SEC. 326. OFFSHORE WIND ENERGY DEVELOPMENT, MORRO
BAY, CALIFORNIA.

(a) FINDINGS.—Congress makes the following findings:

(1) Since 2016, the Department of Defense and
Department of the Navy have been working with
State and Federal stakeholders to determine whether
a commercial lease for the development of renewable
energy off the coast of Morro Bay, California could be
developed in a manner that is compatible with the
training and readiness requirements of the Depart-
ment of Defense.
(2) Military readiness and the ability to conduct realistic training are critical to our national security; however, energy security and other ocean uses are also important. These interests should be balanced to the extent practicable when analyzing offshore energy proposals.

(3) In August 2019, Members of Congress, the Assistant Secretary of Defense for Sustainment, senior officials from other Federal agencies, and state and local elected representatives met to discuss a path forward to accommodate wind energy development off the Central Coast of California while ensuring the Department of Defense was able to continue meeting its testing, training, and operational requirements.

(4) Following the initial meeting in August 2019, the stakeholder group continued meeting at roughly monthly intervals through 2019 and into 2020 to discuss options and work towards a mutually agreeable solution for renewable energy development and continued military testing, training, and operational requirements off the Central Coast of California.

(5) In May 2020, the Assistant Secretary of the Navy for Energy, Installations, and Environment notified stakeholders that despite the previous year of
negotiations, it was his view any wind energy developments off the Central Coast of California may not be viewed as being compatible with military activities. This unilateral decision was made abruptly, without providing any supporting analysis or acknowledgment of the progress and commitments made during previous negotiations, and was not in the spirit of cooperation and collaboration that had driven the previous nine months of stakeholder engagements.

(6) Stakeholder confidence in the Department of Defense review process is paramount. Abrupt and unilateral changes of course erode confidence and undermine the State, local, and industry trust in a fair, transparent, and predictable adjudication of potential conflicts.

(7) In early 2019, in order to create continuity between the offshore and terrestrial processes, the Department of Defense consolidated its review of proposed energy development projects so that offshore energy proposals were now included in the Military Aviation and Installation Assurance Clearinghouse (the Clearinghouse). The Clearinghouse has a proven record for reviewing proposed energy development projects through a fair and transparent process. The
Morro Bay proposal pre-dates this consolidation but underwent a similar Department of Defense led compatibility review.

(8) Congress has generally supported the transparent and fair Clearinghouse review process, as well as all efforts between the Department of Defense and other stakeholders to reach solutions that allow for the development of energy projects in a manner that is compatible with military testing, training, and operational requirements.

(9) Legislating a solution to a specific energy development proposal should only be reserved for rare occasions. Due to Navy’s abrupt and unilateral decision to walk away from productive negotiations, after months of good-faith efforts by other stakeholders and public engagement, the threshold for congressional intervention has been reached.

(b) RESPONSIBILITY.—All interaction on behalf of the Department of the Navy with the California Energy Commission, Federal agencies, State and local governments, and potential energy developers regarding proposed offshore wind energy off the central coast of California shall be performed through the Office of the Under Secretary of Defense for Acquisition and Sustainment.

(c) BRIEFING REQUIREMENT; LIMITATION.—
(1) Briefing.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall provide to the Committees on Armed Services and the Committee on Natural Resources of the House of Representatives a briefing on status of the review by the Offshore Energy Working Group of the request to locate at least two offshore wind lease areas proximate to and within the Morro Bay Call Area. Such briefing shall include—

(A) a detailed map that shows any areas identified;

(B) proposed mitigations that would enable compatible development in the areas identified;

(C) any unresolved issues; and

(D) any other terms of the agreement reached with the California Energy Commission, other Federal agencies, State and local governments, and potential energy developers.

(2) Limitation.—The Secretary of Defense may not issue a final offshore wind assessment that proposes wind exclusion areas and may not object to an offshore energy project in the Central Coast of California that has filed for review by the Military Aviation and Installation Assurance Clearinghouse until
the Secretary provides the briefing required under paragraph (1).

(d) LIMITATION ON USE OF FUNDS.—Of the amounts authorized to be appropriated by this Act or otherwise made available for the Department of Defense for fiscal year 2021, not more than 75 percent may be obligated or expended for the Office of the Assistant Secretary of the Navy for Energy, Installations, and Environment until the date that is 30 days after the date on which the briefing required under subsection (c)(1) is provided.

SEC. 828. SENSE OF CONGRESS ON THE PROHIBITION ON CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE SERVICES OR EQUIPMENT.

(a) FINDINGS.—Congress finds the following:

(1) Prohibiting the use of telecommunications and video surveillance products or services from certain Chinese entities within the Federal Government’s supply chain is essential to our national security.

(2) Section 889 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115–232; 132 Stat. 1917; 41 U.S.C. note prec. 3901) restricts Federal agencies from procuring, contracting with entities that use, or funding the purchase of certain telecommunications products of Chi-
inese companies determined by Congress to pose a substantial threat to the security of our communication infrastructure.

(3) Specifically, section 889(a)(1)(B) of such Act, effective August 13, 2020, will prohibit Federal agencies from entering into, extending, or renewing a contract with an entity that uses covered telecommunications and video surveillance equipment or services from designated Chinese companies, including Huawei and ZTE, in their supply chains.

(4) As of July 1, 2020, the Federal Acquisition Regulatory Council has yet to release a draft rule for public comment on the implementation of the prohibitions described in section 889(a)(1)(B) of such Act, leaving Federal agencies and contractors that provide equipment and services to the Federal Government without implementation guidance necessary to adequately plan for or comply with the prohibitions.

(5) Belated, and then hurried, implementation of this critical prohibition puts at risk the Federal Government’s ability to acquire essential goods and services and increases vulnerability in the supply chain through inconsistent implementation.

(6) A senior Department of Defense leader testified on June 10, 2020, that, “I am very concerned
about being able to implement [the prohibition] in August, as well as totally comply within two years . . . I believe we need more time”.

