7           **CLIMATE CHANGE.**

8           (a) FINDINGS.—Congress finds the following:

9               (1) The Special Report: Global Warming of  
10           1.5°C, published by the Intergovernmental Panel on  
11           Climate Change on October 8, 2018, and the Fourth  
12           National Climate Assessment, first published by the  
13           United States Global Change Research Program in  
14           2018, concluded that—

15               (A) the release of greenhouse gas emis-  
16           sions, most notably the combustion of fossil  
17           fuels and the degradation of natural resources  
18           that absorb atmospheric carbon from human  
19           activity, are the dominant causes of climate  
20           change during the past century;

21               (B) changes in the Earth’s climate are—

22                   (i) causing sea levels to rise;

23                   (ii) increasing the global average tem-  
24           perature of the Earth;

1 (iii) increasing the incidence and se-  
2 verity of wildfires; and

3 (iv) intensifying the severity of ex-  
4 tremе weather, including hurricanes, cy-  
5 clones, typhoons, flooding, droughts, and  
6 other disasters that threaten human life,  
7 healthy communities, and critical infra-  
8 structure.

9 (2) An increase in the global average tempera-  
10 ture of 2 degrees Celsius compared to pre-industri-  
11 alized levels would cause—

12 (A) the displacement, and the forced inter-  
13 nal migration, of an estimated 143,000,000  
14 people in Latin America, South Asia, and Sub-  
15 Saharan Africa by 2050 if insufficient action is  
16 taken (according to the World Bank);

17 (B) the displacement of an average of  
18 17,800,000 people worldwide by floods every  
19 year (according to the Internal Displacement  
20 Monitoring Centre) because of the exacerbating  
21 effects of climate change;

22 (C) more than \$500,000,000,000 in lost  
23 annual economic output in the United States (a  
24 10 percent contraction from 2018 levels) by

1           2100 (according to the Fourth National Cli-  
2           mate Assessment);

3           (D) an additional 100,000,000 people  
4           worldwide to be driven into poverty by 2030  
5           (according to the World Bank);

6           (E) greater food insecurity and decreased  
7           agricultural production due to climate change's  
8           effects on the increased frequency and intensity  
9           of extreme weather events;

10          (F) the proliferation of agricultural pests  
11          and crop diseases, loss of biodiversity, degrad-  
12          ing ecosystems, and water scarcity; and

13          (G) more than 350,000,000 additional peo-  
14          ple worldwide to be exposed to deadly heat  
15          stress by 2050.

16          (3) According to the International Energy  
17          Agency, the United States, China, India, and the  
18          European Union (including the United Kingdom) ac-  
19          count for more than 58 percent of global greenhouse  
20          gas emissions. China, which is the world's top green-  
21          house gases emitter and has an outsized impact on  
22          the United States' core interest in climate sta-  
23          bility—

24                 (A) is likely to achieve its carbon emissions  
25                 mitigation pledge to the Paris Agreement, con-

1           tained in its 2015 nationally determined con-  
2           tribution, to “peak” emissions around 2030  
3           ahead of schedule;

4           (B) announced, on September 22, 2020,  
5           and restated on April 22, 2021, a pledge to  
6           achieve carbon neutrality by 2060;

7           (C) announced on April 22, 2021, its in-  
8           tent to strictly control coal fired power genera-  
9           tion projects, as well as strictly limit the in-  
10          crease in coal consumption over the 14th five  
11          year plan period and phase it down in the 15th  
12          five year plan period; and

13          (D) however, remains uncommitted to  
14          internationally recognized metrics for achieving  
15          these goals.

16          (b) SENSE OF CONGRESS.—It is the sense of Con-  
17          gress that—

18               (1) to address the climate crisis, the United  
19               States must leverage the full weight of its diplomatic  
20               engagement and foreign assistance to promote our  
21               national security and economic interests related to  
22               climate change;

23               (2) in the absence of United States leadership  
24               on global issues driving international climate-related  
25               policymaking, it would lead to a substantial and

1 harmful decline in the Nation’s global competitive-  
2 ness;

3 (3) promoting international instruments on cli-  
4 mate action and other relevant international stand-  
5 ards and best practices, as such standards and prac-  
6 tices develop, serve the interests of the American  
7 people and protect United States environmental re-  
8 sources and the planet;

9 (4) promoting the adoption and implementation  
10 of international climate-related agreements, stand-  
11 ards, and practices by foreign states ensures a level  
12 playing field for United States businesses and other  
13 stakeholders;

14 (5) working with international allies and part-  
15 ners to promote environmental justice and climate  
16 justice serves the American people’s interests;

17 (6) finding common ground with the People’s  
18 Republic of China (PRC) on climate action where  
19 possible is important, but the United States must  
20 also continue to hold the PRC accountable where its  
21 actions undermine the interests of the United States  
22 and its allies and partners;

23 (7) and in furtherance of the previous clauses,  
24 the United States should—

1 (A) explore opportunities for constructive  
2 cooperation on climate action initiatives with  
3 the PRC and other countries while ensuring the  
4 United States maintains its competitive advan-  
5 tage in climate-related fields of expertise and  
6 industry, including—

7 (i) support for international coopera-  
8 tive policies, measures, and technologies to  
9 decarbonize industry and power, including  
10 through circular economy, energy storage  
11 and grid reliability, carbon capture, and  
12 green hydrogen; and

13 (ii) increased deployment of clean en-  
14 ergy, including renewable and advanced  
15 nuclear power; green and climate resilient  
16 agriculture; energy efficient buildings;  
17 green, and low-carbon transportation;

18 (B) cooperate on addressing emissions of  
19 methane and other non-CO<sub>2</sub> greenhouse gases;

20 (C) cooperate on addressing emissions  
21 from international civil aviation and maritime  
22 activities;

2 significantly advances global climate ambition  
3 on mitigation, adaptation, and support;

4           (F) coordinate among relevant Federal,  
5 State, and local departments and agencies on  
6 climate action related initiatives;

7           (G) provide resources, authorities and sup-  
8 port for enhancing United States ambition and  
9 commitment to solving the climate crisis includ-  
10 ing climate action specific assistance and multi-  
11 lateral fund contributions; and

12           (H) integrate considerations for climate  
13 change into broader United States foreign pol-  
14 icy decision-making and the United States na-  
15 tional security apparatus.

16       (c) PURPOSE.—The purpose of this section is to pro-  
17 vide authorities, resources, policies, and recommended ad-  
18 ministrative actions—

19           (1) to restore United States global leadership  
20 on addressing the climate crisis and make United  
21 States climate action and climate diplomacy a more  
22 central tenet of United States foreign policy;

23           (2) to improve the United States commitment  
24 to taking more ambitious action to help mitigate  
25 global greenhouse gas emission and improve devel-

1 oping countries' resilience and adaptation capacities  
2 to the effects of climate change;

3 (3) to ensure the United States maintains com-  
4 petitive advantage over global strategic competitors  
5 in diplomacy and new technological development;

6 (4) to encourage the pursuit of new bilateral co-  
7 operation agreements with other world powers on  
8 initiatives to advance global clean energy innovation  
9 and other measures to mitigate global greenhouse  
10 gas emissions and improve climate change adapta-  
11 tion capacities;

12 (5) to ensure that the United States national  
13 security apparatus integrates critically important  
14 data on the compounding effects that climate change  
15 is having on global security risks by enhancing our  
16 understanding of how, where, and when such effects  
17 are destabilizing countries and regions in ways that  
18 may motivate conflict, displacement, and other driv-  
19 ers of insecurity; and

20 (6) to authorize funding and programs to sup-  
21 port a reaffirmation of the United States' commit-  
22 ments to international cooperation and support for  
23 developing and vulnerable countries to take climate  
24 action.

23 on emerging events exacerbated by climate  
24 change and the legal, procedural, and resource  
25 constraints faced by the Department of State

1 and the United States Agency for International  
2 Development throughout respective budgeting,  
3 strategic planning, and management cycles to  
4 support the prevention of and response to  
5 emerging events exacerbated by climate change;

6 (B) current annual global assessments of  
7 emerging events exacerbated by climate change;

8 (C) recommendations to further strengthen  
9 United States capabilities described in this sec-  
10 tion; and

11 (D) consideration of analysis, reporting,  
12 and policy recommendations by civil society,  
13 academic, and nongovernmental organizations  
14 and institutions, and partner countries to pre-  
15 vent and respond to emerging events exacer-  
16 bated by climate change;

17 (2) recommendations to ensure shared responsi-  
18 bility by—

19 (A) enhancing multilateral mechanisms for  
20 preventing, mitigating, and responding to  
21 emerging events exacerbated by climate change;  
22 and

23 (B) strengthening regional organizations;  
24 and

1 actions and commitments to ensure a level playing  
2 field with the United States and its allies and part-  
3 ners;

4 (2) other countries look toward the United  
5 States and the PRC, as the world's largest emitters  
6 and largest economies, for leadership by example to  
7 effectively mitigate greenhouse gas emissions, de-  
8 velop and deploy energy generation technologies, and  
9 integrate sustainable adaptation solutions to the in-  
10 evitable effects of climate change;

11 (3) given the volume of the PRC's greenhouse  
12 gas emissions and the scientific imperative to swiftly  
13 reduce global greenhouse gas emissions to net-zero  
14 emissions around 2050, China should—

15 (A) revise its long-term pledge;

16 (B) seek to immediately peak its emissions;

17 (C) begin reducing its greenhouse gas  
18 emissions significantly to meet a more ambi-  
19 tious long-term 2050 reductions target; and

20 (D) update its nationally determined con-  
21 tribution along a trajectory that aligns with  
22 achieving a more ambitious net-zero by 2050  
23 emissions target;

24 (4) it is in the United States national interest  
25 to emphasize the environment and climate change in

1 its bilateral engagement with the PRC, as global cli-  
2 mate risks cannot be mitigated without a significant  
3 reduction in PRC domestic and overseas emissions;

4 (5) the United States and the PRC, to the ex-  
5 tent practicable, should coordinate on making and  
6 delivering ambitious pledges to reduce greenhouse  
7 gas emissions, with aspirations towards achieving  
8 net zero greenhouse gas emissions by 2050;

9 (6) the United States and its allies and part-  
10 ners should work together, using diplomatic and eco-  
11 nomic tools, to hold the PRC accountable for any  
12 failure by the PRC—

13 (A) to increase ambition in its 2030 na-  
14 tionally determined contribution, in line with  
15 net zero greenhouse gas emissions by 2050 be-  
16 fore the 26th Conference of the Parties to the  
17 UNFCCC scheduled for November 2021 and  
18 meeting a more ambitious nationally determined  
19 contribution;

20 (B) to work faithfully to uphold the prin-  
21 ciples, goals, and rules of the Paris Agreement;

22 (C) to avoid and prohibit efforts to under-  
23 mine or devolve the Paris Agreement's rule or  
24 underlying framework, particularly within areas

1 of accountability transparency, and shared re-  
2 sponsibility among all parties;

3 (D) to eliminate greenhouse gas intensive  
4 projects from the PRC's Belt and Road Initia-  
5 tive and other overseas investments, includ-  
6 ing—

7 (i) working with United States allies  
8 and partners to eliminate support for coal  
9 power production projects in the Belt and  
10 Road Initiative;

11 (ii) providing financing and project  
12 support for cleaner and less risky alter-  
13 natives; and

14 (iii) undertaking “parallel initiatives”  
15 to enhance capacity building programs and  
16 overseas sustainable investment criteria,  
17 including in areas such as integrated en-  
18 ergy planning, power sector reform, just  
19 transition, distributed generation, procure-  
20 ment, transparency, and standards to sup-  
21 port low-emissions growth in developing  
22 countries; and

23 (E) to phase out existing coal power plants  
24 and reduce net coal power production;

1           (7) the United States should pursue confidence-  
2 building opportunities for the United States and the  
3 PRC to undertake “parallel initiatives” on clean en-  
4 ergy research, development, finance, and deploy-  
5 ment, including through economic and stimulus  
6 measures with clear, mutually agreed upon rules and  
7 policies to protect intellectual property, ensure equi-  
8 table, nonpunitive provision of support, and verify  
9 implementation, which would provide catalytic  
10 progress towards delivering a global clean energy  
11 transformation that benefits all people;

12           (8) the United States should pursue cooperative  
13 initiatives to reduce global deforestation, including  
14 efforts to shift toward the import and consummation  
15 of forest and agricultural commodities that are pro-  
16 duced in a manner that does not contribute to defor-  
17 estation;

18           (9) the United States should pursue appro-  
19 priate scientific cooperative exchanges and research  
20 that align with United States interests and those of  
21 its international partners and allies, provide reci-  
22 procity of access, protect intellectual property rights,  
23 and preserve the values and human rights interests  
24 of the American people;

1           (10) the U.S. Special Presidential Envoy for  
2           Climate should seek to work with other countries to  
3           require China end its classification of “developing  
4           nation” within the Paris Agreement; and

5           (11) the United States should seek to require  
6           the Chinese Communist Party to match emission  
7           cutting targets established by the United States.

12          tunities to partner with multilateral development finance  
13          institutions to develop financing tools based on shared de-  
14          velopment finance criteria and mechanisms to support in-  
15          vestments in developing countries that—

20          (b) **PARTNERSHIP AGREEMENT.**—The Chief Execu-

24          velopment finance institutions to leverage the respective  
25          available funds to support low carbon economic develop-

1 ment, which may include clean energy including renewable  
2 and nuclear energy projects, environmental adaptation,  
3 and resilience activities in countries.

11 siliance, and environmental adaptation projects that  
12 advance the development objectives of the United  
13 States overseas and provide viable alternatives to  
14 projects that would otherwise be included within the  
15 People’s Republic of China’s Belt and Road Initia-  
16 tive.

