## A BILL

To support educational entities in fully implementing title IX and reducing and preventing sex discrimination in all areas of education, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Patsy T. Mink and  
5 Louise M. Slaughter Gender Equity in Education Act of  
6 2021”.

7 **SEC. 2. FINDINGS.**

8 FINDINGS.—Congress finds the following:

1           (1) Title IX of the Education Amendments of  
2           1972 (20 U.S.C. 1681 et seq.) (in this Act referred  
3           to as “title IX”) and the implementing regulations  
4           of title IX prohibit sex discrimination in federally  
5           funded education programs and activities.

6           (2) Although title IX requires that schools treat  
7           students equally with regard to athletic participation  
8           opportunities, athletic scholarships, and the benefits  
9           and services provided to athletic teams, female par-  
10          ticipation rates, especially for girls of color, lag far  
11          behind male participation rates. Nationally, for ex-  
12          ample, boys receive more than 1,130,000 more op-  
13          portunities to play high school sports than girls.

14          (3) Furthermore, a recent study from the Wom-  
15          en’s Sports Foundation found that African-American  
16          youth and youth from low-income households were  
17          least likely to be current players (35 percent, and 28  
18          percent respectively) and most likely to have never  
19          played sports (49 percent, and 54 percent respec-  
20          tively) compared to others. These disparities were  
21          especially prominent for girls from low-income fami-  
22          lies (25 percent current players, 58 percent never  
23          played) and African-American families (28 percent  
24          current players, 55 percent never played). The gaps  
25          in participation in high school sports have not sig-

1 significantly narrowed in the past 20 years—with 40  
2 percent of predominantly minority-serving high  
3 schools having large gaps between the percentage of  
4 spots on teams for girls and the percentage of stu-  
5 dents who are girls (compared to only 16 percent of  
6 predominantly White high schools that have such  
7 gaps).

8 (4) Female student athletes have been found to  
9 have higher levels of self-esteem, as well as reduced  
10 risk for cardiovascular disease, diabetes, osteoporo-  
11 sis, and breast cancer, compared to those who do not  
12 play sports. In addition, female student athletes are  
13 more likely to graduate from high school than fe-  
14 male students who do not play sports. Girls who play  
15 sports in high school go on to earn 7 percent higher  
16 annual wages than those who do not play sports,  
17 and are more likely to enter the labor force and pur-  
18 sue higher-skill, previously male-dominated positions.  
19 Generally, sports participation for women is associ-  
20 ated with a lower prevalence of experiencing intimate  
21 partner violence, reinforcing that athletic access not  
22 only strengthens health, educational, and workplace  
23 outcomes, but also personal safety.

24 (5) Although the availability of athletic scholar-  
25 ships facilitates access to higher education, many in-

1       stitutions of higher education fail to award propor-  
2       tional athletic financial aid to women, which can af-  
3       fect their long-term employment outcomes and eco-  
4       nomic security. According to the Department of  
5       Education’s Equity in Athletics Disclosure Act data  
6       from 2019, male athletes at NCAA Division I and  
7       II schools received \$240,000,000 more in athletic  
8       scholarships than female athletes at those schools.

9               (6) Although title IX ensures gender equity in  
10       career and technical education, women are severely  
11       underrepresented in fields nontraditional to their  
12       gender. A recent study by the National Coalition for  
13       Women and Girls in Education indicated that  
14       women make up more than 80 percent of workers  
15       with training or certification in historically women-  
16       dominated occupations that pay less than \$30,000  
17       per year, including child care, early childhood edu-  
18       cation, home care, and cosmetology. Women rep-  
19       resent less than 40 percent of workers trained or  
20       certified in high-paying and historically male-domi-  
21       nated fields, including transportation, advanced  
22       manufacturing, and construction.

