1 SEC. 2. FINDINGS.
2 Congress makes the following findings:
3 (1) Approximately 21 percent of physicians who
4 were board certified in general internal medicine
5 during the early 1990s have left internal medicine,
compared to a 5 percent departure rate for those who were certified in subspecialties of internal medicine.

(2) The number of United States medical graduates going into family medicine has fallen by more than 50 percent from 1997 to 2005.

(3) In 2007, only 88 percent of the available medicine residency positions were filled and only 42 percent of those were filled by United States medical school graduates.

(4) In 2006, only 24 percent of third-year internal medicine resident intended to pursue careers in general internal medicine, down from 54 percent in 1998.

(5) Primary care physicians and primary care providers serve as the point of first contact for most patients and are able to coordinate the care of the whole person, reducing unnecessary care and duplicative testing.

(6) Primary care physicians and primary care providers practicing preventive care, including screening for illness and treating diseases, can help prevent complications that result in more costly care.
(7) Patients with primary care physicians or primary care providers have lower health care expenditures and primary care is correlated with better health status, lower overall mortality, and longer life expectancy.

(8) Higher proportions of primary care physicians are associated with significantly reduced utilization.

(9) The United States has a higher ratio of specialists to primary care physicians than other industrialized nations and the population of the United States is growing faster than the expected rate of growth in the supply of primary care physicians.

(10) The number of Americans age 65 and older, those eligible for Medicare and who use far more ambulatory care visits per person as those under age 65, is expected to double from 2000 to 2030.

(11) A decrease in Federal spending to carry out programs authorized by title VII of the Public Health Service Act threatens the viability of one of the programs used to solve the problem of inadequate access to primary care.

(12) The National Health Service Corps program has a proven record of supplying physicians to
underserved areas, and has played an important role in expanding access for underserved populations in rural and inner city communities.

(13) Individuals in many geographic areas, especially rural areas, lack adequate access to high quality preventive, primary health care, contributing to significant health disparities that impair America’s public health and economic productivity.

(14) About 20 percent of the population of the United States resides in primary medical care Health Professional Shortage Areas.

“(i) REDUCTION IN LIMIT BASED ON UNUSED POSITIONS.—

“(I) IN GENERAL.—The Secretary shall reduce the otherwise applicable resident limit for a hospital that the Secretary determines had
residency positions that were unused for all 5 of the most recent cost reporting periods ending prior to the date of enactment of this paragraph by an amount that is equal to the number of such unused residency positions.

“(II) EXCEPTION FOR RURAL HOSPITALS AND CERTAIN OTHER HOSPITALS.—This subparagraph shall not apply to a hospital—

“(aa) located in a rural area (as defined in subsection (d)(2)(D)(ii));

“(bb) that has participated in a voluntary reduction plan under paragraph (6); or

“(cc) that has participated in a demonstration project approved as of October 31, 2003, under the authority of section 402 of Public Law 90–248.

“(ii) NUMBER AVAILABLE FOR DISTRIBUTION.—The number of additional residency positions available for distribu-
tion under subparagraph (B) shall be an amount that the Secretary determines would result in a 15 percent increase in the aggregate number of full-time equivalent residents in approved medical training programs (as determined based on the most recent cost reports available at the time of distribution). One-third of such number shall only be available for distribution to hospitals described in subclause (I) of subparagraph (B)(ii) under such subparagraph.

“(B) DISTRIBUTION.—

“(i) IN GENERAL.—The Secretary shall increase the otherwise applicable resident limit for each qualifying hospital that submits an application under this subparagraph by such number as the Secretary may approve for portions of cost reporting periods occurring on or after the date of enactment of this paragraph. The aggregate number of increases in the otherwise applicable resident limit under this subparagraph shall be equal to the number of.
additional residency positions available for
distribution under subparagraph (A)(ii).

“(ii) Distribution to hospitals
already operating over resident
limit.—

“(I) In general.—Subject to
subclause (II), in the case of a hos-
pital in which the reference resident
level of the hospital (as defined in
clause (ii)) is greater than the other-
wise applicable resident limit, the in-
crease in the otherwise applicable resi-
dent limit under this subparagraph
shall be an amount equal to the prod-
uct of the total number of additional
residency positions available for dis-
tribution under subparagraph (A)(ii)
and the quotient of—

“(aa) the number of resident
positions by which the reference
resident level of the hospital ex-
ceeds the otherwise applicable
resident limit for the hospital; and
“(bb) the number of resident positions by which the reference resident level of all such hospitals with respect to which an application is approved under this subparagraph exceeds the otherwise applicable resident limit for such hospitals.

“(II) REQUIREMENTS.—A hospital described in subclause (I)—

“(aa) is not eligible for an increase in the otherwise applicable resident limit under this subparagraph unless the amount by which the reference resident level of the hospital exceeds the otherwise applicable resident limit is not less than 10 and the hospital trains at least 25 percent of the full-time equivalent residents of the hospital in primary care and general surgery (as of the date of enactment of this paragraph); and
“(bb) shall continue to train at least 25 percent of the full-time equivalent residents of the hospital in primary care and general surgery for the 10-year period beginning on such date.