(7) Subsequent to the enactment of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115–232), Congress established the Federal Acquisition Security Council (FASC)—comprised of senior officials from the Office of Management and Budget, General Services Administration, Department of Defense, Department of Homeland Security and the intelligence community—to streamline the Federal Government’s supply chain risk management efforts and develop criteria and processes for supply chain information sharing among executive agencies.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) successful implementation of the prohibition on using or procuring certain telecommunications and video surveillance equipment under section 889 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115–232; 132 Stat. 1917; 41 U.S.C. note prec. 3901) is critical to protecting the supply chain of the Federal Government, and Federal agencies should draw upon the ex-
pert resources available (such as the Federal Acquisition Security Council established under subchapter III of chapter 13 of title 41, United States Code) to ensure implementation of such prohibition is done in a comprehensive and deliberative manner; and

(2) the Federal Acquisition Regulatory Council shall ensure successful implementation of such prohibition by providing sufficient time for public comment and review of any related rulemaking.

SEC. 1242. SENSE OF CONGRESS ON SUPPORT FOR COORDINATED ACTION TO ENSURE THE SECURITY OF BALTIC ALLIES.

It is the sense of Congress that—
(1) the continued security of the Baltic states of Estonia, Latvia, and Lithuania is critical to achieving United States national security interests and defense objectives against the acute and formidable threat posed by Russia;

(2) the United States and the Baltic states are leaders in the mission of defending independence and democracy from aggression and in promoting stability and security within the North Atlantic Treaty Organization (NATO), with non-NATO partners, and with other international organizations such as the European Union;

(3) the Baltic states are model NATO allies in terms of burden sharing and capital investment in materiel critical to United States and allied security, investment of over 2 percent of their gross domestic product on defense expenditure, allocating over 20 percent of their defense budgets on capital modernization, matching security assistance from the United States, frequently deploying their forces around the world in support of allied and United States objectives, and sharing diplomatic, technical, military, and analytical expertise on defense and security matters;
(4) the United States should continue to strengthen bilateral and multilateral defense by, with, and through allied nations, particularly those which possess expertise and dexterity but do not enjoy the benefits of national economies of scale;

(5) the United States should pursue consistent efforts focused on defense and security assistance, coordination, and planning designed to ensure the continued security of the Baltic states and on deterring current and future challenges to the national sovereignty of United States allies and partners in the Baltic region; and

(6) such an initiative should include an innovative and comprehensive conflict deterrence strategy for the Baltic region encompassing the unique geography of the Baltic states, modern and diffuse threats to their land, sea, and air spaces, and necessary improvements to their defense posture, including command-and-control infrastructure, intelligence, surveillance, and reconnaissance capabilities, communications equipment and networks, and special forces.

SEC. 1243. SENSE OF CONGRESS ON SUPPORT FOR ESTONIA, LATVIA, AND LITHUANIA.

(a) FINDINGS.—Congress finds the following:
(1) The Baltic countries of Estonia, Latvia, and Lithuania are highly valued allies of the United States, and they have repeatedly demonstrated their commitment to advancing our mutual interests as well as those of the NATO Alliance.

(2) Operation Atlantic Resolve is a series of exercises and coordinating efforts demonstrating the United States’ commitment to its European partners and allies, including the Baltic countries of Estonia, Latvia, and Lithuania, with the shared goal of peace and stability in the region. Operation Atlantic Resolve strengthens communication and understanding, and is an important effort to deter Russian aggression in the region.

(3) Through Operation Atlantic Resolve, the European Deterrence Initiative undertakes exercises, training, and rotational presence necessary to reassure and integrate our allies, including the Baltic countries, into a common defense framework.

(4) All three Baltic countries contributed to the NATO-led International Security Assistance Force in Afghanistan, sending troops and operating with few caveats. The Baltic countries continue to commit resources and troops to the Resolute Support Mission in Afghanistan.
(b) Sense of Congress.—Congress—

(1) reaffirms its support for the principle of collective defense in Article 5 of the North Atlantic Treaty for our NATO allies, including Estonia, Latvia, and Lithuania;

(2) supports the sovereignty, independence, territorial integrity, and inviolability of Estonia, Latvia, and Lithuania as well as their internationally recognized borders, and expresses concerns over increasingly aggressive military maneuvering by the Russian Federation near their borders and airspace;

(3) expresses concern over and condemns subversive and destabilizing activities by the Russian Federation within the Baltic countries; and

(4) encourages the Administration to further enhance defense cooperation efforts with Estonia, Latvia, and Lithuania and supports the efforts of their Governments to provide for the defense of their people and sovereign territory.

SEC. 1244. SENSE OF CONGRESS ON SUPPORT FOR GEORGIA.

(a) FINDINGS.—Congress finds the following:

(1) Georgia is a valued friend of the United States and has repeatedly demonstrated its commitment to advancing the mutual interests of both coun-
tries, including the deployment of Georgian forces as part of the former International Security Assistance Force (ISAF) and the current Resolute Support Mission led by the North Atlantic Treaty Organization (NATO) in Afghanistan and the Multi-National Force in Iraq.

(2) The European Deterrence Initiative builds the partnership capacity of Georgia so it can work more closely with the United States and NATO, as well as provide for its own defense.

(3) In addition to the European Deterrence Initiative, Georgia’s participation in the NATO initiative Partnership for Peace is paramount to interoperability with the United States and NATO, and establishing a more peaceful environment in the region.

(4) Despite the losses suffered, as a NATO partner, Georgia is committed to the Resolute Support Mission in Afghanistan with the fifth-largest contingent on the ground.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the United States should—

(1) reaffirm support for an enduring strategic partnership between the United States and Georgia;

(2) support Georgia’s sovereignty and territorial integrity within its internationally-recognized bor-
ders, and does not recognize the independence of the
Abkhazia and South Ossetia regions currently occu-
pied by the Russian Federation;

(3) continue support for multi-domain security
assistance for Georgia in the form of lethal and non-
lethal measures to build resiliency, bolster deterrence
against Russian aggression, and promote stability in
the region, by—

(A) strengthening defensive capabilities and
promote readiness; and

(B) improving interoperability with NATO
forces; and

(4) further enhance security cooperation and en-
gagement with Georgia and other Black Sea regional
partners.

