1 **SEC. 2. FINDINGS.**

2 Congress finds that—

3 (1) many areas of undeveloped National Forest
4 System land, National Park System land, and public
5 land administered by the Bureau of Land Manage-
6 ment in the States of Idaho, Montana, Oregon,
7 Washington, and Wyoming (referred to in this sec-
8 tion as “public land”)—

9 (A) possess outstanding natural character-
10 istics that give the areas value as wildernesses,
11 parks, or wild and scenic rivers; and

12 (B) if properly preserved, will be an endur-
13 ing resource as wildernesses and wildland areas
14 and of biodiversity for the benefit of the people
15 of the United States;

16 (2) the Northern Rockies Bioregion—

17 (A) contains the most diverse array of
18 wildland that remains in the United States
19 south of Canada;

20 (B) provides a sanctuary for species listed
21 as threatened or endangered under the Endan-

1 gered Species Act of 1973 (16 U.S.C. 1531 et
2 seq.);

3 (C) is national interest public land that is
4 among the most popular wildland in the United
5 States; and

6 (D) embraces greater ecosystems and na-
7 tional treasures such as the Greater Yellow-
8 stone, Greater Glacier/Northern Continental Di-
9 vide, Greater Hells Canyon/Wallowa, Greater
10 Salmon/Selway, and Greater Cabinet-Yaak-Sel-
11 kirk ecosystems;

12 (3) the natural ecosystems in the Northern
13 Rockies Bioregion are largely dependent on—

14 (A) public land; and

15 (B) the ecological productivity and diver-
16 sity of resources on public land;

17 (4) conservation of roadless areas on public
18 land—

19 (A) produces clean water;

20 (B) protects native fisheries and native
21 flora and fauna;

22 (C) provides scenic and recreational quali-
23 ties; and

1 (D) preserves options for sustainable eco-
 2 nomics through activities such as hunting, fish-
 3 ing, and wilderness-based recreation;

4 (5) the headwaters of several major river sys-
 5 tems, including the Columbia, Snake, Green, Mis-
 6 souri, and Saskatchewan Rivers, are in the Northern
 7 Rockies Bioregion and the water of those rivers—

8 (A) flows to 3 oceans;

9 (B) is of economic importance to farming
 10 and ranching operations, municipal water sup-
 11 plies, and water-based recreation, including
 12 fishing and boating; and

13 (C) if protected, will enhance the uses de-
 14 scribed in subparagraph (B), reduce costs for
 15 water treatment and irrigation, and increase
 16 native fish populations;

17 (6) the wildlife treasures of the Northern Rock-
 18 ies Bioregion are of international significance and
 19 contain intact, large mammalian fauna and rare and
 20 unique plant life;

21 (7) wildlife habitat fragmentation due to road
 22 building, timber harvesting, mining, oil and gas ex-
 23 ploration, lack of interagency cooperation, and other
 24 activities has severe effects on—

1 (A) the wildlife populations of the North-
2 ern Rockies Bioregion (including populations of
3 species listed as threatened or endangered
4 under the Endangered Species Act of 1973 (16
5 U.S.C. 1531 et seq.)) and the habitats of the
6 wildlife; and

7 (B) the water quality, ancient forests, and
8 greater ecosystems of the Northern Rockies
9 Bioregion;

10 (8) the overemphasis on resource extraction
11 from public land has—

12 (A) compromised ecosystem integrity and
13 detracted from economic diversification oppor-
14 tunities; and

15 (B) resulted in economic instability and
16 high unemployment in rural, resource-depend-
17 ent communities;

18 (9) the fragmentation and development of the
19 remaining roadless and essentially roadless eco-
20 systems and biological connectors of the Northern
21 Rockies Bioregion would cause a loss to the United
22 States of—

23 (A) an entire wildland region; and

24 (B) the only remaining area in the United
25 States south of Canada that can support popu-

1 lations of gray wolves, grizzly bears, anad-
2 romous fish, and other rare or endangered
3 plant or animal life in 1 intact bioregion;

