2 history, and geography.

3 (2) In order for our Nation’s students to be

5 places, students need 21st century content, beyond
6 the traditional core subjects, that includes global
7 awareness, financial, economic, business and entre-
8 preneurial literacy, civic literacy, and health and
9 wellness awareness.

10 (3) Students need to go beyond just learning
11 today’s academic context to develop critical thinking
12 and problem solving skills, communication skills, cre-
13 ativity and innovation skills, collaboration skills, con-
14 textual learning skills, and information and media
15 literacy skills.

16 (4) Information and communications technology
17 literacy is the ability to use technology to develop
18 21st century content knowledge and skills, in the
19 content of learning core subjects, and students must
20 be able to use technology to learn content and skills
21 so that the students know how to learn, think criti-
22 cally, solve problems, use information, communicate,
23 innovate, and collaborate.

24 (5) Educators need to incorporate life skills into
25 pedagogy, including leadership, ethics, account-