SEC. 1245. SENSE OF CONGRESS ON BURDEN SHARING BY
PARTNERS AND ALLIES.

(a) FINDINGS.—Congress makes the following findings:

(1) The United States’ alliances and other criti-
cal defense partnerships are a cornerstone of Depart-
ment of Defense (DOD) efforts to deter aggression
from our adversaries, counter violent extremism, and
preserve United States national security interests in
the face of challenges to those interests by Russia,
China and other actors.
(2) The North Atlantic Treaty Organization (NATO) is the most successful military alliance in history, having deterred war between major state powers for more than 70 years.

(3) Collective security and the responsibility of each member of the security of the other members as well as the alliance as a whole is a pillar of the NATO alliance.

(4) NATO members other than the United States collectively expend over $300,000,000,000 in defense investments annually and maintain military forces totaling an estimated 1,900,000 service members, bolstering the alliance’s collective capacity to counter shared threats.

(5) At the NATO Wales Summit in 2014, NATO members pledged to strive to increase their own defense spending to 2 percent of their respective gross domestic products and to spend at least 20 percent of their defense budgets on equipment by 2024 as part of their burden sharing commitments.

(6) Since 2014, there has been a steady increase in allied defense spending, with 22 member countries meeting defense spending targets in 2018 and having submitted plans to meet the targets by 2024.
(7) In addition to individual defense spending contributions, NATO allies and partners also contribute to NATO and United States operations around the world, including the Resolute Support Mission in Afghanistan and the Global Coalition to Defeat the Islamic State in Iraq and Syria (ISIS).

(8) South Korea hosts a baseline of 28,500 United States forces including the Eighth Army and Seventh Air Force.

(9) South Korea maintains Aegis Ballistic Missile Defense and Patriot Batteries that contribute to regional Ballistic Missile Defense, is a participant in the Enforcement Coordination Center, and is a significant contributor to United Nations peacekeeping operations.

(10) South Korea is an active consumer of United States Foreign Military Sales (FMS) with approximately $30,500,000,000 in active FMS cases and makes significant financial contributions to support forward deployed United States forces in South Korea, including contributions of $924,000,000 under the Special Measures Agreement in 2019 and over 90 percent of the cost of developing Camp Humphreys.

(11) Japan hosts 54,000 United States forces including the Seventh Fleet, the only forward-deployed
United States aircraft carrier, and the United States Marine Corps’ III Marine Expeditionary Force.

(12) Japan maintains Aegis Ballistic Missile Defense and Patriot Batteries that contribute to regional Ballistic Missile Defense, conducts bilateral presence operations and mutual asset protection missions with United States forces, and is a capacity building contributor to United Nations peacekeeping operations.

(13) Japan is an active consumer of United States FMS with approximately $28,400,000,000 in active FMS cases and makes significant financial contributions to enable optimized United States military posture, including contributions of approximately $2,000,000,000 annually under the Special Measures Agreement, $187,000,000 annually under the Japan Facilities Improvement Program, $12,100,000,000 for the Futenma Replacement Facility, $4,800,000,000 for Marine Corps Air Station Iwakuni, and $3,100,000,000 for construction on Guam to support the movement of United States Marines from Okinawa.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—
(1) the United States Government should focus on United States national security requirements for investment in forward presence, joint exercises, investments, and commitments that contribute to the security of the United States and collective security, and cease efforts that solely focus on the financial contributions of United States allies and partners when negotiating joint security arrangements;

(2) the United States must continue to strengthen its alliances and security partnerships with like-minded democracies around the world to deter aggression from authoritarian competitors and promote peace and respect for democratic values and human rights around the world;

(3) United States partners and allies should continue to increase their military capacity and enhance their ability to contribute to global peace and security;

(4) NATO allies should continue working toward their 2014 Wales Defense Investment Pledge commitments;

(5) the United States should maintain forward-deployed United States forces in order to better ensure United States national security and global stability; and
(6) alliances and partnerships are the cornerstone of United States national security and critical to countering the threat posed by malign actors to the post-World War II liberal international order.

SEC. 1246. SENSE OF CONGRESS ON NATO’S RESPONSE TO THE COVID-19 PANDEMIC.

(a) FINDINGS.—Congress finds the following:

(1) The North Atlantic Treaty Organization (NATO) has been working with allies and partners to provide support to the civilian response to the Coronavirus Disease 2019 (commonly referred to as “COVID-19”) pandemic, including logistics and planning, field hospitals, and transport, while maintaining NATO’s operational readiness and continuing to carry out critical NATO missions.

(2) Since the beginning of the pandemic, NATO allies and partners have completed more than 350 airlift flights, supplying hundreds of tons of critical supplies globally, have built nearly 100 field hospitals and dedicated more than half a million troops to support the civilian response to the pandemic.

(3) NATO’s Euro-Atlantic Disaster Response Coordination Centre has been operating 24 hours, seven days a week to coordinate requests for supplies and resources.
(4) The NATO Support and Procurement Agency’s Strategic Airlift Capability and Strategic Airlift International Solution programs have chartered flights to transport medical supplies between partners and allies.

(5) NATO established Rapid Air Mobility to speed up military air transport of medical supplies and resources to allies and partners experiencing a shortage of medical supplies and personal protective equipment.

