

116TH CONGRESS  
2D SESSION

# H. R. 7417

To direct the Secretary of Defense to set sustainability goals for the Department of Defense, and for other purposes.

---

IN THE HOUSE OF REPRESENTATIVES

JUNE 30, 2020

Mr. CASTEN of Illinois introduced the following bill; which was referred to the Committee on Armed Services

---

## A BILL

To direct the Secretary of Defense to set sustainability goals for the Department of Defense, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “National Security Re-  
5 siliency and Sustainability Act of 2020”.

6 **SEC. 2. RESILIENCY AND SUSTAINABILITY GOALS FOR THE**

7 **DEPARTMENT OF DEFENSE.**

8 (a) IN GENERAL.—For fiscal year 2021 and any sub-  
9 sequent fiscal year, the Secretary of Defense shall—

1           (1) reduce energy intensity (measured in Brit-  
2           ish thermal units per gross square foot) in buildings  
3           of the Department by 2.5 percent annually through  
4           the end of fiscal year 2027, relative to the baseline  
5           energy use in buildings of the Department in 2008  
6           by implementing efficiency measures.

7           (2) improve data center energy efficiency at De-  
8           partment facilities by—

9                   (A) ensuring the chief information officer  
10                  of the Department promotes energy optimiza-  
11                  tion, efficiency, and performance in data cen-  
12                  ters;

13                   (B) installing and monitoring advanced en-  
14                  ergy meters in all data centers by 2023; and

15                   (C) establishing a power usage effective-  
16                  ness target of 1.2 to 1.4 for new data centers  
17                  and less than 1.5 for existing data centers;

18           (3) ensure that electric energy and thermal en-  
19           ergy in Department buildings are comprised of clean  
20           energy, in amounts—

21                   (A) not less than 28 percent for fiscal  
22                  years 2028 and 2029;

23                   (B) not less than 33 percent for fiscal  
24                  years 2030 and 2031;

1 (C) not less than 37 percent for fiscal  
2 years 2032 and 2033;

3 (D) not less than 39 percent for fiscal  
4 years 2034 and 2035;

5 (E) not less than 42 percent for fiscal  
6 years 2036 and 2037; and

7 (F) not less than 45 percent for fiscal year  
8 2038 and each year thereafter;

9 (4) ensure that the percentage of the total  
10 amount of electric energy consumed by the Depart-  
11 ment that is clean energy is—

12 (A) not less than 28 percent for fiscal year  
13 2025;

14 (B) not less than 30 percent for fiscal  
15 years 2026 and 2027;

16 (C) not less than 33 percent for fiscal  
17 years 2028 and 2029;

18 (D) not less than 37 percent for fiscal  
19 years 2030 and 2031;

20 (E) not less than 40 percent for fiscal  
21 years 2032 and 2033;

22 (F) not less than 43 percent for fiscal  
23 years 2034 and 2035;

24 (G) not less than 46 percent for fiscal  
25 years 2036 and 2037; and

1 (H) not less than 50 percent for fiscal year  
2 2038 and each year thereafter;

3 (5) ensure that all clean energy capacity added  
4 between 2021 and 2040 comes from sources based  
5 on projects that are not in operation as of the date  
6 of the installation or signing of any financial agree-  
7 ment for the purchase of the clean electric or ther-  
8 mal energy;

9 (6) include in the electric energy portion of the  
10 clean energy requirements established in paragraphs  
11 (3) and (4), and retain all renewable energy certifi-  
12 cates and clean energy attributes for, clean electric  
13 energy associated with—

14 (A) installing clean energy on site at De-  
15 partment facilities;

16 (B) contracting for the purchase of energy,  
17 which includes—

18 (i) the installation of renewable en-  
19 ergy on site at a Department facility or off  
20 site from a Department facility; and

21 (ii) the installation of clean energy op-  
22 erating or owned by a third party on site  
23 of a Department facility that is directly  
24 serving local loads, and for which the facil-  
25 ity has a commitment to procure, for a

1 contract period of not less than 10 years  
2 and up to a period of 40 years, the lesser  
3 of—

