2 under paragraph (1), unless the Commission
3 notifies the person who made the certification
4 within such time that the Commission is stay-
5 ing the certification due to—

6 “(i) an inadequate explanation by the
7 person making the certification; or

8 “(ii) any novel or complex issues
9 which require additional time to consider.

10 “(B) PUBLIC NOTICE.—The Commission
11 shall make the following available to the public
12 and provide a copy to the Commodity Futures
13 Trading Commission:

14 “(i) Each certification received under
15 paragraph (1).

16 “(ii) Each stay of the Commission
17 under this subsection, and the reasons
18 therefor.

19 “(iii) Any response from a person
20 making a certification under paragraph (1)
21 to a stay of the certification by the Com-
22 mission.

23 “(C) CONSOLIDATION.—The Commission
24 may consolidate and treat as one submission
25 multiple certifications made under paragraph

(1) for the same blockchain system which relates to a digital commodity which are received during the review period provided under this paragraph.

“(5) STAY OF CERTIFICATION.—

“(A) IN GENERAL.—A notification by the Commission pursuant to paragraph (4)(A) shall stay the certification once for up to an additional 120 days from the date of the notification.

“(B) PUBLIC COMMENT PERIOD.—Before the end of the 60-day period described under paragraph (4)(A), the Commission may begin a public comment period of at least 30 days in conjunction with a stay under this subsection.

“(6) DISPOSITION OF CERTIFICATION.—A certification made under paragraph (1) shall—

“(A) become effective—

“(i) upon the publication of a notification from the Commission to the person who made the certification that the Commission does not object to the certification; or

“(ii) at the expiration of the certification review period; and

1 “(B) not become effective upon the publi-
2 cation of a notification from the Commission to
3 the person who made the certification that the
4 Commission has rebutted the certification.

5 “(7) RECERTIFICATION.—With respect to a
6 blockchain system for which a certification has been
7 rebutted under this subsection, no person may make
8 a certification under paragraph (1) with respect to
9 such blockchain system during the 90-day period be-
10 ginning on the date of such rebuttal.

11 “(8) APPEAL OF REBUTTAL.—

12 “(A) IN GENERAL.—If a certification is re-
13 butted under this section, the person making
14 such certification may appeal the decision to
15 the United States Court of Appeals for the Dis-
16 trict of Columbia, not later than 60 days after
17 the notice of rebuttal is made.

18 “(B) REVIEW.—In an appeal under sub-
19 paragraph (A), the court shall have de novo re-
20 view of the determination to rebut the certifi-
21 cation.

22 “(b) MATURITY CRITERIA.—

23 “(1) SENSE OF CONGRESS.—It is the sense of
24 the Congress that protecting investors, maintaining
25 fair, orderly, and efficient markets, and facilitating

1 capital formation necessitates establishing clear cri-
2 teria for blockchain systems to be deemed mature,
3 as well as enabling the Commission to develop, with-
4 out prejudice to any such criteria codified in statute,
5 alternative criteria by which blockchain systems may
6 be considered not to be controlled by any person or
7 group of persons under common control in order to
8 accommodate changes in markets and technology.

9 “(2) IN GENERAL.—The Commission may issue
10 rules identifying conditions by which a blockchain
11 system, together with its related digital commodity,
12 shall be considered a mature blockchain system, con-
13 sistent with the protection of investors, maintenance
14 of fair, orderly, and efficient markets, and the facili-
15 tation of capital formation.

16 “(3) RULES OF CONSTRUCTION.—

17 “(A) Nothing in this subsection may be
18 construed to permit the Commission to impose
19 additional criteria to the criteria in subsection
20 (c) for certifying that a blockchain system is a
21 mature blockchain system pursuant to sub-
22 section (c).

23 “(B) Nothing in this subsection or sub-
24 section (c) may be construed to limit the Com-
25 mission’s ability to identify alternative condi-

1 tions and criteria by which a blockchain system
2 may be considered a mature blockchain system.

3 “(c) DEEMED MATURE.—

4 “(1) IN GENERAL.—Notwithstanding subsection
5 (b), for the purposes of subsection (a), a digital com-
6 modity issuer, digital commodity related person, dig-
7 ital commodity affiliated person, or decentralized
8 governance system of the blockchain system may es-
9 tablish that a blockchain system, together with its
10 related digital commodity, is not controlled by any
11 person or group of persons under common control,
12 if the blockchain system, together with its related
13 digital asset, meets the requirements described in
14 paragraph (2) or (3).

