It is the sense of Congress that—

(2) the United States Marine Corps is unique in that, while embarked upon Naval vessels, they bring all the logistic support necessary for the full range of military operations, operating “from the sea” they require no third party host nation permission to conduct military operations;

(3) the Department of the Navy has a requirement for 38 amphibious assault ships to meet this full range of military operations;

(4) for budgetary reasons only that requirement of 38 vessels was reduced to 33 vessels, which adds military risk to future operations;
(5) the Department of the Navy has been unable
to meet even the minimal requirement of 33 oper-
ationally available vessels and has submitted a ship-
building and ship retirement plan to the Congress
which will reduce the force to 28 vessels; and

(6) experience has shown that early engineering
and design of naval vessels has significantly reduced
the acquisition costs and life-cycle costs of those ves-
sels.

(b) **Next Generation of Amphibious Ships.**—In
light of subsection (a), it is the sense of Congress that—

(1) the Navy should consider prioritization of in-
vestment in and procurement of the next generation
of amphibious assault ships;

(2) the next generation amphibious assault ships
should maintain survivability protection level II in
accordance with current Navy ship requirements;

(3) commonality in hull form design could be a
desirable element to reduce acquisition and life cycle
cost; and

(4) maintaining a robust amphibious ship-
building industrial base is vital for future national
security.

HR 4310 RH

1480) is amended by striking “December 31, 2012” and inserting “March 31, 2013”.

SEC. 723. ESTABLISHMENT OF TRICARE WORKING GROUP.

(a) Sense of Congress.—It is the sense of Congress that—

(1) children of members of the Armed Forces deserve health-care practices and policies that—

(A) are designed to meet their pediatric-specific needs;

(B) are developed and determined proactively and comprehensively; and

(C) ensure and maintain their access to pediatric-specific treatments, providers, and facilities.

(2) children’s health-care needs and standards of care are different and distinct from those of adults, therefore the TRICARE program should undertake a proactive, comprehensive approach to review and analyze its policies and practices to meet the needs of children to ensure that children and their families receive appropriate care in proper settings and avoid unnecessary challenges in seeking or obtaining proper health care;

(3) a proactive and comprehensive review is necessary because the reimbursement structure of the
TRICARE program is patterned upon Medicare and the resulting policies and practices of the TRICARE program do not always properly reflect appropriate standards for pediatric care;

(4) one distinct aspect of children’s health care is the need for specialty care and services for children with special-health-care needs and chronic-health conditions;

(5) the requirement for specialized health care and developmental support is an ongoing and serious matter of day-to-day life for families with children with special or chronic-health-care needs;

(6) the Department of Defense and the TRICARE program, recognizing the special needs of certain children, have instituted special-needs programs, including the ECHO program, but there are collateral needs that are not being met, generally because the services are provided in the local community rather than by the Department of Defense, who may not always have the best tools or knowledge to access these State and local resources;

(7) despite wholehearted efforts by the Department of Defense, a gap exists between linking military families with children with special-health-care needs and chronic conditions with the resources and
services available from local or regional highly specialized providers and the communities and States in which they reside;

(8) the gap is especially exacerbated by the mobility of military families, who often move from State to State, because special-needs health care, educational, and social services are very specific to each local community and State and such services often have lengthy waiting lists; and

(9) the Department of Defense will be better able to assist military families with children with special-health-care needs fill the gap by collaborating with special-health-care needs providers and those knowledgeable about the opportunities for such children that are provided by States and local communities.

(b) ESTABLISHMENT.—

(1) IN GENERAL.—The Secretary of Defense shall establish a working group to carry out a review of the TRICARE program with respect to—

(A) pediatric health care needs under paragraph (2); and

(i) comprehensively review the policy and practices of the TRICARE program with respect to providing pediatric health care;

(ii) recommend changes to such policies and practices to ensure that—

(I) children receive appropriate care in an appropriate manner, at the appropriate time, and in an appropriate setting; and

(II) access to care and treatment provided by pediatric providers and children’s hospitals remains available for families with children; and

(iii) develop a plan to implement such changes.

(B) REVIEW.—In carrying out the duties under subparagraph (A), the working group shall—

(i) identify improvements in policies, practices, and administration of the TRICARE program with respect to pediatric-specific health care and pediatric-specific healthcare settings;
(ii) analyze the direct and indirect effects of the reimbursement policies and practices of the TRICARE program with respect to pediatric care and care provided in pediatric settings;

(iii) consider case management programs with respect to pediatric complex and chronic care, including whether pediatric specific programs are necessary;

(iv) develop a plan to ensure that the TRICARE program addresses pediatric-specific health care needs on an on-going basis beyond the life of the working group;

(3) Pediatric special and chronic health care needs.—

(A) Duties.—The working group shall—
(i) review the methods in which families in the TRICARE program who have children with special-health-care needs access community resources and health-care resources;

(ii) review how having access to, and a better understanding of, community resources may improve access to health care and support services;

(iii) recommend methods to accomplish improved access by such children and families to community resources and health-care resources, including through collaboration with children’s hospitals and other providers of pediatric specialty care, local agencies, local communities, and States;

(iv) consider approaches and make recommendations for the improved integration of individualized or compartmentalized medical and family support resources for military families;

(v) work closely with the Office of Community Support for Military Families with Special Needs of the Department of Defense and other relevant offices to avoid
redundancies and target shared areas of concern for children with special or chronic-health-care needs; and

(vi) review any relevant information learned and findings made by the working group under this paragraph that may be considered or adopted in a consistent manner with respect to improving access, resources, and services for adults with special needs.

(B) REVIEW.—In carrying out the duties under subparagraph (A), the working group shall—

(i) discuss improvements to special needs health care policies and practices;

(ii) determine how to support and protect families of members of the National Guard or Reserve Components as the members transition into and out of the relevant Exceptional Family Member Program or the ECHO program;

(iii) analyze case management services to improve consistency, communication, knowledge, and understanding of resources and community contacts;
(iv) identify areas in which a State may offer services that are not covered by the TRICARE program or the ECHO program and how to coordinate such services;

(v) identify steps that States and communities can take to improve support for military families of children with special health care needs;

(vi) consider how the TRICARE program and other programs of the Department of Defense can work with specialty pediatric providers and resource communities to ensure access, promote communication and collaboration, and optimize experiences of military families seeking and receiving health care services for their children with special or chronic health care needs;

(vii) consider special and chronic health care in a comprehensive manner without focus on one or more conditions or diagnoses to the exclusion of others;

(viii) focus on ways to create innovative partnerships, linkages, and access to information and resources for military families across the spectrum of the special-needs
community and between the medical community and the family support community; and

(ix) review matters that further the mission of the working group.

(c) Membership.—

(b) CONFORMING AMENDMENT.—Section 12304b(i) of title 10, United States Code, is amended by striking “231(e)(2)” and inserting “section 231(f)(2)”.

Subtitle D—Counterterrorism

Congress finds the following:

(1) In 2001, Congress passed, and the President signed, the Authorization for Use of Military Force (Public Law 107–40; 50 U.S.C. 1541 note) (hereinafter referred to as the “AUMF”), which authorized the President to “use all necessary and appropriate force” against those responsible for the attacks of September 11, 2001, and those who harbored them “in order to prevent any future acts of international terrorism against the United States”.

(2) In 2004, the Supreme Court held in Hamdi v. Rumsfeld that the AUMF authorized the President to detain individuals, including a United States citizen captured in Afghanistan and later detained in the United States, legitimately determined to be “engaged in armed conflict against the United States” until the end of hostilities, noting that “[W]e understand Congress’ grant of authority for the use of “nec-
necessary and appropriate force’ to include the authority
to detain for the duration of the relevant conflict, and
our understanding is based on longstanding law-of-
war principles’’.

(3) The Court reaffirmed the long-standing prin-
ciple of American law that a United States citizen
may not be detained in the United States pursuant
to the AUMF without due process of law, stating the
following:

   (A) “Striking the proper constitutional bal-
   ance here is of great importance to the Nation
during this period of ongoing combat. But it is
equally vital that our calculus not give short
shrift to the values that this country holds dear
or to the privilege that is American citizenship.”.

   (B) “It is during our most challenging and
uncertain moments that our Nation’s commit-
ment to due process is most severely tested; and
it is in those times that we must preserve our
commitment at home to the principles for which
we fight abroad.”.

   (C) “[A] state of war is not a blank check
for the President when it comes to the rights of
the Nation’s citizens.”.
(D) “[A]bsent suspension, the writ of habeas corpus remains available to every individual detained within the United States.”.

(E) “All agree suspension of the writ has not occurred here.”.

(F) “[A]n enemy combatant must receive notice of the factual basis for his classification, and a fair opportunity to rebut the Government’s factual assertions before a neutral decisionmaker.”.

(G) “Whatever power the United States Constitution envisions for the Executive in its exchanges with other nations or with enemy organizations in times of conflict, it most assuredly envisions a role for all three branches when individual liberties are at stake.”.

(H) “[U]nless Congress acts to suspend it, the Great Writ of habeas corpus allows the Judicial Branch to play a necessary role in maintaining this delicate balance of governance, serving as an important judicial check on the Executive’s discretion in the realm of detentions.”.

(I) “We reaffirm today the fundamental nature of a citizen’s right to be free from involuntary confinement by his own government without
due process of law, and we weigh the opposing
governmental interests against the curtailment of
liberty that such confinement entails.”.

(4) In 2008, in Boumediene v. Bush, the Su-
preme Court also extended the constitutional right to
habeas corpus to the foreign detainees held pursuant
to the AUMF at the United States Naval Station,
Guantanamo Bay, Cuba.

