragraph (g)(7) applies only if the liability cannot properly be characterized as a liability covered by rules provided elsewhere in this section. If a liability may properly be characterized as, for example, a liability arising from the provision of goods or services to, or by, a taxpayer, the determination as to when economic performance occurs with respect to that liability is made under paragraph (d) of this section and not under this paragraph (g)(7).

(8) *Examples.* The following examples illustrate the principles of this paragraph (g). For purposes of these examples, it is assumed that the elements of the all events test other than economic performance have been met and, except as otherwise provided, that the recurring item exception is not used.

Example 1. During the period 1970 through 1975, Z corporation, a calendar year, accrual method taxpayer, manufactured and distributed industrial products that contained carcinogenic substances. In 1990, a number of lawsuits are filed against Z alleging damages due to exposure to these products. In settlement of a lawsuit maintained by A, Z agrees to purchase an annuity contract that will provide annual payments to A of $50,000 for a period of 25 years. On December 15, 1990, Z pays W, an unrelated life insurance company, $491,129 for such an annuity contract. Z retains ownership of the annuity contract.

Under paragraph (g)(2) of this section, economic performance with respect to Z's liability to A occurs as each payment is made to A. Consequently, $50,000 is incurred by Z for each taxable year that a payment is made to A under the annuity contract. (Z must also include in income a portion of amounts paid under the annuity, pursuant to section 72.) The result is the same if in 1990 Z secures its obligation with a standby letter of credit.

If, instead, Z transfers ownership of the annuity contract to A, an amount equal to the fair market value of the annuity on the date of transfer is incurred by Z in the taxable year of the transfer (see paragraph (g)(1)(ii)(B) of this section).

Example 2. Assume the same facts as in Example 1, except that Z is required by court order to pay $15,000,000 to a fund that will assume sole liability for a specified class of tort claims arising out of the manufacture and distribution of Z products containing carcinogenic substances.

If Z does not (or cannot) elect the application of section 468B (designated settlement fund), then under paragraph (g)(1)(i) and (g)(2) of this section, economic performance with respect to the $15,000,000 liability occurs only as payments are made to the underlying tort claimants from the fund. Consequently, Z incurs only those amounts actually paid to the claimants from the fund during the taxable year. If Z properly elects the application of section 468B, economic performance with respect to the $15,000,000 liability occurs as Z makes payments to the fund.

Example 3. X corporation, a calendar year, accrual method taxpayer, manufactures and sells hardware products. X enters into agreements that entitle each of its distributors to a rebate (or discount on future purchases) from X based on the amount of purchases made by the distributor from X during any calendar year. During the 1990 calendar year, X becomes liable to pay a $2,000 rebate to distributor A. X pays A $1,200 of the rebate on January 15, 1991, and the remaining $800 on October 15, 1991. Assume the rebate is deductible (or allowable as an adjustment to gross receipts or cost of goods sold) when incurred.

If X does not, or is not entitled to, adopt the recurring item exception described in §1.461-5 with respect to rebates and refunds, then under

paragraph (g)(3) of this section, economic performance with respect to the $2,000 rebate liability occurs in 1991. However, if X has made a proper election under §1.461-5, and as of December 31, 1990, all events have occurred that determine the fact of the rebate liability, X incurs $1,200 for the 1990 taxable year. Because economic performance (payment) with respect to the remaining $800 does not occur until October 15, 1991 (more than 8 1/2 months after the end of 1990), X cannot use the recurring item exception (see §1.461-5). Thus, the $800 is not incurred by X until the 1991 taxable year. The result in this example would be the same if, instead of making the cash payments to A, during 1991 X adjusts the price paid by A for hardware purchased by A that is delivered to A during 1991.

Example 4. W corporation, a calendar year, accrual method taxpayer, produces and sells breakfast cereal. W conducts a contest pursuant to which the winner is entitled to $10,000 per year for a period of 20 years. On December 1, 1990, A is declared the winner of the contest and is paid $10,000 by W. In addition, on December 1 of each of the next nineteen years, W pays $10,000 to A.

Under paragraph (g)(4) of this section, economic performance with respect to the $200,000 contest liability occurs as each of the $10,000 payments is made by W to A. Consequently, $10,000 is incurred by W for the 1990 taxable year and for each of the succeeding nineteen taxable years.

Example 5. Y corporation, a calendar year, accrual method taxpayer, owns a casino that contains progressive slot machines. A progressive slot machine provides a guaranteed jackpot amount that increases as money is gambled through the machine until the jackpot is won or until a maximum predetermined amount is reached. On July 1, 1991, the guaranteed jackpot amount on one of Y's slot machines reaches the maximum predetermined amount of $50,000. On February 1, 1992, the $50,000 jackpot is paid to B.

Under paragraph (g)(4) of this section, economic performance with respect to the $50,000 jackpot liability occurs on the date the jackpot is paid to B. Consequently, $50,000 is incurred by Y for the 1992 taxable year.

Example 6. X corporation, a calendar year, accrual method taxpayer, manufactures and distributes automobiles. On December 1, 1990, X enters into a contract with Z, a property and casualty insurance company unrelated to X. Under the contract, X must pay Z $25 for each automobile manufactured by X during the 1991 calendar year. This amount is payable monthly based on the automobiles manufactured during the preceding month. In return, Z must satisfy any liability of X to a third party for damages attributable to a defect in these automobiles (a "1991 product liability loss"). X is not entitled to a refund, credit or other benefit under the contract. X manufactures 100,000 automobiles during the 1991 calendar year.

Assuming the arrangement constitutes insurance, under paragraph (g)(5) of this section economic performance occurs over the 1991 taxable year, as the premium is paid. Consequently, the $2,500,000 insurance premium is incurred by X for the 1991 taxable year.

Example 7. V corporation, a calendar year, accrual method taxpayer, manufactures toys. V enters into a contract with W, an unrelated insurance company, on December 15, 1990. The contract obligates V to pay W a premium of $500,000 before the end of 1993. The contract obligates W to satisfy any liability of V resulting from claims made during 1991 or 1992 against V by any third party for damages attributable to defects in toys manufactured by V. Pursuant to the contract, V pays W a premium of $500,000 on September 1, 1993.

Assuming the arrangement constitutes insurance, economic performance occurs as the premium is paid. Thus, $500,000 is incurred by V for the 1993 taxable year.

Example 8. Y corporation, a calendar year, accrual method taxpayer, is a common carrier. On December 15, 1990, Y contracts to pay Z, an unrelated insurance company, $360,000 in 1991. In return, Z must satisfy any liability of Y for damages that arises under a workers' compensation act or out of any tort if the event that causes the damages occurs during 1991 or 1992. Y pays $360,000 to Z during Y's 1991 taxable year.

Assume that the arrangement constitutes insurance under section 162. Economic performance with respect to a liability for insurance occurs as the premiums for the insurance are paid. Consequently, $360,000 is incurred by Y for the 1991 taxable year. The period for which the $360,000 amount is permitted to be taken into account is determined under the capitalization rules because the insurance contract is an asset having a useful life extending substantially beyond the close of the taxable year.

Example 9. Assume the same facts as in Example 8, except that Y is obligated to pay the first $5,000 of any damages covered by the arrangement with Z. Y is, in effect, self-insured to the extent of this $5,000 "deductible." Thus, under paragraph (g)(1) of this section, economic performance with respect to the $5,000 liability does not occur until the amount is paid to the person to which the tort or workers' compensation liability is owed (whether paid to that person by Y or Z).

Example 10. The laws of State A provide that every person owning personal property located in State A on the first day of January shall be liable for tax thereon and that a lien for such tax shall attach as of such date. In addition, the laws of State A provide that 60% of the tax is due on the first day of December following the lien date and the remaining 40% is due on the first day of July of the succeeding year. On January 1, 1990, X corporation, a calendar year, accrual method taxpayer, owns personal property located in State A. State A imposes a $10,000 tax on X with respect to that property on January 1, 1990. X pays State A $6,000 of the tax on December 1, 1990, and the remaining $4,000 on July 1, 1991.

Under paragraph (g)(6) of this section, economic performance with respect to $6,000 of the tax liability occurs on December 1, 1990. Consequently, $6,000 is incurred by X for the 1990 taxable year. Economic performance with respect to the remaining $4,000 of the tax liability occurs on July 1, 1991. If X has adopted the recurring item exception described in §1.461-5 as a method of accounting for taxes, and as of December 31, 1990, all events have occurred that determine the liability of X for the remaining $4,000, X also incurs $4,000 for the 1990 taxable year. If X does not adopt the recurring item exception, the $4,000 is not incurred by X until the 1991 taxable year.

(h) *Liabilities arising under the Nuclear Waste Policy Act of 1982.* Notwithstanding the principles of paragraph (d) of this section, economic performance with respect to the liability of an owner or generator of nuclear waste to make payments to the Department of Energy ("DOE") pursuant to a contract required by the Nuclear Waste Policy Act of 1982 (Pub. L. 97-425, 42 U.S.C. 10101-10226 (1982)) occurs as each payment under the contract is made to DOE and not when DOE satisfies its obligations under the contract. This rule applies to the continuing fee required by 42 U.S.C. 10222(a)(2) (1982), as well as the one-time fee required by 42 U.S.C. 10222(a)(3) (1982). For rules relating to when economic performance occurs with respect to interest, see paragraph (e) of this section.

(i) [Reserved].

(j) *Special effective dates and transitional rules.* (1) Except as otherwise provided in paragraph (j)(2) of this section, section 461(h) and this §1.461-4 apply to liabilities that would, under the law in effect before the enactment of section 461(h), be allowable as a deduction or otherwise incurred after July 18, 1984. For example, this effective date applies to liabilities arising under a workers' compensation act or out of any tort. See §1.461-7T for rules relating to the effective dates of section 461(h).

(2) Rules for liabilities contained in paragraph (g) of this section (other than liabilities arising under a workers' compensation act or out of any tort) apply to liabilities that would, under the law in effect before the enactment of section 461(h), be allowable as a deduction or otherwise incurred for taxable years beginning after December 31, 1989. Thus, there is no section 481(a) adjustment with respect to any change in the timing of when a liability is incurred that may result from compliance with paragraph (g) of this section. See §1.461-7T for an explanation of the principles of this "cut-off method." A taxpayer is permitted, however, to elect to change the timing of when a liability described in this paragraph (j)(2) is incurred through a full-year change in method of accounting pursuant to the procedures and principles of §1.461-7T, subject to the conditions of section 4 of Rev. Proc. 84-74, 1984-2 C.B. 736 (as amended). The Commissioner may provide additional published guidance relating

to these changes, including rules regarding any required adjustment under section 481(a).

§1.461-5 Recurring item exception.

(a) *In general.* Except as otherwise provided in paragraph (c) of this section, a taxpayer using an accrual method of accounting may adopt the recurring item exception described in paragraph (b) of this section as a method of accounting for one or more types of recurring items incurred by the taxpayer.

(b) *Requirements for use of the exception*—(1) *General rule.* Under the recurring item exception, a liability is treated as incurred for a taxable year if—

(i) As of the end of that taxable year, all events have occurred that establish the fact of the liability and the amount of the liability can be determined with reasonable accuracy;

(ii) Economic performance with respect to the liability occurs on or before the earlier of—

(A) The date the taxpayer files a timely (including extensions) return for that taxable year; or

(B) The 15th day of the 9th calendar month after the close of that taxable year;

(iii) The liability is recurring in nature; and

(iv) Either—

(A) The amount of the liability is not material; or

(B) The accrual of the liability for that taxable year results in a better matching of the liability with the income to which it relates than would result from accruing the liability for the taxable year in which economic performance occurs.

(2) *Amended returns.* A taxpayer may file an amended return treating a liability as incurred under the recurring item exception for a taxable year if economic performance with respect to the liability occurs after the taxpayer files a return for that year, but within 8 1/2 months after the close of that year.

(3) *Liabilities that are recurring in nature.* A liability is recurring if it can generally be expected to be incurred from one taxable year to the next. However, a taxpayer may treat such a liability as recurring in nature even if it is not incurred by the taxpayer in each taxable year. In addition, a liability that has never previously been incurred by a taxpayer may be treated as recurring if it is reasonable to expect that the liability will be incurred on a recurring basis in the future.

(4) *Materiality requirement.* For purposes of this paragraph (b):

(i) In determining whether a liability is material, consideration shall be given to the amount of the liability in absolute terms and in relation to the amount of other items of income and expense attributable to the same activity.

(ii) A liability is material if it is material for financial statement purposes under generally accepted accounting principles.

(iii) A liability that is immaterial for financial statement purposes under generally accepted accounting principles may be material for purposes of this paragraph (b).

(5) *Matching requirement.* (i) In determining whether the matching requirement of paragraph (b)(1)(iv)(B) of this section is satisfied, generally accepted accounting principles are an important factor, but are not dispositive.

(ii) In the case of a liability described in paragraph (g)(3) (rebates and refunds), paragraph (g)(4) (awards, prizes, and jackpots), paragraph (g)(5) (insurance, warranty, and service contracts), or paragraph (g)(6) (taxes) of §1.461-4, the matching requirement of paragraph (b)(1)(iv)(B) of this section shall be deemed satisfied.

(c) *Types of liabilities not eligible for treatment under the recurring item exception.* The recurring item exception does not apply to any liability of a taxpayer described in paragraph (e) (interest), paragraph (g)(2) (workers' compensation, tort, breach of contract, and violation of law), or paragraph (g)(7) (other liabilities) of §1.461-4. Moreover, the recurring item exception does not apply to any liability incurred by a tax shelter, as defined in section 461(i) and §1.448-1T(b).

(d) *Time and manner of adopting the recurring item exception.* If a taxpayer has never incurred a type of liability (as described in Q&A-3 (d) of §1.461-7T) prior to its first taxable year beginning after December 31, 1989, the taxpayer is permitted to adopt the recurring item exception as a method of accounting for that type of liability, but only for its first taxable year beginning after December 31, 1989, that the type of liability is incurred by the taxpayer. If a taxpayer has incurred a type of liability prior to its first taxable year beginning after December 31, 1989, the taxpayer is granted the consent of the Commissioner to change to the recurring item exception method of accounting for that type of liability, but only for its first taxable year beginning after December 31, 1989. In either of these cases, the recurring item exception must be adopted as prescribed in Q&A-7 (b) of §1.461-7T, applied by substituting the appropriate taxable year described above in this paragraph (d) for "the taxable year that includes July 19, 1984," and any resulting section 481(a) adjustment is taken into account ratably over a 3-year adjustment period, pursuant to the principles of Q&A-8 and Q&A-9 of §1.461-7T. In all other cases, any change to or from the recurring item exception method of accounting (for either a type of item or for all items) is a change in method of accounting subject to section 446(e) and §1.446-1(e).

(e) *Examples.* The following examples illustrate the principles of this section:

Example 1. Y corporation, a calendar year, accrual method taxpayer, manufactures and distributes video cassette recorders. Y offers to refund the price of the recorder to any purchaser not satisfied with the recorder. During the 1990 taxable year, 100 purchasers request a refund of the $500 purchase price. Y refunds $30,000 on or before September 15, 1991, and the remaining $20,000 after such date but before the end of the 1991 taxable year.

Under paragraph (g)(3) of §1.461-4, economic performance with respect to $30,000 of the refund liability occurs on or before September 15, 1991. Assume the refund is deductible (or allowable as an adjustment to gross receipts or cost of goods sold) when incurred. If Y does not, or is not entitled to, adopt the recurring item exception with respect to rebates and refunds, $30,000 is incurred by Y for the 1991 taxable year. However, if Y has made a proper election under this section, and as of December 31, 1990, all events have occurred that determine the fact of the liability for the $30,000, Y incurs that amount for the 1990 taxable year. Because economic performance (payment) with respect to the remaining $20,000 occurs after September 15, 1991 (more than 8 1/2 months after the end of 1990), that amount is not eligible for recurring item treatment under this section. Thus, the $20,000 amount is not incurred by Y until the 1991 taxable year.

Example 2. X corporation, a calendar year, accrual method taxpayer, is a manufacturer of printing presses. Under its method of account-

ing, X recognizes sales income upon execution of the sales contract, rather than upon shipment. In December 1990, X contracts to pay C, a common carrier, $10,000 upon June 1991 delivery of 10 presses sold by X in November 1990. X generally incurs such shipping costs from one taxable year to the next. Economic performance with respect to the amount paid to C for shipping services occurs in June 1991, as C provides the shipping services (see §1.461-4(d)(2)).

Assume that all the events that fix and determine X's $10,000 liability occur in 1990. If X adopts the recurring item exception, X may deduct $10,000 for its 1990 taxable year, even though economic performance does not occur until June 1991. The $10,000 expense relates to 1990 income from the sale. Thus, better matching results from its accrual in the taxable year preceding the year during which economic performance occurs.

Example 3. Assume the same facts as in Example 2, and assume that X files its income tax return for 1990 on March 15, 1991. Under paragraph (b)(1)(ii) of this section, the costs are ineligible for recurring item exception treatment because economic performance with respect to the costs does not occur before X files a return for the taxable year for which the item would have been deducted under the exception. However, since economic performance occurs within 8 1/2 months after 1990, X may file an amended return claiming the deduction for its 1990 taxable year (see paragraph (b)(2) of this section).

§1.461-6 Economic performance when certain liabilities are assigned or are extinguished by the establishment of a fund.

(a) *Qualified assignments of certain personal injury liabilities under section 130.* In the case of a qualified assignment (within the meaning of section 130(c)), economic performance occurs as a taxpayer-assignor makes payments that are excludible from the income of the assignee under section 130(a).

(b) *Section 468B.* Economic performance occurs as a taxpayer makes qualified payments to a designated settlement fund under section 468B, relating to special rules for designated settlement funds.

(c) *Payment to a qualified fund—*(1) *In general.* In the case of a liability described in paragraph (g)(2) of §1.461-4 (other than a liability described in section 468B(d)(2)(D)), economic performance occurs as a taxpayer makes "approved payments" in satisfaction of the liability to a "qualified fund."

(2) *Qualified fund—*(i) *In general.* A qualified fund is a fund—

(A) That is established by an order described in paragraph (c)(2)(ii)(A) of this section and that extinguishes a liability of the taxpayer specified in paragraph (c)(1) of this section;

(B) That is administered by persons a majority of whom by vote are independent of the taxpayer;

(C) Under the terms of which the taxpayer or any related person cannot hold any beneficial interest in the income or corpus of the fund;

(D) To which no amounts can be transferred except approved payments;

(E) From which no amounts may be transferred to the taxpayer or any related person; and

(F) With respect to which an election has been made under this section.

(ii) *Other definitions.* For purposes of this paragraph (c)—

(A) *Approved payment.* An approved payment is any money or property, other than stock or indebtedness of the taxpayer (or any related person), irrevocably transferred to a qualified fund pursuant to an order of the United States, any State or political subdivision thereof, any possession of the United States, or any agency or instrumentality (including a court of law) of any of the foregoing. While an approved payment can include amounts received as a settlement of an insurance claim, no deduction is allowed for the transfer of those amounts to the extent the amounts are excluded from the taxpayer's gross income.

(B) *Extinguishment of liability.* [Reserved]

(C) *Related person.* "Related person" has the same meaning as in sections 267(b) and 707(b), applied by substituting 10 percent for 50 percent each place it appears.

(iii) *Exceptions.* A qualified fund does not include—

(A) A fund that is established to satisfy any contested liability of the taxpayer within the meaning of §1.461-2 (b); or

(B) A welfare benefit fund as defined in section 419.

(3) *Disqualification of fund.* If a qualified fund fails to satisfy any of the requirements of paragraph (c)(2) of this section for any taxable year—

(i) All amounts remaining in the fund shall be treated as transferred to the taxpayer in the taxable year of such failure; and

(ii) The taxpayer's tax liability for the year shall be computed without application of this paragraph (c). Thus, for example, deductions relating to a liability for which a fund is established may not be taken until the taxable year during which payments are made to the person entitled to payment (or as otherwise specified in this section).

(4) *Taxation of qualified fund.* The gross income of a qualified fund is taxed at the maximum rate in effect for the taxable year under section 1(e) of the Code. Approved payments to a fund are not treated as income to the fund. No deductions to the gross income of the fund are allowed except a deduction for any ordinary and necessary administrative or incidental costs incurred by the fund that would be deductible by a corporation.

(5) *Subtitle F.* For purposes of subtitle F (procedure and administration), a qualified fund is treated as a corporation and any tax imposed by this paragraph (c) is treated as a tax imposed by section 11 of the Code.

(6) *Time and manner of making election.* An election under this paragraph (c) is made under guidance published by the Secretary, and is revocable only with the consent of the Commissioner. See section 446(e) and §1.446-1(e).

(d) *Payments to other funds or persons that constitute economic performance.* [Reserved].

(e) *Effective dates.* The rules in paragraphs (a) and (b) of this section apply to payments after July 18, 1984. The rules in paragraph (c) of this section apply to payments in taxable years beginning after December 31, 1989.

Par. 10. Section 1.61-3 is amended by adding a new sentence at the end of paragraph (a) to read as follows:

§1.61-3 Gross income derived from business.

(a) * * * Thus, for example, an amount cannot be taken into account in the computation of cost of goods sold any earlier than the taxable year in which economic performance occurs with respect to the amount (see §1.446-1(c)(1)(ii)).

* * * * *

Par. 11. Section 1.263(a)-1 is amended by adding new text to the end of paragraph (b) to read as follows:

§1.263(a)-1 Capital expenditures; in general.

* * * * *

(b) * * * An amount referred to in paragraph (a) of this section is a capital expenditure that is taken into account through inclusion in inventory costs or a charge to capital accounts or basis no earlier than the taxable year during which the amount is incurred within the meaning of §1.446-1(c)(1)(ii). Capital expenditures are subsequently recovered through depreciation, amortization, cost of goods sold, as an adjustment to basis, or otherwise, at such time as the property to which the amount relates is used, sold, or otherwise disposed of by the taxpayer, in accordance with applicable Code sections and guidance published by the Secretary.

* * * * *

Par. 12. Section 1.263A-1T is amended by adding a new sentence to the end of paragraph (a)(5)(i) to read as follows:

§1.263A-1T Capitalization and inclusion in inventory costs of certain expenses (temporary).

(a) * * *

(5) * * *

(i) * * * However, the amount of any cost required to be capitalized may not be included in inventory or charged to capital accounts or basis beginning any earlier than the taxable year during which the amount is incurred within the meaning of §1.446-1(c)(1)(ii).

* * * * *

Par. 13. Section 1.451-3 is amended by adding a new paragraph (a) (8) to read as follows:

§1.451-3 Long-term contracts.

(a) * * *

(8) *Incurred.* For purposes of this section, the term "incurred" has the same meaning as in §1.446-1(c)(1)(ii).

* * * * *

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on June 6, 1990, 8:45 a.m., and published in the issue of the Federal Register for June 7, 1990, 55 F.R. 23235)

Notice of Proposed Rulemaking

Look-back Method for Long-term Contracts

IA-130-86

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains a notice of proposed rulemaking relating to the look-back method of section 460(b) of the Internal Revenue Code for long-term contract income reported under the percentage of completion method of accounting. The look-back method was enacted by the Tax Reform Act of 1986 (the "1986 Act"), Pub. L. No. 99-514 [1986-3 C.B. (Vol. 1) 1], and amended by the Technical and Miscellaneous Revenue Act of 1988 (the "1988 Act"), Pub. L. No. 100-647 [1988-3 C.B. 1], and the Revenue Reconciliation Act of 1989 (the "1989 Act"), Pub. L. No. 101-239 [1990-1 C.B. 210]. The purpose of the look-back method is to compensate for deferral or acceleration of contract income that results from the use of estimated, rather than actual, total contract price and contract costs in applying the percentage of completion method. Taxpayers are required to pay interest if long-term contract income is deferred, and are entitled to receive interest if long-term contract income is accelerated, under the percentage of completion method. These proposed regulations provide guidance as to how interest is computed under the look-back method, and also include simplified methods to reduce the complexity of computing interest under the look-back method.

DATES: In general, these proposed regulations are proposed to be effective with respect to contracts entered into after February 28, 1986. However, §1.460-6(d) (regarding the application of the simplified marginal impact method to domestic contracts of widely held pass-through entities) does not apply to any contract completed in a tax year for which the due date (determined with regard to extensions) of the return is before November 10, 1988, and §1.460-6(g) (regarding the application of the look-back method if there is a mid-contract change in a taxpayer reporting income from a contract) applies only to changes in the taxpayer after June 12, 1990. Written comments must be received by August 13, 1990. Outlines for persons wishing to speak at the public hearing scheduled for August 24, 1990, must be delivered by August 3, 1990. *See* the Notice of Public Hearing published elsewhere in *** [Announcement 90-84, 1990-29 I.R.B. 33]. A Treasury Decision adopting the proposed regulations with respect to the simplified marginal impact method in §1.460-6(d), and the delayed reapplication method in §1.460-6(e), is expected to be issued no later than September 17, 1990.

ADDRESSES: Send comments and requests to speak at the public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, D.C. 20044, Attn: CC:CORP:T:R Room 4429 (IA-130-86). In the alternative, comments and requests may be hand-delivered to: Internal Revenue Service, Attn: CC:CORP:T:R (IA-130-86), Room 4429, Washington, D.C.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments concerning the accuracy of the burden estimate and suggestions for reducing the burden should be directed to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, D.C. 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer T:FP, Washington, D.C. 20224.

The collection of information in this regulation is in proposed §1.460-6(f) and (g). This information is required by the Internal Revenue Service to verify the amount of interest a taxpayer is required to pay or is entitled to receive under the look-back method. The likely respondents are corporations, partnerships, and individuals.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Estimated total annual reporting and recordkeeping burden: 69,550 hours.

The estimated average annual reporting burden per respondent is 5 hours and 32 minutes.

The estimated average annual recordkeeping burden per recordkeeper is 8 hours and 22 minutes.

Estimated number of respondents/recordkeepers: 5,000.

Estimated annual frequency of responses: 1.

Background

This document proposes to add new §1.460-6 to Part 1 of Title 26 of the Code of Federal Regulations. The proposed regulations conform the Income Tax Regulations to the requirements of section 460(b) of the Code, as enacted by section 804(a) of the 1986 Act and as amended by sections 1008(c)(2) and 5041(d) of the 1988 Act, and sections 7621(b) and 7811(e) of the 1989 Act.

Explanation of Provisions

IN GENERAL

Section 460(b) of the Code provides that, upon the completion of any long-term contract, the look-back method is applied to amounts reported under the contract using the percentage of completion method. The percentage of completion method requires the use of estimates of total contract price and total contract costs for reporting income in years prior to the year of contract completion. The look-back method is intended to offset the time-value effects of using estimates during the life of a contract that differ from the actual amounts determined upon the completion of the contract.

Under the look-back method, taxpayers are required to pay interest if tax liability is deferred as a result of underestimating the total contract price or overestimating total contract costs. Conversely, taxpayers are entitled to receive interest if tax liability is accelerated as a result of overestimating the total contract price or underestimating total contract costs. The amount of interest a taxpayer is required to pay or is entitled to receive under the look-back method is computed by applying the overpayment rate established by section 6621(a)(1), compounded daily, to the difference between the tax liability reported and the tax liability that would have been reported if the taxpayer had reported income on the basis of the actual contract price and the actual contract costs instead of the estimated contract price and costs (the "hypothetical underpayment" or "hypothetical overpayment"). Congress provided the look-back method to prevent harsh results that would otherwise be produced by the percentage of completion method if, for example, an overall loss is experienced on a contract. H.R. Rep. No. 426, 99th Cong., 1st Sess. 626 (1985), 1986-3 (Vol. 2) C.B. 626.

The look-back method involves only the computation of interest with respect to hypothetical underpayments or overpayments of tax liability attributable to the use of estimated, rather than actual, contract price and contract costs and, accordingly, has no effect on the amount of tax liability reported for a previous tax year. For example, if the tax rates in effect during the second year of a 2-year contract are lower than tax rates in effect during the first year, and if contract income was accelerated to the first year of the contract because estimated contract costs were lower than actual contract costs, interest is credited to the taxpayer on the hypothetical overpayment of tax for the first year based on the tax rate actually in effect for that year. The taxpayer would not be entitled, however, to a refund representing the amount of tax that would have been saved by applying the lower tax rate in effect for the second tax year to the amount of income accelerated to the first year of the contract. The look-back method, therefore, by design only corrects for timing differences, not permanent differences in tax liability that result from over- or underestimation of contract price and costs. Accordingly, the look-back method does not replace the requirement to properly estimate total contract price and contract costs in reporting income under the percentage of completion method for each year of a contract. For this reason, taxpayers' estimates remain subject to verification upon audit. See Notice 89-15, 1989-1 C.B. 634, Q & A 24 through Q & A 27, for rules for estimating the total contract price and total contract costs.

OPERATION OF THE LOOK-BACK METHOD

The amount of interest charged or credited to a taxpayer under the look-back method is generally computed in three steps. The first step is to reapply the percentage of completion method to completed contracts using the actual, rather than estimated, contract price and contract costs. Income from the contract is thus reallocated among prior tax years. The second step is to compare what the tax liability for each affected year would have been if income had been reported as reallocated under the look-back method with the tax liability that was previously determined. If, for any year, there is a difference between these two amounts, the difference is treated as a hypothetical underpayment or overpayment of tax. The third step is to apply the rate of interest on overpayments established by section 6621 of the Code, compounded daily, to the hypothetical underpayment or overpayment of tax, from the year of the underpayment or overpayment until the year the contract was completed. The result is the amount of interest to be paid by or credited to the taxpayer. The proposed regulations illustrate the three steps involved in applying the look-back method.

SIMPLIFIED METHOD

The proposed regulations provide a "simplified marginal impact method," which generally simplifies the application of Step Two of the look-back method by eliminating the requirement to determine what a taxpayer's tax liability would have been if income were reported on the basis of actual contract price and actual contract costs. Under the simplified marginal impact method, a taxpayer reapplies the percentage of completion method, using the actual, rather than estimated, total contract price and total contract costs, to all con-

tracts that are completed or adjusted in a particular year. The taxpayer then computes the aggregate marginal increase or decrease in income, from those contracts only, for each tax year affected by those contracts. This increase or decrease in income for each affected tax year is generally deemed to give rise to a hypothetical overpayment or underpayment of tax determined at the highest statutory tax rate in effect for that year under section 1, in the case of an individual, and section 11, in the case of a corporation (currently 28 percent and 34 percent, respectively).

In accordance with section 460(b)(4) of the Code, as added by section 5041(d) of the 1988 Act, the simplified marginal impact method must be used with respect to income from domestic long-term contracts of a widely held partnership, S corporation, or trust. With respect to this required application, the simplified marginal impact method is applied at the entity rather than at the owner level. In addition, hypothetical overpayments or underpayments of tax liability are deemed to arise at the highest statutory tax rate in effect for the majority of the entity's owners without regard to the actual tax rates or tax attributes of each of the owners.

The Internal Revenue Service has concluded that the simplified marginal impact method should be made available in the case of contracts that are not subject to the statutory simplified method. The Service is concerned about the administrative burdens that would be imposed on taxpayers in the absence of this simplified method. Considerable complexity arises because a taxpayer otherwise must fully recompute tax liability for several years at a time and, in addition, recompute tax liability multiple times for the same year when the look-back method is applied to a year for which the tax liability has previously been recomputed under the look-back method. Additional complexity results because the time period for determining the amount of interest charged or credited to a taxpayer must be adjusted when the look-back method affects tax attributes such as net operating loss or credit carryovers and carrybacks that change the time period that a hypothetical underpayment or overpayment of tax was actually available to the taxpayer or the government.

The simplified marginal impact method simplifies the computation of hypothetical overpayments and underpayments and, in some cases, the time period for charging or crediting interest. Therefore, the proposed regulations also permit C corporations, owners of widely held pass-through entities with respect to foreign contracts, owners of closely held pass-through entities, and sole proprietors to elect the simplified marginal impact method. The simplified marginal impact method is made available to these taxpayers under the authority of section 460(h), which provides that the Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of section 460.

A taxpayer that either is required to or that elects to use the simplified marginal impact method must apply the method to all of the taxpayer's completed long-term contracts. If, however, the amount of income originally reported with respect to a long-term contract for any redetermination year exceeds the amount of income reallocated under the look-back method with respect to that contract for that year (*i.e.*, using actual contract price and contract costs) by the lesser of $1,000,000 or 20 percent of the amount of income reallocated under the look-back method with respect to that contract for that year, the proposed regulations provide that the Commissioner may require a taxpayer that uses the simplified marginal impact method to apply the look-back method to that contract as if the simplified method did not apply. In determining whether to exercise this authority, the district director may take into account whether the taxpayer overreported income for a purpose of receiving interest on a hypothetical overpayment determined at the highest statutory tax rate. The district director also may take into account whether the taxpayer underreported income for the year in question with respect to other contracts. Moreover, if the Form 8697 is examined for any completion year and a year in which income was overreported is open under the statute of limitations, an adjustment to tax, rather than to look-back interest, will be made if the taxpayer did not properly estimate contract price and contract costs and the taxpayer would otherwise be permitted to obtain a permanent tax benefit. In addition, to prevent the running of interest in a taxpayer's favor on amounts in excess of the taxpayer's actual tax liability for any year, a hypothetical overpayment in the case of a taxpayer electing the simplified marginal impact method is limited to the taxpayer's actual tax liability for the year, taking into account net operating losses carried to that year.

FORM 8697

The amount of interest due or to be refunded as a result of applying the look-back method is computed and reported on Form 8697 (Interest Computation Under the Look-back Method for Completed Long-term Contracts) for any tax year in which one or more long-term contracts are completed, or in which the contract price or contract costs are adjusted for one or more long-term contracts that were previously completed. Form 8697 is due no later than the due date (including extensions) of the tax return for the year of completion or adjustment. Form 8697 is filed with the same Internal Revenue Service Center with which a taxpayer's income tax return is filed.

In general each taxpayer that reports income from a long-term contract, or adjusts amounts attributable to a completed long-term contract, is required to file Form 8697 to apply the look-back method. In the case of a pass-through entity, such as a partnership or an S corporation, however, the proposed regulations clarify that the owners or shareholders generally are required to file Form 8697 and are liable for, or entitled to receive, interest with respect to their distributive shares of income from a contract. However, widely held pass-through entities are required to apply the look-back method at the entity level with respect to income from domestic contracts.

MID-CONTRACT CHANGE IN TAXPAYER

The proposed regulations identify which taxpayer is responsible for applying the look-back method and which taxpayer is liable for paying (or is entitled to receive) interest comput-

ed under the look-back method if, prior to the completion of a long-term contract, there is a change in the taxpayer that reports income from the contract. The proposed regulations generally require the completing taxpayer to apply the look-back method with respect to all years of the contract, including tax years of a predecessor taxpayer. This approach is consistent with the assumption that a successor taxpayer reporting income from a contract, by assuming other rights and liabilities under the contract, should also be viewed as assuming the requirement to apply the look-back method upon completion. The proposed regulations reject an approach that would treat a mid-contract change in the taxpayer as a constructive completion of the contract for purposes of the look-back method. This approach would increase the complexity of the look-back method by increasing the number of times the look-back method is applied to a single contract. Moreover, a constructive completion would require the look-back method to be applied before actual completion of the contract and on the basis of estimates or, in the case of a sale of an entire business, on the basis of an allocation of the purchase price of the business, thereby producing results that may conflict with the purpose of the look-back method. For these reasons, the proposed regulations do not provide for a mid-contract application of the look- back method in the case of a change in the taxpayer and, in requiring the look-back method to be applied at the time of final completion, provide that overpayments and underpayments must be computed with respect to both pre-transaction and post-transaction years, and that interest runs on these amounts until final completion. Accordingly, only amounts paid by the customer (and not amounts transferred between the parties) are treated as contract revenue in applying the look-back method. Amounts transferred between the parties that represent gain or loss on the contract relative to the amount of income previously included under the percentage of completion method are disregarded for purposes of the percentage of completion method and the look-back method.

The proposed regulations also identify which taxpayer is required to apply the look-back method at the time of final completion and what information another taxpayer must provide to enable the responsible taxpayer to apply the look-back method. Because it could be unfair to require a taxpayer that previously reported income from a contract (the "predecessor") to pay interest based on changes in contract price and costs that are beyond its control after that taxpayer has terminated its interest in a long-term contract, the proposed regulations make the completing taxpayer primarily responsible for the payment of all interest due under the look-back method. This approach also insures that interest is ultimately paid under the look-back method with respect to all years of the contract, even if the predecessor has gone out of existence by the time the contract is completed. Secondary liability for interest due under the look-back method for the pre-transaction period is imposed on the taxpayer that has transferred or otherwise discontinued its interest in the contract, to prevent use of contract transfers to avoid the requirements of the look-back method. Since it would be unduly intrusive to require the predecessor to provide the detailed information about its tax returns that would be necessary to apply the look-back method precisely, the completing taxpayer must determine underpayments of tax in pre-transaction years under the simplified marginal impact method.

In order to prevent a related taxpayer from receiving interest on hypothetical overpayments using a tax rate that exceeds the related predecessor's actual marginal tax rate, however, the successor taxpayer is not permitted to receive interest on overpayments with respect to pre-transaction tax years, other than in a taxable sale to an unrelated party of a contract or an interest in a flow-through entity. Instead, the predecessor may apply the look-back method with respect to pre-transaction years and receive interest to the extent that the predecessor's application of the look-back method results in hypothetical overpayments for any of these tax years.

SCOPE OF LOOK-BACK METHOD

The proposed regulations describe the scope of the look-back method, which generally includes all long-term contracts entered into after February 28, 1986, that are reported under the percentage of completion method or the percentage of completion-capitalized cost method. In the case of any long-term contract reported under the percentage of completion-capitalized cost method, interest is charged or credited to the taxpayer with respect to the percentage (40, 70, or 90, whichever applies) of the contract reported under the percentage of completion method.

Section 56(a)(3) provides that, in determining the amount of the alternative minimum taxable income for any tax year, the percentage of completion method of accounting (as modified by section 460(b)) is used in lieu of the method of accounting that is used for purposes of computing the regular tax. The proposed regulations clarify that the look-back method accordingly applies to alternative minimum taxable income computed using the percentage of completion method as well as to regular taxable income.

DE MINIMIS EXCEPTION

The 1988 Act amended section 460(b) to exempt from the look-back method certain long-term contracts that are not otherwise exempt from the required use of the percentage of completion method (or the percentage of completion-capitalized cost method). Under section 460(b)(3)(B), the look-back method does not apply to any contract completed within 2 years if the gross contract price does not exceed the lesser of $1,000,000 or 1 percent of the taxpayer's average annual gross receipts. The proposed regulations clarify that this de minimis exception is mandatory, even if income from the contract was accelerated as a result of the use of inaccurate estimates of contract price and contract costs, so that the taxpayer would otherwise be entitled to receive interest on the resulting hypothetical overpayment of tax.

If the de minimis exception applies to a contract for regular taxable income, then the exception also applies for alternative minimum taxable in-

come. Because of the adjustments required for computing alternative minimum taxable income, a taxpayer's gross receipts for alternative minimum tax purposes may differ from gross receipts for regular income tax purposes. Thus, if the criteria for meeting the de minimis exception were applied separately for alternative minimum tax purposes using alternative minimum tax gross receipts, a difference between alternative minimum tax gross receipts and regular tax gross receipts could cause a contract to qualify for the de minimis exception for regular tax purposes, but not for alternative minimum tax purposes, or vice versa. To prevent this result, the proposed regulations provide that gross receipts are determined for purposes of section 460(b)(3)(B) by reference only to regular taxable income.

The de minimis exception was enacted in 1988, effective for qualifying contracts entered into after February 28, 1986, and, therefore, may apply to contracts for which a taxpayer has already applied the look-back method. Since the de minimis exception was enacted retroactively, taxpayers are permitted to file an amended Form 8697 to reverse the application of the look-back method to qualifying contracts.

TREATMENT OF LOOK-BACK INTEREST

In accordance with section 460(b)(1), interest required to be paid by a taxpayer is treated as an increase in tax for purposes of subtitle F of the Code (other than the estimated tax penalty); however, interest received by a taxpayer is not treated as a reduction in tax liability. Under the proposed regulations, the determination of whether interest computed under the look-back method is treated as tax for this purpose is determined on a "net" basis for each filing year. Thus, if a taxpayer computes for the current filing year both hypothetical overpayments and hypothetical underpayments for prior years, the taxpayer has an increase in tax only if the interest computed on the underpayments for all those prior years exceeds the interest computed on the overpayments for all those prior years.

For purposes of determining taxable income under subtitle A of the Code, however, any amount of interest required to be paid by the taxpayer under the look-back method is treated as interest expense arising from an underpayment of income tax. Thus, any look-back interest paid by an individual (determined on a net basis) is treated as personal interest in accordance with §1.163-9T(b)(2), even if that interest arises from long-term contract income that is allocated to an investment, passive, or trade or business activity. Similarly, for purposes of subtitle A, any amount of interest refunded to the taxpayer under the look-back method is taxable interest income.

The proposed regulations clarify that interest computed under the look-back method at the entity level under the simplified marginal impact method is allocated among the owners (or beneficiaries) in the same manner that interest income and interest expense are allocated to owners (or beneficiaries) and subject to the requirements of section 704 and any other applicable rules. Consequently, under the proposed regulations, look-back interest expense allocated to an individual owner (or beneficiary) is treated as personal interest expense, even though paid by the pass-through entity under the simplified marginal impact method.

TREATMENT OF CHANGE ORDERS

The proposed regulations clarify that the look-back method is applied to all amounts attributable to a single long-term contract. Section 460(f), which defines the term "long-term contract," authorizes the Secretary to prescribe regulations that require (1) two or more contracts that are interdependent (by reason of pricing or otherwise) to be treated as a single contract, and (2) a single contract that is properly severed to be treated as multiple contracts. Notice 89-15, Q & A 37 and 38, provides that the rules for severing and aggregating contracts in §1.451-3(e) determine what constitutes a single long-term contract for purposes of reporting income and allocating costs to long-term contracts under section 460. These rules apply for determining whether a change order or other similar agreement is treated as a separate contract or as part of the original contract. *Cf.* Notice 89-15, Q & A 11. Because the look-back method involves a hypothetical reapplication of the percentage of completion method (as modified by section 460), the same rules apply in determining what constitutes a single long-term contract for purposes of the look-back method. Accordingly, under the proposed regulations, if a contract change order does not constitute a separate contract under the rules for severing and aggregating contracts, the revenue and expenses attributable to the change order are allocable under the look-back method to all tax years of the underlying contract.

TIME AT WHICH LOOK-BACK METHOD IS APPLIED

Section 460(b)(1)(B) of the Code requires the look-back method to be applied upon completion of a long-term contract, and then to be reapplied in any tax year in which there are post-completion adjustments to the contract price or contract costs.

Completion

The proposed regulations define the term "completion" for this purpose to mean final completion and acceptance within the meaning of §1.451-3(b)(2). With respect to any long-term contract, therefore, the look-back method generally is applied no later than the year in which the subject matter of the contract has been delivered and is available for use by the customer, even if the taxpayer expects to incur additional contract costs in a year subsequent to the completion year.

Although §1.451-3(b)(2) determines the "time" for completion, the provisions in §1.451-3(b)(2), and §1.451-3(d) (which separate contract revenues and contract costs from a long-term contract in certain circumstances, such as in the case of a dispute or contract term relating to contingent compensation) do not apply for purposes of the look-back method. These provisions, which are designed to prevent inappropriate deferral of income and expenses by taxpayers using the completed contract method, are not relevant under the percentage of completion method. Moreover, these provisions are inconsistent with the requirement of section 460(b)(1)(B) to reapply the look-back method to

amounts taken into account after completion, since their application would otherwise permit income from a long-term contract to be accounted for under a method of accounting that is not subject to the look-back method.