15 “(2) CRITERIA FOR ANY BLOCKCHAIN SYS-
16 TEM.—The requirements described in this paragraph
17 are the following:

18 “(A) SYSTEM VALUE.—

19 “(i) MARKET VALUE.—The digital
20 commodity has a value that is substantially
21 derived from the use and functioning of
22 the blockchain system.

23 “(ii) DEVELOPMENT OF VALUE MECH-
24 ANISM SUBSTANTIALLY COMPLETED.—

25 Where the digital commodity issuer has

1 made public a development plan describing
2 how the digital commodity's value is rea-
3 sonably expected to be derived from the
4 programmatic functioning of the
5 blockchain system, the development of such
6 mechanisms has been substantially com-
7 pleted.

8 “(B) FUNCTIONAL SYSTEM.—The
9 blockchain system allows network participants
10 to engage in the activities the blockchain system
11 is intended to provide, including—

12 “(i) using, transmitting, or storing
13 value, or otherwise executing transactions,
14 on the blockchain system;

15 “(ii) deploying, executing, or accessing
16 software or services, or otherwise offering
17 or participating in services, deployed on or
18 integrated with the blockchain system;

19 “(iii) participating in the consensus
20 mechanism, transaction validation process,
21 or decentralized governance system of the
22 blockchain system; or

23 “(iv) operating any client, node,
24 validator, or other form of computational

1 infrastructure with respect to the
2 blockchain system.

3 “(C) OPEN AND INTEROPERABLE SYS-
4 TEM.—The blockchain system—

5 “(i) is composed of source code that is
6 open source; and

7 “(ii) does not restrict or prohibit
8 based on the exercise of unilateral author-
9 ity any person, other than a digital com-
10 modity issuer, digital commodity related
11 person, or digital commodity affiliated per-
12 son from engaging in the activities the
13 blockchain system is intended to provide,
14 including the activities described in sub-
15 paragraph (B).

16 “(D) PROGRAMMATIC SYSTEM.—The
17 blockchain system operates, executes, and en-
18 forces its operations and transactions based
19 solely on pre-established, transparent rules en-
20 coded directly within the source code of the
21 blockchain system.

22 “(E) SYSTEM GOVERNANCE.—No person
23 or group of persons under common control—

24 “(i) has the unilateral authority, di-
25 rectly or indirectly, through any contract,

1 arrangement, understanding, relationship,
2 or otherwise, to control or materially alter
3 the functionality, operation, or rules of
4 consensus or agreement of the blockchain
5 system or its related digital commodity; or

6 “(ii) has the unilateral authority to di-
7 rect the voting, in the aggregate, of 20
8 percent or more of the outstanding voting
9 power of such blockchain system by means
10 of a related digital commodity, nodes or
11 validators, a decentralized governance sys-
12 tem, or otherwise, in a blockchain system
13 which can be altered by a voting system.

14 “(F) IMPARTIAL SYSTEM.—No person or
15 group of persons under common control pos-
16 sesses a unique permission or privilege with re-
17 spect to functionality, operation, or rules of
18 consensus or agreement of the blockchain sys-
19 tem or its related digital commodity, unless
20 such alteration—

21 “(i) addresses errors, regular mainte-
22 nance, or cybersecurity risks of the
23 blockchain system that affect the pro-
24 grammatic functioning of the blockchain
25 system; and

1 “(ii) is adopted through the consensus
2 or agreement of a decentralized governance
3 system.

4 “(G) DISTRIBUTED OWNERSHIP.—No dig-
5 ital commodity issuer, digital commodity related
6 person, or digital commodity affiliated person
7 beneficially owns, in the aggregate, 20 percent
8 or more of the total amount of units of the dig-
9 ital commodity.

10 “(3) OPTIONAL CRITERIA FOR PREEXISTING
11 BLOCKCHAIN SYSTEMS.—The requirements described
12 in this paragraph are that the blockchain system—

13 “(A) was created prior to the date of en-
14 actment of this section;

15 “(B) met the requirements of subpara-
16 graphs (A) through (F) of paragraph (2) prior
17 to the date of enactment of this section; and

18 “(C) at least 50 percent of the units of the
19 digital commodity related to the blockchain sys-
20 tem are held by persons other than the digital
21 commodity issuer, a digital commodity related
22 person, or a digital commodity affiliated person.

