The FDA is responsible for protecting the public health by assuring the safety, efficacy, and security of human and veterinary drugs, biological products, medical devices, our Nation's food supply, cosmetics, and products that emit radiation. The FDA is also responsible for advancing the public health by helping to speed innovations that make medicines more effective, safer, and more affordable; and helping the public get the accurate, science-based information they need to use medicines and foods to improve their health. The Budget includes funding for counterterrorism activities that specifically relate to the protection of products or therapies regulated by the FDA (such as drugs, vaccines, foods, and animal feed), and the availability of medical products for public health preparedness in the event of an attack. Specifically, the Budget requests increased funding for food defense, drug safety, medical device reviews, and moving expenses for a new Human Drugs facility in White Oak, Maryland.

The Vaccine Injury Compensation program was established pursuant to Public Law 99-660 and Public Law 100-203, and serves as a source of funds to pay claims for compensation for vaccine related injury or death. Payment of claims associated with vaccine related injury or death occurring before October 1, 1988 are financed from the General Fund and are reflected in this account. Given sufficient carry-over funds from prior years' appropriations to pay for the balance of the pre-1988 backlog of claims yet to be adjudicated, no appropriation is requested in 2006 to cover payment of pre-1988 claims. By statute, no new claims are accepted for this account. Payment of claims associated with vaccine related injury or death occurring after October 1, 1988 are reflected in the Vaccine improvement trust fund account.

ADMINISTRATIVE PROVISIONS, INDIAN HEALTH SERVICE

Appropriations in this Act to the Indian Health Service shall be available for services as authorized by 5 U.S.C. 3109 but at rates not to exceed the per diem rate equivalent to the maximum rate payable for senior-level positions under 5 U.S.C. 5376; hire of passenger motor vehicles and aircraft; purchase of medical equipment; purchase of reprints; purchase, renovation and erection of modular buildings and renovation of existing facilities; payments for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; and for uniforms or allowances therefor as authorized by 5 U.S.C. 5901-5902; and for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

In accordance with the provisions of the Indian Health Care Improvement Act, non-Indian patients may be extended health care at all tribally administered or Indian Health Service facilities, subject to charges, and the proceeds along with funds recovered under the Federal Medical Care Recovery Act (42 U.S.C. 2651-2653) shall be credited to the account of the facility providing the service and shall be available without fiscal year limitation. Notwithstanding any other law or regulation, funds transferred from the Department of Housing and Urban Development to the Indian Health Service shall be administered under Public Law 86-121 (the Indian Sanitation Facilities Act) and Public Law 93-638, as amended.

Funds appropriated to the Indian Health Service in this Act, except those used for administrative and program direction purposes, shall not be subject to limitations directed at curtailing Federal travel and transportation.

[None of the funds made available to the Indian Health Service in this Act shall be used for any assessments or charges by the Department of Health and Human Services unless identified in the

budget justification and provided in this Act, or approved by the House and Senate Committees on Appropriations through the reprogramming process. Personnel ceilings may not be imposed on the Indian Health Service nor may any action be taken to reduce the full time equivalent level of the Indian Health Service below the level in fiscal year 2002 adjusted upward for the staffing of new and expanded facilities, funding provided for staffing at the Lawton, Oklahoma hospital in fiscal years 2003 and 2004, critical positions not filled in fiscal year 2002, and staffing necessary to carry out the intent of Congress with regard to program increases.]

Notwithstanding any other provision of law, funds previously or herein made available to a tribe or tribal organization through a contract, grant, or agreement authorized by title I or title V of the Indian Self-Determination and Education Assistance Act of 1975 (25 U.S.C. 450), may be deobligated and reobligated to a self-determination contract under title I, or a self-governance agreement under title V of such Act and thereafter shall remain available to the tribe or tribal organization without fiscal year limitation.

