Selected Data for Cities with 25,000 or more Inhabitants in 1940

PREPARED UNDER THE SUPERVISION OF
MORRIS H. HANSEN
Statistical Assistant to the Director
By MORRIS B. ULLMAN

INTRODUCTORY NOTE

Selected data for each city in the United States having 25,000 or more inhabitants in 1940 are presented in this publication. Statistics on social, economic, and governmental subjects for each city have been assembled from a number of sources.[1] The present report has been prepared as a supplement to the Statistical Abstract of the United States in order to satisfy numerous requests for a summary presentation of data for smaller areas than can be presented in the annual volume.

The arrangement of the cities in the various tables is that of their 1940 population rank. This arrangement facilitates comparisons between cities of approximately equal size. To aid in the location of cities for which the 1940 population may not be known, table 2 on pages 6 and 7 shows the cities arranged alphabetically within States and gives the 1940 population rank for each place.

Information on population shifts and housing shortages for dates later than April 1940 is not available for all cities. Data obtained from special censuses and national population estimates are presented in tables 1 and 3. The information in table 3, population as of November 1, 1943, is for the counties in which each city having 100,000 or more inhabitants in 1940 is located. since estimates for individual cities are not available for that date. Additional information on housing shortages are available for certain cities from reports prepared by the Bureau of the Census for the National Housing Agency. A list of cities covered by these surveys can be obtained by writing to the Director of the Census.

Basic data which are available for all cities form the bulk of this report and are given in table 5 on pages 12 to 47. These data are summarized by city-size groups in table 4 on pages 10 and 11. Definitions used and sources of the material for each item begin on page 2.

Comments and suggestions on the usefulness of this supplement will be appreciated and will be given consideration when future publications of a similar nature are prepared.

[1] The cooperation of the various agencies which furnished information and of various members of the staff of the Bureau of the Census is gratefully acknowledged. Miss Rose Glubin supervised the preparation of the tables.

TABLE 1.—POPULATION AND OCCUPIED DWELLING UNITS OF SELECTED CITIES ACCORDING TO SPECIAL CENSUSES TAKEN DURING 1943 AND 1944

(Cities arranged by 1940 population rank)

1940 pop. rank	CITY	Date of special census	POPULATION				OCCUPIED DWELLING UNITS		
			On date of special census	Maximum relative sampling error	On April 1, 1940	Percent increase	On date of special census	On April 1, 1940	Percent increase

DEFINITIONS OF TERMS AND SOURCES OF INFORMATION

Table 1.—Population and Occupied Dwelling Units of Selected Cities According to Special Censuses Taken During 1943 and 1944

During the last two years the Bureau of the Census has been called upon to take special enumerations in the 29 cities for which data are shown in this table. A number of these are "Special Censuses" taken at the request of and the expense of the local communities where a certification of the current population was deemed necessary. The population in the other cities, except one,[1] was determined by the enumeration of a scientifically selected sample. The results for those cities which were enumerated on a sample basis and for Muskegon, Michigan, were obtained from Censuses of Congested Production Areas in 10 areas designated by the Committee on Congested Production Areas.

Col. 1 - Date of Census in the city in 1943 or 1944.

Cols. 2-5 - Resident population at the time of the special census and on April 1, 1940, with the percent increase between April 1 and the date of the census. The figures for the 21 Congested Production Area cities apply primarily to the civilian population since they do not include members of the armed forces living on military or naval reservations. The maximum relative sampling errors for the population of those cities where the 1944 figures are based on sample enumerations are given in column 3. These percentages represent the maximum differences that would ever be expected as a result of the sampling procedure used. Nineteen times out of 20 the sampling method should determine the population within a percentage only two-thirds as great; and in two times out of three within a percentage only one-third as great as the percentage shown in this column.

It should be noted that the maximum relative sampling error also applies to the percent increase as shown in col. 5, that is, the error due to sampling in the 1.9 percent increase in the population of Detroit is 3.3 percent of 1.9 percent.

