fiscal year 2012 for the use of the Department of Defense
for research, development, test, and evaluation as specified
in the funding table in section 4201.

SEC. 211. LIMITATION ON AVAILABILITY OF FUNDS FOR THE GROUND COMBAT VEHICLE PROGRAM.

Of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2012 for research, development, test, and evaluation, Army, for the ground combat vehicle program, not more than 70 percent may be obligated or expended until the date on which the Secretary of the Army submits to the congressional defense committees a report containing an updated analysis of alternatives, including a quantitative analysis, of such program that compares the vehicle survivability, force protection, mobility, and other key capabilities of—

(1) each alternative to the ground combat vehicle, including the upgraded Bradley fighting vehicle that was included in the original analysis of alternatives of such program; and

(2) the revised ground combat vehicle design concept.

(1) commercially available weapon systems as of the date of the analysis, including complete weapon systems and kits to apply to existing weapon systems; and

(2) weapon systems that are fielded as of the date of the analysis that include any required improvements.

(b) WAIVER AUTHORITY.—The Secretary of Defense may waive the limitation under subsection (a) if the Secretary submits to the congressional defense committees written certification that the waiver is in the national security interests of the United States because such limitation is delaying the fielding of capabilities that address urgent operational needs with respect to combat theaters of operations.
SEC. 213. LIMITATION ON AVAILABILITY OF FUNDS FOR 

OHIO-CLASS BALLISTIC MISSILE SUBMARINE REPLACEMENT PROGRAM.

(a) FINDINGS.—Congress finds the following:

(1) On May 13, 2010, the President submitted to Congress the report required under section 1251 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84; 123 Stat. 2549) that stated, “The Secretary of Defense, based on recommendations from the Joint Chiefs of Staff, has established a baseline nuclear force structure that fully supports U.S. security requirements and conforms to the New START limits. . . The United States will reduce the number of SLBM launchers (launch tubes) from 24 to 20 per SSBN, and deploy no more than 240 SLBMs at any time.”.

(2) On January 10, 2011, the Under Secretary of Defense for Acquisition, Technology, and Logistics issued an acquisition decision memorandum for the Ohio-class submarine replacement program whereby the Navy received Milestone A approval to proceed with a replacement design based on 16 missile tubes.

(3) Consistent with the reductions and limitations established in the New START Treaty, which entered into force on February 5, 2011, more than
two-thirds of the deployed nuclear deterrent force of
the United States are planned to be carried on bal-
listic missile submarines.

(4) The Commander of the United States Stra-
tegic Command testified on March 2, 2011, that,
“The issue of the number of tubes is not a simple
black and white answer,” but rather it is comprised
of several issues including, “the overall number of
tubes we wind up with at the end. . . flexibility and
options with how many warheads per missile per
tube. . . the overall number of boats. . . and many
other factors.”. He further stated that, “Sixteen
[missile tubes per submarine] will meet
STRATCOM’s requirements, given that we are sit-
ting here 20 years in advance.”.

(b) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) the long-term ability of the United States to
maintain a nuclear force sufficient to address the
range of mission requirements necessary to deter,
dissuade, and defeat potential adversaries and as-
sure allies and partners must not be comprised sole-
ly on the basis of the promise of potential cost sav-
ings resulting from the decision of the Secretary of
Defense to reduce the planned number of missile
tubes per Ohio-class ballistic missile submarine from 24 to 16; and

(2) because the planned Ohio-class replacement ballistic submarine is expected to be in operation through 2080, near-term design decisions should take into consideration uncertainties in the future threat and strategic environment.

(c) LIMITATION.—

(1) IN GENERAL.—Of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2012 for research, development, test, and evaluation, Navy, for the Ohio-class ballistic submarine replacement program, not more than 90 percent may be obligated or expended until the date on which the Secretary of Defense submits to the congressional defense committees a report containing—

(A) a summary of the analysis conducted to support the acquisition decision memorandum, including any assessment of the threat and strategic environment and mission requirements that informed the decision to reduce the planned number of missile tubes per submarine from 20 (as stated in the report submitted to Congress under section 1251 of the National
Defense Authorization Act for Fiscal Year 2010
(Public Law 111–84; 123 Stat. 2549)) to 16
(as stated in the acquisition decision memo-
randum);

(B) a description of the threat and stra-
tegic environment assumed by the Secretary
throughout the expected operational lifetime of
the program, including how the Secretary would
address significant changes to such threat and
strategic environment;

(C) a description of any other assumptions
made by the Secretary throughout the expected
operational lifetime of the program that pro-
vides the rationale of the Secretary to reduce
the planned number of missile tubes per sub-
machine to 16, including assumptions regard-
ing—

(i) changes in nuclear policy and
strategy;

(ii) changes in the role of ballistic
missile submarines as a part of the overall
nuclear forces of the United States; and

(iii) further nuclear reductions, wheth-
er conducted under an international agree-
ment or unilaterally;
(D) an identification of key risks to missions or requirements that may be increased because of the Secretary’s decision to reduce the planned number of missile tubes per submarine to 16, including whether the Secretary plans to accept or mitigate such risks; and

(E) a summary of the rigorous cost comparison of the designs for 16 missile tubes per submarine and 20 missile tubes per submarine, consistent with the direction provided in the acquisition decision memorandum, including the accuracy of the cost estimate of the procurement cost of each submarine.

