LAND AND MINERALS MANAGEMENT

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is charged with the multiple use management of natural resources on 264 million acres of public land. It also supervises mineral leasing and operations on an additional 300 million acres of Federal mineral estate that underlie other surface ownerships. The lands managed by BLM provide important natural resources, recreational and scenic values to the American people, as well as resource commodities and revenue to the Federal Government, States, and counties. It is the mission of the BLM to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations.

Wildland fire preparedness.—This activity funds the non-emergency and predictable aspects of the Department's wildland fire program. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence. It also includes activities related to program monitoring and evaluation, integration of fire into land-use planning, fire facility construction and maintenance, and fire research and fire science program activities.

Wildland fire operations.—This activity funds the emergency and unpredictable aspects of the Department's wildland fire management program. Wildland fire operations include emergency suppression, emergency rehabilitation, and hazardous fuels reduction. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected and consistent with resource objectives and land management plans. Suppression operations also include severity funding used to improve initial attack preparedness response capabilities when abnormal fire conditions occur resulting in fire seasons starting earlier than normal, lasting longer than normal, or exceeding average fire danger ratings for prolonged periods. Emergency rehabilitation of wildland fire areas is carried out to prevent land degradation and resource damages and to stabilize soils, structures, or other conditions or damage caused by wildland fires. Hazardous fuels reduction operations include all operational aspects of applying prescribed fire to reduce fuel loadings and promote ecosystem diversity. It also includes me-

chanical treatments. Funding requests are guided by the historical 10-year average of suppression and rehabilitation expenditures, adjusted for inflation, and a target level for hazardous fuels reduction operations.

Rural Fire District Assistance.—This activity provides for financial support to local and rural fire protection districts that protect small communities. These local firefighting agencies often provide a critical service in helping meet protection needs for wildland interface areas threatened by wildlife. Funding would be used for engines and other initial attack equipment, communication equipment, training and other related support.

The Central Hazardous Materials Fund is used to fund remedial investigations/feasibility studies and cleanups of hazardous waste sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations

of no-year funds and of offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 *et seq.*) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

This appropriation is derived from a percentage of receipts from grazing of livestock on the public lands, and from grazing and mineral leasing receipts on Bankhead-Jones Farm Tenant Act lands transferred from the Department of Agriculture by various Executive Orders. These funds are used for the planning, construction, development, and monitoring of range improvements when appropriated.

Permanent operating funds accounts include:

Operations and maintenance of quarters.—Funds in this account are used to maintain and repair BLM employee-occupied quarters from which rental charges are collected. Agencies are required to collect quarter rentals from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

Forest ecosystems health and recovery.—Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. This account was established to allow the Bureau of Land Management to more efficiently and effectively address forest health. Funds can be used for other forest health purposes, including release from competing vegetation and density control treatments.

Timber sale pipeline restoration fund.—This fund provides for the deposit and use of fees collected by the BLM for sales of non-salvage timber pursuant to the timber salvage provisions of Public Law 104-19 and Public Law 105-83. Of

General and special funds—Continued

the total deposited into this account, 75 percent is to be used for preparation of timber sales to fill the timber pipeline on lands administered by the BLM, and 25 percent is to be expended on the backlog of recreation projects on BLM lands.

Recreation fees.—This account holds funds that enable the BLM to retain and spend up to 15 percent of recreation receipts collected during the current year to offset fee collection costs.

Expenses, road maintenance deposits.—Users of certain roads under jurisdiction of the Bureau of Land Management (BLM) make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

Recreational fee demonstration program.—Fees collected by the BLM at recreation sites identified pursuant to provisions of the 1996 Interior and Related Agencies Appropriations Act are deposited to this account. BLM returns 100 percent of these receipts back to the site where the fees were generated.

Acquisitions in Deschutes, OR from land sale receipts.—Pursuant to Public Law 105–221, the Oregon Public Lands Transfer Act, the Secretary of the Interior is authorized to use the proceeds from sales in Deschutes County to purchase environmentally sensitive lands.

Operations and Acquisitions in Nevada from land sale receipts.—Pursuant to Public Law 105–263, 85% of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive land in the State, and to make capital improvements to areas administered by the NPS, FWS, and BLM in Clark County, NV. Included in this account is earnings on investments.

Lincoln County Land Sales.—Public Law 106–298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the state of Nevada, 10 percent to the County, and 85 percent to an interest bearing account that is available for expenditure without further appropriation.

Commercial Film and Photography Fees.—Fees collected pursuant to Public Law 106–206 are used to recover costs incurred as a result of filming activities or similar projects, including but not limited to administrative and personnel costs. Also, a reasonable fee is collected for commercial filming activities or similar projects on Federal lands administered by the Secretary of the Interior.

Federal Land Disposal.—The Federal Land Disposal Account, P.L. 106–248 Stat. 616, provides that the Administration will conduct sales of lands that have been classified as suitable for disposal under current resource management plans. This law provides that receipts from such sales may be used to acquire non-Federal lands with significant resource values that fall within the boundaries of areas now managed by the Department of the Interior.

Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.—Under provisions of the Secure Rural Schools and Community Self-Determination Act of 2000 (Public Law 106–393), annual payments to the 18 Oregon & California (O&C) counties will be derived from any revenues, fees, penalties, or miscellaneous receipts received by the Federal Government from activities by the BLM on O&C and Coos Bay Wagon Road lands. These receipts are exclusive of deposits to any relevant trust fund, i.e., Timber Sale Pipeline Restoration and Forest Ecosystem Health and Recovery funds, or permanent operating funds.

