

119TH CONGRESS  
2D SESSION

# H. R. 7273

To reauthorize the National Aeronautics and Space Administration, and for other purposes.

---

## IN THE HOUSE OF REPRESENTATIVES

JANUARY 30, 2026

Mr. BABIN (for himself, Ms. LOFGREN, Mr. HARIDOPOLOS, and Mrs. FOUSHEE) introduced the following bill; which was referred to the Committee on Science, Space, and Technology

---

## A BILL

To reauthorize the National Aeronautics and Space Administration, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

### 3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) SHORT TITLE.—This Act may be cited as the  
5 “NASA Reauthorization Act of 2026”.

6 (b) TABLE OF CONTENTS.—The table of contents for  
7 this Act is as follows:

Sec. 1. Short title; table of contents.

Sec. 2. Definitions.

### TITLE I—AUTHORIZATION OF APPROPRIATIONS

Sec. 101. Fiscal year 2026.

## TITLE II—EXPLORATION

- Sec. 201. Continuity of purpose for space exploration.
- Sec. 202. Artemis program.
- Sec. 203. Reaffirmation of the Space Launch System.
- Sec. 204. Human-rated lunar landing capabilities.
- Sec. 205. Advanced spacesuit capabilities.

## TITLE III—SPACE OPERATIONS

## Subtitle A—Policy

- Sec. 301. Report on continued United States presence in low-Earth orbit.
- Sec. 302. United States strategy for low-Earth orbit.
- Sec. 303. Risk of losing access to low-Earth orbit.

## Subtitle B—International Space Station

- Sec. 311. International Space Station.
- Sec. 312. Maintenance of service for International Space Station.
- Sec. 313. Nongovernmental human missions on the International Space Station.
- Sec. 314. United States deorbit capabilities.

## Subtitle C—Future Activities and Other Provisions

- Sec. 321. Commercial low-Earth orbit development.
- Sec. 322. Report on suborbital crew missions.
- Sec. 323. Orbital debris research and development.
- Sec. 324. Lunar communications and navigation.
- Sec. 325. Celestial time standardization.

## TITLE IV—SPACE TECHNOLOGY

- Sec. 401. SBIR phase II flexibility.
- Sec. 402. Lunar power purchase agreement feasibility study.
- Sec. 403. Cryogenic fluid valve technology review.

## TITLE V—AERONAUTICS

- Sec. 501. Definitions.
- Sec. 502. Experimental aircraft demonstrations.
- Sec. 503. Hypersonics research.
- Sec. 504. Advanced materials and manufacturing technology.
- Sec. 505. Unmanned aircraft systems and advanced air mobility.
- Sec. 506. Advanced capabilities for emergency response operations.
- Sec. 507. Hydrogen aviation.
- Sec. 508. High-performance chase aircraft.
- Sec. 509. Collaboration with academia.
- Sec. 510. Decadal survey for national aeronautics research.
- Sec. 511. Making advancements in commercial hypersonics.

## TITLE VI—SCIENCE

- Sec. 601. Maintaining a balanced science portfolio.
- Sec. 602. Implementation of science mission cost-caps.
- Sec. 603. Reexamination of decadal surveys.
- Sec. 604. Landsat.

- Sec. 605. Private earth observation data.
- Sec. 606. Commercial satellite data.
- Sec. 607. NASA data for agricultural applications.
- Sec. 608. Planetary science portfolio.
- Sec. 609. Planetary defense.
- Sec. 610. Lunar discovery and exploration.
- Sec. 611. Commercial lunar payload services.
- Sec. 612. Planetary and lunar operations.
- Sec. 613. Mars sample return.
- Sec. 614. Hubble space telescope servicing.
- Sec. 615. Great observatories mission and technology maturation.
- Sec. 616. Nancy Grace Roman space telescope.
- Sec. 617. Heliophysics research.
- Sec. 618. Study on commercial space weather data.
- Sec. 619. Geospace dynamics constellation.
- Sec. 620. Technology development for wildland fire science, management, and mitigation.
- Sec. 621. Implementation of recommendations by the National Wildland Fire Management and Mitigation Commission.

#### TITLE VII—STEM EDUCATION

- Sec. 701. National space grant college and fellowship program.
- Sec. 702. Skilled technical workforce education outreach.

#### TITLE VIII—POLICY OF NASA

- Sec. 801. Major programs.
- Sec. 802. NASA advisory council.
- Sec. 803. NASA assessment of early cost estimates.
- Sec. 804. Independent cost estimate.
- Sec. 805. Authorization for the transfer to NASA of funds from other agencies for scientific or engineering research or education.
- Sec. 806. Report on merits and options for establishing an institute relating to space resources.
- Sec. 807. Reports to Congress.
- Sec. 808. Contract flexibility.
- Sec. 809. GAO report.
- Sec. 810. NASA public-private talent program.
- Sec. 811. Report on Space Act agreements.
- Sec. 812. Mentoring.
- Sec. 813. Restriction on Federal funds relating to certain space and scientific activities of the People's Republic of China.
- Sec. 814. Rule of construction.

### 1 **SEC. 2. DEFINITIONS.**

2 In this Act:

- 3 (1) ADMINISTRATOR.—The term “Adminis-
- 4 trator” means the Administrator of the National
- 5 Aeronautics and Space Administration.

1           (2) APPROPRIATE COMMITTEES OF CON-  
2       GRESS.—The term “appropriate committees of Con-  
3       gress” means—

4                   (A) the Committee on Commerce, Science,  
5                   and Transportation of the Senate; and

6                   (B) the Committee on Science, Space, and  
7       Technology of the House of Representatives.

8           (3) CISLUNAR SPACE.—The term “cislunar  
9       space” means the region of space beyond low-Earth  
10      orbit out to and including the region around the sur-  
11      face of the Moon.

12          (4) COMMERCIAL PROVIDER.—The term “com-  
13      mercial provider” means any person providing space  
14      services or space-related capabilities, primary control  
15      of which is held by persons other than the Federal  
16      Government, a State or local government, or a for-  
17      eign government.

18          (5) DEEP SPACE.—The term “deep space”  
19      means the region of space beyond low-Earth orbit,  
20      which includes cislunar space.

21          (6) ISS.—The term “ISS” means the Inter-  
22      national Space Station.

23          (7) NASA.—The term “NASA” means the Na-  
24      tional Aeronautics and Space Administration.

1 (8) ORION.—The term “Orion” means the mul-  
2 tipurpose crew vehicle described under section 303  
3 of the National Aeronautics and Space Administra-  
4 tion Authorization Act of 2010 (42 U.S.C. 18323).

5 (9) SPACE LAUNCH SYSTEM.—The term “Space  
6 Launch System” means the Space Launch System  
7 authorized under section 302 of the National Aero-  
8 nautics and Space Administration Authorization Act  
9 of 2010 (42 U.S.C. 18322).

## 10 **TITLE I—AUTHORIZATION OF** 11 **APPROPRIATIONS**

### 12 **SEC. 101. FISCAL YEAR 2026.**

13 For fiscal year 2026, there are authorized to be ap-  
14 propriated to NASA \$24,438,336,000, as follows:

15 (1) For Exploration, \$7,783,000,000.

16 (2) For Space Operations, \$4,175,000,000.

17 (3) For Science, \$7,250,000,000.

18 (4) For Aeronautics, \$935,000,000.

19 (5) For Space Technology, \$920,500,000.

20 (6) For Education, \$143,000,000.

21 (7) For Safety, Security, and Mission Services,  
22 \$3,000,000,000.

23 (8) For Construction and Environmental Com-  
24 pliance and Restoration, \$185,336,000.

25 (9) For Inspector General, \$46,500,000.

## **TITLE II—EXPLORATION**

### **SEC. 201. CONTINUITY OF PURPOSE FOR SPACE EXPLORATION.**

(a) FINDINGS.—Congress finds the following:

(1) NASA continues to make progress in developing and testing the Space Launch System, Orion, and associated ground systems, including through the successful completion of the Artemis I mission in November 2022 and through continued preparations for the Artemis II crewed flight demonstration mission.

(2) The number of spacefaring countries is increasing, and foreign countries have expanded activities for space exploration efforts, including efforts to explore and utilize the Moon through human and robotic missions.

(3) A strong and ambitious space exploration program conducted with international and commercial partners is important to maintaining United States leadership in space and enhancing United States international competitiveness.

(4) Clear mission objectives that tie to concrete, long-term programmatic goals provide a measure to ensure accountability, enhance public support for exploration missions, and provide a clear signal of

1 commitment to both international and domestic  
2 partners.

3 (b) CONTINUITY OF EXISTING CAPABILITIES AND  
4 PROGRAMS.—

5 (1) As part of the human exploration activities  
6 of the Administration, including progress on Artemis  
7 missions and activities, the Administrator shall con-  
8 tinue development of space exploration elements pur-  
9 suant to section 10811 of the National Aeronautics  
10 and Space Administration Authorization Act of 2022  
11 (Public Law 117–167; 51 U.S.C. 20302).

12 (2) The Administrator shall leverage the private  
13 sector for logistical services to the extent practical,  
14 consistent with the Moon to Mars architecture re-  
15 quirements and in accordance with section 50131 of  
16 title 51, United States Code.

17 (3) Congress reaffirms the sense of Congress to  
18 maintain continuity of purpose as described in sec-  
19 tion 201 of the 2017 NASA Transition Authoriza-  
20 tion Act (Public Law 115–10; 131 Stat. 21).

21 **SEC. 202. ARTEMIS PROGRAM.**

22 (a) SENSE OF CONGRESS.—The following is the sense  
23 of Congress:

24 (1) Exploration of outer space, including explo-  
25 ration of the lunar surface and cislunar space, pro-

1       vides benefits and economic opportunity, including  
2       by inspiring future generations and expanding the  
3       science, technology, engineering, and mathematics  
4       workforce needed to sustain United States leader-  
5       ship in science, space, and technology.

6           (2) The lunar south pole is home to shadowed  
7       craters that may contain water ice and other  
8       volatiles. Understanding the nature of lunar polar  
9       volatiles, such as water ice, would advance science  
10      related to the origin and evolution of volatiles in the  
11      inner solar system and could facilitate the long-term  
12      future of space exploration. Water ice lunar re-  
13      sources have the potential to become an enabling  
14      component of future space exploration missions  
15      throughout the solar system, including crewed mis-  
16      sions to Mars.

17          (3) Other countries have demonstrated techno-  
18      logical advances and successful robotic missions for  
19      lunar exploration and have announced credible plans  
20      for long-term human exploration of the Moon that  
21      include the intent to establish lunar bases.

22          (4) United States leadership of and measurable  
23      progress on the exploration of deep space is essential  
24      for guiding development of norms related to oper-

1        ations on and around the Moon and for other space  
2        destinations.

3            (5) It is in the national interest of the United  
4        States to hold a leadership role in discussions of fu-  
5        ture norms governing activities in space, including  
6        those on the lunar surface and in cislunar space.

7        (b) IN GENERAL.—In carrying out activities to en-  
8        able Artemis missions under the Moon to Mars Program  
9        set forth in section 10811 of the National Aeronautics and  
10       Space Administration Authorization Act of 2022 (Public  
11       Law 117–167), the Administrator shall—

12            (1) use relevant elements set forth in section  
13        10811(b)(2)(B) of the National Aeronautics and  
14        Space Administration Authorization Act of 2022  
15        (Public Law 117–167);

16            (2) continue to ensure that the elements under  
17        paragraph (1) enable the human exploration of  
18        Mars, consistent with section 10811(b)(2)(C)(i) of  
19        the National Aeronautics and Space Administration  
20        Authorization Act of 2022 (Public Law 117–167);

21            (3) engage with international partners, as ap-  
22        propriate, in a manner that is consistent with sec-  
23        tion 10811(b)(2)(C) the National Aeronautics and  
24        Space Administration Authorization Act of 2022

1 (Public Law 117–167), and that increases redun-  
2 dancy, efficiency, and cost savings; and

3 (4) leverage capabilities provided by United  
4 States commercial providers, as appropriate and  
5 practicable.

6 (c) UNITED STATES COMMERCIAL PROVIDER CAPA-  
7 BILITIES IN SUPPORT OF LUNAR EXPLORATION EF-  
8 FORTS.—The Administrator may enter into agreements  
9 with United States commercial providers or engage in pub-  
10 lic-private partnerships to procure capabilities and services  
11 to support the human exploration of the Moon or cislunar  
12 space.

13 **SEC. 203. REAFFIRMATION OF THE SPACE LAUNCH SYS-**  
14 **TEM.**

15 (a) SPACE LAUNCH SYSTEM.—

16 (1) DEVELOPMENT AND CADENCE OBJEC-  
17 TIVES.—Congress reaffirms—

18 (A) support for the full development of ca-  
19 pabilities of the Space Launch System as set  
20 forth in section 302(c) of the National Aero-  
21 nautics and Space Administration Authorization  
22 Act of 2010 (42 U.S.C. 18322(c)); and

23 (B) its commitment to the flight rate of  
24 the integrated Space Launch System and Orion  
25 crew vehicle missions set forth in section

1           10812(b) of the National Aeronautics and  
2           Space Administration Authorization Act of  
3           2022 (Public Law 117–167; 51 U.S.C. 20301  
4           note).

5           (2) OTHER USES.—The Administrator shall as-  
6           sess the demand for the Space Launch System by  
7           entities other than NASA and shall break out such  
8           demand according to the relevant Federal agency or  
9           nongovernment sector. This assessment may—

10                 (A) estimate cost and schedule savings  
11                 from reduced transit times and the potential for  
12                 increased returns enabled by the unique capa-  
13                 bilities of the Space Launch System;

14                 (B) describe any barriers or challenges  
15                 that could impede use of the Space Launch  
16                 System by entities other than NASA; and

17                 (C) identify potential actions and costs as-  
18                 sociated with overcoming barriers and chal-  
19                 lenges described in subparagraph (B).

20           (b) REPORT.—Not later than 180 days after the date  
21           of the enactment of this Act, the Administrator shall sub-  
22           mit to the appropriate committees of Congress a report  
23           describing the following:

24                 (1) NASA’s progress towards achieving the  
25                 flight rate referred to in subsection (a)(1)(B) and

1 the expected launch of the integrated Space Launch  
2 System and Orion crew vehicle missions after which  
3 such cadence shall be achieved.

4 (2) The results of the assessment conducted  
5 pursuant to subsection (a)(2).

6 **SEC. 204. HUMAN-RATED LUNAR LANDING CAPABILITIES.**

7 (a) REAFFIRMATION.—Congress reaffirms that the  
8 Moon to Mars program set forth in section 10811 of the  
9 National Aeronautics and Space Administration Author-  
10 ization Act of 2022 (Public Law 117–167; 51 U.S.C.  
11 20302 note.; 136 Stat. 1732) shall include human-rated  
12 lunar landing systems.

13 (b) HUMAN-RATED LUNAR LANDING CAPABILI-  
14 TIES.—

15 (1) IN GENERAL.—The Administrator shall  
16 carry out the following:

17 (A) Support the development and dem-  
18 onstration of, and shall obtain, human-rated  
19 lunar landing capabilities, including lunar as-  
20 cent capabilities, to further the goals of the  
21 human exploration roadmap under section 432  
22 of the National Aeronautics and Space Admin-  
23 istration Transition Authorization Act of 2017  
24 (Public Law 115–10; 51 U.S.C. 20302 note)  
25 and the Moon to Mars Program set forth in

1 section 10811 of the National Aeronautics and  
2 Space Administration Authorization Act of  
3 2022 (Public Law 117–167).

4 (B) Ensure that such human-rated lunar  
5 landing capabilities meet all relevant require-  
6 ments, including requirements of the Moon to  
7 Mars program, and for human-rating and cer-  
8 tification.

9 (C) Ensure any commercial provider from  
10 which the Administrator obtains human-rated  
11 lunar landing capabilities is a United States  
12 commercial provider.

13 (2) IMPLEMENTATION.—In carrying out para-  
14 graph (1)(A)—

15 (A) the Administrator may include  
16 uncrewed lunar landing services; and

17 (B) the Administrator shall, subject to the  
18 availability of appropriations for such purpose,  
19 seek to obtain such capabilities from not fewer  
20 than two commercial providers.

21 (c) REPORT.—The Administrator shall submit to the  
22 appropriate committees of Congress the following:

23 (1) Not later than 60 days after the date of the  
24 enactment of this Act, a report—

1 (A) identifying the contribution over the  
2 past five years, and the planned contribution  
3 for 2026 through 2030, of government per-  
4 sonnel, expertise, technologies and infrastruc-  
5 ture utilized and to be utilized in support of de-  
6 sign, development, or operation of human lunar  
7 landing capabilities under this section; and

8 (B) setting forth details and the associated  
9 costs of such government support, broken out  
10 according to the areas of contribution specified  
11 in subparagraph (A), as part of any develop-  
12 ment initiative for obtaining human lunar land-  
13 ing capabilities.

14 (2) Not later than 60 days after the date of the  
15 enactment of this Act, a report that sets forth, for  
16 any agreement with a United States commercial pro-  
17 vider for human lunar landing capabilities, the fol-  
18 lowing:

19 (A) The total value of the agreement when  
20 awarded.

21 (B) If different from the amount in sub-  
22 paragraph (A), the total value of the agreement  
23 as of the date of the enactment of this Act, and  
24 an explanation for any change in value, as well  
25 as an identification of whether NASA or the

1 commercial partner is responsible for meeting  
2 the change in value.

3 (C) The dollar amount invested and to be  
4 invested by the Administration, and the dollar  
5 amount invested and to be invested by the com-  
6 mercial partner.

7 (D) The full requirements, including  
8 human-rating and safety requirements, for  
9 human lunar landing capabilities under the  
10 agreement when awarded.

11 (E) If different from the amount specified  
12 in subparagraph (C), the full requirements, in-  
13 cluding human-rating and certification require-  
14 ments, for the human lunar landing capabilities  
15 under the agreement as of the date of the en-  
16 actment of this Act and an explanation for any  
17 changes in requirements.

18 (F) A description of milestone and associ-  
19 ated payments provided for in the agreement,  
20 including the following:

21 (i) An identification of all milestones  
22 under the agreement.

23 (ii) The value of the associated pay-  
24 ment for each milestone identified under  
25 clause (i).

