

## 24. CYBERSECURITY FUNDING

*Cybersecurity is an important component of the Administration's IT modernization efforts, and the President remains dedicated to securing the Federal enterprise from cyber-related threats. Assessments of the Federal Government's overall cybersecurity risk continue to find the Federal enterprise to be at risk. Cybersecurity budgetary priorities will continue to seek to reduce this risk based on data-driven, risk-based assessments of the threat environment and the current Federal cybersecurity posture. The President's Budget includes an estimated \$17.4 Billion which supports the protection of Federal information systems and our nation's most valuable information including the personal information of the American public. This budget funds activities in support of the President's Executive Order 13800 on Strengthening the Cybersecurity of Federal Networks and Critical Infrastructure,<sup>1</sup> the outcomes of the Report to the President on Federal IT Modernization, the Modernize IT to Increase Productivity and Security (IT Modernization) Cross Agency Priority (CAP) Goal of the President's Management Agenda (PMA),<sup>2</sup> and the National Cybersecurity Strategy.<sup>3</sup>*

### National Cybersecurity Strategy

In September 2018, the White House released the National Cyber Strategy, which reinforces ongoing work and provides strategic direction for the Federal Government to take action on short and long-term improvements to cybersecurity for the government, private sector, and individuals. The National Cyber Strategy recognizes that private and public entities have struggled to secure their systems as adversaries have increased the frequency and sophistication of their malicious cyber activities, and directs the Federal Government to do its part to ensure a secure cyber environment for our country.

### Data Collection Methodology and Adjustments

Section 630 of the Consolidated Appropriations Act, 2017 (Pub. L. No. 115-31) amended 31 U.S.C. § 1105 (a) (35) to require that an analysis of Federal cybersecurity funding be incorporated into the President's Budget. The Federal spending estimates in this analysis utilize funding and programmatic information collected on the Executive Branch's cybersecurity efforts, including cybersecurity activities and funding for all Federal agencies,

<sup>1</sup> <https://www.whitehouse.gov/presidential-actions/presidential-executive-order-strengthening-cybersecurity-federal-networks-critical-infrastructure/>.

<sup>2</sup> See <https://www.performance.gov/>.

<sup>3</sup> <https://www.whitehouse.gov/wp-content/uploads/2018/09/National-Cyber-Strategy.pdf>

not just those carried out by the Department of Homeland Security (DHS) and Department of Defense (DOD).

Agencies provide funding data at a level of detail sufficient to consolidate information to determine total governmental spending on cybersecurity. OMB provided the following guidance to agencies regarding the reporting of cybersecurity budget information for each fiscal year (FY): FY 2018 Actual levels should reflect the actual budgetary resources available for that year; FY 2019 Estimate levels should reflect the estimated budgetary resources available that year, assuming for those agencies that at the time the budget was prepared were operating under the Continuing Appropriations Act, 2019 (Division C of P.L. 115-245, as amended) that the amounts included for 2019 should reflect the annualized level provided by the continuing resolution; and FY 2020 President's Budget levels should reflect final policy decisions included in the President's Budget. Agencies were directed to coordinate responses between their Chief Financial Officers, Chief Information Officers, and Chief Information Security Officers. Submissions were assessed against prior cybersecurity budget submissions and historical security performance.

### Federal Budget Authority

The FY 2020 President's Budget includes \$17.4 billion of budget authority for cybersecurity-related activities, an \$790 million (5 percent) increase above the FY 2019 estimate. Due to the sensitive nature of some activities, this amount does not represent the entire cyber budget. The DOD was the largest contributor to the budget authority for cybersecurity-related activities submitted in the President's Budget with \$9.6 billion in cybersecurity funding in FY 2020.

Agencies reported cybersecurity budget authority in FY 2020 in order to fulfill their responsibilities for protecting information and information systems commensurate with the risk and magnitude of potential harm. However, a number of agencies also have cybersecurity-related spending that is not dedicated to the protection of their own networks, serving instead a broader cybersecurity mission. For instance, to ensure a consistent baseline level of information security, there are a number of programs that provide tools and capabilities government-wide, such as DHS's Continuous Diagnostics and Mitigation (CDM) program. Additionally, numerous programs exist that further enhance national and Federal cybersecurity focused on areas such as standards, research, and the investigation of cyber-crimes rather than specific technical capabilities.

Table 24-2 provides an overview of civilian CFO Act Agency cybersecurity spending as aligned to the NIST Cybersecurity Framework functions, Identify, Protect,

<b>Total .....</b>	<b>14,978</b>	<b>16,645</b>	<b>17,435</b>

Detect, Respond, and Recover. Table 24-3 provides a more detailed view of the information presented in Table 24-1. In addition to total cybersecurity budget amounts, the table provides amounts at the bureau level to give greater insight into the structure of agency cybersecurity budgets. Due to the sensitivity of the information, the cybersecurity budget information for DOD has not been broken out in this way.

**Non-Federal Cybersecurity Spending**

The most recent and comprehensive study of State-level cybersecurity spending revealed that the majority of States allocate between zero and two percent of their total IT budgets to cybersecurity.<sup>4 5</sup> It also revealed that cyber-

Respond .....	1,316
Recover .....	213
<b>Total .....</b>	<b>7,420</b>

This analysis excludes Department of Defense spending.

<sup>4</sup> OMB does not collect any cybersecurity expenditure data from State, local, or private entities directly.

<sup>5</sup> Source: Doug Robinson and Srini Subramanian, 2016 Deloitte-

security spending has not increased to meet increasing cybersecurity challenges, with the majority of respondents reporting such budgets remaining flat or increasing less than five percent since 2014. Recent research also indicates that State and local governments rely heavily on inter-agency collaboration and Federal programs to fund their cybersecurity activities, with 49 percent of State CISOs reporting they seek alternative funding sources from intra-state agencies or programs, and 47 percent reporting a heavy reliance on DHS-specific programs.<sup>6</sup> According to the Federal Emergency Management Administration (FEMA)’s 2017 National Preparedness Report, 82 percent of States report that cybersecurity is a high priority but only 13 percent rate themselves as proficient, which marks a three percent decline from 2012.<sup>7</sup> However, States also report cybersecurity as the biggest growth area for IT spending moving forward.<sup>8</sup>

While it is difficult to estimate how much the U.S. private sector spends on cybersecurity, the research firm Gartner releases routine estimates of cybersecurity spending globally and forecasts that cybersecurity spending is anticipated to rise more than 12 percent in 2018 to \$114 billion.<sup>9</sup> The firm further forecasted that information security spending would increase 8.7 percent in FY 2019 to \$124 billion. A similar report from Gartner in early 2017 noted that private entities are moving away from a prevention-only focus and moving toward a defense-in-depth approach by enhancing capabilities to detect and respond to cybersecurity incidents. The International Data Corporation predicts that spending will continue to grow, and at a faster rate than overall IT spending, reaching \$101.6 billion in 2020.<sup>10</sup>

**Additional Information**

The President’s Budget is also required to include an analysis of fee-based cybersecurity costs as well as gross and net appropriations or obligational authority and outlays. Agencies have not historically reported their cybersecurity budgets in this manner, and OMB continues to work with the broader Federal community to capture this information in a way that is helpful to both agencies and Congress.