None of the funds made available to the Indian Health Service in this Act shall be used to implement the final rule published in the Federal Register on September 16, 1987, by the Department of Health and Human Services, relating to the eligibility for the health care services of the Indian Health Service until the Indian Health Service has submitted a budget request reflecting the increased costs associated with the proposed final rule, and such request has been included in an appropriations Act and enacted into law.

With respect to functions transferred by the Indian Health Service to tribes or tribal organizations, the Indian Health Service is authorized to provide goods and services to those entities, on a reimbursable basis, including payment in advance with subsequent adjustment. The reimbursements received therefrom, along with the funds received from those entities pursuant to the Indian Self-Determination Act, may be credited to the same or subsequent appropriation account which provided the funding. Such amounts shall remain available until expended.

Reimbursements for training, technical assistance, or services provided by the Indian Health Service will contain total costs, including direct, administrative, and overhead associated with the provision of goods, services, or technical assistance.

[The Indian Health Service may purchase 8.5 acres of land for expansion of parking facilities at the W.W. Hastings hospital in Tahlequah, Oklahoma using third party collections subject to advance approval from the House and Senate Committees on Appropriations.

The Centers for Disease Control and Prevention (CDC) supports a number of categorical programs designed to improve the health, safety, and protection of all Americans. These programs include immunization, HIV prevention, chronic disease prevention and health promotion, infectious disease control, occupational safety and health, injury prevention and control, environmental health, and programs that reduce the occurrence of birth defects and developmental disabilities. CDC also supports bioterrorism and emergency response activities. Funding for these activities is included in the Public Health and Social Services Emergency Fund provided to CDC from the Office of the Secretary of Health and Human Services. The Budget request for the 317 immunization program assumes enactment of a legislative proposal that reduces the discretionary request by \$100 million.

The Budget includes legislative proposals for the Vaccines for Children (VFC) program to expand access to immunizations for VFC-eligible children. Legislation amending the Vaccines for Children program will be proposed to allow underinsured children to receive immunizations at State and local public health clinics and to lift price caps. These proposals will result in approximately \$100 million in savings from the CDC discretionary 317 immunization program. The Budget request for the 317 program assumes enactment of this proposal.

State Grants and Demonstrations provides funding for grant programs established under several legislative authorities. Title II of the Ticket to Work and Work Incentives Improvement Act of 1999 (P.L. 106-170), established two grant programs. Section 203 provides funding for Medicaid grants to support the design, establishment and operation of State infrastructures to help working people with disabilities purchase health coverage through Medicaid. Section 204 provides funding for States to establish Demonstrations to Maintain Independence and Employment, which will provide Medicaid benefits and services to working individuals who have a condition that, without medical assistance, will result in disability.

Part of Title II of the Trade Act of 2002 (P.L. 107-210) amends the Public Health Service Act by adding section 2745, which addresses promotion of qualified high-risk pools for assisting "high-risk" individuals who may find private health insurance unavailable, unaffordable, or undesirable. This section establishes: (1) seed grants to States for the creation and initial operation of a qualified high-risk pool and (2) grants to States for operation of qualified high-risk pools.

CMS now administers several programs enacted under the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MNA) (Public Law 108-173). The Pilot program for National and State Background Checks is authorized to spend a total of \$25 million during fiscal years 2004 through 2007 to identify efficient, effective, and economical procedures for long-term care facilities or providers to conduct background checks on prospective employees who would have direct access to patients.

The Federal Reimbursement of Emergency Health Services Furnished to Undocumented Aliens has an annual appropriation of \$250 million beginning in FY 2005 and continuing through FY 2008. The funding is available to reimburse eligible providers for furnishing emergency health services to undocumented aliens.

Transitional grants totaling \$62.5 million each year in FY 2005 and FY 2006 are available to States that operate State Pharmaceutical Assistance Programs. These funds will be used to educate Part D eligible individuals enrolled in the Program about the prescription drug coverage available through Part D of the MMA.