Payments to counties, National Grasslands.—Of the revenues received from the use of Bankhead-Jones Act lands administered by the Bureau of Land Management, 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

Payments to Nevada from receipts on land sales.—(A) Public Law 96–586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent). (B) Public Law 105–263 authorizes the disposal through sale of approximately 27,000 acres in Clark City Nevada, the proceeds of which are to be distributed as follows: (a) five percent for use in the general education program of the State of Nevada (b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada and (c) the remaining 85 percent to be used to acquire environmentally sensitive lands in Nevada; capital improvements to areas administered by NPS, FWS and BLM in Clark County, Nevada; development of multi-species habitat plan in Clark County, Nevada;

Funds are made available to the Bureau of Land Management for administration and subsequent payment to accounts accepting Cook Inlet Region, Incorporated offers for Federal properties.

Native Alaskan groups' properties.—Funds were appropriated by Public Law 102–172 for the Calista Corporation, and by Public Law 102–415 for the Haida Corporation and the Gold Creek Susitna Association, Incorporated, for the acquisition by those groups of Federal real properties in fulfillment of claims originally settled in 43 U.S.C. 1617, the Alaska Native Claims Settlement Act.

PAYMENT TO ALASKA, ARCTIC NATIONAL WILDLIFE REFUGE

(Legislative proposal, subject to PAYGO)

The budget assumes that the first oil and gas lease in the coastal plan of the Arctic National Wildlife Refuge (ANWR) would be held in 2004, resulting in the leasing of 400,000 to 600,000 acres and producing \$2.4 billion in receipts from bonuses which would be shared 50/50 between the Federal Government and the State of Alaska. The Federal share of the first lease sale bonus bids would be used by the Department of Energy to fund increased on solar and renewable energy technology research and development over seven years. Legislation is required to hold any oil and gas leasing sale.

The Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities.

The Helium Privatization Act of 1996, Public Law 104-273, provides for the eventual privatization of the program and its functions. In FY 2002, the Helium program will consist of:

- (a) continued storage and transmission of crude helium;
- (b) complete disposal of helium refining facilities and other excess property not needed for storage and transmission of crude helium;
- (c) oversight of the production of helium on Federal lands;
- (d) administration of in kind crude helium gas sale program.

The estimates assume that the helium program will continue to fund full implementation of the Helium Privatization Act.

Environmental protection.—This activity funds those functions that directly contribute to ensuring that the environment is protected during surface coal mining operations. It also addresses those activities that ensure that coal operators adequately reclaim the land after mining is completed.

Under this activity, OSM provides regulatory grants to States to operate enforcement programs under the terms of the Surface Mining Control and Reclamation Act of 1977 (SMCRA). It also provides for the operation of Federal and Indian land programs and the oversight of State programs. This activity also supports State regulatory program development and maintenance.

Environmental Restoration.—This activity funds environmental reclamation efforts through the collection of civil penalties for post-SMCRA reclamation and funds from bond forfeitures. It also provides funding for underground and coal outcrop fires.

Technology development and transfer.—This activity provides funding to enhance the technical skills that States and Indian Tribes need to operate their regulatory programs. It provides technical outreach to States and Indian Tribes to solve problems related to the environmental effects of coal mining. The Applicant Violator System is funded from this activity.

Financial Management.—This activity provides the resources for the managing, accounting, and processing of collections and for the pursuit of delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations.

Executive direction and administration.—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

Environmental Restoration.—This activity funds those functions that contribute to reclaiming lands affected by past coal mining practices. Funds are used to restore land and water resources and the environment that have been degraded by mining prior to the passage of the Surface Mining Control and Reclamation Act (SMCRA).

This activity provides reclamation grants to qualified States. It also provides for the Federal reclamation program, which includes the Federally-administered emergency reclamation program, and for high priority projects in States that do not have a reclamation program.

Funding is also provided within this account, for the Appalachian Clean Streams Initiative.

Technology development and transfer.—This activity provides funding to enhance the technical skills that the States and Indian Tribes need to operate their reclamation programs. OSM conducts technical studies on mining and reclamation-related problems. This activity also provides resources for the Small operators assistance program.

Financial Management.—This activity provides funds to identify, notify, collect, and audit fees from coal operators for the Abandoned Mine Reclamation Fund. OSM seeks to maximize voluntary compliance with the SMCRA's reclamation fee provisions.

Executive direction and administration.—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services such as rent, telephones, and postage.

The following are the key performance measures for the Abandoned Mine Reclamation Fund account:

PERFORMANCE MEASURES

	2000 actual	2001 est.	2002 est.
Number of acres reclaimed on all abandoned coal mine sites.	8,100	8,600	7,000
Percent of total funds from outside sources for the Clean Streams Initiative	57%	60%	62%

The 2000 accomplishment for acres reclaimed is a calculated estimate. The accomplishments reported to OSM by States and Tribes for 2000 included more than one year. Also, estimates generally reflect the full number of projects funded; actual project completion may occur one to three years after initiation.

The U.S. Geological Survey provides research and scientific information to support the mission of the Department of the Interior and the science needs of the land and resource management bureaus of the Department. The U.S. Geological Survey also works in collaboration with other Federal, State, and Tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues and pertaining to the water, land, and mineral and biological resources of the Nation.

This budget emphasizes the U.S. Geological Survey's core mission responsibilities; in particular, its priority role in providing sound science to support the Department of the Interior's land management bureaus in their decision-making processes. This budget gives priority to those resources and programs that most directly address the science needs of Interior agencies and are related to core mission responsibilities

of the U.S. Geological Survey. At the same time, the budget proposes to reduce USGS funding for external programs and increase financial participation of outside partners.