In addition, section 460(b)(1) requires any portion of the contract price not previously included in income to be included in income for the year immediately following the completion year, even if the taxpayer expects to incur additional contract costs in a year subsequent to the year immediately following the completion year. This rule does not apply for purposes of the look-back method, however. Thus, to the extent that a taxpayer incurs additional costs after the year immediately following the year of completion, the taxpayer will be entitled to receive interest under the look-back method to compensate for any acceleration of income that resulted from this requirement.

Post-completion reapplications

The proposed regulations clarify that, after completion of a contract, section 460(b) generally requires the look- back method to be reapplied in any subsequent tax year in which additional contract revenues or contract costs are taken into account, or in which amounts previously taken into account as income or deductions are adjusted for any reason. In reapplying the look-back method when any amount is taken into account after completion, including when any amount of revenue that is taken into account in the year immediately following the year of completion by reason of section 460(b)(1), the proposed regulations provide that only costs actually incurred as of the reapplication year are included in the denominator of the percentage of completion ratio. Section 460(b)(2) provides that these amounts may be taken into account, for purposes of reapplying the look-back method, at a value that is discounted from the time the amount is taken into account to the time of completion. The proposed regulations clarify that amounts of contract revenue that are properly taken into account under the percentage of completion method at the time of, or prior to, contract completion are not discounted under this rule, even if received after contract completion. Although section 460(b)(2) permits taxpayers to discount adjustments on a contract-by-contract basis, if a taxpayer discounts any adjustments relating to a particular contract, the taxpayer must discount all contract price or contract cost adjustments arising from the contract. *See* H.R. Rep. No. 247, 101st Cong., 1st Sess. 1411 (1989), which provides that adjustments to costs are to be treated in the same manner as adjustments to price.

The proposed regulations provide a "delayed reapplication method" which, if elected, may reduce the number of times the look-back method is required to be reapplied for post-completion adjustments to a taxpayer's long-term contracts. Under the delayed reapplication method, taxpayers will be permitted to wait until the cumulative amount of adjustments to either the contract price or contract costs reaches a threshold of 10 percent of these amounts prior to adjustment or, if lesser, $1,000,000. To insure that all adjustments to the contract price are ultimately taken into account under the look-back method, however, the delayed reapplication method requires an electing taxpayer to reapply the look-back method no later than 5 years after the completion of the contract or the last application of the look-back method, without regard to whether the other thresholds have been met by that year. The Internal Revenue Service invites written comments and suggestions regarding the practicality of the delayed reapplication method, including its effectiveness in reducing the administrative complexity of the look-back method.

Special Analyses

It has been determined that these proposed regulations are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these proposed regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are submitted (preferably nine copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing is scheduled for August 24, 1990. Notice of the public hearing is published in *** [Announcement 90-84, 1990-29 I.R.B. 33].

List of Subjects

26 CFR 1.441-1 through 1.483-2

Income taxes, Accounting, Deferred compensation plans.

26 CFR 602

Reporting and recordkeeping requirements.

Amendments to the Regulations

The following amendments to 26 CFR Part 1 are adopted:

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: Sec. 7805, 68A Stat. 917: 26 U.S.C. 7805. * * * Section 1.460-6 is also issued under 26 U.S.C. 460(h).

Par. 2. New sections 1.460-0 through 1.460-8 are added under the heading "Taxable Year for Which Items of Gross Income Included" to read as follows:

§1.460-0. Outline of regulations under section 460.

This section lists the paragraphs contained in §1.460-1 through 1.460-8.

§1.460-1. Accounting for long-term contracts in general. [Reserved.]

§1.460-2. Definition of long-term contract. [Reserved.]

§1.460-6. Look-back method.

(a) *In general*—(1) *Introduction.* With respect to income from any long-term contract reported under the percentage of completion method, a

taxpayer is required to pay or is entitled to receive interest under section 460(b) on the amount of tax liability that is deferred or accelerated as a result of overestimating or underestimating total contract price or contract costs. Under this look-back method, taxpayers are required to pay interest for any deferral of tax liability resulting from the underestimation of the total contract price or the overestimation of total contract costs. Conversely, if the total contract price is overestimated or the total contract costs are underestimated, taxpayers are entitled to receive interest for any resulting acceleration of tax liability. The computation of the amount of deferred or accelerated tax liability under the look-back method is hypothetical; application of the look-back method does not result in an adjustment to the taxpayer's tax liability as originally reported, as reported on an amended return, or as adjusted on examination. Thus, the look-back method does not correct for differences in tax liability that result from over- or underestimation of contract price and costs and that are permanent because, for example, tax rates change during the term of the contract.

(2) *Overview.* Paragraph (b) explains which situations require application of the look-back method to income from a long-term contract. Paragraph (c) explains the operation of the three computational steps for applying the look-back method. Paragraph (d) provides guidance concerning the simplified marginal impact method. Paragraph (e) provides an elective method to minimize the number of times the look-back method must be reapplied to a single long-term contract. Paragraph (f) describes the reporting requirements for the look-back method and the tax treatment of look-back interest. Paragraph (g) provides rules for applying the look-back method when there is a transaction that changes the taxpayer that reports income from a long-term contract prior to the completion of a contract. Paragraph (h) provides examples illustrating the three computational steps for applying the look-back method.

(b) *Scope of look-back method—*(1) *In general.* The look-back method applies to any income from a long-term contract within the meaning of section 460(f) that is required to be reported under the percentage of completion method (as modified by section 460) for regular income tax purposes or for alternative minimum tax purposes. If a taxpayer uses the percentage of completion-capitalized cost method for long-term contracts, the look-back method applies for regular tax purposes only to the portion (40, 70, or 90 percent, whichever applies) of the income from the contract that is reported under the percentage of completion method. The requirements of section 460 also apply to income and expenses attributable to activities that benefit any long-term contract entered into by a party related to the taxpayer within the meaning of section 707(b) or 267(b), determined without regard to section 267(f)(1)(A) and by substituting "80 percent" for "50 percent" with regard to the ownership of the stock of a C corporation. Therefore, to the extent that the percentage of completion method is required to be used with respect to income and expenses that are attributable to activities that benefit a related party's long-term contract, the look-back method also applies to these amounts, even if those activities are not performed under a contract entered into directly by the taxpayer.

(2) *Exceptions from section 460.* The look-back method generally does not apply to the regular taxable income from any long-term construction contract within the meaning of section 460(e)(4) that

(i) is a home construction contract within the meaning of section 460(e)(1)(A), or

(ii) is not a home construction contract but is estimated to be completed within a 2-year period by a taxpayer whose average annual gross receipts for the 3 tax years preceding the tax year the contract is entered into do not exceed $10,000,000 (as provided in section 460(e)(1)(B)). These contracts are not subject to the look-back method for regular tax purposes, even if the taxpayer uses a version of the percentage of completion method permitted under §1.451-3, unless the taxpayer has properly changed its method of accounting for these contracts to the percentage of completion method as modified by section 460(b). The look-back method, however, applies to the alternative minimum taxable income from a contract of this type, unless it is exempt from the required use of the percentage of completion method under section 56(a)(3).

(3) *De minimis exception.* Notwithstanding that the percentage of completion method is otherwise required to be used, the look-back method does not apply to any long-term contract that (i) is completed within 2 years of the contract commencement date, and (ii) has a gross contract price (as of the completion of the contract) that does not exceed the lesser of $1,000,000 or 1 percent of the average annual gross receipts of the taxpayer for the 3 tax years preceding the tax year in which the contract is completed. This de minimis exception is mandatory and, therefore, precludes application of the look-back method to any contract that meets the requirements of the exception. The de minimis exception applies for purposes of computing both regular taxable income and alternative minimum taxable income. Solely for this purpose, the determination of whether a long-term contract meets the gross receipts test for both alternative minimum tax and regular tax purposes is made based only on the taxpayer's regular taxable income.

(4) *Alternative minimum tax.* For purposes of computing alternative minimum taxable income, section 56(a)(3) generally requires long-term contracts within the meaning of section 460(f) (generally without regard to the exceptions in section 460(e)) to be accounted for using only the percentage of completion method as defined in section 460(b), including the look-back method of section 460(b), with respect to tax years beginning after December 31, 1986. However, section 56(a)(3) (and thus the look-back method) does not apply to any long-term contract entered into after June 20, 1988, and before the beginning of the first tax year that begins after September 30, 1990, that meets the conditions of both section 460(e)(1)(A) and clauses (i) and (ii) of section 460(e)(1)(B), and does not apply to any long-term contract entered into in a tax year that begins after

September 30, 1990, that meets the conditions of section 460(e)(1)(A). A taxpayer that applies the percentage of completion method (and thus the look-back method) to income from a long-term contract only for purposes of determining alternative minimum taxable income, and not regular taxable income, must apply the look-back method to the alternative minimum taxable income in the year of contract completion and other filing years whether or not the taxpayer was liable for the alternative minimum tax for the filing year or for any prior year. Interest is computed under the look-back method to the extent that the taxpayer's total tax liability (including the alternative minimum tax liability) would have differed if the percentage of completion method had been applied using actual, rather than estimated, contract price and contract costs.

(5) *Effective date.* The look-back method, including the de minimis exception, applies to long-term contracts entered into after February 28, 1986. With respect to activities that are subject to section 460 solely because they benefit a long-term contract of a related party, the look-back method generally applies only if the related party's long-term contract was entered into after June 20, 1988, unless a principal purpose of the related-party arrangement is to avoid the requirements of section 460.

(c) *Operation of the look-back method*—(1) *Overview*—(i) *In general.* The amount of interest charged or credited to a taxpayer under the look-back method is computed in three steps. This paragraph (c) describes the three steps for applying the look-back method. These steps are illustrated by the examples in paragraph (h). The first step is to hypothetically reapply the percentage of completion method to all long-term contracts that are completed or adjusted in the current year (the "filing year"), using the actual, rather than estimated, total contract price and contract costs. Based on this reapplication, the taxpayer determines the amount of taxable income (and alternative minimum taxable income) that would have been reported for each year prior to the filing year that is affected by contracts completed or adjusted in the filing year if the actual, rather than estimated, total contract price and costs had been used in applying the percentage of completion method to these contracts, and to any other contracts completed or adjusted in a year preceding the filing year. If the percentage of completion method only applies to alternative minimum taxable income for contracts completed or adjusted in the filing year, only alternative minimum taxable income is recomputed in the first step. The second step is to compare what the tax liability would have been under the percentage of completion method (as reapplied in the first step) for each tax year for which the tax liability is affected by income from contracts completed or adjusted in the filing year (a "redetermination year") with the most recent determination of tax liability for that year to produce a hypothetical underpayment or overpayment of tax. The third step is to apply the rate of interest on overpayments designated under section 6621 of the Code, compounded daily, to the hypothetical underpayment or overpayment of tax for each redetermination year to compute interest that runs, generally, from the due date (determined without regard to extensions) of the return for the redetermination year to the due date (determined without regard to extensions) of the return for the filing year. The net amount of interest computed under the third step is paid by or credited to the taxpayer for the filing year. Paragraph (d) provides a simplified marginal impact method that simplifies the second step—the computation of hypothetical underpayments or overpayments of tax liability for redetermination years—and, in some cases, the third step—the determination of the time period for computing interest.

(ii) *Post-completion revenue and expenses*—(A) *In general.* The look-back method is applied upon the completion of any long-term contract and (unless the taxpayer elects the delayed reapplication method of this section) is applied in any subsequent tax year for which there are taken into account any increases or decreases in either total contract price or total contract costs allocable to the contract under section 460(c) ("allocable contract costs") to the extent those increases or decreases were not previously taken into account under the percentage of completion method. Any year in which the look-back method must be reapplied is treated as a filing year. See Example (3) of paragraph (h)(4) for an illustration of how the look-back method is applied to post- completion adjustments.

(B) *Completion.* A contract is considered to be completed for purposes of the look-back method no later than the year in which final completion and acceptance within the meaning of §1.451-3(b)(2) have occurred. Accordingly, determination of the completion year for any long-term contract is based on an analysis of all the relevant facts and circumstances, including the manner in which the parties to the contract deal with each other and with the subject matter of the contract and the nature of any work or costs remaining to be performed or incurred on the contract. Therefore, the first application of the look-back method must occur no later than the tax year in which the subject matter of the contract has been delivered and is available for use by the customer, even if the taxpayer reasonably expects at that time to incur additional allocable contract costs.

(C) *Discounting of contract price and contract cost adjustments subsequent to completion; election not to discount—(1) General rule.* The amount of any post-completion adjustment to the total contract price or contract costs is discounted, solely for purposes of applying the look-back method, from its value at the time the amount is taken into account in computing taxable income to its value at the completion of the contract. The discount rate for this purpose is the Federal mid-term rate under section 1274(d) in effect at the time the amount is properly taken into account. For purposes of applying the look-back method for the completion year, no amounts are discounted, even if they are received after the completion year.

(2) Election not to discount. Notwithstanding the general requirement to discount post-completion adjustments, a taxpayer may elect not to discount contract price and contract cost adjustments with respect to any contract. The election not to discount

is to be made on a contract-by-contract basis and is binding with respect to all post-completion adjustments that arise with respect to a contract for which an election has been made. An election not to discount with respect to any contract is made by stating that an election is being made on the taxpayer's timely filed federal income tax return (determined with regard to extensions) for the first tax year after completion in which the taxpayer takes into account (i.e., includes in income or deducts) any adjustment to the contract price or contract costs. See §5h.6.

(*3*) *Year-end discounting convention.* In the absence of an election not to discount, any revisions to the contract price and contract costs must be discounted to their value as of the completion of the contract in reapplying the look-back method. For this purpose, the period of discounting is the period between the completion date of the contract and the date that any adjustment is taken into account in computing taxable income. Although taxpayers may use the period between the months in which these two events actually occur, in many cases, these dates may not be readily identifiable. Therefore, for administrative convenience, taxpayers are permitted to use the period between the end of the tax years in which these events occur as the period of discounting provided that the convention is used consistently with respect to all post-completion adjustments for all contracts of the taxpayer the adjustments to which are discounted. In that case, the taxpayer must use as the discount rate the Federal mid-term rate under section 1274(d) as of the end of the tax year in which any revision is taken into account in computing taxable income.

(D) *Revenue acceleration rule.* Section 460(b)(1) imposes a special rule that requires a taxpayer to include in gross income, for the tax year immediately following the year of completion, any previously unreported portion of the total contract price (including amounts that the taxpayer expects to receive in the future) determined as of that year, even if the percentage of completion ratio is less than 100 percent because the taxpayer expects to incur additional allocable contract costs in a later year. At the time any remaining portion of the contract price is includible in income under this rule, no offset against this income is permitted for estimated future contract costs. To achieve the requirement to report all remaining contract revenue without regard to additional estimated costs, a taxpayer must include only costs actually incurred through the end of the tax year in the denominator of the percentage of completion ratio in applying the percentage of completion method for any tax years after the year of completion. The look-back method also must be reapplied for the year immediately following the year of completion if any portion of the contract price is includible in income in that year by reason of section 460(b)(1). For purposes of reapplying the look-back method as a result of this inclusion in income, the taxpayer must only include in the denominator of the percentage of completion ratio the actual contract costs incurred as of the end of the year, even if the taxpayer reasonably expects to incur additional allocable contract costs. To the extent that costs are incurred in a subsequent tax year, the look-back method is reapplied in that year (or a later year if the delayed reapplication method is used), and the taxpayer is entitled to receive interest for the post-completion adjustment to contract costs. Because this reapplication occurs subsequent to the completion year, only the cumulative costs incurred as of the end of the reapplication year are includible in the denominator of the percentage of completion ratio.

(2) *Look-back Step One*—(i) *Hypothetical reallocation of income among prior tax years.* For each filing year, a taxpayer must allocate total contract income among prior tax years, by hypothetically applying the percentage of completion method to all contracts that are completed or adjusted in the filing year using the rules of this paragraph (c)(2). The taxpayer must reallocate income from those contracts among all years preceding the filing year that are affected by those contracts using the total contract price and contract costs, as determined as of the end of the filing year ("actual contract price and costs"), rather than the estimated contract price and contract costs. The taxpayer then must determine the amount of taxable income and the amount of alternative minimum taxable income that would have been reported for each affected tax year preceding the filing year if the percentage of completion method had been applied on the basis of actual contract price and contract costs in reporting income from all contracts completed or adjusted in the filing year and in any preceding year. If the percentage of completion method only applies to alternative minimum taxable income from the contract, only alternative minimum taxable income is recomputed in the first step. For purposes of reallocating income (and costs if the 10-percent year changes for a taxpayer using the 10-percent method) under the look-back method, the method of computing the percentage of completion ratio is the same method used to report income from the contract on the taxpayer's return. (Thus, an election to use the 10-percent method or the simplified cost-to-cost method is taken into account). See Example (1) of paragraph (h)(2) for an illustration of Step One.

(ii) *Treatment of estimated future costs in year of completion.* If a taxpayer reasonably expects to incur additional allocable contract costs in a tax year subsequent to the year in which the contract is completed, the taxpayer includes the actual costs incurred as of the end of the completion year plus the additional allocable contract costs that are reasonably expected to be incurred (to the extent includible under the taxpayer's percentage of completion method) in the denominator of the percentage of completion ratio. The completion year is the only filing year for which the taxpayer may include additional estimated costs in the denominator of the percentage of completion ratio in applying the look-back method. If the look-back method is reapplied in any year after the completion year, only the cumulative costs incurred as of the end of the year of reapplication are includible in the denominator of the percentage of completion ratio in reapplying the look-back method.

(iii) *Interim reestimates not considered.* The look-back method cannot be applied to a contract before it is completed. Accordingly, for purposes of applying Step One, the actual total contract price and contract costs are substituted for the previous estimates

of total contract price and contract costs only with respect to contracts that have been completed in the filing year and in a tax year preceding the filing year. No adjustments are made under Step One for contracts that have not been completed prior to the end of the current filing year, even if, as of the end of this year, the estimated total contract price or contract costs for these uncompleted contracts is different from the estimated amount that was used during any tax year for which taxable income is recomputed under the look-back method for the current filing year.

(iv) *Tax years in which income is affected.* In general, because income under the percentage of completion method is generally reported as costs are incurred, the taxable income and alternative minimum taxable income is recomputed only for each year in which allocable contract costs were incurred. However, there will be exceptions to this general rule. For example, a taxpayer may be required to cumulatively adjust the income from a contract in a year in which no allocable contract costs are incurred if the estimated total contract price or contract costs was revised in that year. However, in applying the look-back method, no contract income is allocated to that year. Thus, there may be a difference between the amount of contract income originally reported for that year and the amount of contract income as reallocated. Similarly, because of the revenue acceleration rule of section 460(b)(1), income may be reported in the year immediately following the completion year even though no costs were incurred during that year and, in applying the look-back method in that year or another year, if additional costs are incurred or the contract price is adjusted in a later year, no income is allocated to that year.

(v) *Costs incurred prior to contract execution; 10-percent method*—(A) *General rule.* There are two situations in which allocable contract costs may be incurred without causing contract income to be reported under the percentage of completion method. First, allocable contract costs that are incurred in tax years prior to the tax year the contract is entered into are deductible in the tax year the contract is entered into, and no contract income is required to be reported in any of these prior tax years. The look-back method does not require allocation of contract income to tax years before the contract was entered into. Costs incurred prior to the year a contract is entered into are similarly first taken into account in the numerator of the percentage of completion ratio in the year the contract is entered into. Second, under the elective 10-percent method of section 460(b)(5), a taxpayer takes no contract revenues or contract costs into account until the tax year as of the close of which at least 10 percent of the total estimated contract costs are incurred (the 10-percent year). Instead, contract costs incurred in a tax year preceding the 10-percent year are deferred until the 10-percent year, at which time they are included in the numerator of the percentage of completion ratio and deducted from gross income. A taxpayer using the 10-percent method must also use the 10-percent method in applying the look-back method, using actual total contract costs to determine the 10-percent year. Thus, contract income is never reallocated to a year before the 10-percent year as determined on the basis of actual contract costs. If the 10-percent year is earlier as a result of applying Step One of the look-back method, contract costs incurred up to and including the new 10-percent year (as determined based on actual contract costs), are reallocated from the original 10-percent year to the new 10-percent, and costs incurrred in later years but before the old 10-percent year are reallocated to those years. If the 10-percent year is later as a result of applying Step One of the look-back method, contract costs incurred up to and including the new 10-percent year are reallocated from all prior years to the new 10-percent year. This is the only case in which costs are reallocated under the look-back method.

(B) *Example.* The application of the look-back method by a taxpayer using the 10-percent method is illustrated by the following example:

Example. Z elected to use the 10-percent method of section 460(b)(5) for reporting income under the percentage of completion method. Z entered into a contract in 1990 for a fixed price of $1,000*x*. During 1990, Z incurred allocable contract costs of $80*x* and estimated that it would incur a total of $900*x* for the entire contract. Since $80*x* is less than 10 percent of total estimated contract costs, Z reported no revenue from the contract in 1990 and deferred the $80*x* of costs incurred. In 1991, Z incurred an additional $620*x* of contract costs, and completed the contract. Accordingly, in its 1991 return, Z reported the entire contract price of $1,000*x*, and deducted the $620*x* of costs incurred in 1991 and the $80*x* of costs incurred in 1990.

Under section 460(b)(5), the 10-percent method applies both for reporting contract income and the look-back method. Under the look-back method, since the costs incurred in 1990 ($80*x*) exceed 10 percent of the actual total contract costs ($700*x*), Z is required to allocate $114*x* of contract revenue ($80*x*/$700*x* × $1,000*x*) and the $80x of costs incurred to 1990. Thus, application of the look-back method results in a net increase in taxable income for 1990 of $34*x*, solely for purposes of the look-back method.

(vi) *Amount treated as contract price*—(A) *General rule.* The amount that is treated as total contract price for purposes of applying the percentage of completion method and reapplying the percentage of completion method under the look-back method under Step One includes all amounts that the taxpayer expects to receive from the customer. Thus, amounts are treated as part of the contract price as soon as it is reasonably estimated that they will be received, even if the all-events test has not yet been met.

(B) *Contingencies.* Any amounts related to contingent rights or obligations, such as incentive fees or amounts in dispute, are not separated from the contract and accounted for under a non-long-term contract method of accounting, notwithstanding any provision in §1.451-3(b)(2)(ii), (iii), (iv), and §1.451-3(d)(2), (3), and (4), to the contrary. Instead, those amounts are treated as part of the total contract price in applying the percentage of completion method and the look-back method. For example, if an incentive fee under a contract to manufacture a satellite is payable to the taxpayer after a specified period of successful performance, the incentive fee is includible in the total contract price at the time and to the extent that it can reasonably be predicted that the performance objectives will be met, for purposes of both the percentage of completion method and the look-back method. Similarly, a portion of the contract price that is in dispute is included in the total contract price at the time and to the extent that the taxpayer can reasonably expect the dispute will be resolved in the taxpayer's favor (without regard to when the taxpayer

receives payment for the amount in dispute or when the dispute is finally resolved).

(C) *Change orders.* In applying the look-back method, a change order with respect to a contract is not treated as a separate contract unless the change order would be treated as a separate contract under the rules for severing and aggregating contracts provided in §1.451-3(e). Thus, if a change order is not treated as a separate contract, the contract price and contract costs attributable to the change order must be taken into account in allocating contract income to all tax years affected by the underlying contract.

(3) *Look-back Step Two: Computation of hypothetical overpayment or underpayment of tax*—(i) *In general.* Step Two involves the computation of a hypothetical overpayment or underpayment of tax for each year in which the tax liability is affected by income from contracts that are completed or adjusted in the filing year (a "redetermination year"). The application of Step Two depends on whether the taxpayer uses the simplified marginal impact method contained in paragraph (d) or the actual method described in this paragraph. The remainder of this paragraph (c)(3) does not apply if a taxpayer uses the simplified marginal impact method.

(ii) *Redetermination of tax liability.* Under the method described in this paragraph (c)(3) (the "actual method"), a taxpayer, first, must determine what its regular and alternative minimum tax liability would have been for each redetermination year if the amounts of contract income allocated in Step One for all contracts completed or adjusted in the filing year and in any prior year were substituted for the amounts of contract income reported under the percentage of completion method on the taxpayer's original return (or as subsequently adjusted on examination, or by amended return). See Example (2) of paragraph (h)(3) for an illustration of Step Two.

(iii) *Hypothetical underpayment or overpayment.* After redetermining the income tax liability for each tax year affected by the reallocation of contract income, the taxpayer then determines the amount, if any, of the hypothetical underpayment or overpayment of tax for each of these redetermination years. The hypothetical underpayment or overpayment for each affected year is the difference between the tax liability as redetermined under the look-back method for that year and the amount of tax liability determined as of the latest of the following:

(A) the original return date;

(B) the date of a subsequently amended or adjusted return (if, however, the amended return is due to a carryback described in section 6611(f), see paragraph (c)(4)(iii); or,

(C) the last previous application of the look-back method (in which case, the previous hypothetical tax liability is used).

(iv) *Cumulative determination of tax liability.* The redetermination of tax liability resulting from previous applications of the look-back method is cumulative. Thus, for example, in computing the amount of a hypothetical overpayment or underpayment of tax for a redetermination year, the current hypothetical tax liability is compared to the hypothetical tax liability for that year determined as of the last previous application of the look-back method.

(v) *Years affected by look-back only.* A redetermination of income tax liability under Step Two is required for every tax year for which the tax liability would have been affected by a change in the amount of income or loss for any other year for which a redetermination is required. For example, if the allocation of contract income under Step One changed the amount of a net operating loss that was carried back to a year preceding the year the taxpayer entered into the contract, the tax liability for the earlier year must be redetermined.

(vi) *Definition of tax liability.* For purposes of Step Two, the income tax liability must be redetermined by taking into account all applicable additions to tax, credits, and net operating loss carrybacks and carryovers. Thus, the tax, if any, imposed under section 55 (relating to alternative minimum tax) must be taken into account. For example, if the taxpayer did not pay alternative minimum tax, but would have paid alternative minimum tax for that year if actual rather than estimated contract price and costs had been used in determining contract income for the year, the amount of any hypothetical overpayment or underpayment of tax must be determined by comparing the hypothetical total tax liability (including hypothetical alternative minimum tax liability) with the actual tax liability for that year. The effect of taking these items into account in applying the look-back method is illustrated in Examples (4) through (7) of paragraphs (h)(5) through (h)(8) below.

(4) *Look-back Step Three: Calculation of interest on underpayment or overpayment*—(i) *In general.* After determining a hypothetical underpayment or overpayment of tax for each redetermination year, the taxpayer must determine the interest charged or credited on each of these amounts. Interest on the amount determined under Step Two is determined by applying the overpayment rate designated under section 6621, compounded daily. In general, the time period over which interest is charged on hypothetical underpayments or credited on hypothetical overpayments begins at the due date (not including extensions) of the return for the redetermination year for which the hypothetical underpayment or overpayment determined in Step Two is computed. This time period generally ends on the earlier of

(A) the due date (not including extensions) of the return for the filing year, and

(B) the date both

(*1*) the income tax return for the filing year is filed, and

(*2*) the tax for that year has been paid in full. If a taxpayer uses the simplified marginal impact method contained in paragraph (d), the remainder of this paragraph (c)(4) does not apply.

(ii) *Changes in the amount of a loss or credit carryback or carryover.* The time period for determining interest may be different in cases involving loss or credit carrybacks or carryovers in order to properly reflect the time period during which the taxpayer (in the case of an underpayment) or the Government (in the case of an overpayment) had the use of the amount determined to be a hypothetical underpayment or overpayment. Thus, if a reallocation of contract income under Step One results in an increase or decrease to a net operating loss carryback (but not a carryforward), the

interest due or to be refunded must be computed on the increase or decrease in tax attributable to the change to the carryback only from the due date (not including extensions) of the return for the redetermination year that generated the carryback and not from the due date of the return for the redetermination year in which the carryback was absorbed. In the case of a change in the amount of a carryover as a result of applying the look-back method, interest is computed from the due date of the return for the year in which the carryover was absorbed. See Examples (8) and (9) of paragraph (h)(9) for an illustration of these rules.

(iii) *Changes in the amount of tax liability that generated a subsequent refund.* If the amount of tax liability for a redetermination year (as reported on the taxpayer's original return, as subsequently adjusted on examination, as adjusted by amended return, or as redetermined by the last previous application of the look-back method) is decreased by the application of the look-back method, and any portion of the redetermination year tax liability was absorbed by a loss or credit carryback arising in a year subsequent to the redetermination year, the look-back method applies as follows to properly reflect the time period of the use of the tax overpayment. To the extent the amount of tax absorbed because of the carryback exceeds the total hypothetical tax liability for the year (as redetermined under the look-back method) the taxpayer is entitled to receive interest only until the due date (not including extensions) of the return for the year in which the carryback arose.

Example. Upon the completion of a long-term contract in 1990, the taxpayer redetermines its tax liability for 1988 under the look-back method. This redetermination results in a hypothetical reduction of tax liability from $1,500*x* (actual liability originally reported) to $1,200*x* (hypothetical liability). In addition, the taxpayer had already received a refund of some or all of the actual 1988 tax by carrying back a net operating loss (NOL) that arose in 1989. The time period over which interest would be computed on the hypothetical overpayment of $300*x* for 1988 would depend on the amount of the refund generated by the carryback, as illustrated by the following three alternative situations:

(A) If the amount refunded because of the NOL is $1,500*x*: interest is credited to the taxpayer on the entire hypothetical overpayment of $300*x* from the due date of the 1988 return, when the hypothetical overpayment occurred, until the due date of the 1989 return, when the taxpayer received a refund for the entire amount of the 1988 tax, including the hypothetical overpayment.

(B) If the amount refunded because of the NOL is $1,000*x*: interest is credited to the taxpayer on the entire amount of the hypothetical overpayment of $300*x* from the due date of the 1988 return, when the hypothetical overpayment occurred, until the due date of the 1990 return. In this situation interest is credited until the due date of the return for the completion year of the contract, rather than the due date of the return for the year in which the carryback arose, because the amount refunded was less than the redetermined tax liability. Therefore, no portion of the hypothetical overpayment is treated as having been refunded to the taxpayer before the filing year.

(C) If the amount refunded because of the NOL is $1,300*x*: interest is credited to the taxpayer on $100*x* ($1,300*x* − $1,200*x*) from the due date of the 1988 return until the due date of the 1989 return because only this portion of the total hypothetical overpayment is treated as having been refunded to the taxpayer before the filing year. However, the taxpayer did not receive a refund for the remaining $200*x* of the overpayment at that time and, therefore, is credited with interest on $200*x* through the due date of the tax return for 1990, the filing year. See Examples (10) and (11) of paragraph (h)(9) for a further illustration of this rule.

(iv) *Additional interest due on interest only after tax liability due.* For each filing year, taxpayers are required to file a Form 8697 (Interest Computation Under the Look-back Method for Completed Long-term Contracts) at the time the return for that filing year is filed to report the interest due or to be refunded under the look-back method. Even if the taxpayer has received an extension to file its income tax return for the filing year, look-back interest is computed with respect to the hypothetical increase (or decrease) in the tax liability determined under the look-back method only until the initial due date of that return (without regard to the extension). Interest is charged (or credited) with respect to the amount of look-back interest due (or to be refunded) under the look-back method from the initial due date of the return through the date the return is filed. No interest is charged (or credited) after the due date of the return with respect to the amount of the hypothetical increases (or decreases) in tax liability determined under the look-back method.

(d) *Simplified marginal impact method*—(1) *Introduction.* This paragraph (d) provides a simplified method for calculating look-back interest based on an assumed marginal tax rate of the taxpayer. Any taxpayer may elect this simplified marginal impact method, except that pass-through entities described in paragraph (d)(4) are required to apply the simplified marginal impact method at the entity level with respect to domestic contracts and the owners of those entities do not apply the look-back method to those contracts. Under the simplified marginal impact method, a taxpayer calculates the hypothetical underpayments or overpayments of tax for a prior year based on certain simplifying assumptions.

(2) *Operation*—(i) *In general.* Under the simplified marginal impact method, income from those contracts that are completed or adjusted in the filing year is first reallocated in accordance with the procedures of Step One contained in paragraph (c)(2) of this section. Step Two is modified in the following manner. The hypothetical underpayment or overpayment of tax for each year of the contract (a "redetermination year") is determined by multiplying the applicable regular tax rate by the increase or decrease in regular taxable income (or, if it produces a greater amount, by multiplying the applicable alternative minimum tax rate by the increase or decrease in alternative minimum taxable income, whether or not the taxpayer would have been subject to the alternative minimum tax) as a result of reallocating income to the tax year under Step One. Generally, the product of the alternative minimum tax rate and the increase or decrease in alternative minimum taxable income will be the greater of the two amounts described in the preceding sentence only with respect to contracts for which a taxpayer uses the full percentage of completion method only for alternative minimum tax purposes and uses the completed contract method, or the percentage of completion-capitalized cost method, for regular tax purposes. Step Three is then applied. Interest is credited to the taxpayer on the net overpayment and is charged to the taxpayer on the net underpayment for each redetermination year from the due date (determined without regard to extensions) of the return for the redetermination year until the earlier of

(A) the due date (determined without regard to extensions) of the re-

turn for the filing year, and (B) the first date by which both

(*1*) the return is filed and

(*2*) the tax is fully paid.

(ii) *Applicable tax rate.* For purposes of determining hypothetical underpayments or overpayments of tax under the simplified marginal impact method, the applicable regular tax rate is the highest rate of tax in effect for the redetermination year under section 1 in the case of an individual and under section 11 in the case of a corporation. The applicable alternative minimum tax rate is the rate of tax in effect for the taxpayer under section 55(b)(1). The highest rate is determined without regard to the taxpayer's actual rate bracket and without regard to any additional surtax imposed for the purpose of phasing out multiple tax brackets or exemptions.

(iii) *Overpayment ceiling.* The net hypothetical overpayment of tax for any redetermination year is limited to the taxpayer's total federal income tax liability for the redetermination year reduced by the cumulative amount of net hypothetical overpayments of tax for that redetermination year resulting from earlier applications of look-back method. If the reallocation of contract income results in a net overpayment of tax and this amount exceeds the actual tax liability (as of the filing year) for the redetermination year, as adjusted for past applications of the look-back method and taking into account net operating loss, capital loss, or credit carryovers and carrybacks to that year, the actual tax so adjusted is treated as the overpayment for the redetermination year. This overpayment ceiling does not apply when the simplified marginal impact method is applied at the entity level by a widely held pass-through entity in accordance with paragraph (d)(4).

(iv) *Example.* The application of the simplified marginal impact method is illustrated by the following example:

Example. Corporation X, a calendar-year taxpayer, reports income from long-term contracts and elected the simplified marginal impact method when it filed its income tax return for 1989. X uses only the percentage of completion method for both regular taxable income and alternative minimum taxable income. X completed contracts A, B, and C in 1989 and, therefore, was required to apply the look-back method in 1989. Income was actually reported for these contracts in 1987, 1988, and 1989. X's applicable tax rate, as determined under section 11, for the redetermination years 1987 and 1988 was 40 percent and 34 percent, respectively. The amount of contract income originally reported and reallocated for contracts A, B, and C, and the net overpayments and underpayments for the redetermination years are as follows:

	1987	*1988*
Contract A:		
Originally reported	$5,000*x*	$4,000*x*
Reallocated	3,000*x*	5,000*x*
Increase/(Decrease)	(2,000*x*)	1,000*x*
Contract B:		
Originally reported	6,000*x*	2,000*x*
Reallocated	7,000*x*	1,500*x*
Increase/(Decrease)	1,000*x*	(500*x*)
Contract C:		
Originally reported	8,000*x*	5,000*x*
Reallocated	4,000*x*	7,000*x*
Increase/(Decrease)	(4,000*x*)	2,000*x*
Net Increase/ (Decrease)	(5,000*x*)	2,500*x*
Tentative (Underpayment)/Overpayment		
@ .40	2,000*x*	
@ .34		(850*x*)
Ceiling:		
Actual Tax Liability (After Carryovers and Carrybacks)	1,500*x*	500*x*
Final (Underpayment)/ Overpayment	1,500*x*	(850*x*)

Under the simplified marginal impact method, X determined a tentative hypothetical net overpayment for 1987 and a net underpayment for 1988. X determined these amounts by first aggregating the difference for contracts A, B, and C between the amount of contract price originally reported and the amount of contract price as reallocated and, then, applying the highest regular tax rate to the aggregate decrease in income for 1987 and the aggregate increase in income for 1988.

However, X's overpayment for 1987 is subject to a ceiling based on X's total tax liability. Because the tentative net overpayment of tax for 1987 exceeds the actual tax liability for that year after taking into account carryovers and carrybacks to that year, the final overpayment under the simplified marginal impact method is the amount of tax liability paid instead of the tentative net overpayment. Since application of the look-back method for 1988 results in a tentative underpayment of tax, it is not subject to a ceiling. If the look-back method is applied in 1991, the ceiling amount for 1987 will be zero and the ceiling amount for 1988 will be $1,350.

X is entitled to receive interest on the hypothetical overpayment from March 15, 1988, to March 15, 1990. X is required to pay interest on the underpayment from March 15, 1989, to March 15, 1990.

(3) *Anti-abuse rule.* A taxpayer electing to use the simplified marginal impact method must use the method for each long-term contract for which it reports income (except with respect to domestic contracts if the taxpayer is an owner in a widely held pass-through entity that is required to use the simplified marginal impact method at the entity level for those contracts). The district director, however, may recompute interest for any contract (including domestic contracts of widely held pass-through entities) under the look-back method using the actual method (and without regard to the simplified marginal impact method) if the amount of income originally reported with respect to the contract for any redetermination year exceeds the amount of income reallocated under the look-back method with respect to that contract for that year (using actual contract price and contract costs) by the lesser of $1,000,000 or 20 percent of the amount of income as reallocated (*i.e.*, based on actual contract price and contract costs) under the look-back method with respect to that contract for that year. In determining whether to exercise this authority upon examination of the Form 8697, the district director may take into account whether the taxpayer overreported income for a purpose of receiving interest under the look-back method on a hypothetical overpayment determined at the highest statutory tax rate. The district director also may take into account whether the taxpayer underreported income for the year in question with respect to other contracts. Notwithstanding the look-back method, the district director may require an adjustment to the tax liability for any open tax year if the taxpayer did not apply the percentage of completion method properly on its original return.

(4) *Application*—(i) *Required use by certain pass-through entities*—(A) *General rule.* The simplified marginal impact method is required to be used with respect to income reported from domestic contracts by a pass-through entity that is either a partnership, an S corporation, or a trust, and that is not closely held. With respect to contracts described in the preceding sentence, the simplified marginal impact method is applied by the pass-through entity at the entity level. For determining the amount of any hypothetical underpayment or overpayment, the applicable regular and alternative minimum tax rates, respectively, are generally the highest rates of tax in effect for corporations under section 11 and section 55(b)(1). However, the applicable regular and alternative

minimum tax rates are the highest rates of tax imposed on individuals under section 1 and section 55(b)(1) if, at all times during the redetermination year involved (i.e., the year in which the hypothetical increase or decrease in income arises), more than 50 percent of the interests in the entity were held by individuals directly or through 1 or more pass-through entities.

(B) *Closely held.* A pass-through entity is closely held if, at any time during any redetermination year, 50 percent or more (by value) of the beneficial interests in that entity are held (directly or indirectly) by or for 5 or fewer persons. For this purpose, the term "person" has the same meaning as in section 7701(a)(1), except that a pass-through entity is not treated as a person. In addition, the constructive ownership rules of section 156(3e) apply by substituting the term "beneficial interest" for the term "stock" and by substituting the term "pass-through entity" for the term "corporation" used in that section, as appropriate, for purposes of determining whether a beneficial interest in a pass-through entity is indirectly owned by any person.

(C) *Examples.* The following examples illustrate the application of the rules of paragraph (d)(4)(i):

Example (1). P, a partnership, began a long-term contract on March 1, 1986, and completed this contract in its tax year ending December 31, 1989. P used the percentage of completion method for all contract income. Substantially all of the income from the contract arose from U.S. sources. At all times during all of the years for which income was required to be reported under the contract, exactly 25 percent of the value of P's interests were owned by Corporation M. The remaining 75 percent of the value of P's interests was owned in equal shares by 15 unrelated individuals, who are also unrelated to Corporation M. M's ownership of P represents less than 50 percent of the value of the beneficial interests in P, and, therefore, viewed alone, is insufficient to make P a closely held partnership. In addition, because no 4 of the individual owners together own 25 percent or more of the remaining value of P's beneficial interests, there is no group of 5 owners that together own, directly or indirectly, 50 percent or more by value of the beneficial interests in P. Therefore, P is not a closely held pass-through entity.

Because P is not a closely held pass-through entity, and because P completed the contract after the effective date of section 460(b)(4), P is required to use the simplified marginal impact method. Any interest computed under the look-back method will be paid to, or collected from, P, rather than its partners, and will be includible or deductible in computing the partnership's ordinary income or loss on Form 1065. Further, assume that, for the redetermination years, Corporation M is subject to alternative minimum tax at the rate of 20 percent and 3 of the individuals who own interests in P are subject to the highest marginal tax rate of 33 percent in 1988. Regardless of the actual marginal tax rates of its partners, P is required to determine the underpayment or overpayment of tax for each redetermination year at the entity level by applying a single rate to the increase or decrease in income resulting from the reallocation of contract income under the look-back method. Because more than 50 percent of the interests in P are held by individuals, P must use the highest rate specified in section 1 for each redetermination year. Thus, the rate applied by P is 50 percent for 1986, 38.5 percent for 1987, and 28 percent for 1988.

Example (2). Assume the same facts as in Example (1), except that one of the individuals, Individual I, who directly owns 5 percent of the value of the interests of P, also owns 100 percent of the stock of Corporation M. Section 1563(e)(4) of the Code provides that stock owned directly or indirectly by or for a corporation is considered to be owned by any person who owns 5 percent or more in value of its stock in that proportion which the value of the stock which that person so owns bears to the value of all the stock in that corporation. Because section 460(b)(4)(C)(iii) and this paragraph (d)(4) provide that rules similar to the constructive ownership rules of section 1563(e) apply in determining whether a pass-through entity is closely held, all of M's interest in P is attributed to I because I owns 100 percent of the value of the stock in M. Accordingly, because I's direct 5 percent and constructive 25 percent ownership of P, plus the interests owned by any 4 other individual partners, equals 50 percent or more of the value of the beneficial interests of P, P is a closely held pass-through entity within the meaning of section 460(b)(4)(C)(iii). Therefore, P cannot use the simplified marginal impact method at the entity level. Accordingly, each of the partners of P must separately apply the look-back method to their respective interests in the income and expenses attributable to the contract, but each partner may elect to use the simplified marginal impact method with respect to the partner's share of income from the contract.

(D) *Domestic contracts*—(1) *General rule.* A domestic contract is any contract substantially all of the income of which is from sources in the United States. For this purpose, "substantially all" of the income from a long-term contract is considered to be from United States sources if 95 percent or more of the gross income from the contract is from sources within the United States as determined under the rules in sections 861 through 865.

