SEC. 130. SENSE OF CONGRESS ON MARINE CORPS AMPHIBIOUS LIFT AND PRESENCE REQUIREMENTS.

(a) FINDINGS.—Congress makes the following findings:

(1) The United States Marine Corps is a combat force which leverages maneuver from the sea as a force multiplier allowing for a variety of operational tasks ranging from major combat operations to humanitarian assistance.

(2) The United States Marine Corps is unique in that, while embarked upon Naval vessels, they bring all the logistic support necessary for the full range of military operations, operating “from the sea” they require no third party host nation permission to conduct military operations.

(3) The Department of the Navy has a requirement for 38 amphibious assault ships to meet this full range of military operations.

(4) Due to fiscal constraints only, that requirement of 38 vessels was reduced to 33 vessels, which adds military risk to future operations.
(5) The Department of the Navy has been unable to meet even the minimal requirement of 30 operationally available vessels and has submitted a shipbuilding and ship retirement plan to Congress which will reduce the force to 28 vessels.

(6) Experience has shown that early engineering and design of naval vessels has significantly reduced the acquisition costs and life-cycle costs of those vessels.

(b) Sense of Congress.—It is the sense of Congress that—

(1) the Department of Defense should carefully evaluate the maritime force structure necessary to execute demand for forces by the commanders of the combatant commands;

(2) the Department of the Navy carefully evaluate amphibious lift capabilities to meet current and projected requirements;

(3) the Department of the Navy should consider prioritization of investment in and procurement of the next generation of amphibious assault ships, as a component of the balanced battle force;

(4) the next generation amphibious assault ships should maintain survivability protection;
(5) operation and maintenance requirements analysis, as well as the potential to leverage a common hull form design, should be considered to reduce total ownership cost and acquisition cost; and (6) maintaining a robust amphibious ship building industrial base is vital for the future of the national security of the United States.

(3) upgrades of the hardware and software of that radar to meet Space Situational Awareness mission needs;

(4) operational testing of that radar; and

(5) transfer of jurisdiction of that radar to the Air Force Space Command for operations and sustainment by September 30, 2016.

SEC. 217. DETAILED DIGITAL RADIO FREQUENCY MODULATION COUNTERMEASURES STUDIES AND SIMULATIONS.

(a) ADDITIONAL AMOUNT FOR RDT&E, ARMY.—The amount authorized to be appropriated for fiscal year 2013 by section 201 is hereby increased by $38,000,000, with the amount of the increase to be available for amounts authorized to be appropriated by that section and available for research, development, test, and evaluation, Army, for system development and demonstration (PE 0605457A) Army Integrated Air and Missile Defense (AIAMD), as specified in the funding table in section 4201.

(b) AVAILABILITY OF AMOUNT.—To the extent provided in appropriations Acts, the amount authorized and made available by subsection (a) may be obligated and expended for a new program to conduct detailed digital radio frequency modulation (DRFM) countermeasures studies and simulations to develop algorithms to address this
threat change in support of the accelerated fielding of a
new capability in Patriot, Sentinel, and Integrated Air and
Missile Defense (IAMD) for the requirements of the com-
manders of the combatant commands.

**Matters**

**SEC. 231. HOMELAND BALLISTIC MISSILE DEFENSE.**

(a) FINDINGS.—Congress makes the following find-
ings:

(1) The Ballistic Missile Defense Review of
February 2010 stated as its first policy priority that
“the United States will continue to defend the home-
land against the threat of limited ballistic missile at-
tack” and that “an essential element of the United
States’ homeland ballistic missile defense strategy is
to hedge against future uncertainties, including both
the uncertainty of future threat capabilities and the
technical risks inherent to our own development
plans”.

(2) The United States currently has an oper-
ational Ground-based Midcourse Defense (GMD)
system with 30 Ground-Based Interceptors (GBIs)
deployed in Alaska and California, protecting the
United States against the potential future threat of
limited ballistic missile attack from countries such as North Korea and Iran.

(3) As Deputy Assistant Secretary of Defense for Nuclear and Missile Defense Policy Bradley Roberts testified before the Committee on Armed Services of the Senate on April 25, 2012, “[w]ith 30 GBIs in place, the United States is in an advantageous position vis-à-vis the threats from North Korea and Iran,” and “neither has successfully tested an ICBM or demonstrated an ICBM-class warhead”.

(4) Deputy Assistant Secretary Roberts testified that maintaining this advantageous position “requires continued improvement to the GMD system, including enhanced performance by the GBIs and the deployment of new sensors. It also requires the development of the Precision Tracking Space System (PTSS) to handle larger raid sizes and the Standard Missile-3 (SM–3) Block IIB as the ICBM threat from states like Iran and North Korea matures. These efforts will help to ensure that the United States possesses the capability to counter the projected threat for the foreseeable future”.

(5) As its highest priority, the Missile Defense Agency is designing a correction to the problem that
caused a December 2010 flight test failure of the Ground-based Midcourse Defense system using the Capability Enhancement II (CE–II) model of exo-atmospheric kill vehicle, and plans to demonstrate the correction in two flight tests before resuming production or assembly of additional Capability Enhancement II kill vehicles.

(6) The Department of Defense has a program to improve the performance and reliability of the Ground-based Midcourse Defense system, including a plan to test every component of the Ground-Based Interceptors for reliability. According to Department of Defense officials, the goal of the Ground-Based Interceptor reliability program is to double the number of threat Intercontinental Ballistic Missiles (ICBMs) that our current inventory of Ground-Based Interceptors could defeat, thereby effectively doubling the capability of our current Ground-based Midcourse Defense system.

(7) The Missile Defense Agency, working with the Director of Operational Test and Evaluation and with United States Strategic Command, has developed a comprehensive Integrated Master Test Plan (IMTP) for missile defense, with flight tests for the Ground-based Midcourse Defense system planned
through fiscal year 2022, including salvo testing, multiple simultaneous engagement testing, and operational testing.

(8) The Director of Operational Test and Evaluation, who must review, approve, and sign each semi-annual version of the Integrated Master Test Plan, testified that the Test Plan is “a robust and rigorous test plan”. He also testified that the current pace of Ground-based Midcourse Defense system testing of one flight test per year is the “best that we’ve been able to achieve over a decade”.

(9) The Director of the Missile Defense Agency testified before the Committee on Armed Services of the Senate on April 25, 2012, that flight testing the Ground-based Midcourse Defense system more often than once per year could cause “greater risk of further failure and setbacks to developing our homeland defense capability as rapidly as possible”.

(10) As part of its homeland defense hedging strategy, the Department of Defense has already decided upon or implemented a number of actions to improve the missile defense posture of the United States in case the threat of Intercontinental Ballistic Missiles from North Korea or Iran emerges sooner
or in greater numbers than anticipated. These include the following actions:

(A) The Missile Defense Agency has completed construction of Missile Field-2 at Fort Greely, Alaska, with eight extra silos available to deploy additional operational Ground-Based Interceptors, if needed.

(B) With its request for 5 additional Ground-Based Interceptors in the budget of the President for fiscal year 2013, the Missile Defense Agency plans to have enough test and spare Ground-Based Interceptors to emplace in the 8 extra silos from 2014 through 2025, and will keep the Ground-Based Interceptor production line active for 5 additional years, thus allowing additional Ground-Based Interceptor purchases in the future, if needed.

(C) The Department has decided not to decommission prototype Missile Field-1 at Fort Greely but, instead, to keep it in a storage status that would permit it to be refurbished and reactivated within a few years if future threat developments make that necessary.

(D) The Missile Defense Agency plans to build an in-flight interceptor communications
terminal at Fort Drum, New York, to enhance the performance of Ground-Based Interceptors defending the eastern United States against possible future missile threats from Iran.

(E) The Missile Defense Agency is continuing the development and testing of the two-stage Ground-Based Interceptor for possible deployment in the future, if needed.

(F) The Missile Defense Agency is upgrading early warning radars in Clear, Alaska, and Cape Cod, Massachusetts, to enhance the ability to defend against potential multiple future Intercontinental Ballistic Missile threats from North Korea and Iran.

(G) The Missile Defense Agency is pursuing development of the Standard Missile-3 Block IIB interceptor for Phase 4 of the European Phased Adaptive Approach. It is intended to augment the Ground-based Midcourse Defense system as a cost-effective first layer of defense of the homeland against a possible future Intercontinental Ballistic Missile threat from Iran.

(H) The Missile Defense Agency is pursuing development of the Precision Tracking
Space System, a satellite sensor system to provide persistent tracking of large numbers of missiles in flight, and fire-control quality targeting data to various missile defense interceptor systems. According to the Director of the Missile Defense Agency, “the greatest future enhancement for both homeland and regional defense in the next ten years is the development of the Precision Tracking Space System satellites”.

(1) As part of its homeland defense hedging strategy review, the Department of Defense is considering other options to enhance the future United States posture to defend the homeland, including the feasibility, advisability and affordability of deploying additional Ground-Based Interceptors, either in Alaska or at a missile defense site on the East Coast of the United States.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) it is a national priority to defend the homeland against the potential future threat of limited ballistic missile attack from countries such as North Korea and Iran;
(2) the currently deployed Ground-based Mid-
course Defense system, with 30 Ground-Based Inter-
ceptors deployed in Alaska and California, provides
protection of the United States homeland against
the potential future threat of limited ballistic missile
attack from North Korea and Iran;

(3) it is essential for the Ground-based Mid-
course Defense system to achieve the levels of reli-
ability, availability, sustainability, and operational
performance that will allow it to continue providing
protection of the United States homeland against
limited ballistic missile attack;

(4) the Missile Defense Agency should, as its
highest priority, correct the problem that caused the
December 2010 Ground-based Midcourse Defense
system flight test failure and demonstrate the cor-
rection in flight tests before resuming production of
the Capability Enhancement-II kill vehicle, in order
to provide confidence that the system will work as
intended;

(5) the Department of Defense should continue
to enhance the performance and reliability of the
Ground-based Midcourse Defense system, and en-
hance the capability of the Ballistic Missile Defense
System, to provide improved capability to defend the
homeland against possible increased future missile threats from North Korea and Iran;

(6) the Missile Defense Agency should continue its robust, rigorous, and realistic testing of the Ground-based Midcourse Defense system at a pace of one flight test per year, as described in the Integrated Master Test Plan, including salvo testing, multiple simultaneous engagement testing, and operational testing;

(7) if successfully developed, the Standard Missile-3 Block IIB interceptor would provide an essential first layer of defense of the homeland against an emerging Intercontinental Ballistic Missile threat from Iran, using a cost-effective forward-based early intercept system that could permit holding Ground-Based Interceptors in reserve, and if such interceptor could be deployed on ships, it would also provide a significant enhancement to defense against possible future threats from North Korea;

(8) the Precision Tracking Space System has the potential to improve dramatically the capability of homeland and regional missile defense systems against large numbers of missiles launched simultaneously, and should remain a high priority for development;
(9) the Department of Defense has taken a
number of prudent, affordable, cost-effective, and
operationally significant steps to hedge against the
possibility of future growth in the missile threat to
the homeland from North Korea and Iran; and

(10) the Department of Defense should con-
tinue to evaluate the evolution of the long-range mis-
sile threat from North Korea and Iran and consider
other possibilities for prudent, affordable, cost-effec-
tive, and operationally significant steps to improve
the posture of the United States to defend the home-
land against possible future growth in the threat.

(c) Report.—

(1) Report required.—Not later than 180
days after the date of the enactment of this Act, the
Secretary of Defense shall submit to the congres-
sional defense committees a report on the status of
efforts to improve the homeland ballistic missile de-
defense capability of the United States.

(2) Elements of report.—The report re-
quired by paragraph (1) shall include the following:

(A) A detailed description of the actions
taken or planned to improve the reliability,
availability, and capability of the Ground-based
Midcourse Defense system.
(B) A description of any improvements achieved as a result of the actions described in subparagraph (A).

(C) A description of the results of the two planned flight tests of the Ground-based Mid-course Defense system (Control Test Vehicle flight test-1, and GMD Flight Test–06b) intended to demonstrate the success of the correction of the problem that caused the flight test failure of December 2010, and the status of any decision to resume production of the Capability Enhancement-II kill vehicle.

(D) A detailed description of actions taken or planned to improve the homeland defense posture of the United States to hedge against potential future Intercontinental Ballistic Missile threat growth from North Korea and Iran.

(E) Any other matters the Secretary considers appropriate.

(3) FORM OF REPORT.—The report shall be submitted in unclassified form, but may include a classified annex.

SEC. 232. REGIONAL BALLISTIC MISSILE DEFENSE.

(a) FINDINGS.—Congress makes the following findings:
(1) In the introduction to the Ballistic Missile Defense Review of February 2010, Secretary of Defense Robert Gates states that “I have made defending against near-term regional threats a top priority of our missile defense plans, programs and capabilities”.

(2) In describing the threat of regional ballistic missiles, the report of the Ballistic Missile Defense Review states that “there is no uncertainty about the existence of regional threats. They are clear and present. The threat from short-range, medium-range, and intermediate-range ballistic missiles (SRBMs, MRBMs, and IRBMs) in regions where the United States deploys forces and maintains security relationships is growing at a particularly rapid pace”.

(3) In testimony before the Committee on Armed Services of the Senate on April 25, 2012, Dr. Bradley Roberts, Deputy Assistant Secretary of Defense for Nuclear and Missile Defense Policy stated, with respect to regional missile defense, that “the need arises from the rapidly emerging threats to our armed forces in Europe, the Middle East, and East Asia from regional missile proliferators and the basic challenge such proliferation poses to the safety and
security of our forces and allies and to our power projection strategy”.

(4) Iran has the largest inventory of regional ballistic missiles in the Middle East, with hundreds of missiles that can reach southeastern Europe and all of the Middle East, including Israel. Iran is improving its existing missiles and developing new and longer-range missiles.

