-Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

- (1) Type of Information Collection: Extension Reinstatement with Change of a Previously Approved Collection.
- (2) Title of the Form/Collection: National Drug Threat Survey.
- (3) Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection: Form Number: NDIC Form #
- (4) Affected public who will be asked or required to respond, as well as a brief abstract: Primary: Federal, State, Tribal, and local law enforcement agencies. This survey is a critical component of the National Drug Threat Assessment and other reports and assessments produced by the National Drug Intelligence Center. It provides direct access to detailed drug threat data from State and local law enforcement agencies.
- (5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: It is estimated that approximately 3,500 respondents will complete a survey response within approximately 20 minutes.
- (6) An estimate of the total public burden (in hours) associated with the collection: There are an estimated 1,167 total annual burden hours associated with this collection.

If additional information is required contact: Ms. Lynn Bryant, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Patrick Henry Building, Suite 1600, 601 D Street, NW., Washington, DC 20530.

Dated: December 21, 2009.

Lynn Bryant,

Department Clearance Officer, PRA, U.S. Department of Justice.

BILLING CODE 4410-DC-P

DEPARTMENT OF JUSTICE

Bureau of Alcohol, Tobacco, Firearms and Explosives

[Docket No. ATF 34N]

Commerce in Explosives; List of **Explosive Materials (2009R–18T)**

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), Department of Justice.

ACTION: Notice of list of explosive materials.

SUMMARY: Pursuant to 18 U.S.C. 841(d) and 27 CFR 555.23, the Department must publish and revise at least annually in the Federal Register a list of explosives determined to be within the coverage of 18 U.S.C. 841 et seq. The list covers not only explosives, but also blasting agents and detonators, all of which are defined as explosive materials in 18 U.S.C. 841(c). As a result of a recent court decision, ammonium perchlorate composite propellant (APCP) is no longer regulated under the Federal explosives laws. Therefore, APCP has been removed from the list of explosives. In addition, the Department is revising the list to include a parenthetical text after "ammonium perchlorate explosive mixtures" to clarify that this term excludes APCP. This notice publishes the 2009 List of Explosive Materials.

DATES: The list becomes effective upon publication of this notice on January 8, 2010.

FOR FURTHER INFORMATION CONTACT:

Debra S. Satkowiak, Chief; Explosives Industry Programs Branch; Arson and Explosives Programs Division; Bureau of Alcohol, Tobacco, Firearms and Explosives; United States Department of Justice; 99 New York Avenue, NE., Washington, DC 20226 (202–648–7120).

SUPPLEMENTARY INFORMATION: The list is intended to include any and all mixtures containing any of the materials on the list. Materials constituting blasting agents are marked by an asterisk. While the list is comprehensive, it is not all-inclusive. The fact that an explosive material is not on the list does not mean that it is not within the coverage of the law if it otherwise meets the statutory definitions in 18 U.S.C. 841. Explosive materials are listed alphabetically by their common names followed, where applicable, by chemical names and synonyms in brackets.

The Department has not added any new terms to the list of explosive materials. However, ammonium perchlorate composite propellant

(APCP) has been removed from the list of explosive materials. On March 16, 2009, the United States District Court for the District of Columbia vacated the ATF classification of APCP as an explosive as defined under 18 U.S.C. 841(d). Tripoli Rocketry Ass'n, Inc. v. ATF, No. 00–0273 (March 16, 2009) Order). As a result of the court's decision, APCP is no longer regulated under the Federal explosives laws at 18 U.S.C. Chapter 40. Accordingly, APCP has been removed from the list of explosive materials. In addition, the Department is revising the list to include a parenthetical text after "ammonium perchlorate explosive mixtures" to clarify that the term excludes APCP.

This list supersedes the List of Explosive Materials dated December 31, 2008 (Docket No. ATF 28N, 73 FR 80428).

Notice of List of Explosive Materials

Pursuant to 18 U.S.C. 841(d) and 27 CFR 555.23, I hereby designate the following as explosive materials covered under 18 U.S.C. 841(c):

Acetylides of heavy metals. Aluminum containing polymeric propellant. Aluminum ophorite explosive.

Amatex.

Amatol.

Ammonal.