(2) FORM.—The report under paragraph (1) shall be submitted in unclassified form, but may include a classified annex.

(d) DEFINITIONS.—In this section:

(1) The term “acquisition decision memorandum” means the acquisition decision memorandum regarding the Ohio-class submarine replacement program issued by the Under Secretary of Defense for Acquisition, Technology, and Logistics on January 10, 2011.

(2) The term “New START Treaty” means the Treaty between the United States of America and

Reduction and Limitation of Strategic Offensive
Arms, signed on April 8, 2010, and entered into
force on February 5, 2011.

(ii) the expeditionary fighting vehicle;

and

(iii) a new amphibious combat vehicle;

and

(B) include at least one vehicle that is capable of accelerating until the vehicle moves along the top of the water (commonly known as “getting up on plane”) and at least one vehicle that is not capable of such acceleration.

able before the date of the enactment of this Act for the procurement of an assault amphibious vehicle 7A1 with—

1. survivability upgrades under the survivability product improvement program;
2. other necessary survivability capabilities that are in response to urgent operational needs; or

(b) PERFORMANCE IMPROVEMENT DEFINED.—In this section, the term “performance improvement”, with respect to the propulsion system for the F–35 Lightning II aircraft program, means an increase in fan or core engine airflow volume or maximum thrust in military or
afterburner settings for the primary purpose of improving the takeoff performance or vertical load bring back of such aircraft. The term does not include development or procurement improvements with respect to weight, acquisition costs, operations and support costs, durability, manufacturing efficiencies, observability requirements, or repair costs.

SEC. 217. LIMITATION ON AVAILABILITY OF FUNDS FOR THE JOINT SPACE OPERATIONS CENTER MANAGEMENT SYSTEM.

(a) Sense of Congress.—It is the sense of Congress that—

(1) improvements to the space situational awareness and space command and control capabilities of the United States are necessary; and

the Bob Stump National Defense Authorization Act

SEC. 232. LIMITATION ON AVAILABILITY OF FUNDS FOR MEDIUM EXTENDED AIR DEFENSE SYSTEM.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the United States should pursue options with respect to multilaterally terminating the contract covering the medium extended air defense system in order to lessen the contract termination liability belonging to the United States;

(2) the Secretary of Defense must now sustain the Patriot air and missile defense system longer than previously planned;

(3) the Secretary of Defense should identify promising technologies from the medium extended air defense system, whether the technology originated in the United States or in a partner country, as soon as practicable and transition such technologies into a Patriot air and missile defense system upgrade effort or other program of record; and

(4) the Secretary of Defense should continue to pursue international cooperative missile defense activities that are affordable and benefit the security of all parties.
(b) LIMITATION.—None of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2012 for the medium extended air defense system program may be obligated or expended until the date on which the Secretary of Defense—

(1) either—

(A) negotiates a multilateral termination with respect to the contract covering the program; or

(B) restructures such program and ensures that specific deliverables under such contract will be transitioned to one or more current programs of record by not later than September 30, 2013; and

(2) submits to the congressional defense committees written notification of—

(A) the amount of the total cost for which the United States is liable with respect to terminating the contract under paragraph (1)(A) or restructuring the program under paragraph (1)(B), as the case may be;

SEC. 233. HOMELAND DEFENSE HEDGING POLICY AND STRATEGY.

(a) POLICY.—It is the policy of the United States to develop and maintain a hedging strategy to provide for the protection of the homeland of the United States that—

(1) provides such protection through the phased, adaptive approach to missile defense in Europe if—
(A) the intercontinental ballistic missile threat from the Middle East to the United States materializes earlier than 2020 (the year in which phase four of the phased, adaptive approach is planned to begin protecting the homeland of the United States); or

(B) technical challenges or schedule delays affect the availability of the standard missile–3 block IIB interceptor planned for fielding in Europe by 2020 in order to protect the homeland of the United States as part of such phase four;

(2) provides such protection if the intercontinental ballistic missile threat from East Asia to the United States materializes more rapidly than expected;

(3) provides capabilities that improve or enhance the protection of the United States beyond the ground-based midcourse defense capabilities currently deployed for the defense of the United States; and

(4) includes plans for ensuring that such hedging capabilities described in paragraphs (1) through (3)—
(A) are suitable to perform the assigned mission;

(B) are operationally effective; and

(C) use technologies that are sufficiently matured and tested prior to fielding.

(b) STRATEGY.—

(1) IN GENERAL.—In light of the policy described in subsection (a), the Secretary of Defense shall develop a hedging strategy to provide for the protection of the homeland of the United States.

(2) ELEMENTS.—The strategy under paragraph (1) shall include the following:

(A) A description of the hedging alternatives and capabilities considered by the Secretary.

(B) A summary of the analyses conducted, including—

(i) criteria used to assess such options and capabilities; and

(ii) the findings and recommendations of such analyses.

(C) Detailed plans, programs, and a budget profile for implementing the strategy through 2022.
(D) The criteria to be used in determining when each item contained in the strategy should be implemented and the schedule required to implement each item.