16                   countries, particularly countries with little ca-  
17                   pacity to reduce greenhouse gas emissions and  
18                   deploy clean energy facilities, and countries that  
19                   lack sufficient policies to advance such develop-  
20                   ment;

21                   (C) encouraging the development of stand-  
22                   ards and practices, and increasing transparency  
23                   and accountability efforts for the reduction of  
24                   short-lived climate pollutants;

1 (D) integrating tracking and monitoring  
2 systems into industrial processes;

3 (E) fostering research to improve scientific  
4 understanding of—

5 (i) how high concentrations of short-  
6 lived climate pollutants affect human  
7 health, safety, and our environment;

8 (ii) changes in the amount and re-  
9 gional concentrations of black carbon and  
10 methane emissions, based on scientific  
11 modeling and forecasting;

12 (iii) effective means to sequester  
13 short-lived climate pollutants; and

14 (iv) other related areas of research the  
15 United States representatives deem nec-  
16 essary;

17 (F) encouraging the World Bank, the  
18 International Monetary Fund, and other inter-  
19 national finance organizations—

20 (i) to prioritize efforts to combat  
21 short-lived climate pollutants; and

22 (ii) to enhance or maintain trans-  
23 parency by providing sufficient and ade-  
24 quate information to facilitate independent

1 verification of their climate finance report-  
2 ing;

3 (G) encouraging observers of the Arctic  
4 Council (including India and China) to adopt  
5 mitigation plans consistent with the findings  
6 and recommendations of the Arctic Council's  
7 Framework for Action on Black Carbon and  
8 Methane;

9 (H) collaborating on technological ad-  
10 vances in short-lived climate pollutants mitiga-  
11 tion, sequestration and reduction technologies;  
12 and

13 (I) advising foreign countries, at both the  
14 national and subnational levels, regarding the  
15 development and execution of regulatory poli-  
16 cies, services, and laws pertaining to reducing  
17 the creation and the collection and safe man-  
18 agement of short-lived climate pollutants.

19 (b) ENHANCING INTERNATIONAL OUTREACH AND  
20 PARTNERSHIP OF UNITED STATES AGENCIES INVOLVED  
21 IN GREENHOUSE GAS REDUCTIONS.—

22 (1) FINDING.—Congress recognizes the success  
23 of the United States Climate Alliance and the green-  
24 house gas reduction programs and strategies estab-

1 lished by the Environmental Protection Agency's  
2 Center for Corporate Climate Leadership.

3 (2) AUTHORIZATION OF EFFORTS TO BUILD  
4 FOREIGN PARTNERSHIPS.—The Secretary of State,  
5 in coordination with the Administrator of the Envi-  
6 ronmental Protection Agency, shall build partner-  
7 ships, as appropriate, with the governments of for-  
8 eign countries and to support international efforts to  
9 reduce short-lived climate pollutants.

10 (c) CONSIDERATION OF SHORT-LIVED CLIMATE POL-  
11 LUTANTS IN NEGOTIATING INTERNATIONAL AGREE-  
12 MENTS.—In negotiating any relevant international agree-  
13 ment with any country or countries after the date of the  
14 enactment of this Act, the President shall—

15 (1) consider the impact short-lived climate pol-  
16 lutants are having on the increase in global average  
17 temperatures and the resulting global climate  
18 change;

19 (2) consider the effects that climate change is  
20 having on the environment; and

21 (3) ensure that the agreement strengthens ef-  
22 forts to significantly reduce short-lived climate pol-  
23 lutants from such country or countries.

24 (d) PLAN TO REDUCE BLACK CARBON EMISSIONS  
25 FROM SHIPS.—The Administrator of the Environmental

1 Protection Agency, in consultation with the Secretary of  
2 State, the Secretary of Energy, the Secretary of Transpor-  
3 tation, the Secretary of Commerce, and the Commandant  
4 of the Coast Guard, shall develop a comprehensive plan  
5 to reduce black carbon emissions from ships based on ap-  
6 propriate emissions data from oceangoing vessels. The  
7 plan shall provide for such reduction through—

8 (1) a clean freight partnership;

9 (2) limits on black carbon emissions; and

10 (3) efforts that include protection of access to  
11 critical fuel shipments and emergency needs of  
12 coastal communities.

13 (e) ESTABLISHMENT OF INTERAGENCY WORKING  
14 GROUP ON SHORT-LIVED CLIMATE POLLUTANTS MITIGA-  
15 TION.—

16 (1) ESTABLISHMENT.—Not later than 90 days  
17 after the date of enactment of this Act, the Presi-  
18 dent shall establish a task force, to be known as the  
19 Interagency Working Group on Short-Lived Climate  
20 Pollutant Mitigation.

21 (2) MEMBERSHIP.—The members of the Work-  
22 ing Group shall include the head (or a designee  
23 thereof) of—

24 (A) the Department of Agriculture;

25 (B) the Department of Commerce;

- 1 (C) the Department of Defense;
- 2 (D) the Department of Energy;
- 3 (E) the Department of Health and Human  
4 Services;
- 5 (F) the Department of the Interior;

10 Administration;

- 17 (A) review the policy recommendations  
18 made by—
- 19 (i) the Intergovernmental Panel on  
20 Climate Change;

2 ness and Resilience;  
3 (v) the Clean Cooking Alliance;  
4 (vi) the International Maritime Orga-  
5 nization; and  
6 (vii) other relevant organizations and  
7 institutions; and  
8 (B) develop an action plan to reduce short-  
9 lived climate pollutants that incorporates any  
10 appropriate proposals or recommendations

13 **SEC. 30609. BUILDING UNITED STATES ECONOMIC GROWTH**  
14 **AND TECHNOLOGICAL INNOVATION**  
15 **THROUGH THE GREEN CLIMATE FUND.**

16 (a) GREEN CLIMATE FUND.—

17 (1) FINDINGS.—Congress finds that—

18 (A) climate change most severely impacts  
19 vulnerable and disadvantaged communities in  
20 the United States and around the world;

21 (B) it is the responsibility of the United  
22 States Government to work with and press  
23 other countries to address environmental justice  
24 and climate justice;

1 (C) the report of the United Nations Envi-  
2 ronment Programme entitled “Climate Change  
3 and the Cost of Capital in Developing Coun-  
4 tries”, dated May 2018, found that, in the 10  
5 years prior to the publication of the report, cli-  
6 mate vulnerability has cost the 20 nations most  
7 affected by catastrophes rooted in climate  
8 change an additional \$62,000,000,000 in inter-  
9 est payments alone;

10 (D) individuals and families, particularly  
11 communities of color, indigenous communities,  
12 and low-income communities, that are on the  
13 frontlines of climate change across the globe are  
14 often in close proximity to environmental  
15 stressors or sources of pollution;

16 (E) the communities described in subpara-  
17 graph (D)—

18 (i) are often the first exposed to the  
19 causes and impacts of climate change; and

20 (ii) have the fewest resources with  
21 which to mitigate those impacts or to relo-  
22 cate;

23 (F) all efforts to adapt to and mitigate cli-  
24 mate change must include specific protections  
25 for and acknowledgment of the harm of climate

1 change to communities of color, indigenous peo-  
2 ples, women, and other frontline communities  
3 and marginalized peoples around the world;

4 (G) in Paris, on December 12, 2015, the  
5 parties to the United Nations Framework Con-  
6 vention on Climate Change adopted the Paris  
7 Agreement, a benchmark agreement—

8 (i) to combat climate change;

9 (ii) to accelerate and intensify the ac-  
10 tions and investments needed for a sus-  
11 tainable low carbon future; and

12 (iii) that acknowledges, “Parties  
13 should, when taking action to address cli-  
14 mate change, respect, promote and con-  
15 sider their respective obligations on human  
16 rights, the right to health, the rights of in-  
17 digenous peoples, local communities, mi-  
18 grants, children, persons with disabilities  
19 and people in vulnerable situations and the  
20 right to development, as well as gender  
21 equality, empowerment of women and in-  
22 tergenerational equity”;

23 (H) the Paris Agreement—

1 (i) notes the importance of “climate  
2 justice” when mitigating and adapting to  
3 climate change; and

4 (ii) recognizes “the need for an effec-  
5 tive and progressive response to the urgent  
6 threat of climate change”;

7 (I) it is imperative for all countries to un-  
8 dertake mitigation activities to rapidly meet the  
9 goal of limiting global warming to not more  
10 than 1.5 degrees Celsius;

11 (J) developed countries have the greatest  
12 capacity to mitigate their greenhouse gas emis-  
13 sions, while—

14 (i) developing countries have the least  
15 capacity to engage in mitigation activities;  
16 and

17 (ii) the capacity of developing coun-  
18 tries to engage in mitigation activities is  
19 less than the national mitigation potential  
20 of those developing countries;

21 (K) the determination for the fair share of  
22 mitigation and adaptation activities for each  
23 country must take into account—

24 (i) the historic greenhouse gas emis-  
25 sions of each country; and

1 (ii) the current capacity of each coun-  
2 try to both mitigate greenhouse gas emis-  
3 sions and adapt to climate impacts;

4 (L) developed countries that have histori-  
5 cally emitted a disproportionately high share of  
6 greenhouse gas emissions, and reaped the eco-  
7 nomic benefits of those polluting activities, have  
8 a corresponding disproportionately greater re-  
9 sponsibility to engage in global mitigation and  
10 adaptation activities, as compared to less indus-  
11 trialized countries that have historically polluted  
12 far less;

13 (M) the only realistic way for less industri-  
14 alized countries to meet their full mitigation po-  
15 tential is through international climate financ-  
16 ing by more developed countries;

17 (N) in the 2009 Copenhagen Accord, devel-  
18 oped countries committed to jointly mobilize,  
19 starting in 2020, \$100,000,000,000 per year in  
20 public climate financing (as well as private in-  
21 vestment and other alternative forms of fi-  
22 nance), for developing countries, a commitment  
23 reaffirmed in 2015 in Decision 1/CP.21 of the  
24 United Nations Framework Convention on Cli-  
25 mate Change, Adoption of the Paris Agreement;

1 (O) the \$100,000,000,000 commitment de-  
2 scribed in subparagraph (N) was a political  
3 compromise that falls short of the actual fi-  
4 nancing needs for climate action in developing  
5 countries;

6 (P) Bloomberg New Energy Finance has  
7 estimated that the transition to renewable en-  
8 ergy sources in developing countries will require  
9 hundreds of billions of dollars annually;

10 (Q) the United Nations Environment Pro-  
11 gramme has estimated that adaptation needs  
12 relating to climate change in developing coun-  
13 tries may be as much as \$300,000,000,000 an-  
14 nually by 2030;

15 (R) the Green Climate Fund was created  
16 in 2010 by 194 countries to serve as a crucial  
17 financing mechanism to help developing coun-  
18 tries limit or reduce greenhouse gas emissions  
19 and adapt to climate change;

20 (S) in 2015, the United Nations Frame-  
21 work Convention on Climate Change agreed  
22 that the Green Climate Fund should serve the  
23 goals of the Paris Agreement, which states that  
24 “developed country Parties shall provide finan-  
25 cial resources to assist developing country Par-

1 ties with respect to both mitigation and adapta-  
2 tion in continuation of their existing obligations  
3 under the Convention”;

4 (T) the Green Climate Fund is an essential  
5 institution for climate financing, as the Green  
6 Climate Fund ensures—

7 (i) balanced governance between de-  
8 veloped and developing countries;

9 (ii) stakeholder engagement and dis-  
10 course;

11 (iii) a balanced approach between  
12 mitigation and adaptation;

13 (iv) fair and equal labor and working  
14 conditions;

15 (v) conservation of biodiversity and  
16 critical habitats; and

17 (vi) strong environmental, social, and  
18 gender protections;

19 (U) the Green Climate Fund—

20 (i) promotes and protects human  
21 rights and the rights of marginalized  
22 groups, including indigenous peoples,  
23 women, children, and people with disabil-  
24 ities; and

1 (ii) continues to take steps to  
2 strengthen protection for marginalized  
3 groups;

4 (iii) the United States committed  
5 \$3,000,000,000 of the first  
6 \$10,000,000,000 raised for the initial re-  
7 source mobilization period of the Green  
8 Climate Fund, though only  $\frac{1}{3}$  of this  
9 pledge was fulfilled, leaving the United  
10 States the only country to fall substantially  
11 short of a commitment of a country to the  
12 Green Climate Fund; and

13 (V) the Green Climate Fund is a fully  
14 operational and proven institution supporting  
15 well over 100 projects and programs in devel-  
16 oping countries around the world.

17 (2) STATEMENT OF POLICY.—It is the policy of  
18 the United States to provide climate financing—

19 (A) as an essential part of the global effort  
20 to combat climate change; and

21 (B) that—

22 (i) upholds the principles of environ-  
23 mental justice and climate justice;

1 (ii) supports programs and projects  
2 developed by recipient countries and com-  
3 munities;

4 (iii) is designed and implemented with  
5 the free, prior, and informed consent of in-  
6 digenous peoples and other impacted com-  
7 munities;

8 (iv) promotes gender equality as es-  
9 sential in all of the projects and programs  
10 supported by climate financing;

11 (v) includes best practices for environ-  
12 mental and social safeguards to ensure  
13 that projects and programs supported by  
14 climate financing respect fundamental  
15 human rights; and

16 (vi) addresses both mitigation and ad-  
17 aptation as essential aspects of responding  
18 to climate change.

19 (b) AUTHORIZATION OF APPROPRIATIONS.—There  
20 are authorized to be appropriated for contributions to the  
21 Green Climate Fund \$4,000,000,000 for each of the fiscal  
22 years 2022 and 2023.

23 (c) SENSE OF CONGRESS.—It is the sense of Con-  
24 gress that the climate financing needs to achieve the  
25 greenhouse gas emissions reductions required to keep the

1 planet at or below 1.5 degrees Celsius of global warming  
2 are significantly greater than the amount of funds author-  
3 ized to be appropriated under subsection (a).

4 **SEC. 30610. ENSURING A WHOLE-OF-GOVERNMENT RE-**  
5 **SPONSE TO CLIMATE ACTION.**

6 (a) ESTABLISHMENT.—The Secretary of State shall  
7 establish a Climate Impacts Task Force (referred to in  
8 this section as the “Task Force”) with the mandate to—

9 (1) monitor international climate and related  
10 impacted social conditions to anticipate and prevent  
11 climate and environmental stressors from evolving  
12 into national security risks;

13 (2) monitor and assess climate action under-  
14 taken by other countries in response to national  
15 strategies and international commitments, and co-  
16 ordinate closely with allies and partners to ensure a  
17 coordinated response against any state or non-state  
18 actors, including the People’s Republic of China  
19 (PRC) and PRC companies, undermining global cli-  
20 mate objectives, norms, and practices;

21 (3) strengthen the efforts of the Department of  
22 State and the United States Government to act  
23 proactively to mitigate the human harms and poten-  
24 tial for national security risks resulting from inter-

1 national emerging events exacerbated by climate  
2 change; and

3 (4) assist other Federal departments and agen-  
4 cies, foreign partners, and multilateral organizations  
5 in their efforts to do the same.

