

## CUTS, CONSOLIDATIONS, AND SAVINGS

Whether the Budget is in surplus or deficit, wasting taxpayer dollars on programs that are outdated, ineffective, or duplicative is wrong. Given the current fiscal environment, it is critical that we redouble our efforts to scour the Budget for waste and make tough decisions about reducing funding for or ending programs that are laudable, but not essential. This exercise is difficult but necessary, and it builds on efforts the Administration has undertaken since the President first took office.

The Administration has already made significant progress in cutting waste in areas across the Government. We have successfully targeted a series of programs for elimination, reduction, or consolidation. For example, at the Department of Defense, we eliminated the F-22 fighter aircraft that were no longer needed as part of the new defense strategy developed by our military leadership, and the Expeditionary Fighting Vehicle, which was performing poorly. These and other program terminations at the Pentagon will save over \$20 billion. At the Department of Agriculture (USDA), we closed or consolidated 260 USDA field offices, saving \$58 million. At the Department of Health and Human Services, we ended three duplicative health programs, saving taxpayers over \$380 million.

As part of the President's Campaign to Cut Waste, we have cut unnecessary travel and conference spending by billions of dollars, and overall administrative spending in areas such as printing, fleet management, and advisory service contracts by billions more. In aggregate, agencies have targeted \$8.8 billion in annual administrative savings by the end of 2013 as detailed in this section. The Administra-

tion has already announced significant progress made toward this goal and will provide periodic updates on savings achieved during the year. We are selling off excess Federal real estate. We are also leveraging the buying power of the Federal Government to save money on the purchase of commodity goods such as office supplies and shipping services.

The President has also engaged the Federal workforce and the public in cutting waste through his SAVE Award program, tapping the knowledge and expertise of frontline employees. Over the last three years, 66 SAVE Award ideas have been included in the President's Budget, ranging from ending the mailing of the Federal Register to Government offices to automatically powering off computers at the Department of Labor.

In each of the President's first three Budgets, he identified, on average, more than 150 terminations, reductions, and savings proposals, totaling nearly \$25 billion each year. In last year's Budget, the Administration detailed 210 cuts, consolidations, and savings proposals, totaling more than \$24 billion in 2013. This year, the Budget includes a total of 215 cuts, consolidations, and savings proposals, which are projected to save more than \$25 billion in 2014, and \$539 billion through 2023.

Discretionary and mandatory cuts, consolidations, and savings proposals are detailed on the following tables, as well as savings activities agencies are undertaking that require no further action by the Congress, many of which were suggested through the President's SAVE Award. Savings from program integrity proposals, to-

taling \$98 billion through 2023, are detailed in the Budget Process chapter of the Analytical Perspectives volume.

As these tables show, the Budget includes a robust package of proposals that modify Medicare provider payments totaling \$306 billion over the next 10 years. These include a number of measures detailed in Table S-9 (see Summary Tables section of this volume), including a proposal to align Medicare drug payment policies with Medicaid rebate policies for low-income beneficiaries, allowing Medicare to benefit from lower drug prices. This change alone will save \$123 bil-

lion over the next 10 years. The Budget takes other critical steps to save money, such as closing the loophole in current law that allows people to collect both full disability benefits and unemployment benefits that cover the same period of time. Shutting this loophole will save \$1 billion over 10 years. The single biggest consolidation proposed this year is in the area of science, technology, engineering, and mathematics (STEM) education, where the Administration is proposing a bold restructuring of STEM education programs—consolidating 90 programs and realigning ongoing STEM education activities to improve the delivery, impact, and visibility of these efforts.
