OBJECT CLASSIFICATION

Object Classification Narrative

This report presents the Federal Government’s obligations in terms of the object classification prescribed in section 83 of OMB Circular No. A-11. Object classes describe the “nature” of the service or article for which obligations are first incurred, regardless of the purpose, function, or program served.

Object classes. The object classes are divided into the following five major groups:

- 10 Personnel Compensation and Benefits
- 20 Contractual Services and Supplies
- 30 Acquisition of Assets
- 40 Grants and Fixed Charges
- 90 Other

A new object class code, 11,6 Military personnel – basic allowance for housing, was added this year. This object class code includes basic allowance for housing given to personnel of the uniformed service, including the Commissioned Corps of the Public Health Service and National Oceanic and Atmospheric Administration.

The tables included in this report provide the amounts shown in the object class schedules of the 2013 Budget *Appendix*. The 2011 column reflects the actual obligations recorded in the prior year, the 2012 column reflects estimated obligations incurred in the current year, and the 2013 column reflects estimated obligations for all proposed appropriations in the budget year. Since direct obligations are financed by taxpayers, the reports details direct obligations by each individual object class code, whereas reimbursable obligations, which are financed by offsetting collections received from the sale of goods and services, are shown on one total line.

The Budget includes a Future Disaster Costs allowance (\$500 million in 2012 and \$5,500 in 2013) as a placeholder in object class code 92.0, Undistributed, since those needs are not known in advance. The Budget also includes savings from a legislative proposal to improve Treasury debt collection (-\$ 12 million in 2013) in object class code 92, Undistributed since the savings from this proposal span across numerous agencies and accounts.

OBLIGATIONS AND OFFSETTING RECEIPTS AND COLLECTIONS

EXPLANATORY NOTES

OFFSETTING COLLECTIONS AND OFFSETTING RECEIPTS TABLES

The collections and receipts that have been offset against gross obligations in deriving net obligations are presented so that the user may adjust gross obligations to whatever level would be most useful.

The two types of offsets are “offsetting collections” and “offsetting receipts.” Both result from the same types of transactions, i.e., either business-like or market-oriented payments from the public or payments exclusively between Federal Government accounts.

For more information on receipts, offsetting receipts, and offsetting collections, see Chapter 12, “Budget Concepts,” in the *Analytical Perspectives* volume of the 2013 Budget.

TABLE 3: Bridge from Gross to Net Obligations. This table presents the offsetting collections and offsetting receipts that are deducted from total obligations before arriving at net obligations. It presents the offsetting collections and offsetting receipts deducted by each cabinet department and major agency. Offsetting receipts that are not distributed by agency in the 2013 Budget are included in the sections titled “All Branches,” “Executive Branch,” and “Undistributed Offsetting Receipts.”

Offsetting collections are presented under the heading “Credited to appropriation or fund accounts.” Those from other Federal Government accounts are on the line called “Other Government accounts (Federal and trust).” The offsetting collections from the public that are Governmental in nature (e.g., tax receipts, compulsory user charges, custom duties, license fees) but required by law to be credited to expenditure accounts are presented on the “Offsetting Governmental collections” line. Those from the public as payment for business-type transactions are on “The public (non-Federal sources)” line.

Offsetting receipts include offsetting collections from the public that are Governmental in nature but are not authorized to be credited to expenditure accounts. It is required by law that they be treated as offsetting, and they are presented on the “Offsetting Governmental receipts” line. Offsetting receipts from the public’s business-type payments are presented on the “Proprietary receipts from the public” line. The offsetting receipts from other Federal Government accounts are presented under “Intragovernmental receipts.” Payments within the same fund group – trust to trust or Federal to Federal – are presented as “Intrafund transactions,” while payments from one fund group – either Federal or trust funds – to the other fund group are presented as “Interfund transactions.”

TABLE 4: Undistributed Offsetting Receipts. This table presents more detail on the offsetting receipts that are not distributed by agency. As shown in Table 3, all offsetting collections and most offsetting receipts are deducted from total agency obligations before arriving at net obligations. The offsetting collections presented as “Credited to appropriations or fund accounts” in the bridge table described above are deducted at the account level. The offsetting receipts must be distributed – that is, a determination must be made as to which agency’s obligations will be netted. Rather than deducting them from any agency, decisions have been made in a few cases to deduct such receipts before striking government-wide totals. These amounts are called “undistributed offsetting receipts.” It should be noted that the universe of amounts that are not distributed by agency is larger than the amounts that are not distributed by function. In reports and tables by function, the following offsetting receipts that are not distributed by agency are distributed by function:

- Interest received by on-budget trust funds (sub function 902); and
- Interest received by off-budget trust funds (sub function 903).