(5) Chapter 47A of title 10, United States Code,
as originally enacted by the Military Commissions
Act of 2006 (Public Law 109–366), only allows for
prosecution of foreign terrorists by military commis-
sion.

(6) In 2011, with the enactment of the National
Defense Authorization Act for Fiscal Year 2012 (Pub-
lic Law 112–81), Congress and the President affirmed
the authority of the Armed Forces of the United
States to detain pursuant to the AUMF a person who
planned, authorized, committed, or aided the terrorist
attacks that occurred on September 11, 2001, or har-
bored those responsible for those attacks, or a person
who was a part of or substantially supported al-
Qaeda, the Taliban, or associated forces that are en-
gaged in hostilities against the United States or its
coalition partners, including any person who has
committed a belligerent act or has directly supported such hostilities in aid of such enemy forces.

(7) The interpretation of the detention authority provided by the AUMF under the National Defense Authorization Act for Fiscal Year 2012 is the same as the interpretation used by the Obama administration in its legal filings in Federal court and is nearly identical to the interpretation used by the Bush administration. This interpretation has also been upheld by the United States Court of Appeals for the District of Columbia Circuit.

(8) Such Act also requires the Secretary of Defense to regularly brief Congress regarding the application of the detention authority provided by the AUMF.

(9) Section 1021 of such Act states that “Nothing in this section shall be construed to affect existing law or authorities relating to the detention of United States citizens, lawful resident aliens of the United States, or any other persons who are captured or arrested in the United States.”.

SEC. 1032. FINDINGS REGARDING HABEAS CORPUS RIGHTS.

Congress finds the following:

(1) Article 1, section 9 of the Constitution states “The Privilege of the Writ of Habeas Corpus shall not
be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.”.

(2) Regarding the Great Writ, the Supreme Court has noted “The writ of habeas corpus is the fundamental instrument for safeguarding individual freedom against arbitrary and lawless state action.”.

SEC. 1033. HABEAS CORPUS RIGHTS.

Nothing in the Authorization for Use of Military Force (Public Law 107–40; 50 U.S.C. 1541 note) or the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81) shall be construed to deny the availability of the writ of habeas corpus in a court ordained or established by or under Article III of the Constitution for any person who is detained in the United States pursuant to the Authorization for Use of Military Force (Public Law 107–40; 50 U.S.C. 1541 note).

SEC. 1034. EXTENSION OF AUTHORITY TO MAKE REWARDS FOR COMBATING TERRORISM.

torities to make rewards for combating terrorism. The report shall include—

SEC. 1052. COMMITMENTS FOR NUCLEAR WEAPONS STOCK-
PILE MODERNIZATION.

(a) FINDINGS.—Congress finds the following:

(1) In 2008, then Secretary of Defense Robert
Gates warned that “to be blunt, there is absolutely no
way we can maintain a credible deterrent and reduce
the number of weapons in our stockpile without either
resorting to testing our stockpile or pursuing a modernization program.”.

(2) Secretary Gates also warned in September 2009 that modernization is a prerequisite to nuclear force reductions, stating that modernizing the nuclear capability of the United States is an “enabler of arms control and our ability to reduce the size of our nuclear stockpile. When we have more confidence in the long-term viability of our weapons systems, then our ability to reduce the number of weapons we must keep in the stockpile is enhanced.”.

(3) President Obama’s 2010 Nuclear Posture Review stated that—

(A) “In order to sustain a safe, secure, and effective U.S. nuclear stockpile as long as nuclear weapons exist, the United States must possess a modern physical infrastructure—comprised of the national security laboratories and a complex of supporting facilities.”; and

(B) “[I]mplementation of the Stockpile Stewardship Program and the nuclear infrastructure investments recommended in the NPR will allow the United States to shift away from retaining large numbers of non-deployed warheads as a hedge against technical or geopolitical...
surprise, allowing major reductions in the nuclear stockpile. These investments are essential to facilitating reductions while sustaining deterrence under New START and beyond.”.

(4) Section 1251 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84; 123 Stat. 2549) required the President to submit a report to Congress on the plan for the nuclear weapons stockpile, nuclear weapons complex, and delivery platforms at the time a follow-on treaty to the Strategic Arms Reduction Treaty was submitted by the President to the Senate. The President submitted such report in May 2010 and submitted updates in November 2010 and February 2011.

(5) Such section 1251 also contained a sense of Congress that “the enhanced safety, security, and reliability of the nuclear weapons stockpile, modernization of the nuclear weapons complex, and maintenance of nuclear delivery systems are key to enabling further reductions in the nuclear forces of the United States.”.

(6) Forty-one Senators wrote to President Obama on December 15, 2009, stating, “we don’t believe further reductions can be in the national secu-
rity interest of the U.S. in the absence of a significant program to modernize our nuclear deterrent.”.

(7) Former Secretary of Defense and Secretary of Energy James Schlesinger stated, while testifying before the Committee on Foreign Relations of the Senate in April 2010, “I believe that it is immensely important for the Senate to ensure, what the Administration has stated as its intent, i.e., that there be a robust plan with a continuation of its support over the full 10 years, before it proceeds to ratify this START follow-on treaty.”.

(8) Former Secretary of State James Baker stated in testimony before the Committee on Foreign Relations of the Senate in May 2010 that “because our security is based upon the safety and reliability of our nuclear weapons, it is important that our Government budget enough money to guarantee that those weapons can carry out their mission.”.

(9) Former Secretary of State Henry Kissinger also stated in May 2010 while testifying before the Committee on Foreign Relations of the Senate that “as part of a number of recommendations, my colleagues, Bill Perry, George Shultz, Sam Nunn, and I have called for significant investments in a repaired
and modernized nuclear weapons infrastructure and
added resources for the three national laboratories.”.

(10) Then Secretary of Defense Robert Gates,
while testifying before the Committee on Armed Serv-
ces of the Senate in June 2010, stated, “I see this
treaty as a vehicle to finally be able to get what we
need in the way of modernization that we have been
unable to get otherwise. . . . We are essentially the
only nuclear power in the world that is not carrying
out these kinds of modernization programs.”.

(11) Secretary Gates further stated that “I’ve
been up here for the last four springs trying to get
money for this and this is the first time I think I’ve
got a fair shot of actually getting money for our nu-
clear arsenal.”.

(12) The Directors of the national nuclear weap-
ons laboratories wrote to the chairman and ranking
member of the Committee on Foreign Relations of the
Senate in December 2010 that “We are very pleased
by the update to the Section 1251 Report, as it would
enable the laboratories to execute our requirements for
ensuring a safe, secure, reliable and effective stockpile
under the Stockpile Stewardship and Management
Plan. In particular, we are pleased because it clearly
responds to many of the concerns that we and others
have voiced in the past about potential future-year funding shortfalls, and it substantially reduces risks to the overall program. In summary, we believe that the proposed budgets provide adequate support to sustain the safety, security, reliability and effectiveness of America’s nuclear deterrent within the limit of 1,550 deployed strategic warheads established by the New START Treaty with adequate confidence and acceptable risk.”.

(13) President Obama pledged, in a December 2010 letter to several Senators, “I recognize that nuclear modernization requires investment for the long-term. . . . That is my commitment to the Congress— that my Administration will pursue these programs and capabilities for as long as I am President.”.

(14) Secretary Gates added in May 2011 that, “this modernization program was very carefully worked out between ourselves and the Department of Energy; and, frankly, where we came out on that played a fairly significant role in the willingness of the Senate to ratify the New START agreement.”.

(15) The Administrator for Nuclear Security, Thomas D’Agostino, testified before Congress in November 2011 that, “it is critical to accept the linkage between modernizing our current stockpile in order to
achieve the policy objective of decreasing the number
of weapons we have in our stockpile, while still ensur-
ing that the deterrent is safe, secure, and effective.”.

(b) NEW START TREATY DEFINED.—In this subtitle,
the term “New START Treaty” means the Treaty between
the United States of America and the Russian Federation
on Measures for the Further Reduction and Limitation of
Strategic Offensive Arms, signed on April 8, 2010, and en-
tered into force on February 5, 2011.

“(2) INSUFFICIENT FUNDING.—

“(A) REPORT.—During each year in which
the New START Treaty is in force, if the Presi-
dent determines that an appropriations Act is enacted that fails to meet the resource levels set forth in the November 2010 update to the plan referred to in section 1251 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84; 123 Stat. 2549) or if at any time determines that more resources are required to carry out such plan than were estimated, the President shall submit to the appropriate congressional committees, within 60 days of making such a determination, a report detailing—

“(i) a plan to remedy the resource shortfall;

“(ii) if more resources are required to carry out the plan than were estimated—

“(I) the proposed level of funding required; and

“(II) an identification of the stockpile work, campaign, facility, site, asset, program, operation, activity, construction, or project for which additional funds are required;

“(iii) any effects caused by the shortfall on the safety, security, reliability, or credi-
bility of the nuclear forces of the United States; and

“(iv) whether and why, in light of the shortfall, remaining a party to the New START Treaty is in the national interest of the United States.

“(B) LIMITATION.—If the President submits a report under subparagraph (A), none of the funds made available for fiscal year 2012 or any fiscal year thereafter for the Department of Defense or the National Nuclear Security Administration may be used to reduce the number of deployed nuclear warheads until—

“(i) after the date on which such report is submitted, the President certifies in writing to the appropriate congressional committees that the resource shortfall identified in such report has been addressed; and

“(ii) a period of 120 days has elapsed following the date on which such certification is made.

“(C) EXCEPTION.—The limitation in subparagraph (B) shall not apply to—

“(i) reductions made to ensure the safety, security, reliability, and credibility of
the nuclear weapons stockpile and strategic delivery systems, including activities related to surveillance, assessment, certification, testing, and maintenance of nuclear warheads and strategic delivery systems; or

“(ii) nuclear warheads that are retired or awaiting dismantlement on the date of the report under subparagraph (A).