(6) In June 2020, NATO Defense Ministers agreed to future steps to prepare for a potential second wave of the COVID-19 pandemic, including a new operation plan, establishing a stockpile of medical equipment and supplies, and a new fund to acquire medical supplies and services.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) NATO’s response to the COVID-19 pandemic is an excellent example of the democratic alliance’s capacity tackling overwhelming logistical challenges through close collaboration;

(2) the United States should remain committed to strengthening NATO’s operational response to the pandemic; and
(3) the United States should fulfill its commitments made at the 2020 NATO Defense Ministerial and continue to bolster the work of the Euro-Atlantic Disaster Response Coordination Centre, the NATO Support and Procurement Agency’s Strategic Airlift Capability and Strategic Airlift International Solution programs, and other efforts to utilize NATO’s capabilities to support the civilian pandemic response.

SEC. 1607. LIMITATION ON AVAILABILITY OF FUNDS FOR PROTOTYPE PROGRAM FOR MULTI-GLOBAL NAVIGATION SATELLITE SYSTEM RECEIVER DEVELOPMENT.

Of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2021 for increment 2 of the acquisition of military Global Positioning System user equipment terminals, not more than 80 percent may be obligated or expended until the date on which the Secretary of Defense—
(1) certifies to the congressional defense committees that the Secretary of the Air Force is carrying
out the program required under section 1607 of the National Defense Authorization Act for Fiscal Year 2020 (Public Law 116–92; 133 Stat. 1724); and

(2) provides to the Committees on Armed Services of the House of Representatives and the Senate a briefing on how the Secretary is implementing such program, including with respect to addressing each element specified in subsection (b) of such section.

SEC. 1608. LIMITATION ON AWARDING CONTRACTS TO ENTITIES OPERATING COMMERCIAL TERRESTRIAL COMMUNICATION NETWORKS THAT CAUSE INTERFERENCE WITH THE GLOBAL POSITIONING SYSTEM.

The Secretary of Defense may not enter into a contract, or extend or renew a contract, with an entity that engages in commercial terrestrial operations using the 1525–1559 megahertz band or the 1626.5–1660.5 megahertz band unless the Secretary has certified to the congressional defense committees that such operations do not cause harmful interference to a Global Positioning System device of the Department of Defense.

SEC. 1609. PROHIBITION ON AVAILABILITY OF FUNDS FOR CERTAIN PURPOSES RELATING TO THE GLOBAL POSITIONING SYSTEM.

(a) FINDINGS.—Congress finds the following:
(1) On April 19, 2020, the Federal Communications Commission issued an order and authorization granting Ligado Networks LLC the authority to operate a nationwide terrestrial communications network using the 1526–1536 megahertz band, the 1627.5–1637.5 megahertz band, or the 1646.5–1656.5 megahertz band.

(2) In an attempt to address interference to the Global Positioning System operating near those bands, Ligado Networks LLC has committed to assuming the costs mitigating any interference caused by their network.

(3) In the approval order, the Federal Communications Commission directed that “Ligado takes all necessary mitigation measures to prevent or remediate any potential harmful interference to U.S. Government devices, including devices used by the military, that are identified both pre- and post-deployment of Ligado’s network.”

(4) In a letter to the Committee on Armed Services of the House of Representatives dated May 21, 2020, Ligado Networks LLC reaffirmed the commitment to bear the costs to the Department of Defense, stating that the “FCC directed Ligado to provide protections to GPS devices using its spectrum by impos-
ing stringent coordination, cooperation, and replacement obligations on Ligado, so that Ligado bears the burden” and “Make no mistake: the obligation is ours, and the burden falls solely on our company.”.

(b) PROHIBITION.—Except as provided by subsection (c), none of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2021 or any subsequent fiscal year for the Department of Defense may be obligated or expended to retrofit any Global Positioning System device or system, or network that uses the Global Positioning System, in order to mitigate interference from commercial terrestrial operations using the 1526–1536 megahertz band, the 1627.5–1637.5 megahertz band, or the 1646.5–1656.5 megahertz band.

(c) ACTIONS NOT PROHIBITED.—The prohibition in subsection (a) shall not apply to any action taken by the Secretary of Defense relating to—

(1) conducting technical or information exchanges with the entity that operates the commercial terrestrial operations in the megahertz bands specified in such subsection;

(2) seeking compensation for interference from such entity; or

(3) Global Positioning System receiver upgrades needed to address other resiliency requirements.
SEC. 1610. REPORT ON RESILIENT PROTECTED COMMUNICATIONS SATELLITES.

(a) FINDINGS.—Congress finds the following:

(1) The national command, control, and communications system of the Department of Defense is essential to the national security of the United States.

(2) The Department of Defense requires the space segments of such system to be resilient and survivable to address advanced threats from Russia and China.

(3) The next-generation overhead persistent infrared missile warning satellites are being upgraded with enhanced resiliency features to make them much less vulnerable to attack and will begin launch in 2025.

(4) Because missile warning satellites rely on protected communications satellites to relay warnings and response orders, the next-generation overhead persistent infrared missile warning satellites will require protected communications satellites with enhanced resiliency features, however, the current plan of the Space Force is to provide those capabilities with the evolved strategic satellite communications program that will not be available until 2032 or later.

(5) As a result, the Chief of Space Operations should implement an accelerated plan to achieve more
resilient protected communications satellites without delay.

(b) REPORT.—Not later than 60 days after the date of the enactment of this Act, the Chief of Space Operations shall submit to the congressional defense committees a report on how the Space Force will address the need for resilient protected communications satellites during the years 2025 through 2032.

SEC. 1652. EXTENSION OF TRANSITION OF BALLISTIC MISSILE DEFENSE PROGRAMS TO MILITARY DEPARTMENTS.

SEC. 1653. DEVELOPMENT OF HYPersonic AND BALLISTIC MISSILE TRACKING SPACE SENSOR PAYLOAD.

(a) FINDINGS; SENSE OF CONGRESS.—

(1) FINDINGS.—Congress finds the following:

(A) Subsection (d) of section 1683 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115–91; 10 U.S.C. 2431 note), as amended by section 1683 of the National Defense Authorization Act for Fiscal Year 2020 (Public Law 116–92), requires the Director of the Missile Defense Agency to develop a hypersonic and ballistic tracking space sensor payload to address missile defense tracking requirements.

