Miscellaneous permanent payments include:

Payments for Oregon and California and Coos Bay Wagon Road grant lands (O&C), receipts.—The Secure Rural Schools and Community Self-Determination Act of 2000 (as amended by P.L. 116–93, the Further Consolidated Appropriations Act, 2020), provides annual revenue sharing payments to the 18 O&C counties. These payments are derived from revenues from Federal activities on O&C lands in the previous calendar year, supplemented by amounts from the General Fund. The Infrastructure Investment and Jobs Act, Public Law 117–58, amended the Secure Rural Schools and Community Self-Determination Act to extend SRS payments through 2023, with the final payment in 2024. In the absence of this authority, eligible counties would receive funds authorized under the 1937 and 1939 statutes. Payments to the Oregon counties under the 1937 statute would be 50 percent of revenues from O&C grant lands. Payments under the 1939 statute are for lost tax revenue in two Oregon counties and would be roughly 75 percent of all revenues from Coos Bay Wagon Road grant lands.

Payments to States (proceeds of sales).—States are paid five percent of the net proceeds from the sale of public land and public land products (31 U.S.C. 1305).

Payments to States from grazing receipts, etc, public lands outside grazing districts.—States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

Payments to States from grazing receipts, etc, public lands within districts.—States are paid 12.5 percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

Payments to States from grazing receipts, etc, public lands within grazing districts, miscellaneous.—States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

Payments to counties, National Grasslands.—Of the revenues received from the use of Bankhead-Jones Act lands administered by the BLM, 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

Payments to Nevada from receipts on land sales.—Public Law 96–586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent).

Public Law 105–263, as amended by Public Law 107–282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: a) five percent for use in the general education program of the State of Nevada; b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, Fish and Wildlife Service, and the BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails, and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse the BLM for costs incurred arranging sales and exchanges under the Act.

Public Law 106–298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: a) five percent to the State of Nevada for general education purposes; b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

Cook Inlet Region, Incorporated Account.—This account received funding appropriated by section 9102 of the 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of Public Law 94–204 (43 U.S.C. 1611). The BLM maintains an accounting of the funds used by the Cook Inlet Region, Incorporated to purchase properties.

The Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities. The Helium Privatization Act of 1996 (HPA), Public Law 104-273, provided for the eventual privatization of the program and its functions, specifying that once the helium debt is retired, the Helium Production Fund would be dissolved. The debt was repaid at the beginning of 2014. The Helium Stewardship Act of 2013 (HSA), Public Law 113-40, provided for continued operation of the Helium program while facilitating a gradual exit from the helium market. The Helium program consists of: continued storage and transmission of crude helium; oversight of the production of helium on Federal lands; and administration of in-kind and open market crude helium gas sale programs. To minimize impacts to the helium market, the HSA provides a "glide path" from the sales mandated under HPA, increasing the sales price of helium through an auction mechanism and reducing the total volume of helium sold each year until the amount in storage reaches 3.0 billion cubic feet (bcf). The 3.0 bcf target was reached October 1, 2018, and BLM is no longer selling crude helium. Additionally, pursuant to HSA BLM transferred all assets for disposal to the General Services Administration (GSA) at the end of FY 2021. The GSA, completed its disposal processing in 2024.

The Marine Minerals Administration (MMA) manages development of the country's offshore energy, mineral, and geological resources in an economically beneficial and environmentally responsible way while promoting safety and conserving the country's offshore resources through vigorous regulatory oversight and enforcement. MMA's work supports Administration efforts to unleash Outer Continental Shelf (OCS) energy and critical mineral potential and thus generate prosperity, economic growth, and national security for our country. MMA is committed to eliminating unnecessary regulatory barriers, accelerating offshore energy and critical mineral development, and engaging in offshore development that is rapid, responsible, and fully aligned with America's energy and mineral development goals. The Bureau will continuously evaluate its mission processes and staff capabilities to keep pace with innovation in OCS exploration and production, and will adapt and respond, as necessary, to changes in the lifecycle of offshore mineral development. MMA is committed to continually improving the effectiveness of its safety management systems program and compliance assurance functions such as its inspection program, enhancing its permitting processes for greater efficiency, quality assurance and consistency, ensuring high levels of preparedness in the event of oil spills, and addressing requirements to regulate existing OCS energy infrastructure. The Bureau will continue supporting environmental stewardship and utilizing environmental studies and analyses to inform its decision-making.

Marine Minerals Administration Account

The Marine Minerals Administration account is MMA's primary account, which is funded with both net discretionary appropriations and offsetting collections (e.g., OCS rental receipts and cost recovery and inspection fees) and includes the following budget activities: Conventional Energy Operations; Marine Minerals; Environmental Programs and Enforcement; Executive Direction; and Offshore Decommissioning.

Conventional Energy Operations Budget Activity — This activity directly advances the Administration's priority to unleash OCS energy and mineral potential and thus generate prosperity, economic growth, and national security for our country. This activity funds the National OCS Oil and Gas Leasing Program and Working Families Tax Cut Act requirements,

including activities such as OCS oil and gas planning, leasing, and oversight, including inventories of oil and gas reserves; administering existing leases; OCS permit and plan application reviews and process tracking; inspections of OCS facilities (including critical high-risk activities); geological and geophysical survey reviews; resource and economic evaluation and fair market value determination; developing and maintaining the OCS cadastre; carbon sequestration efforts; investigations; enforcement; audit programs; annual operator performance reviews; oil and gas production level verifications; research supporting emerging technology analysis and activities; protecting the Federal Government from financial risks related to natural resource development; cybersecurity; standards and regulatory review activities; and technical training.

Marine Minerals Budget Activity —This budget activity supports the conveyance, on a noncompetitive basis, of rights to OCS sediment (such as sand and gravel) resources to Federal, State, and local government agencies for shore protection, beach or coastal wetlands restoration projects, or construction projects funded or authorized by the Federal government. This activity funds OCS critical mineral lease sales and execution of post lease sale activities, and assessment of OCS critical minerals and collection of baseline information pertaining to ecological conditions and communities associated with OCS critical mineral deposits. Funding supports responsible resource exploration and leasing activities, coordination with governmental partners, engagement of stakeholders, and applied scientific studies to improve decision making and manage risk.

Environmental Programs and Enforcement Budget Activity —This activity supports environmental studies and assessments required by the Outer Continental Shelf Lands Act and other authorizing statutes to inform environmentally and economically responsible decisions regarding energy and mineral development on the OCS. It also supports environmental compliance staff and operational support required to manage MMA's compliance with the National Environmental Policy Act, the Endangered Species Act, the National Historic Preservation Act, and other laws and regulations for Federal actions, such as permitting; compliance verification and enforcement of environmental standards, including specialized offshore inspections; and environmental coordination, including collaboration with operators and Federal and State agencies regarding offshore facility decommissioning.

Executive Direction Budget Activity — This activity funds organization-wide leadership, strategic direction, management, coordination, communications strategies, and outreach. Resources support functions such as managing the budget planning and execution processes, addressing Freedom of Information Act requirements, managing official documents and administrative records related to offshore energy and mineral development, and policy analysis.

Renewable Energy Budget Activity —In alignment with Executive Order 14154, *Unleashing American Energy*, the FY 2027 Budget eliminates the Renewable Energy budget activity. To the extent necessary, resources within the Conventional Energy Operations and Environmental Programs and Enforcement budget activities will assist with fulfilling the remaining legal responsibilities associated with existing offshore renewable energy leases. The MMA does not request funding for this budget activity in FY 2027.

Offshore Decommissioning Budget Activity— This activity funds the proper maintenance, monitoring, and decommissioning of orphaned wells, pipelines, and structures on the OCS for which there is no identifiable responsible party and have become Federal liabilities.

Environmental restoration.—This activity encompasses efforts to reclaim land and water impacted by historical coal mining. Funding supports actions under Title IV of the Surface Mining Control and Reclamation Act (SMCRA) to address Abandoned Mine Land (AML) hazards that threaten public health, safety, property, and the environment. These efforts include oversight of State and Tribal AML programs, high-priority and emergency projects, federal reclamation projects and operations in states without their own programs, program evaluations, tribal reclamation programs (including Oklahoma), and the technical and policy support necessary to achieve effective reclamation outcomes. Activities also include watershed restoration projects.

This account includes the Abandoned Mine Land Economic Revitalization program, which aims to return legacy coal mining sites to productive use and foster economic and community development.

Technology development and transfer.—This activity provides funding to enhance the technical capabilities States and Tribes need to carry out AML reclamation programs under SMCRA. The Office of Surface Mining Reclamation and Enforcement (OSM) provides reclamation focused technical assistance, training, and technology development and transfer services that support effective AML project planning and implementation of reclamation-related problems/responsibilities.

Financial management.—This activity provides resources for managing, accounting, identifying, processing collections, and auditing fees from coal

operators for the AML Fund. OSM seeks to maximize voluntary compliance with the SMCRA's reclamation fee provisions. This includes the developing and maintaining fees collections systems. This activity also includes accounting activities and reporting on grants awarded to States and Tribes for reclamation activities.

Executive direction and administration.—This activity provides funding for executive direction, general administrative support and bureau-wide shared services/functions to include, but not limited to, rent, telephones, network, software licensing, general information systems and hosting.

The Surface Mining Control and Reclamation Act of 1977, as amended by the Infrastructure Investment and Jobs Act (Public Law 117–58), the Tax Relief and Health Care Act of 2006 (Public Law 109–432), the Bipartisan Miners Act of 2019 (Division M of Public Law 116–94), and the American Miner Benefits Improvement Act of 2020 (Division Y of Public

Law 116–260), authorizes mandatory Treasury payments to three United Mine Workers of America (UMWA) retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other Federal funding sources do not meet the plans' expenditure needs, and to the 1974 UMWA Pension Plan, subject to certain limitations.

WATER AND SCIENCE

BUREAU OF RECLAMATION

Appropriations to the Bureau of Reclamation are made from the General Fund and from certain special funds in the Treasury. Projects funded from the General Fund include the Colorado River Basin Project and the Colorado River Storage Project, among others. Special funds include the Reclamation Fund, the Central Valley Project Restoration Fund, the Colorado River Dam Fund, and the Recreation, Entrance, and User Fee account. Non-Federal entities also advance funds for operation and maintenance and provide funds under the Contributed Funds Act.

Of the Bureau's special funds, the Reclamation Fund consists of repayments and other revenues from water and power users; receipts from the sale, lease, and rental of Federal lands; and certain oil and mineral revenues. It can finance program activities authorized under "Reclamation Law" that directly benefit the 17 Western States. The Central Valley Project Restoration Fund consists of revenues from project beneficiaries. The Colorado River Dam Fund generates revenue from the sale of Boulder Canyon Project power.

The Water and Related Resources account supports the development, management, and restoration of water and related resources in the 17 Western States. The account includes funds to operate, maintain, and rehabilitate existing water and power facilities; protect public safety; conduct studies and perform work to improve the reliability of water and related resources; and provide financial assistance for various projects, water conservation, and fish and wildlife activities.

Work is done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues, and stretch limited water supplies.

The Utah Reclamation Mitigation and Conservation account was established under Title IV of Public Law 102–575 for contributions from the State of Utah, the Federal Government (through the Secretary of the Interior and the Western Area Power Administration), and project beneficiaries (the Conservancy District). The requirement for contributions as principal from the State, the Secretary, and the Conservancy District ended in 2001. The requirement for contributions from the Western Area Power Administration ended in 2013. Funds deposited into the account as principal may not be expended for any purpose. Interest earned annually on the account is available for expenditure, without further appropriations, by the Utah Reclamation Mitigation and Conservation Commission, which has the option to use the funds for the mitigation, conservation, and enhancement of fish and wildlife and recreational resources, or to reinvest the funds into the account as principal. This account also receives transfer of funds annually appropriated to the Central Utah Completion Account for the Utah Reclamation Mitigation and Conservation Commission, as provided in Title III of Public Law 102–575.

The U.S. Geological Survey (USGS) monitors, analyzes, and predicts current and evolving Earth-system interactions and delivers actionable information at scales and timeframes relevant to decisionmakers. The USGS provides actionable science to decisionmakers about energy and mineral resources, natural hazards, and water resources using state-of-the-art science, tools, and technology. The USGS also provides authoritative mapping and imagery of the Earth's land and water features.

Geology, Energy, and Minerals.—The USGS Geology, Energy, and Minerals Mission Area is the Nation's primary source of impartial scientific information on domestic and global geologic resources and their supply chains. The Nation relies on energy and mineral resources to power homes and businesses and to manufacture products and technologies from phones to vehicles to data centers. The mission area maps and conducts research on the entire life-cycle of these resources, including geologic resource occurrence, extraction, use, disposal, and the opportunity to recover resources from waste. Additionally, the mission area assesses emerging resources, which provide opportunities for innovation in the energy industry. Science produced in the mission area informs economic, technological, national security, and global trade strategies and investments, as well as sustainable natural resource management and the development of infrastructure and new technologies.

Natural Hazards.—The USGS Natural Hazards Mission Area plays a critical role in providing policymakers, communities, and the public with the knowledge needed to anticipate, understand and reduce risks associated with natural hazards. It provides authoritative assessments of potential threats such as earthquakes, volcanic eruptions, landslides, storm-induced coastal flooding, geomagnetic storms, and tsunamis, as well as longer-term impacts such as sea level change and coastal erosion. This mission area also advances the characterization and assessment of coastal and marine hazards, processes, conditions, and vulnerability by mapping the seafloor. These mapping efforts also provide vital information for understanding the Nation's geothermal, marine energy, and critical mineral resources. The USGS Natural Hazards Mission Area works with partners and stakeholders to define and mitigate hazard risks, deepen understanding of natural hazard processes, and characterize potential impacts on human activity and health and the economy.

Water Resources.—The USGS Water Resources Mission Area is the Nation's primary Federal source of water information. That information is used by water decision-makers at all levels (Federal, State, tribal and municipal) to respond to and manage a wide range of issues, such as minimizing loss of life and property from floods and droughts; protecting human health from water-borne contaminants and diseases; assuring adequate supplies of clean water for drinking, agricultural, commercial, industrial, mining, datacenters, and recreational water uses; and supporting local, regional and National infrastructure projects. To adequately meet these many

SURVEYS, INVESTIGATIONS, AND RESEARCH—Continued

demands for water information, the mission area focuses on observing, understanding, predicting, and delivering information on the Nation's water resources. Observations include stream gaging, water quality sampling, and groundwater monitoring. Understanding those observations are part of the research to assess water conditions and develop sensors and models that are used to predict or forecast scenarios of water condition. Delivery includes databases, web applications, and visualizations that disseminates this work to the public. Collectively, these efforts contribute to sustainable stewardship and development of the Nation's resources for the benefit of present and future generations.

Core Science Systems.—The USGS is the Federal agency responsible for mapping the geologic, geographic, and land features of the United States. The USGS conducts detailed surveys and distributes high-quality and highly-accurate topographic, hydrographic, and biogeographic maps and remotely sensed data to the public. Mapping accuracy enabled by cutting-edge technologies allows precise planning for recreational use on public lands; supporting permitting with Department of the Interior partners; critical mineral resource assessments; transportation and pipeline infrastructure projects; land change and flood prediction at regional, local, and neighborhood scales; emergency response; and hazards mitigation. The USGS Core Science Systems Mission Area fulfills the USGS role as the primary national civilian mapping agency, including topographic mapping in support of Federal and State requirements; national geospatial coordination in support of Interior and the Federal Geographic Data Committee; geospatial mapping and applications through the Civil Applications Committee; and satellite remote sensing. The USGS, through Core Science Systems is the primary Federal steward of high-quality geospatial data and remote sensing data and provides data access to the public through The National Map, the Federal Geospatial Platform, the National Land Cover Database, the USGS Earth Explorer, and the National Biogeographic Map. The USGS also operates Landsat satellites and data systems necessary to monitor, detect, and understand changes that affect the Nation's natural and agricultural resources, economy, public safety and national security.

Science Support.—The USGS Science Support activity provides funding and resources toward business and information services that are crucial to conducting quality science, including internal controls; budget and performance; publishing; monitoring and evaluation of science quality and integrity; information assurance; information management and technology services; strategic planning; facilities; safety; property; materials management; and the Freedom of Information Act (FOIA). Science Support also provides policy and analysis services related to technology transfer, intellectual property, agreement reviews, and directive management.

Facilities.—The USGS Facilities activity provides safe, functional workspace to accomplish the bureau's science mission. The Facilities activity's goal is to meet bureau science needs while optimizing facility locations and functionality of workspace while reducing costs. The USGS defines facilities as all sites where USGS activities are housed and mission-related work is conducted. Facilities typically provide space for offices, laboratories and storage, as well as shared support for food services, conference rooms, and other common space uses. USGS research vessels are also considered facilities for funding purposes. Basic facility operations, rent costs, and security are funded and performed through this program. This activity is also responsible for facility maintenance and ensuring facilities are in compliance with Federal, State, and local standards to provide a safe, and functional work environment for employees, visiting partners, and customers. The USGS Facilities Program serves the public by saving money through improving space utilization and disposing of underutilized assets.