(5) North Korea has a large and growing inventory of short-range and medium-range ballistic missiles that can reach United States forces and allies in South Korea and Japan. North Korea is improving its existing missiles and developing new and longer-range missiles.

(6) In September 2009, President Barack Obama announced that he had accepted the unanimous recommendation of the Secretary of Defense and the Joint Chiefs of Staff to establish a European Phased Adaptive Approach to missile defense, designed to protect deployed United States forces and allies and partners in Europe against the large and growing threat of ballistic missiles from Iran.

(7) In November 2010, at the Lisbon Summit, the North Atlantic Treaty Organization (NATO) decided to adopt the core mission of missile defense of
its population, territory and forces. The North Atlantic Treaty Organization agreed to enhance its missile defense command and control system, the Active Layered Theater Ballistic Missile Defense, to provide a North Atlantic Treaty Organization command and control capability. This is in addition to contributions of missile defense capability from individual nations.

(8) During 2011, the United States successfully implemented Phase 1 of the European Phased Adaptive Approach, including deployment of an AN/TPY–2 radar in Turkey, deployment of an Aegis Ballistic Missile Defense ship in the eastern Mediterranean Sea with Standard Missile-3 Block IA interceptors, and establishment of a missile defense command and control system in Germany.

(9) During 2011, the United States successfully negotiated all the international agreements with North Atlantic Treaty Organization allies needed to permit future phases of the European Phased Adaptive Approach, including agreements with Romania and Poland to permit the deployment of Aegis Ashore missile defense systems on their territory, an agreement with Turkey to permit deployment of an AN/TPY–2 radar on its territory, and an agreement
with Spain to permit the forward stationing of four
Aegis Ballistic Missile Defense ships at Rota.

(10) Phase 2 of the European Phased Adaptive
Approach is planned for deployment in 2015, and is
planned to include the deployment of Standard Mis-
sile-3 Block IB interceptors on Aegis Ballistic Mis-
sile Defense ships and at an Aegis Ashore site in
Romania.

(11) Phase 3 of the European Phased Adaptive
Approach is planned for deployment in 2018, and is
planned to include the deployment of Standard Mis-
sile-3 Block IIA interceptors on Aegis Ballistic Mis-
sile Defense ships and at an Aegis Ashore site in Po-
land.

(12) Phase 4 of the European Phased Adaptive
Approach is planned for deployment in 2020, and is
planned to include the deployment of Standard Mis-
sile-3 Block IIB interceptors at Aegis Ashore sites.
This interceptor is intended to protect both Europe
and the United States against potential future long-
range ballistic missiles from Iran.

(13) At the North Atlantic Treaty Organization
Summit in Chicago in 2012, the North Atlantic
Treaty Organization plans to announce it has
achieved an “interim capability” for the North At-
Atlantic Treaty Organization missile defense system, including initial capability of its Active Layered Theater Ballistic Missile Defense system at a command and control facility in Germany.

(14) The United States has a robust program of missile defense cooperation with Israel, including joint development of the Arrow Weapon System and the new Arrow-3 upper tier interceptor, designed to defend Israel against ballistic missiles from Iran. These jointly developed missile defense systems are designed to be interoperable with United States ballistic missile defenses, and these interoperable systems are tested in large military exercises. The United States has deployed an AN/TPY–2 radar in Israel to enhance missile defense against missiles from Iran.

(15) The United States is working with the nations of the Gulf Cooperation Council on enhanced national and regional missile defense capabilities against growing missile threats from Iran. As part of this effort, the United Arab Emirates plans to purchase two batteries of the Terminal High Altitude Air Defense (THAAD) system, as well as other equipment.
(16) The United States has a strong program of missile defense cooperation with Japan, including the co-development of the Standard Missile-3 (SM–3) Block IIA interceptor for the Aegis Ballistic Missile Defense system, intended to be deployed by Japan and in Phase 3 of the European Phased Adaptive Approach, Japan’s fleet of Aegis Ballistic Missile Defense ships using the SM–3 Block IA interceptors, and the United States deployment of an AN/TPY–2 radar in Japan.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the threat from regional ballistic missiles, particularly from Iran and North Korea, is serious and growing, and puts at risk forward-deployed United States forces and allies and partners in Europe, the Middle East, and the Asia-Pacific region;

(2) the Department of Defense has an obligation to provide force protection of forward-deployed United States forces, assets, and facilities from regional ballistic missile attack;

(3) the United States has an obligation to meet its security commitments to its allies, including ballistic missile defense commitments;
(4) the Department of Defense has a balanced program of investment and capabilities to provide for both homeland defense and regional defense against ballistic missiles, consistent with the Ballistic Missile Defense Review and with the prioritized and integrated needs of the commanders of the combatant commands;

(5) the European Phased Adaptive Approach to missile defense is an appropriate and necessary response to the existing and growing ballistic missile threat from Iran to forward deployed United States forces and allies and partners in Europe;

(6) the Department of Defense—

(A) should, as a high priority, continue to develop, test, and plan to deploy all four phases of the European Phased Adaptive Approach, including all variants of the Standard Missile-3 interceptor; and

(B) should also continue with its other phased and adaptive regional missile defense efforts tailored to the Middle East and the Asia-Pacific region;

(7) European members of the North Atlantic Treaty Organization are making valuable contributions to missile defense in Europe, by hosting ele-
ments of United States missile defense systems on their territories, through individual national contributions to missile defense capability, and by collective funding and development of the Active Layered Theater Ballistic Missile Defense system; and

(8) the Department of Defense should continue with the development of the key enablers of enhanced regional missile defense, including the Precision Tracking Space System.

(c) REPORT.—

(1) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Secretary of Defense shall submit to the congressional defense committees a report describing the status and progress of regional missile defense programs and efforts.

(2) ELEMENTS OF REPORT.—The report required by paragraph (1) shall include the following:

(A) An assessment of the adequacy of the existing and planned European Phased Adaptive Approach to provide force protection for forward deployed United States forces in Europe against ballistic missile threats from Iran, and an assessment whether adequate force protec-
tion would be available absent the European
Phased Adaptive Approach.

(B) An assessment whether the European
Phased Adaptive Approach and other planned
regional missile defense approaches of the
United States meet the integrated priorities of
the commanders of the regional combatant com-
mands in an affordable and balanced manner.

(C) A description of the progress made in
the development and testing of elements of sys-
tems intended for deployment in Phases 2
through 4 of the European Phased Adaptive
Approach, including the Standard Missile-3
Block IB interceptor and the Aegis Ashore sys-
tem.

(D) A description of the manner in which
elements of regional missile defense architec-
tures, such as forward-based X-band radars in
Turkey and Japan, contribute to the enhance-
ment of homeland defense of the United States.

(E) A description of the current and
planned contributions of North Atlantic Treaty
Organization allies, both collectively and indi-
vidually, to missile defense in Europe.
(3) Form.—The report required by paragraph 1 shall be submitted in unclassified form, but may include a classified annex.

SEC. 233. MISSILE DEFENSE COOPERATION WITH RUSSIA.

(a) Findings.—Congress makes the following findings:

(1) For more than a decade, the United States and Russia have discussed a variety of options for cooperation on shared early warning and ballistic missile defense. For example, on May 1, 2001, President George W. Bush spoke of a “new cooperative relationship” with Russia and said “it should be premised on openness, mutual confidence and real opportunities for cooperation, including the area of missile defense. It should allow us to share information so that each nation can improve its early warning capability, and its capability to defend its people and territory. And perhaps one day, we can even cooperate in a joint defense”.

(2) Section 1231 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (as enacted into law by Public Law 106–398; 1654A–329) authorized the Department of Defense to establish in Russia a “joint center for the exchange of data from systems to provide early warn-
ing of launches of ballistic missiles and for notification of launches of such missiles”, also known as the Joint Data Exchange Center (JDEC).

(3) On March 31, 2008, Deputy Secretary of Defense Gordon England stated that “we have offered Russia a wide-ranging proposal to cooperate on missile defense—everything from modeling and simulation, to data sharing, to joint development of a regional missile defense architecture—all designed to defend the United States, Europe, and Russia from the growing threat of Iranian ballistic missiles. An extraordinary series of transparency measures have also been offered to reassure Russia. Despite some Russian reluctance to sign up to these cooperative missile defense activities, we continue to work toward this goal”.

(4) On July 6, 2009, President Barack Obama and Russian President Dmitry Medvedev issued a joint statement on missile defense issues, which stated that “Russia and the United States plan to continue the discussion concerning the establishment of cooperation in responding to the challenge of ballistic missile proliferation. . . We have instructed our experts to work together to analyze the ballistic mis-
sile challenges of the 21st century and to prepare appropriate recommendations”.

(5) The February 2010 report of the Ballistic Missile Defense Review established as one of its central policy pillars that increased international missile defense cooperation is in the national security interest of the United States and, with regard to cooperation with Russia, the United States “is pursuing a broad agenda focused on shared early warning of missile launches, possible technical cooperation, and even operational cooperation”.

(6) at the November 2010 Lisbon Summit, the North Atlantic Treaty Organization (NATO) decided to develop a missile defense system to “protect NATO European populations, territory and forces” and also to seek cooperation with Russia on missile defense. In its Lisbon Summit Declaration, the North Atlantic Treaty Organization reaffirmed its readiness to “invite Russia to explore jointly the potential for linking current and planned missile defence systems at an appropriate time in mutually beneficial ways”. The new NATO Strategic Concept adopted at the Lisbon Summit states that “we will actively seek cooperation on missile defense with Russia”, that “NATO-Russia cooperation is of stra-
 tegic importance”, and that “the security of the
North Atlantic Treaty Organization and Russia is
intertwined”.

(7) In a December 18, 2010, letter to the lead-
ership of the Senate, President Obama wrote that
the North Atlantic Treaty Organization “invited
Russia to cooperate on missile defense, which could
lead to adding Russian capabilities to those deployed
by NATO to enhance our common security against
common threats. The Lisbon Summit thus dem-
onstrated that the Alliance’s missile defenses can be
strengthened by improving NATO-Russian relations.
This comes even as we have made clear that the sys-
tem we intend to pursue with Russia will not be a
joint system, and it will not in any way limit United
States’ or NATO’s missile defense capabilities. Ef-
fective cooperation with Russia could enhance the
overall efficiency of our combined territorial missile
defenses, and at the same time provide Russia with
greater security”.

(8) Section 221(a)(3) of the Ike Skelton Na-
tional Defense Authorization Act for Fiscal Year
2011 (Public Law 111–383; 124 Stat. 4167) states
that it is the sense of Congress “to support the ef-
forts of the United States Government and the
North Atlantic Treaty Organization to pursue co-
operation with the Russian Federation on ballistic
missile defense relative to Iranian missile threats”.

(9) In a speech in Russia on March 21, 2011,
Secretary of Defense Robert Gates cited “the
NATO-Russian decision to cooperate on defense
against ballistic missiles. We’ve disagreed before,
and Russia still has uncertainties about the Euro-
pean Phased Adaptive Approach, a limited system
that poses no challenges to the large Russian nu-
clear arsenal. However, we’ve mutually committed to
resolving these difficulties in order to develop a
roadmap toward truly effective anti-ballistic missile
collaboration. This collaboration may include ex-
changing launch information, setting up a joint data
fusion center, allowing greater transparency with re-
spect to our missile defense plans and exercises, and
conducting a joint analysis to determine areas of fu-
ture cooperation”.

(10) In testimony to the Committee on Armed
Services of the Senate on April 13, 2011, Deputy
Assistant Secretary of Defense for Nuclear and Mis-
sile Defense Policy Bradley H. Roberts stated that
the United States has been pursuing a Defense
Technology Cooperation Agreement with Russia
since 2004, and that such an agreement is necessary
“for the safeguarding of sensitive information in
support of cooperation” on missile defense, and to
“provide the legal framework for undertaking coop-
erative efforts”. Further, Dr. Roberts stated that
the United States would not provide any classified
information to Russia without first conducting a Na-
tional Disclosure Policy review. He also stated that
the United States is not considering sharing “hit-to-
kill” technology with Russia.

(11) In a March 2012 answer to a question
from the Committee on Armed Services of the Sen-
ate on missile defense cooperation with Russia, Act-
ing Under Secretary of Defense for Policy Jim Mil-
er wrote that “I support U.S.-Russian cooperation
on missile defenses first and foremost because it
could improve the effectiveness of U.S. and NATO
missile defenses, thereby improving the protection of
the United States, our forces overseas, and our Al-
lies. Missile defense cooperation with Russia is in
the security interests of the United States, NATO,
and Russia, first and foremost because it could
strengthen capabilities across Europe to intercept
Iranian missiles”. He also wrote that “[t]he United
States has pursued missile defense cooperation with
Russia with the clear understanding that we would not accept constraints on missile defense, and that we would undertake necessary qualitative and quantitative improvements to meet U.S. Security needs”.

(12) In February 2012, an international group of independent experts known as the Euro-Atlantic Security Initiative issued a report proposing missile defense cooperation between the United States (with its North Atlantic Treaty Organization allies) and Russia. The group, whose leaders included Stephen Hadley, the National Security Advisor to President George W. Bush, proposed that the nations share satellite and radar early warning data at joint cooperation centers in order to improve their ability to detect, track, and defeat medium-range and intermediate-range ballistic missiles from the Middle East.

(13) In a letter dated April 13, 2012, Robert Nabors, Assistant to the President and Director of the Office of Legislative Affairs, wrote that “it is Administration policy that we will only provide information to Russia that will enhance the effectiveness of our missile defenses. The Administration will not provide Russia with sensitive information that would
in any way compromise our national security, including hit-to-kill technology and interceptor telemetry”.

