A BILL

To ensure that the education and training provided members of the Armed Forces and veterans better assists members and veterans in obtaining civilian certifications and licenses, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This Act may be cited as the “Troop Talent Act of
3 2013”.

4 **SEC. 2. FINDINGS.**

5 Congress makes the following findings:

6 (1) According to the Bureau of Labor Statis-
7 tics, the unemployment rate for recent veterans of
8 military operations in Iraq and Afghanistan was 9.4
9 percent in February 2013, compared with 7.6 per-
10 cent in February 2012.

11 (2) With the unemployment rate among such
12 veterans higher than the national average and the
13 number of veterans receiving unemployment benefits
14 doubling since 2002, there is a significant need to
15 assist members of the Armed Forces as they transi-
16 tion to the civilian workforce.

17 (3) In order to remain competitive in the civil-
18 ian employment market, members of the Armed
19 Forces and veterans require information about how
20 their military skill sets translate to the requirements
21 of the civilian workforce. Members of the Armed
22 Forces currently receive insufficient or inadequate
23 information during their training for military occu-
24 pational specialties on translating skills obtained
25 during such training to civilian occupations and cre-
26 dentials.

1 (4) In addition, there is a need for enhanced ac-
2 cess by accredited credentialing agencies to military
3 training curricula in order to facilitate and enhance
4 the correlation between military training and appli-
5 cable civilian credentialing courses and exams.

6 (5) The information technology sector is one of
7 the fastest growing industries, with tremendous job
8 growth and demand for talented, qualified individ-
9 uals. The information technology sector has an un-
10 employment rate of 3.5 percent according to a Bu-
11 reau of Labor Statistics report from February 2013.

12 (6) The Bureau of Labor Statistics projects a
13 need for 110,000 computer support specialists over
14 the next decade. Currently, the size of the informa-
15 tion technology workforce in the Armed Forces is
16 about 160,000 members.