(E) Any other information the Secretary considers necessary.

(3) SUBMISSION.—The Secretary shall submit to the congressional defense committees the strategy developed under paragraph (1) by the earlier of the following:

(A) December 5, 2011.

(B) The date on which the Secretary completes the development of such strategy.

SEC. 234. GROUND-BASED MIDCOURSE DEFENSE SYSTEM.

(a) FINDINGS.—Congress finds the following:

(1) The last two intercept flight tests of the ground-based midcourse defense system in January 2010 and December 2010 failed to intercept, and in January 2011, the Director of the Missile Defense Agency halted deliveries of completed exo-atmospheric kill vehicles until the root cause of such failures is determined and resolved.

(2) The ground-based midcourse defense system is currently the only missile defense system that pro-
tects the homeland of the United States from long-range ballistic missile threats.

(3) In the fiscal year 2010 budget request, the ground-based midcourse defense system element was reduced by $524,600,000 from the fiscal year 2009 level while the fiscal year 2011 budget request restored $318,800,000 of this funding.

(4) The fiscal year 2012 budget request further reduces the ground-based midcourse defense system element by $185,000,000 for fiscal year 2012 and further reduces such element by an additional $1,000,000,000 for the years covering the future-years defense program from the amount projected in the fiscal year 2011 budget request.

(5) According to the Missile Defense Agency, the combination of the two flight-test failures and operating under the reduced spending limits of the Continuing Resolutions during fiscal year 2011 before the date on which the Department of Defense and Full-Year Continuing Appropriations Act, 2011 (Public Law 112–10) was enacted have resulted in the delay or restructuring of several activities within the ground-based midcourse defense system element, including—
(A) delays to ground-based interceptor manufacturing and fleet upgrades;

(B) Stockpile Reliability Program component testing;

(C) new capability development, modeling, testing, and fielding;

(D) Fort Greely missile defense complex communications upgrades; and

(E) delays to flight testing of the two-stage ground-based interceptor.

(6) According to the Missile Defense Agency and the United States Northern Command, the procurement of additional ground-based interceptors will be necessary in light of the recent flight-test results.

(b) Sense of Congress.—It is the sense of Congress that the ground-based midcourse defense system is currently the only missile defense system that protects the homeland of the United States from long-range ballistic missile threats and therefore—

(1) the system should be given sufficient prioritization and funding to ensure its long-term reliability, effectiveness, and ability to adapt to advances in such threats;
(2) the Director of the Missile Defense Agency should thoroughly identify the root cause associated with the exo-atmospheric kill vehicle that led to the flight-test failures described in subsection (a)(1) and identify other potential technical issues associated with the exo-atmospheric kill vehicle or ground-based midcourse defense system that have materialized in recent testing;

(3) implementation of corrective measures and flight testing should be undertaken as soon as possible to provide commanders of the combatant commands and the American people greater confidence in the reliability and effectiveness of the system; and

(4) the procurement of additional ground-based interceptors will be necessary in light of recent flight-test results.

(c) PLAN AND CERTIFICATION REQUIRED.—Not later than 30 days after the date of the enactment of this Act, or on the date on which the Failure Review Board has completed the review of the ground-based midcourse defense system flight-test failures described in subsection (a)(1), whichever is later, the Secretary of Defense shall submit to the congressional defense committees the following:
(1) A plan by the Director of the Missile Defense Agency to address the flight-test failures, including—

(A) an identification of the root cause associated with the exo-atmospheric kill vehicle that led to the flight-test failures;

(B) an identification of other potential technical issues associated with the exo-atmospheric kill vehicle or ground-based midcourse defense system that have materialized in recent testing;

(C) how the Director will resolve the issues identified in subparagraphs (A) and (B), including a consideration of whether a re-designed exo-atmospheric kill vehicle is necessary;

(D) a description of planned flight tests of the exo-atmospheric kill vehicle with any implemented fixes;

(E) a summary of the measures required by the Commander of the United States Northern Command based on the flight-test failures in order to meet operational requirements; and

(F) the schedule and additional resources necessary to implement the plan.
(2) Written certification by the Secretary that—

(A) the Director has thoroughly investigated the root cause of the flight-test failures and any other potential technical issues associated with the exo-atmospheric kill vehicle or ground-based midcourse defense system that have materialized in recent testing;

(B) the plan under paragraph (1) is sufficient to resolve the issues identified in subparagraphs (A) and (B) of such paragraph;

(C) the schedule and additional resources described in subparagraph (F) of paragraph (1) are sufficient to implement the plan under such paragraph; and

(D) the Director has sufficiently prioritized the implementation of corrective measures and flight testing of the ground-based midcourse defense system.

SEC. 235. STUDY ON SPACE-BASED INTERCEPTOR TECHNOLOGY.