Cols. 6-8 - Occupied dwelling units at the time of the recent census and on April 1, 1940, with the percent increase between these two dates. For cities in the Congested Production Areas, the category "occupied dwelling units" comprises the dwelling units occupied by households whose heads are residents of the area and is approximately comparable with the number for 1940. In 1940 any person who had a home elsewhere to which he planned to return was reallocated to that home from the place where he was enumerated. In 1944 many such persons were enumerated as residents of the place where they were found. This difference in treatment results in some increase in the number of resident-occupied dwelling units in these areas in 1944. In part, however, this increase is offset by the 1940 practice of enumerating a dwelling unit as "occupied" if it contained one or more residents, whereas in 1944 a dwelling unit was classified as "visitor-occupied" if the head of the household occupying the unit was a visitor, regardless of the residence status of other occupants of the unit.

Table 3.—Civilian Population April 1, 1940 and November 1, 1943 of Counties Having Cities With 100,000 or More Inhabitants in 1940

Estimates of civilian population on November 1, 1943, based on the registration for War Ration Book 4 have been prepared by the Bureau of the Census for each county and some of the results are presented in table 3. Registration figures for the United States were adjusted to an independent estimate of the total civilian population based on the 1940 Census and on births, deaths, and net immigration between April 1, 1940 and November 1, 1943. The estimated population in institutions in each county also entered into the preparation of these estimates.

The figures in all cases are shown to the last digit, as computed, instead of being rounded, not because they are assumed to be accurate to the last digit, but for convenience in summation.

Source: Bureau of the Census, Series P-44, No. 3. Estimated Civilian Population of the U. S., by Counties: November 1, 1943.

Table 4.—Summary of Selected Characteristics of Cities by City-Size Groups

Table 5.—Selected Characteristics of Each City With 25,000 or More Inhabitants in 1940

(Column numbers given below refer to table 5 and correspond to the line numbers in table 4)

Col. 1 - Area in square miles. Area shown includes total land and inland water as of April 1, 1940.

Source: Bureau of the Census, 16th Census of the U. S. 1940: Areas of the United States.

Cols. 2-6 - Population. The population reported is the resident population as of April 1, 1940. The number of citizens shown in Col. 6 excludes foreign-born persons who have first papers, aliens, and those for whom citizenship was not reported.

Source: Bureau of the Census, 16th Census of the U. S. 1940: Population, Volume II - General Characteristics. Historical series of the total population for each city is given in Population, Volume I, Number of Inhabitants.

Col. 7 - Number of Registered Voters: 1942. Data were obtained by a questionnaire sent to city officials and from official documents.

Source: Bureau of the Census, Elections, 1942. City Proposals Voted Upon and Number of Registered Voters, July 1943.

Cols. 8-12 - Climate. Basic climatic data shown cover periods ranging up to 50 years. For cities in which weather stations having a long period of observations are not located, the observations from nearby stations having approximately the same climatic conditions are shown. Such substitutions are indicated by footnotes.

Source: Department of Commerce, Weather Bureau. Data shown here have been taken from Yearbook of Agriculture. Climate and Man, 1941.

Cols. 13-18 - Housing: 1940. A dwelling unit is defined as living quarters occupied by or intended for occupancy by one household and is classified as occupied if it was occupied at the time of enumeration. It is considered as owner-occupied if it was owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All rooms that are used or available for use as living quarters for the household are counted in determining the number of rooms in each dwelling unit. Bathrooms, closets, pantries, halls, screened porches and unfinished rooms in the basement or attic are not counted as rooms. A kitchen is a separate room if it is partitioned off from floor to ceiling. Rooms used for office purposes by a person, such as a doctor or lawyer, who lives in the dwelling unit are included but rooms used as a store or shop for business are excluded.

Source: Bureau of the Census, 16th Census of the U. S. 1940: Housing, Volume II - General Characteristics. Data are from the Census of Housing taken as of April 1, 1940.

Col. 19 - Typical Net Monthly Electric Bill, 100 kwh Jan. 1943. Typical bills for consumers using electrical energy for lighting, small appliances and refrigeration are shown. All bills were computed in accordance with specifications formulated by the Federal Power Commission with the data submitted by the utilities on Federal Power Commission forms. In those cities where more than one typical monthly bill exists because the community is

[1] Muskegon, Michigan.

served by more than one utility or because of a difference in rates, that monthly typical bill, which applies to the majority of the customers served, is used.

Source: Federal Power Commission. Typical Residential Electric Bills - Cities of 2500 Population and More, 1943.