Reimbursable Activities.—This work includes reimbursements from non-Federal sources (States, Tribes, and municipalities) for cooperative efforts; proceeds from the sale of copies of photographs and records and the sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign

countries and international organizations for technical assistance. The USGS also receives reimbursements from other Federal agencies for mission-related work performed at the request of the financing agency.

Ecological Services.—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species listed under the Endangered Species Act (ESA) and work to make the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize potential conflicts between development projects and imperiled species. The Budget

proposes to transfer activities within the National Marine Fisheries Service's Office of Protected Resources into Ecological Services to establish a single program responsible for the ESA and Marine Mammal Protection Act, which will reduce bureaucratic redundancies, streamline permitting, and improve the conservation of federally protected species.

Habitat Conservation.—Through technical and financial assistance, the Service promotes the protection, conservation, and restoration of the Nation's fish and wildlife resources. These conservation activities are accomplished through a voluntary citizen and community based stewardship program with partners on private lands. Conserving the Nation's coastal trust resources is accomplished through collaboration with others on public and private lands.

National Wildlife Refuge System.—The Service maintains the National Wildlife Refuge System consisting of 573 refuges, waterfowl production areas in 212 counties managed by 38 wetland management districts, 48 wildlife coordination areas, and eight national monuments. The National Wildlife Refuge System administers this network of lands and waters to conserve and restore fish, wildlife, plants, and their habitats, for the benefit of present and future generations of Americans.

Conservation and Enforcement.—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 1,000 species of birds. Grants and partnerships are key to these programs, such as Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protection laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with domestic and international partners to promote a coordinated strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

Fish and Aquatic Conservation.—The Fish and Aquatic Conservation Program consists of a network of 71 National Fish Hatcheries, one historic National Fish Hatchery, six Fish Health Centers, seven Fish Technology Centers, 51 Fish and Wildlife Conservation Offices, and the Aquatic Animal Drug Approval Partnership Program. Working with partners, the program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American public.

General Operations.—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all of the Fish and Wildlife Service's programs. The funds also support the National Conservation Training Center and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

The Construction activity provides funding for projects that focus on construction and rehabilitation, environmental compliance, pollution abatement, hazardous materials cleanup, and seismic safety for facilities on Fish and Wildlife Service lands. This also includes repair and inspection of the Service's dams and bridges. This activity also supports modernization of field communications capability. These projects are needed to accomplish the management objectives and purposes of these structures, protect and enhance natural resources, and fulfill the Service's mission.

geographical area. Funds in this account also cover acquisition management activities, such as title fees and land surveys. The U.S. Fish and Wildlife Service places emphasis on acquiring important fish, wildlife, and plant habitat for the conservation of listed endangered and threatened species, implementing the North American Waterfowl Management Plan, and conserving migratory birds of conservation concern. The Federal Land Acquisition program uses alternative and innovative conservation tools, including conservation easements, and implements projects that have the input and participation of the affected local communities and stakeholders.

LANDOWNER INCENTIVE PROGRAM

The Landowner Incentive Program provided cost-shared, competitive grants to States, Commonwealths, the District of Columbia, Territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These programs provided technical and financial assistance to private landowners to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008 and minimal balances remain in this account.

Funds deposited into this account include import duties on arms and ammunition and receipts in excess of U.S. Postal Service expenses from the sale of Migratory Bird Hunting and Conservation Stamps, also known as Duck Stamps. These funds are used to acquire land and water for migratory bird refuges and waterfowl production areas. In addition, any funds reverted from the States within the Federal Aid in Wildlife Restoration Fund are available for this purpose. The Federal Duck Stamp Act (P.L. 113–264) increased the price of Duck Stamps from \$15 to \$25, with the \$10 increase to be dedicated to the acquisition of conservation easements for conservation of migratory birds.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707).

The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. Interest on obligations held in the Federal Aid in Wildlife Restoration Fund is also available for this purpose. In addition, a portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration, and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species

that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include obtaining a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the Service to make payments to counties in which Fish and Wildlife Service fee lands are located from the revenues resulting from the sale of products from Service lands, less expenses for producing the revenue and activities related to revenue sharing. The 2027 Budget does not propose to supplement revenues with discretionary funding.

The Federal Lands Recreation Enhancement Act (FLREA) was passed as part of the Omnibus Appropriations bill for 2005. Approximately 164 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program supports user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on Federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. Recreation fees are often used at Service sites to fund student intern and various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education, and environmental interpretation.

The Federal Aid in Wildlife Restoration Act (16 U.S.C. 669 et seq.), also known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106–408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program, as well as the Firearm and Bow Hunter Education and Safety Program that provides grants to the States.

The Target Practice and Marksmanship Training Support Act (P.L. 116–17) amends the Pittman-Robertson Wildlife Restoration Act to define a public target range and offers States alternatives for funding specific activities related to public target ranges.

The Wetlands Conservation and Access Improvement Act (P.L. 119–40) amended the Pittman-Robertson Wildlife Restoration Act (16 U.S.C. 669(b)(2)(C)) to extend the availability of interest earned on obligations held in the Federal Aid to Wildlife Restoration Fund (i.e., the Wildlife Restoration Trust Fund) to carry out approved wetlands conservation projects to 2033.

The Energy Policy Act (P.L. 109–58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed each year to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. In 2011, administration of this program was transferred from the Bureau of Ocean Energy Management to the Fish and Wildlife Service.

The Federal Aid in Sport Fish Restoration Act, also known as the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 et seq.), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment and certain other sport fish related products and fuel.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106–408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program. It also provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The Sport Fish Restoration Act specifies that the net deposits made into the Sport Fish Restoration and Boating Safety Trust Fund, minus the distri-

The National Park Service (NPS) administers 433 units and over 85 million acres of land in 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands. This annual appropriation funds the operation of areas and facilities administered under the National Park System through two budget activities Park Management and External Administrative Costs. This account also contains reimbursable activity such as recovery of costs associated with special use permits.

The first activity, Park Management, covers the management and operation of park areas, and is divided into five subactivities that represent functional areas:

Resource stewardship.—Encompasses resource management operations that provide for the protection of unique natural and historical features of units of the National Park System.

Visitor services.—Includes operations that provide orientation, educational, and interpretive programs to enhance the visitor's park experience. It also provides for the efficient management of commercial services for the benefit of visitors and the protection of resources.

OPERATION OF THE NATIONAL PARK SYSTEM—Continued

Park protection.—Provides for the protection of park resources, visitors, and staff. Funding supports law enforcement operations, including the United States Park Police, that reduce vandalism and other destruction of park resources, and advance safety, and public health operations across the national park system.

Facility operations and maintenance.—Encompasses the maintenance and protection of buildings, other facilities, lands, and other government investments.

Park support.—Covers the management, supervision, and administrative operations for park areas and partnerships.

The second activity, External Administrative Costs, funds costs which are largely determined by organizations outside the National Park Service and for which funding requirements are less flexible. The requirements for these costs are mandated in accordance with applicable laws. To promote the efficient performance of the National Park Service, these costs are most effectively managed on a centralized basis.

The Construction appropriation supports several National Park Service mission goals, including preserving park resources, providing for visitor enjoyment, and improving organizational effectiveness. In addition, this account contains activity related to reimbursable agreements.

The Construction appropriation is composed of five budget activities:

Line item construction.—This activity provides for the construction, rehabilitation, and replacement of facilities needed to accomplish the management objectives approved for each park. The National Park Service will continue to execute projects funded from prior year appropriations.

Special programs.—This activity includes Emergency and Unscheduled Projects and Employee Housing.

Construction planning.—This activity includes the project planning to prepare working drawings, specification documents, and contracts needed to construct or rehabilitate National Park Service facilities.

Construction program management and operations.—This activity provides centralized design and engineering management services, as well as contracting services for park construction projects.

Management planning.—This activity provides funding to prepare and update unit management plans and for environmental impact planning and compliance. The unit management plans guide National Park Service actions for the protection, use, development, and management of each park unit.

The Land Acquisition and State Assistance appropriation uses permanent funding derived from the Land and Water Conservation Fund to support National Park Service land acquisition activities and provide grants to States for the purchase and development of land for outdoor recreation activities.

In addition, P.L. 109–432 allows a portion of the revenue collected from certain oil and gas leases in the Gulf of America's Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund and distributed to States in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Full-Year Continuing Appropriations Act, 2025 (P.L. 119–4) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration per the statute.

The Full-Year Continuing Appropriations Act, 2025 also made available up to seven percent of State Conservation Grant funding for use by States for their grant administration. The FY 2027 Budget proposes to continue this authority.

The Land Acquisition and State Assistance program is composed of the following budget activities:

Federal land acquisition.—Provides for the acquisition of land and interests in land to preserve and protect, for public use and enjoyment, the historic, scenic, and recreational values of congressionally authorized areas within the National Park System. The land acquisition program will focus on acquisition of high-priority inholdings that create a burden to the public

State conservation grants.—Provides matching grants to States and local units of government for the acquisition and development of land and facilities that provide the public access to new opportunities to engage in outdoor recreation.

American Battlefield Protection Program.—The American Battlefield Protection Program awards grants for the acquisition, modernization and restoration of American battlefields. The program supports the protection of battlefield lands associated with the Revolutionary War, the Civil War, and the War of 1812 and it aids State and local governments and non-profit organizations to acquire or otherwise preserve these important cultural resources for recreational access and education.

The National Park Medical Services Fund was established in the John D. Dingell, Jr. Conservation, Management, And Recreation Act (P.L. 116–9). The Fund consists of fees collected for medical services provided to persons in units of the National Park System or for medical services provided by National Park Service personnel outside units of the National Park System and donations to the Fund. Amounts deposited into the Fund are available, to the extent provided in advance by Acts of appropriation, for units of the National Park System to provide medical services. Funds may also be used to obtain and improve medical facilities, equipment, vehicles, and other needs as well as prepare needs assessments or other programmatic analyses and management plans for medical services programs.

Recreation fee program.—The National Park Service (NPS) and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). The Expanding Public Lands Outdoor Recreation Experiences Act (P.L. 118-234) extended the FLREA authority through FY 2031. Net proceeds are used to provide benefits and services to the visitor throughout the National Park System. At least 80 percent of collections must remain at the park unit until expended, unless that revenue exceeds the reasonable needs for the unit for that fiscal year, in which case the NPS can reduce the percent retained, but not below 60 percent. Proceeds from the sale of the America the Beautiful passes, which allow access to all public lands that charge fees for a year, are distributed among the Federal land management agencies which offer them for sale, including the NPS, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation, and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with Public Law 108-447. The National Park Service Centennial Act (P.L. 114-289) established in the National Park Foundation, a Second Century Endowment for NPS projects and activities, funded through offsetting collections from the first

\$10 million collected in each fiscal year, generated from the America the Beautiful Senior Pass.

Deed-restricted parks fee program.—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with Public Law 105-327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

Transportation systems fund.—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of Public Law 105-391.

Payment for tax losses on land acquired for Grand Teton National Park.—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

The Historic Preservation Fund appropriation funds grants that facilitate the preservation of the Nation's historic resources. This appropriation provides grants-in-aid to Historically Black Colleges and Universities. These grants provide physical preservation assistance to buildings located on campuses of Historically Black Colleges and Universities (HBCUs) that are listed in or eligible for the National Register. The program also funds National Register nominations and Preservation Plans for HBCU campuses.

Park concessions franchise fees.—Franchise fees for concessioner activities in the National Park System (NPS) are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105–391. At least 80 percent of collections must remain at the park unit until expended, unless that revenue exceeds the reasonable needs for the unit for that fiscal year, in which case the NPS can reduce the percent retained, but not below 60 percent. The National Park Service Centennial Act (P.L. 114–289), established a new concessions contracting authority within NPS, which is described under the Visitor Experience Improvements Fund account.

Concessions improvement accounts.—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

Park buildings lease and maintenance fund.—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105–391.

Operation and maintenance of quarters.—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain Government-owned quarters within the National Park System.

Filming and photography special use fees.—In limited circumstances, the National Park Service may issue permits and retain associated fees to use park lands and facilities for filming, still photography, and similar activities.

Contributions to U.S. Park Police annuity benefits.—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under Public Law 85–157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before 2002, such payments were funded from appropriations made annually to the National Park Service.

Delaware Water Gap, Route 209 Operations.—The Delaware Water Gap National Recreation Area Improvement Act, section 4(b) of Public Law 109–156, as amended by Public Law 115–101, directs the Department of the Interior to establish a fee and permit program for the use of Highway 209 by commercial vehicles. All fees received are set aside in a special account and made available for the administration and enforcement of the program, including registering vehicles, issuing permits and vehicle identification stickers, and personnel costs. The Consolidated Appropriations Act, 2023 (P.L. 117–328) extended this authority through the end of FY 2026 and the FY 2027 Budget proposes to extend the authority.

The Selis-Qlispe Ksanka Settlement Trust Fund was established in the Montana Water Rights Protection Act (P.L. 116–260). The Act settles claims to water rights in Montana for the Confederated Salish and Kootenai Tribes of the Flathead Indian Reservation. The Act authorizes annual payments of \$90,000,000 to the Trust Fund out of any Funds in the Treasury not otherwise appropriated starting in fiscal year 2021 through fiscal year 2030 for a total of \$900,000,000. The Act also authorizes discretionary appropriations of \$1,000,000,000 for deposit in the Trust Fund. The Trust Fund includes two accounts: the Salish and Kootenai Compact Account and the Salish and Kootenai Settlement Implementation Account. Funds deposited into the account are adjusted to reflect fluctuations in costs occurring after the date of enactment of the Act up to the day of deposit to the Fund. The Trust Fund is interest bearing.

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs and the Bureau of Indian Education may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding the Act of September 22, 1961, Public Law 87–279, as amended (25 U.S.C. 15), the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs or the Bureau of Indian Education for central office oversight and Executive Direction and Administrative Services (except Executive Direction and Administrative Services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs or the Bureau of Indian Education under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994, Public Law 103–413.

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs or the Bureau of Indian Education, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under the Act of April 16, 1934, as amended (25 U.S.C. 5342 et seq.), shall be available to support the operation of any elementary or secondary school in the State of Alaska.

No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995, except that the Secretary of the Interior may waive this prohibition to support expansion of up to one additional grade when the Secretary determines such waiver is needed to support accomplishment of the mission of the Bureau of Indian Education, or more than one grade to expand the elementary grade structure for Bureau-funded schools with a K-2 grade structure on October 1, 1996. Appropriations made available in this or any prior Act for schools funded by the Bureau shall be available, in accordance with the Bureau's funding formula, only to the schools in the Bureau school system as of September 1, 1996, and to any school or school program that was reinstated in fiscal year 2012. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978, Public Law 95–561, as amended (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of the Department of the Interior and Related Agencies Appropriations Act, 2000, Appendix C of Public Law 106–113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101–301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

Funds available under this Act may not be used to establish satellite locations of schools in the Bureau school system as of September 1, 1996, except that the Secret-

ary may waive this prohibition in order for an Indian tribe to provide language and cultural immersion educational programs for non-public schools located within the jurisdictional area of the tribal government which exclusively serve tribal members, do not include grades beyond those currently served at the existing Bureau-funded school, provide an educational environment with educator presence and academic facilities comparable to the Bureau-funded school, comply with all applicable Tribal, Federal, or State health and safety standards, and the Americans with Disabilities Act, and demonstrate the benefits of establishing operations at a satellite location in lieu of incurring extraordinary costs, such as for transportation or other impacts to students such as those caused by busing students extended distances: Provided, That no funds available under this Act may be used to fund operations, maintenance, rehabilitation, construction, or other facilities-related costs for such assets that are not owned by the Bureau: Provided further, That the term "satellite school" means a school location physically separated from the existing Bureau school by more than 50 miles but that forms part of the existing school in all other respects.

Funds made available for Tribal Priority Allocations within Operation of Indian Programs and Operation of Indian Education Programs may be used to execute requested adjustments in tribal priority allocations initiated by an Indian tribe.

Under the Mineral Leasing Act (MLA), States receive fifty percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. Alaska is the exception, receiving a 90 percent share of receipts from Federal mineral leasing in that State. Separate statutes cover revenue sharing payments from the National Petroleum Reserve-Alaska and the 1002 Area of the Arctic National Wildlife Refuge, where the traditional MLA fifty-percent State share applies. To partially cover the costs of administering the Federal mineral leasing program, the Bipartisan Budget Act of 2013 permanently amended the MLA to deduct two percent from the required payments to States under the Act. These payments are administered by Interior's Office of Natural Resources Revenue.

According to the Flood Control Act of 1936 (33 U.S.C. 701 et seq.), 75 percent of revenue collected in the Treasury from the leasing of lands acquired by the United States for flood control, navigation, and allied purposes, is to be shared with the State in which it was collected. These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected, or for defraying other expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements. Payments are administered by Interior's Office of Natural Resources Revenue.

Since May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have been paid to the State in which the national forest resides. A State's payment is based on national forest acreage. Where a national forest is situated in several States, an individual State payment is proportionate to its area within that particular national forest. These payments are administered by Interior's Office of Natural Resources Revenue.

Title IV of the Department of the Interior and Related Agencies Appropriations Act, 1998 (P.L. 105–83) established the Environmental Improvement and Restoration Fund account. As required by law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account are deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned by the Fund is permanently appropriated to the Department of Commerce, and the unappropriated balance of interest remains in the Fund, subject to appropriation. At this time, no budget authority is requested.