National mapping program.—The national mapping program ensures a nationwide geographic information knowledge base by collecting, integrating, and making available, in printed and digital format, cartographic and geographic base data, remotely sensed data, data from classified sources, and multi-purpose and special-purpose maps. The USGS is the lead Federal agency for civil mapping. Research is conducted in the mapping sciences, geography, and related disciplines in support of data production and applications. Activities related to the National Spatial Data Infrastructure support inter-agency and intergovernmental partnerships for establishing a national geospatial data clearinghouse, developing data standards, coordinating regional data production and sharing, and developing a data framework (data set) for the Nation.

Geologic hazards, resources, and processes.—The national program of onshore and offshore geologic research and investigations produces: (1) information on natural hazards of geologic origin such as earthquakes, volcanic eruptions, landslides, and coastal erosion; (2) geologic information for use in the management of public lands and in national policy determinations; (3) information on the chemistry and physics of the Earth, its past climate, and the geologic processes by which it was formed and is being modified; (4) geologic, geophysical, and geochemical maps and analyses to address environmental, energy and mineral resource, and hazards concerns; (5) hazards, energy and mineral resource, and environmental assessments; and (6) improved methods and instrumentation for detecting and monitoring hazards, disseminating hazards information, and conducting assessments.

Water resources investigations.—The USGS water programs produce data, analyses, assessments and methodologies to support Federal, State, Tribal, and local government decisions on water planning, water management, water quality, flood forecasting and warning, and enhancement of the quality of the environment. The U.S. Geological Survey's water resources programs have a rich history of working cooperatively with other Federal agencies, States, and other entities to leverage Federal resources to meet their mutual water information needs. The 2002 Budget proposes to make increased use of reimbursements or cost-sharing models for certain water quality-related programs to more appropriately reflect the value and benefits of these programs to external customers.

Biological research.—The national program of biological research: (1) conducts biological research inventory and monitoring; (2) provides scientific information for the management of biological resources; and (3) predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats. The program conducts the high priority biological research needed by the Department of the Interior's land management bureaus and operates the Cooperative Research Unit program which provides research and information to resource managers, and trains natural resource professionals in partnership with university and State scientists.

Science support.—Science support provides for Bureauwide management; executive direction and coordination; administrative, human resources, and information resources management services, and financial and personnel systems support provided by DOI's National Business Center.

Facilities.—This activity finances: (1) USGS rental payments; (2) operation and maintenance for properties; and (3) deferred maintenance and capital improvement.

Reimbursable program.—Reimbursements from non-Federal sources are from States, Tribes, and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of

the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission related work performed at the request of the financing agency, and beginning in 2002, will be required to support certain ongoing USGS water quality-related programs in which the primary beneficiaries are non-Interior agencies.

Note.—Collections contained in this account include amounts that have been legislatively reclassified as intragovernmental funds.

The activities previously financed under Department of the Interior, United States Fish and Wildlife Service, Federal Infrastructure Improvement, from LWCF in 2000 and 2001 are presented in these schedules and are proposed to be financed in this account in 2002.

Ecological services.—The Service provides technical assistance to prevent or minimize adverse environmental effects of development projects; restores trust species habitats; and, produces wetland maps of the United States. Financial assistance is provided to private landowners to restore or improve habitat for endangered species. Contaminants are investigated, monitored, and assessed for effects on trust resources. Activities are pursued to prevent species from becoming extinct, and to return them to the point where they are neither threatened nor endangered.

Refuges and wildlife.—The Service maintains the National Wildlife Refuge System consisting of 530 units, with waterfowl production areas in 201 counties and 50 coordination areas, totaling about 94 million acres; and directs and coordinates national migratory bird programs.

Law enforcement.—The Service enforces federal laws, regulations, and international treaties for the protection of fish, wildlife and plants, including inspections of wildlife shipments entering or leaving the United States at ports-of-entry. The

Service is authorized 253 special agents and 94 wildlife inspectors, and manages the Clark R. Bavin National Wildlife Forensics Laboratory in Ashland, OR, the National Wildlife Property Repository and the National Eagle Repository, both located in Commerce City, CO.

Fisheries.—The Service manages 70 national hatcheries, 9 health centers, and 7 technology centers for the production of fish species, protects and enhances inter-jurisdictional fishery resources, and provides technical assistance for the restoration and improvement of fish and wildlife populations and their habitats. Projects to improve aquatic resources are implemented through the National Fish and Wildlife Foundation and other partnerships.

General operations.—Provides policy guidance, program coordination, and administrative services to all fish and wildlife programs. The funds also support the Service's international activities, National Conservation Training Center, and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

Funding for refuge, hatchery and law enforcement maintenance emphasizes the Service's commitment to the long-term stewardship of federal lands and facilities.

This account includes \$25 million for Federal Infrastructure Improvement, which is part of the Conservation Spending Category.

As part of the 1999 Pacific Salmon Treaty Agreement between the U.S. and Canada, the U.S. agreed to reduce the harvest of Fraser River salmon by the non-Indian fishing fleet. Pursuant to this agreement, the Congress provided the U.S. Fish and Wildlife Service with \$5.0 million in 2000 under this account. The funds are to be awarded as a grant to the State of Washington to (1) meet the intent of the Pacific Salmon Treaty; (2) reduce the overall fleet capacity while maintaining a sustainable and economically viable fishery; and (3) provide economic relief to Washington salmon fishers.