“(D) DEFINITIONS.—In this paragraph:

“(i) The term ‘appropriate congressional committees’ means—

“(I) the congressional defense committees; and

“(II) the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives.

(2) **EFFECTIVE DATE.**—The amendment made by paragraph (1) shall take effect on October 1, 2012.

**SEC. 1054. PROGRESS OF MODERNIZATION.**

(a) **FINDINGS.**—Congress finds the following:

(1) In 2008, then Secretary of Defense Robert Gates warned that “to be blunt, there is absolutely no way we can maintain a credible deterrent and reduce the number of weapons in our stockpile without either resorting to testing our stockpile or pursuing a modernization program.”

(2) The 2010 Nuclear Posture Review stated that “the President has directed a review of post-New START arms control objectives, to consider future reductions in nuclear weapons. Several factors will influence the magnitude and pace of future reductions in U.S. nuclear forces below New START levels”, including—

(A) “First, any future nuclear reductions must continue to strengthen deterrence of potential regional adversaries, strategic stability vis-à-vis Russia and China, and assurance of our allies and partners. This will require an updated assessment of deterrence requirements; further improvements in U.S., allied, and partner non-nuclear capabilities; focused reductions in stra-
ategic and non-strategic weapons; and close consultations with allies and partners. The United States will continue to ensure that, in the calculations of any potential opponent, the perceived gains of attacking the United States or its allies and partners would be far outweighed by the unacceptable costs of the response.”;

(B) “Second, implementation of the Stockpile Stewardship Program and the nuclear infrastructure investments recommended in the NPR will allow the United States to shift away from retaining large numbers of non-deployed warheads as a hedge against technical or geopolitical surprise, allowing major reductions in the nuclear stockpile. These investments are essential to facilitating reductions while sustaining deterrence under New START and beyond.”; and

(C) “Third, Russia’s nuclear force will remain a significant factor in determining how much and how fast we are prepared to reduce U.S. forces. Because of our improved relations, the need for strict numerical parity between the two countries is no longer as compelling as it was during the Cold War. But large disparities in nuclear capabilities could raise concerns on
both sides and among U.S. allies and partners, and may not be conducive to maintaining a sta-
ble, long-term strategic relationship, especially as nuclear forces are significantly reduced. There-
fore, we will place importance on Russia joining us as we move to lower levels.”.

(3) The 2010 Nuclear Posture Review also stated that the Administration would “conduct follow-on analysis to set goals for future nuclear reductions below the levels expected in New START, while strengthening deterrence of potential regional adver-
saries, strategic stability vis-à-vis Russia and China, and assurance of our allies and partners.”.

(4) The Secretary of Defense has warned in testi-
mony before the Committee on Armed Services of the House of Representatives regarding the sequestration mechanism under section 251A of the Balanced Budg-
et and Emergency Deficit Control Act of 1985 that “if this sequester goes into effect and it doubles the num-er of cuts, then it’ll truly devastate our national de-
fense, because it will then require that we have to go at our force structure. We will have to hollow it out . . . [i]t will badly damage our capabilities for the future. . . . And if you have a smaller force, you’re
not going to be able to be out there responding in as
many areas as we do now.”.

(5) The 2010 Nuclear Posture Review also stated
that “by modernizing our aging nuclear facilities and
investing in human capital, we can substantially re-
duce the number of nuclear weapons we retain as a
hedge.”.

(6) The President requested the promised
$7,600,000,000 for weapons activities of the National
Nuclear Security Administration in fiscal year 2012
but signed an appropriations Act for fiscal year 2012
that provided only $7,233,997,000, a substantial re-
duction to only the second year of the ten-year plan
under section 1251 of the National Defense Authoriza-
tion Act for Fiscal Year 2010 (Public Law 111–84;
123 Stat. 2549).

(7) The President requested only $7,577,341,000
for weapons activities of the National Nuclear Secu-
rity Administration in fiscal year 2013 while the
President’s section 1251 plan promised
$7,900,000,000.

(8) The President’s section 1251 plan further
promised to request $8,400,000,000 in fiscal year
2014, $8,700,000,000 in fiscal year 2015,
$8,900,000,000 in fiscal year 2016, at least
$8,900,000,000 in fiscal year 2017, at least
$9,200,000,000 in fiscal year 2018, at least
$9,400,000,000 in fiscal year 2019, at least
$9,400,000,000 in fiscal year 2020, and at least
$9,500,000,000 in fiscal year 2021.

(9) While the administration has not yet shared
with Congress the terms of reference of the so-called
Nuclear Posture Review Implementation Study, or
the Department of Defense’s instructions for that re-
view, the only publicly available statements by the
administration, including language from the Nuclear
Posture Review, suggest the review was specifically
instructed by the President and his senior political
appointees to only consider reductions to the nuclear
forces of the United States.

(10) When asked at a hearing if the New START
Treaty allowed the United States “to maintain a nu-
clear arsenal that is more than is needed to guarantee
an adequate deterrent,” then Commander of the
United States Strategic Command, General Kevin P.
Chilton said, “I do not agree that it is more than is
needed. I think the arsenal that we have is exactly
what is needed today to provide the deterrent.”.
(b) **Nuclear Employment Strategy.**—Section 491 of title 10, United States Code, as amended by section 1051, is amended by adding after subsection (b) the following:

“(c) Limitation.—With respect to a new nuclear weapons employment strategy described in a report submitted to Congress under subsection (a), none of the funds made available for fiscal year 2012 or any fiscal year thereafter for the Department of Defense may be used to implement such strategy until a period of one year has elapsed following the date on which such report is submitted to Congress.”.

(c) Limitation.—During each of fiscal years 2012 through 2021, none of the funds made available for each such fiscal year for the Department of Defense may be used to carry out the results of the decisions made pursuant to the 2010 Nuclear Posture Review Implementation Study that would alter the nuclear weapons employment strategy, guidance, plans, or options of the United States until the date on which the President certifies to the congressional defense committees that—

(1) the President has included the resources necessary to carry out the February 2011 update to the report required under section 1251 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84; 123 Stat. 2549) in the budget of the
President submitted to Congress under section 1105(a) of title 31, United States Code, for such fiscal year;

(2) the resources described in paragraph (1) have been provided to the President in an appropriations Act; and

(3) the sequestration mechanism under section 251A of the Balanced Budget and Emergency Deficit Control Act of 1985 has been repealed or the sequestration mechanism under such section for the security category has otherwise been terminated.

SEC. 1055. LIMITATION ON STRATEGIC DELIVERY SYSTEM REDUCTIONS.

(a) FINDINGS.—Congress finds the following:

(1) The Nuclear Posture Review of 2010 said, with respect to modernizing the triad, “for planned reductions under New START, the United States should retain a smaller Triad of SLBMs, ICBMs, and heavy bombers. Retaining all three Triad legs will best maintain strategic stability at reasonable cost, while hedging against potential technical problems or vulnerabilities.”.

(2) The Senate stated in Declaration 13 of the Resolution of Advice and Consent to Ratification of the New START Treaty that “In accordance with
paragraph 1 of Article V of the New START Treaty, which states that, ‘Subject to the provisions of this Treaty, modernization and replacement of strategic offensive arms may be carried out,’ it is the sense of the Senate that United States deterrence and flexibility is assured by a robust triad of strategic delivery vehicles. To this end, the United States is committed to accomplishing the modernization and replacement of its strategic nuclear delivery vehicles, and to ensuring the continued flexibility of United States conventional and nuclear delivery systems.”.

(3) The Senate required the President, prior to the entry into force of the New START Treaty, to certify to the Senate that the President intended to modernize or replace the triad of strategic nuclear delivery systems.

(4) The President made this certification in a message to the Senate on February 2, 2011, in which the President stated, “I intend to (a) modernize or replace the triad of strategic nuclear delivery systems: a heavy bomber and air-launched cruise missile, an ICBM, and a nuclear-powered ballistic missile submarine (SSBN) and SLBM; and (b) maintain the United States rocket motor industrial base.”.

(b) LIMITATION.—
(1) IN GENERAL.—Chapter 24 of title 10, United States Code, as added by section 1051, is amended by adding at the end the following new section:

§ 494. STRATEGIC DELIVERY SYSTEM REDUCTIONS

“(a) ANNUAL CERTIFICATION.—Beginning fiscal year 2013, the President shall annually certify in writing to the congressional defense committees whether plans to modernize or replace strategic delivery systems are fully resourced and being executed at a level equal to or more than the levels set forth in the November 2010 update to the plan referred to in section 1251 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84; 123 Stat. 2549), including plans regarding—

“(1) a heavy bomber and air-launched cruise missile;

“(2) an intercontinental ballistic missile;

“(3) a submarine-launched ballistic missile;

“(4) a ballistic missile submarine; and

“(5) maintaining—

“(A) the nuclear command and control system; and

“(B) the rocket motor industrial base of the United States.

“(b) LIMITATION.—If the President certifies under subsection (a) that plans to modernize or replace strategic de-
livery systems are not fully resourced or being executed, none of the funds made available for fiscal year 2012 or any fiscal year thereafter for the Department of Defense may be used to reduce, convert, or eliminate strategic delivery systems, whether deployed or nondeployed, pursuant to the New START Treaty or otherwise until a period of 120 days has elapsed following the date on which such certification is made.

“(c) EXCEPTION.—The limitation in subsection (b) shall not apply to—

“(1) reductions made to ensure the safety, security, reliability, and credibility of the nuclear weapons stockpile and strategic delivery systems, including activities related to surveillance, assessment, certification, testing, and maintenance of nuclear warheads and delivery systems; or

“(2) strategic delivery systems that are retired or awaiting dismantlement on the date of the certification under subsection (a).