(a) Study on Space-based Interceptor Technology.—

(1) Study.—Of the funds authorized to be appropriated by this Act or otherwise made available
for fiscal year 2012 for ballistic missile defense tech-

ining the technical and operational considerations
associated with developing and operating a limited
space-based interceptor capability and to submit the
report under paragraph (2). At minimum, the study
shall include—

(A) the identification of the technical risks,

ing that would be needed for any nation to de-
velop and operate an effective space-based in-
terceptor capability; and

(D) the estimated effectiveness and cost of
potential options for developing and operating
such a capability, including their effectiveness
in conjunction with existing and planned terres-
trially-based missile defense systems.

(2) REPORT.—
(A) Not later than one year after the date of the enactment of this Act, the Secretary of Defense shall submit to the congressional defense committees a report on the study required under paragraph (1).

(B) The report submitted under this paragraph shall be in unclassified form, but may include a classified annex.

(b) MERIT-BASED OR COMPETITIVE DECISIONS.—With respect to carrying out subsection (a), a decision to commit, obligate, or expend funds with or to a specific entity shall—

(1) be based on merit-based selection procedures in accordance with the requirements of sections 2304(k) and 2374 of title 10, United States Code, or on competitive procedures; and

(2) comply with other applicable provisions of law.

SEC. 333. SENSE OF CONGRESS REGARDING INTEGRATION OF BALLISTIC MISSILE DEFENSE TRAINING ACROSS AND BETWEEN COMBATANT COMMANDS AND MILITARY SERVICES.

(a) FINDINGS.—Congress finds that ballistic missile defense is an inherently joint operation that requires close coordination between combatant commands and military services at all levels, from the strategic to the operational to the tactical. Since the time available to identify, track, and intercept ballistic missiles will be less than 30 minutes, joint training to improve the ability of the military departments and combatant commands to work together is essential for successfully planning and conducting ballistic missile defense operations. Congress has previously expressed concern that gaps in joint missile defense training, from the lowest sensor or shooter operator level to the highest levels of decision-making on combatant command staffs, must be identified and rectified.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) improving the integration of ballistic missile defense training across and between combatant commands and military services and fully identifying the training requirements, capabilities, and resources that the Department of Defense needs to effectively train for this complex mission is vital to the protec-
tion of the United States against ballistic missile at-
tacks;

(2) identifying and addressing training gaps in
integrating missile defense training is essential for
successfully employing the Ballistic Missile Defense
System; and

(3) identifying the capabilities and funding
needed to effectively and adequately integrate train-
ing across and between the combatant commands
and military services is important to ensure that
training priorities are being met and that resources
are aligned to support the training.

SEC. 368. SENSE OF CONGRESS ON PROPOSED FEDERAL AVIATION ADMINISTRATION CHANGES TO FLIGHT CREW MEMBER DUTY AND REST REQUIREMENTS.

(a) FINDINGS.—Congress makes the following findings:

(1) Section 212 of the Airline Safety and Federal Aviation Administration Extension Act of 2010 (Public Law 111–216; 49 U.S.C. 44701 note) directed the Administrator of the Federal Aviation Administration to issue regulations, based on the best available scientific information, to specify limitations on the hours of flight and duty time allowed for pilots to address problems relating to pilot fatigue.

(2) On September 14, 2010, the Federal Aviation Administration issued a Notice of Proposed Rulemaking titled “Flightcrew Member Duty and Rest Requirements”.

(3) Between March 2010 and March 2011, the Air Mobility Command and its Civil Reserve Air Fleet partners airlifted more than 2,000,000 passengers and 848,000 tons of cargo around the world
in support of the missions of the Department of De-
fense.

(4) An Air Force Institute of Technology study
titled “Civil Reserve Airlift Fleet (CRAF) Crew Rest
Study” analyzed 2264 missions flown by Civil Re-
serve Air Fleet carriers under contract with the De-
partment of Defense between May and September
2011, and concluded that over 80 percent of those
missions may have been infeasible had the proposed
rule referred to in paragraph (2) been in effect dur-
ing such period.

(5) On February 15, 2011, General Duncan J.
McNabb, Commander of the United States Trans-
portation Command, wrote to the Administrator of
the Federal Aviation Administration expressing sig-
nificant concern about the proposed rule change and
stating that the Operational Risk Management ap-
proach of the United States Transportation Com-
mand mitigated operational hazards and included
“reasonable measures to reduce risk to personnel,
equipment and the mission”. In the letter, General
McNabb noted that he believes there is room for
proper exceptions to the proposed rule and went on
to write that “through cooperation, we can develop
mutually acceptable guidelines that not only mitigate
the impact of crew fatigue, but afford all carriers
the flexibility to implement safer aircrew processes”.

(6) The United States Transportation Com-
mand is relying heavily on the Civil Reserve Air
Fleet as a critical partner as they effectively and ef-
ficiently deploy and sustain the warfighter in simul-
taneous operations in Afghanistan, Iraq, and Libya
and in relief operations in Japan.
(b) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) when faced with immediate and long-term
world events, the superb team of the United States
Transportation Command successfully overcomes
many obstacles to support the national security ob-
jectives of the United States with world-class logis-
tics and the Civil Reserve Air Fleet program is one
of the major reasons they deliver both combat power
and humanitarian relief on time, on target, and at
best value to the taxpayer;

(2) the Administrator of the Federal Aviation
Administration should make every effort to ensure
that any changes to guidelines, regulations, and
rules of the Federal Aviation Administration, includ-
ing changes to the Flightcrew Member Duty and
Rest Requirements, fully consider the impact of such
changes on Civil Reserve Air Fleet carriers, the United States Transportation Command, and the Department of Defense; and

(3) the Administrator of the Federal Aviation Administration, in consultation with the Commander of the United States Transportation Command, should develop guidelines that address not only crew fatigue, but also enhance safety while minimizing the impact on the mission of the United States Transportation Command and the Department of Defense.

