SEC. 404. PROMOTION OF SOUND FINANCIAL PRACTICES BY THE UNITED NATIONS.

(a) FINDINGS.—Congress makes the following findings:

(1) In the early 1980s, the United States Government began to pay United States assessments to certain international organizations in the last quarter of the calendar year in which they were due. This practice allowed the United States to pay its annual assessment to the United Nations and other

international organizations with the next fiscal year's appropriations, taking advantage of the fact that international organizations operate on calendar years. It also allowed the United States to reduce budgetary outlays, making the United States budget deficit appear smaller.

(2) The United States, which is assessed 22 percent of the United Nations regular budget, now pays its dues at least 10 months late, and often later depending on when the relevant appropriation is enacted.

(3) This practice causes the United Nations to operate throughout much of the year without a significant portion of its operating budget. By midyear, the budget is usually depleted, forcing the United Nations to borrow from its separate peacekeeping budget (the organization is prohibited from external borrowing). As a result, countries that contribute to United Nations peacekeeping missions are not reimbursed on a timely basis.

(4) For years, the United States has been encouraging the United Nations and other international organizations to engage in sound, fiscally responsible budgetary practices. In fact, many of the conditions in United States law for paying nearly \$1,000,000,000 in debt to the United Nations and other international organizations are aimed at this goal. But late payment of United States dues forces the United Nations and other international organizations to engage in budgetary practices that are neither sound nor responsible.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the United States should initiate a process to synchronize the payment of its assessments to the United Nations and other international organizations over a multiyear period so that the United States can resume paying its dues to such international organizations at the beginning of each calendar year.

(c) AUTHORIZATION OF APPROPRIATIONS.—

(1) IN GENERAL.—In addition to amounts otherwise available for the purpose of payment of the United States assessed contributions to the United Nations and other international organizations, there are authorized to be appropriated such sums as may be necessary to carry out the policy described in subsection (b).

(2) AVAILABILITY OF FUNDS.—Amounts appropriated pursuant to paragraph (1) are authorized to remain available until expended.

SEC. 1305. INTERNATIONAL ATOMIC ENERGY AGENCY REGULAR BUDGET ASSESSMENTS AND VOLUNTARY CONTRIBUTIONS.

(a) **FINDINGS.**—Congress makes the following findings:

(1) The Department has concluded that the International Atomic Energy Agency (in this section referred to as the “IAEA”) is a critical and effective instrument for verifying compliance with international nuclear nonproliferation agreements, and that it serves as an essential barrier to the spread of nuclear weapons.

(2) The IAEA furthers United States national security objectives by helping to prevent the proliferation of nuclear weapons material, especially through its work on effective verification and safeguards measures.

(3) The IAEA can also perform a critical role in monitoring and verifying aspects of nuclear weapons reduction agreements between nuclear weapons states.

(4) The IAEA has adopted a multifaceted action plan, to be funded by voluntary contributions, to address the threats posed by radioactive sources that could be used in a radiological weapon and will be the leading international agency in this effort.

(5) As the IAEA has negotiated and developed more effective verification and safeguards measures, it has experienced significant real growth in its mission, especially in the vital area of nuclear safeguards inspections.

(6) Nearly two decades of zero budget growth have affected the ability of the IAEA to carry out its mission and to hire and retain the most qualified inspectors and managers, as evidenced in the decreasing proportion of such personnel who hold doctorate degrees.

(7) Increased voluntary contributions by the United States will be needed if the IAEA is to increase its safeguards activities and also to implement its action plan to address the worldwide risks posed by lost or poorly secured radioactive sources.

(8) Although voluntary contributions by the United States lessen the IAEA’s budgetary constraints, they cannot readily be used for the long-term capital investments or permanent staff increases necessary to an effective IAEA safeguards regime.