Cols. 20-21 - Permits Issued for New Residential Buildings: 1942. Building-permit data are collected directly from local building officials, except in the States of Illinois, Massachusetts, New Jersey, New York, North Carolina, and Pennsylvania, where State departments of labor collect and forward the data. In addition, notifications of construction projects financed by Federal and State Governments are collected.

The valuation figures represent estimates of construction costs made by prospective builders in the case of privately financed constructions, and the value of contracts awarded in the case of construction financed with Federal or State funds. Number of dwelling units and valuations are for new residential construction. Valuation data also include nonhousekeeping residential buildings.

The reports for several cities do not cover the entire year. Those reporting for fewer than 12 months are footnoted. The summary data shown in Table 4 are the totals of the individual cities as given in Table 5.

Source: Department of Labor, Bureau of Labor Statistics.

Cols. 22-24 - Hotels: 1939. Hotels include establishments designating themselves as hotels and providing hotel accommodations as their major business activity. Establishments include those reporting six or more guest rooms or receipts from rentals amounting to $500 or more. The receipts represent total revenue of the establishment. Statistics for certain cities were not included because publication of the data would involve disclosure of individual operations.

Source: Bureau of the Census, 16th Census of the U. S. 1940: Census of Business, Volume III, Service Establishments, 1939.

Cols. 25-29 - Vital Statistics. Birth and death data are by place of residence of the mother of the child or of the decedent. Stillbirths are excluded in all cases, and deaths occurring overseas are not included in the mortality figures. Tabulations are derived from transcripts of the original birth and death certificates which are received from registration officials of States and cities.

Average birth and death rates covering the 2 year period 1939-40 are shown. Infant deaths refer to deaths under one year of age.

Source: Bureau of the Census. Vital Statistics of the U. S. Supplement 1939-1940, Part III and Vital Statistics Special Reports, Volume 20, State Summaries, 1942.

Cols. 30-33 - Education: 1940. Data on expenditures, number of teachers and total enrollment (Cols. 30-32) are for day schools and include the colleges, junior colleges, normal school and similar institutions which are part of the city school system.

Current expenses include administration; instruction and supervision; operation of school plant, including repairs and maintenance; auxiliary services, such as promotion of health and extracurricular activity; and fixed charges allocated to pupil expenditure, such as money contributed by the city to retirement funds. Free textbooks are also included where they apply. Capital outlays and debt service are excluded.

The number of teachers includes the number of persons required to fill all teaching positions and, also, other instructional staff members, such as those persons offering services supplementary to classroom instruction in libraries, etc. A principal is counted in the teaching staff only if more than half of his time is spent in teaching.

Total enrollment includes the number of different names on the school registers during the school year.

The median year of school completed is the year which divides the population 25 years of age and over into equal parts, one-half having completed more schooling and one-half having completed less schooling than the median. The median for cities with over 50,000 inhabitants have been computed from ungrouped data. For other cities, the medians have been computed from grouped data.

Source: Data in cols. 30-32 are from Office of Education, Biennial Survey of Education for 1939-40 records. Median years of school completed for persons 25 years old and over are from the Bureau of the Census, 16th Census of the U. S. 1940: Population, Volume II, General Characteristics and Volume IV Characteristics by Age.

Cols. 34-53 - Labor Force: 1940. The employment data shown are for all persons 14 years old and over according to their work status during the week of March 24 to 30, 1940. The labor force includes persons at work, those with a job but temporarily absent from work, those on public emergency work, and those seeking work. Those persons at work or having a job though not at work during the census week are included in the employed worker group.

The distribution of employed persons by major industry groups is given in cols. 38 to 53. The following combinations of Census industry groups are shown:

Extractive industries

- Agriculture
- Forestry and fishery
- Coal mining
- Crude petroleum and natural gas production
- Other mines and quarries.