(2) *Portion of contract income sourced.* In determining whether substantially all of the gross income from a long-term contract is from United States sources, taxpayers must apply the allocation and apportionment principles of sections 861 through 865 only to the portion of the contract accounted for under the percentage of completion method. Under the percentage of completion method, gross income from a long-term contract includes all payments to be received under the contract (*i.e.*, any amounts treated as contract price). Similarly, all costs taken into account in the computation of taxable income under the percentage of completion method are deducted from gross income rather than added to a cost of goods sold account that reduces gross income. Therefore, allocable contract costs are not considered in determining whether a long-term contract is a domestic contract or a foreign contract, even if, under the taxpayer's facts, the allocation of contract costs to any portion of a contract not accounted for under the percentage of completion method would affect the relative percentages of United States and foreign source gross income from the entire contract if this portion of the contract were taken into account in applying the 95-percent test.

(E) *Application to foreign contracts.* If a widely held pass-through entity has some foreign contracts and some domestic contracts, the owners of the pass-through entity each apply the look-back method (using, if they elect, the simplified marginal impact method) to their respective share of the income and expense from foreign contracts. Moreover, in applying the look-back method to foreign contracts at the owner level, the owners do not take into account their share of increases or decreases in contract income resulting from the application of the simplified marginal impact method with respect to domestic contracts at the entity level.

(F) *Effective date.* The simplified marginal impact method must be applied to pass-through entities described in paragraph (d)(4)(i) with respect to domestic contracts completed in tax years for which the due date of the return (determined with regard to extensions) of the pass-through entity is after November 9, 1988.

(ii) *Elective use*—(A) *General rule.* As provided in paragraph (d)(4)(i), the simplified marginal impact method must be used by certain pass-through entities with respect to domestic contracts. C corporations, individuals, and owners of closely held pass-through entities may elect

the simplified marginal impact method. Owners of other pass-through entities may also elect the simplified marginal impact method with respect to all contracts other than those for which the simplified marginal impact method is required to be applied at the entity level. This rule applies to foreign contracts of widely held pass-through entities. In the case of an electing owner in a pass-through entity, the simplified marginal impact method is applied at the owner level, instead of at the entity level, with respect to the owner's share of the long-term contract income and expense reported by the pass-through entity.

(B) *Election requirements.* A taxpayer elects the simplified marginal impact method by stating that the election is being made on a timely filed income tax return (determined with regard to extensions) for the first tax year the election is to apply. An election to use the simplified marginal impact method applies to all applications of the look-back method to all eligible long-term contracts for the tax year for which the election is made and for any subsequent tax year. The election may not be revoked without the consent of the Commissioner.

(C) *Consolidated group consistency rule.* In the case of a consolidated group of corporations within the meaning of section 1504(a), an election to use the simplified marginal impact method is made by the common parent of the group. The election is binding on all other affected members of the group (including members that join the group after the election is made with respect to all applications of the look-back method after joining). If a member subsequently leaves the group, the election remains binding as to that member unless the Commissioner consents to a revocation of the election. If a corporation using the simplified marginal impact method joins a group that does not use the method, the election is automatically revoked with respect to all applications of the look-back method after it joins the group.

(e) *Delayed reapplication method*—(1) *In general.* For purposes of reapplying the look-back method after the year of contract completion, a taxpayer may elect the delayed reapplication method to minimize the number of required reapplications of the look-back method. Under this method, the look-back method is reapplied after the year of completion of a contract (or after a subsequent application of the look-back method) only when one of the following conditions is met with respect to the contract:

(i) the net undiscounted value of increases or decreases in the contract price occurring since the time of the last application of the look-back method exceeds the lesser of $1,000,000 or 10 percent of the total contract price as of that time,

(ii) the net undiscounted value of increases or decreases in contract costs occurring since the time of the last application of the look-back method exceeds the lesser of $1,000,000 or 10 percent of the total actual contract costs as of that time,

(iii) the taxpayer goes out of existence, or

(iv) neither condition (i), (ii) nor (iii) above is met by the end of the fifth tax year that begins after completion of the contract or, after any subsequent reapplication of the look-back method, that begins after the last year of reapplication.

(2) *Time and manner of making election.* An election to use the delayed reapplication method may be made for any filing year for which the due date of the return (determined with regard to extensions) is after June 12, 1990. The election is made by a statement to that effect on the taxpayer's timely filed federal income tax return (determined with regard to extensions) for the first tax year the election is to be effective. An election to use the delayed reapplication method is binding with respect to all long-term contracts for which the look-back method would be reapplied without regard to the election in the year of election and any subsequent year unless the Commissioner consents to a revocation of the election. In the case of a consolidated group of corporations within the meaning of section 1504(a), an election to use the delayed reapplication method is made by the common parent of the group. The election is binding on all other affected members of the group (including members that join the group after the election is made with respect to contracts adjusted after joining). If a member subsequently leaves the group, the election remains binding as to that member unless the Commissioner consents to a revocation of the election. If a corporation that has made the election joins a consolidated group that has not made the election, the election is treated as revoked with respect to contracts adjusted after joining.

(3) *Examples.* The operation of this delayed reapplication method is illustrated by the following examples:

Example (1). X completes a contract in 1987, and applies the look-back method when its return for 1987 is filed. X properly uses $600,000 as the actual contract price in applying the look-back method. In 1990, as a result of the settlement of a dispute with its customer, X redetermines total contract price to be $640,000, and includes $40,000 in gross income. On its return for 1990, X states that it is electing the delayed reapplication method. X is not required to reapply the look-back method at that time, because $40,000 does not exceed the lesser of $1,000,000 or 10 percent of the unadjusted contact price of $600,000, and 5 years have not passed since the last application of the look-back method.

Example (2). Assume the same facts as in Example (1), except that at the end of 1992, the fifth year after completion of the contract, no other adjustments to contract price or contract costs have occurred. X is required to reapply the look-back method in 1992 and, accordingly, redetermine its tax liability for each redetermination year. After redetermining the underpayment of tax for those years, X must compute the amount of interest charged on the underpayments. Although 1992 is the filing year, interest is due on the amount of each underpayment resulting from the adjustment only from the due date of the return for each redetermination year to the due date of the return for 1990 because the tax liability for the adjustment was fully paid in 1990. However, from the due date of the 1990 return until the due date of the 1992 return, when the look-back method is reapplied for the adjustment, interest is due on the amount of interest attributable to the underpayments.

(f) *Look-back reporting*—(1) *Procedure.* The amount of any interest due or to be refunded as a result of applying the look-back method is computed and reported on Form 8697 for any filing year. In general, the look-back method is applied by and Form 8697 is filed by the taxpayer that reports income from a long-term contract. See paragraph (g) to determine who is responsible for applying the look-back method when, prior to the completion of a long-term contract, there is a transaction that changes the taxpayer that reports income from the contract.

(2) *Treatment of interest on return*—(i) *General rule.* The amount of interest required to be paid by a taxpayer is treated as an income tax

under subtitle A, but only for purposes of subtitle F of the Code (other than sections 6654 and 6655), which addresses tax procedures and administration. Thus, a taxpayer that fails to file Form 8697 with respect to interest required to be paid or fails to pay the amount of interest due is subject to any applicable penalties under subtitle F, including, for example, a penalty for failing to file Form 8697. However, interest required to be paid under the look-back method is treated as interest expense for purposes of computing taxable income under subtitle A, even though it is treated as income tax liability for penalty purposes. Interest received under the look-back method is treated as taxable interest income for all purposes, and is not treated as a reduction in tax liability. The determination of whether or not interest computed under the look-back method is treated as tax is determined on a "net" basis for each filing year. Thus, if a taxpayer computes for the current filing year both hypothetical overpayments and hypothetical underpayments for prior years, the taxpayer has an increase in tax only if the interest computed on the underpayments for all those prior years exceeds the interest computed on the overpayments for all those prior years, for all contracts completed or adjusted for the year.

(ii) *Accounting treatment of look-back interest.* For purposes of determining taxable income under subtitle A of the Code, any amount of interest refunded to the taxpayer under the look-back method is includible in gross income as interest income in the tax year it is properly taken into account under the taxpayer's method of accounting for interest income. Any amount of interest required to be paid by a taxpayer under the look-back method is treated as interest expense arising from an underpayment of income tax. Thus, look-back interest required to be paid by an individual, or by a pass-through entity on behalf of an individual owner (or beneficiary) under the simplified marginal impact method, is treated as personal interest and, therefore, is disallowed in accordance with §1.163-9T(b)(2). Interest required to be paid at the entity level under the simplified marginal impact method is allocated among the owners (or beneficiaries) for reporting purposes in the same manner that interest income and interest expense are allocated to owners (or beneficiaries) and subject to the requirements of section 704 and any other applicable rules. Look-back interest expense allocated to an individual owner (or beneficiary) in this situation accordingly is treated as personal interest.

(g) *Mid-contract change in taxpayer*—(1) *General rules*—(i) *Application of look-back method.* If, prior to the completion of a contract, there is a transaction that changes the taxpayer that is responsible for reporting income from the contract, the look-back method is not applied at the time of that transaction, but is instead applied for the first time when the contract is completed by the successor taxpayer. For purposes of this paragraph, a contract will be treated as the same contract if the terms of the contract are not substantially changed in connection with the transaction, whether or not the customer agrees to release the predecessor from any or all of its obligations under the contract by novation. Upon completion of the entire contract, the look-back method is applied with respect to both the pre-transaction period and the post-transaction period, taking into account all amounts paid by the customer and all contract costs incurred during both periods. The successor is liable for interest computed on hypothetical underpayments for both the pre- and post-transaction years, but, in general, is entitled to receive interest only with respect to hypothetical overpayments determined for post-transaction years. The predecessor, in general, is entitled to receive interest computed on hypothetical overpayments determined for pre-transaction years. For purposes of this paragraph (g), pre- transaction years are all tax years of the predecessor in which the predecessor reported income from the contract. Post-transaction years are all tax years of the successor in which the successor reported income from the contract.

(ii) *Operation of percentage of completion method.* The predecessor and successor report income under the percentage of completion method, and apply the look-back method, using as total contract price only and all amounts expected to be received from the customer by both the predecessor and the successor. Thus, the successor reports income from the contract during the post-transaction period by "stepping into the shoes" of the predecessor with respect to the percentage of completion formula. The successor must therefore continue to use the same percentage of completion method (*i.e*, the simplified cost-to-cost method or the 10-percent method) used by the predecessor with respect to the contract for purposes of both reporting income under the percentage of completion method and recomputing income under the look-back method.

(2) *Application of look-back method to pre-transaction period*—(i) *Responsible party.* The successor is liable for interest computed on hypothetical underpayments for both the pre- and post-transaction years, but, in general, is entitled to receive interest only with respect to hypothetical overpayments determined for post-transaction years. The existence of a hypothetical underpayment (and thus whether the successor computes interest under the look-back method) is determined separately for each year and for each contract during the pre-transaction period and without regard to any other year or any other contract. Thus, the successor does not get credit with respect to any hypothetical underpayments for any hypothetical overpayments in pre-transaction years. In the case, however, of a taxable sale of a contract or of a business or an interest in a pass-through entity the assets of which include a contract, the following rules apply. Unless the sale is to a related party within the meaning of section 707(b) or 267(b) (determined without regard to section 267(f)(1)(A) and determined by substituting "80 percent" for "50 percent" with regard to the ownership of the stock of a C corporation in subsections (b)(2), (b)(8), (b)(10)(A) and (b)(12) of section 267), the successor is entitled to receive interest on hypothetical overpayments arising in pre-transaction years. In all other cases, only the predecessor is permitted to apply the look-back method to pre-transaction years to receive interest on hypothetical overpayments determined with respect to any pre-transaction year. The predecessor will be secondarily liable for any interest required to be paid with respect to the pre-transaction period (reduced by any interest on pre-trans-

action overpayments to which the predecessor is entitled).

(ii) *Look-back method for pre-transaction period.* For purposes of the look-back method, the total contract price (and contract costs if the 10-percent method was used by the predecessor) is reallocated to all affected pre-transaction and post-transaction years. The amount treated as total contract price includes only and all amounts received from the customer by both the predecessor and the successor. Thus, any payments between the predecessor and successor with respect to the contract are not treated as contract price or contract costs. See paragraph (c)(2)(vi) of this section. The successor must apply the look-back method to each pre-transaction year that is a redetermination year using the simplified marginal impact method described in paragraph (d) (regardless of whether or not the predecessor would have actually used that method). Any hypothetical underpayment for a redetermination year is treated as described in paragraph (g)(2)(iii).

(iii) *Interest on underpayments.* With respect to any hypothetical underpayment for a pre-transaction year, interest is charged on the underpayment from the due date of the predecessor's tax return for the year of the underpayment until the due date of the successor's return for the completion year, and the successor is primarily liable for the payment of interest on these amounts and the filing of Form 8697.

(iv) *Interest on overpayments.* With respect to any hypothetical overpayment for a pre-transaction year, the successor is not entitled to receive any interest on that overpayment, except in the case of a taxable sale to an unrelated party. In the case of a taxable sale to an unrelated party, the successor is entitled to interest on a hypothetical overpayment determined using the simplified marginal impact method (regardless of whether the predecessor used the method and without regard to the tax liability ceiling). In all other cases, only the predecessor is entitled to receive interest with respect to any hypothetical overpayment of tax for any pre-transaction year if the predecessor applies the look-back method to that contract for that year and computes an overpayment (using the simplified marginal impact method with regard to the tax liability ceiling, or the actual method, whichever applies to the predecessor). For purposes of determining the time period for computing interest on a resulting hypothetical overpayment, interest runs from that pre-transaction redetermination year to the year the contract is completed by the successor.

(v) *Information predecessor must provide.* In order to help the successor to apply the look-back method with respect to pre-transaction tax years, any predecessor that reported income from a long-term contract as defined in section 460(f) (whether or not under the percentage of completion method) or otherwise reported income under section 460, is required to provide the information described in this paragraph to the successor by the due date (without regard to extensions) of the predecessor's return for the tax year ending with, or the first tax year ending after, a transaction that causes a change in the taxpayer. If the predecessor fails to provide this information, the district director may require the predecessor to apply the look-back method to pre-transaction tax years and pay interest on underpayments for those years. The required information is:

(A) The portion of the contract reported by the predecessor under the percentage of completion method of section 460(b) for regular and alternative minimum tax purposes (*i.e.*, whether the predecessor used the percentage of completion method, the 40/60 method, the 70/30 method, or the 90/10 method). If the predecessor did not report any income from the contract under the percentage of completion method for either regular or alternative minimum tax purposes (as modified by section 460(b)), no other information is required to be reported.;

(B) the method used to apply the percentage of completion method (*i.e.*, the simplified cost-to-cost method or the 10-percent method, or neither);

(C) the amount of contract price reported by year;

(D) the numerator and the denominator of the percentage of completion ratio by year;

(E) the due date (without regard to extensions) of the predecessor's returns for each year in which income was required to be reported;

(F) whether the transferor is a corporate or a noncorporate taxpayer; and

(G) any other information required by the Commissioner by administrative pronouncement.

(vi) *Information successor must provide.* If the predecessor requests, the successor taxpayer must provide the information described in this paragraph to the predecessor by the due date of the return for the completion year or each year thereafter in which the successor is required to reapply the look-back method. This information is not required to be reported in the case of a taxable sale of a contract or of an interest in a pass-through entity to an unrelated party:

(A) the due date (without regard to extensions) of the return for any year in which the successor is required to apply the look-back method with respect to the contract;

(B) the total contract price reported by the successor;

(C) the total allocable contract costs incurred by the successor as of the filing year and required to be taken into account in computing the percentage of completion ratio under the percentage of completion method in use; and

(D) any other information required by the Commissioner by administrative pronouncement.

(3) *Application of look-back method to post-transaction period.* With respect to post-transaction tax years, only the successor applies the look-back method. For these years, the successor uses the same look-back method it uses for other contracts (*i.e.*, the simplified marginal impact method or the actual method) to determine the amount of any hypothetical overpayment or underpayment of tax and the time period for computing interest on these amounts.

(4) *Examples of transactions to which this paragraph applies; meaning of "predecessor and successor"—*
(i) *General rule.* For purposes of this paragraph, the term "predecessor" generally means any taxpayer that reported income from a contract before and not after any transaction that causes a change in the taxpayer that is responsible for reporting income from the contract. The term "successor" generally means any tax-

payer that reported income from a contract after but not before any transaction described in the preceding sentence.

(ii) *Examples.* The following are examples of transactions to which this paragraph applies, showing the successor and predecessor in each:

Transaction	*Predecessor*	*Successor*
Section 336 corporate liquidation	Liquidating corporation	Distributee/assignee of contract
Section 338 (qualified stock purchase	Target corporation	Acquiring
Taxable sale of contract (including sale of business)	Seller-assignor	Purchaser-assignee
S conversion to C closely held or foreign contracts)	S corporation shareholders	C corporation
C conversion to S (closely held or foreign contracts)	C corporation	S corporation shareholders
S conversion to C (widely held for domestic contracts)	S corporation	C corporation
C conversion to S (widely held for domestic contracts)	C corporation	S corporation
Separate return to consolidated return	Corporation performing contract	Parent
Consolidated return to separate return	Parent	Corporation performing contract
Consolidated return to different consolidated return	Old parent	New parent
Section 351 (tax-free incorporation)	Transferor(s)	Controlled corporation
Section 708 (termination of partnership) (widely held for domestic contracts)	Partnership	Transferees
Section 708 (termination of partnership) (closely held or foreign contracts)	Partners	Transferees
Section 721 (contribution to partnership) (widely held for domestic contracts)	Contributing Partner	Partnership
Section 721 (contribution to partnership) (closely held or foreign contracts)	Contributing Partner	Partners
Sale of partnership interest (nonterminating) (widely held for domestic contracts)	Partnership	Partnership
Sale of partnership interest (nonterminating) (closely held or foreign contracts)	Selling Partner	Purchasing Partner
Sale of S corporation stock (widely held for domestic contracts)	S corporation	S corporation
Sale of S corporation stock (closely held or foreign contracts)	Selling shareholder	Purchasing shareholder

(5) *Special rules.* In the case of a mid-contract conversion from C corporation to S corporation status, the corporation (rather than its shareholders) must apply the look-back method with respect to any C corporation tax years. In doing so, the corporation must use the same look-back method (*i.e.*, the simplified marginal impact method, or the actual method) that the corporation used for other contracts prior to electing S corporation status. The corporation is entitled to receive interest on hypothetical overpayments determined for C corporation tax years. The S corporation has the right to receive look-back interest and the liability to pay look-back interest for the C corporation years, but these amounts flow through to the shareholders for pur-

poses of subtitle A. These amounts are not treated as built-in gains or built-in losses under section 1374. A mid-contract S corporation election does not eliminate the requirement that certain S corporations use the simplified marginal impact method with respect to post-election tax years. If an S corporation that is required to use the simplified marginal impact method terminates its S election, the successor C corporation must use the simplified marginal impact method with respect to pre-transaction tax years. In that case, the C corporation as a successor in interest is also entitled to receive interest with respect to hypothetical overpayments determined for pre-transaction years. In the case of a termination of a widely-held partnership within the meaning of section 708, the successors in interest are entitled to receive interest using the simplified marginal impact method for domestic contracts. In the case of a transaction subject to section 338, the simplified method is not applied to pre-transaction years unless that was the method used by the acquired corporation.

(6) *Effective date.* In general, the rules of this paragraph apply to mid-contract changes in the taxpayer after June 12, 1990. With respect to any other mid-contract changes, taxpayers may use any reasonable method to take into account a mid-contract change in applying the look-back method, including the rules in this paragraph (g).

(h) *Examples*—(1) *Overview.* This paragraph provides computational examples of the rules of this section. Except as otherwise noted, the examples involve calendar-year taxpayers and involve long-term contracts subject to section 460 that are accounted for using the percentage of completion method, rather than the percentage of completion-capitalized cost method. If the percentage of completion-capitalized cost method were used by a taxpayer described in the examples, the amounts of contract income and expenses shown in the examples would be reduced, for purposes of determining regular taxable income, to the appropriate fraction (40, 70, or 90 percent) of contract items accounted for under the percentage of completion method. Tens of thousands of dollars ($ 00,000's) are omitted from the figures in the examples. The contracts described in the examples are assumed to be the taxpayers' only contracts that are subject to the look-back method of section 460. Except as otherwise stated, the examples assume that the taxpayer has no adjustments and preferences for purposes of section 55, so that alternative minimum taxable income is the same as taxable income, and no alternative minimum tax is imposed for the years involved. The examples assume that the taxpayer does not elect the 10-percent method, the simplified marginal impact method, or the delayed reapplication method.

(2) *Step One.* The following example illustrates the application of paragraph (c)(2):

Example (1). In 1989, W completes three long-term contracts, A, B, and C, entered into on January 1 of 1986, 1987, and 1988, respectively. For Contract A, W used the completed contract method of accounting. For Contract B, W used the percentage of completion-capitalized cost method of accounting, taking into account 60 percent of contract income under W's normal method of accounting, which was the completed contract method. For Contract C, W used the percentage of completion method of accounting. The total price for each contract was $1,000. In computing alternative minimum taxable income, W is required to use the percentage of completion method for Contracts B and C. W used regular tax costs for purposes of determining the degree of contract completion under the alternative minimum tax.

Contract A is not taken into account for purposes of applying the look-back method, because it is subject to neither section 460 nor section 56(a)(3). Thus, even if W had used the percentage of completion method as permitted under §1.451-3, instead of the completed contract method, the look-back method would not be applicable because the Contract A was entered into before the effective date of section 460.

The actual costs allocated to Contracts B and C under section 460(c) and incurred in each year of the contract were as follows:

Contract	*1987*	*1988*	*1989*	*Total*
B	$200	$400	$200	$800
C	100	300	400	800

In applying the look-back method, the first step is to allocate the contract price among tax years preceding and including the completion year. That allocation would produce the following amounts of gross income for purposes of the regular tax. Note that no income from Contract C is allocated to 1987, the year before the contract was entered into, even though contract costs were incurred in 1987:

Contract	*1987*	*1988*	*1989*
B	$100 (40% x $200/$800 x $1000)	$200 ((40% x $600/$800 x $1000) − $100)	$700
C	0	500 ($400/$800 x $1000)	500

Because the percentage of completion-capitalized cost method may not be used for alternative minimum tax purposes, the allocation of contract income would produce the following amounts of gross income for purposes of computing alternative minimum taxable income:

Contract	*1987*	*1988*	*1989*
B	$250 ($200/$800 x $1000)	$500 (($600/$800 x $1000) − $250)	$250
C	0	500	500

(3) *Step Two.* The following example illustrates the application of paragraph (c)(3):

Example (2). (i) X enters into two long-term contracts (D and E) in 1988. X determines its tax liability for 1988 as follows:

e = estimate
a = amount originally reported (actual)
h = hypothetical

	1988		
	D	*E*	*Total*
1988 contract costs	$ 3,000a	$ 2,000a	
Total contract costs	8,000e	8,000e	
Total contract price	10,000e	10,000e	
1988 completion %	37.5%e	25%e	
1988 gross income	3,750a	2,500a	
less, 1988 costs	(3,000a)	(2,000a)	
1988 net contract income	750a	500a	$1,250a
Other 1988 net income (loss)			(2,000a)
Taxable income (NOL)			(750a)
Tax			-0-a
Refund from NOL carryback fully absorbed in 1985, at 46%			345a

(ii) X completes Contract D during 1989. X determines its taxable income for 1989 as follows:

1989	*D*	*E*	*Total*
1989 contract costs	$ 3,000a	$ -0-a	
Total contract costs	6,000a	9,000e	
Total contract price	10,000a	10,000e	
1989 completion %	100%a	22.2%e	
1989 gross income/(loss)	6,250a	(278a)	
less, 1989 costs	(3,000a)	-0-a	
1989 net contract income	3,250a	(278a)	$2,972a
Other 1989 net income (loss)			-0-a
Taxable income (NOL)			2,972a
Tax at 34%			1,011a

(iii) For purposes of the look-back method, X must reallocate the actual total contract D price between 1988 and 1989 based on the actual total contract D costs. This results in the following hypothetical underpayment of tax for 1988 for purposes of the look-back method. Note that X does not reallocate the contract E price in applying the look-back method in 1989 because contract E has not been completed, even though X's estimate of contract E costs has changed. The following computation is only for purposes of applying the look-back method, and does not result in the assessment of a tax deficiency.

1988	*D*	*E*	*Total*
1988 contract costs	$ 3,000a	$ 2,000a	
Total contract costs	6,000a	8,000e	
Total contract price	10,000a	10,000e	
1988 completion %	50%a	25%e	
1988 gross income	5,000h	2,500a	
less, 1988 costs	(3,000a)	(2,000a)	
1988 net contract income	2,000h	500a	$ 2,500h
Other 1988 net income (loss)			(2,000a)
Taxable income (NOL)			500h
Tax at 34%			170h
less, previously computed tax			-0-a
Underpayment of 1988 tax			170h
Underpayment of 1985 tax from NOL carryback refund in 1988			345h
Total underpayment of tax			515h

For purposes of any subsequent application of the look-back method for which 1989 is a redetermination year, because the reallocation of contract income and redetermination of tax liability are cumulative, X will use for 1989 the amount of contract D income and the amount of tax liability that would have been reported in 1989 if X had used actual contract costs instead of the amounts that were originally reported using the estimate of $8,000. Assuming no subsequent revisions (due to, for example, adjustments to contract D price and costs determined after the end of 1989), this amount would be determined as follows:

1989	*D*	*E*	*Total*
1989 contract costs	$ 3,000a	$ -0-a	
Total contract costs	6,000e	9,000e	
Total contract price	10,000a	10,000e	
1989 completion %	100%a	22.2%e	
1989 gross income	5,000h	(278a)	
less, 1989 costs	(3,000a)	-0-a	
1989 net contract income	2,000h	(278a)	$1,722h
Other 1989 net income (loss)			-0-a
Taxable income (NOL)			1,722h
Tax at 34%			585h

(iv) X completes contract E during 1990. X determines its taxable income for 1990 as follows:

1990	*D*	*E*	*Total*
1990 contract costs		$ 7,000a	
Total contract costs		9,000a	
Total contract price		10,000a	
1990 completion %		100%a	
1990 gross income		7,778a	
less, 1990 costs		(7,000a)	
1990 net contract income		778a	$778a
Other 1990 net income (loss)			-0-a
Taxable income (NOL)			778a
Tax at 34%			265a

(v) For purposes of the look-back method, X must reallocate the actual total contract E price between 1988, 1989, and 1990, based on the actual total contract E costs. This results in the following hypothetical overpayment of tax for 1988. Note that X uses the amount of income for contract D determined in the last previous application of the look-back method, and not the amount of income actually reported:

1988

	D	*E*	*Total*
1988 contract costs	$ 3,000a	$ 2,000a	
Total contract costs	6,000a	9,000a	
Total contract price	10,000a	10,000a	
1988 completion %	50%a	22.2%a	
1988 gross income	5,000h	2,222h	
less, 1988 costs	(3,000a)	(2,000a)	
1988 net contract income	2,000h	222h	$ 2,222h
Other 1988 net income (loss)			(2,000a)
Taxable income (NOL)			222h
Tax at 34%			75h
less, previously computed tax (based on most recent application of the look-back method)			170h
Overpayment of 1988 tax			(95h)

In applying the look-back method to 1989, X again uses the amounts substituted as of the last previous application of the look-back method with respect to contract D. Thus, X computes its hypothetical underpayment for 1989 as follows:

1989

	D	*E*	*Total*
1989 contract costs	$ 3,000a	$ -0-a	
Total contract costs	6,000a	9,000a	
Total contract price	10,000a	10,000a	
1989 completion %	100%a	22.2%a	
1989 gross income	5,000h	-0-h	
less, 1989 costs	(3,000a)	(-0-a)	
1989 net contract income	2,000h	-0-a	$2,000h
Other 1989 net income (loss)			(-0-a)
Taxable income (NOL)			2,000h
Tax at 34%			680h
less, previously computed tax			585h
Underpayment of 1989 tax			95h

For purposes of any subsequent application of the look-back method for which 1990 is a redetermination year, X will use for 1990 the amount of Contract E income, and the amount of tax liability, that was originally reported in 1990 because X's estimate of the total contract costs from $8,000 to $9,000 did not change after 1989. Without regard to any subsequent revisions, these amounts are the same as in the table in paragraph (h)(3)(iv) above:

(4) *Post-completion adjustments.* The following example illustrates the application of paragraph (c)(1)(ii):

Example (3). The facts are the same as in Example (2). In 1991, X settles a lawsuit against its customer in Contract E. The customer pays X an additional $3,000, without interest, in 1991. Applying the Federal mid-term rate then in effect, this $3,000 has a discounted value at the time of contract completion in 1990 of $2,700. X is required to apply the look-back method for 1991 even though no contract was completed in 1991. X must include the full $3,000 adjustment (which was not previously includible in total contract price) in gross income for 1991. X does not elect not to discount adjustments to the contract price or costs. Thus, X adjusts the contract price by the discounted amount of the adjustment and, therefore, uses $12,700 (not $13,000) for total Contract E price, rather than $10,000, which was used when the look- back method was first applied with respect to Contract E.

For purposes of the look-back method, X must allocate the revised total Contract E price of $12,700 between 1988, 1989 and 1990 based on the actual total Contract E costs, and compare the resulting revised tax liability with the tax liability determined for the last previous application of the look-back method involving those years. This results in the following hypothetical underpayments of tax for purposes of the look-back method:

r = revised

1988

	D	*E*	*Total*
1988 contract costs	$ 3,000a	$ 2,000a	
Total contract costs	6,000a	9,000a	
Total contract price	10,000a	12,700r	
1988 completion %	50%a	22.2%a	
1988 gross income	5,000h	2,822rh	
less, 1988 costs	(3,000a)	(2,000a)	
1988 net contract income	2,000h	822rh	$ 2,822rh
Other 1988 net income/ (loss)			(2,000a)
Taxable income			822rh
Tax at 34%			279rh
less, previously computed tax			75h
Underpayment of 1988 tax			204rh

No Contract E costs were incurred in 1989, and there is no hypothetical underpayment for 1989.

1990

	D	*E*	*Total*
1990 contract costs		$ 7,000a	
Total contract costs		9,000a	
Total contract price		12,700r	
1990 completion %		100%a	
1990 gross income		9,878rh	
less, 1990 costs		(7,000a)	
1990 net contract income		2,878rh	$2,878rh
Other 1990 net income (loss)			-0-a
Taxable income (NOL)			2,878rh
Tax at 34%			978rh
less, previously computed tax			265h
Underpayment of 1990 tax			713rh

In 1992, X incurs an additional cost of $1,000 allocable to the contract, which was not previously includible in total contract costs. Applying the Federal mid-term rate then in effect, the $1,000 has a discounted value at the time of contract completion of $800. X deducts this additional $1,000 in expenses in 1992. Based on this increase to contract costs, X reapplies the look-back method, and determines the following hypothetical overpayments for 1988, 1989 and 1990 for purposes of the look-back method:

1988

	D	*E*	*Total*
1988 contract costs	$ 3,000a	$ 2,000a	
Total contract costs	6,000a	9,800r	
Total contract price	10,000a	12,700r	
1988 completion %	50%a	20.4%r	
1988 gross income	5,000h	2,592rh	
less, 1988 costs	(3,000a)	(2,000a)	
1988 net contract income	2,000h	592rh	$ 2,592rh
Other 1988 net income (loss)			(2,000a)
Taxable income (NOL)			592rh
Tax at 34%			201rh
less, previously computed tax			279rh
Overpayment of 1988 tax			(78rh)

No Contract E costs were incurred in 1989, and there is no hypothetical underpayment for 1989.

1990

	D	*E*	*Total*
1990 contract costs		$ 7,000a	
Total contract costs		9,800r	
Total contract price		12,700r	
1990 completion %		92%a	
1990 gross income		9,071rh	
less, 1990 costs		(7,000a)	
1990 net contract income		2,071rh	$2,071rh
Other 1990 net income (loss)			-0-a
Taxable income (NOL)			2,071rh
Tax at 34%			704rh
less, previously computed tax			978rh
Overpayment of 1990 tax			(274rh)

(5) *Alternative minimum tax.* The operation of the look-back method in the case of a taxpayer liable for the alternative minimum tax as provided in paragraph (c)(3)(vi) is illustrated by the following example:

Example (4). Y enters into a long-term contract in 1988 that is completed in 1989. Y used regular tax costs for purposes of determining the degree of contract completion under the alternative minimum tax.

(i) Y determines its tax liability for 1988 as follows:

1988 contract costs	$ 4,000a
Total contract costs	8,000e
Total contract price	20,000e
1988 completion %	50%e
1988 gross income	10,000a
less, 1988 contract costs	(4,000a)
1988 net contract income	6,000a
Other 1988 net income/(loss)	(3,400a)
Taxable income	2,600a
Regular tax at 34%	884a
Adjustments and preferences to produce alternative minimum taxable income	600a
Alternative minimum taxable income	3,200a
Tentative minimum tax at 20%	640a
Tax liability	884a

In 1989, Y determines the following amounts:

1989 contract costs	$ 6,000a
Total contract costs	10,000a
Total contract price	20,000a

(ii) For purposes of applying the look-back method, Y redetermines its tax liability for 1988, which results in a hypothetical overpayment of tax. This hypothetical overpayment is determined by comparing Y's original regular tax liability for 1988 with the hypothetical total tax liability (including alternative minimum tax liability) for that year because Y would have paid the alternative minimum tax if Y had used its actual contract costs to report income:

1988 contract costs	$ 4,000a
Total contract costs	10,000a
Total contract price	20,000a
1988 completion %	40%a
1988 gross income	8,000h
less, 1988 contract costs	(4,000a)
1988 net contract income	4,000h
Other 1988 net income/(loss)	(3,400a)
Taxable income	600h
Regular tax at 34%	204h
Adjustments and preferences to produce alternative minimum taxable income	600a
Alternative minimum taxable income	1,200h
Tentative minimum tax at 20%	240h
Alternative minimum tax	36h
Total tax liability	240h
less, previously computed tax	884a
Underpayment/(overpayment)	(644h)

(6) *Credit carryovers.* The operation of the look-back method in the case of credit carryovers as provided in paragraph (c)(3)(v) is illustrated by the following example:

Example (5). Z enters into a contract in 1986 that is completed in 1987. Z determines its tax liability for 1986 as follows:

1986 contract costs	$ 400a
Total contract costs	1,000e
Total contract price	2,000e
1986 completion %	40%e
1986 gross income	800a
less, 1986 costs	(400a)
1986 net contract income	400a
Other 1986 net income	-0-a
Taxable income	400a
Tax at 46%	184a
Unused tax credits carried forward from 1985 allowable in 1986	350a
Net tax due	-0-a

Z determines the following amounts for 1987:

1987 contract costs	$ 400a
Total contract price	2,000a
Total contract costs	800a

If Z had used actual rather than estimated contract costs in determining gross income for 1986, Z would have reported tax liability of $276 (46% x $600) rather than $184. However, Z would have paid no additional tax for 1986 because its unused tax credits carried forward from 1985 would have been sufficient to offset this increased tax liability. Therefore, there is no hypothetical underpayment for 1986 for purposes of the look-back method. However, this hypothetical earlier use of the credit may increase the hypothetical tax liability for 1987 (or another subsequent year) for purposes of subsequent applications of the look-back method.

(7) *Net operating losses.* The operation of the look-back method in the case of net operating loss ("NOL") carryovers as provided in paragraph (c)(3)(v) is illustrated by the following example:

Example (6). A entered into a long-term contract in 1986, which was completed in 1987. A determined its tax liability for 1986 as follows:

1986 contract costs	$ 400a
Total contract costs	1,000e
Total contract price	2,000e
1986 completion %	40%e
1986 gross income	800a
less, 1986 costs	(400a)
1986 net contract income	400a
Other 1986 net income/(loss)	(1,000a)
Taxable income/(NOL)	(600a)
Tax	-0-a

A elected to carry this loss forward to 1987 pursuant to section 172(b)(3)(C).

For 1987, A determined the following amounts:

1987 contract costs	$ 400a
Total contract costs	800a
Total contract price	2,000a

If actual rather than estimated contract costs had been used in determining gross income for 1986, A would have reported $1,000 of gross income from the contract rather than $800, and thus would have reported a loss of $400 rather than $600. However, since A would have paid no tax for 1986 regardless of whether actual or estimated contract costs had been used, A does not have an underpayment for 1986 for purposes of the look-back method. If A had, instead, carried back the 1986 NOL, and this NOL had been absorbed in the tax years 1983 through 1985, it would have resulted in refunds of tax for those years in 1986. When A applies the look-back method, a hypothetical underpayment of tax would have resulted for those years due to a hypothetical reduction in the amount that would have been refunded if income had been reported on the basis of actual contract costs. See Example (2)(iii).

(8) *Alternative minimum tax credit.* The following example illustrates the application of the look-back method if affected by the alternative minimum tax credit as provided in paragraph (c)(3)(vi):

Example (4), above, illustrates that the reallocation of contract income under the look-back method can result in a hypothetical underpayment or overpayment determined using the alternative minimum tax rate, even though the taxpayer actually paid only the regular tax for that year. However, application of the look-back method had no effect on the difference between the amount of alternative minimum taxable income and the amount of regular taxable income taken into account in that year because the taxpayer was required to use the percentage of completion method for both regular and alternative minimum tax purposes and used the same version of the percentage of completion method for both regular and alternative minimum tax purposes (*i.e.*, the taxpayer had made an election to use regular tax costs in determining the percentage of completion for purposes of computing alternative minimum taxable income).

The following example illustrates the application of the look-back method in the case of a taxpayer that does not use the percentage of completion method of accounting for long-term contracts in computing taxable income for regular tax purposes and thus must make an adjustment to taxable income to determine alternative minimum taxable income. The example also shows how interest is computed under the look-back method when the taxpayer is entitled to a credit under section 53 for minimum tax paid because of this adjustment.

Example (7). X is a taxpayer engaged in the construction of real property under contracts that are completed within a 24-month period and whose average annual gross receipts do not exceed $10,000,000. As permitted by section 460(e)(1)(B), X uses the completed contract method ("CCM") for regular tax purposes. However, X is engaged in the construction of commercial real property and, therefore, is required to use the percentage of completion method ("PCM") for alternative minimum tax ("AMT") purposes.

Assume that for 1988, 1989, and 1990, X has only one long-term contract, which is entered into in 1988 and completed in 1990. Assume further that X estimates gross income from the contract to be $2,000, total contract costs to be $1,000, and that the contract is 25 percent complete in 1988 and 75 percent complete in 1989. In 1990, the year of completion, the percentage of completion does not change but, upon completion, gross income from the contract is actually $3,000, instead of $2,000, and costs are actually $1,000.

For 1988, 1989, and 1990, X's income and tax liability using estimated contract price and costs are as follows:

Estimates	*1988*	*1989*	*1990*
Regular tax			
Long-term			
Contract-CCM	$-0-	$ -0-	$2,000
Other Income	-0-	5,000	-0-
Total Income	-0-	5,000	2,000
Tax @ 34%	-0-	1,700	680
AMT			
Gross Income	500	1,000	1,500
Deductions	(250)	(500)	(250)
Total long-term			
Contract-PCM	250	500	1,250
Other Income	-0-	5,000	-0-
Total Income	250	5,500	1,250
Tax @ 20%	50	1,100	250
Tentative Minimum Tax	50	1,100	250
Regular Tax	-0-	1,700	680
Minimum Tax Credit	-0-	(50)	-0-
Net Tax Liability	50	1,650	680

When X files its tax return for 1990, X applies the look-back method to the contract. For 1988, 1989, and 1990, X's income and tax liability using actual contract price and costs are as follows:

Actual	*1988*	*1989*	*1990*
Regular tax			
Long-term			
Contract-CCM	$-0-	$ -0-	$2,000
Other Income	-0-	5,000	-0
Total Income	-0-	5,000	2,000
Tax @ 34%	-0-	1,700	680
AMT			
Gross Income	750	1,500	750
Deductions	(250)	(500)	(250)
Total long-term			
Contract-PCM	500	1,000	500
Other Income	-0-	5,000	-0-
Total Income	500	6,000	500
Tax @ 20%	100	1,200	100
Tentative Minimum Tax	100	1,200	100
Regular Tax	-0-	1,700	680
Minimum Tax Credit	-0-	(100)	-0-
Net Tax Liability	100	1,600	680
Underpayment	50		
Overpayment		50	

As shown above, application of the look-back method results in a hypothetical underpayment of $50 for 1988 because X was subject to the alternative minimum tax for that year. Interest is charged to X on this $50 underpayment from the due date of X's 1988 return until the due date of X's 1990 return.

In 1989, although X was required to compute alternative minimum taxable income using the percentage of completion method, X was not required to pay alternative minimum tax. Nevertheless, the look-back method must be applied to 1989 because use of actual rather than estimated contract price in computing alternative minimum taxable income for 1988 would have changed the amount of the alternative minimum tax credit carried to 1989. Interest is paid to X on the resulting $50 overpayment from the due date of X's 1989 return until the due date of X's 1990 return.

(9) *Period for interest.* The following Examples (8) through (11) illustrate how to determine the period for computing interest as provided in paragraph (c)(4):

Example (8). The facts are the same as in Example (6), except that the contract is completed in 1988, and A determined the following amounts for 1987 and 1988:

for 1987:

1987 contract costs	$ -0-
Total contract costs	1,000e
Total contract price	2,000e
1987 completion %	40%e
1987 gross income	-0-a
less, 1987 costs	-0-a
Other 1987 net income	600a
Net operating loss carryforward from 1986	(600a)
taxable income	-0-a
tax	-0-a

for 1988:

1988 contract costs	400a
Total contract costs	800a
Total contract price	2,000a

If actual rather than estimated contract costs had been used in determining gross income for 1986, A would have reported $1,000 of gross income from the contract for 1986 rather than $800, and would have reported a net operating loss carryforward to 1987 of $400 rather than $600. Therefore, A would have reported taxable income of $200, and would have paid tax of $80 (*i.e.*, $200 x 40%) for 1987. The due date for filing A's Federal income tax return for its 1988 taxable year is March 15. A obtains an extension and files its 1988 return on September 15, 1989. Under the look-back method, A is required to pay interest on the amount of this hypothetical underpayment ($80) computed from the due date (determined without regard to extensions) for A's return for 1987 (not 1986, even though 1986 was the year in which the net operating loss arose) until March 15 (not September 15), the due date (without regard to extensions) of A's return for 1988. A is required to pay additional interest from March 15 until September 15 on the amount of interest outstanding as of March 15 with respect to the hypothetical underpayment of $80.

Example (9). The facts are the same as in Example (6), except that A carries the net operating loss of $600 back to 1983 rather than forward to 1987, and receives a refund of $276 ($600 reduction in 1983 taxable income x 46% rate in effect in 1983). As in Example (6), if actual contract costs had been used, A would have reported a loss for 1986 of $400 rather than $600. Thus, A would have received a refund of 1983 tax of $184 ($400 x 46%) rather than $276. Under the look-back method A is required to pay interest on the difference in these two amounts ($92) computed from the due date (determined without regard to extensions) of A's return for 1986 (the year in which the carryback arose rather than 1983, the year in which it was used) until the due date of A's return for 1988.

Example (10). B enters into a long-term contract in 1986 that is completed in 1988. B determines its 1986 tax liability as follows:

1986 contract costs	$ 400a
Total contract costs	1,000e
Total contract price	2,000e
1986 completion %	40%e
1986 gross income	800a
less, 1986 costs	(400a)
1986 net contract income	400a
Other 1986 net income	2,000a
Taxable income	2,400a
Tax at 46%	1,104a

B determines its tax liability for 1987 as follows:

1987 contract costs	$ 400a
Total contract costs	1,600e
Total contract price	2,000e
1987 completion %	50%e
1987 gross income	200a
(=(50% x $2,000)	$800 previously reported)
less, 1987 costs	(400a)
1987 net contract income	(200a)
Other 1987 net income/(loss)	(2,200a)
Taxable income (NOL)	(2,400a)
Tax	-0-a

Assume that B had no taxable income in either 1984 or 1985, so that the entire amount of the $2,400 net operating loss is carried back to 1986, and B receives a refund, with interest from the due date of B's 1987 return, of the entire $1,104 in tax that it paid for 1986.