(14) The United States and Russia already engage in substantial cooperation on a number of international security efforts, including nuclear non-proliferation, anti-piracy, counter-narcotics, nuclear security, counter-terrorism, and logistics resupply through Russia of coalition forces in Afghanistan. These areas of cooperation require each side to share and protect sensitive information, which they have both done successfully.

(15) The United States currently has shared early warning agreements and programs of cooperation with eight nations in addition to the North Atlantic Treaty Organization. The United States has developed procedures and mechanisms for sharing early warning information with partner nations while ensuring the protection of sensitive United States information.

(16) Russia and the United States each have missile launch early warning and detection and tracking sensors that could contribute to and enhance each others’ ability to detect, track, and defend against ballistic missile threats from Iran.
(17) The Obama Administration has provided regular briefings to Congress on its discussions with Russia on possible missile defense cooperation.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) it is in the national security interest of the United States to pursue efforts at missile defense cooperation with Russia that would enhance the security of the United States, its North Atlantic Treaty Organization allies, and Russia, particularly against missile threats from Iran;

(2) the United States should pursue ballistic missile defense cooperation with Russia on both a bilateral and a multilateral basis with its North Atlantic Treaty Organization allies, particularly through the NATO-Russia Council;

(3) missile defense cooperation with Russia should not “in any way limit United States’ or NATO’s missile defense capabilities”, as acknowledged in the December 18, 2010, letter from President Obama to the leadership of the Senate, and should be mutually beneficial and reciprocal in nature;

(4) the United States should not provide Russia with sensitive missile defense information that would
in any way compromise United States national secu-

rity, including “hit-to-kill” technology and inter-

tceptor telemetry; and

(5) the United States should pursue missile de-

fense cooperation with Russia in a manner that en-

sures that—

(A) United States classified information is

appropriately safeguarded and protected from

unauthorized disclosure;

(B) prior to sharing classified information

with Russia, the United States conducts a Na-

tional Disclosure Policy review and determines

the types and levels of information that may be

shared and whether any additional procedures

are necessary to protect such information;

(C) prior to entering into missile defense

technology cooperation projects, the United

States enters into a Defense Technology Co-

operation Agreement with Russia that estab-

lishes the legal framework for a broad spectrum

of potential cooperative defense projects; and

(D) such cooperation does not limit the

missile defense capabilities of the United States

or its North Atlantic Treaty Organization allies.
SEC. 234. NEXT GENERATION EXO-ATMOSPHERIC KILL VEHICLE.

(a) PLAN FOR NEXT GENERATION KILL VEHICLE.—
The Director of the Missile Defense Agency shall develop a long-term plan for the Exo-atmospheric Kill Vehicle (EKV) that addresses both modifications and enhancements to the current Exo-atmospheric Kill Vehicle and options for the competitive development of a next generation Exo-atmospheric Kill Vehicle for the Ground-Based Interceptor (GBI) of the Ground-based Midcourse Defense (GMD) system and any other interceptor that might be developed for the defense of the United States against long-range ballistic missiles.

(b) DEFINITION OF PARAMETERS AND CAPABILITIES.—

(1) ASSESSMENT REQUIRED.—The Director shall define the desired technical parameters and performance capabilities for a next generation Exo-atmospheric Kill Vehicle using an assessment conducted by the Director for that purpose that is designed to ensure that a next generation Exo-atmospheric Kill Vehicle design—

(A) enables ease of manufacturing, high tolerances to production processes and supply chain variability, and inherent reliability;
(B) will be optimized to take advantage of
the Ballistic Missile Defense System architec-
ture and sensor system capabilities;

(C) leverages all relevant kill vehicle devel-
opment activities and technologies, including
from the current Standard Missile-3 Block IIB
(SM–3 IIB) program and the previous Multiple
Kill Vehicle technology development program;

(D) seeks to maximize, to the greatest ex-
tent practicable, commonality between sub-
systems of a next generation Exo-atmospheric
Kill Vehicle and other exo-atmospheric kill vehi-
cle programs; and

(E) meets Department of Defense criteria,
as established in the February 2010 Ballistic
Missile Defense Review, for affordability, reli-
ability, suitability, and operational effectiveness
to defend against limited attacks from evolving
and future threats from long-range missiles.

(2) Evaluation of Payloads.—The assess-
ment required by paragraph (1) shall include an
evaluation of the potential benefits and drawbacks of
options for both unitary and multiple Exo-atmos-
pheric Kill Vehicle payloads.

(3) preserve intercontinental ballistic missile silos in operational or warm status.

SEC. 239. SENSE OF CONGRESS ON THE SUBMITTAL TO CONGRESS OF THE HOMELAND DEFENSE HEDGING POLICY AND STRATEGY REPORT OF THE SECRETARY OF DEFENSE.

(a) FINDINGS.—Congress makes the following findings:

(1) Section 233 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81; 125 Stat. 1340) requires a homeland de-
fense hedging policy and strategy report from the Secretary of Defense.

(2) The report was required to be submitted not later than 75 days after the date of the enactment of the National Defense Authorization Act for Fiscal Year 2012, namely by March 16, 2012.

(3) The Secretary of Defense has not yet submitted the report as required.

(4) In March 2012, General Charles Jacoby, Jr., Commander of the United States Northern Command, the combatant command responsible for operation of the Ground-based Midcourse Defense system to defend the homeland against ballistic missile threats, testified before Congress that “I am confident in my ability to successfully defend the homeland from the current set of limited long-range ballistic missile threats”, and that “[a]gainst current threats from the Middle East, I am confident we are well postured”.

(5) Phase 4 of the European Phased Adaptive Approach (EPAA) is intended to augment the currently deployed homeland defense capability of the Ground-based Midcourse Defense system against a potential future Iranian long-range missile threat by
deploying an additional layer of forward-deployed interceptors in Europe in the 2020 timeframe.

(6) The Director of National Intelligence, James Clapper, has testified to Congress that, although the intelligence community does “not know if Iran will eventually decide to build nuclear weapons”, it judges “that Iran would likely choose missile delivery as its preferred method of delivering a nuclear weapon”. He also testified that “Iran already has the largest inventory of ballistic missiles in the Middle East, and it is expanding the scale, reach, and sophistication of its ballistic missile forces, many of which are inherently capable of carrying a nuclear payload”.

(7) The 2012 Annual Report to Congress on the Military Power of Iran by the Department of Defense states that, in addition to increasing its missile inventories, “Iran has boosted the lethality and effectiveness of its existing missile systems with accuracy improvements and new submunitions payloads”, and that it continues to develop missiles that can strike Israel and Eastern Europe. It also states that “Iran has launched multistage space launch vehicles that could serve as a testbed for developing long-range ballistic missiles technologies”, and that
“[w]ith sufficient foreign assistance, Iran may be technically capable of flight-testing an intercontinental ballistic missile by 2015”.

(8) Despite the failure of its April 2012 satellite launch attempt, North Korea warned the United States in October 2012 that the United States mainland is within range of its missiles.

(9) The threat of limited ballistic missile attack against the United States homeland from countries such as North Korea and Iran is increasing.

(b) SENSE OF CONGRESS.—It is the sense of the Congress that—

(1) the homeland defense hedging policy and strategy report required by section 233 of the National Defense Authorization Act for Fiscal Year 2012 is necessary to inform Congress on options to protect the United States homeland against the evolving ballistic missile threat, including potential options prior to the deployment of Phase 4 of the European Phased Adaptive Approach to missile defense; and

(2) the Secretary of Defense should comply with the requirements of section 233 of the National Defense Authorization Act for Fiscal Year 2012 by
submitting the homeland defense hedging policy and strategy report to Congress.

SEC. 868. SENSE OF SENATE ON THE CONTRIBUTIONS OF LATVIA AND OTHER NORTH ATLANTIC TREATY ORGANIZATION MEMBER NATIONS TO THE SUCCESS OF THE NORTHERN DISTRIBUTION NETWORK.

(a) FINDINGS.—The Senate makes the following findings:

(1) The remote and austere environments in which United States troops are required to operate as part of the International Security Assistance Force (ISAF) mission in Afghanistan have increased the need for reliable lines of supply in southwest Asia.

(2) The country of Afghanistan presents unique logistics challenges, which have precipitated the development of several redundant lines of supply.

(3) United States Transportation Command and the Defense Logistics Agency (DLA), in consultation with United States Embassy officials and other parties, have successfully established memoranda of understanding and other agreements with nations in and around southwest Asia to ensure the reliability of lines of supply to Afghanistan.
(4) The lines of supply through Pakistan have been repeatedly threatened by instability in that country. Airlifting goods to Afghanistan, while safer, is expensive.

(5) The Northern Distribution Network (NDN) was established in late 2008 to ensure that a safe and cost-effective line of supply is available for United States troops in Afghanistan.

(6) The two prongs of supply provided by the Northern Distribution Network ship nonlethal goods from the Baltic ports in the north and the Caucasus in the west to southwest Asia and Afghanistan.

(7) The Northern Distribution Network has been successful and now handles more than 50 percent of cargo shipped to Afghanistan.

(8) North Atlantic Treaty Organization (NATO) member nations along the Northern Distribution Network routes have contributed significantly to the success of the Northern Distribution Network.

(9) The United States has strong economic ties to Northern Distribution Network nations that are members of the North Atlantic Treaty Organization, and these nations may be able to provide quality
goods and services for near and long-term use by the
Department of Defense.

(10) Since 2009 the port of Riga, on the Baltic
Sea, has been a critical overland entry point for
goods being shipped using the Northern Distribution
Network. Latvia is a member of the North Atlantic
Treaty Organization and has been an ally of the
United States in the region for many years.

(11) In September 2010, the Defense Logistics
Agency, the General Services Administration, and
other parties hosted a local procurement conference
in Riga, Latvia.

(12) One hundred nine Latvian vendors at-
tended the September 2010 conference in Riga, and
contracts with Latvian vendors have been entered
into as a result.

(13) In May 2012, Latvia hosted an inter-
national workshop in Riga to examine ways of trans-
forming the Northern Distribution Network from a
route for the delivery of United States and other Al-
lies’ non-lethal goods to Afghanistan into a commer-
cial route that would support the economic growth
of Afghanistan and the southwest Asia region.

(b) SENSE OF SENATE.—It is the sense of the Senate
that—
(1) Latvia and other North Atlantic Treaty Organization member nations along the Northern Distribution Network routes are key economic and security partners of the United States and are to be commended for their contribution to ensuring United States and International Security Assistance Force troops have reliable lines of supply to achieve the mission in Afghanistan;

(2) when quality products at competitive prices are available, significant effort should be made to procure goods locally from Latvia and other North Atlantic Treaty Organization member nations along the Northern Distribution Network routes; and

(3) Latvia and other North Atlantic Treaty Organization member nations along the Northern Distribution Network routes remain allies of the United States in the region, and a mutually beneficial relationship should continue to be cultivated between the United States and Latvia and such other nations in the future.

(6) Enhancement of the capacity to deploy, and achieve access to, enterprise-level services.
(7) Separation of server and end-user device computing to facilitate server and data center consolidation and a more secure tiered and zoned network architecture.

(b) Personnel Plan.—

(1) In general.—As part of the actions taken under subsection (a), the Secretary shall establish and carry out a plan to reassign personnel billets currently allocated to network operations and security that will become available pursuant to the reduction in network enclaves required by that subsection to tasks related to potential offensive cyber operations in order to achieve an appropriate balance between the offensive and defensive missions of the United States Cyber Command and its components. The plan shall include targets for the number of personnel to be reassigned to tasks related to offensive operations, and the rate at which such personnel shall be added to the workforce for such tasks.

(2) Disposition of personnel.—In developing the plan required by paragraph (1), the Secretary shall—

(A) determine whether the number of personnel required to be reassigned to tasks re-
lated to offensive operations in order to achieve
the balance described in paragraph (1) will be
met, in pace and numbers, through the reas-
signment of personnel billets pursuant to the
plan; and

(B) if the Secretary determines that the
number of personnel so required will not be so
met (whether because of insufficient numbers of
personnel in billets to be reassigned or because
personnel available for reassignment cannot be
trained or directed to tasks related to offensive
operations), take appropriate actions to ensure
the availability to the United States Cyber
Command of appropriate numbers of personnel
qualified to undertake tasks related to offensive
operations.

(3) ADDITIONAL ELEMENTS.—In developing the
plan required by paragraph (1), the Secretary shall
also—

(A) identify targets for the number of per-
sonnel to be reassigned to tasks related to of-
fensive cyber operations, and the rate at which
such personnel shall be added to the workforce
for such tasks; and
(B) identify targets for use of National Guard personnel to support cyber workforce rationalization and the actions taken under subsection (a).

(4) SUBMITTAL TO CONGRESS.—The Secretary shall submit the plan required by paragraph (1) to the congressional defense committees at the time of the submittal to Congress of the budget of the President for fiscal year 2014 pursuant to section 1105(a) of title 31, United States Code.

SEC. 924. NEXT-GENERATION HOST-BASED CYBER SECURITY SYSTEM FOR THE DEPARTMENT OF DEFENSE.

(a) STRATEGY FOR ACQUISITION OF SYSTEM REQUIRED.—The Chief Information Officer of the Department of Defense shall, in coordination with the Under Secretary of Defense for Acquisition, Technology, and Logistics, develop a strategy to acquire next-generation host-based cybersecurity tools and capabilities (in this section referred to as a “next-generation system”) for the Department of Defense.

(b) ELEMENTS OF SYSTEM.—It is the sense of Congress that any next-generation system acquired under the strategy required by subsection (a) should meet the following requirements:
(1) To overcome problems and limitations in current capabilities, the system should not rely on anti-virus or signature-based threat detection techniques that—

(A) cannot address new or rapidly morphing threats;

(B) consume substantial amounts of communications capacity to remain current with known threats and to report current status; or

(C) consume substantial amounts of resources to store rapidly growing threat libraries.