“(d) DEFINITIONS.—In this section:

“(1) The term ‘New START Treaty’ means the Treaty between the United States of America and the Russian Federation on Measures for the Further Reduction and Limitation of Strategic Offensive Arms,
signed on April 8, 2010, and entered into force on February 5, 2011.

“(2) The term ‘strategic delivery system’ means a delivery platform for nuclear weapons.”.

(2) CLERICAL AMENDMENTS.—The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

“494. Strategic delivery system reductions.”.

SEC. 1056. PREVENTION OF ASYMMETRY OF NUCLEAR WEAPON STOCKPILE REDUCTIONS.

(a) FINDINGS.—Congress finds the following:

(1) Then Secretary of Defense Robert Gates warned in 2008 that, “There is no way to ignore efforts by rogue states such as North Korea and Iran to develop and deploy nuclear weapons or Russian or Chinese strategic modernization programs. To be sure, we do not consider Russia or China as adversaries, but we cannot ignore these developments and the implications they have for our national security.”.

(2) The 2010 Nuclear Posture Review stated that, “large disparities in nuclear capabilities could raise concerns on both sides and among U.S. allies and partners, and may not be conducive to maintaining a stable, long-term strategic relationship, especially as nuclear forces are significantly reduced.”.
(3) The Senate stated in the Resolution of Advice and Consent to Ratification of the New START Treaty that, “It is the sense of the Senate that, in conducting the reductions mandated by the New START Treaty, the President should regulate reductions in United States strategic offensive arms so that the number of accountable strategic offensive arms under the New START Treaty possessed by the Russian Federation in no case exceeds the comparable number of accountable strategic offensive arms possessed by the United States to such an extent that a strategic imbalance endangers the national security interests of the United States.”.

(4) At a hearing before the Committee on Armed Services of the House of Representatives in 2011, Secretary of Defense Leon Panetta said, with respect to unilateral nuclear reductions by the United States, “I don’t think we ought to do that unilaterally—we ought to do that on the basis of negotiations with the Russians and others to make sure we are all walking the same path.”.

(b) CERTIFICATION.—Section 1045 of the National Defense Authorization Act for Fiscal Year 2012 (50 U.S.C. 2523b) is amended by adding at the end the following new subsection:
“(d) PREVENTION OF ASYMMETRY IN REDUCTIONS.—

“(1) CERTIFICATION.—During any year in which the President recommends to reduce the number of nuclear weapons in the active and inactive stockpiles of the United States by a number that is greater than one percent of the number of nuclear weapons in such stockpiles, the President shall certify in writing to the congressional defense committees whether such reductions will cause the number of nuclear weapons in such stockpiles to be fewer than the number of nuclear weapons in the active and inactive stockpiles of the Russian Federation.

“(2) LIMITATION.—If the President certifies under paragraph (1) that the recommended number of nuclear weapons in the active and inactive stockpiles of the United States is fewer than the number of nuclear weapons in the active and inactive stockpiles of the Russian Federation, none of the funds made available for fiscal year 2012 or any fiscal year thereafter for the Department of Defense or the National Nuclear Security Administration may be used to carry out any reduction to such stockpiles of the United States until—

“(A) after the date on which such certification is made, the President transmits to the
congressional defense committees a report by the
Commander of the United States Strategic Com-
mand, without change, detailing whether the rec-
ommended reduction would create a strategic im-
balance between the total nuclear forces of the
United States and the total nuclear forces of the
Russian Federation; and
“(B) a period of 180 days has elapsed fol-
lowing the date on which such report is trans-
mittted.
“(3) EXCEPTION.—The limitation in paragraph
(2) shall not apply to—
“(A) reductions made to ensure the safety,
security, reliability, and credibility of the nu-
clear weapons stockpile and strategic delivery
systems, including activities related to surveil-
lance, assessment, certification, testing, and
maintenance of nuclear warheads and strategic
delivery systems; or
“(B) nuclear warheads that are retired or
awaiting dismantlement on the date of the cer-
tification under paragraph (1).”.

SEC. 1057. CONSIDERATION OF EXPANSION OF NUCLEAR
FORCES OF OTHER COUNTRIES.

(a) FINDINGS.—Congress finds the following:
(1) The Resolution of Advice and Consent to Ratification of the New START Treaty of the Senate said, “It is the sense of the Senate that if, during the time the New START Treaty remains in force, the President determines that there has been an expansion of the strategic arsenal of any country not party to the New START Treaty so as to jeopardize the supreme interests of the United States, then the President should consult on an urgent basis with the Senate to determine whether adherence to the New START Treaty remains in the national interest of the United States.”.

(2) In 2011, experts testified before the Committee on Armed Services of the House of Representatives that—

(A) “Russia is modernizing every leg of its nuclear triad with new, more advanced systems”, including new ballistic missile submarines, new heavy intercontinental ballistic missiles carrying up to 15 warheads each, new shorter range ballistic missiles, and new low-yield warheads; and

(B) “China is steadily increasing the numbers and capabilities of the ballistic missiles it deploys and is upgrading older ICBMs to newer, more advanced systems. China also appears to be
actively working to develop a submarine-based nuclear deterrent force, something it has never had. . . . A recent unclassified Department of Defense report says that this network of tunnels could be in excess of 5,000 kilometers and is used to transport nuclear weapons and forces.”.

(b) REPORT AND CERTIFICATION.—

(1) IN GENERAL.—Chapter 24 of title 10, United States Code, as added by section 1051, is amended by adding at the end the following new section:

“§ 495. Consideration of expansion of nuclear forces of other countries

“(a) REPORT AND CERTIFICATION.—During any year in which the President recommends any reductions in the nuclear forces of the United States, none of the funds made available for fiscal year 2012 or any fiscal year thereafter for the Department of Defense or the National Nuclear Security Administration may be used for such recommended reduction until the date on which—

“(1) the President transmits to the appropriate congressional committees a report detailing, for each country with nuclear weapons—

“(A) the number of each type of nuclear weapons possessed by such country;
“(B) the modernization plans for such weapons of such country;

“(C) the production capacity of nuclear warheads and strategic delivery systems (as defined in section 491(c) of this title) of such country; and

“(D) the nuclear doctrine of such country; and

“(2) the Commander of the United States Strategic Command certifies to the appropriate congressional committees whether such recommended reductions in the nuclear forces of the United States will—

“(A) impair the ability of the United States to address—

“(i) unplanned strategic or geopolitical events; or

“(ii) technical challenge; or

“(B) degrade the deterrence or assurance provided by the United States to friends and allies of the United States.

“(b) FORM.—The reports required by subsection (a)(1) shall be submitted in unclassified form, but may include a classified annex.
“(c) APPROPRIATE CONGRESSIONAL COMMITTEES DE-
FINED.—In this section, the term ‘appropriate congres-
sional committees’ means the following:

“(1) The congressional defense committees.

“(2) The Committee on Foreign Affairs of the
House of Representatives and the Committee on For-
egn Relations of the Senate.”.

(2) The table of sections at the beginning of
chapter 24 of title 10, United States Code, is amended
by inserting after the item relating to section 494 the
following new item:

“495. Consideration of expansion of nuclear forces of other countries.”.

SEC. 1058. CHEMISTRY AND METALLURGY RESEARCH RE-
PLACEMENT NUCLEAR FACILITY AND URA-
NIUM PROCESSING FACILITY.

(a) FINDINGS.—Congress finds the following:

(1) Administrator for Nuclear Security Thomas
D’Agostino testified before the Committee on Armed
Services of the House of Representatives in February
2008 that “Infrastructure improvements are a major
part of the complex transformation plan that we have,
and we’ve made important progress, but we have a lot
more to do. Some major facilities that we have date
back to World War II and cannot readily meet to-
day’s safety and security requirements. Let me give
you just two quick examples, if I could. A sufficient
capability to work with plutonium is an essential part of a national security enterprise and is required for as long as we retain a nuclear deterrent, and most likely even longer. Currently, we have a very small production capacity at Los Alamos, about 10 pits per year, at our TA–55 area. Our building at Los Alamos, the Chemistry and Metallurgy Research Facility, is well over 50 years old and is insufficient to support the national security requirements for the stockpile and for future national security mission areas. So, whether we continue on our existing path or move towards a replacement modern warhead-type stockpile, we still need the capacity to produce about 50 to 80 pits per year, which is less than one-tenth of our Cold War level, as well as the ability to carry out pit surveillance, which is an essential part of maintaining our stockpile.”.

(2) Then Commander of the United States Strategic Command General Kevin P. Chilton also testified in February 2008 that “When you have a responsive complex that has the capacity to flex to production as you may need it or adjust your deployed force posture in the future, should you need it—in other words, if we go to a lower number, you need to be certain that you can come back up, should the strategic
environment change, and you can’t necessarily without that flexible or responsive infrastructure behind it, and that’s probably one of my great concerns. And then how you posture both the portion of your stockpile that you hold in reserve and your confidence in the weapons that you have deployed is very much a function of modernizing, in my view, the weapons systems that we have available today, which are, as the secretary described, of Cold War legacy design, and the associated issues with them.”.

(3) The Congressional Commission on the Strategic Posture of the United States reported in May 2009, with respect to the timing of the replacement of the nuclear weapons infrastructure of the United States, that “This raises an obvious question about whether these two replacement programs might proceed in sequence rather than concurrently. There are strong arguments for moving forward concurrently. Existing facilities are genuinely decrepit and are maintained in a safe and secure manner only at high cost. Moreover, the improved production capabilities they promise are integral to the program of refurbishment and modernization described in the preceding chapter. If funding can be found for both, this would best serve the national interest in maintaining a safe,
secure, and reliable stockpile of weapons in the most
effective and efficient manner.”.

