8 priate.

9 “(2) USE OF TRADING.—In any case in which
10 a point source is subject to an effluent limit in a
11 permit issued under section 402 for nitrogen, phos-
12 phorus, or sediment, such point source may meet
13 that permit limit in whole or in part through a trade
14 administered by the Chesapeake Bay Nutrient and
15 Sediment Trading Commission established by section
16 117A.

17 “(3) CORRESPONDING LOAD REDUCTIONS.—
18 For any total maximum daily nutrient or sediment
19 load in the Chesapeake Bay, a process shall be de-
20 veloped—

21 “(A) to account for reductions in loadings
22 to the Chesapeake Bay watershed of nitrogen,
23 phosphorus, and sediment, including those
24 achieved by entities that do not have a total
25 maximum daily load allocation for such pollut-

1 ants, and including reductions achieved by res-
2 toration activities implemented by private enti-
3 ties, local governments, States, and Federal
4 agencies, including the Department of Agri-
5 culture; and

10 served solely to the States to implement a total max-
11 imum daily nutrient or sediment load in the Chesa-
12 peake Bay, including authority to assign load and
13 waste load allocations to individual sources and
14 source sectors to achieve a total maximum daily nu-
15 trient or sediment load in the Chesapeake Bay. At
16 the request of a Chesapeake Bay State, the Adminis-
17 trator may review a State implementation plan and
18 offer non-binding recommendations for consideration
19 by the State, but may not take any action to super-
20 sede any such State implementation.

21 “(5) ADAPTIVE MANAGEMENT.—

22 “(A) IN GENERAL.—If a Chesapeake Bay
23 State develops a plan to implement a total max-
24 imum daily nutrient or sediment load in the
25 Chesapeake Bay that provides for reductions in

1 loading through an iterative process that em-
2 ploys adaptive management principles, permits
3 may be issued under section 402 for new or ex-
4 isting point source discharges that—

5 “(i) include wasteload allocations con-
6 sistent with such plan; and

7 “(ii) demonstrate progress towards
8 achieving the wasteload allocation specified
9 in such plan by treatment, trading, or
10 other means, in accordance with the sched-
11 ule provided in such plan, as determined
12 by the permit issuing authority.

13 “(B) ASSESSMENT OF PROGRESS.—In as-
14 sessing sufficient progress by municipal dis-

17 ability, cost, effectiveness, and appropriateness
18 of practices, techniques, methods, or other pro-
19 visions for the control of such pollutants shall
20 be considered.

21 “(6) OPTIONS FOR OFFSETTING OF
22 STORMWATER MANAGEMENT REQUIREMENTS.—An
23 individual or entity undertaking land development
24 activities may meet the applicable stormwater man-
25 agement requirements by offsetting such activities

1 through the establishment of stormwater manage-
2 ment practices off-site within the Chesapeake Bay
3 watershed. Offsetting stormwater management prac-
4 tices shall include, at a minimum, the establishment
5 of riparian forest buffers, streambank fencing, or
6 other best management practices on agricultural
7 lands.

8 “(7) RELATION TO WATERSHED PARTNER-
9 SHIPS.—A Chesapeake Bay State may use funds
10 made available to the State under section 319 for

8 chief executive of the State, no further re-
9 ductions in losses of nitrogen, phosphorus,
10 or sediment may be required by the State
11 or Federal Government from agricultural
12 or nonindustrial private forest land in the
13 basin or subbasin; and

14 “(ii) during such period, no operations
15 conducted on agricultural or nonindustrial
16 private forest land in the basin or subbasin
