Data-Driven Innovation (DDI) funding promotes increased and improved use of data and evaluation to improve the impact and cost-effectiveness of Federal Government programs. OMB transfers DDI funds to Federal agencies to lead cross-program projects and evaluations. Examples of such projects and evaluations include: (1) implementing new grant designs that reflect data-driven, outcome-focused approaches; (2) expanding the use of rigorous evaluation and other evidence-building tools, including use of rapid experimentation for continuous improvement; (3) increasing access to and utilization of high quality data for evaluation, performance measurement, and other types of analyses; and (4) partnering with innovative leaders in States, localities, foundations, research organizations, and the private sector experts to create conditions for cost-effective change at all levels of government.

Funded from fiscal year 2010 through 2013, the Partnership Fund invested over \$29 million in 11 pilot projects, which are estimated to lead to total savings of up to \$200 million annually if the pilots are implemented more broadly. As evaluations are completed and results finalized, OMB will work with Federal agencies, State and local governments, and other stakeholders to disseminate lessons learned and apply the tested tools and methods across programs and levels of government. Early pilot results show how access to data from financial institutions could help to detect overpayments in the Unemployment Insurance program, how automated risk assessment tools using integrated data from State Medicaid and the Federal Medicare programs could help identify provider fraud, and how a shared services solution could help States verify Medicaid provider eligibility.

Information Technology Oversight and Reform (ITOR) funding provides the Government with a resource base controlled by the Director of the Office of Management and Budget (OMB) to support activities and tools that enhance the efficiency and effectiveness of Federal investments in information technology (IT). ITOR goals are to: (1) reduce waste and duplication, and ensure that IT investments stay within their budgets and deliver on time, (2) help agencies deliver IT investments that maximize the Government's productivity and customer satisfaction, and (3) expand the use of data and analytics to support agency IT portfolio management. In addition, ITOR funding provides for continued enhancements to OMB's oversight of cybersecurity threat mitigation activities, with the goals of improving agency reporting and analysis of cybersecurity activities, and migrating to a government-wide, continuous diagnostics and mitigation framework.

Information Technology Oversight.—Under the direction of the Federal Chief Information Officer (CIO), ITOR funding will be used to enhance transparency, data collection, analytics, and technical assistance of Federal IT investments. ITOR oversight activities will support continued operations of and enhancements to the Federal IT Dashboard, improving the public's view of the Government's approximately \$80 billion annual investment in IT. Building on data from the IT Dashboard and an integrated agency data collection process, the Federal CIO will continue to engage with agencies through TechStat and PortfolioStat reviews, identifying underperforming and duplicative investments and

taking corrective actions. ITOR oversight activities will increase the productivity of IT investments by, for example, optimizing and consolidating data centers under the Federal Data Center Consolidation Initiative, continuing the adoption of cloud computing, and increasing the use of intra-agency and interagency shared services.

Federal IT Effectiveness.—In addition to oversight activities, ITOR funding will be used to improve the effectiveness of Federal IT investments by analyzing ways to improve the digital experiences that individuals and businesses have with the Government. This may include developing standards and policies for a more effective citizen experience, common platforms for re-use across agency's citizen-facing services, and/or options to increase technology talent within the Government.

Cybersecurity.—ITOR funding for cybersecurity will expand OMB's oversight of agencies' use of cybersecurity funding and the 2015 Cybersecurity Cross Agency Priority (CAP) goal, which is focused on agencies managing information risk on a continuous basis, addressing the need for anti-phishing and malware defense measures, and advancing key identity management initiatives.

The Spectrum Relocation Fund, created by the Commercial Spectrum Enhancement Act of 2004, as amended by the Middle Class Tax Relief and Job Creation Act of 2012, reimburses Federal agencies that must relocate wireless communications systems from Federal spectrum that has been or will be reallocated to commercial use. Auction receipts associated with the reallocated spectrum are deposited into the Fund to pay eligible pre- and post-auction costs that help efficiency and effectively transition Federal agencies off of the reallocated spectrum. The Office of Management and Budget (OMB) administers the Fund in consultation with the National Telecommunications and Information Administration (NTIA) of the Department of Commerce.