Construction

Textiles and apparel manufacturing

- Textile-mill products
- Apparel and other fabricated textile products

Chemicals, petroleum, and coal products manufacturing

- Chemical and allied products
- Petroleum and coal products

Iron, steel, and nonferrous metals and their products manufacturing

- Iron and steel and their products
- Nonferrous metals and their products

Machinery and transportation equipment manufacturing

- Machinery
- Automobiles and automobile equipment
- Transportation equipment except auto

Other manufacturing industries

- Food and kindred products
- Logging
- Sawmills and planing mills
- Furniture, store fixtures, miscellaneous wooden goods
- Paper and allied products
- Printing, publishing and allied industries
- Leather and leather products
- Stone, clay and glass products
- Other and not specified manufacturing industries

Transportation, communication, and other public utilities

- Railroad (including railroad repair shops) and railway express
- Trucking service
- Other transportation
- Communication
- Utilities

Wholesale trade

Retail trade

- Food and dairy products stores, and milk retailing
- Eating and drinking places
- Motor vehicles and accessories retail and filling stations
- Other retail trade

Business and personal services (excluding domestic service)

Finance, insurance and real estate
Automobile storage, rental, and repair services
Business and repair services, except automobile
Hotels and lodging places
Laundering, cleaning, and dyeing services
Miscellaneous personal services

Domestic service

Amusement, recreation, and related services

Professional and related services

Government (does not include government employees performing functions similar to those of private industry employees, but includes those engaged in activities that are peculiarly governmental functions)

Source: Bureau of the Census, 16th Census of the U. S. 1940: Population, Volume II, Characteristics of the Population, 1940.

Cols. 54-58 - Manufacturing Establishments: 1939. Data are for establishments reporting products valued at $5,000 or more. The term "establishment" signifies a single plant or factory. Wage earners in manufacturing plants are those who perform manual work, using tools, operating machines, handling materials and products, and caring for the plant and its equipment. They comprise both time and piece workers. The average for the year has been calculated by dividing the sums of the figures for the several months by 12. Value of products is, broadly, the selling value at the factory or plant, of all commodities produced (or, for some industries, receipts for work done) during the census year, whether sold, transferred to other plants or in stock.

For some purposes, the most satisfactory measure of the importance of a given industry is the "value added by manufacture," calculated by subtracting the cost of materials, supplies, containers, fuel, purchased electric energy, and contract work from the value of products.

Statistics have been withheld where publication would mean disclosure of data for individual establishments.

Source: Bureau of the Census, 16th Census of the U. S. 1940: Census of Manufactures, 1939, Volume III.

Cols. 59-62 - Retail Establishments: 1939. Data are from the Census of Business and cover the year 1939. Retail establishments include those primarily engaged in selling merchandise for personal or household consumption or utilization, and rendering service incidental to the sale of goods. In addition to those kinds of businesses readily recognizable as retail stores under this general description, retail businesses such as eating and drinking places, filling stations, lumber and building-materials dealers, and motor-vehicle dealers are included.

Sales include total operating receipts of retail stores after deduction of refunds or allowances for merchandise returned by customers. Local and State sales taxes collected by the store directly from customers and paid directly by the store to the local or State taxing agency are excluded.

The number of employees is the number of full-time and part-time paid employees including salaried officers of corporations, but not proprietors of unincorporated businesses. The number of employees shown is an aggregate of the average employment of each establishment; this average was obtained by totaling the number reported monthly for the period ended nearest the 15th of each month, and dividing the sum by 12.

Pay roll includes all compensation (salaries, wages, commissions, and bonuses) paid during the year to all employees. Payments in kind, such as free meals and lodging, are excluded. Pay roll is reported before deductions for social security, insurance, dues, etc., are made.

Source: Bureau of the Census, 16th Census of the U. S. 1940: Retail Trade, 1939, Part 3, Kinds of Business by Area, State, Counties and Cities.

Cols. 63-66 - Service Establishments: 1939. Service establishments are those engaged in a variety of kinds of business whose primary activity is the sale of services. The following seven major groups are included in this category: (1) personal service establishments including barber and beauty shops, cleaning and pressing establishments, laundries, photographic studios, etc.; (2) business service establishments including adjustment and credit bureaus, advertising agencies, private employment agencies, etc.; (3) services allied to transportation including packing and crating service; warehousing, etc.; (4) automotive repairs and services; (5) other repair services; (6) custom industries; and (7) miscellaneous services. Not included are services of doctors, lawyers, dentists and others performing a professional or scientific service, and also financial, educational, real estate, insurance, and transportation services are excluded. Religious and charitable institutions, hospitals and sanitariums, public utilities, and government operated enterprises are also excluded.