(2) The system should provide an open architecture-based framework for so-called “plug-and-play” integration of a variety of types of deployable tools in addition to cyber intrusion detection tools, including tools for—

(A) insider threat detection;

(B) continuous monitoring and configuration management;

(C) remediation following infections; and

(D) protection techniques that do not rely on detection of the attack, such as virtualization, and diversification of attack surfaces.
(3) The system should be designed for ease of deployment to potentially millions of host devices of tailored security solutions depending on need and risk, and to be compatible with cloud-based, thin-client, and virtualized environments as well as battle-field devices and weapons systems.

(c) SUBMITTAL TO CONGRESS.—The Chief Information Office shall submit to Congress a report setting forth the strategy required by subsection (a) together with the budget justification materials of the Department of Defense submitted to Congress with the budget of the President for fiscal year 2015 pursuant to section 1105(a) of title 31, United States Code.

(b) UPDATE OF DEVELOPMENT AND ACQUISITION MODELS.—

(1) IN GENERAL.—The Under Secretary of Defense for Acquisition, Technology, and Logistics shall, in coordination with the Chief Information Officer, provide for the development of updates and improvements to one or more existing best-practice development and acquisition models (such as the Capability Maturity Model Integration) in order to provide explicit guidance under such model or models for improved assurance, security, quality, and resiliency in the computer software developed and procured by the Department.

(2) ELEMENTS.—Any update or improvement to a development and acquisition model under this subsection shall—

(A) include diagnostic methods that enable evaluations of conformance to the processes and best practices of the model for achieving quality, assurance, and security throughout the life cycle of software products concerned; and

(B) be compatible with the variety of current agile and incremental software development methodologies.
(c) Requirements for Secure Code Development Practices.—The Under Secretary shall, in coordination with the Chief Information Officer—

(1) direct the Director of the Defense Information Systems Agency to modify the Application Security and Development Security Technical Implementation Guide (STIG) to require (rather than highly recommend) the use of automated static vulnerability analysis tools in the computer software code development phase, and in development and operational testing, to identify and remediate security vulnerabilities for covered systems;

(2) develop a list of qualified government and private-sector static analysis tools and third-party testing organizations to support the requirement under paragraph (1);

(3) direct the Director—

(A) to designate secure software coding standards; and

(4) develop guidance and direction for Department program managers to require government software development and maintenance organizations
and contractors to identify and implement, through contract statements of work, a secure software coding plan that includes verifiable processes and practices.

(d) Verification of Effective Implementation.—The Under Secretary shall, in coordination with the Chief Information Officer, develop guidance and direction for Department program managers for covered systems to do as follows:

(1) To require evidence that government software development and maintenance organizations and contractors are conforming in computer software coding to—

(A) approved secure coding standards of the Department during software development, upgrade and maintenance activities, including through the use of inspection and appraisals;

(B) an applicable best practice development and acquisition model; and

(C) the requirement established pursuant to subsection (b)(1).

(2) To make appropriate use of authorized software code assessment centers (whether a government center, Federally funded research and development center, or government contractor) to evaluate
applications and software products for conformance
to secure coding requirements.

(e) **Study on Additional Means of Improving Software Security.**—

(1) **In general.**—The Under Secretary shall, in coordination with the Chief Information Officer, provide for a study of potential mechanisms for obtaining higher quality and secure development of computer software for the Department.

(2) **Mechanisms to be studied.**—The mechanisms studied under paragraph (1) may include the following:

(A) Liability for defects or vulnerabilities in software code.

(B) So-called “clawback” provisions on earned fees that enable the Department to recoup funds for security vulnerabilities discovered after software is delivered.

(C) Exemption from liability for rigorous conformance with secure development processes.

(D) Warranties against software defects and vulnerabilities.

(f) **Software Repositories and Collaborative Development Environments.**—The Under Secretary shall, in consultation with the Chief Information Officer—

(A) storing software code owned by the government, or to which it has use rights, together with all associated documentation and quality and security test results;

(B) minimizing duplicative investment in software code development infrastructure while promoting common, high-quality development practices and facilitating sharing of best practices; and

(C) promoting software re-use and competition for software capability insertion, upgrades, and maintenance;

(2) establish rules and procedures for depositors in the repositories and environments provided for under paragraph (1) to keep the software code base current, if the depositors are not already using such a repository or environment for software development and life-cycle management; and
(3) ensure that the repositories and environments provided for under paragraph (1) provide automated tools for software reverse engineering, functionality analysis, and static and dynamic vulnerability analysis of source code and binary code in order to enable users to search for software relevant to their requirements, understand what the code does and how it functions, and assess its quality and security.

(g) COVERED SYSTEMS DEFINED.—In this section, the term “covered systems” means any Department of Defense critical information systems and weapons systems, including—

(1) major systems, as that term is defined in section 2302(5) of title 10, United States Code;

(B) conduct a business case analysis of each data link system contained in the inventory under subparagraph (A) to determine whether—

(i) the maintenance, upgrade, new deployment, or replacement of such system should be open to competition; or

(ii) the data link should be converted to an open architecture, or a different data link standard should be adopted to enable such competition;

(C) for each data link system for which competition is determined advisable under clause (i) or (ii) of subparagraph (B), develop a plan (with specific objectives, actions, and schedules) to achieve such competition, includ-
ing a plan to address any policy, legal, programmatic, or technical barriers to such competition; and

(D) for each data link system for which competition is determined not advisable under subparagraph (B), prepare a justification for the determination that it is not practical to conduct such competition or to convert the data link standard to open architecture or adopt a different data link standard for which competition is feasible.

(2) Element of Business Case Analyses.— In conducting a business case analysis for purposes of paragraph (1)(B), the Under Secretary shall solicit the views of industry on the merits and feasibility of introducing competition for the maintenance, upgrade, new deployment, or replacement for the data link system in question.

(b) Earlier Actions.—If the Under Secretary completes any portion of the plan described in subsection (a)(1)(C) before December 1, 2013, the Secretary may commence action on such portion of the plan upon completion of such portion, including publication of such portion of the plan.

(e) Reports.—
(1) **Submittal of plan to Congress.** — The Under Secretary shall submit to Congress the plan described in subsection (a)(1)(C) at the same time the budget of the President for fiscal year 2015 is submitted to Congress pursuant to section 1105(a) of title 31, United States Code. SEC. 931. SOFTWARE LICENSES OF THE DEPARTMENT OF DEFENSE.

(a) Audits.—Not later than 180 days after the date of the enactment of this Act, and every two years thereafter, the Chief Information Officer of the Department of the Defense shall, in consultation with chief information officers of the military departments and the Defense Agencies—

(1) conduct an inventory of all existing software licenses in favor of the Department of Defense, including licenses in use and licenses not in use, on an application-by-application basis;

(2) compare the number of software licenses in use, and the manner of their use by Department employees, with the number of software licenses available to the Department and the product use rights contained in such licenses;

(3) assess the needs of the Department and the components of the Department for software licenses during the two fiscal years next following the date of the completion of the inventory; and

(4) determine means by which the Department can achieve the greatest possible economies of scale.
and cost-savings in the procurement, use, and optimization of software licenses.

SEC. 933. AUTHORITY FOR SHORT-TERM EXTENSION OF LEASE FOR AIRCRAFT SUPPORTING THE BLUE DEVIL INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE PROGRAM.

(a) In general.—Notwithstanding section 2401 of title 10, United States Code, the Secretary of the Air Force may extend or renew the lease of aircraft supporting the Blue Devil intelligence, surveillance, and reconnaissance program after the date of the expiration of the current lease of such aircraft for a term that is the shorter of—

(1) the period beginning on the date of the expiration of the current lease and ending on the date on which the Commander of the United States Central Command notifies the Secretary that a substitute is available for the capabilities provided by the lease, or that the capabilities provided by such aircraft are no longer required; or

(2) six months.

(b) Funding.—Amounts authorized to be appropriated for fiscal year 2013 by title XV and available for Overseas Contingency Operations for operation and maintenance as specified in the funding tables in section 4302 may be available for the extension or renewal of the lease authorized by subsection (a).
SEC. 934. SENSE OF SENATE ON POTENTIAL SECURITY RISKS TO DEPARTMENT OF DEFENSE NETWORKS.

(a) FINDINGS.—The Senate makes the following findings:

(1) Cybersecurity threats are pervasive and serious, including through the supply chain of information technology equipment and software.

(2) Semiconductor manufacturing is already dominated by foreign producers, presenting supply chain risk management challenges.

(3) In a number of instances, foreign manufacturers of telecommunications equipment, including advanced wireless technology, are gaining global market share due to high quality and low prices. Competitive market forces ensure that commercial providers of consumer, business, and government systems and services will choose equipment and associated software from these manufacturers. In some cases, like Huawei Industries, this competitive position stems in part from inappropriate government subsidies and other forms of assistance.

(4) Some of these companies also present clear cybersecurity supply chain risks that the Government must address.
(5) The Committee on Foreign Investment in the United States has blocked the attempt by Huawei to acquire United States technology firms on two occasions and the National Security Agency and the Secretary of Commerce have advised two major United States telecommunications carriers against selecting Huawei as a supplier.

(6) The Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111–383) provided authority and mechanisms for the Secretary of Defense to control these supply chain risks, but only for National Security Systems, leaving many information technology systems and missions exposed to supply chain risks.

(7) Blocking sales from providers of information technology systems and services due to concerns about cybersecurity risks, while maintaining our commitment to free trade and fair and transparent competition, poses difficult policy challenges.

(b) SENSE OF SENATE.—It is the sense of the Senate that the Department of Defense—

(1) must ensure it maintains full visibility and adequate control of its supply chain, including subcontractors, in order to mitigate supply chain exploitation; and
(2) needs the authority and capability to mitigate supply chain risks to its information technology systems that fall outside the scope of National Security Systems.

SEC. 935. SENSE OF CONGRESS ON THE UNITED STATES CYBER COMMAND.

(a) FINDINGS.—Congress makes the following findings:

(1) On June 23, 2009, the Secretary of Defense directed the Commander of the United States Strategic Command to establish the United States Cyber Command, which became operational on May 21, 2010, and operates as a sub-unified command subordinate to the United States Strategic Command.

(2) In May 2012, media reports indicated that General Martin Dempsey, the Chairman of the Joint Chiefs of Staff, planned to recommend to Secretary of Defense Leon Panetta that the two-year-old United States Cyber Command be elevated to full combatant command status.

(3) On August 14, 2012, General Keith Alexander, the Commander of the United States Cyber Command and the Director of the National Security Agency, addressed the TechNet Land Forces conference and stated that "[i]n 2007 we drafted . . .
a paper . . . about establishing a Cyber Command . . . [which concluded that] . . . the most logical is to set it up as a sub unified and grow it to a unified, and I think that’s the process that we’re going to work our way through”.

(4) On October 11, 2012, Secretary of Defense Leon Panetta discussed cybersecurity in a speech to the Business Executives for National Security in New York, New York, specifically calling for a strengthening of the United States Cyber Command and stating that the Department of Defense “must ensure that [the United States Cyber Command] has the resources, that it has the authorities, that it has the capabilities required to perform this growing mission. And it must also be able to react quickly to events unfolding in cyberspace and help fully integrate cyber into all of the department’s plans and activities.”.

(b) SENSE OF CONGRESS.—Congress—

(1) recognizes the serious cyber threat to national security and the need to work both offensively and defensively to protect the Nation’s networks and critical infrastructure;

(2) acknowledges the importance of the unified command structure of the Department in directing
military operations in cyberspace and recognizes that a change in the status of the United States Cyber Command has Department-wide and national security implications, which require careful consideration;

(3) expects to be briefed and consulted about any proposal to elevate the United States Cyber Command to a unified command before a decision by the Secretary make such a proposal to the President and to receive, at a minimum—

(A) a clear statement of mission and related legal definitions;

(B) an outline of the specific national security benefits of elevating the sub-unified United States Cyber Command to a unified command;

(C) an estimate of the cost of creating a unified United States Cyber Command and a justification of the expenditure; and

(D) if the Secretary considers it advisable to continue the designation of the Commander of the United States Cyber Command as also being the Director of the National Security Agency—

(i) an explanation of how a single individual could serve as a commander of a
combatant command that conducts overt, albeit clandestine, cyber operations under title 10, United States Code, as well as the director of an intelligence agency that conducts covert cyber operations under the National Security Act of 1947 (50 U.S.C. 401 et seq.) in a manner that affords deniability to the United States; and

(ii) a statement of whether the Secretary believes it is appropriate either to appoint a line officer as the Director of the National Security Agency or to take the unprecedented step of appointing an intelligence officer as a unified commander; and

(4) believes that appropriate policy foundations and standing rules of engagement must be in place before any decision to create a unified United States Cyber Command.

SEC. 936. REPORTS TO DEPARTMENT OF DEFENSE ON PENETRATIONS OF NETWORKS AND INFORMATION SYSTEMS OF CERTAIN CONTRACTORS.

SEC. 1003. AUDIT READINESS OF DEPARTMENT OF DEFENSE STATEMENTS OF BUDGETARY RESOURCES.

(a) Objective.—Section 1003(a)(2)(A)(ii) of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84; 123 Stat. 2439; 10 U.S.C. 2222 note) is amended by inserting “, and the statement of budgetary resources of the Department of Defense is validated as ready for audit by not later than September 30, 2014” after “September 30, 2017”.