P.L. 104-191 established the Health Care Fraud and Abuse Control (HCFAC) account within the Federal hospital insurance trust fund and appropriated funds, to be available without further appropriation, from the trust fund to the HCFAC account for specified health care fraud and abuse control activities of the Department of Health and Human Services (HHS), the Department of Justice, and other agencies.

This schedule reflects the estimated distribution of the account for 2005 and 2006. As required by statute, actual 2005 and 2006 agency distributions will be determined by the Secretary of HHS and the Attorney General consistent with the Administration's priorities.

The 2006 Budget includes a discretionary request for efforts to safeguard Medicaid and the Medicare prescription drug benefit, and will supplement the mandatory funds made available by P.L. 104-191.

It is important that these cost increases and new enforcement investments be fully funded. The Administration is proposing to fund them as contingent appropriations. To ensure full funding of the new enforcement investments, the Administration proposes to employ a budget enforcement mechanism that allows for an adjustment by the Budget Committees to the section 302(a) allocation to the Appropriations Committees found in the concurrent resolution on the budget. In addition, the Administration will also seek to establish statutory spending limits, as defined by section 251 of the Balanced

Budget and Emergency Deficit Control Act of 1985, and to adjust them for this purpose. These adjustments would only be permissible if the use of these funds was clearly restricted to the specified purpose. The maximum allowable adjustment to the 302(a) allocation and/or the statutory spending limit would be \$80 million for 2006 (see chapter 15 in *Analytical Perspectives*).

This legislative proposal includes provisions to introduce an option available to all states to participate in an alternative financing system for child welfare that will better meet the needs of each state's foster care population. States choosing to participate face far fewer administrative burdens and will receive funds in the form of flexible grants. Also included is a legislative change to clarify the process for determining Title IV–E eligibility in the Foster Care Program.

Note.—The reimbursable program (HCFA) in the Administration on Aging (AoA) reflects the estimated distribution of the allocation account for 2006. Actual 2006 distributions will be determined by the Secretary of HHS and the Attorney General.

Administration on Aging.—The proposed level will provide continued funding for core formula grant programs that provide nutrition, supportive services and caregiver support services through the aging network. These programs are part of a comprehensive system of support for older people and their families.

The proposed budget will also provide continued support for the Department's efforts to create a more balanced system of long term care and build partnerships to enhance the delivery of an integrated, consumer-oriented, and cost effective system of health and social supports to seniors and their family caregivers. Re-balancing the long-term care system will provide older Americans more choices and opportunities for independence.

HHS Service and Supply Fund (SSF) provides a wide range of logistical and support services to components of the Department and other Federal agencies. The Program Support Center line includes activities such as personnel and payroll administration, financial management operations, and administrative services, including acquisitions management, building and property management, telecommunication services, medical supplies repackaging and distribution services, and the Federal Occupational Health Service. The Office of Secretary activities line includes the fund manager, departmental contracts, audit resolutions, Commissioned Corps force management, information technology, web management, claims, and acquisition integration and modernization.

Most Commissioned Corps officers work for agencies in the Department of Health and Human Services and are reflected in the agencies' personnel summaries. However, some officers are assigned to other Federal agencies. The allocation account section in the following personnel summary shows officers assigned to other agencies which are paid directly by that agency, either through an allocation account or by directly citing that agency's appropriation.

The Office of Inspector General (OIG) identifies and recommends actions to correct fraud, waste, and abuse in HHS administered and assisted programs and operations through audits, evaluations, and investigations.

In addition to the discretionary resources appropriated to the OIG, the Health Insurance Portability and Accountability Act of 1996 makes available mandatory funding for use by the OIG. These funds are used to combat Medicare, Medicaid, and State Children's Health Insurance Program (SCHIP) fraud, waste, and abuse through a coordinated Health care fraud and abuse control (HCFAC) program with the Department of Justice. The following table shows total funding resources for the OIG:
