

111TH CONGRESS
1ST SESSION

H. CON. RES. 95

Recognizing the importance of the Department of Agriculture Forest Service
Experimental Forests and Ranges.

IN THE HOUSE OF REPRESENTATIVES

APRIL 2, 2009

Mr. CHILDERS submitted the following concurrent resolution; which was
referred to the Committee on Agriculture

CONCURRENT RESOLUTION

Recognizing the importance of the Department of Agriculture
Forest Service Experimental Forests and Ranges.

Whereas the general provisions of the Act of June 4, 1897
(commonly known as the Organic Administration Act of
1897; 16 U.S.C. 551) and section 4 of the Forest and
Rangeland Renewable Resources Research Act of 1978
(16 U.S.C. 1643) authorize the Secretary of Agriculture
to designate experimental forests and ranges;

Whereas, in 2008, the Department of Agriculture celebrated
the 100th anniversary of the establishment of the first
experimental forest at Fort Valley, Arizona, which even-
tually led to the creation of 77 additional experimental
forests and ranges within the National Forest System;

Whereas the network of experimental forests and ranges pro-
vides places for long-term science and management stud-

ies in major vegetation types of the 195 million acres of public land administered by the Forest Service;

Whereas research at these experimental forests and ranges has provided critical information to the public, such as recognition of acid rain based on long-term precipitation chemistry data at Hubbard Brook, New Hampshire, characterization of old-growth Douglas-fir forests and ecology of the northern spotted owl, which set the stage for conservation planning in the Pacific Northwest, improved understanding of the science of forest hydrology, which was derived from long-term studies in experimental forests, especially Coweeta, and the forest and rangeland management systems built from foundation studies at many experimental properties; and

Whereas experimental forests and ranges provide opportunities to study the resources of the United States, including knowledge of forest and stream ecosystems, long-term records of climate, forest dynamics, hydrology, and other ecosystem components, information about long-term field experiments and opportunities to participate in them, access to a cadre of knowledgeable scientists, and access to thousands of publications about natural resource management and ecosystem science: Now, therefore, be it

1 *Resolved by the House of Representatives (the Senate*
 2 *concurring)*, That Congress recognizes the important con-
 3 tributions that the 77 experimental forests and ranges
 4 within the National Forest System have made in under-
 5 standing and conserving the environment and ensuring

- 1 that natural resources in the United States remain a
- 2 source of pride and enjoyment.