(B) The budget of the President for fiscal year 2021 submitted under section 1105 of title
31, United States Code, did not provide any funding for the Missile Defense Agency to continue the development of such sensor payload.

(2) SENSE OF CONGRESS.—It is the sense of Congress that—

(A) regardless of the overall architecture for a missile defense tracking space layer, the Director of the Missile Defense Agency should remain the material developer for the hypersonic and ballistic tracking space sensor payload to ensure that—

(i) unique hypersonic and ballistic missile tracking requirements are met; and

(ii) the system can be integrated into the existing missile defense system command and control, battle management, and communications system; and

(B) the Secretary of Defense should ensure transparency of funding for this effort to ensure proper oversight can be conducted on this critical capability.

(b) LIMITATION.—Subsection (d) of section 1683 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115–91; 10 U.S.C. 2431 note), as amended by section 1683 of the National Defense Authorization Act for
Fiscal Year 2020 (Public Law 116–92), is amended by adding at the end the following new paragraph:

“(3) LIMITATION.—Of the funds authorized to be appropriated by the National Defense Authorization Act for Fiscal Year 2021 or otherwise made available for fiscal year 2021 for operation and maintenance, Defense-wide, for the Space Defense Agency, not more than 50 percent may be obligated or expended until the date on which the Secretary submits the certification under paragraph (2)(B).”.

(c) COORDINATION.—Subsection (a) of such section is amended by striking “the Commander of the Air Force Space Command and” and inserting “the Chief of Space Operations, the Commander of the United States Space Command, the Commander of the United States Northern Command, and”.

SEC. 1654. ANNUAL CERTIFICATION ON HYPERSONIC AND BALLISTIC MISSILE TRACKING SPACE SENSOR PAYLOAD.

(a) FINDING; SENSE OF CONGRESS.—

(1) FINDING.—Congress finds that the budget submitted by the President under section 1105(a) of title 31, United States Code, for fiscal year 2021 does not fully fund an operational capability for the hypersonic and ballistic missile tracking space sensor
within the tracking layer of the persistent space-based
sensor architecture of the Space Development Agency,
despite such space sensor being a requirement by the
combatant commanders and being highlighted as a
needed capability against both hypersonic and bal-
listic threats in the Missile Defense Review published
in 2019.

(2) SENSE OF CONGRESS.—It is the sense of
Congress that the Missile Defense Agency hypersonic
and ballistic missile tracking space sensor must be
prioritized within the persistent space-based sensor
architecture of the Space Development Agency to en-
sure the delivery of capabilities to the warfighter as
soon as possible.

(b) ANNUAL CERTIFICATION.—Subsection (d) of sec-
tion 1683 of the National Defense Authorization Act for Fis-
cal Year 2018 (Public Law 115–91; 10 U.S.C. 2431 note),
as amended by section 1653, is further amended by adding
at the end the following new paragraph:

“(4) ANNUAL CERTIFICATION.—On an annual
basis until the date on which the hypersonic and bal-
listic tracking space sensor payload achieves full oper-
tional capability, the Secretary of Defense, without
delegation, shall submit to the appropriate congress-
ional committees a certification that—
“(A) the most recent future-years defense program submitted under section 221 of title 10, United States Code, includes estimated expenditures and proposed appropriations in amounts necessary to ensure the development and deployment of such space sensor payload as a component of the sensor architecture developed under subsection (a); and

“(B) the Commander of the United States Space Command has validated both the ballistic and hypersonic tracking requirements of, and the timeline to deploy, such space sensor payload.”.

SEC. 1655. ALIGNMENT OF THE MISSILE DEFENSE AGENCY WITHIN THE DEPARTMENT OF DEFENSE.

(a) FINDINGS.—Congress finds the following:

(1) Since the Missile Defense Agency was aligned to be under the authority, direction, and control of the Under Secretary of Defense for Research and Engineering pursuant to section 205(b) of title 10, United States Code, the advanced technology development budget requests in the defense budget materials (as defined in section 231(f) of title 10, United States Code) have decreased by more than 650 percent, from a request for $292,000,000 for fiscal year 2018 (the high-
est such request) to a request for $45,000,000 for fiscal year 2021.

(2) The overwhelming majority of the budget of the Missile Defense Agency is invested in programs that would be categorized as acquisition category 1 efforts if such programs were administered under the acquisition standards under Department of Defense Directive 5000.

(b) SENSE OF CONGRESS.—It is the sense of Congress that, in light of the findings under subsection (a), upon the completion of the independent review of the organization of the Missile Defense Agency required by section 1688 of the National Defense Authorization Act for Fiscal Year 2020 (Public Law 116–92; 133 Stat. 1787), the Secretary of Defense should reassess the alignment of the Agency within the Department of Defense to ensure that missile defense efforts are being given proper oversight and that the Agency is focused on delivering capability to address current and future threats.

(c) REPORT.—Not later than February 28, 2021, the Secretary of Defense shall submit to the congressional defense committees a report on the alignment of the Missile Defense Agency within the Department of Defense. The report shall include—
(1) a description of the risks and benefits of both—

(A) continuing the alignment of the Agency under the authority, direction, and control of the Under Secretary of Defense for Research and Engineering pursuant to section 205(b) of title 10, United States Code; and

(B) realigning the Agency to be under the authority, direction, and control of the Under Secretary of Defense for Acquisition and Sustainment; and

(2) if the Agency were to be realigned, the actions that would need to be taken to realign the Agency to be under the authority, direction, and control of the Under Secretary of Defense for Acquisition and Sustainment or another element of the Department of Defense.

SEC. 1656. ANALYSIS OF ALTERNATIVES FOR HOMELAND MISSILE DEFENSE MISSIONS.