Ammonium nitrate explosive mixtures (cap sensitive).

* Ammonium nitrate explosive mixtures (non-cap sensitive).

Ammonium perchlorate having particle size less than 15 microns.

Ammonium perchlorate explosive mixtures (excluding ammonium perchlorate composite propellant (APCP)).

Ammonium picrate [picrate of ammonia, Explosive D].

Ammonium salt lattice with isomorphously substituted inorganic salts.

*ANFO [ammonium nitrate-fuel oil]. Aromatic nitro-compound explosive mixtures.

Azide explosives.

Baranol. Baratol.

BEAF [1, 2-bis (2, 2-difluoro-2nitroacetoxyethane)].

Black powder.

Black powder based explosive mixtures. *Blasting agents, nitro-carbo-nitrates, including non-cap sensitive slurry and

water gel explosives. Blasting caps.

Blasting gelatin.

Blasting powder.
BTNEC [bis (trinitroethyl) carbonate]. BTNEN [bis (trinitroethyl) nitramine]. BTTN [1,2,4 butanetriol trinitrate]. Bulk salutes. Butyl tetryl.

Fulminating mercury.

Fulminating platinum. Nitrogelatin explosive. Nitrogen trichloride. Fulminating silver. Calcium nitrate explosive mixture. Nitrogen tri-iodide. Cellulose hexanitrate explosive mixture. Nitroglycerine [NG, RNG, nitro, glyceryl Chlorate explosive mixtures. Gelatinized nitrocellulose. trinitrate, trinitroglycerine]. Composition A and variations. Gem-dinitro aliphatic explosive mixtures. Nitroglycide. Composition B and variations. Composition C and variations. Guanyl nitrosamino guanyl tetrazene. Nitroglycol [ethylene glycol dinitrate, EGDN]. Guanyl nitrosamino guanylidene hydrazine. Nitroguanidine explosives. Copper acetylide. Guncotton. Nitronium perchlorate propellant mixtures. Cyanuric triazide. Nitroparaffins Explosive Grade and Cyclonite [RDX]. ammonium nitrate mixtures. Cyclotetramethylenetetranitramine [HMX]. Heavy metal azides. Nitrostarch. Cyclotol. Hexanite. Nitro-substituted carboxylic acids. Cyclotrimethylenetrinitramine [RDX]. Hexanitrodiphenylamine. Nitrourea. Hexanitrostilbene. Hexogen [RDX]. DATB [diaminotrinitrobenzene]. Hexogene or octogene and a nitrated N-Octogen [HMX]. DDNP [diazodinitrophenol]. methylaniline. Octol [75 percent HMX, 25 percent TNT]. DEGDN [diethyleneglycol dinitrate]. Hexolites. Organic amine nitrates. Detonating cord. HMTD [hexamethylenetriperoxidediamine]. Organic nitramines. Detonators. HMX [cyclo-1,3,5,7-tetramethylene 2,4,6,8-Dimethylol dimethyl methane dinitrate tetranitramine; Octogen]. composition. PBX [plastic bonded explosives]. Hydrazinium nitrate/hydrazine/aluminum Dinitroethyleneurea. explosive system. Pellet powder. Dinitroglycerine [glycerol dinitrate]. Hydrazoic acid. Penthrinite composition. Dinitrophenol. Pentolite. Dinitrophenolates. Perchlorate explosive mixtures. Dinitrophenyl hydrazine. Igniter cord. Peroxide based explosive mixtures. Dinitroresorcinol. Igniters. PETN [nitropentaerythrite, pentaerythrite Dinitrotoluene-sodium nitrate explosive Initiating tube systems. tetranitrate, pentaerythritol tetranitrate]. mixtures. Picramic acid and its salts. DIPAM [dipicramide; Picramide. diaminoĥexanitrobiphenyl]. KDNBF [potassium dinitrobenzo-furoxane]. Picrate explosives. Dipicryl sulfone. Picrate of potassium explosive mixtures. Dipicrylamine. Display fireworks. Lead azide. Picric acid (manufactured as an explosive). DNPA [2,2-dinitropropyl acrylate]. Lead mannite. Picryl chloride. DNPD [dinitropentano nitrile]. Lead mononitroresorcinate. Picryl fluoride. Dynamite. Lead