“(C) prohibit practices, understandings, arrangements, and activities, including exclusive contracts for MVPD programming or satellite broadcast programming between an MVPD and an MVPD programming vendor or satellite broadcast programming vendor, that prevent an MVPD from obtaining such programming from any MVPD programming vendor in which an MVPD has an attributable interest or any satellite broadcast programming vendor in which an MVPD has an attributable interest for distribution to persons in areas not served by an MVPD as of the date of enactment of the Sports Freedom Act of 2006; and

(2) by inserting after subsection (b) the following:

“(c) LOCAL GOVERNMENT PROVISION OF ADVANCED COMMUNICATIONS CAPABILITY AND SERVICES.—No State or local government statute, regulation, or other State or local government legal requirement may prohibit or have the effect of prohibiting any public provider from providing, to any person or any public or private entity, advanced communications capability or any service that uti-
izes the advanced communications capability provided by such provider.

“(d) SAFEGUARDS.—

“(1) ANTIDISCRIMINATION.—To the extent any public provider regulates competing providers of advanced communications capability, it shall apply its ordinances and rules and policies, including those relating to the use of public rights-of-way, permitting, performance bonding and reporting, without discrimination in favor of itself or any advanced communications capability provider that it owns or is affiliated with, as compared to other providers of such capability or services.

“(2) APPLICATION OF GENERAL LAWS.—A public provider may not provide advanced communications capability to the public unless the provision of such capability by that public provider is subject to the same laws and regulations that would apply if the advanced communications capability were being provided by a nongovernmental entity.

“(3) OPEN ACCESS TO NON-GOVERNMENTAL ENTITIES.—If a public provider initiates a project to provide advanced communications capability to the public, it shall grant to a requesting non-governmental entity the right to place similar facilities in
the same conduit, trenches, and locations as the public provider for concurrent or future use under the same conditions as the public provider. A public provider may limit, or refuse to grant, such a right to a requesting non-governmental entity with respect to any such conduit, trench, or location for public safety reasons.

“(4) ENFORCEMENT.—Paragraphs (1), (2), and (3) preempt any State or local law, regulation, rule, or practice that is inconsistent with the requirements of those paragraphs. If the Commission determines, after notice and an opportunity for a hearing, that a State or local government is engaging in any act or practice that violates paragraph (1), (2), or (3), the Commission shall take such action as may be necessary to enjoin or restrain the State or local government from engaging in that act or practice.

“(e) PUBLIC-PRIVATE PARTNERSHIPS ENCOURAGED.—If a public provider initiates a project to provide advanced communications capability to the public through a public-private partnership, the public provider shall publish a request for proposals in a publication of general circulation in the community in which the project is to be implemented and solicit bids through an open bid process.
“(f) Protection Against Undue Government Competition With Private Sector.—

“(1) Notice and Opportunity to Bid Required.—If a public provider decides not to initiate a project to provide advanced communications capability to the public through a public-private partnership, then, before the public provider may provide advanced communications capability to the public, it shall—

“(A) publish notice of its intention in media generally available to the public in the area in which it intends to provide such capability; and

“(B) provide an opportunity for commercial enterprises to bid for the rights to provide such capability during the 30-day period following publication of the notice.

“(2) Notice Requirements.—The public provider shall include in the notice required by paragraph (1) a description of the proposed scope of the advanced communications capability to be provided, including—

“(A) the services to be provided (including network capabilities);

“(C) service tiers and pricing; and

“(D) any proposal for providing advanced communications capability to low-income areas, or other demographically or geographically defined areas, that are not the same as the terms, service, pricing, or tiers applicable in other portions of the coverage area.

“(3) PRIVATE SECTOR RIGHT OF FIRST REFUSAL.—The public provider may proceed with the project only if, during the 30-day period, no private sector entity submits a bid to provide equivalent advanced communications capability of the same scope for the same or lower cost to consumers, as determined by a neutral third party, and demonstrates the requisite technical and financial ability to provide that capability. The neutral third party shall be selected by the public provider, and the private sector entity shall bear the costs of using a neutral third party.

“(4) APPLICATION TO EXISTING ARRANGEMENTS AND PENDING PROPOSALS.—This subsection does not apply to—

“(A) any contract or other arrangement under which a public provider is providing ad-

or

“(iii) has been approved by refer-
endum but is the subject of a lawsuit
brought before March 1, 2006.

“(g) PUBLIC SAFETY EXEMPTION.—Subsections (d),
(e), and (f) of this section do not apply when a public
provider provides advanced communications capabilities