(b) Affordable and Sustainable Approach.—

(1) In general.—The Chief Management Officer of the Department of Defense and the Chief Management Officers of each of the military departments shall ensure that plans to achieve an auditable statement of budgetary resources of the Department of Defense by September 30, 2014, include appropriate steps to minimize one-time fixes and manual work-arounds, are sustainable and af-

SEC. 1004. REPORT ON EFFECTS OF BUDGET SEQUESTRATION ON THE DEPARTMENT OF DEFENSE.

(a) FINDINGS.—Congress makes the following findings:

(1) The inability of the Joint Select Committee on Deficit Reduction to find $1,200,000,000,000 in savings will trigger automatic funding reductions known as “sequestration” to the Department of Defense of $492,000,000,000 between 2013 and 2021 under section 251A of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 USC 901a).
(2) These reductions are in addition to reductions of $487,000,000,000 already being implemented by the Department of Defense, and would decrease the readiness and capabilities of the Armed Forces while increasing risks to the effective implementation of the National Security Strategy of the United States.

(3) The leaders of the Department of Defense have consistently testified that threats to the national security of the United States have increased, not decreased. Secretary of Defense Leon Panetta said that these reductions would “inflict severe damage to our national defense for generations”, comments that have been echoed by the Secretaries of the Army, Navy, and Air Force.

(4) While reductions in funds available for the Department of Defense will automatically commence January 2, 2013, uncertainty regarding the reductions has already exacerbated Department of Defense efforts to plan future defense budget.

(5) Sequestration will have a detrimental effect on the industrial base that supports the Department of Defense.

(b) REPORT.—

(2) ELEMENTS.—The report required by paragraph (1) shall include the following:

(A) An assessment of the potential impact of sequestration on the readiness of the Armed Forces, including impacts to steaming hours, flying hours, and full spectrum training miles, and an estimate of the increase or decrease in readiness (as defined in the C status C–1 through C–5).

(B) An assessment of the potential impact of sequestration on the ability of the Department of Defense to carry out the National Military Strategy of the United States, and any changes to the most recent Risk Assessment of the Chairman of the Joint Chiefs of Staff under...
section 153(b) of title 10, United States Code arising from sequestration.

(C) A list of the programs, projects, and activities across the Department of Defense, the military departments, and the elements and components of the Department of Defense that would be reduced or terminated as a result of sequestration.

(D) An estimate of the number and value of all contracts that will be terminated, restructured, or revised in scope as a result of sequestration, including an estimate of potential termination costs and of increased contract costs due to renegotiation and reinstatement of contracts.

(3) ASSUMPTIONS.—The report required by paragraph (1) shall assume the following:

(A) Except as provided in subparagraph (B), the funds subject to sequester are the funds in all 050 accounts, including all unobligated balances.

(B) The funds exempt from the sequester are the following:

(i) Funds in accounts for military personnel.
(ii) Funds in accounts for overseas contingency operations.

(4) Presentation of certain information.—In listing programs, projects, and activities under paragraph (2)(C), the report required by paragraph (1) shall set forth for each the following:

(A) The most specific level of budget item identified in applicable appropriations Acts.

(B) Related classified annexes and explanatory statements.

(C) Department of Defense budget justification documents DOD P–1 and R–1 as subsequently modified by congressional action, and as submitted by the Department of Defense together with the budget materials for the budget of the President for fiscal year 2013 (as submitted to Congress pursuant to section 1105(a) of title 31, United States Code).

(D) Department of Defense document O–1 for operation and maintenance accounts for fiscal year 2013, for which purpose the term “program, project, or activity” means the budget activity account and sub account for the program, project, or activity as submitted in such document O–1.

Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall submit to Congress, and publish on the Internet website of the Department of Defense available to the public, the following:

(1) The total dollar amount of all balances carried forward by the Department of Defense at the end of fiscal year 2012 by account.

(2) The total dollar amount of all unobligated balances carried forward by the Department of Defense at the end of fiscal year 2012 by account.

(3) The total dollar amount of any balances (both obligated and unobligated) that have been carried forward by the Department of Defense for five years or more as of the end of fiscal year 2012 by account.

SEC. 1006. TRANSFER OF CERTAIN FISCAL YEAR 2012 AND 2013 FUNDS.

(a) TRANSFER AUTHORIZED.—To the extent provided in appropriations Acts, the Secretary of Defense may transfer from fiscal year 2012 and 2013 procurement or research, development, test, and evaluation accounts an
aggregate of $46,000,000 to be available for the additional
authorizations in sections 132, 154, and 217.

(b) COVERED FUNDS.—In subsection (a), the term
“fiscal year 2012 and 2013 procurement or research, de-
velopment, test, and evaluation accounts” means—

(1) amounts authorized to be appropriated for
fiscal year 2012 by sections 101 and 201 of the Na-
tional Defense Authorization Act for Fiscal Year
2012 (Public Law 112–81) and available as specified

modifications, $4.0 million; Defense wide 12/14
Combat mission requirements, $4.2 million.

(c) EFFECT ON AUTHORIZATION AMOUNTS.—A
transfer made from one account to another under the au-
thority of this section shall be deemed to change the
amount authorized for the account to which the amount
is transferred by an amount equal to the amount trans-
erred.

(d) CONSTRUCTION OF AUTHORITY.—The transfer
authority in this section is in addition to any other trans-
fer authority provided in this Act.

SEC. 1023. SENSE OF CONGRESS ON RECAPITALIZATION FOR THE NAVY AND COAST GUARD.

(a) FINDINGS.—Congress makes the following findings:

(1) More than 70 percent of the world’s surface is comprised of navigable oceans.

(2) More than 80 percent of the population of the world lives within 100 miles of an ocean.

(3) More than 90 percent of the world’s commerce traverses an ocean.
(4) The national security of the United States is inextricably linked to the maintenance of global freedom of access for both the strategic and commercial interests of the United States.

(5) To maintain that freedom of access the sea services of the United States, composed of the Navy, the Marine Corps, and the Coast Guard, must be sufficiently positioned as rotationally globally deployable forces with the capability to decisively defend United States citizens, homeland, and interests abroad from direct or asymmetric attack and must be comprised of sufficient vessels to maintain global freedom of action.

(6) To achieve appropriate capabilities to ensure national security the Government of the United States must continue to recapitalize the fleets of the Navy and Coast Guard and must continue to conduct vital maintenance and repair of existing vessels to ensure such vessels meet service life goals.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the sea services of the United States should be funded and maintained to provide the broad spectrum of capabilities required to protect the national security of the United States;
(2) such capabilities should include—

(A) the ability to project United States power rapidly anywhere on the globe without the need for host nation basing permission or long and potentially vulnerable logistics supply lines;

(B) the ability to land and recover maritime forces from the sea for direct combat action, to evacuate United States citizens from hostile situations, and to provide humanitarian assistance where needed;

(C) the ability to operate from the subsurface with overpowering conventional combat power, as well as strategic deterrence; and

(D) the ability to operate in collaboration with United States maritime partners in the common interest of preventing piracy at sea and maintaining the commercial sea lanes available for global commerce;

(3) the Secretary of Defense, in coordination with the Secretary of the Navy, should maintain the recapitalization plans for the Navy as a priority in all future force structure decisions; and

(4) the Secretary of Homeland Security should maintain the recapitalization plans for the Coast
Guard as a priority in all future force structure decisions.

SEC. 1024. NOTICE TO CONGRESS FOR THE REVIEW OF PROPOSALS TO NAME NAVAL VESSELS.

(a) FINDINGS.—Congress makes the following findings:

(1) The Navy traces its ancestry to October 13, 1775, when an Act of the Continental Congress authorized the first vessel of a navy for the United Colonies. Vessels of the Continental Navy were named for early patriots and military heroes, Federal institutions, colonial cities, and positive character traits representative of naval and military virtues.

(2) An Act of Congress on March 3, 1819, made the Secretary of the Navy responsible for assigning names to vessels of the Navy. Traditional sources for vessel names customarily encompassed such categories as geographic locations in the United States; historic sites, battles, and ships; naval and military heroes and leaders; and noted individuals who made distinguished contributions to United States national security.
(3) These customs and traditions provide appropriate and necessary standards for the naming of vessels of the Navy.

(b) NOTICE TO CONGRESS.—Section 7292 of title 10, United States Code, is amended by adding at the end the following new subsection:

“(d)(1) The Secretary of the Navy may not announce or implement any proposal to name a vessel of the Navy until 30 days after the date on which the Secretary submits to the Committees on Armed Services of the Senate and the House of Representatives a report setting forth such proposal.

“(2) Each report under this subsection shall describe the justification for the proposal covered by such report in accordance with the standards referred to in section 1024(a) of the National Defense Authorization Act for Fiscal Year 2013.”.

(c) EFFECTIVE DATE.—This section and the amendment made by this section shall go into effect on the date that is 30 days after the date of the enactment of this Act.

(a) FINDINGS.—Congress makes the following findings:

(1) In its December 2011 report entitled “Critical Materials Strategy”, the Department of Energy states that the heavy rare earth phosphors, dysprosium, europium, terbium, and yttrium, are particularly important given their relative scarcity and their importance to clean energy, energy efficiency, hybrid and electric vehicles, and advanced defense systems, among other key technologies.

Subtitle G—Nuclear Matters

SEC. 1071. STRATEGIC DELIVERY SYSTEMS.

(a) FINDINGS.—Congress makes the following findings:

(1) The Nuclear Posture Review of 2010 said, with respect to modernizing the triad, “for planned reductions under New START, the United States should retain a smaller Triad of SLBMs, ICBMs, and heavy bombers. Retaining all three Triad legs will best maintain strategic stability at reasonable cost, while hedging against potential technical problems or vulnerabilities”.

(2) The Senate stated in Declaration 12 of the Resolution of Advice and Consent to Ratification of
the New START Treaty that “In accordance with paragraph 1 of Article V of the New START Treaty, which states that, ‘Subject to the provisions of this Treaty, modernization and replacement of strategic offensive arms may be carried out,’ it is the sense of the Senate that United States deterrence and flexibility is assured by a robust triad of strategic delivery vehicles. To this end, the United States is committed to accomplishing the modernization and replacement of its strategic nuclear delivery vehicles, and to ensuring the continued flexibility of United States conventional and nuclear delivery systems”.

(3) The Senate required the President, prior to the entry into force of the New START Treaty, to certify to the Senate that the President intended to modernize or replace the triad of strategic nuclear delivery systems.

(4) The President made this certification in a message to the Senate on February 2, 2011, in which the President stated, “I intend to (a) modernize or replace the triad of strategic nuclear delivery systems: a heavy bomber and air-launched cruise missile, an ICBM, and a nuclear-powered ballistic missile submarine (SSBN) and SLBM; and (b)
maintain the United States rocket motor industrial base’.

(b) REQUIREMENTS.—

(1) IN GENERAL.—Chapter 23 of title 10, United States Code, is amended by adding at the end the following new section:

§ 491. Strategic delivery systems

(a) ANNUAL CERTIFICATION.—Beginning in fiscal year 2013, the President shall annually certify in writing to the congressional defense committees whether plans to modernize or replace strategic delivery systems are fully funded at levels equal to or more than the levels set forth in the November 2010 update to the plan referred to in section 1251 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84; 123 Stat. 2549), including plans regarding—

“(1) a heavy bomber and air-launched cruise missile;

“(2) an intercontinental ballistic missile;

“(3) a submarine-launched ballistic missile;

“(4) a ballistic missile submarine; and

“(5) maintaining the nuclear command and control system (as first reported in section 1043 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81; 125 Stat. 1576)).
“(b) ADDITIONAL REPORT MATTERS FOLLOWING CERTAIN CERTIFICATIONS.—If the President certifies under subsection (a) that plans to modernize or replace strategic delivery systems are not fully funded, the President shall include in the next annual report submitted to Congress under section 1043 of the National Defense Authorization Act for Fiscal Year 2012 the following:

“(1) A determination whether or not the lack of full funding will result in a loss of military capability when compared with the November 2010 update to the plan referred to in section 1251 of the National Defense Authorization Act for Fiscal Year 2010.

“(2) If the determination under paragraph (1) is that the lack of full funding will result in a loss of military capability—

“(A) a plan to preserve or retain the military capability that would otherwise be lost; or

“(B) a report setting forth—

“(i) an assessment of the impact of the lack of full funding on the strategic delivery systems specified in subsection (a); and

“(ii) a description of the funding required to restore or maintain the capability.
“(3) A certification by the President whether or not the President is committed to accomplishing the modernization and replacement of strategic delivery systems and will meet the obligations concerning nuclear modernization as set forth in declaration 12 of the Resolution of Advice and Consent to Ratification of the New START Treaty.

“(c) Treatment of Certain Reductions.—Any certification under subsection (a) shall not take into account the following:

“(1) Reductions made to ensure the safety, security, reliability, and credibility of the nuclear weapons stockpile and strategic delivery systems, including activities related to surveillance, assessment, certification, testing, and maintenance of nuclear warheads and delivery systems.

“(2) Strategic delivery systems that are retired or awaiting dismantlement on the date of the certification under subsection (a).

“(d) Definitions.—In this section:

(b) Sense of the Senate on Certain Agreements.—It is the sense of the Senate that any agreement between the United States and the Russian Federation related to missile defense, nuclear weapons, or long-range conventional strike systems obligating the United States to reduce or limit the Armed Forces or armaments of the United States in any militarily significant manner may be made only pursuant to the treaty-making power of the President as set forth in Article II, section 2, clause 2 of the Constitution of the United States.

SEC. 1083. SENSE OF CONGRESS ON NON-UNITED STATES CITIZENS WHO ARE GRADUATES OF UNITED STATES EDUCATIONAL INSTITUTIONS WITH ADVANCED DEGREES IN SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS.

(a) FINDINGS.—Congress makes the following findings:

(1) It is a national security concern that more than half of all graduates with advanced scientific and technical degrees from United States institutions of higher education are non-United States citizens who have very limited opportunities upon graduation to contribute to the science and technology activities of the Department of Defense and the United States defense industrial base.
(2) The capabilities of the Armed Forces are highly reliant upon advanced technologies that provide our forces with a technological edge on the battlefield.