The 2001 appropriation included \$50 million under Title VIII of the Interior and Related Agencies Appropriations Act for U.S. Fish and Wildlife Service State Wildlife Grants under the conservation spending category. These funds are to be used for cost-shared, competitively awarded grants to States for conservation of a State's full array of wildlife and their habitats. While the 2002 Budget proposes decreasing funding under this account by \$50 million, the 2002 budget proposes funding for Land and Water Conservation Fund State grants at \$450 million, an increase of \$360 million. States may use their share of the \$450 million State LWCF program for wildlife conservation and habitat restoration, in line with the purposes of the State Wildlife Grant program.

These funds have traditionally been used to support Federal land acquisition. Federal Land Acquisition funds are used to acquire areas that have native fish and/or wildlife values and provide natural resource benefits over a broad geographical area, and for acquisition management activities. The 2002 budget proposes that funds also be used to support state and local conservation efforts by redirecting \$60 million in Federal land acquisition funds towards private conservation efforts.

The budget proposes \$50 million for the United States Fish and Wildlife Service to establish a competitively-awarded cost-shared Landowner Incentive Program for grants to the States,

District of Columbia, Territories, and Tribes to establish or supplement their own Landowner Incentive Program. These programs will provide technical and financial assistance to private landowners all across the country to help them protect and manage habitat, while continuing to engage in traditional land use practices. Eligibility criteria and other aspects of program administration will be developed by the U.S. Fish and Wildlife Service in consultation with the States. The budget proposes \$1.5 million of the \$50 million, three percent, be used to administer the Landowner Incentive Program.

The budget proposes an additional \$10 million for the United States Fish and Wildlife Service to establish a Private Stewardship Grants Program. Individuals and groups engaged in local, private, and voluntary conservation efforts will be eligible to apply for a grant to help fund projects that benefit federally listed, proposed, or candidate species, or other at-risk species. A diverse panel of representatives from State and Federal Government, conservation organizations, agriculture and development interests, and the science community will assess the applications and make recommendations to the Secretary of the Interior, who will award the grants. The budget proposes \$300,000 of the \$10 million, three percent, be used to administer the Private Stewardship Grant Program.

The Partnerships for Wildlife Act (16 U.S.C. 3741), authorizes wildlife conservation and appreciation projects to conserve fish and wildlife species and to provide opportunities for the public to enjoy these species through nonconsumptive activities. Grants to States are directed toward nonconsumptive activities and the conservation of species not taken for recreation, fur, or food; not listed as endangered or threatened under the Endangered Species Act of 1973; and not defined as marine mammals under the Marine Mammal Protection Act of 1972.

The 2002 budget proposes funding for Land and Water Conservation Fund State grants at \$450 million, an increase of \$360 million. States may use their share of the \$450 million State LWCF program for wildlife conservation and restoration, in line with the purposes of the Wildlife Conservation and Appreciation Fund.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707) and interest on obligations held in the Federal Aid in Wildlife Restoration Fund. The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. A portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The 2001 appropriation included a total of \$40 million for the North American Wetlands Conservation Fund, of which \$20 million was provided under Title VIII of the Interior and Related Agencies Appropriations Act under the conservation spending category. While the 2002 budget proposes decreasing funding under this account by \$25 million, the 2002 budget also proposes funding for Land and Water Conservation Fund State grants at \$450 million, an increase of \$360 million. States may use their share of the \$450 million State LWCF program to fulfill the purposes of the North American Wetlands Conservation Act.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for conservation, recovery, and monitoring projects for species that are listed, or species that are candidates for listing, as threatened or endangered. Grants are also awarded to States for land acquisition in support of Habitat Conservation Plans and species recovery efforts in partnership with local governments and other interested parties to protect species while allowing development to continue. The Fund is partially financed by permanent appropriations from the General Fund of the U.S. Treasury in an amount equal to five percent of receipts deposited to the Federal aid in wildlife and sport fish restoration accounts and amounts equal to Lacey Act receipts over \$500,000. The actual amount available for grants is subject to annual appropriations.

The 2001 appropriation included a total of \$104 million for the Cooperative Endangered Species Conservation Fund, of which \$78 million was provided under Title VIII of the Interior and Related Agencies Appropriations Act under the conservation spending category. While the 2002 budget proposes decreasing funding under this account by \$50 million, the 2002 budget also proposes funding for Land and Water Conservation Fund State grants at \$450 million, an increase of \$360 million. States may use their share of the \$450 million State LWCF program to fulfill the purposes of the Cooperative Endangered Species Conservation program.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes revenues through the sale of products from Service lands, less expenses for producing revenue and activities related to revenue sharing. The Fish and Wildlife Service makes payments to counties in which Service lands are located. If the net revenues are insufficient to make full payments according to the formula contained in the Act, direct appropriations are authorized to make up the difference.

In 1997, the U.S. Fish and Wildlife Service initiated the recreational fee demonstration program at selected refuges and other public sites. Entrance fees and other user receipts collected at sites are deposited into the Recreational fee demonstration program account.

The fee program demonstrates the feasibility of user-generated cost recovery for the operation and maintenance of recreation areas or sites and habitat enhancement projects on Federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address backlogged maintenance needs, and meet other operational needs. Congress has extended authority for collections for this demonstration program through 2002 and for obligations through 2005.

The Federal Aid in Wildlife Restoration Act, popularly known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, and wildlife management research. Under the program, States, Puerto Rico,

Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from the 11 percent excise tax on sporting arms and ammunition, the 10 percent excise tax on handguns, and the 12.4 percent tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act to authorize the Secretary of Interior to implement a multi-State conservation grant program and a firearm and bow hunter education and safety program which provides grants to the States.