§ 909. Training assistance

Subtitle C—General Service Authorities

SEC. 521. FINDINGS REGARDING UNIQUE NATURE, DEMANDS, AND HARDSHIPS OF MILITARY SERVICE.

(a) Codification.—Chapter 37 of title 10, United States Code, is amended by inserting before section 651 the following new section:

§ 650. Findings regarding unique nature, demands, and hardships of service in the armed forces

“Congress makes the following findings:

“(1) Section 8 (clauses 12, 13, and 14) of Article I of the Constitution of the United States commits exclusively to Congress the powers to raise and
support armies, provide and maintain a Navy, and 
make rules for the government and regulation of the 
land and naval forces.

“(2) There is no constitutional right to serve in 
the armed forces.

“(3) Pursuant to the powers conferred by sec-
tion 8 of article I of the Constitution of the United 
States, it lies within the discretion of the Congress 
to establish qualifications for and conditions of serv-

ice in the armed forces.

“(4) The primary purpose of the armed forces 
is to prepare for and to prevail in combat should the 
need arise.

“(5) The conduct of military operations re-
quires members of the armed forces to make ex-
traordinary sacrifices, including the ultimate sac-
ifice, in order to provide for the common defense.

“(6) Success in combat requires military units 
that are characterized by high morale, good order 
and discipline, and unit cohesion.

“(7) One of the most critical elements in com-
battle capability is unit cohesion, that is, the bonds of 
trust among individual service members that make 
the combat effectiveness of a military unit greater
than the sum of the combat effectiveness of the individual unit members.

“(8) Military life is fundamentally different from civilian life in that—

“(A) the extraordinary responsibilities of the armed forces, the unique conditions of military service, and the critical role of unit cohesion, require that the military community, while subject to civilian control, exist as a specialized society; and

“(B) the military society is characterized by its own laws, rules, customs, and traditions, including numerous restrictions on personal behavior, that would not be acceptable in civilian society.

“(9) The standards of conduct for members of the armed forces regulate a member’s life for 24 hours each day beginning at the moment the member enters military status and not ending until that person is discharged or otherwise separated from the armed forces.

“(10) Those standards of conduct, including the Uniform Code of Military Justice, apply to a member of the armed forces at all times that the member has a military status, whether the member is on
base or off base, and whether the member is on duty or off duty.

“(11) The pervasive application of the standards of conduct is necessary because members of the armed forces must be ready at all times for worldwide deployment to a combat environment.

“(12) The worldwide deployment of United States military forces, the international responsibilities of the United States, and the potential for involvement of the armed forces in actual combat routinely make it necessary for members of the armed forces involuntarily to accept living conditions and working conditions that are often spartan, primitive, and characterized by forced intimacy with little or no privacy.

“(13) The armed forces must maintain personnel policies that are intended to recruit and retain only those persons whose presence in the armed forces serve the needs of the armed forces, contribute to the accomplishment of the missions of the armed forces, and maintain the armed forces’ high standards of morale, good order and discipline, and unit cohesion that are the essence of military capability.”.

“(B) the duration of their participation.
“(3) For each of the armed forces, the data collection repository shall be able to indicate, for a fiscal year—

“(A) the number of members who received the high-deployment allowance under section 436 of title 37 (or who would have been eligible to receive the allowance if the duty assignment was not excluded by the Secretary of Defense);

“(C) the number of months each member received the allowance (or would have received it in the case of members described in the parenthetical phrase in subparagraph (A)); and

“(D) the total amount expended on the allowance.

“(4) For each of the armed forces, the data collection repository shall be able to indicate, for a fiscal year, the number of days that high demand, low density units (as defined by the Chairman of the Joint Chiefs of Staff) were deployed, and whether these units met the force goals for limiting deployments, as described in the personnel tempo policies applicable to that armed force.”.

“(f) OTHER DEFINITIONS.—In this section:

“(1)(A) Subject to subparagraph (B), the term ‘dwell time’ means the time a member of the armed forces or a unit spends at the permanent duty station or home port after returning from a deployment.

“(B) The Secretary of Defense may modify the definition of dwell time specified in subparagraph (A). If the Secretary establishes a different definition of such term, the Secretary shall transmit the new definition to Congress.

“(2) The term ‘operating tempo’ means the rate at which units of the armed forces are involved in all military activities, including contingency operations, exercises, and training deployments.

“(3) The term ‘personnel tempo’ means the amount of time members of the armed forces are engaged in their official duties at a location or under circumstances that make it infeasible for a member to spend off-duty time in the housing in which the member resides.”.

