

118TH CONGRESS
2D SESSION

S. 5276

To require a roadmap for the future desired state for the solid rocket motor (SRM) industrial base, and for other purposes.

IN THE SENATE OF THE UNITED STATES

SEPTEMBER 25, 2024

Mr. CORNYN (for himself, Mr. PADILLA, and Mr. WICKER) introduced the following bill; which was read twice and referred to the Committee on Armed Services

A BILL

To require a roadmap for the future desired state for the solid rocket motor (SRM) industrial base, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Solid Propulsion En-
5 hancement and Advancement for Readiness Act of 2024”
6 or the “SPEAR Act of 2024”.

7 **SEC. 2. SOLID ROCKET MOTOR INDUSTRIAL BASE.**

8 (a) IN GENERAL.—Not later than March 1, 2025, the
9 Under Secretary of Defense for Acquisition and

1 Sustainment, acting through the Director of the Joint
2 Production Accelerator Cell and the Assistant Secretary
3 of Defense for Industrial Base Policy, shall submit to the
4 congressional defense committees a roadmap for the fu-
5 ture desired state for the solid rocket motor (SRM) indus-
6 trial base.

7 (b) COORDINATION.—In developing this roadmap re-
8 quired under subsection (a), the Under Secretary of De-
9 fense for Acquisition and Sustainment shall coordinate
10 with the following officials:

11 (1) The Assistant Secretary of the Navy for Re-
12 search, Development, and Acquisition.

13 (2) The Assistant Secretary of the Army for
14 Acquisition, Logistics, and Technology.

15 (3) The Assistant Secretary of the Air Force
16 for Acquisition, Technology, and Logistics.

17 (4) Service munitions Program Executive Offi-
18 cers, as appropriate.

19 (5) The Director of the Missile Defense Agency.

20 (c) ELEMENTS.—The roadmap under subsection (a)
21 shall include the following elements:

22 (1) The current and future capability and ca-
23 pacity of existing solid rocket motor manufacturers,
24 Aerojet Rocketdyne and Northrop Grumman (for-
25 merly Orbital ATK).

1 (2) The capability and capacity of potential new
2 entrants to the solid rocket motor industrial base,
3 including companies funded by the United States
4 Government.

5 (3) An assessment of the process for qualifying
6 new entrants, including new manufacturing proc-
7 esses, for solid rocket motors.

8 (4) An assessment of the capacity and capa-
9 bility of the SRM industrial base to support the de-
10 mands of existing munitions program of record.

11 (5) An assessment of the capacity and capa-
12 bility of the SRM industrial base to support poten-
13 tial future demands of munitions programs.

14 (6) An assessment of emerging technologies or
15 manufacturing processes that would support the
16 modernization or evolution of the SRM industrial
17 base.

18 (7) A mapping of program of record and antici-
19 pated or potential future munitions programs to
20 SRM manufacturer throughput.

21 (8) Identification of current and potential
22 shortfalls in common precursors and chemicals.

23 (9) United States Government funding to date
24 for the SRM industrial base, whether through pro-
25 grams of record or through Defense Production Act

1 (DPA) or Industrial Base Analysis and Sustainment
2 (IBAS) programs, broken out by fiscal year and pur-
3 pose.

4 (10) A plan to prioritize government funding
5 for energetics facilities in the following precedence:

6 (A) Government-owned, government-oper-
7 ated facilities.

8 (B) Government-owned, contractor-oper-
9 ated facilities.

10 (C) Contractor-owned, contractor-operated
11 facilities.

12 (d) GAO REVIEW.—Not later than June 1, 2025, the
13 Comptroller General of the United States shall conduct
14 a review of Department of Defense decisions regarding the
15 SRM industry since February 1, 2022, including—

16 (1) the requested levels of funding for muni-
17 tions using solid rocket motors, broken down by
18 motor diameter;

19 (2) the requested levels of funding for direct in-
20 vestment in government-owned, government-operated
21 facilities, government-owned, contractor-operated fa-
22 cilities, and contractor-owned, contractor-operated
23 facilities;

24 (3) the requested levels of funding for direct in-
25 vestment in the SRM supplier base;

1 (4) the potential adverse effects of prioritizing
2 privately owned SRM production infrastructure over
3 government-owned SRM production infrastructure;
4 and

5 (5) a cost and capabilities comparison between
6 the expansion of existing infrastructure at the Alle-
7 gany Ballistics Laboratory and construction of new
8 infrastructure at Naval Surface Warfare Center, In-
9 dian Head.
