

DEPARTMENT OF DEFENSE—MILITARY PROGRAMS

MILITARY PERSONNEL

ACTIVE AND RESERVE FORCES

These appropriations finance the personnel costs of the Active, Reserve, and Guard forces of the Army, Navy, Air Force, and Marine Corps. They include pay and allowances of officers, enlisted personnel, cadets and midshipmen, permanent change of station travel, inactive duty and active duty training, accruing retirement and health benefits, enlistment, reenlistment and affiliation bonuses, special and incentive pays, and other personnel costs. Over the past several years, significant pay increases, coupled with new requirements to accrue funds for future health benefits, have significantly increased the requirements of these appropriations.

Included in these accounts is funding for a 1.0 percent across-the-board pay raise. With this and other compensation increases, military salaries, as defined by Regular Military Compensation, which includes basic pay, a tax-free allowance for housing or the value of in-kind housing, a tax-free allowance for subsistence (food) and the tax savings because these allowances are tax free, will average more than \$56,000 for enlisted personnel and more than \$105,000 for officers. Many military personnel also receive one-time or yearly bonuses, monthly special pays, other allowances, and significant non-cash benefits, including comprehensive health care. Also included in these appropriations are the amounts required to implement items contained in the Department of Defense's (DOD's) proposed 2014 Authorization Act, which will be submitted in support of the 2014 President's Budget.

The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108-375) provided permanent, indefinite appropriations to finance the cost of accruing TRICARE benefits of uniformed servicemembers. These costs are included in the DOD discretionary total.

The Budget includes proposals to adjust beneficiary cost shares for TRICARE Prime/Standard/Extra programs for retirees under age 65, and to implement annual enrollment fees for the TRICARE-for-Life (TFL) program for Medicare-eligible retirees. These proposals are phased-in over a 4 or 5-year period. The Budget also includes a proposal to adjust the prescription pharmacy co-payments over a 10-year period for active duty families and all retirees. Also included is a proposal to realign the TRICARE health plan benefit year from a fiscal year basis to a calendar year basis for the calculation to align annual adjustments with the retiree cost-of-living adjustment (COLA). In addition to discretionary savings in the Defense Health Program, the proposal reduces future accrual costs, resulting in reduced Services' discretionary contributions to the Medicare Eligible Retiree Health Care Fund.

The following summary table reflects the actual base and supplemental 2013 amounts and the base 2014 military personnel appropriation request and the additional amounts for TRICARE accrual funded from permanent, indefinite authority. Total base 2014 military personnel requirements are \$137,076 million.

The Reserve Officers' Training Corps (ROTC) program provides training for reserve and regular officer candidates who have enrolled in the course while attending a college at which an ROTC unit has been established. College graduates who satisfactorily complete the advanced course of the program are commissioned and may be ordered to active duty for a minimum of three years.

The Reserve Officers' Training Corps Vitalization Act of 1964, as amended, authorizes a limited number of scholarships for ROTC students on a competitive basis. Successful candidates for the scholarships generally serve a minimum period of four years on active duty upon graduation and appointment as a commissioned officer. A number of scholarship recipients will fulfill their entire obligation in the Reserve components.

The Armed Forces Health Professions Scholarship Program provides a source of active duty commissioned officers for the various health professions.

The numbers of commissioned officers graduated from these programs are summarized below:

OPERATION AND MAINTENANCE

These appropriations finance the cost of operating and maintaining the Armed Forces, including the Reserve components and related support activities of the Department of Defense, except military personnel pay, allowances, and travel costs. Included are amounts for training and operation costs, pay of civilians, contract services for maintenance of equipment and facilities, fuel, supplies, and repair parts for weapons and equipment. Financial requirements are influenced by many factors, including the number of aircraft squadrons, Army brigades and Marine Corps regiments, installations, military strength and deployments, rates of operational activity, and the quantity and complexity of major equipment (aircraft, ships, missiles, tanks, et cetera) in operation.

Federal Funds

This account transfers funds to operation and maintenance and military personnel appropriations, for Defense activities that purchase foreign currencies, to finance upward adjustments of recorded obligations due to foreign currency fluctuations above the budget rate. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this appropriation and are available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Department to withdraw unobligated balances from operation and maintenance and military personnel appropriations from prior years. By statute (10 U.S.C. 2779(d)(3)), the total amount of discretionary budget authority in this transfer account may not exceed \$970,000,000.