(9) The recent United States decision to accept a 25 percent IAEA regular budget assessment was based upon a correct interpretation of existing law. It was not the intent of Congress that the United States contributions to all United Nations-related organizations and activities be reduced pursuant to the Admiral James W. Nance and Meg Donovan Foreign Relations Authorization Act, Fiscal Years 2000 and 2001 (as enacted into law by section 1000(a)(7) of Public Law 106–113; 113 Stat. 1501A–405 et seq.), which sets 22 percent assessment rates as benchmarks for the general United Nations budget, the Food and Agricultural Organization, the World Health Organization, and the International Labor Organization. Rather, contributions for an important and effective agency such as the IAEA should be maintained at levels commensurate with the criticality of its mission.

(10) The Secretary should negotiate a gradual and sustained increase in the regular budget of the International Atomic Energy Agency, which should begin with the 2004 budget.

(b) **AUTHORIZATION OF APPROPRIATIONS.**—Of the funds authorized to be appropriated for Nonproliferation, Anti-terrorism, Demining, and Related Programs there is authorized to be appropriated \$60,000,000 for fiscal year 2003 for a United States voluntary contribution to the International Atomic Energy Agency, including for the purpose of implementing the Protection Against Nuclear Terrorism program adopted by the International Atomic Energy Agency Board of Governors in March 2002.

“(B) components that are listed on Annex A or Annex B to the Nuclear Suppliers Group Guidelines for the Export of Nuclear Material, Equipment and Technology (published by the International Atomic Energy Agency as Information Circular INFCIRC/254/Rev. 5/Part 1, or any subsequent revision thereof).”.

Subtitle B—Russian Federation Debt Reduction for Nonproliferation

SEC. 1311. SHORT TITLE.

This subtitle may be cited as the “Russian Federation Debt for Nonproliferation Act of 2002”.

SEC. 1312. FINDINGS AND PURPOSES.

(a) **FINDINGS.**—Congress finds the following:

(1) It is in the vital security interests of the United States to prevent the spread of weapons of mass destruction to additional states or to terrorist organizations, and to ensure that other nations’ obligations to modify their stockpiles of such arms in accordance with treaties, executive agreements, or political commitments are fulfilled.

(2) In particular, it is in the vital national security interests of the United States to ensure that—

(A) all stocks of nuclear weapons and weapons-usable nuclear material in the Russian Federation are secure and accounted for;

(B) stocks of nuclear weapons and weapons-usable nuclear material that are excess to military needs in the Russian Federation are monitored and reduced;

(C) any chemical or biological weapons, related materials, and facilities in the Russian Federation are destroyed;

(D) the Russian Federation’s nuclear weapons complex is reduced to a size appropriate to its post-Cold War missions, and its experts in weapons of mass destruction technologies are shifted to gainful and sustainable civilian employment;

(E) the Russian Federation’s export control system blocks any proliferation of weapons of mass destruction, the means of delivering such weapons, and materials, equipment, know-how, or technology that would be used to develop, produce, or deliver such weapons; and

(F) these objectives are accomplished with sufficient monitoring and transparency to provide confidence that they have in fact been accomplished and that the funds provided to accomplish these objectives have been spent efficiently and effectively.

(3) United States programs should be designed to accomplish these vital objectives in the Russian Federation as rapidly

as possible, and the President should develop and present to Congress a plan for doing so.

(4) Substantial progress has been made in United States-Russian Federation cooperative programs to achieve these objectives, but much more remains to be done to reduce the urgent risks to United States national security posed by the current state of the Russian Federation's weapons of mass destruction stockpiles and complexes.

(5) The threats posed by inadequate management of weapons of mass destruction stockpiles and complexes in the Russian Federation remain urgent. Incidents in years immediately preceding 2001, which have been cited by the Russia Task Force of the Secretary of Energy Advisory Board, include—

(A) a conspiracy at one of the Russian Federation's largest nuclear weapons facilities to steal nearly enough highly enriched uranium for a nuclear bomb;

(B) an attempt by an employee of the Russian Federation's premier nuclear weapons facility to sell nuclear weapons designs to agents of Iraq and Afghanistan; and

(C) the theft of radioactive material from a Russian Federation submarine base.

(6) Addressing these threats to United States and world security will ultimately consume billions of dollars, a burden that will have to be shared by the Russian Federation, the United States, and other governments, if these threats are to be neutralized.