4 (10) since the completion of the 1936 roadless
5 area inventory by Bob Marshall, millions of acres of
6 roadless wildland have been developed in the North-
7 ern Rockies Bioregion;

8 (11) extensive fragmentation of wildland and
9 wildlife habitat has—

10 (A) resulted in the listing of several species
11 as threatened or endangered under the Endan-
12 gered Species Act of 1973 (16 U.S.C. 1531 et
13 seq.); and

14 (B) reduced the number and range of
15 other species, including anadromous fish;

16 (12) the natural ecosystems of the Northern
17 Rockies Bioregion serve as educational and research
18 centers for onsite studies in biology, geology, astron-
19 omy, and other sciences;

20 (13) the pristine nature of public land helps
21 local communities attract new residents and busi-
22 nesses based on local quality of life;

23 (14) a review of the situation in the Northern
24 Rockies Bioregion as of the date of enactment of
25 this Act has revealed the urgent need for an ecologi-

cal reserve system for the Northern Rockies Bio-
region that includes core ecosystem reserve areas
and biological connecting corridors necessary—

(A) to ensure wildlife movements and ge-
netic interchange between the core reserve
areas; and

(B) to act as carbon reserves in a warming
world;

(15) wildlife freedom of movement is essential
to the survival of wildlife species, and a number of
scientific studies have identified movement corridors
as necessary for wildlife conservation in a changing
climate;

(16) several foreign governments, including the
governments of Australia and Scotland, have an-
nounced plans for corridors that would make wildlife
movement possible as climate pressures increase;

(17) the concept of connective corridors for
wildlife movement—

(A) has been endorsed by the Governors of
States in the western United States; and

(B) is recognized by conservation and sci-
entific organizations, such as the National
Academy of Sciences, which, in 2008, described

1 freedom of movement for wildlife as basic to the
2 emerging new science of movement ecology;

3 (18) freedom of wildlife movement—

4 (A) was a fundamental reason for the de-
5 velopment and introduction of this Act; and

6 (B) has become an increasingly high-pro-
7 file issue in the climate and biological sciences;

8 (19) the economic value to the United States of
9 most of the public land, left in its natural state, ex-
10 ceeds any potential return to the Treasury of the
11 United States from timber harvest and development;

12 (20) if Federal land management in the North-
13 ern Rockies Bioregion continues to result in develop-
14 ment in roadless areas, the Federal Government will
15 be using tax revenues to fund permanent reductions
16 in wilderness, water quality, fish and wildlife habi-
17 tat, species, and biological diversity;

18 (21) this Act—

19 (A) provides opportunities for employment
20 in outdoor trades by establishing rehabilitation
21 zones on specific tracts of damaged Federal
22 land where active restoration work will occur;

23 (B) will provide contracts for local busi-
24 nesses; and

1 (C) will renew the intrinsic economic, so-
2 cial, and cultural benefits that result from pro-
3 ductive land;

4 (22) Federal land rehabilitation projects—

5 (A) have direct benefits to local economies;
6 and

7 (B) reduce the loss to taxpayers in the
8 United States caused by below-cost timber sales
9 and other subsidized resource extraction;

10 (23) a congressional review of roadless areas
11 within public land identifies—

12 (A) areas that, on the basis of the land
13 form, ecosystem, associated fish and wildlife,
14 economic value, and location of the areas, will
15 help to fulfill the role of the Forest Service, Na-
16 tional Park Service, and Bureau of Land Man-
17 agement to ensure a quality National Wilder-
18 ness Preservation System;

19 (B) areas that may have value as wild and
20 scenic rivers; and

21 (C) areas that—

22 (i) may not possess wilderness at-
23 tributes and should not now be designated
24 as components of the National Wilderness
25 Preservation System; and

1 (ii) should be studied to determine the
2 role of the areas in maintaining biological
3 diversity in the Northern Rockies Bio-
4 region;

5 (24) many areas of public land—

6 (A) have been damaged and experienced a
7 reduction in productivity due to unwise develop-
8 ment practices, which have also impaired eco-
9 system function and biological diversity, such as
10 the Island Park area adjacent to Yellowstone
11 National Park, which contains large clear-cut
12 areas that border the park boundary; and