NONRECURRING EXPENSES FUND

Public Law 118–42 established the Department of the Interior Nonrecurring Expenses Fund (NEF). This Fund will allow the Department to transfer unobligated balances of expired discretionary funds appropriated for Fiscal Year 2024 and subsequent years, no later than the fifth fiscal year after the last fiscal year of availability, to the NEF to become available for use as no-year funds to support specific purposes. The NEF will provide funding

for critical infrastructure projects that may require significant one-time investments such as information technology modernization projects. These requirements often do not coincide with the timing of the budget formulation process and are difficult to forecast. In many cases, these costs either cannot be accommodated within existing funds or are emergency requirements that would otherwise require the Department to reprogram existing funds from other priorities.

ADMINISTRATIVE PROVISIONS

For fiscal year 2027, up to \$550,000 of the payments authorized by chapter 69 of title 31, United States Code, may be retained for administrative expenses of the Payments in Lieu of Taxes Program: Provided, That the amounts provided under this Act specifically for the Payments in Lieu of Taxes program are the only amounts available for payments authorized under chapter 69 of title 31, United States Code: Provided further, That in the event the sums appropriated for any fiscal year for payments pursuant to this chapter are insufficient to make the full payments authorized by that chapter to all units of local government, then the payment to each local government shall be made proportionally: Provided further, That the Secretary may make adjustments to payment to individual units of local government to correct for prior overpayments or underpayments: Provided further, That no payment shall be made pursuant to that chapter to otherwise eligible units of local government if the computed amount of the payment is less than \$100.

The Office of the Secretary provides for the administration of the Payments in Lieu of Taxes program, which makes payments to counties and other units of local government for lands within their boundaries administered by the Bureau of Land Management, U.S. Forest Service, the National Park Service, the Fish and Wildlife Service, and certain other agencies. Funding for the program is in a separate account within Department-Wide programs.

INSULAR AFFAIRS

The Secretary of the Interior is charged with the responsibility of promoting the economic and political development of those insular areas which are under U.S. jurisdiction and within the responsibility of the Department of the Interior. The Secretary originates and implements Federal policy for the U.S. Territories; guides and coordinates certain operating programs and construction projects; provides information services and technical assistance; coordinates certain Federal programs and services provided to the Freely Associated States, and participates in foreign policy and defense matters concerning the U.S. Territories and the Freely Associated States.

The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (P.L. 99–239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003 (P.L. 108–188), continued financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023. The Compact of Free Association for the Republic of Palau was enacted on November 14, 1986 as Public Law 99–658, and was implemented on October 1, 1994. Financial assistance provisions under the Compact of Free Association with the Republic of Palau were set to expire on September 30, 2009, however, under the 2010 Compact Review Agreement (CRA) the United States agreed to provide continued economic assistance to the Government of Palau through 2024. The Compacts of Free Association Amendments Act of 2024 (P.L. 118–42) renewed financial assistance to the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau through fiscal year 2043.

Public Law 94–565 (31 U.S.C. 6901–07), as amended, authorizes Payments in Lieu of Taxes ("PILT payments") to counties and other units of local government for lands within their boundaries administered by the Bureau of Land Management, the National Park Service, the Fish and Wildlife Service, and the Bureau of Reclamation. Additionally, PILT payments cover Federal lands administered by the U.S. Forest Service, U.S. Army Corps of Engineers, and the Utah Reclamation Mitigation and Conservation Commission. The PILT payment formula is based on a number of factors, including the amount of Federal land within an eligible unit of local government, its population, and certain other Federal payments the local government may receive. From the inception of the PILT program in 1977 through 2007, PILT funding was subject to annual appropriations. The Emergency Economic Stabilization Act of 2008 provided a five-year (FYs 2008–2012) mandatory funding stream for PILT at the full authorization levels calculated using the existing PILT formula. The Moving Ahead for Progress in the 21st Century Act (P.L. 112–141) extended the mandatory authorization through 2013, and the Agricultural Act of 2014 (P.L. 113–79) extended the mandatory authorization through 2014.

The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 and the Consolidated and Further Continuing Appropriations Act (P.L. 113–235) extended PILT payment authority through 2015 with a combination of discretionary and mandatory funds. The Consolidated Appropriations Act of 2016 (P.L. 114–113) provided discretionary PILT funding within the Office of the Secretary, Departmental Operations account to extend payment authority through 2016. The Consolidated Appropriations Act, 2017 (P.L. 115–31) provided discretionary PILT funding within Department-wide Programs.

Congressional appropriations for 2018 (P.L. 115–141), 2019 (P.L. 116–6), 2020 (P.L. 116–94), 2021 (P.L. 116–260), 2022 (P.L. 117–103), 2023 (P.L. 117–328), 2024 (P.L. 118–42), and 2025 (P.L. 119–4) each provided PILT

funding at the full authorized payment levels. The 2027 Budget proposes discretionary funding for PILT payments within Department-wide Programs.

Under the Natural Resource Damage Assessment and Restoration (NRDAR) Fund, natural resource damage assessments are performed to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, prepare for response to potential inland oil spills, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through cooperative assessment agreements, negotiated settlements, or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to

the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The NRDAR Fund operates as a Department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.), the Oil Pollution Act of 1990 (33 U.S.C. 2701 et seq.), and the System Unit Resource Protection Act (54 U.S.C. 100721). Since 1992, amounts received by the United States and its State and tribal co-trustee partners from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The 2027 Budget reflects the receipts, transfers, and mandatory spending by the Department of the Interior associated with the civil and criminal settlements resulting from the 1989 *Exxon Valdez* oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and State of Alaska natural resource trustee agencies to restore the natural resources and services damaged by the spill. The *Exxon Valdez* Oil Spill Trustee Council consists of three State and three Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds.

WILDLAND FIRE MANAGEMENT

The 2027 Budget does not request funding for wildland fire management within DOI's Department-wide programs. Instead, the 2027 Budget requests funding for wildland fire accounts under the U.S. Wildland Fire Service. The 2027 Budget reforms Federal wildland fire management to create an integrated, cost-efficient, and operationally more effective organization by building on the recent unification of the Department of the Interior's (Interior) wildland fire resources and operations and establishment of the U.S. Wildland Fire Service (USWFS). The 2027 Budget proposes a further strategic unification by consolidating the Department of Agriculture

(USDA) Forest Service's (FS) wildland fire resources and operations into the USWFS in Interior. Contingent upon the enactment of legislation unifying the wildland fire programs of Interior and USDA, the USWFS will fund all wildland fire resources currently funded separately by the two departments, employ all Federal wildland fire personnel working on lands administered by Interior and USDA FS, and manage Federal wildland fire response policies. The USWFS also will continue funding Tribal Nations' wildland fire personnel. Please consult the U.S. Wildland Fire Service section of the Appendix for more information.

The Department's Working Capital Fund finances services and activities that can be performed more effectively and efficiently in a centralized manner, including business services provided by the Interior Business Center (IBC). Activities financed through the Fund include information technology and security, systems hosting and help desk services, communications, human capital, civil rights, procurement and grants management, aircraft services, central reproduction, supplies and health services, and safety and health initiatives. Departmental administrative systems hosted through the Fund include the Federal Personnel and Payroll System and the Financial and Business Management System (FBMS). The IBC provides financial management, acquisition, and human resource services as well as payroll services to other agencies as one of the Government-wide shared service providers selected by the Office of Personnel Management. Through the National Indian Program Training Center, a component of Department of the Interior (DOI) University, the Working Capital Fund provides training courses and other services related to Indian culture, law and programs to Federal Government employees. The appropriated portion of the Working Capital Fund includes discretionary funding for FBMS operations and maintenance, and enhancements; strengthening cybersecurity and the IT supply chain; improving data management; and evaluating program effectiveness.

NATIONAL PARKS AND PUBLIC LAND LEGACY RESTORATION FUND—Continued

The Great American Outdoors Act (P.L. 116–152) established the National Parks and Public Land Legacy Restoration Fund to address deferred maintenance at the Department of the Interior and the U.S. Forest Service. The Fund supports restoration of deteriorating assets through allocations to the National Park Service, U.S. Fish and Wildlife Service, Bureau of Land Management, Bureau of Indian Education, and U.S. Forest Service. The Fund is supported by an annual deposit for five years based on 50 percent of all Federal energy development revenue from the prior year that would otherwise be credited or deposited as miscellaneous receipts to the Treasury. The Departments of the Interior and Agriculture annually submit projects to Congress for awareness, execute projects, and monitor results/program performance. This Fund makes a significant investment in the facilities which support the important missions of the Department of the Interior and the U.S. Forest Service and help maintain America's national treasures for future generations. The 2027 Budget proposes to reauthorize the National Parks and Public Land Legacy Restoration Fund for five years, which received its last deposit based on qualified energy development revenues in fiscal year 2025.

The Great Salt Lake Watershed Recovery Program supports a comprehensive Federal program that will restore and protect Utah's Great Salt Lake. The Department will work with cooperating Federal agencies, including the U.S. Army Corps of Engineers, Environmental Protection Agency, and Department of Agriculture, to ensure the long-term sustainability of the Great Salt Lake, which is a critical ecological and economic asset to Utah, the region, and the country. Interior and Federal partners will take action to improve water flows into and within the lake, restore ecosystems, remove invasive species, and address toxins in the lakebed outside of any active environmental remediation sites.

The 2027 Budget reforms Federal wildland fire management to create an integrated, cost-efficient, and operationally more effective organization by building on the recent unification of the Department of the Interior's (Interior) wildland fire resources and operations and establishment of the U.S. Wildland Fire Service (USWFS). The 2027 Budget proposes a further strategic unification by consolidating the Department of Agriculture (USDA) Forest Service's (FS) wildland fire resources and operations into the USWFS in Interior. Contingent upon the enactment of legislation unifying the wildland fire programs of Interior and USDA, the USWFS will fund all wildland fire resources currently funded separately by the two departments, employ all Federal wildland fire personnel working on lands administered by Interior and USDA FS, and manage Federal wildland fire response policies. The USWFS also will continue funding Tribal Nations' wildland fire personnel. This integrated, cost-efficient, and operationally more effective organization will streamline Federal wildfire suppression response, risk mitigation efforts, and coordination with non-federal partners to combat the wildfire crisis.

Firefighter Pay Reforms — The 2027 Budget fully funds the costs of permanent pay increases and incident response premium pay for Federal and Tribal wildland firefighters across the United States, both of which were enacted in 2025. The 2027 Budget also requests permanent extension of the premium pay cap waiver for wildland fire personnel.

Preparedness — Funds the non-emergency and predictable aspects of wildland fire management activities, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to the occurrence of wildfire. It also includes activities related to program monitoring and evaluation, and the integration of fire into land-use planning.

Suppression Operations — Funds the total spectrum of management actions taken to suppress wildfires in a safe, cost-effective manner. This activity includes emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage. The 2027 Budget request fully funds Federal suppression operations at the ten-year average of obligations as reported in the 2015 President's Budget, in accordance with the Consolidated Appropriations Act, 2018 (Public Law 115–141). That Act also amended the Balanced Budget and Emergency Deficit Control Act to provide additional new budget authority for fiscal years 2020 through 2027. This additional budget authority is provided in the Wildfire Suppression Operations Reserve Fund account and made available subject to the requirements in Public Law 115–141.

Fuels Management — Funds hazardous fuels management aimed at mitigating risk to communities and their values, including areas in the wildland urban interface. Interior contributes to community adaptation to wildland fire and improves the ability to safely and appropriately respond to wildfire. Funding for this activity covers the planning, operational aspects, and monitoring of fuels management projects. Interior uses such methods as prescribed fire, establishing potential control locations, and mechanical thinning.

Other Operations — Funds all other aspects of wildland fire management, including Burned Area Rehabilitation, Facilities Construction and Maintenance, Intelligence and Technology, and Grants and Partnerships. Burned Area Rehabilitation begins the recovery process for lands and resources damaged by wildland fires that would not return to fire-adapted conditions on their own. The Facilities Construction and Maintenance subactivity funds construction and maintenance of facilities to house firefighters and other personnel, and equipment used in wildland firefighting and fuels management activities. The new Intelligence and Technology program subactivity supports unified wildland fire information technology, research, and science, including the Joint Fire Science Program that is currently co-administered by Interior and USDA FS. The new Grants and Partnerships subactivity includes targeted funding for rural fire assistance, which helps local cooperators protect remote communities and natural resources.

This includes unifying the Departments' individual Wildfire Suppression Operations Reserve Fund accounts. In addition to the amounts provided for wildfire suppression operations through the main wildland fire appropriation, the Consolidated Appropriations Act, 2018 (Public Law 115–141) amended the Balanced Budget and Emergency Deficit Control Act to provide additional budget authority for fiscal years 2020 through 2027. This budget authority is available for transfer to the main wildland fire account when appropriations for wildfire suppression in that account are close to depletion. The additional budget authority helps ensure adequate

resources are available to fight wildfires, protect communities, and safeguard human life during the most severe fire seasons.

The primary mission of the Justice Operations, Management, and Accountability (JOMA) Salaries and Expenses appropriation is to support the Attorney General and Department of Justice (DOJ) senior policy officials in managing Department resources and developing policy for legal, law enforcement, and criminal justice activities. JOMA also provides administrative support services to the legal divisions and policy guidance and other support to all Department organizations. Most JOMA offices have significant oversight responsibilities that shape DOJ policy and influence the way the Department works toward meeting each of its strategic goals.

The Justice Information Sharing Technology (JIST) appropriation provides resources to the DOJ Chief Information Officer (CIO) to ensure progress towards the DOJ's strategic goals in supporting agents, attorneys, analysts, and administrative staffs across the world with modern, mission-enabling technologies. The CIO is also responsible for ensuring these and other IT investments align with the DOJ's overall IT strategy, as well as its technical reference, enterprise architectures, and cybersecurity requirements.

Enterprise Cybersecurity.—Enhancing the DOJ's cybersecurity posture remains a top and cross-cutting priority for the Department and its leadership, as the DOJ supports a wide range of missions, including national security, law enforcement, and impartial administration of justice. The systems supporting these critical missions must secure sensitive information, enable essential workflows, and protect the integrity of data and information guiding vital decision-making. The DOJ CIO leverages JIST resources to drive continual advances in the Department's cybersecurity architecture, systems and processes to ensure DOJ enterprise and information resources are resilient and secure against a continually evolving threat landscape.

IT Architecture and Oversight.—Oversight of the DOJ IT environment by the CIO is vital given the role of technology in supporting and enabling DOJ's varied legal, investigative, and administrative missions. JIST resources fund the CIO's DOJ-wide IT architecture governance and oversight responsibilities, which include IT planning, IT investment management, IT cybersecurity and IT compliance with enterprise architecture (EA) requirements from the Office of Management and Budget (OMB) and the Government Accountability Office, and IT cybersecurity. The OCIO's IT investment management and oversight encompasses Capital Planning and Investment Control, along with the Department Investment Review Council and the Department Investment Review Board, which allows OCIO to ensure alignment of investments across the enterprise and efficient use of resources. These activities comply with the Federal Information Technology Acquisition Reform Act, the Clinger-Cohen Act, OMB Circular A-130, Managing Information as a Strategic Resource, and other applicable laws, regulations, and Executive Orders governing Federal IT management.

IT Transformation and Innovation Engineering.—IT transformation is an ongoing commitment of the OCIO to evolve the DOJ's IT environment by driving toward shared commodity infrastructure services and simplified design and implementation of tools to advance the mission while reducing risk and driving efficiency. These efforts allow the DOJ to shift from custom government-owned solutions to advanced industry-leading offerings at competitive pricing. The OCIO recognizes modernization and innovation as an ongoing activity, requiring IT strategies and operating models to adapt as technology changes in order to harness new and innovative technologies that meet DOJ mission requirements. By creating partnerships with DOJ components, Federal agencies, and industry leaders for the exploration of new technologies, the OCIO leads the ideation, design, planning, and execution of enterprise IT innovations to enhance DOJ user experience and enable operations while ensuring alignment with DOJ architectures and strategic priorities. The OCIO also uses technology readiness assessments to evaluate the maturity of technologies and readiness for incorporation into a system, as less-than-ready technologies can be the source of program risks, delays, and cost increases.

The JIST account also includes balances of funding transferred from other accounts for the Tribal Access Program (TAP) and the Department's Spectrum Relocation Fund (SRF) allocation. The TAP funds are earmarked for driving collaboration between the Federal, state, local and tribal criminal justice communities by providing Tribal governments with means to access, enter, and exchange data with national crime information systems. The SRF allocations are governed by the OMB-approved plan for Department-level coordination of vacating auctioned spectrum frequency band and replacing equipment affected by the Advanced Wireless Systems -3 auction.

Section 100054 of the Working Families Tax Cut Act appropriated \$3.33 billion to the Department to support the execution of law enforcement and litigation priorities across multiple DOJ components. These priorities include combatting drug trafficking and prosecuting immigration-related matters. Resources are being managed from a centralized DOJ account and allocated to a variety of DOJ components. Reimbursable funding is also provided to this account in support of these purpose areas.