Section 901 of Title IX of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 2001 (P.L. 106-553) authorizes a new grant program, the Wildlife Conservation and Restoration Account, to supplement existing funding available to the States and territories from the Sport Fish Restoration account and Federal Aid in Wildlife Restoration account. The 2001 appropriation included \$50 million to be used by State, territory or an Indian Tribe for the planning, development, revision and implementation of its wildlife conservation and restoration program and wildlife conservation strategy, including wildlife conservation, wildlife education, and wildlife-associated recreation projects. While the 2002 budget proposes decreasing funding under this account by \$50 million, the 2002 budget also proposes funding for Land and Water Conservation Fund State grants at \$450 million, an increase of \$360 million. States may use their share of the \$450 million State LWCF program to fulfill the purposes of the Wildlife Conservation and Restoration Account.

The Federal Aid in Sport Fish Restoration Act, commonly referred to as the Dingell-Johnson Sport Fish Restoration Act (as modified by the Wallop-Breaux amendment) created a fishery resources, conservation, and restoration program funded by an excise tax on fishing and sporting equipment.

Since 1992 the Sport Fish Restoration Fund has supported coastal wetlands grants pursuant to the Coastal Wetlands

Planning, Protection and Restoration Act (P.L. 101–646). Additional revenue from small engine fuel taxes was provided under the Surface Transportation Extension Act of 1997.

The Coastal Wetlands Planning, Protection and Restoration Act requires an amount equal to 18 percent of the total deposits into the Sport Fish Restoration Fund, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, to be distributed as follows: 70 percent shall be available to the Corps of Engineers for priority project and conservation planning activities; 15 percent shall be available to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects under Section 8 of the North American Wetlands Conservation Act (P.L. 101–233).

The Clean Vessel Act authorizes the Secretary of the Interior to make grants to States, in specified amounts, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities. The Sport Fish Restoration Act, as amended, provides for the transfer of funds from the Sport fish restoration account of the Aquatic Resources Trust Fund for use by the Secretary of the Interior to carry out the purposes of this Act and for use by the Secretary of Transportation for State recreational boating safety programs (46 USC 13106(a)(1)). The Sportfishing and Boating Safety Act authorizes the Secretary of the Interior to develop national and state outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources, as well as to make grants to states for developing and maintaining facilities for certain recreational vessels.

Assistance is provided to States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, and acquisition and improvement of fish habitat and provision of access for public use.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106–408) amends the Dingell-Johnson Sport Fish Restoration Act to authorize the Secretary of Interior to implement a multi-State conservation grant program and provide funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The National Park System contains 384 areas and 83.6 million acres of land in 49 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. These areas have been established to protect and preserve the cultural and natural heritage of the United States and its territories. Park visits total over 285 million annually. This appropriation funds the operation of individual units of the National Park System as well as planning and administrative support for the entire system. The budget proposes making repair and rehabilitation funds available until expended, to provide the flexibility needed to carry out these programs. In addition, repair and rehabilitation project funds are specifically appropriated only for repair and rehabilitation projects, which include but are not limited to facility, campground, and trail rehabilitation; roadway overlay and/or reconditioning; bridge repair; wastewater and water line replacement; and the rewiring of buildings, and for operation of the National Park Service automated facility management software system and for comprehensive facility condition assessments.

The budget proposes funding United States Park Police pension payments in the Operation of the National Park System appropriation.

The Urban Park and Recreation Fund provides matching grants to cities for the renovation of urban park and recreation facilities, targeting low-income inner-city neighborhoods. The 2001 appropriation included a total of \$30 million, of which \$20 was provided under Title VIII of the Interior and Related Agencies Appropriations Act. While the 2002 Budget proposes no funds for the grant portion of this program for fiscal year 2002, the 2002 Budget also proposes funding for Land and Water Conservation Fund grants to States at \$450 million, an increase of \$360 million.

Note.—The activities previously financed under Department of the Interior, National Park Service, Federal Infrastructure Improvement, from LWCF in 2000 and 2001 are presented in these schedules and are proposed to be financed in this account in 2002.

Line Item Construction.—This activity provides for the construction, rehabilitation, and replacement of those facilities needed to accomplish the management objectives approved for each park. Projects are categorized as facility improvement, utility systems rehabilitation, historic preservation, and natural resource preservation. Funds are also provided to the National Park Foundation to leverage non-Federal funds for cost-shared projects to repair and rehabilitate park facilities.

Special Programs.—Under this activity several former activity and subactivity components are combined. These include Emergency and Unscheduled Projects, the Seismic Safety of National Park System Buildings Program, Employee Housing, Dam Safety, and Equipment Replacement.

Construction Planning.—This activity includes the project planning function in which funds are used to prepare working drawings, specification documents, and contracts needed to construct or rehabilitate National Park Service facilities.

Pre-Design and Supplementary Services.—Under this activity, provisions are made to undertake workloads in conformance with improvement recommendations of NAPA. Functions include conditions surveys and special reports to acquire archaeological, historical, environmental and engineering design information which represents requisite preliminary stages of the design process.

Construction Program Management and Operations.—This activity complies with NAPA recommendations to base fund Service Center management and operations.

General Management Plans.—Under this activity, funding is used to prepare General Management Plans and keep them up-to-date to guide National Park Service actions for the protection, use, development, and management of each park unit; and to conduct studies of alternatives for the protection of areas that may have potential for addition to the National Park System.

The Construction account includes \$50,000,000 for Federal Infrastructure Improvement, which is part of the Conservation Spending Category.

This appropriation funds the Federal Land Acquisition Program, which provides funds to acquire certain lands, or interests in lands, for inclusion in the National Park System to preserve nationally important natural and historic resources. Funds are also provided for land acquisition critical to Everglades restoration.

