levels of program planning and budgetary decisionmaking within the Air Force;

(B) advocacy for science and technology development is institutionalized across all levels of Air Force management in a manner that is not dependent on individuals; and

(C) the value of Air Force science and technology development is made increasingly apparent to the warfighters, by linking the needs of those warfighters with decisions on science and technology development.

(2) Complete and adopt a policy directive that provides for changes in how the Air Force makes budgetary and nonbudgetary decisions with respect to its science and technology development programs and how it carries out those programs.

(3) At least once every five years, conduct a review of the long-term challenges and short-term objectives of the Air Force science and technology programs that is consistent with the review specified in section 252 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (as enacted into law by Public Law 106–398; 114 Stat. 1654A–46).
(4) Ensure that development and science and technology planning and investment activities are carried out for future space warfighting systems and for future nonspace warfighting systems in an integrated manner.

(b) MATTERS STUDIED.—(1) The study shall independently review and assess whether such changes as a whole are sufficient to ensure the following:

(A) That the concerns about the management of the science and technology program that have been raised by the Congress, the Defense Science Board, the Air Force Science Advisory Board, and the Air Force Association have been adequately addressed.

(B) That appropriate and sufficient technology is available to ensure the military superiority of the United States and counter future high-risk threats.

(C) That the science and technology investments are balanced to meet the near-, mid-, and long-term needs of the Air Force.

(D) That technologies are made available that can be used to respond flexibly and quickly to a wide range of future threats.

(E) That the Air Force organizational structure provides for a sufficiently senior level advocate of science and technology to ensure an ongoing, effective presence of the science and technology community during the budget and planning process.

(2) In addition, the study shall independently assess the specific changes to the Air Force science and technology program as follows:
(A) Whether the biannual science and technology summits provide sufficient visibility into, and understanding and appreciation of, the value of the science and technology program to the senior level of Air Force budget and policy decisionmakers.

(B) Whether the applied technology councils are effective in contributing the input of all levels beneath the senior leadership into the coordination, focus, and content of the science and technology program.

(C) Whether the designation of the commander of the Air Force Materiel Command as the science and technology budget advocate is effective to assure that an adequate budget top line is set.

(D) Whether the revised development planning process is effective to aid in the coordination of the needs of the Air Force warfighters with decisions on science and technology investments and the establishment of priorities among different science and technology programs.

(E) Whether the implementation of section 252 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (as enacted into law by Public Law 106–398; 114 Stat. 1654A–46) is effective to identify the basis for the appropriate science and technology program top line and investment portfolio.
(c) REPORT.—Not later than 60 days after the date on which the study required by subsection (a) is completed, the Secretary of the Air Force shall submit to Congress the results of the study.

(a) Reduction of Defense Acquisition and Support Workforce.—The Secretary of Defense shall accomplish reductions in defense acquisition and support personnel positions during fiscal year 2002 so that the total number of such personnel as of October 1, 2002, is less than the total number of such personnel as of October 1, 2001, by at least 13,000.

SEC. 902. SENSE OF CONGRESS ON ESTABLISHMENT OF AN OFFICE OF TRANSFORMATION IN THE DEPARTMENT OF DEFENSE.

(a) Findings.—Congress finds the following:
The Armed Forces should give careful consideration to implementing transformation to meet operational challenges and exploit opportunities resulting from changes in the threat environment and the emergence of new technologies.

A 1999 Defense Science Board report on transformation concluded that there was no overall Department of Defense vision for transformation, no road map, no metrics to measure progress, and little sense of urgency.

Historic case studies have shown that within the military, as well as commercial enterprises, successful transformation must be directed from the highest levels of an organization.

It is the sense of Congress that the Secretary of Defense should consider the establishment of an Office of Transformation within the Office of the Secretary of Defense to advise the Secretary on—

(1) development of force transformation strategies to ensure that the military of the future is prepared to dissuade potential military competitors and, if that fails, to fight and win decisively across the spectrum of future conflict;
(2) ensuring a continuous and broadly focused transformation process;

(3) service and joint acquisition and experimentation efforts, funding for experimentation efforts, promising operational concepts and technologies, and other transformation activities, as appropriate; and

(a) **Findings.**—Congress finds the following:

(1) The Lafayette Escadrille, an aviation squadron within the French Lafayette Flying Corps, was formed April 16, 1916.

(2) The Lafayette Escadrille consisted of aviators from the United States who volunteered to fight for the people of France during World War I.

(3) 265 volunteers from the United States served in the Lafayette Flying Corps, completing 3,000 combat sorties and amassing nearly 200 victories.

(4) The Lafayette Escadrille won 4 Legions of Honor, 7 Medailles Militaires, and 31 citations, each with a Croix de Guerre.

