

113TH CONGRESS
1ST SESSION

H. R. 1843

To modernize laws, and eliminate discrimination, with respect to people living with HIV/AIDS, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

MAY 7, 2013

Ms. LEE of California (for herself and Ms. ROS-LEHTINEN) introduced the following bill; which was referred to the Committee on the Judiciary, and in addition to the Committees on Energy and Commerce and Armed Services, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To modernize laws, and eliminate discrimination, with respect to people living with HIV/AIDS, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Repeal Existing Poli-
5 cies that Encourage and Allow Legal HIV Discrimination
6 Act of 2013” or the “REPEAL HIV Discrimination Act
7 of 2013”.

1 **SEC. 2. FINDINGS.**

2 The Congress makes the following findings:

3 (1) At present, 32 States and 2 United States
4 territories have criminal statutes based on perceived
5 exposure to HIV, rather than actual transmission of
6 HIV to another. Thirteen States have HIV-specific
7 laws that make spitting or biting a felony, even
8 though it is not possible to transmit HIV via saliva.

9 (2) According to the Centers for Disease Con-
10 trol and Prevention (CDC), HIV is only transmitted
11 through blood, semen, vaginal fluid, and breast milk.

12 (3) Prosecutions for perceived exposure, non-
13 disclosure, or unintentional transmission of HIV
14 have occurred in at least 39 States under general or
15 HIV-specific laws.

16 (4) Even in the absence of HIV transmission,
17 people living with HIV have been given sentences of
18 up to 35 years based on exaggerated fears of HIV,
19 regardless of actual risk of transmission.

20 (5) State and Federal criminal law does not
21 currently reflect the three decades of medical ad-
22 vances and discoveries made with regard to trans-
23 mission and treatment of HIV.

24 (6) According to CDC, correct and consistent
25 male or female condom use is very effective in pre-
26 venting HIV transmission. However, most State

1 HIV-specific laws and prosecutions do not treat the
2 use of a condom during sexual intercourse as a miti-
3 gating factor or evidence that the defendant did not
4 intend to transmit HIV.

5 (7) Criminal laws and prosecutions do not take
6 into account the benefits of effective antiretroviral
7 medications, which reduce the HIV virus to
8 undetectable levels and further reduce the already
9 low risk of transmitting the HIV to near-zero.

10 (8) Although HIV/AIDS currently is viewed as
11 a treatable, chronic, medical condition, people living
12 with HIV have been charged under aggravated as-
13 sault, attempted murder, and even bioterrorism stat-
14 utes because prosecutors, courts, and legislators con-
15 tinue to view and characterize the blood, semen, and
16 saliva of people living with HIV as a “deadly weap-
17 on”.

18 (9) Multiple peer-reviewed studies demonstrate
19 that HIV-specific laws do not reduce risk-taking be-
20 havior or increase disclosure by people living with or
21 at risk of HIV, and there is increasing evidence that
22 these laws reduce the willingness to get tested. Fur-
23 thermore, placing legal responsibility for preventing
24 the transmission of HIV and other pathogens exclu-
25 sively on people diagnosed with HIV, and without

1 consideration of other pathogens that can be sexu-
2 ally transmitted, undermines the public health mes-
3 sage that all people should practice behaviors that
4 protect themselves and their partners from HIV and
5 other sexually transmitted diseases.

6 (10) The identity of an individual accused of
7 violating existing HIV-specific restrictions is broad-
8 cast through media reports, potentially destroying
9 employment opportunities and relationships and vio-
10 lating the person's right to privacy.

11 (11) Individuals who are convicted for HIV ex-
12 posure, nondisclosure, or transmission often must
13 register as sex offenders even in cases of consensual
14 sexual activity. Their employability is destroyed and
15 their family relationships are fractured.

16 (12) The United Nations, including the Joint
17 United Nations Programme on HIV/AIDS
18 (UNAIDS), urges governments to "limit criminaliza-
19 tion to cases of intentional transmission. Such re-
20 quirement indicates a situation where a person
21 knows his or her HIV-positive status, acts with the
22 intention to transmit HIV, and does in fact transmit
23 it". UNAIDS also recommends that criminal law
24 should not be applied to cases where there is no sig-
25 nificant risk of transmission.

1 (13) The Global Commission on HIV and the
2 Law was launched in June 2010 to examine laws
3 and practices that criminalize people living with and
4 vulnerable to HIV and to develop evidence-based rec-
5 ommendations for effective HIV responses. The
6 Commission calls for “governments, civil society and
7 international bodies to repeal punitive laws and
8 enact laws that facilitate and enable effective re-
9 sponses to HIV prevention, care and treatment serv-
10 ices for all who need them”. The Commission rec-
11 ommends against the enactment of “laws that ex-
12 plicitly criminalise HIV transmission, exposure or
13 non-disclosure of HIV status, which are counter-
14 productive”.

15 (14) In 2010, the President released a National
16 HIV/AIDS Strategy (NHAS), which addressed HIV-
17 specific criminal laws, stating: “[W]hile we under-
18 stand the intent behind [these] laws, they may not
19 have the desired effect and they may make people
20 less willing to disclose their status by making people
21 feel at even greater risk of discrimination. In some
22 cases, it may be appropriate for legislators to recon-
23 sider whether existing laws continue to further the
24 public interest and public health. In many instances,
25 the continued existence and enforcement of these

1 types of laws run counter to scientific evidence about
 2 routes of HIV transmission and may undermine the
 3 public health goals of promoting HIV screening and
 4 treatment.”. The NHAS also states that State legis-
 5 latures should consider reviewing HIV-specific crimi-
 6 nal statutes to ensure that they are consistent with
 7 current knowledge of HIV transmission and support
 8 public health approaches to preventing and treating
 9 HIV.

10 (15) In February 2013, the President’s Advi-
 11 sory Council on AIDS (PACHA) passed a resolution
 12 stating “all U.S. law should be consistent with cur-
 13 rent medical and scientific knowledge and accepted
 14 human rights-based approaches to disease control
 15 and prevention and avoid imposition of unwarranted
 16 punishment based on health and disability status”.

17 **SEC. 3. SENSE OF CONGRESS REGARDING LAWS OR REGU-**
 18 **LATIONS DIRECTED AT PEOPLE LIVING WITH**
 19 **HIV/AIDS.**

20 It is the sense of Congress that Federal and State
 21 laws, policies, and regulations regarding people living with
 22 HIV/AIDS—

23 (1) should not place unique or additional bur-
 24 dens on such individuals solely as a result of their
 25 HIV status; and

(2) should instead demonstrate a public health-oriented, evidence-based, medically accurate, and contemporary understanding of—

(A) the multiple factors that lead to HIV transmission;

(B) the relative risk of demonstrated HIV transmission routes;

(C) the current health implications of living with HIV;

(D) the associated benefits of treatment and support services for people living with HIV; and

(E) the impact of punitive HIV-specific laws, policies, regulations, and judicial precedents and decisions on public health, on people living with or affected by HIV, and on their families and communities.