BUGLE CALL COMMONLY KNOWN AS “TAPS”
AT MILITARY FUNERALS, MEMORIAL SERV-

(a) FINDINGS.—Congress makes the following find-
ings:

(1) The bugle call commonly known as “Taps”
is known throughout the United States as part of
the military honors accorded at funerals, memorial
services, and wreath ceremonies held for members of
the uniformed services and veterans.

(2) In July 1862, following the Seven Days
Battles, Union General Daniel Butterfield and bu-
gler Oliver Willeox Norton created “Taps” at Berk-
ley Plantation, Virginia, as a way to signal the end
of daily military activities.

(3) “Taps” is now established by the uniformed
services as the last call of the day and is sounded
at the completion of a military funeral.

(4) “Taps” has become the signature, solemn
musical farewell for members of the uniformed serv-
ices and veterans who have faithfully served the
United States during times of war and peace.
(5) Over its almost 150 years of use, “Taps” has been woven into the historical fabric of the United States.

(3) Yellow Ribbon Day would also recognize the history and meaning of the Yellow Ribbon as the symbol of support for members of the Armed Forces.

(4) Yellow Ribbon Day would also signify a tribute and remembrance to all Prisoners of War and a fervent hope for the safe return and full accounting of all members of the Armed Forces who are Missing in Action.

(5) April 9th would be an appropriate day to designate as Yellow Ribbon Day as it was on April 9, 2004, that Staff Sergeant Matt Maupin became the first Prisoner of War of Operation Iraqi Freedom.

(b) SENSE OF CONGRESS.—Congress supports the goals and ideals of Yellow Ribbon Day in honor of members of the Armed Forces who are serving overseas apart from their families and loved ones.

In the case of an individual who the military panel has recommended no longer be subject to military detention, if the review board accepts the recommendation of the military panel, the review board shall identify a suitable location outside the United States to which to transfer the individual. SEC. 1045. NATIONAL SECURITY PLANNING GUIDANCE TO DENY SAFE HAVENS TO AL-QAEDA AND ITS VIOLENT EXTREMIST AFFILIATES.

(a) Purpose and Findings.—

(1) Purpose.—The purpose of this section is to improve interagency strategic planning and execution to more effectively integrate efforts to deny safe havens and strengthen at-risk states to further the goals of the National Security Strategy related to the disruption, dismantlement, and defeat of al-Qaeda and its violent extremist affiliates.

(2) Findings.—Congress makes the following findings:
(A) In Iraq, Afghanistan, and other areas where stabilization operations are carried out, the lack of an integrated, coordinated planning effort in which the goals, objectives, and priori-
ties of the United States effort and the roles and missions of the various agencies of the United States were clearly delineated has ham-
pered the efforts of the United States in such operations and may have contributed to in-
creased costs in funding, time, effort, and other terms.

(B) The fight against al-Qaeda and its vio-
en extremist affiliates, and the threat to the United States by transnational terrorism, will continue for the foreseeable future.

(C) A key component of success in the struggle against al-Qaeda and its violent ex-
tremist affiliates is the ability to deny safe ha-
vens to al-Qaeda, its violent extremist affiliates, and other violent extremist organizations, and United States national security interests will sometimes require the United States to assist in building the capabilities of other countries and entities to deny such violent extremist organiza-
tions safe havens and to participate in regional
efforts to deny such violent extremist organizations safe havens.

(b) National Security Planning Guidance.—

(1) Guidance Required.—The President shall issue classified or unclassified national security planning guidance in support of objectives stated in the national security strategy report submitted to Congress by the President pursuant to section 108 of the National Security Act of 1947 (50 U.S.C. 404a) to deny safe havens to al-Qaeda and its violent extremist affiliates and to strengthen at-risk states. Such guidance shall serve as the strategic plan that governs United States and coordinated international efforts to enhance the capacity of governmental and nongovernmental entities to work toward the goal of eliminating the ability of al-Qaeda and its violent extremist affiliates to establish or maintain safe havens.

(2) Contents of Guidance.—The guidance required under paragraph (1) shall include each of the following:

(A) A prioritized list of specified geographic areas that the President determines are necessary to address and an explicit discussion and list of the criteria or rationale used to
prioritize the areas on the list, including a dis-
cussion of the conditions that would hamper the
ability of the United States to strengthen at-
risk states or other entities in such areas.

(B) For each specified geographic area, a
description, analysis, and discussion of the core
problems and contributing issues that allow or
could allow al-Qaeda and its violent extremist
affiliates to use the area as a safe haven from
which to plan and launch attacks, engage in
propaganda, or raise funds and other support,
including any ongoing or potential
radicalization of the population, or to use the
area as a key transit route for personnel, weap-
ons, funding, or other support.

(C) A list of short-term, mid-term, and
long-term goals for each specified geographic
area, prioritized by importance.

(D) A description of the role and mission
of each Federal department and agency in-
volved in executing the guidance, including the
Departments of Defense, Justice, Treasury, and
State and the Agency for International Devel-
opment.
(E) A description of gaps in United States capabilities to meet the goals listed pursuant to subparagraph (C), and the extent to which those gaps can be met through coordination with nongovernmental, international, or private sector organizations, entities, or companies.

