S. 2504

To address prescription opioid and heroin abuse.

IN THE SENATE OF THE UNITED STATES

JUNE 19, 2014

Ms. AYOTTE (for herself and Mr. DONNELLY) introduced the following bill;
which was read twice and referred to the Committee on Health, Edu-
cation, Labor, and Pensions

A BILL

To address prescription opioid and heroin abuse.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Heroin and Prescrip-
5 tion Opioid Abuse Prevention, Education, and Enforce-
6 ment Act of 2014”.

7 **SEC. 2. FINDINGS.**

8 (1) The Controlled Substances Act (21 U.S.C.
9 801 et seq.) declares that many controlled sub-
10 stances have a useful and legitimate medical purpose

1 and are necessary to maintain the health and gen-
2 eral welfare of the people of the United States.

3 (2) Health care professionals, medical experts,
4 researchers, and scientists have found pain to be a
5 major national health problem.

6 (3) The responsible treatment of pain is a high
7 priority for our Nation and the needs of individuals
8 with pain must be taken into careful consideration
9 when taking steps to prevent prescription drug mis-
10 use and abuse.

11 (4) When no longer needed or wanted for legiti-
12 mate pain management or health treatment, pre-
13 scription opioids are susceptible to diversion. Pre-
14 scription opioids also may be abused by individuals
15 who were not prescribed such drugs or misused by
16 individuals not taking such drugs as directed.

17 (5) Approximately 4 out of 5 new heroin users
18 report that they became addicted to prescription
19 opioids before they used heroin for the first time.

20 (6) According to the National Institute on Drug
21 Abuse, heroin attaches to the same brain cell recep-
22 tors as prescription opioids.

23 (7) The low cost and high purity of currently
24 available heroin has contributed to an increase in
25 heroin use.

1 (8) More people are using heroin, and are using
2 heroin at a younger age. The National Survey on
3 Drug Use and Health reports that new heroin users
4 numbered 142,000 in 2010, and increased to
5 178,000 in 2011. In 2011, the average age at first
6 use among heroin abusers between 12 and 49 years
7 was 22.1 years. In 2009, the average age at first use
8 among heroin abusers between 12 and 49 years was
9 25.5 years.

10 (9) According to the Department of Health and
11 Human Services, heroin use rose 79 percent nation-
12 wide between 2007 and 2012.

13 (10) Deaths from heroin overdose have signifi-
14 cantly increased in communities across the United
15 States. According to the Centers for Disease Control
16 and Prevention, the number of deaths involving her-
17 oin increased by 110 percent from 2006 to 2011.
18 From 2010 to 2011, the number of heroin deaths
19 rose from 3,036 to 4,397.

20 (11) The Edward Byrne Memorial Justice As-
21 sistance Grant Program is critical to fighting the
22 prescription opioid abuse and heroin use epidemics,
23 and should be reauthorized and fully funded.