(a) ANALYSIS OF ALTERNATIVES.—

(1) REQUIREMENT.—Not later than 90 days after the date of the enactment of this Act, the Director of Cost Assessment and Program Evaluation, in coordination with the Secretary of the Navy, the Secretary of the Army, and the Director of the Missile

(2) SCOPE.—The analysis of alternatives under paragraph (1) shall include the following:

(A) The sensors needed for the architecture described in such paragraph.

(B) An assessment of the locations of each system included in the analysis to provide similar coverage as the ground-based midcourse defense system, including, with respect to such systems that are land-based, by giving preference to locations with completed environmental impact analyses conducted pursuant to section 227 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239; 126 Stat. 1678), to the extent practicable.

(C) The acquisition objectives for interceptors of the terminal high altitude area defense system and standard missile–3 interceptors for homeland defense purposes.
(D) Any improvements needed to the missile
defense system command and control, battle
management, and communications system.

(E) The manning, training, and
sustainment needed to support such architecture.

(F) A detailed schedule for the development,
testing, production, and deployment of such sys-
tems.

(G) A lifecycle cost estimate of such archi-
tecture.

(H) A comparison of the capabilities, costs,
schedules, and policies with respect to—

(i) deploying regional systems de-
scribed in subsection (a) to conduct home-
land defense missions; and

(ii) deploying future ground-based
midcourse defense systems for such missions.

(3) SUBMISSION.—Not later than 90 days after
the date of the enactment of this Act, the Secretary of
Defense shall submit to the congressional defense com-
mittees a report containing—

(A) the analysis of alternatives under para-
graph (1); and

(B) a certification by the Secretary that
such analysis is sufficient.
(b) Assessment.—Not later than February 28, 2021, the Director of the Defense Intelligence Agency, and the head of any other element of the intelligence community that the Secretary of Defense determines appropriate, shall submit to the congressional defense committees an assessment of the following:

(1) How the development and deployment of regional terminal high altitude area defense systems and Aegis ballistic missile defense systems to conduct longer-range missile defense missions would be perceived by near-peer foreign countries and rogue nations.

(2) How such near-peer foreign countries and rogue nations would likely respond to such deployments.

SEC. 1657. NEXT GENERATION INTERCEPTORS.

(a) Notification of Changed Requirements.—During the acquisition and development process of the next generation interceptor program, not later than seven days after the date on which any changes are made to the requirements for such program that are established in the equivalent to capability development documentation, the Director of the Missile Defense Agency shall notify the congressional defense committees of such changes.
(b) Briefing on Contract.—Not later than 14 days after the date on which the Director awards a contract for the next generation interceptor, the Director shall provide the congressional defense committees a briefing on such contract, including with respect to the cost, schedule, performance, and requirements of the contract.

(2) Matters Included.—The report under paragraph (1) shall include the following:

(A) An explanation of how contracts in existence as of the date of the report could be used to reestablish improvements and sustainment for kill vehicles and boosters for the ground-based midcourse defense system.

(B) An explanation of how such system could be improved through service life extensions.
or pre-planned product improvements to address
some of the requirements of the next generation
interceptor by 2026, including an identification
of the costs, schedule, and any risks.

(C) A description of the costs and schedule
with respect to restarting booster production to
field 20 additional interceptors by 2026.

(D) An analysis of policy implications with
respect to the requirements for the ground-based
midcourse defense system.

SEC. 1658. OVERSIGHT OF NEXT GENERATION INTER-
CEPTOR PROGRAM.

(a) FINDINGS; SENSE OF CONGRESS.—

(1) FINDINGS.—Congress finds that the Sec-
retary of Defense discovered major technical problems
with the redesigned kill vehicle program, which led to
cancelling the program in August 2019 and caused
significant delays to the improved defense of the
United States against rogue nation ballistic missile
threats and wasted $1,200,000,000.

(2) SENSE OF CONGRESS.—It is the sense of
Congress that the Secretary of Defense should ensure
robust oversight and accountability for the acquisition
of the future next generation interceptor program to
avoid making the same errors that were experienced in the redesigned kill vehicle effort.

(b) INDEPENDENT COST ASSESSMENT AND VALIDATION.—

(1) ASSESSMENT.—The Director of Cost Assessment and Program Evaluation shall conduct an independent cost assessment of the next generation interceptor program.

(2) VALIDATION.—The Under Secretary of Defense for Acquisition and Sustainment shall validate the preliminary cost assessment conducted under paragraph (1) that will be used to inform the award of the contract for the next generation interceptor.

(3) SUBMISSION.—Not later than the date on which the Director of the Missile Defense Agency awards a contract for the next generation interceptor, the Secretary of Defense shall submit to the congressional defense committees a report containing the preliminary independent cost assessment under paragraph (1) and the validation under paragraph (2).

(c) FLIGHT TESTS.—In addition to the requirements of section 2399 of title 10, United States Code, the Director of the Missile Defense Agency may not make any decision regarding the initial production, or equivalent, of the next generation interceptor unless the Director has—
(1) certified to the congressional defense committees that the Director has conducted not fewer than two successful intercept flight tests of the next generation interceptor; and

(2) provided to such committees a briefing on the details of such tests, including with respect to the operational realism of such tests.

SEC. 1659. MISSILE DEFENSE COOPERATION BETWEEN THE UNITED STATES AND ISRAEL.

(a) Sense of Congress.—It is the sense of Congress that—

(1) the strong and enduring relationship between the United States and Israel is in the national security interest of both countries;

(2) the memorandum of understanding signed by the United States and Israel on September 14, 2016, including the provisions of the memorandum relating to missile and rocket defense cooperation, continues to be a critical component of the bilateral relationship;

(3) the United States and Israel should continue government-to-government collaboration and information sharing of technical data to investigate the potential operational use of Israeli missile defense systems for United States purposes; and
(4) in addition to the existing Israeli missile defense interceptor systems, there is potential for developing and incorporating directed energy platforms to assist the missile defense capabilities of both the United States and Israel.

