

119TH CONGRESS
1ST SESSION

H. RES. 513

Supporting the designation of the second Friday of June as “National Service and Conservation Corps Day”.

IN THE HOUSE OF REPRESENTATIVES

JUNE 12, 2025

Ms. HOULAHAN (for herself, Ms. MATSUI, Mr. BACON, and Mr. FITZPATRICK) submitted the following resolution; which was referred to the Committee on Education and Workforce

RESOLUTION

Supporting the designation of the second Friday of June as “National Service and Conservation Corps Day”.

Whereas there exists a network of National Service Programs (in this resolution referred to as “Service and Conservation Corps”) that receive funding pursuant to subtitle C of the National and Community Service Act (42 U.S.C. 12571 et seq.);

Whereas such network includes more than 150 Service and Conservation Corps across the country;

Whereas these Service and Conservation Corps annually provide education, workforce development, and support services to nearly 23,000 young adults and post-9/11 veterans;

Whereas today’s Service and Conservation Corps are locally based organizations that engage young adults (generally ages 16 to 25) and veterans (up to age 35) in service projects that address recreation, disaster response, conservation, and community needs;

Whereas these Service and Conservation Corps are direct descendants of the Civilian Conservation Corps, a Great Depression-era Federal work relief program that mobilized 3,000,000 young men to dramatically improve the Nation’s public lands;

Whereas Civilian Conservation Corps participants received food, shelter, education, and a \$30-a-month stipend;

Whereas, from 1933 to 1942, the Civilian Conservation Corps planted 3,000,000,000 trees and helped build trails, roads, campgrounds, and other park infrastructure still in use today;

Whereas April 5, 2023, was the 90th anniversary of President Franklin D. Roosevelt establishing the Civilian Conservation Corps with a Presidential Executive order;

Whereas most modern Service and Conservation Corps are nonprofits or are operated by units of State or local government;

Whereas, through public-private partnerships, Service and Conservation Corps work with a range of organizations, government agencies, and institutions to engage Corpsmembers in meaningful projects that address local and national issues;

Whereas, through a term of service that could last from a few months to a year, Corpsmembers experience the “Corps Model”, where they gain work experience and develop in-demand skills;

Whereas Corpsmembers are compensated with a stipend or living allowance and often receive an education award or scholarship upon completing their service;

Whereas, additionally, Corps provide participants with educational programming, mentoring, and access to career and personal counseling, and some Corps operate or partner with charter schools to help participants earn their high school diploma or GED;

Whereas Corpsmembers complete thousands of community improvement, resilience, and resource conservation projects every year;

Whereas Corpsmembers typically serve on crews alongside other young adults, or in “individual placement” or internship positions that provide additional capacity to Federal, State, and local resource management agencies;

Whereas Service and Conservation Corps have longstanding partnerships with Federal, State, and local community development and resource management agencies to engage Corpsmembers in meaningful and necessary projects across the country;

Whereas Service and Conservation Corps projects include—

- (1) the enhancement of neighborhoods and community public spaces, including public parks;
- (2) the preservation and protection of public lands, shorelines, waterways, habitat, and wildlife;
- (3) the preservation of historic structures;
- (4) providing access to and the enhancement of recreation on public lands and waters;
- (5) enhancing resilience to natural disasters; and
- (6) mitigation, response to, and recovery from natural disasters, including hurricanes and wildfire;

Whereas, during this past year, Corpsmembers who were personally impacted by the devastation caused by Hurricanes Helene and Milton as well the California wildfires, responded to these events in their own communities, and Corpsmembers located across the country traveled to these locations to help their fellow citizens in their time of need;

Whereas the United States urgently needs to respond to decades of deferred maintenance on public lands and waters, restore critical ecosystems, and make its communities more resilient;

Whereas the United States also has millions of young people facing unemployment and barriers to opportunity; and

Whereas the existing network of more than 150 Service and Conservation Corps are ready to meet the needs of these young Americans: Now, therefore, be it

1 *Resolved*, That the House of Representatives—

2 (1) supports the designation of a “National
3 Service and Conservation Corps Day”;

4 (2) congratulates the existing network of more
5 than 150 Service and Conservation Corps on their
6 contributions to the United States;

7 (3) urges the citizens of the United States to
8 recognize the importance of national service; and

9 (4) supports the continuation and expansion of
10 the national network of Service and Conservation

- 1 Corps under the National and Community Service
- 2 Act (42 U.S.C. 12501 et seq.).