Receipts include total operating receipts. Employees include the number of full-time and part-time paid employees and also salaried officers of corporations but not proprietors of unincorporated businesses.

Source: Bureau of the Census, 16th Census of the U. S. 1940: Census of Business, Service Establishments, 1939.

Cols. 67-77 - City Government Finance: 1942. General revenue (Cols. 67-70) is revenue of the city incident to the exercise of its governmental functions as distinguished from the management of its public-service enterprises and from the administration of its trust and sinking funds. Included are taxes, aid received from other governments, and contributions from city enterprises and miscellaneous services. Tax revenues comprise general and selective property taxes, taxes on sales and gross receipts, business and occupation licenses and permits, poll, and other taxes. Aid received from other governments includes all amounts contributed from the funds of other governments - Federal, State, and local. Earnings include revenue from reimbursements from municipal services and for use of money and property, including special assessments and charges for capital outlay, interest, and rents and royalties, as well as revenue from fines and forfeits and from contributions from public-service enterprises. Miscellaneous or other revenue is revenue from commercial activities (activities undertaken to furnish certain facilities operated by the city in the interest of the public, but not incident to the exercise of their general governmental functions - such as markets, warehouses, etc.); revenue not assignable to any function including that from incidental operating accounts and from plants such as garages, municipal electric light and central heating plants; conscience money; reimbursement for losses charged off on prior years; and surplus of trust or sinking funds transferred to general funds.

General expenditure (Cols. 71-75) comprises total charges incurred for the year's financial program of the general government of the city as distinguished from the management of its public-service enterprises and from the administration of its trust and sinking funds. Included are the cost of operation and maintenance, aid paid to other governmental units, capital outlay, debt service, and contributions of general revenue to trust funds and to public-service enterprises.

Operation expenditure includes payments for services employed, property rented, and materials utilized in the current maintenance of the general-governmental functions of the city, as distinguished from capital outlay, debt service, and transfers to trust funds and public service enterprises, including payments to other governments for such functions.

Capital outlays are expenditures for the purchase of land, buildings, and equipment of durable value, new construction, and improvements more or less permanent in character, acquired or built by cities in the exercise of their general governmental functions. The expenditure may be from current funds or from the proceeds of debt issued.

The figures for debt service comprise interest payments and provision for debt retirement; the latter consists of direct redemption of long-term debt other than from sinking funds or by refunding, net reduction in short-term debts other than by funding, and payments into sinking funds.

Contributions to trust funds include taxes or other general-funds revenue assigned to trust funds or amounts transferred from general funds to trust funds. Contributions to public-service enterprises include the amounts paid from general-government revenues for the use and benefit of public-service enterprises; tax and other general revenue credited to enterprises; and debt service and capital costs of the enterprise met by general-government funds. Water, electricity, gas, transit, housing, and other large commercial activities are treated by the Census Bureau as public-service enterprises in all cities reported. Individual city data for contributions to public-service enterprises are given only for cities with a population of 100,000 and over. The data for the cities of 25,000 to 100,000 population are included in the total expenditures column for each city.

Source: Bureau of the Census: City Finances: 1942, Volume 2 - Topical Reports: "City Revenue in 1942," "City Expenditure in 1942," More complete definitions are given in Bureau of the Census, Financial Statistics of Cities: 1941, Volume 3.

Gross debt (Col. 76) includes all debt, both long- and short-term, issued by or in the name of the city or any of its agencies, including debt for public-service enterprises, self-supporting debt; and special assessment obligations guaranteed by the city. Net long-term debt (Col. 77) is the total long-term debt less sinking fund and other offsets to such debt.

Source: Bureau of the Census, City Finances: 1942, Volume 2, Topical Reports: "City Debt on June 30, 1942."

Cols. 78-79 - City Government Employment (Non-school) Number of non-school employees includes municipal employees with permanent, temporary, or indefinite tenure. Elective and other officials, judges, etc. paid by the city or by fees and having a term of one year or more are also included. Persons on work relief and employees of contractors are excluded. Pay roll consists of salaries, wages, and fees of all officials and employees as described above.

Where available, data have been shown for October 1942. In those cases where October 1942 data are not available, figures for another period were used as indicated by the footnotes.

