

116TH CONGRESS  
2D SESSION

# H. R. 6842

To amend title 23, United States Code, to modify the apportionment formula for the congestion mitigation and air quality improvement program, and for other purposes.

---

## IN THE HOUSE OF REPRESENTATIVES

MAY 12, 2020

Ms. TITUS introduced the following bill; which was referred to the Committee on Transportation and Infrastructure

---

## A BILL

To amend title 23, United States Code, to modify the apportionment formula for the congestion mitigation and air quality improvement program, and for other purposes.

1       *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

**3 SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Congestion Mitigation  
5 and Air Quality Improvement Modernization Act”.

**6 SEC. 2. APPORTIONMENT.**

7       Section 104(b)(4) of title 23, United States Code, is  
8 amended to read as follows:

1               “(4) CONGESTION MITIGATION AND AIR QUAL-  
2       ITY IMPROVEMENT PROGRAM.—

3               “(A) CALCULATION.—For the congestion  
4       mitigation and air quality improvement pro-  
5       gram, an amount determined by multiplying the  
6       amount of the base apportionment remaining  
7       for the State under subsection (c) after making  
8       the set aside in accordance with paragraph (5)  
9       by the proportion that—

10               “(i) the total of all weighted county  
11       populations with monitored pollutant con-  
12       centrations above national ambient air  
13       quality standards in the State; bears to

14               “(ii) the total of all weighted county  
15       populations with monitored pollutant con-  
16       centrations above national ambient air  
17       quality standards in all States.

18               “(B) CALCULATION OF WEIGHTED POPU-  
19       LATIONS WITH MONITORED POLLUTION CON-  
20       CENTRATIONS ABOVE NATIONAL AMBIENT AIR  
21       QUALITY STANDARDS.—Subject to subparagraphs (C), (D), and (E), for the purpose of  
22       subparagraph (A), the weighted population in  
23       counties with pollution concentrations above na-  
24       tional ambient air quality standards shall be

1       calculated by multiplying the population of each  
2       county by a factor determined from the ratio of  
3       design values to national ambient air quality  
4       standards.

5            “(C) DESIGN VALUES OF OZONE.—

6              “(i) IN GENERAL.—In making the cal-  
7        culation under subparagraph (B), for coun-  
8        ties with design values of ozone greater  
9        than the national ambient air quality  
10      standard, the population of a monitored  
11      county is multiplied by a factor of—

12               “(I) the average of 2013–2015  
13        and 2016–2018 design values, pro-  
14        vided by the Environmental Protec-  
15        tion Agency Administrator; bears to

16               “(II) the primary national ambi-  
17        ent air quality standard for ozone es-  
18        tablished by the Administrator under  
19        109(b) of the Clean Air Act (42  
20        U.S.C. 7409(b)).

21              “(ii) SPECIAL RULE.—If the average  
22        of design values from 2013–2015 and  
23        2016–2018 is not greater than the primary  
24        national ambient air quality standard for  
25        ozone, a weighting factor of zero is applied.

1                         “(iii) MAXIMUM FACTOR.—Notwith-  
2                         standing clauses (i) and (ii), the maximum  
3                         factor to be applied for ozone shall not ex-  
4                         ceed 1.4.

5                         “(D) DESIGN VALUES OF FINE PARTICU-  
6                         LATE MATTER.—

7                         “(i) IN GENERAL.—For counties with  
8                         design values of fine particulate matter  
9                         greater than the national ambient air qual-  
10                         ity standards, the population of a mon-  
11                         itored county is multiplied by the greater  
12                         factor of—

13                         “(I) the average of the 2013–  
14                         2015 and 2016–2018 design values  
15                         for annual concentrations of fine par-  
16                         ticulate matter, provided by the Envi-  
17                         ronmental Protection Agency Admin-  
18                         istrator; bears to