In 1988, B determines the following amounts:

1988 contract costs	$ 800a
Total contract costs	1,600a
Total contract price	2,000a

If B had used actual contract costs rather than estimated costs in determining its gross income for 1986, B would have had gross income from the contract of $500 rather than $800, and thus would have had taxable income of $2,100 rather than $2,400, and would have paid tax of $966 rather than $1,104. B is entitled to receive interest on the difference between these two amounts, the hypothetical overpayment of tax of $138. Interest is computed from the due date (without regard to extensions) of B's return for 1986 until the due date for B's return for 1987. Interest stops running at this date, because B's hypothetical overpayment of tax ended when B filed its original 1987 return and received a refund for the carryback to 1986, and interest on this refund began to run only from the due date of B's 1987 return. See section 6611(f).

Example (11). C enters into a long-term contract in 1986, its first year in business, which is completed in 1988. C determines its tax liability for 1986 as follows:

1986 contract costs	$ 400a
Total contract costs	1,000e
Total contract price	2,000e
1986 completion %	40%e
1986 gross income	800a
less, 1986 costs	(400a)
1986 net contract income	400a
Other 1986 net income	2,000a
Taxable income (NOL)	2,400a
Tax at 46%	1,104a

C determines its tax liability for 1987 as follows:

1987 contract costs	$ 400a
Total contract costs	1,066e
Total contract price	2,000e
1987 completion %	75%e
1987 gross income	700a
less, 1987 costs	(400a)
1987 net contract income	300a
Other 1987 net income	(2,450a)
Taxable income (NOL)	(2,150a)
Tax	-0-a

C carries back the net operating loss to 1986, and files an amended return for 1986, showing taxable income of $250, and receives a refund of $989 (46% x $2,150). Interest on this refund begins to run only as of the due date of C's 1987 return. See section 6611(f).

In 1988, when the contract is completed, C determines the following amounts:

1988 contract costs	$ 800a
Total contract costs	1,600a
Total contract price	2,000a

If C had used actual contract price and contract costs in determining gross income for 1986, it would have reported gross income from the contract of $500 rather than $800, taxable income of $2,100 rather than $2,400, and tax liability of $966 rather than $1,104.

If C had used actual contract price and contract costs in determining gross income for 1987, it would have reported gross income from the contract of $500 rather than $700, and would have reported a net operating loss of $2,350, rather than $2,150, which would have been carried back to 1986.

Under the look-back method, C receives interest with respect to a total 1986 hypothetical overpayment of $138 ($1,104 minus $966). C is credited with interest on $23 of this amount only from the due date of C's 1986 return until the due date of C's 1987 tax return, because this portion of C's total hypothetical overpayment for 1986 was refunded to C with interest computed from the due date of C's 1987 return and, therefore, was no longer held by the government. However, because the remainder of the total hypothetical overpayment of $115 was not refunded to C, C is credited with interest on this amount from the due date of C's 1986 return until the due date of C's 1988 tax return. Under the look-back method, C receives no interest with respect to 1987, because C had no tax liability for 1987 using either estimated or actual contract price and costs.

§1.460-7. Exempt long-term contracts. [Reserved.]

§1.460-8. Changes in method of accounting. [Reserved.]

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 3. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805

Par. 4. Section 602.101(c) is amended by adding in the appropriate place in the table:

"§1.460-6 . . . 1545-1031."

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue .

(Fiiled by the Office of the Federal Register on June 11, 1990, 8:45 a.m., and published in the issue of the Federal Register for June 12, 1990, 55 F.R. 23755)

Notice of Proposed Rulemaking

Returns Relating to Cash in Excess of $10,000 Received in a Trade or Business

IA-41-89

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the rules and regulations portion of *** [T.D. 8304, page 250, this Bulletin], the Internal Revenue Service is issuing temporary regulations to provide rules relating to the reporting of cash in excess of $10,000 received in a trade or business. These regulations enable law enforcement authorities to ascertain the magnitude of large transfers of cash with respect to the same transaction. The regulations affect trades or businesses that are currently required to report large receipts of cash. The text of the temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES: These amendments are proposed to be effective for amounts received after December 31, 1989. Comments and requests for a public hearing must be received by September 7, 1990.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC: CORP:TR (IA-41-89), Room 4429, Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments concerning the accuracy of the burden estimate and suggestions for reducing the burden should be directed to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, D.C. 20503.

The collection of information in this regulation is in §1.6050I-1. This information is required by the Internal Revenue Service to ascertain the magnitude of transfers of large amounts of cash. This information will be used by law enforcement authorities with respect to the enforcement of federal and state laws. The likely respondents are businesses or other for-profit institutions and nonprofit institutions.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances. Estimated total annual reporting burden: 7,489 hours. The estimated average annual burden per respondent is 18 minutes. Estimated number of respondents: 8,300. Estimated annual frequency of responses: 3.

Background

The temporary regulations published in the Rules and Regulations portion of this issue of the Federal Register add a new temporary regulation §1.6050I-1T to Part 1 of Title 26 of the Code of Federal Regulations. The temporary regulations require a person who currently must report the receipt of cash in excess of $10,000 with respect to a transaction to also make a report each time subsequent cash payments received within a one-year period with respect to the same transaction or a related transaction aggregate an amount in excess of $10,000. For the text of the new temporary regulations, see T.D. 8304 published in *** [page 250, this Bulletin]. The preamble to the temporary regulations explains the regulations.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before the adoption of these proposed regulations, consideration will be given to any written comments that are submitted (preferably an original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Internal Revenue Service by any person who also submits written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on July 6, 1990, 8:45 a.m., and published in the issue of the Federal Register for July 9, 1990, 55 F.R. 28061)

Notice of Proposed Rulemaking

Information With Respect to Certain Foreign-Owned Corporations

IL-868-89

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed Income Tax Regulations relating to information which must be reported and records which must be maintained by certain foreign-owned corporations under sections 6038A and 6038C of the Internal Revenue Code. These regulations will provide appropriate guidance for affected reporting corporations and related parties. The regulations will affect any reporting corporation, that is, certain domestic corporations or foreign corporations, as well as certain related parties of the reporting corporation.

DATES: Written comments, requests to appear, and outlines of oral comments to be presented at a public hearing scheduled for Friday, February 22, 1991, at 10:00 a.m., must be received by Friday, February 8, 1991. See notice of hearing published elsewhere in *** [Announcement 90-145, 1990-53 I.R.B. 64].

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, D. C. 20503, with copies to the Internal Revenue Service, Attention: IRS Reports Clearance Officer T:FP, Washington, D. C. 20224. The collection of information in this regulation is in §§1.6038A-2 and 1.6038A-3. This information is required by the Internal Revenue Service to determine the correct tax treatment of transactions between 25-percent foreign-owned corporations engaged in a U.S. trade or business and related parties. The likely respondents for Form 5472 are corporations.

These estimates are an approximation of the average time expected to be necessary for record maintenance and collection of information. They are based upon such information as is available to the Internal Revenue Service. Individual respondents and recordkeepers may require greater or less time, depending on their particular circumstances.

Estimated total annual reporting and recordkeeping burden: 1,539,000 hours.

The estimated average annual reporting burden per respondent is 14 hours and 26 minutes.

The estimated average annual recordkeeping burden per recordkeeper is 10 hours.

Estimated number of respondents/recordkeepers: 63,000.

Estimated annual frequency of responses: 1.

Background

This document contains proposed Income Tax Regulations (26 CFR Part 1) under sections 6038A and 6038C of the Internal Revenue Code of 1986. These regulations are generally proposed to be effective for taxable years beginning after July 10, 1989. However, special effective date rules are proposed to provide that certain provisions sections will be effective as of December 10, 1990, except as follows:

§1.6038A-1(c)	July 10, 1989
§1.6038A-2.....	July 10, 1989
§1.6038A-3.....	March 20, 1990
§1.6038A-4.....	July 10, 1989
§1.6038A-6.....	November 5, 1990

Explanation of Provisions

Prior Law

Prior to the enactment of the Revenue Reconciliation Act of 1989, section 6038A required an annual filing of an information return, Form 5472, by a domestic corporation (or a foreign corporation engaged in trade or business within the United States) that is controlled by a foreign person. A person controlled a corporation if that person owned stock possessing more than 50 percent of the total voting power of all classes of stock entitled to vote or more than 50 percent of the total value of shares of all classes of stock. If a corporation failed to furnish the information required under the statute, a penalty of $1000 was imposed for each taxable year with respect to which such failure occurred. An additional penalty of $1000 was imposed for each 30-day period during which such failure continued after the expiration of a 90-day period following the mailing of a notice of failure. The increase in the additional penalty was limited to $24,000.

Statutory Provision

The Revenue Reconciliation Act of 1989 amended section 6038A in several significant ways. First, the threshold of foreign ownership subjecting a corporation to the application of section 6038A was lowered from 50 percent to 25 percent. Second, amended section 6038A requires the maintenance of records as prescribed by regulations.

The penalty for the failure either to file timely the annual information return or to maintain (or to cause another to maintain) the prescribed records is $10,000 for each taxable year with respect to which such failure occurs. The former maximum additional penalty of $24,000 has been deleted. If the failure continues for more than 90 days after the day on which notice is given by the Service of such failure, an additional penalty of $10,000 is assessed for each 30-day period or part thereof that the failure continues.

In addition to the above changes, the 1989 Act added a new section, section 6038A(e)(1), requiring a foreign related party that engages in transactions with a reporting corporation to authorize the reporting corporation to act as its agent solely for purposes of sections 7602, 7603, and 7604.

If the related party does not authorize the reporting corporation to act as its agent, the Secretary shall apply the noncompliance penalty with respect to transactions between the related party and the reporting corporation.

If the noncompliance penalty applies, the amount allowed as a deduction for amounts paid or incurred to the related party and for the cost of

goods purchased from the related party or sold by the reporting corporation to the related party is determined by the Secretary in his sole discretion based upon such probative information as the Secretary may choose to obtain. See H.R. Conf. Rep. 386, 101st Cong., 1st Sess. 593-595 (1989).

The noncompliance penalty may also be applied to a transaction between the related party and the reporting corporation if the reporting corporation does not substantially comply with a summons for records or testimony relating to such transaction.

The Omnibus Budget Reconciliation Act of 1990 (the 1990 Act) added section 6038C to the Internal Revenue Code. Foreign corporations engaged in U.S. trade or business are subject to the provisions of section 6038C, which are similar to the provisions of section 6038A. Additional regulations under section 6038C will be issued at a later time which will reflect the 1990 Act changes with respect to such corporations.

Comments

Comments are solicited with respect to ways to permit related foreign corporations to file a single agency designation, in a manner similar to the rules contained in paragraph (g) of §1.6038A-1 regarding the ability of the common parent of an affiliated group to file a consolidated Form 5472 for all related party transactions of the U.S. consolidated return group and to be designated as agent for related parties.

The *de minimis* rule of §1.6038A-1(h) was developed after consideration of case studies submitted by international examiners. Comments from taxpayers are solicited.

Comments and case studies are also solicited on whether the various tests for determining material profit and loss statements under §1.6038A-3(c)(3) are appropriate. In particular, comments regarding the existing accounting and business practices for maintaining profit and loss statements are requested. Objections to the profit and loss statement standards set forth in these regulations should be accompanied by proposed alternatives. Comments also are solicited on when a profit margin analysis, rather than a return on assets analysis, might be appropriate for the high profit test under paragraph (c)(6) of section 1.6038A-3.

Explanation of Proposed Regulations

General requirement and definitions

Section 1.6038A-1 provides the general rule that certain foreign-owned U.S. corporations and foreign corporations engaged in trade or business within the United States (reporting corporations) must furnish certain information annually on an information return, Form 5472, and maintain records relating to transactions between the reporting corporation and a foreign related party as described in §1.6038A-3. Definitions are provided for the terms reporting corporation, 25-percent foreign-owned, 25-percent foreign shareholder, related party, foreign person, and foreign related party. Special rules are provided for U.S. consolidated return groups.

Requirement of return

Section 1.6038A-2 describes the information that must be furnished annually on Form 5472. Reporting corporations whose sole trade or business in the United States is a banking, financing, or similar business as defined in §1.864-4(c)(5)(i) (formerly excepted from filing Form 5472) will be subject to the information filing requirement of §1.6038A-2.

Record maintenance

Section 1.6038A-3 provides the general rule that records to be maintained by a reporting corporation are those records sufficient to establish the correctness of the federal income tax return (including the correct treatment of transactions with related parties) of the reporting corporation. Records prepared, maintained, or possessed by a foreign related party relating to transactions between the reporting corporation and any related parties must be maintained in the United States, except where an election is in effect under paragraph (f) of §1.6038A-3. A record may be maintained in the United States by a party other than the reporting corporation; however, the reporting corporation remains liable for the proper compilation and maintenance of such records.

The regulations generally are based upon the view that the requirement to "maintain" records does not require their creation. However, basic accounting records and material profit and loss statements must be created if they are not otherwise maintained. In connection with record maintenance and production, labels placed upon documents by the taxpayer shall not control.

Some reporting corporations may be unfamiliar with record maintenance practices generally adopted in the United States under the guidance of section 6001, its regulations, and longstanding administrative practice developed thereunder. In addition, such corporations may not be aware of the specific information that would be relevant to an examination of their related party transactions. In the absence of detailed guidance, such reporting corporations might not retain the information that is required for U.S. tax purposes. Therefore, six general categories of records with respect to related party transactions are provided as a safe harbor. Reporting corporations that maintain records in the categories that apply to the particular industry or business of the reporting corporation, to the extent such records may be relevant to the correct U.S. tax treatment of the transactions between related parties, are deemed to meet the record maintenance requirements of section 6038A.

Reporting corporations may enter into agreements with the District Director or the Assistant Commissioner (International) specifying what records must be maintained to satisfy the maintenance requirements for such reporting corporations under this section. Agreements with respect to retention of machine-sensible records under Rev. Proc. 86-19 [1986-1 C.B. 558] may also be executed. An annual election to maintain records outside the United States is provided if the reporting corporation agrees to produce the records as prescribed by the regulations. The District Director or the Assistant Commissioner (International) may invalidate the election to maintain records outside the United States under certain circumstances.

Monetary penalty

Section 1.6038A-4 provides for the imposition of a monetary penalty of $10,000 for each taxable year in which a reporting corporation fails to timely file Form 5472, fails to maintain or cause another to maintain the records described in §1.6038A-3, or fails to produce the records within the time prescribed in §1.6038A-3. A rule permitting a reporting corporation to show reasonable cause as to why the failure occurred is provided. The reasonable cause exception is to be interpreted in accordance with the legislative history. *See* S. Prt. 101- [ ], 101st Cong., 1st Sess. 117 (1989) and H. Conf. Rep. No. 386, 101st Cong., 1st Sess. 593 (1989). Failure to maintain records is determined upon the basis of the overall compliance with the records maintenance requirement by a reporting corporation. Finally, rules relating to the increase in the penalty where the failure continues after notification are provided.

Authorization of agent

Section 1.6038A-5 provides that the noncompliance penalty in §1.6038A-7 shall apply to any transaction between a related party and a reporting corporation, unless the related party authorizes the reporting corporation to act as its limited agent solely for purposes of sections 7602, 7603, and 7604. When the proposed regulations become final, a related party annually shall authorize the reporting corporation to act as its limited agent on Form 5472 or within 30 days of a request from the Service. Until official Internal Revenue Service forms are available, the authorization as set forth in the regulations should be utilized. A procedure is provided for the retroactive authorization of an agent with respect to inadvertent transactions with related parties when the relationship is attenuated and certain other requirements are met. Additionally, a provision allows for the authorization by a foreign related party to be deemed under certain circumstances. A deemed authorization is effective only for transactions entered into prior to the time when the reporting corporation knew or had reason to know that the related party was in fact related.

Failure to furnish information

Section 1.6038A-6 provides that the noncompliance penalty contained in §1.6038A-7 may be applied under certain circumstances when information requested by the Service is not produced. A special rule permits the District Director or the Assistant Commissioner (International) to choose not to apply the noncompliance penalty when, in the discretion of the District Director or the Assistant Commissioner (International), the failure to furnish information is *de minimis.*

Noncompliance penalty

Section 1.6038A-7 provides that if a foreign related party does not authorize the reporting corporation to act as its agent as required by §1.6038A-5 or, if following a failure to furnish information as required by §1.6038A-6, the District Director or the Assistant Commissioner (International) determines that §1.6038A-7 should apply, the District Director or the Assistant Commissioner (International) shall determine the amount of deductions allowed for any amount paid or incurred by the reporting corporation to the related party in connection with such transaction and the cost to the reporting corporation of any property acquired in such transaction from the related party or transferred to the related party. The amount of the deduction or cost to the reporting corporation shall be determined in the sole discretion of the District Director or the Assistant Commissioner (International). *See* H. Conf. Rep. 386, 101st Cong., 1st Sess. 593-95 (1989).

Section 6038C

Corporations subject to section 6038C generally will be subject to the rules contained in §§1.6038A-1 through 1.6038A-7.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comments on their impact on small business.

Comments and Request for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held on Friday, February 22, 1991.

List of Subjects in 26 CFR §§1.6000-1 through 1.6109-2

Income taxes, Administration and procedure, Payment of tax.

Adoption of amendment to the regulations

Accordingly, 26 CFR Part 1 is amended as follows:

PART 1—INCOME TAX REGULATIONS

Paragraph 1. The authority for Part 1 is amended by adding the following citations:

Authority: 26 U.S.C. 7805. * * * Sections 1.6038A-1, 1.6038A-2, 1.6038A-3, 1.6038A-4, 1.6038A-5, 1.6038A-6, and 1.6038A-7 also issued under 26 U.S.C. 6038A. * * *

Par. 2. Section 1.6038A-1 is removed.

Par. 3. New §§1.6038A-0 through 1.6038A-7 are added to read as follows:

§1.6038A-0 *Table of contents.*

This section lists the captions that appear in the regulations under section 6038A.

§1.6038A-1 *General requirements and definitions.*

(a) Purpose and scope.
(b) In general.
(c) Reporting corporation.
(1) In general.
(2) 25-percent foreign-owned.
(3) 25-percent foreign shareholder.
(i) In general.
(ii) Total voting power and value.

(d) Related party.
(e) Attribution rules.
(1) Attribution under section 318.
(2) Attribution of transactions with related parties engaged in by a partnership.
(f) Foreign person.
(g) Foreign related party.
(h) Safe harbor for reporting corporations with *de minimis* value of related party transactions.
(1) In general.
(2) Aggregate value of gross payments made or received.
(i) Consolidated return groups.
(1) Required information.
(2) Authorization of agent and retention of records.
(3) Monetary penalties.
(j) Examples.
(k) Effective dates.
(1) Section 1.6038A-1.
(2) Section 1.6038A-2.
(3) Section 1.6038A-3.
(4) Section 1.6038A-4.
(5) Section 1.6038A-5.
(6) Section 1.6038A-6.
(7) Section 1.6038A-7.
§1.6038A-2 *Requirement of return.*
(a) Form 5472 required.
(1) In general.
(2) Reportable transaction.
(b) Contents of return.
(1) Reporting corporation.
(2) Related party.
(3) Foreign related party transactions for which only monetary consideration is paid or received by the reporting corporation.
(4) Foreign related party transactions involving nonmonetary consideration or no consideration.
(5) Additional information.
(6) Reasonable estimate.
(i) Estimate within 25 percent of actual amount.
(ii) Other estimates.
(7) Small amounts.
(8) Accrued payments and receipts.
(c) Method of reporting.
(d) Time and place for filing returns.
(e) Duplicate filing required.
(f) Exceptions.
(1) No reportable transactions.
(2) Transactions solely with a domestic reporting corporation.
(3) Transactions with a corporation subject to reporting under section 6038.
(g) Filing Form 5472 when transactions with related parties engaged in by a partnership are attributed to a reporting corporation.
(h) Effective dates for certain reporting corporations.
§1.6038A-3 *Record maintenance.*
(a) General maintenance requirements.
(1) Section 6001 and section 6038A.
(2) Safe harbor.
(b) Other maintenance requirements.
(1) Records that must be maintained in the United States.
(2) Indirectly related records.
(3) Foreign related party or third-party maintenance.
(4) Translation of records.
(5) Exception for foreign governments.
(c) Specific records to be maintained for safe harbor.
(1) In general.
(2) Descriptions of categories of documents to be maintained.
(i) Original entry books and transaction records.
(ii) Profit and loss statements.
(iii) Pricing documents.
(iv) Foreign country and third party filings.
(v) Ownership and capital structure records.
(vi) Records of loans, services, and other non-sales transactions.
(3) Material profit and loss statements.
(4) Existing records test.
(5) Significant industry segment test.
(i) In general.
(ii) Gross revenue test.
(iii) Percentage tests.
(iv) Definitions.
(A) Gross revenue.
(B) Identifiable assets.
(C) Operating profit or loss.
(D) Product.
(E) Related products or services.
(F) Model.
(G) Product line.
(v) Level of specificity required.
(vi) Examples.
(6) High profit test.
(i) In general.
(ii) Return on assets test.
(d) Liability for certain partnership record maintenance.
(e) Agreements with the District Director or the Assistant Commissioner (International).
(f) Exception to U.S. maintenance.
(1) Annual election.
(2) Retroactive elections.
(3) Scheduled production for high volume or other reasons.
(4) Invalidation of non-U.S. maintenance election.
(g) Period of retention.
(h) Effective dates.
§1.6038A-4 *Monetary penalty.*
(a) Imposition of monetary penalty.
(1) In general.
(2) Liability for certain partnership transactions.
(3) Calculation of monetary penalty.
(b) Reasonable cause.
(1) In general.
(2) Affirmative showing required.
(i) In general.
(ii) Small corporations.
(c) Failure to maintain records or to cause another to maintain records.
(d) Increase in penalty where failure continues after notification.
(1) In general.
(2) Additional penalty for another failure.
(3) Cessation of accrual.
(4) Continued failures.
(e) Other penalties.
(f) Examples.
Example (1)—Failure to file Form 5472.
Example (2)—Failure to maintain records.
(g) Effective dates.
§1.6038A-5 *Authorization of agent.*
(a) Failure to authorize.
(b) Annual authorization by related party.
(1) In general.
(2) Authorization for prior years.
(c) Legal effect of authorization of agent.
(1) Agent for purposes of commencing judicial proceedings.
(2) Foreign related party found where reporting corporation found.
(d) Successors in interest.
(e) Retroactive authorization for inadvertent transaction.
(1) In general.
(2) Procedure for requesting retroactive authorization.
(3) Effect of retroactive authorization.
(i) Noncompliance penalty adjustments.
(ii) Monetary penalty.
(4) Deemed compliance.
(5) Reason to know.
(6) Effect of deemed compliance.

(f) Effective dates.

§1.6038A-6 *Failure to furnish information.*

(a) In general.

(b) Enforcement proceeding not required.

(c) De minimis failure.

(d) Effective dates.

§1.6038A-7 Noncompliance.

(a) In general.

(b) Determination of the amount.

(c) Separate application.

(d) Effective dates.

§1.6038A-1 *General requirements and definitions.*

(a) *Purpose and scope.* This section and §§1.6038A-2 through 1.6038A-7 provide rules for certain foreign-owned U.S. corporations and foreign corporations engaged in trade or business within the United States (reporting corporations) relating to information that must be furnished, records that must be maintained, and the authorization of the reporting corporation to act as agent for related foreign persons for purposes of sections 7602, 7603, and 7604 that must be executed. Section 6038A(a) and this §1.6038A-1 require that a reporting corporation furnish certain information annually and maintain certain records relating to transactions between the reporting corporation and certain related parties. This §1.6038A-1 also provides definitions of terms used in section 6038A. Section 1.6038A-2 provides guidance concerning the information to be submitted and the filing of the required return. Section 1.6038A-3 provides guidance concerning the maintenance of records. Section 1.6038A-4 provides guidance concerning the application of the monetary penalty for the failure either to furnish information or to maintain records. Section 1.6038A-5 provides guidance concerning the authorization of an agent for purposes of sections 7602, 7603, and 7604. Section 1.6038A-6 provides guidance concerning the failure to furnish information requested by a summons. Finally, §1.6038A-7 provides guidance concerning the application of the noncompliance penalty for failure by the related party to authorize an agent or for the reporting corporation to substantially comply with a summons.

(b) *In general.* A reporting corporation must furnish the information described in §1.6038A-2 by filing an annual information return (Form 5472), and must maintain records as described in §1.6038A-3.

(c) *Reporting corporation*—(1) *In general.* For purposes of section 6038A, a reporting corporation is either a domestic corporation that is 25-percent foreign-owned as defined in paragraph (c)(2), or a foreign corporation that is 25-percent foreign-owned and engaged in trade or business within the United States. After November 4, 1990, a foreign corporation engaged in a trade or business within the United States at any time during a taxable year is a reporting corporation. See section 6038C.

(2) *25-percent foreign-owned.* A corporation is 25-percent foreign-owned if it has at least one 25-percent foreign shareholder at any time during the taxable year.

(3) *25-percent foreign shareholder*—(i) *In general.* A foreign person is a 25-percent foreign shareholder of a corporation if such person owns at least 25 percent of—

(A) the total voting power of all classes of stock of such corporation entitled to vote, or

(B) the total value of all classes of stock of such corporation.

(ii) *Total voting power and value.* In determining whether one foreign person owns 25 percent of the total voting power of all classes of stock of a corporation entitled to vote or 25 percent total value of all classes of stock of a corporation, consideration will be given to all the facts and circumstances of each case, under principles similar to §1.957-1(b)(2) (consideration of arrangements to shift formal voting power away from the foreign person).

(d) *Related party.* The term "related party" means—

(1) Any 25-percent foreign shareholder of the reporting corporation,

(2) Any person who is related within the meaning of section 267(b) or 707(b)(1) to the reporting corporation or to a 25-percent foreign shareholder of the reporting corporation, or

(3) Any other person who is related to the reporting corporation within the meaning of section 482 and the regulations thereunder.

However, the term "related party" does not include any corporation filing a consolidated federal income tax return with the reporting corporation.

(e) *Attribution rules*—(1) *Attribution under section 318.* For purposes of determining whether a corporation is 25-percent foreign-owned and whether a person is a related party under section 6038A, the constructive ownership rules of section 318 shall apply. However, "10 percent" shall be substituted for "50 percent" in section 318(a)(2)(C), and subparagraphs (A), (B), and (C) of section 318(a)(3) shall not be applied so as to consider a U.S. person as owning stock that is owned by a person who is not a U.S. person.

(2) *Attribution of transactions with related parties engaged in by a partnership.* The transactions in which a domestic or foreign partnership engages shall be attributed to any reporting corporation whose interest in the capital or profits of the partnership, either directly or indirectly, combined with the interests of all related parties to the reporting corporation partner, equals 25 percent or more of the total partnership interests. Attribution of such transactions shall be made only to the extent of the partnership interest held by that reporting corporation partner. *See* sections 875 and 702(a) and the regulations thereunder. (Attribution shall not be made, however, of transactions directly between the partnership and a reporting corporation.) Accordingly, a reporting corporation partner that is deemed to engage in transactions with related parties under this rule is subject to the information reporting requirements of §1.6038A-2, to the record maintenance requirements of §1.6038A-3, to the monetary penalty under §1.6038A-4, to the requirement of authorization of agent under §1.6038A-5, and to the rules of §1.6038A-6 relating to the requirement to produce records.

(f) *Foreign person.* For purposes of section 6038A, a foreign person is—

(1) Any individual who is not a citizen or resident of the United States, but not including any individual for whom an election under section 6013(g) or (h) (relating to an election to file a joint return) is in effect;

(2) Any individual who is a citizen of any possession of the United States and who is not otherwise a

citizen or resident of the United States;

(3) Any partnership, association, company, or corporation that is not created or organized in the United States or under the law of the United States or any State thereof;

(4) Any foreign trust or foreign estate, as defined in section 7701(a)(31); or

(5) Any foreign government or foreign controlled commercial entity as defined by section 892(a)(2)(B) and the regulations thereunder to the extent that it is engaged directly or indirectly in a U.S. trade or business and receives income that is not exempt under section 892(a) and the regulations thereunder. A foreign government or foreign controlled commercial entity, however, will be treated as a foreign person under section 6038A and this section only for purposes of the return requirement described in §1.6038A-2. For purposes of section 6038A(a), a possession of the United States shall be considered to be a foreign country.

(g) *Foreign related party.* A foreign related party is a foreign person as defined under paragraph (f) of this §1.6038A-1 that is also a related party as defined under paragraph (d) of this §1.6038A-1.

(h) *Safe harbor for reporting corporations with de minimis value of related party transactions*—(1) *In general.* A reporting corporation

(i) that has an aggregate value of not more than $2,000,000 of gross payments made to (or received from) foreign related parties with respect to related party transactions, including monetary consideration, nonmonetary consideration, and the value of transactions involving no consideration, and

(ii) for which the aggregate value of the gross payments made to (or received from) foreign related parties with respect to related party transactions is less than 10 percent of its U.S. gross income, is not subject to the requirements of §§1.6038A-3 and 1.6038A-5. Such a corporation remains subject to the information reporting requirements of §1.6038A-2 and the general record maintenance requirements of section 6001. The threshold amounts described in this paragraph are to be applied separately to such amounts paid to or received from foreign related parties, rather than netting such amounts.

(2) *Aggregate value of gross payments made or received.* The aggregate value of gross payments made to (or received from) a foreign related party with respect to foreign related party transactions is determined by totaling the dollar amounts of related party transactions as described in §1.6038A-2(b)(3) and (4) on all Forms 5472 filed by the reporting corporation. The aggregate value of gross payments made to (or received from) all foreign related parties with respect to transactions engaged in with reporting corporations that are related (under the principles described in paragraphs (d) and (e) of this §1.6038A-1) is determined by totaling all dollar amounts of payments made to (or received from) all foreign related parties as described in §1.6038A-2(b)(3) and (4) on all Forms 5472 filed by all such related reporting corporations.

(i) *Consolidated return groups*—(1) *Required information.* If a U.S. consolidated income tax return is filed, the return requirement described in §1.6038A-2 may be satisfied for the U.S. consolidated group by the filing of a consolidated Form 5472. In such a case, the common parent, as indicated on Form 851, must attach a schedule to the consolidated Form 5472 stating which members of the U.S. consolidated return group would otherwise be separate reporting corporations under section 6038A. The schedule must provide the name, address, and taxpayer identification number of each member. A member is not required to join in filing a consolidated Form 5472 merely because other members of the group choose to file one or more Forms 5472 on a consolidated basis.

(2) *Authorization of agent and retention of records.* The common parent of a group of reporting corporations filing a consolidated income tax return may be authorized to act as the agent for foreign related persons engaged in transactions with members of the consolidated return group solely for purposes of section 7602, 7603, and 7604 under section 6038A(e)(1) and §1.6038A-5. The common parent may be authorized to act as an agent by the completion of the authorization of agent on the Form 5472, or by filing an authorization of agent statement as described in §1.6038A-5 until amended Form 5472 is available. Each member of the group, however, must maintain the records required under section 6038A(a) and §1.6038A-3 relating to its related party transactions.

(3) *Monetary penalties.* The common parent and each reporting corporation that join in the filing of a consolidated Form 5472 are liable jointly and severally for penalties for failure to file Form 5472 and for failure to maintain records under section 6038A(d) and §1.6038A-4(e). *See* §1.1502-77(a) regarding the scope of agency of the common parent corporation.

(j) *Examples.* The following examples illustrate the rules of this section.

Example (1). A U.S. partnership that is engaged in a U.S. trade or business is 75 percent owned by FC1, a foreign corporation that, in turn, is wholly owned by another foreign corporation, FC2. The remaining 25 percent of the U.S. partnership is owned by Corp, a domestic corporation, that is wholly owned by FC3. The U.S. partnership engages in transactions solely with FC2 and FC3. These transactions are attributed to FC1 and Corp. For purposes of section 6038A and this §1.6038A-1, FC1 and Corp are reporting corporations and must report their respective pro rata shares of the value of the transactions with FC2 and FC3, 25 percent to Corp and 75 percent to FC1.

Example (2). FC2 and FC3 are both foreign corporations that are wholly owned by FC1, also a foreign corporation. FC2 engages in a trade or business in the United States through a branch. The branch engages in related party transactions with FC1. FC2 is a reporting corporation. FC3 is a foreign related party. FC1 is a 25-percent foreign shareholder of both FC2 and FC3. Neither FC1 nor FC3 is a reporting corporation.

Example (3). FC1 owns 25 percent of total voting power in each of FC2 and FC3. FC2 and FC3 each own 20 percent of the total voting power of Corp, a domestic corporation. The remaining stock of Corp is owned by an unrelated domestic corporation. Neither FC2 nor FC3 is engaged in a U.S. trade or business. Under section 318(a)(2)(C) and paragraph (e) of this §1.6038A-1, FC1 constructively owns its proportionate share of the stock of Corp owned directly by FC2 and FC3. Thus, FC1 is treated as constructively owning five percent of Corp through each of FC2 and FC3 or a total of 10 percent of the Corp stock. Consequently, Corp is not a reporting corporation because no 25 percent shareholder exists.

(k) *Effective dates*—(1) *Section 1.6038A-1.* Section 1.6038A-1(c) (relating to the definition of a reporting corporation) is effective for taxable years beginning after July 10, 1989. The remaining paragraphs of section 1.6038A-1 are effective as of Decem-

ber 10, 1990, without regard to when the taxable year began.

(2) *Section 1.6038A-2.* Section 1.6038A-2 (relating to the requirement to file Form 5472) is generally effective for taxable years beginning after July 10, 1989. However, §1.6038A-2 as it applies to reporting corporations whose sole trade or business in the United States is a banking, financing, or similar business as defined in §1.864-4(c)(5)(i) is effective as of December 10, 1990.

(3) *Section 1.6038A-3.* Section 1.6038A-3 (relating to the record maintenance requirement) is generally effective as of December 10, 1990. However, records in existence on or after March 20, 1990, must be maintained, without regard to when the taxable year (to which the records relate) began.

(4) *Section 1.6038A-4.* Section 1.6038A-4 (relating to the monetary penalty) is generally effective for taxable years beginning after July 10, 1989, for the failure to file Form 5472. For the failure to maintain records or the failure to produce documents as agreed under the election to maintain records outside the United States, the effective date is December 10, 1990, without regard to when the taxable year (to which the records relate) began.

(5) *Section 1.6038A-5.* Section 1.6038A-5 (relating to the authorization of agent requirement) is effective as of without regard to when the taxable year (to which the records relate) began.

(6) *Section 1.6038A-6.* Section 1.6038A-6 (relating to the failure to furnish information under a summons) is effective after November 5, 1990, without regard to when the taxable year (to which the summons relates) began.

(7) *Section 1.6038A-7.* Section 1.6038A-7 (relating to the noncompliance penalty adjustment) is effective as of without regard to when the taxable year began.

§1.6038A-2 *Requirement of return.*

(a) *Form 5472 required*—(1) *In general.* Each reporting corporation as defined in §1.6038A-1(c) shall make a separate annual information return on Form 5472 with respect to each related party as defined in §1.6038A-1(d) with which such reporting corporation has had any reportable transaction during the taxable year. The information required by section 6038A and this section must be furnished even though it may not affect the amount of any tax due under the Code.

(2) *Reportable transaction.* A reportable transaction is any transaction of the types listed in paragraph (b)(3) and (4) of this section. However, if neither party to the transaction is a United States person as defined in section 7701(a)(30) and the transaction—

(i) Does not give rise to any deferred payment or recognized income or gain that is from sources within the United States or that is effectively connected, or treated as effectively connected, with the conduct of a trade or business within the United States, and

(ii) Does not give rise to any expense, loss or other deduction that is allocable or apportionable to such income,

the transaction is not a reportable transaction.

(b) *Contents of return*—(1) *Reporting corporation.* Form 5472 must provide the following information in the manner the form prescribes with respect to each reporting corporation.

(i) Name, address (including mailing code) and U.S. taxpayer identification number; each country in which the reporting corporation files an income tax return as a resident under the tax laws of the country or countries; country or countries of organization and incorporation; total assets; where its business is conducted; and principal business activity;

(ii) Name, address, U.S. tax identification number, if applicable, of each 25-percent foreign shareholder; country or countries in which the 25-percent foreign shareholder files an income tax return as a resident under the tax laws of the country or countries; the place where the 25-percent shareholder conducts its business; and country or countries of organization, citizenship, or incorporation of each 25-percent foreign shareholder of the reporting corporation;

(iii) Number of Forms 5472 filed for the taxable year and aggregate value in U.S. dollars of gross payments as defined by paragraph (h)(2) of §1.6038A-1 made with respect to all foreign related party transactions as reported on all Forms 5472.

(2) *Related party.* The taxpayer must provide information on Form 5472, set forth in the manner the form prescribes, about each related party, whether foreign or domestic, with which the reporting corporation had a transaction of the types described in paragraph (b)(3) and (4) of this section during its taxable year, including the following information.

(i) The name, U.S. tax identification number, if applicable, and address of the related party;

(ii) The nature of the related party's business and the principal place or places where such business is conducted;

(iii) Each country in which the related party files an income tax return as a resident under the tax laws of the country; and

(iv) The relationship of the reporting corporation to the related party.

(3) *Foreign related party transactions for which only monetary consideration is paid or received by the reporting corporation.* If the related party is a foreign person, the reporting corporation must set forth on Form 5472 the dollar amounts of all reportable transactions for which monetary consideration (including U.S. and foreign currency) was the sole consideration paid or received during the taxable year of the reporting corporation. The total amount of such transactions, as well as the separate amounts for each type of transaction described below, must be reported on Form 5472, in the manner the form prescribes. Where actual amounts are not determinable, a reasonable estimate (as described in paragraph (b)(6) of §1.6038A-2) is permitted. The types of transactions described in this paragraph are:

(i) Sales and purchases of stock in trade (inventory);

(ii) Sales and purchases of tangible property other than stock in trade;

(iii) Rents and royalties paid and received (other than amounts reported under paragraph (b)(3)(iv) of this paragraph);

(iv) Sales, purchases, and amounts paid and received as consideration for the use of all intangible property, including (but not limited to) copyrights, designs, for-

mulas, inventions, models, patents, processes, trademarks, and other similar intangible property rights;

(v) Consideration paid and received for technical, managerial, engineering, construction, scientific, or similar services;

(vi) Commissions paid and received;

(vii) Amounts loaned and borrowed (except open accounts resulting from sales and purchases reported under other items listed in this paragraph (b)(3) that arise and are collected in full in the ordinary course of business);

(viii) Interest paid and received;

(ix) Premiums paid and received for insurance and reinsurance; and

(x) Other amounts paid or received not specifically identified in this paragraph (b)(3).

Amounts required to be reported under paragraph (b)(3)(vii) of this section shall be reported as monthly averages or outstanding balances at the beginning and end of the taxable year, as the form shall prescribe.

(4) *Foreign related party transactions involving nonmonetary consideration or no consideration.* If the related party is a foreign person, the reporting corporation must provide on Form 5472 a description of any reportable transaction, or group of reportable transactions, listed in paragraph (b)(3) of this section, for which any part of the consideration paid or received was not monetary consideration, or for which no consideration was paid or received. A description required under this paragraph (b)(4) of this section shall include sufficient information from which to determine the nature and approximate monetary value of the transaction or group of transactions, and shall include—

(i) A description of all property (including monetary consideration), rights, or obligations transferred from the reporting corporation to the foreign related party and from the foreign related party to the reporting corporation;

(ii) A description of all services performed by the reporting corporation for the foreign related party and by the foreign related party for the reporting corporation; and

(iii) A reasonable estimate of the fair market value or a description of such property (other than money), rights, obligations, or services. If, for any transaction, the entire consideration received includes both tangible and intangible property and the consideration paid is solely monetary consideration, the transaction should be reported under paragraph (b)(3) if the intangible property was related and incidental to the transfer of the tangible property (*e.g.*, a right to warranty services.)

(5) *Additional information.* In addition to the information required under paragraph (b)(3) and (4) of this section, a reporting corporation must provide on Form 5472, in the manner the form prescribes, the following information.

(i) If the reporting corporation imports goods from a foreign related party, whether the costs taken into account in computing the basis or inventory cost of such goods are different from the costs taken into account in computing the valuation of the goods for customs purposes, adjusted pursuant to section 1059A and the regulations thereunder, and if so, the reason or reasons for such difference.

(ii) Whether the documents supporting the reporting corporation's treatment of the items set forth in paragraph (b)(5)(i) of this section are in existence and available in the United States at the time of the filing of Form 5472.

(6) *Reasonable estimate*—(i) *Estimate within 25 percent of actual amount.* Any amount reported under this section is considered to be a reasonable estimate if it is at least 75 percent and not more than 125 percent of the actual amount.

(ii) *Other estimates.* If any amount reported under this paragraph (b) of this section fails to meet the reasonable estimate test of paragraph (b)(6)(i) of this section, the reporting corporation may, nevertheless, show that such amount is a reasonable estimate by making an affirmative showing of relevant facts and circumstances in a written statement containing a declaration that it is made under the penalties of perjury. The District Director or the Assistant Commissioner (International) shall determine whether the amount reported was a reasonable estimate.

(7) *Small amounts.* If any actual amount required under this section does not exceed $50,000, the amount may be reported as "$50,000 or less."

(8) *Accrued payments and receipts.* For purposes of this section, in the case of an accrual basis taxpayer, the terms "paid" and "received" shall include accrued payments and receipts, respectively.

(c) *Method of reporting.* All statements required on or with the Form 5472 under this section and §1.6038A-5 shall be in the English language. All amounts required to be reported under paragraph (b) of this section shall be expressed in United States currency, with a statement of exchange rates used to translate into U.S. currency.

(d) *Time and place for filing returns.* A Form 5472 required under this section shall be filed with the reporting corporation's income tax return for the sametaxable year, and shall be filed by the due date (including extensions) for filing that income tax return. However, if a reporting corporation's income tax return is not timely filed (including extensions), the Form 5472 shall be filed with the Internal Revenue Service Center with which the reporting corporation's income tax return is required to be filed and the Philadelphia Service Center, and shall be filed on or before the due date required by law (including extensions) for filing of that income tax return. In such a case, a copy of the Form 5472 also must be filed with the income tax return when such return is filed.

(e) *Duplicate filing required.* The reporting corporation shall file a duplicate copy of each Form 5472 (including any attachments and/or schedules) (at the same time as the original copy is filed) with the Internal Revenue Service Center, Philadelphia, PA 19255.

(f) *Exceptions*—(1) *No reportable transactions.* A reporting corporation is not required to file Form 5472 if it has no transactions of the types listed in paragraph (b)(3) and (4) of this section during the taxable year with any related party. Such a reporting corporation, however, remains subject to the record maintenance requirements of §1.6038A-3 and the authorization of agent requirement of §1.6038A-5.

(2) *Transactions solely with a domestic reporting corporation.* If all of

a foreign reporting corporation's reportable transactions are with one or more related domestic reporting corporations, the foreign reporting corporation shall furnish on Form 5472 only the information required under paragraph (b)(1) and (2) of this section, if the domestic reporting corporations provide the information required under paragraph (b)(3) through (5) of this section. Such a foreign reporting corporation is, nonetheless, subject to the record maintenance requirements of §1.6038A-3 and the requirements of §§1.6038A-5 and 1.6038A-6. The name or names, address(es), and taxpayer identification number(s) of the domestic reporting corporation that provided such information must be indicated on Form 5472 in the space provided for the information under paragraph (b)(1) and (2) of this section.