(3) In order to maintain and advance our military technological superiority, the United States requires the best and brightest scientists, mathematicians, and engineers to discover, develop, and field the next generation of weapon systems and defense technologies.

(4) The Department of Defense and the defense industrial base compete with other sectors for a limited number of United States citizens who have appropriate advanced degrees and skills.

(5) While an overarching national priority is to increase the numbers of United States citizens who have appropriate advanced degrees in science, technology, engineering, and mathematics (STEM), it would be beneficial if the Department of Defense and the defense industrial base were able to access the pool of talent of non-United States citizens with advanced scientific and technical degrees from United States institutions of higher education, many of whom are otherwise returning to their home countries.
(b) SENSE OF CONGRESS.—It is the sense of Congress—

(1) that the Department of Defense should make every reasonable and practical effort to increase the number of United States citizens who pursue advanced degrees in science, technology, engineering, and mathematics; and

(2) to strongly urge the Department of Defense to investigate innovative mechanisms (subject to all appropriate security requirements) to access to the pool of talent of non-United States citizens with advanced scientific and technical degrees from United States institutions of higher education, especially in those scientific and technical areas that are most vital to the national defense (such as those identified by the Assistant Secretary of Defense for Research and Engineering and the Armed Forces).

SEC. 1084. SENSE OF SENATE ON THE MAINTENANCE BY THE UNITED STATES OF A TRIAD OF STRATEGIC NUCLEAR DELIVERY SYSTEMS.

(a) FINDINGS.—The Senate finds the following:

(1) The April 2010 Nuclear Posture Review concluded that even with the reductions specified in the New START Treaty, the United States should retain a nuclear “Triad” of land-based interconti-
nental ballistic missiles, submarine-launched ballistic
missiles and nuclear capable heavy bombers, noting
that “[r]etaining all three Triad legs will best main-
tain strategic stability at reasonable cost, while
hedging against potential technical problems or
vulnerabilities”.

(2) The resolution of ratification for the New
START Treaty, which the Senate approved on De-
cember 22, 2010, stated that “it is the sense of the
Senate that United States deterrence and flexibility
is assured by a robust triad of strategic delivery ve-
hicles. To this end, the United States is committed
to accomplishing the modernization and replacement
of its strategic nuclear delivery vehicles, and to en-
suring the continued flexibility of United States con-
ventional and nuclear delivery systems”.

(3) In a message to the Senate on February 2,
2011, President Obama certified that he intended to
“modernize or replace the triad of strategic nuclear
delivery systems: a heavy bomber and air-launched
cruise missile, an ICBM, and a nuclear-powered bal-
listic missile submarine (SSBN) and SLBM” and to
“maintain the United States rocket motor industrial
base”.

†S 3254 ES
(b) Sense of Senate.—It is the sense of the Senate that—

(1) the United States should maintain a triad of strategic nuclear delivery systems; and

(2) the United States is committed to modernizing the component weapons and delivery systems of that triad.

Sec. 1085. Plan to Partner with State and Local Entities to Address Veterans Claims Backlog.

(a) Findings.—Congress makes the following findings:

(1) The Department of Veterans Affairs defines any claim for benefits under laws administered by the Secretary of Veterans Affairs as backlogged if the claim has been pending for 125 days or more.

(2) According to the Department, as of November 24, 2012, there were 899,540 pending claims, with 604,583 (67.2 percent) of those considered backlogged.

(3) The Department’s data further shows that, on November 22, 2010, there were 749,934 claims pending, with only 244,129 (32.6 percent) of those considered backlogged.
During the past two years, both the overall number of backlogged claims and the percentage of all pending claims that are backlogged have doubled.

In order to reduce the claims backlog at regional offices of the Department of Veterans Affairs located in Texas, the Texas Veterans Commission announced two initiatives on July 19, 2012, to partner with the Department of Veterans Affairs—

(A) to assist veterans whose claims are already backlogged to complete development of those claims; and

(B) to help veterans who are filing new claims to fully develop those claims prior to filing them, shortening the processing time required.

The common goal of the two initiatives of the Texas Veterans Commission, called the “Texas State Strike Force Team” and the “Fully Developed Claims Team Initiative”, is to reduce the backlog of claims pending in Texas by 17,000 within one year.

During the first two months of these new initiatives, the Texas Veterans Commission helped veterans complete development of more than 2,500 backlogged claims and assisted veterans with the submission of more than 800 fully developed claims.
(8) In testimony before the Subcommittee on Disability Assistance and Memorial Affairs of the Committee on Veterans’ Affairs of the House of Representatives on September 21, 2012, Diana Rubens, Deputy Under Secretary for Field Operations of the Veterans Benefits Administration, indicated that the Department of Veterans Affairs has experienced positive outcomes in projects with the Texas Veterans Commission, stating that both Veterans Service Organizations “and state and county service officers . . . are important partners in VBA’s transformation to better serve Veterans.”.

(9) At the same hearing, Mr. John Limpose, director of the regional office of the Department of Veterans Affairs in Waco, Texas, testified that the “TVC is working very, very well” with regional offices of the Department in Texas, calling the Texas Veterans Commission a “very positive story that we can branch out into . . . all of our stakeholders.”.

(b) REPORT.—

(1) IN GENERAL.—Not later than 60 days after the date of the enactment of this Act, the Secretary of Veterans Affairs shall submit to Congress a plan to reduce the current backlog of pending claims for benefits under laws administered by the Secretary
and more efficiently process claims for such benefits in the future.

(2) CONTENTS.—The report required by paragraph (1) shall include the following:

(A) A summary of all steps the Secretary has taken thus far to partner with non-Federal entities in support of efforts to reduce the backlog described in paragraph (1) and more efficiently process claims described in such paragraph in the future, including two previous initiatives by the Texas Veterans Commission, namely the 2008–2009 Development Assistant Pilot Project and the 2009–2011 Claims Processing Assistance Team.

(B) A plan for the Secretary to partner with non-Federal entities to support efforts to reduce such backlog and more efficiently process such claims in the future, including the following:

(i) State and local agencies relating to veterans affairs.

(ii) Organizations recognized by the Secretary for the representation of veterans under section 5902 of title 38, United States Code.
(iii) Such other relevant government and non-government entities as the Secretary considers appropriate.

(C) A description of how the Secretary intends to leverage partnerships with non-Federal entities described in subparagraph (B) to eliminate such backlog, including through increasing the percentage of claims that are fully developed prior to submittal to the Secretary and ensuring that new claims are fully developed prior to their submittal.

(D) A description of what steps the Secretary has taken and will take—

(i) to expedite the processing of claims that are already fully developed at the time of submittal; and

(ii) to support initiatives by non-Federal entities described in subparagraph (B) to help claimants gather and submit necessary evidence for claims that were previously filed but require further development.

(E) A description of how partnerships with non-Federal entities described in subparagraph
(B) will fit into the Secretary’s overall claims processing transformation plan.

It is the sense of the Senate that—

(1) Department of Defense airfields, training airspace, and air training routes are national treasures that must be protected from encroachment;

(2) placement or emplacement of obstructions near or on Department of Defense airfields, training airspace, or air training routes has the potential of increasing risk to military aircraft and personnel as well as impacting training and readiness; and

(3) the Department of Defense should develop comprehensive rules and regulations to address construction and use of land in close proximity to Department of Defense airfields, training areas, or air training routes to ensure compatibility with military aircraft operations.

SEC. 1249. PLAN FOR PROMOTING THE SECURITY OF AFGHAN WOMEN AND GIRLS DURING THE SECURITY TRANSITION PROCESS.

(a) FINDINGS.—Congress makes the following findings:

(1) According to the Department of Defense’s April 2012 Report on Progress Toward Security and Stability in Afghanistan:

(A) “U.S. and coalition forces will continue to degrade the Taliban-led insurgency in order to provide time and space to increase the capacity of the Afghan National Security Forces and the Afghan Government so they can assume full responsibility for Afghanistan’s security by the end of 2014.”

(B) “Transition to Afghan security lead began in July 2011 and transition to full Afghan security responsibility will be complete country-wide by the end of 2014.”

(C) “The security of the Afghan people and the stability of the government are used to judge provincial readiness to move to each successive stage of transition implementation.”

(D) For each area designated for transition, a transition implementation plan is developed by the Government of Afghanistan,
NATO, and ISAF and approved by the Joint Afghan-NATO Inteqal Board (JANIB). JANIB is also responsible for recommending areas to enter and exit the transition process.

(2) According to a 2002 study on Women, Peace and Security submitted by the Secretary-General of the United Nations pursuant to Security Council resolution 1325 (2000), “the suspension of or restriction on women’s enjoyment of their human rights” can act as an early-warning indicator of impending or renewed conflict. In Afghanistan, restrictions on women’s mobility and rights can signal the presence of extremist or insurgent elements in a community.

(3) The security of Afghan women and girls in areas undergoing security transitions will be an important gauge of the transition strategy’s success. Indicators by which to measure women’s security include the mobility of women and girls, the participation of women in local government bodies, the rate of school attendance for girls, women’s access to government services, and the prevalence of violence against women.

(4) Maintaining and improving physical security for Afghan women and girls throughout the country
is critical in order for women and girls to take ad-
vantage of opportunities in education, commerce,
politics, and other areas of public life, which in turn
is essential for the future stability and prosperity of
Afghanistan.

(5) Women who serve as public officials at all
levels of the Government of Afghanistan face serious
threats to their personal security and that of their
families. Many female officials have been the victims
of violent crimes, but they are generally not afforded
official protection by the Government of Afghanistan
or security forces.

(6) Protecting the security and human rights of
Afghan women and girls requires the involvement of
Afghan men and boys through education about the
important benefits of women’s full participation in
social, economic, and political life. Male officials and
security personnel can play a particularly important
role in supporting and protecting women and girls.

(7) The Chicago Summit Declaration issued by
NATO in May 2012 states: “As the Afghan Na-
tional Police further develop and professionalize,
they will evolve towards a sustainable, credible, and
accountable civilian law enforcement force that will
shoulder the main responsibility for domestic secu-
rity. This force should be capable of providing policing services to the Afghan population as part of the broader Afghan rule of law system.”

(8) Women face significant barriers to full participation in the ANA and ANP, including a discriminatory or hostile work environment and the lack of separate facilities designed for female personnel.

(9) As of September 2012, female recruitment and retention rates for the Afghan National Security Forces are far below published targets, as follows:

(A) Approximately 1,700 women serve in the Afghan National Security Forces, or less than half of one percent of the total force.

(B) In 2010, President Hamid Karzai announced plans to recruit and train 5,000 women in the Afghan National Police, or approximately 3 percent of the force, by 2014. Currently, there are approximately 1,370 women in the ANP, or 0.87 percent of the police force.

(C) Approximately 350 women currently serve in the Afghan National Army, representing only 0.17 percent of the force. The Government of Afghanistan has said that its
goal is to achieve a force that is 10 percent female. As of May 2012, approximately 3 percent of new ANA recruits were women.

(10) Male security personnel often do not respond to threats or incidences of violence against women, particularly at the local level. They largely lack the training and understanding needed to respond appropriately and effectively to situations involving women. According to the Department of Defense’s April 2012 Report on Progress Toward Security and Stability in Afghanistan:

(A) The Afghan Ministry of Defense “lacks the combination of policies, procedures, and execution to promote opportunity and fair and respectful treatment of women in the force”.

(B) The Afghan Ministry of Interior “faces significant challenges in fully integrating and protecting women in the ANP workforce, especially among operational units at the provincial and district levels”.

(C) In the Afghan National Police, “Many Provincial Headquarters Commanders do not accept policewomen, as they prefer male can-
didates and lack adequate facilities to support females.”

(D) “While women are greatly needed to support police operations, a combination of cultural impediments, weak recruitment, and uneven application of policies hinder significant progress.”

(E) “Although stronger documentation, implementation, and enforcement of policies, procedures, and guidance to better integrate women will help, time will be needed to change the cultural mores that form the basis of many of the current impediments.”

(11) The United States, the North American Treaty Organization, and United States coalition partners have made firm commitments to support the human rights of the women and girls of Afghanistan, as evidenced by the following actions:

(B) The National Action Plan also states that “the engagement and protection of women as agents of peace and stability will be central to United States efforts to promote security, prevent, respond to, and resolve conflict, and rebuild societies.” This policy applies to United States Government efforts in Afghanistan, where addressing the security vulnerabilities of Afghan women and girls during the period of security transition is an essential step toward long-term stability.

(C) The Chicago Summit Declaration issued by NATO in May 2012 states: “We emphasize the importance of full participation of all Afghan women in the reconstruction, political, peace and reconciliation processes in Afghanistan and the need to respect the institutional arrangements protecting their rights. We remain committed to the implementation of United Nations Security Council Resolution (UNSCR) 1325 on women, peace and security. We recognize also the need for the protection of children from the damaging effects of armed conflict as required in relevant UNSCRs.”
The Strategic Partnership Agreement signed between the United States and Afghanistan by President Obama and President Karzai in June 2012 states, “Consistent with its Constitution and international obligations, Afghanistan shall ensure and advance the essential role of women in society, so that they may fully enjoy their economic, social, political, civil and cultural rights.”

(b) PLAN TO PROMOTE SECURITY OF AFGHAN WOMEN.—

(1) IN GENERAL.—Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense, in concurrence with the Secretary of State, shall submit to the appropriate congressional committees a plan to promote the security of Afghan women during the security transition process.