The Executive Office for Immigration Review (EOIR) was created on January 9, 1983 through an internal DOJ reorganization that combined the Board of Immigration Appeals (BIA) with the Immigration Judge function. In addition to establishing EOIR as a separate agency within DOJ, this reorganization made the Immigration Courts independent of the agency charged with enforcement of Federal immigration laws. Under delegated authority from the Attorney General, EOIR conducts immigration court proceedings, appellate reviews, and administrative hearings. The Office of the Chief Administrative Hearing Officer was added in 1987. EOIR is headed by a Director, appointed by the Attorney General, who oversees approximately 75 Immigration Courts nationwide, the BIA, and the headquarters organization located in Falls Church.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. By statute, the OIG also reports to the Attorney General, the Congress, and the public on a semiannual basis regarding its significant activities.

The Audit Division is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit Division also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations Division investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules, and procedures that govern Department employees, contractors, and grantees. This Division also develops these cases for criminal prosecution, civil action, or administrative action. In some instances, the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections Division conducts program and management reviews that involve on-site inspection, statistical analysis, and other techniques to review Department programs and activities and makes recommendations for improvement.

The Oversight and Review Division investigates allegations of significant interest to the American public and the Congress, and of vital importance to the Department.

The Office of the General Counsel provides legal advice to OIG management and staff. It also drafts memoranda on issues of law; prepares administrative subpoenas; represents the OIG in personnel, contractual, ethical, and legal matters; and responds to Freedom of Information Act requests.

The Management and Planning Division provides advice to OIG senior leadership on administrative and fiscal policy, and assists OIG components in the areas of budget formulation and execution, security, personnel, training, travel, procurement, property management, telecommunications, records management, quality assurance, internal controls, and general support.

The Information Technology Division executes the OIG's IT strategic vision and goals by directing technology and business process integration, network administration, implementation of computer hardware and software, cybersecurity, applications development, programming services, policy formulation, and other mission-support activities.

The following Department legal activities are financed from this appropriation:

Supreme Court Proceedings and Appellate Matters.—The Office of the Solicitor General conducts substantially all litigation on behalf of the United States and its agencies in the Supreme Court of the United States, approves decisions to appeal and seek further review in cases involving the United States in the lower Federal courts, and supervises the handling of litigation in the Federal appellate courts.

Criminal Matters.—The Criminal Division develops, enforces, and supervises the application of all Federal criminal laws, except those specifically assigned to other divisions. The mission of the Criminal Division is to identify and respond to critical and emerging national and international criminal threats, and to lead the enforcement, regulatory, and intelligence communities in a coordinated nationwide response to reduce those threats.

Claims, Customs, and General Civil Matters.—The Civil Division represents the Federal Government in civil litigation to defend Federal statutes, regulations, and policies, and to avoid payment of unjustified monetary claims. It also investigates and pursues perpetrators of financial, economic, health care, and other forms of fraud to recover billions of dollars owed to the Federal Government. Examples of non-monetary litigation include the defense of thousands of challenges to immigration enforcement decisions and to Federal activities involving counterterrorism, as well as enforcement of consumer protection laws.

Environment and Natural Resource Matters.—The Environment and Natural Resources Division enforces the Nation's civil and criminal environmental laws and defends environmental challenges to Government action. Additionally, the Division represents the United States in virtually all matters concerning the use and development of the Nation's natural resources and public lands, wildlife protection, Indian rights and claims, worker safety, animal welfare, and the acquisition of Federal property.

Legal Opinions.—The Office of Legal Counsel provides written opinions and oral advice in response to requests from the Counsel to the President, the various agencies of the Executive Branch, and offices within the Department, including the offices of the Attorney General and Deputy Attorney General.

Civil Rights Matters.—This program enforces the Nation's Federal civil rights laws. Through the enforcement of a wide range of anti-discrimination laws, the Division gives meaning to our Nation's promise of equal opportunity. The Division works to uphold and defend the civil and constitutional rights of all individuals, particularly some of the most vulnerable members of our society. The Division enforces Federal statutes that prohibit discrimination and provide a remedy for constitutional violations.

Office of the Pardon Attorney.—The Office of the Pardon Attorney (OPA) receives and evaluates clemency petitions for federal crimes and prepares letters of advice for the President for each application with approval from the Deputy Attorney General. In addition, OPA responds to inquiries con-

cerning executive clemency petitions and the clemency process from applicants, their legal representatives, members of the public, and Members of Congress; prepares all necessary documents to affect the President's decision to grant or deny clemency; and provides advisory services to White House Counsel concerning executive clemency procedures.

Reimbursable Programs.—This reflects reimbursable funding for the following:

Civil Division.—For litigating cases under the National Childhood Vaccine Injury Act, and for litigating a number of extraordinarily large cases on behalf of the United States;

Criminal Division.—For activities related to healthcare fraud and drug prosecutions, international training programs, and asset forfeiture related activities;

Environment and Natural Resources Division.—From numerous client agencies for personnel, automated litigation support, and litigation consultant services for a variety of environmental, natural resource, land acquisition, and Native American cases, including from the Environmental Protection Agency for Superfund enforcement litigation; and

Civil Rights Division.—For activities related to the Division's Complaint Adjudication Office and Health Care Fraud activities.

Fraud Division.—The Fraud Division is the newest litigation division in the Department of Justice. Created in 2026, the Fraud Division will become the Department's central focal point to combat the fraud targeting U.S. taxpayer resources. The Fraud Division will enforce the Federal criminal and civil laws against fraud targeting Federal government programs, Federally funded benefits, businesses, nonprofits, and private citizens nationwide.

The Antitrust Division administers and enforces antitrust and related statutes. This program primarily involves the investigation of suspected

violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts, and the maintenance of competitive conditions.

The Department's Antitrust Division and the Federal Trade Commission (FTC) are responsible for reviewing corporate mergers to ensure they do not promote anticompetitive practices. Revenue collected from pre-merger filing fees, known as Hart-Scott-Rodino fees, are collected by the FTC and split evenly between the two agencies. In 2027, the Antitrust Division will continue to collect filing fees for pre-merger notifications and will retain these fees for expenditure in support of its programs.

There are 94 United States Attorneys' Offices located throughout the United States, Puerto Rico, the Virgin Islands, Guam, and the Northern Mariana Islands. The 93 U.S. Attorneys (Guam and the Northern Mariana Islands are under the direction of a single U.S. Attorney) prosecute criminal offenses against the United States, represent the Government in civil actions in which the United States is concerned, and initiate proceedings for the collection of fines, penalties, and forfeitures owed to the United States. Additionally, the Justice Department's reorganization eliminated Community Relations Service (CRS) as a standalone component and realigned it within the Executive Office for U.S. Attorneys. The realignment will ensure the continuation of those minimum CRS statutory functions.

The Federal Government is represented by a United States Marshal in each of the 94 judicial districts. The primary mission of the United States Marshals Service (USMS) is to protect, defend, and enforce the American justice system by securing Federal court facilities and ensuring the safety

UNITED STATES MARSHALS SERVICE—Continued

of judges, court personnel, and the public; apprehending fugitives and non-compliant sex offenders; maintaining custody of Federal prisoners and providing for their security and transportation from arrest to incarceration; ensuring the safety of protected government witnesses and their families; executing Federal warrants and court orders; managing seized assets acquired through illegal means; and providing custody, management, and disposal of forfeited assets. The USMS is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

The USMS derives other Federal funds from the Administrative Office of the U.S. Courts for the Judicial Facility Security Program, the Assets Forfeiture Fund for seized assets management and disposal, and the Fees and Expenses of Witnesses appropriation for security and relocation of protected witnesses. Non-Federal funds are derived from State and local governments for witness protection and the transportation of prisoners pursuant to State writs, as well as fees collected from service of civil process and sales associated with judicial orders.

For 2027, the USMS requests program increases to support the Administration's priorities including enhancements for Judicial Security Protective Operations, Fugitive Task Forces, Protective Equipment Program, Safe Task Forces, Immigration Enforcement, and the Cyclical Replacement of Vehicles.

The Federal Prisoner Detention (FPD) appropriation is responsible for the variable costs associated with the care of Federal detainees in the custody of the USMS. The USMS must ensure the safe, secure, and humane confinement of persons in its custody while allowing unimpeded prisoner transportation operations. The FPD appropriation provides for housing, subsistence, transportation, medical care, and medical guard service of Federal detainees in State, local, and private facilities.

The Federal Government utilizes various methods to house detainees. The USMS acquires detention bed space for Federal detainees through several means, using the most appropriate method to maximize efficiency and effectiveness for the Government:

— Intergovernmental Agreements (IGAs) with State and local jurisdictions, whose excess prison and jail bed capacity is utilized via a negotiated daily rate paid to those jurisdictions;

— Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility, funded through the Federal Bureau of Prisons (BOP) appropriation; and

— Private performance-based contract facilities, where an individual daily rate or contract minimum rate is paid.

Over 70 percent of the USMS detainee population that is placed in government facilities will be housed under IGAs.

For 2027, the USMS requests base adjustments to account for changes to the detention population and variable housing, medical care, medical guard, and transportation costs projected to occur during the fiscal year.

The September 11th Victim Compensation Fund (VCF) was created to provide compensation for any individual (or a personal representative of a deceased individual) who suffered physical harm or was killed as a result of the terrorist attacks on September 11, 2001, or the debris removal efforts that took place in the immediate aftermath of those attacks. The VCF was extended on July 29, 2019, with the passage of the Never Forget the Heroes: James Zadroga, Ray Pfeifer, and Luis Alvarez Permanent Authorization of the September 11th Victim Compensation Fund Act, Public Law 116–34. The Act extends the VCF's claim filing deadline to October 1, 2090, and appropriates such funds as may be necessary in each fiscal year through fiscal year 2092 to pay all eligible claims.

The United States Trustee Program (USTP or Program) supervises the administration of bankruptcy cases and private trustees in the Federal Bankruptcy Courts and litigates against fraud and abuse in the system by debtors, creditors, attorneys, bankruptcy petition preparers, and others. The Bankruptcy Judges, U.S. Trustees and Family Farmer Bankruptcy Act of 1986 (P.L. 99–554) expanded the initial pilot Program to a 21 region, nationwide program encompassing 88 judicial districts (bankruptcy cases filed in Alabama and North Carolina are administered by the Administrative Office of the U.S. Courts). The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (P.L. 109–8) expanded the Program's responsibilities to include, among other things, means testing, credit counseling/debtor education, and debtor audits. The August 2019 enactment of the Small Business Reorganization Act (P.L. 116–54) gave the Program additional responsibilities regarding small business debtors.

USTP appropriations are offset primarily by revenues deposited into the United States Trustee System Fund from filing fees paid by consumer and business debtors as well as quarterly fees based on disbursements made by most chapter 11 debtors. The February 2026 enactment of the Bankruptcy Administration Improvement Act of 2025 (BAIA 2025, P.L. 119–76)

continued the quarterly fee scheduled enacted in January 2021 (BAIA 2020, P.L. 116–325) from April 1, 2026, through December 31, 2030, with an additional 0.1 percent in the percentage fee paid by larger bankruptcy cases. In addition, the USTP's chapter 7 filing fee allocation was reduced to permanently fund additional chapter 7 private trustee compensation beginning on October 1, 2026. Funding for temporary bankruptcy judgeships was also continued. The law is projected to enable the USTP to offset appropriations through new revenue annually through FY 2030.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund (AFF) as a repository for forfeited cash and the proceeds of sales of forfeited property under any law enforced and administered by the Department in accordance with 28 U.S.C. 524(c). Authorities of the AFF have been amended by various public laws enacted since 1984. Under current law, authority to use the AFF for certain investigative expenses shall be specified in annual appropriations acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise, or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the asset forfeiture program are paid from the permanent, indefinite portion of the AFF. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The Radiation Exposure Compensation Act (RECA) established an administrative claim program as an alternative to litigation for persons who contracted certain illnesses as a result of the United States atmospheric nuclear testing program during the Cold War and associated defense-related uranium extraction. On July 4, 2025, Public Law 119–21 was enacted. Sections 100201–100205 of this law reauthorized RECA until December 31, 2028, added multiple new eligible populations, and created a restitution system for persons who became ill after presumed exposure to the Manhattan Project waste.

The mission of the Federal Bureau of Investigation (FBI) is to protect the American people and uphold the Constitution of the United States.

The FBI's enterprise strategy includes four priorities to focus efforts across the enterprise: Crush Violent Crime, Defend the Homeland, Rebuild Public Trust, and Drive Fierce Organizational Accountability. The FBI accomplishes these priorities by continuously setting strategic goals and initiatives tied to executive and employee performance, including specific threat mitigation strategies through Integrated Program Management.

The FBI is headed by a Director, who is appointed by the President and confirmed by the Senate. FBI Headquarters, located in Washington, D.C., provides centralized operational, policy, and administrative support to FBI investigations. The FBI operates 56 field offices in major U.S. cities and approximately 350 resident agencies (RAs) throughout the country. RAs are satellite offices that allow the FBI to maintain a presence in and serve local communities. The FBI also operates 62 Legal Attache offices and 34 sub-offices in 80 foreign countries around the world. Finally, the FBI maintains several specialized facilities and analytical centers across the country, such as the Criminal Justice Information Services Division in Clarksburg, WV; the Richard Shelby Center for Innovation and Advanced Training in Huntsville, AL; and the FBI Academy and Laboratory at Quantico, VA.

A number of FBI activities are supported by reimbursable funding streams. The FBI is also authorized to conduct fingerprint and name checks for certain non-Federal agencies.

For 2027, the FBI is requesting \$12.5 billion in Salaries and Expenses funding.

The Drug Enforcement Administration's (DEA) mission is to enforce the controlled substances laws and regulations of the United States. The DEA is advancing its core North Star mission priorities strengthening enforcement; dismantling the Mexican cartels; disrupting chemical supply chains; targeting illicit finance; leading the fight on the cyber and dark web frontlines; building strategic domestic and foreign partnerships; reducing violence and protecting communities; and, prioritizing employee wellness. As the Department's single-mission agency for enforcing the Controlled Substances Act, the DEA plays an integral role in advancing the Administration's priorities as demonstrated by the DEA's enforcement efforts along our borders, particularly the Southern Border, where the Mexican Sinaloa and Jalisco Cartels (Cartel Jalisco Nueva Generacion, or CJNG) actively and continuously introduce fentanyl and other illicit substances into the United States.

The DEA is also actively supporting the Administration's immigration enforcement priorities by participating in the Homeland Security Task Forces (HSTFs) and has deployed Special Agents to Washington, D.C. and Memphis, Tennessee to assist with reducing and preventing violent crime.

The DEA's activities are divided into three decision units:

Domestic Enforcement: Through effective enforcement efforts and complementary support functions, the DEA disrupts and dismantles the leadership, command and control, and infrastructure of major drug traffick-

ing syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This decision unit contains most of the DEA's S&E resources and staffing, domestic enforcement groups, State and local task forces, Federal and local task forces, intelligence groups, and all the support functions essential to accomplishing the mission domestically.

International Enforcement: The DEA works with its foreign counterparts to attack vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. The DEA continues to engage with partners abroad and advance its international enforcement objectives with an emphasis on the Western Hemisphere region.

State and Local Assistance: The DEA supports State and local law enforcement with training so that State and local agencies can better address the environmental threat of clandestine laboratories in their communities.

Public Law 102-395 established the Diversion Control Fee Account in 1993. The DEA Diversion Control Program sets fees at a level to ensure the recovery of the full cost of operating the program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA prevents, detects, and investigates the diversion of pharmaceutical controlled substances and listed chemicals from legitimate channels, while ensuring an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial and scientific needs. The CSA requires manufacturers, distributors, pharmacies, hospitals, practitioners, mid-level practitioners, researchers, teaching institutes, narcotic treatment programs, importers/exporters, and analytical labs to register with the DEA in order to distribute, manufacture, prescribe, dispense, or otherwise handle controlled substances or listed chemicals. The registrant community is the first line of defense against the opioid epidemic now facing the United States. The engagement and education of these community members can help in reducing the overprescribing of opioids and the prevention of abuse and illicit use.

Investigations that the Diversion Control Program conducts fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances, and the diversion of listed chemicals (List I and II) used in the illicit manufacture of controlled substances.

This appropriation will provide for the custody and care of a projected average daily population of over 153,000 individuals, and for the maintenance and operation of 121 penal institutions, regional offices, and a central office located in Washington, D.C. The appropriation also finances the incarceration of individuals in the BOP's care and custody who are in State and local jails and other facilities for short periods of time. The Federal Prison System (FPS) also receives reimbursements for the daily care and maintenance of State and local offenders, for utilities used by Federal Prison Industries, Inc., for staff housing, and for meals purchased by FPS staff at institutions.

Inmate Care and Programs.—This activity covers the costs of all food, medical supplies, clothing, welfare services, release clothing, transportation, gratuities, staff salaries (including salaries of Health Resources and Services Administration commissioned officers), and operational costs of functions directly related to providing inmate care. This decision unit also finances the costs of GED classes and other educational programs, vocational training, drug treatment, religious programs, psychological services, and other inmate programs such as Life Connections.