(b) COOPERATION.—The Secretary of Defense may seek to extend existing cooperation with Israel to carry out, on a joint basis with Israel, research, development, test, and evaluation activities to establish directed energy capabilities that address missile threats to the United States, the deployed members of the Armed Forces of the United States, or Israel. The Secretary shall ensure that any such activities are conducted—

(1) in accordance with Federal law and the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons which may be deemed to be Excessively Injurious or to have Indiscriminate Effects, signed at Geneva October 10, 1980; and

(2) in a manner that appropriately protects sensitive information and the national security interests of the United States and the national security interests of Israel.

(b) ELEMENTS.—The report under subsection (a) shall include the following:

(1) The identification of existing deployed land- and sea-based air and missile defense programs of record within the military departments and Defense Agencies, including with respect to interceptors, radars, and ground-, ship-, air-, and space-based sensors that could be used either alone or in coordination with other systems to counter the threats specified in subsection (a) with an initial operational capability by 2025.

(2) A plan of how such programs would be used to counter such threats with an initial operational capability by 2025.

(3) A plan of which programs currently in development but not yet deployed could enhance or substitute for existing programs in countering such...
threats with an initial operational capability by 2025.

(4) An analysis of which military department, Defense Agency, or combatant command would have operational control of the mission to counter such threats.

Subtitle C—Space Technology Advancement Report (STAR) Act of 2020

SEC. 1721. SHORT TITLE.

This subtitle may be cited as the “‘Space Technology Advancement Report (STAR) Act of 2020’.”
SEC. 1722. FINDINGS.

Congress finds the following:

(1) As stated in the United States-China Economic and Security Commission’s 2019 Report to Congress, the United States retains many advantages over the People’s Republic of China (PRC) in space, including—

(A) the organization and technical expertise of its space program;

(B) the capabilities of the National Aeronautics and Space Administration for human spaceflight and exploration;

(C) its vibrant commercial space sector;

(D) its long history of space leadership; and

(E) many international partnerships.

(2) The PRC seeks to establish a leading position in the economic and military use of outer space and views space as critical to its future security and economic interests.

(3) The PRC’s national-level commitment to establishing itself as a global space leader harms United States interests and threatens to undermine many of the advantages the United States has worked so long to establish.

(4) For over 60 years, the United States has led the world in space exploration and human space
flight through a robust national program that ensures NASA develops and maintains critical spaceflight systems to enable this leadership, including the Apollo program’s Saturn V rocket, the Space Shuttle, the International Space Station and the Space Launch System and Orion today.

(5) The Defense Intelligence Agency noted in its 2019 “Challenges to U.S. Security in Space” report that the PRC was developing a national super-heavy lift rocket comparable to NASA’s Space Launch System.

(6) The United States space program and commercial space sector risks being hollowed out by the PRC’s plans to attain leadership in key technologies.

(7) It is in the economic and security interest of the United States to remain the global leader in space power.

(8) A recent report by the Air Force Research Laboratory and the Defense Innovation Unit found that China’s strategy to bolster its domestic space industry includes a global program of theft and other misappropriation of intellectual property, direct integration of state-owned entities and their technology with commercial start-ups, the use of front companies
to invest in United States space companies, vertical
control of supply chains, and predatory pricing.

(9) The United States Congress passed the Wolf
Amendment as part of the Fiscal Year 2012 Consoli-
dated and Further Continuing Appropriations Act
(Public Law 112–55) and every year thereafter in re-
sponse to the nefarious and offensive nature of Chi-
inese activities in the space industry.

(H) An assessment of the current ability, role, costs, and authorities of the Department of Defense to mitigate the threats of commercial communications and navigation in space from the PRC’s growing counterspace capabilities, and any actions required to improve this capability.

(I) An assessment of how the PRC’s activities are impacting United States national security, including—

(i) theft by the PRC of United States intellectual property through technology transfer requirements or otherwise; and

(ii) efforts of the PRC to seize control of critical elements of the United States space industry supply chain and United States space industry companies or sister companies with shared leadership; and government cybersecurity capabilities.
(J) An assessment of efforts of the PRC to pursue cooperative agreements with other nations to advance space development.

(K) Recommendations to Congress, including recommendations with respect to—

### DIVISION E—NATIONAL ARTIFICIAL INTELLIGENCE INITIATIVE ACT OF 2020

**SEC. 5001. SHORT TITLE.**

This division may be cited as the “National Artificial Intelligence Initiative Act of 2020”.

**SEC. 5002. FINDINGS.**

Congress finds the following:
(1) Artificial intelligence is a tool that has the potential to change and possibly transform every sector of the United States economy and society.

(2) The Federal Government should continue to play an important role advancing research, development, standards, and education activities in artificial intelligence through coordination and collaboration between government, academia, and the private sector to leverage the intellectual, physical, and digital resources of each stakeholder.

(3) The Federal Government lacks clear understanding of the capabilities of artificial intelligence and its potential to affect various social and economic sectors, including ethical concerns, national security implications, and workforce impacts.

(4) Researchers from academia, Federal laboratories, and much of the private sector have limited access to many high-quality datasets, computing resources, or real-world testing environments to design and deploy safe and trustworthy artificial intelligence systems.

(5) There is a lack of standards and benchmarking for artificial intelligence systems that academia and the public and private sectors can use
to evaluate the performance of these systems before
and after deployment.

(6) Artificial intelligence is increasingly becoming a highly interdisciplinary field with expertise re-
quired from a diverse range of scientific and other
scholarly disciplines that traditionally work inde-
pendently and continue to face cultural and institu-
tional barriers to large scale collaboration.

(7) Current Federal investments and funding
mechanisms are largely insufficient to incentivize and
support the large-scale interdisciplinary and public-
private collaborations that will be required to advance
trustworthy artificial intelligence systems in the
United States.