(3) *Transactions with a corporation subject to reporting under section 6038.* A reporting corporation is not required to make a return of information on Form 5472 with respect to a related corporation for a taxable year for which a U.S. person that controls the reporting corporation makes a return of information on Form 5471 that is required under section 6038 and §1.6038-2, if that return contains information required under §1.6038-2(f)(11) with respect to the reportable transactions between the reporting corporation and the related corporation for that taxable year.

(g) *Filing Form 5472 when transactions with related parties engaged in by a partnership are attributed to a reporting corporation.* A reporting corporation, to which transactions engaged in by a partnership are attributed under paragraph (e)(2) of §1.6038A-1, must report on Form 5472 only the value of the transaction or transactions that is represented by its partnership interest. Thus, for example, if a partnership buys $1000 of widgets from the foreign parent of a reporting corporation whose partnership interest in the partnership equals 50 percent of the partnership interests (and the remaining 50 percent is held by unrelated parties), the reporting corporation must report $500 of purchases from a foreign related party on Form 5472.

(h) *Effective dates for certain reporting corporations.* For effective dates for this section, see §1.6038A-1(k).

§1.6038A-3 *Record maintenance.*

(a) *General maintenance requirements—(1) Section 6001 and section 6038A.* A reporting corporation must keep the permanent books of account or records as required by section 6001 that are sufficient to establish the correctness of the federal income tax return of the corporation, including information, documents, or records ("records") to the extent they may be relevant to determine the correct treatment of transactions with related parties. *See* section 6001 and the regulations thereunder. This requirement applies to records of the reporting corporation itself, as well as to records of any foreign related party that may be relevant to determine the correct treatment of transactions between the reporting corporation and foreign related parties. While records required to establish the correct tax treatment of transactions between the reporting corporation and foreign related parties are within the scope of section 6001, section 6038A and this section provide detailed guidance regarding the required maintenance of records with respect to such transactions and specifies penalties for noncompliance.

(2) *Safe harbor.* A safe harbor for record maintenance is provided under paragraph (c) of this section, which sets forth detailed guidance concerning the types of records to be maintained with respect to related party transactions. A corporation that maintains or causes another person to maintain the records listed in paragraph (c)(2) will be deemed to have met the record maintenance requirements of section 6038A.

(b) *Other maintenance requirements—(1) Records that must be maintained in the United States.* Records prepared, maintained, or possessed by a foreign related party relating to transactions between the reporting corporation and any related parties must be maintained in the United States, except where an election is in effect under paragraph (f) of this section.

(2) *Indirectly related records.* This section applies to records that are directly or indirectly related to transactions between the reporting corporation and any foreign related parties. An example of records that are indirectly related to such transactions is records possessed by a foreign subsidiary of a foreign related party that document the raw material or component costs of a product that is manufactured or assembled by the subsidiary and sold as a finished product by the foreign related party to the reporting corporation.

(3) *Foreign related party or third-party maintenance.* If records that are required to be maintained under this section are in the control of a foreign related party, the records may be obtained or compiled (if not already in the possession of the foreign related party or already compiled) under the direction of the reporting corporation and then maintained by the reporting corporation, the foreign related party, or a third party. A foreign related party or third party may make arrangements with the District Director or the Assistant Commissioner (International) to directly furnish requested records, rather than through a reporting corporation. If a foreign related party or a third party maintains records in the ordinary course of business that are not in the possession of the reporting corporation, the reporting corporation, nonetheless, is liable for the maintenance of such records. A reporting corporation shall be subject to the monetary penalty for the failure of a foreign related party or third party to maintain required records.

(4) *Translation of records.* When records are provided to the Service under a request for production, any portion of such records must be translated into the English language within 30 days of a request for translation of that portion by the District Director or the Assistant Commissioner (International). An extension of this time period may be requested under the rules of paragraph (f)(3) of this section.

(5) *Exception for foreign governments.* A foreign government or a controlled commercial entity as defined by section 892(2)(B) is not subject to the obligation to maintain records under this section.

(c) *Specific records to be maintained for safe harbor—(1) In general.* A reporting corporation that

maintains or causes another person to maintain the records specified in this paragraph (c) will be deemed to have met the record maintenance requirements of this section. This paragraph provides general descriptions of the categories of records to be maintained; the particular title or label applied by a reporting corporation or related party does not control. Functional equivalents of the specified documents are acceptable. Record maintenance in accordance with this safe harbor, however, requires only the maintenance of types of documents described in paragraph (c)(2) of this section that are directly or indirectly related to transactions between the reporting corporation and any foreign related party. Additionally, to the extent the reporting corporation establishes that records in a particular category are not applicable to the industry or business of the reporting corporation and any foreign related party, maintenance of such records is not required under this paragraph. Record maintenance in accordance with this paragraph (c) generally does not require the original creation of records that are ordinarily not created by the reporting corporation or its related parties. (If, however, a document that is actually created is described in this paragraph (c), it is to be maintained even if the document is not of the type ordinarily created by the reporting corporation or its related parties.) There are two exceptions to the rule. First, basic accounting records, if they do not otherwise exist, must be created and retained that are sufficient to document the U.S. tax effects of transactions between related parties. Second, records sufficient to produce material profit and loss statements as described in paragraphs (c)(2)(ii) and (c)(3) of this section must be created if such records are not ordinarily maintained. All internal records storage and retrieval systems used for each taxable year must be retained.

(2) *Descriptions of categories of documents to be maintained.* The following records must be maintained in order to satisfy this paragraph (c) to the extent they may be relevant to determine the correct treatment of transactions between the reporting corporation and any foreign related party.

(i) *Original entry books and transaction records.* This category includes books and records of original entry or their functional equivalents, however designated or labelled, that are relevant to transactions between any foreign related party and the reporting corporation. Examples include, but are not limited to, general ledgers, sales journals, purchase order books, cash receipts books, cash disbursement books, canceled checks and bank statements, workpapers, sales contracts, and purchase invoices.

(ii) *Profit and loss statements.* This category includes records from which the reporting corporation can compile and supply, within a reasonable time, material profit and loss statements of the reporting corporation and all related parties as defined under §1.6038A-1(d) (the "related party group") which reflect profit or loss of the related party group attributable to U.S.-connected products or services. The determination of whether a profit and loss statement is material is made under the rules provided in paragraph (c)(3) of this section. For purposes of this paragraph (c), the term "U.S.-connected products or services" means products or services that are imported to or exported from the United States by transfers between the reporting corporation and any of its foreign related parties. The material profit and loss statements described in this paragraph (c)(2)(ii) must reflect revenue and expenses of all members of the related party group. Thus, records in this category include the documentation of the cost of raw materials used by a related party to manufacture finished goods that are then sold by another related party to the reporting corporation. The records should be kept under U.S. generally accepted accounting principles if they are ordinarily maintained in such manner. If such records are not ordinarily maintained under such accounting principles, an explanation of the material differences between the accounting principles used and U.S. generally accepted accounting principles must be made available. An explanation of methods used to allocate specific items to a particular profit and loss statement also must be made available.

(iii) *Pricing documents.* This category includes all documents relevant to establishing the appropriate price or rate for transactions between the reporting corporation and any foreign related party. Examples include, but are not limited to, documents related to transactions involving the same or similar products or services entered into by the reporting corporation or a foreign related party with related and unrelated parties; shipping and export documents; commission agreements; documents relating to production or assembly facilities; third-party and intercompany purchase invoices; manuals, specifications, and similar documents relating to or describing the performance of functions conducted at a location; intercompany correspondence discussing any instructions or assistance relating to such transactions provided to the reporting corporations by the related foreign person (or vice versa); intercompany and intracompany correspondence concerning the price or the negotiation of the price used in such transactions; documents regarding the value of intangibles used or developed by the reporting corporation or the foreign related party; documents regarding the direct and indirect costs of materials, labor, cost of goods sold, and other expenses; and documents relating to direct and indirect selling, general and administrative expenses (e.g., relating to advertising, sales promotions, or warranties).

(iv) *Foreign country and third party filings.* This category includes financial and other documents filed with or prepared for any foreign government entity, any independent commission, or any financial institution relating to transactions between the reporting corporation and any foreign related party.

(v) *Ownership and capital structure records.* This category includes records or charts showing the relationship between the reporting corporation and the related foreign party; the location, ownership, and status (for example, joint venture, partnership, branch, or division) of all entities and offices directly or indirectly involved in the transactions between the reporting corporation and any foreign related party; a worldwide organization chart; records showing the management structure of all foreign affiliates; and loan documents, agreements, and other documents relating to any transfer of the stock of

the reporting corporation that results in the change of the status of a foreign person as a foreign related party.

(vi) *Records of loans, services, and other non-sales transactions.* This category includes documents relating to loans (including all third-party loans that are related to a transaction between a reporting corporation and a foreign related party); guarantees of a related foreign party of debts of the reporting corporation and vice versa; hedging arrangements involving the reporting corporation and any foreign related party; security agreements between the reporting corporation and any foreign related party; research and development expense allocations between any foreign related party and the reporting corporation; service transactions between any foreign related party and the reporting corporation, including, for example, a description of the allocation of charges for management services, time or travel records, or allocation studies; import and export transactions; the registration of patents and copyrights with respect to transactions between the reporting corporation and any foreign related party; and documents regarding lawsuits in foreign countries that relate to such transactions (for example, product liability suits for U.S. products).

(3) *Material profit and loss statements.* For purposes of paragraph (c)(2)(ii), the determination of whether a profit and loss statement is material will be made according to the following rules. An agreement between the reporting corporation and the District Director or the Assistant Commissioner (International) as described in paragraph (d) of this section may identify all material profit and loss statements of the related party group and describe the items to be included in any profit and loss statements for which records are to be maintained to satisfy the requirements of paragraph (c)(2)(ii) of this section. In the absence of such an agreement, a profit and loss statement will be material if it meets any of the following tests: the existing records test described in paragraph (c)(4) of this section, the significant industry segment test described in paragraph (c)(5) of this section, or the high profit test described in paragraph (c)(6) of this section.

(4) *Existing records test.* A profit and loss statement is material under the existing records test described in this paragraph (c)(4) if any member of the related party group creates or compiles such statement in the course of its business operations. For example, a profit and loss statement is described in this paragraph if it was produced for internal accounting or management purposes, or for disclosure to shareholders, financial institutions, government agencies, or any other persons. Accordingly, such existing statements and the records from which they were compiled are subject to the record maintenance requirements described in paragraph (c)(2)(ii) of this section to the extent they reflect the profit or loss of the related party group attributable to U.S.-connected products or services.

(5) *Significant industry segment test*—(i) *In general.* A profit and loss statement is material under the significant industry segment test described in this paragraph (c)(5) if—

(A) The statement reflects the profit or loss of the related party group attributable to a single industry segment;

(B) The gross revenue from U.S.-connected products or services attributable to such industry segment meets the gross revenue test described in paragraph (c)(5)(ii) of this section; and

(C) One of the percentage tests described in paragraph (c)(5)(iii) of this section is satisfied with respect to the products and services attributable to such industry segment.

An industry segment is a segment of the related party group's combined operations which is engaged in providing a product or service or a group of related products or services (as defined in paragraph (c)(5)(iv)(E)) primarily to customers that are not members of the related party group. Paragraph (c)(5)(v) provides rules for determining the level of specificity required in grouping related products and services. Profit and loss statements compiled for each significant industry segment must reflect revenues and expenses attributable to the operations in such segment by all members of the related party group.

(ii) *Gross revenue test.* An industry segment meets the gross revenue test described in this paragraph (c)(5)(ii) if the amount of gross revenue earned within such segment by the provision of U.S.-connected products or services by the related party group to customers outside of such group is $25 million or more in the taxable year. Where the U.S.-connected products or services consist of components which are incorporated into other products or services before sale to customers, the portion of the total gross revenue derived from sales of such finished products or services attributable to the components may be determined on the basis of relative costs of production. Thus, where relevant for determining whether the $25 million threshold has been met, the amount of gross revenue derived by the related party group from the provision of such finished products or services may be reduced by multiplying such gross revenue by a fraction, the numerator of which is the costs of production of the related party group attributable to the component products or services that constitute U.S.-connected products or services and the denominator of which is the costs of production of the related party group attributable to the finished products in which such components are incorporated.

(iii) *Percentage tests.* An industry segment meets one of the percentage tests described in this paragraph (c)(5)(iii) if

(A) Its gross revenue is 10 percent or more of the combined gross revenue of all of the group's industry segments;

(B) Its identifiable assets are 10 percent or more of the combined identifiable assets of all industry segments; or

(C) The absolute amount of its operating profit or operating loss is 10 percent or more of the greater, in absolute amount, of the combined operating profit of allindustry segments that did not incur an operating loss or the combined operating loss of all industry segments that did incur an operating loss.

(iv) *Definitions.* The following definitions apply for purposes of this paragraph (c)(5).

(A) *Gross revenue.* Gross revenue includes receipts (prior to reduction for cost of goods sold) both from sales to customers outside of the related party group and from inter-

segment sales or transfers within the related party group. Interest from sources outside the related party group and interest earned on intersegment trade receivables is included in gross revenue if the asset on which the interest is earned is included among the industry segment's identifiable assets, but interest earned on advances or loans to other industry segments is not included. Accounting for intersegment sales or transfers must be made on a reasonable basis and a description of such basis must be provided.

(B) *Identifiable assets.* The identifiable assets of an industry segment are those tangible and intangible assets of the related party group that are used by the industry segment, including assets that are used exclusively by that industry segment and an allocated portion of assets used jointly by two or more industry segments. Any allocation of assets among industry segments must be made on a reasonable basis and a description of such basis must be provided. Assets of an industry segment that transfers products or services to another industry segment shall not be allocated to the receiving segment. Assets that represent part of the related party group's investment in an industry segment, such as goodwill, shall be included in the industry segment's identifiable assets. Assets maintained for general corporate purposes (*i.e.*, those not used in the operations of any industry segment) shall not be allocated to industry segments.

(C) *Operating profit or loss.* The operating profit or loss of an industry segment is its gross revenue (as defined in paragraph (c)(5)(iv)(A) of this section) minus all operating expenses. None of the following shall be added or deducted in computing the operating profit or loss of an industry segment: revenue earned at the corporate level and not derived from the operations of any industry segment; general corporate expenses; interest expense (except where the industry segment's operations are principally of a financial nature, such as banking, insurance, leasing or financing); domestic and foreign income taxes; and extraordinary items not reflecting the ongoing business operations of the industry segment.

(D) *Product.* The term "product" generally means an item of property (or combination of component parts) which is the result of a production process, is primarily sold to unrelated parties (or incorporated by the relatedparty group into other products sold to unrelated parties), and performs a specific function.

(E) *Related products or services.* The term "related products or services" refers to groupings of products and types of services that reflect reasonable accounting, marketing, or other business practices within the industries in which the related party group operates. For this purpose, products are segregated into narrow classifications of models and also aggregated into broad classifications of product lines. Similar principles shall be applied in grouping types of services into reasonable levels of narrow and broad classifications.

(F) *Model.* The term "model" generally means a classification of products that incorporate particular components, options, styles, and any other unique features resulting in product differentiation. Examples of models would include electronic products that are sold or accounted for under a single model number and automobiles sold under a single model name.

(G) *Product line.* The term "product line" generally means a group of products that are aggregated into a single classification for accounting, marketing, or other business purposes. Examples of product lines would include groups of products that perform similar functions; products that are marketed under the same trade names, brand names or trademarks; and products that are related economically (*i.e.*, having similar rates of profitability, similar degrees of risk, and similar opportunities for growth).

(v) *Level of specificity required.* In applying the significant industry segment test of this paragraph (c)(5), groups of related products and services must be chosen to provide a reasonable level of specificity that results in the greatest number of separate significant industry segments in comparison to other possible classifications. This determination must be made on the basis of the particular facts presented by the operations of the related party group. The following rules, however, provide general guidelines for making such classifications. First, the related party group's operations that involve the provision of U.S.-connected products should be grouped into product lines. The rules of this paragraph (c)(5) should then be applied to determine if any such product line would, standing alone, constitute a significant industry segment when compared to the operations of the related party group as a whole. Any significant industry segments determined at the level of product lines should be further segregated, and tested for significant industry segments, at the level of separate products. Finally, any significant industry segments determined at the level of separate products should be segregated, and tested for significant industry segments, at the level of separate models. Similar principles should be applied in classifying and testing types of services. A profit and loss statement reflecting the related party group's provision of any product or service (or group of products or services as classified under these rules) that constitutes a significant industry segment will be considered material for purposes of this paragraph (c)(5).

(vi) *Examples.* The rules for determining reasonable levels of specificity for significant industry segments may be illustrated by the following examples.

Example (1). A related party group is engaged in the manufacture and worldwide sales of automobiles and aftermarket parts. The group's operations within the categories of "automobiles" and "aftermarket parts" are each sufficient to constitute significant industry segments for the group under the rules of paragraph (c)(5) of this section. No narrower classification of aftermarket parts results in any significant industry segments. Automobiles produced by the group are generally classified for marketing purposes by trade names; aggregating groups of automobiles by these trade names results in three significant industry segments, those for trade names A, B, and C. Finally, two car models sold under the trade name A ("A1" and "A2") and one car model sold under the trade name B ("B3"), produce sufficient revenue to constitute significant industry segments. Such classifications into trade names and car models are generally used in the related party group's industry; moreover, different types of classifications would produce fewer significant industry segments. Accordingly, a reasonable level of specificity for this related party group's industry segments would be eight categories of products consisting of "automobiles", "aftermarket parts", "A", "B", "C", "A1", "A2", and "B3".

Example (2). A related party group is engaged in manufacturing electronic goods that are distributed at retail in the United States by the reporting corporation. The group sells three types of products in the United States: televisions, radios, and video cassette recorders (VCRs). Each of these three broad product areas constitutes a significant industry segment for the group as a whole. VCRs can be further segregated by price into high-end and low-end models, and the provision of each constitutes a significant industry segment for the group. Revenues from only one VCR model, model number VCRX-10, are sufficiently large to make the provision of that model a significant industry segment. With respect to televisions, the group normally accounts for these products by size. Using this classification, portable televisions, medium-sized televisions, and consoles each constitute significant industry segments. Narrower classifications by television model numbers result in no additional significant industry segments. Finally, sales of a single radio product line, those sold under the trade name R, results in a significant industry segment, but no other radio models or product groups are large enough to constitute a significant industry segment. In each case, these classifications conform to normal business practices in the industry and result in the greatest possible number of significant industry segments for this related party group. Accordingly, a reasonable level of specificity for this related party group's industry segments would include the ten categories consisting of "VCRs", "high-end VCRs", "low-end VCRs", "model number VCRX-10", "televisions", "portable televisions", "medium-sized televisions", "console televisions", "radios", and "radio trade name R".

(6) *High profit test*—(i) *In general.* A profit and loss statement is material under the high profit test described in this paragraph (c)(6) if—

(A) The statement reflects the profit or loss of the related party group attributable to a single industry segment;

(B) The gross revenues from U.S.-connected products or services attributable to such segment meet the gross revenue test described in paragraph (c)(5)(ii) of this section (except that the $25 million threshold for this purpose is raised to $75 million); and

(C) The return on assets test described in paragraph (c)(6)(ii) of this section is satisfied with respect to the products and services attributable to such segment.

Accordingly, a significant industry segment (as determined under paragraph (c)(5) of this section) must be divided into any narrower industry segments that meet the high profit test of this paragraph (c)(6), even if such narrower segments would not, standing alone, meet the significant industry segment test of paragraph (c)(5) of this section.

(ii) *Return on assets test.* An industry segment meets the return on assets test if the rate of return on assets earned by the related party group within this industry segment exceeds 10 percent, and is at least 200 percent or more of the rate of return on assets earned by any significant industry segment (determined under the rules of paragraph (c)(5) of this section) which incorporates the business operations of the first industry segment. One industry segment will be considered to incorporate the business operations of a narrower industry segment only if all of the gross revenue attributable to the narrower segment is also attributable to the broader segment. For purposes of this paragraph, the rate of return on assets earned by an industry segment is determined by dividing that segment's operating profit (as defined in paragraph (c)(5)(iv)(C) of this section) by its identifiable assets (as defined in paragraph (c)(5)(iv)(B) of this section).

(d) *Liability for certain partnership record maintenance.* A reporting corporation, to which transactions engaged in by a partnership are attributed under paragraph (e)(2) of §1.6038A-1, is subject to the record maintenance requirements of this §1.6038A-3 to the extent of the transactions so attributed.

(e) *Agreements with the District Director or the Assistant Commissioner (International).* The District Director or the Assistant Commissioner (International), in the discretion of either, may negotiate and enter into an agreement with a reporting corporation that establishes what records the reporting corporation must maintain or cause another to maintain, how such records must be maintained, and by whom such records must be maintained in order to satisfy the reporting corporation's obligations under this section.

(f) *Exception to U.S. maintenance*—(1) *Annual election.* A reporting corporation may elect to maintain outside the United States records not ordinarily maintained in the United States but required to be maintained in the United States under this section. To make the election, the reporting corporation must agree to the production of records by either:

(i) Delivering to the Service duplicates of the original documents requested within 60 days of the request by the Service for such records and providing translations of such documents within 30 days of a request for translations of specific documents; or

(ii) Moving duplicates of the original documents requested to the United States within 60 days of the request of the Service for such records; providing the Service with an index to the requested records, the name and address of a custodian located within the United States having control over the records, and the address where the records are located within 60 days of the Service's request for such records; and continuing to maintain such records within the United States throughout the period of retention described in paragraph (g) of this section. For summons procedures with respect to such records that have been moved to the United States, see sections 6038A(e), 7602, 7603, and 7604.

For material profit and loss statements described in paragraphs (c)(5) and (c)(6) of this section, "120 days" shall be substituted for "60 days" in paragraphs (f)(1)(i) and (f)(1)(ii) of this section, and labels and text with respect to such statements must be in the English language. The agreement described in this paragraph must be signed by an officer of the reporting corporation. An annual agreement may be made on Form 5472. Until revised Forms 5472 are available, the agreement shall be made on an attachment to the Form 5472 which contains the following heading and statement.

ELECTION TO MAINTAIN RECORDS OUTSIDE THE U.S.

"[Name of reporting corporation] hereby elects to maintain outside the United States the records described in paragraph (b) of §1.6038A-3, relating to transactions between [name of reporting corporation] and [name of foreign related party] for its taxable year ending on [date]. [Name of reporting corporation] agrees to produce upon request of the Internal Revenue Service any [name of reporting corporation] or [name of foreign related party] records covered by this election (and translations of specified records) within the time and in the manner prescribed by the regulations.

Signature for [name of reporting corporation]

(To be signed by a corporate officer, on behalf of the reporting corporation: I certify that I have the authority to execute this agreement on behalf of [name of reporting corporation].)

(Signature) (Title) (Date)

Please print or type your name below.

(2) *Retroactive elections.* An election pertaining to documents that were in existence on or after March 20, 1990, with respect to taxable years for which the Form 5472 was required to be filed prior to the date on which the final regulations under section 6038A are published may be made on the first timely filing of Form 5472 after that date. Such election should bear the caption "Retroactive election for taxable years prior to final section 6038A regulations."

(3) *Scheduled production for high volume or other reasons.* Upon a written request, for good cause shown, the District Director or the Assistant Commissioner (International), in the discretion of either, may grant an extension of the time for the production or translation of the requested documents. Such requests should be made within 30 days of the request for records by the Internal Revenue Service. If an extension is needed because of the volume of records requested, the District Director or the Assistant Commissioner (International) may allow production to be scheduled over a period of time so that not all records must be produced at the same time.

(4) *Invalidation of non-U.S. maintenance election.* The District Director (with the concurrence of the Assistant Commissioner (Examination)), or the Assistant Commissioner (International), may invalidate, for cause, an election to maintain outside the United States the records specified in paragraph (b) of this section. An election may be invalidated only if there exists a clear pattern of failure to maintain or timely produce the required records. The assessment of a monetary penalty under section 6038A(d) and §1.6038A-4 for failure to maintain records is not necessarily sufficient in and of itself to cause invalidation of the election to maintain records outside the United States.

(g) *Period of retention.* Records required to be maintained by section 6038A(a) and this section shall be kept as long as they may be relevant to determining the correct tax treatment of any transaction between the reporting corporation and a related party, but in no case less than the applicable statute of limitations on assessment and collection with respect to the taxable year in which the transaction or item to which the records relate affects the U.S. tax liability of the reporting corporation. See section 6001 and the regulations thereunder.

(h) *Effective dates.* For effective dates for this section, see §1.6038A-1(k).

§1.6038A-4 *Monetary penalty.*

(a) *Imposition of monetary penalty—(1) In general.* If a reporting corporation fails to furnish the information described in §1.6038A-2 within the time and manner prescribed in paragraphs (d) and (e) of §1.6038A-2 (relating to the filing of Form 5472), fails to maintain or cause another to maintain records as required by §1.6038A-3, or fails to produce records maintained outside the United States within the time prescribed in paragraph (f) of §1.6038A-3 (relating to the production of maintained records), a penalty of $10,000 shall be assessed for each taxable year with respect to which such failure occurs. Such a penalty may be imposed by the District Director, the Assistant Commissioner (International), or the Director of the Internal Revenue Service Center where the income tax return is filed. The filing of a substantially incomplete Form 5472 constitutes a failure to file Form 5472. Where, however, the information described in paragraph (b)(3) through (5) of §1.6038A-2 is not required to be reported, a Form 5472 filed without such information is not a substantially incomplete Form 5472.

(2) *Liability for certain partnership transactions.* A reporting corporation, to which transactions engaged in by a partnership are attributed under paragraph (e)(2) of §1.6038A-1, is subject to the rules of this section to the extent failures occur with respect to the partnership transactions so attributed to the reporting corporation.

(3) *Calculation of monetary penalty.* If a reporting corporation fails to maintain records as required by §1.6038A-3 of transactions with multiple related parties, the monetary penalty may be assessed for each failure to maintain records with respect to each related party. The monetary penalty, however, shall be im-

posed on a reporting corporation only once for a taxable year with respect to each related party for a failure to furnish the information required on Form 5472, for a failure to maintain or cause another to maintain records, or for a failure to timely produce records under an election to maintain records outside the United States. An additional penalty for a another failure may be imposed, however, under the rules of paragraph (d)(2) of this section. Thus, unless such failures continue after notification as described in paragraph (d) of this section, the maximum penalty under this paragraph with respect to each related party for all such failures in a taxable year is $10,000. The members of a group of corporations filing a consolidated return are jointly and severally liable for any monetary penalty under this section that may be imposed.

(b) *Reasonable cause*—(1) *In general.* If an affirmative showing is made that there is reasonable cause for a failure that results in the assessment of the monetary penalty, the period during which reasonable cause exists shall be treated as beginning on the day reasonable cause is established and ending not earlier than the last day on which reasonable cause existed for any such failure. Failures which may be excused for reasonable cause include not timely filing Form 5472, not maintaining or causing another to maintain records as required by §1.6038A-3, and not producing records maintained outside the United States within the time prescribed in paragraph (f) of §1.6038A-3. Additionally, the beginning of the 90-day period after mailing of a notice by the District Director, the Assistant Commissioner (International), or the Director of an Internal Revenue Service Center of a failure described in paragraph (d) of this §1.6038A-4, shall be treated as not earlier than the last day on which reasonable cause existed.

(2) *Affirmative showing required*—(i) *In general.* To show that reasonable cause exists for purposes of paragraph (b)(1), the reporting corporation must make an affirmative showing of all the facts alleged as reasonable cause for such failure in a written statement containing a declaration that it is made under penalties of perjury. The statement must be filed with the District Director or the Assistant Commissioner (International) (in the case of failure to maintain or furnish requested information permitted to be maintained outside the United States under the election or a failure to file), or the Director of the Internal Revenue Service Center where the Form 5472 is required to be filed (in the case of failure to file Form 5472). The District Director, the Assistant Commissioner (International), or the Director of the Internal Revenue Service Center where the income tax return is filed, as appropriate, shall determine whether the applicable failure was due to reasonable cause, and if so, the period of time for which such reasonable cause existed. If a return has been filed as required by §1.6038A-2 or records have been maintained and produced as required by §1.6038A-3, except for an omission of, or error with respect to, some of the information required or a record to be maintained, the omission or error shall not constitute a failure for purposes of section 6038A(d) if the reporting corporation who filed the return establishes to the satisfaction of the District Director, the Assistant Commissioner (International), or the Director of the Internal Revenue Service Center that the person has substantially complied with the filing of Form 5472 or the requirement to maintain or produce records.

(ii) *Small corporations.* The District Director or the Assistant Commissioner (International) shall apply the reasonable cause exception liberally in the case of a small corporation that

(A) had no knowledge of the requirements imposed by section 6038A;

(B) has limited presence in and contact with the United States; and

(C) promptly and fully complies with all requests by the District Director or the Assistant Commissioner (International) to file Form 5472, and to furnish books, records, or other materials relevant to the reportable transaction.

(c) *Failure to maintain records or to cause another to maintain records.* A failure to maintain records or to cause another to maintain records is determined by the District Director or the Assistant Commissioner (International) upon the basis of the overall compliance (including compliance with an agreement to produce records under the election to maintain records outside the United States) with the maintenance of records requirement by a reporting corporation. It is not an item-by-item determination. Thus, for example, a failure to maintain a single or small number of items may not constitute a failure for purposes of section 6038A(d), unless such item or items are essential to the correct determination of the tax liability of the reporting corporation. Upon such a determination, the District Director or the Assistant Commissioner (International) shall notify the reporting corporation of the failure in writing.

(d) *Increase in penalty where failure continues after notification*—(1) *In general.* If any failure described in this section continues for more than 90 days after the day on which the District Director, the Assistant Commissioner (International), or the Director of the Internal Revenue Service Center where the return is required to be filed (regarding a failure to file Form 5472), mails notice of the failure to the reporting corporation, the reporting corporation shall pay a penalty (in addition to the penalty described in paragraph (a) of this section) of $10,000 with respect to each related party for which a failure occurs for each 30-day period during which the failure continues after the expiration of the 90-day period. Any uncompleted fraction of a 30-day period shall count as a 30-day period for purposes of this paragraph (d) of this section.

(2) *Additional penalty for another failure.* An additional penalty for a taxable year may be imposed, however, if at a subsequent time from the time of the imposition of the monetary penalty described in paragraph (a) of this section, a second failure is determined and such second failure continues after notification under paragraph (d)(1) of this section. Thus, if a taxpayer fails to file Form 5472 and is assessed a monetary penalty and later, upon audit, is determined to have failed to maintain records, an additional penalty for the failure to maintain records may be assessed under the rules of this paragraph if the failure to maintain records continues after notification under this paragraph.

(3) *Cessation of accrual.* The monetary penalty will cease to accrue if

the reporting corporation either files Form 5472 (in the case of a failure to file Form 5472), furnishes information to substantially complete Form 5472, or demonstrates compliance with respect to the maintenance of records (in the case of a failure to maintain) records for the taxable year in which the examination occurs and subsequent years to the satisfaction of the District Director or the Assistant Commissioner (International). The monetary penalty also will cease to accrue if requested information, documents, or records, kept outside the United States under an the election contained in §1.6038A-3(f) and not produced within the time specified, are produced.

(4) *Continued failures.* If a failure under this section relating to a taxable year beginning before July 11, 1989, occurs, and if the failure continues following 90 days after the notice of failure under this paragraph is sent, the amount of the additional penalty to be assessed under this paragraph is $10,000 for each 30-day period (or fraction thereof) beginning after November 5, 1990, during which the failure continues.

There is no limitation on the amount of the monetary penalty that may be assessed after November 5, 1990.

(e) *Other penalties.* For criminal penalties for failure to file a return and filing a false or fraudulent return, see sections 7203 and 7206 of the Code.

(f) *Examples.* The following examples illustrate the rules of this section.

Example (1)—Failure to file Form 5472. Corp X, a U.S. reporting corporation, engages in related party transactions with FC. Corp X does not file timely a Form 5472 or maintain records relating to the transactions with FC for Year 1 or subsequent years. The Service Center with which Corp X files its income tax return imposes a $10,000 penalty for each of Years 1, 2, and 3 under section 6038A(d) and this §1.6038A-4 for failure to provide information as required on Form 5472 and mails a notice of failure to provide information. Corp X does not file Form 5472. Ninety days following the mailing of the notice of failure to Corp X an additional penalty of $10,000 is imposed. On the 135th day following the mailing of the notice of failure, Corp X files Form 5472 for Years 1, 2, and 3. The total penalty owed by Corp X for Year 1 is $30,000. ($10,000 for not timely filing Form 5472, $10,000 for the first 30-day period following the expiration of the 90-day period, and $10,000 for the fraction of the second 30-day period). The penalty for Years 2 and 3 for the failure to file Form 5472 is also $30,000 for each year, calculated in the same manner as for Year 1. The total penalty for failure to file Form 5472 for Years 1, 2, and 3 is $90,000.

Example (2)—Failure to maintain records. Assume the same facts as in *Example (1).* In Year 5, Corp X is audited for Years 1 through 3. Corp X has not been maintaining records relating to the transactions with FC. The District Director issues a notice of failure to maintain records. Corp X has already been subject to the monetary penalty of $10,000 for each of Years 1, 2, and 3 for failure to file Form 5472 and, therefore, a monetary penalty under paragraph (a) of this section for failure to maintain records is not assessed. However, an additional penalty is assessed after the 90th day following the mailing of the notice of failure to maintain records. Corp X develops a record maintenance system as required by section 6038A and §1.6038A-3. On the 180th day following the mailing of the notice of failure to maintain records, Corp X demonstrates to the satisfaction of the District Director that the newly developed record maintenance system will comply with the requirements of §1.6038A-3 and the increase in the monetary penalty after notification ceases to accrue. The additional penalty for failure to maintain records is $30,000. An additional penalty of $30,000 per year is assessed for each of years 2 and 3 for the failure to maintain records for a total of $90,000.

(g) *Effective dates.* For effective dates for this section, see §1.6038A-1(k).

§1.6038A-5 *Authorization of agent.*

(a) *Failure to authorize.* The rules of §1.6038A-7 shall apply to any transaction between a foreign related party and a reporting corporation (including any transaction engaged in by a partnership that is attributed to the reporting corporation under paragraph (e)(2) of §1.6038A-1), unless the foreign related party authorizes the reporting corporation to act as its limited agent solely for purposes of sections 7602, 7603, and 7604 with respect to any request by the Secretary to examine records or produce testimony related to such a transaction or with respect to any summons by the Secretary for such records or testimony. The fact that a reporting corporation is authorized to act as an agent for a foreign related party is not sufficient without other activities to establish for the foreign related party either a trade or business in the United States for purposes of the Code or a permanent establishment or fixed base for purposes of an income tax treaty.

(b) *Annual authorization by related party*—(1) *In general.* A foreign related party annually shall authorize as its agent (solely for purposes of sections 7602, 7603, and 7604) the reporting corporation with which it engages in transactions by providing a statement on Form 5472, signed by the foreign related party or an officer of the foreign related party possessing the authority to authorize an agent for purposes of Rule 4 (d)(3) of the Federal Rules of Civil Procedure. The reporting corporation will accept this appointment by providing such a statement, signed by an officer of the reporting corporation possessing the authority to accept such an appointment. The agency shall be effective at all times. Until official Internal Revenue Service forms are available, the authorization and acceptance must be attached to the Form 5472 and must contain a heading and statement as set forth below. A foreign government or a controlled commercial entity as defined by section 892(2)(B) is not subject to the authorization of agent requirement.

AUTHORIZATION OF AGENT

"[Name of foreign related party] hereby expressly authorizes [name of reporting corporation] to act as its agent solely for purposes of sections 7602, 7603, and 7604 of the Internal Revenue Code with respect to any request to examine records or produce testimony related to any transaction between [name of the above-named foreign related party] and [name of reporting corporation] or with respect to any summons for such records or testimony.

Signature of or for
[name of foreign related party] _____ (Title) _____ (Date) _____

(If signed by a corporate officer, partner, or fiduciary on behalf of foreign related party]: I certify that I have the authority to execute this authorization of agent to act on behalf of [name of foreign related party]).

Type or print your name below if signing for a foreign related party that is not an individual.

[Name of reporting corporation] accepts this appointment to act as agent for [name of foreign related party] for the above purpose."

Signature for [Name of Reporting Corporation]	(Title)	(Date)

I certify that I have the authority to accept this appointment to act as agent on behalf of [name of foreign related party] and agree to accept service of process for the above purposes.

Type or print your name below.

---

(2) *Authorization for prior years.* A foreign related party may authorize a reporting corporation to act as its agent with respect to taxable years for which a Form 5472 is required to be filed prior to the date on which the final regulations under section 6038A are published by providing the above executed authorization of agent within 30 days of a request by the Service for such an authorization.

(c) *Legal effect of authorization of agent.* The legal consequences of a foreign related party authorizing a reporting corporation to act as its agent for purposes of sections 7602, 7603, and 7604 of the Code are as follows.

(1) *Agent for purposes of commencing judicial proceedings.* A reporting corporation that is authorized by a foreign related party to act as its agent for purposes of sections 7602, 7603, and 7604 (including service of process) is also the agent of the foreign related party for purposes of—

(i) The filing of a petition to quash under section 6038A(e)(4)(A) or a petition to review an Internal Revenue Service determination of noncompliance under section 6038A(e)(4)(B), and (ii) The commencement of a judicial proceeding to enforce a summons under section 7604, whether commenced in conjunction with a petition to quash under section 6038A(e)(4)(A) or commenced as a separate proceeding in the federal district court for the district in which the person to whom the summons is issued resides or is found.

(2) *Foreign related party found where reporting corporation found.* For any purposes relating to sections 7602, 7603, or 7604 (including service of process), a foreign related party that authorizes a reporting corporation to act on its behalf under section 6038A(e)(1) and this section may be found anywhere where the reporting corporation has residence or is found.

(d) *Successors in interest.* A successor in interest to a related party should execute and file a new Authorization of Agent on Form 5472 following the succession event. If the Form 5472 containing the new Authorization of Agent is not filed as part of an income tax return, only the information regarding the reporting corporation and the related party as described in paragraph (b)(1) and (2) of §1.6038A-2, plus the Authorization of Agent sections of Form 5472 (or attachment thereto) need be completed. The Form 5472 should be sent to the Internal Revenue Service Center with which the reporting corporation's income tax return is required to be filed. A duplicate copy of the Form 5472 must be filed with the Internal Revenue Service Center, Philadelphia, PA 19255. A new Authorization of Agent should be filed no later than the next filing date (including extensions) of the corporate income tax return of the reporting corporation.

(e) *Retroactive authorization for inadvertent transaction*—(1) *In general.* If a foreign person and a reporting corporation that engage in a transaction discover only after the completion of the transaction and after the time to timely file Form 5472 that the foreign person is a related party within the meaning of section 6038A(c)(2) and §1.6038A-1(c)(4) and the foreign person has not authorized the reporting corporation to act as its agent under section 6038A(e)(1) and paragraph (b) of this section, the related party, upon discovery of the relationship, retroactively may authorize the reporting corporation to act as its agent for purposes of section 6038A(e)(1) and this section if the District Director or the Assistant Commissioner (International) permits. The District Director or the Assistant Commissioner (International) may permit a retroactive authorization if—

(i) The transaction is a small or isolated transaction on arm's-length terms; and

(ii) The related party engaging in the transaction does not directly own stock in the reporting corporation.

(2) *Procedure for requesting retroactive authorization.* In cases described in paragraph (e)(1) of this section, a foreign related party may submit a request in writing to the District Director or the Assistant Commissioner (International) that it be permitted retroactively to authorize as its agent a reporting corporation with which it engaged in a transaction. The request should include statements demonstrating that the foreign related party and the reporting corporation meet the requirements

of paragraph (e)(1) of this section. If the District Director or the Assistant Commissioner (International) so permits, such permission should be in writing. The foreign related party may authorize the reporting corporation to act as its agent by filing a Form 5472 within 30 days after receipt of such written permission (or if the Form 5472 has not been revised to include an authorization section, the Form 5472 and the authorization of agent statement contained in paragraph (b) of this section for the year in which the transaction occurred). One Form 5472 should be filed as an amended return with the Internal Revenue Service Center with which the reporting corporation's income tax return is required to be filed. A duplicate Form 5472 should be filed at the same time as the amended return is filed with the Internal Revenue Service Center, Philadelphia, PA 19255.

(3) *Effect of retroactive authorization*—(i) *Noncompliance penalty adjustment.* If a foreign related party retroactively authorizes as its agent a reporting corporation with which it engaged in a transaction, the foreign related party shall be treated as having complied with the authorization of agent requirement of this section. If a related party does not retroactively authorize a reporting corporation as its agent for purposes of sections 7602, 7603, and 7604, the reporting corporation will be subject to the noncompliance penalty contained in §1.6038A-7 with respect to transactions that occurred prior to the time the reporting corporation first became aware that the requirements of section 6038A would apply.

(ii) *Monetary penalty.* A Form 5472 that is filed under paragraph (e)(2) of this section within 30 days of the receipt of the written permission to retroactively authorize an agent will be treated as timely filed. Accordingly, the monetary penalty under §1.6038A-4 will not be applicable.

(4) *Deemed compliance.* In exceptional circumstances, the District Director or the Assistant Commissioner (International) may treat a reporting corporation as retroactively authorized to act as agent for a related party for purposes of sections 7602, 7603, and 7604 in the absence of an actual agency appointment by the foreign related party. Factors to be considered include—

(i) If neither the reporting corporation nor the other party to the transaction knew or had reason to know that the two parties were related at the time of the transaction, and

(ii) The extent to which the taxpayer establishes to the satisfaction of the District Director or the Assistant Commissioner (International) that all transactions between the reporting corporation and the related party were on arm's-length terms and did not involve the participation of any known related party.

(5) *Reason to know.* Whether the reporting corporation or other party had reason to know that the two parties were related at the time of the transaction will be determined by all the facts and circumstances.

(6) *Effect of deemed compliance.* If a reporting corporation is deemed under paragraph (e)(4) of this section to have been retroactively authorized to act as an agent for a foreign related party for purposes of section 7602, 7603, and 7604, such deemed compliance is applicable only for that particular transaction and other reportable transactions entered into prior to the time when the reporting corporation knew or had reason to know that the related party, in fact, was related. The noncompliance rule of §1.6038A-7 shall apply to any transaction subsequent to that time with the same related party, unless the related party actually authorizes the reporting corporation to act as its agent under paragraph (a) of this section. A new authorization must be executed for all subsequent transactions. In addition, the record maintenance requirements of §1.6038A-3 will apply to all subsequent transactions and, with respect to prior transactions, will apply to relevant records in existence at the time the relationship was discovered.

(f) *Effective dates.* For effective dates for this section, see §1.6038A-1(k).

§1.6038A-6 *Failure to furnish information.*

(a) *In general.* The rules of §1.6038A-7 may be applied with respect to a transaction between a foreign related party and the reporting corporation (including any transaction engaged in by a partnership that is attributed to the reporting corporation under paragraph (e)(2) of §1.6038A-1) if a summons is issued to the reporting corporation to produce any records or testimony, either directly or as agent for such related party, to determine the correct treatment under Title 1 of the Code of such a transaction between the reporting corporation and the related party; and if—

(1)(i) The summons is not quashed in a proceeding, if any, begun under section 6038A(e)(4) and is not determined to be invalid in a proceeding, if any, begun under section 7604 to enforce such summons; and

(ii) The reporting corporation does not substantially and timely comply with the summons, and the District Director or the Assistant Commissioner (International) has sent by certified or registered mail a notice under section 6038A(e)(2)(C) to the reporting corporation that it has not so complied; or

(2) The reporting corporation fails to maintain or to cause another to maintain records as required by §1.6038A-3, and by reason of that failure, the summons is quashed in a proceeding under section 6038A(e)(4) or in a proceeding begun under section 7604 to enforce the summons, or the reporting corporation is not able to provide the records requested in the summons.

