4 **SEC. 3. FINDINGS, PURPOSES, AND POLICY.**

5 (a) SECTION HEADING.—Section 2 (29 U.S.C. 2201)
6 is amended by striking the heading and inserting the fol-
7 lowing:

8 **“SEC. 2. FINDINGS, PURPOSES, AND POLICY.”.**

9 (b) FINDINGS.—Section 2(a) (29 U.S.C. 2201(a)) is
10 amended to read as follows:

11 “(a) FINDINGS.—The Congress finds as follows:

12 “(1) Disability is a natural part of the human
13 experience and in no way diminishes the right of in-
14 dividuals to—

15 “(A) live independently;

16 “(B) enjoy self-determination;

17 “(C) make choices;

18 “(D) pursue meaningful careers; and

19 “(E) enjoy full inclusion and integration in
20 the economic, political, social, cultural, and edu-
21 cational mainstream of American society.

22 “(2) During the past decade, there have been
23 major advances in modern technology. Technology is
24 now a powerful force in the lives of all residents of
25 the United States. Technology can provide important

1 tools for making the performance of tasks quicker
2 and easier.

3 “(3) For some individuals with disabilities,
4 assistive technology devices and assistive technology
5 services are necessary to enable the individuals—

6 “(A) to have greater control over their
7 lives;

8 “(B) to participate in, and contribute more
9 fully to, activities in their home, school, and
10 work environments, and in their communities;

11 “(C) to interact to a greater extent with
12 individuals who do not have disabilities; and

13 “(D) to otherwise benefit from opportuni-
14 ties that are taken for granted by individuals
15 who do not have disabilities.

16 “(4) Substantial progress has been made in the
17 development of assistive technology devices, includ-
18 ing adaptations to existing equipment, that signifi-
19 cantly benefit individuals with disabilities of all ages.
20 Such devices can be used to increase the involvement
21 of such individuals in, and reduce expenditures asso-
22 ciated with, programs and activities such as early
23 intervention, education, rehabilitation and training,
24 employment, residential living, independent living,
25 recreation, and other aspects of daily living.

1 “(5) Most States have technology-related assist-
2 ance programs carried out under this Act. In spite
3 of the efforts made by such programs, there remains
4 a need to support systems change and advocacy ac-
5 tivities in order to assist States to develop and im-
6 plement consumer-responsive, comprehensive state-
7 wide programs of technology-related assistance for
8 individuals with disabilities of all ages.

9 “(6) Notwithstanding the efforts of such State
10 technology-related assistance programs, there is still
11 a lack of—

12 “(A) resources to pay for assistive tech-
13 nology devices and assistive technology services;

14 “(B) trained personnel to assist individuals
15 with disabilities to use such devices and serv-
16 ices;

17 “(C) information among individuals with
18 disabilities and their family members, guard-
19 ians, advocates, and authorized representatives,
20 individuals who work for public agencies, or for
21 private entities (including insurers), that have
22 contact with individuals with disabilities, edu-
23 cators and related service personnel, technology
24 experts (including engineers), employers, and
25 other appropriate individuals about the avail-

1 ability and potential of technology for individ-
2 uals with disabilities;

3 “(D) aggressive outreach to
4 underrepresented populations and rural popu-
5 lations;

6 “(E) systems that ensure timely acquisi-
7 tion and delivery of assistive technology devices
8 and assistive technology services, particularly
9 with respect to children;

10 “(F) coordination among State human
11 services programs, and between such programs
12 and private entities, particularly with respect to
13 transitions between such programs and entities;
14 and

15 “(G) capacity in such programs to provide
16 the necessary technology-related assistance.

17 “(7) Many individuals with disabilities cannot
18 access existing telecommunications and information
19 technologies and are at risk of not being able to ac-
20 cess developing technologies. The failure of Federal
21 and State governments, hardware manufacturers,
22 software designers, information systems managers,
23 and telecommunications service providers to account
24 for the specific needs of individuals with disabilities
25 results in the exclusion of such individuals from the

1 use of telecommunications and information tech-
2 nologies and results in unnecessary costs associated
3 with the retrofitting of devices and product systems.

4 “(8) There are insufficient incentives for the
5 commercial pursuit of the application of technology
6 devices to meet the needs of individuals with disabili-
7 ties, because of the perception that such individuals
8 constitute a limited market.

9 “(9) At the Federal level, there is a lack of co-
10 ordination among agencies that provide or pay for
11 the provision of assistive technology devices and
12 assistive technology services. In addition, the Fed-
13 eral Government does not provide adequate assist-
14 ance and information with respect to the use of
15 assistive technology devices and assistive technology
16 services to individuals with disabilities and their
17 family members, guardians, advocates, and author-
18 ized representatives, individuals who work for public
19 agencies, or for private entities (including insurers),
20 that have contact with individuals with disabilities,
21 educators and related services personnel, technology
22 experts (including engineers), employers, and other
23 appropriate individuals.”.