(4) The 2010 Nuclear Posture Review states—

(A) “The National Nuclear Security Ad-
ministration (NNSA), in close coordination with
DoD, will provide a new stockpile stewardship
and management plan to Congress within 90
days, consistent with the increases in infrastruc-
ture investment requested in the President’s FY
2011 budget. As critical infrastructure is re-
stored and modernized, it will allow the United
States to begin to shift away from retaining
large numbers of non-deployed warheads as a
technical hedge, allowing additional reductions
in the U.S. stockpile of non-deployed nuclear
weapons over time.”;

(B) “In order to sustain a safe, secure, and
effective U.S. nuclear stockpile as long as nuclear
weapons exist, the United States must possess a
modern physical infrastructure—comprised of
the national security laboratories and a complex
of supporting facilities.”;

(C) “Funding the Chemistry and Metallurgy Research Replacement Project at Los Ala-
mos National Laboratory to replace the existing
50-year old Chemistry and Metallurgy Research facility in 2021.”;

(D) “Developing a new Uranium Processing Facility at the Y–12 Plant in Oak Ridge, Ten- nessee to come on line for production operations in 2021.”;

(E) “Without an ability to produce ura- nium components, any plan to sustain the stock- pile, as well as support for our Navy nuclear propulsion, will come to a halt. This would have a significant impact, not just on the weapons program, but in dealing with nuclear dangers of many kinds.”; and

(F) “The non-deployed stockpile currently includes more warheads than required for the above purposes, due to the limited capacity of the National Nuclear Security Administration (NNSA) complex to conduct LEPs for deployed weapons in a timely manner. Progress in restor- ing NNSA’s production infrastructure will allow these excess warheads to be retired along with other stockpile reductions planned over the next decade.”.

(5) In the memorandum of agreement between the Department of Defense and the Department of
Energy concerning the modernization of the nuclear
weapon stockpile of the United States dated May 3,
2010, then Secretary of Defense Robert Gates and
Secretary of Energy Steven Chu agreed that “DOE
Agrees to . . . increase pit production capacity . . .
plan and program to ramp up to a minimum of 50–
80 PPY in 2022.”.

(6) The plan required under section 1251 of the
National Defense Authorization Act for Fiscal Year
2010 (Public Law 111–84; 123 Stat. 2549) submitted
by the President states that the Chemistry and Metallurgy
Research Replacement building and the Uranium
Processing Facility will complete construction
by 2021 and will achieve full operational
functionality by 2024.

(7) The Senate required that, prior to the entry
into force of the New START Treaty, the President
certifies to the Senate that the President intends to—

(A) accelerate to the extent possible the design
and engineering phase of the Chemistry and
Metallurgy Research Replacement building and
the Uranium Processing Facility; and

(B) request full funding, including on a
multyear basis as appropriate, for the Chem-
istry and Metallurgy Research Replacement
building and the Uranium Processing Facility
upon completion of the design and engineering
phase for such facilities.

(8) The President did request full funding for
such facilities on February 2, 2011, when the Presi-
dent stated, “I intend to (a) accelerate, to the extent
possible, the design and engineering phase of the
Chemistry and Metallurgy Research Replacement
(CMRR) building and the Uranium Processing Facil-
ity (UPF); and (b) request full funding, including on
a multi-year basis as appropriate, for the CMRR
building and the UPF upon completion of the design
and engineering phase for such facilities.”.

(b) LIMITATION.—Section 1045 of the National De-

2523b), as amended by section 1056(b), is amended by add-
ing at the end the following new subsection:

“(c) CMRR AND UPF.—

“(1) ANNUAL CERTIFICATION.—Beginning fiscal
year 2013, the President shall annually certify in
writing to the congressional defense committees wheth-
er—

“(A) the construction of both the Chemistry
and Metallurgy Research Replacement building
and the Uranium Processing Facility will be completed by not later than 2021; and

“(B) both facilities will be fully operational by not later than 2024.

“(2) LIMITATION.—If the President certifies under paragraph (1) that the Chemistry and Metallurgy Research Replacement building and the Uranium Processing Facility will be completed by later than 2021 or be fully operational by later than 2024, none of the funds made available for fiscal year 2012 or any fiscal year thereafter for the National Nuclear Security Administration may be used to reduce the nondeployed nuclear warheads in the nuclear weapons stockpile of the United States until a period of 120 days has elapsed following the date of such certification.

“(3) EXCEPTION.—The limitation in paragraph (2) shall not apply to—

“(A) reductions made to ensure the safety, security, reliability, and credibility of the nuclear weapons stockpile and delivery systems, including activities related to surveillance, assessment, certification, testing, and maintenance of nuclear warheads and strategic delivery systems; or
“(B) nuclear warheads that are retired or awaiting dismantlement on the date of the certification under paragraph (1).

“(4) Termination.—The requirement in paragraph (1) shall terminate on the date on which the President certifies in writing to the congressional defense committees that the Chemistry and Metallurgy Research Replacement building and the Uranium Processing Facility are both fully operational.”.

SEC. 1059. NUCLEAR WARHEADS ON INTERCONTINENTAL BALLISTIC MISSILES OF THE UNITED STATES.

(a) Sense of Congress.—It is the sense of Congress that reducing the number of nuclear warheads contained on each intercontinental ballistic missile of the United States does not promote strategic stability if at the same time other nuclear weapons states, including the Russian Federation and the People’s Republic of China, are rapidly increasing the warhead-loading of their land-based missile forces.

(b) Limitation.—

(1) In general.—Chapter 24 of title 10, United States Code, as added by section 1051, is amended by adding at the end the following new section:
§ 496. Nuclear warheads on intercontinental ballistic missiles of the United States

(a) IN GENERAL.—During any year in which the President proposes to reduce the number of nuclear warheads contained on an intercontinental ballistic missile of the United States, none of the funds made available for fiscal year 2012 or any fiscal year thereafter for the Department of Defense or the National Nuclear Security Administration may be used for such proposed reduction if the reduction results in such missile having only a single nuclear warhead unless the President certifies in writing to the congressional defense committees that the Russian Federation and the People’s Republic of China are both also carrying out a similar reduction.

(b) EXCEPTION.—The limitation in subsection (a) shall not apply to reductions made to ensure the safety, security, reliability, and credibility of the nuclear weapons stockpile and delivery systems, including activities related to surveillance, assessment, certification, testing, and maintenance of nuclear warheads and strategic delivery systems.”.

(2) The table of sections at the beginning of chapter 24 of title 10, United States Code, is amended by inserting after the item relating to section 495 the following:
SEC. 1060. NONSTRATEGIC NUCLEAR WEAPON REDUCTIONS AND EXTENDED DETERRENCE POLICY.

(a) FINDINGS.—Congress finds the following:

(1) The NATO Strategic Concept of 2010 endorsed the continued role of nuclear weapons in the security of the NATO alliance, stating—

(A) “The supreme guarantee of the security of the Allies is provided by the strategic nuclear forces of the Alliance, particularly those of the United States; the independent strategic nuclear forces of the United Kingdom and France, which have a deterrent role of their own, contribute to the overall deterrence and security of the Allies.”;

(B) “We will ensure that NATO has the full range of capabilities necessary to deter and defend against any threat to the safety and security of our populations. Therefore, we will . . . maintain an appropriate mix of nuclear and conventional forces”; and

(C) “[NATO will] ensure the broadest possible participation of Allies in collective defence planning on nuclear roles, in peacetime basing of nuclear forces, and in command, control and consultation arrangements.”.
(2) However, the 2010 Strategic Concept also walked away from the decades-long policy encapsulated by the 1999 Strategic Concept that said, “The presence of United States conventional and nuclear forces in Europe remains vital to the security of Europe, which is inseparably linked to that of North America.”

(3) Former Secretary of Defense William Perry said in March 2011 testimony before the Subcommittee on Strategic Forces of the Committee on Armed Services of the House of Representatives that “the reason we have nuclear weapons in Europe in the first place, is not because the rest of our weapons are not capable of deterrence, but because, during the Cold War at least, our allies in Europe felt more assured when we had nuclear weapons in Europe. That is why they were deployed there in the first place. Today the issue is a little different. The issue is the Russians in the meantime have built a large number of nuclear weapons, and we keep our nuclear weapons there as somewhat of a political leverage for dealing with an ultimate treaty in which we may get Russia and the United States to eliminate tactical nuclear weapons. My own view is it would be desirable if both the United States and Russia would eliminate tac-
tical nuclear weapons, but I see it as very difficult to arrive at that conclusion if we were to simply elimi-
nate all of our tactical nuclear weapons unilater-
ally.”.

(4) During testimony before the Subcommittee on Strategic Forces of the Committee on Armed Services of the House of Representatives in July 2011—

(A) former Department of Defense official Frank Miller stated, “as long as U.S. allies be-
lieve that those weapons need to be there, we need to make sure that we provide that security.”; and

(B) former Department of Defense official Mort Halperin stated, “I do not think we should be willing to trade our withdrawal of our nu-
clear weapons from Europe for some reduction, even a substantial reduction, in Russian tactical nuclear weapons because if it is . . . that the credibility of the American nuclear deterrent for our NATO allies depends on the presence of nu-
clear weapons in Europe, that will not change if the Russians cut their tactical nuclear arsenal by two thirds, or even eliminate it because they will still have their strategic weapons, which, while they can’t have intermediate range mis-
siles, they can find a way to target them on the NATO countries.”.

(5) Section 1237(b) of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81) expressed the sense of Congress that—

(A) the commitment of the United States to extended deterrence in Europe and the nuclear alliance of NATO is an important component of ensuring and linking the national security of the United States and its European allies;

(B) the nuclear forces of the United States are a key component of the NATO nuclear alliance; and

(C) the presence of the nuclear weapons of the United States in Europe—combined with NATO’s unique nuclear sharing arrangements under which non-nuclear members participate in nuclear planning and possess specially configured aircraft capable of delivering nuclear weapons—provides reassurance to NATO allies who feel exposed to regional threats.

(b) LIMITATION.—Chapter 24 of title 10, United States Code, as added by section 1051, is amended by adding at the end the following new section:
“§ 497. Limitation on reduction, consolidation, or withdrawal of nuclear forces based in Europe

“(a) Policy on Nonstrategic Nuclear Weapons.—It is the policy of the United States—

“(1) to pursue negotiations with the Russian Federation aimed at the reduction of Russian deployed and nondeployed, nonstrategic nuclear forces;

“(2) that nonstrategic nuclear weapons should be considered when weighing the balance of the nuclear forces of the United States and the Russian Federation;

“(3) that any geographical relocation or storage of nonstrategic nuclear weapons by the Russian Federation does not constitute a reduction or elimination of such weapons;

“(4) the vast advantage of the Russian Federation in nonstrategic nuclear weapons constitutes a threat to the United States and its allies and a growing asymmetry in Western Europe; and

“(5) the forward-deployed nuclear forces of the United States are an important contributor to the assurance of the allies of the United States and constitute a check on proliferation and a tool in dealing with neighboring states hostile to NATO."
“(b) Policy on Extended Deterrence Commitment to Europe.—It is the policy of the United States that—

“(1) it maintain its commitment to extended deterrence, specifically the nuclear alliance of the North Atlantic Treaty Organization, as an important component of ensuring and linking the national security interests of the United States and the security of its European allies;

“(2) forward-deployed nuclear forces of the United States shall remain based in Europe in support of the nuclear policy and posture of NATO;

“(3) the presence of nuclear weapons of the United States in Europe—combined with NATO’s unique nuclear sharing arrangements under which non-nuclear members participate in nuclear planning and possess specially configured aircraft capable of delivering nuclear weapons—contributes to the cohesion of NATO and provides reassurance to allies and partners who feel exposed to regional threats; and

“(4) only the President and Congress can articulate when and how the United States will employ the nuclear forces of the United States and no multilateral organization, not even NATO, can articulate a
declaratory policy concerning the use of nuclear
weapons that binds the United States.

“(c) LIMITATION ON REDUCTION, CONSOLIDATION, OR
WITHDRAWAL OF NUCLEAR FORCES BASED IN EUROPE.—
In light of the policy expressed in subsections (a) and (b),
none of the funds made available for fiscal year 2012 or
any fiscal year thereafter for the Department of Defense
may be used to effect or implement the reduction, consoli-
dation, or withdrawal of nuclear forces of the United States
that are based in Europe unless—

“(1) the reduction, consolidation, or withdrawal
of such nuclear forces is requested by the government
of the host nation in the manner provided in the
agreement between the United States and the host na-
ton regarding the forces;

“(2) the President certifies that—

“(A) NATO member states have considered
the reduction, consolidation, or withdrawal in
the High Level Group;

“(B) NATO has decided to support such re-
duction, consolidation, or withdrawal;

“(C) the remaining nuclear forces of the
United States that are based in Europe after
such reduction, consolidation, or withdrawal
would provide a commensurate or better level of
assurance and credibility as before such reduction, consolidation, or withdrawal; and

“(D) there has been reciprocal action by the Russian Federation, not including the Russian Federation relocating nuclear forces from one location to another; or

“(3) the reduction, consolidation, or withdrawal of such nuclear forces is specifically authorized by an Act of Congress.

“(d) NOTIFICATION.—Upon any decision to reduce, consolidate, or withdraw the nuclear forces of the United States that are based in Europe, the President shall submit to the appropriate congressional committees a notification containing—

“(1) the certification required by paragraph (2) of subsection (c) if such reduction, consolidation, or withdrawal is based upon such paragraph; and

“(2) justification for such reduction, consolidation, or withdrawal; and

“(3) an assessment of how NATO member states, in light of such reduction, consolidation, or withdrawal, assess the credibility of the deterrence capability of the United States in support of its commitments undertaken pursuant to article 5 of the North Atlantic Treaty, signed at Washington, District of Co-
lumbia, on April 4, 1949, and entered into force on August 24, 1949 (63 Stat. 2241; TIAS 1964).

“(e) NOTICE AND WAIT REQUIREMENT.—The President may not commence a reduction, consolidation, or withdrawal of the nuclear forces of the United States that are based in Europe for which the certification required by subsection (c)(2) is made until the expiration of a 180-day period beginning on the date on which the President submits the notification under subsection (d) containing the certification.

SEC. 1214. PROHIBITION ON USE OF PRIVATE SECURITY CONTRACTORS AND MEMBERS OF THE AFGHAN PUBLIC PROTECTION FORCE TO PROVIDE SECURITY FOR MEMBERS OF THE ARMED FORCES AND MILITARY INSTALLATIONS AND FACILITIES IN AFGHANISTAN.

(a) FINDINGS.—Congress makes the following findings:

(1) According to the Department of Defense, as of February 1, 2012, there had been 42 insider attacks on coalition forces since 2007 by the Afghan National Army, Afghan National Police, or Afghan nationals hired by private security contractors to guard United States bases and facilities in Afghanistan.
(2) The Department of Defense data shows that the trend of insider attacks is increasing.

(3) Members of the Armed Forces of the United States continue to be garrisoned and housed in facilities and installations in Afghanistan that are guarded by private security contractors and not by United States or coalition forces.

(4) President Karzai has prohibited the use of private security contractors in Afghanistan and determined that beginning in March, 2012, the Afghan Ministry of Interior will provide Afghan Public Protection Forces on a reimbursable basis to those desiring to contract for additional security.

(5) The Afghan Ministry of Interior will have the primary responsibility for screening and vetting the Afghan nationals who will comprise the Afghan Public Protection Force.

(6) The current force levels in Afghanistan are necessary to accomplish the International Security Assistance Force mission and force protection for members of the Armed Forces garrisoned and housed in Afghanistan should not come at the expense of mission success.

(7) The President of the United States has begun to draw down United States military forces in Af
ghanistan and has committed to continue this drawdown through 2014.

(8) The redeployment phase of any military operation brings increasing vulnerabilities to members of the Armed Forces.

(9) It is the responsibility of the Commander in Chief to provide for the security for members of the Armed Forces deployed to Afghanistan and to mitigate internal threats to such forces to the greatest extent possible, while continuing to meet the objectives of the International Security Assistance Force mission in Afghanistan, including the training and equipping of the Afghan National Security Forces in order that they may provide for their own security.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the best security and force protection for members of the Armed Forces garrisoned and housed in Afghanistan should be provided;

(2) better security and force protection for members of the Armed Forces garrisoned and housed in Afghanistan can be provided by United States military personnel than private security contractors or members of the Afghan Public Protection Force;
(3) the President should take action in light of the increased risk to members of the Armed Forces during this transitional period in Afghanistan and the increasing number of insider attacks; and

(4) the United States remains committed to mission success in Afghanistan in light of the national security interests in the region and the sacrifice and commitment of the United States Armed Forces over the last ten years.

(c) PROHIBITION.—Notwithstanding section 2465 of title 10, United States Code, funds appropriated to the Department of Defense may not be obligated or expended for the purpose of—

(1) entering into a contract for the performance of security-guard functions at a military installation or facility in Afghanistan at which members of the Armed Forces deployed to Afghanistan are garrisoned or housed;

(2) otherwise employing private security contractors to provide security for members of the Armed Forces deployed to Afghanistan; or

(3) employing the Afghan Public Protection Force to provide security for such members or to perform such security-guard functions at such a military installation or facility.
(d) REQUIREMENT.—

(1) IN GENERAL.—The President shall ensure that as many appropriately trained members of the Armed Forces of the United States as are necessary are available to—

(A) perform security-guard functions at all military installations and facilities in Afghanistan at which members of the Armed Forces deployed to Afghanistan are garrisoned or housed;

(B) provide security for members of the Armed Forces deployed to Afghanistan; and

(C) provide adequate counterintelligence support for such members.

(2) RELATIONSHIP TO OTHER REQUIREMENTS AND LIMITATIONS.—The members of the Armed Forces required to be made available under paragraph (1) shall be in addition to—

(A) the number of such members who are deployed to Afghanistan to support the requirements of the North Atlantic Treaty Organization mission in Afghanistan and the military campaign plan of the Commander of the International Security and Assistance Force; and

(B) any limitation on force levels that may be in effect.
(e) WAIVER.—The President may waive the prohibition under subsection (c) and the requirement under subsection (d) if the President submits to Congress a certification in writing that—

(1) the use of private security contractors or the Afghan Public Protection Force can provide a level of security and force protection for members of the Armed Forces deployed to Afghanistan that is at least equal to the security and force protection that can be provided by members of the Armed Forces; and

(2) the Secretary of Defense has ensured that all employees of private security contractors and members of the Afghan Public Protection Force providing security or force protection for members of the Armed Forces deployed to Afghanistan are independently screened and vetted by members of the Armed Forces of the United States.

(f) REPORT.—

(1) IN GENERAL.—Not later than 30 days after the end of each quarter of fiscal years 2013 and 2014, the Secretary of Defense shall submit to the congressional defense committees a report on the following:

(A) Data on attempted and successful attacks by the Afghan National Security Forces, the Afghan Public Protection Force, and private
security contractors on United States Armed Forces and civilian personnel of the Department of Defense.

(B) The number of members of the United States Armed Forces and civilian personnel of the Department of Defense wounded or killed due to such attacks.