(b) *Enforcement proceeding not required.* The District Director or the Assistant Commissioner (International) is not required to begin an enforcement proceeding to enforce the summons in order to apply the rules of §1.6038A-7.

(c) *De minimis failure.* Where a reporting corporation's failure to comply with the requirement to furnish information under this section is *de minimis*, the District Director or the Assistant Commissioner (International), in the discretion of the District Director or the Assistant Commissioner (International), may choose not to apply the noncompliance penalty. Thus, for example, in cases where a particular document or group of documents is not furnished upon request or summons, the District Director or the Assistant Commissioner (International), in their sole discre-

tion, may choose not to apply the noncompliance penalty if the District Director or the Assistant Commissioner (International) deems the document or documents not to have significant or sufficient value in the determination of the correctness of the tax treatment of the related party transaction.

(d) *Effective dates.* For effective dates for this section, see §1.6038A-1(k).

§1.6038A-7 *Noncompliance.*

(a) *In general.* In the case of any failure described in §1.6038A-5 or §1.6038A-6, the rules of this §1.6038A-7 apply to the reporting corporation. In such a case

(1) The amount of the deduction allowed under subtitle A for any amount paid or incurred by the reporting corporation to the related party in connection with such transaction, and

(2) The cost to the reporting corporation of any property acquired in such transaction from the related party or transferred by such corporation in such transaction to the related party, may be determined by the District Director or the Assistant Commissioner (International).

(b) *Determination of the amount.* The amount of the deduction or the cost to the reporting corporation shall be the amount determined by the District Director or the Assistant Commissioner (International) in the sole discretion of the District Director or the Assistant Commissioner (International) from the District Director's or Assistant Commissioner (International)'s own knowledge or from such information as the District Director or Assistant Commissioner (International) may choose to obtain through testimony or otherwise. The District Director or Assistant Commissioner (International) may disregard any information, documents, or records submitted by the reporting corporation or the related party if, in the sole discretion of the District Director or the Assistant Commissioner (International), the District Director or the Assistant Commissioner (International) deems that they do not have significant or sufficient value in the determination of the correctness of the tax treatment of the related party transaction.

(c) *Separate application.* If the noncompliance penalty of this section applies with respect to transactions with a related party of the reporting corporation, it will not be applied with respect to any other related parties of the reporting corporation solely upon the basis of that failure. Thus, for example, if a reporting corporation engages in transactions with related party A and related party B, and the reporting corporation does not respond to a summons for records related to the transactions between the reporting corporation and related party A, the noncompliance penalty imposed as a result of such failure will not apply to the transactions between the reporting corporation and related party B. If a separate summons is issued for records relating to the transactions between the reporting corporation and related party B and the reporting corporation does not produce such records, the noncompliance penalty may be applied to those transactions.

(d) *Effective dates.* For effective dates for this section, see § 1.6038A-1(k).

Par. 4. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 1.6038C-1 also issued under 26 U.S.C. 6038C.

Par. 5. New §1.6038C-1 is added to read as follows: §1.6038C-1 *General rule.*

The rules of §§1.6038A-1 through 1.6038A-7 generally will apply for purposes of section 6038C.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

Approved November 29, 1990.

Kenneth W. Gideon,
Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on December 4, 1990, 2:30 p.m., and published in the issue of the Federal Register for December 10, 1990, 55 F.R. 50706)

Notice of Proposed Rulemaking

One Class of Stock Requirement

PS-4-73

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the requirement that a small business corporation have only one class of stock. Changes to the applicable law were made by the Subchapter S Revision Act of 1982. These regulations affect corporations and their shareholders, and are necessary to provide them with guidance needed to comply with the applicable tax law.

DATE: Written comments and requests for a public hearing must be received by January 3, 1991.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604 Ben Franklin Station, Attn: CC:CORP:T:R (PS-4-73), Room 4429, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the Income Tax Regulations (26 CFR Part 1) under section 1361 of the Internal Revenue Code. These amendments are proposed to implement section 1361(b)(1)(D) and (c)(4) and (5) as added by the Subchapter S Revision Act of 1982.

Only a small business corporation is eligible to elect subchapter S status. Section 1361(b) defines a small business corporation as a domestic corporation that is not an ineligible corporation and that does not have—(i) more than 35 shareholders, (ii) as a shareholder a person (other than an estate and certain types of trusts) who is not an individual, (iii) a nonresident alien as a shareholder, and (iv) more than one class of stock.

Proposed regulations relating to the definition of an S corporation under section 1361 were published in the Federal Register (51 FR 35659) [LR-262-82, 1986-2 C.B. 789] on October 7, 1986. The paragraph relat-

ing to the one class of stock requirement was reserved in that document. This document contains proposed regulations relating to the one class of stock requirement. Provisions relating to the other requirements under section 1361 are generally reserved in this document. See the notice of proposed rulemaking published on October 7, 1986, with respect to those provisions.

Explanation of Provisions

The proposed regulations relate to the one class of stock requirement for S corporations provided in section 1361(b)(1)(D) of the Code. The proposed regulations provide that a corporation has more than one class of stock if the outstanding shares of stock do not confer identical rights to distributions and liquidation proceeds, regardless of whether the difference in rights occurs pursuant to the corporate charter, articles of incorporation, the corporate bylaws, by operation of state law, by administrative action, or by agreement. Distributions that are made by a corporation with respect to its outstanding shares of stock and that vary with respect to timing or amount are considered non-conforming distributions and generally result in a second class of stock. However, differences in voting rights, rights that arise out of buy-sell agreements among shareholders, and restrictions on the transferability of stock are disregarded in determining whether a corporation has more than one class of stock. Transfers made by a corporation to a shareholder that are characterized as distributions under the Code (*e.g.*, under section 7872) or under general principles of Federal tax law are considered distributions with respect to stock for purposes of these regulations.

All outstanding shares of stock are taken into account in determining whether a corporation has a second class of stock. The proposed regulations provide that, solely for purposes of subchapter S, stock that is substantially nonvested within the meaning of §1.83-3(b) is not treated as outstanding stock unless the holder makes an election under section 83(b). The proposed regulations also provide that most types of deferred compensation arrangements that do not involve property subject to section 83 are not treated as outstanding stock for purposes of subchapter S.

Any instrument, obligation, or arrangement, regardless of whether designated as debt, which constitutes equity or otherwise results in the holder being treated as the owner of stock under general principles of Federal tax law is treated as a second class of stock of the corporation. See Rev. Rul. 80-238, 1980-2 C.B. 96, Rev. Rul. 82-150, 1982-2 C.B. 110, and Rev. Rul. 85-87, 1985-1 C.B. 268, for examples of the application of general principles to treat an option to acquire stock of a corporation as a present stock interest. In addition, the proposed regulations provide that options that are substantially certain to be exercised are treated as a second class of stock for purposes of subchapter S regardless of whether they would be treated as stock under general principles of Federal tax law.

Prior to the amendment of subchapter S by the Subchapter S Revision Act of 1982, some courts had held that the general principles of Federal tax law under which purported debt would ordinarily be recharacterized as equity did not necessarily require purported debt to be treated as a second class of stock for purposes of subchapter S. *See, e.g., Portage Plastics Co. v. United States*, 486 F.2d 632 (7th Cir. 1973) (en banc). The legislative history of the Subchapter S Revision Act of 1982, however, indicates that Congress intended to supplant this case law with the straight debt safe harbor of section 1361(c)(5) of the Code. Thus, consistent with Congressional intent, this pre-1982 case law is not reflected in these proposed regulations, and a purported debt instrument that is outside the safe harbor rules will be treated as a second class of stock for subchapter S purposes if it constitutes equity under general principles of Federal tax law. *See* H.R. Rep. No. 826, 97th Cong., 2d Sess. 8 (1982); S. Rep. No. 640, 97th Cong., 2d Sess. 8 (1982).

Section 1361(c)(5) and the proposed regulations provide that straight debt is not treated as a second class of stock even if it would otherwise be treated as equity under general principles of Federal tax law. Section 1361(c)(5)(B) defines straight debt as a written unconditional promise to pay on demand or on a specified date a sum certain in money if (i) the interest rate and interest payment dates are not contingent on profits, the corporation's discretion, or similar factors, (ii) there is no convertibility (directly or indirectly) into stock, and (iii) the creditor is an individual (other than a nonresident alien), an estate or a trust described in section 1361(c)(2).

The proposed regulations provide that, to qualify as straight debt, the obligation must bear a reasonable rate of interest. The determination of whether an obligation bears a reasonable rate of interest is made based on all the facts and circumstances, including the amount borrowed and the timing and amount of the payments due under the obligation. An obligation may provide for a variable interest rate that is based on a current objective interest index, if the interest rate meets the reasonable interest rate requirement. An "objective interest index" is an interest rate that is made known publicly and offered contemporaneously to unrelated borrowers in private lending transactions by a financial institution or that is based on a similar objective interest rate index which is regularly published. Examples of an objective interest index include the prime rate of a designated financial institution, LIBOR (London Interbank Offered Rate), or the applicable Federal rate under section 1274(d). The proposed regulations set forth two safe harbors for satisfying the reasonable interest rate requirement. An obligation is treated as bearing a reasonable interest rate if the obligation has a yield to maturity that is at least equal to the applicable Federal rate, but not more than five points above the applicable Federal rate (determined as of the date that the obligation is issued). Similarly, an obligation bearing a variable interest rate is treated as bearing a reasonable interest rate if (A) the issue price of the obligation equals the obligation's stated redemption price at maturity, (B) the obligation's interest rate is expressed as a fixed multiple of a current objective interest index or as a constant number of percentage points or basis points more or less than a current objective interest index, and (C) the rate resulting from the formula at the time of issuance of

the obligation is at least equal to the applicable Federal rate at that time and is no greater than five percentage points above the applicable Federal rate at that time.

The Service invites public comment on alternative rules or safe harbors relating to whether an instrument, obligation, or arrangement should be treated as a second class of stock. In particular, the Service invites public comment on whether a safe harbor should be created for obligations held by financial institutions.

The regulations are proposed to be effective for taxable years beginning after December 31, 1982. However, in the case of an instrument or obligation designated as debt that was in existence on or before October 5, 1990, and was held solely by the owners of, and in substantially the same proportion as, the nominal stock of the corporation, §1.1361-1-(1)(3)(ii) will apply to taxable years beginning on or after (*Insert the date that is 90 days after publication of the final regulations in the Federal Register*) with respect to the purported debt. In addition, in the case of an instrument or obligation that met the straight debt safe harbor described in section 1361(c)(5) of the Code and that was in existence on or before October 5, 1990, the reasonable interest rate requirement of §1.1361-1(1)-(4)(i)(B) will apply to taxable years beginning on or after (*Insert date that is 90 days after the publication of the final regulations in the Federal Register*), with respect to that instrument or obligation. Finally, in the case of an option, warrant, or similar instrument that was in existence on or before October 5, 1990, §1.1361-1(1)-(3)(iii) will apply to taxable years beginning on or after (*Insert the date that is 90 days after publication of the final regulations in the Federal Register*) with respect to the option, warrant, or similar instrument.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of the proposed rulemaking for the regulations was submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and requests for a public hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Internal Revenue Service by any person who also submits timely written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

List of Subjects

26 CFR 1.1361-OA through 1.1388-1

Cooperatives, Income taxes, Small business, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

The proposed amendments to 26 CFR Part 1 are as follows:

PART 1—[AMENDED]

Paragraph 1. The authority citation for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. *** §1.1361-1(1) also issued under 26 U.S.C. 1361(c)(5)(C).

Par. 2. The following new section is added to read as follows:

§1.1361-1 S corporation defined.

(a) [RESERVED]

(b) *Small business corporation defined*—(1) *In general.* For purposes of subchapter S, chapter 1 of the Code and the regulations thereunder, the term "small business corporation" means a domestic corporation that is not an ineligible corporation (as defined in paragraph (d) of this section) and that does not have—

(i) More than 35 shareholders,

(ii) As a shareholder, a person (other than an estate and other than certain trusts described in paragraph (h)(1) of this section) who is not an individual,

(iii) A nonresident alien as a shareholder, or

(iv) More than one class of stock.

(2) *Estate in bankruptcy.* The term "estate" for purposes of this paragraph, includes the estate of an individual in a case under title 11 of the United States Code.

(3) *Treatment of restricted stock.* Solely for purposes of subchapter S, stock that is substantially nonvested (within the meaning of §1.83-3(b)) is not treated as outstanding stock of the corporation, and the holder of such stock is not treated as a shareholder solely by reason of holding such stock, unless the holder makes an election under section 83(b). In the event of such an election, the stock is treated as outstanding stock of the corporation and the holder of the stock is treated as a shareholder for purposes of subchapter S. See paragraph (1)(2) of this section for rules for determining whether substantially nonvested stock with respect to which an election under section 83(b) has been made is treated as a second class of stock.

(4) *Treatment of deferred compensation plans.* For purposes of subchapter S, an instrument, obligation, or arrangement that does not convey the right to vote, that is not property under §1.83-3 of the regulations, and that is issued to an employee by a corporation in connection with the performance of services under a plan with respect to which an employee is not taxed currently on income, is not treated as outstanding stock.

(5) *Straight debt.* For purposes of subchapter S, an instrument or obligation that satisfies the definition of straight debt in paragraph (1)(4) of this section is not treated as outstanding stock.

(c)—(k) [RESERVED]

(1) *Classes of stock*—(1) *General rule.* A corporation that has more than one class of stock does not qualify as a small business corporation.

(2) *Outstanding shares of stock treated as a second class of stock*—(i) *In general.* A corporation has more than one class of stock for purposes of this paragraph if all of the outstanding shares of stock of the

corporation do not confer identical rights to distribution and liquidation proceeds, regardless of whether any differences in rights occur pursuant to the corporate charter, articles or bylaws, by operation of state law, by administrative action, or by agreement. Thus, for example, substantially nonvested stock with respect to which an election under section 83(b) has been made is treated as a second class of stock, unless such stock confers rights to distribution and liquidation proceeds that are identical to those rights conferred by the other outstanding shares of stock. Differences in voting rights among shares of stock of a corporation are disregarded in determining whether a corporation has more than one class of stock. Thus, for example, if all shares have identical rights to distribution and liquidation proceeds, an S corporation may have voting and nonvoting common stock, a "class" of stock that may vote only on certain issues, irrevocable proxy agreements, or groups of shares that differ with respect to rights to elect members of the board of directors. Buy-sell agreements among shareholders and restrictions on the transferability of stock are disregarded in determining whether a corporation has more than one class of stock. Agreements to redeem shares of stock of a corporation are disregarded in determining whether a corporation has more than one class of stock unless the agreement—

(A) Restricts the rights of the holders of the subject stock to share in liquidation proceeds, or

(B) Provides for distributions that would be treated as non-conforming distributions under paragraph (1)(2)(ii)(C) of this section.

(ii) *Non-conforming distributions*—(A) *In general.* Notwithstanding that all outstanding shares of stock confer identical rights to distribution and liquidation proceeds, a corporation has more than one class of stock if the corporation makes nonconforming distributions (*i.e.*, distributions that differ with respect to timing or amount with respect to each outstanding share of stock), unless the distribution is described in paragraph (1)(2)(ii)(B) or (C) of this section.

(B) *Pro rata distributions.* Distributions that differ with respect to timing but are pro rata with respect to all outstanding shares of stock, taking into account the entire taxable year of the S corporation (or the deemed taxable year if an election under section 1377(a)(2) is made), are not treated as non-conforming distributions if the differences in timing of the distributions were unintentional or if the distributions that differ with respect to timing are made within a three-month period (provided the aggregate distributions during the three-month period are pro rata with respect to all outstanding shares of stock).

(C) *Redemptions.* A distribution that is treated as a distribution in part or full payment in exchange for stock under sections 302(a) or 303(a) is not treated as a non-conforming distribution. A distribution that is treated as a distribution under section 301 pursuant to section 302(d) is not treated as a non-conforming distribution unless the distribution is made pursuant to a plan that provides for a series of distributions to the shareholders of the S corporation that would result in the shareholders owning substantially the same proportionate interest in the corporation that they had before the series of distributions.

(iii) *Stock taken into account.* Except as provided in paragraphs (b)(3) and (b)(4) of this section (relating to restricted stock and to deferred compensation plans), and paragraph (1)(4) of this section (relating to the safe harbor for straight debt), all outstanding shares of stock of a corporation are taken into account in determining whether the corporation has a second class of stock.

(3) *Other instruments, obligations, or arrangements treated as a second class of stock*—(i) *In general.* Except as provided in paragraph (b)(4) of this section (relating to deferred compensation plans) and paragraph (1)(4) of this section (relating to the safe harbor for straight debt), any instrument, obligation, or arrangement described in paragraph (1)(3)(ii) or (iii) is treated as a second class of stock for purposes of this paragraph (1).

(ii) *Instruments, obligations, or arrangements treated as equity under general principles.* Any instrument, obligation, or arrangement issued by a corporation (other than outstanding shares of stock described in paragraph (1)(2)(iii) of this section), regardless of whether designated as debt, as treated as a second class of stock of the corporation if the instrument, obligation, or arrangement constitutes equity or otherwise results in the holder being treated as the owner of stock under general principles of Federal tax law.

(iii) *Certain call options, warrants or similar instruments*—(A) *In general.* Except as otherwise provided in this paragraph (1)(3)(iii), a call option, warrant, or similar instrument (collectively "call option") issued by a corporation is treated as a second class of stock of the corporation if the call option is substantially certain to be exercised by the holder. This rule applies regardless of whether the owner of the call option is treated as the owner of the underlying stock under general principles of Federal tax law. The determination of whether a call option is substantially certain to be exercised is made at the time of issuance and, in the event of a material modification by the corporation or subsequent transfer to another holder (other than by gift or subsequent transfer to another holder (other than by gift or transfer at death subject to chapter 11 or 12, a transfer between spouses or former spouses subject to section 1041), at the time of such material modification or transfer. Thus, for example, a corporation that issues or has outstanding a call option with a strike price substantially below the market price of the underlying stock on the date that the call option is issued, transferred, or materially modified is treated as having more than one class of stock.

(B) *Certain exceptions.* (*1*) A call option that is issued by a corporation to a qualified person in connection with a loan to the corporation is not treated as a second class of stock for purposes of this paragraph (1) if the call option is exercisable only if the corporation defaults on the repayment of the loan. For this purpose, a "qualified person" means any person that—

(*i*) Is actively and regularly engaged in the business of lending, and

(*ii*) Is not a related person with respect to the corporation within the meaning of section 465(b)(3)(C), or if such person is a related person with respect to the corporation, the financing from the related person is com-

mercially reasonable and on substantially the same terms as loans involving unrelated persons.

(*2*) A call option that is issued to an employee in connection with the performance of services is not treated as a second class of stock if—

(*i*) The call option is nontransferable within the meaning of §1.83-3(d) and

(*ii*) The call option does not have a readily ascertainable fair market value as defined in §1.83-7(b) at the time the option is granted.

If the call option becomes transferable, this paragraph (1)(3)(iii)(B)(*2*) will cease to apply.

(C) *Safe harbor for certain options.* A call option that conveys the right to acquire stock of the corporation at a specified strike price is not treated as substantially certain to be exercised at the time of issuance or material modification by the corporation (including a material modification of the strike price pursuant to the terms of the instrument) or subsequent transfer to another holder, if the strike price of the call option at such time is at least 90 percent of the fair market value of the stock with respect to which the call option may be exercised.

(4) *Straight debt safe harbor*—(i) *In general.* Notwithstanding paragraph (1)(3) of this section, straight debt is not treated as a second class of stock. For purposes of section 1361(c)(5) and this section, the term "straight debt" means a written unconditional obligation, regardless of whether embodied in a formal note, to pay a sum certain on demand, or on a specified due date, which—

(A) Does not provide for an interest rate or payment dates that are contingent on profits, the borrower's discretion, the payment of dividends with respect to common stock, or similar factors;

(B) Bears a reasonable interest rate;

(C) Is not convertible (directly or indirectly) into stock or any other equity interest of the S corporation; and

(D) Is held by an individual (other than a nonresident alien), an estate, or a trust described in section 1361(c)(2).

For purposes of paragraph (1)(4)(i)(B) of this section, an obligation may have less than a reasonable interest rate or may bear no interest if the term of the obligation is one year or less and the obligation is not part of a series of obligations designed to avoid the requirement that an obligation bear a reasonable interest rate.

(ii) *Interest Rate*—(A) *Reasonable interest rate in general.* For purposes of paragraph (1)(4)(i)(B) of this section, the determination of whether an obligation bears a reasonable interest rate is made taking into account all of the facts and circumstances, including the amount borrowed and the timing and amount of payments due under the obligation (whether characterized as interest or principal).

(B) *Variable interest rate.* An obligation may provide for a variable interest rate that is based on a current objective interest index, if the interest rate meets the reasonable interest rate requirement of paragraph (1)(4)(i)(B) of this section. An "objective interest index" is a rate that is made known publicly and offered contemporaneously to unrelated borrowers in private lending transactions by a financial institution or that is based on a similar objective interest rate index which is regularly published. Examples of an objective interest index include the prime rate of a designated financial institution, LIBOR (London Interbank Offered Rate), or the applicable Federal rate under section 1274(d).

(C) *Reasonable interest rate safe harbors.* For purposes of paragraph (1)(4)(i)(B) of this section, an obligation is treated as bearing a reasonable interest rate if the obligation has a yield to maturity that is at least equal to the applicable Federal rate, but not more than five percentage points above the applicable Federal rate (determined as of the date that the obligation is issued). Similarly, for purposes of paragraph (1)(4)(i)(B) of this section, an obligation bearing a variable interest rate is treated as bearing a reasonable interest rate if—

(*1*) The issue price of the obligation equals the obligation's stated redemption price at maturity;

(*2*) The obligation's interest rate expressed as a fixed multiple of a current objective interest index or as a constant number of percentage or basis points more or less than a current objective interest index; and

(*3*) The rate resulting from the formula described in paragraph (1)(4)(ii)(C)(*2*) of this section at the time of issuance of the obligation is at least equal to the applicable Federal rate at that time and is no greater than five percentage points above the applicable Federal rate at that time.

See paragraph (1)(4)(ii)(B) of this section for the meaning of the term "objective interest index." Notwithstanding that an obligation has a yield to maturity or a variable interest rate that is not within the range described in the preceding sentences, the obligation may be considered to bear a reasonable rate of interest taking into account the facts and circumstances of the transaction.

(iii) *Subordination.* The fact that an obligation is subordinated to other debt of the corporation will not prevent the obligation from qualifying as straight debt.

(iv) *Modification or transfer.* An obligation that originally qualifies as straight debt ceases to so qualify if the obligation—

(A) Is materially modified so that the definition of straight debt is no longer satisfied, or

(B) Is transferred to a third party who would not be eligible to be a shareholder in an S corporation (without regard to the 35 shareholder requirement of section 1361(b)(1)(A)).

(v) *Treatment of straight debt for other purposes.* An obligation of an S corporation that satisfies the definition of straight debt in paragraph (1)(4)(i) of this section is not treated as a second class of stock. Such an obligation is treated as debt and is subject to the applicable rules governing indebtedness for other purposes of the Code unless the Commissioner determines that a principal purpose for issuing the obligation is tax avoidance. Accordingly, interest paid or accrued with respect to a straight debt obligation is generally treated as interest by the corporation and the recipient and does not constitute a distribution to which section 1368 applies.

(vi) *Treatment of C corporation "debt" upon conversion to S status.* If a C corporation has outstanding an obligation that satisfies the definition of straight debt in paragraph (1)(4)(i) of this section, but that may be considered equity under general principles of Federal tax law, the obligation is not treated as a second class of

stock for purposes of this section if the C corporation converts to S status. In addition, the conversion from C corporation status to S corporation status will not be treated as an exchange of debt for stock with respect to such an instrument.

(5) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example 1. The law of State A requires that permission be obtained from the State Commissioner of Corporations before stock may be issued by a corporation. The Commissioner grants permission to M, a corporation, to issue its stock subject to the restriction that any person who is issued stock in exchange for property, and not cash, must waive all rights to receive distributions until the shareholders who contributed cash for stock have received a stated amount of distributions per share. The shareholders who are issued stock for property execute an agreement with M based on the aforementioned condition. The condition placed by the Commissioner pursuant to State law upon the prospective holders of stock to be issued for property results in a difference as to the rights to distributions among shares. Accordingly, M is considered to have more than one class of stock and does not qualify as a small business corporation.

Example 2. Corporation N issues a debt instrument to another corporation that is convertible into stock of N corporation. The debt instrument does not satisfy the straight debt safe harbor both because it is convertible into stock of the issuing corporation and because it is held by a corporation. However, the instrument is considered a second class of stock only if it is treated as equity under the general principles of Federal tax law governing the distinction between debt and equity, or if it is a call option that is substantially certain to be exercised.

Example 3. Corporation Q has 500 shares of issued and outstanding common stock. A and B each own 250 shares of the stock. In addition, A and B each hold equal amounts of debt issued by Q that does not constitute straight debt and that is treated as equity under the general principles of Federal tax law governing the distinction between debt and equity. The debt, although held proportionately by the shareholders, is treated as a second class of stock.

Example 4. Corporation R, an S corporation, executes an agreement with its shareholders to modify its normal distribution policy by making upward adjustments of its distributions to those shareholders who bear heavier state tax burdens based on a formula to give the shareholders the same after tax results. The agreement causes the stock of Corporation R to have different rights to distributions. Therefore, Corporation R is considered to have a second class of stock.

Example 5. Corporation T, an S corporation with a calendar taxable year, has two shareholders, A and B, each owning 50 percent of the stock of the corporation. The corporate bylaws require that A and B receive equal distributions with respect to their stock. A $100 distribution is made to A on March 1 but because the corporation's bookkeeper inadvertently filed B's check instead of mailing it, a $100 distribution is not made to B until June 1 of the same taxable year. Because the distributions were not intentionally nonconforming and the distributions would be pro rata if the entire taxable year were taken into account, the distributions will not result in a second class of stock.

(6) *Inadvertent terminations.* See section 1362(f) and the regulations thereunder for rules relating to inadvertent terminations in cases where the one class of stock requirement has been inadvertently breached.

(7) *Effective date.* Section 1.1361-1(l) generally applies to taxable years beginning on or after January 1, 1983. However, in the case of an instrument or obligation designated as debt that was in existence on or before October 5, 1990, and was held solely by the owners of, and in substantially the same proportion as, the nominal stock of the corporation, §1.1361-1(l)(3)(ii) will apply to taxable years beginning on or after (*Insert the date that is 90 days after the publication of the final regulations in the Federal Register*) with respect to the purported debt. In addition, in the case of an instrument or obligation that met the straight debt safe harbor described in section 1361(c)(5) of the Code and that was in existence on or before October 5, 1990, the reasonable interest rate requirement of §1.1361-1(l)(4)(i)(B) will apply to taxable years beginning on or after (*Insert date that is 90 days after the publication of the final regulations in the Federal Register*), with respect to that instrument or obligation. Finally, in the case of an option, warrant, or similar instrument that was in existence on or before October 5, 1990, §1.1361-1(l)(3)(iii) will apply to taxable years beginning on or after (*Insert the that is 90 days after publication of the final regulations in the Federal Register*) with respect to the option, warrant, or similar instrument.

Fred T. Goldberg, Jr.,
Commissioner of
Internal Revenue.

(Filed by the Office of the Federal Register on October 4, 1990, 8:45 a.m., and published in the issue of the Federal Register for October 5, 1990, 55 F.R. 40870)

Notice of Proposed Rulemaking

Normalization: Inconsistent Procedures and Adjustments

PS-107-88

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: In response to numerous questions, the regulations proposed in this notice provide guidance on the application of the normalization requirements of sections 167(l) and 168(i)(9) of the Internal Revenue Code to utility companies that file consolidated federal income tax returns. The proposed regulations establish the extent to which certain ratemaking procedures and adjustments that are based on tax savings attributable to the filing of a consolidated return will be treated as inconsistent with the normalization requirements. These regulations provide that, in order to comply with the normalization requirements, a utility's ratemaking tax expense must be determined as though it filed a separate return. At the same time, however, the proposed regulations provide that in certain circumstances it will not violate the normalization requirements to exclude from rate base a utility's share of the tax savings attributable to the filing of a consolidated return.

DATES: Written comments must be received by January 28, 1991. A public hearing on these proposed regulations has been scheduled for 10:00 a.m. on February 8, 1991. Persons wishing to speak at this hearing must deliver outlines of their comments by January 25, 1991. These regulations are proposed to be effective for rate orders that become final on or after December 20, 1990.

ADDRESSES: Send comments and requests to speak at the public hearing to the Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (PS-107-88), Room 4429, Washington, D.C. 20044. If desired, comments and requests to speak may be hand-delivered to the Internal Revenue Service, Attn: CC:CORP:T:R (PS-107-88), Room 4429, 1111 Constitution Ave., NW, Washington, D.C.

SUPPLEMENTARY INFORMATION:

Background

This notice proposes to add new sections 1.167(l)-1(h)(7) and 1.168(i)-1 to Part 1 of Title 26 of the Code of Federal Regulations (CFR). The final regulations will be added to Part 1 of Title 26 of the CFR in accordance with the Internal Revenue Service's specific regulatory authority under 26 U.S.C. 167(l) and 26 U.S.C. 168(i)(9)(B)(iii), as well as its general regulatory authority under 26 U.S.C. 7805.

Any public utility taking advantage of accelerated depreciation in determining its federal income tax liability must use "normalization" accounting in calculating the rates to be charged to its customers and in maintaining its regulated books of account. These proposed regulations provide guidance on the proper application of the normalization requirements to a public utility filing a consolidated income tax return.

Accelerated depreciation was introduced by Congress as a means of encouraging capital formation by taxpayers by permitting earlier deductions for the cost of capital items. The reduction in current tax liability due to accelerated depreciation creates a deferral of taxes owed, and the difference between a company's federal income tax liability calculated using accelerated depreciation and the tax liability it would have were it to use the straight-line method of depreciation is, in effect, an interest-free loan from the Treasury. As with other loans, this difference is not permanent and must be "repaid" in the later years of the asset's life when a slower depreciation method would have provided larger deductions because the accelerated method has used up all available basis. Flow-through accounting, in effect, takes the principal amount of this congressionally-mandated loan away from the utility and flows it through to the utility's current customers.

In 1969, Congress enacted section 167(l) of the Code to prohibit the use of flow-through accounting. (Section 167(l) corresponds to sections 168(f)(2) and 168(i)(9)(A) under the Accelerated Cost Recovery System (ACRS), as modified by the Tax Reform Act of 1986.) In general, any utility taking advantage of accelerated depreciation must use normalization accounting for ratemaking purposes. Under normalization, a utility must calculate its ratemaking tax expense using depreciation that is no more accelerated than its ratemaking depreciation. Normalization also requires a utility to treat as a reserve the difference between its tax liability as computed using accelerated depreciation and the tax liability the utility would have were the tax to be computed using its ratemaking depreciation method (typically straight-line).

The purpose of these normalization requirements is to prevent the flow through to utility ratepayers of the reduction in current taxes stemming from the use of accelerated depreciation. The normalization rules require a utility to treat the reduction as a deferred tax expense that is collected from current customers through utility rates, and thus is available to utilities as cost-free investment capital until it must be paid to the Treasury. See H.R. Rep. No. 643, 97th Cong., 2d Sess. 6 (1982).

Under normalization accounting, ratepayers may receive a benefit from a utility's use of accelerated depreciation in calculating its federal income tax liability. The normalization rules do not prevent a regulatory agency from passing through to ratepayers the benefit of cost-free capital over the period for which the taxes are deferred. In other words, a utility commission may establish rates that reflect the capital cost savings resulting from accelerated depreciation by excluding the reserve for deferred taxes from the base to which the utility's rate of return is applied (or by treating the deferred taxes as cost-free capital in determining the rate of return allowed).

In response to various ratemaking procedures, Congress enacted the predecessor of section 168(i)(9)(B) (section 168(e)(3)(C) under ACRS, before its modification by the Tax Reform Act of 1986 [Pub. L. 99-514, 1986-3 C.B. (Vol. 1) 1]). See S. Rep. No. 1038, 96th Cong., 2d Sess. 11 (1980). Section 168(i)(9)(B)(i) provides that the normalization requirements of section 168(i)(9)(A) are not met if the taxpayer, for ratemaking purposes, uses a procedure or adjustment that is inconsistent with these requirements. Section 168(i)(9)(B)(ii) specifies certain procedures and adjustments that are to be treated as inconsistent for purposes of section 168(i)(9)(B)(i). (Congress amended section 167(l) to include the rules of section 168(i)-(9)(B).)

Recognizing that it could not foresee all possible ratemaking procedures that might undermine the purpose of the normalization rules, Congress granted the Secretary broad regulatory authority in Section 168(i)(9)(B)(iii) to identify such procedures. (The Secretary has similarly broad authority under section 167(l)(5), which directs the Service to issue regulations if, for any reason, the application of any of the provisions of section 167(l) to any public utility property does not carry out the purposes of that section.)

Over the last several years, the Service has faced the question of whether the calculation of ratemaking tax expense on a consolidated group basis is inconsistent under section 168(i)(9)(B)(i) with the normalization requirements, or, if not, whether it should be treated as inconsistent by exercise of the Service's broad regulatory authority under sections 167(l)(5) and 168(i)(9)(B)(iii). When computed on a consolidated group basis, ratemaking tax expense is reduced to reflect the savings from filing a consolidated return with affiliated companies having net operating losses.

Under one variation—the "consolidated tax savings adjustment"—the ratemaker first determines the utility's total tax expense on a separate return basis and then reduces it by the utility's share of the consolidated tax savings. Under another variation, the ratemaker computes an "effective tax rate" by dividing the tax liability of the group by the sum of the taxable incomes of all members with positive taxable income. The ratemaker then applies this "effective tax rate" to the utility's taxable income to compute its current tax expense. One state court has held that consolidated tax savings adjustments are not inconsistent with the normalization rules, so long as the adjustment does not exceed the utility's current tax expense. See *Continental Telephone Co. of Pennsylvania v. Pennsylvania Public Utility Commission*, 120 Pa. Commw. 25, 548 A.2d 344 (1988), *appeal denied*,

521 Pa. 613, 557 A.2d 345 (1989).

A related issue that has also arisen is whether a utility may, consistent with the requirement to normalize, reduce rate base (rather than ratemaking tax expense) by its share of the consolidated tax savings.

In May 1989, Notice 89-63 [1989-1 C.B. 720] announced that the Service had opened a regulations project to give guidance on the application of the normalization requirements to public utilities filing consolidated federal income tax returns. Notice 89-63 stated that the regulations would address the extent to which the use of "effective tax rates" or "consolidated tax savings adjustments" will be treated as inconsistent with the normalization rules. These proposed regulations are the result of that project.

Explanation of Provisions

Overview

The proposed regulations provide that it is a violation of the normalization requirements to determine a utility's ratemaking tax expense, either current or deferred, by taking into account the income, losses, deductions, or credits of other taxpayers with which it files a consolidated return. To comply with the normalization rules, a utility must compute its ratemaking tax expense as if it filed a separate return. The proposed regulations provide, however, that it is not a violation of the normalization rules for a utility that files a consolidated return to reduce its rate base by its share of the cumulative net tax savings attributable to the filing of a consolidated return for certain tax years. The proposed regulations provide the method, based on provisions of the consolidated return regulations, for determining a utility's share of the consolidated group's cumulative net tax savings. As with the requirements under section 1.167(l)-1(h), these requirements do not apply to the determination of state tax expense for ratemaking purposes.

Detailed Explanation

Under the authority of sections 167(l) and 168(i)(9)(B)(iii), sections 1.167(l)-1(h)(7) and 1.168(i)-1 of the proposed regulations provide that a utility must compute its ratemaking tax expense as if it filed a separate return. Thus, for example, the proposed regulations provide that it is inconsistent with normalization for ratemaking tax expense to be reduced on account of the losses of another corporation with which the utility files a consolidated return. Similarly, it is inconsistent with normalization to calculate ratemaking tax expense, either current or deferred, using an effective tax rate determined by taking into account the losses of any other corporation. Any rate order that becomes a "final determination" (within the meaning of section 1.46-6(f)(8)(iii) of the regulations) on or after December 20, 1990, violates the normalization requirements if it provides for a ratemaking tax expense calculated by taking into account the income, losses, deductions, or credits of any other corporation with which the utility files a consolidated return. Such a violation will result in the denial of accelerated depreciation deductions on public utility property.

Section 1.168(i)-1 of the proposed regulations does not address the treatment under the normalization rules of reductions in a utility's tax liability resulting from expenses of the utility itself, even if these expenses are not taken into account in determining cost of service. Thus, for example, if a utility is not permitted to include in its cost of service the cost of an abandoned power plant, a particular advertising expense, or any other cost a ratemaking authority considers to be imprudent, the proposed regulations do not prohibit a reduction in ratemaking tax expense to reflect the concomitant reduction in its tax liability on account of these expenses. The Service invites comments on the proper treatment of these items under the normalization rules.

Consolidated Tax Savings May Be Treated As No-cost Capital

The effect of the proposed regulations is to require utility customers to pay, through cost of service, the same tax expense they would pay if the utility filed a separate return. In some cases, this requirement will permit the utility to collect from customers an amount of tax expense that, because the utility joins in filing a consolidated return with an affiliate generating net operating losses, exceeds the amount the group must remit to the Treasury. This reduction in the group's tax liability, though, might not be permanent. When the loss affiliate becomes profitable (and therefore would be in a position to use its earlier net operating losses had it not joined with the utility in filing a consolidated return), the group as a whole will be liable for more tax for the year than if the members had not filed a consolidated return.

Consolidated tax savings are similar to the deferred taxes arising from the allowance of accelerated depreciation on public utility property in that the temporary tax savings available to the utility is cost-free capital from the time it is collected from ratepayers until the time the affiliate becomes profitable. The Service has concluded that it is not inconsistent with the normalization requirements for a regulatory commission to share the benefits of this cost-free capital with ratepayers through a reduction in the utility's capital costs reflected in its rates.

Consistent with the analogous provisions of section 1.167(l)-1(h)(6) of the current regulations, which permit reduction of rate base by the amount of the deferred tax reserve, section 1.168(i)-1(c) of the proposed regulations permits the exclusion from a utility's rate base (or, alternatively, the treatment as no-cost capital) of an amount not in excess of the utility's share of the consolidated tax savings as determined under the proposed regulations. This exclusion of amounts from the utility's rate base is permitted notwithstanding any implication to the contrary in section 1.167(l)-1(h)(6)(i) of the current regulations.

Section 1.168(i)-1(c) of the proposed regulations does not require the exclusion of any amount from a utility's rate base, or the treatment of any amount as no-cost capital; it simply provides an upper limit. As with the deferred tax reserve resulting from accelerated depreciation, ratemakers may decide how much of the benefit of the consolidated tax savings to pass through.

The Service understands that, although practice varies, most state utility commissions have set rates in a way that does not take consolidated

tax savings into account, either in determining ratemaking tax expense or in determining rate base or cost of capital. The Service intends that issuance of these proposed regulations will not disturb this existing practice during the period prior to the issuance of final regulations. Specifically, under the proposed regulations, any rate order that becomes final on or after December 20, 1990, that takes consolidated tax savings into account in computing ratemaking tax expense will violate the normalization rules. In addition, the Service intends that commissions should not conclude that they may, consistent with the normalization rules, change their practice to reduce rate base by consolidated tax savings during the period in which the Service is considering public comments on the provisions of the proposed regulations permitting rate base reduction. Accordingly, the provisions of the proposed regulations permitting rate base reduction generally will not be effective until issuance of final regulations.

Therefore, in determining the maximum amount by which rate base is to be reduced (or the maximum amount that may be treated as no-cost capital) the proposed regulations do not allow consideration of consolidated tax savings arising in tax years ending prior to the date that is 30 days after final regulations incorporating the provisions of these proposed regulations are published, or, if sooner, January 1, 1992. Furthermore, notwithstanding the general effective date of these proposed regulations, the provisions permitting reduction of rate base by consolidated tax savings (or treatment of consolidated tax savings as no-cost capital) apply only to rate orders that become final on or after the date that is 30 days after the date that final regulations are published, or, if sooner, January 1, 1992. Thus, any rate order that becomes final prior to this date, but on or after December 20, 1990, will violate normalization if it reduces rate base by consolidated tax savings or treats consolidated tax savings as no-cost capital.

In addition, the proposed regulations do not permit consolidated tax savings to be excluded from rate base (or treated as no cost capital) for any year for which rates were determined under a method that flowed through the consolidated tax savings as a reduction to ratemaking tax expense. Thus, for example, if consolidated tax savings are considered in computing ratemaking tax expense for any tax year by reason of a rate order that became final prior to December 20, 1990, these consolidated tax savings may not be excluded from rate base.

The Service invites comments regarding the appropriateness of these effective date rules.

In general, a utility's share of the tax savings attributable to the filing of a consolidated return ("cumulative net tax savings") is the difference between its cumulative share of the consolidated group's tax liability and the cumulative tax liability the utility would have were it to file a separate return for the current year and all previous years. The proposed regulations provide the method for determining a utility's share of a group's consolidated tax savings. This amount is determined on a cumulative basis; it must be reduced when the group's tax liability increases because a former loss affiliate becomes profitable.

The method in the proposed regulations for determining a utility's share of consolidated tax savings is based on a method for allocating tax liability among members of a consolidated group for purposes of calculating earnings and profits that is provided in sections 1.1502-33(d)(2)(i) and 1.1552-1(a)(2) of the consolidated return regulations. This approach ensures appropriate treatment of deferred intercompany transactions, as well as losses, of the consolidated group, and it is most likely familiar to taxpayers affected by the proposed regulations.

To determine its cumulative net tax savings, a utility must first determine its share of the consolidated group's tax savings for each tax year beginning with the "election year." (Flexibility is provided by allowing the selection of the election year, but in no instance may the election year be earlier than the first tax year ending on or after the date that is 30 days after the date final regulations are published, or, if sooner, January 1, 1992. The utility's share (which may be negative) of the consolidated tax savings for any tax year is determined by subtracting its share of the consolidated group's tax liability for the year, determined in accordance with sections 1.1552-1(a)(2) and 1.1502-33(d)(2)(i), from its tax liability for the year calculated as if it had filed a separate return for that year and all previous years. Under these rules, no adjustment is made for payments by the utility under a tax sharing agreement. Comments are invited on any adjustments that might be necessary where there are minority interests in a nonutility affiliate.

Operation of Section 1.1502-33(d)(2)(i)

Under section 1.1502-33(d)(2)(i), the tax liability of a consolidated group is first allocated among the members of the group in proportion to their relative separate return tax liabilities, as provided in section 1.1552-1(a)(2). (For this purpose, separate return tax liability is determined as if a separate return were filed for the current year only, and thus does not take into account NOL's from other years.) However, in situations in which one member of the group generates losses in one year that are used to reduce the group's tax liability, but becomes profitable in a subsequent year, tax liability as allocated under section 1.1552-1(a)(2) must be adjusted so that the cumulative amount of tax liability allocated to the loss member does not exceed the amount that would have been its cumulative tax liability if it had not joined in the consolidated return. The loss member's excess liability is allocated to the other members of the group that benefitted from the losses. Section 1.1502-33(d)(2)(i) provides the mechanism for making these adjustments.