[1] Includes two places urban under special rule with combined population of 113,923 persons.
[2] Includes thirteen places urban under special rule with combined population of 444,587 persons.
[3] Includes 126 places urban under special rule with combined population of 1,364,858 persons.
[4] Population in 1930 of places classified according to 1940 population.
[5] For 8 urban places with a total population in 1940 of 5,793,868 persons.
[6] For 21 urban places with a total population in 1940 of 7,232,409 persons.
[7] For 46 urban places with a total population in 1940 of 6,479,171 persons.
[8] For 86 urban places with a total population in 1940 of 5,936,886 persons.
[9] For 156 urban places with a total population in 1940 of 5,473,651 persons.
[10] City rates as shown have been weighted by number of occupied dwelling units to give weighted average.
[11] Does not include data for places urban under special rule.
[12] For 210 urban places with a total population in 1940 of 7,332,604 persons.
[13] For 49 urban places with a total population in 1940 of 7,067,566 persons.
[14] For 84 urban places with a total population in 1940 of 5,851,813 persons.
[15] For 136 urban places with a total population in 1940 of 4,766,599 persons.
[16] Rates in Table 5 for individual cities are 2-year averages.
[17] Includes supervisors and principals of rural areas.

TABLE 4.—SUMMARY OF SELECTED CHARACTERISTICS OF CITIES BY CITY-SIZE GROUPS—Continued

Unless otherwise indicated, group totals include places classified as urban under special rule. Groups for which data have not been summarized are indicated by a dash (-). The item numbers correspond to the column numbers in the next table.

[1] Includes two places urban under special rule with combined population of 113,923 persons.
[2] Includes thirteen places urban under special rule with combined population of 444,587 persons.
[3] Includes 126 places urban under special rule with combined population of 1,364,858 persons.
[4] Does not include data for places urban under special rule.
[5] Includes estimates not available for individual cities. Total revenue reported is $235,592,000.
[6] Includes estimates not available for individual cities. Total taxes reported are $188,526,000.
[7] Includes estimates not available for individual cities. Total taxes reported are $170,124,000.
[8] Includes estimates not available for individual cities. Total aid received from other governments is $38,116,000.
[9] Includes estimates not available for individual cities. Total earnings and miscellaneous reported are $28,866,000.
[10] Includes estimates not available for individual cities. Total earnings and miscellaneous reported are $27,170,000.
[11] Includes estimates not available for individual cities. Total expenditures reported are $259,417,000.
[12] Includes estimates not available for individual cities. Total revenue reported is $233,143,000.
[13] Includes estimates not available for individual cities. Total operation reported is $173,804,000.
[14] Includes estimates not available for individual cities. Total debt service reported is $57,171,000.
[15] Includes estimates not available for individual cities. Total debt service reported is $44,693,000.

TABLE 5.—SELECTED CHARACTERISTICS OF EACH CITY WITH 25,000 OR MORE INHABITANTS IN 1940

(Dash (-) is used to indicate that data are not available)

1940 Pop. Rank	CITY	Area in square miles 1940	POPULATION					Registered voters 1942	CLIMATE				
			Total 1940	Total 1930	Number of males 1940	Number nonwhite 1940	Citizens 21 years of age and over 1940		Average temperature January (°F)	Average temperature July (°F)	Maximum temperature (°F)	Minimum temperature (°F)	Average annual precipitation (Inches)

[1] Total includes data for colleges, junior colleges, normal schools and similar institutions since these units are part of the city school system.
[2] Data for Huntington Park, South Gate and Beverly Hills (part) are included.
[3] Separate data for city system are not available, since data are reported for the county or a similar unit.
[4] 1937-38 data used: 1939-40 data not available.

TABLE 5.—SELECTED CHARACTERISTICS OF EACH CITY WITH 25,000 OR MORE INHABITANTS IN 1940—Continued

(Dash (-) is used to indicate that data are not available)

1940 Pop. Rank	CITY	EMPLOYED WORKERS BY INDUSTRY GROUP, 1940															
				Manufacturing													
		Extractive industries	Construction	Textiles and apparel	Chemicals, and petroleum and coal products	Iron, steel, nonferrous metals and their products	Machinery and transportation equipment	Other manufacturing industries	Transportation, communication and other public utilities	Wholesale trade	Retail trade	Business and personal services (ex. domestic service)	Domestic service	Amusement, recreation and related services	Professional and related services	Government	Industry not reported

[1] Total includes data for colleges, junior colleges, normal schools and similar institutions since they are part of the city school system.
[2] Separate data for city system are not available, since data are reported for the county or a similar unit.
[3] 1937-38 data used; 1939-40 data not available.