23 “(d) DECENTRALIZED GOVERNANCE SYSTEM.—

1 “(1) For the purposes of this section, a decen-
2 tralized governance system is not a ‘person’ or a
3 ‘group of persons under common control’.

4 “(2) A blockchain system, together with its dig-
5 ital commodity, shall not be precluded from being
6 considered a mature blockchain system solely based
7 on a functional, administrative, clerical, or ministe-
8 rial action of a decentralized governance system, in-
9 cluding any such action taken by a person acting on
10 behalf of and at the direction of the decentralized
11 governance system, as determined by the Commis-
12 sion and consistent with the protection of investors,
13 maintenance of fair, orderly, and efficient markets,
14 and the facilitation of capital formation.

15 “(e) RULEMAKING.—Not more than 270 days after
16 the date of enactment of this section, the Commission
17 shall issue rules to carry out this section.”.

18 **SEC. 206. EFFECTIVE DATE.**

19 Unless otherwise provided in this title, this title and
20 the amendments made by this title shall take effect 360
21 days after the date of enactment of this Act, except that,

14 **TITLE V—INNOVATION AND**
15 **TECHNOLOGY IMPROVEMENTS**

16 **SEC. 501. FINDINGS; SENSE OF CONGRESS.**

17 (a) FINDINGS.—Congress finds the following:

18 (1) Entrepreneurs and innovators are building
19 and deploying this next generation of the internet.

20 (2) Digital commodity networks represent a
21 new way for people to join together and cooperate
22 with one another to undertake certain activities.

23 (3) Digital commodities have the potential to be
24 the foundational building blocks of these systems,
25 aligning the economic incentive for individuals to co-

1 operate with one another to achieve a common pur-
2 pose.

3 (4) The digital commodity ecosystem has the
4 potential to grow our economy and improve everyday
5 lives of Americans by facilitating collaboration
6 through the use of technology to manage activities,
7 allocate resources, and facilitate decision making.

8 (5) Blockchain systems and the digital commod-
9 ities they empower provide control, enhance trans-
10 parency, reduce transaction costs, and increase effi-
11 ciency if proper protections are put in place for in-
12 vestors, consumers, our financial system, and our
13 national security.

14 (6) Blockchain technology facilitates new types
15 of network participation which businesses in the
16 United States may utilize in innovative ways.

17 (7) Other digital commodity companies are set-
18 ting up their operations outside of the United
19 States, where countries are establishing frameworks
20 to embrace the potential of blockchain technology
21 and digital commodities and provide safeguards for
22 consumers.

23 (8) Digital commodities, despite the purported
24 anonymity, provide law enforcement with an excep-

1 tional tracing tool to identify illicit activity and bring
2 criminals to justice.

3 (9) The Financial Services Committee of the
4 House of Representatives has held multiple hearings
5 highlighting various risks that digital commodities
6 can pose to the financial markets, consumers, and
7 investors that must be addressed as we seek to har-
8 ness the benefits of these innovations.

9 (b) SENSE OF CONGRESS.—It is the sense of Con-
10 gress that—

11 (1) the United States should seek to prioritize
12 understanding the potential opportunities of the next
13 generation of the internet;

14 (2) the United States should seek to foster ad-
15 vances in technology that have robust evidence indi-
16 cating they can improve our financial system and
17 create more fair and equitable access to financial
18 services for everyday Americans while protecting our
19 financial system, investors, and consumers;

20 (3) the United States must support the respon-
21 sible development of digital commodities and the un-
22 derlying technology in the United States or risk the
23 shifting of the development of such assets and tech-
24 nology outside of the United States, to less regulated
25 countries;

1 (4) Congress should consult with public and
2 private sector stakeholders to understand how to
3 enact a functional framework tailored to the specific
4 risks and unique benefits of different digital com-
5 modity-related activities, distributed ledger tech-
6 nology, distributed networks, and mature blockchain
7 systems;

8 (5) Congress should enact a functional frame-
9 work tailored to the specific risks of different digital
10 commodity-related activities and unique benefits of
11 distributed ledger technology, distributed networks,
12 and mature blockchain systems; and

13 (6) consumers and market participants will ben-
14 efit from a framework for digital commodities con-
15 sistent with longstanding investor protections in se-
16 curities and commodities markets, yet tailored to the
17 unique benefits and risks of the digital commodity
18 ecosystem.