(C) A description of tactical or covert methods used in such attacks and a description of motivations for such attacks.

(2) ADDITIONAL INFORMATION.—The first report submitted following the date of the enactment of this Act and the report submitted for the first quarter of fiscal year 2014 shall also include the following:

(A) Actions the Department of Defense is taking to monitor indicators and early warning signs of infiltration or co-option of the Afghan National Security Forces, the Afghan Public Protection Force, and private security contractors.

(B) The methodology and systematic approach to resolving disputes between the Afghan National Security Forces and United States Armed Forces and civilian personnel of the Department of Defense when such disputes arise.
(g) DEFINITION.—In this section, the term “members of the Armed Forces deployed to Afghanistan” means members of the Armed Forces deployed to Afghanistan in support of the International Security Assistance Force in Afghanistan and members of the Armed Forces of the United States deployed to Afghanistan in support of Operation Enduring Freedom.

SEC. 1215. REPORT ON UPDATES AND MODIFICATIONS TO CAMPAIGN PLAN FOR AFGHANISTAN.

(a) REPORT REQUIRED.—Not later than 180 days after the date on which any substantial update or modification is made to the campaign plan for Afghanistan (including the supporting and implementing documents for such plan), the Comptroller General of the United States shall submit to the congressional defense committees a report on the updated or modified plan, including an assessment of the updated or modified plan.

(b) EXCEPTION.—The requirement to submit a report under subsection (a) on any substantial update or modification to the campaign plan for Afghanistan shall not apply if the Comptroller General—

(1) determines that a report submitted to Congress by the Comptroller General before the date of the enactment of this Act substantially meets the requirement to submit the report under subsection (a); and
(2) notifies the congressional defense committees in writing of the determination under paragraph (1).

(c) TERMINATION.—The requirement to submit a report under subsection (a) on any substantial update or modification to the campaign plan for Afghanistan shall terminate on September 30, 2014.

(d) REPEAL.—Section 1226 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84; 123 Stat. 2525) is repealed.

SEC. 1216. UNITED STATES MILITARY SUPPORT IN AFGHANISTAN.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) following Al Qaeda’s attacks on the United States on September 11, 2001, United States and coalition forces have achieved significant progress toward security and stability in Afghanistan;

(2) as the United States completes transfer of the lead for security to the Afghan National Security Forces by the end of 2014, the United States should ensure that the gains in security are maintained;

(3) the United States mission in Afghanistan continues to be to disrupt, dismantle, and defeat al Qaeda, as well as to prevent its return to either Afghanistan or Pakistan;
(4) the specific objectives in Afghanistan are to deny safe haven to Al Qaeda and to deny the Taliban the ability to overthrow the Afghan Government;

(5) the Taliban, Haqqanis, and associated insurgents continue to enjoy safe havens in Pakistan, but are unlikely to be capable of overthrowing the Afghan Government unless the United States withdraws forces precipitously from Afghanistan;

(6) the Haqqani Network provides unique capabilities and capacity to the Afghan Taliban, and additionally, serves as a combat multiplier to the Afghan insurgency due to its geographic primacy over the key terrain of the Paktika, Paktia, and Khost provinces, as well as North and South Waziristan, and willingness to introduce international weaponry and technology into the battle space and serve as the reception point and integrator of international foreign fighters into the Afghan insurgency;

(7) the Haqqani Network has been the most important Afghan-based protector of Al Qaeda;

(8) the unique capabilities and effects brought to the battle space by the Haqqani Network necessitate that the Government of Afghanistan should have superior operational capacity in order to maintain the security of Afghanistan over time;
(9) the United States military should not maintain an indefinite combat mission in Afghanistan and should transition to a counter-terrorism and advise and assist mission at the earliest practicable date, consistent with conditions on the ground;

(10) significant uncertainty exists within Afghanistan regarding the level of future United States military support; and

(11) in order to reduce this uncertainty, and to promote further stability and security in Afghanistan, the President should—

(A) fully consider the International Security Assistance Force Commander’s assessment regarding the need for the United States to maintain a “significant combat presence through 2013”;

(B) maintain a force of at least 68,000 troops through December 31, 2014, unless fewer forces can achieve United States objectives;

(C) maintain a credible troop presence after December 31, 2014, sufficient to conduct counter-terrorism and train and advise the Afghan National Security Forces, consistent with the Strategic Partnership Agreement (signed on May 2, 2012); and
(D) maintain sufficient funding for the Afghan National Security Forces to accomplish the objectives described in paragraphs (3), (4), and (8).

(b) NOTIFICATION.—The President shall notify the congressional defense committees of any decision to reduce the number of United States Armed Forces deployed in Afghanistan below the number of such Armed Forces deployed in Afghanistan on—

(1) December 31, 2012,

(2) December 31, 2013, and

(3) December 31, 2014,
prior to any public announcement of any such decision to reduce the number of United States Armed Forces deployed in Afghanistan.

(c) MATTERS TO INCLUDE IN NOTIFICATION.—As part of a notification required by subsection (b), the President shall—

(1) provide an assessment of the relevant security risk metrics associated with the marginal reduction in force levels; and

(2) provide a by-unit assessment of the operational capability of the Afghan National Security Forces to independently conduct the required operations to maintain security in Afghanistan.

(2) by redesignating paragraphs (2), (3), and (4) as paragraphs (3), (4), and (5), respectively;

(3) by inserting after paragraph (1) the following:

“(2) LIMITATION ON FUNDS FOR FISCAL YEAR 2013; REPORT REQUIRED.—Of the amounts appropriated or transferred to the Fund for fiscal year 2013, not more than 10 percent of such amounts may be obligated or expended until such time as the Secretary of Defense, with the concurrence of the Secretary of State, submits to the appropriate congres-
sional committees an update of the report required
under paragraph (1).”;

(4) in paragraph (3) (as redesignated)—

(A) by inserting “after fiscal year 2013”
after “any fiscal year”;

(B) by striking “requested to be”; and

(C) by striking “at the same time that the
President’s budget is submitted pursuant to sec-
section 1105(a) of title 31, United States Code” and
inserting “not later than 45 days before amounts
in the Fund are made available to the Secretary
of Defense”; and

(5) in paragraph (4) (as redesignated), by strik-
ing “the update required under paragraph (2)” and
inserting “the updates required under paragraphs (2)
and (3)”.

Subtitle C—Matters Relating to
Iran

SEC. 1221. DECLARATION OF POLICY.

(a) FINDINGS.—Congress makes the following findings:

(1) Iran, which has long sought to foment insta-
bility and promote extremism in the Middle East, is
now seeking to exploit the dramatic political transi-
tion underway in the region to undermine govern-
ments traditionally aligned with the United States
and support extremist political movements in these countries.

(2) At the same time, Iran may soon attain a nuclear weapons capability, a development that would threaten United States interests, destabilize the region, encourage regional nuclear proliferation, further empower and embolden Iran, the world’s leading state sponsor of terrorism, and provide it the tools to threaten its neighbors, including Israel.

(3) With the assistance of Iran over the past several years, Syria, Hezbollah, and Hamas have increased their stockpiles of rockets, with more than 60,000 rockets now ready to be fired at Israel. Iran continues to add to its arsenal of ballistic missiles and cruise missiles, which threaten Iran’s neighbors, Israel, and United States Armed Forces in the region.

(4) Preventing Iran from acquiring a nuclear weapon is among the most urgent national security challenges facing the United States.

(5) Successive United States administrations have stated that an Iran armed with a nuclear weapon is unacceptable.

(6) President Obama stated on January 24, 2012, “Let there be no doubt: America is determined to prevent Iran from getting a nuclear weapon, and
I will take no options off the table to achieve that goal.”.

(7) In order to prevent Iran from developing nuclear weapons, the United States, in cooperation with its allies, must utilize all elements of national power including diplomacy, robust economic sanctions, and credible, visible preparations for a military option.

(8) Nevertheless, to date, diplomatic overtures, sanctions, and other non-kinetic actions toward Iran have not caused the Government of Iran to abandon its nuclear weapons program.

(9) With the impact of additional sanctions uncertain, additional pressure on the Government of Iran could come from the credible threat of military action against Iran’s nuclear program.

(b) DECLARATION OF POLICY.—It shall be the policy of the United States to take all necessary measures, including military action if required, to prevent Iran from threatening the United States, its allies, or Iran’s neighbors with a nuclear weapon.

SEC. 1222. UNITED STATES MILITARY PREPAREDNESS IN THE MIDDLE EAST.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—
(1) military exercises conducted in the Persian Gulf and Gulf of Oman emphasize the United States resolve and the policy of the United States described in section 1221(b) by enhancing the readiness of the United States military and allied forces, as well as signaling to the Government of Iran the commitment of the United States to defend its vital national security interests; and

(2) the President, as Commander in Chief, should augment the presence of the United States Fifth Fleet in the Middle East and to conduct military deployments, exercises, or other visible, concrete military readiness activities to underscore the policy of the United States described in section 1221(b).

(b) PLAN.—

(1) IN GENERAL.—The Secretary of Defense shall prepare a plan to augment the presence of the United States Fifth Fleet in the Middle East and to conduct military deployments, exercises, or other visible, concrete military readiness activities to underscore the policy of the United States described in section 1221(b).