1 (iii) An identification of completed  
2 milestones and the date of completion.

3 (iv) An identification of milestones  
4 which have not yet been completed and an  
5 estimated schedule for completion.

6 (v) The value of all NASA payments  
7 under the agreement, outlays as of the  
8 date of the enactment of this Act, and the  
9 amount which as of the date of the enact-  
10 ment of this Act has not yet been paid.

11 (vi) A description of any changes in  
12 milestones and associated payments be-  
13 tween the date of contract award and the  
14 date of the enactment of this Act.

15 (G) Any cost, schedule, and performance  
16 challenges as of the date of the enactment of  
17 this Act in provider performance of the agree-  
18 ment.

19 (H) A detailed justification of compliance  
20 with section 30301 of title 51, United States  
21 Code.

22 (I) A detailed certification and justification  
23 of compliance with section 50503 of title 51,  
24 United States Code.

1           (3) Not later than 90 days after the date of the  
2           enactment of this Act, in consultation with any  
3           United States commercial provider that is party to  
4           an agreement with NASA for human lunar landing  
5           capabilities under this section, a report on any steps  
6           the Administrator and such providers are taking to  
7           carry out the following:

8                   (A) Address cost, schedule, and perform-  
9                   ance challenges faced by each commercial pro-  
10                  vider in development and performance of  
11                  human lunar landing capabilities described in  
12                  paragraph (2)(G).

13                  (B) Facilitate the timely availability of  
14                  human lunar landing capabilities of each pro-  
15                  vider to support the schedule of Artemis mis-  
16                  sions in effect as of the date of the enactment  
17                  of this Act, as applicable to each provider.

18           (4) Not later than 90 days after the date of the  
19           enactment of this Act, a report on any alternative  
20           approaches, and implementation plans for any  
21           Artemis mission, including an estimate of needed  
22           budgetary resources, for a human lunar landing ca-  
23           pability that meets NASA human-rating and certifi-  
24           cation requirements in the event challenges referred  
25           to in paragraph (3)(A) cannot be overcome or the

1 timeline specified in paragraph (3)(B) cannot be  
2 met.

3 **SEC. 205. ADVANCED SPACESUIT CAPABILITIES.**

4 (a) FINDINGS.—Congress finds the following:

5 (1) Space suits and associated extravehicular  
6 activity (EVA) technologies are critical exploration  
7 technologies that are necessary for crewed missions  
8 to low-Earth orbit and future human deep space ex-  
9 ploration efforts, including to the lunar vicinity and  
10 surface of the Moon.

11 (2) The NASA civil service workforce at the  
12 Johnson Space Center provides unique capabilities  
13 to design, integrate, and validate Space Suits and  
14 associated EVA technologies.

15 (3) Maintaining a strong NASA core com-  
16 petency in the design, development, manufacture,  
17 and operation of space suits and related technologies  
18 allows NASA to be an informed purchaser of com-  
19 petitively awarded commercial space suits and sub-  
20 components.

21 (4) According to a 2018 NASA Office of In-  
22 spector General (OIG) report, current EVAs space  
23 suits, the Extravehicular Mobility Units (EMUs),  
24 were developed in the late 1970s, are reaching the  
25 end of their useful life, have experienced multiple

1 maintenance issues that threaten astronaut lives,  
2 and no longer accommodate the varying sizes of a  
3 diverse astronaut corps.

4 (5) The same NASA OIG report found that  
5 “manufacturers of several critical suit components,  
6 including the very fibers of the suits, have now gone  
7 out of business”, which further reinforces the impor-  
8 tance of NASA’s role in maintaining a space suit  
9 core competency and limiting the risk posed by out-  
10 sourcing key national capabilities.

11 (6) The private sector currently is developing  
12 space suit capabilities.

13 (7) Testing space suits and related technologies  
14 on the ISS could reduce risk and improve safety of  
15 such suits and technologies.

16 (b) IN GENERAL.—The Administrator shall obtain  
17 advanced spacesuit capabilities necessary to achieve the  
18 goals of NASA’s human spaceflight exploration programs.

19 (c) ELIGIBILITY.—Any commercial provider from  
20 which the Administrator obtains advanced spaceflight ca-  
21 pabilities must be a United States commercial provider,  
22 as set forth in section 203(c) of this Act.

23 (d) PRESERVING SPACESUIT EXPERTISE.—

24 (1) In carrying out subsection (b), NASA shall  
25 maintain the internal expertise necessary to develop

1 space suits for both extravehicular activity and sur-  
2 face operations, including through partnerships with  
3 the private sector.

4 (2) The Johnson Space Center shall continue to  
5 manage NASA's spacesuit and extravehicular activ-  
6 ity programs.

7 (e) REPORT.—Not later than 180 days from the date  
8 of the enactment of this Act, the Administrator shall sub-  
9 mit to the appropriate committees of Congress a report—

10 (1) describing NASA's plans for—

11 (A) in-space testing of advanced spacesuit  
12 capabilities, including—

13 (i) space suit tests which must be con-  
14 ducted in microgravity in low-Earth orbit;  
15 and

16 (ii) space suit tests that must be con-  
17 ducted on the ISS before decommissioning  
18 of the ISS;

19 (B) transitioning from existing spacesuits  
20 in use on the ISS to use of advanced spacesuit  
21 capabilities;

22 (C) future use of advanced spacesuit capa-  
23 bilities by government astronauts with any non-  
24 governmental platform in low-Earth orbit that  
25 is certified for use by the Administration for

government astronauts (as such term is defined in section 50902(4) of title 51, United States Code); and

(D) disposition of retired spacesuits used on the Space Shuttle or the ISS; and

(2) including—

(A) a detailed justification of compliance with section 30301 of title 51, United States Code; and

(B) a detailed certification and justification of compliance with section 50503 of title 51, United States Code.

(f) ASSESSMENT OF EXTRAVEHICULAR MOBILITY UNITS USED ON THE ISS.—

(1) No later than 45 days after the date of enactment of this Act, the Administrator shall enter into an arrangement with an independent science and technical engineering organization to review the technical status and performance of the Administration's existing extravehicular mobility units ("EMUs"), to analyze the data associated with all mishaps, anomalies, and off-nominal events related to the EMUs used by government astronauts on the ISS over the last 10 years, and to make rec-

1       ommendations to the Administrator, based on the  
2       results of such assessment.

3           (2) The Administrator shall ensure that the en-  
4       tity carrying out the assessment in paragraph (1)  
5       consults with relevant industry contractors regarding  
6       the Administration's EMUs and EMU capabilities,  
7       and coordinates with the NASA Astronaut Office in  
8       carrying out such assessment.

9           (3) The Administrator shall transmit the re-  
10      sults of the assessment in paragraph (1) to the ap-  
11      propriate committees of Congress as soon as prac-  
12      ticable and no later than 270 days after the date of  
13      enactment of this Act.

## 14       **TITLE III—SPACE OPERATIONS**

### 15               **Subtitle A—Policy**

#### 16       **SEC. 301. REPORT ON CONTINUED UNITED STATES PRES-** 17               **ENCE IN LOW-EARTH ORBIT.**

18       Not later than 180 days after the date of the enact-  
19      ment of this Act, the Comptroller General of the United  
20      States shall submit to the appropriate committees of Con-  
21      gress a report containing an accounting of the following:

22           (1) The five, ten, and twenty-year United  
23      States objectives for low-Earth orbit activities.

1           (2) The type and extent of capabilities using  
2           low-Earth orbit platforms the Federal Government  
3           requires to support such United States objectives.

4           (3) A description of the Federal Government's  
5           current and planned future compliance with the fol-  
6           lowing:

7                   (A) The policy on maintaining an uninter-  
8                   rupted capability for human space flight and  
9                   operations in low-Earth orbit, in accordance  
10                  with section 70501(a)(1) of title 51, United  
11                  States Code.

12                  (B) Section 201(b) of the National Aero-  
13                  nautics and Space Administration Authorization  
14                  Act of 2010 (42 U.S.C. 18311(b)) regarding  
15                  United States human space flight capabilities.

16           (4) The preparedness of the United States to  
17           continue to satisfy the statutory direction referred to  
18           in paragraph (3) under the planned approach to  
19           deorbit the ISS by not later than the end of calendar  
20           year 2031.

21 **SEC. 302. UNITED STATES STRATEGY FOR LOW-EARTH**  
22 **ORBIT.**

23           (a) STRATEGY.—Not later than 210 days after the  
24           date of the enactment of this Act, the Administrator, in  
25           consultation with the National Space Council, Office of

1 Science and Technology Policy, or other appropriate inter-  
2 agency coordinating body, shall submit to the appropriate  
3 committees of Congress a strategy for a robust and resil-  
4 ient architecture to advance NASA and other relevant  
5 Federal Government research, development, and oper-  
6 ational requirements in low-Earth orbit. Such architecture  
7 should—

8 (1) include a mix of crewed and uncrewed plat-  
9 forms;

10 (2) consider an incremental approach to achiev-  
11 ing the full suite of capabilities necessary to satisfy  
12 research, development, and operational requirements  
13 for NASA activities in low-Earth orbit;

14 (3) consider the requirements described in sub-  
15 section (b); and

16 (4) sustain and promote United States leader-  
17 ship and international partnerships in carrying out  
18 low-Earth orbit activities.

19 (b) REQUIREMENTS.—Not later than 90 days after  
20 the date of the enactment of this Act, the Administrator  
21 shall submit to the appropriate committees of Congress  
22 and make available to relevant United States commercial  
23 industry entities, an accounting of the research, develop-  
24 ment, and operational requirements for NASA activities  
25 in low-Earth orbit, including any requirements that could

1 affect the design, development, instrumentation, or long-  
2 term operations of future United States commercial low-  
3 Earth orbit platforms and supporting capabilities. In pre-  
4 paring such accounting, the Administrator may consider  
5 the requirements of other relevant Federal agencies.

6 **SEC. 303. RISK OF LOSING ACCESS TO LOW-EARTH ORBIT.**

7 Not later than 270 days after the date of the enact-  
8 ment of this Act, the Administrator shall submit to the  
9 appropriate committees of Congress a report that evalu-  
10 ates the risk posed by a potential gap in access to a low-  
11 Earth orbit platform on science and technology research  
12 and development conducted by NASA and private entities.  
13 The report shall describe the following:

14 (1) The NASA science and exploration pro-  
15 grams that may be adversely affected by the lack of  
16 a United States presence in low-Earth orbit.

17 (2) The effects that such a gap would have on  
18 the following:

19 (A) The United States competitiveness in  
20 science and technology.

21 (B) The development of the United States-  
22 based commercial space industry.

23 (3) Potential options and associated costs for  
24 preventing such a gap, including the following:

1 (A) Implementing the strategy described in  
2 section 306.

3 (B) Supporting the operation of the ISS  
4 beyond 2030.

5 (C) Increasing investment in and accel-  
6 erating development of commercial space sta-  
7 tions.

8 (D) Working with international partners to  
9 establish alternative means for conducting re-  
10 search in low-Earth orbit.

11 **Subtitle B—International Space**  
12 **Station**

13 **SEC. 311. INTERNATIONAL SPACE STATION.**

14 (a) SENSE OF CONGRESS.—It is the sense of Con-  
15 gress that—

16 (1) the ISS is a unique facility that provides  
17 the United States with capabilities in space that are  
18 currently unmatched; NASA continues to make pro-  
19 ductive use of the ISS;

20 (2) the ISS serves several functions, including  
21 establishing the United States as a leader in space  
22 activities, acting as a beacon of international co-  
23 operation, and conducting cutting-edge microgravity  
24 and observational research in low-Earth orbit;

1           (3) NASA must complete certain objectives on  
2           the ISS to facilitate deep space exploration efforts,  
3           including carrying out human research and dem-  
4           onstrating exploration-related technologies; and

5           (4) reducing crew size or cargo deliveries, or re-  
6           ducing sustaining engineering capabilities, would re-  
7           duce the scientific output of the ISS and potentially  
8           increase the risk to the ISS and its crew.

9           (b) FULL UTILIZATION.—

10           (1) SENSE OF CONGRESS.—It is the sense of  
11           Congress that, to ensure the greatest return on in-  
12           vestments made by the United States and the ISS  
13           partners in the development, assembly, and oper-  
14           ations of the ISS, the Administrator should maxi-  
15           mize the utilization and productivity of the ISS with  
16           respect to the priorities set forth in section 10816  
17           of the National Aeronautics and Space Administra-  
18           tion Authorization Act of 2022 (Public Law 117–  
19           167; 51 U.S.C. 70901 note), which include research  
20           of the human research program, risk reduction ac-  
21           tivities relevant to exploration technologies, the ad-  
22           vancement of United States leadership of basic and  
23           applied space life and physical sciences, and other  
24           research and development essential to Moon to Mars  
25           program activities.

1           (2) AMENDMENT.—Section 502(a) of the Na-  
2           tional Aeronautics and Space Administration Au-  
3           thorization Act of 2010 (Public Law 111–267; 42  
4           U.S.C. 18352(a)), is amended by striking “take  
5           steps to”.

6   **SEC. 312. MAINTENANCE OF SERVICE FOR INTERNATIONAL**  
7                           **SPACE STATION.**

8           (a) IN GENERAL.—Subject to appropriations for such  
9           purpose, the Administrator shall maintain a flight cadence  
10          necessary to support the health and safety of the ISS crew  
11          and the full and productive utilization of the ISS through  
12          its operational lifetime, consistent with the certification  
13          date of the ISS. In maintaining such flight cadence, the  
14          Administrator shall seek to carry out not less than the  
15          average annual cadence for the immediately preceding  
16          three fiscal years of crew and cargo flights on United  
17          States vehicles certified under NASA’s Commercial Crew  
18          and Cargo Program as of the date of the enactment of  
19          this Act.

20          (b) WAIVER.—The Administrator may waive the re-  
21          quirement under subsection (a) upon submission of a writ-  
22          ten determination to Congress that—

23                  (1) the health and safety of the ISS requires a  
24          reduction in flights; or

1           (2) the ISS has concluded its operational life-  
2       time.

3       **SEC. 313. NONGOVERNMENTAL HUMAN MISSIONS ON THE**  
4                               **INTERNATIONAL SPACE STATION.**

5       (a) SENSE OF CONGRESS.—It is the sense of Con-  
6       gress that—

7           (1) nongovernmental human missions on the  
8       ISS carried out, as appropriate, pursuant to NASA  
9       policies and procedures, and other Federal Govern-  
10      ment laws and regulations, can provide lessons and  
11      learning experiences for both government and non-  
12      government entities to inform the development of fu-  
13      ture commercial low-Earth orbit platforms and a  
14      low-Earth orbit economy; and

15          (2) the Administrator should share lessons  
16      learned from nongovernmental human missions on  
17      the ISS to advance the commercial human  
18      spaceflight industry, to promote the safety of future  
19      commercial low-Earth orbit platforms, and to inform  
20      the evolution of policies guiding such activities in  
21      low-Earth orbit.

22      (b) NONGOVERNMENTAL HUMAN MISSIONS ON THE  
23      ISS.—The Administrator may enter into one or more  
24      agreements to enable one or more United States commer-  
25      cial providers to conduct nongovernmental human mis-

1 sions on the ISS pursuant to NASA policies and proce-  
2 dures, and Federal Government laws and regulations.

3 (c) REPORT.—Not later than 18 months after the  
4 date of the enactment of this Act, the Comptroller General  
5 of the United States shall submit to the appropriate com-  
6 mittees of Congress a report containing information relat-  
7 ing to the following:

8 (1) The number of nongovernmental human  
9 missions on the ISS planned.

10 (2) The number of nongovernmental human  
11 missions on the ISS completed.

12 (3) The extent to which commercial entities car-  
13 rying out nongovernmental human missions on the  
14 ISS fully reimburse costs incurred by NASA in asso-  
15 ciation with any nongovernmental missions carried  
16 out on the ISS.

17 (4) The extent to which nongovernmental  
18 human missions on the ISS impact the priorities  
19 specified in section 10816 of the National Aero-  
20 nautics and Space Administration Authorization Act  
21 of 2022 (Public Law 117–167; 51 U.S.C. 70901  
22 note).

23 (5) The impact, if any, to operations of or ac-  
24 tivities on the ISS that are not related to nongovern-  
25 mental human missions on the ISS.

1           (6) The extent to which any nongovernmental  
2       human mission on the ISS—

3           (A) conforms with section 20102 of title  
4       51, United States Code;

5           (B) adheres to the requirements of section  
6       50131 of title 51, United States Code; and

7           (C) is consistent with the national security  
8       or foreign policy interests of the United States.

9           (7) Any other issues related to nongovern-  
10      mental human missions on the ISS that the Comp-  
11      troller General determines are appropriate for review  
12      as part of undertaking the report in subsection (c).

13   **SEC. 314. UNITED STATES DEORBIT CAPABILITIES.**

14      (a) SENSE OF CONGRESS.—It is the sense of Con-  
15      gress that—

16           (1) the ISS is aging and eventually will need to  
17      be deorbited safely and disposed of in a controlled  
18      manner; and

19           (2) to protect the safety of the public, and to  
20      avoid interfering with other space operators or ob-  
21      jects, NASA plans to deorbit and disposition the ISS  
22      through a controlled atmospheric reentry over an  
23      uninhabited region.

24      (b) ACQUISITION OF ISS DEORBIT CAPABILITIES.—

1           (1) IN GENERAL.—The Administrator shall ac-  
2       quire ISS deorbit capabilities from one or more  
3       United States commercial providers.

4           (2) IMPLEMENTATION.—In carrying out para-  
5       graph (1), the Administrator shall, to the greatest  
6       extent practicable, not reduce or deprioritize NASA  
7       activities conducted on and in support of the ISS to  
8       support the acquisition of United States deorbit ca-  
9       pabilities.

10       (c) COSTS.—

11           (1) INDEPENDENT COST ESTIMATE.—For the  
12       deorbit capabilities described in subsection (b), the  
13       Administrator shall obtain, not later than 30 days  
14       after the date of the enactment of the Act, an inde-  
15       pendent life-cycle cost estimate for such deorbit ca-  
16       pabilities and shall report the results of such esti-  
17       mate and a five-year budget profile to the appro-  
18       priate committees of Congress.

19           (2) REPORT.—

20           (A) IN GENERAL.—Not later than one year  
21       after the date of the enactment of this Act, the  
22       Administrator shall submit to the appropriate  
23       committees of Congress a report detailing the  
24       Administration's plan for the financial,

logistical, and operational responsibilities associated with the deorbit capability.

(B) FURTHER REPORTS.—The Administrator shall annually submit to the appropriate committees of Congress a report, to accompany the President’s budget request, containing a description of the annual and cumulative lifecycle expenditures for the preceding year on activities related to the deorbit of the ISS and how such costs are shared among the ISS partners.

## **Subtitle C—Future Activities and Other Provisions**

### **SEC. 321. COMMERCIAL LOW-EARTH ORBIT DEVELOPMENT.**

(a) IN GENERAL.—The Administrator is authorized to enter into agreements with one or more United States commercial providers to enable the development and certification of, and procure capabilities related to, a United States private, low-Earth orbit platform or platforms, and to use such platform or platforms and related capabilities to—

(1) further the strategy under section 302(a);

(2) sustain the priorities described in section 10816 of the National Aeronautics and Space Administration Authorization Act of 2022 (Public Law 117–167; 51 U.S.C. 70901 note) and the activities

1 under the Human Exploration Roadmap pursuant to  
2 section 432(b)(2)(J) of the National Aeronautics  
3 and Space Administration Transition Authorization  
4 Act of 2017 (Public Law 115–10); and

5 (3) satisfy the requirements described in section  
6 302(b).

7 (b) ANCHOR TENANCY.—Not later than November  
8 15, 2026, the Administrator shall provide to the appro-  
9 priate committees of Congress the following:

10 (1) The results of a survey and assessment of  
11 the market for capabilities and services that may be  
12 provided through future United States commercial  
13 low-Earth orbit platforms that shall be prepared by  
14 an independent entity with appropriate expertise.

15 (2) A detailed justification of compliance with  
16 section 30301 of title 51, United States Code.

17 (3) A detailed certification and justification of  
18 compliance with section 50503 of title 51, United  
19 States Code.

20 (c) USE OF UNITED STATES LAUNCH AND REENTRY  
21 SERVICES.—As a term of an agreement entered into under  
22 to subsection (a), the Administrator shall include a re-  
23 quirement for the use of United States commercially-pro-  
24 vided launch and reentry services to support all Adminis-  
25 tration activities under the agreement, in accordance with

1 section 50131 of title 51, United States Code, as applica-  
2 ble.

3 (d) SAFETY.—Not later than 60 days after the date  
4 of the enactment of this Act, the Administrator shall sub-  
5 mit to the appropriate Committees of Congress a deter-  
6 mination on the applicability of Administration human  
7 rating processes, certification, and requirements for plat-  
8 forms used for services under this section and the cir-  
9 cumstances and arrangements under which such proc-  
10 esses, certification, and requirements would apply.

11 **SEC. 322. REPORT ON SUBORBITAL CREW MISSIONS.**

12 Not later than 180 days after the date of the enact-  
13 ment of this Act, the Administrator shall submit to the  
14 appropriate committees of Congress a report on the costs,  
15 benefits, risks, training requirements, and policy or legal  
16 implications, including liability matters, of launching  
17 United States Government personnel on commercial sub-  
18 orbital vehicles.

19 **SEC. 323. ORBITAL DEBRIS RESEARCH AND DEVELOPMENT.**

20 (a) SENSE OF CONGRESS.—It is the sense of Con-  
21 gress that NASA’s research and development activities re-  
22 lated to understanding and mitigating the hazards posed  
23 by orbital debris are critical to ensuring the continued safe  
24 operation of NASA missions, including the safety of hu-  
25 mans living and working in space, and such activities fur-

1 ther enable scientific and technological advances that can  
2 be leveraged by the broader space operations community  
3 to foster a sustainable space environment.

4 (b) RESEARCH AND DEVELOPMENT.—The Adminis-  
5 trator shall, to the extent practicable, conduct research  
6 and development to advance scientific understanding and  
7 technological capabilities related to orbital debris charac-  
8 terization and mitigation.

9 (c) CONSIDERATIONS.—In conducting the research  
10 and development described in subsection (b), the Adminis-  
11 trator may consider activities that—

12 (1) improve the characterization and modeling  
13 of the space environment, including the characteriza-  
14 tion and modeling of objects of both natural and an-  
15 thropogenic origins that cannot be directly charac-  
16 terized by ground-based measurements;

17 (2) leverage space weather research and devel-  
18 opment elements within NASA’s Heliophysics pro-  
19 gram, to the extent appropriate and in accordance  
20 with the priorities established in the most recent  
21 solar and space physics decadal survey;

22 (3) support the application of relevant research,  
23 tools, and technologies to advance orbital debris  
24 characterization and mitigation and the transfer of

1       such research, tools, and technologies to stake-  
2       holders, as appropriate and practicable; and

3           (4) involve coordination with other relevant  
4       Federal entities that have a shared interest in tech-  
5       nologies and research advanced under this section.

6   **SEC. 324. LUNAR COMMUNICATIONS AND NAVIGATION.**

7       (a) FINDINGS.—Congress finds the following:

8           (1) Reliable communication and navigation ca-  
9       pabilities are essential for sustainable human and  
10      robotic exploration of the Moon, Mars, and other  
11      deep space destinations.

12          (2) Fostering the development of commercial  
13      capabilities can accelerate the deployment of lunar  
14      communication and navigation services that could  
15      support the Artemis program, and the Moon to Mars  
16      program.

17      (b) AUTHORIZATION.—The Administrator is author-  
18      ized to ensure the availability of a robust and resilient  
19      lunar communications and navigation architecture that  
20      will support NASA’s human and robotic lunar exploration  
21      activities and requirements.

22      (c) STUDY AND PLAN.—To inform the development  
23      in subsection (a), the Administrator shall develop a study  
24      and prepare a plan to—

1           (1) ensure the availability of interoperable com-  
2           munication and navigation services for NASA mis-  
3           sions on the lunar surface and in cislunar space;

4           (2) coordinate with the private sector, other  
5           Federal agencies, and, as appropriate, international  
6           partners, to establish technical standards in accord-  
7           ance with section 12(d) of the National Technology  
8           Transfer and Advancement Act of 1995 (Public Law  
9           104–113), protocols, and interface requirements for  
10          lunar communications and navigation services and  
11          systems, including relevant information technology  
12          and cybersecurity standards and practices;

13          (3) support NASA lunar activities;

14          (4) leverage NASA’s space technology research,  
15          development, and demonstration activities related to  
16          space communications and navigation; and

17          (5) evaluate the opportunities, benefits, feasi-  
18          bility, challenges, and possible risks of using com-  
19          mercial cislunar communication and navigation serv-  
20          ices, as appropriate, by United States commercial  
21          providers.

22   **SEC. 325. CELESTIAL TIME STANDARDIZATION.**

23          (a) SENSE OF CONGRESS.—It is the sense of Con-  
24          gress that—

1           (1) United States leadership of a sustained  
2           presence on the Moon and in deep space exploration  
3           is important for advancing science, exploration, com-  
4           mercial growth, and international partnership;

5           (2) the Artemis and Moon to Mars programs of  
6           the National Aeronautics and Space Administration  
7           (NASA) will involve governmental, commercial, aca-  
8           demic, and international partners where there is a  
9           need for interoperability between systems;

10          (3) the use of Coordinated Universal Time has  
11          challenges when used beyond Earth at other celestial  
12          bodies, due to relativistic effects;

13          (4) the United States should lead in developing  
14          time standardization for the Moon and other celes-  
15          tial bodies other than Earth to support interoper-  
16          ability and safe and sustainable operations; and

17          (5) development of such standardization will ad-  
18          vance United States leadership in standards setting  
19          for global competitiveness, and will benefit other  
20          spacefaring countries and entities.

21          (b) DEVELOPMENT OF CELESTIAL TIME STANDARD-  
22          IZATION.—The Administrator of NASA, in consultation  
23          with the Director of the Office of Science and Technology  
24          Policy, shall carry out the following:

1           (1) Enable the development of celestial time  
2           standardization, including by leading the study and  
3           definition of a coordinated lunar time.

4           (2) Develop a strategy to implement a coordi-  
5           nated lunar time that would support future oper-  
6           ations and infrastructure on and around the Moon.

7           (3) In carrying out paragraphs (1) and (2)—

8                   (A) coordinate with relevant Federal enti-  
9                   ties, including the Department of Commerce,  
10                  the Department of Defense, the Department of  
11                  State, and the Department of Transportation;  
12                  and

13                  (B) consult with—

14                           (i) relevant private sector entities;  
15                           (ii) relevant academic entities; and  
16                           (iii) relevant international standards  
17                  setting bodies and international partners.

18           (4) Incorporate the following features of a co-  
19           ordinated lunar time, to the extent practicable, in  
20           the development of the strategy developed pursuant  
21           to paragraph (2):

22                   (A) Traceability to Coordinated Universal  
23                  Time.

24                   (B) Accuracy sufficient to support preci-  
25                  sion navigation and science.

1 (C) Resilience to loss of contact with  
2 Earth.

3 (D) Scalability to space environments be-  
4 yond the Earth-Moon system.

5 (c) REPORT.—Not later than two years after the date  
6 of the enactment of this Act, the Administrator of NASA  
7 shall submit to the appropriate committees of Congress  
8 a report describing the strategy developed pursuant to  
9 subsection (b)(2), including relevant plans, timelines, and  
10 resources required for the implementation of a coordinated  
11 lunar time pursuant to such strategy.

## 12 **TITLE IV—SPACE TECHNOLOGY**

### 13 **SEC. 401. SBIR PHASE II FLEXIBILITY.**

14 Section 9 of the Small Business Act (15 U.S.C. 638)  
15 is amended in subsection (cc) by striking “and the Depart-  
16 ment of Education” and inserting “the Department of  
17 Education, and the National Aeronautics and Space Ad-  
18 ministration”.

### 19 **SEC. 402. LUNAR POWER PURCHASE AGREEMENT FEASI-** 20 **BILITY STUDY.**

21 (a) STUDY.—The Administrator may enter into an  
22 arrangement with an independent entity with appropriate  
23 expertise to conduct a study evaluating the feasibility of  
24 using power purchase agreements to facilitate the private

1 sector development and deployment of lunar surface power  
2 capabilities.

3 (b) CONTENTS.—The study conducted under sub-  
4 section (a) may include the following:

5 (1) An identification of facilities and technical  
6 capabilities needed to support lunar surface power  
7 production.

8 (2) A description and assessment of the types  
9 and technical readiness of technologies that could be  
10 used to provide the United States with access to  
11 lunar surface power, and an estimated timeline of  
12 availability of such technologies.

13 (3) A demand forecast for lunar surface power  
14 capabilities, including the following:

15 (A) Forecasted demand of both govern-  
16 mental and nongovernmental users.

17 (B) To support the following:

18 (i) Near-term exploration activities.

19 (ii) Long-duration activities.

20 (iii) Capabilities allowing activities  
21 throughout the lunar night.

22 (4) An identification of lessons learned from  
23 Federal Government experience with power purchase  
24 agreements, including a description of any relevant  
25 Federal Government use of power purchase agree-

1       ments, and a description of how such lessons learned  
2       could inform or be applied to future United States  
3       lunar power purchase agreements.

4           (5) Potential policy and legal issues associated  
5       with lunar power purchase agreements between pro-  
6       viders and the United States Government, inter-  
7       national partners, and other private sector entities.

8       (c) COORDINATION.—In conducting the study under  
9       this section, the Administrator may consult with the fol-  
10      lowing:

11           (1) The Lunar Surface Innovation Consortium.

12           (2) The Department of Energy, the Depart-  
13       ment of Commerce, and other Federal agencies, as  
14       determined appropriate by the Administrator.

15           (3) International partners.

16           (4) Relevant private sector entities.

17       (d) REPORT.—Not later than 24 months after the  
18       date of the enactment of this Act, the Administrator shall  
19       submit to the appropriate committees of Congress a report  
20       that describes the results of the study conducted pursuant  
21       to subsection (a).

22   **SEC. 403. CRYOGENIC FLUID VALVE TECHNOLOGY REVIEW.**

23       (a) SENSE OF CONGRESS.—It is the sense of Con-  
24       gress that advancing cryogenic fluid valve technology  
25       would support the Administration’s efforts to improve

1 cryogenic fluid management and improve space vehicle re-  
2 liability and efficiency.

3 (b) TECHNOLOGY AND RESEARCH REVIEW.—Not  
4 later than 90 days after the date of the enactment of this  
5 Act, subject to the availability of appropriations, the Ad-  
6 ministrator shall enter into an agreement with an inde-  
7 pendent research and development center or other inde-  
8 pendent nonprofit organization, as determined appropriate  
9 by the Administrator, to conduct a review of cryogenic  
10 fluid valve technology in accordance with this section. The  
11 organization shall review recent advances in technologies  
12 related to cryogenic fluid valve use in space applications  
13 and assess opportunities to improve cryogenic fluid valve  
14 technologies, including support for research and develop-  
15 ment activities to advance materials engineering for cryo-  
16 genic fluid valves.

17 (c) REPORT.—Not later than 18 months after the  
18 date of the enactment of this Act, the organization con-  
19 ducting the review shall submit to the Administrator and  
20 the appropriate committees of Congress a report detailing  
21 the results of the review conducted under this section.

## 22 **TITLE V—AERONAUTICS**

### 23 **SEC. 501. DEFINITIONS.**

24 In this title:

1           (1) ADVANCED AIR MOBILITY; AAM.—The terms  
2           “advanced air mobility” and “AAM” mean a trans-  
3           portation system that is comprised of urban air mo-  
4           bility and regional air mobility using manned or un-  
5           manned aircraft.

6           (2) REGIONAL AIR MOBILITY.—The term “re-  
7           gional air mobility” means the movement of pas-  
8           sengers or property by air between 2 points using an  
9           airworthy aircraft that—

10                 (A) has advanced technologies, such as dis-  
11                 tributed propulsion, vertical takeoff and land-  
12                 ing, powered lift, nontraditional power systems,  
13                 or autonomous technologies;

14                 (B) has a maximum takeoff weight of  
15                 greater than 1,320 pounds; and

16                 (C) is not urban air mobility.

17           (3) UNMANNED AIRCRAFT.—The term “un-  
18           manned aircraft” means an aircraft that is operated  
19           without the possibility of direct human intervention  
20           from within or on the aircraft.

21           (4) UNMANNED AIRCRAFT SYSTEM.—The term  
22           “unmanned aircraft system” means an unmanned  
23           aircraft and associated elements (including commu-  
24           nication links and the components that control the  
25           unmanned aircraft) that are required for the oper-

1        ator to operate safely and efficiently in the national  
2        airspace system.

3            (5) URBAN AIR MOBILITY.—The term “urban  
4        air mobility” means the movement of passengers or  
5        property by air between 2 points in different cities  
6        or 2 points within the same city using an airworthy  
7        aircraft that—

8            (A) has advanced technologies, such as dis-  
9        tributed propulsion, vertical takeoff and land-  
10       ing, powered lift, nontraditional power systems,  
11       or autonomous technologies; and

12           (B) has a maximum takeoff weight of  
13       greater than 1,320 pounds.

14           (6) UTM.—The term “UTM” means an un-  
15       manned aircraft system traffic management system  
16       or service.

17 **SEC. 502. EXPERIMENTAL AIRCRAFT DEMONSTRATIONS.**

18        (a) STUDY.—Not later than one year after the date  
19       of the enactment of this Act, the Administrator, in con-  
20       sultation with industry and academia, shall conduct a  
21       study of NASA’s administration of past and ongoing  
22       NASA experimental aircraft demonstrator projects.

23        (b) FUTURE DEMONSTRATIONS.—The study under  
24       subsection (a) shall include an identification of flight re-  
25       search activities, systems, capabilities, and technologies

1 that could be viable candidates for experimental aircraft  
2 demonstrator projects. Such activities, systems, capabili-  
3 ties, and technologies may include technological advance-  
4 ments related to structures, aerodynamics, propulsion,  
5 controls, and autonomous capabilities. The study shall in-  
6 clude a description of criteria and performance metrics  
7 used to determine the readiness of an activity, system, ca-  
8 pability, or technology for incorporation into an experi-  
9 mental aircraft demonstrator project.

10 (c) LESSONS LEARNED.—The study under subsection  
11 (a) also shall include an assessment of lessons learned  
12 from NASA’s administration of past and ongoing experi-  
13 mental aircraft demonstration projects over the last dec-  
14 ade, including the projects set forth under section 10831  
15 of the National Aeronautics and Space Administration Au-  
16 thorization Act of 2022 (Public Law 117–167). Such as-  
17 sessment shall include—

18 (1) a quantitative assessment of each experi-  
19 mental aircraft demonstration project’s ability to  
20 meet cost, schedule and performance goals, as de-  
21 fined at the time of project confirmation;

22 (2) the extent to which each project’s objectives  
23 or performance goals were changed or descoped, and  
24 the rationale for such change or descoping;

1           (3) the extent to which the system, capability,  
2           or technology that was the subject of each project  
3           was matured as a result of its demonstration on an  
4           experimental aircraft demonstrator; and

5           (4) the extent to which each project has con-  
6           tributed, or is likely to contribute in the future, to  
7           advancing the capabilities of and innovation in the  
8           United States aircraft and aviation industries.

9   **SEC. 503. HYPERSONICS RESEARCH.**

10       (a) SENSE OF CONGRESS.—It is the sense of Con-  
11       gress that—

12           (1) basic and applied hypersonics research—

13                (A) is critical for enabling the development  
14                of advanced high-speed aeronautical and space  
15                systems; and

16                (B) can improve understanding of tech-  
17                nical challenges related to high-speed and reus-  
18                able vehicle technologies, including those related  
19                to propulsion, noise, advanced materials, and  
20                entry, descent, and landing operations;

21           (2) investments in hypersonics research are  
22           critical to sustaining United States global leadership  
23           in space and aeronautics; and

24           (3) NASA efforts to study hypersonics research  
25           should complement research supported by the De-

1       partment of Defense and, when appropriate, be con-  
2       ducted in partnership with universities and industry.