The Defense Health Program (DHP) provides care to current and retired members of the Armed Forces, their family members, and other eligible beneficiaries. Beneficiaries may obtain care from the Military Department medical and dental facilities or through the civilian health care network under the TRICARE program.

Accrual accounting for Medicare-eligible beneficiaries began in 2003 and the health care for these beneficiaries is funded from the Department of Defense Medicare-Eligible Retiree Health Care Fund. The DHP also manages Research and Development funds appropriated by Congress, which support medical research and health information management systems development.

The DHP and Department of Veterans Affairs (VA) share the goal of improving the access, quality, and cost effectiveness of health care provided by VA and DOD. To this end, each Department contributes a minimum of \$15 million per year for joint health care incentives.

The Budget assumes enactment of a comprehensive package of health care enrollment fees, deductible, and co-pay changes phased in over several years—cost share generally tied to a simple percentage of the member's gross retired pay. Once the reform is fully implemented, the benefits are still generous with the average beneficiary cost share well below the original 27% of total health care costs. The current reform proposals include: increase in enrollment fees and deductibles for retirees under age 65; modest enrollment fees for Medicare-eligible retirees over age 65 (with full grandfathering of those Medicare-eligible retirees who are already receiving TRICARE benefits at the time of enactment); increases pharmacy co-pays for retirees and military family members, but not active duty members, to incentivise the use of mail order and generic drugs; exempts survivors of members who die on active duty and medically retired and their family members to protect the most vulnerable.

The requested appropriation for the Defense Health Program is over \$33 billion. Contingent upon the enactment of authorizing legislation of the health care proposals, the appropriation shall be reduced by approximately \$297 million.

Health care is provided in military facilities as follows:

	2012	2013	2014
Inpatient Facilities	56	56	56
Outpatient Clinics	365	361	361
Dental Clinics	281	249	249

The DHP is staffed by:

	2012	2013	2014
Civilian work years (thousands)	65	68	68
Military personnel (thousands)	85	86	86

The number of eligible beneficiaries of the Defense Health Program is estimated as follows:

The Defense Environmental Restoration Program provides for the identification, investigation, and cleanup of contamination resulting from past DOD activities. The Department has 27,553

sites that have a remedy in place or a response completed, leaving 5,495 open sites at active and Base Realignment and Closure (BRAC) military installations and 1,821 open sites at Formerly Used Defense Sites (FUDS). For these remaining open sites, DOD is engaged in either a study to determine the extent of the contamination or the actual clean-up of the contamination.

The Department's environmental restoration program is funded by five separate environmental restoration accounts, one for each military department, one for defense agencies and one for FUDS. The first four accounts, Army, Navy, Air Force and defense-wide environmental restoration accounts cover funding for active installations, and are shown separately from the FUDS program environmental restoration account, which funds environmental cleanup on properties no longer owned and/or used by DOD. These five accounts include restoration activities ranging from inventory to preliminary assessment, then to investigation and cleanup of contamination, and finally to closeout of a site. BRAC sites are funded separately under the relevant BRAC account.

PROCUREMENT

Appropriations in this title support the acquisition of aircraft, ships, combat vehicles, satellites and their launch vehicles, weapons and all capital equipment. Major systems in production typically are budgeted annually to maintain production continuity through the life of the acquisition program and in several instances multiyear contracts are used to ensure stability of production and economies of scale. Initial spares and support as well as the modification of existing equipment are also funded. Resources presented under the Procurement title contribute primarily to achieving the Department's annual goals of assuring readiness and sustainability, transforming the force for new missions, and reforming processes and organizations. Performance targets in support of these goals contribute to the Department's efforts to mitigate force management and operational risk, future challenges risk, and institutional risk.

Procurement in support of the ground forces encompasses wheeled and tracked vehicles, rotary wing aircraft, ammunition and equipment procured to meet inventory requirements dictated by the force size and anticipated mission requirements. Similarly, procurement in support of naval forces includes ships, equipment for the ships, aircraft, munitions, the Marine Corps ground element, and other equipment to sustain future naval operations. The Air Force programs support the broad range of missions and include aircraft, tactical missiles, ballistic missile weapons and associated surveillance and space assets keyed to the strategic deterrence mission, munitions and other mission support equipment. Advance appropriations are being requested for VIRGINIA class submarines.

This program, first authorized in Public Law 102-484 (the 1992 Authorization Act), is to encourage commercial firms to use idle government owned, contractor-operated Army ammunition manufacturing facilities to ensure a viable industrial base for the manufacture of ammunition.