19                         “(II) the primary national ambi-  
20                         ent air quality standard for fine par-  
21                         ticulate matter for annual concentra-  
22                         tions established by the Administrator  
23                         under 109(b) of the Clean Air Act (42  
24                         U.S.C. 7409(b)); or

1                         “(III) the average of the 2013–  
2                         2015 and 2016–2018 design values  
3                         for 24-hour averaging time of fine  
4                         particulate matter, provided by the  
5                         Environmental Protection Agency Ad-  
6                         ministrator; bears to

7                         “(IV) the primary national ambi-  
8                         ent air quality standard for fine par-  
9                         ticulate matter for 24-hour averaging  
10                        time established by the Administrator  
11                        under 109(b) of the Clean Air Act (42  
12                        U.S.C. 7409(b)).

13                        “(ii) SPECIAL RULE.—If the average  
14                        of design values from 2013–2015 and  
15                        2016–2018 are not greater than the pri-  
16                        mary national ambient air quality stand-  
17                        ards for particulate matter, a weighting  
18                        factor of zero is applied.

19                        “(iii) MAXIMUM FACTOR.—Notwith-  
20                        standing clause (i), the maximum factor to  
21                        be applied for fine particulate matter shall  
22                        not exceed 1.4.

23                        “(E) DESIGN VALUES OF BOTH OZONE  
24                        AND PARTICULATE MATTER.—Notwithstanding  
25                        subparagraphs (B) through (D), for counties

1       with design values greater than the national  
2       ambient air quality standards for both ozone  
3       and particulate matter, a new factor, deter-  
4       mined by multiplying the factors determined in  
5       subparagraphs (C) and (D), is applied to coun-  
6       ty populations in place of the individual factors  
7       determined in subparagraphs (C) and (D).

8             “(F) MINIMUM APPORTIONMENT.—Not-  
9       withstanding any other provision of this para-  
10      graph, the minimum apportionment for a State  
11      under this paragraph shall be one half of 1 per-  
12      cent of the funds apportioned under this para-  
13      graph.

14            “(G) MAXIMUM APPORTIONMENT.—Not-  
15       withstanding any other provision of this para-  
16      graph, the maximum apportionment for a State  
17      under this paragraph shall be 25 percent of the  
18      funds apportioned under this paragraph.

19           “(H) DETERMINATIONS OF POPU-  
20      LATION.—In determining county population for  
21      purposes of this paragraph, the Secretary shall  
22      use the latest available annual estimates pre-  
23      pared by the Secretary of Commerce.”.

1   **SEC. 3. CONGESTION MITIGATION AND AIR QUALITY IM-**

2                   **PROVEMENT PROGRAM.**

3       Section 149 of title 23, United States Code, is

4   amended—

5                   (1) in subsection (b)—

6                      (A) by striking “, carbon monoxide,”;

7                      (B) by striking “186(a),”;

8                      (C) by striking “7512(a),”;

9                      (D) in paragraph (8)(B) by striking “; or”

10                  and inserting a semicolon;

11                  (E) in paragraph (9) by striking the period

12                  at the end and inserting “; or”; and

13                  (F) by adding at the end the following:

14                  “(10) other projects, if determined by the Sec-  
15                  retary, to be more cost-effective than projects de-  
16                  scribed in paragraphs (1) through (9).”;

17                  (2) in subsection (c) by striking “carbon mon-

18                  oxide, or both, and for”; and

19                  (3) by amending subsection (d) to read as fol-  
20                  lows:

21                  “(d) STATES FLEXIBILITY.—If a State does not  
22                  have, and never has had, a nonattainment area designated  
23                  under the Clean Air Act (42 U.S.C. 7401 et seq.), the  
24                  State may use funds apportioned to the State under sec-  
25                  tion 104(b)(4) for any project in the State that—

- 1           “(1) would otherwise be eligible under sub-  
2       section (b) as if the project were carried out in a  
3       nonattainment or maintenance area; or  
4           “(2) is eligible under the surface transportation  
5       block grant program under section 133.”.
