A BILL

To establish a grant program in the Bureau of Consumer Financial Protection to fund the establishment of centers of excellence to support research, development and planning, implementation, and evaluation of effective programs in financial literacy education for young people and families ages 8 through 24 years old, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Young Americans Fi-
5 nancial Literacy Act”.

6 **SEC. 2. FINDINGS.**

7 The Congress finds as follows:

8 (1) That 88 percent of Americans believe finan-
9 cial education should be taught in schools and 92
10 percent of K–12 teachers believe that financial edu-
11 cation should be taught in school, but only 12 per-
12 cent of teachers actually teach the subject.

13 (2) According to a 2020 survey, less than half
14 of states require high school students to take a
15 course on personal finance, and less than 17 percent
16 of high schoolers were required to take a one semes-
17 ter personal finance course.

18 (3) For the fourth year in a row, more than one
19 third of surveyed consumers gave themselves a “B”
20 when grading their own level of basic financial lit-
21 eracy. Less than one-fifth of Americans gave them-
22 selves an “A”. Most adults feel that their financial
23 literacy skills are inadequate, yet they do not rely on
24 anyone else to handle their finances; they feel it is

1 important to know more but have received no finan-
2 cial education.

3 (4) The sudden disruptions caused by the
4 spread of COVID–19 are presenting economic chal-
5 lenges with growing consequences. While some fac-
6 tors affecting financial well-being are beyond indi-
7 vidual control, financial literacy can help people bet-
8 ter manage their finances through times of hardship.

9 (5) It is necessary to respond immediately to
10 the pressing needs of individuals faced with the loss
11 of their financial stability; however increased atten-
12 tion must also be paid to financial literacy education
13 reform and long-term solutions to prevent future
14 personal financial disasters.

15 (6) There is an urgent need to respond to the
16 COVID–19 economic recovery with research-based
17 financial literacy education programs to reach indi-
18 viduals at all ages and socioeconomic levels, particu-
19 larly those facing unique and challenging financial
20 situations, such as high school graduates entering
21 the workforce, soon-to-be and recent college grad-
22 uates, young families, and the unique needs of mili-
23 tary personnel and their families.

24 (7) High school and college students who are
25 exposed to cumulative financial education show an

1 increase in financial knowledge, which in turn drives
2 increasingly responsible behavior as they become
3 young adults.

4 (8) The majority (52 percent) of young adults
5 between the ages of 23–28 consider “making better
6 choices about managing money”, the single most im-
7 portant issue for individual Americans to act on
8 today.

9 (9) According to the Government Accountability
10 Office, giving Americans the information they need
11 to make effective financial decisions can be key to
12 their well-being and to the country’s economic
13 health. The current pandemic, in which 88 percent
14 of Americans say is causing stress on their personal
15 finances, underscores the need to improve individ-
16 uals’ financial literacy and empower all Americans to
17 make informed financial decisions. This is especially
18 true for young people as they are earning their first
19 paychecks, securing student aid, and establishing
20 their financial independence. Therefore, focusing
21 economic education and financial literacy efforts and
22 best practices for young people between the ages of
23 8–24 is of the utmost importance.