(2) ELEMENTS.—The plan required under paragraph (1) shall include the following elements:

(A) A plan to monitor and respond to changes in women’s security conditions in areas undergoing transition, including the following actions:

(i) Seeking to designate a Civilian Impact Advisor on the Joint Afghan-NATO
Inteqal Board (JANIB) to assess the impact of transition on male and female civilians and ensure that efforts to protect women’s rights and security are included in each area’s transition implementation plan.

(ii) Reviewing existing indicators against which sex-disaggregated data is collected and, if necessary, developing additional indicators, to ensure the availability of data that can be used to measure women’s security, such as—

(I) the mobility of women and girls;

(II) the participation of women in local government bodies;

(III) the rate of school attendance for girls;

(IV) women’s access to government services; and

(V) the prevalence of violence against women; and incorporating those indicators into ongoing efforts to assess overall security conditions during the transition period.
(iii) Integrating assessments of women’s security into current procedures used to determine an area’s readiness to proceed through the transition process.

(iv) Working with Afghan partners, coalition partners, and relevant United States Government departments and agencies to take concrete action to support women’s rights and security in cases of deterioration in women’s security conditions during the transition period.

(B) A plan to increase gender awareness and responsiveness among Afghan National Army and Afghan National Police personnel, including the following actions:

(i) Working with Afghan and coalition partners to utilize training curricula and programming that addresses the human rights of women and girls, appropriate responses to threats against women and girls, and appropriate behavior toward female colleagues and members of the community; assessing the quality and consistency of this training across regional com-
mands; and assessing the impact of this training on trainee behavior.

(ii) Working with national and local ANA and ANP leaders to develop and utilize enforcement and accountability mechanisms for ANA and ANP personnel who violate codes of conduct related to the human rights of women and girls.

(iii) Working with Afghan and coalition partners to implement the above tools and develop uniform methods and standards for training and enforcement among coalition partners and across regions.

(C) A plan to increase the number of female members of the ANA and ANP, including the following actions:

(i) Providing, through consultation with Afghan partners, realistic and achievable objectives for the recruitment and retention of women to the ANA and ANP by the end of the security transition period in 2014.

(ii) Working with national and local ANA and ANP leaders and coalition partners to address physical and cultural chal-
Challenges to the recruitment and retention of female ANA and ANP personnel, including through targeted recruitment campaigns, expanded training and mentorship opportunities, parity in pay and promotion rates with male counterparts, and availability of facilities for female personnel.

(iii) Working with national and local ANA and ANP leaders to increase understanding about the unique ways in which women members of the security forces improve the force’s overall effectiveness.

(iv) Working with national and local ANA and ANP leaders to develop a plan for maintaining and increasing the recruitment and retention of women in the ANA and ANP following the completion of the security transition.

(3) REPORT.—The Secretary of Defense shall include in each report on progress toward security and stability in Afghanistan that is submitted to Congress under sections 1230 and 1231 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181; 122 Stat. 385, 390) a
section describing actions taken to implement the plan required under this subsection.

(c) APPROPRIATE CONGRESSIONAL COMMITTEES DEFINED.—In this section, the term “appropriate congressional committees” means—

(1) the Committee on Armed Services and the Committee on Foreign Relations of the Senate; and

(2) the Committee on Armed Services and the Committee on Foreign Affairs of the House of Representatives.

SEC. 1250. SENSE OF CONGRESS ON THE ISRAELI IRON DOME DEFENSIVE WEAPON SYSTEM.

(a) FINDINGS.—Congress makes the following findings:

(1) The citizens of Israel have suffered under a continual barrage of missiles, rockets, and mortar shells from the Hamas-controlled Gaza Strip.

(2) Hamas has been designated by the Secretary of State as a Foreign Terrorist Organization.

Subtitle C—Reports

SEC. 3131. REPORT ON ACTIONS REQUIRED FOR TRANSI-
TION OF REGULATION OF NON-NUCLEAR AC-
TIVITIES OF THE NATIONAL NUCLEAR SECU-
RITY ADMINISTRATION TO OTHER FEDERAL
AGENCIES.

Not later than February 28, 2013, the Secretary of
Energy shall, acting through the Administrator of the Na-
tional Nuclear Security Administration, submit to Con-
gress a report on the actions required to transition, to the
maximum extent practicable, the regulation of the non-
nuclear activities of the National Nuclear Security Admin-
istration to other appropriate agencies of the Federal Gov-
ernment by not later than October 1, 2017.

SEC. 3132. REPORT ON CONSOLIDATION OF FACILITIES OF
THE NATIONAL NUCLEAR SECURITY ADMIN-
ISTRATION.

(a) Report Required.—Not later than 180 days
after the date of the enactment of this Act, the Nuclear
Weapons Council shall submit to the congressional defense
committees a report setting forth the assessment of the
Council as to the feasibility of consolidating facilities and functions of the National Nuclear Security Administration in order to reduce costs.

(b) Process for Consolidation.—If the assessment of the Council in the report under subsection (a) is that excess facilities exist and the consolidation of facilities and functions of the Administration is feasible and would reduce cost, the report shall include recommendations for a process to determine the manner in which the consolidation should be accomplished, including an estimate of the time to be required to complete the process.

(c) Limitation on Availability of Certain Funds Pending Report.—Amounts authorized to be appropriated by this title and available for the facility projects in the Department of Energy Readiness and Technical Base designated 04–D–125 and 06–D–141 may not be obligated or expended for CD–3, Start of Construction (as found in Department of Energy Order 413.3 B Program and Project Management for the Acquisition of Capital Assets,) until the submittal under subsection (a) of the report required by that subsection.

SEC. 3133. REGIONAL RADIOLOGICAL SECURITY ZONES.

(a) Findings.—Congress makes the following findings:
(1) A terrorist attack using high-activity radiological materials, such as in a dirty bomb, could inflict billions of dollars of economic costs and considerable societal and economic dislocation, with effects and costs possibly lasting for years.

(2) It may be easier for terrorists to obtain the materials for, and to fabricate, a dirty bomb than an improvised nuclear device.

(3) Radiological materials are in widespread use worldwide, with estimates of the number of radiological sources ranging from 100,000 to millions.

(4) Many nations have a security and regulatory regime for their radiological sources that is much less developed than that of the United States.

(5) Radiological materials are used at many civilian sites including hospitals, industrial sites, and other locations that have little security, placing these materials at risk of theft.

(6) Many radiological materials have become lost, disused, unwanted, or abandoned, with the Global Threat Reduction Initiative of the National Nuclear Security Administration having recovered more than 30,000 radioactive sources in the United States, repatriated more than 2,400 United States-origin sources from other countries, and helped re-
cover more than 13,000 radioactive sources and radioisotope thermoelectric generators in other countries.

(7) High-activity radiological materials can be used in a dirty bomb.

(b) SENSE OF CONGRESS.—It is the sense of Congress that United States and global nonproliferation efforts should place a high priority on programs to secure high-activity radiological sources to reduce the threat of radiological terrorism.

(c) STUDY.—

(1) IN GENERAL.—Not later than 180 days after the date of the enactment of this Act, the Administrator of the National Nuclear Security Administration shall submit to the appropriate committees of Congress a study in accordance with paragraph (3).

(2) CONSULTATION.—The Administrator may, in conducting the study required under paragraph (1), consult with the Secretary of Homeland Security, the Secretary of State, the Nuclear Regulatory Commission, and such other departments and agencies of the United States Government as the Administrator considers appropriate.
(3) MATTERS INCLUDED.—The study under paragraph (1) shall include the following:

(A) An assessment of the radioactive isotopes and associated activity levels that present the greatest risk to national and international security.

(B) A review of current United States Government efforts to secure radiological materials abroad, including coordination with foreign governments, the European Union, the International Atomic Energy Agency, other international programs, and nongovernmental organizations that identify, register, secure, remove, and provide for the disposition of high-risk radiological materials worldwide.

(C) A review of current United States Government efforts to secure radiological materials domestically at civilian sites, including hospitals, industrial sites, and other locations.

(D) A definition of regional radiological security zones, including the subset of the materials of concern to be the immediate focus and the security best practices required to achieve that goal.
(E) An assessment of the feasibility, cost, desirability, and added benefit of establishing regional radiological security zones in high priority areas worldwide in order to facilitate regional collaboration in—

(i) identifying and inventorying high-activity radiological sources at high-risk sites;

(ii) reviewing national level regulations, inspections, transportation security, and security upgrade options; and

(iii) assessing opportunities for the harmonization of regulations and security practices among the nations of the region.

(F) An assessment of the feasibility, cost, desirability, and added benefit of establishing remote regional monitoring centers that would receive real-time data from radiological security sites, would be staffed by trained personnel from the countries in the region, and would alert local law enforcement in the event of a potential or actual terrorist incident or other emergency.

(G) A list and assessment of the best practices used in the United States that are most
critical in enhancing domestic radiological material security and could be used to enhance radiological security worldwide.

(II) An assessment of the United States entity or entities that would be best suited to lead efforts to establish a radiological security zone program.

(I) An estimate of the costs associated with the implementation of a radiological security zone program.

(J) An assessment of the known locations outside the United States housing high-risk radiological materials in excess of 1,000 curies.

(4) FORM.—The study required under paragraph (1) shall be submitted in unclassified form, but may include a classified annex.

(d) APPROPRIATE COMMITTEES OF CONGRESS DEFINED.—In this section, the term “appropriate committees of Congress” means—

(1) the Committee on Armed Services, the Committee on Homeland Security and Governmental Affairs, and the Committee on Foreign Relations of the Senate; and

(2) the Committee on Armed Services, the Committee on Homeland Security, and the Com-
mittee on Foreign Affairs of the House of Rep-resentatives.

SEC. 3134. REPORT ON LEGACY URANIUM MINES.

(1) IN GENERAL.—The Secretary of Energy shall undertake a review of, and prepare a report on, abandoned uranium mines at which uranium ore was mined for the weapons program of the United States (hereinafter referred to as “legacy uranium mines”).

(2) MATTERS TO BE ADDRESSED.—The report shall describe and analyze—

(A) the location of the legacy uranium mines on Federal, State, tribal, and private land, taking into account any existing inventories undertaken by Federal agencies, States, and Indian tribes, and any additional information available to the Secretary;

(B) the extent to which the legacy uranium mines—

(i) may pose a potential and significant radiation health hazard to the public;

(ii) may pose some other threat to public health and safety hazard;

(iii) have caused, or may cause, degr-adation of water quality; and
have caused, or may cause, environmental degradation;

(C) a ranking of priority by category for the remediation and reclamation of the legacy uranium mines;

(D) the potential cost and feasibility of remediating and reclaiming, in accordance with applicable Federal law, each category of legacy uranium mines; and

(E) the status of any efforts to remediate and reclaim legacy uranium mines.

(b) RECOMMENDATIONS.—The report shall—

(1) make recommendations as to how to ensure most feasibly and effectively and expeditiously that the public health and safety, water resources, and the environment will be protected from the adverse effects of legacy uranium mines; and

(2) make recommendations on changes, if any, to Federal law to address the remediation and reclamation of legacy uranium mines.

(c) CONSULTATION.—In preparing the report, the Secretary of Energy shall consult with any other relevant Federal agencies, affected States and Indian tribes, and interested members of the public.
(d) Report to Congress.—Not later than 18 months after the date of enactment of this Act, the Secretary of Energy shall submit to the Committee on Armed Services and the Committee on Energy and Natural Resources of the Senate and the appropriate Committees of the House of Representatives—

(1) the report; and

(2) the plan and timeframe of the Secretary of Energy for implementing those recommendations of the report that do not require legislation.

Section 3134 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84; 123 Stat. 2713) is amended—

(1) in subsection (c)—

(A) in paragraph (1), by striking “The Comptroller General shall conduct a review during the period described in paragraph (2), of the following:” and inserting “Beginning on the date of the submittal of the report required
under subsection (b)(2), the Comptroller General shall conduct a review of the following;”;

(B) by striking paragraph (2);

(C) by redesignating paragraph (3) as paragraph (2); and

Subtitle D—Other Matters

SEC. 3141. SENSE OF CONGRESS ON OVERSIGHT OF THE NUCLEAR SECURITY ENTERPRISE.

(a) Findings.—Congress makes the following findings:

(1) In 2000, the National Nuclear Security Administration was established as an independent entity within the Department of Energy to manage and secure the nuclear weapons stockpile of the United States and to manage nuclear nonproliferation and naval reactor programs.

(2) Serious security and health incidents continue to occur at sites of the National Nuclear Security Administration.

(3) In September 2012, an official of the Government Accountability Office testified to Congress that lax laboratory attitudes toward safety procedures, laboratory inadequacies in identifying and addressing safety problems with appropriate corrective actions, and inadequate oversight by site offices of the National Nuclear Security Administration were responsible for nearly 100 safety incidents since 2000.
(4) On July 28, 2012, three unarmed individuals compromised security at the Y–12 National Security Complex in Oak Ridge, Tennessee, and according to the Government Accountability Office, “gained access to the protected security area directly adjacent to one of the nation’s most critically important nuclear weapons-related facilities”.

(5) In June 2006, hackers attacked an unclassified computer system at the National Nuclear Security Administration’s Service Center in Albuquerque, New Mexico, and gained access to a file containing the names and social security numbers of more than 1,500 employees of the National Nuclear Security Administration.

(6) As early as February 2005, the Inspector General of the Department of Energy identified problems with the retrieval of badges from terminated employees at Los Alamos National Laboratory and other sites of the National Nuclear Security Administration.

(7) In 2004, a pattern of safety and security incidents that occurred over the course of a year prompted the stand-down of Los Alamos National Laboratory.
(8) The National Nuclear Security Administra-
tion, independent of the safety and security reform
efforts of the Department of Energy, has launched
an overhaul of its contracting oversight, placing an
emphasis on contractor self-policing through an un-
tested “contractor assurance” approach.