(7) The creation of new funding streams could accelerate progress in reducing these threats to United States security and help the government of the Russian Federation to fulfill its responsibility for secure management of its weapons stockpiles and complexes as United States assistance phases out.

(8) The Russian Federation has a significant foreign debt, a substantial proportion of which it inherited from the Soviet Union.

(9) Past debt-for-environment exchanges, in which a portion of a country's foreign debt is canceled in return for certain environmental commitments or payments by that country, suggest that a debt-for-nonproliferation exchange with the Russian Federation could be designed to provide additional funding for nonproliferation and arms reduction initiatives.

(10) Most of the Russian Federation's official bilateral debt is held by United States allies that are advanced industrial democracies. Since the issues described pose threats to United States allies as well, United States leadership that results in a larger contribution from United States allies to cooperative threat reduction activities will be needed.

(11) At the June 2002 meeting of the G-8 countries, agreement was achieved on a G-8 Global Partnership against the Spread of Weapons and Materials of Mass Destruction, under which the advanced industrial democracies committed to contribute \$20,000,000,000 to nonproliferation programs in the Russian Federation during a 10-year period, with each contributing country having the option to fund some or all of its contribution through reduction in the Russian Federation's official debt to that country.

(12) The Russian Federation's Soviet-era official debt to the United States is estimated to be \$480,000,000 in Lend-

Lease debt and \$2,250,000,000 in debt as a result of credits extended under title I of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1701 et seq.).

(b) PURPOSES.—The purposes of this subtitle are—

(1) to facilitate the accomplishment of the United States objectives described in the findings set forth in subsection (a) by providing for the use of a portion of the Russian Federation's foreign debt to fund nonproliferation programs, thus allowing the use of additional resources for these purposes; and

(2) to help ensure that the resources made available to the Russian Federation are targeted to the accomplishment of the United States objectives described in the findings set forth in subsection (a).

Any such dialogue with India or Pakistan would not be represented or considered, nor would it be intended, as granting any recognition to India or Pakistan, as appropriate, as a nuclear weapon state (as defined in the Treaty on the Non-Proliferation of Nuclear Weapons).

(c) REPORT.—Not later than March 1, 2003, the President shall submit to the appropriate congressional committees a report describing United States efforts to achieve the objectives listed in subsections (a) and (b), the progress made toward the achievement of those objectives, and the likelihood that each objective will be achieved by September 30, 2003.

SEC. 1602. REAL-TIME PUBLIC AVAILABILITY OF RAW SEISMOLOGICAL DATA.

The head of the Air Force Technical Applications Center shall make available to the public, immediately upon receipt or as soon after receipt as is practicable, all raw seismological data provided to the United States Government by any international monitoring organization that is directly responsible for seismological monitoring.

SEC. 1603. DETAILING UNITED STATES GOVERNMENTAL PERSONNEL TO INTERNATIONAL ARMS CONTROL AND NON-PROLIFERATION ORGANIZATIONS.

(a) IN GENERAL.—The Secretary, in consultation with the Secretaries of Defense and Energy and the heads of other relevant United States departments and agencies, as appropriate, should develop measures to improve the process by which United States Government personnel may be detailed to international arms control and nonproliferation organizations without adversely affecting the pay or career advancement of such personnel.

(b) REPORT REQUIRED.—Not later than May 1, 2003, the Secretary shall submit a report to the Committee on Foreign Relations of the Senate and the Committee on International Relations of the House of Representatives setting forth the measures taken under subsection (a).

SEC. 1604. DIPLOMATIC PRESENCE OVERSEAS.

(a) PURPOSE.—The purpose of this section is to—

(1) elevate the stature given United States diplomatic initiatives relating to nonproliferation and political-military issues; and

(2) develop a group of highly specialized, technical experts with country expertise capable of administering the nonproliferation and political-military affairs functions of the Department.