6 (b) LEADERSHIP.—The Secretary of State shall des-  
7 ignate a senior career official, as appropriate, of the De-  
8 partment of State to serve as the Chair of the Task Force.  
9 Such official shall report to the Secretary of State.

10 (c) RESPONSIBILITIES.—Under the direction of the  
11 Chair, the Task Force shall—

12 (1) meet regularly to ensure that events exacer-  
13 bated by climate change and the risk of emerging  
14 events exacerbated by climate change throughout the  
15 world are adequately considered and addressed;

16 (2) facilitate the development and execution of  
17 policies and tools to enhance the capacity of the  
18 United States to prevent and respond to emerging  
19 events exacerbated by climate change worldwide;

21 that heighten the risk of emerging events exacer-  
22 bated by climate change;

24 related to the prevention of and response to emerg-

1 ing events exacerbated by climate change with re-  
2 spect to certain regions or particular countries;

3 (5) incorporate lessons learned from past  
4 United States efforts to prevent and respond to  
5 emerging events exacerbated by climate change and  
6 other impacts that are comparable in scope or sever-  
7 ity;

8 (6) provide the Secretary of State with rec-  
9 ommendations and potential improvements to poli-  
10 cies, programs, resources, and tools related to the  
11 prevention of and response to emerging events exac-  
12 erbated by climate change;

13 (7) coordinate the Department of State's en-  
14 gagement in interagency processes led by the Na-  
15 tional Security Council that share the Task Force's  
16 objectives;

17 (8) conduct outreach not less frequently than  
18 biannually, with representatives of nongovernmental  
19 organizations dedicated to the prevention of and re-  
20 sponse to emerging events exacerbated by climate  
21 change and other appropriate parties, to—

22 (A) receive assistance relating to the Task  
23 Force's efforts to address emerging events exac-  
24 erbated by climate change and develop new or

1 improved policies, programs, resources, and  
2 tools; and

3 (B) provide a public understanding of the  
4 work of the Task Force;

5 (9) in carrying out paragraphs (1) through (9),  
6 focus on particular ways for the United States to de-  
7 velop, strengthen, and enhance its capabilities to—

8 (A) monitor, receive early warning of, and  
9 coordinate responses to potential emerging  
10 events exacerbated by climate change;

11 (B) engage allies and partners, including  
12 multilateral and regional institutions, to build  
13 capacities and mobilize action for preventing  
14 and responding to emerging events exacerbated  
15 by climate change;

16 (C) encourage the deployment of civilian  
17 advisors to prevent and respond to emerging  
18 events exacerbated by climate change;

19 (D) increase the capacity of and develop  
20 doctrine for the United States Foreign Service,  
21 civil service, Armed Forces, development profes-  
22 sionals, and other actors to engage in the full  
23 spectrum of activities to prevent and respond to  
24 emerging events exacerbated by climate change;

1           (E) develop and implement tailored foreign  
2           assistance programs that address and mitigate  
3           the risks of emerging events exacerbated by cli-  
4           mate change;

5           (F) ensure intelligence collection, analysis,  
6           and sharing of appropriate information; and

7           (G) address any other issues that the Task  
8           Force determines appropriate;

9           (10) in carrying out paragraphs (1) through  
10          (9), receive support from bureaus and offices of the  
11          Department of State, as the Secretary of State de-  
12          termines appropriate; and

13          (11) facilitate annual coordination between the  
14          Department of State and other appropriate depart-  
15          ments and agencies to ensure international and do-  
16          mestic climate change objectives are aligned.

17          (d) COMPOSITION.—The Task Force shall—

18               (1) seek to ensure that its efforts complement  
19               and support interagency processes led by the Na-  
20               tional Security Council that share the Task Force’s  
21               objectives; and

22               (2) operate with regular consultation and par-  
23               ticipation of designated representatives, at the As-  
24               sistant Secretary level or higher, from all such exec-

1       utive departments, agencies, or offices as the Chair  
2       may designate.

3       (e) REPORT.—Not later than 180 days after the date  
4 of the enactment of this Act and every 2 years thereafter  
5 for the following 10 years, the Secretary of State, in con-  
6 sultation with the Task Force, shall submit to the Com-  
7 mittee on Foreign Relations and the Committee on Appro-  
8 priations of the Senate and the Committee on Foreign Af-  
9 fairs and the Committee on Appropriations of the House  
10 of Representatives an unclassified report, with a classified  
11 annex if necessary, that includes—

12           (1) a review, in consultation with the des-  
13 igned representatives specified in subsection (d),  
14 consisting of—

15           (A) an evaluation of the efficacy of current  
16 efforts based on United States and locally iden-  
17 tified indicators, including capacities and con-  
18 straints for United States Government-wide de-  
19 tection, early warning and response, informa-  
20 tion-sharing, contingency planning, and coordi-  
21 nation of efforts to prevent and respond to  
22 emerging events exacerbated by climate change;

23           (B) an assessment of the funding expended  
24 by relevant Federal departments and agencies  
25 on emerging events exacerbated by climate

1 change and the legal, procedural, and resource  
2 constraints faced by the Department of State  
3 and the United States Agency for International  
4 Development throughout respective budgeting,  
5 strategic planning, and management cycles to  
6 support the prevention of and response to  
7 emerging events exacerbated by climate change;

8 (C) current annual global assessments of  
9 emerging events exacerbated by climate change;

10 (D) recommendations to further strength-  
11 en United States capabilities described in sub-  
12 paragraph (A); and

13 (E) consideration of analysis, reporting,  
14 and policy recommendations by civil society,  
15 academic, and other nongovernmental organiza-  
16 tions and institutions to prevent and respond to  
17 emerging events exacerbated by climate change;

18 (2) recommendations to ensure shared responsi-  
19 bility by—

20 (A) enhancing multilateral mechanisms for  
21 preventing, mitigating, and responding to  
22 emerging events exacerbated by climate change;  
23 and

24 (B) strengthening regional organizations;  
25 and

1           (3) the implementation status of the rec-  
2           ommendations included in the review under para-  
3           graph (1).

4           (f) BRIEFINGS AND MATERIALS.—The Chair and  
5           members of the Task Force shall, not less frequently than  
6           annually, provide briefings and materials to the Com-  
7           mittee on Foreign Relations of the Senate and the Com-  
8           mittee on Foreign Affairs of the House of Representatives.

9           (g) REPORT BY THE DIRECTOR OF NATIONAL INTEL-  
10          LIGENCE.—The Director of National Intelligence is en-  
11          couraged to include, in his or her annual (or more often  
12          as appropriate) unclassified testimony, accompanied by a  
13          classified annex, if necessary, to Congress (including the  
14          Permanent Select Committee on Intelligence of the House  
15          of Representatives and the Select Committee on Intel-  
16          ligence of the Senate) on threats to United States national  
17          security—

18                 (1) a review of countries and regions at risk of  
19                 emerging events exacerbated by climate change; and

20                 (2) whenever possible, specific identification of  
21                 countries and regions at immediate risk of emerging  
22                 events exacerbated by climate change.

23           (h) SENSE OF CONGRESS.—It is the sense of Con-  
24          gress that rapid and robust climate change response mech-  
25          anisms, including the establishment of the Task Force, are

1 critical for ensuring other countries remain accountable to  
2 their climate action commitments as well as preserving the  
3 national security and economic interests of the United

5 **SEC. 30611. WORKING WITH INTERNATIONAL PARTNERS TO**  
6 **REDUCE DEFORESTATION.**

7 (a) FINDINGS.—Congress finds the following:

8 (1) The People’s Republic of China (PRC) is  
9 having a substantial impact on the most important  
10 forest ecosystems in the world, and illegal logging  
11 and agricultural expansion have caused the massive  
12 forest loss. According to the World Resources Insti-  
13 tute, the PRC has become the world’s leading im-  
14 porter and consumer of timber products, soybeans,  
15 and palm oil, as well as the largest manufacturing  
16 and export country of forest products.

17 (2) In 2016, the PRC imported logs from more  
18 than 100 countries in the world. According to a  
19 Global Witness report, between January 2013 and  
20 April 2020, Chinese financial institutions provided  
21 more than \$22.5 billion to major companies that  
22 produce and trade commodities at high risk of driv-  
23 ing deforestation. These commodities include beef,  
24 soy, palm oil, paper, pulp, rubber, and timber.

1           (3) Further, the growing international demand  
2 for such agricultural commodities causes the major-  
3 ity of deforestation emissions globally, and most of  
4 the associated land-clearing violates applicable na-  
5 tional or local laws. According to a 2021 Forest  
6 Trends report, at least 69 percent of forest land con-  
7 verted to pasture or cropland was cleared illegally.

8           (4) The growing demand for timber and agri-  
9 cultural commodities has accelerated  
10 unsustainable—and often illegal—logging and the  
11 trade of timber products, which harms the countries  
12 in which it takes place by siphoning away govern-  
13 ment tax revenue, transforming the livelihoods of  
14 communities dependent on forests, and hurting legal  
15 businesses' competitiveness. Further, illegal logging  
16 and illegal conversion of forest to agricultural land  
17 threatens biodiversity and accelerates deforestation  
18 and forest degradation in key timber supply coun-  
19 tries, undermining United States and global climate  
20 goals.

21           (5) The United States should work with inter-  
22 national partners to ensure that Chinese and other  
23 banks factor into lending practices the environ-  
24 mental and social impact of the companies they fi-  
25 nance. This should include pressuring the PRC and

1 other countries to revise regulations to require the  
2 banking sector not to finance companies linked to  
3 deforestation and include rigorous checks on the  
4 companies operating in sectors or regions where  
5 there is a high risk of deforestation to ensure they  
6 are not associated with deforestation.

7 (b) DEFINITIONS.—In this section:

8 (1) ADMINISTRATOR.—Except as otherwise ex-  
9 pressly provided, the term “Administrator” means  
10 the Administrator of the United States Agency for  
11 International Development.

12 (2) DEFORESTATION.—The term “deforest-  
13 ation” means a change in land use from a forest (in-  
14 cluding peatlands) to any other land use.

15 (3) DEVELOPING COUNTRY.—The term “devel-  
16 oping country” means a country eligible to receive  
17 official development assistance according to the in-  
18 come guidelines of the Development Assistance Com-  
19 mittee of the Organisation for Economic Co-oper-  
20 ation and Development.

21 (4) EMISSIONS REDUCTIONS.—The term “emis-  
22 sions reductions” means greenhouse gas emissions  
23 reductions achieved from reduced or avoided defor-  
24 estation under this section.

25 (5) FOREST.—

1 (A) IN GENERAL.—The term “forest”  
2 means a terrestrial ecosystem, including wet-  
3 land forests, comprised of native tree species  
4 generated and maintained primarily through  
5 natural ecological and evolutionary processes.

6 (B) EXCLUSION.—The term “forest” does  
7 not include plantations, such as crops of trees  
8 planted by humans primarily for the purposes  
9 of harvesting.

10 (6) FOREST DEGRADATION.—The term “forest  
11 degradation” is any reduction in the carbon stock of  
12 a forest due to the effects of human land-use activi-  
13 ties, including such land-use activities on peatlands.

14 (7) INTACT FOREST.—The term “intact forest”  
15 means an unbroken expanse of natural ecosystems  
16 within the global extent of forest cover that—

17 (A) covers an area of at least 500 square  
18 kilometers and is at least 10 kilometers in each  
19 direction; and

20 (B) contains forest and non-forest eco-  
21 systems minimally influenced by human eco-  
22 nomic activity and large enough that all native  
23 biodiversity, including viable populations of  
24 wide-ranging species, could be maintained.

1           (9) LEAKAGE.—The term “leakage” means the  
2 unexpected loss of anticipated carbon benefits due to  
3 the displacement of activities in a project area to  
4 areas outside the project, resulting in carbon emis-  
5 sions.

6           (10) LEAKAGE PREVENTION ACTIVITIES.—The  
7 term “leakage prevention activities” means activities  
8 in developing countries that are directed at pre-  
9 serving existing forest carbon stocks, including for-  
10 ested wetlands and peatlands that might, absent  
11 such activities, be lost through leakage.

12           (11) NATIONAL DEFORESTATION REDUCTION  
13 ACTIVITIES.—The term “national deforestation re-  
14 duction activities” means activities in developing  
15 countries that reduce a quantity of greenhouse gas  
16 emissions from deforestation that is calculated by  
17 measuring actual emissions against a national defor-  
18 estation baseline established pursuant to subpara-  
19 graphs (B) and (C) of subsection (d)(4).

20           (12) SUBNATIONAL DEFORESTATION AND FOR-  
21 EST DEGRADATION REDUCTION ACTIVITIES.—The  
22 term “subnational deforestation and forest degrada-  
23 tion reduction activities” means activities in devel-  
24 oping countries that reduce a quantity of greenhouse  
25 gas emissions from deforestation and forest degrada-

1       tion that is calculated by measuring actual emissions  
2       using an appropriate baseline, or an alternative de-  
3       termined under subsection (d)(4)(B)(ii), established  
4       by the Administrator at the State or provincial level.

5       (c) PURPOSES.—The purposes of this section are to  
6       provide United States assistance to developing countries  
7       to develop, implement, and improve actions that reduce  
8       deforestation and forest degradation or conserve or restore  
9       forest ecosystems—

10           (1) to protect the value of forest ecosystems  
11           with respect to permanent carbon capture and se-  
12           questration in a manner in which such value is  
13           measurable, reportable, and verifiable; and

14           (2) in a manner that—

15                   (A) is consistent with and enhances the  
16                   implementation of complementary United  
17                   States policies that support the good govern-  
18                   ance of forests, biodiversity conservation, and  
19                   environmentally sustainable development;

20                   (B) takes into consideration the views and  
21                   participation of local communities and most vul-  
22                   nerable communities and populations, particu-  
23                   larly forest-dependent communities; and

24                   (C) incorporates the right to free prior and  
25                   informed consent of indigenous peoples.