(9) The Government Accountability Office has
given the contractor administration and project
management capabilities of the National Nuclear Se-
curity Administration a “high risk” designation and
found there to be insufficient qualified Federal ac-
quision professionals to “plan, direct, and oversee
project execution”.

(b) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) there is a need for strong, independent over-
sight of the United States nuclear security enter-
prise;

(2) any attempt to reform oversight of the nu-
clear security enterprise that transfers oversight
from the Department of Energy to the National Nu-
clear Security Administration, reduces protections
for worker health and safety at facilities of the Na-
tional Nuclear Security Administration to levels
below the standards of the Department of Energy,
or transfers construction appropriations for the nuclear security enterprise from the Department of Energy appropriation account to the military construction appropriation account, should be carefully evaluated;

(3) the Office of Health, Safety, and Security of the Department of Energy, which reports to the Secretary of Energy but is also accountable for routinely reporting to Congress on the performance with respect to safety and security of the Department, including the National Nuclear Security Administration, and the role of that Office in overseeing safety and security at the National Nuclear Security Administration, should not be diminished but should be routinely evaluated;

(4) any future modifications to the management or structure of the nuclear security enterprise should be done in a way that maintains or increases oversight of critical construction, security, and acquisition capabilities;

(5) to the extent possible, oversight of programs of the National Nuclear Security Administration by the Department of Defense should increase to ensure current and future warfighting requirements are met; and
(6) the Nuclear Weapons Council should provide proper oversight in the execution of its responsibilities under section 179 of title 10, United States Code.

   (A) to evaluate and support projects for the production in the United States, without the use of highly enriched uranium, of significant quantities of molybdenum-99 for medical uses;

   (B) to be carried out in cooperation with non-Federal entities; and

   (C) the costs of which shall be shared in accordance with section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352).

(2) CRITERIA.—Projects shall be judged against the following primary criteria:

   (A) The length of time necessary for the proposed project to begin production of molybdenum-99 for medical uses within the United States.

   (B) The capability of the proposed project to produce a significant percentage of United States demand for molybdenum-99 for medical uses.

   (C) The cost of the proposed project.

(3) EXEMPTION.—An existing reactor in the United States fueled with highly enriched uranium
shall not be disqualified from the program if the Secretary determines that—

(A) there is no alternative nuclear reactor fuel, enriched in the isotope U–235 to less than 20 percent, that can be used in that reactor;

(B) the reactor operator has provided assurances that, whenever an alternative nuclear reactor fuel, enriched in the isotope U–235 to less than 20 percent, can be used in that reactor, it will use that alternative in lieu of highly enriched uranium; and

(C) the reactor operator has provided a current report on the status of its efforts to convert the reactor to an alternative nuclear reactor fuel enriched in the isotope U–235 to less than 20 percent, and an anticipated schedule for completion of conversion.

(4) Public participation and review.—The Secretary shall—

(A) develop a program plan and annually update the program plan through public workshops; and

(B) use the Nuclear Science Advisory Committee to conduct annual reviews of the progress made in achieving the program goals.

(2) Title.—The lease contracts shall provide for the producers of the molybdenum-99 to take title to and be responsible for the molybdenum-99 created by the irradiation, processing, or purification of uranium leased under this section.

(3) Duties.—

(A) Secretary.—The lease contracts shall require the Secretary—

(i) to retain responsibility for the final disposition of spent nuclear fuel created by the irradiation, processing, or purification of uranium leased under this section for the production of medical isotopes; and
(ii) to take title to and be responsible for the final disposition of radioactive waste created by the irradiation, processing, or purification of uranium leased under this section for which the Secretary determines the producer does not have access to a disposal path.

(B) PRODUCER.—The producer of the spent nuclear fuel and radioactive waste shall accurately characterize, appropriately package, and transport the spent nuclear fuel and radioactive waste prior to acceptance by the Department.

(4) COMPENSATION.—

(A) IN GENERAL.—Subject to subparagraph (B), the lease contracts shall provide for compensation in cash amounts equivalent to prevailing market rates for the sale of comparable uranium products and for compensation in cash amounts equivalent to the net present value of the cost to the Federal Government for—

(i) the final disposition of spent nuclear fuel and radioactive waste for which
the Department is responsible under paragraph (3); and

(ii) other costs associated with carrying out the uranium lease and take-back program authorized by this subsection.

(5) Authorized use of funds.—The Secretary may obligate and expend funds received under leases entered into under this subsection, which shall remain available until expended, for the purpose of carrying out the activities authorized by this subtitle, including activities related to the final disposition of spent nuclear fuel and radioactive waste for which the Department is responsible under paragraph (3).

(6) Exchange of uranium for services.—The Secretary shall not barter or otherwise sell or transfer uranium in any form in exchange for—

(A) services related to the final disposition of the spent nuclear fuel and radioactive waste
for which the Department is responsible under paragraph (3); or

(B) any other services associated with carrying out the uranium lease and take-back program authorized by this subsection.

(d) COORDINATION OF ENVIRONMENTAL REVIEWS.—The Department and the Nuclear Regulatory Commission shall ensure to the maximum extent practicable that environmental reviews for the production of the medical isotopes shall complement and not duplicate each review.

(e) OPERATIONAL DATE.—The Secretary shall establish a program as described in subsection (c)(3) not later than 3 years after the date of enactment of this Act.

(f) RADIOACTIVE WASTE.—Notwithstanding section 2 of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10101), radioactive material resulting from the production of medical isotopes that has been permanently removed from a reactor or subcritical assembly and for which there is no further use shall be considered low-level radioactive waste if the material is acceptable under Federal requirements for disposal as low-level radioactive waste.
SEC. 3154. EXPORTS.

Section 134 of the Atomic Energy Act of 1954 (42 U.S.C. 2160d) is amended by striking subsection c. and inserting the following:

"c. Effective 7 years after the date of enactment of the American Medical Isotopes Production Act of 2012, the Commission may not issue a license for the export of highly enriched uranium from the United States for the purposes of medical isotope production.

"d. The period referred to in subsection b. may be extended for no more than 6 years if, no earlier than 6 years after the date of enactment of the American Medical Isotopes Production Act of 2012, the Secretary of Energy certifies to the Committee on Energy and Commerce of the House of Representatives and the Committee on Energy and Natural Resources of the Senate that—

"(1) there is insufficient global supply of molybdenum-99 produced without the use of highly enriched uranium available to satisfy the domestic United States market; and

"(2) the export of United States-origin highly enriched uranium for the purposes of medical isotope production is the most effective temporary means to increase the supply of molybdenum-99 to the domestic United States market."
“c. To ensure public review and comment, the development of the certification described in subsection e. shall be carried out through announcement in the Federal Register.

“f. At any time after the restriction of export licenses provided for in subsection b. becomes effective, if there is a critical shortage in the supply of molybdenum-99 available to satisfy the domestic United States medical isotope needs, the restriction of export licenses may be suspended for a period of no more than 12 months, if—

“(1) the Secretary of Energy certifies to the Congress that the export of United States-origin highly enriched uranium for the purposes of medical isotope production is the only effective temporary means to increase the supply of molybdenum-99 necessary to meet United States medical isotope needs during that period; and

“(2) the Congress enacts a Joint Resolution approving the temporary suspension of the restriction of export licenses.

“g. As used in this section—

“(1) the term ‘alternative nuclear reactor fuel or target’ means a nuclear reactor fuel or target which is enriched to less than 20 percent in the isotope U–235;
“(2) the term ‘highly enriched uranium’ means uranium enriched to 20 percent or more in the isotope U–235;

pose stated in their export license;
(4) whether they have been used for an alter-
native purpose and, if so, whether such alternative
purpose has been explicitly approved by the Commis-

sion;
(5) the year of export, and reimportation, if ap-

plicable;

DIVISION F—STOLEN VALOR ACT

TITLE LI—STOLEN VALOR ACT

SEC. 5011. SHORT TITLE.

This division may be cited as the “Stolen Valor Act of 2012”.

SEC. 5012. FINDINGS.

Congress find the following:

(1) Because of the great respect in which military service and military awards are rightfully held by the public, false claims of receiving such medals or serving in the military are especially likely to be harmful and material to employers, voters in deciding to whom paid elective positions should be entrusted, and in the award of contracts.

(2) Military service and military awards are held in such great respect that public and private decisions are correctly influenced by claims of heroism.

(3) False claims of military service or military heroism are an especially noxious means of obtaining something of value because they are particularly likely to cause tangible harm to victims of fraud.
(4) False claims of military service or the receipt of military awards, if believed, are especially likely to dispose people favorably toward the speaker.

(5) False claims of military service or the receipt of military awards are particularly likely to be material and cause people to part with money or property. Even if such claims are unsuccessful in bringing about this result, they still constitute attempted fraud.

(6) False claims of military service or the receipt of military awards that are made to secure appointment to the board of an organization are likely to cause harm to such organization through their obtaining the services of an individual who does not bring to that organization what he or she claims, and whose falsehood, if discovered, would cause the organization’s donors concern that the organization’s board might not manage money honestly.

(7) The easily verifiable nature of false claims regarding military service or the receipt of military awards, the relative infrequency of such claims, and the fact that false claims of having served in the military or received such awards are rightfully condemned across the political spectrum, it is especially
likely that any law prohibiting such false claims
would not be enforced selectively.

(8) Congress may make criminal the false claim
of military service or the receipt of military awards
based on its powers under article I, section 8, clause
2 of the Constitution of the United States, to raise
and support armies, and article I, section 8, clause
18 of the Constitution of the United States, to enact
necessary and proper measures to carry into execu-
tion that power.

SEC. 5013. MILITARY MEDALS OR DECORATIONS.

amended to read as follows:

"§ 704. Military medals or decorations

attempts to purchase, solicits for purchase, mails, ships,

trades, barter, or exchanges for anything of value any
decoration or medal authorized by Congress for the Armed
Forces of the United States, or any of the service medals
or badges awarded to the members of such forces, or the
ribbon, button, or rosette of any such badge, decoration,
or medal, or any colorable imitation thereof, except when
authorized under regulations made pursuant to law, shall
be fined under this title, imprisoned for not more than 6 months, or both.

“(b) False Claims to the Receipt of Military Decorations, Medals, or Ribbons and False Claims Relating to Military Service in Order to Secure a Tangible Benefit or Personal Gain.—

“(1) In general.—Whoever, with the intent of securing a tangible benefit or personal gain, knowingly, falsely, and materially represents himself or herself through any written or oral communication (including a resume) to have served in the Armed Forces of the United States or to have been awarded any decoration, medal, ribbon, or other device authorized by Congress or pursuant to Federal law for the Armed Forces of the United States, shall be fined under this title, imprisoned for not more than 6 months, or both.

“(2) Tangible benefit or personal gain.—
For purposes of this subsection, the term ‘tangible benefit or personal gain’ includes—

“(A) a benefit relating to military service provided by the Federal Government or a State or local government;

“(B) public or private employment;

“(C) financial remuneration;
“(D) an effect on the outcome of a criminal or civil court proceeding;
“(E) election of the speaker to paying office; and
“(F) appointment to a board or leadership position of a non-profit organization.
“(c) DEFINITION.—In this section, the term ‘Armed Forces of the United States’ means the Army, Navy, Air Force, Marine Corps, and Coast Guard, including the reserve components named in section 10101 of title 10.’’.

SEC. 5014. SEVERABILITY.
If any provision of this division, any amendment made by this division, or the application of such provision or amendment to any person or circumstance is held to be unconstitutional, the remainder of the provisions of this division, the amendments made by this division, and the application of such provisions or amendments to any person or circumstance shall not be affected.

Subtitle C—Sense of Congress Regarding Spectrum

SEC. 5317. SENSE OF CONGRESS REGARDING SPECTRUM.

It is the sense of Congress that—
(1) the Nation’s mobile communications industry is a significant economic engine, by one estimate directly or indirectly supporting 3,800,000 jobs, or 2.6 percent of all United States employment, contributing $195,500,000,000 to the United States gross domestic product and driving $33,000,000,000 in productivity improvements in 2011;

(2) while wireless carriers are continually implementing new and more efficient technologies and techniques to maximize their existing spectrum capacity, there is a pressing need for additional spectrum for mobile broadband services, with one report predicting that global mobile data traffic will increase 18-fold between 2011 and 2016 at a compound annual growth rate of 78 percent, reaching 10.8 exabytes per month by 2016;

(3) as the Nation faces the growing demand for spectrum, consideration should be given to both the supply of spectrum for licensed networks and for unlicensed devices;

(4) while this additional demand can be met in part by reallocating spectrum from existing non-governmental uses, the long-term solution must include reallocation and sharing of Federal Government spectrum for private sector use;
recognizing the important uses of spectrum by the Federal Government, including for national and homeland security, law enforcement and other critical federal uses, existing law ensures that Federal operations are not harmed as a result of a reallocation of spectrum for commercial use, including through the establishment of the Spectrum Relocation Fund to reimburse Federal users for the costs of planning and implementing relocation and sharing arrangements and, with respect to spectrum vacated by the Department of Defense, certification under section 1062 of P.L. 106–65 by the Secretaries of Defense and Commerce and the Chairman of the Joint Chiefs of Staff that replacement spectrum provides comparable technical characteristics to restore essential military capability; and

given the need to determine equitable outcomes for the Nation in relation to spectrum use that balance the private sector’s demand for spectrum with national security and other critical federal missions, all interested parties should be encouraged to continue the collaborative efforts between industry and government stakeholders that have been launched by the National Telecommunications and Information Administration to assess and rec-
ommend practical frameworks for the development of relocation, transition, and sharing arrangement and plans for 110 megahertz of federal spectrum in the 1695–1710 MHz and the 1755–1850 MHz bands.

Passed the Senate December 4, 2012.