As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from loan guarantees committed in 1992 and beyond (including modifications of loan guarantees that resulted from commitments in any year). The amounts in this account are a means of financing and are not included in the budget totals.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Appropriations in this title support modernization through basic and applied research, fabrication of technology-demonstration devices, and development and testing of prototypes and full-scale preproduction hardware. This work is performed by contractors, government laboratories and facilities, universities, and nonprofit organizations. Research and development programs are funded to cover annual needs. Resources presented under the RDT&E title contribute primarily to achieving the Department's annual goals of transforming the force for new missions and reforming processes and organizations.

Funds for each fiscal year are available for obligation for a two-year period beginning on the first day of that fiscal year.

This year's Budget provides for major technology and development efforts. These include science and technology programs, development of weapons systems and supporting systems, including missile defense, and support of test and evaluation programs and necessary infrastructure. The Department continues to emphasize technology efforts that ensure that the Nation will maintain a technological advantage over potential adversaries.

DOD's request reflects the partnership between NNSA and DOD to modernize the nuclear deterrent. As in last year's Budget, DOD is carrying a separate account for the outyears that contains the amounts for NNSA's Weapons Activities and Naval Reactors. These funds, shown in the table below, underscore the close link between these activities and DOD nuclear requirements and missions. OMB will ensure that these future budget year allocations to NNSA occur in the required amounts.

CONTRIBUTIONS FOR RENEWABLE ENERGY IMPACT ASSESSMENTS AND MITIGATION, DEFENSE

Contributions of funds from applicants for renewable energy projects filed with the Secretary of Transportation pursuant to section 44718 of title 49, United States Code. Contributions are used to conduct studies of potential measures to mitigate adverse impacts of such projects on military operations and readiness. As applicable, contributions may also be reallocated to other DOD appropriations and used to offset the costs of measures undertaken by the Secretary of Defense to mitigate adverse impacts of approved projects on military operations and readiness.

MILITARY CONSTRUCTION

The Military Construction programs are intended to provide facilities required as a result of new weapon systems entering the inventory, including aircraft and naval vessels, and other high priority initiatives. The Program also continues initiatives to realign the global defense posture, improve living and working conditions, reduce operating costs, and increase productivity. The Program also supports energy conservation by upgrading or replacing facilities which have become functionally obsolete or can be made more efficient through relatively modest investments in improvements. Also included in this request are resources required to clean up and dispose of property consistent with the five closure rounds required by the Base Closure Acts of 1988 and 1990.

Resources presented under the Military Construction title contribute primarily to achieving the Department's annual performance goals of assuring readiness and sustainability.

FAMILY HOUSING

These appropriations finance all costs associated with construction, improvements, operations, maintenance, utilities, privatization, and leasing of all military family housing. In addition to quality of life enhancements, the program contains initiatives to reduce operating costs and conserve energy by upgrading or replacing facilities which can be made more efficient through relatively modest investments in improvements.

The Family Housing Improvement Fund (FHIF) was created to finance the use of innovative methods authorized in the National Defense Authorization Act for Fiscal Year 1996 (Public Law 104-106), under the Military Housing Privatization Initiative (MHPI) to meet the Department's housing needs. The MHPI authorities allow the Department to use limited partnerships, make direct and guaranteed loans, provide equity investments, and convey Department-owned property to stimulate the private sector to increase the availability of affordable, quality housing for military personnel. The funds required to privatize military family housing are transferred from the military departments' family housing construction accounts into the Family Housing Improvement Fund.

Resources presented under the Family Housing title contribute primarily to achieving the Department's annual performance goals of assuring readiness and sustainability.

Section 662 of the National Defense Authorization Act for 1992 and 1993, Public Law 102-190, established the Voluntary Separation Incentive (VSI) Fund to more effectively manage and account for the costs of the Voluntary Separation Incentive program. The VSI program provides annual payments to former active-duty servicemembers who voluntarily left service after serving more than six but less than 20 years. For all members who left service after December 31, 1992, the Department of Defense was required to deposit the total present value of their future VSI benefits into the VSI fund by the time authority to approve VSI benefits ended on December 31, 2001. DOD was also required to

cover the unfunded benefits of former members who separated before January 1, 1993 through yearly, actuarially-determined Government contributions from the DOD military personnel appropriations. Permanent authority to make these payments is contained in section 8044 of the 1997 Defense Appropriations Act. The fund also receives interest on its investments.