1 (d) EMISSIONS REDUCTIONS THROUGH REDUCED  
2 DEFORESTATION.—

3 (1) ESTABLISHMENT OF PROGRAM.—Not later  
4 than 1 year after the date of the enactment of this  
5 Act, the Administrator, in consultation with other  
6 appropriate agencies, shall establish a program to  
7 provide assistance to reduce deforestation in devel-  
8 oping countries and its impacts, in accordance with  
9 this section.

10 (2) OBJECTIVES.—The objectives of the pro-  
11 gram established under paragraph (1) shall be—

12 (A) to achieve—

13 (i) emissions reductions of at least  
14 7,000,000,000 tons of carbon dioxide  
15 equivalent in 2025;

16 (ii) cumulative emissions reductions of  
17 at least 11,000,000,000 tons of carbon di-  
18 oxide equivalent by December 31, 2030;

2 participate in international markets for  
3 international offset credits for reduced  
4 emissions from deforestation;

5 (ii) supporting the development of  
6 overseas domestic policy frameworks to en-  
7 sure effective, efficient, and equitable ben-

9 issued by national and subnational govern-  
10 ments; and

11 (iii) promoting and expanding land ti-  
12 tling initiatives and programs in other

16 nerable to leakage, particularly in developing  
17 countries with largely intact native forests;

18 (D) to build the scientific knowledge and  
19 institutional capacity to help developing coun-  
20 tries—

21 (i) monitor the effects of climate  
22 change on their forests;

23 (ii) develop and implement strategies  
24 to conserve their forests; and

1 (iii) support forest-dependent commu-  
2 nities adapt to climate change;

3 (E) to the extent practicable, to reduce de-  
4 forestation in ways that reduce the vulnerability  
5 and increase the resilience to climate effects for  
6 forests and forest-dependent communities;

7 (F) to prevent degradation and fragmenta-  
8 tion of forests and other intact ecosystems, par-  
9 ticularly in tropical countries, including by pro-  
10 viding assistance or supporting policies to—

11 (i) conserve, protect, and restore the  
12 integrity of such ecosystems; and

13 (ii) support the rights of Indigenous  
14 People and local communities and their  
15 ability to continue their effective steward-  
16 ship of their intact traditional lands and  
17 territories;

21 estation;

23 ESTATION REDUCTION PROGRAM.—

6 with other appropriate agencies, deter-  
7 mines—

11 stocks that may be at risk of deforest-  
12 ation or degradation;

18 tablished under paragraph (4); and

19 (iii) has entered into a bilateral or  
20 multilateral agreement or arrangement  
21 with the United States, or is part of an  
22 international program supported by the  
23 United States to prevent deforestation,  
24 that establishes the conditions of participa-  
25 tion by the country in the program estab-

1           lished under this section, which shall in-  
2           clude an agreement to meet the standards  
3           established under paragraph (4) for the ac-  
4           tivities to which such standards apply.

5           (B) EXCEPTION.—A developing country  
6           that does not meet the requirement described in  
7           paragraph (1)(A)(ii) may receive assistance  
8           under this section for the purpose of building  
9           capacity to meet such requirement.

10          (2) AUTHORIZED ACTIVITIES.—Subject to the  
11          requirements of this section, in providing assistance  
12          under this section, the Administrator may support

1 tact and primary forest areas and managed for-  
2 est areas;

3 (D) leakage prevention activities;

4 (E) the development and implementation  
5 of measurement, monitoring, reporting, and  
6 verification capacities and governance struc-  
7 tures, including legal regimes, standards, proc-  
8 esses, and safeguards, as established under  
9 paragraph (4), to enable a country to quantify  
10 emissions reductions for purposes of purchasing  
11 or trading subnational emissions reduction cred-  
12 its in carbon markets;

19 jectives of the Lacey Act Amendments of 1981  
20 (16 U.S.C. 3371 et seq.);

21 (H) the development and strengthening of  
22 governance capacities to reduce deforestation  
23 and other land use emissions and to combat il-  
24 legal logging and associated trade, including the  
25 development of systems for independent moni-

1 toring of the efficacy of forest law enforcement  
2 and increased enforcement cooperation, includ-  
3 ing joint efforts with Federal agencies, to en-  
4 force the Lacey Act Amendments of 1981 (16  
5 U.S.C. 3371 et seq.);

6 (I) programs to help countries strengthen  
7 the necessary governance and technological ca-

9 origin of agricultural commodities associated  
10 with tropical deforestation, such as beef, soy,  
11 palm oil, paper, pulp, cocoa, and rubber;

12 (J) the development and strengthening of

14                  results of the activities conducted under this  
15                  section.

16                  (3) MECHANISMS.—The Administrator shall  
17                  apply the administrative authorities under the For-  
18                  eign Assistance Act of 1961 (22 U.S.C. 2151 et  
19                  seq.), except to the extent inconsistent with the pro-  
20                  visions of this section, to the same extent and in the  
21                  same manner as such authorities apply to the imple-  
22                  mentation of such Act in order to support activities  
23                  to achieve the objectives described in subsection  
24                  (c)(2) by—

1 (A) developing and implementing programs  
2 and project-level activities that achieve such ob-  
3 jectives;

4 (B) to the extent practicable, giving pri-  
5 ority in any review process to activities under  
6 paragraph (2)(A); and

7 (C) as appropriate, considering multi-year  
8 funding arrangements in carrying out the pur-  
9 poses of this section.

10 (4) STANDARDS.—The Administrator, in con-  
11 sultation with other appropriate agencies, shall es-  
12 tablish program standards that—

13 (A) ensure that emissions reductions  
14 achieved through supported activities—

15 (i) are additional, measurable,  
16 verifiable, and monitored;

17 (ii) account for leakage, uncertainty,  
18 and permanence; and

19 (iii) at a minimum, meet the stand-  
20 ards established under the emissions unit  
21 criteria of the Carbon Offsetting and Re-  
22 duction Scheme for International Aviation  
23 (CORSLA) developed by the International  
24 Civil Aviation Organization (ICAO);

25 (B) require—

1 (i) the establishment of a national de-  
2 forestation baseline for each country with  
3 national deforestation reduction activities  
4 that is used to account for reductions  
5 achieved from such activities; or

6 (ii) if a developing country has estab-  
7 lished policies and taken measures to re-  
8 duce emissions from disturbed peatlands,  
9 deforestation, or forest degradation, but  
10 has not established a national baseline, the  
11 provision of a credible, transparent, accu-  
12 rate, and conservative alternative for quan-  
13 tifying emissions;

14 (C) provide that each national deforest-  
15 ation baseline established under subparagraph  
16 (B)(i)—

17 (i) is national, or subnational on an  
18 interim basis, in scope; and

19 (ii) is consistent with nationally ap-  
20 propriate mitigation commitments or ac-  
21 tions with respect to deforestation, taking  
22 into consideration—

23 (I) the average annual historical  
24 deforestation rates of the country dur-  
25 ing a period of at least 5 years; and

1 (II) the applicable drivers of de-  
2 forestation and other factors to ensure  
3 additionality;

4 (iii) establishes a trajectory that  
5 would result in zero net deforestation by  
6 not later than 20 years after the date on  
7 which the baseline is established;

8 (iv) is adjusted over time to account  
9 for changing national circumstances; and

10 (v) is designed to account for all sig-  
11 nificant sources of greenhouse gas emis-  
12 sions from deforestation in the country;

13 (D) with respect to assistance provided for  
14 activities described in subparagraph (A) or (B)  
15 of paragraph (2), require emissions reductions  
16 to be achieved and verified before the provision  
17 of any assistance under this section;

18 (E) with respect to accounting for sub-  
19 national deforestation and forest degradation  
20 reduction activities that lack the standardized  
21 or precise measurement and monitoring tech-  
22 niques needed for a full accounting of changes  
23 in emissions or baselines, or are subject to  
24 other sources of uncertainty, apply a conserv-

1           active discount factor to reflect the uncertainty  
2           regarding the levels of reductions achieved;

3           (F) ensure that activities under this sec-  
4           tion are designed, carried out, and managed—

5           (i) using forest management practices  
6           that, in an open and transparent process—

7           (I) improve the livelihoods of for-  
8           est communities in a manner that  
9           promotes the maintenance of intact  
10          forests, protects associated biodiver-  
11          sity, and restores native forest species  
12          and ecosystems while avoiding the in-  
13          troduction of invasive nonnative spe-  
14          cies;

15          (II) maintain natural biodiver-  
16          sity, resilience, and carbon storage ca-  
17          pacity of forests;

18          (III) to the extent practicable, do  
19          not adversely affect the permanence of  
20          forest carbon stocks or emissions re-  
21          ductions;

22          (IV) include broad stakeholder  
23          participation and the free prior and  
24          informed consent of affected indige-  
25          nous peoples; and

1 (V) take into account the needs  
2 and interests of local communities,  
3 forest-dependent communities, indige-  
4 nous peoples, and vulnerable social  
5 groups;

6 (ii) in consultation with, and with the  
7 full and effective participation of, local  
8 communities, indigenous peoples, and for-  
9 est-dependent communities in affected  
10 areas, as partners and primary stake-  
11 holders, before and during the design,  
12 planning, implementation, monitoring, and  
13 evaluation of activities; and

14 (iii) with equitable sharing of profits  
15 and benefits derived from the activities  
16 with local communities, indigenous peoples,  
17 and forest-dependent communities; and

18 (G) with respect to assistance for all activi-  
19 ties under this section, seek to ensure the estab-  
20 lishment and enforcement of legal regimes,  
21 standards, processes, and safeguards by the  
22 country in which the activities are conducted, as  
23 a condition of such assistance or as a proposed  
24 activity for which such assistance may be pro-  
25 vided, which—

1 (i) protect the rights and interests of  
2 local communities, indigenous peoples, for-  
3 est-dependent communities, human rights  
4 defenders, and vulnerable social groups;  
5 and

6 (ii) promote consultations with local  
7 communities, indigenous peoples, and for-  
8 est-dependent communities in affected  
9 areas, as partners and primary stake-  
10 holders, before and during the design,  
11 planning, implementation, monitoring, and  
12 evaluation of activities under this section;  
13 and

14 (iii) ensure equitable sharing of prof-  
15 its and benefits from incentives for emis-  
16 sions reductions or leakage prevention with  
17 local communities, indigenous peoples, and  
18 forest-dependent communities.

19 (5) SCOPE.—

20 (A) REDUCED EMISSIONS.—The Adminis-  
21 trator shall include reduced emissions from for-  
22 est degradation and disturbance of peatlands  
23 within the scope of activities under this section.

24 (B) EXPANSION OF AUTHORIZED ACTIVI-  
25 TIES.—If the Administrator determines, in con-

1           sultation with other appropriate agencies, that  
2           sufficient methodologies and technical capacities  
3           exist to measure, monitor, and account for the  
4           emissions referred to in subparagraph (A), the  
5           Administrator may expand the authorized ac-  
6           tivities under this section, as appropriate, to in-  
7           clude reduced soil carbon-derived emissions as-  
8           sociated with deforestation and degradation of  
9           forested wetlands and peatlands, consistent  
10          with a comprehensive approach to maintaining  
11          and enhancing forests, increasing climate resil-  
12          iency, reducing emissions, and increasing re-  
13          movals of greenhouse gases.

14          (6) ACCOUNTING.—The Administrator shall use  
15          a publicly accessible registry to account for and reg-  
16          ister the emissions reductions achieved through as-  
17          sistance provided under this section each year, after  
18          appropriately discounting for uncertainty and other  
19          relevant factors as required by the standards estab-  
20          lished under paragraph (4).

21          (7) INTERNATIONAL DEFORESTATION REDUC-  
22          TION PROGRAM INSURANCE ACCOUNT FOR NON-  
23          COMPLETION OR REVERSAL.—In furtherance of the  
24          objectives described in subsection (c)(2), the Admin-

1        Administrator shall develop and implement a program  
2        that—

3                (A) addresses noncompletion or reversal  
4                with respect to any greenhouse gas emissions  
5                that were not, or are no longer, sequestered;  
6                and

7                (B) may include a mechanism to hold in  
8                reserve a portion of the amount allocated for  
9                projects to support the program.

10        (8) EXTENSION OF ASSISTANCE.—

11                (A) IN GENERAL.—The Administrator may  
12                extend, for an additional 5 years, the period  
13                during which assistance is authorized for activi-

22                        (ii) the greenhouse gas emissions re-  
23                        ductions achieved as a result of the activi-  
24                        ties are not resulting in significant leakage;

1 (iii) such greenhouse gas emissions re-  
2 ductions are being appropriately dis-  
3 counted to account for any leakage that is  
4 occurring; and

5 (iv) such extension would further ad-  
6 vance or ensure achievement of the objec-  
7 tives of the activities.

8 (B) ASSISTANCE FOR SUBNATIONAL DE-  
9 FORESTATION AND FOREST DEGRADATION RE-  
10 DUCATION ACTIVITIES.—

11 (i) IN GENERAL.—If the Adminis-

19 tion reduction activities.

20 (ii) CONTINUED ASSISTANCE.—The  
21 Administrator may extend the period dur-  
22 ing which assistance is authorized for sub-

10          resource management objectives and initiatives in  
11          countries receiving assistance under this section.

12          (10) ASSISTANCE AS SUPPLEMENT.—The provi-

17          (11) FUNDING LIMITATION.—Of the funds  
18          made available to carry out this section in any fiscal

20          administrative expenses of the United States Agency  
21          for International Development in support of activi-  
22          ties described in paragraph (2). Such amount shall

5           cated in the United States and an entity located in  
6           a foreign country.

7           (2) ROLE OF THE SECRETARY OF STATE.—  
8           Nothing in this section may be construed to affect

11          Foreign Assistance Act of 1961 (22 U.S.C.

3 **SEC. 30612. CONTROLLING THE EXPORT OF ELECTRONIC**  
4 **WASTE TO PROTECT UNITED STATES SUPPLY**  
5 **CHAINS.**

6 (a) FINDINGS.—Congress finds the following:

7 (1) It is in the national security interests of the  
8 United States to ensure that the export of electronic  
9 waste does not become the source of counterfeit  
10 goods that may reenter electronics supply chains in  
11 the United States, and for other purposes.