In FY 2002, the State Assistance Program will provide grants for a wide array of State and Tribal recreation projects. By combining the objectives of several Department grant programs under the LWCF umbrella, this Program will enhance State and Tribal flexibility and achieve efficiencies in the delivery of funds. Grants will be provided for traditional recreation purposes, as well as for acquiring lands and interests in lands that provide habitat for a vast array of fish and wildlife, including wetlands for migratory birds and species that are threatened with extinction.

Funds are also included for the National Park Service to manage and coordinate the Land Acquisition Program, administer grants to States and Tribes, both new and those awarded in prior years, and administer grants awarded in prior years for the Urban Park and Recreation Recovery Program.

Recreational fee demonstration program.—The National Park Service and other land management agencies have initiated a demonstration fee program that allows parks and other units to collect new or increased admission and user fees and spend the revenue for park improvements. This temporary authority, provided in section 315 of section 101(c) of Public Law 104-134 as amended or supplemented by section 319 of section 101(d) of Public Law 104-208, section 5001 of Public Law 105-18, sections 107, 320 and 321 of Public Law 105-83, section 327 of section 101(e) of Public Law 105-277, and section 336 of Public Law 106-291 expires at the end of fiscal year 2002. To ensure that fee revenue remains available for park improvements after 2001, the Administration will propose legislation extending fee authority through 2006, to take effect once the current authority expires.

Non-demonstration parks fee program.—Under section 310 of Public Law 106-176, the National Park Service may retain recreation fees collected at NPS sites that are not part of the Recreation Fee Demonstration program or that fall within the deed-restricted parks fee program. Revenues are used in the same manner and for the same purposes as provided under the fee demonstration program, and this authority expires upon the termination of that program.

National park passport program.—Proceeds from the sale of national park passports for admission to all park units are to be used for the national passport program and the National Park System in accordance with section 603 of Public Law 105-391. By law, up to 15 percent of proceeds may be used to administer and promote the national park passport program and the National Park System, and net proceeds are to be used for high priority visitor service or resource management projects throughout the National Park System.

Deed-restricted parks fee program.—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with Public Law 105-327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site and Abraham Lincoln Birthplace National Historic Site.

Transportation systems fund.—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of Public Law 105-391.

Educational expenses, children of employees, Yellowstone National Park.—Revenues received from the collection of short-term recreation fees to the park are used to provide education facilities to pupils who are dependents of persons engaged in the administration, operation, and maintenance of Yellowstone National Park (16 U.S.C. 40a).

Payment for tax losses on land acquired for Grand Teton National Park.—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

This appropriation finances 60 percent of programmatic matching grants-in-aid to the States and certified local governments, as well as grants to Indian tribes.

No funds are requested for historic preservation grants to Historically Black Colleges and Universities (HBCUs), because funding through 2001 reached the full authorized level of \$29 million for HBCU grants, as provided in the 1996 Omnibus Parks and Public Lands Act. No funds are requested for the Millennium Initiative to Save America's Treasures, because that program has achieved its stated goal of commemorating the Millennium by providing \$95 million in grants over three years.

Park concessions franchise fees.—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105–391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System generally and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations.

Concessions improvement accounts.—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account at the direction of the park superintendent for facilities that directly support concession visitor services, but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

Park buildings lease and maintenance fund.—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105–391.

Operation and maintenance of quarters.—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

National Maritime Heritage Grants Program.—Of the revenues received from the sale of obsolete vessels in the National Defense Reserve Fleet, 25 percent are used for matching grants to State and local governments and private nonprofit organizations under the National Maritime Heritage Grants Program and for related administrative expenses in accordance with 16 U.S.C. 5401. Program authorization expires at the end of 2006.

Delaware Water Gap, Route 209 operations.—Fees collected for use of Route 209 within the Delaware Water Gap National Recreation Area by commercial vehicles are used for management, operation, and maintenance of the route within the park as authorized by Public Law 98–63 (97 Stat. 329), section 117 of Public Law 98–151 (97 Stat. 977) as amended by Public Law 99–88 (99 Stat. 343), and section 702 of Division I of Public Law 104–333 (110 Stat. 4185). The expired authorization was restored in fiscal year 1997 by Public Law 104–333.

Glacier Bay National Park resource protection.—Of the revenues received from fees paid by tour boat operators or other permittees for entering Glacier Bay National Park, 60 percent are used for certain activities to protect resources of the Park from harm by permittees in accordance with section 703 of Division I of Public Law 104–333 (110 Stat. 4185).

Filming and photography special use fees.—The National Park Service is now authorized to retain fee receipts that are collected from issuing permits to use park lands and facilities for commercial filming, still photography, and similar activities. Amounts collected should provide a fair return to the Government and may be used in accordance with the formula and purposes established for the Recreational Fee Demonstration Program.

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided to Indian Tribes, Alaskan Native groups, and individual Native Americans.

Tribal priority allocations.—This activity includes the majority of funds used to support ongoing programs at the local Tribal level. Funding priorities for base programs included in Tribal Priority Allocations are determined by Tribes. Although budget estimates include specific amounts for individual programs, funds may be shifted among programs within the total available for a Tribe or a BIA agency or regional office at the time of budget execution.

Other recurring programs.—This activity includes ongoing programs for which funds are (1) distributed by formula, such as elementary and secondary school operations and Tribal community colleges; and (2) for resource management activities that carry out specific laws or court-ordered settlements.

Non-recurring programs.—This activity includes programs that support Indian reservation and Tribal projects of limited duration, such as noxious weed eradication, cadastral surveys, and forest development.

Central office operations.—This activity supports the executive, program, and administrative management costs of central office organizations, most of which are located in Washington, DC.