3       (b) **HYPERSONICS RESEARCH.**—The Administrator,  
4 in coordination with the Administrator of the Federal  
5 Aviation Administration and the Secretary of the Depart-  
6 ment of Defense, and in consultation with industry and  
7 academia, shall continue to carry out basic and applied  
8 hypersonics research.

9       (c) **HYPERSONICS RESEARCH ROADMAP.**—Not later  
10 than 180 days after the date of the enactment of this Act,  
11 the Administrator, in consultation with the Administrator  
12 of the Federal Aviation Administration and the Secretary  
13 of the Department of Defense, and with industry and aca-  
14 demic institutions, shall update the hypersonics research  
15 roadmap required under section 603 of the National Aero-  
16 nautics and Space Administration Transition Authoriza-  
17 tion Act of 2017 (Public Law 115–10; 51 U.S.C. 20302  
18 note). In updating the research roadmap, the Adminis-  
19 trator may consider advancements in—

20           (1) system level design, analysis, and validation  
21       of hypersonics aircraft technologies;

22           (2) propulsion capabilities and technologies;

23           (3) vehicle technologies, including vehicle flow  
24       physics and vehicle thermal management associated  
25       with aerodynamic heating;

1           (4) advanced materials, including materials ca-  
2           pable of withstanding high temperatures and dem-  
3           onstrating durable materials, and efforts to create  
4           models and simulate use of such materials; and

5           (5) other areas of hypersonics research as de-  
6           termined appropriate by the Administrator.

7           (d) REPORT AND BRIEFING.—Not later than one  
8           year after the date of the enactment of this Act, the Ad-  
9           ministrators shall—

10           (1) transmit the updated research roadmap  
11           under subsection (c) to the appropriate committees  
12           of Congress; and

13           (2) provide a briefing on the research conducted  
14           under subsection (b), including how such research  
15           aligns with the updated research roadmap under  
16           subsection (c).

17   **SEC. 504. ADVANCED MATERIALS AND MANUFACTURING**  
18                           **TECHNOLOGY.**

19           Not later than 180 days after the date of the enact-  
20           ment of this Act and annually thereafter, the Adminis-  
21           trator shall submit to the appropriate committees of Con-  
22           gress a report on the status of NASA activities pursuant  
23           to subsections (e) and (f) of section 10831 of the National  
24           Aeronautics and Space Administration Authorization Act  
25           of 2022 (Public Law 117–167; 51 U.S.C. 40102 note; re-

1 lating to the advanced materials and manufacturing tech-  
2 nology program and research partnerships, respectively),  
3 as well as other NASA activities.

4 **SEC. 505. UNMANNED AIRCRAFT SYSTEMS AND ADVANCED**  
5 **AIR MOBILITY.**

6 (a) FINDING.—Congress finds that research and de-  
7 velopment related to autonomous aviation is vital to en-  
8 sure United States competitiveness as the National Air-  
9 space System evolves from trajectory-based operations to  
10 collaborative and highly automated operations.

11 (b) COLLABORATION.—The Administrator shall, in  
12 collaboration with the Administrator of Federal Aviation  
13 Administration, the heads of other relevant Federal agen-  
14 cies, and appropriate representatives of academia and in-  
15 dustry, continue its research on unmanned aircraft sys-  
16 tems and advanced air mobility, including research related  
17 to UTM and autonomous capabilities, as practicable.

18 (c) BRIEF.—Not later than 18 months after the date  
19 of the enactment of this Act, the Administrator shall brief  
20 the appropriate committees of Congress on the progress  
21 of the research under subsection (b).

22 **SEC. 506. ADVANCED CAPABILITIES FOR EMERGENCY RE-**  
23 **SPONSE OPERATIONS.**

24 (a) IN GENERAL.—The Administrator shall leverage  
25 NASA-developed tools and technologies to conduct re-

1 search and development activities under the Advanced Ca-  
2 pabilities for Emergency Response Operations (ACERO)  
3 project, or appropriate successor project or projects, to im-  
4 prove aerial responses to wildfires.

5 (b) GOALS.—The research and development activities  
6 conducted under subsection (a) may include the following:

7 (1) Advanced aircraft technologies and airspace  
8 management efforts to assist in the management,  
9 deconfliction, and coordination of aerial assets dur-  
10 ing wildfire response efforts.

11 (2) Information sharing and real-time data ex-  
12 change for wildfire response teams.

13 (3) Development of an interoperable platform to  
14 provide situational awareness of aerial assets during  
15 wildfire response.

16 (4) Establishment of a multi-agency concept of  
17 operations, which may involve Federal, State, and  
18 local government agencies, to enable coordination of  
19 aerial activities for wildfire response.

20 (c) COLLABORATION.—In carrying out this section,  
21 the Administrator—

22 (1) may coordinate and collaborate with other  
23 Federal, State, and local government agencies, re-  
24 gional organizations, and commercial partners and

1 academic institutions involved in wildfire manage-  
2 ment; and

3 (2) shall, to the maximum extent practicable,  
4 consult with the heads of other Federal departments  
5 and agencies to avoid duplication of activities.

6 (d) PROHIBITION.—

7 (1) IN GENERAL.—Except as provided in this  
8 subsection, the Administrator may not procure an  
9 unmanned aircraft system to conduct activities de-  
10 scribed in this section if such unmanned aircraft sys-  
11 tem is manufactured or assembled by a covered for-  
12 eign entity.

13 (2) EXEMPTION.—The Administrator may  
14 waive the prohibition under paragraph (1) on a case-  
15 by-case basis if the Administrator—

16 (A) determines that the procurement of an  
17 unmanned aircraft system is—

18 (i) in the national interest of the  
19 United States; and

20 (ii) necessary for the sole purpose of  
21 improving aerial responses to wildfires; and

22 (B) notifies the appropriate committees of  
23 Congress not later than 30 days after a deter-  
24 mination in the affirmative under subparagraph  
25 (A).

1 (e) ANNUAL REPORTS.—Not later than one year  
2 after the date of the enactment of this Act and annually  
3 thereafter until December 31, 2031, the Administrator  
4 shall submit to the appropriate committees of Congress  
5 a report describing the activities, including results, carried  
6 out pursuant to this section. Each such report, at min-  
7 imum, shall contain the following:

8 (1) A description of any research and develop-  
9 ment activities.

10 (2) A description of the Administrator’s activi-  
11 ties pursuant to subsection (c).

12 (3) An identification of any topics related to  
13 improvement of aerial responses to wildfires that  
14 could benefit from further research.

15 (4) A description of any continuing efforts  
16 under this section.

17 (5) Any other information determined appro-  
18 priate by the Administrator.

19 (f) DEFINITION.—In this section, the term “covered  
20 foreign entity” has the meaning given such term in section  
21 1832 of the National Defense Authorization Act for Fiscal  
22 Year 2024 (Public Law 118–31).

23 **SEC. 507. HYDROGEN AVIATION.**

24 (a) IN GENERAL.—Subject to the availability of ap-  
25 propriations for such purpose, and taking into consider-

1 ation the strategy developed under and research conducted  
2 pursuant to section 1019 of the FAA Reauthorization Act  
3 of 2024 (Public Law 118–63), the Administrator may  
4 carry out research on emerging technologies related to hy-  
5 drogen aviation.

6 (b) REPORT.—Not later than two years after the date  
7 of the enactment of this Act, the Administrator shall sub-  
8 mit to the appropriate committees of Congress a report  
9 on NASA research activities under subsection (a) and any  
10 associated findings.

11 **SEC. 508. HIGH-PERFORMANCE CHASE AIRCRAFT.**

12 (a) SENSE OF CONGRESS.—It is the sense of Con-  
13 gress that—

14 (1) NASA programs benefit from and rely upon  
15 high-performance chase aircraft for providing re-  
16 search and mission support; and

17 (2) NASA currently faces maintenance chal-  
18 lenges related to its aging high-performance aircraft  
19 fleet, which is resulting in increased program costs.

20 (b) BRIEFING.—Not later than 60 days after the date  
21 of the enactment of this Act and biannually thereafter,  
22 the Administrator shall provide to the appropriate com-  
23 mittees of Congress a briefing on the strategy of NASA  
24 relating to the following:

1           (1) Collaboration with the Department of De-  
2       fense on efforts for research and flight asset sharing  
3       to support NASA’s research mission support and  
4       pilot training requirements.

5           (2) Efforts to seek aircraft parts and engines to  
6       keep NASA’s current fleet of chase aircraft oper-  
7       ational, including potential use of 3D additive manu-  
8       factured parts.

9           (3) Strategies for acquiring or using through  
10      loan, sharing, or other agreements, as appropriate,  
11      Department of Defense aircraft to support NASA’s  
12      research and mission support activities, as required.

13 **SEC. 509. COLLABORATION WITH ACADEMIA.**

14      It is the sense of Congress that—

15           (1) colleges and universities are hubs of re-  
16      search and innovation, with expertise in various  
17      fields of science and aeronautics;

18           (2) collaborating with academia allows NASA to  
19      access cutting-edge research and expertise that can  
20      further enable advancements in aeronautics research  
21      and technology and address complex aeronautical  
22      challenges;

23           (3) a cutting-edge civil aeronautics research and  
24      development program can inspire the next genera-  
25      tion to pursue education and careers in science,

1 technology, engineering, and mathematics, including  
2 aeronautics; and

3 (4) opportunities for students to participate in  
4 NASA-supported academic research and develop-  
5 ment projects, such as the University Leadership  
6 Initiative, the University Students Research Chal-  
7 lenge, and related aeronautic projects and competi-  
8 tions, contributes to training the next generation  
9 and developing the aeronautics workforce to support  
10 continued United States leadership and economic  
11 growth in civil aeronautics and aviation.

12 **SEC. 510. DECADAL SURVEY FOR NATIONAL AERONAUTICS**  
13 **RESEARCH.**

14 (a) SENSE OF CONGRESS.—It is the sense of Con-  
15 gress that—

16 (1) engaging the science and engineering com-  
17 munities, along with industry, through the develop-  
18 ment of a National Academies of Science, Engineer-  
19 ing, and Medicine decadal survey in aeronautics re-  
20 search and development can provide a science and  
21 engineering community consensus on key research  
22 and development priorities in national civil aero-  
23 nautics programs;

24 (2) a decadal survey—

1 (A) entails a comprehensive review of and  
2 strategy and priorities for civil national aero-  
3 nautics research and development; and

4 (B) prioritizes such research and develop-  
5 ment for the next decade; and

6 (3) a decadal survey for civil aeronautics re-  
7 search and development can serve as a guiding  
8 framework for NASA's and other relevant Federal  
9 agencies' strategic planning and resource allocation  
10 in the field of civil aeronautics research and develop-  
11 ment for the coming decade.

12 (b) FINDINGS.—Congress finds that—

13 (1) in title 51, United States Code, sections ad-  
14 dressing NASA's decadal surveys for aeronautics re-  
15 search include sections 20305 and 40703; and

16 (2) the most recent National Academies'  
17 Decadal Survey of Civil Aeronautics was published  
18 in 2006.

19 (c) STUDY.—In accordance with section 20305 of  
20 title 51, United States Code, the Administrator, in con-  
21 sultation with the heads of other relevant Federal Govern-  
22 ment agencies, as appropriate, shall enter into an arrange-  
23 ment with the National Academies of Sciences, Engineer-  
24 ing, and Medicine to conduct a decadal survey of civil aer-  
25 onautics research for the 2026 through 2036 decade. The

1 survey shall recommend research and programmatic prior-  
2 ities to sustain United States leadership in civil aero-  
3 nautics research and development and support a safe and  
4 sustainable future for aviation. The survey may also in-  
5 clude recommendations for the following:

6 (1) Enabling innovation.

7 (2) Ensuring a world-class workforce for aero-  
8 nautics research and development and related  
9 United States commercial industries and activities.

10 (3) The dissemination and transition of such  
11 research and development to the United States com-  
12 mercial aviation and aircraft industries.

13 (d) TRANSMITTAL.—Not later than two years after  
14 the date of the enactment of this Act, the Administrator  
15 shall submit to the appropriate committees of Congress  
16 the results of such survey, including any recommenda-  
17 tions.

18 **SEC. 511. MAKING ADVANCEMENTS IN COMMERCIAL**  
19 **HYPERSONICS.**

20 (a) IN GENERAL.—In conducting the hypersonics re-  
21 search in accordance with section 40112(d) of title 51,  
22 United States Code, the Administrator may establish the  
23 Making Advancements in Commercial Hypersonics Pro-  
24 gram (in this section referred to as the “Program”), which  
25 shall facilitate opportunities for testing of high-speed air-

1 craft and other technologies that advance scientific re-  
2 search and technology development related to hypersonic  
3 aircraft.

4 (b) LIMITATION.—The Program under subsection (a)  
5 shall not fund the development of technologies that are  
6 supported by such testing opportunities.

7 (c) PLAN.—Not later than 60 days after the date of  
8 the enactment of this Act, the Administrator, acting  
9 through the Aeronautics Research Mission Directorate,  
10 shall develop a strategic plan for activities under sub-  
11 section (a) that aligns with the research roadmap under  
12 section 503 of this Act.

13 (d) COORDINATION, CONSULTATION AND COLLABO-  
14 RATION.—

15 (1) The Administrator shall ensure coordination  
16 between the Aeronautics Research Mission Direc-  
17 torate and other Mission Directorates, as appro-  
18 priate, to identify technologies eligible for testing op-  
19 portunities under the Program.

20 (2) The Administrator shall consult and seek to  
21 collaborate with, as appropriate, with the Secretary  
22 of Defense and the Administrator of the Federal  
23 Aviation Administration on activities related to the  
24 Program, including development, testing, and eval-

1       uation of high-speed aircraft and related tech-  
2       nologies.

3       (e) REPORT.—The Administrator shall submit to the  
4       appropriate committees of Congress, and the Committee  
5       on Armed Services of the House of Representatives and  
6       the Committee on Armed Services of the Senate—

7               (1) not later than 80 days after the date of the  
8       enactment of this section, a report that—

9                       (A) describes activities of the program es-  
10                      tablished under subsection (a); and

11                     (B) includes the strategic plan produced  
12                     under subsection (c); and

13               (2) not later than one year after the date of the  
14       enactment of this Act and annually thereafter, a re-  
15       port describing progress in carrying out the pro-  
16       gram, including the number and type of testing op-  
17       portunities executed in the previous fiscal year and  
18       planned for the upcoming fiscal year.

19       (f) RESEARCH SECURITY.—Nothing under this sec-  
20       tion authorizes the Administrator to develop, implement,  
21       or execute an agreement related to technologies under this  
22       section with any entity of concern, a foreign business enti-  
23       ty, or a foreign country of concern.

24       (g) DEFINITIONS.—In this section—

1           (1) ENTITY OF CONCERN.—The term “entity of  
2       concern” has the meaning given such term in section  
3       10114 of the Research and Development, Competi-  
4       tion, and Innovation Act (Public Law 117–167; 42  
5       U.S.C. 18912).

6           (2) FOREIGN BUSINESS ENTITY.—The term  
7       “foreign business entity” means an entity that is  
8       majority-owned or majority-controlled (as such term  
9       is defined in section 800.208 of title 31, Code of  
10      Federal Regulations, or a successor regulation), or  
11      minority owned greater than 25 percent by—

12                (A) any governmental organization of a  
13      foreign country of concern; or

14                (B) any other entity that is—

15                      (i) known to be owned or controlled  
16      by any governmental organization of a for-  
17      eign country of concern; or

18                      (ii) organized under, or otherwise sub-  
19      ject to, the laws of a foreign country of  
20      concern.

21           (3) FOREIGN COUNTRY OF CONCERN.—The  
22      term “foreign country of concern” has the meaning  
23      given such term in section 9901 of title XCIX of di-  
24      vision H of the William M. (Mac) Thornberry Na-

1 tional Defense Authorization Act for Fiscal Year  
2 2021 (15 U.S.C. 4651).

3 (4) HIGH-SPEED AIRCRAFT.—The term “high-  
4 speed aircraft” means an aircraft operating at  
5 speeds in excess of Mach 1, including supersonic and  
6 hypersonic aircraft.

7 (5) HYPERSONIC.—The term “hypersonic”  
8 means flights operating at speeds that exceed Mach  
9 5.

10 (6) SUPERSONIC.—The term “supersonic”  
11 means flights operating at speeds in excess of Mach  
12 1 but less than Mach 5.

## 13 **TITLE VI—SCIENCE**

### 14 **SEC. 601. MAINTAINING A BALANCED SCIENCE PORTFOLIO.**

15 (a) SENSE OF CONGRESS.—Congress reaffirms the  
16 sense of Congress that—

17 (1) a balanced and adequately funded set of ac-  
18 tivities consisting of research and analysis grant pro-  
19 grams, technology development, suborbital research  
20 activities, and small, medium, and large space mis-  
21 sions, contributes to a robust and productive science  
22 program and serves as a catalyst for innovation and  
23 discovery; and

24 (2) the Administrator should set science prior-  
25 ities by following the recommendations and guidance

1 provided by the scientific community through the  
2 National Academies of Sciences, Engineering, and  
3 Medicine decadal surveys.

4 (b) **POLICY REAFFIRMATION.**—Congress reaffirms  
5 the policy of the United States set forth in section 501(c)  
6 of the National Aeronautics and Space Administration  
7 Transition Authorization Act of 2017 (Public Law 115–  
8 10; 51 U.S.C. 20302 note), which states, “It is the policy  
9 of the United States to ensure, to the extent practicable,  
10 a steady cadence of large, medium, and small science mis-  
11 sions”.

12 **SEC. 602. IMPLEMENTATION OF SCIENCE MISSION COST-**  
13 **CAPS.**

14 (a) **SENSE OF CONGRESS.**—It is the sense of Con-  
15 gress that—

16 (1) NASA science missions address compelling  
17 scientific questions prioritized by the National Acad-  
18 emies decadal surveys, and often such missions ex-  
19 ceed expectations in terms of performance, longevity,  
20 and scientific impact;

21 (2) the Administrator should continue to pursue  
22 an ambitious science program while also seeking to  
23 avoid excessive cost growth that has the potential to  
24 affect the balance across the Science portfolio and  
25 within the Science Divisions;

1           (3) audits by the NASA Inspector General and  
2           the Government Accountability Office have reported  
3           that early cost estimates for missions in the prelimi-  
4           nary phases of conception and development are im-  
5           mature and unreliable, and the cost of a mission  
6           typically is not well-understood until the project is  
7           further along in the development process;

8           (4) cost growth of a mission beyond its early  
9           cost estimates is a challenge for budget planning  
10          and has the potential to affect other missions in the  
11          Science Mission Directorate portfolio, including  
12          through delays to future mission solicitations; and

13          (5) relying on early cost estimates made prior  
14          to preliminary design review for science missions  
15          which then experience such cost growth may  
16          disincentivize program and cost discipline moving  
17          forward.

18          (b) REPORT.—Not later than 12 months after the  
19          date of the enactment of this Act, the Comptroller General  
20          shall transmit to the appropriate committees of Congress  
21          a review of NASA practices related to establishment of  
22          and compliance with cost caps of competitively-selected,  
23          principal investigator-led science missions. The review  
24          shall—

1           (1) assess current cost cap values and deter-  
2           mine whether existing cost-cap amounts are appro-  
3           prium for different classes of missions;

4           (2) consider the effectiveness of cost caps in  
5           maintaining a varied and balanced portfolio of mis-  
6           sion types within the Science Mission Directorate;

7           (3) describe the information NASA requires as  
8           part of a proposal submission related to project cost  
9           estimates and proposal compliance with cost caps,  
10          and assess whether such required information pro-  
11          vides sufficient insight or confidence in the esti-  
12          mates;

13          (4) consider NASA processes for assessing pro-  
14          posed cost estimates and the accuracy of such as-  
15          sessments for past competitively-selected, principal  
16          investigator-led science missions; and

17          (5) for the period starting on January 1, 2000,  
18          and ending on the date of the enactment of this  
19          Act—

20                (A) a list of—

21                   (i) competitively-selected, principal in-  
22                   vestigator-led science missions for which  
23                   costs have exceeded the associated cost  
24                   cap; and

1 (ii) reason the mission costs exceeded  
2 the cost-cap;

3 (B) an assessment of NASA's role in pre-  
4 dicting, preventing, or managing competitively-  
5 selected, principal investigator-led science mis-  
6 sion cost increases; and

7 (C) a description of the impact of in-  
8 creased competitively-selected, principal investi-  
9 gator-led science mission costs beyond the cost  
10 caps on—

11 (i) the missions for which the cost cap  
12 has been breached; and

13 (ii) other missions within the applica-  
14 ble division and within the Science Mission  
15 Directorate.

16 **SEC. 603. REEXAMINATION OF DECADEAL SURVEYS.**

17 Title 51, United States Code, is amended in section  
18 20305(c) by inserting “, significant changes to the NASA  
19 budget” after “growth”.

20 **SEC. 604. LANDSAT.**

21 Not later than 180 days after the date of enactment  
22 of this Act, the Administrator shall transmit a report to  
23 the appropriate committees of Congress describing—

24 (1) the Administrator's efforts to comply with  
25 section 60134 of title 51, United States Code;

1           (2) aspects of Landsat NEXT or any other  
2       Landsat observations that—

3           (A) could be provided by private sector  
4       data-buys or service procurements; and

5           (B) could—

6           (i) meet associated science require-  
7       ments while maintaining or exceeding the  
8       quality, integrity, and continuity of the  
9       Landsat observational capabilities and per-  
10      formance, including requirements nec-  
11      essary to ensure high-quality calibrated  
12      data continuity and traceability with the  
13      50-year Landsat data record; and

14          (ii) comply with nondiscriminatory  
15      availability of unenhanced data and public  
16      archiving of data pursuant to section  
17      60141 and 60142 of title 51, United  
18      States Code, and all other relevant Federal  
19      laws, regulations, and policies related to  
20      open science and data accessibility;

21          (3) any potential tradeoffs or other impacts of  
22      subparagraphs (A) or (B) that could reduce the ben-  
23      efit of Landsat data for scientific and applied uses  
24      or reduce the Federal Government's ability to make  
25      such data available for the widest possible use; and

1           (4) recommendations and opportunities for the  
2       Federal Government to mitigate potential tradeoffs  
3       or impacts identified under paragraph (3) or to oth-  
4       erwise facilitate private sector data-buys or service  
5       procurements.

6   **SEC. 605. PRIVATE EARTH OBSERVATION DATA.**

7       (a) AMENDMENTS.—Section 702 of the National Aer-  
8       onautics and Space Administration Authorization Act of  
9       2010 (42 U.S.C. 18371) is amended—

10           (1) by striking “The Director of OSTP” and  
11       inserting the following:

12       “(a) IN GENERAL.—The Director of OSTP”; and

13           (2) by adding at the end the following:

14       “(b) CONSIDERATIONS.—In updating the civil Earth  
15       observation strategic implementation plan pursuant to  
16       subsection (a), the Director of OSTP shall consider com-  
17       mercial Earth observation data, as appropriate, that can  
18       be purchased or accessed by the Federal Government to  
19       meet Earth observation requirements.”.

20       (b) GOVERNMENT ACCOUNTABILITY OFFICE RE-  
21       PORT.—Not later than 12 months after the release of the  
22       next civil Earth observation strategic implementation plan  
23       update under section 702(a) of the National Aeronautics  
24       and Space Administration Authorization Act of 2010 (42  
25       U.S.C. 18371(a)), the Comptroller General shall report to

1 the appropriate committees of Congress an assessment of  
2 the Director of the Office of Science and Technology Pol-  
3 icy's implementation of section 702(b) of the National  
4 Aeronautics and Space Administration Authorization Act  
5 of 2010 (42 U.S.C. 18371(b)), as amended.

6 **SEC. 606. COMMERCIAL SATELLITE DATA.**

7 (a) FINDINGS.—Congress makes the following find-  
8 ings:

9 (1) Section 60501 of title 51, United States  
10 Code, states that the goal for the Earth Science pro-  
11 gram of NASA shall be to pursue a program of  
12 Earth observations, research, and applications activi-  
13 ties to better understand the Earth, how it supports  
14 life, and how human activities affect its ability to do  
15 so in the future.

16 (2) Section 50115 of title 51, United States  
17 Code, states that the Administrator of NASA shall,  
18 to the extent possible and while satisfying the sci-  
19 entific or educational requirements of NASA, and  
20 where appropriate, of other Federal agencies and  
21 scientific researchers, acquire, where cost effective,  
22 space-based and airborne commercial Earth remote  
23 sensing data, services, distribution, and applications  
24 from a commercial provider.

1           (3) The Administrator of NASA established the  
2       Commercial SmallSat Data Acquisition Pilot Pro-  
3       gram in 2017 to identify, validate, and acquire from  
4       commercial sources data that support the Earth  
5       science research and application goals.

6           (4) The Administrator of NASA has—

7                (A) determined that the pilot program de-  
8       scribed in paragraph (3) has been a success, as  
9       described in the final evaluation entitled “Com-  
10      mercial SmallSat Data Acquisition Program  
11      Pilot Evaluation Report” issued in 2020;

12              (B) established a formal process for evalu-  
13      ating and onboarding new commercial vendors  
14      in such pilot program;

15              (C) increased the number of commercial  
16      vendors and commercial data products available  
17      through such pilot program; and

18              (D) expanded procurement arrangements  
19      with commercial vendors to broaden user access  
20      to provide commercial Earth remote sensing  
21      data and imagery to federally funded research-  
22      ers.

23       (b) COMMERCIAL SATELLITE DATA ACQUISITION  
24   PROGRAM.—

1           (1) IN GENERAL.—Chapter 603 of title 51,  
2       United States Code, is amended by adding at the  
3       end the following:

4   **“§ 60307. Commercial satellite data acquisition pro-**  
5                           **gram**

6       “(a) IN GENERAL.—The Administrator shall estab-  
7       lish within the Earth Science Division of the Science Mis-  
8       sion Directorate a program to acquire and disseminate  
9       cost-effective and appropriate commercial Earth remote  
10      sensing data and imagery in order to satisfy the scientific,  
11      operational, and educational requirements of the Adminis-  
12      tration, and where appropriate, of other Federal agencies  
13      and scientific researchers to augment or complement the  
14      suite of Earth observations acquired by the Administra-  
15      tion, other United States Government agencies, and inter-  
16      national partners.

17      “(b) DATA PUBLICATION AND TRANSPARENCY.—The  
18      terms and conditions of commercial Earth remote sensing  
19      data and imagery acquisitions under the program de-  
20      scribed in subsection (a) shall not prevent—

21           “(1) the publication of commercial data or im-  
22           agery for scientific purposes; or

23           “(2) the publication of information that is de-  
24           rived from, incorporates, or enhances the original  
25           commercial data or imagery of a vendor.

1       “(c) AUTHORIZATION.—In carrying out the program  
2 under this section, the Administrator may—

3           “(1) procure the commercial Earth remote  
4 sensing data and imagery from commercial vendors  
5 to advance scientific research and applications in ac-  
6 cordance with subsection (a); and

7           “(2) establish or modify end-use license terms  
8 and conditions to allow for the widest-possible use of  
9 procured commercial Earth remote sensing data and  
10 imagery by individuals other than NASA-funded  
11 users, consistent with the goals of the program.

12       “(d) UNITED STATES VENDORS.—Commercial Earth  
13 remote sensing data and imagery referred to in sub-  
14 sections (a) and (c) shall, to the maximum extent prac-  
15 ticable, be procured from United States vendors.

16       “(e) REPORT.—Not later than 180 days after the  
17 date of the enactment of this section and annually there-  
18 after, the Administrator shall submit to the Committee on  
19 Commerce, Science, and Transportation of the Senate and  
20 the Committee on Science, Space, and Technology of the  
21 House of Representatives a report that includes the fol-  
22 lowing information regarding the agreements, vendors, li-  
23 cense terms, and uses of commercial Earth remote sensing  
24 data and imagery under this section:

1           “(1)(A) In the case of the initial report, a list  
2           of all agreements that are providing commercial  
3           Earth remote sensing data and imagery to NASA as  
4           of the date of the report.

5           “(B) For each subsequent report, a list of all  
6           agreements that have provided commercial Earth re-  
7           mote sensing data and imagery to NASA during the  
8           reporting period.

9           “(2) A description of the end-use license terms  
10          and conditions for each such vendor.

11          “(3) A description of how each such agreement  
12          advances scientific research and applications, includ-  
13          ing priorities recommended by the National Acad-  
14          emies of Sciences, Engineering, and Medicine  
15          decadal surveys.

16          “(4) Information specifying whether the Admin-  
17          istrator has entered into an agreement with a com-  
18          mercial vendor or a Federal agency that permits the  
19          use of data and imagery by Federal Government em-  
20          ployees, contractors, or non-Federal users.”.

21          (2) CLERICAL AMENDMENT.—The table of con-  
22          tents for chapter 603 of title 51, United States  
23          Code, is amended by adding at the end the following  
24          new item:

“60307. Commercial Satellite Data Acquisition Program.”.

1 **SEC. 607. NASA DATA FOR AGRICULTURAL APPLICATIONS.**

2 (a) FINDINGS.—Congress finds the following:

3 (1) NASA has decades of experience in space-  
4 based scientific Earth observations and measure-  
5 ments, including data, trends and modeling.

6 (2) NASA Earth science data, which includes  
7 data on precipitation, temperature,  
8 evapotranspiration, soil moisture, and vegetation  
9 health, has been used to inform the decisionmaking  
10 of agricultural producers.

11 (3) NASA applies its scientific data and models  
12 to inform and support the agricultural community  
13 and engages in innovative collaborations such as the  
14 NASA Acres and NASA Harvest agricultural con-  
15 sortia.

16 (4) NASA uses space-based Earth observations  
17 and science and applications to support farmers in  
18 efforts to conserve water and other resources, im-  
19 prove farm management and crop yield, and facili-  
20 tate the stability of the national food supply.

21 (5) NASA's upcoming Earth System Observ-  
22 atory will benefit the agricultural community by im-  
23 proving observations critical for measuring and un-  
24 derstanding cropland conditions, water availability,  
25 early onset crop disease, soil moisture, and other  
26 crop and rangeland management indicators.

1           (6) Increased engagement between NASA and  
2           the agricultural community can support agricultural  
3           producers, bolster the national food supply, and im-  
4           prove agricultural research, science, and technology.

5           (b) DATA DISSEMINATION.—NASA shall continue to  
6           partner with other relevant Federal agencies, as prac-  
7           ticable, to disseminate water, soil, vegetation, land-use,  
8           and other relevant NASA Earth observation and science  
9           data, information and tools to support American agricul-  
10          tural producers. Such partnerships may include activities  
11          such as—

12           (1) continuing to leverage NASA Earth science  
13           water data and information to enable efficient use of  
14           resources, inform irrigation decisions, and support  
15           local innovation and control of water management;

16           (2) supporting agriculture decisionmaking by  
17           increasing the accessibility and useability of NASA  
18           Earth science data, information, and tools relevant  
19           to the impact of disease, weather, precipitation, and  
20           other environmental factors on agricultural produc-  
21           tion; or

22           (3) making available, to the greatest extent  
23           practicable, NASA earth science measurements and  
24           data to advance precision agricultural capabilities

1       relevant to the needs and requirements of agricul-  
2       tural producers.

3       (c) APPLICATION OF SPACE-BASED DATA.—The Ad-  
4       ministrators shall, in furtherance of the goal for the  
5       NASA’s Earth science and applications program of secur-  
6       ing practical benefits for society, as set forth in section  
7       60501 of title 51, United States Code, continue to collabo-  
8       rate with relevant Federal agencies to develop mechanisms  
9       to transition, as appropriate, relevant NASA Earth  
10      science research findings, data, information, models, and  
11      capabilities to operational governmental and private sector  
12      entities focused on addressing the needs of the agricultural  
13      user community.

14      (d) PARTNERING.—In carrying out subsections (b)  
15      and (d), NASA shall, to the extent practicable and in col-  
16      laboration with other relevant Federal agencies, where ap-  
17      propriate, continue to engage State and local government  
18      agencies, institutions of higher education, agriculture pro-  
19      ducer organizations, and other relevant stakeholder and  
20      user communities from the public and private sectors to  
21      improve dissemination of NASA Earth science data, infor-  
22      mation, and tools relevant to the needs of agricultural pro-  
23      ducers and the agriculture industry, in accordance with  
24      the goal for the Administration’s Earth science and appli-  
25      cations program set forth in section 60501 of title 51,

1 United States Code, and relevant recommendations of the  
2 most recent decadal survey on Earth science and applica-  
3 tions from space.

4 **SEC. 608. PLANETARY SCIENCE PORTFOLIO.**

5 (a) SENSE OF CONGRESS.—It is the sense of Con-  
6 gress that—

7 (1) planetary science missions advance the sci-  
8 entific understanding of the solar system and the  
9 place of humans in it while also advancing the de-  
10 sign and operations of spacecraft and robotic engi-  
11 neering; and

12 (2) Discovery, New Frontiers, and Flagship  
13 programs allow NASA to fund a range of missions  
14 that vary in size, cost, and complexity; maintaining  
15 balance across these mission classes allows for a  
16 broad scope of discoveries and scientific advances.

17 (b) MISSION PRIORITIES REAFFIRMATION.—Con-  
18 gress reaffirms the direction in section 502(b)(1) of the  
19 National Aeronautics and Space Administration Transi-  
20 tion Authorization Act of 2017 (Public Law 115–10; 51  
21 U.S.C. 20302 note) that—

22 (1) in accordance with the priorities established  
23 in the most recent Planetary Science Decadal Sur-  
24 vey, the Administrator shall ensure, to the greatest  
25 extent practicable, the completion of a balanced set

of Discovery, New Frontiers, and Flagship missions  
at the cadence recommended by the most recent  
Planetary Science Decadal Survey; and

(2) consistent with the set of missions described  
in paragraph (1), and while maintaining the con-  
tinuity of scientific data and steady development of  
capabilities and technologies, the Administrator may  
seek, if necessary, adjustments to mission priorities,  
schedule, and scope in light of changing budget pro-  
jections.

**SEC. 609. PLANETARY DEFENSE.**

(a) Section 808 of the National Aeronautics and  
Space Administration Authorization Act of 2010 (42  
U.S.C. 18387), is amended in subsection (b) by striking  
“implement, before September 30, 2012,” and inserting  
“, in coordination with the NASA Administrator, maintain  
and regularly update”.

(b) Title 51, United States Code, is amended—

(1) in section 71103—

(A) in the section heading, by striking  
**“Developing policy and recom-  
mending”** and inserting **“Policy on near-  
Earth objects and”**;

(B) by striking “Within 2 years after Oc-  
tober 15, 2008, the” and inserting “The”;

1 (C) after “Policy shall”, by inserting “, in  
 2 coordination with the Administrator, maintain  
 3 and regularly update”;

4 (D) by striking “(1) develop”; and

5 (E) in paragraph (2), by striking “(2) rec-  
 6 ommend” and inserting “recommendations  
 7 for”; and

8 (2) in chapter 711—

9 (A) by adding at the end the following:

10 **“§ 71105. Planetary defense coordination office**

11 “(a) OFFICE.—As directed in section 10825 of the  
 12 National Aeronautics and Space Administration Author-  
 13 ization Act of 2022 (Public Law 117–167), the Adminis-  
 14 trator shall maintain an office within the Planetary  
 15 Science Division of the Science Mission Directorate to be  
 16 known as the ‘Planetary Defense Coordination Office’.

17 “(b) RESPONSIBILITIES.—Consistent with the direc-  
 18 tion in section 10825 of the National Aeronautics and  
 19 Space Administration Authorization Act of 2022 (Public  
 20 Law 117–167) the Planetary Defense Coordination Office  
 21 under subsection (a) shall—

22 “(1) plan, develop, and implement a program to  
 23 survey threats posed by near-Earth objects equal to  
 24 or greater than 140 meters in diameter, as required  
 25 by section 321(d)(1) of the National Aeronautics

1 and Space Administration Authorization Act of 2005  
 2 (Public Law 109–155; 119 Stat. 2922; 51 U.S.C.  
 3 71101 note prec.);

4 “(2) identify, track, and characterize potentially  
 5 hazardous near-Earth objects, issue warnings of the  
 6 effects of potential impacts of such objects, and in-  
 7 vestigate strategies and technologies for mitigating  
 8 the potential impacts of such objects; and

9 “(3) assist in coordinating government planning  
 10 for a response to a potential impact of a near-Earth  
 11 objects.”; and

12 (B) in the table of contents—

13 (i) by adding at the end the following  
 14 new item:

“71105. Planetary Defense Coordination Office.”; and

15 (ii) by amending the item relating to  
 16 section 71103 to read as follows:

“71103. Policy on near-Earth objects and responsible Federal agency.”.