(5) In 1918, command of the Lafayette Escadrille was transferred to the United States, where the Lafayette Escadrille became the combat air force of the United States.

(6) In 1921, a Franco-American committee was organized to locate a final resting place for the 68 United States aviators who lost their lives flying for France during World War I.
(7) The Lafayette Escadrille Memorial was dedicated on July 4, 1928, in honor of all United States aviators who flew for France during World War I.

(8) The Lafayette Escadrille Memorial Foundation, located in the United States and in France, was founded by Nelson Cromwell in 1930 and endowed with a $1,500,000 trust for the maintenance and upkeep of the Lafayette Escadrille Memorial.

(9) Environmental conditions have contributed to structural damage to, and the overall degradation of, the Lafayette Escadrille Memorial, preventing the holding of memorial services inside the crypt.

(10) The French Government has pledged funds to support a restoration of the Lafayette Escadrille Memorial.

(11) The Lafayette Escadrille Memorial should be restored to its original beauty to honor all the United States aviators who flew for France during World War I and to demonstrate the respect of the United States for the sacrifices made by all Americans who have served our Nation and our allies.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the United States should continue to honor its commitment to the United States aviators who lost their lives flying for France during World War I by appropriating suffi-
cient funds to restore the Lafayette Escadrille Memorial in Marnes La-Coguette, France.

SEC. 1049. DESIGNATION OF FIREFIGHTER ASSISTANCE PROGRAM IN HONOR OF FLOYD D. SPENCE, A FORMER MEMBER OF THE HOUSE OF REPRESENTATIVES, AND SENSE OF CONGRESS ON NEED TO CONTINUE THE PROGRAM.

(1) by inserting “AND DESIGNATION” after “ESTABLISHMENT”; and

(2) by adding at the end the following new sentence: “The program of firefighter assistance administered by the Office shall be known as the ‘Floyd D. Spence Memorial Domestic Defenders Initiative’.”.

(b) SENSE OF CONGRESS.—The firefighters assistance grant program authorized by section 33 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229) is recognized as having served as an effective device in Congress’ ongoing effort to address the needs of America’s fire service, and it is the sense of Congress that the program should be reauthorized for fiscal year 2003 and subsequent fiscal years at a higher level of funding.
SEC. 1050. SENSE OF CONGRESS ON IMPLEMENTATION OF FUEL EFFICIENCY REFORMS IN DEPARTMENT OF DEFENSE.

(a) FINDINGS.—Congress finds the following:

(1) The Federal Government is the largest single energy user in the United States, and the Department of Defense is the largest energy user among all Federal agencies.

(2) The Department of Defense consumed 595,000,000,000,000 BTUs of petroleum in fiscal year 1999, while all other Federal agencies combined consumed 56,000,000,000,000 BTUs of petroleum.

(3) The total cost of petroleum to the Department of Defense amounted to $3,600,000,000 in fiscal year 2000.

(4) Increased fuel efficiency would reduce the cost of delivering fuel to military units during operations and training and allow a corresponding percentage of defense dollars to be reallocated to logistic shortages and other readiness needs.

(5) Increased fuel efficiency would decrease the time needed to assemble military units, would increase unit flexibility, and would allow units to remain in the field for a longer period of time.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Secretary of Defense should work to implement fuel

(a) FINDINGS.—The Congress finds the following:

(1) The National Defense Features program, which is funded from the National Defense Sealift Fund established by section 2218 of title 10, United States Code, is a constituent element of the defense policy of the United States intended to provide essential sealift capacity in emergencies, strengthen the national shipbuilding base, and maintain a resource of highly trained merchant seamen.

(2) Implementation of the National Defense Features program would provide significant benefits both for the United States and for allied nations during military contingencies.
(3) For the United States and nations allied with the United States to realize these benefits, it is essential that vessels built under that program enjoy commercial opportunities in peacetime on trade routes between the United States and allied nations and that those vessels not be excluded from such opportunities through restrictive trade practices.

(4) The failure of vessels built, or to be built, under the National Defense Features program to obtain employment as common carriers or contract carriers in the particular sector of any trade route in the foreign commerce of the United States for which they are designed to operate, together with long-term domination of that sector of the trade route by citizens of an allied nation, evidences the existence of restrictive trade practices.

(b) ACTION TO PROMOTE PROGRAM.—In any case in which the Secretary of Defense finds the existence of the conditions determined by subsection (a)(4) to prove the existence of restrictive trade practices, the Secretary shall certify the case to the Federal Maritime Commission, which thereupon, in consultation with the Secretary, shall take action to counteract such practices, utilizing all remedies available under section 10002(e)(1) of the Foreign Shipping Practices Act of 1988 (46 U.S.C.