4 (I) 100 percent of clean energy  
5 asset output; or

6 (II) 100 percent of facility energy  
7 needs; and

8 (iii) a contract for differences with a  
9 minimum off-take period of 10 years, and  
10 up to a period of 40 years, for the installa-  
11 tion of clean energy not physically located  
12 on site at a Department facility nor elec-  
13 trically connected to the facility, for which  
14 the department agrees to procure the en-  
15 ergy (in MWh), as well as corresponding  
16 renewable energy certificates, and clean en-  
17 ergy attributes, at a defined price for the  
18 period of the contract;

19 (7) include, in the thermal electric energy por-  
20 tion of the clean energy requirement established in  
21 paragraph (3), clean energy associated with—

22 (A) installing thermal clean energy on site  
23 at Department facilities and retaining cor-  
24 responding renewable and clean attributes; and

1 (B) fulfilling the requirements of the en-  
2 ergy policy of the Department as provided in  
3 section 2911 of title 10, United States Code;

4 (8) improve water use efficiency and manage-  
5 ment, including stormwater management, by—

6 (A) reducing potable water consumption  
7 intensity, measured in gallons per gross square  
8 foot, by 36 percent by fiscal year 2025 through  
9 reductions of 2 percent annually through fiscal  
10 year 2025 relative to a baseline of the water  
11 consumption of the Department in fiscal year  
12 2007;

13 (B) installing water meters and collecting  
14 and using building and facility water balance  
15 data to improve water conservation and man-  
16 agement;

17 (C) reducing the industrial, landscaping,  
18 and agricultural water consumption, measured  
19 in gallons, by 2 percent annually through fiscal  
20 year 2025 relative to a baseline of the indus-  
21 trial, landscaping, and agricultural water con-  
22 sumption of the Department during fiscal year  
23 2010; and

1 (D) installing appropriate green infrastruc-  
2 ture features on Department property to help  
3 with stormwater and wastewater management;

4 (9) improve building efficiency, performance,  
5 and management by—

6 (A) ensuring, for fiscal year 2021 and each  
7 subsequent fiscal year, that the new construc-  
8 tion of any Department building larger than  
9 5,000 gross square feet that enters the plan-  
10 ning process is designed to achieve energy net-  
11 zero and, water or waste net-zero by fiscal year  
12 2035;

13 (B) identifying, beginning in fiscal year  
14 2021, as part of the planning requirements of  
15 section 3, a percentage of at least 15 percent,  
16 measured by number or total square footage, of  
17 the existing Department buildings larger than  
18 5,000 gross square feet that will, by fiscal year  
19 2030, comply with the revised Guiding Prin-  
20 ciples for Federal Leadership in High Perform-  
21 ance and Sustainable Buildings (Guiding Prin-  
22 ciples), and will reach 100 percent conformance  
23 with the Guiding Principles for building inven-  
24 tory by 2050;

1 (C) identifying, as part of the planning re-  
2 quirements of this section, a percentage of the  
3 existing buildings of the Department that are  
4 larger than 5,000 gross square feet and in-  
5 tended to be energy, waste, or water net-zero  
6 buildings by fiscal year 2030, and implementing  
7 actions that will allow those buildings to meet  
8 that target;

9 (D) including in all new Department lease  
10 solicitations for buildings or facilities larger  
11 than 10,000 rentable square feet—

12 (i) criteria for energy efficiency either  
13 as a required performance specification or  
14 as a source selection evaluation factor in  
15 best-value tradeoff procurements; and

16 (ii) requirements for building lessor  
17 disclosure of carbon emission or energy  
18 consumption data for any portion of the  
19 building occupied by the Department that  
20 may be provided by the lessor through sub-  
21 metering or estimation from prorated occu-  
22 pancy data, whichever is more cost-effec-  
23 tive;

24 (E) including in the planning for new  
25 buildings or leases cost-effective strategies to

1 optimize sustainable space usage and consider-  
2 ation of existing community transportation  
3 planning and infrastructure, including access to  
4 public transit; and

5 (F) including the incorporation of climate-  
6 resilient design and management elements into  
7 the operation, repair, and renovation of existing  
8 Department buildings and the design of new  
9 Department buildings;

10 (10) promote sustainable acquisition and pro-  
11 curement by ensuring that environmental perform-  
12 ance and sustainability factors are included for all  
13 applicable procurements in the planning, award, and  
14 execution phases of the acquisition by—

15 (A) preferentially purchasing—

16 (i) recycled content products des-  
17 ignated by the Environmental Protection  
18 Agency;

19 (ii) energy and water efficient prod-  
20 ucts and services identified by the Environ-  
21 mental Protection Agency and the Depart-  
22 ment of Energy; and

23 (iii) BioPreferred and biobased prod-  
24 ucts, as designated by the Department of  
25 Agriculture;

1 (B) purchasing sustainable products and  
2 services identified by the Environmental Protec-  
3 tion Agency;

4 (C) purchasing products or services that—

5 (i) meet or exceed specifications,  
6 standards, or labels recommended by the  
7 Environmental Protection Agency that  
8 have been determined to assist agencies in  
9 meeting their needs and further advance  
10 sustainable procurement goals; or

11 (ii) meet environmental performance  
12 criteria developed or adopted by voluntary  
13 consensus standards bodies consistent with  
14 section 12(d) of the National Technology  
15 Transfer and Advancement Act of 1995  
16 (15 U.S.C. 272 note(d));

17 (D) acting, as part of the implementation  
18 of planning requirements under section 3, until  
19 the Department achieves at least 95 percent  
20 compliance with the BioPreferred and biobased  
21 purchasing requirement in this paragraph, to—

22 (i) establish annual targets for the  
23 number of contracts to be awarded with  
24 BioPreferred and biobased criteria and the  
25 dollar value of BioPreferred and biobased

1 products to be delivered and reported  
2 under those contracts in the following fis-  
3 cal year, by considering—

4 (I) the dollar value of designated  
5 BioPreferred and biobased products  
6 reported in previous years;

7 (II) the specifications reviewed  
8 and revised for inclusion of BioPre-  
9 ferred and biobased products; and

10 (III) the number of applicable  
11 product and service contracts to be  
12 awarded, including construction, oper-  
13 ations and maintenance, food services,  
14 vehicle maintenance, and janitorial  
15 services; and

16 (ii) ensure contractors submit timely  
17 annual reports on BioPreferred and  
18 biobased purchases; and

19 (E) reducing copier and printing paper use  
20 and acquiring uncoated printing and writing  
21 paper containing at least 30 percent post-con-  
22 sumer recycled content or greater; and

23 (11) implement energy savings performance  
24 contracts for Department buildings by—

1 (A) using energy savings performance con-  
2 tracting as a tool to help meet energy efficiency  
3 and management goals while implementing life-  
4 cycle cost-effective energy efficiency and clean  
5 energy technology and water conservation meas-  
6 ures; and

7 (B) providing annual Department targets  
8 for performance contracting for energy savings  
9 for fiscal year 2021 and subsequent fiscal years  
10 as part of the planning requirements of section  
11 3.

12 (b) STRATEGIC SUSTAINABILITY PERFORMANCE  
13 PLAN.—For each of fiscal years 2021 through 2040, the  
14 Secretary of Defense shall develop, implement, and annu-  
15 ally update an integrated Strategic Sustainability Per-  
16 formance Plan for the Department. Not later than 180  
17 days before the end of the fiscal year, each year the Sec-  
18 retary shall submit to Congress the plan for the Depart-  
19 ment for the subsequent fiscal year. Each such plan shall  
20 be made publicly available on the website of the Depart-  
21 ment.

22 (c) LIMITATIONS.—This section shall apply with re-  
23 spect to activities, personnel, resources, and facilities of  
24 the Department that are located within the United States.  
25 The Secretary of Defense may provide that this section

1 shall apply in whole or in part with respect to the activi-  
2 ties, personnel, resources, and facilities of the Department  
3 that are not located within the United States, if the Sec-  
4 retary determines that such application is in the interest  
5 of the United States.

6 (d) WAIVER AUTHORITY.—

7 (1) IN GENERAL.—The Secretary of Defense  
8 may waive the requirements of this section with re-  
9 spect to a particular activity or facility of the De-  
10 partment if the Secretary determines such a waiver  
11 is in the national security interests of the United  
12 States.

13 (2) NOTICE.—Not later than 30 days after the  
14 Secretary issues a waiver under subsection (a), the  
15 Secretary shall submit to the chair and ranking  
16 member of the Committees on Armed Services of the  
17 Senate and House of Representatives notice of the  
18 waiver and the reason for the waiver.

19 (e) DEFINITIONS.—In this section:

20 (1) The term “advanced energy meters” means  
21 those energy meters that meet the requirements for  
22 certification as defined by the Leadership in Energy  
23 and Environmental Design (LEED) program as  
24 maintained by the U.S. Green Building Council  
25 (USGBC).

1           (2) The term “average greenhouse gas intensity  
2 of power generation on the United States electric  
3 grid” means the total net greenhouse gas emissions  
4 from the electricity sector in the previous fiscal year  
5 as measured in carbon dioxide equivalents and deter-  
6 mined by the Energy Information Administration in  
7 consultation with the Environmental Protection  
8 Agency, divided by the national net power generation  
9 over the same period as determined by the Energy  
10 Information Administration.

11           (3) The term “best-value tradeoff procure-  
12 ments” means a process by which the Government  
13 considers whether it is in the best interest of the  
14 Government to award a contract to an entity other  
15 than the lowest price offeror or other than the high-  
16 est technically rated offeror based on established  
17 evaluation factors.

18           (4) The term “clean energy” means any energy  
19 produced by a generation project that is at least 50  
20 percent less greenhouse gas intensive on a marginal  
21 basis as measured by carbon dioxide equivalents per  
22 megawatt-hour than the average greenhouse gas in-  
23 tensity of power generation on the United States  
24 electric grid over the previous fiscal year at the time  
25 of contracting.

1           (5) The term “clean energy attributes” means  
2 the technology and non-energy attributes that rep-  
3 resent proof that 1 megawatt-hour of electricity was  
4 generated from an eligible clean energy resource,  
5 that can be sold separately from the underlying ge-  
6 neric electricity with which they are associated by  
7 sources of clean energy placed into service within 10  
8 years prior to the start of the fiscal year.

9           (6) The term “climate resilient design” means  
10 to design assets to prepare for, withstand, respond  
11 to, or quickly recover from disruptions due to severe  
12 weather events and climate change for the intended  
13 life of the asset.

14           (7) The term “Department facility” means any  
15 building or collection of buildings, grounds, or struc-  
16 tures, as well as any fixture or part thereof, which  
17 is owned by the Department of Defense or that is  
18 held by the Department under a lease-acquisition  
19 agreement under which the Department will receive  
20 fee simple title under the terms of such agreement  
21 without further negotiation.

22           (8) The term “energy net zero” means a build-  
23 ing where the total energy used by the building on  
24 an annual basis is equal to the amount of clean en-  
25 ergy created in site.

1           (9) The term “equal value replacement renew-  
2           able energy certificates” means a quantity of renew-  
3           able energy certificates equal to the number of  
4           megawatt-hours of clean electricity generated from  
5           an eligible renewable energy resource.

6           (10) The term “greenhouse gas” means carbon  
7           dioxide, methane, nitrous oxide, hydrofluorocarbons,  
8           perfluorocarbons, nitrogen trifluoride, sulfur  
9           hexafluoride, and any other substance so identified  
10          by the Administrator of the Environmental Protec-  
11          tion Agency.

12          (11) The term “greenhouse gas intensity on a  
13          marginal basis” means the marginal fossil fuel use  
14          multiplied by the lower heating value of the fossil  
15          fuel, as defined by the Energy Information Adminis-  
16          tration, multiplied by the carbon dioxide emissions  
17          coefficients of the fossil fuel, as defined by the En-  
18          ergy Information Administration. If a project uses  
19          no fossil fuel, the marginal greenhouse gas emissions  
20          are defined as zero.

21          (12) The term “green infrastructure features”  
22          means features of infrastructure which use natural  
23          hydrologic features to manage water and provide en-  
24          vironmental and community benefits.

1           (13) The term “life-cycle cost-effective” means  
2 the costs of a product, project, or measure during  
3 the life of the product, project, or measure are esti-  
4 mated to be equal to or less than the current or  
5 standard practice or product.

6           (14) The term “marginal greenhouse gas emis-  
7 sions” means the marginal fossil fuel use multiplied  
8 by the lower heating value of the fossil fuel, as de-  
9 fined by the Energy Information Administration,  
10 multiplied by the carbon dioxide emissions coeffi-  
11 cients of the fossil fuel, as defined by the Energy In-  
12 formation Administration. If a project uses no fossil  
13 fuel, the marginal greenhouse gas emissions are de-  
14 fined as zero.

15           (15) The term “marginal fossil fuel use” means  
16 the fossil fuel combusted to produce energy by the  
17 project, measured in metric tons per year, minus  
18 any existing fossil combustion, measured in metric  
19 tons per year, within the same system that is deter-  
20 mined by the Administrator of the Environmental  
21 Protection Agency in consultation with the Secretary  
22 of Energy and Administrator of the Energy Infor-  
23 mation Administration to be necessary to the pro-  
24 duction of the contracted energy generation and

1 would have been consumed regardless of the addition  
2 of the contracted energy generation.

3 (16) The term “energy savings performance  
4 contract” means a contract that—

5 (A) provides for the performance of serv-  
6 ices for the design, acquisition, installation,  
7 testing, and, where appropriate, operation,  
8 maintenance, and repair, of an identified energy  
9 conservation measure or series of measures at  
10 1 or more locations; and

11 (B) with respect to an agency facility that  
12 is a public building (as such term is defined in  
13 section 3301 of title 40, United States Code),  
14 is in compliance with the prospectus require-  
15 ments and procedures of section 3307 of title  
16 40, United States Code.

17 (17) The term “power usage effectiveness”  
18 means the ratio obtained by dividing the total  
19 amount of electricity and other power consumed in  
20 running a data center by the power consumed by the  
21 information and communications technology in the  
22 data center.

23 (18) The term “renewable attributes” means  
24 the environmental benefits associated with 1 mega-

1 watt-hour of electricity generated from a renewable  
2 energy resource.

3 (19) The term “renewable energy certificate”  
4 means the technology and non-energy attributes that  
5 represent proof that 1 megawatt-hour of electricity  
6 was generated from an eligible renewable energy re-  
7 source, that can be sold separately from the under-  
8 lying generic electricity with which they are associ-  
9 ated and were produced by sources of renewable en-  
10 ergy placed into service within 10 years prior to the  
11 start of the fiscal year.

12 (20) The term “resiliency” means the ability to  
13 maintain or quickly restore functionality or use of  
14 applicable infrastructure following a disruptive exter-  
15 nal event including, but not limited to, severe  
16 storms, extreme heat, flooding, and earthquakes.

17 (21) The term “source selection evaluation fac-  
18 tor” means factors an agency uses to determine  
19 which of several competing proposals submitted in  
20 response to an request for proposal would best meet  
21 the agency’s needs.

22 (22) The term “sustainability” means a meas-  
23 ure of the ability of a development, infrastructure  
24 project, or of general Department operations to meet  
25 current operational needs without compromising the

1 ability of future generations to meet these needs  
2 through the depletion of strategic resources, long-  
3 term environmental harm or pollution, contributing  
4 to an unsafe climate, or any other measures as  
5 deemed by the Secretary with consultation from the  
6 Administrator of the Environmental Protection  
7 Agency and Chair of the Council on Environmental  
8 Quality.

9 (23) The term “United States” means the fifty  
10 States, the District of Columbia, the Commonwealth  
11 of Puerto Rico, Guam, American Samoa, the United  
12 States Virgin Islands, and the Northern Mariana Is-  
13 lands, and associated territorial waters and airspace.

14 (24) The term “waste net zero” refers to any  
15 building which through the reduction, reuse, recy-  
16 cling, composting, or recovery of solid waste streams  
17 (with the exception of any hazardous materials or  
18 medical waste) results in the elimination of any  
19 waste that is sent for disposal to landfills or inciner-  
20 ators.

21 (25) The term “water balance” means a com-  
22 parison of the water supplied to a defined system to  
23 the water consumed by that system in order to iden-  
24 tify the proportion of water consumed for specific

1 end-uses and ensure potential water leaks in the sys-  
2 tem are addressed.

3 (26) The term “water net zero” means any  
4 building which returns water to the original water  
5 source such that the annual water consumption is  
6 equivalent to the alternative water use plus water re-  
7 turned to the original source over the course of a  
8 year through practices that minimize total water  
9 consumption, maximize alternative water sources,  
10 and minimize wastewater discharge from the build-  
11 ing.

○