17 **SEC. 610. LUNAR DISCOVERY AND EXPLORATION.**

18 (a) IN GENERAL.—The Administrator may carry out,  
 19 within the Science Mission Directorate, a program to ac-  
 20 complish science objectives for the Moon, with an organi-  
 21 zational structure that aligns responsibility, authority, and  
 22 accountability, as recommended by the most recent  
 23 decadal survey for planetary science and astrobiology.

1 (b) OBJECTIVES AND REQUIREMENTS.—In carrying  
2 out the program in subsection (a), the Administrator shall  
3 direct the Science Mission Directorate, in consultation  
4 with the Exploration Systems Development Mission Direc-  
5 torate and the Space Technology Mission Directorate, to  
6 define high-priority lunar science objectives informed by  
7 decadal surveys and other scientific consensus rec-  
8 ommendations, and related requirements of an integrated  
9 Artemis science strategy for human and robotic missions  
10 to the Moon.

11 (c) INSTRUMENTATION.—The program in subsection  
12 (a) should assess the need for and facilitate the develop-  
13 ment of instrumentation to support the scientific explo-  
14 ration of the Moon.

15 **SEC. 611. COMMERCIAL LUNAR PAYLOAD SERVICES.**

16 (a) SENSE OF CONGRESS.—It is the sense of Con-  
17 gress that—

18 (1) Administration encouragement and support  
19 for commercial services for lunar surface delivery ca-  
20 pabilities and other related services serves the na-  
21 tional interest; and

22 (2) commercial providers benefit from an ap-  
23 proach that places low-cost, noncritical instruments  
24 on initial deliveries using small- and medium-size

1       landers before proceeding to larger landers for more  
2       complex payloads.

3       (b) COMMERCIAL LUNAR PAYLOAD SERVICES.—The  
4 Administrator is authorized to establish a Commercial  
5 Lunar Payload Services program for the purposes of pro-  
6 curing, from one or more United States commercial pro-  
7 viders, services for delivery of NASA science payloads, and  
8 the payloads of other NASA mission directorates, as ap-  
9 propriate and practicable, to the lunar surface.

10      (c) RELATIONSHIP TO OTHER MISSION DIREC-  
11 TORATES.—A Mission Directorate that seeks to obtain  
12 commercial lunar payload services under the program es-  
13 tablished in subsection (b) shall provide funding for—

14           (1) any payload, instrument or other item spon-  
15       sored by the Mission Directorate for delivery  
16       through the program; and

17           (2) the cost of the commercial lunar payload  
18       services obtained on behalf of the Mission Direc-  
19       torate.

20      (d) IMPLEMENTATION.—In implementing any such  
21 activities pursuant to subsection (b), the Administrator  
22 shall—

23           (1) conduct updated market research on the  
24       commercial lunar economy and identify any changes  
25       since the last market analysis;

1           (2) assess NASA's needs from and role in and  
2           contribution to the commercial lunar delivery mar-  
3           ket;

4           (3) based on such needs identified in paragraph  
5           (2), assess the effectiveness of the task order ap-  
6           proach in advancing commercial development of  
7           lunar delivery services, including an assessment of  
8           the appropriate number of providers necessary to  
9           support NASA commercial lunar delivery needs, and  
10          identify any challenges and recommendations for im-  
11          provement; and

12          (4) strengthen procedures related to the selec-  
13          tion, manifesting, interfaces, and requirements of  
14          payloads and other relevant factors that could con-  
15          tribute to minimizing future NASA-directed changes  
16          to projects following commercial lunar payload serv-  
17          ice contract awards.

18          (e) MANAGEMENT PLAN.—Not later than 90 days  
19          from the date of the enactment of this Act, the Adminis-  
20          trator shall, informed by the activities conducted under  
21          subsection (c), prepare and implement a management plan  
22          with clear leadership authority and responsibility for the  
23          program authorized in subsection (b).

24          (f) BRIEFINGS.—Not later than 180 days from the  
25          date of the enactment of this Act, the Administrator shall

1 brief the appropriate committees of Congress on the imple-  
2 mentation of the management plan in subsection (d).

3 (g) COORDINATION.—The Administrator shall ensure  
4 coordination between Mission Directorates and the Moon  
5 to Mars Program on the administration of the program  
6 in subsection (b) to ensure alignment of goals for lunar  
7 delivery services.

8 **SEC. 612. PLANETARY AND LUNAR OPERATIONS.**

9 (a) SENSE OF CONGRESS.—It is the sense of Con-  
10 gress that—

11 (1) existing NASA lunar and Martian orbital  
12 missions are operating well beyond their planned  
13 mission lifespans;

14 (2) NASA relies on this aging infrastructure for  
15 observations, communications relay, and other oper-  
16 ations to support critical NASA missions; and

17 (3) the United States plans to increase its ac-  
18 tivities on and around both the Moon and Mars in  
19 coming years.

20 (b) PLAN.—The Administrator shall develop a plan  
21 to ensure continuity of operations and sufficient observa-  
22 tional and operational capabilities on and around the  
23 Moon and Mars necessary to continue to enable a robust  
24 science program and human exploration program for the  
25 Moon and Mars well into the future. Such plan shall con-

1 sider opportunities to engage both private and inter-  
2 national partners in future operations.

3 **SEC. 613. MARS SAMPLE RETURN.**

4 (a) IN GENERAL.—The Administrator shall, subject  
5 to the availability of appropriations, lead a Mars Sample  
6 Return program to enable the return to Earth of scientif-  
7 ically-selected samples from the surface of Mars for study  
8 in terrestrial laboratories, consistent with the rec-  
9 ommendations of the National Academies decadal surveys  
10 for planetary science.

11 (b) APPROACH.—The Administrator shall pursue the  
12 program in subsection (a) on a timeline and in a manner  
13 necessary to—

14 (1) Sustain United States leadership in the sci-  
15 entific exploration of Mars;

16 (2) maintain NASA capabilities to land and op-  
17 erate robotic spacecraft on the surface of Mars;

18 (3) preserve the relevant unique and long-term  
19 institutional expertise; and

20 (4) maintain a balanced and robust planetary  
21 science division portfolio without requiring signifi-  
22 cant increases to the NASA budget.

23 (c) IMPLEMENTATION PLAN.—The Administrator  
24 shall, as soon as practicable and no later than 180 days  
25 after the date of enactment of this Act, transmit to the

1 appropriate committees of Congress a plan and timeline  
2 for the implementation of a Mars Sample Return program  
3 pursuant to this section with the goal of enabling the high-  
4 est scientific return for the resources invested. Such plan  
5 shall include a design and mission architecture and estab-  
6 lish realistic cost and schedule estimates to enable such  
7 goal.

8 **SEC. 614. HUBBLE SPACE TELESCOPE SERVICING.**

9 Not later than 90 days from the date of the enact-  
10 ment of this Act, the Administrator shall submit to the  
11 appropriate committees of Congress full copies of any  
12 study conducted in the last five years regarding the tech-  
13 nical feasibility of safely reboosting the Hubble Space Tel-  
14 escope, including any such studies regarding the technical  
15 feasibility of using private sector capabilities.

16 **SEC. 615. GREAT OBSERVATORIES MISSION AND TECH-**  
17 **NOLOGY MATURATION.**

18 (a) **ESTABLISHMENT.**—The Administrator may es-  
19 tablish a Great Observatories Mission and Technology  
20 Maturation program (referred to in this section as the  
21 “Program”) to mature the large-scale space-based mission  
22 concepts and technologies needed for future large strategic  
23 astrophysics missions, including for a large-aperture infra-  
24 red, optical, and ultraviolet space telescope, as informed

1 by the recommendations of the most recent decadal survey  
2 in astronomy and astrophysics.

3 (b) ACTIVITIES.—The Program shall inform the de-  
4 sign and development of future large-scale space-based As-  
5 trophysics missions by conducting activities which may in-  
6 clude—

7 (1) assessing the appropriate scope for any fu-  
8 ture mission;

9 (2) determining the range of capabilities and  
10 technology readiness of such capabilities needed for  
11 a mission; and

12 (3) informing the development and maturation  
13 of science and technologies needed for such mission.

14 (c) COSTS.—The independent life-cycle cost estimate  
15 conducted under section 30307 of title 51, United States  
16 Code, as amended by this Act, for any large-scale space-  
17 based mission derived from concepts and technologies ma-  
18 tured through the Program shall include an accounting  
19 of all costs spent on maturation of the mission through  
20 the Program.

21 (d) REPORT.—Not later than one year after the date  
22 of the enactment of this Act and annually thereafter, the  
23 Administrator shall submit to the appropriate committees  
24 of Congress a report on the progress and impacts of any

1 Projects established under subsection (b) within Astro-  
2 physics programs.

3 **SEC. 616. NANCY GRACE ROMAN SPACE TELESCOPE.**

4 The Administrator shall continue development of the  
5 Nancy Grace Roman Space Telescope as directed in sub-  
6 section 10823(b) of the National Aeronautics and Space  
7 Administration Authorization Act of 2022 (Public Law  
8 117–167).

9 **SEC. 617. HELIOPHYSICS RESEARCH.**

10 (a) SENSE OF CONGRESS.—It is the sense of Con-  
11 gress that—

12 (1) NASA heliophysics research advances the  
13 scientific understanding of the Sun, its impact on  
14 the Earth and near-Earth environment, and the  
15 Sun’s interactions with other bodies in the solar sys-  
16 tem, the interplanetary medium, and the interstellar  
17 medium;

18 (2) fundamental science supported by the  
19 Heliophysics division is critical to improving space  
20 weather observations and forecasting capabilities,  
21 which contribute to—

22 (A) fortifying national security and other  
23 critically important space-based and ground-  
24 based assets;

1 (B) improving the resilience of the Na-  
2 tion's energy infrastructure; and

3 (C) protecting human health in space; and

4 (3) the Heliophysics Division should continue to  
5 maximize the scientific return on investment of its  
6 portfolio through maintaining a balanced portfolio  
7 that includes research and analysis, including multi-  
8 disciplinary research initiatives, technology develop-  
9 ment, space-based missions and suborbital flight  
10 projects that include both directed and strategic mis-  
11 sions and principal investigator-led, competitively so-  
12 licited missions, informed by the science priorities  
13 and guidance of the most recent decadal survey in  
14 solar and space physics.

15 (b) PROGRAM MANAGEMENT.—The Administrator  
16 shall seek to—

17 (1) maintain a regular Explorer Announcement  
18 of Opportunity cadence and alternate between small  
19 and mid-sized missions; and

20 (2) enable a regular selection of Missions of Op-  
21 portunity.

22 **SEC. 618. STUDY ON COMMERCIAL SPACE WEATHER DATA.**

23 (a) STUDY.—The Administrator, in consultation with  
24 the Administrator of the National Oceanic and Atmos-  
25 pheric Administration, shall conduct a study of the extent

1 to which commercially-available data could advance space  
2 weather research, including the relevant space weather re-  
3 search priorities of the most recent decadal survey on solar  
4 and space physics.

5 (b) CONTENTS.—The study shall include—

6 (1) an assessment of commercial capabilities  
7 and commercial data that meets or exceeds the  
8 science and technical standards and requirements of  
9 the Administration, which may include—

10 (A) data that is or could be generated by  
11 commercial providers;

12 (B) commercially-available small space-  
13 craft;

14 (C) opportunities for hosted NASA pay-  
15 loads on commercial spacecraft; and

16 (D) commercial solutions for data proc-  
17 essing applicable to space weather science;

18 (2) recommendations and opportunities for the  
19 Federal Government to facilitate the use of commer-  
20 cially available options for space weather data rel-  
21 evant to advancing the Administration’s space  
22 weather research and development activities con-  
23 sistent with the most recent National Academies  
24 decadal survey, without reducing quality of data;  
25 and

1           (3) options, where appropriate, for potential  
2       partnerships or use of NASA prize authority and  
3       competitions, as appropriate and practicable, to ob-  
4       tain access to such data identified in paragraph (1)  
5       that—

6           (A) meets or exceeds the science and tech-  
7       nical standards and requirements of the Admin-  
8       istration; and

9           (B) are not duplicative of activities con-  
10      ducted pursuant to chapter 606 of title 51,  
11      United States Code.

12      (c) REPORT.—Not later than 270 days after the date  
13      of enactment of this Act, the Administrator shall submit  
14      a report to the appropriate committees of Congress con-  
15      taining the results of the study provided under subsection  
16      (a).

17      **SEC. 619. GEOSPACE DYNAMICS CONSTELLATION.**

18      (a) SENSE OF CONGRESS.—It is the sense of Con-  
19      gress that the Geospace Dynamics Constellation mission  
20      could enable scientific discoveries that will transform un-  
21      derstanding of the processes that govern the dynamics of  
22      the Earth’s upper atmospheric envelope that surrounds  
23      and protects the planet.

24      (b) ASSESSMENT.—Not later than 30 days after the  
25      date of the enactment of this Act, the Administrator shall

1 submit to the appropriate committees of Congress a report  
 2 regarding the updated mission approach, schedule, and  
 3 budget profile to launch the Geospace Dynamics Con-  
 4 stellation mission by the end of the decade to fulfill the  
 5 recommendations of the heliophysics decadal survey.

6 **SEC. 620. TECHNOLOGY DEVELOPMENT FOR WILDLAND**  
 7 **FIRE SCIENCE, MANAGEMENT, AND MITIGA-**  
 8 **TION.**

9 (a) IN GENERAL.—The Administrator, acting  
 10 through the Associate Director of the Earth Science Divi-  
 11 sion for Earth Action, shall establish a project for science  
 12 and technology development for wildland fire management  
 13 and mitigation (referred to in this section as  
 14 “FireSense”).

15 (b) PURPOSE.—The purpose of FireSense is to co-  
 16 develop, deploy, and support NASA’s application of ad-  
 17 vanced science, data, and technology capabilities to enable  
 18 measurable improvement in United States wildland fire  
 19 management and mitigation across the fire cycle, includ-  
 20 ing pre-fire, active fire, and post-fire phases.

21 (c) OBJECTIVES.—In establishing FireSense, the Ad-  
 22 ministrator shall seek input from relevant stakeholders  
 23 and shall align FireSense with the goal for NASA’s Earth  
 24 science and applications program set forth in section  
 25 60501 of title 51, United States Code, consider relevant

1 recommendations of the most recent decadal survey on  
2 Earth science and applications from space, and shall, to  
3 the extent practicable, focus on the following objectives:

4           (1) Enhanced predictive modeling and early  
5 warning systems for wildland fire detection and pre-  
6 vention.

7           (2) Developing remote sensing technologies and  
8 data analysis tools to monitor fire-prone areas.

9           (3) Transitioning wildland fire management  
10 technologies to operational users, including agencies,  
11 private sector entities, and academic institutions.

12           (4) Conducting studies on the long-term impact  
13 of temperature change, weather variability, environ-  
14 mental stressors, and atmospheric, hydrologic, eco-  
15 logical, and other changes to Earth systems on  
16 wildland fire behavior, frequency, and intensity.

17           (5) Supporting post-fire recovery and ecosystem  
18 restoration through advanced technologies and data.

19           (6) Providing necessary technical assistance to  
20 operational users to receive, process, and make use  
21 of wildland fire science, data, and technology re-  
22 sources.

23           (7) Any additional objectives as determined nec-  
24 essary by the Administrator to satisfy the purpose  
25 described in subsection (b).

1 (d) INTERAGENCY COORDINATION.—In implementing  
2 FireSense, the Administrator shall, as practicable and ap-  
3 propriate, coordinate with relevant Federal, State, and  
4 local agencies to support wildland fire science, data, and  
5 technology development activities across all phases of the  
6 fire cycle, including prevention, detection, response, and  
7 recovery.

8 (e) OPERATIONAL SUPPORT.—The Administrator  
9 shall, to the extent practicable and in collaboration with  
10 other relevant Federal agencies, continue to provide nec-  
11 essary scientific and technical support to enhance wildland  
12 fire mitigation efforts to operational users, including the  
13 following:

14 (1) Relevant Federal agencies, as determined  
15 appropriate by the Administrator.

16 (2) State, local, and Tribal governments and or-  
17 ganizations.

18 (3) Private sector entities.

19 (4) Academic institutions, including colleges,  
20 universities, and wildland fire research institutions.

21 (f) DATA SHARING AND COLLABORATION.—The Ad-  
22 ministrator shall facilitate the sharing of data, tools, and  
23 research findings with operational users and other rel-  
24 evant stakeholders to ensure effective use of NASA's capa-  
25 bilities in wildland fire management.

1 (g) FIRESENSE PROJECT EVALUATION.—The Ad-  
2 ministrator shall periodically evaluate the effectiveness of  
3 FireSense and make necessary adjustments to improve its  
4 impact on wildland fire management.

5 (h) REPORT.—Not later than one year after the date  
6 of the enactment of this Act and annually thereafter for  
7 five years, the Administrator shall submit to the appro-  
8 priate committees of Congress a report on the activities  
9 and accomplishments of FireSense, including the fol-  
10 lowing:

11 (1) An assessment of interagency coordination  
12 efforts.

13 (2) FireSense’s impact on wildland fire man-  
14 agement efforts.

15 (3) A list of emerging wildland fire manage-  
16 ment technologies and opportunities that may be  
17 considered for further research, development, dem-  
18 onstration, and deployment.

19 (4) An assessment of existing challenges to ef-  
20 fective coordination with operational users, including  
21 State, local, and Tribal governments.

22 **SEC. 621. IMPLEMENTATION OF RECOMMENDATIONS BY**  
23 **THE NATIONAL WILDLAND FIRE MANAGE-**  
24 **MENT AND MITIGATION COMMISSION.**

25 (a) FINDINGS.—Congress finds the following:

1           (1) Wildland fires pose a significant threat to  
2       public safety, property, and natural resources.

3           (2) The National Wildland Fire Management  
4       and Mitigation Commission (in this section referred  
5       to as the “Commission”) has provided critical rec-  
6       ommendations for enhancing wildland fire science,  
7       data, and technology resources.

