

DEPARTMENT OF DEFENSE—MILITARY PROGRAMS

MILITARY PERSONNEL

ACTIVE AND RESERVE FORCES

These appropriations finance the personnel costs of the Active, Reserve, and Guard forces of the Army, Navy, Marine Corps, Air Force, and Space Force. They include pay and allowances of officers, enlisted personnel, cadets and midshipmen, permanent change of station travel, in-active duty and active duty training, accruing retirement and health benefits, enlistment, reenlistment and affiliation bonuses, special and incentive pays, and other personnel costs.

Included in these accounts is funding for a 5.2 percent across-the-board pay raise for all pay grades, effective January 1, 2024. This pay raise is equal to the increase in the Employment Cost Index (ECI) for wages and salaries, for private industry workers as called for in law and is the highest pay raise in over two decades. With this increase, military salaries, as defined by Regular Military Compensation, which includes basic pay, a tax-free allowance for housing or the value of in-kind housing, a tax-free allowance for subsistence (food), and the tax savings because these allowances are tax free, will continue to grow and will average more than \$76,000 for enlisted personnel and more than \$136,400 for officers in FY 2024. Many military personnel also receive one-time or yearly bonuses, monthly special pays, other allowances, and significant non-cash benefits, including comprehensive health care.

The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108–375) provided permanent, indefinite appropriations to finance the cost of accruing TRICARE benefits of uniformed servicemembers. These costs are included in the Department of Defense discretionary total.

The following summary table reflects the FY 2023 enacted amounts and the FY 2024 military personnel appropriation request and the additional amounts for TRICARE accrual funded from permanent, indefinite authority. The total FY 2024 military personnel requirements are \$178,874 million.

The Reserve Officers' Training Corps (ROTC) program provides training for reserve and regular officer candidates who have enrolled in the course while attending a college at which

an ROTC unit has been established. College graduates who satisfactorily complete the advanced course of the program are commissioned and may be ordered to active duty for a minimum of three years.

The Reserve Officers' Training Corps Vitalization Act of 1964, as amended, authorizes a limited number of scholarships for ROTC students on a competitive basis. Successful candidates for the scholarships generally serve a minimum period of four years on active duty upon graduation and appointment as a commissioned officer. A number of scholarship recipients will fulfill their entire obligation in the Reserve components.

The Armed Forces Health Professions Scholarship Program provides a source of active duty commissioned officers for the various health professions.

The numbers of commissioned officers graduated from these programs are summarized below:

OPERATION AND MAINTENANCE

These appropriations finance the cost of operating and maintaining the Armed Forces, including the Reserve components and related support activities of the Department of Defense, except military personnel pay and allowances. Included are amounts for training and operation costs, pay of civilians, contract services for maintenance of equipment and facilities, fuel, supplies, and repair parts for weapons and equipment. Financial requirements are influenced by many factors, including the number of aircraft squadrons, Army brigades and Marine Corps regiments, installations, military strength and deployments, rates of operational activity, and the quantity and complexity of major equipment (aircraft, ships, missiles, tanks, et cetera) in operation.

This account transfers funds to operation and maintenance and military personnel appropriations, for Defense activities that purchase foreign currencies, to finance upward adjustments of recorded obligations due to foreign currency fluctuations above the budget rate. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this appropriation and are available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Department to withdraw unobligated balances from operation and maintenance and military personnel appropriations from prior years. By statute (10 U.S.C. 2779(d)(3)), the total amount of discretionary budget authority in this transfer account may not exceed \$970,000,000.

The Defense Health Program (DHP) provides care to current and retired members of the Armed Forces, their family members, and other eligible beneficiaries. Beneficiaries may obtain care from the Military Department medical and dental facilities or the civilian health care network under the TRICARE program.

Accrual accounting for Medicare-eligible beneficiaries began in 2003, and the health care for these beneficiaries is funded by the Department of Defense Medicare-Eligible Retiree Health Care Fund. The DHP also manages Research and Development funds appropriated by Congress, which support medical research and health information management systems development.

The DHP and the Department of Veterans Affairs (VA) aim to improve the access, quality, and cost-effectiveness of health care provided by the VA and DOD. To this end, each Department contributes a minimum of \$15 million per year for joint healthcare incentives.

The Defense Environmental Restoration Program provides for the identification, investigation, and cleanup of contamination resulting from past DOD activities. The Department has 35,468 sites that have a remedy in place or a response completed, leaving 3,267 open sites at active and Base Realignment and Closure (BRAC) military installations and 1,592 open sites at Formerly Used Defense Sites (FUDS). For these remaining open sites, DOD is engaged in the cleanup process, including investigation to determine the extent of the contamination and the actual clean-up of the contamination, as appropriate.

The Department's environmental restoration program is funded by five separate environmental restoration accounts, one for each military department, one for defense agencies and one for FUDS. The first four accounts, Army, Navy, Air Force and defense-wide environmental restoration accounts cover funding for active installations, and are shown separately from the FUDS program environmental restoration account, which funds environmental cleanup on properties no longer owned and/or used by DOD. These five accounts include restoration activities ranging from inventory to preliminary assessment, then to investigation and cleanup of contamination, and finally to closeout of a site. BRAC sites are funded separately under the BRAC account.

