

119TH CONGRESS
1ST SESSION

H. R. 5845

To establish a lending program for Latin America and the Caribbean to reaffirm the United States commitment to sustainable and equitable growth and energy security in the Western Hemisphere.

IN THE HOUSE OF REPRESENTATIVES

OCTOBER 28, 2025

Mr. ESPAILLAT introduced the following bill; which was referred to the
Committee on Foreign Affairs

A BILL

To establish a lending program for Latin America and the Caribbean to reaffirm the United States commitment to sustainable and equitable growth and energy security in the Western Hemisphere.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Las Americas Energy
5 Security Act”.

6 **SEC. 2. FINDINGS; PURPOSE; STATEMENT OF POLICY.**

7 (a) FINDINGS.—Congress finds the following:

1 (1) Energy independence and security are crit-
2 ical for a country to maintain its sovereignty, inde-
3 pendence, and sustainable economic growth.

4 (2) The International Energy Agency (“IEA”)
5 defines energy security as the uninterrupted avail-
6 ability of energy sources at an affordable price.

7 (3) The IEA defines long-term energy security
8 as primarily dealing with timely investments to sup-
9 ply energy in line with economic developments and
10 environmental needs.

11 (4) The IEA defines short-term energy security
12 as focusing on the ability of a country’s energy sys-
13 tem to react promptly to sudden changes in the sup-
14 ply-demand balance.

15 (5) The IEA’s Executive Director remarked in
16 February 2023 that Russia’s February 2022 inva-
17 sion of Ukraine had sparked an ongoing global en-
18 ergy crisis with serious implications for international
19 energy security.

20 (6) The Intergovernmental Panel on Climate
21 Change (IPCC), a United Nations body that pro-
22 vides regular assessments on global heating, issued
23 a synthesis report in March 2023, and found that
24 the effects of global temperature changes were “al-
25 ready affecting many weather and climate extremes

1 in every region across the globe,” which has “led to
2 widespread adverse impacts on food and water secu-
3 rity, human health and on economies and society
4 and related losses and damages to nature and peo-
5 ple.”.

6 (7) The IPCC notes that to avoid mounting loss
7 of life, biodiversity, and infrastructure, we must have
8 ambitious, accelerated action to adapt to climate
9 change, while also making rapid, deep cuts in green-
10 house gas emissions.

11 (8) The World Meteorological Organization’s
12 State of the Climate in Latin America and the Car-
13ibbean 2021 report found that—

14 (A) widespread drought across Latin
15 America and the Caribbean has had significant
16 impact on inland shipping routes, crop yields,
17 and food production, and consequently led to
18 worsening food insecurity;

19 (B) extreme weather events affected mil-
20 lions of people across Central America, exacer-
21 bating food insecurity in countries already crip-
22 pled by economic shocks, COVID–19 impacts,
23 and conflict; and

1 (C) sea-level rise poses a major risk to low-
2 lying coastal zones in Latin America and the
3 Caribbean.

4 (9) The United Nations states that facilitating
5 more reliable and affordable access to clean elec-
6 tricity helps governments to improve the quality of
7 other basic services, such as education and
8 healthcare. Electricity access also helps diversify and
9 strengthen local economies. Thus, increasing elec-
10 tricity access could reduce the need to migrate to
11 urban areas and other countries.

12 (10) Natural disasters of increased frequency
13 are projected to increase the displacement of people
14 and the United Nations High Commissioner for Ref-
15 ugees estimates that an annual average of more than
16 20 million people have been forcibly displaced by
17 weather-related sudden onset hazards every year
18 since 2008.

19 (11) Rising commodity and energy prices, as
20 well as other global economic shocks such as those
21 caused by natural disasters, pandemics, and conflict
22 pose a serious security risk that may lead to social
23 unrest and instability in Latin America and the Car-
24ibbean.

1 (b) SENSE OF CONGRESS.—It is the sense of Con-
2 gress that the United States has economic and national
3 security interests in assisting Latin America and the Car-
4ibbean to achieve sustainable energy security.

5 (c) STATEMENT OF POLICY.—It is the policy of the
6 United States—

7 (1) to advance United States foreign policy and
8 development goals by helping Latin America and the
9 Caribbean meet its short-term energy needs;

10 (2) to promote the energy security of Latin
11 America and the Caribbean by encouraging the de-
12 velopment of accessible, transparent, competitive,
13 and solvent energy markets and systems that pro-
14 vide diversified sources, types, and routes of energy,
15 as well as by prioritizing clean energy sources that
16 reduce carbon emissions and address the ongoing
17 global rise in temperatures;

18 (3) to encourage United States public and pri-
19 vate sector investment in Latin American and Carib-
20 bean energy infrastructure projects to bridge the gap
21 between energy security and commercial demand in
22 a way that is consistent with the region’s current ab-
23 sorptive capacity, and that recognizes the impor-
24 tance of building and widening the absorptive capac-
25 ity of the region;

1 (4) to help facilitate the export of United States
2 energy resources, technology, and expertise to global
3 markets in a way that benefits the comprehensive
4 energy security of Latin America and the Caribbean;
5 and

6 (5) to assist partner countries in developing and
7 strengthening regulatory and investment frameworks
8 that support energy security.
