5 development projects;

6 (3) the Corps of Engineers has numerous au-
7 thorities provided by Congress to address varying
8 water resources challenges;

12 included in a report of the Chief of Engineers to Congress
13 pursuant to section 2033 of the Water Resources Develop-
14 ment Act of 2007 (33 U.S.C. 2282a), the Secretary may
15 not require a 35 percent or greater level of design matu-
16 rity for the project if a lesser level of design maturity is
17 sufficient to prepare a class III cost estimate (as such
18 term is described in Engineer Regulation 1110-2-1302 of
19 the Corps of Engineers entitled “Civil Works Cost Engi-
20 neering” (June 30, 2016)) for the project.