(b) **AUTHORITY.**—To carry out the purposes of subsection (a), the Secretary is authorized to establish the position of Counselor for Nonproliferation and Political Military Affairs in United States diplomatic missions overseas, to be filled by individuals who are career Civil Service officers or Foreign Service officers committed to follow-on assignments in the Nonproliferation Bureau or the Political Military Affairs Bureau of the Department.

(c) **TRAINING.**—After being selected to serve as Counselor, any person so selected shall spend not less than 10 months in language training courses at the Foreign Service Institute, or in technical courses administered by the Department of Defense, the Department of Energy, or other appropriate departments and agencies of the United States, except that such requirement for training may be waived by the Secretary.

SEC. 1605. COMPLIANCE WITH THE CHEMICAL WEAPONS CONVENTION.

(a) **FINDINGS.**—Congress makes the following findings:

(1) On April 24, 1997, the Senate provided its advice and consent to ratification of the Chemical Weapons Convention subject to the condition, among others, that the President certify that no sample collected in the United States pursuant to the Convention will be transferred for analysis to any laboratory outside the territory of the United States.

(2) Congress enacted the same condition into law as section 304(f)(1) of the Chemical Weapons Convention Implementation Act of 1998 (22 U.S.C. 6724(f)(1)).

(3) Part II, paragraph 57, of the Verification Annex of the Convention requires that all samples requiring off-site analysis under the Convention shall be analyzed by at least two laboratories that have been designated as capable of conducting such testing by the OPCW.

(4) The only United States laboratory currently designated by the OPCW is the United States Army Edgewood Forensic Science Laboratory.

(5) In order to comply with the Chemical Weapons Convention, the certification submitted pursuant to condition (18) of the resolution of ratification of the Chemical Weapons Convention, and the requirements of section 304(f)(1) of the Chemical Weapons Convention Implementation Act of 1998 (22 U.S.C. 6724(f)(1)), the United States must possess, at a minimum, a second OPCW-designated laboratory.

(6) The possession of a second OPCW-designated laboratory is necessary in view of the potential for a challenge inspection to be initiated against the United States by a foreign nation.

(7) The possession of a third OPCW-designated laboratory would enable the OPCW to implement its normal sample analysis procedures, which randomly assign real and manufactured samples so that no laboratory knows the origin of a given sample.

(8) To qualify as a designated laboratory, a laboratory must be certified under ISO Guide 25 or a higher standard and complete three proficiency tests. The laboratory must have the full capability to handle substances listed on Schedule

1 of the Annex on Schedules of Chemicals of the Chemical Weapons Convention. In order to handle such substances in the United States, a laboratory also must operate under a bailment agreement with the United States Army.

(9) Several existing United States commercial laboratories have approved quality control systems, already possess bailment agreements with the United States Army, and have the capabilities necessary to obtain OPCW designation.

(10) In order to bolster the legitimacy of United States analysis of samples taken on its national territory, it is preferable that one designated laboratory not be a United States Government facility.

(b) ESTABLISHMENT OF NON-GOVERNMENTAL DESIGNATED LABORATORY.—

(1) REPORT.—Not later than March 1, 2003, the United States National Authority, as designated under section 101 of the Chemical Weapons Convention Implementation Act of 1998 (22 U.S.C. 6711) (referred to in this section as the “National Authority”), shall submit to the appropriate congressional committees a report detailing a plan for securing OPCW designation of a nongovernmental United States laboratory by December 1, 2004.

(2) DIRECTIVE.—Not later than June 1, 2003, the National Authority shall select, through competitive procedures, a nongovernmental laboratory within the United States to pursue designation by the OPCW.

(3) DELEGATION.—The National Authority may delegate the authority and administrative responsibility for carrying out paragraph (2) to one or more of the heads of the agencies described in section 101(b)(2) of the Chemical Weapons Convention Implementation Act of 1998 (22 U.S.C. 6711(b)(2)).

(c) DEFINITIONS.—In this section:

(1) CHEMICAL WEAPONS CONVENTION OR CONVENTION.—The term “Chemical Weapons Convention” or “Convention” means the Convention on the Prohibition of Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction, Opened for Signature and Signed by the United States at Paris on January 13, 1993, including the following protocols and memorandum of understanding:
