IN THE SENATE OF THE UNITED STATES

JULY 8, 2019

Mr. MARKEY (for himself, Mr. VAN HOLLEN, Mr. SCHATZ, and Mr. BLUMENTHAL) introduced the following bill; which was read twice and referred to the Committee on Environment and Public Works

A BILL

To establish a National Climate Bank.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “National Climate Bank
5 Act”.

6 **SEC. 2. NATIONAL CLIMATE BANK.**

7 (a) IN GENERAL.—Title LXII of the Revised Stat-
8 utes (12 U.S.C. 21 et seq.) is amended by adding at the
9 end the following:

1 “(C) global warming at or above 2 degrees
2 Celsius beyond pre-industrialized levels will
3 cause—

4 “(i) mass migration from the regions
5 most affected by climate change;

6 “(ii) more than \$500,000,000,000 in
7 lost annual economic output in the United
8 States by the year 2100;

9 “(iii) wildfires that, by 2050, will an-
10 nually burn at least twice as much forest
11 area in the western United States than
12 was typically burned by wildfires in the
13 years preceding 2019;

14 “(iv) a loss of more than 99 percent
15 of all coral reefs on Earth;

16 “(v) more than 350,000,000 more
17 people to be exposed globally to deadly
18 heat stress by 2050; and

19 “(vi) a risk of damage to
20 \$1,000,000,000,000 of public infrastruc-
21 ture and coastal real estate in the United
22 States; and

23 “(D) global temperatures must be kept
24 below 1.5 degrees Celsius above pre-industri-

1 alized levels to avoid the most severe impacts of
2 a changing climate, which will require—

3 “(i) global reductions in greenhouse
4 gas emissions from human sources of 40 to
5 60 percent from 2010 levels by 2030; and

6 “(ii) net-zero global emissions by
7 2050;

8 “(2)(A) according to Bloomberg New Energy
9 Finance, in 2018, approximately \$64,000,000,000
10 was invested in renewable energy in the United
11 States; and

12 “(B) according to the International Energy
13 Agency, in 2018, approximately \$42,000,000,000
14 was invested in energy efficiency in North America;

15 “(3) investments in renewable energy and en-
16 ergy efficiency have a demonstrated track record of
17 increasing jobs while lowering the cost of new renew-
18 able energy investments, which benefits the clean en-
19 ergy economy;

20 “(4) green banks can be used to accelerate in-
21 vestment in—

22 “(A) new and emerging technologies; and

23 “(B) new and innovative financing prod-
24 ucts to leverage private sector financing;

1 “(5) green banking has a demonstrated track
2 record of success at increasing investment in the
3 clean energy economy;

4 “(6) green banks have led to \$3,670,000,000 of
5 investment in cost-effective clean energy projects
6 across the United States, lowering energy costs for
7 end-users, with that investment total composed of—

8 “(A) \$1,079,000,000 in public funds; and

9 “(B) \$2,591,000,000 in private and phil-
10 anthropic capital;

11 “(7) in 2018, green banks were operating in a
12 number of States and other jurisdictions, includ-
13 ing—

14 “(A) the District of Columbia; and

15 “(B) the States of—

16 “(i) Colorado;

19 “(iv) Hawaii;

20 “(v) Maryland;

21 “(vi) Michigan;

22 “(vii) Nevada;

23 “(viii) New York; and

24 “(ix) Rhode Island;

1 “(8) in the many different types of electricity
2 markets around the country, achieving 100 percent
3 market penetration of clean energy will require deliv-
4 ery of clean electric energy that is cheaper than al-
5 ternative fossil-fuel based electricity;

6 “(9) market-based clean energy financing tools,
7 such as those used by existing State and local green
8 banks, can be used—

9 “(A) to accelerate the deployment of clean
10 energy;

11 “(B) to reduce greenhouse gas emissions in
12 the United States by substituting fossil-fuel
13 based energy with lower-cost clean energy;

14 “(C) to unlock private investment by offer-
15 ing complementary capital that can change the
16 dynamics of a capital stack and make new
17 projects worth investing in for private sector
18 capital providers; and

19 “(D) to open new markets for greater in-
20 vestment and increase opportunities for commu-
21 nities and the private sector; and

22 “(10) the Federal Government can accelerate
23 and rapidly expand the deployment of clean energy
24 technologies by creating a dedicated financial insti-
25 tution that can support the work of existing green

1 banks and provide greater capital for efforts to re-
2 duce emissions, increasing the overall scale of clean
3 energy investment and the pace of substitution of
4 clean energy technologies for fossil-fuel based tech-
5 nologies.