23               (7) Although title IX ensures gender equity in  
24       the fields of science, technology, engineering, and  
25       mathematics (in this section referred to as

1 “STEM”) education, women are disproportionately  
2 lost at nearly every stage of the STEM pipeline. A  
3 recent report by the National Center for Education  
4 Statistics showed that women earned only 32 per-  
5 cent of all STEM degrees in 2017, and nearly 1/2 of  
6 these women were White. Women of color earned  
7 about 12 percent of STEM degrees in that same  
8 year. Furthermore, in STEM fields where women  
9 are particularly underrepresented, such as com-  
10 puting and engineering, women earned an even  
11 smaller percentage of degrees, including only 19 per-  
12 cent of computing bachelor’s degrees, and 21 per-  
13 cent of engineering bachelor’s degrees.

14 (8) Although title IX prohibits sex discrimina-  
15 tion in employment in federally funded education  
16 programs, a recent report by the American Associa-  
17 tion of University Women found that women com-  
18 prise only 36 percent of tenured faculty and 30 per-  
19 cent of university presidents. A similar study by the  
20 National Science Foundation confirmed that women  
21 only hold 34 percent of all tenured and tenure-track  
22 positions, and 27 percent of full professor positions  
23 in STEM fields. Furthermore, Black and Latina  
24 women, together, hold only 4 percent of all tenured  
25 and tenure-track positions, and barely over 2 percent

1 of full professor positions in STEM fields. Asian-  
2 American women hold around 5 percent of all  
3 tenured and tenure-track positions, and less than 3  
4 percent of full professor positions in STEM fields.

5 (9) Although title IX protects against sexual  
6 and sex-based harassment and violence, more than  
7 50 percent of girls and 40 percent of boys in grades  
8 7 through 12 experience sexual harassment each  
9 year, and approximately 10 percent of high school  
10 students experience dating violence each year. A re-  
11 cent GLSEN report indicated that 87 percent of les-  
12 bian, gay, bisexual, transgender, queer, and ques-  
13 tioning (referred to in this section as “LGBTQ”)  
14 students have experienced harassment or assault  
15 based on a personal characteristic, and nearly 66  
16 percent have experienced LGBTQ-related verbal har-  
17 assment at school based on sexual orientation. Re-  
18 search has shown that LGBTQ students who experi-  
19 ence harassment at school are more likely to experi-  
20 ence depression and anxiety, to engage in unhealthy  
21 and antisocial behaviors, and to have more unex-  
22 cused absences from school.

23 (10) Although title IX prohibits discrimination  
24 on the basis of pregnancy or parenting status, the  
25 limited availability of accommodations, including lac-

1       tation accommodations, excused absences for preg-  
2       nancy-related medical conditions, and child care  
3       needs (including caring for a sick child) is a leading  
4       reasons that parenting mothers drop out of high  
5       school. A recent report by the National Women’s  
6       Law Center indicated that only half of teenage  
7       mothers earn a high school diploma by the age of  
8       22, compared with 89 percent of women who do not  
9       have a child during their teenage years, and that  
10      one-third of young mothers will never get a diploma  
11      or GED, further limiting continuing opportunities  
12      for education and employment.

13           (11) Although title IX protects against dis-  
14      crimination based on stereotypes of actual or per-  
15      ceived sex, many people carry implicit or uncon-  
16      scious biases that can unintentionally influence atti-  
17      tudes, beliefs, behaviors, and decision-making proc-  
18      esses. Research has shown that unconscious biases  
19      can impact classroom environments, teaching meth-  
20      ods, student evaluations, disciplinary practices, and  
21      career and counseling guidance, which can lead to  
22      discrimination against students based on race, color,  
23      national origin, and disability, particularly for stu-  
24      dents who are pursuing nontraditional fields.

1           (12) Nationally, the Feminist Majority Founda-  
2           tion has estimated at least 100,000 title IX coordi-  
3           nators are needed, but a recent report only identified  
4           23,000 title IX coordinators in 2016. The Feminist  
5           Majority Foundation has found that schools serving  
6           children in prekindergarten through grade 12 rarely  
7           have their own title IX coordinators.