(8) The United States education pipeline for ar-
tificial intelligence fields faces significant challenges.
Not only does the artificial intelligence research field
lack the gender and racial diversity of the American
population as a whole, but it is failing to both retain
researchers and adequately support educators to meet
the demands of the next generation of students study-
ing artificial intelligence.

(9) In order to help drive forward advances in
trustworthy artificial intelligence across all sectors
and to the benefit of all Americans, the Federal Gov-
vernment must provide sufficient resources and use its convening power to facilitate the growth of artificial intelligence human capital, research, and innovation capacity in academia and other nonprofit research organizations, companies of all sizes and across all sectors, and within the Federal Government.

SEC. 5003. DEFINITIONS.

In this division:

(1) ADVISORY COMMITTEE.—The term “Advisory Committee” means the National Artificial Intelligence Advisory Committee established under section 5104(a).

(3) ARTIFICIAL INTELLIGENCE.—The term “artificial intelligence” means a machine-based system that can, for a given set of human-defined objectives, make predictions, recommendations or decisions influencing real or virtual environments. Artificial intelligence systems use machine and human-based inputs to—

(A) perceive real and virtual environments;

(B) abstract such perceptions into models through analysis in an automated manner; and
(C) use model inference to formulate options for information or action.

(4) INITIATIVE.—The term “Initiative” means the National Artificial Intelligence Initiative established under section 5101(a).

(5) INITIATIVE OFFICE.—The term “Initiative Office” means the National Artificial Intelligence Initiative Office established under section 5102(a).

(6) INSTITUTE.—The term “Institute” means an Artificial Intelligence Research Institute described in section 201(b)(1).

(7) INTERAGENCY COMMITTEE.—The term “Interagency Committee” means the interagency committee established under section 5103(a).

(8) K-12 EDUCATION.—The term “K-12 education” means elementary school and secondary education, as such terms are defined in section 8101 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7801).

(9) MACHINE LEARNING.—The term “machine learning” means an application of artificial intelligence that is characterized by providing systems the ability to automatically learn and improve on the basis of data or experience, without being explicitly programmed.

ment through grants, cooperative agreements, testbeds, and access to data and computing resources.

(2) Support for the development of voluntary standards, best practices, and benchmarks for the development and use of trustworthy artificial intelligence systems.

(3) Support for educational programs at all levels, in both formal and informal learning environments, to prepare the American workforce and the general public to be able to use and interact with artificial intelligence systems, as well as adapt to the potentially transformative impact of artificial intelligence on society and the economy.

(4) Support for interdisciplinary research, education, and training programs for students and researchers that promote learning in the methods and systems used in artificial intelligence and foster interdisciplinary perspectives and collaborations among subject matter experts in relevant fields, including computer science, mathematics, statistics, engineering, social sciences, psychology, behavioral science, ethics, security, legal scholarship, and other disciplines that will be necessary to advance artificial intelligence research and development responsibly.
(5) Support for partnerships to leverage knowledge, computing resources, access to open datasets, and other resources from industry, government, non-profit organizations, Federal laboratories, State programs, and institutions of higher education to advance activities under the Initiative.

(6) Interagency planning and coordination of Federal artificial intelligence research, development, demonstration, standards engagement, and other activities under the Initiative.

(9) Leveraging existing Federal investments to advance objectives of the Initiative.

(10) Support for a network of interdisciplinary artificial intelligence research institutes, as described in section 5201(b)(7)(B).

(11) Support opportunities for international cooperation with strategic allies, as appropriate, on the research and development, assessment, and resources
for trustworthy artificial intelligence systems and the
development of voluntary consensus standards for
those systems.

ERGY ARTIFICIAL INTEL-
LIGENCE RESEARCH PRO-
GRAM

SEC. 5501. DEPARTMENT OF ENERGY ARTIFICIAL INTEL-
LIGENCE RESEARCH PROGRAM.

(a) In General.—The Secretary shall carry out a
cross-cutting research and development program to advance
artificial intelligence tools, systems, capabilities, and work-
force needs and to improve the reliability of artificial intel-
ligence methods and solutions relevant to the mission of the
Department. In carrying out this program, the Secretary
shall coordinate across all relevant offices and programs at
the Department, including the Office of Science, the Office
of Energy Efficiency and Renewable Energy, the Office of
Nuclear Energy, the Office of Fossil Energy, the Office of
Electricity, the Office of Cybersecurity, Energy Security,
and Emergency Response, the Advanced Research Projects
Agency-Energy, and any other relevant office determined
by the Secretary.

(b) Research Areas.—In carrying out the program
under subsection (a), the Secretary shall award financial
assistance to eligible entities to carry out research projects on topics including—

(1) the application of artificial intelligence systems to improve large-scale simulations of natural and other phenomena;

(2) the study of applied mathematics, computer science, and statistics, including foundations of methods and systems of artificial intelligence, causal and statistical inference, and the development of algorithms for artificial intelligence systems;

(3) the analysis of existing large-scale datasets from science and engineering experiments and simulations, including energy simulations and other priorities at the Department as determined by the Secretary using artificial intelligence tools and techniques;

(4) the development of operation and control systems that enhance automated, intelligent decision-making capabilities;

(5) the development of advanced computing hardware and computer architecture tailored to artificial intelligence systems, including the codesign of networks and computational hardware;

(6) the development of standardized datasets for emerging artificial intelligence research fields and ap-
applications, including methods for addressing data scarcity; and

(7) the development of trustworthy artificial intelligence systems, including—

(A) algorithmic explainability;

(B) analytical methods for identifying and mitigating bias in artificial intelligence systems; and

(C) safety and robustness, including assurance, verification, validation, security, and control.

(c) Technology Transfer.—In carrying out the program under subsection (a), the Secretary shall support technology transfer of artificial intelligence systems for the benefit of society and United States economic competitiveness.

(d) Facility Use and Upgrades.—In carrying out the program under subsection (a), the Secretary shall—