picrate. PLX [95% nitromethane, 5% Lead salts, explosive. ethylenediamine]. E Lead styphnate [styphnate of lead, lead Polynitro aliphatic compounds. EDDN [ethylene diamine dinitrate]. trinitroresorcinate]. Polyolpolynitrate-nitrocellulose explosive EDNA [ethylenedinitramine]. Liquid nitrated polyol and trimethylolethane. Ednatol. Liquid oxygen explosives. Potassium chlorate and lead sulfocyanate EDNP [ethyl 4,4-dinitropentanoate]. explosive. EGDN [ethylene glycol dinitrate]. Potassium nitrate explosive mixtures. Erythritol tetranitrate explosives. Magnesium ophorite explosives. Potassium nitroaminotetrazole. Mannitol hexanitrate. Esters of nitro-substituted alcohols. Pyrotechnic compositions Ethyl-tetryl. MDNP [methyl 4,4-dinitropentanoate]. PYX [2,6-bis(picrylamino)] 3,5-MEAN [monoethanolamine nitrate]. Explosive conitrates. dinitropyridine. Explosive gelatins. Mercuric fulminate. Explosive liquids. Mercury oxalate. Explosive mixtures containing oxygen-Mercury tartrate. RDX [cyclonite, hexogen, T4, cyclo-1,3,5,releasing inorganic salts and hydrocarbons. Metriol trinitrate. trimethylene-2,4,6,-trinitramine; Explosive mixtures containing oxygen-Minol-2 [40% TNT, 40% ammonium nitrate, hexahydro-1,3,5-trinitro-S-triazine]. releasing inorganic salts and nitro bodies. 20% aluminum]. Explosive mixtures containing oxygen-MMAN [monomethylamine nitrate]; releasing inorganic salts and water methylamine nitrate. Safety fuse. Mononitrotoluene-nitroglycerin mixture. Salts of organic amino sulfonic acid insoluble fuels. Explosive mixtures containing oxygen-Monopropellants. explosive mixture. releasing inorganic salts and water soluble Salutes (bulk). N fuels. Silver acetylide. NIBTN [nitroisobutametriol trinitrate]. Explosive mixtures containing sensitized Silver azide. nitromethane. Nitrate explosive mixtures. Silver fulminate. Explosive mixtures containing Nitrate sensitized with gelled nitroparaffin. Silver oxalate explosive mixtures. Nitrated carbohydrate explosive. tetranitromethane (nitroform). Silver styphnate. Silver tartrate explosive mixtures. Nitrated glucoside explosive. Explosive nitro compounds of aromatic Nitrated polyhydric alcohol explosives. hydrocarbons. Silver tetrazene. Explosive organic nitrate mixtures. Nitric acid and a nitro aromatic compound Slurried explosive mixtures of water, inorganic oxidizing salt, gelling agent, fuel, Explosive powders. explosive. Nitric acid and carboxylic fuel explosive. and sensitizer (cap sensitive). Nitric acid explosive mixtures. Smokeless powder. Flash powder. Nitro aromatic explosive mixtures. Sodatol. Fulminate of mercury. Nitro compounds of furane explosive Sodium amatol. Sodium azide explosive mixture. Fulminate of silver. mixtures. Fulminating gold. Nitrocellulose explosive. Sodium dinitro-ortho-cresolate.

Nitroderivative of urea explosive mixture.

Sodium nitrate explosive mixtures.

Sodium nitrate-potassium nitrate explosive mixture.

Sodium picramate.

Special fireworks.

Squibs.

Styphnic acid explosives.

T

Tacot [tetranitro-2,3,5,6-dibenzo-1,3a,4,6a tetrazapentalene].

TATB [triaminotrinitrobenzene].

TATP [triacetonetriperoxide].

TEGDN [triethylene glycol dinitrate].

Tetranitrocarbazole.

Tetrazene [tetracene, tetrazine, 1(5tetrazolyl)-4-guanyl tetrazene hydrate]. Tetrazole explosives.

Tetryl [2,4,6 tetranitro-N-methylaniline].

Thickened inorganic oxidizer salt slurried explosive mixture.