Institution Security and Administration.—This activity covers costs associated with the maintenance of facilities and institution security. This activity finances institution maintenance, motor pool operations, power-house operations, institution security, and other administrative functions. In addition, this activity covers all costs associated with general administration and provides funding for the central office, regional offices, and staff training centers. Also included are oversight functions of the executive staff and regional and central office program managers in the areas of budget development and execution; financial management; procurement and property management; human resource management; inmate systems management; safety; legal counsel; research and evaluation; and systems support.

Contract Confinement.—This activity provides for the confinement of sentenced Federal offenders in a Government-owned, contractor-operated facility, and State, local, and private contract facilities. It also provides for the care of individuals in custody who are in contract community residential centers and covers the costs associated with management and oversight of contract confinement functions.

For 2027, BOP requests no less than \$409.5 million in base funding to continue robustly implementing the First Step Act. The full and timely implementation of the First Step Act remains a priority for the BOP.

Federal Prison Industries, Inc. (FPI) was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to protect society and reduce crime by preparing inmates with job training and practical work skills for reentry success. This rehabilitative work program provides products and services primarily to other Federal agencies. FPI's operations are self-sustaining to minimize impacts to taxpayers and are diversified to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. FPI provides job and life skills training to inmates, makes prisons and communities safer, allows inmates to meet their financial obligations, and supports local and small businesses through its purchases of materials.

FEDERAL PRISON INDUSTRIES, INCORPORATED—Continued

FPI operates as a revolving fund and does not receive an annual appropriation. The majority of revenues are derived from the sale of products and services to other Federal departments, agencies, and bureaus. Operating expenses such as the cost of raw materials and supplies, inmate wages, staff salaries, and capital expenditures are applied against these revenues resulting in net operating income or loss, which is reapplied toward operating costs for future production. In this regard, FPI makes capital investments in buildings and improvements, machinery, and equipment as necessary to conduct its industrial operations. To increase inmate work opportunities, FPI continues to explore opportunities with commercial customers.

In the Consolidated and Further Continuing Appropriations Act, 2012 (P.L. 112–55), FPI received two authorities to increase inmate employment. The first enables FPI to recapture work that would otherwise be performed outside of the United States, also known as repatriation. The second authorizes FPI to participate in the Prison Industries Enhancement Certification Program, which allows FPI to partner with commercial businesses under a strict set of conditions to manufacture and sell prison-made goods in interstate commerce.

More recently, in December 2018, the First Step Act of 2018 (P.L. 115–391) provided FPI with four additional market authorities to expand inmate employment. These new authorities include the sale of FPI products to public entities for use in correctional institutions; public entities for use in disaster relief or emergency response; the D.C. government; and, except for office furniture, certain IRS-recognized non-profit organizations.

The 2027 Budget requests \$55 million for the Office of Justice Programs (OJP) Research, Evaluation, and Statistics appropriation. This appropriation supports objective and rigorous scientific research, evaluation, and collection and dissemination of statistical data to inform efforts that promote public safety and advance justice. The information and technologies developed through OJP's research and statistical programs improve the efficiency and effectiveness of criminal justice systems and programs at all levels of government.

Research, Development, and Evaluation Program.—The 2027 Budget proposes a direct appropriation of \$22 million for the National Institute of Justice (NIJ) to support high-quality research, development, and evaluation in the forensic, social, and physical sciences.

Criminal Justice Statistics Program.—The 2027 Budget proposes \$33 million for the Bureau of Justice Statistics (BJS) to carry out national statistical collections supporting data-driven approaches to reduce and prevent crime and to assist state, local and tribal governments in enhancing their statistical capabilities, including improving criminal history records and information systems. Current programs provide statistics on victimization, law enforcement, Federal justice systems, prosecution and adjudication (courts), corrections, and criminal histories and recidivism.

Research, Evaluation and Statistics Set Aside.—The 2027 Budget requests a set-aside of up to 2.5 percent for research, evaluation, and statistics. The

RESEARCH, EVALUATION AND STATISTICS—Continued

set-aside amount from OJP discretionary programs supports the base programs for NIJ and BJS.

Management and Administration.—The 2027 Budget proposes a total Management and Administration funding level of \$273 million for OJP, supporting 719 total FTE.

The Department's grant components, including OJP, the Office of Community Oriented Policing Services (COPS), and the Office on Violence Against Women (OVW), will be consolidated into one component. This consolidation will create process and cost efficiencies and improve partnerships with State, local, Tribal, and other community stakeholders. The Department continues to plan for and analyze the most effective method to accomplish the consolidation, including the structure and name of the consolidated organization.

The 2027 Budget requests \$1.6 billion for OJP's State and Local Law Enforcement Assistance appropriation. State, local, and tribal law enforcement and criminal justice professionals are responsible for the majority of the Nation's day-to-day crime prevention and control activities. The programs supported by this account support law enforcement efforts to reduce and prevent violent crime; improve law enforcement officer safety and wellness; address drug-related crime and substance abuse; support victims of trafficking and sexual assault, and better coordinate law enforcement efforts at all levels of government. The Budget includes programs such as the following:

Byrne Justice Assistance Grants (JAG).—The Byrne Justice Assistance Grants program awards grants to State, local, and tribal governments to support a broad range of activities that prevent and control crime, including: law enforcement operations and programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment programs; and planning, evaluation, and technology improvement programs. The 2027 Budget proposes \$426 million for the JAG appropriation, including \$359 million for the JAG formula program.

Model City Initiative.—The 2027 Budget requests \$100 million for the new Model City Initiative (MCI) to bolster DOJ's ongoing efforts to combat violent crime, and provide technology, equipment, staffing, and support to MCI task forces. This initiative enables participating jurisdictions to consult appropriate stakeholders and receive expedited, coordinated assistance from DOJ to enhance local law enforcement strategies and improve their capacity to effectively reduce violent crime.

Comprehensive Addiction Recovery Act (CARA).—The Budget requests \$418 million for continued support for programs authorized by the Comprehensive Addiction Recovery Act, including \$189 million for OJP's Comprehensive Opioid, Stimulant, and Substance Use Program (COSSUP), which aims to reduce substance use and address use disorders, while reducing the number of overdose fatalities. The Budget also requests \$89 million for the Drug Court Program, which provides an alternative to incarceration

to addicted offenders who enter the criminal justice system, addressing their addiction through treatment and recovery support services and subsequently reducing recidivism. Other CARA-authorized programs requested in the budget include: Veterans Treatment Courts (\$30 million), Residential Substance Abuse Treatment (\$35 million), Justice and Mental Health Collaborations (\$40 million), and the Prescription Drug Monitoring Program (\$35 million).

Combating Sexual Assault and Human Trafficking.—The 2027 Budget invests in programs that assist state, local, and tribal governments in improving their response to sexual assault and eliminating forensic evidence analysis backlogs related to these cases, including \$51.5 million for the Sexual Assault Kit Initiative. The 2027 Budget also requests \$88 million to support human trafficking grant programs, including support for comprehensive and specialized services for human trafficking victims, as well as multidisciplinary taskforces to identify, investigate, and prosecute these types of cases.

The High Intensity Drug Trafficking Areas (HIDTA) program was established by the Anti-Drug Abuse Act of 1988, as amended, to provide assistance to Federal, State, local, and tribal law enforcement entities operating in those areas most adversely affected by drug trafficking. The HIDTA program provides resources to Federal, State, local, and tribal agencies in each HIDTA region to carry out activities that address the specific drug threats of that region. A central feature of the HIDTA program is the discretion granted to HIDTA Executive Boards to design and carry out activities that reflect the specific drug trafficking threats found in each HIDTA region. This discretion ensures that each HIDTA Executive Board can tailor its strategy and initiatives closely to local conditions and can respond quickly to changes in those conditions. Among the types of activities funded by the HIDTA program are: drug enforcement task forces comprised of multiple Federal, State, local, and tribal agencies designed to dismantle and disrupt drug trafficking organizations; multi-agency intelligence centers that provide drug intelligence to HIDTA initiatives and participating agencies; initiatives to establish or improve interoperability of communications and information systems between and among law enforcement agencies; and investments in technology infrastructure.

For 2027, the Budget continues the FY 2026 proposal to transfer management of the HIDTA program from the Office of National Drug Control Policy to OJP to improve coordination with the Department's other drug enforcement efforts.

The COPS Office advances the practice of community policing by the Nation's state and local law enforcement agencies through information sharing and grant resources. COPS develops programs that respond directly to the emerging needs of law enforcement agencies to shift focus from reacting to preventing crime and disorder.

To advance this mission, COPS develops training and technical assistance to enhance law enforcement officers problem-solving and community interaction skills, promotes collaboration between law enforcement and community members to develop innovative initiatives to prevent crime, and provides cost-effective service delivery to grantees to support community policing. COPS awards grants to hire community policing professionals, develop and test innovative policing strategies, and provide training and technical assistance to community members, local government leaders, and all levels of law enforcement. Since 1994, the COPS Office has invested more than \$20 billion to help advance community policing, supporting over 13,000 of the Nation's 18,000 law enforcement agencies.

The Budget requests \$303 million for COPS programs, including \$256 million for the COPS Hiring appropriation. Within this amount, \$164 million is for the COPS Hiring Program; \$34 million is for tribal law enforcement; \$10 million is for Law Enforcement Mental Health and Wellness; \$4 million is for the Tribal Access Program; and \$44 million for the Regional Information Sharing System. The Budget also includes \$12 million for the Police Act Program; and \$35 million for the STOP School Violence Program.

The Department's grant components, including COPS, OJP, and OVW, will be consolidated into one component. This consolidation will create process and cost efficiencies and improve partnerships with State, local, Tribal, and other community stakeholders. The Department continues to plan for and analyze the most effective method to accomplish the consolidation, including the structure and name of the consolidated organization.

that serve culturally specific and underserved communities and others, OVW grant programs help provide victims with the protection and services they need to pursue safe and healthy lives, while simultaneously enabling communities to hold offenders accountable for their violence.

The 2027 Budget proposes \$539 million for programs administered by OVW to prevent and respond to violence against women, including domestic violence, dating violence, sexual assault, and stalking.

The Department's grant components, including COPS, OJP, and OVW, will be consolidated into one component. This consolidation will create process and cost efficiencies and improve partnerships with State, local, tribal, and other community stakeholders. The Department continues to plan for and analyze the most effective method to accomplish the consolidation, including the structure and name of the consolidated organization.

The 2027 Budget requests \$310 million for OJP's Juvenile Justice Programs to support State, local, tribal, and community efforts to prevent juvenile delinquency and crime, and assist children who have been victimized by crime and child abuse. These programs also help states and communities improve their juvenile justice systems in ways that protect public safety, hold youth involved in the justice system accountable, and provide appropriate reentry services for youth returning to their communities after detention in secure correctional facilities.

The 2027 Budget requests \$65 million for the Part B: Formula Grants Program, which is the core program that supports State, local, and tribal efforts to improve the fairness and responsiveness of the juvenile justice system and to ensure appropriate accountability of the juvenile offender. The 2027 Budget also requests \$108 million for the Missing and Exploited Children Program, \$43 million for Youth Mentoring, \$46 million for Delinquency Prevention Programs, and \$41 million for the Victims of Child Abuse Act program.

The 2027 Budget requests \$239 million for OJP's Public Safety Officers' Benefits (PSOB) Program, of which \$204 million is a mandatory appropriation for death benefits and \$34.8 million is a discretionary appropriation for disability and education benefits. This appropriation supports programs that provide benefits to public safety officers who are severely injured in the line of duty and to the families and survivors of public safety officers killed or mortally injured in the line of duty. These programs represent the continuation of a partnership between the Department, national public safety organizations, and public safety agencies at the state, local, and tribal levels. The PSOB program oversees three types of benefits:

PUBLIC SAFETY OFFICER BENEFITS—Continued

Death Benefits.—This program provides a one-time financial benefit to survivors of public safety officers whose deaths resulted from injuries sustained in the line of duty.

Disability Benefits.—This program offers a one-time financial benefit to public safety officers permanently disabled by catastrophic injuries sustained in the line of duty.

Education Benefits.—This program provides financial support for higher education expenses to the eligible spouses and children of public safety officers killed or permanently disabled in the line of duty.

The Crime Victims Fund (CVF) provides formula grants to states and territories to support compensation and services for victims of crime. CVF resources also support training, technical assistance, and demonstration grants designed to improve the capabilities and capacity of victims' services providers throughout the Nation. The Fund is financed by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The 2027 Budget proposes to provide \$1.9 billion from collections and balances for crime victim compensation, services, and related needs. Of this amount, up to \$95 million is available for the Office for Victims of Crime for Tribal Victims Assistance Grants.

Enacted in 2014, the Workforce Innovation and Opportunity Act (WIOA) is the primary authorization for this appropriation account. The Act was intended to provide job seekers and workers with the labor market information, job search assistance, and training they need to get and keep jobs, and to provide employers with skilled workers. However, the current patchwork of workforce development programs has proven inefficient and burdensome to States. To remove the burden on States and enhance focus on improving outcomes for workers, the President's Budget proposes to consolidate 12 different programs (including Adult Employment and

TRAINING AND EMPLOYMENT SERVICES—Continued

Training Activities; Youth Activities; Dislocated Worker Employment and Training Activities; Dislocated Worker National Reserve; Indian and Native American Programs; National Farmworker Jobs Program; Reentry Employment Opportunities; Apprenticeship; Workforce Data Quality Initiative; YouthBuild; and Demonstrations and Pilots) into one workforce development funding stream called the Make America Skilled Again grant program.

Make America Skilled Again.—Grants to provide financial assistance to States, territories, and Tribes to support a wide range of workforce development, training, and related activities in an effort to help States and local communities respond to their workforce needs and support their economic development goals. The Department will be able to spend up to 0.75 percent of MASA funds for performance accountability, program integrity, and technical assistance services to grantees, replacing the technical assistance and training funds currently provided through appropriations and authorizing legislation, and up to 3 percent for targeted investments related to Registered Apprenticeship for intermediary contracts and cooperative agreements, outreach and engagement, and technology modernization initiatives. Grantees will have a minimum 10 percent expenditure on Registered Apprenticeship activities.

Career and Technical Education. To further improve efficiency in the workforce development system and effectively prepare students and workers to succeed in the labor market, the Budget transfers programs funded under the Carl D. Perkins Career and Technical Education Act of 2006 (Perkins V) from the Department of Education (ED) to the Department of Labor. The Budget provides funding for Career and Technical Education (CTE) State Grants and CTE National Programs authorized by Title I and section 114 of Perkins V, respectively. By shifting CTE programs from ED to DOL, the Budget streamlines services, reduces administrative burden, and helps fulfill the President's promise to return education to the States.

The Budget builds on the success of the Workforce Development Partnership between the agencies that began in FY 2025 to integrate the Federal Government's workforce development portfolio. The partnership quickly reduced duplication and increased efficiency by coordinating technical assistance, monitoring, and State planning, thereby demonstrating that DOL is best positioned to meet the needs of American students and workers. Transferring programs funded under Perkins V from ED to DOL will create a stronger talent pipeline for the Nation's workforce, give States a central point of contact in the Federal Government, and reduce duplication of effort and conflicting agency directives.

Established in 1964 as part of the Economic Opportunity Act and authorized by the Workforce Innovation and Opportunity Act of 2014 (P.L. 113–128, Title 1, Subtitle C, section 141), Job Corps provides youth with academic, career technical and marketable skills to enter the workforce, enroll in post-secondary education, or enlist in the military. The Budget eliminates Job Corps because it is financially unsustainable, has an exorbitant per-participant cost, risks the safety of young adults, and fails to deliver on performance outcomes. The 2027 Budget will fund Job Corps for close-out costs to execute an orderly shutdown of the program.

Community Service Employment for Older Americans (CSEOA) is a community service and work-based job training program for older Americans. Authorized by Title IV of the Older Americans Act, as amended, and reauthorized in 2020 (P.L. 116–131), the program provides training for low-income, unemployed seniors ages 55 and older. The program is proposed for elimination because it fails to meet its major statutory goals of fostering economic self-sufficiency and moving low-income seniors into unsubsidized employment.

Unemployment compensation.—State administration amounts provide administrative grants to State agencies that administer the program by paying unemployment compensation to eligible workers and collecting State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-service members as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose of this performance management system is to effect continuous improvement in State performance and implement activities designed to reduce errors and prevent fraud, waste, and abuse in

the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administering the program resulting from increases in the number of unemployment claims filed and paid. The appropriation automatically provides additional funds whenever unemployment claim workloads increase above levels specified in the appropriations language.

Employment service.—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by grants provided by formula to States. Funding allotments are provided annually on a Program Year basis beginning July 1 and ending June 30 of the following year. To remove the burden on States of managing a confusing patchwork of different workforce development grant programs and to enhance focus on improving outcomes for workers, the President's Budget proposes to consolidate 11 different programs, including Employment Service State grants, into one workforce development funding stream called the Make America Skilled Again grant program.

Employment service activities serving national needs are conducted through contracts, grants, and reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. The Make America Skilled Again program provides a set-aside for these activities, eliminating the need for this funding in 2027. States also currently receive funding under this activity for administration of the Work Opportunity Tax Credit. However, the tax credit expired at the end of December 2025, and so the President's Budget requests no funding for its administration in 2027.