(2) MATTERS TO BE INCLUDED.—The plan required under paragraph (1) shall include, at a minimum, steps necessary for the Armed Forces to sup-
port the policy of the United States described in section 1221(b), including—

(A) pre-positioning sufficient supplies of aircraft, munitions, fuel, and other materials for both air- and sea-based missions at key forward locations in the Middle East and Indian Ocean;

(B) maintaining sufficient naval assets in the region necessary to signal United States resolve and to bolster United States capabilities to launch a sustained sea and air campaign against a range of Iranian nuclear and military targets, to protect seaborne shipping, and to deny Iranian retaliation against United States interests in the region;

(C) discussing the viability of deploying at least two United States aircraft carriers, an additional large deck amphibious ship, and a Mine Countermeasures Squadron in the region on a continual basis, in support of the actions described in subparagraph (B); and

(D) conducting naval fleet exercises similar to the United States Fifth Fleet’s major exercise in the region in March 2007 to demonstrate ability to keep the Strait of Hormuz open and to
counter the use of anti-ship missiles and swarm-
ing high-speed boats.

(3) Submission to Congress.—The plan re-
quired under paragraph (1) shall be submitted to the
congressional defense committees not later than 120
days after the date of enactment of this Act.

SEC. 1223. ANNUAL REPORT ON MILITARY POWER OF IRAN.

(a) In General.—Section 1245 of the National De-
fense Authorization Act for Fiscal Year 2010 (Public Law
111–84; 123 Stat. 2542) is amended—

(1) by redesignating subsections (c) and (d) as
subsections (d) and (e), respectively; and

(2) by inserting after subsection (b) the fol-
owing:

“(c) Combatant Commander Assessment.—The re-
port required under subsection (a) shall include an annex,
in classified or unclassified form, that includes an identi-
fication and assessment of the Commander of the United
States Central Command on the following:

“(1) Any critical gaps in intelligence that limit
the ability of the Commander to counter threats ema-
nating from Iran.

“(2) Any gaps in the capabilities, capacity, and
authorities of the Commander to counter Iranian
threats to United States Armed Forces and United
States interests in the region.

“(3) Any gaps in the capabilities and capacity
of the Commander to take military action against
Iran to prevent Iran from developing a nuclear weap-
on.

“(4) Any other matters the Commander considers
to be relevant.”.

(b) EFFECTIVE DATE.—The amendments made by sub-
section (a) take effect on the date of the enactment of this
Act and apply with respect to each report required to be
submitted under section 1245 of the National Defense Au-
thorization Act for Fiscal Year 2010 on or after such date
of enactment.

“(1) PROPOSED PROCUREMENTS.—Paragraphs
(2) through (4) shall apply to a proposed procurement

“(3) PUBLICATION OF NOTICE STATEMENT.—Concurrently, the statement required in paragraph (2) shall be published in the Federal contracting opportunities database.
“(4) Recompetition of a previously bundled contract.—If the proposed procurement is a previously bundled contract, that is to be recompeted as a bundled contract, the Administrator shall determine, with the assistance of the agency proposing the procurement—

“(A) the amount of savings and benefits (in accordance with subsection (d)) achieved under the bundling of contract requirements;

“(B) whether such savings and benefits will continue to be realized if the contract remains bundled, and whether such savings and benefits would be greater if the procurement requirements were divided into separate solicitations suitable for award to small business concerns;

“(5) FAILURE TO PROVIDE NOTICE.—

“(A) NO NOTIFICATION RECEIVED.—If no notification of the proposed procurement or accompanying statement is received, but the Administrator determines that the proposed procurement is a proposed procurement described in paragraph (1), then the Administrator shall require that such a statement of work be completed by the Procurement Activity and sent to the procurement center representative and postpone the solicitation process for at least 10 days but not more than 45 days to allow the Administrator to review the statement and make recommendations as described in this section before the procurement process is continued.

“(B) NO WORK CONTINUED.—If the Administrator requires a Procurement Activity to provide a statement of work pursuant to subparagraph (A), the Procurement Activity shall not be
permitted to continue with the procurement until such time as the Procurement Activity complies with the requirements of subparagraph (A).

“(6) Responsibility of the Procurement Center Representative.—Within 15 days after receipt of the proposed procurement and accompanying statement, if the procurement center representative believes that the procurement as proposed will render small business prime contract participation unlikely, the representative shall recommend to the Procurement Activity alternative procurement methods which would increase small business prime contracting opportunities.

“(7) Disagreement Between the Administrator and the Procurement Activity.—

“(A) In General.—If the Administrator determines that a small business concern would be adversely affected, directly or indirectly, by the proposed procurement, or if a small business concern or a trade association of which that small business concern is a member so requests, the Administrator may take action under this paragraph to further the interests of small businesses.

“(d) MARKET RESEARCH.—

“(1) IN GENERAL.—Before proceeding with an acquisition strategy that could lead to bundled contracts, the head of an agency shall conduct market research to determine whether bundling of the requirements is necessary and justified.

“(2) FACTORS.—For purposes of subsection (c)(1), a bundled contract is necessary and justified if the bundling of contract requirements will result in substantial measurable benefits in excess of those benefits resulting from a procurement of the contract requirements that does not involve contract bundling.
“(3) BENEFITS.—For the purposes of bundling of contract requirements, benefits described in paragraph (2) may include the following:

“(A) Cost savings.

“(B) Quality improvements.

“(C) Reduction in acquisition cycle times.

“(D) Better terms and conditions.

“(A) Cost savings shall not include any reduction in the use of military interdepartmental purchase requests or any similar transfer funds among Federal agencies for the use of a contract issued by another Federal agency.

“(5) LIMITATION ON ACQUISITION STRATEGY.—The head of a Federal agency may not carry out an acquisition strategy that includes bundled contracts valued in excess of the dollar threshold, unless the sen-
ior procurement executive or, if applicable, Chief Acquisition Officer, for the Federal agency, certifies to the head of the Federal agency that steps will be taken to include small business concerns in the acquisition strategy prior to the implementation of such acquisition strategy.

“(e) STRATEGY SPECIFICATIONS.—If the head of a contracting agency determines that an acquisition plan or proposed procurement strategy will result in a bundled contract, the proposed acquisition plan or procurement strategy shall—

“(1) identify specifically the benefits anticipated to be derived from the bundling of contract requirements;

“(2) set forth an assessment of the specific impediments to participation by small business concerns as prime contractors that result from the contract bundling and specify actions designed to maximize small business participation as subcontractors (including suppliers) at various tiers under the contract or contracts that are awarded to meet the requirements; and

“(3) include a specific determination that the anticipated measurable benefits of the proposed bundled contract justify its use.
“(f) Contract Teaming.—In the case of a solicitation of offers for a bundled contract that is issued by the head of an agency, a small-business concern may submit an offer that provides for use of a particular team of subcontractors for the performance of the contract. The head of the agency shall evaluate the offer in the same manner as other offers, with due consideration to the capabilities of all of the proposed subcontractors. If a small business concern teams under this paragraph, it shall not affect its status as a small business concern for any other purpose.

“(g) Database, Analysis, and Annual Report Regarding Contract Bundling.—

“(1) Database.—Not later than 180 days after the date of the enactment of this subsection, the Administrator shall develop and shall thereafter maintain a database containing data and information regarding—

“(A) each bundled contract awarded by a Federal agency; and

“(B) each small business concern that has been displaced as a prime contractor as a result of the award of such a contract.

“(2) Analysis.—For each bundled contract that is to be recompeted, the Administrator shall determine—
“(A) the amount of savings and benefits realized, in comparison with the savings and benefits anticipated by the analysis required under subsection (d) prior to the contract award; and

“(B) whether such savings and benefits will continue to be realized if the contract remains bundled, and whether such savings and benefits would be greater if the procurement requirements were divided into separate solicitations suitable for award to small business concerns.

“(3) ANNUAL REPORT ON CONTRACT BUNDLING.—

“(A) IN GENERAL.—Not later than 1 year after the date of the enactment of this paragraph, and annually in March thereafter, the Administrator shall transmit a report on contract bundling to the Committee on Small Business of the House of Representatives and the Committee on Small Business and Entrepreneurship of the Senate.

“(B) CONTENTS.—Each report transmitted under subparagraph (A) shall include—

a result of the award of bundled contracts by Federal agencies; and

“(ii) a description of the activities with respect to previously bundled contracts of each Federal agency during the preceding year, including—

“(I) data on the number and total dollar amount of all contract requirements that were bundled; and

“(II) with respect to each bundled contract, data or information on—

“(aa) the justification for the bundling of contract requirements;

“(bb) the cost savings realized by bundling the contract requirements over the life of the contract;

“(cc) the extent to which maintaining the bundled status of contract requirements is projected to result in continued cost savings;

“(dd) the extent to which the bundling of contract requirements complied with the contracting
agency’s small business subcontracting plan, including the total dollar value awarded to small business concerns as subcontractors and the total dollar value previously awarded to small business concerns as prime contractors; and

“(ee) the impact of the bundling of contract requirements on small business concerns unable to compete as prime contractors for the consolidated requirements and on the industries of such small business concerns, including a description of any changes to the proportion of any such industry that is composed of small business concerns.

“(h) Bundling Accountability Measures.—

“(1) Teaming Requirements.—Each Federal agency shall include in each solicitation for any multiple award contract above the dollar threshold a provision soliciting bids from any responsible source, in-
cluding responsible small business concerns and teams or joint ventures of small business concerns.

“(2) Policies on reduction of contract bundling.—

“(A) In general.—Not later than 270 days after the date of enactment of this subparagraph, the Federal Acquisition Regulatory Council, established under section 1302(a) of title 41, United States Code, shall amend the Federal Acquisition Regulation issued under section 1303 of such title to—

“(i) establish a Government-wide policy regarding contract bundling, including regarding the solicitation of teaming and joint ventures; and

“(ii) require that the policy established under clause (i) be published on the website of each Federal agency.

“(B) Rationale for contract bundling.—Not later than 30 days after the date on which the head of a Federal agency submits the report required under section 15(h), the head of the Federal agency shall publish on the website of the Federal agency a list and rationale for any bundled contract for which the Federal agen-
cy solicited bids or that was awarded by the Federal agency.”.