13 (B) should be returned to the former eco-
14 logical health and native diversity of the areas
15 through efforts—

16 (i) to ensure that vital ecosystem com-
17 ponents are restored, especially in areas in
18 which wildlife travel corridors and native
19 fish and wildlife populations have been
20 damaged or eliminated; and

21 (ii) to ensure and maintain genetic
22 interchange, biological diversity, and res-
23 toration of native species diversity through-
24 out the Northern Rockies Bioregion;

1 (25) backcountry areas of the National Park
2 System have been damaged by inappropriate man-
3 agement, despite policies that require that rec-
4 ommended wilderness be administered as wilderness;

5 (26) an emphasis on structures and motorized
6 equipment, and in some instances developed
7 backcountry campsites, in backcountry areas of the
8 National Park System has detracted from and de-
9 graded the wilderness character of those
10 backcountry areas;

11 (27) Federal agencies entrusted with managing
12 the natural resources of the Northern Rockies Bio-
13 region—

14 (A) operate under contradictory congres-
15 sional mandates; and

16 (B) are in dissension over management
17 policies that involve common resources and
18 greater ecosystems;

19 (28) Federal agency structures and regulatory
20 mechanisms as of the date of enactment of this Act
21 have proven unsatisfactory for the responsible man-
22 agement of nationally important ecosystems on pub-
23 lic land;

24 (29) Federal laws and regulations as of the
25 date of enactment of this Act have not been suffi-

1 cient to establish and maintain the accountability of
2 Federal agencies for public resources; and

3 (30) this Act does not affect private existing
4 rights.

5 **SEC. 3. PURPOSES.**

6 (a) IN GENERAL.—The purposes of this Act are—

7 (1) to designate certain National Forest System
8 land, certain National Park System land, and cer-
9 tain public land administered by the Bureau of Land
10 Management in the States of Idaho, Montana, Or-
11 egon, Washington, and Wyoming as components of
12 the National Wilderness Preservation System;

13 (2) to designate certain National Forest System
14 land, certain public land administered by the Bureau
15 of Land Management, and watercourses on that Na-
16 tional Forest System land and public land in the
17 States of Montana, Idaho, and Wyoming as compo-
18 nents of the National Wild and Scenic Rivers Sys-
19 tem;

20 (3) to prioritize areas for wildland recovery to
21 help restore biological diversity and native species;
22 and

23 (4) to establish a system of biological con-
24 necting corridors—

1 (A) between the core ecosystems in the
2 Northern Rockies Bioregion; and

3 (B) that connect to ecologically significant
4 wildland to the south of the Northern Rockies
5 Bioregion.

6 (b) PURPOSE OF DESIGNATIONS.—The designations
7 of land made by this Act are made—

8 (1) to promote, perpetuate, and preserve the
9 wilderness character of the designated land;

10 (2) to protect water quality, watersheds, and
11 wildlife habitats, including the habitats of species
12 listed as threatened or endangered under the Endan-
13 gered Species Act of 1973 (16 U.S.C. 1531 et seq.);

14 (3) to protect the ecological integrity and con-
15 tiguity of major wildland ecosystems and the inter-
16 connecting corridors of the ecosystems identified by
17 the Director of the United States Fish and Wildlife
18 Service or another official;

19 (4) to protect and maintain biological and na-
20 tive species diversity and dispersal throughout the
21 Northern Rockies Bioregion;

22 (5) to promote and ensure interagency coopera-
23 tion in the implementation of integrated, holistic
24 ecosystem management and protection of the eco-

1 systems and corridors covered by this Act based on
2 principles from conservation biology;

3 (6) to preserve scenic, historic, and cultural re-
4 sources;

5 (7) to promote scientific research, primitive
6 recreation, solitude, physical and mental challenges,
7 and inspiration for the benefit of the people of the
8 United States;

9 (8) to avoid the misinvestment of scarce capital
10 in land of marginal timber value; and

11 (9) to promote ecologically and economically
12 sustainable management in the Northern Rockies
13 Bioregion.