8           (3) The Administration, through the Science  
9       Mission Directorate, has the capability to support  
10      and enhance wildland fire management through its  
11      advanced research and technological expertise.

12      (b) INCORPORATION OF RECOMMENDATIONS.—The  
13      Administrator, in accordance with the goal for NASA’s  
14      Earth science and applications program set forth in sec-  
15      tion 60501 of title 51, United States Code, and relevant  
16      recommendations of the most recent decadal survey on  
17      Earth science and applications from space, shall incor-  
18      porate the recommendations of the Commission, to the ex-  
19      tent practicable, which may include continuing to carry  
20      out the following:

21           (1) Enhancing the collection, analysis, and dis-  
22      semination of data related to wildland fires, includ-  
23      ing satellite and remote sensing data.

1           (2) Supporting research and development  
2       projects aimed at improving wildland fire prediction,  
3       prevention, response, and recovery.

4           (3) Developing and deploying technologies that  
5       can assist in monitoring, detecting, and mitigating  
6       wildland fires.

7           (4) Conducting studies on the long-term impact  
8       of temperature change, weather variability, environ-  
9       mental stressors, and atmospheric, hydrologic, eco-  
10      logical, and other changes to Earth systems on  
11      wildland fire behavior, frequency, and intensity.

12       (c) INTERAGENCY COORDINATION.—The Adminis-  
13   trator shall continue to coordinate, as practicable, with  
14   other Federal, State, local, and Tribal entities to integrate  
15   the Commission’s recommendations into broader wildland  
16   fire management efforts. Such coordination may include  
17   the following:

18           (1) Facilitating the sharing of wildland fire-re-  
19      lated data and research findings with relevant agen-  
20      cies and stakeholders.

21           (2) Participating in joint initiatives and projects  
22      aimed at enhancing wildland fire management capa-  
23      bilities.

24       (d) EVALUATION.—The Administrator shall conduct  
25   periodic evaluations of NASA’s efforts to incorporate the

1 Commission's recommendations and make adjustments as  
2 necessary to maximize the effectiveness of such rec-  
3 ommendations to support wildland fire mitigation and  
4 management efforts.

5 (e) REPORTING.—Not later than one year after the  
6 date of the enactment of this Act, the Administrator shall  
7 submit to the appropriate committees of Congress a report  
8 detailing the activities undertaken by NASA to implement  
9 the Commission's recommendations, including the fol-  
10 lowing:

11 (1) A summary of research and development  
12 projects initiated or supported.

13 (2) An assessment of the impact of such activi-  
14 ties on wildland fire management and mitigation ef-  
15 forts.

16 (3) Any challenges or obstacles encountered in  
17 implementing such recommendations.

## 18 **TITLE VII—STEM EDUCATION**

### 19 **SEC. 701. NATIONAL SPACE GRANT COLLEGE AND FELLOW-** 20 **SHIP PROGRAM.**

21 (a) AMENDMENTS.—Title 51, United States Code, is  
22 amended—

23 (1) in section 40303, by striking subsections (d)  
24 and (e);

25 (2) in section 40304—

1 (A) by striking subsection (c) and inserting  
2 the following:

3 “(c) SOLICITATIONS.—

4 “(1) IN GENERAL.—Prior to the conclusion of  
5 each preceding award cycle, the Administrator shall  
6 issue a solicitation to space grant consortia for the  
7 award of grants or contracts under this section. The  
8 Administrator shall implement the allocation guid-  
9 ance under subsection (e) during each fiscal year  
10 covered by an award cycle.

11 “(2) PROPOSALS.—A lead institution of a space  
12 grant consortium that seeks a grant or contract  
13 under this section shall submit, on behalf of such  
14 space grant consortium, an application to the Ad-  
15 ministrator at such time and in such manner and  
16 accompanied by such information as the Adminis-  
17 trator may require.

18 “(3) AWARDS.—The Administrator shall award  
19 one or more multi-year grants or contracts, dis-  
20 bursed in annual installments, to the lead institution  
21 of an eligible space grant consortium of—

22 “(A) each of the 50 States of the United  
23 States;

24 “(B) the District of Columbia; and

1 “(C) the Commonwealth of Puerto Rico.”;

2 and

3 (B) by inserting after subsection (d) the

4 following:

5 “(e) ALLOCATION OF FUNDING.—

6 “(1) PROGRAM IMPLEMENTATION.—To carry  
7 out the purposes set forth in section 40301 of this  
8 title, each fiscal year, of the funds appropriated for  
9 this program of that fiscal year, the Administrator  
10 shall allocate not less than 85 percent among eligible  
11 space grant consortia as follows:

12 “(A) The space grant consortia identified  
13 in paragraph 40304(c)(3) shall each receive an  
14 equal share.

15 “(B) The territories of Guam and the U.S.  
16 Virgin Islands shall each receive funds equal to  
17 one-fifth of the share for each space grant con-  
18 sortium.

19 “(2) PROGRAM ADMINISTRATION.—

20 “(A) IN GENERAL.—Each fiscal year, of  
21 the funds made available for the National Space  
22 Grant College and Fellowship Program, the Ad-  
23 ministrator shall allocate not more than 10 per-  
24 cent for the administration of the program.

1           “(B) COSTS COVERED.—The funds allo-  
2           cated under paragraph (1)(A) of this section  
3           shall cover all costs of the Administration asso-  
4           ciated with the administration of the National  
5           Space Grant College and Fellowship Program,  
6           including—

7                   “(i) direct costs to the program, in-  
8                   cluding costs relating to support services  
9                   and civil service salaries and benefits;

10                   “(ii) indirect general and administra-  
11                   tive costs of centers and facilities of the  
12                   Administration; and

13                   “(iii) indirect general and administra-  
14                   tive costs of the Administration head-  
15                   quarters.

16           “(3) SPECIAL OPPORTUNITIES.—Each fiscal  
17           year, of the funds made available for the National  
18           Space Grant College and Fellowship program, the  
19           Administrator shall allocate not more than 5 percent  
20           to lead institutions of Space Grant Consortia for  
21           grants to carry out innovative approaches and pro-  
22           grams to further science and education relating to  
23           the missions of the Administration pursuant to sub-  
24           section (b).”.

1 (b) REVIEW.—The Administrator shall make ar-  
2 rangements for an independent external review of the Na-  
3 tional Space Grant College and Fellowship Program to—

4 (1) evaluate its management, accomplishments,  
5 approach to funding allocation as described in sec-  
6 tion 40303(e) of title 51, United States Code, and  
7 responsiveness to the purposes and goals defined in  
8 chapter 403 of title 51, United States Code;

9 (2) consider the benefits partnerships with local  
10 education agencies, including those in underserved  
11 and rural areas, may provide; and

12 (3) propose any statutory updates that may be  
13 needed to implement recommendations of the review.

14 (c) REPORT.—Not later than nine months after the  
15 date of enactment of this Act, the Administrator shall sub-  
16 mit to the appropriate committees of Congress a report  
17 on the independent external review of the National Space  
18 Grant College and Fellowship Program described in sub-  
19 section (a).

20 **SEC. 702. SKILLED TECHNICAL WORKFORCE EDUCATION**  
21 **OUTREACH.**

22 (a) IN GENERAL.—The Administrator may conduct  
23 or support STEM engagement activities that focus on ex-  
24 panding opportunities for students to pursue skilled tech-  
25 nical workforce occupations in space and aeronautics.

1       (b) LEVERAGING EXISTING PROGRAMS.—The Ad-  
2 ministrator, in conducting activities pursuant to sub-  
3 section (a), shall consider leveraging, as appropriate, exist-  
4 ing programs of NASA or other Federal programs and  
5 interagency initiatives, such as the Manufacturing USA  
6 program under section 34 of the National Institute of  
7 Standards and Technology Act (15 U.S.C. 278s).

8       (c) INCLUSION.—Activities under subsection (a) may  
9 include outreach activities that engage secondary and  
10 post-secondary students, including students at institutions  
11 of higher education, two-year colleges, and high schools,  
12 and students in vocational or career and technical edu-  
13 cation programs, and that—

14           (1) expose students to careers that require ca-  
15 reer and technical education;

16           (2) encourage students to pursue careers that  
17 require career and technical education; and

18           (3) provide students hands-on learning opportu-  
19 nities to view the manufacturing, assembly, and test-  
20 ing of NASA-funded space and aeronautical systems,  
21 as the Administrator considers appropriate and with  
22 consideration of relevant factors such as workplace  
23 safety, mission needs, and the protection of sensitive  
24 and proprietary technologies.

1 (d) BRIEFING.—Not later than one year after the  
 2 date of the enactment of this Act, the Administrator shall  
 3 brief the appropriate committees of Congress on NASA’s  
 4 current and planned activities under this section.

5 (e) DEFINITIONS.—In this section:

6 (1) INSTITUTION OF HIGHER EDUCATION.—The  
 7 term “institution of higher education” has the  
 8 meaning given the term in section 101(a) of the  
 9 Higher Education Act of 1965 (20 U.S.C. 1001(a)).

10 (2) SKILLED TECHNICAL WORKFORCE.—The  
 11 term “skilled technical workforce” has the meaning  
 12 given the term in section 4(b)(3) of the Innovations  
 13 in Mentoring, Training, and Apprenticeships Act (42  
 14 U.S.C. 1862p note; Public Law 115–402).

## 15 **TITLE VIII—POLICY OF NASA**

### 16 **SEC. 801. MAJOR PROGRAMS.**

17 Section 30104 of title 51, United States Code, is  
 18 amended in subsection (a)(1) by striking “7120.5E, dated  
 19 August 14, 2012” and inserting “7120.5F, dated August  
 20 3, 2021”.

### 21 **SEC. 802. NASA ADVISORY COUNCIL.**

22 (a) CONSULTATION AND ADVICE.—Section 20113(g)  
 23 of title 51, United States Code, is amended by adding  
 24 “and Congress” after “advice to the Administration”.

1 (b) SUNSET.—Effective September 30, 2028, section  
2 20113(g) of title 51, United States Code, is amended by  
3 striking “and Congress”.

4 **SEC. 803. NASA ASSESSMENT OF EARLY COST ESTIMATES.**

5 Not later than 12 months after the date of the enact-  
6 ment of this Act, the Comptroller General of the United  
7 States shall submit to the appropriate committees of Con-  
8 gress a review of the development, application, and assess-  
9 ment of early cost estimates made prior to preliminary de-  
10 sign review for NASA missions. The review may include—

11 (1) an assessment of NASA processes related to  
12 the formation and evaluation of proposed and early-  
13 stage cost estimates;

14 (2) an evaluation of NASA’s monitoring and  
15 management of cost estimates throughout mission  
16 development, in accordance with section 10861(b)(4)  
17 of the National Aeronautics and Space Administra-  
18 tion Authorization Act of 2022 (Public Law 117–  
19 167); and

20 (3) any such recommendations as the Comp-  
21 troller General determines appropriate.

22 **SEC. 804. INDEPENDENT COST ESTIMATE.**

23 Section 30307 of title 51, United States Code, is  
24 amended—

1 (1) in the section heading, by striking “**anal-**  
 2 **ysis**” and inserting “**estimate**”; and

3 (2) in subsection (b)—

4 (A) by striking “Before any funds may be  
 5 obligated for implementation” and inserting  
 6 “After the Administrator completes the prelimi-  
 7 nary design review”;

8 (B) by striking “analysis” and inserting  
 9 “estimate”; and

10 (C) by inserting after the first sentence,  
 11 “No funds may be obligated for implementation  
 12 of the project before the Administrator reports  
 13 the results of the life-cycle cost estimate to  
 14 Congress.”.

15 **SEC. 805. AUTHORIZATION FOR THE TRANSFER TO NASA OF**  
 16 **FUNDS FROM OTHER AGENCIES FOR SCI-**  
 17 **ENTIFIC OR ENGINEERING RESEARCH OR**  
 18 **EDUCATION.**

19 (a) IN GENERAL.—Subsection (f) of section 20113  
 20 of title 51, United States Code, is amended—

21 (1) by striking “In the performance of its func-  
 22 tions” and inserting the following:

23 “(1) COOPERATION.—In the performance of its  
 24 functions”; and

1           (2) by adding at the end the following new  
2 paragraph:

3           “(2) FUNDS.—Funds available to any depart-  
4 ment or agency of the Federal Government for sci-  
5 entific or engineering research or education, or the  
6 provision of facilities therefor, shall, subject to the  
7 approval of the head of such department or agency  
8 or as delegated pursuant to such department’s or  
9 agency’s regulation, be available for transfer, in  
10 whole or in part, to the Administration for such use  
11 as is consistent with the purposes for which such  
12 funds were appropriated. Funds so transferred shall  
13 be merged with the appropriation to which trans-  
14 ferred, except that such transferred funds shall be  
15 limited to the awarding of grants or cooperative  
16 agreements for scientific or engineering research or  
17 education.”.

18       (b) ANNUAL INFORMATION ON FUNDS TRANS-  
19 FERRED.—

20           (1) IN GENERAL.—Not later than two years  
21 after the date of the enactment of this section, the  
22 Administrator shall include in the annual budget  
23 justification materials of the Administration, as sub-  
24 mitted to Congress with the President’s budget re-  
25 quest under section 1105 of title 31, United States

1 Code, information describing the activities conducted  
2 under subsection (f) of section 20113 of title 51,  
3 United States Code (as amended by subsection (a)),  
4 during the immediately preceding fiscal year.

5 (2) CONTENTS.—The information referred to in  
6 paragraph (1) shall contain a description of each  
7 transfer of funds under the authority provided for in  
8 paragraph (2) of subsection (f) of section 20113 of  
9 title 51, United States Code (as added and amend-  
10 ed, respectively, by this section), during the imme-  
11 diately preceding fiscal year, including the following:

12 (A) An identification of the department or  
13 agency of the Federal Government from which  
14 such funds were transferred.

15 (B) The total amount of funds so trans-  
16 ferred, disaggregated by each such department  
17 or agency.

18 (C) The purposes for which such funds  
19 were appropriated to each agency or depart-  
20 ment.

21 (D) The program or activity of the Admin-  
22 istration to which such funds were made avail-  
23 able by each such transfer.

24 (E) The purposes of each such administra-  
25 tion program or activity, and the amount of

1 funding appropriated to the Administration for  
2 such purposes.

3 (c) REPORT.—Not later than three years after the  
4 date of the enactment of the section, the Administrator  
5 shall submit to the appropriate committees of Congress  
6 a report that includes the following:

7 (1) A summary of the value of the authority  
8 provided for in paragraph (2) of subsection (f) of  
9 section 209113 of title 51, United States Code (as  
10 added and amended, respectively, by this section),  
11 including the extent to which such authority has  
12 benefited the Administration and its ability to meet  
13 its needs, achieve its mission, or more effectively  
14 conduct interagency collaborations.

15 (2) An identification of any barriers or chal-  
16 lenges to implementing such authority, or otherwise  
17 to managing funding required to conduct joint pro-  
18 grams and award jointly funded grants and coopera-  
19 tive agreements by the administration with other  
20 Federal departments and agencies to advance the  
21 missions of each such department and agency.

1 **SEC. 806. REPORT ON MERITS AND OPTIONS FOR ESTAB-**  
2 **LISHING AN INSTITUTE RELATING TO SPACE**  
3 **RESOURCES.**

4 (a) REPORT.—Not later than 180 days after the date  
5 of the enactment of this Act, the Administrator and Sec-  
6 retary shall jointly submit to the appropriate committees  
7 of Congress a report on the merits of, and options for,  
8 establishing an institute relating to space resources to ad-  
9 vance the objectives of NASA and the Department in  
10 maintaining United States preeminence in space. Such ob-  
11 jectives shall include the following:

12 (1) Identifying, developing, and distributing  
13 space resources, including by encouraging the devel-  
14 opment of foundational science, industrial capability,  
15 and technology.

16 (2) Reducing the technological and business  
17 risks associated with identifying, developing, and dis-  
18 tributing space resources.

19 (3) Research to maximize the responsible use of  
20 space resources.

21 (4) Developing options for using space re-  
22 sources to carry out the following.

23 (A) Support current and future space ar-  
24 chitectures, programs, business, and missions.

1 (B) Enable such architectures, programs,  
2 business, and missions that would not otherwise  
3 be possible.

4 (C) Supplement the supply of such re-  
5 sources available on Earth.

6 (b) ADDITIONAL MATTERS.—The report required  
7 under subsection (a) shall also include the following as-  
8 sessments of the Administrator and the Secretary:

9 (1) Whether a virtual or physical institute relat-  
10 ing to space resources is most cost effective and ap-  
11 propriate.

12 (2) Whether partnering with institutions of  
13 higher education and the aerospace industry, and  
14 the extractive industry as appropriate, would be ef-  
15 fective in increasing information available to the in-  
16 stitute with respect to advancing the objectives de-  
17 scribed in such subsection.

18 (c) DEFINITIONS.—In this section:

19 (1) DEPARTMENT.—The term “Department”  
20 means the Department of Commerce.

21 (2) EXTRACTIVE INDUSTRY.—The term “ex-  
22 tractive industry” means companies and individuals  
23 involved in the processes of extracting, including  
24 mining, quarrying, drilling, and dredging, raw, nat-  
25 ural materials or energy sources.

1           (3) INSTITUTION OF HIGHER EDUCATION.—The  
2       term “institution of higher education” has the  
3       meaning given such term in section 101(a) of the  
4       Higher Education Act of 1965 (20 U.S.C. 1001(a)).

5           (4) SECRETARY.—The term “Secretary” means  
6       the Secretary of Commerce.

7           (5) SPACE RESOURCE.—

8           (A) IN GENERAL.—The term “space re-  
9       source” means an abiotic resource in situ in  
10      outer space.

11          (B) INCLUSIONS.—The term “space re-  
12      source” includes a raw, natural material or en-  
13      ergy source.

14   **SEC. 807. REPORTS TO CONGRESS.**

15          (a) CONGRESSIONAL REPORTS AND NOTICES.—Any  
16      report or notice provided to Congress by NASA shall be  
17      provided to the appropriate committees of Congress, con-  
18      currently with its delivery to any other Committee or of-  
19      fice.