Under section 1.1502-33(d)(2)(i)(*a*), the amount of group tax liability allocated to any member for a tax year is equal to the member's proportionate share of the group's liability based on the member's separate return tax liability under section 1.1552-1(a)(2). It may not, however, exceed the excess of (1) the total of the tax liabilities of the member on a separate return basis for all tax years to which the election under section 1.1502-33(d)(3) applies, and for which the member joined in the filing of a consolidated return of the group (including the current tax year) computed as if it had actually filed sepa-

rate returns for all of these years, over (2) the total of the portions of the group tax liability allocated to the member for all previous tax years to which the election applies. The proposed regulations provide that any tax year ending on or after the date that is 30 days after final regulations are published, or, if sooner, January 1, 1992, may be treated as the first year to which an election applies for purposes of this rule.

Any tax liability of a group that cannot be allocated to a member that previously generated losses because of this limitation must be allocated to the other members that benefitted from these losses, thus increasing their share of the group's tax liability above the amount that would be allocated under section 1.1552-1(a)(2). Under section 1.1502-33(d)(2)(i)(*b*), any excess tax liability that would be allocated to a member of a group but for section 1.1502-33(d)(2)(i)(*a*) must be allocated among the other members in direct proportion to (and limited to) the reduction in tax liability resulting to the other members. The reduction for any member is the excess, if any, of (1) the total of its tax liabilities on a separate return basis for all tax years to which the election under section 1.1502-33(d)(3) applies and for which it joined in the filing of a consolidated return of the group (including the current tax year) computed as if it had actually filed separate returns for all these years, over (2) the total of the portions of the tax liability of the group allocated to the member for all tax years to which the election applies (including, for the current year, only the amount allocated under section 1.1552-1(a)(2)).

This allocation of excess tax liability may have the effect of increasing a utility's share of the group's tax liability above the amount that would have been its tax liability for the current year if it had not filed a consolidated return. This difference can be viewed as a recapture of the utility's share of previous consolidated tax savings. Accordingly, if the utility's share of the group's tax savings is excluded from its rate base (or, alternatively, is treated as no-cost capital), the maximum amount permitted to be excluded from rate base must be reduced to reflect this repayment of tax savings from prior years.

The proposed regulations provide an example to illustrate the exclusion of consolidated tax savings from rate base as permitted under the regulations.

Special Analyses

The Commissioner of Internal Revenue has determined that these proposed rules are not major rules as defined in Executive Order 12291, and that a Regulatory Impact Analysis therefore is not required. Furthermore, it has been certified that these rules, if issued, will not have a significant economic impact on a substantial number of small entities. Therefore, an initial Regulatory Flexibility Analysis is not required under the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Comments and Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held at 10:00 a.m. on February 8, 1991, in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor of the Internal Revenue Building, 1111 Constitution Ave., NW, Washington, D.C.

Deductions, Exemptions, Income tax, Taxable income.

Proposed Amendments to the Regulations

Accordingly, Title 26, Part 1, of the Code of Federal Regulations is proposed to be amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805 *** §1.167(l)-1(h)(7) also issued under 26 U.S.C. 167(l), and §1.168(i)-1 also issued under 26 U.S.C. 168(i)(9)-(B)(iii).

Par. 2. Section 1.167(l)-1 is amended by adding a new paragraph (h)(7) to read as follows:

§1.167(l)-1 Limitations on reasonable allowance in case of property of certain public utilities.

*****

(h) ***

(7) *Application of normalization requirements to utilities filing consolidated returns.* Notwithstanding §1.167(l)-1(a)(1) of the regulations, in order to use a normalization method of accounting, any corporation that owns public utility property and that is a member of a consolidated group must comply with the requirements of §1.168(i)-1.

Par. 3. New §1.168(i)-1 is added to read as follows:

§1.168(i)-1 Normalization rules.

(a) *In general.* Under section 168(f)(2), section 168 does not apply to any public utility property (within the meaning of section 167(l)(3)(A)) if the taxpayer does not use a normalization method of accounting. Sections 167(l)(3)(G) and 168(i)(9) describe the requirements of a normalization method of accounting. Section 167(l)(5) directs the Secretary to issue regulations if, for any reason, the application of any of the provisions of section 167(l) to any public utility property does not carry out the purposes of that section. Section 168(i)(9)(B)(iii) provides that the Secretary may by regulation prescribe the procedures and adjustments that are to be treated as inconsistent with the requirements of a normalization method of accounting. Under this authority, any corporation that owns public utility property and that is a member of a consolidated group (a "utility") will be considered to use a normalization method of accounting only if its federal income tax expense for determining cost of service for ratemaking purposes ("ratemaking tax expense") is computed as if it filed a separate federal income tax return. Any procedure or adjustment that results in the flow-through of tax savings arising from the filing of a consolidated return will be treated as inconsistent with a normalization method of accounting. See paragraph (b) of this section. The procedures and adjustments described in paragraph (c) of this section, however, which exclude the cumulative amount of these savings from the base to

which the utility's rate of return is applied ("rate base"), will not be treated as inconsistent with a normalization method of accounting. This section is effective for rate orders that become final determinations within the meaning of §1.46-6(f)(8)(iii) of the regulations on or after December 20, 1990.

(b) *Flow-through of consolidated tax savings treated as inconsistent with normalization.* Except as provided in paragraph (c) of this section, it is inconsistent with a normalization method of accounting to compute a utility's ratemaking tax expense or the amount treated as no-cost capital or the amount of the rate base by taking into account the income, losses, deductions, or credits, of any other member of the consolidated group of which it is a member. Thus, for example, it is inconsistent with a normalization method of accounting to reduce ratemaking tax expense on account of the losses or loss carryovers of another member of the utility's consolidated group. Similarly, it is inconsistent with a normalization method of accounting to determine either the current or deferred portion of ratemaking tax expense using an effective tax rate determined by taking into account the losses or credits of other members of the utility's consolidated group, or otherwise to reduce cost of service for ratemaking purposes to take into account the current tax savings resulting from the losses or credits of other members of the utility's consolidated group.

(c) *Exclusion from rate base permitted*—(1) *In general.* It is not inconsistent with the requirements of a normalization method of accounting to treat as no-cost capital (or, alternatively, to exclude from rate base) under this section an amount not in excess of the cumulative amount of the utility's allocable shares of the federal income tax savings attributable to the filing of a consolidated return for the tax year and all prior tax years, beginning with the election year selected under paragraph (c)(3) of this section ("cumulative net tax savings"). (This amount is in addition to the deferred tax reserve, which also may be applied to reduce rate base or be treated as cost-free capital.) If the cumulative net tax savings is less than zero, no adjustment is made to rate base. However, exclusion from rate base or treatment as no-cost capital is not permitted for the utility's share of the consolidated tax savings for any year for which rates were determined under a method that takes consolidated tax savings into account in computing ratemaking tax expense. Thus, if consolidated tax savings are taken into account in computing ratemaking tax expense for any tax year by reason of a rate order that became final prior to December 20, 1990, the utility's share of the consolidated tax savings for that year may not be excluded from the rate base or treated as no-cost capital. This paragraph (c) applies only to treatment of consolidated tax savings pursuant to a rate order that becomes final on or after the date that is 30 days after the date that final regulations are published, or, if sooner, January 1, 1992.

(2) *Allocable share of tax savings.* For any tax year, a utility's allocable share (which may be negative) of tax savings attributable to the filing of a consolidated return is equal to—

(i) Its federal income tax liability for the year, determined as if it actually filed a separate return for that tax year and all previous and subsequent tax years, minus

(ii) Its allocable share of the consolidated group's tax liability for the year, determined in accordance with §§1.1552-1(a)(2) and 1.1502-33(d)-(2)(i).

(3) *Selection of election year.* For purposes of applying the allocation rules of §§1.1552-1(a)(2) and 1.1502-33(d)(2)(i), any tax year ending on or after the date that is 30 days after the date that final regulations are published, or, if sooner, January 1, 1992, may be treated as the year of the election referred to in §1.1502-33(d)(2)(i).

(4) *Use of test periods.* In determining cost of service for future periods based on an historical test period, the amount of consolidated tax savings for future periods may be projected, and thus changes from the test period in the amount excluded from rate base (or treated as no-cost capital) under this section may also be projected. Any projections, however, must be reasonable. For example, a projection may not take into account an extraordinary event, such as the termination or acquisition of a business, unless it is evident that such an event will occur.

(d) *Example*—(1) This example illustrates the following series of calculations necessary to determine the maximum amount that may be treated as no-cost capital or by which rate base may be reduced. First, the group's consolidated tax liability for the year is allocated among the members in proportion to their separate return liabilities (determined as though separate returns were filed for the current year only). Second, the amount allocated to each member is limited to ensure that this amount does not cause the cumulative total amount of group tax liability allocated to the member for all years to exceed the amount that would have been the member's cumulative total tax liability if it had actually filed a separate return for all years. Any part of the group's consolidated tax liability for the year that cannot be allocated to a member because of this limit is apportioned among the other members, to produce each member's final allocation of the group's consolidated tax liability for the year. The utility's final allocation is then subtracted from the amount that would have been the utility's separate return tax liability for the current year if the utility had actually filed separate returns for all years. This difference is the utility's share of the consolidated tax savings for the year. The utility's cumulative share of the consolidated tax savings may be used to reduce rate base or be treated as cost-free capital. (This amount is in addition to the deferred tax reserve, which also may be applied to reduce rate base or be treated as cost-free capital.)

(2) In this example, regulated public utility *U* files a consolidated return with its nonregulated affiliates *X* and *Y*. The year 1991 has been selected as the year of election, and a 34 percent tax rate has been assumed. Line references are to the tables below.

Allocation under §1.1552-1(a)(2). Under §1.1552-1(a)(2), the group's consolidated tax liability for the year is allocated among the members in proportion to their separate return tax liabilities. For purposes of this allocation, a member's separate return tax liability is computed as though it filed a separate return for the current year, without regard to other years. The following information and calculations are required to make this allocation. *U*'s separate taxable income for the year, as defined in §1.1502-12 and determined using accelerated depreciation, is 60. *X* has a loss of 50, and *Y* has separate taxable income of 45. (Line A.1). The group's consolidated taxable income (as defined in §1.1502-11) and tax liability are 55 and 18.7 (34 percent of 55), respectively. (Lines A.2 and A.3). The separate taxable incomes of *U*, *X* and *Y*, for purposes of §1.1552-1(a)-(2)(ii), are 60, a loss of 50, and 45, respectively. (Line A.4). Thus, the separate return tax liabilities of *U*, *X*, and *Y* are 20.4, 0, and 15.3, respectively. (Line A.5). The group's tax liability of 18.7 is then allocated among the members in proportion to their separate return tax liabilities, resulting in an allocation under §1.1552-1(a)(2) of 10.69 to *U*, O to *X*, and 8.01 to *Y*. (Line A.6).

(A) *Allocation under §1.1552-1(a)(2).*

	U	X	Y	Group
(*1*) Separate taxable income (as defined in §1.1502-12) (using accelerated depreciation)	60	50	45	-
(*2*) Consolidated taxable income (as defined in §1.1502-11)	-	-	-	55
(*3*) Consolidated tax liability	-	-	-	18.7
(4) Separate taxable income for purposes of §1.1552-1(a)(2) calculation	60	(50)	45	-
(*5*) Separate return tax liability as calculated in §1.1552-1(a)(2)	20.4	-0-	15.3	-
(*6*) Allocation of consolidated tax liability under §1.1552-1(a)(2)	10.69	-0-	8.01	-

Allocation under §1.1502-33(d)(2)(i). Under §1.1502-33(d)(2)(i), the first step is to ensure that the amount allocated to each member under §1.1552-1(a)(2) for the current year does not cause the cumulative total amount of group tax liability allocated to the member for all years (beginning with the year treated as the year of election) to exceed the amount that would have been the member's cumulative total tax liability if it had actually filed a separate return for all years. Thus, the maximum amount that may be allocated to any member for the year is the excess of the cumulative total of the member's tax liabilities on a separate return basis (determined as though the member had actually filed separate returns for all years, beginning with the year treated as the year of election), as determined in §1.1502-33(d)(2)(i)(*a*)(*1*) (line B.2), over the total portions of group tax liability allocated to the member for all previous years, as determined in §1.1502-33(d)(2)(i)(*a*)(*2*) (line B.3). Because the current year, 1991, is treated as the year of election, the amounts shown on line B.3 are all 0. The excess for each member (line B.2 minus line B.3), which for 1991 is the same as the member's separate return liability for 1991, is shown on line B.4. It is the maximum amount that may be allocated to the member. This amount is compared with the amount allocated under §1.1552-1(a)(2) (line B.1), and the lesser of the two amounts is the amount allocated under §1.1502-33(d)(2)(i)(*a*) to the member. (Line B.5). For 1991, these two amounts are the same. Thus for 1991, the amount allocated to each member under §1.1552-1(a)(2) is not limited under the first step.

(B) *Allocation under §1.1502-33(d)(2)(i).*

	U	X	Y	Group
(*1*) Allocation under §1.1552-1(a)(2) (from line A.6)	10.69	-0-	8.01	-
(*2*) Cumulative total of tax liabilities on separate return basis as though separate returns filed for all years (as determined in §1.1502-33(d)(2)(i)(*a*)(*1*))	20.4	-0-	15.3	-
(*3*) Total portions of group tax liability allocated to member for all previous years (as determined in §1.1502-33(d)(2)(i)(*a*)(*2*))	-0-	-0-	-0-	-
(*4*) Excess of cumulative total of separate return liabilities over amounts allocated for all previous years (line B.2 minus line B.3) (as determined in §1.1502-33(d)(2)(i)(*a*)) (limit on amount that may be allocated to a member)	20.4	-0-	15.3	-
(*5*) Initial allocation (lesser of line B.1 and line B.4)	10.69	-0-	8.01	-

Apportionment of excess. The second step under §1.1502-33(d)(2)(i) is to apportion among the other members any amount of the group's consolidated tax liability that may not be allocated to a member because of the limit determined under the first step. This excess is determined by subtracting the total of the amounts allocated under §1.1502-33(d)(2)(i)(*a*) (line C.2) from the consolidated tax liability (line C.1). Because the amount allocated under §1.1552-1(a)(2)(ii) is not limited under the first step for 1991, the two amounts are the same (18.7), and the difference (line C.3) is 0. Thus, there is no excess tax liability to be apportioned under the second step.

(C) *Apportionment of excess.*

	U	X	Y	Group
(*1*) Consolidated tax liability (from line A.3)	-	-	-	18.7
(*2*) Total of amounts allocated in line B.5	-	-	-	18.7
(*3*) Amount of consolidated tax liability that cannot be allocated because of limit in line B.4 (line C.1 minus line C.2)	-	-	-	-0-

Cumulative consolidated tax savings. Each member's current year consolidated tax savings is equal to the excess of its separate return tax liability for the year, determined as if separate returns had actually been filed for all years (line D.1), over the amount of the consolidated group's tax liability finally allocated to the member for the year (line D.2). Thus, the amount finally allocated to each member (line D.2) is subtracted from the member's separate return tax liability shown on line D.1 (20.4, 0, and 15.3, of *U*, *X*, and *Y*, respectively) to produce its consolidated tax savings for the year (9.71, 0, and 7.29). (Line D.3). Each member's cumulative consolidated tax savings is equal to the consolidated tax savings for the year added to the cumulative consolidated tax savings for preceding year. (Line D.4). Because 1991 is treated as the year of election, the cumulative consolidated tax savings is the same as the consolidated tax savings for 1991. The maximum amount that may be treated as cost-free capital to *U* (or by which *U*'s rate base may be reduced) under the rules of this section is 9.71 for 1991.

(D) *Cumulative consolidated tax savings.*

	U	X	Y	Group
(*1*) Separate return tax liability for current year determined as though separate returns filed for all years (see §1.1502-33(d)(2)(i)(*a*)(*1*))	20.4	-0-	15.3	-
(*2*) Final allocation (line B.5 plus any excess group tax liability apportioned under C)	10.69	-0-	8.01	-
(*3*) Consolidated tax savings (line D.1 minus line D.2)	9.71	-0-	7.29	-
(*4*) Cumulative consolidated tax savings (line D.3 plus line D.4 from preceding year)	9.71	-0-	7.29	-

1992

Allocation under §1.1552-1(a)(2). Under §1.1552-1(a)(2), the group's consolidated tax liability for the year is allocated among the members in proportion to their separate return tax liabilities. The following information and calculations are required to make this allocation. *U*'s separate taxable income for the year, as defined in §1.1502-12, and determined using accelerated depreciation, is 75. *X* and *Y* have separate taxable incomes of 30 and 50, respectively. (Line A.1). The group's consolidated taxable income and tax liability are 155 and 52.7 (34 percent of 155), respectively. (Lines A.2 and A.3). The separate taxable incomes of *U*, *X*, *Y*, for purposes of §1.1552-1(a)(2)(ii), are 75, 30, and 50, respectively. (Line A.4). Thus the separate return tax liabilities of *U*, X, and Y, are 25.5, 10.2, and 17, respectively. (Line A.5). Note that *X*'s separate return tax liability does not take into account *X*'s net operating loss from the preceding year, because, for this purpose, separate return tax liability is determined as if a separate return were filed only for the current year, and not for preceding years also. The group's tax liability of 52.7 is then allocated among the members in proportion to their separate return tax liabilities, resulting in an allocation under §1.1552-1(a)(2) of 25.5, 10.2, and 17, to *U*, *X*, and *Y*, respectively. (Line A.6).

(A) *Allocation under §1.1552-1(a)(2).*

	U	X	Y	Group
(*1*) Separate taxable income (as defined in §1.1502-12) (using accelerated depreciation)	75	30	50	-
(*2*) Consolidated taxable income (as defined in §1.1502-11)	-	-	-	155
(*3*) Consolidated tax liability	-	-	-	52.7
(*4*) Separate taxable income for purposes of §1.1552-1(a)(2) calculation	75	30	50	-
(*5*) Separate return tax liability as calculated in §1.1552-1(a)(2)	25.5	10.2	17	-
(*6*) Allocation of consolidated tax liability under §1.1552-1(a)(2)	25.5	10.2	17	-

Allocation under §1.1502-33(d)(2)(i). Under the first step of §1.1502-33(d)(2)(i), the maximum amount that may be allocated to any member for the year is the excess of the cumulative total of the member's tax liabilities on a separate return basis (determined as though the member had actually filed separate returns for all years, beginning with the year treated as the year of election), as determined in §1.1502-33(d)(2)(i)(*a*)(*1*) (line B.2), over the total portions of group tax liability allocated to the member for all previous years, as determined in §1.1502-33(d)(2)(i)(*a*)(*2*) (line B.3). The cumulative totals of the members' tax liabilities (1991 and 1992) are 45.9, 0, and 32.3, for *U*, *X*, and *Y*, respectively. Note that the total for *X* takes into account the fact that, if *X* had filed a separate return for both years, a deduction for a net operating loss carryover from 1991 would have been allowed for 1992, so that *X* would have had no liability for either year. The portion of group tax liability that was allocated to each member for 1991 is shown on line B.3. The excess (line B.2 minus line B.3) is shown on line B.4. It is the maximum amount that may be allocated to each member. This amount is compared with the amount allocated under §1.1552-1(a)(2) (line B.1), and the lesser of the two amounts is the amount allocated under §1.1502-33(d)(2)(i)(*a*) to the member. (Line B.5). Note that the amount allocated to *X* under §1.1502-33(d)(2)(i)(*a*) is thus 0), rather than 10.2, the amount allocated under §1.1552-1(a)(2).

(B) *Allocation under §1.1502-33(d)(2)(i).*

	U	X	Y	Group
(*1*) Allocation under §1.1552-1(a)(2) (from line A.6)	25.5	10.2	17	-
(*2*) Cumulative total of tax liabilities on separate return basis as though separate returns filed for all years (as determined in §1.1502-33(d)(2)(i)(*a*)(*1*))	45.9	-0-	32.3	-
(*3*) Total portions of group tax liability allocated to member for all previous years (as determined in §1.1502-33(d)(2)(i)(*a*)(*2*))	10.69	-0-	8.01	-
(*4*) Excess of cumulative total of separate return liabilities over amounts allocated for all previous years (line B.2 minus line B.3) (as determined in §1.1502-33(d)(2)(i)(*a*)) (limit on amount that may be allocated to a member)	35.21	-0-	24.29	-
(*5*) Initial allocation (lesser of line B.1 and line B.4)	25.5	-0-	17	-

Apportionment of excess. The second step under §1.1502-33(d)(2)(i) is to apportion among the other members any amount of the group's consolidated tax liability that may not be allocated to a member because of the limit determined under the first step. This excess is determined by subtracting the total of the amounts allocated under §1.1502-33(d)(2)(i) (line C.2), which is 42.5, from the consolidated tax liability, which is 52.7 (line C.1). The difference (line C.3) is 10.2, the amount that could not be allocated to *X* because of the limit in step 1. This excess must be apportioned between *U* and *Y* in proportion to their relative reductions in tax liability for 1991 and 1992 as a result of filing a consolidated return, as determined in §1.1502-33(d)(2)(i)(*b*). These reductions are equal to the excess of the cumulative total of separate return liabilities, determined as if separate returns had been filed for both 1991 and 1992, (line C.4), over the total of the portions of tax liability of the group allocated for both years (line C.5). These reductions, which are shown on line C.6, are 9.71 and 7.29 for *U* and *Y*, respectively. The total of these reductions is 17. (Line C.7). *U*'s and *Y*'s percent, respectively. (Line C.8). Thus, the amounts of excess tax liability apportioned to *U* and *Y* are 5.83 and 4.37, respectively. (Line C.9).

(C) *Apportionment of excess.*

	U	X	Y	Group
(*1*) Consolidated tax liability (from line A.3)	-	-	-	52.7
(*2*) Total of amounts allocated in line B.5	-	-	-	42.5
(*3*) Amount of consolidated tax liability that cannot be allocated because of limit in line B.4 (line C.1 minus line C.2)	-	-	-	10.2
(*4*) Cumulative total of separate return liabilities, computed as though separate returns filed for all years (as determined in §1.1502-33(d)(2)(i)(*b*)(*1*)) (same as line B.2)	45.9	-	32.3	-
(*5*) Total of the portions of tax liability of group allocated to member for all years (as determined in §1.1502-33(d)(2)(i)(*b*)(*2*))	36.19	-	25.01	-
(*6*) Reduction in tax liability to other members (as determined in §1.1502-33(d)(2)(i)(*b*)) (line C.5 minus line C.4)	9.71	-	7.29	-
(*7*) Total reduction in tax liability (sum of numbers on line C.6)	-	-	-	17
(*8*) Each member's share of total reduction (line C.6 divided by line C.7)	0.57	-	0.43	-
(*9*) Apportionment of excess tax liability (line C.3 multiplied by line C.8)	5.83	-	4.37	-

Cumulative consolidated tax savings. Each member's current year consolidated tax savings is equal to the excess of its separate return tax liability for the year, determined as if separate returns had actually been filed for all years (line D.1), over the amount of the consolidated group's tax liability finally allocated to the member for the year (line D.2). Thus, the amount finally allocated to each member (line D.2) is subtracted from the member's separate return tax liability shown on line D.1 (25.5, 0, and 17, for *U*, *X*, and *Y*, respectively) to produce its consolidated tax savings for the year. Thus, *U*'s and *Y*'s consolidated tax savings for the year are negative 5.83 and negative 4.37, respectively, representing a partial recapture of the benefit that *U* and *Y* received from filing a consolidated return in 1991. (Line D.3). Each member's cumulative consolidated tax savings is equal to the consolidated tax savings for the year added to the cumulative consolidated tax savings for the preceding year. Thus, *U*'s cumulative consolidated tax savings is 9.71 minus 5.83, or 3.88, while *Y*'s is 7.29 minus 4.37, or 2.92. (Line D.4). The maximum amount that may be treated as cost-free capital to *U* (or by which *U*'s rate base may be reduced) under the rules of this section is 3.88 for 1991.

(D) *Cumulative Consolidated Tax Savings.*

	U	X	Y	Group
(*1*) Separate return tax liability for current year determined as though separate returns filed for all years (see §1.1502-33(d)(2)(i)(*a*)(*1*))	25.5	-0-	17	-
(*2*) Final allocation (line B.5 plus line C.9)	31.33	-0-	21.37	-
(*3*) Consolidated tax savings (line D.2 minus line D.1)	(5.83)	-0-	(4.37)	-
(*4*) Cumulative consolidated tax savings (line D.3 plus line D.4 from preceding year)	3.88	-0-	2.92	-

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on November 20, 1990, 2:45 p.m., and published in the issue of the Federal Register for November 27, 1990, 55 F.R. 49294)

Notice of Proposed Rulemaking

Limitations on Passive Activity Losses and Credits—Developer Rule Amendments

PS-71-89

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In *** [T.D. 8318, page 103, this Bulletin], the Internal Revenue Service is issuing temporary regulations that amend previously issued temporary regulations concerning the limitations on passive activity losses and passive activity credits. The text of those temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES: Comments and requests for a public hearing must be delivered by February 19, 1991. These regulations are proposed to apply for taxable years beginning after December 31, 1987.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Room 4429, Washington, D.C. 20044 (Attn: CC: CORP:T:R (PS-071-89)).

FOR FURTHER INFORMATION CONTACT: Dexter A. Johnson at (202) 566-4751 (not a toll-free num-

SUPPLEMENTARY INFORMATION

Background

The temporary regulations in *** [T.D. 8318, page 103, this Bulletin] amend §1.469-2T(f)(5) in Title 26 of the Code of Federal Regulations. Section 1.469-2T(f)(5) excludes certain net income and gain from passive activity gross income. This document proposes to adopt the temporary regulations as final regulations. Accordingly, the text of the temporary regulations serves as the comment document for this notice of proposed rulemaking. In addition, the preamble to the temporary regulations explains the proposed and temporary rules.

For the text of the temporary regulations, see T.D. 8318, published in *** [page 103, this Bulletin].

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291.

Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are submitted (preferably a signed original and seven copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearing will be published in the Federal Register.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on November 16, 1990, 8:45 a.m., and published in the issue of the Federal Register for November 19, 1990, 55 F.R. 48135)

Notice of Proposed Rulemaking

Excise Tax on Chemicals That Deplete the Ozone Layer and on Products Containing Such Chemicals

PS-73-89

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In *** [T.D. 8311, page 223, this Bulletin], the Internal Revenue Service is issuing temporary regulations relating to the tax on chemicals that deplete the ozone layer and on products containing such chemicals. The text of those temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES: Written comments and requests for a public hearing must be received before November 6, 1990.

ADDRESSES: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Room 4429, Attention: CC:CORP:T:R (PS-73-89), Washington, D.C. 20044. In the alternative, comments and requests may be hand delivered to: CC:CORP:T:R (PS-73-89), Internal Revenue Service, Room 4429, 1111 Constitution Ave., N.W., Washington, D.C. 20224

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The requirements for collection of information contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments concerning the accuracy of the burden estimates and suggestions for reducing this burden should be directed to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, D.C. 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, D.C. 20224.

The requirements for collection of information in this proposed regulation are in §§52.4682-1T(b)(2)(iii), 52.4682-2T(b), 52.4682-2T(d), 52.4682-3T(c)(2), 52.4682-3T(g), and 52.4682-4T(f). This information is required by the Internal Revenue Service to verify compliance with sections 4681 and 4682 of the Internal Revenue Code. This information will be used as evidence that qualifying sales have taken place, to determine whether modifications to the list of imported taxable products are necessary, and to determine the amount of floor stocks tax for which a person is liable. The likely respondents and/or recordkeepers are businesses and other organizations.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents and recordkeepers may require more or less time, depending on their particular circumstances.

Estimated total annual recordkeeping burden: 75,022 hours.

Estimated average annual burden per recordkeeper: 0.5 hour.

Estimated number of recordkeepers: 150,216.

Estimated total annual reporting burden: 120 hours.

Estimated average burden per respondent: 0.4 hour.

Estimated number of respondents: 300.

Estimated frequency of responses: On occasion.

Background

Temporary regulations in *** [T.D. 8311, page 223, this Bulletin] amend the Environmental Tax Regulations (26 CFR Part 52) by adding rules under sections 4681 and 4682 of the Internal Revenue Code. The temporary regulations contain rules concerning the tax on chemicals that deplete the ozone layer and on products containing such chemicals.

This document proposes to adopt the temporary regulations as final regulations. Accordingly, the text of the temporary regulations serves as the comment document for this notice of proposed rulemaking. For the text of the temporary regulations, see T.D. 8311 published in *** [page 223, this Bulletin]. The preamble to the temporary regulations explains the proposed and temporary rules.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of

the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are submitted (preferably a signed original and seven copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be scheduled and held upon written request to the Internal Revenue Service by any person who also submits written comments. If a public hearing is scheduled, notice of the time and place will be published in the Federal Register.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on August 31, 1990, 3:16 p.m., and published in the issue of the Federal Register for September 6, 1990, 55 F.R. 36659)

Notice of Proposed Rulemaking

Tax on Transportation by Water

PS-3-90

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In *** [T.D. 8314, page 220, this Bulletin], the Internal Revenue Service is issuing final and temporary regulations that implement the tax on the transportation of passengers on covered voyages by certain vessels under sections 4471 and 4472 of the Internal Revenue Code as enacted by section 7504 of the Revenue Reconciliation Act of 1989 (Pub. L. 101-239, 103 Stat. 2106, 2362) [1990-1 C.B. 210, 246]. The text of the final and temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES: Written comments and requests for a public hearing must be received by December 11, 1990.

ADDRESSES: Send written comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Room 4429, Attn: CC:CORP:T:R (PS-003-90), Washington, D.C. 20044. In the alternative, comments and requests may be hand delivered to: CC:CORP:T:R (PS-003-90), Internal Revenue Service, Room 4429, 1111 Constitution Ave., N.W., Washington, D.C. 20224.

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed regulations on the Excise Tax on Transportation by Water (26 CFR Part 43) under sections 4471 and 4472 of the Internal Revenue Code. Final and temporary regulations containing the text of the proposed regulations are published in *** see T.D. 8314 page 220, this Bulletin]. The temporary regulations contain rules concerning the excise tax on the initial embarkation or disembarkation of passengers on certain commercial passenger vessels and on certain other commercial vessels transporting passengers engaged in gambling. The preamble to the final and temporary regulations explains the regulations.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking for the regulations was submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before the adoption of these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearings will be published in the Federal Register.

Charles H. Brennan,
Acting Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on October 5, 1990, 4:34 p.m., and published in the issue of the Federal Register for October 12, 1990, 55 F.R. 41546)

Notice of Proposed Rulemaking

Nuclear Decommissioning Fund Qualification Requirements

PS-7-90

AGENCY: Internal Revenue Service, Treasury

ACTION: Notice of Proposed Rulemaking

SUMMARY: This document contains proposed regulations relating to the qualification requirements of nuclear decommissioning reserve funds that combine their assets for investment purposes. Final regulations published March 3, 1988, (T.D. 8184) [1988-1 C.B. 49] contain the requirement that nuclear decommissioning reserve funds invest directly in permissible assets as well as a provision that permits one or more of such funds to combine assets for investment purposes. The proposed regulations describe two types of pooling arrangements that satisfy the direct investment requirement.

DATES: Written comments and requests for a public hearing must be received by August 13, 1990. These regulations are proposed to be effective as of July 18, 1984.

ADDRESS: Send comments and requests for a public hearing to Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attention: CC:CORP:T:R (PS-7-90), Room 4429, Washington, D.C. 20044.

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) to provide rules under section 468A of the Internal Revenue Code of 1986. Section 468A, relating to nuclear decommissioning costs, was added to the Code by section 91(c) of the Tax Reform Act of 1984 (Public Law 98-369, 98 Stat. 609) [1984-3 C.B. (Vol. 1) 1, 112].

Section 468A provides special rules pursuant to which a taxpayer is allowed a deduction for the tax year in which the taxpayer makes a contribution to a Nuclear Decommissioning Reserve Fund ("Fund"), notwithstanding the fact that economic performance with respect to the nuclear decommissioning costs will occur in a later tax year. Section 468A outlines rules governing the treatment of a Fund and contributions to a Fund. Section 468A(e)(4) provides that a Fund may be used exclusively for (A) satisfying, in whole or in part, any liability of any person that contributes to the Fund for the decommissioning of a nuclear power plant; (B) payment of administrative costs of the Fund; and (C) to the extent not currently used for the purposes set forth in paragraphs (A) and (B), making investments described in section 501(c)(21)(B)(ii).

Section 1.468A-5(a)(3)(i)(C) of the regulations describes the investments listed in section 501(c)(21)(B)(ii) of the Code as direct investments in public debt securities of the United States, obligations of a State or local government that are not in default as to principal or interest, or time or demand deposits in a bank or insured credit union. The preamble to T.D. 8184 makes it clear that the direct investment requirement was intended to prevent Funds from investing in mutual funds or annuity contracts. Section 1.468A-5(a)(1)(i) requires that each Fund must be established as a trust under State law. Section 1.468A-5(a)(1)(iii) provides that the assets of one or more qualified Funds may be pooled for investment purposes. Section 1.468A-5(a)(1)(iv) provides similar rules for the pooling of the assets for investment purposes of one or more qualified or non-qualified Funds.

The regulations under section 468A are silent as to whether the pooling of assets creates a separate taxable entity and thus violates the direct investment requirement. These proposed regulations are issued to provide guidance concerning the type of pooling arrangements that will satisfy the investment restrictions.

Explanation of Provisions

The proposed regulations apply to any pooling of the assets of one or more qualified nuclear decommissioning funds, as well as the pooling of one or more qualified nuclear decommissioning funds with one or more non-qualified nuclear decommissioning funds.

The proposed regulations provide that the pooling of assets for investment purposes in a regulated investment company as defined in section 851 or common trust fund described in section 584 will satisfy the investment requirement if certain requirements are satisfied. These requirements include the general investment and self-dealing restrictions applicable to all qualified nuclear decommissioning reserve funds.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably an original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held upon written request by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Special Analysis

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedures Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small businesses.

List of Subjects 26 CFR 1.441-1 through 1.483-2

Income taxes, Accounting, Deferred compensation plans.

Amendments to the regulations

For reasons set out in the preamble, Title 26, Part 1 of the Code of Federal Regulations is proposed to be amended in part:

Paragraph 1. The authority for Part 1 continues to read as follows:

Authority: 26 U.S.C. 7805 ***.

Par. 2. Section 1.468A-5 is amended as follows:

1. Paragraph (a)(1)(iii) is revised.
2. Paragraph (a)(1)(iv) is revised.
3. Paragraph (a)(3)(i)(C) is revised.
4. The revised provisions read as follows:

§1.468A-5 Nuclear decommissioning fund qualification requirements; prohibitions against self-dealing; disqualification of nuclear decommissioning fund; termination of fund upon substantial completion of decommissioning.

(a) Qualification requirements

(1) In general ***

(iii) The assets of two or more nuclear decommissioning funds (whether or not established pursuant to a single trust agreement) can be pooled in the manner described in paragraph (a)(3)(i)(C)(*2*) of this section for the purpose of investing the assets in the property described in paragraph (a)(3)(i)(C)(*1*) of this section if and only if—

(A) The trustee of each nuclear decommissioning fund separately accounts for the contributions, earnings, expenses and distributions of such fund;

(B) The earnings and expenses are reasonably apportioned among such nuclear decommissioning funds; and

(C) The books and records of such funds enable the Internal Revenue Service to verify that the requirements of section 468A and §§1.468A-1 through 1.468A-8 are satisfied with respect to each nuclear decommissioning fund.

(iv) The assets of nonqualified decommissioning funds can be pooled with the assets of one or more nuclear decommissioning funds in the manner described in paragraph (a)(3)(i)(C)(*2*) of this section for the purpose of investing the assets in the property described in paragraph (a)(3)(i)(C)(*1*) of this section if and only if the requirements of paragraph (a)(1)(iii)(A) and (C) of this section are satisfied and earnings and expenses are reasonably apportioned among the pooled funds.

***

(3) *Limitation on use of fund*—(i) ***

(C) To the extent that the assets of the nuclear decommissioning fund are not currently required for the purposes described in paragraph (a)(3)(i)(A) or (B) of this section, to:

(*1*) invest directly in—

(*i*) Public debt securities of the United States;

(*ii*) Obligations of a State of local government that are not in default as to principal or interest; or

(*iii*) Time or demand deposits in a bank (as defined in section 581) or an insured credit union (within the meaning of section 101(6) of the Federal Credit Union Act, 12 U.S.C. 1752(7)(1982)), located in the United States; or

(*2*) invest in a regulated investment company as defined in section 851 or in a common trust fund as described in section 584 that meets the following requirements—

(*i*) The regulated investment company or common trust fund invests only in property described in paragraph (a)(3)(i)(C)(*1*) of this section;

(*ii*) The investors in the regulated investment company or common trust fund are limited to qualified or nonqualified decommissioning funds;

(*iii*) The requirements of paragraph (a)(1)(iii) or (iv) of this section are satisfied; and

(*iv*) The regulated investment company or common trust fund do not engage in any acts of self-dealing as defined in paragraph (b)(2) of this section.

Fred T. Goldberg, Jr.,
Commissioner of
Internal Revenue.

(Filed by the Office of the Federal Register on June 27, 1990, 8:45 a.m., and published in the issue of the Federal Register for June 28, 1990, 55 F.R. 26460)

Notice of Proposed Rulemaking

Tax on Transportation by Water

PS-69-90

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains a notice of proposed rulemaking relating to definitions under section 4472 of the Internal Revenue Code for purposes of the tax on the transportation of passengers on covered voyages by certain vessels under sections 4471 and 4472 as enacted by section 7504 of the Revenue Reconciliation Act of 1989 (Pub. L. 101-239, 103 Stat. 2106, 2362) [1990-1 C.B. 210, 246].

DATES: Written comments and requests for a public hearing must be received by December 11, 1990.

ADDRESSES: Send written comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Room 4429, Attn: CC:CORP:T:R (PS-069-90), Washington, D.C. 20044. In the alternative, comments and requests may be hand delivered to: CC:CORP:T:R (PS-069-90), Internal Revenue Service, Room 4429, 1111 Constitution Ave., N.W., Washington, D.C. 20224.

SUPPLEMENTARY INFORMATION:

Background

This document contains a proposed regulation on the Excise Tax on Transportation by Water (26 CFR Part 43) under section 4472 of the Internal Revenue Code.

Explanation of Provisions

The proposed regulation would provide taxpayers with definitions of terms under section 4472 for purposes of the tax imposed by section 4471 of the Code. Section 4471 of the Code imposes a tax of $3 per passenger on a covered voyage, as that term is defined in section 4472, to be paid by the person providing the covered voyage. The tax is to be imposed only once for each passenger on a covered voyage, either at the time of first embarkation or disembarkation in the United States. Under section 4472(1) of the Code, the term "covered voyage" means a voyage of (a) a commercial passenger vessel that extends over one or more nights, or (b) a commercial vessel transporting passengers engaged in gambling aboard the vessel beyond the territorial waters of the United States. Proposed §43.4472-1(b) defines the term "voyage" as an outward and a homeward passage of the vessel, but states that a voyage may be a covered voyage with respect to a passenger even if the passenger does not make both an outward and a homeward passage. Under proposed §43.4472-1(c) a voyage extends over 1 or more nights if it extends for 18 or more hours including midnight. Under proposed §43.4472-1(d) of the regulations a passenger on a commercial vessel will be considered to be engaged in gambling aboard the vessel if that person is participating as a player in a game of chance, for money or other thing of value, that is conducted, sponsored, or operated by the owner or operator of the vessel. There is an exception for persons who participate with other passengers in casual, "friendly" games of chance to which the owner or operator of the vessel is not connected. Under proposed §43.4472-1(e), a vessel is considered to be beyond the territorial waters of the United States if it is beyond the international boundary line between the United States and any contiguous foreign country or it is over 3 nautical miles (3.45 statute miles) from the low tide on the coastline. The regulations provide for a 3 nautical mile territorial limit to coincide with existing federal and state jurisdiction over gambling activities.

Special Analyses

It has been determined that this proposed rule is not a major rule as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to this regulation, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal

Revenue Code, the notice of proposed rulemaking for the regulations was submitted to the Administrator of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before the adoption of these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearings will be published in the Federal Register.

List of Subjects in 26 CFR Part 43

Excise taxes, Gambling, Transportation by water, Vessels.

Proposed Regulations

Accordingly, Title 26, Part 43, of the Code of Federal Regulations is amended as follows:

PART 43—[Amended]

Paragraph 1. The authority for Part 43 continues to read in part:

Authority: 26 U.S.C. 7805. *** .

Par. 2. A new §43.4472-1 is added to read as follows:

§43.4472-1 Definitions.

(a) *In general.* For definitions of the terms "covered voyage" and "passenger vessel," see sections 4472(1) and (2).

(b) *Voyage.* For purposes of this section the term "voyage" means a journey of a vessel that includes the outward and homeward trips or passages. The voyage commences when the vessel begins to load passengers and continues during the entire ensuring period until the vessel has made one outward and one homeward passage (including intermediate passages, if made). A voyage may be a covered voyage with respect to a passenger even if the passenger does not make both an outward and homeward passage or if the point of first embarkation or disembarkation by the passenger in the United States is at an intermediate stop of the vessel.

(c) *Over 1 or more nights.* A voyage is considered to extend over 1 or more nights if it extends for 18 or more hours including midnight.

(d) *Engaged in gambling.* A passenger is engaged in gambling aboard a vessel if that person is participating as a player in any policy game or other lottery, or any other game of chance, for money or other thing of value, provided that the policy game, other lottery, or game of chance is conducted, sponsored, or operated by the owner or operator of the vessel, as either principal or agent, or by an employee, agent, or franchisee of the owner or operator of the vessel. A passenger is not engaged in gambling aboard a vessel if the passenger participates with other passengers in a casual, "friendly" game of chance that is not conducted, sponsored, or operated by the owner or operator of the vessel or by an employee, agent, or franchisee of the owner or operator.

(e) *Territorial waters.* For purposes of sections 4471 and 4472, the territorial waters of the United States are those waters within the international boundary line between the United States and any contiguous foreign country or within 3 nautical miles (3.45 statute miles) from low tide on the coastline. No inference is intended as to the extent of the territorial limits for other tax purposes.

Charles H. Brennan,
Acting Commissioner of Internal Revenue.

(Filed by the Office of the Federal Register on October 5, 1990, 4:35 p.m., and published in the issue of the Federal Register for October 12, 1990, 55 F.R. 41545)

Notice of Proposed Rulemaking

Fuel Floor Stocks Tax of 1990

PS-98-90

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This document contains a notice of proposed rulemaking relating to the floor stocks taxes on gasoline, diesel fuel, and aviation fuel that are held on December 1, 1990. These rules reflect changes to the law made by the Revenue Reconciliation Act of 1990. The proposed regulations provide guidance relating to the person liable for the tax, exemptions from the tax, and reporting and recordkeeping responsibilities for the tax.

DATES: Written comments and requests for a public hearing must be received by January 2, 1991.

ADDRESSES: Send written comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Room 4429, Attn: CC:CORP:T:R (PS-98-90), Washington, DC 20044. In the alternative, comments and requests may be hand delivered to: CC:CORP:T:R (PS-98-90), Internal Revenue Service, Room 4429, 1111 Constitution Ave., N.W., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The requirements for the collection of information contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information requirements should be sent to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224.