Foreign Labor Certification.—This activity provides for the operation of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill permanent or temporary vacancies. Major programs include the H-2A temporary agricultural, H-2B temporary non-agricultural, CW-1 temporary, H-1B temporary specialty occupations, and Permanent (Green Card) labor certification programs. The account is divided between Federal and State activities. Consistent with the Trump Administration's executive actions to promote government efficiency, secure the Nation's borders, promote economic growth, and facilitate use of legal pathways that protect the U.S. from national security and other public safety threats, the Budget proposes to make the Office of Foreign Labor Certification (OFLC) an independent sub-agency. This new structure will enable OFLC to administer immigration and migration policies, regulations, and programs in a manner that optimizes performance, minimizes unnecessary use of resources, and ensures resiliency and continuity of operations that are customer centered.

Federal Administration.—Federal Administration supports most of the application processing services provided by the Department to U.S. em-

ployers. These include the staff who adjudicate applications; the IT systems that support application filing and processing; policy; program management; and other Federal activities supporting the effective and efficient administration of the foreign labor certification programs.

State Grants.—State Grants support required State-level foreign labor certification activities conducted by State Workforce Agencies in 55 States and U.S. territories. Activities include posting and circulating job orders and other assistance to recruit U.S. workers; conducting safety inspections of employer-provided housing for H-2A agricultural workers; developing prevailing practice and wage surveys to set wages and work standards in a geographic area; and conducting post-certification site visits to support employer compliance with H-2A and H-2B program requirements.

Workforce Information and Electronic Tools.—These funds are used to support the joint Federal-State efforts to facilitate workers finding jobs and businesses finding workers through the comprehensive American Job Center system authorized under the Workforce Innovation and Opportunity Act. This system, and the online career tools that expand its reach, provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services.

National Agricultural Workers Survey fee.—The Department of Labor conducts the National Agricultural Workers Survey (NAWS), which collects information annually about the demographic, employment, and health characteristics of the U.S. crop labor force. The information is obtained directly from farm workers through face-to-face interviews. The Department is currently evaluating methodologies to reduce overall cost of conducting the survey while still receiving the desired data.

This account provides for general fund financing of extended unemployment benefit programs under certain statutes. It is also the mechanism used to make general fund reimbursements for some or all of the benefits and administrative costs incurred for temporary Federal programs. These funds are transferred from the Payments to the Unemployment Trust Fund account to a receipt account in the Unemployment Trust Fund (UTF) so that resources may be transferred to the Employment Security Administration Account in the UTF for administrative costs, or to the Extended Unemployment Compensation Account or the Federal Unemployment Account in the UTF for benefit costs.

The Coronavirus Aid, Relief, and Economic Security Act (Public Law 116-136) provided as an incentive for States to enact State Short-Time Compensation (STC) programs and promote the use of STC, 100 percent reimbursement of STC benefit costs paid under State law for weeks ending on or before December 31, 2020. The Continued Assistance for Unemployed Workers Act of 2020 (Public Law 116-260) extended the 100 percent STC reimbursements to include weeks of unemployment ending on or before March 14, 2021, and the American Rescue Plan Act (Public Law 117-2) further extended the 100 percent STC reimbursements to include weeks of unemployment ending on or before September 6, 2021. Grant

funding was also available to States whose permanent STC laws meet the Federal definition.

This account provides mandatory general revenue funding for Federal Pandemic Unemployment Compensation (FPUC), a temporary program established under the Coronavirus Aid, Relief, and Economic Security Act (Public Law 116-136). This program paid a supplement of \$600 on every week of unemployment compensation through July 31, 2020. It was then reauthorized by the Continued Assistance for Unemployed Workers Act of 2020 (Public Law 116-260) and modified to provide \$300 per week in supplemental benefits for weeks of unemployment beginning after December 26, 2020, and ending on or before March 14, 2021. In addition to reestablishing the FPUC program, the Continued Assistance for Unemployed Workers Act of 2020 established the Mixed Earners Unemployment Compensation (MEUC) program, which paid a \$100 supplemental to certain claimants with self-employment income for weeks of unemployment ending on or before March 14, 2021. The FAUC account also provides funding for the MEUC program. The American Rescue Plan Act (Public Law 117-2) extended the FPUC program at \$300 per week and the MEUC

FEDERAL ADDITIONAL UNEMPLOYMENT COMPENSATION PROGRAM,
RECOVERY—Continued

program at \$100 per week for certain claimants for weeks of unemployment ending on or before September 6, 2021.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, and to the Black Lung Disability Trust Fund as authorized by section 9501(c)(1) of the Internal Revenue Code of 1986; and for nonrepayable advances to the revolving fund established by section 901(e) of the Social Security Act, to the Unemployment Trust Fund as authorized by 5 U.S.C. 8509, and to the "Federal Unemployment Benefits and Allowances" account, such sums as may be necessary, which shall be available for obligation through September 30, 2028.

This appropriation makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account has provided repayable advances to the Black Lung Disability Trust Fund (BLDTF) when its balances proved insufficient to make payments from that account. The BLDTF now has authority to borrow directly from the Treasury under the trust fund debt restructuring provisions of Public Law 110–343. Repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This appropriation also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FEC Account) to pay the costs of unemployment compensation for former Federal employees and ex-servicemembers, and to the Federal Unemployment Benefits and Allowances (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance (TAA) for Workers program. These advances are shown as budget authority and outlays in the Advances account. The 2014 appropriations language included new authority for nonrepayable advances to the revolving fund for the Employment Security Administration Account (ESAA) in the UTF. In turn, this revolving fund may provide repayable, interest-bearing advances to the ESAA if it runs short of funds, and the borrowing authority will enable the ESAA to cover its obligations despite seasonal variations in the account's receipts.

Advances were not needed for the FUA and EUCA accounts in 2025, and the Department estimates that no advances will be necessary in 2026 or 2027. Detail on the nonrepayable advances is provided above; detail on the repayable advances is shown separately in the UTF or the BLDTF.

To address the potential need for significant and somewhat unpredictable advances to various accounts, the Congress appropriates such sums as necessary for advances to all of the potential recipient accounts. The 2027 request continues this authority.

PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, \$113,384,000, together with not to exceed \$53,906,000 which shall be available from the Employment Security Administration Account in the Unemployment Trust Fund.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund (UTF). The UTF has two accounts for the railroad unemployment insurance system

UNEMPLOYMENT TRUST FUND—Continued

but for the Federal-State unemployment insurance system there are 57 separate accounts: one for each of the 50 States, three jurisdictions (District of Columbia, Puerto Rico, Virgin Islands), and four Federal accounts. The State and jurisdiction accounts receive funds from a State unemployment insurance payroll tax which is used to pay benefits. The Federal Unemployment Tax Act (FUTA) payroll tax provides funds for two of the Federal accounts—the Employment Security Administration Account (ESAA) and the Extended Unemployment Compensation Account (EUCA)—while the remaining two, the Federal Unemployment Account (FUA) and the Federal Employees Compensation Account (FEC Account), are revolving accounts.

Except for FEC Account balances, funds on deposit in the UTF accounts are invested in Government securities until needed for payment of benefits or administrative expenses. The FUTA payroll tax is deposited in the ESAA which retains 80 percent of the deposit and pays the costs of Federal and State administration of the unemployment insurance system, veterans' employment services, surveys of wages and employment, foreign labor certifications and about 97 percent of the costs of the Employment Service. The other 20 percent of FUTA is transferred to the EUCA which pays for certain extended benefit (EB) payments. During periods of high State unemployment, there is a stand-by program of EB, financed one-half by State unemployment taxes and one-half by the FUTA payroll tax.

The UTF also provides repayable advances (loans) from the FUA to States and jurisdictions when the balances in their individual accounts are insufficient to pay benefits. Federal accounts in the UTF may receive repayable and nonrepayable advances from the general fund when they have insufficient balances to make advances to States, pay the Federal share of extended unemployment benefits, or pay for State and Federal administrative costs.

The FEC Account in the UTF provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse the FEC Account for benefits paid to their former employees. The FEC Account is not funded out of Federal unemployment taxes. Any additional resources necessary to assure that the FEC Account can make the required payments to States are provided from the Advances to the Unemployment Trust Fund and Other Funds appropriation.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the UTF, and receipts from a tax on railroad payrolls are deposited into the program's accounts in the UTF to meet expenses.

Jobs for Veterans State grants.—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans' Employment and Training Service (VETS) to act on behalf of the Secretary in the promulgation of policies and regulations that ensure

maximum employment and training opportunities for veterans and priority of service for veterans (38 U.S.C. 4215) within the state workforce delivery system for employment and training programs funded in whole or in part by the U.S. Department of Labor. Under the JVA, grants are allocated to the states according to the statutory formula to support Disabled Veterans' Outreach Program (DVOP) specialists and Local Veterans' Employment Representative (LVERs) staff.

DVOP specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOP specialists place maximum emphasis on assisting veterans with significant barriers to employment. LVER staff (38 U.S.C. 4104) conduct outreach to employers, employer associations, and business groups to promote the advantages of hiring veterans. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable state employment service delivery system, including American Job Centers by educating all workforce partner staff on current employment initiatives and programs for veterans. In addition, each LVER provides reports to the manager of the state employment service delivery system and to the state Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the state's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

Transition Assistance Program (TAP).—(10 U.S.C. 1144, 38 U.S.C. 4113) This program provides employment workshops for separating service members and their spouses to prepare these individuals for entry into the civilian workforce and job market. Its primary goal is to facilitate the transition from military to civilian employment. VETS coordinates with Federal agencies including the Departments of Defense, Veterans Affairs, Education, and Homeland Security, and also the Small Business Administration and the Office of Personnel Management to provide transition services to military service members separating from active duty. The 2019 National Defense Authorization Act instructed responsible agencies to improve TAP and directed DOL to deliver a mandatory one-day employment planning workshop for all transitioning service members, as well as optional days of instruction on general employment preparation and Vocational Training for transitioning service members interested in apprenticeship opportunities and technical careers. VETS also serves veterans and veteran spouses through the Off Base Transition Training pilot at selected states, to further serve and support underserved populations in locations away from active duty installations.

Federal Administration.—VETS' Federal Administration budget activity supports the Federal administration of 38 U.S.C. 41, 42, and 43. This allows VETS to carry out programs and develop policies to provide employment and training opportunities designed to meet the needs of veterans (38 U.S.C. 4102–4115). This activity provides for the salary and benefits, travel, and training for all VETS' current staff in the national office, six regional offices, and offices in each state, the District of Columbia, and Puerto Rico. In addition, this activity provides for outreach and engagement with Federal, state, and local governments; private sector employers and trade associations; institutions of higher learning; non-profit organizations; and Veteran Service Organizations to help service members, returning veterans, and families reintegrate into the workforce.

It also enables VETS to discharge its responsibilities to administer, interpret, and enforce the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), 38 U.S.C. 4301–4335, by providing technical assistance and investigating complaints received from veterans and service members who believe their employment and reemployment rights were violated. This budget activity enables VETS to investigate complaints received from veterans who claim a violation of their veterans' preference rights in Federal hiring pursuant to the Veterans' Employment Opportunities Act of 1998 (VEOA), 5 U.S.C. 3330a. VETS' Federal Contractor Program (VETS-4212) is also supported under this activity, pursuant to 38 U.S.C. 4212. These responsibilities involve the administration of a system whereby Federal contractors submit reports setting forth their affirmative action efforts to hire and retain eligible veterans.

VETERANS' EMPLOYMENT AND TRAINING—Continued

Resources under the Federal Administration activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 U.S.C. 4102A(b)(5)), and the Homeless Veterans Reintegration (38 U.S.C. 2021). VETS personnel provide technical assistance to grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

Federal Administration supports the oversight and development of policies for TAP (10 U.S.C. 1144 and 38 U.S.C. 4113). Through outreach and education efforts, such as job fairs, VETS staff raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 U.S.C. 4110) also are supported through this budget activity. In addition, through fee collection, the federal administration activity funds administrative processes associated with the Honoring Investments in Recruiting and Employing American Military Veterans Act of 2017 (HIRE VETS Act or the Act).

National Veterans' Training Institute (NVTI).—NVTI develops and supplies competency-based training to Federal and state providers of services to veterans (38 U.S.C. 4109). NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation and ongoing staff development so they can effectively assist job-seeking veterans.

Homeless Veterans' Reintegration Program (HVRP).—HVRP (38 U.S.C. 2021, 2021A and 2023) provides grants to states or other public entities, as well as to non-profits, including faith-based organizations. Grantees operate employment programs to assist homeless veterans reintegrate into meaningful employment and stimulate the development of effective service delivery systems that will address the complex problems facing homeless veterans. VETS partners with the U.S. Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans.

The Pension Benefit Guaranty Corporation (PBGC or the Corporation) is a Federal corporation established under the Employee Retirement Income Security Act (ERISA) of 1974, as amended. It guarantees payment of basic pension benefits earned by about 30 million of America's workers and retirees participating in more than 23,500 private-sector defined benefit pension plans. The Single-Employer Program protects about 18.4 million workers and retirees in about 22,200 pension plans. The Multiemployer Program protects about 11.1 million participants in about 1,305 pension plans. By law, the two programs are funded and administered separately, and their financial conditions, results of operations, and cash flows are reported separately.

The Single-Employer Program is financed by insurance premiums paid by companies that sponsor defined benefit pension plans, investment income from plan assets trusted by PBGC and recoveries from companies formerly responsible for the plans. Congress sets PBGC premium rates.

The Multiemployer Program is financed by premiums and investment income. The American Rescue Plan (ARP) Act of 2021 (Public Law 117-2) established the Special Financial Assistance (SFA) Program for financially troubled multiemployer pension plans. The SFA program is funded entirely by an appropriation from the General Fund of the U.S. Department of the Treasury.

Plan Preservation Efforts.—PBGC works to preserve plans and keep pension promises in the hands of the employers who make them. When companies undertake major transactions that might threaten their ability to pay pensions, PBGC negotiates protections for their pension plans. PBGC encouraged companies, both in bankruptcy and otherwise, to preserve their plans that were at risk. In FY 2025, PBGC:

—Protected 2,953 single-employer plan participants by taking action to encourage companies to keep their plans when they emerged from bankruptcy.

Stepping in to Insure Pensions When Plans Fail.—Nearly 1.4 million current and future retirees in trustee single-employer pension plans rely on PBGC for their pension benefits. In FY 2025, PBGC:

—Paid over \$6.4 billion to nearly 926,000 retirees in single-employer plans; and

—Completed 270 standard termination audits to verify plan administrators' calculation of benefits upon plan termination resulting in more than \$3.1 million in additional benefits distributed to 581 participants and beneficiaries in these plans.

Single-employer benefit payments.—The Single-Employer Program covers defined benefit pension plans that generally are sponsored by a single employer. When an under-funded single-employer plan terminates, PBGC steps in to pay participants' benefits up to legal limits. This typically happens when the employer sponsoring an underfunded plan liquidates in bankruptcy, ceases operation, or can no longer afford to keep the plan going. PBGC takes over the plan's assets, administration, and payment of benefits up to the legal limits. If a plan has enough money to pay all benefits owed to participants and beneficiaries, the plan sponsor can choose to terminate a plan by filing a standard termination. In FY 2025, PBGC:

—Assumed responsibility for the benefit payments of 19,908 workers and retirees in the 31 single-employer plans that were trustee.

Multiemployer financial assistance.—The Multiemployer Program protects about 11.1 million participants in about 1,305 pension plans. The Multiemployer Program covers defined benefit pension plans that are maintained through one or more collective bargaining agreements between employers and one or more employee organizations or unions. The participating employers are usually in the same or related industries, such as

transportation, construction, mining, or hospitality. If a PBGC-insured multiemployer plan is unable to pay guaranteed benefits when due, PBGC provides insolvent multiemployer plans with traditional financial assistance, in the statutorily required form of loans (generally unsecured), sufficient to pay PBGC guaranteed benefits and reasonable administrative expenses. In FY 2025, PBGC:

—Provided \$168.5 million in traditional financial assistance to 100 multiemployer plans covering 60,244 participants (including beneficiaries) receiving guaranteed benefits.

Under the SFA Program as of the end of FY 2025, PBGC has approved applications from 139 plans for \$74.1 billion in SFA since the program began. PBGC provides funding to eligible multiemployer plans in an amount projected to enable plans to cover their full plan benefits through 2051.

Investment management fees and custodian bank fees.—PBGC contracts with professional financial services corporations to manage Trust Fund assets in accordance with an investment strategy approved by PBGC's Board of Directors. Investment management fees are driven by the amount of assets under management. They are a direct, programmatic expense required to maintain the Trust Fund which supports single-employer benefit payments.

Consolidated Administrative Budget.—PBGC's administrative budget comprises all expenditures and operations that support:

- Benefit payments to pension plan participants;
- Financial assistance to distressed multiemployer pension plans; and
- Stewardship and accountability.

These operations include premium collections, pre-trusteeship work, efforts to preserve pension plans, recovery of assets from former plan sponsors, and pension insurance program protection activities. This area also covers the expenditures that support activities related to trusteeship; plan asset management (excluding investment management fees) and trust accounting; as well as benefit payments and administration services. Furthermore, this area includes the administrative functions covering procurement, financial management, human resources, facilities management, communications, legal support, and information technology infrastructure. Finally, these funds support the operations of the Participant and Plan Sponsor Advocate and the required functions and efforts of the Office of the Inspector General.