20          (b) REPORTS ON INTERNATIONAL AGREEMENTS.—If  
21      the United States becomes a signatory to an international  
22      agreement or nonbinding instrument concerning NASA  
23      activities, the Administrator shall submit to the appro-  
24      priate committees of Congress a report containing a copy  
25      of such agreement or instrument, as the case may be.

1 **SEC. 808. CONTRACT FLEXIBILITY.**

2 Congress finds that NASA FAR Supplement (NFS)  
3 1852.242–72, Denied Access to NASA Facilities instructs  
4 that for the period that NASA facilities were not acces-  
5 sible to contractor employees, the contracting officer may  
6 adjust the contract performance or delivery schedule, fore-  
7 go the work, reschedule the work, or consider requests for  
8 equitable adjustment to the contract.

9 **SEC. 809. GAO REPORT.**

10 Not later than one year after the date of the enact-  
11 ment of this Act, the Comptroller General of the United  
12 States shall submit to the appropriate committees of Con-  
13 gress a review of fire and emergency services at NASA  
14 launch and reentry facilities that assesses the following:

15 (1) Current capabilities and projected demands  
16 for NASA-provided fire and emergency services.

17 (2) How demand for NASA-provided fire and  
18 emergency services have been impacted by the fol-  
19 lowing:

20 (A) An increased rate of launch and re-  
21 entry operations.

22 (B) An increased number of leases with  
23 commercial launch and reentry service providers  
24 for use of NASA property.

1           (3) Current fire and emergency services pro-  
2       vided by commercial providers to support launch and  
3       reentry operations that are conducted—

4           (A) to fulfill a contractual obligation with  
5       NASA; or

6           (B) for non-NASA purposes using NASA-  
7       leased property.

8           (4) Whether NASA-provided and commercially-  
9       provided fire and emergency services are able to  
10      meet current and projected demands and support all  
11      fire response areas on NASA property.

12 **SEC. 810. NASA PUBLIC-PRIVATE TALENT PROGRAM.**

13      Section 20113 of title 51, United States Code, is  
14      amended by adding at the end the following new sub-  
15      section:

16      “(o) PUBLIC-PRIVATE TALENT PROGRAM.—

17           “(1) ASSIGNMENT AUTHORITY.—Under policies  
18      and procedures prescribed by the Administration,  
19      the Administrator may, with the agreement of a pri-  
20      vate sector entity and the consent of an employee of  
21      the Administration or of such entity, arrange for the  
22      temporary assignment of such employee of the Ad-  
23      ministration to such private sector entity, or of such  
24      employee of such entity to the Administration, as  
25      the case may be.

1 “(2) AGREEMENTS.—

2 “(A) IN GENERAL.—The Administrator  
3 shall provide for a written agreement among  
4 the Administration, the private sector entity,  
5 and the employee concerned regarding the  
6 terms and conditions of the employee’s assign-  
7 ment under this subsection. The agreement  
8 shall—

9 “(i) require that the employee of the  
10 Administration, upon completion of the as-  
11 signment, will serve in the Administration,  
12 or elsewhere in the civil service if approved  
13 by the Administrator, for a period equal to  
14 twice the length of the assignment;

15 “(ii) provide that if the employee of  
16 the Administration or of the private sector  
17 entity (as the case may be) fails to carry  
18 out the agreement, such employee shall be  
19 liable to the United States for payment of  
20 all expenses of the assignment, unless such  
21 failure was for good and sufficient reason,  
22 as determined by the Administrator; and

23 “(iii) contain language ensuring that  
24 such employee of the Administration or of  
25 the private sector entity (as the case may

1           be) does not improperly use predecisional  
2           or draft deliberative information that such  
3           employee may be privy to or aware of re-  
4           lated to Administration programing, budg-  
5           eting, resourcing, acquisition, or procure-  
6           ment for the benefit or advantage of the  
7           private sector entity.

8           “(B) TREATMENT.—An amount for which  
9           an employee is liable under subparagraph (A)  
10          shall be treated as a debt due the United  
11          States.

12          “(C) WAIVER.—The Administrator may  
13          waive, in whole or in part, collection of a debt  
14          described in subparagraph (B) based on a de-  
15          termination that the collection would be against  
16          equity and good conscience and not in the best  
17          interests of the United States, after taking into  
18          account any indication of fraud, misrepresenta-  
19          tion, fault, or lack of good faith on the part of  
20          the employee concerned.

21          “(3) TERMINATION.—An assignment under this  
22          section may, at any time and for any reason, be ter-  
23          minated by the Administration or the private-sector  
24          entity concerned, as the case may be.

25          “(4) DURATION.—

1           “(A) IN GENERAL.—An assignment under  
2           this subsection shall be for a period of not less  
3           than three months and not more than two  
4           years, renewable up to a total of three years.  
5           An employee of the Administration may not be  
6           assigned under this subsection for more than a  
7           total of three years inclusive of all such assign-  
8           ments.

9           “(B) EXTENSION.—An assignment under  
10          this subsection may be for a period in excess of  
11          two years, but not more than three years, if the  
12          Administrator determines that such assignment  
13          is necessary to meet critical mission or program  
14          requirements.

15          “(5) POLICIES AND PROCEDURES.—

16                 “(A) IN GENERAL.—The Administrator  
17                 shall establish policies and procedures relating  
18                 to assignments under this subsection.

19                 “(B) ELEMENTS.—Policies and procedures  
20                 established pursuant to subparagraph (A) shall  
21                 address the following:

22                         “(i) The nature and elements of writ-  
23                         ten agreements with participants in assign-  
24                         ments under this subsection.

1 “(ii) Criteria for making such assign-  
2 ments, including the needs of the Adminis-  
3 tration relating thereto.

4 “(iii) How the Administration will  
5 oversee such assignments, in particular  
6 with respect to paragraphs (2)(A)(iii),  
7 (7)(C), and (7)(D).

8 “(iv) Criteria for issuing waivers.

9 “(v) How expenses under paragraph  
10 (2)(A)(ii) would be determined.

11 “(vi) Guidance for participants in  
12 such assignments.

13 “(vii) Mission Directorate, Office, and  
14 organizational structure to implement and  
15 manage such assignments.

16 “(viii) Any other necessary policies,  
17 procedures, or guidelines to ensure such  
18 assignments comply with all relevant statu-  
19 tory authorities and ethics rules, and effec-  
20 tively contribute to one or more of the Ad-  
21 ministration’s missions.

22 “(C) INHERENTLY GOVERNMENTAL AC-  
23 TIVITIES.—Assignments made under this sub-  
24 section shall not have responsibilities or per-  
25 form duties or decision making regarding Ad-

1           ministration activities that are inherently gov-  
2           ernmental, pursuant to subpart 7.500 of title  
3           48, Code of Federal Regulations, and Office of  
4           Management and Budget review.

5           “(6) STATUS OF FEDERAL EMPLOYEES AS-  
6           SIGNED TO PRIVATE SECTOR ENTITIES.—

7                   “(A) IN GENERAL.—An employee of the  
8           Administration who is assigned to a private sec-  
9           tor entity under this subsection shall be consid-  
10          ered, during the period of such assignment, to  
11          be on detail to a regular work assignment in  
12          the Administration for all purposes. The written  
13          agreement established under paragraph (2)(A)  
14          shall address the specific terms and conditions  
15          related to such employee’s continued status as  
16          a Federal employee.

17                   “(B) CERTIFICATION.—In establishing a  
18          temporary assignment of an employee of the  
19          Administration to a private sector entity, the  
20          Administrator or Administrator’s designee shall  
21          certify that such temporary assignment shall  
22          not have an adverse or negative impact on the  
23          mission of the Administration or organizational  
24          capabilities associated with such assignment.

1           “(7) TERMS AND CONDITIONS FOR PRIVATE  
2       SECTOR EMPLOYEES.—An employee of a private sec-  
3       tor entity who is assigned to the Administration  
4       under this subsection—

5           “(A) shall continue to receive pay and ben-  
6       efits from the private sector entity from which  
7       such employee is assigned and shall not receive  
8       pay or benefits from the Administration, except  
9       as provided in subparagraph (B);

10          “(B) is deemed to be an employee of the  
11       Administration for the purposes of—

12           “(i) chapters 73 and 81 of title 5;

13           “(ii) sections 201, 203, 205, 207,  
14       208, 209, 603, 606, 607, 643, 654, 1905,  
15       and 1913 of title 18, except that such sec-  
16       tion 209 does not apply to any salary, or  
17       contribution or supplementation of salary  
18       made pursuant to subparagraph (A) of this  
19       paragraph;

20           “(iii) sections 1343, 1344, and  
21       1349(b) of title 31;

22           “(iv) the Federal Tort Claims Act and  
23       any other Federal tort liability statute;

24           “(v) the Ethics in Government Act of  
25       1978; and

1 “(vi) chapter 21 of title 41;

2 “(C) shall not have access to any trade se-  
3 crets or any other nonpublic information which  
4 is of commercial value to the private sector en-  
5 tity from which such employee is assigned;

6 “(D) may not perform work that is consid-  
7 ered inherently governmental in nature, in ac-  
8 cordance with paragraph (5)(C); and

9 “(E) may not be used to circumvent—

10 “(i) section 1710 of title 41, United  
11 States Code; or

12 “(ii) any limitation or restriction on  
13 the size of the Administration’s civil serv-  
14 ant workforce.

15 “(8) ADDITIONAL REQUIREMENTS.—The Ad-  
16 ministrator shall ensure that—

17 “(A) the normal duties and functions of an  
18 employee of the Administration who is assigned  
19 to a private sector entity under this subsection  
20 can be reasonably performed by other employ-  
21 ees of the Administration without the perma-  
22 nent transfer or reassignment of other per-  
23 sonnel of the Administration;

24 “(B) normal duties and functions of such  
25 other employees of the Administration are not,

1 as a result of and during the course of such  
2 temporary assignment, performed or augmented  
3 by contractor personnel in violation of section  
4 1710 of title 41; and

5 “(C) not more than two percent of the Ad-  
6 ministration’s civil servant workforce may par-  
7 ticipate in an assignment under this subsection  
8 at the same time.

9 “(9) CONFLICTS OF INTEREST.—The Adminis-  
10 trator shall implement a system to identify, mitigate,  
11 and manage any conflicts of interests that may arise  
12 as a result of an employee’s assignment under this  
13 subsection.

14 “(10) PROHIBITION AGAINST CHARGING CER-  
15 TAIN COSTS TO THE FEDERAL GOVERNMENT.—A  
16 private-sector entity may not charge the Administra-  
17 tion or any other agency of the Federal Government,  
18 as direct or indirect costs under a Federal contract,  
19 the costs of pay or benefits paid by the entity to an  
20 employee assigned to the Administration under this  
21 subsection for the period of the assignment con-  
22 cerned.

23 “(11) CONSIDERATIONS.—In carrying out this  
24 subsection, the Administrator shall take into consid-  
25 eration—

1           “(A) the question of how assignments  
2           under this subsection might best be used to  
3           help meet the needs of the Administration with  
4           respect to the training of employees; and

5           “(B) where applicable, areas of particular  
6           private sector expertise, such as cybersecurity.

7           “(12) NASA REPORTING.—

8           “(A) IN GENERAL.—Not later than April  
9           30 of each year, the Administrator shall submit  
10          to the Committee on Science, Space, and Tech-  
11          nology of the House of Representatives and the  
12          Committee on Commerce, Science, and Trans-  
13          portation of the Senate a report summarizing  
14          the implementation of this subsection.

15          “(B) CONTENTS.—Each report under sub-  
16          paragraph (A) shall include, with respect to the  
17          annual period to which such report relates, the  
18          following:

19                 “(i) Information relating to the total  
20                 number of employees of private sector enti-  
21                 ties assigned to the Administration, and  
22                 the total number of employees of the Ad-  
23                 ministration assigned to private sector en-  
24                 tities.

1           “(ii) A brief description and assess-  
2           ment of the talent management benefits  
3           evidenced from such assignments, as well  
4           as any identified strategic human capital  
5           and operational challenges, including the  
6           following:

7                   “(I) An identification of the  
8                   names of the private sector entities to  
9                   and from which employees were as-  
10                  signed.

11                  “(II) A complete listing of posi-  
12                  tions such employees were assigned to  
13                  and from.

14                  “(III) An identification of as-  
15                  signed roles and objectives of such as-  
16                  signments.

17                  “(IV) Information relating to the  
18                  durations of such assignments.

19                  “(V) Information relating to as-  
20                  sociated pay grades and levels.

21           “(iii) An assessment of impacts of  
22           such assignments on the Administration  
23           workforce and workforce culture.

24           “(iv) An identification of the number  
25           of Administration staff and budgetary re-

1 sources required to implement this sub-  
2 section.

3 “(13) FEDERAL ETHICS.—Nothing in this sub-  
4 section shall affect existing Federal ethics rules ap-  
5 plicable to Federal personnel.

6 “(14) GAO REPORTING.—

7 “(A) IN GENERAL.—Not later than three  
8 years after the date of the enactment of this  
9 subsection, the Comptroller General of the  
10 United States shall submit to the Committee on  
11 Science, Space, and Technology of the House of  
12 Representatives and the Committee on Com-  
13 merce, Science, and Transportation of the Sen-  
14 ate a report summarizing the implementation of  
15 this subsection.

16 “(B) CONTENTS.—The report under sub-  
17 paragraph (A) shall include the following:

18 “(i) A review of the implementation of  
19 this subsection, according to law and the  
20 Administration policies and procedures es-  
21 tablished for assignments under this sub-  
22 section.

23 “(ii) Information relating to the ex-  
24 tent to which such assignments adhere to

1 best practices relating to public-private tal-  
2 ent exchange programs.

3 “(iii) A determination as to whether  
4 there should be limitations on the number  
5 of individuals participating in such assign-  
6 ments.

7 “(iv) Information relating to the ex-  
8 tent to which the Administration complies  
9 with statutory requirements and ethics  
10 rules, and appropriately handles potential  
11 conflicts of interest and access to non-  
12 public information with respect to such as-  
13 signments.

14 “(v) Information relating to the extent  
15 to which such assignments effectively con-  
16 tribute to one or more of the Administra-  
17 tion’s missions.

18 “(vi) Information relating to Adminis-  
19 tration resources, including employee time,  
20 dedicated to administering such assign-  
21 ments, and whether such resources are suf-  
22 ficient for such administration.”.

23 **SEC. 811. REPORT ON SPACE ACT AGREEMENTS.**

24 (a) IN GENERAL.—Not later than 180 days after the  
25 date of the enactment of this Act, the Comptroller General

1 of the United States shall submit to the appropriate com-  
2 mittees of Congress a report describing the following:

3 (1) Intellectual property considerations in Space  
4 Act agreements.

5 (2) Feedback shared by industry groups regard-  
6 ing intellectual property considerations in Space Act  
7 agreements.

8 (3) Differences between NASA policies regard-  
9 ing intellectual property in Space Act agreements  
10 and policies utilized in similar situations by other  
11 Federal agencies.

12 (b) DEFINITION.—In this section, the term “Space  
13 Act agreements” means agreements entered into by NASA  
14 pursuant to its authorities under the National Aeronautics  
15 and Space Act of 1958 (Public Law 85–568).

16 **SEC. 812. MENTORING.**

17 (a) IN GENERAL.—The Administrator shall establish  
18 a comprehensive NASA-wide mentoring program for early-  
19 career, mid-level, and senior-level employees at all NASA  
20 Centers and NASA Headquarters to ensure a robust pipe-  
21 line for NASA’s civil servant workforce and support the  
22 preparation of employees, including those from popu-  
23 lations that are historically underrepresented in STEM,  
24 for promotion and leadership roles.

1 (b) BRIEFING.—Not later than 180 days after the  
2 date of the enactment of this Act, the Administrator shall  
3 brief the appropriate committees of Congress on the imple-  
4 mentation of subsection (a).

5 **SEC. 813. RESTRICTION ON FEDERAL FUNDS RELATING TO**  
6 **CERTAIN SPACE AND SCIENTIFIC ACTIVITIES**  
7 **OF THE PEOPLE’S REPUBLIC OF CHINA.**

8 (a) IN GENERAL.—No Federal funds authorized in  
9 this Act may be obligated or expended for the following:

10 (1) For the National Aeronautics and Space  
11 Administration (NASA), the Office of Science and  
12 Technology Policy (OSTP), or the National Space  
13 Council (NSC) to develop, design, plan, promulgate,  
14 implement, or execute a bilateral policy, program,  
15 order, or contract of any kind to participate, collabo-  
16 rate, or coordinate bilaterally in any way with the  
17 People’s Republic of China or any company owned  
18 by the People’s Republic of China, or incorporated  
19 under the laws of the People’s Republic of China,  
20 unless such activities are specifically authorized by a  
21 law enacted after the date of the enactment of this  
22 Act.

23 (2) To effectuate the hosting of official visitors  
24 from the People’s Republic of China at facilities be-  
25 longing to or utilized by NASA.

1 (b) EXCEPTION.—The restrictions described in sub-  
2 section (a) shall not apply to activities with respect to  
3 which NASA, OSTP, or NSC, after consultation with the  
4 Federal Bureau of Investigation, have certified—

5 (1) pose no risk of resulting in the transfer of  
6 technology, data, or other information with national  
7 security or economic security implications to the  
8 People’s Republic of China or a company owned by  
9 the People’s Republic of China or incorporated  
10 under the laws of the People’s Republic of China;  
11 and

12 (2) will not involve knowing interactions with  
13 officials who have been determined by the United  
14 States to have direct involvement with violations of  
15 human rights.

16 (c) SUBMISSION.—Any certification made under sub-  
17 section (b) shall be submitted to the Committee on  
18 Science, Space, and Technology and the Committee on Ap-  
19 propriations of the House of Representatives, the Com-  
20 mittee on Commerce, Science, and Transportation and the  
21 Committee on Appropriations of the Senate, and the Fed-  
22 eral Bureau of Investigation, not later than 30 days prior  
23 to the activity in question. Any such certification shall in-  
24 clude a description of the purpose of such activity, its

1 agenda, its major participants, and its location and tim-  
2 ing.

3 **SEC. 814. RULE OF CONSTRUCTION.**

4       Nothing in this Act may be construed to limit the  
5 ability of a NASA employee to discuss scientific research  
6 performed by such employee in accordance with NASA's  
7 scientific integrity policies.

○