The requirements for collection of information in this proposed regulation are in section 42.5(b). This information is required by the Internal Revenue Service to verify compliance with sections 11211 and 11213 of the Revenue Reconciliation Act of 1990. This information will be used to determine the amount of floor stocks tax for which a person is liable. The likely respondents/recordkeepers are businesses and other organizations.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on informa-

tion that is available to the Internal Revenue Service. Individual respondents and recordkeepers may require more or less time, depending on their particular circumstances.

Estimated total annual recordkeeping burden: 75,000 hours.

Estimated average annual burden per recordkeeper: 0.5 hour.

Estimated number of recordkeepers: 150,000.

Explanation of provisions

Background and purpose of the floor stocks tax

The Revenue Reconciliation Act of 1990, Public Law 101-508 (the "Act"), increases the rates of excise taxes on gasoline, diesel fuel, and aviation fuel, effective December 1, 1990. The gasoline tax, under section 4081 of the Internal Revenue Code (the "Code"), increases from 9 cents per gallon to 14.1 cents per gallon; the diesel fuel tax, under section 4091, increases from 15 cents per gallon to 20.1 cents per gallon; and the aviation fuel tax, under section 4091, increases from 14 cents per gallon to 17.6 cents per gallon. These new rates include the 0.1-cent-per-gallon tax that funds the Leaking Underground Storage Tank Trust Fund ("LUST Fund").

The Act also imposes a floor stocks tax, which does not appear in the Code, on these fuels. The floor stocks tax is a one-time tax on fuels that are held at the first moment of December 1, 1990, at a point in the distribution chain where these fuels would not otherwise be subject to the increased tax rates. The rate of floor stocks tax generally is equal to the difference between the old and new tax rates, without regard to the LUST Fund financing rate. Thus, for example, the tax on sales or removals of gasoline after November 30, 1990, is increased by 5.1 cents per gallon but the floor stocks tax on gasoline is only 5 cents per gallon.

General operation of the tax

A floor stocks tax of 5 cents per gallon generally is imposed on previously-taxed gasoline and diesel fuel that is held at the first moment of December 1, 1990. Also, a floor stocks tax of 3.5 cents per gallon generally is imposed on previously-taxed aviation fuel that is held at the first moment of December 1, 1990. A 2.5-cents-per-gallon tax is imposed on diesel fuel that is held at that time for use in trains and was not previously taxed at the Highway Trust Fund financing rate under section 4091. Special rates apply to gasoline or diesel fuel used to produce gasohol or a diesel/fuel alcohol mixture. Exemptions from the tax are allowed for fuel held exclusively for an exempt use, for gasoline and diesel fuel held in the tank of a motor vehicle or motorboat, and gasoline or diesel fuel held by a person if the aggregate amount of such fuel held by that person (or the controlled group of which that person is a member) is not in excess of a specified amount. The person liable for the tax is the person that has title to the fuel at the first moment of December 1, 1990. This person must pay the tax to the Internal Revenue Service on or before May 31, 1991.

Definitions

Section 42.2 of the regulations provides definitions relating to the floor stocks taxes. The definitions of "aviation fuel" and "diesel fuel" are in substance the same as the existing definitions under Notice 89-17, 1989-1 C.B. 647. Similarly, the definition of "gasoline" is in substance the same as the existing definition under section 48.4081-1(e)(4) of the proposed gasoline tax regulations (52 FR 44141, 44144 (November 18, 1987)) but also includes gasoline blend stocks and additives specified in Rev. Rul. 88-70, 1988-2 C.B. 338. The definition of "train" is similar to the existing definition in section IV(D)(1) of Notice 88-30, 1988-1 C.B. 497, 506, but is clarified to include both freight and passenger trains.

Imposition of floor stocks tax

Section 42.3 identifies the fuels subject to the floor stocks tax, lists the applicable rates of tax, and identifies the person liable for the tax.

Section 42.3(d) and section 11218 of the Act provide that fuel held in a foreign trade zone at the first moment of December 1, 1990, is subject to the floor stocks tax. However, this fuel is not taxed if it is otherwise exempt from tax under the rules of §42.4.

Exemptions from the floor stocks tax

Section 42.4 provides rules relating to exemptions from the floor stocks tax.

First, under §42.4(b), the floor stocks tax generally does not apply to fuel held at the first moment of December 1, 1990, exclusively for an exempt use. An "exempt use" is any use of a fuel (other than use in producing gasohol or a diesel fuel/alcohol mixture, or use as fuel in a train) discussed in sections 6420, 6421, or 6427 of the Code which entitles the user to a credit or refund of the tax imposed under sections 4081 or 4091, as the case may be. The regulations provide that fuel is held exclusively for an exempt use only if (i) the person holding the fuel at the first moment of December 1, 1990, actually uses the fuel in an exempt use, or (ii) in the case of gasoline, the person holding the fuel at that time is a gasoline wholesale distributor described in section 6416(a)(4) to the extent it actually sells the fuel at a tax-excluded price for a use described in section 6416(b)(2). Accordingly, except in the case of gasoline actually sold at a tax-excluded price by such a gasoline wholesale distributor, fuel is not held exclusively for an exempt use if it is held for resale (including resale to a person who will use the fuel for an exempt use). However, the user of fuel in an exempt use may be entitled to a credit or refund of floor stocks tax pursuant to sections 34, 6416, 6420, 6421 and 6427.

Diesel fuel held for use in a train is not treated as held for an exempt use and, therefore, a floor stocks tax of 2.5 cents per gallon applies to such fuel, even if the operator or owner of the train is a State or local government. Although State and local governments generally may obtain a credit or refund of tax paid on diesel fuel used by them for their exclusive use, section 6427(l)(4), as added by the Act, provides that the 2.5-cents-per-gallon tax on diesel fuel used in trains is not refundable.

Second, under §42.4(c), the floor stocks tax does not apply to gasoline or diesel fuel held at the first moment of December 1, 1990, in the fuel supply tank of a motor vehicle or motorboat. No exemption is provided for fuel held in "dead storage" (i.e., the amount of fuel that will not be pumped out of a storage tank because

the fuel is below the mouth of the draw pipe).

Third, under §42.4(d), a person is not liable for the floor stocks tax on gasoline if the amount of gasoline held by the person at the first moment of December 1, 1990, does not exceed 4,000 gallons. In determining whether this threshold is crossed, the amount of gasoline a person holds exclusively for an exempt use and the amount of gasoline held by a person in the fuel supply tank of a motor vehicle or motorboat is not taken into account. If a person holds more than 4,000 gallons of gasoline, then the floor stocks tax is imposed on all gasoline that is held by the person and that is not otherwise exempt.

Members of a controlled group of companies and other organizations must aggregate the gasoline held by all members of the group in determining whether they hold not more than 4,000 gallons of gasoline. If holdings of all members in aggregate exceed 4,000 gallons, then the *de minimis* exemption does not apply to any member of the group. The aggregation rule for controlled groups does not affect the requirement that each separate person liable for floor stocks tax file a return. See §§42.3(c) and 42.5(d).

The rules in §42.4(d) also apply to diesel fuel except that the threshold amount is 2,000 gallons.

Inventory, payment, and return

Section 42.5 requires that every person liable for tax and certain other specified persons must prepare and retain an inventory of fuel held at the first moment of December 1, 1990 (other than fuel that was not previously subject to tax or that is in the fuel supply tank of a motor vehicle or motorboat). Fuel held for use in a train must also be inventoried.

The tax must be paid by May 31, 1991, using Form 8109, Federal Tax Deposit Coupon. A return on Form 720, Quarterly Federal Tax Return, (Revised January 1991), must also be filed by that date. Persons who are also required to report other excise taxes for the first quarter of 1991 must report the floor stocks tax and the other excise taxes on one Form 720. The due date for the return is May 31, 1991, even if returns for the other excise taxes are ordinarily due at an earlier date. This rule does not extend the time for making deposits or payments of the other excise taxes.

Reliance on These Proposed Regulations

These regulations are being issued in proposed form to provide timely guidance to taxpayers and to allow interested parties appropriate opportunity to provide comments prior to issuance of final regulations. Although final regulations may include changes made, for example, in response to comments, it is intended that taxpayers may rely on the proposed regulations until final regulations are issued.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Administrator of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before the adoption of these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. If a public hearing is scheduled, notice of the time and place for the hearings will be published in the Federal Register.

List of Subjects in 26 CFR Part 42

Excise taxes, Revenue Reconciliation Act of 1990.

Proposed Amendments to the Regulations

Accordingly, 26 CFR, Ch. I, is proposed to be amended as follows:

Paragraph 1. A new Part 42 of the Code of Federal Regulations is added as follows:

PART 42— FUEL FLOOR STOCKS TAX FOR 1990

§42.1 Scope of part.

§42.2 Definitions relating to the floor stocks tax.

§42.3 Imposition of floor stocks tax.

§42.4 Exemptions from floor stocks tax.

§42.5 Requirements with respect to inventory, payment and return.

§42.6 Applicability of other laws.

Authority: 26 U.S.C. 7805.

§42.1 Scope of part.

The regulations in this part 42 relate to the fuel floor stocks taxes imposed by sections 11211(j) and 11213(b)(5) of the Revenue Reconciliation Act of 1990, Public Law 101-508. The taxes are imposed on previously-taxed gasoline, diesel fuel, and aviation fuel held at the first moment of December 1, 1990, and on diesel fuel held for use in trains on that date. These regulations describe the specific articles subject to tax, the rates of tax, and the persons liable for tax. These regulations also describe exemptions from the tax and requirements for inventory of fuel, payment of tax, and filing a return reporting the tax. These regulations are effective on December 1, 1990.

§42.2 Definitions relating to the floor stocks tax.

(a) *Overview.* This section provides definitions for purposes of the regulations in this part.

(b) *Act.* The term "Act" means the Revenue Reconciliation Act of 1990, Public Law 101-508.

(c) *Aviation fuel.* The term "aviation fuel" means any liquid (other than gasoline) that is commonly or commercially known or sold as a fuel that is suitable for use in an aircraft.

(d) *Controlled group*—(1) *In general.* The term "controlled group" means—

(i) Any controlled group of corporations (within the meaning of paragraph (d)(2) of this section); and

(ii) Any other group of organizations under common control (within the meaning of paragraph (d)(3) of this section).

(2) *Controlled group of corporations*—(i) *In general.* The term "controlled group of corporations" has the meaning given that term by section 1563(a), except that the phrase "more than 50 percent" shall be substituted for the phrase "at least 80 percent" each place it appears therein.

(ii) *Excluded members.* For purposes of this part, a controlled group of corporations includes members that are described in section 1563(b) (relating to excluded members).

(iii) *Examples of controlled groups.* Under section 1563(a), controlled groups of corporations include, but are not limited to—

(A) Parent-subsidiary controlled groups as defined in §1.1563-1(a)(2);

(B) Brother-sister controlled groups as defined in §1.1563-1(a)(3); and

(C) Combined groups as defined in §1.1563-1(a)(4).

(3) *Group of organizations under common control.* The term "group of organizations under common control" means any group of organizations (as defined in §1.52-1(b)) that would be treated as a group of trades or businesses under common control for purposes of §1.52-1 if—

(i) The rules of §1.52-1 were applied without regard to whether an organization conducts a trade or business; and

(ii) The phrase "more than 50 percent" were substituted for "at least 80 percent" each place it appears in §1.52-1(d)(2).

(e) *Diesel fuel.* The term "diesel fuel" means any liquid (including a diesel fuel/alcohol mixture but not including gasoline) that is commonly or commercially known or sold as a fuel that is suitable for use in a diesel-powered highway vehicle or diesel-powered train.

(f) *Diesel fuel/alcohol mixture.* The term "diesel fuel/alcohol mixture" means any mixture described in section 4091(c)(1)(A).

(g) *Floor stocks tax.* The term "floor stocks tax" means the tax imposed by sections 11211(j) and 11213(b)(5) of the Act on fuel held at the first moment of December 1, 1990.

(h) *Fuel.* The term "fuel" means gasoline, diesel fuel, and aviation fuel.

(i) *Gasohol.* The term "gasohol" means any mixture treated as gasohol for purposes of section 4081(c).

(j) *Gasoline.* The term "gasoline" means—

(1) All products (including gasohol) that are commonly or commercially known or sold as gasoline and are suitable for use as a motor fuel (other than products that are not sold as gasoline and have an American Society for Testing Materials octane number of less than 75 as determined by the "motor method"); and

(2) All products that are listed in Revenue Ruling 88-70, 1988-2 Cumulative Bulletin 338, as "gasoline blend stocks" or "products commonly used as additives in gasoline."

(k) *Train.* The term "train" means any equipment or machinery that rides on rails regardless of whether the equipment or machinery transports passengers, freight, or a combination of both passengers and freight. Thus, the term includes a locomotive, work train, switching engine, or track maintenance machine. The term "train" does not include any equipment or machinery that does not ride on rails.

§42.3 Imposition of floor stocks tax.

(a) *Overview.* This section identifies the fuels subject to the floor stocks tax, the applicable rates of tax, and the persons liable for the tax.

(b) *Fuels subject to tax and rates of tax*—(1) *Gasoline*— (i) *Imposition of tax.* Section 11211(j)(1)(A) of the Act imposes a floor stocks tax on gasoline (including gasohol)—

(A) On which tax was imposed under section 4081 before December 1, 1990; and

(B) Which is held at the first moment of December 1, 1990, by any person.

(ii) *Generally applicable rate of tax.* Except as otherwise provided in paragraph (b)(1)(iii) of this section, the rate of floor stocks tax on gasoline is 5 cents per gallon.

(iii) *Rates relating to gasohol.* The rate of floor stocks tax under this paragraph (b)(1) is—

(A) 5 cents per gallon in the case of gasohol;

(B) 6.22 cents per gallon in the case of gasoline that was taxed at a reduced rate under section 4081(c) and is used in producing gasohol that contains ethanol;

(C) 5.56 cents per gallon in the case of gasoline that was taxed at a reduced rate under section 4081(c) and is used in producing gasohol that does not contain ethanol;

(D) .55 cent per gallon in the case of gasoline that was not taxed at a reduced rate under section 4081(c) and is used in producing gasohol that contains ethanol (and no amount is recoverable pursuant to section 6427(f) with respect to such gasoline); and

(E) Zero in the case of gasoline that was not taxed at a reduced rate under section 4081(c) and is used in producing gasohol that does not contain ethanol (and .11 cent per gallon is recoverable pursuant to section 6427(f) with respect to such gasoline).

(2) *Diesel fuel*—(i) *Imposition of tax.* Section 11211(j)(1)(A) of the Act imposes a floor stocks tax on diesel fuel (including diesel fuel/alcohol mixtures)—

(A) On which tax was imposed at a Highway Trust Fund financing rate under section 4091 before December 1, 1990; and

(B) Which is held at the first moment of December 1, 1990, by any person.

(ii) *Generally applicable rate of tax.* Except as otherwise provided in paragraph (b)(2)(iii) of this section, the rate of floor stocks tax on diesel fuel described in paragraph (b)(2)(i) of this section is 5 cents per gallon.

(iii) *Rates relating to diesel fuel/alcohol mixtures.* The rate of floor stocks tax under this paragraph (b)(2) is—

(A) 5 cents per gallon in the case of a diesel fuel/alcohol mixture;

(B) 6.22 cents per gallon in the case of diesel fuel that was taxed at a reduced rate under section 4091(c)-(1)(B) and is used in producing a diesel fuel/alcohol mixture that contains ethanol;

(C) 5.56 cents per gallon in the case of diesel fuel that was taxed at a reduced rate under section 4091(c)-(1)(B) and is used in producing a diesel fuel/alcohol mixture that does not contain ethanol;

(D) 1.22 cents per gallon in the case of diesel fuel that was not taxed at a reduced rate under section 4091(c)-(1)(B)and is used in producing a die-

sel fuel/alcohol mixture that contains ethanol (and no amount is recoverable pursuant to section 6427(f) with respect to such diesel fuel); and

(E) .56 cent per gallon in the case of diesel fuel that was not taxed at a reduced rate under section 4091(c)-(1)(B) and is used in producing a diesel fuel/alcohol mixture that does not contain ethanol (and no amount is recoverable pursuant to section 6427(f) with respect to such diesel fuel).

(3) *Diesel fuel held for use in trains*—(i) *Imposition of tax.* Section 11211(j)(1)(B) of the Act imposes a floor stocks tax on diesel fuel—

(A) On which no tax was imposed at a Highway Trust Fund financing rate under section 4091 before December 1, 1990; and

(B) Which is held at the first moment of December 1, 1990, by any person and is used by that person to propel a train on rails.

(ii) *Rate of tax.* The rate of floor stocks tax under this paragraph (b)(3) is 2.5 cents per gallon.

(4) *Aviation fuel*—(i) *Imposition of tax.* Section 11213(b)(5) of the Act imposes a floor stocks tax on aviation fuel—

(A) On which tax was imposed under section 4041(c)(1) or 4091 before December 1, 1990; and

(B) Which is held at the first moment of December 1, 1990, by any person.

(ii) *Rate of tax.* The rate of floor stocks tax under this paragraph (b)(4) is 3.5 cents per gallon.

(c) *Person liable for tax*—(1) *In general.* The person liable for the floor stocks tax on any fuel subject to tax is the person that holds the fuel at the first moment of December 1, 1990. For purposes of the floor stocks tax, fuel is held at the first moment of December 1, 1990, by the person that has title to the fuel (whether or not delivery to that person has been made) at such time, as determined under applicable local law.

(2) *Special rule.* Each business unit that has, or is required to have, its own employer identification number is treated as a separate person for purposes of the floor stocks tax. For example, a chain of retail service stations that has one employer identification number is one person for purposes of the floor stocks tax and a parent corporation and a subsidiary that each have a different employer identification number are two persons for purposes of the floor stocks tax.

(d) *Treatment of fuel in foreign trade zones.* Notwithstanding the Act of June 18, 1934 (48 Stat. 998, 19 U.S.C. 81a) or any other provision of law, any fuel that is located in a foreign trade zone at the first moment of December 1, 1990, shall be subject to floor stocks tax, if—

(1) Internal revenue taxes have been determined, or customs duties liquidated, with respect to such fuel before December 1, 1990, pursuant to a request made under the first proviso of section 3(a) of the Act of June 18, 1934; or

(2) Such fuel is held at the first moment of December 1, 1990, under the supervision of a customs officer pursuant to the second proviso of such section 3(a).

§42.4 Exemptions from floor stocks tax.

(a) *Overview.* This section provides rules for determining exemptions from the floor stocks tax. Generally, tax is not imposed—

(1) On fuel held exclusively for an exempt use;

(2) On gasoline or diesel fuel held in the tank of a motor vehicle or motorboat; or

(3) On gasoline or diesel fuel held by a person if the person does not hold more than a specified amount of that fuel.

(b) *Fuel held for exempt uses*—(1) *Gasoline.* The floor stocks tax does not apply to gasoline held exclusively for an exempt use. In determining whether gasoline is held exclusively for an exempt use, the following rules apply:

(i) The term "exempt use" means, with respect to gasoline, any use of gasoline (other than use in producing gasohol) which is described in sections 6420, 6421 or 6427 and which entitles the user to a credit or refund of the tax imposed by section 4081. Thus, for example, exempt use of gasoline includes use on a farm for farming purposes, use in an offhighway business use, use in certain intercity, local and school buses, exclusive use by a State or local government or nonprofit educational organization, and use in commercial aircraft.

(ii) Gasoline is held exclusively for an exempt use only if—

(A) The person that holds gasoline at the first moment of December 1, 1990, actually uses the gasoline in an exempt use; or

(B) A gasoline wholesale distributor described in section 6416(a)(4) holds gasoline at the first moment of December 1, 1990, and sells the gasoline at a tax-excluded price for a use described in section 6416(b)(2).

Accordingly, except as provided in this paragraph (b)(1)(ii), gasoline is not held exclusively for an exempt use if, at the first moment of December 1, 1990, the gasoline is held for resale (including resale to a person that will use the gasoline in an exempt use). Thus, for example, gasoline held by a gasoline service station is not exempt from the floor stocks tax under this paragraph (b)(1) if it will be sold to a farmer for use on a farm for farming purposes. However, the farmer would be eligible to claim an income tax credit for the tax under sections 34 and 6420.

(2) *Diesel fuel.* The floor stocks tax does not apply to diesel fuel held exclusively for an exempt use. In determining whether diesel fuel is held exclusively for an exempt use, the following rules apply:

(i) The term "exempt use" means, with respect to diesel fuel, any use of diesel fuel (other than in producing a diesel fuel/alcohol mixture or as fuel in a diesel-powered train) which is described in section 6427 and which entitles the user to a credit or refund of the tax imposed by section 4091. Thus, for example, exempt uses of diesel fuel that is not used as fuel in a diesel-powered train include use other than as a fuel in a diesel-powered highway vehicle (as defined in §48.4041-8(b)(4)), use on a farm for farming purposes, exclusive use by a State or local government or nonprofit educational organization, and use in an off-highway business use.

(ii) Diesel fuel held for use in a diesel-powered train is not exempt from the floor stocks tax under this paragraph (b)(2) even if the fuel is held by a State or local government. Similarly, the exemptions for use oth-

er than as fuel in a diesel-powered highway vehicle and off-highway business use do not apply to fuel used in a diesel-powered train. See section 6427(l)(4), as added by the Act.

(iii) The floor stocks tax does not apply to diesel fuel held for use in a bus if a credit for, or a refund of, the tax, in whole or in part, is allowable for diesel fuel used in the bus under section 6427(b). Thus, for example, the floor stocks tax does not apply to diesel fuel held for use in an intercity bus if the diesel fuel was previously subject to tax at a reduced rate of 3 cents per gallon or 3.1 cents per gallon.

(iv) Diesel fuel is held exclusively for an exempt use only if the person that holds the fuel at the first moment of December 1, 1990, actually uses the diesel fuel in an exempt use.

(v) Accordingly, diesel fuel is not held exclusively for an exempt use if, at the first moment of December 1, 1990, the diesel fuel is held for resale (including resale to a person that will use the diesel fuel in an exempt use). Thus, for example, diesel fuel held by a retailer is not exempt from the floor stocks tax under this paragraph (b)(2) if it will be sold to a construction company for use in the construction company's off-road machinery. However, the construction company would be eligible to claim a credit or refund of the tax under section 6427.

(3) *Aviation fuel.* The floor stocks tax does not apply to aviation fuel held exclusively for an exempt use. In determining whether aviation fuel is held exclusively for an exempt use, the following rules apply:

(i) The term "exempt use" means, with respect to aviation fuel, any use of aviation fuel which is described in section 6427 and which entitles the user to a credit or refund of the tax imposed by section 4091. Thus, for example, exempt use of aviation fuel includes any use other than use as a fuel in an aircraft in noncommercial aviation (as defined in section 4041(c)), use on a farm for farming purposes, and exclusive use by a State or local government or nonprofit educational organization.

(ii) Aviation fuel is held exclusively for an exempt use only if the person that holds the aviation fuel at the first moment of December 1, 1990, actually uses the aviation fuel in an exempt use. Accordingly, aviation fuel is not held exclusively for an exempt use if, at the first moment of December 1, 1990, the aviation fuel is held for resale (including resale to a person that will use the aviation fuel in an exempt use). Thus, for example, aviation fuel held by a fixed base operator is not exempt from the floor stocks tax under this paragraph (b)(3) if it will be sold to an airline for use in commercial aviation. However, the airline would be eligible to claim a credit or refund of the tax under section 6427.

(c) *Exemption for gasoline or diesel fuel held in vehicle tank.* The floor stocks tax does not apply to gasoline or diesel fuel held, at the first moment of December 1, 1990, in the fuel supply tank of a motor vehicle (as defined in §48.4041-8(c)) or motorboat. Fuel held in the fuel supply tank of a train or an aircraft is not exempt from the floor stocks tax under this paragraph (c).

(d) *Exemption for certain amounts of fuel*—(1) *In general.* The floor stocks tax does not apply to—

(i) Gasoline that a person holds at the first moment of December 1, 1990, if the aggregate amount of gasoline held by that person at that time does not exceed 4,000 gallons; and

(ii) Diesel fuel that a person holds at the first moment of December 1, 1990, if the aggregate amount of diesel fuel held by that person at that time does not exceed 2,000 gallons.

(2) *Additional rules.* The following additional rules apply for purposes of this paragraph (d):

(i) *Aviation fuel.* Aviation fuel is not exempt from the floor stocks tax merely because it is held in de minimis amounts at the first moment of December 1, 1990.

(ii) *Coordination with other exemptions.* In determining the aggregate amount of gasoline or diesel fuel held by a person at the first moment of December 1, 1990, there shall be excluded the amount of gasoline or diesel fuel exempt from the floor stocks tax by reason of paragraph (b) of this section (relating to fuel held for exempt uses), or paragraph (c) of this section (relating to gasoline and diesel fuel held in the tank of a vehicle).

(iii) *All amounts held subject to tax if threshold exceeded.* The floor stocks tax applies to all amounts of gasoline (or diesel fuel, as the case may be) held by a person (and not exempt from tax under paragraph (b) or (c) of this section) if the aggregate amount of fuel held by the person at the first moment of December 1, 1990, exceeds 4,000 gallons (2,000 gallons in the case of diesel fuel).

(iv) *Controlled groups.* A member of a controlled group (as defined in §42.2(d)) holds more than 4,000 gallons of gasoline (2,000 gallons in the case of diesel fuel) if the aggregate amount of all gasoline (or diesel fuel, as the case may be) held by all members of the controlled group exceeds 4,000 gallons of gasoline (2,000 gallons in the case of diesel fuel).

(3) *Examples.* The following examples illustrate the rules of this paragraph (d):

Example 1. *A* holds 10,000 gallons of gasoline on December 1, 1990, 6,000 of which are held exclusively for use on a farm for farming purposes. The remaining 4,000 gallons are held for use in *A*'s highway vehicles. *A* is not a member of a controlled group. A is not subject to the floor stocks tax on any of the 10,000 gallons because the aggregate amount of fuel held by *A* for uses other than exempt uses does not exceed 4,000 gallons.

Example 2. On December 1, 1990, *B* holds 1,900 gallons of diesel fuel and 3,900 gallons of gasoline. *B* is not a member of a controlled group. *B* is not liable for the floor stocks tax on diesel fuel because *B*'s holdings of diesel fuel do not exceed 2,000 gallons. *B* is not liable for the floor stocks tax on gasoline because *B*'s holdings of gasoline do not exceed 4,000 gallons.

Example 3. On December 1, 1990, *C* holds 4,100 gallons of gasoline for resale at a service station. *C* is liable for a floor stocks tax of $205 (4,100 X $.05) on that gasoline.

Example 4. *D, E,* and *F* are members of the same controlled group. On December 1, 1990, D holds 2,000 gallons of gasoline, *E* holds 2,500 gallons of gasoline, and *F* holds 500 gallons of gasoline. None of the gasoline is held for an exempt use or in the fuel supply tank of a motor vehicle. Because the aggregate amount held by all members of the group exceeds 4,000 gallons, all gasoline held by each member is subject to the floor stocks tax. Thus, *D* is liable for tax of $100 (2,000 X $.05), *E* is liable for tax of $125 (2,500 X $.05) and *F* is liable for tax of $25 (500 X $.05).

§42.5 Requirements with respect to inventory, payment and return.

(a) *Overview.* This section sets forth requirements for inventory of fuel, payment of tax and filing a

return reporting the tax.

(b) *Inventory.* Every person liable for the floor stocks tax, every person holding gasoline or diesel fuel for resale, and every person holding gasoline or diesel fuel for use as a fuel in a trade or business of providing transportation services by motor vehicle (other than a bus to which section 6421(b) or 6427(b) applies) shall prepare an inventory of all gasoline, diesel fuel and aviation fuel held by that person at the first moment of December 1, 1990 (other than fuel on which no tax under section 4081 or 4091 was imposed before December 1, 1990, and gasoline or diesel fuel held in the fuel supply tank of a motor vehicle or motorboat). In addition every person who, at the first moment of December 1, 1990, holds diesel fuel for use in a train shall prepare an inventory of all such fuel. The inventory shall be determined as of the first moment of December 1, 1990, but work-back and work-forward inventories will be acceptable if supported by adequate commercial records of receipt, use and disposition of the fuel. Persons subject to the inventory requirement of this paragraph (b) must maintain records of the inventory and make the records available for inspection and copying by internal revenue agents and officers. Records of the inventory are not to be filed with the Internal Revenue Service.

(c) *Payment of tax.* The floor stocks tax shall be paid without assessment or notice on or before May 31, 1991. The payment shall be accompanied by Form 8109, *Federal Tax Deposit Coupon*, in accordance with the instructions applicable to that form. The boxes on Form 8109 for "720" and "1st Quarter" shall be marked.

(d) *Filing of returns*—(1) *Form 720.* Every person liable for the floor stocks tax shall make a return of the tax on Form 720, *Quarterly Federal Excise Tax Return*, (Revised January 1991). The return shall be prepared and filed in accordance with the instructions relating to the return. The applicable Form 720 and its separate instructions may be obtained at many local Internal Revenue Service offices or by calling the following toll-free number: 1-800-829-3676.

(2) *Time for filing Form 720.* The Form 720 reporting liability for the floor stocks tax shall be filed on or before May 31, 1991. This Form 720 is for the first calendar quarter of 1991. In the case of a person not otherwise required to file Form 720 for that calendar quarter, the return shall be marked "FINAL-FLOOR STOCKS" at the top. Only one Form 720 shall be filed for any calendar quarter. If a person is also required to report liability for other excise taxes for the first calendar quarter of 1991 on Form 720 and that Form 720 would otherwise be due on or before a date earlier than May 31, 1991, that person shall report the floor stocks tax and the other taxes on one Form 720 filed on or before May 31, 1991. This rule does not extend the time for making deposits or paying any excise tax.

§42.6 Applicability of other laws.

(a) *In general.* All provisions of law, including penalties, applicable with respect to the taxes imposed by section 4081 in the case of gasoline and section 4091 in the case of diesel fuel or aviation fuel shall, insofar as applicable and not inconsistent with the provisions of this part, apply with respect to floor stocks tax to the same extent as if that tax was imposed by section 4081 or section 4091, as the case may be.

(b) *Credits and refunds.* For rules relating to credits and refunds with respect to floor stocks tax paid on gasoline, diesel fuel, or aviation fuel used in an exempt use, see sections 34, 6416, 6420, 6421 and 6427.

(c) *Penalties and interest.* For the application of provisions relating to interest and penalties, see chapters 67 and 68 of subtitle F.

Fred T. Goldberg, Jr.,
Commissioner of
Internal Revenue.

(Filed by the Office of the Federal Register on November 28, 1990, 1:54 p.m., and published in the issue of the Federal Register for December 3, 1990, 55 F.R. 49908)

Announcement of the Disbarment, Suspension, or Consent to Voluntary Suspension of Attorneys, Certified Public Accountants, Enrolled Agents and Enrolled Actuaries from Practice Before the Internal Revenue Service

Under Section 330, Title 31 of the United States Code (1970 ed.), the Secretary of the Treasury, after due notice and opportunity for hearing, is authorized to suspend or disbar from practice before the Internal Revenue Service any person who has violated the rules and regulations governing the recognition of attorneys, certified public accountants, enrolled agents or enrolled actuaries to practice before the Internal Revenue Service.

Attorneys, certified public accountants, enrolled agents, and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify such disbarred or suspended practitioners, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been disbarred or suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary, and the date of disbarment or period of suspension. This announcement will appear in the weekly Bulletin for five successive weeks or as long as it is practicable for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended or disbarred and will be consolidated and published in the Cumulative Bulletin.

After due notice and opportunity for hearing before an administrative law judge, the following individuals have been disbarred from further practice before the Internal Revenue Service:

Name	Address	Designation	Date of Disbarment
Bandas, William I.	Richmond, VA	Attorney	December 31, 1989
Bent, C. Frederick, III	Boston, MA	Attorney	July 11, 1990
Cullum, William E.	Mobile, AL	CPA	July 16, 1990
Esposito, James A.	Fairmount, WV	Attorney	April 16, 1990
Harris, Thomas W., Jr.	Irvine, CA	Attorney	June 18, 1990
Kennedy, John B.	Wilmington, DE	Attorney	April 16, 1990
Larson, Bruce N.	West Des Moines, IA	CPA	April 16, 1990
Malone, Thomas F.	Gorham, ME	Attorney	April 27, 1990
Mann, Walter R.	Tallahassee, FL	Attorney	April 16, 1990

After due notice and opportunity for hearing before an administrative law judge, the following individuals have been suspended from further practice before the Internal Revenue Service:

Name	Address	Designation	Date of Suspension
Corrette, Bruce A.	St. Johnsbury, VT	CPA	Definite from April 16, 1990 to April 16, 1993
Hunt, Christopher J.	Mercer Island, WA	CPA	Indefinite from July 13, 1990
Weiner, Irwin	Calumet City, IL	CPA	Definite from June 17, 1990 to December 17, 1990

Under 31 Code of Federal Regulations, Part 10, an attorney, certified public accountant, enrolled agent or enrolled actuary, in order to avoid the institution or conclusion of a proceeding for his disbarment or suspension from practice before the Internal Revenue Service, may offer his consent to suspension from such practice. The Director of Practice, in his discretion, may suspend an attorney, certified public accountant, enrolled agent or enrolled actuary in accordance with the consent offered.

Attorneys, certified public accountants, enrolled agents, and enrolled actuaries are prohibited in any Internal Revenue Service matter from directly or indirectly employing, accepting assistance from, being employed by or sharing fees with, any practitioner disbarred or under suspension from practice before the Internal Revenue Service.

To enable attorneys, certified public accountants, enrolled agents and enrolled actuaries to identify practitioners under consent suspension from practice before the Internal Rev-

enue Service, the Director of Practice will announce in the Internal Revenue Bulletin the names and addresses of practitioners who have been suspended from such practice, their designation as attorney, certified public accountant, enrolled agent or enrolled actuary and date or period of suspension. This announcement will appear in the weekly Bulletin at the earliest practicable date after such action and will continue to appear in the weekly Bulletins for five successive weeks or for as many weeks as is practicable for each attorney, certified public accountant, enrolled agent or enrolled actuary so suspended and will be consolidated and published in the Cumulative Bulletin.

The following individuals have been placed under consent suspension from practice before the Internal Revenue:

Name	Address	Designation	Date of Suspension
Aronson, Mitchell D.	Ft. Myers, FL	Attorney	Indefinite from June 7, 1990
Bowers, Theodore R.	Panama City, FL	Attorney	Indefinite from March 6, 1990
Coats, Jack	Cleveland, TX	CPA	Indefinite from April 12, 1990
Craft, James D.	Bay City, TX	Enrolled Agent	Indefinite from May 25, 1990
Crow, Kenneth H.	Waco, TX	Attorney	Indefinite from May 4, 1990
Gillis, Stephen S.	Chula Vista, CA	Attorney	Indefinite from May 25, 1990
Harper, Emmett D.	Ft. Walton Beach, FL	Enrolled Agent	Indefinite from March 16, 1990
Kadish, Charles	Portland, ME	Attorney	Indefinite from April 23, 1990
Marcus, Richard M.	Encino, CA	Attorney	Indefinite from April 2, 1990
McGinnis, Lyle B., Jr.	Huntington, WV	CPA	Indefinite from September 18, 1990
Perry, James N.	Cincinnati, OH	Attorney	Indefinite from May 22, 1990
Schafer, James H.	Hutchinson, MN	Attorney	Indefinite from April 12, 1990
Stern, Wallace E.	Southport, CT	CPA	Indefinite from June 8, 1990
Thier, Richard H.	Miami Beach, FL	Attorney	Indefinite from August 10, 1990
Wallace, Gerald O.	Montgomery, AL	Attorney	Indefinite from April 16, 1990

Summaries of Disciplinary Actions Taken by the Director of Practice

The following summaries have been selected from closed cases in the Office of Director of Practice to provide information to tax practitioners regarding the types of activity that may result in disciplinary action. These summaries do not constitute precedent in any matter before the Director of Practice. This is the first publication of disciplinary action summaries. It is anticipated that summaries will be published on a quarterly basis. Before the next publication, your comments on the style and substance of the summaries are invited. Please send comments to: Office of Director of Practice, HR:DP, Internal Revenue Service, 1111 Constitution Ave., N.W., Washington, D.C. 20224.

After due notice and opportunity for hearing, the following resulted in suspensions or disbarments from practice before the Internal Revenue Service:

1. A tax practitioner owned and operated an accounting firm which had a number of employees. Although the proper amount of taxes were withheld from their paychecks, the practitioner failed to pay over this money to the U.S. Government and to file the quarterly tax returns (Form 941) reflecting such taxes. The failure to file the Forms 941 as required by the revenue laws, as well as the failure to pay over the withheld taxes, indicated a violation of section 10.51(d) of Circular 230. When contacted by the Director of Practice relative to the matter, the practitioner explained that he had insufficient funds with which to pay the taxes on behalf of his employees. The Director of Practice found this explanation inadequate justification for failure to pay such taxes in a timely manner, believing that when the taxes were withheld from employees' wages, the practitioner had an affirmative duty to transmit them to the Government. Further, his failure to file Forms 941 was a willful disregard of the requirements of the law. Consequently, his failure to do so was found to place him in violation of section 10.51(d) of Circular 230. The practitioner was suspended from practice before the Internal Revenue Service for a period of not less than five years.

2. The practitioner, an attorney, in preparing several of his clients' tax returns, failed to report all items of income and claimed deductions to which the taxpayers were not entitled. In addition, he promoted a tax shelter in which sham sales were used to artificially increase the basis of the value of the shelter's assets. He also was a partner in that shelter. He later represented clients before the Internal Revenue Service regarding the tax positions taken in connection with the shelter. The clients' interests were found to be in conflict with his interests as a partner in the tax shelter. Further, his preparation of his clients' tax returns was in willful disregard of the revenue laws. The conduct violated sections 10.22, 10.29, and 10.51 of Circular 230 and resulted in the practitioner's disbarment from practice before the Internal Revenue Service.

The following individuals were placed under consent suspension from practice before the Internal Revenue Service:

1. The practitioner prepared tax returns on which bogus deductions were claimed for charitable contributions to a mail order ministry. After being contacted by the Director of Practice, the practitioner indicated he had no specific knowledge of the organization of the mail order ministry. However, the facts showed he was present at meetings in which the ministry organization was explained to audiences. (After these meetings, the attendees were solicited to become "ordained ministers" of the organization upon payment of a fee.) The facts also showed that the ministry's promoter referred the "ordained ministers" to the practitioner for preparation of their individual Federal income tax returns. After possible violations of sections 10.21, 10.22, 10.51(b), and 10.51(d) of Circular 230 were raised, the practitioner offered his consent to suspension from practice before the Internal Revenue Service for a period of two years. Such offer was accepted.

2. The practitioner did not file Federal income tax returns for four taxable years until being contacted by representatives of the Internal Revenue Service Criminal Investigation Division regarding the matter. The Director of Practice raised possible violation of Circular 230, section 10.51(d). After providing mitigating circumstances as an explanation of the matter, the practitioner offered his consent to suspension from practice before the Internal Revenue Service for a period of two years. Such offer was accepted.

3. The practitioner was the executor of an estate. Before becoming the executor, he served as legal counsel to the decedent. During the course of his service as counsel and (later) executor, he commingled assets of the decedent, as well as the estate, with his own funds. In addition, the practitioner made charitable donations of works of art belonging to the estate. He claimed deductions of the contributions on his own Federal income tax return. The Director of Practice alleged possible violations of sections 10.51(b) and (d) of Circular 230. The Director of Practice accepted the practitioner's offer of consent to suspension from practice before the IRS for an indefinite period of time.

The following individuals received letters of reprimand pursuant to section 10.54 of Circular 230:

1. While representing a taxpayer before the Internal Revenue Service under a power of attorney, an enrolled agent advised the taxpayer that he would file a petition on his behalf with the U. S. Tax Court. Because the enrolled agent was not admitted to practice before that court, an order of dismissal for lack of jurisdiction was issued. It was concluded that the practitioner knew or should have known admission to practice before the U. S. Tax Court was required before he could file petitions on behalf of taxpayers. His erroneous advice to taxpayers and resultant activity, together with the delays that resulted therefrom, were found to constitute violations of sections 10.22(a) and 10.23 of Circular 230. A letter of reprimand was issued.

2. At an IRS examination of a client's tax returns for three years, a practitioner brought with him numerous supporting documents. Three Internal Revenue Service employees attended the examination for review of the documents. The practitioner refused to release more than one document at a time. When asked why he would not allow each employee to review separate documents, he stated the taxpayer had directed him to maintain control of each and every document during the examination and

not to relinquish possession of the documents. In order to abide by the wishes of the taxpayer, the practitioner felt he could exercise effective control over only one document at a time. Due to the large number of documents to be reviewed and the fact the Internal Revenue Service review would take place in the presence of the practitioner, the refusal to relinquish possession of more than one document at a time was found to be unreasonable under the circumstances. The fact that a client places demands of the sort under consideration on a practitioner was found not to be a basis for altering his responsibilities as a tax professional (to conduct his affairs in accordance with the requirements of Circular 230). Consequently, his conduct resulted in an unreasonable delay in the prompt disposition of the examination, in violation of section 10.23 of Circular 230. The practitioner was issued a reprimand and was also counselled that repetition of dilatory tactics on his part would result in a proceeding for his suspension or disbarment from practice before the Internal Revenue Service.

3. The practitioner signed his client's name on a power of attorney in his favor (rather than have the taxpayer execute the document herself) and submitted the power of attorney to the Internal Revenue Service. When asked by Service personnel concerning the improper signature, the practitioner stated the taxpayer gave him verbal authorization to represent her. While there was no clear finding of unauthorized representation, his signing the taxpayer's purported signature was improper. Based on the practitioner's assurances that he would be more diligent in abiding by correct procedures in the future, as well as his previous unblemished record, the sanction for his violation of Circular 230 was limited to a reprimand.

Cases were opened in the following instances but were closed without any disciplinary action taken.

1. A referral to the Director of Practice concerned a certified public accountant's preparation of a corporate tax return for a professional corporation controlled by a physician. The return reflected substantial overstatements of country club dues and subscriptions. An issue of possible violation of section 10.22(a) of Circular 230 (failure to exercise due diligence in the preparation of tax returns) was raised. The practitioner explained that the client was a long-standing one. During his preparation of the returns, he informed the taxpayer he would need substantiation for the deductions claimed and was assured that such records existed. In the practitioner's view, nothing during the engagement indicated a variance generally from the corporation's modus operandi. Consequently, he concluded there was no reason to assume the taxpayer had misrepresented the facts. It was found the practitioner was justified in relying in good faith upon the information provided by the taxpayer. Accordingly, it was determined the certified public accountant had not violated section 10.22(a) of Circular 230, and the matter was closed.

2. A matter referred to the Director of Practice disclosed that the practitioner, an employee of a tax service firm, had submitted a power of attorney to the Internal Revenue Service containing false representations. The practitioner and two co-workers had signed the power of attorney as enrolled agents. Although the practitioner was in fact an enrolled agent, his co-workers were not and thus had misrepresented their status to the Internal Revenue Service. It was alleged that the practitioner knew or should have known of this misrepresentation and had affirmative duties relating to the situation. The practitioner was contacted by the Director of Practice concerning the matter. A possible violation of Subpart C, sections 10.51(b) and 10.51(h) of Circular 230 was raised. In response, the practitioner provided proof that his employment with the firm had terminated before submission of the power of attorney at issue. Further, he represented that the power of attorney was executed by the non-enrolled agents and submitted without his knowledge or approval. Accordingly, it was determined the practitioner had not violated the provisions of Circular 230 and the matter was closed.