12 (2) A 2012 Senate Armed Services Committee  
13 Report “discovered counterfeit electronic parts from  
14 China in the Air Force’s largest cargo plane, in as-  
15 semblies intended for Special Operations helicopters,  
16 and in a Navy surveillance plane among 1,800 cases  
17 of bogus parts”.

18 (3) Further, exporting such material has often  
19 resulted in environmental damage because of illegal  
20 dumping or inadequate environmental regulations in  
21 other countries for ensuring their safe and secure  
22 disposal.

23 (4) China, the single largest producer of elec-  
24 tronic waste, is on track for its e-waste industry to  
25 total \$23,800,000,000 by 2030, given its high sup-

1       ply of used products, demand for recycled materials,  
2       and capacity to transport these materials.

3               (5) As the second largest producer of electronic  
4       waste, the United States has a strong economic and  
5       national security incentive to enhance domestic e-  
6       waste recycling capacity rather than exporting to  
7       China and other countries.

8               (6) Given China’s lack of regulations and work-  
9       er protections, workers in the e-waste industry have  
10      been exposed to over 1,000 harmful substances, in-  
11      cluding lead and mercury, endangering the health  
12      and wellbeing of workers.

13      (b) DEFINITIONS.—In this section:

8 with no additional mechanical or hand

25 upon the human use of wildlife as food or medicine

2 habitats are not fragmented, degraded, or destroyed  
3 and that human pressure on natural habitats is not

13          human consumption immediately, during a transitional pe-  
14          riod, or aspirationally, shall be reviewed, updated, and

5 plexity of emerging disease threats; and

6 (2) support improved community health, bio-  
7 diversity conservation, forest conservation and man-  
8 agement, sustainable agriculture, and the safety of  
9 livestock, domestic animals, and wildlife in devel-  
10 oping countries, particularly in tropical landscapes  
11 where there is an elevated risk of zoonotic disease  
12 spill over.

13 **SEC. 30806. STATEMENT OF POLICY.**

14 It is the policy of the United States to—

15 (1) support the availability of scalable and sus-  
16 tainable alternative sources of protein and nutrition  
17 for local communities, where appropriate, in order to  
18 minimize human reliance on the commercial trade in  
19 live wildlife for human consumption;

20 (2) support foreign governments to—

21 (A) reduce commercial trade in live wildlife  
22 for human consumption;

23 (B) transition from the commercial trade  
24 in live wildlife for human consumption to

1 sustainably produced alternate protein and nu-  
2 tritional sources;

3 (C) establish and effectively manage and  
4 protect natural habitat, including protected and  
5 conserved areas and the lands of Indigenous  
6 peoples and local communities, particularly in  
7 countries with tropical forest hotspots for

24 zoonotic infectious diseases, with recommenda-  
25 tions for implementing the closure of wildlife

1 markets and prevention of the commercial trade  
2 in live wildlife for human consumption, except  
3 where the consumption of wildlife is necessary  
4 for local food security or where such actions  
5 would significantly disrupt a readily available  
6 and irreplaceable food supply;

7 (B) raise awareness and build stakeholder  
8 engagement networks, including civil society,  
9 the private sector, and local and regional gov-  
10 ernments on the dangerous potential of wildlife  
11 markets as a source of zoonotic diseases and re-  
12 duce demand for the consumption of wildlife  
13 through evidence-based behavior change pro-  
14 grams, while ensuring that existing wildlife  
15 habitat is not encroached upon or destroyed as  
16 part of this process;

17 (C) encourage and support alternative  
18 forms of sustainable food production, farming,  
19 and shifts to sustainable sources of protein and  
20 nutrition instead of terrestrial wildlife, where  
21 able and appropriate, and reduce consumer de-  
22 mand for terrestrial and freshwater wildlife  
23 through enhanced local and national food sys-  
24 tems, especially in areas where wildlife markets  
25 play a significant role in meeting subsistence

1 needs while ensuring that existing wildlife habi-  
2 tat is not encroached upon or destroyed as part  
3 of this process; and

4 (D) strive to increase biosecurity and hygi-  
5 enic standards implemented in farms, gathering  
6 centers, transport, and market systems around  
7 the globe, especially those specializing in the  
8 provision of products intended for human con-

24 an impact, and that interventions will need to be tailored  
25 to the situation to—

1           (1) pursuant to section 30804, close wildlife  
2           markets and prevent associated commercial trade in  
3           live wildlife, placing a priority focus on countries  
4           with significant markets for live wildlife for human  
5           consumption, high-volume commercial trade and as-  
6           sociated markets, trade in and across urban centers,  
7           and trade for luxury consumption or where there is  
8           no dietary necessity—

9                   (A) through existing treaties, conventions,  
10                   and agreements;

11                   (B) by amending existing protocols or  
12                   agreements;

13                   (C) by pursuing new protocols; or

14                   (D) by other means of international coordi-  
15                   nation;

16           (2) improve regulatory oversight and reduce  
17           commercial trade in live wildlife and eliminate prac-  
18           tices identified to contribute to zoonotic spillover and  
19           emerging pathogens;

20           (3) prevent commercial trade in live wildlife  
21           through programs that combat wildlife trafficking  
22           and poaching, including by—

24 States Department of Agriculture (USDA) and in-

1       stitutions of higher education with agricultural or  
2       natural resource expertise;

3               (6) work through international organizations to  
4       develop a set of objective risk-based metrics that  
5       provide a cross-country comparable measure of the  
6       level of risk posed by wildlife trade and marketing  
7       and can be used to track progress nations make in  
8       reducing risks, identify where resources should be  
9       focused, and potentially leverage a peer influence ef-  
10      fect;

11              (7) prevent the degradation and fragmentation  
12      of forests and other intact ecosystems to minimize  
13      interactions between wildlife and human and live-  
14      stock populations that could contribute to spillover  
15      events and zoonotic disease transmission, including  
16      by providing assistance or supporting policies to, for  
17      example—

17 **TITLE II—PROHIBITIONS OR**  
18 **CONDITIONS ON CERTAIN**  
19 **TRANSMITTALS OF FUNDS**

20 **SEC. 60201. FINDINGS.**

21 Congress finds the following:

22           (1) The Financial Crimes Enforcement Net-  
23 work (FinCEN) is the Financial Intelligence Unit of  
24 the United States tasked with safeguarding the fi-  
25 nancial system from illicit use, combating money

1       laundrying and its related crimes including ter-  
2       rorism, and promoting national security.

3           (2) Per statute, FinCEN may require domestic  
4       financial institutions and financial agencies to take  
5       certain “special measures” against jurisdictions, in-  
6       stitutions, classes of transactions, or types of ac-  
7       counts determined to be of primary money laun-  
8       dering concern, providing the Secretary with a range  
9       of options, such as enhanced record-keeping, that  
10      can be adapted to target specific money laundrying  
11      and terrorist financing and to bring pressure on  
12      those that pose money laundrying threats.

13          (3) This special-measures authority was grant-  
14      ed in 2001, when most cross-border transactions oc-  
15      curred through correspondent or payable-through ac-  
16      counts held with large financial institutions which  
17      serve as intermediaries to facilitate financial trans-  
18      actions on behalf of other banks.

19          (4) Innovations in financial services have trans-  
20      formed and expanded methods of cross-border trans-  
21      actions that could not have been envisioned 20 years  
22      ago when FinCEN was given its special-measures  
23      authority.

24          (5) These innovations, particularly through dig-  
25      ital assets and informal value transfer systems, while

1 useful to legitimate consumers and law enforcement,  
2 can be tools abused by bad actors like sanctions  
3 evaders, fraudsters, money launderers, and those  
4 who commit ransomware attacks on victimized U.S.  
5 companies and which abuse the financial system to  
6 move and obscure the proceeds of their crimes.

7 (6) Ransomware attacks on U.S. companies re-  
8 quiring payments in cryptocurrencies have increased  
9 in recent years, with the U.S. Treasury estimating  
10 that ransomware payments in the United States  
11 reached \$590 million in just the first half of 2021,  
12 compared to a total of \$416 million in 2020.

13 (7) In July 2021, the White House, with sup-  
14 port of U.S. allies, asserted that the People's Repub-  
15 lic of China was responsible for ransomware oper-  
16 ations against private companies that included de-  
17 mands of millions of dollars, including the 2021  
18 ransomware attacks that breached Microsoft email  
19 systems and affected thousands of consumers, State  
20 and local municipalities, and government contractors  
21 attributed to a cyber espionage group with links to  
22 the Chinese Ministry of State Security.

23 (8) As ransomware attacks organized by Chi-  
24 nese and other foreign bad actors continue to grow  
25 in size and scope, modernizing FinCEN's special

1 measure authorities will empower FinCEN to adapt  
2 its existing tools, monitor and obstruct global finan-  
3 cial threats, and meet the challenges of combating  
4 21st century financial crime.

22 States, or 1 or more classes of transactions within,  
23 or involving, a jurisdiction outside of the United  
24 States to be of primary money laundering concern,  
25 the Secretary, in consultation with the Secretary of

1 the State, the Attorney General, and the Chairman  
2 of the Board of Governors of the Federal Reserve  
3 System, may prohibit, or impose conditions upon  
4 certain transmittals of funds (as such term may be  
5 defined by the Secretary in a special measure

7 law), to or from any domestic financial institution or

5 **LIFE TRAFFICKING FINANC-**  
6 **ING AND PROCEEDS STUDY**  
7 **ACT**

8 **SEC. 60401. FINDINGS.**

9 Congress finds the following:

10 (1) The 2017 report by the think tank, Global  
11 Financial Integrity, entitled “Transnational Crime  
12 and the Developing World”, determined that the an-  
13 nual global retail value of illegal wildlife trade is be-  
14 tween \$5 billion to \$23 billion, and when losses to  
15 ecosystem services are considered, the World Bank  
16 estimates the cost of environmental crime is between  
17 \$1 trillion and \$2 trillion, annually.

18 (2) Wildlife traffickers do not prefer particular  
19 species or commodities, but instead, according to the  
20 non-governmental organization, United for Wildlife,  
21 wildlife traffickers focus on the demand, availability,  
22 profit potential, and relatively low risk associated  
23 with acquiring, trading, and distributing wildlife  
24 globally.

1           (3) The trafficking of wildlife affects human  
2 health because of undetected spread of zoonotic dis-  
3 eases, scarcity in food resources, and the environ-  
4 mental results of degraded ecosystems.

5           (4) Also, the trafficking of illicit wildlife such as  
6 pangolins from Africa, macaws from Peru, turtles  
7 from the United States, and rosewood species smug-  
8 gled globally threatens our national security at home  
9 and American interests abroad because rogue orga-  
10 nizations, including transnational criminal organiza-  
11 tions, use the proceeds to fund illegal and violent  
12 acts throughout the world, fueling corruption and  
13 benefiting from corrupt government officials, weak-  
14 ening the rule of law, and distorting commercial  
15 markets.

16           (5) Many of these supply chains are affected by  
17 Chinese activity, from the criminal organizations in-  
18 volved in the initial poaching of targeted commod-  
19 ities to the demand for goods produced from endan-  
20 gered plants and animals.

21           (6) The Organized Crime Drug Enforcement  
22 Task Forces conducted an investigation known as  
23 “Operation Apex” which identified extensive overlaps  
24 among drug trafficking organizations, professional

1 money launderers, and wildlife trafficking syn-  
2 dicates.

3 (7) A study conducted by Federal entities that  
4 examined wildlife trafficking networks determined  
5 that—

6 (A) more than two-thirds of persons traf-  
7 ficking wildlife also trafficked narcotics;

8 (B) 10 percent of persons trafficking wild-  
9 life were doing so to finance terrorism; and

10 (C) a small percentage of persons traf-  
11 ficking wildlife were doing so to finance the pro-  
12 liferation of nuclear materials.

13 (8) Because wildlife trafficking is executed as  
14 part of a commodity-agnostic global enterprise, the  
15 United States and allies of the United States should  
16 focus efforts to reduce wildlife trafficking on cur-  
17 tailing the expansive networks that traffic wildlife  
18 and other goods and on bringing enforcement ac-  
19 tions against persons who launder the proceeds of  
20 those persons who traffic wildlife rather than pursue  
21 specific nations, groups, or commodities.

22 (9) In the past decade, the illicit wildlife trade  
23 has moved online, mainly to social media platforms,  
24 creating jurisdictional and technical challenges for  
25 law enforcement.

1 **SEC. 60402. STUDY.**

24               ficking;

1           (4) a discussion, based on a consideration of  
2 relevant prior studies and investigations, of the con-

5 trafficking, and narcotics trafficking, including  
6 shared supply chains and financial facilitators;

7 encrypted messaging and other surface web  
8 platforms;

11 may be chosen by persons trafficking in wildlife;

14 used most for transactions and payments in-  
15 volving trafficking in wildlife;

21 and proceeds;

5 **TITLE V—STUDY ON CHINESE**  
6 **SUPPORT FOR AFGHAN IL-**  
7 **LICIT FINANCE**

8 **SEC. 60501. STUDY ON CHINESE SUPPORT FOR AFGHAN IL-**  
9 **LICIT FINANCE.**

10 (a) FINDINGS.—Congress finds the following:

11 (1) Though China and Afghanistan share only  
12 a small land border, when it comes to illicit financial  
13 activity between the two countries, China has a dem-  
14 onstrated history of permissiveness regarding traf-  
15 ficking and money laundering that could support  
16 both the Taliban and its associates.

17 (2) A 2014 Financial Action Task Force report  
18 titled, “Financial Flows Linked to the Production  
19 and Trafficking of Afghan Opiates” found evidence  
20 of import/export companies registered in China that  
21 were transferring funds to Afghanistan, likely as  
22 part of trade-based money laundering schemes cen-  
23 tered around illicit opium production and trafficking,  
24 which, per the United Nations Office on Drugs and

1 Crime (UNODC), is one of the Taliban's main  
2 sources of income.

3 (3) Since the U.S. withdrawal from Afghanistan  
4 in August 2021, China has announced its willingness  
5 to lend financial support and legitimacy to the  
6 Taliban-led government in Afghanistan, including  
7 Afghan Interior Minister, Sirajuddin Haqqani, a  
8 member of the U.S.-sanctions designated Foreign  
9 Terrorist Organization, the Haqqani Network.