TMETN [trimethylolethane trinitrate].

TNEF [trinitroethyl formal].

TNEOC [trinitroethylorthocarbonate]. TNEOF [trinitroethylorthoformate].

TNT [trinitrotoluene, trotyl, trilite, triton]. Torpex.

Tridite.

Trimethylol ethyl methane trinitrate composition.

Trimethylolthane trinitrate-nitrocellulose.

Trimonite.

Trinitroanisole.

Trinitrobenzene.

Trinitrobenzoic acid.

Trinitrocresol.

Trinitro-meta-cresol.

Trinitronaphthalene.

Trinitrophenetol.

Trinitrophloroglucinol.

Trinitroresorcinol.

Tritonal.

U

Urea nitrate.

W

Water-bearing explosives having salts of oxidizing acids and nitrogen bases, sulfates, or sulfamates (cap sensitive). Water-in-oil emulsion explosive compositions.

X

Xanthamonas hydrophilic colloid explosive

Approved: December 28, 2009.

Kenneth E. Melson,

Deputy Director.

BILLING CODE 4410-FY-P

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review: Comment Request

January 4, 2010.

The Department of Labor (DOL) hereby announces the submission of the following public information collection

request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. chapter 35). A copy of this ICR, with applicable supporting documentation; including, among other things, a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained from the RegInfo.gov Web site at http://www.reginfo.gov/ public/do/PRAMain or by contacting Darrin King on 202-693-4129 (this is not a toll-free number)/e-mail: DOL PRA PUBLIC@dol.gov.

Interested parties are encouraged to send comments to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Department of Labor—Occupational Safety and Health Administration (OSHA), Office of Management and Budget, Room 10235, Washington, DC 20503, Telephone: 202–395–7316/Fax: 202–395–5806 (these are not toll-free numbers), E-mail:

OIRA_submission@omb.eop.gov within 30 days from the date of this publication in the **Federal Register**. In order to ensure the appropriate consideration, comments should reference the OMB Control Number (see below).

The OMB is particularly interested in comments which:

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

• Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

• Enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Ågency: Occupational Safety and Health Administration.

Type of Review: Revision and extension of a previously approved collection.

Title of Collection: OSHA Data Initiative (ODI).

OMB Control Number: 1218–0209. Affected Public: Business or other forprofits and State, Local, or Tribal Government. Estimated Number of Respondents: 120.000.

Estimated Total Annual Burden Hours: 20,000.

Estimated Total Annual Costs Burden (excludes hourly wage costs): \$0.

Description: To meet the Agency's program needs, OSHA is proposing to continue its initiative to collect injury and illness data and the number of workers and hours worked from establishments in portions of the private sector and some State government agencies. The purpose of the data collection is to compile occupational injury and illness data from employers within specific industries and size categories allowing OSHA to calculate occupational injury and illness rates by employer and specific industry. The agency will require this information from up to 120,000 employers required to create and maintain records pursuant to 29 CFR Part 1904. For additional information, see the related 60-day preclearance notice published in the Federal Register at Vol. 74 FR 45881 on September 4, 2009. PRA documentation prepared in association with the preclearance notice is available on http://www.regulations.gov under docket number OSHA-2009-0029.

Darrin A. King,

Departmental Clearance Officer. [FR Doc. 2010–86 Filed 1–7–10; 8:45 am]

BILLING CODE 4510-26-P

NATIONAL SCIENCE FOUNDATION

Astronomy and Astrophysics Advisory Committee #13883; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92– 463, as amended), the National Science Foundation announces the following Astronomy and Astrophysics Advisory Committee (#13883) meeting:

Date and Time: February 1–2, 2010, 8:30 a.m.–5 p.m.

Place: National Science Foundation, Room 595, Stafford II Building, 4201 Wilson Blvd., Arlington, VA 22230.

Type of Meeting: Open.

Contact Person: Dr. Craig Foltz, Acting Director, Division of Astronomical Sciences, Suite 1045, National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230. Telephone: 703–292–4909.

Purpose of Meeting: To provide advice and recommendations to the National Science Foundation (NSF), the National Aeronautics and Space Administration (NASA) and the U.S. Department of Energy (DOE) on issues within the field of astronomy and