TITLE II—BIOLOGICAL CONNECTING CORRIDORS

SEC. 201. FINDINGS.

Congress finds that, as of the date of enactment of this Act—

(1) the most recent scientific information on ecological reserve design and function, including recent scientific information on species dispersal in response to a changing climate, points out the critical need for biological connecting corridors between the larger core ecosystem areas;

(2) while none of the remaining major wildland ecosystems of the Northern Rockies Bioregion appears to be of sufficient size to perpetuate the full complement of self-sustaining viable populations of native wildlife, biological diversity, and full range of ecological processes on its own, it appears that an effective reserve system can be achieved if biological connecting corridors between the ecosystems are identified and protected;

(3) the wildland areas addressed by this title are located between the major core ecosystems of the region and are essential for wildlife and plant migration and genetic interchange; and

1 (4) those areas are some of the most beautiful
2 and wild mountain ranges in the United States, in-
3 cluding the Bitterroot, Sapphire, Lost River, Lemhi,
4 and Bridger mountain ranges.

5 **SEC. 202. DESIGNATION OF BIOLOGICAL CONNECTING COR-**
6 **RIDORS.**

7 (a) DESIGNATION.—To protect the life flow of the
8 Northern Rockies Bioregion, the Federal land described
9 in subsection (b)—

10 (1) is designated as biological connecting cor-
11 ridors that connect the Greater Yellowstone, Greater
12 Glacier/Northern Continental Divide, Greater Hells
13 Canyon, Greater Salmon/Selway, and Greater Cabi-
14 net-Yaak-Selkirk ecosystems; and

15 (2) shall be subject to the special corridor man-
16 agement requirements under section 203.

17 (b) DESCRIPTION OF FEDERAL LAND.—The Federal
18 land referred to in subsection (a) is the approximately
19 2,900,000 acres of Federal land, as generally depicted on
20 the map entitled “Northern Rockies Ecosystem Protection
21 Act (2023)” and dated April 10, 2023, and administered
22 by the Forest Service or the Bureau of Land Management.

1 **SEC. 203. TREATMENT OF BIOLOGICAL CONNECTING COR-**
2 **RIDORS.**

3 (a) IN GENERAL.—Those portions of the biological
4 connecting corridors designated by section 202 are des-
5 ignated as special corridor management areas and shall

8 laws and in accordance with subsection (b).

9 (b) REQUIREMENTS.—

10 (1) SILVICULTURAL MANAGEMENT AND TIMBER
11 HARVESTING.—The practice of even-aged silvicol-
12 tural management and timber harvesting is prohib-

14 (2) MINING, OIL, GAS, AND ROADS.—Subject to
15 valid existing rights, mining, oil, and gas exploration
16 and development and new road construction or re-
17 construction is prohibited within the special corridor
18 management areas.

19 (3) ROAD DENSITY.—

20 (A) IN GENERAL.—The Federal land man-
21 agement agency responsible for the administra-
22 tion of a special corridor management area or
23 portion of a special corridor management area
24 shall act immediately to ensure that road den-
25 sities within the biological connecting corridor

1 approach, to the maximum extent practicable,
 2 zero miles of road per square mile of land area.

3 (B) LIMITATION.—The road density de-
 4 scribed in subparagraph (A) shall not exceed

13 (1) IN GENERAL.—No private land is affected
 14 by this title and no private landowner whose land is

 17 any circumstances, to comply with this title.

18 (2) COOPERATIVE AGREEMENTS.—A private

9 agreements would benefit the ecological integrity and
10 function of the designated corridors.

11 (b) LAND TRADES AND ACQUISITIONS.—The Sec-
12 retary of Agriculture and the Secretary of the Interior
13 may undertake land trades or acquisitions to carry out the

15 the action to be—

16 (1) appropriate; and

17 (2) in compliance with existing law (including
18 regulations) applicable to land trades or acquisitions.

20 tion 501, the Secretary of Agriculture and the Secretary
21 of the Interior shall describe the progress of cooperative
22 agreements, acquisitions, and proposed land exchanges
23 sought pursuant to this section.