10 (4) China's permissive policies regarding Af-  
11 ghan illicit finance run counter to the strategic in-  
12 terests of the United States with respect to coun-  
13 tering trafficking and preventing terrorist groups  
14 from accessing the international financial system.

15 (5) China's role as a critical source of financial  
16 wherewithal for the Taliban and its associates to  
17 process and implement drug and other illicit-activity  
18 transactions warrants further study as these actions  
19 pose a threat both to the safety and security of the  
20 people of Afghanistan and the international commu-  
21 nity.

22 (6) Congress needs to better understand how  
23 China could leverage its relationships and resources  
24 within Afghanistan and how these activities could di-  
25 rectly or indirectly provide financial support to ter-

1       rorist organizations, including the Taliban and its  
2       associates.

3       (b) STUDY.—

4             (1) REQUIREMENT.—Not later than one year  
5       after the date of the enactment of this Act, the Sec-  
6       retary of Treasury shall provide to the Committee on  
7       Financial Services and the Committee on Foreign  
8       Affairs of the House of Representatives and the  
9       Committee on Banking, Housing, and Urban Affairs  
10      and the Committee on Foreign Relations of the Sen-  
11      ate and the Permanent Select Committee on Intel-  
12      ligence of the House of Representatives and the Se-  
13      lect Committee on Intelligence of the Senate a re-  
14      port on the financial activities of China and Chinese  
15      entities in connection with the finances of Afghani-  
16      stan and the Taliban.

17            (2) MATTERS INCLUDED.—The report under  
18      paragraph (1) shall include the following:

19                (A) An assessment of the activities under-  
20      taken by the People’s Republic of China and  
21      Chinese-registered companies to support illicit  
22      financial networks in Afghanistan, particularly  
23      such networks involved in narcotics trafficking,  
24      illicit financial transactions, official corruption,

1 natural resources exploitation, and terrorist net-  
2 works.

3 (B) An assessment of financial, commer-  
4 cial, and economic activities undertaken by  
5 China and Chinese companies in Afghanistan to  
6 support Chinese policies counter to American  
7 strategic interests.

8 (C) Information relating to the impacts of  
9 existing United States and multilateral laws,  
10 regulations, and sanctions, including environ-  
11 mental and public health impacts of natural re-  
12 sources exploitation.

13 (D) Any recommendations to Congress re-  
14 garding legislative or regulatory improvements  
15 necessary to support the identification and dis-  
16 ruption of Chinese-supported illicit financial  
17 networks in Afghanistan.

18 (3) FORM.—The report under paragraph (1)  
19 may include a classified annex.

3 **TITLE XIII—CLIMATE CHANGE**  
4 **EDUCATION**

5 **SEC. 71301. FINDINGS.**

6 Congress makes the following findings:

7 (1) The evidence for human-induced climate  
8 change is overwhelming and undeniable.

9 (2) Atmospheric carbon can be significantly re-  
10 duced through conservation, by shifting to renewable  
11 energy sources such as solar, wind, tidal, and geo-  
12 thermal, and by increasing the efficiency of build-  
13 ings, including domiciles, and transportation.

14 (3) Providing clear information about climate  
15 change, in a variety of forms, can remove the fear  
16 and the sense of helplessness, and encourage individ-  
17 uals and communities to take action.

18 (4) Implementation of measures that promote  
19 energy efficiency, conservation, and renewable en-  
20 ergy will greatly reduce human impact on the envi-  
21 ronment.

22 (5) Informing people of new technologies and  
23 programs as they become available will ensure max-  
24 imum understanding and maximum effect of those  
25 measures.

1           (6) More than 3,000,000 students graduate  
2 from high schools and colleges in the United States  
3 each year, armed with attitudes, skills, and knowl-  
4 edge about the climate that inform their actions.

5           (7) The effect on the climate, positive or nega-  
6 tive, of each of those 3,000,000 students lasts be-  
7 yond a lifetime.

8           (8) Those students need to be prepared to im-  
9 plement changes in professional and personal prac-  
10 tices, to support and help develop new technology  
11 and policy, and to address the coming social and  
12 economic challenges and opportunities arising from a  
13 changing climate.

14           (9) It has been demonstrated that the people of  
15 the United States overwhelmingly support teaching  
16 students about the causes, consequences, and poten-  
17 tial solutions to climate change in all 50 States and  
18 more than 3,000 counties across the United States.

19           (10) Only 30 percent of middle school and 45  
20 percent of high school science teachers understand  
21 the extent of the scientific consensus on climate  
22 change.

20 poses of this section to States undertaking the  
21 working waterfront planning process under this  
22 section, for the purpose of preserving and pro-  
23 tecting working waterfronts during such pro-  
24 cess.

1           “(5) Any coastal State applying for a working  
2 waterfront grant under this title shall—

3           “(A) develop a working waterfront plan,  
4 using a process that involves the public and  
5 those with an interest in the coastal zone;

6           “(B) coordinate development and imple-  
7 mentation of such a plan with other coastal  
8 management programs, regulations, and activi-  
9 ties of the coastal State; and

10           “(C) if the coastal State allows qualified  
11 holders (other than the coastal State) to enter  
12 into working waterfront covenants, provide as  
13 part of the working waterfront plan under this  
14 subsection a mechanism or procedure to ensure  
15 that the qualified holders are complying their  
16 duties to enforce the working waterfront cov-  
17 enant.

18           “(d) USES, TERMS, AND CONDITIONS.—

19           “(1) Each grant made by the Secretary under  
20 this section shall be subject to such terms and condi-  
21 tions as may be appropriate to ensure that the grant  
22 is used for purposes consistent with this section.

23           “(2) A grant under this section may be used—

24           “(A) to acquire a working waterfront, or  
25 an interest in a working waterfront;

1           “(B) to make improvements to a working  
2 waterfront, including the construction or repair  
3 of wharfs, boat ramps, or related facilities; or

4           “(C) for necessary climate adaptation miti-  
5 gation.

6           “(e) PUBLIC ACCESS REQUIREMENT.—A working  
7 waterfront project funded by grants made under this sec-  
8 tion must provide for expansion, improvement, or preser-  
9 vation of reasonable and appropriate public access to  
10 coastal waters at or in the vicinity of a working water-  
11 front, except for commercial fishing or other industrial ac-  
12 cess points where the coastal State determines that public  
13 access would be unsafe.

14           “(f) LIMITATIONS.—

15           “(1) Except as provided in paragraph (2), a  
16 grant awarded under this section may be used to  
17 purchase working waterfront or an interest in work-  
18 ing waterfront, including an easement, only from a  
19 willing seller and at fair market value.

20           “(2) A grant awarded under this section may  
21 be used to acquire working waterfront or an interest  
22 in working waterfront at less than fair market value  
23 only if the owner certifies to the Secretary that the  
24 sale is being entered into willingly and without coer-  
25 cion.

1           “(3) No Federal, State, or local entity may ex-  
2           ercise the power of eminent domain to secure title to  
3           any property or facilities in connection with a  
4           project carried out under this section.

5           “(g) ALLOCATION OF GRANTS TO LOCAL GOVERN-  
6           MENTS AND OTHER ENTITIES.—

7           “(1) The Secretary shall encourage coastal  
8           States to broadly allocate amounts received as  
9           grants under this section among working water-  
10          fronts identified in working waterfront plans ap-  
11          proved under subsection (c).

12          “(2) Subject to the approval of the Secretary,  
13          a coastal State may, as part of an approved working  
14          waterfront plan, designate as a qualified holder any  
15          unit of State or local government or nongovern-  
16          mental organization, if the coastal State is ulti-  
17          mately responsible for ensuring that the property  
18          will be managed in a manner that is consistent with  
19          the purposes for which the land entered into the pro-  
20          gram.

21          “(3) A coastal State or a qualified holder des-  
22          ignated by a coastal State may allocate to a unit of  
23          local government, nongovernmental organization,  
24          fishing cooperative, or other entity, a portion of any  
25          grant made under this section for the purpose of

1 carrying out this section, except that such an alloca-  
2 tion shall not relieve the coastal State of the respon-  
3 sibility for ensuring that any funds so allocated are  
4 applied in furtherance of the coastal State's ap-  
5 proved working waterfront plan.

6 “(4) A qualified holder may hold title to or in-  
7 terest in property acquired under this section, except  
8 that—

9 “(A) all persons holding title to or interest  
10 in working waterfront affected by a grant under  
11 this section, including a qualified holder, private  
12 citizen, private business, nonprofit organization,  
13 fishing cooperative, or other entity, shall enter  
14 into a working waterfront covenant;

15 “(B) such covenant shall be held by the  
16 coastal State or a qualified holder designated  
17 under paragraph (2);

18 “(C) if the coastal State determines, on  
19 the record after an opportunity for a hearing,  
20 that the working waterfront covenant has been  
21 violated—

22 “(i) all right, title, and interest in and  
23 to the working waterfront covered by such  
24 covenant shall, except as provided in sub-

1 paragraph (D), revert to the coastal State;

2 and

3 “(ii) the coastal State shall have the  
4 right of immediate entry onto the working  
5 waterfront;

6 “(D) if a coastal State makes a determina-  
7 tion under subparagraph (C), the coastal State  
8 may convey or authorize the qualified holder to  
9 convey the working waterfront or interest in  
10 working waterfront to another qualified holder;  
11 and

12 “(E) nothing in this subsection waives any  
13 legal requirement under any Federal or State  
14 law.

15 “(h) MATCHING CONTRIBUTIONS.—

16 “(1) Except as provided in paragraph (2), the  
17 Secretary shall require that each coastal State that  
18 receives a grant under this section, or a qualified  
19 holder designated by that coastal State under sub-  
20 section (g), shall provide matching funds in an  
21 amount equal to at least 25 percent of the total cost  
22 of the project carried out with the grant.

23 “(2) The Secretary may waive the application  
24 of paragraph (1) for any qualified holder that is an  
25 underserved community, a community that has an

1 inability to draw on other sources of funding because  
2 of the small population or low income of the commu-  
3 nity, or for other reasons the Secretary considers ap-  
4 propriate.

5 “(3) A local community designated as a quali-  
6 fied holder under subsection (g) may utilize funds or  
7 other in-kind contributions donated by a nongovern-  
8 mental partner to satisfy the matching funds re-  
9 quirement under this subsection.

10 “(4) As a condition of receipt of a grant under  
11 this section, the Secretary shall require that a coast-  
12 al State provide to the Secretary such assurances as  
13 the Secretary determines are sufficient to dem-  
14 onstrate that the share of the cost of each eligible  
15 project that is not funded by the grant awarded  
16 under this section has been secured.

17 “(5) If financial assistance under this section  
18 represents only a portion of the total cost of a  
19 project, funding from other Federal sources may be  
20 applied to the cost of the project. Each portion shall  
21 be subject to match requirements under the applica-  
22 ble provision of law.

23 “(6) The Secretary shall treat as non-Federal  
24 match the value of a working waterfront or interest  
25 in a working waterfront, including conservation and

1 other easements, that is held in perpetuity by a  
2 qualified holder, if the working waterfront or inter-  
3 est is identified in the application for the grant and  
4 acquired by the qualified holder within 3 years of  
5 the grant award date, or within 3 years after the  
6 submission of the application and before the end of  
7 the grant award period. Such value shall be deter-  
8 mined by an appraisal performed at such time before  
9 the award of the grant as the Secretary considers  
10 appropriate.

11 “(7) The Secretary shall treat as non-Federal  
12 match the costs associated with acquisition of a  
13 working waterfront or an interest in a working wa-  
14 terfront, and the costs of restoration, enhancement,  
15 or other improvement to a working waterfront, if the  
16 activities are identified in the project application and  
17 the costs are incurred within the period of the grant  
18 award, or, for working waterfront described in para-  
19 graph (6), within the same time limits described in  
20 that paragraph. These costs may include either cash  
21 or in-kind contributions.

22 “(i) LIMIT ON ADMINISTRATIVE COSTS.—No more  
23 than 5 percent of the funds made available to the Sec-  
24 retary under this section may be used by the Secretary

1 for planning or administration of the program under this  
2 section.

3 “(j) OTHER TECHNICAL AND FINANCIAL ASSIST-  
4 ANCE.—

5 “(1) Up to 5 percent of the funds appropriated  
6 under this section may be used by the Secretary for  
7 purposes of providing technical assistance as de-  
8 scribed in this subsection.

9 “(2) The Secretary shall—

10 “(A) provide technical assistance to coastal  
11 States and local governments in identifying and  
12 obtaining other sources of available Federal  
13 technical and financial assistance for the devel-  
14 opment and revision of a working waterfront  
15 plan and the implementation of an approved  
16 working waterfront plan;

17 “(B) provide technical assistance to States  
18 and local governments for the development, im-  
19 plementation, and revision of comprehensive  
20 working waterfront plans, which may include,  
21 subject to the availability of appropriations,  
22 planning grants and assistance, pilot projects,  
23 feasibility studies, research, and other projects

16           made available under this section shall be paid wages at  
17           rates not less than those prevailing on projects of a char-  
18           acter similar in the locality as determined by the Secretary  
19           of Labor in accordance with subchapter IV of chapter 31

3 “(a) VOLUNTARY COLLECTION.—The Director shall  
4 provide for the collection of demographic information, in-  
5 cluding gender, race, military or veteran status, and any  
6 other demographic category that the Director determines  
7 appropriate, related to each inventor listed with an appli-  
8 cation for patent, that may be submitted voluntarily by  
9 that inventor.

10 “(b) PROTECTION OF INFORMATION.—The Director  
11 shall—

12 “(1) keep any information submitted under sub-

23 “(1) FREEDOM OF INFORMATION ACT.—Any  
24 demographic information submitted under subsection  
25 (a) shall be exempt from disclosure under section  
26 552(b)(3) of title 5.

1           “(2) FEDERAL INFORMATION POLICY LAW.—  
2           Subchapter I of chapter 35 of title 44 shall not  
3           apply to the collection of demographic information  
4           under subsection (a).