(3) REVIEW AND UPDATE OF GUIDANCE.—The President shall review and update the guidance required under paragraph (1) as necessary. Any such review shall address each of the following:

(B) The performance of each Federal department and agency involved in executing the guidance.

(C) The performance of the unified country team and appropriate combatant command, or in the case of a cross-border effort, country teams in the area and the appropriate combatant command.
(D) Any addition to, deletion from, or change in the order of the prioritized list maintained pursuant to paragraph (2)(A).

(4) **Specified Geographic Area Defined.**—In this subsection, the term “specified geographic area” means any country, subnational territory, or region—

(A) that serves or may potentially serve as a safe haven for al-Qaeda or a violent extremist affiliate of al-Qaeda—

(i) from which to plan and launch attacks, engage in propaganda, or raise funds and other support; or

(ii) for use as a key transit route for personnel, weapons, funding, or other support; and

(B) over which one or more governments or entities exert insufficient governmental or security control to deny al-Qaeda and its violent extremist affiliates the ability to establish a large scale presence.

(5) **Submittal to Congress.**—Not later than 15 days after the President issues the guidance required under paragraph (1) or reviews or updates such guidance under paragraph (3), the President...
shall submit to the Committees on Armed Services and Foreign Affairs of the House of Representatives and the Committees on Armed Services and Foreign Relations of the Senate a copy of such guidance.

(c) IMPLEMENTATION.—

(C) The manner in which performance in furtherance of the national security planning guidance shall be considered in evaluating the performance of personnel designated to fill the positions identified as critical pursuant to subparagraph (A), including the consideration of input from personnel from other departments and agencies who filled senior positions on the country team or relevant combatant command, in particular the appropriate United States ambassador.

(D) The manner for implementing lessons learned in the course of reviewing the performance of a country team or multiple country teams and relevant combatant command in the course of reviewing the national security planning guidance under subsection (b)(3).

(E) The manner in which disputes related to carrying out the national security planning guidance between members of the country team, the relevant combatant command, or departments and agencies shall be handled.
(3) IMPLEMENTATION OF MEMORANDUM OF UNDERSTANDING.— Not later than 120 days after the memorandum of understanding required by paragraph (1) is signed, the heads of those departments and agencies listed in the national security planning guidance shall issue such policies and guidance and prescribe such regulations as are necessary to implement the memorandum of understanding for the relevant matters pertaining to their respective departments and agencies.

(4) UPDATE AND REVIEW.—The memorandum of understanding as required under paragraph (1) shall be updated and reviewed as necessary, but at a minimum shall be reviewed with each review of the national security planning guidance under subsection (b)(3).

President for National Security Affairs stated, “As
we implement New START, we’re making prepara-

Under the President’s direction, the Department of
Defense will review our strategic requirements and
develop options for further reductions in our current

5,000 warheads, including both deployed and reserve warheads. To develop these options for further reductions, we need to consider several factors, such as potential changes in targeting requirements and alert postures that are required for effective deterrence.”.

As the pilot attempted to climb, the aircraft grazed the glacier’s ridgeline and exploded within 5 seconds instantly killing Ensign Maxwell Lopez, Navigator and Wendell “Bud” Hendersin, Aviation Machinists Mate 1st Class while Frederick Williams, Aviation Radioman 1st Class died several hours later. Six other crewmen survived including the Captain of the “George 1’s” seaplane tender U.S.S. Pine Island.

(4) The bodies of the dead were protected from the desecration of Antarctic scavenging birds (Skuas) by the surviving crew wrapping the bodies and temporarily burying the men under the starboard wing engine nacelle.

(5) Rescue requirements of the “George-1” survivors forced the abandonment of their crewmates’ bodies.

(6) Conditions prior to the departure of Task Force 68 precluded a return to the area to the recover the bodies.
(7) For nearly 60 years Navy promised the families that they would recover the men: “If the safety, logistical, and operational prerequisites allow a mission in the future, every effort will be made to bring our sailors home.”.

(8) The Joint POW/MIA Accounting Command twice offered to recover the bodies of this crew for Navy.

(9) A 2004 NASA ground penetrating radar overflight commissioned by Navy relocated the crash site three miles from its crash position.

(10) The Joint POW/MIA Accounting Command offered to underwrite the cost of an aerial ground penetrating radar (GPR) survey of the crash site area by NASA.

(11) The Joint POW/MIA Accounting Command studied the recovery with the recognized recovery authorities and national scientists and determined that the recovery is only “medium risk”.

(12) National Science Foundation and scientists from the University of Texas, Austin, regularly visit the island.

(13) The crash site is classified as a “perishable site”, meaning a glacier that will calve into the Bellingshausen Sea.
(14) The National Science Foundation maintains a presence in area of the Pine Island Glacier.

(15) The National Science Foundation Director of Polar Operations will assist and provide assets for the recovery upon the request of Congress.

(16) The United States Coast Guard is presently pursuing the recovery of 3 WWII air crewmen from similar circumstances in Greenland.

(17) On Memorial Day, May 25, 2009, President Barak Obama declared: “... the support of our veterans is a sacred trust. ... we need to serve them as they have served us. ... that means bringing home all our POWs and MIAs. ...”.

(18) The policies and laws of the United States of America require that our armed service personnel be repatriated.