Regional office operations.—The Bureau of Indian Affairs has 12 regional offices located throughout the country. Re-

gional Directors have line authority over agency office superintendents. Most of the agency offices are located on Indian reservations. Virtually all of the staff and related administrative support costs for regional and agency offices are included within this activity. Regional Directors have flexibility in aligning their staff and resources to best meet the program requirements of the Tribes within their region.

Special programs and pooled overhead.—Most of the funds in this activity support law enforcement and bureau-wide expenses for items such as unemployment compensation, workers compensation, facilities rentals, telecommunications, and data processing. This activity includes the Bureau's two post-secondary schools, the Indian police academy, the Indian Arts and Crafts Board, the Indian Integrated Resources Information Program, and non-education facilities operation and maintenance.

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts and grants, either directly or in cooperation with States and other organizations.

Appropriations for the Bureau of Indian Affairs (except the revolving fund for loans, the Indian loan guarantee and insurance fund, and the Indian Guaranteed Loan Program account) shall be available for expenses of exhibits, and purchase of not to exceed 229 passenger motor vehicles, of which not to exceed 187 shall be for replacement only.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office operations, pooled overhead general administration (except facilities operations and maintenance), or provided to implement the recommendations of the National Academy of Public Administration's August 1999 report shall be available for tribal contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs for distribution to other tribes, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

Appropriations made available in this or any other Act for schools funded by the Bureau shall be available only to the schools in the Bureau school system as of September 1, 1996. No funds available to the Bureau shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved

by the Secretary of the Interior at each school in the Bureau school system as of October 1, 1995. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1146 of the Education Amendments of 1978 (25 U.S.C. 2026)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code (commonly known as the "Federal Tort Claims Act"). [Not later than June 15, 2001, the Secretary of the Interior shall evaluate the effectiveness of Bureau-funded schools sharing facilities with charter schools in the manner described in the preceding sentence and prepare and submit a report on the finding of that evaluation to the Committees on Appropriations of the Senate and of the House.] (*Department of the Interior and Related Agencies Appropriations Act, 2001.*)

In 1999, \$8 million was provided to the Secretary of the Interior to implement and enforce certain Federal regulations in the state of Alaska dealing with subsistence uses of fish and wildlife on navigable rivers in Alaska consistent with the Alaska National Interest Lands Conservation Act (ANILCA). The 1999 appropriation stated that Federal enforcement actions were to be taken if the Alaska State Legislature failed to take action by October 1, 1999, to amend the Constitution of the State of Alaska to enable implementation of state laws. If the State Legislature had taken such action by October 1, 1999, the Secretary was directed to make a grant of \$8 million to the State of Alaska to implement and enforce the applicable ANILCA provisions. The Alaska State legislature failed to take action by the date specified, and therefore, Federal implementation and enforcement has been initiated. In 2001, funds were provided to the Fish and

The Government Management Reform Act, P.L. 103-356, established the Franchise Fund Pilot Program. Pursuant to the Act, the Department of the Interior was designated as one of six executive branch agencies authorized to establish a franchise fund. Section 113 of the General Provisions of the Department of the Interior Related Agencies Appropriation Act of 1997, P.L. 104-208, established in the Treasury a franchise fund pilot. This fund is to be available for the cost of capitalizing and operating administrative services as the Secretary determines may be performed more advantageously as central services. The budget extends through the end of Fiscal Year 2002 the authority for the franchise fund pilot program.

Until October 1, 1994, the United States exercised jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities were carried out by the Department of the Interior.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and, as of October 1, 1994, the Republic of Palau. Assistance to the Republic of Palau is now contained in the "Compact of Free Association" account.

Remaining funds in the "Trust Territory of the Pacific Islands" account will be used to meet final transition responsibilities of the United States. Outlays from numerous ongoing infrastructure construction projects in the Republic of Palau and the other two entities will continue as provided by the Compacts of Free Association and appropriation laws, and will be reported as Trust Territory expenditures until such time as the activities cease.

COMPACT OF FREE ASSOCIATION

For economic assistance and necessary expenses for the Federated States of Micronesia and the Republic of the Marshall Islands as provided for in sections 122, 221, 223, 232, and 233 of the Compact of Free Association, and for economic assistance and necessary expenses for the Republic of Palau as provided for in sections 122, 221, 223, 232, and 233 of the Compact of Free Association, **[\$20,745,000] \$23,245,000**, to remain available until expended, as authorized by Public Law 99-239 and Public Law 99-658. The peoples of the Marshall Islands and the Federated States of Micronesia approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (Public Law 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and will continue for fifteen years, totalling an estimated \$2.3 billion, to aid in the development of these sovereign nations.

Section 231 of the Compact of Free Association contains a formula for two additional years of assistance if negotiations are underway to extend provisions that expire at the end of the fifteenth year. In addition, the Military Use and Operating Rights Agreement with the Republic of the Marshall Islands contains a clause which awards the Marshall Islands a \$2.5 million payment as a result of the U.S. announcing its intention to extend its lease of Kwajalein for an additional 15 years.

The Compact of Free Association with the Republic of Palau was implemented under the terms of Public Law 99-658 on October 1, 1994. This compact will provide annual benefits to the Republic totalling an estimated \$600 million over the fifteen-year period that began at the implementation date.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments will be performed in order to provide the basis for claims against responsible parties for the restoration of damaged natural resources. Funds are appropriated to conduct damage assessments and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through negotiated settlements or other legal actions by the Department of the Interior.