5           “(d) PUBLICATION OF DEMOGRAPHIC INFORMA-  
6           TION.—

7           “(1) REPORT REQUIRED.—Not later than 1  
8           year after the date of enactment of this section, and  
9           not later than January 31 of each year thereafter,  
10          the Director shall make publicly available a report  
11          that, except as provided in paragraph (3)—

12                   “(A) includes the total number of patent  
13                   applications filed during the previous year  
14                   disaggregated—

15                           “(i) by demographic information de-  
16                           scribed in subsection (a); and

17                           “(ii) by technology class number,  
18                           technology class title, country of residence  
19                           of the inventor, and State of residence of  
20                           the inventor in the United States;

21                   “(B) includes the total number of patents  
22                   issued during the previous year disaggregated—

23                           “(i) by demographic information de-  
24                           scribed in subsection (a); and

1           “(ii) by technology class number,  
2           technology class title, country of residence  
3           of the inventor, and State of residence of  
4           the inventor in the United States; and

5           “(C) includes a discussion of the data col-  
6           lection methodology and summaries of the ag-  
7           gregate responses.

8           “(2) DATA AVAILABILITY.—In conjunction with  
9           issuance of the report under paragraph (1), the Di-  
10          rector shall make publicly available data based on  
11          the demographic information collected under sub-  
12          section (a) that, except as provided in paragraph  
13          (3), allows the information to be cross-tabulated to  
14          review subgroups.

15          “(3) PRIVACY.—The Director—

16               “(A) may not include personally identifying  
17               information in—

18                   “(i) the report made publicly available  
19                   under paragraph (1); or

20                   “(ii) the data made publicly available  
21                   under paragraph (2); and

22               “(B) in making publicly available the re-  
23               port under paragraph (1) and the data under  
24               paragraph (2), shall anonymize any personally  
25               identifying information related to the demo-

1 graphic information collected under subsection  
2 (a).

3 “(e) BIENNIAL REPORT.—Not later than 2 years  
4 after the date of enactment of this section, and every 2

8 the public, and recommendations on how to improve data  
9 collection.”.

10 (b) TECHNICAL AND CONFORMING AMENDMENT.—  
11 The table of sections at the beginning of chapter 11 of  
12 title 35, United States Code, is amended by adding at the  
13 end the following:

“124. Collection of demographic information for patent inventors.”.

14 **SEC. 80103. STOPPING HARMFUL OFFERS ON PLATFORMS**  
15 **BY SCREENING AGAINST FAKES IN E-COM-**  
16 **MERCE.**

17 (a) CONTRIBUTORY LIABILITY FOR ELECTRONIC  
18 COMMERCE PLATFORMS.—Section 32 of the Act entitled  
19 “An Act to provide for the registration and protection of  
20 trademarks used in commerce, to carry out the provisions  
21 of certain international conventions, and for other pur-  
22 poses”, approved July 5, 1946 (commonly known as the  
23 “Trademark Act of 1946”) (15 U.S.C. 1114), is amended  
24 by adding at the end the following:

1           “(4)(A) An electronic commerce platform shall  
2           be contributorily liable in a civil action under para-  
3           graph (1) for a case in which a third-party seller  
4           uses in commerce a counterfeit mark in connection  
5           with the sale, offering for sale, distribution, or ad-  
6           vertising of goods that implicate health and safety  
7           on the platform, unless the platform demonstrates  
8           that the platform took each of the following steps to  
9           prevent such use on the platform before any infring-  
10          ing act by the third-party seller:

11                   “(i) Determined after a reasonable inves-  
12                   tigation, and reasonably periodically con-  
13                   firmed—

14                           “(I) that the third-party seller des-  
15                           ignated a registered agent in the United  
16                           States for service of process; or

17                           “(II) in the case of third-party seller  
18                           located in the United States that has not  
19                           designated a registered agent under sub-  
20                           clause (I), that the third-party seller has  
21                           designated a verified address for service of  
22                           process in the United States.

23                           “(ii) Verified through reliable documenta-  
24                           tion, including to the extent possible some form  
25                           of government-issued identification, the iden-

1           tity, principal place of business, and contact in-  
2           formation of the third-party seller.

3           “(iii) Except as provided for in subpara-  
4           graph (C), required the third-party seller to—

5                   “(I) take reasonable steps to verify  
6                   the authenticity of goods on or in connec-  
7                   tion with which a registered mark is used;  
8                   and

9                   “(II) attest to the platform that the  
10                  third-party seller has taken reasonable  
11                  steps under subclause (I) to verify the au-  
12                  thenticity of the goods.

13          “(iv) Imposed on the third-party seller as  
14          a condition of participating on the platform  
15          contractual requirements that—

16                  “(I) the third-party seller agrees not  
17                  to use a counterfeit mark in connection  
18                  with the sale, offering for sale, distribu-  
19                  tion, or advertising of goods on the plat-  
20                  form;

21                  “(II) the third-party seller consents to  
22                  the jurisdiction of United States courts  
23                  with respect to claims related to participa-  
24                  tion by the third-party seller on the plat-  
25                  form; and

1           “(III) the third-party seller designates  
2           an agent for service of process in the  
3           United States, or, in the case of third-  
4           party seller located in the United States,  
5           the third-party seller designates a verified  
6           address for service of process in the United  
7           States.

8           “(v) Displayed conspicuously on the plat-  
9           form the verified principal place of business,  
10          contact information, and identity of the third-  
11          party seller, and the country from which the  
12          goods were originally shipped from the third-  
13          party seller, except the platform shall not be re-  
14          quired to display any such information that  
15          constitutes the personal identity of an indi-  
16          vidual, a residential street address, or personal  
17          contact information of an individual, and in  
18          such cases shall instead provide alternative,  
19          verified means of contacting the third-party  
20          seller.

21          “(vi) Except as provided for in subpara-  
22          graph (C), displayed conspicuously in each list-  
23          ing the country of origin and manufacture of  
24          the goods as identified by the third-party seller,  
25          unless such information was not reasonably

1 available to the third-party seller and the third-  
2 party seller has identified to the platform the  
3 steps it undertook to identify the country of ori-  
4 gin and manufacture of the goods and the rea-  
5 sons it was unable to identify the same.

6 “(vii) Required each third-party seller to  
7 use images that accurately depict the goods  
8 sold, offered for sale, distributed, or advertised  
9 on the platform.

10 “(viii) Implemented at no charge from the  
11 platform to the registrant reasonable proactive  
12 measures for screening goods before displaying  
13 the goods to the public to prevent the use by  
14 any third-party seller of a counterfeit mark in  
15 connection with the sale, offering for sale, dis-  
16 tribution, or advertising of goods on the plat-  
17 form. The determination of whether proactive  
18 measures are reasonable shall consider the size  
19 and resources of a platform, the available tech-  
20 nological and non-technological solutions at the  
21 time of screening, the information provided by  
22 the registrant to the platform, and any other  
23 factor considered relevant by a court.

24 “(ix) Provided reasonably accessible elec-  
25 tronic means by which a registrant and con-

1           sumer can notify the platform of suspected use  
2           of a counterfeit mark.

3           “(x) Implemented at no charge from the  
4           platform to the registrant a program to expedi-  
5           tiously disable or remove from the platform any  
6           listing for which a platform has reasonable  
7           awareness of use of a counterfeit mark in con-  
8           nection with the sale, offering for sale, distribu-  
9           tion, or advertising of goods. Reasonable aware-  
10          ness of use of a counterfeit mark may be in-  
11          ferred based on information regarding the use  
12          of a counterfeit mark on the platform generally,  
13          general information about the third-party seller,  
14          identifying characteristics of a particular list-  
15          ing, or other circumstances as appropriate. A  
16          platform may reinstate a listing disabled or re-  
17          moved under this clause if, after an investiga-  
18          tion, the platform reasonably determines that a  
19          counterfeit mark was not used in the listing. A  
20          reasonable decision to reinstate a listing shall  
21          not be a basis for finding that a platform failed  
22          to comply with this clause.

23          “(xi) Implemented a publicly available,  
24          written policy that requires termination of a  
25          third-party seller that reasonably has been de-

1           terminated to have engaged in repeated use of a  
2           counterfeit mark in connection with the sale, of-  
3           fering for sale, distribution, or advertising of  
4           goods on the platform. Use of a counterfeit  
5           mark by a third-party seller in 3 separate list-  
6           ings within 1 year typically shall be considered  
7           repeated use, but a platform may allow a third-  
8           party seller to remain active after repeated use  
9           of a counterfeit mark when reasonable miti-  
10          gating circumstances exist. The determination  
11          of whether reasonable mitigating circumstances  
12          exist shall consider the overall activity of the  
13          third-party seller, efforts the third-party seller  
14          has taken to cure supply-chain concerns, efforts  
15          the third-party takes to resolve disputes once  
16          notified of a concern, and any other factor con-  
17          sidered relevant by a court. A platform may re-  
18          instate a third-party seller if, after an investiga-  
19          tion, the platform reasonably determines that  
20          the third-party seller did not engage in repeated  
21          use of a counterfeit mark or that reasonable  
22          mitigating circumstances existed. A reasonable  
23          decision to reinstate a third-party seller shall  
24          not be a basis for finding that a platform failed  
25          to comply with this clause.

1           “(xii) Implemented at no charge from the  
2 platform to the registrant reasonable measures  
3 for screening third-party sellers to ensure that  
4 sellers who have been terminated do not rejoin  
5 or remain on the platform under a different  
6 seller identity or alias. The determination of  
7 whether screening measures are reasonable  
8 shall consider the size and resources of a plat-  
9 form, the available technological and non-tech-  
10 nological solutions at the time of screening, and  
11 any other factor considered relevant by a court.

12           “(xiii) Provided a verified basis to contact  
13 a third-party seller upon request by a registrant  
14 that has a bona fide belief that the seller has  
15 used a counterfeit mark in connection with the  
16 sale, offering for sale, distribution, or adver-  
17 tising of goods on the platform except that the  
18 platform is not required to provide information  
19 that constitutes the personal identity of an indi-  
20 vidual, a residential street address, or personal  
21 contact information of an individual (in such  
22 case, the provider shall provide an alternative  
23 means of contacting the third-party seller).

24           “(B)(i) This paragraph shall apply—

1           “(I) to an electronic commerce platform  
2           that has sales on the platform in the previous  
3           calendar year of not less than \$500,000; or

4           “(II) to an electronic commerce platform  
5           with less than \$500,000 in sales in the previous  
6           calendar year, 6 months after the platform has  
7           received 10 notices, in aggregate, that qualify  
8           under clause (ii).

9           “(ii) To count toward the aggregate 10-notice  
10          threshold under clause (i)(II), a notice shall—

11           “(I) include a reference to this paragraph;

12           “(II) include an explicit notification of the  
13          10-notice limit and the requirement of the plat-  
14          form to publish the information in clause (iii);  
15          and

16           “(III) identify a listing on the platform  
17          that reasonably could be determined to have  
18          used a counterfeit mark in connection with the  
19          sale, offering for sale, distribution, or adver-  
20          tising of goods that implicate health and safety.

21           “(iii) Not later than 1 month after the date on  
22          which a platform described in clause(i)(II) receives  
23          the first notice described under clause (ii), the plat-  
24          form shall make publicly available an attestation  
25          that the sales on the platform in the previous cal-

1       endar year were less than \$500,000 and an aggre-  
2       gate count of the notices that qualify under clause  
3       (ii). Such count shall be updated upon receipt of ad-  
4       ditional notices.

5               “(C) Notwithstanding clauses (iii) and (vi) of  
6       subparagraph (A), a platform is exempt from the re-  
7       quirements of such clauses for goods, on or in con-  
8       nection with which a registered mark is used, sold,  
9       offered for sale, or advertised by a third-party seller  
10      for less than \$5,000 if the third-party seller sells, of-  
11      fers for sale, or advertises on the platform 5 or  
12      fewer goods of the same type in connection with the  
13      same mark in a 1-year period.

14              “(D) This paragraph may not be construed to  
15      limit liability in contexts other than those described  
16      in this paragraph, including any cause of action  
17      available under any other provision of this Act, not-  
18      withstanding that the same facts may give rise to a  
19      claim under this paragraph.

20              “(E) With respect to fiscal year 2024, and each  
21      fiscal year thereafter, the amounts in subparagraphs  
22      (B) and (C) shall be increased each year by an  
23      amount equal to the percentage increase, if any, in  
24      the Consumer Price Index.

25              “(F) In this paragraph:

1           “(i) The term ‘counterfeit mark’ has the  
2 meaning given that term in section 34(d)(1)(B).

3           “(ii) The term ‘electronic commerce plat-  
4 form’ means any electronically accessed plat-  
5 form that includes publicly interactive features  
6 that allow for arranging the sale or purchase of  
7 goods, or that enables a person other than an  
8 operator of the platform to sell or offer to sell  
9 physical goods to consumers located in the  
10 United States.

11           “(iii) The term ‘goods that implicate  
12 health and safety’ means goods the use of  
13 which can lead to illness, disease, injury, serious  
14 adverse event, allergic reaction, or death if pro-  
15 duced without compliance with all applicable  
16 Federal, State, and local health and safety reg-  
17 ulations and industry-designated testing, safety,  
18 quality, certification, manufacturing, packaging,  
19 and labeling standards.

20           “(iv) The term ‘third-party seller’ means a  
21 person other than the electronic commerce plat-  
22 form that uses the platform to arrange for the  
23 sale or purchase of goods.”.

24           (b) MATERIAL MISREPRESENTATIONS IN TAKE-  
25 DOWN NOTICES.—

1           (1) AMENDMENT.—The Act entitled “An Act to  
2           provide for the registration and protection of trade-  
3           marks used in commerce, to carry out the provisions  
4           of certain international conventions, and for other  
5           purposes”, approved July 5, 1946 (commonly known  
6           as the “Trademark Act of 1946”) is amended by in-  
7           serting after section 32 (15 U.S.C. 1114), the fol-  
8           lowing new section:

9           **“SEC. 32A. MATERIAL MISREPRESENTATIONS IN TAKE-**  
10           **DOWN NOTICES.**

11           “(a) CIVIL LIABILITY.—Any person who knowingly  
12           makes any material misrepresentation in a notice to an  
13           electronic commerce platform that a counterfeit mark was  
14           used in a listing by a third party seller for goods that  
15           implicate health and safety shall be liable in a civil action  
16           for damages by the third-party seller that is injured by  
17           such misrepresentation, as the result of the electronic  
18           commerce platform relying upon such misrepresentation  
19           to remove or disable access to the listing, including tem-  
20           porary removal or disablement.