Federal Employees' Compensation Act benefits.—The Federal Employees' Compensation Act (FECA) program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). A workers' compensation case is created following the receipt of an injury report or claim for occupational disease. In 2027, the FECA program projects to create 90,000

cases for Federal workers or their survivors; 17,000 Federal employees are projected to submit initial wage-loss claims; and 36,000 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

Longshore and Harbor Workers' Compensation Act benefits.—Under the Longshore and Harbor Workers' Compensation Act, as amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons receiving benefits prior to 1972. The remainder is provided from the Special Workers' Compensation Fund, which is financed by private employers, and is assessed at the beginning of each calendar year for their proportionate share of these payments.

Panama Canal Commission (PCC) Benefits.—The PCC Fund currently meets the Commissions Federal Employees Program workers' compensation obligations that extend beyond the dissolution of the PCC on December 31, 1999, under the Panama Canal Treaty of 1977. However, the PCC fund is estimated to be insufficient to cover its obligations during 2027. Once PCC funds are depleted, PCC benefits will be paid out of the Special Benefits Employees' Compensation Fund.

Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) benefits.—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses. This program is EEOICPA Part B.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program Part E, to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act.

Part B was created with a definite mandatory appropriation for administrative costs, consistent with other DOL Office of Workers' Compensation Programs (OWCP) administration accounts, which is reflected in the appropriations language for this account. Part E was created with an indefinite mandatory appropriation, because initial administration costs were uncer-

tain, which is why the Part E amount is not included in the appropriations account, though the planned amount is included in tables.

The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act of 2015 (P.L. 113–291) amended EEOICPA to include Section 3687, creating the Advisory Board on Toxic Substances and Worker Health to advise the Secretary of Labor (as delegated by Executive Order 13699) with respect to technical aspects of the EEOICPA program. The Advisory Board is charged with advising the Secretary on four statutorily-specific technical issues related to EEOICPA: DOL's site exposure matrices; medical guidance for claims examiners; evidentiary requirements for claims under subtitle B related to lung disease; and the work of industrial hygienists and staff physicians and consulting physicians to ensure quality, objectivity, and consistency.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled due to coal workers' pneumoconiosis (black lung), and to their spouses and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107–275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Office of Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the FECA program from the Commission to the Department of Labor, effective January 1, 1989. The fund is estimated to be insufficient to cover its obligations during 2027. Once PCC funds are depleted, PCC benefits will be paid out of the Special Benefits Employees' Compensation Fund.

The Black Lung Disability Trust Fund (BLDTF) consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on coal mined and used domestically, along with the amounts borrowed from Treasury. Additional monies in the BLDTF come from coal companies' reimbursements for payments by the Trust Fund, penalties, and Section

BLACK LUNG DISABILITY TRUST FUND—Continued

501(c)(21) trusts. Monies in the BLDTF are used to pay compensation and medical benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the BLDTF pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. Because excise tax receipts have been insufficient to cover the BLDTF's expenses, the fund has borrowed monies necessary to meet the shortfall from the U.S. Treasury, subject to repayment with interest. This led to the fund accumulating a large amount of debt. The Emergency Economic Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid. Due to a decline in coal production and other factors, however, the Trust Fund's debt has continued to grow.

Note.—The coal excise tax rate fluctuated between 2019 and 2022, alternating between \$0.50 to \$1.10 per ton on underground-mined coal and \$0.25 to \$0.55 per ton on surface-mined coal or 2% of the sales price (whichever is lower). With the Inflation Reduction Act of 2022, Congress permanently set the rates to provide more stability for the BLDTF. Effective September 30, 2022, all coal from underground mines is taxed at \$1.10 per ton or 4.4% of the sale price and all coal from surface mines is taxed at \$0.55 per ton or 4.4% of the sale price.

The trust fund consists of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and—pursuant to an annual assessment of the industry—for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

The trust fund is available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments, after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons receiving benefits prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

The Wage and Hour Division enforces the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act (FMLA), certain provisions of the Immigration and Nationality Act (INA), the wage garnishment provisions in Title III of the Consumer Credit Protection Act (CCPA), the Employee Polygraph Protection Act (EPPA), and provisions of the United States-Mexico-Canada Agreement (USMCA). The Division also determines prevailing wages and enforces employment standards under various Government contract wage standards, including the Davis-Bacon and Related Acts (DBRA) and the McNamara-O'Hara Service Contract Act (SCA). Collectively, these labor standards cover most private, state, and local government employment. They protect nearly 155 million workers in more than 12 million establishments throughout the United States and its territories.

The Wage and Hour Division has traditionally had responsibility for enforcing certain worker protections provisions of the Immigration and Nationality Act, specifically the H-2A and H-1B temporary non-immigrant foreign worker programs. Pursuant to an Interagency Agreement (IAA) between the U.S. Department of Homeland Security (DHS) and the U.S. Department of Labor (DOL) and section 214(c)(14)(B) of the Immigration and Nationality Act (INA), 8 U.S.C. 1184(c)(14)(B), DOL and WHD have been delegated the enforcement authority located at section 214(c)(14)(A)(i) of the INA, 8 U.S.C. 1184(c)(14)(A)(i) for enforcing the H-2B temporary non-immigrant foreign worker program. Under section 524 of H.R. 3288, the Secretary of Labor may use one-third of the H-1B and L Fraud Protection and Detection fee account for enforcement of these temporary worker program provisions and for related enforcement activities.

The 2026 Budget proposes to eliminate OFCCP, a continuation of the proposal from the 2026 Budget. Executive Order (EO) 14173, *Ending Il-legal Discrimination and Restoring Merit-Based Opportunity*, rescinded EO 11246, permanently removing the basis for OFCCP's EO 11246 enforcement authority and program work. The 2027 Budget transfers enforcement of the Vietnam Era Veterans' Readjustment Assistance Act of 1974 and enforcement of Section 503 of the Rehabilitation Act of 1973 to the proposed new Office of Civil Rights.

The Office of Labor-Management Standards (OLMS) administers the Labor-Management Reporting and Disclosure Act (LMRDA) and related laws. OLMS is the lead agency responsible for safeguarding labor union assets, ensuring fair and democratic elections of union officers, and creating transparency through public disclosure of various required forms. OLMS conducts criminal investigations into potential offenses such as embezzlement, deprivation of rights through violence, extortionate picketing, willful failure to file required reports, destruction of records, filing false reports, and election fraud within unions. Additionally, the LMRDA prohibits individuals convicted of certain crimes from holding union office or employment, or from occupying positions with employers or employer associations where they possess "specific collective bargaining authority or direct responsibility in the area of labor-management relations." Civil investigations encompass violations of the LMRDA, including those related to union elections, financial disclosures by unions, union officers and employees, employers, and labor relations consultants, and the imposition of trusteeships on labor unions. OLMS also conducts audits into the financial conditions and operations of unions.

The 2027 funding level is \$1.6 million above the 2026 Full-Year CR level of \$48,515,000. With this funding, OLMS will maintain effective oversight of unions' compliance with the statutory financial reporting obligations under the LMRDA, investigations of complaints under the laws governing the holding of elections of labor union officers, and its responsibilities under 13(c) of the Federal Transit Act.

Safety and Health Standards.—This activity provides for the protection of worker safety and health through the development, promulgation, review, and evaluation of occupational safety and health standards and guidance, as specified under the Occupational Safety and Health Act of 1970 (OSH Act). Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is cost effective when com-

pared with alternative regulatory proposals providing equal levels of protection. This activity also ensures, through the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) process, that small business concerns are considered in the process of developing standards.

Federal Enforcement.—This activity provides for the protection of employees through the enforcement of workplace standards promulgated under the OSH Act, through the physical inspection of worksites, and by providing guidance on how to comply with the requirements of OSHA standards. OSHA's enforcement strategy ranges from a selective targeting of inspections and related compliance activities to a focus on specific high-hazard industries and worksites. Enforcement is prioritized by the investigation of imminent danger situations and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury and illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards.

Whistleblower Programs.—This activity provides for the enforcement of Section 11(c) of the OSH Act, which prohibits any person from discharging or in any manner retaliating against any employee because the employee has exercised rights under the Act, including complaining to OSHA and seeking an OSHA inspection, participating in an OSHA inspection, and participating or testifying in any proceeding related to an OSHA inspection.

State Programs.—This activity supports states that assume responsibility for administering occupational safety and health programs under State Plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to 50 percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs that are at least as effective as the Federal OSHA program. State programs, like Federal OSHA, provide a mix of enforcement, outreach, training, and compliance assistance activities. There are 29 approved State Plans.

Technical Support.—This activity provides support for OSHA's emergency response activities, including responses to oil spills, hurricanes, tornados, and other natural or manmade disasters. This activity also provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

Federal Compliance Assistance.—This activity supports a broad range of training, outreach, and cooperative programs that provide compliance assistance for employers and employees in protecting workers' safety and health, with particular emphasis on high-hazard industries, small business, and other hard-to-reach workers. OSHA works with employer and employee stakeholder groups to share compliance assistance information, resources, and tools, and to plan, coordinate, and participate in meetings, conferences, training events, and outreach activities in support of the agency's key initiatives, including enforcement and rulemaking activities, outreach campaigns, and other priority initiatives. OSHA also works with employers and employees through cooperative programs, such as the Voluntary Protection Programs to recognize employers with exemplary safety and health programs, and Alliances and Strategic Partnerships, which commit organizations to proactively collaborate with OSHA. This activity also provides assistance to federal agencies in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including online.

State Compliance Assistance: Consultation Grants.—This activity supports OSHA's On-Site Consultation Program, which offers no-cost and confidential occupational safety and health services to small- and medium-sized businesses in all 50 states, the District of Columbia, and several U.S. territories, with priority given to high-hazard worksites. On-Site Consulta-

tion services are separate from enforcement and do not result in penalties and citations. Consultants from state agencies or universities work with employers to identify workplace hazards, provide advice for compliance with OSHA standards, and assist in establishing and improving safety and health programs. Designated state agencies or universities enter into cooperative agreements that provide a 90 percent federal funding match.

Safety and Health Statistics.—This activity supports the agency's information technology infrastructure, management of information, OSHA's webpage and web-based compliance assistance services, and the statistical basis for OSHA's programs and field operations. These services are provided through an integrated data network and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

Executive Direction.—This activity supports overall leadership, direction, and support for agency operations. This includes developing strategic and agency priorities, coordination of policy, planning and evaluation, audit, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

Mine Safety and Health Enforcement.—This activity uses an integrated approach toward the prevention of mining accidents, injuries, and occupational illnesses, in coal, metal, and nonmetal mines. This includes inspection of mines and other activities as mandated by the Federal Mine Safety and Health Act of 1977 (Mine Act), as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), special emphasis

SALARIES AND EXPENSES—Continued

initiatives that focus on persistent safety and health hazards, promulgation of federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforcement efforts is to prevent death, disease, and injury from mining and promote safe and healthful workplaces for the Nation's miners.

Education and Training.—This activity develops and coordinates MSHA's mine safety and health education and training policies and provides classroom instruction at the National Mine Health and Safety Academy for MSHA personnel, other governmental personnel, and the mining industry. Under the proposed reorganization, Educational Policy and Development (EPD) will be renamed to Education and Training and the functions and resources from the Educational Field and Small Mine Services (EFSMS), which provides compliance assistance to the mining community, will migrate to the Technical Support program. The functions and resources from the Technical Compliance Investigations Division and Accountability Division of the former Assessments program will migrate to the new Education and Training program.

Regulatory and Data Analysis.—This activity develops standards and regulations for the mining industry that protect the safety and health of miners. Under the proposed reorganization, the Standards Development program will be renamed to the Regulatory and Data Analysis program and absorb the data analytics functions and resources from the Program Evaluation and Information Resources (PEIR) program.

Technical Support.—This activity applies engineering and scientific expertise through field and laboratory forensic investigations to resolve technical problems associated with implementing the Mine Act and the MINER Act. Technical Support administers a fee program to approve equipment, materials, and explosives for use in mines and performs field and laboratory audits of equipment previously approved by MSHA. It also collects and analyzes data relative to the cause, frequency, and circumstances of mine accidents. Under the proposed reorganization, the functions and resources for EFSMS will migrate from EPD to the Technical Support program. The realignment will also consolidate all Mine Emergency Operations (MEO) resources under a single program by shifting the MEO personnel and costs in PEIR to the Technical Support program.

Program Administration.—This activity performs general administrative functions and is responsible for meeting performance requirements and developing MSHA's performance plan and Annual Performance Report. Under the proposed reorganization, the functions and resources from the Civil Penalty Compliance Division, Wilkes-Barre Assessments Center, and Management Services Division of the former Assessments program will move to Program Administration. The resources for program evaluation and information technology resource management services from the PEIR program will be moved to Program Administration.

The Office of Inspector General (OIG) conducts audits, investigations, and evaluations that improve the effectiveness, efficiency, and economy of departmental programs and operations. It addresses DOL program fraud and labor racketeering in the American workplace, provides technical assistance to DOL program agencies, and advice to the Secretary and the Congress on how to attain the highest possible program performance. The Office of Audit performs audits of the Department's financial statements, programs, activities, and systems to determine whether information is reliable, controls are effective, and resources are safeguarded. It also ensures funds are expended in a manner consistent with laws and regulations, and with achieving the desired program results. The Office of Investigations—Labor Racketeering and Fraud conducts investigations to detect and deter fraud, waste, and abuse in departmental programs. It also identifies and reduces labor racketeering and corruption in employee benefit plans, labor management relations, and internal union affairs.

Program Direction and Support.—The Program Direction and Support (PDS) activity provides leadership and direction for the various DOL agencies. As part of its responsibilities, the PDS activity oversees a program of analysis and general research on issues affecting America's workforce, and also evaluates the effectiveness of Departmental programs. The PDS

activity includes funding for the following organizations: Office of the Secretary; Office of the Deputy Secretary; Office of the Assistant Secretary for Policy; Office of Congressional and Intergovernmental Affairs, which includes the Center for Faith; Office of Public Affairs; and the Office of Public Liaison.

Legal Services.—The Office of the Solicitor (SOL) provides the Secretary of Labor and departmental program officials with the legal services, including enforcement litigation, required to accomplish the Department's mission. SOL enforces worker protection statutes in Federal courts and other tribunals, including bankruptcy courts and various administrative forums throughout the nation. SOL directly litigates cases under most civil programs under DOL's jurisdiction, including appellate matters, and runs a robust amicus program. SOL works hand-in-hand with DOJ in the few instances where SOL does not have direct litigating authority and plays a significant role in developing many criminal investigations referred to DOJ and other law enforcement agencies. SOL also supports the Department's enforcement efforts by providing legal advice on individual investigations of labor violations. SOL's legal services are integral to the Department's rulemaking efforts, both in the development and then the defense of rules. SOL provides legal advice to the Department's agencies on a wide range of matters, including orders, written interpretations, and opinions and legislation, as well as legal services to Departmental management with respect to issues like appropriations, procurement, data, privacy, FOIA, ethics, and employment law.

Bureau of International Labor Affairs.—The Bureau of International Labor Affairs (ILAB) prioritizes the interests of American workers in U.S. trade and international labor and employment policy, strengthening U.S. jobs and wages, by combating foreign labor abuses and unfair trade practices in global supply chains that undermine U.S. prosperity and security.

Administration and Management.—Exercises leadership in all departmental administrative and management programs and services and ensures efficient and effective operation of Departmental programs; provides policy guidance on matters of personnel management, information resource management and procurement; and provides for consistent and constructive internal labor-management relations throughout the Department.

Adjudication.—The Adjudication activity includes the Office of Administrative Law Judges (OALJ), the Benefits Review Board (BRB), the Employees Compensation Appeals Board (ECAB), and the Administrative Review Board (ARB). OALJ is DOL's only trial level tribunal and adjudicates thousands of cases each year under dozens of statutes administered by DOL. The Boards collectively review and determine several thousand appeals each year, make legal interpretations, and establish legal precedents that set standards for certain DOL-administered statutes.

Women's Bureau.—Develops policies and standards, and conducts inquiries related to the interests of working women. The Budget proposes to eliminate the agency in 2027.

Civil Rights.—Enforces compliance with Federal civil rights laws that cover DOL employees (including former employees), applicants for DOL employment, and customers, participants, and beneficiaries in certain DOL conducted programs as well as programs and activities receiving or benefiting from DOL financial assistance (generally grantees, including Workforce Innovation and Opportunity Act (WIOA) recipients). The resources for this activity will be consolidated into the proposed Office of Civil Rights.

Office of Civil Rights.—In 2027, the Department proposes the establishment of a consolidated, streamlined Office of Civil Rights, which will include current activities funded in the Civil Rights activity, Vietnam Era Veterans Readjustment Assistance Act (VEVRAA) responsibilities, Section 503 of the Rehabilitation Act responsibilities, and the administration of whistleblower protection statutes except for Section 11(c) of the Occupational Safety and Health Act.