In the case where the Secretary determines that a hospital no longer meets the requirement of item (bb), the Secretary may reduce the otherwise applicable resident limit of the hospital by the amount by which such limit was increased under this clause.

“(III) CLARIFICATION REGARDING ELIGIBILITY FOR OTHER ADDITIONAL RESIDENCY POSITIONS.—Nothing in this clause shall be construed as preventing a hospital described in subclause (I) from applying for additional residency positions under this paragraph that are not reserved for distribution under this clause.

“(iii) REFERENCE RESIDENT LEVEL.—
“(I) IN GENERAL.—Except as otherwise provided in subclause (II), the reference resident level specified in this clause for a hospital is the resident level for the most recent cost reporting period of the hospital ending on or before the date of enactment of this paragraph, for which a cost report has been settled (or, if not, submitted (subject to audit)), as determined by the Secretary.

“(II) USE OF MOST RECENT ACCOUNTING PERIOD TO RECOGNIZE EXPANSION OF EXISTING PROGRAM OR ESTABLISHMENT OF NEW PROGRAM.—If a hospital submits a timely request to increase its resident level due to an expansion of an existing residency training program or the establishment of a new residency training program that is not reflected on the most recent cost report that has been settled (or, if not, submitted (subject to audit)), after audit and subject to the discretion of the Sec-
retary, the reference resident level for such hospital is the resident level for the cost reporting period that includes the additional residents attributable to such expansion or establishment, as determined by the Secretary.

“(C) CONSIDERATIONS IN REDISTRIBUTION.—In determining for which hospitals the increase in the otherwise applicable resident limit is provided under subparagraph (B) (other than an increase under subparagraph (B)(ii)), the Secretary shall take into account the demonstrated likelihood of the hospital filling the positions within the first 3 cost reporting periods beginning on or after July 1, 2010, made available under this paragraph, as determined by the Secretary.

“(D) PRIORITY FOR CERTAIN AREAS.—In determining for which hospitals the increase in the otherwise applicable resident limit is provided under subparagraph (B) (other than an increase under subparagraph (B)(ii)), the Secretary shall distribute the increase to hospitals based on the following criteria:
“(i) The Secretary shall give preference to hospitals that submit applications for new primary care and general surgery residency positions. In the case of any increase based on such preference, a hospital shall ensure that—

“(I) the position made available as a result of such increase remains a primary care or general surgery residency position for not less than 10 years after the date on which the position is filled; and

“(II) the total number of primary care and general surgery residency positions in the hospital (determined based on the number of such positions as of the date of such increase, including any position added as a result of such increase) is not decreased during such 10-year period.

In the case where the Secretary determines that a hospital no longer meets the requirement of subclause (II), the Secretary may reduce the otherwise applicable resident limit of the hospital by the amount by
which such limit was increased under this paragraph.

“(ii) The Secretary shall give preference to hospitals that emphasizes training in community health centers and other community-based clinical settings.

“(iii) The Secretary shall give preference to hospitals in States that have more medical students than residency positions available (including a greater preference for those States with smaller resident-to-medical-student ratios). In determining the number of medical students in a State for purposes of the preceding sentence, the Secretary shall include planned students at medical schools which have provisional accreditation by the Liaison Committee on Medical Education or the American Osteopathic Association.

“(iv) The Secretary shall give preference to hospitals in States that have low resident-to-population ratios (including a greater preference for those States with lower resident-to-population ratios).

“(E) LIMITATION.—
“(i) IN GENERAL.—Except as provided in clause (ii), in no case may a hospital (other than a hospital described in subparagraph (B)(ii)(I), subject to the limitation under subparagraph (B)(ii)(III)) apply for more than 50 full-time equivalent additional residency positions under this paragraph.

“(ii) INCREASE IN NUMBER OF ADDITIONAL POSITIONS AVAILABLE FOR DISTRIBUTION.—The Secretary shall increase the number of full-time equivalent additional residency positions a hospital may apply for under this paragraph if the Secretary determines that the number of additional residency positions available for distribution under subparagraph (A)(ii) exceeds the number of such applications approved.

“(F) APPLICATION OF PER RESIDENT AMOUNTS FOR PRIMARY CARE AND NONPRIMARY CARE.—With respect to additional residency positions in a hospital attributable to the increase provided under this paragraph, the approved FTE resident amounts are deemed to be
equal to the hospital per resident amounts for primary care and nonprimary care computed under paragraph (2)(D) for that hospital.

“(G) DISTRIBUTION.—The Secretary shall distribute the increase to hospitals under this paragraph not later than 2 years after the date of enactment of this paragraph.”