TABLE 5.—SELECTED CHARACTERISTICS OF EACH CITY WITH 25,000 OR MORE INHABITANTS IN 1940—Continued

(Dash (-) is used to indicate that data is not available)

1940 Pop. Rank	CITY	EMPLOYED WORKERS BY INDUSTRY GROUP, 1940															
				Manufacturing													
		Extractive industries (38)	Construction (39)	Textiles and apparel (40)	Chemicals, and petroleum and coal products (41)	Iron, steel, nonferrous metals and their products (42)	Machinery and transportation equipment (43)	Other manufacturing industries (44)	Transportation, communication and other public utilities (45)	Wholesale trade (46)	Retail trade (47)	Business and personal services (ex. domestic service) (48)	Domestic service (49)	Amusement, recreation and related services (50)	Professional and related services (51)	Government (52)	Industry not reported (53)

[1] Total includes data for colleges, junior colleges, normal schools and similar institutions, since these units are part of the city school system.
[2] 1937-38 data used; 1939-40 data not available.
[3] Separate data for city system are not available, since data are reported for the county or a similar unit.

TABLE 5.—SELECTED CHARACTERISTICS OF EACH CITY WITH 25,000 OR MORE INHABITANTS IN 1940—Continued

(Dash (-) is used to indicate that data are not available)

1940 Pop. Rank	CITY	EMPLOYED WORKERS BY INDUSTRY GROUP, 1940															
				Manufacturing													
		Extractive industries (38)	Construction (39)	Textiles and apparel (40)	Chemicals, and petroleum and coal products (41)	Iron, steel, nonferrous metals and their products (42)	Machinery and transportation equipment (43)	Other manufacturing industries (44)	Transportation, communication and other public utilities (45)	Wholesale trade (46)	Retail trade (47)	Business and personal services (ex. domestic service) (48)	Domestic service (49)	Amusement, recreation and related services (50)	Professional and related services (51)	Government (52)	Industry not reported (53)

[1] April 1943 data.
[2] Not reported.
[3] April 1942 data.
[4] Information for airport not included.
[5] Does not include pay for ten health employees.
[6] Includes debt service of public-service enterprises.
[7] Includes agency collections for the independent school district; segregation not available. Expenditures for school amounted to $320 thousand.
[8] January 1943 data.
[9] Does not include hospital data.
[10] Does not include data for highways.
[11] January 1942 data.
[12] Data are for fiscal year ending June 30, 1943.
[13] July 1942 data.
[14] Data are for fiscal year ending March 31, 1943.

TABLE 5.—SELECTED CHARACTERISTICS OF EACH CITY WITH 25,000 OR MORE INHABITANTS IN 1940—Continued

[1] Separate data for city system are not available since data are reported for the county or a similar unit.
[2] Total includes data for colleges, junior colleges, normal schools and similar institutions since these units are part of the city school system.
[3] 1937-38 data used; 1939-40 are not available.
[4] Data are included in Los Angeles totals.
[5] Rates based on 1940 figures only
[6] Part of Beverly Hills included in Los Angeles figures.
[7] Includes data for Melrose Park (10,933 population).

TABLE 5.—SELECTED CHARACTERISTICS OF EACH CITY WITH 25,000 OR MORE INHABITANTS IN 1940—Continued

(Dash (-) is used to indicate that data are not available)

1940 Pop. Rank	CITY	EMPLOYED WORKERS BY INDUSTRY GROUP, 1940															
				Manufacturing													
		Extractive industries (38)	Construction (39)	Textiles and apparel (40)	Chemicals, and petroleum and coal products (41)	Iron, steel, nonferrous metals and their products (42)	Machinery and transportation equipment (43)	Other manufacturing industries (44)	Transportation, communication and other public utilities (45)	Wholesale trade (46)	Retail trade (47)	Business and personal services (ex. domestic service) (48)	Domestic service (49)	Amusement, recreation and related services (50)	Professional and related services (51)	Government (52)	Industry not reported (53)
