**SEC. 2029. SENSE OF CONGRESS ON CRITERIA FOR OPERATION AND MAINTENANCE OF HARBOR DREDGING PROJECTS.**

(a) FINDINGS.—Congress finds the following:

(1) Insufficient maintenance dredging results in inefficient water transportation and harmful economic consequences.

(2) The estimated dredging backlog at commercial harbors in the Great Lakes alone is 16,000,000 cubic yards.

(3) Approximately two-thirds of all shipping in the United States either starts or finishes at small harbors.

(4) Small harbors often have a greater proportional impact on local economies than do larger harbors.

(5) Performance metrics can be valuable tools in the budget process for water resources projects.

(6) The use of a single performance metric for water resources projects can result in a budget biased against small and rural communities.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the operations and maintenance budget of the Corps of Engineers should reflect the use of all available economic data, rather than a single performance metric.

**SEC. 2030. INTERAGENCY AND INTERNATIONAL SUPPORT AUTHORITY.**

Section 234 of the Water Resources Development Act of 1996 (33 U.S.C. 2323a) is amended—

(1) by striking subsection (a) and inserting the following:

“(a) IN GENERAL.—The Secretary may engage in activities (including contracting) in support of other Federal agencies, international organizations, or foreign governments to address problems of national significance to the United States.”;

(2) in subsection (b) by striking “Secretary of State” and inserting “Department of State”; and

(3) in subsection (d)—

(A) by striking “\$250,000 for fiscal year 2001” and inserting “\$1,000,000 for fiscal year 2008”; and

(B) by striking “or international organizations” and inserting “, international organizations, or foreign governments”.

**SEC. 2031. WATER RESOURCES PRINCIPLES AND GUIDELINES.**

(a) NATIONAL WATER RESOURCES PLANNING POLICY.—It is the policy of the United States that all water resources projects should reflect national priorities, encourage economic development, and protect the environment by—

- (1) seeking to maximize sustainable economic development;
- (2) seeking to avoid the unwise use of floodplains and flood-prone areas and minimizing adverse impacts and vulnerabilities in any case in which a floodplain or flood-prone area must be used; and
- (3) protecting and restoring the functions of natural systems and mitigating any unavoidable damage to natural systems.

(b) PRINCIPLES AND GUIDELINES.—

(1) PRINCIPLES AND GUIDELINES DEFINED.—In this subsection, the term “principles and guidelines” means the principles and guidelines contained in the document prepared by the Water Resources Council pursuant to section 103 of the Water Resources Planning Act (42 U.S.C. 1962a–2), entitled “Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies”, and dated March 10, 1983.

(A) The use of best available economic principles and analytical techniques, including techniques in risk and uncertainty analysis.

(B) The assessment and incorporation of public safety in the formulation of alternatives and recommended plans.

(C) Assessment methods that reflect the value of projects for low-income communities and projects that use nonstructural approaches to water resources development and management.

(D) The assessment and evaluation of the interaction of a project with other water resources projects and programs within a region or watershed.

(A) consult with the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce, the Secretary of Housing and Urban Development, the Secretary of Transportation, the Administrator of the Environmental Protection Agency, the Secretary of Energy, the Secretary of Homeland Security, the National Academy of Sciences, and the Council on Environmental Quality; and

(B) solicit and consider public and expert comments.

(5) PUBLICATION.—The Secretary shall—

(A) submit to the Committee on Environment and Public Works of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives copies of—

(i) the revisions to the principles and guidelines for use by the Secretary; and

(ii) an explanation of the intent of each revision, how each revision is consistent with this section, and the probable impact of each revision on water resources projects carried out by the Secretary; and

(B) make the revisions to the principles and guidelines for use by the Secretary available to the public, including on the Internet.

(6) EFFECT.—Subject to the requirements of this subsection, the principles and guidelines as revised under this subsection shall apply to water resources projects carried out by the Secretary instead of the principles and guidelines for such projects in effect on the day before date of enactment of this Act.

(7) APPLICABILITY.—After the date of issuance of the revisions to the principles and guidelines, the revisions shall apply—

(A) to all water resources projects carried out by the Secretary, other than projects for which the Secretary has commenced a feasibility study before the date of such issuance;

(8) EXISTING STUDIES.—Revisions to the principles and guidelines issued under paragraph (2) shall not affect the validity of any completed study of a water resources project.

(9) RECOMMENDATION.—Upon completion of the revisions to the principles and guidelines for use by the Secretary, the Secretary shall make a recommendation to Congress as to the advisability of repealing subsections (a) and (b) of section 80 of the Water Resources Development Act of 1974 (42 U.S.C. 1962d–17).

#### SEC. 2032. WATER RESOURCE PRIORITIES REPORT.

(a) IN GENERAL.—Not later than 2 years after the date of enactment of this Act, the President shall submit to Congress a report describing the vulnerability of the United States to damage from flooding, including—

(1) the risk to human life;

- (2) the risk to property; and
  - (3) the comparative risks faced by different regions of the United States.
- (b) INCLUSIONS.—The report under subsection (a) shall include—
- (1) an assessment of the extent to which programs in the United States relating to flooding address flood risk reduction priorities;
  - (2) the extent to which those programs may be encouraging development and economic activity in flood-prone areas;

The Chief of Engineers shall use such benchmarks as a management tool to make the feasibility study process more efficient in all districts of the Corps of Engineers.

(2) BENCHMARK GOALS.—The Chief of Engineers shall establish, to the extent practicable, under paragraph (1) benchmark goals for completion of feasibility studies for water resources projects generally within 2 years. In the case of feasibility studies that the Chief of Engineers determines may require additional time based on the project type, size, cost,

#### **SEC. 2034. INDEPENDENT PEER REVIEW.**

(a) PROJECT STUDIES SUBJECT TO INDEPENDENT PEER REVIEW.—

(1) IN GENERAL.—Project studies shall be subject to a peer review by an independent panel of experts as determined under this section.

(2) SCOPE.—The peer review may include a review of the economic and environmental assumptions and projections, project evaluation data, economic analyses, environmental analyses, engineering analyses, formulation of alternative plans, methods for integrating risk and uncertainty, models used in evaluation of economic or environmental impacts of proposed projects, and any biological opinions of the project study.

(3) PROJECT STUDIES SUBJECT TO PEER REVIEW.—

(A) MANDATORY.—A project study shall be subject to peer review under paragraph (1) if—

#### SEC. 2035. SAFETY ASSURANCE REVIEW.

(a) PROJECTS SUBJECT TO SAFETY ASSURANCE REVIEW.—The Chief of Engineers shall ensure that the design and construction activities for hurricane and storm damage reduction and flood damage reduction projects are reviewed by independent experts under this section if the Chief of Engineers determines that a review by independent experts is necessary to assure public health, safety, and welfare.

(b) FACTORS.—In determining whether a review of design and construction of a project is necessary under this section, the Chief of Engineers shall consider whether—

(2) the project involves the use of innovative materials or techniques;

(3) the project design lacks redundancy; or

(4) the project has a unique construction sequencing or a reduced or overlapping design construction schedule.

(c) SAFETY ASSURANCE REVIEW.—

(1) INITIATION OF REVIEW.—At the appropriate point in the development of detailed engineering and design specifications for each water resources project subject to review under

this section, the Chief of Engineers shall initiate a safety assurance review by independent experts on the design and construction activities for the project.

(2) **SELECTION OF REVIEWERS.**—A safety assurance review under this section shall include participation by experts selected by the Chief of Engineers from among individuals who are distinguished experts in engineering, hydrology, or other appropriate disciplines.