PROCUREMENT

Appropriations in this title support the acquisition of aircraft, ships, combat and support vehicles, satellites and their launch vehicles, weapons, munitions, and all capital equipment. Major systems in production typically are budgeted annually to maintain production continuity through the life of the acquisition program, and in several instances multiyear contracts are used to ensure stability of production and economies of scale. Initial spares and support as well as the modification of existing equipment are also funded. Resources presented under the Procurement title contribute primarily to achieving the Department's annual goals of assuring readiness and sustainability, transforming the force for new missions, and reforming processes and organizations. Performance targets in support of these goals contribute to the Department's efforts to mitigate force management and operational risk, future challenges risk, and institutional risk.

Procurement in support of the ground forces encompasses wheeled and tracked vehicles, aircraft, ammunition, and equipment to meet inventory requirements dictated by the force size and anticipated mission requirements. Similarly, procurement in support of naval forces includes ships, equipment for the ships, aircraft, munitions, tactical and ballistic missile weapons, the Marine Corps air and ground elements, and other equipment to sustain future naval operations. The Air Force programs support a broad range of missions and include aircraft, munitions, tactical and ballistic missile weapons, surveillance assets, U.S. Space Force space assets, and other mission support equipment. Procurement is also in support of missile defense and cyberspace missions.

Funds for each fiscal year are available for obligation for a three-year period beginning on the first day of that fiscal year.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Appropriations in this title support basic and applied research, as well as development, demonstration, testing, prototyping, and evaluation activities. For select Software & Digital Technology Pilot Programs, appropriations may be used for expenses for the agile research, development, test and evaluation, procurement, production, modification, and operation and maintenance. This work is performed by government employees and contractors, in government and corporate laboratories and facilities, at universities, and by nonprofit organizations. Research and development programs are funded to cover annual needs. Resources presented under the RDT&E title contribute primarily to maintaining military technical superiority.

MILITARY CONSTRUCTION

The Military Construction Program provides facilities required for new weapon systems entering the Department's inventory, including aircraft and naval vessels, and other high priority initiatives. The Program continues to invest in global defense posture initiatives, improve living and working conditions, reduce operating costs, and increase productivity. Further, the Program supports energy resiliency and adaptation by replacing or upgrading facilities which are functionally obsolete or can be made more efficient through economical improvements and that enhance mission resiliency and operational capabilities through innovation and investments to increase the Department's contingency preparedness while reducing climate impacts. Also, included in this request are resources required to clean up and dispose of property consistent with the five closure rounds required by the prior Base Realignment and Closure Acts.

Resources presented under the Military Construction title contribute primarily to achieving the Department's annual performance goals of assuring readiness and sustainability.

FAMILY HOUSING

The Family Housing Program funds construction, improvements, operations, maintenance, utilities, privatization, and leasing of all military family housing. The Program supports quality of life enhancements and initiatives to reduce operating costs and conserve energy by upgrading or replacing facilities.

The Family Housing Improvement Fund (FHIF) and the Military Unaccompanied Housing Improvement Fund (MUHIF) finance the use of authorities authorized in the National Defense Authorization Act for Fiscal Year 1996 (Public Law 104–106) to support of the Military Housing Privatization Initiative (MHPI). Funds which are required to support the MHPI are transferred from the military departments' family housing construction accounts into the FHIF and from the military departments' construction accounts into the MUHIF.

Resources presented under the Family Housing title contribute primarily to achieving the Department's annual performance goals of assuring readiness and sustainability.

The National Defense Stockpile program is managed under the authority of the Strategic and Critical Materials Stockpiling Act. The purpose of the Stockpile is to decrease or preclude U.S. dependence on foreign sources for supplies of strategic and critical materials in times of national emergency.

Revenues from the sales of excess commodities are either deposited into the National Defense Stockpile Transaction Fund to finance the National Defense Stockpile program or are transferred to the Treasury for specific congressionally-mandated programs or to reduce the deficit.

Section 662 of the National Defense Authorization Act for 1992 and 1993, Public Law 102-190, established the Voluntary Separation Incentive (VSI) Fund to more effectively manage and account for the costs of the Voluntary Separation Incentive program. The VSI program provides annual payments to former active-duty servicemembers who voluntarily left service after serving more than six but less than 20 years. For all members who left service after December 31, 1992, the Department of Defense was required to deposit the total present value of their future VSI benefits into the VSI fund by the time authority to approve VSI benefits ended on December 31, 2001. DOD was also required to cover the unfunded benefits of former members who separated before January 1, 1993 through yearly, actuarially-determined Government contributions from the DOD military personnel appropriations. Permanent authority to make these payments is contained in section 8044 of the 1997 Defense Appropriations Act. The fund also receives interest on its investments.

The Commissary Surcharge Collections Trust Fund was established in 1992 as a result of the consolidation of Defense Commissaries. The fund pays commissary costs to acquire (including leases), construct, convert, expand, improve, repair, maintain, and equip the physical infrastructure of commissary stores and central processing facilities of the Defense Commissary system. Surcharge funds are also utilized for real property, environmental evaluation, and construction costs including costs for surveys, administration, overhead, planning, and design. Per 10 U.S.C. 2484 the fund may be supplemented with Commissary profit margins resulting from improved management practices and the variable pricing program. The statute (10 U.S.C. 2484) also prescribes costs which may be financed by the fund.
