SEC. 2. FINDINGS.

Congress finds that—

(1) databases of personally identifiable information are increasingly prime targets of hackers, identity thieves, rogue employees, and other criminals, including organized and sophisticated criminal operations;

(2) identity theft is a serious threat to the Nation’s economic stability, homeland security, the development of e-commerce, and the privacy rights of Americans;

(3) over 9,300,000 individuals were victims of identity theft in America last year;

(4) security breaches are a serious threat to consumer confidence, homeland security, e-commerce, and economic stability;

(5) it is important for business entities that own, use, or license personally identifiable information to adopt reasonable procedures to ensure the security, privacy, and confidentiality of that personally identifiable information;

(6) individuals whose personal information has been compromised or who have been victims of identity theft should receive the necessary information
and assistance to mitigate their damages and to re-
store the integrity of their personal information and
identities;

(7) data brokers have assumed a significant
role in providing identification, authentication, and
screening services, and related data collection and
analyses for commercial, nonprofit, and government
operations;

(8) data misuse and use of inaccurate data have
the potential to cause serious or irreparable harm to
an individual’s livelihood, privacy, and liberty and
undermine efficient and effective business and gov-
ernment operations;

(9) there is a need to ensure that data brokers
conduct their operations in a manner that prioritizes
fairness, transparency, accuracy, and respect for the
privacy of consumers;

(10) government access to commercial data can
potentially improve safety, law enforcement, and na-
tional security; and

(11) because government use of commercial
data containing personal information potentially af-
fcts individual privacy, and law enforcement and
national security operations, there is a need for Con-
gress to exercise oversight over government use of commercial data.