Restoration activities include: (1) the replacement and enhancement of affected resources; (2) acquisition of equivalent resources and services; and, (3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a departmentwide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of damaged natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 *et seq.*), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), the Oil Pollution Act of 1990 (33

U.S.C. 2701 *et seq.*), and the Act of July 27, 1990 (16 U.S.C. 1911 *et seq.*). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The budget incorporates the receipts and mandatory spending associated with the 1991 Exxon Valdez oil spill civil and criminal settlements. Receipts for restoration activities from 1992 through 2001 are currently estimated to total \$687 million. Additionally, \$213 million was recovered for past response and damage assessment activities. The Exxon Valdez Oil Spill Trustee Council was formed to act on behalf of the public as trustees in the collection and joint use of all civil settlement recoveries. The criminal settlement funds are managed separately by the Federal and Alaska State governments, although activities are coordinated with the Trustee Council to maximize restoration benefits.

Funding from the settlements, as well as interest, is provided to the Federal and Alaska State governments to restore the resources and services damaged by the 1989 oil spill. Restoration activities were initiated in 1992 and habitat protection was begun in 1993.

Habitat protection and acquisition is one of the principal tools of restoration. The Trustee Council has underway two habitat protection and acquisition programs, a large parcel program that protects blocks of land in excess of 1,000 acres and a small parcel program that recognizes the unique habitat qualities and strategic restoration value that smaller tracts provide. Funding from the Exxon Valdez civil and criminal settlements, the Land and Water Conservation Fund, and private partnerships work together as an integrated approach to the restoration program. The Council has been working with large and small landowners, on a willing-seller basis, in the spill-impacted area to protect approximately 645,247 acres of habitat.

Executive direction.—This activity supports the Office of Special Trustee for American Indians, the Trustee's advisory board, and other Tribal representative groups. Under the American Indian Trust Fund Management Reform Act of 1994, the Special Trustee for American Indians is charged with general oversight for Indian trust reform efforts departmentwide. Additionally, in 1996, at the direction of the Congress, direct responsibilities and authorities for Indian Trust Fund Management were transferred to the Special Trustee from the Assistant Secretary of Indian Affairs.

Program operations, support, and improvements.—This activity supports the management and investment of approximately \$3 billion held in trust for Tribes and individual Indians. Resources support the implementation of trust management reform efforts and the accurate collection, investment, disbursement, and provision of timely financial information to Indian Tribes and individual Indian monies (IIM) account holders.

This appropriation funds a program to consolidate fractional interests in Indian lands. Funds will be used to purchase small fractional interests from willing individual Indian land-owners. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. Activities slated for 2002 include redistribution of *Youpee* interests and estate planning. Additionally, the Department will be able to lease tracts of land with consent of fewer than 100 percent of the owners, which will assist in using previously issued tracts, including those containing oil and gas resources. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462) and other authorities.

Commencing with 2000, most Tribal trust funds, including special funds, managed by the Office of Special Trustee were reclassified as non-budgetary. Ownership of these funds did not change, nor did the Federal Government's management responsibilities; changes were made for presentation purposes only. Some Tribal trust funds will remain budgetary, in either this Tribal Special Fund or the Tribal Trust Fund presented later in this section. Funds in the Tribal Special Fund are those not designated in law as a trust, and generally are funds held and invested to carry out obligations of the Secretary of the Interior.

The unobligated balances reflected above include only those assets invested in U.S. Treasury securities; most of the assets of these funds are in investments held outside Treasury.

This consolidated display presents the activities associated with the following accounts:

Cochiti Wetfields Solution.—In 1994, the Army Corps of Engineers transferred \$4 million pursuant to P.L. 102-358 to fund the Interior's responsibilities under the settlement agreement between Cochiti Tribe, the Corps, and Interior. The Secretary of the Interior is responsible for maintenance, repair, and replacement of a drainage system constructed by the Corps for the Cochiti Pueblo.

Tribal Economic Recovery Fund.—This fund is authorized by the Three Affiliated Tribes and Standing Rock Sioux Tribe Equitable Compensation Act of 1992 (P.L. 102-575) and holds funds which have been appropriated pursuant to the Act. Beginning in 1998, interest earned on the principal of this fund is available for both Tribes for economic development, education, and social services programs.

Southern Arizona Water Rights Settlement Act.—This Cooperative Fund was established to provide a source of funds to carry out the obligations of the Secretary under sections 303, 304, and 305 of the Act (Title III, P.L. 97-293, 96 Stat. 1274-1285). Only interest accruing to the fund may be expended.

Tribal Trust Funds.—Tribal funds are deposited into a consolidated account in the U.S. Treasury pursuant to: (1) general or specific acts of Congress and (2) Federal management

of Tribal real properties, the titles to which are held in trust for the Tribes by the United States. These funds are available to the respective Tribal groups for various purposes, under various acts of Congress, and are subject to the provisions of Tribal constitutions, bylaws, charters, and resolutions of the various Tribes, bands, or groups.

These funds may be used by the Tribe to make \$11.5 million available to the State of Montana as a loan to assist in financing Tongue River Dam project costs; land and natural resources administration, planning, and development; land acquisition; and any other purpose determined by the Tribe.

In addition, this fund holds \$31.5 million for the enlargement and repair of the Tongue River Dam project.

The budget assumes that the first oil and gas lease sale in the coastal plain of the Arctic National Wildlife Refuge (ANWR) would be held in 2004, resulting in the leasing of 400,000 to 600,000 acres and producing \$2.4 billion in receipts from bonuses which would be shared 50/50 between the Federal government and the State of Alaska. The Federal share of the first lease sale bonus bids would be used by the Department of Energy to fund increased solar and renewable energy technology research and development over seven years.
