

119TH CONGRESS
1ST SESSION

S. 2272

To provide access to reliable, clean, and drinkable water on Tribal lands,
and for other purposes.

IN THE SENATE OF THE UNITED STATES

JULY 14, 2025

Mr. BENNET (for himself, Mr. HEINRICH, Mr. HICKENLOOPER, Mr. SANDERS,
Mr. WYDEN, Ms. WARREN, and Mr. PADILLA) introduced the following
bill; which was read twice and referred to the Committee on Indian Af-
fairs

A BILL

To provide access to reliable, clean, and drinkable water
on Tribal lands, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Tribal Access to Clean
5 Water Act of 2025”.

6 **SEC. 2. FINDINGS.**

7 Congress finds that—

8 (1) access to reliable, clean, and drinkable
9 water is an essential human need and critical to the

1 public health, well-being, educational attainment,
2 and economic development of all communities in the
3 United States;

4 (2) many countries, along with the United Na-
5 tions, have recognized the urgency of the need to ac-
6 cess reliable, clean, and drinkable water by passing
7 laws or resolutions relating to the human right to
8 water and sanitation, including—

9 (A) recognizing these water and sanitation
10 needs exist among indigenous peoples; and

11 (B) establishing aggressive targets for
12 achieving universal access to those basic serv-
13 ices;

14 (3) in the United States, access to reliable,
15 clean, and drinkable water has long been a signifi-
16 cant problem in many communities on Tribal lands,
17 such that nearly half of all households on Tribal
18 lands do not have access to reliable water sources,
19 clean drinking water, or basic sanitation, and are
20 significantly more likely than other households in the
21 United States to lack indoor plumbing;

22 (4) the first of the 5 pillars announced on Feb-
23 ruary 4, 2025, by the Administrator of the Environ-
24 mental Protection Agency Lee Zeldin that will guide
25 the work of the Environmental Protection Agency

1 under the Powering the Great American Comeback
2 Initiative is the principle that “every American
3 should have access to clean air, land, and water”;

4 (5) the trust responsibility of the Federal Gov-
5 ernment to Indian Tribes and the Native Hawaiian
6 Community requires the Federal Government to en-
7 sure the survival and welfare of Indian Tribes and
8 the Native Hawaiian Community, and the failure to
9 provide basic water service cannot be reconciled with
10 that trust responsibility;

11 (6) the public health of Indian Tribes and the
12 Native Hawaiian Community lags behind other com-
13 munities in the United States at least in part as a
14 result of lack of public health infrastructure, includ-
15 ing access to running water;

16 (7) through the bipartisan Infrastructure In-
17 vestment and Jobs Act (Public Law 117–58; 135
18 Stat. 429), Congress provided funding for the Indian
19 Health Service and the Environmental Protection
20 Agency to support the construction and repair of
21 Tribal clean water infrastructure, but—

22 (A) inadequate resources are available to
23 Indian Tribes to assist with accessing those
24 construction and repair funding programs and

1 to support the operation and maintenance of
2 water infrastructure; and

3 (B) much of that funding is unavailable to
4 the Native Hawaiian Community;

5 (8) filling the gaps in funding described in
6 paragraph (7) is necessary for efficient implementa-
7 tion of the historic investment in clean water infra-
8 structure for Indian Tribes and the Native Hawaiian
9 Community;

10 (9) technical assistance to Indian Tribes and
11 Native Hawaiian organizations is necessary to en-
12 sure that Indian Tribes and the Native Hawaiian
13 Community are able—

14 (A) to access and take advantage of the
15 new funding described in paragraph (7);

16 (B) to develop the managerial, financial,
17 and regulatory framework necessary for a fully
18 functional and self-sustaining utility; and

19 (C) to engage appropriate outside consult-
20 ants to assist as needed;

21 (10) advances in water technology, including
22 treatment, sensors, and innovative pipeline mate-
23 rials, can assist in—

1 (A) accelerating efforts to provide uni-
2 versal access to reliable, clean, and drinkable
3 water on Tribal lands; and

4 (B) enhancing resilience in the face of ex-
5 treme weather events;

6 (11) past epidemics of communicable diseases
7 and the threat of future such occurrences are stark
8 reminders that access to reliable, clean, and drink-
9 able water to support basic health is a matter of life
10 or death for all individuals in the United States;

11 (12) it is in the interest of the United States,
12 and it is the policy of the United States, that all
13 Tribal lands be provided with safe and adequate
14 water supply systems as soon as practicable; and

15 (13) both appropriate funding at the level of
16 unmet need and a “whole of government” approach
17 among all Federal agencies are essential to provide
18 a meaningful solution to the lack of access to clean
19 water on Tribal lands.