24 (c) PURPOSES.—Section 2(b) (29 U.S.C. 2201(b)) is
25 amended to read as follows:

1 “(b) PURPOSES.—The purposes of this Act are as fol-
2 lows:

3 “(1) To provide financial assistance to the
4 States to support systems change and advocacy ac-
5 tivities designed to assist each State in developing
6 and implementing a consumer-responsive com-
7 prehensive statewide program of technology-related
8 assistance, for individuals with disabilities of all
9 ages, that is designed to—

10 “(A) increase the availability of, funding
11 for, access to, and provision of, assistive tech-
12 nology devices and assistive technology services;

13 “(B) increase the active involvement of in-
14 dividuals with disabilities and their family mem-

18 gram;

19 “(C) increase the involvement of individ-

21 family members, guardians, advocates, or au-
22 thorized representatives, in decisions related to
23 the provision of assistive technology devices and
24 assistive technology services;

1 “(D) increase the provision of outreach to
2 underrepresented populations and rural popu-
3 lations, to enable the two populations to enjoy
4 the benefits of programs carried out to accom-
5 plish purposes described in this paragraph to
6 the same extent as other populations;

7 “(E) increase and promote coordination
8 among State agencies, and between State agen-
9 cies and private entities, that are involved in
10 carrying out activities under this title, particu-
11 larly providing assistive technology devices and
12 assistive technology services, that accomplish a
13 purpose described in another subparagraph of
14 this paragraph;

15 “(F)(i) increase the awareness of laws,
16 regulations, policies, practices, procedures, and
17 organizational structures, that facilitate the
18 availability or provision of assistive technology
19 devices and assistive technology services; and

20 “(ii) facilitate the change of laws, regula-
21 tions, policies, practices, procedures, and orga-
22 nizational structures, that impede the availabil-
23 ity or provision of assistive technology devices
24 and assistive technology services;

1 “(G) increase the probability that individ-
2 uals with disabilities of all ages will, to the ex-
3 tent appropriate, be able to secure and main-
4 tain possession of assistive technology devices
5 as such individuals make the transition between
6 services offered by human service agencies or
7 between settings of daily living;

8 “(H) enhance the skills and competencies
9 of individuals involved in providing assistive
10 technology devices and assistive technology
11 services;

12 “(I) increase awareness and knowledge of
13 the efficacy of assistive technology devices and
14 assistive technology services among—

15 “(i) individuals with disabilities and
16 their family members, guardians, advo-
17 cates, and authorized representatives;

18 “(ii) individuals who work for public
19 agencies, or for private entities (including
20 insurers), that have contact with individ-
21 uals with disabilities;

22 “(iii) educators and related services
23 personnel;

24 “(iv) technology experts (including en-
25 gineers);

1 “(v) employers; and

2 “(vi) other appropriate individuals;

3 “(J) increase the capacity of public agen-
4 cies and private entities to provide and pay for
5 assistive technology devices and assistive tech-
6 nology services on a statewide basis for individ-
7 uals with disabilities of all ages; and

8 “(K) increase the awareness of the needs
9 of individuals with disabilities for assistive tech-
10 nology devices and for assistive technology serv-
11 ices.

12 “(2) To identify Federal policies that facilitate
13 payment for assistive technology devices and
14 assistive technology services, to identify Federal poli-
15 cies that impede such payment, and to eliminate in-
16 appropriate barriers to such payment.

17 “(3) To enhance the ability of the Federal Gov-
18 ernment to provide States with—

19 “(A) technical assistance, information,
20 training, and public awareness programs relat-
21 ing to the provision of assistive technology de-
22 vices and assistive technology services; and

23 “(B) funding for demonstration projects.”.

24 (d) POLICY.—Section 2 (29 U.S.C. 2201) is amended
25 by adding at the end the following:

1 “(c) POLICY.—It is the policy of the United States
2 that all programs, projects, and activities receiving assist-
3 ance under this Act shall be consumer-responsive and shall
4 be carried out in a manner consistent with the principles
5 of—

6 “(1) respect for individual dignity, personal re-
7 sponsibility, self-determination, and pursuit of mean-
8 ingful careers, based on informed choice, of individ-
9 uals with disabilities;

10 “(2) respect for the privacy, rights, and equal
11 access (including the use of accessible formats), of
12 such individuals;

13 “(3) inclusion, integration, and full participa-
14 tion of such individuals;

15 “(4) support for the involvement of a family
16 member, a guardian, an advocate, or an authorized
17 representative, if an individual with a disability re-
18 quests, desires, or needs such support; and

19 “(5) support for individual and systems advo-
