## A BILL

To establish a pilot program to address technology-related abuse in domestic violence cases.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Tech Safety for Vic-  
5 tims of Domestic Violence, Dating Violence, Sexual As-  
6 sault, and Stalking Act”.

7 **SEC. 2. FINDINGS.**

8 Congress finds the following:

9 (1) In the United States, 41 percent of women  
10 and 26 percent of men experience some form of sex-

1 ual violence, physical violence, or stalking, or a com-  
2 bination thereof, by an intimate partner.

3 (2) Many victims of intimate partner violence  
4 also experience nonphysical forms of abuse.

5 (3) With the proliferation of digital technology,  
6 technological abuse has become increasingly preva-  
7 lent and pervasive among victims of intimate partner  
8 violence.

9 (4) According to a 2021 study by the National  
10 Network to End Domestic Violence, 97 percent of  
11 the programs providing support to victims of inti-  
12 mate partner violence have indicated that abusers  
13 are making use of technology to stalk, harass, or  
14 control victims.

15 (5) In the United States, 1 in 3 women under  
16 the age of 35 report being sexually harassed online,  
17 and over half of LGBTQ+ individuals report being  
18 the target of online abuse based on their sexual ori-  
19 entation or gender.

20 (6) Of victims who are stalked using tech-  
21 nology—

22 (A) 67 percent received unwanted phone  
23 calls, voice messages, or text messages;

24 (B) 50 percent received unwanted emails  
25 or messages via the internet;

1 (C) about 35 percent said their activities  
2 were monitored using social media;

3 (D) 27 percent experienced the offender  
4 posting or threatening to post inappropriate,  
5 unwanted, or personal information about them  
6 on the internet; and

7 (E) 19 percent said the offender spied on  
8 them or monitored their activities using tech-  
9 nologies such as listening devices, cameras, or  
10 computer or cellphone monitoring software.

11 (7) Technological abuse runs the gamut of tech-  
12 nical sophistication, from the most basic social  
13 media platforms and phone-based apps to specialty  
14 stalkerware apps, demonstrating that technological  
15 abuse does not require huge financial resources or  
16 complex knowledge of technology.

17 (8) Rapid advances in the technology and meth-  
18 ods for technological abuse present challenges for  
19 advocates seeking to advise victims and prevent tech-  
20 nological abuse.

21 (9) The integration of trained technology ex-  
22 perts into survivor support networks has been suc-  
23 cessful in preventing and shielding survivors from  
24 technological abuse.
