

108TH CONGRESS
2D SESSION

S. 2595

To establish State grant programs related to assistive technology and protection and advocacy services, and for other purposes.

IN THE SENATE OF THE UNITED STATES

JUNE 24, 2004

Mr. GREGG (for himself, Mr. HARKIN, Mr. ROBERTS, Mr. KENNEDY, Mr. REED, Mrs. MURRAY, Mr. JEFFORDS, Mr. ENZI, and Mr. DODD) introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

A BILL

To establish State grant programs related to assistive technology and protection and advocacy services, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Improving Access to
5 Assistive Technology for Individuals with Disabilities Act
6 of 2004”.

7 **SEC. 2. FINDINGS AND PURPOSE.**

8 (a) FINDINGS.—Congress finds the following:

1 (1) Over 54,000,000 individuals in the United
2 States have disabilities, with almost half experi-
3 encing severe disabilities that affect their ability to
4 see, hear, communicate, reason, walk, or perform
5 other basic life functions.

6 (2) Disability is a natural part of the human
7 experience and in no way diminishes the right of in-
8 dividuals to—

9 (A) live independently;

10 (B) enjoy self-determination and make
11 choices;

12 (C) benefit from an education;

13 (D) pursue meaningful careers; and

14 (E) enjoy full inclusion and integration in
15 the economic, political, social, cultural, and edu-
16 cational mainstream of society in the United
17 States.

18 (3) Too many individuals with disabilities are
19 outside the economic and social mainstream of soci-
20 ety in the United States. For example, individuals
21 with disabilities are less likely than their non-dis-
22 abled peers to graduate from high school, participate
23 in postsecondary education, work, own a home, par-
24 ticipate fully in their community, vote, or use the
25 computer and the internet.

1 (4) As President Bush’s New Freedom Initia-
2 tive states, “Assistive and universally designed tech-
3 nologies can be a powerful tool for millions of Ameri-
4 cans with disabilities, dramatically improving one’s
5 quality of life and ability to engage in productive
6 work. New technologies are opening opportunities
7 for even those with the most severe disabilities. For
8 example, some individuals with quadriplegia can now
9 operate computers by the glance of an eye.”.

10 (5) According to the National Council on Dis-
11 ability, “For Americans without disabilities, tech-
12 nology makes things easier. For Americans with dis-
13 abilities, technology makes things possible.”.

14 (6) Substantial progress has been made in the
15 development of assistive technology devices, univer-
16 sally designed products, and accessible information
17 technology and telecommunications systems. Those
18 devices, products, and systems can facilitate commu-
19 nication, ensure independent functioning, enable
20 early childhood development, support educational
21 achievement, provide and enhance employment op-
22 tions, and enable full participation in community liv-
23 ing. Access to such devices, products, and systems
24 can also reduce expenditures associated with early
25 childhood intervention, education, rehabilitation and

1 training, health care, employment, residential living,
2 independent living, recreation opportunities, and
3 other aspects of daily living.

4 (7) Over the last 15 years, the Federal Govern-
5 ment has invested in the development of statewide
6 comprehensive systems of assistive technology, which
7 have proven effective in assisting individuals with
8 disabilities in accessing assistive technology devices
9 and assistive technology services. Federal dollars
10 fund statewide infrastructures that support equip-
11 ment demonstration programs, short-term device
12 loan programs, financial loan programs, equipment
13 exchange and recycling programs, training pro-
14 grams, advocacy services, and information and refer-
15 ral services.

16 (8) Despite the success of the programs and
17 services described in paragraph (7), individuals with
18 disabilities who need assistive technology and acces-
19 sible information technology continue to have a great
20 need to know what technology is available, to deter-
21 mine what technology is most appropriate, and to
22 obtain and utilize that technology to ensure their
23 maximum independence and participation in society.

24 (9) The 2000 decennial Census indicates that
25 over 21,000,000 individuals in the United States,

1 more than 8 percent of the United States population,
2 have a disability that limits their basic physical abili-
3 ties such as walking, climbing stairs, reaching, lifting,
4 or carrying. Nearly 12 percent of working-age indi-
5 viduals in the United States, or 21,300,000 of those
6 individuals, have a disability that affects their ability
7 to work.

8 (10) The combination of significant recent
9 changes in Federal policy (including changes to sec-
10 tion 508 of the Rehabilitation Act of 1973 (29
11 U.S.C. 794d), accessibility provisions of the Help
12 America Vote Act of 2002 (42 U.S.C. 15301 et
13 seq.), Executive Order 13217 (42 U.S.C. 12131
14 note; relating to community-based alternatives for
15 individuals with disabilities), and the amendments
16 made by the No Child Left Behind Act of 2001) and
17 the rapid and unending evolution of technology re-
18 quire a Federal investment in State assistive tech-
19 nology systems to ensure that individuals with dis-
20 abilities reap the benefits of the technological revolu-
21 tion and participate fully in life in their commu-
22 nities.

23 (b) PURPOSES.—The purposes of this Act are—

1 (1) to enhance the ability of the Federal Gov-
2 ernment to provide States with financial assistance
3 that supports statewide—

4 (A) activities to increase access to, and
5 funding for, assistive technology devices and as-
6 sistive technology services, including financing
7 systems and financing programs;

8 (B) device demonstration, device loan, and
9 device re-utilization programs;

10 (C) training and technical assistance in the
11 provision or use of assistive technology devices
12 and assistive technology services;

13 (D) information systems relating to the
14 provision of assistive technology devices and as-
15 sistive technology services; and

16 (E) improved interagency and public-pri-
17 vate coordination that results in increased avail-
18 ability of assistive technology devices and assist-
19 ive technology services; and

20 (2) to provide States with financial assistance
21 to undertake activities that assist each State in
22 maintaining and strengthening cross-disability, full-
23 lifespan State assistive technology programs, con-
24 sistent with the Federal commitment to full partici-

1 pation and independent living of individuals with
2 disabilities.