(19) The fullest possible accounting of United States fallen military personnel means repatriating living American POWs and MIAs, accounting for, identifying, and recovering the remains of military personnel who were killed in the line of duty, or providing convincing evidence as to why such a repatriation, accounting, identification, or recovery is not possible.
(20) It is the responsibility of the Federal Government to return to the United States for proper burial and respect all members of the Armed Forces killed in the line of duty who lie in lost graves.

(b) SENSE OF CONGRESS.— In light of the findings under subsection (a), Congress—

(1) reaffirms its support for the recovery and return to the United States, the remains and bodies of all members of the Armed Forces killed in the line of duty, and for the efforts by the Joint POW-MIA Accounting Command to recover the remains of members of the Armed Forces from all wars, conflicts and missions;

(2) recognizes the courage and sacrifice of all members of the Armed Forces who participated in Operation Highjump and all missions vital to the national security of the United States of America;

(3) acknowledges the dedicated research and efforts by the US Geological Survey, the National Science Foundation, the Joint POW/MIA Accounting Command, the Fallen American Veterans Foundation and all persons and organizations to identify, locate, and advocate for, from their temporary Antarctic grave, the recovery of the well-preserved frozen bodies of Ensign Maxwell Lopez, Naval Aviator,
Frederick Williams, Aviation Machinist’s Mate 1ST Class, Wendell Hendersin, Aviation Radioman 1ST Class of the “George 1” explosion and crash; and

(4) encourages the Department of Defense to review the facts, research and to pursue new efforts to undertake all feasible efforts to recover, identify, and return the well-preserved frozen bodies of the “George 1” crew from Antarctica’s Thurston Island.

(a) FINDINGS.—Congress makes the following findings:
(1) In 1629, Captain John Endicott organized the first militia in the Massachusetts Bay Colony in Salem.

(2) The colonists had adopted the English militia system, which required all males between the ages of 16 and 60 to possess arms and participate in the defense of the community.

(3) In 1636, the Massachusetts General Court ordered the organization of three militia regiments, designated as the North, South, and East regiments.

(4) These regiments drilled once a week and provided guard details each evening to sound the alarm in case of attack.

(5) The East Regiment, the predecessor of the 101st Engineer Battalion, assembled as a regiment for the first time in 1637 on the Salem Common, marking the beginning of the Massachusetts National Guard and the National Guard of the United States.

SEC. 1222. REPORT AND CONSULTATION ON ENERGY SECU-
RITY OF NATO ALLIANCE.

(a) FINDINGS.—Congress finds the following:

(1) Adopted in Lisbon in November 2010, the
new North Atlantic Treaty Organization (NATO)
Strategic Concept declares that “All countries are
increasingly reliant on the vital communication,
transport and transit routes on which international
trade, energy security and prosperity depend. They
require greater international efforts to ensure their
resilience against attack or disruption. Some NATO countries will become more dependent on foreign energy suppliers and in some cases, on foreign energy supply and distribution networks for their energy needs. As a larger share of world consumption is transported across the globe, energy supplies are increasingly exposed to disruption.”.

(2) The new NATO Strategic Concept further declares that, “to deter and defend against any threat to the safety and security of our populations”, the NATO alliance will, “develop the capacity to contribute to energy security, including protection of critical energy infrastructure and transit areas and lines, cooperation with partners, and consultations among Allies on the basis of strategic assessments and contingency planning.”.

(b) REPORT.—

(C) A description of potential risks posed to NATO member countries, including NATO member countries in Eastern Europe, and to United States Armed Forces based in Europe, by the relative lack of easy access to the spot market for natural gas.
(D) A description of the extent to which
the United States military, in conjunction with
the militaries of NATO member countries,
could respond to and mitigate the energy secu-

rity risk to NATO member countries and to
United States Armed Forces based on Europe
posed by the threat of a deliberate disruption of
the supply of oil or natural gas, and the relative
challenges and cost of such a response, includ-
ing for transporting oil and natural gas over
land after delivery by sea to the port of a
NATO member country.

(E) A set of recommendations for available
options to NATO member countries that are
most dependent on a single oil or natural gas
supplier or distribution network to avoid such
dependency, and the potential benefits of in-
creased pipelines within Europe to give Eastern
European countries access to the spot market
for natural gas in the event of a supply inter-
ruption.

(F) A description of all supply interrup-
tions of natural gas to NATO member countries
over the past 20 years.
(G) An analysis of the threats posed by supply interruptions, whether accidental, unauthorized or deliberate, to energy distribution infrastructure and transit areas and lines to NATO member countries most dependent on a single oil or natural gas supplier or distribution network and to United States Armed Forces based in Europe, including from events such as potential natural disasters or terrorist attacks, and the adequacy of the Department of Defense’s current contingency plans to respond to such interruptions.

(H) A description of how NATO’s military capability might be adversely affected if a major oil or natural gas supplier or distribution network were to deliberately disrupt the supply of oil or natural gas.

(I) An analysis of whether and how major suppliers of oil and natural gas to NATO member countries in Europe have used their energy markets to influence European political affairs, and the potential of such actions to undermine the long-term solidarity and future of the NATO alliance.