21           “(b) ACTION BY ELECTRONIC COMMERCE PLAT-  
22           FORM.—

23           “(1) AUTHORITY TO BRING ACTION.—If a  
24           third-party seller who otherwise could bring an ac-  
25           tion under subsection (a), consents and declines to

1 file suit, an electronic commerce platform may bring  
2 an action under subsection (a) against a person who  
3 knowingly made a material misrepresentation in 10  
4 or more notices to the platform alleging that a coun-  
5 terfeit mark was used in a listing by a third party  
6 seller for goods that implicate health and safety.

7 “(2) CONSENT BY THIRD-PARTY SELLER RE-  
8 QUIRED.—Consent shall be obtained in writing from  
9 each third-party seller to which the notices covered  
10 by the civil action were directed.

11 “(3) CONTENTS OF CONSENT.—The consent by  
12 a third-party seller shall be made in specific ref-  
13 erence to a particular notice after the notice has  
14 been filed with the electronic commerce platform and  
15 removal or disablement has occurred.

16 “(c) STATUTORY DAMAGES.—Any person who brings  
17 a claim under this section may elect, at any time before  
18 final judgment is rendered by the trial court, to recover,  
19 instead of actual damages, statutory damages in the  
20 amount of—

21 “(1) not less than \$2,500 or more than  
22 \$15,000 per notice containing a knowing, material  
23 misrepresentation; or

1           “(2) if aggravating circumstances exist, not less  
2 than \$15,000 or more than \$75,000 per notice con-  
3 taining a knowing, material misrepresentation.

4           “(d) DEFINITIONS.—In this section:

19 purposes”, approved July 5, 1946 (commonly known  
20 as the “Trademark Act of 1946”) (15 U.S.C.  
21 1117(a)) is amended by inserting after “under sec-  
22 tion 43(a) or (d),” the following: “a violation under

14                  which such program is submitted for con-

18           THE SECRETARY.—If at any time the Sec-

18 “(vi) ADDITIONAL ASSURANCE BY  
19 STATE BOARD.—The Secretary shall not  
20 determine that a program is an eligible job

24 the State in which the eligible job training  
25 program is provided, containing an assur-

1           ance that the program meets the require-

18           MENT.—

19           “(A) IN GENERAL.—Subject to subpara-

21           this subsection, the Secretary shall, using the  
22           data collected under paragraph (8) and such  
23           other information as the Secretary may require,  
24           determine whether such job training program  
25           meets the requirements of paragraph

1 (1)(B)(i)(V) with respect to whether the stu-  
2 dents who complete the program receive a me-  
3 dian increase of 20 percent of such students'  
4 total earnings. For the purposes of this para-  
5 graph, the Secretary shall determine such per-  
6 centage increase by calculating the difference  
7 between—

8 “(i) the total earnings of students who  
9 enroll in such program, calculated based  
10 on earnings approximately 6 months prior  
11 to enrollment; and

12 “(ii) the total earnings of students

14 based on earnings approximately 6 months  
15 after completing such program.

16 “(B) DATE OF EFFECT.—The requirement  
17 under this paragraph shall take effect beginning

21 “(3) APPEAL OF EARNINGS INFORMATION.—

22 The Secretary’s determination under paragraph (2)  
23 may include an appeals process to permit job train-  
24 ing programs to submit alternate earnings data  
25 (which may include discretionary earnings data or

2 statistically rigorous, accurate, comparable, and rep-  
3 resentative of students who enroll in or complete the  
4 program, or both, as applicable.

5 “(4) AUTHORIZATION OF AWARDS.—For the  
6 award year beginning on July 1, 2024, and each  
7 subsequent award year, the Secretary shall award

12 same terms and conditions, and be awarded in the  
13 same manner, as other Federal Pell Grants awarded  
14 under subsection (b), except a student who is eligible

16 this subsection is a student who—

17 “(A) has not yet attained a  
18 postbaccalaureate degree;

19 “(B) is enrolled, or accepted for enroll-

1           “(5) AMOUNT OF AWARD.—The amount of a  
2 job training Federal Pell Grant for an eligible stu-  
3 dent shall be determined under subsection (b), ex-  
4 cept that a student who is eligible for less than the  
5 minimum Federal Pell Grant because the eligible job  
6 training program is less than an academic year (in  
7 clock-hours and weeks of instructional time) may  
8 still be eligible for a Federal Pell Grant.

9           “(6) INCLUSION IN TOTAL ELIGIBILITY PE-  
10 RIOD.—Any period during which a student receives  
11 a job training Federal Pell Grant under this sub-  
12 section shall be included in calculating the student’s  
13 period of eligibility for Federal Pell Grants under

15   **SEC. 106003. SENSE OF CONGRESS ON UNITED STATES COM-**  
16                           **MITMENT TO THE WORLD TRADE ORGANIZA-**  
17                           **TION.**

18          (a) FINDINGS.—Congress finds the following:

19               (1) The United States is an original member of  
20               the World Trade Organization (WTO) and a key ar-  
21               chitect of the institution.

22               (2) The WTO is a critical forum for strength-  
23               ening the multilateral rules-based trading system  
24               and a bedrock of United States trade policy.

1           (3) The United States has provided the leader-  
2           ship and political will to advance the goal of the  
3           WTO to create and enforce rules that reduce obsta-  
4           cles to international trade that help ensure a level  
5           playing field.

6           (4) Sustained United States leadership in the  
7           WTO provides best paths to achieve necessary WTO  
8           reforms, create new trade rules that enhance oppor-  
9           tunities for all, and address the needs and challenges  
10          of the United States and all other free and open  
11          economies in the 21st century.

12          (5) The United States recognizes the historic  
13          nature of Dr. Ngozi Okonjo-Iweala's selection as the  
14          WTO's new Director-General as being both the first  
15          woman and first African to be chosen.

16          (6) The WTO recognizes that trade should be  
17          conducted with a view to raising standards of living,  
18          ensuring full employment and a large and steadily  
19          growing volume of real income and effective demand,  
20          expanding the production of and trade in goods and  
21          services, optimally using the world's resources in ac-  
22          cordance with the objective of sustainable develop-  
23          ment, and seeking to protect and preserve the envi-  
24          ronment.

1           (7) The WTO is the preferred forum in which  
2 member economies resolve disputes that arise among  
3 them.

4           (8) The United States has consistently sup-  
5 ported having a functional, efficient dispute settle-  
6 ment mechanism at the WTO that strictly follows  
7 the Dispute Settlement Understanding as agreed by  
8 all WTO members and remains accountable to WTO  
9 members.

10          (9) The United States, for decades, has sought  
11 to strengthen the WTO dispute settlement system by  
12 advocating for necessary, thoughtful and prudent re-  
13 forms.

14          (10) The United States has expressed long-  
15 standing concerns that the WTO Appellate Body,  
16 through its findings and procedural liberties, is im-  
17 properly adding to or diminishing the rights or obli-  
18 gations of WTO members.

19          (11) The United States has consistently urged  
20 the WTO to improve transparency by requiring that  
21 all dispute settlement hearings at the WTO be open  
22 to the public, and all submissions by the parties be  
23 publicly available.

24          (12) While several WTO members have joined  
25 the United States in agreeing to open hearings to

1 the public and in making public submissions, most  
2 WTO Members continue to insist on closed hearings  
3 and confidential submissions.

4 (13) Transparent WTO dispute settlement en-  
5 hances WTO members' understanding of the dispute  
6 settlement system, particularly for those who do not  
7 participate often in the system.

8 (14) Open dispute settlement promotes the ac-  
9 countability, professionalism, and impartiality of  
10 WTO adjudicators, to the benefit of the dispute set-  
11 tlement system as a whole.

12 (15) Many WTO members have failed to meet  
13 basic notification obligations making it difficult and,  
14 in some cases, impossible to monitor or determine  
15 their compliance with WTO obligations, including  
16 subsidies disciplines.

17 (16) The United States has encouraged, by pro-  
18 posing various incentives and administrative meas-  
19 ures, better compliance with notification obligations.

20 (17) The WTO allows members to self-identify  
21 as developing countries in order to receive special  
22 and differential treatment.

23 (18) Some self-declared developing countries  
24 that are now advanced continue to demand the same  
25 special and differential treatment intended for much

1 smaller, less developed members, creating  
2 asymmetries that hinder the WTO from achieving  
3 meaningful outcomes in current and future negotia-  
4 tions.

5 (19) For over a decade, most WTO members  
6 have refused to engage in serious efforts to address  
7 longstanding United States calls for reform of dis-  
8 pute settlement and other important aspects of the  
9 WTO system.

10 (20) WTO members are engaged in negotia-  
11 tions to reform the WTO and create new rules, in-  
12 cluding with respect to fisheries subsidies and e-com-  
13 merce.

14 (b) SENSE OF CONGRESS.—It is the sense of Con-  
15 gress that—

16 (1) the United States should continue to lead  
17 reform efforts to ensure that the World Trade Orga-  
18 nization (WTO) functions as agreed by the member-  
19 ship and is updated appropriately for the 21st cen-  
20 tury;

21 (2) the United States should continue to urge  
22 other WTO members to work with the United States  
23 to achieve needed reforms so that the WTO and its  
24 members can address unjustified barriers to trade

1 and promote economic norms that improve the  
2 standard of living across the world; and

3 (3) the United States Trade Representative  
4 should continue to lead and work with other coun-  
5 tries to pursue reforms at the WTO that—

6 (A) address concerns with the WTO’s Ap-  
7 pellate Body;

8 (B) improve the efficiency and trans-  
9 parency of dispute settlement proceedings;

10 (C) remediate the failure to satisfy notifi-  
11 cation obligations of the various WTO agree-  
12 ments and develop accountability mechanisms  
13 to address this issue proactively;

14 (D) discipline the use of special and dif-  
15 ferential treatment for self-declared developing  
16 countries;

17 (E) ensure there are platforms to discuss  
18 issues related to labor, the environment, and  
19 women’s economic empowerment; and

20 (F) create new rules and structures that  
21 can serve the United States interests while pro-  
22 moting peace, prosperity, and open markets and  
23 societies.

1 tity that establishes the charge, and a common carrier or  
2 marine terminal operator that collects a charge on behalf  
3 of another common carrier or marine terminal operator  
4 is not responsible for providing the certification, except  
5 that an invoice from a common carrier or marine terminal  
6 operator collecting a charge on behalf of another must in-  
7 clude a certification from the party that established the  
8 charge.”.

9 **SEC. 180008. PROHIBITION ON UNREASONABLY DECLINING**  
10 **CARGO.**

4        import and export demands; or

5                “(15) unreasonably decline export cargo book-  
6        ings if such cargo can be loaded safely and timely,  
7        as determined by the Commandant of the Coast  
8        Guard, and carried on a vessel scheduled for the im-

10        (b) RULEMAKING ON UNREASONABLY DECLINING  
11 CARGO.—

12                (1) IN GENERAL.—Not later than 90 days after  
13        the date of enactment of this Act, the Commission  
14        shall initiate a rulemaking proceeding to define the

20        ocean common carriers prioritizing the shipment of  
21        empty containers while excluding, limiting, or other-  
22        wise reducing the shipment of full, loaded containers  
23        when such containers are readily available to be  
24        shipped and the appurtenant vessel has the weight

1 and space capacity available to carry such containers  
2 if loaded in a safe and timely manner.

3 **SEC. 180009. DETENTION AND DEMURRAGE.**

4 (a) IN GENERAL.—Section 41104 of title 46, United

8 to include a certification under section 41102(e) alongside  
9 any demurrage or detention charge shall eliminate any ob-  
10 ligation of the charged party to pay the applicable charge.

11 “(e) DEMURRAGE AND DETENTION PRACTICES AND  
12 CHARGES.—Notwithstanding any other provision of law

24 ableness of any demurrage or detention charges  
25 which are the subject of any complaint proceeding

1 challenging a common carrier or marine terminal op-  
2 erator demurrage or detention charges as unjust and  
3 unreasonable.

4 “(f) PENALTIES FOR FALSE OR INACCURATE CER-  
5 TIFIED DEMURRAGE OR DETENTION CHARGES.—In the  
6 event of a finding that the certification under section  
7 41102(e) was inaccurate, or false after submission under  
8 section 41301, penalties under section 41107 shall be ap-  
9 plied if the Commission determines, in a separate enforce-

7 definition for cargo availability for retrieval  
8 shall account for government inspections.

9 (B) Establishing that demurrage and de-

11 sources but incentivize efficiencies in the ocean  
12 transportation network, including the retrieval  
13 of cargo and return of equipment.

14 (C) Prohibiting the consumption of free  
15 time or collection of demurrage and detention  
16 charges when obstacles to the cargo retrieval or  
17 return of equipment are within the scope of re-

19 yond the control of the invoiced or contracting  
20 party.

22 tinuation of free time unless cargo is available  
23 for retrieval and timely notice of cargo avail-  
24 ability has been provided.

2 time or collection of demurrage charges when  
3 marine terminal appointments are not available  
4 during the free time period.

5           (F) Prohibiting the consumption of free  
6 time or collection of detention charges on con-  
7 tainers when the marine terminal required for  
8 return is not open or available.

9           (G) Requiring common carriers to provide  
10 timely notice of—

12 charge;

13                 (ii) container return locations; and

17 ments, including timeliness and supporting in-  
18 formation that shall be included in or with in-  
19 voices for demurrage and detention charges  
20 that will allow the invoiced party to validate the  
21 charges.

22           (I) Requiring common carriers and marine  
23 terminal operators to establish reasonable dis-  
24 pute resolution policies and practices.

1           (J) Establishing the responsibilities of

5           parties other than the shipper for any demur-

18               equipment, vessel space accommodations, containers,  
19               and other instrumentalities necessary for the receiv-
