

119TH CONGRESS  
1ST SESSION

# H. RES. 371

Expressing support for the designation of May 2025 as “National Brain Tumor Awareness Month”.

---

## IN THE HOUSE OF REPRESENTATIVES

MAY 1, 2025

Mr. McCAUL (for himself and Mr. QUIGLEY) submitted the following resolution; which was referred to the Committee on Energy and Commerce

---

## RESOLUTION

Expressing support for the designation of May 2025 as  
“National Brain Tumor Awareness Month”.

Whereas it is estimated that more than 93,000 Americans will be diagnosed with a primary brain tumor in 2025, including 5,000 children, and an estimated 90,000 individuals in the United States were diagnosed with a primary brain tumor in 2024;

Whereas it is estimated that more than 1,000,000 Americans are living with a brain tumor in the United States;

Whereas, in the United States, brain tumors are the—

(1) leading cause of death from cancer in children who are under 14 years of age and teens who are under 19 years of age; and

(2) second-leading cause of death from cancer in young adults who are between 15 and 39 years of age;

Whereas the average 5-year survival rate for an individual in the United States following the diagnosis of a primary malignant brain tumor is only 35.7 percent;

Whereas it is estimated that 18,330 individuals in the United States will die as a result of a malignant brain tumor in 2025;

Whereas brain tumors may be malignant or benign but can be life-threatening in either case;

Whereas treatment of brain tumors is complicated by the fact that more than 100 types of brain tumors exist;

Whereas the treatment and removal of brain tumors present significant challenges due to the uniquely complex and fragile nature of the brain;

Whereas brain tumors affect the primary organ in the human body that controls not only cognitive ability but the actions of every other organ and limb in the body, leading to brain tumors being described as a disease that affects the whole individual;

Whereas brain tumor research is supported by several private, nonprofit research foundations and by Federal medical research institutions;

Whereas basic research may fuel advancements and the development of new treatments for brain tumors;

Whereas obstacles to the development of new treatments for brain tumors remain, and there are limited strategies for the screening or early detection of brain tumors;

Whereas, despite the high number of individuals diagnosed with a brain tumor every year and the devastating prognosis for those individuals, only a few treatments have been approved for malignant brain tumors since the

1980s, and none of these extend survival more than 2 years on average or are considered to be curative;

Whereas the mortality rates associated with brain tumors have changed little during the 30 years preceding the date of introduction of this resolution;

Whereas there is a need for greater public awareness of brain tumors, including the difficulties associated with research on brain tumors and the opportunities for advances in brain tumor research and treatment; and

Whereas May 2025, during which brain tumor advocates nationwide unite in awareness, outreach, and advocacy activities, is an appropriate month to recognize as “National Brain Tumor Awareness Month”: Now, therefore, be it

1       *Resolved*, That the House of Representatives—

2               (1) expresses support for the designation of  
3       “National Brain Tumor Awareness Month”;

4               (2) encourages increased public awareness of  
5       brain tumors to honor the individuals who have lost  
6       their lives to a brain tumor or currently live with a  
7       brain tumor diagnosis;

8               (3) supports efforts to develop better treat-  
9       ments for brain tumors that will improve the quality  
10      of life and the long-term prognosis of individuals di-  
11      agnosed with a brain tumor;

12              (4) expresses its support for individuals who are  
13      battling brain tumors, as well as the families,  
14      friends, and caregivers of those individuals; and

1           (5) urges a collaborative approach to brain  
2 tumor research, which is a promising means of ad-  
3 vancing understanding of, and treatment for, brain  
4 tumors.