Office of Foreign Labor Certification.—This agency, which the 2027 Budget proposes to reorganize under the Office of the Secretary of Labor, administers the Department's foreign labor certification programs. Those

SALARIES AND EXPENSES—Continued

programs carry out the Secretary's responsibilities under the Immigration and Nationality Act and related laws to determine whether there are able, willing, and qualified U.S. workers available to fill positions U.S. employers seek to fill with immigrant or temporary foreign workers, and whether there would be any adverse effect on the wages and working conditions of U.S. workers similarly employed if the Department were to grant a labor certification allowing the employment of a foreign worker. This reorganization would elevate and promote more effective decision-making on labor immigration matters within the Department in line with Administration priorities, help strengthen immigration system integrity, and make better use of the Office in the interest of national security.

Chief Financial Officer.—The Office of the Chief Financial Officer (OCFO) was established under the Chief Financial Officer (CFO) Act of 1990. The OCFO provides strategic financial management leadership and guidance to all Department of Labor program agencies. It oversees financial matters stemming from legislative and regulatory requirements, including the CFO Act, Government Management Reform Act (GMRA), Federal Financial Management Integrity Act (FFMIA), Federal Managers Financial Integrity Act (FMFIA), Clinger-Cohen Act, The Reports Consolidation Act, Improper Payments Information Act (IPIA), Treasury Financial Manual Directives, and Office of Management and Budget (OMB) Circulars. Additionally, OCFO leads the execution of travel-related and financial Executive Orders.

Program Evaluation.—The Evaluation Officer is charged with coordinating and overseeing rigorous evaluations of the Department of Labor's programs, ensuring high standards in evaluations undertaken and funded by the Department, and in leading implementation of the Department's evidence-building agenda. Through its development and dissemination of rigorous scientific knowledge, the office builds evaluation capacity and expertise to ensure that evaluation and research findings are available and accessible for policy and program decision-makers in a timely and actionable way.

Departmental Support Systems.—This activity represents a permanent, centralized IT investment fund for the Department of Labor managed by the Chief Information Officer. The fund supports enterprise-wide IT security enhancements that facilitate a centrally managed IT environment with increased risk mitigation parameters to protect the integrity of DOL data and network availability. New technologies like artificial intelligence and quantum computing require stronger cybersecurity measures and this fund helps to achieve these efforts through several new and ongoing projects.

IT Infrastructure Modernization.—This Chief Information Officer-managed activity provides seed funding for the Department of Labor to explore new and innovative technologies, which help provide scalability, flexibility, and cost efficiency. The Department of Labor is focused on investing in artificial intelligence, including scaling infrastructure for high-performance computing, meeting risk standards for high-impact use cases, and helping agencies implement uses for AI to advance their various missions.

Diplomatic Programs (DP) is financed by this appropriation, fees for services, and reimbursements from other agencies (including for administrative and other services provided by the Department of State). The 2027 request includes funding to finalize the successful transition of the United States Agency for International Development (USAID) staffing costs fully integrated into the Department of State.

Funds are requested in the following categories:

Human Resources—This category supports American salaries at overseas and domestic U.S. diplomatic missions, including Department of State employees who carry out worldwide law enforcement security functions. Through continuous professional development and training, the Department ensures that its professionals have the skills, experience, and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees and locally employed staff.

Overseas Programs—This category provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2027 will support United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings, and other multilateral activities in the United States and abroad. This activity also encompasses medical programs for the Department of State, the Foreign Service, and other U.S. Government departments and agencies overseas. Centralized funding for travel and transportation of ef-

fects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity.

Diplomatic Policy and Support—This category supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. The information management activity in DP includes resources that are used for the creation, collection, processing, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Components of the information management activity include: telecommunications, information security, information system services, pouch, mail, and publishing services for both unclassified and classified information. These activities include domestic and overseas execution of Department programs, such as budget and financial management, contracting and procurement, domestic facilities and vehicles, and rental payments to GSA.

Security Programs—This category provides for the operation of security programs, including Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security (DS), to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities, and information. The salaries paid to Department employees who carry out worldwide law enforcement security functions are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterintelligence responsibilities, both foreign and domestic, as well as supporting law enforcement activities for Passport and Visa Fraud and related offenses. Other programs include, but are not limited to: security operations; engineering services, which provide technical defense of U.S. Government personnel and facilities against electronic and physical attacks; homeland security-related activities; and protection of foreign dignitaries.

The Department of State continues to seek stable budget authorities to ensure that the Bureau of Consular Affairs (CA) can function as a self-sustaining fee-funded operation for the long term. The Consular and Border Security Programs (CBSP) account uses revenue from consular fees and surcharges to fund programs and activities, consistent with applicable statutory authorities. These fees and surcharges include Machine-Readable Visa (MRV) fees, Western Hemisphere Travel Initiative (WHTI) surcharges, Passport Security surcharges, Immigrant Visa Security surcharges, Diversity Visa Lottery fees, H and L Visa Fraud Prevention and Detection Fees, Affidavit of Support fees, Expedited Passport Fees (EPF), and use of J Waiver Fees from a Diplomatic Programs account.

The Passport Application and Execution Fees (PAEF) are the only retained fees that are specifically designated by Congress to offset the costs for providing U.S. citizen services overseas. Section 7069(e) of the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2022 (division K of Public Law 117–103) provided the Department with

CONSULAR AND BORDER SECURITY PROGRAMS—Continued

new authority to retain PAEF and to deposit them in the CBSP account. However, that provision only provided authority to spend fees deposited in 2022. The majority of fees deposited in the CBSP account after 2022 remain unavailable for expenditure. Expenditure authority for PAEF and other fees also reduces the reliance on MRV fees to fund U.S. citizen services and costs while providing critical resilience to fluctuations in demand and temporary revenue authorities. In 2027, the Budget requests \$533 million to support critical U.S. citizen services and passport activities using PAEF revenues, offset by PAEF collections. The Budget also includes a proposed cancellation of other excess CBSP prior-year balances. The proposal will enable PAEF balances and new receipts to be applied to meeting the cost of critical U.S. citizen services and passport activities for which the fee is being charged to the public.

Section 7043 extends expanded expenditure authorities for certain fees and surcharges, providing the ability to use such fees for the costs of providing consular services.

The Department plays a vital role in supporting U.S. citizens through emergency and routine services, issuing millions of secure passports to U.S. citizens domestically at 29 passport facilities and more than 8,000 state and local government facilities and protecting U.S. borders through visa adjudications. Together with the Department of Homeland Security, the Department of Justice, the Intelligence Community, Department of the Treasury, and the law enforcement community, the Department strengthens its layered visa and border security screening system that rests on training, fraud prevention and detection, technological advances, biometric innovations and expanded data sharing. These efforts are only possible by building on a strong, stable, and constantly improving base of security, technology, and trained personnel funded by consular fees and surcharges.

This is a historical account for the U.S. Information Agency, which was disbanded in 1999. Since 2000, the appropriation for overseas information and cultural programs previously provided to the U.S. Information Agency and designed to inform and influence foreign audiences has been administered by the Department of State and funded from Diplomatic Programs and other accounts within the Department of State. Former U.S. Information Agency activities associated with international broadcasting functions were previously funded from the U.S. Agency for Global Media account, which the Budget proposes for elimination in 2027.

This appropriation provides for the implementation of audits, investigations, evaluations, and inspections of the Department's programs and operations as mandated by the Inspector General Act of 1978, as amended, and the Foreign Service Act of 1980, as amended. The objectives of the Office

of the Inspector General (OIG) are to: improve the economy, efficiency, and effectiveness of the Department's operations; detect and prevent fraud, waste, abuse, and mismanagement; and evaluate independently the formulation, applicability, and implementation of security standards at all U.S. diplomatic and consular posts. The OIG also assesses the implementation of U.S. foreign policy, primarily through its inspection of all overseas posts and domestic offices on a cyclical basis. The State Department's Inspector General also serves as Inspector General of the U.S. Agency for Global Media and has oversight of Department of State-managed foreign assistance resources, as well as the U.S. Section of the International Boundary and Water Commission (USIBWC), as mandated by law. The appropriation will also be used to enable the integration of select United States Agency for International Development (USAID) OIG activities into the Department of State OIG, including USAID OIG's former responsibilities for Millennium Challenge Corporation (MCC) oversight.

Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. diplomatic and consular missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

The Department manages the Capital Security Cost Sharing (CSCS) Program, which has two main goals: accelerating the construction of new safe, secure and functional embassy and consulate compounds, and providing an incentive for all United States Government agencies to right-size their presence overseas through the use of cost-sharing. The \$2.2 billion program includes funding consistent with the Benghazi Accountability Review Board's recommended funding level for the construction of new secure facilities overseas. The 2027 request continues the Maintenance Cost Sharing (MCS) Program to provide critically needed renovation, construction, and repair of overseas facilities, to provide adequate working conditions for multi-agency staffs, and protect the U.S. taxpayer investment. Both programs are funded within a combined CSCS-MCS program in 2027. Funding sources include ESCM appropriations, interagency contributions, and consular fee revenues.

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas. In addition, the Department centralized the management of non-residential utility funding into ESCM in 2025.

The Taiwan Relations Act (Public Law 96–8) requires programs with respect to Taiwan to be carried out by or through the American Institute in Taiwan (AIT). AIT supports U.S. interests by promoting U.S. exports, economic and commercial services, and cultural and information exchange; facilitating military sales; providing consular related services for Americans and the people of Taiwan; and on behalf of the Department of State and various U.S. Government agencies, carrying out liaison with Taiwan's counterpart organizations.

The Department contracts with AIT to conduct commercial, cultural, and other relations with the people of Taiwan. Consular related expenses for AIT are funded with fee revenue from the Consular and Border Security Program.

The current appropriation finances any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. The 2027 permanent appropriation provides a supplemental payment to the fund for disbursements attributable to the Foreign Service Pension System and unfunded interest along with liability from military service for the Foreign Service Retirement and Disability System. In addition, the appropriation also finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions. The amount of the appropriation is determined by the annual evaluation of the Fund balance derived from current statistical actuarial data, which includes inflationary cost-of-living adjustments.

The Foreign Service National Defined Contributions Fund (FSNDCF) is an after-employment benefit plan for Locally Employed Staff (LE Staff) working for the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government (USG)-funded contributions for end-of-service benefits for LE Staff in countries where U.S. missions have determined that participation in the local social security system (LSSS) is not in the public interest of the United States. The Department determines which countries are eligible to participate in the fund. Upon separation, payments under this Plan shall be made consistent with the host country law, including any court order affecting payments to participants, unless decided otherwise by the Department.

This fund, which is available without fiscal year limitations and is authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as editorial material, freight forwarding, library, post-assignment travel, motor pool, operations and dispatch agencies operations, inter-agency cooperative administrative support services, acquisition services, information technology support, medical services, aviation services, special issuance passport services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under the authority of the Foreign Missions Act.

The International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998 using the Working Capital Fund. ICASS allows more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

The Foreign Service Retirement and Disability Fund (FSRDF) was established in 1924 to provide pensions to retired and disabled members of the Foreign Service. The FSRDF's revenues consist of contributions from active participants and their U.S. Government agency employers, appropriations, and interest on investments. Monthly annuity payments are made to eligible retired employees or their survivors. The FSRDF includes the operations of two separate retirement systems—the Foreign Service Retirement and Disability System (FSRDS) and the Foreign Service Pension System (FPS). This appropriation provides mandatory funding for the Foreign Service Retirement and Disability Fund (FSRDF) as prescribed in the Foreign Service Act of 1980 as authorized in Section(s) 821 and 822.

The Foreign Service National Separation Liability Trust Fund (FSNSLTF) is maintained to pay accrued separation liability payments for eligible Foreign Service National (FSN), FSN Personal Service Contractors (PSC), and FSN Personal Service Agreements (PSA) employees of the Department of State in those countries in which such pay is legally authorized.

The fund, as authorized by section 151 of Public Law 102–138 (22 U.S.C. 4012a), is maintained by annual government contributions from the Department's Diplomatic Programs (DP) account (including Worldwide Security Protection resources), Consular Affairs (CA) Consular and Border Security Program (CBSP) fees, the International Narcotics Control and Law Enforcement (INCLE) account, and the International Cooperative Administrative Support Services (ICASS) working capital fund that includes both State's DP and other agencies shares. The Department of State funds and manages its own FSNSLTF separate and apart from any separation pay that may be provided by other agencies to non-State Locally Employed Staff (LE Staff).

Pursuant to treaties between the United States and Mexico and U.S. law, the U.S. Section of the International Boundary and Water Commission (IBWC) is charged with the identification and resolution of current and anticipated boundary and water problems arising along the almost 2,000 mile common border, including the southern borders of Texas, New Mexico, Arizona, and California. Administration, Engineering, and Operations activities are also funded by the Salaries and Expenses appropriation.

Administration—Resources provide for negotiations and supervision of joint projects with Mexico to resolve international boundary, water, and environmental problems; overall control of the operation of the U.S. section of the Commission; formulation of operating policies and procedures; and financial management and administrative services to carry out international obligations of the United States, pursuant to treaty and congressional authorization.

Engineering—Resources provide for technical engineering guidance and supervision of planning, construction, operation and maintenance, and environmental monitoring and compliance of international projects; studies relating to international problems of a continuing nature; and preliminary surveys and investigations to determine the need for and feasibility of projects for the resolution of international problems arising along the boundary.

Operations—This activity finances the measurement and determination of the national ownership of boundary waters and the distribution thereof, as well as the U.S. part of the operations and maintenance (O&M) of sanitation facilities, river channel and levee systems, flood control dams and hydroelectric power plants, gauging stations, water quality control projects and boundary demarcation monuments, and markers. Reimbursements are received from Mexico for O&M costs of the South Bay and Nogales International Wastewater Treatment Plants as well as from the City of Nogales for O&M costs at Nogales. Other reimbursements are received from the Western Area Power Administration, U.S. Department of Energy, for O&M and capital costs of hydroelectric generation at Falcon and Amistad International Dams.

This appropriation provides the United States' treaty mandated assessments and expenses to 20 international commissions and organizations including three bilateral commissions (the Great Lakes Fisheries Commission, the International Pacific Halibut Commission, and the Pacific Salmon Commission), nine multilateral bodies, two marine science organizations, one whaling commission, the Arctic Council and the Antarctic Treaty Secretariat, as well as funding regional sea turtle and shark conservation, and travel expenses of non-government U.S. commissioners and their advisors. These commissions and organizations coordinate scientific studies of shared fish stocks and other living marine resources and their habitats and establish common management measures to be implemented by member governments based on their results. Many entities also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

The first phase of the President's Emergency Plan for AIDS Relief (PEPFAR), from 2004 to 2008, was the largest ever global public health initiative by a single country to fight the HIV/AIDS epidemic. This legacy account represents funding that was appropriated for PEPFAR in the Global HIV/AIDS Initiative account through 2007. Since 2008, funds have been appropriated for this program in the Global Health and Child Survival (now Global Health Programs) account, and will continue to be requested in that account.

The Global Health Programs (GHP) account supports implementation of the America First Global Health Strategy (AFGHS) to make America safer, stronger, and more prosperous. AFGHS will protect the homeland by preventing infectious disease outbreaks from reaching U.S. shores; strengthening bilateral relationships by entering into multi-year, bilateral agreements that require co-investment from recipient governments, saving millions of lives and moving countries along the path to decreased dependency on foreign assistance; and promoting American health innovation around the world.

Funding from the Foreign Military Financing (FMF) account procures, via grant, or through subsidies for loans or guarantees, U.S. defense equipment, services, and training to help ensure U.S. partners and allied countries are equipped and trained to defend themselves, contribute to regional and global stability, and contain transnational threats. As is shown in the Budgetary Resources schedule, this Budget proposes that not less than \$100 million in budget authority for emerging priorities may be transferred to the Foreign Military Financing Loan Program Account for subsidizing loans to multiply the FMF program's effectiveness. Similarly, funds may be made available as subsidy for Taiwan direct loans or loan guarantees. Other partners are also eligible for loans and guarantees up to the limits requested in the associated general provisions.

provide military and other security sector assistance to enhance a country's national-level military or other security forces' capabilities to conduct border and maritime security, internal defense, and counterterrorism operations, or to participate in or support military, stability, or peace support operations, consistent with U.S. foreign policy and national security interests. The GSCF can also be used to provide assistance to the justice sector (including law enforcement and prisons), rule of law programs, and stabilization efforts in cases where civilian providers are challenged in their ability to operate. Assistance programs under this account are collaboratively developed by the Department of State and the Department of War. The fund allows direct contributions from each Department to be transferred into the fund for implementation by the most appropriate agency in a given situation, be it State, War, or others. No direct funding is requested.

The Foreign Military Loan Liquidating Account records all cash flows to and from the Government resulting from direct loans obligated and loan guarantees for foreign military financing committed prior to 1992. This account is shown on a cash basis and reflects the transactions resulting from loans provided to finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. No new loan disbursements are made from this account. Certain collections made into this account are made available for default claim payments. The Federal Credit Reform Act of 1990 provides permanent indefinite authority to cover obligations for default payments if the liquidating account funds are otherwise insufficient. All new foreign military financing credit activity in 1992 and after (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

As required by the Federal Credit Reform Act of 1990, the Military Debt Reduction Financing (MDRF) Account is a non-budgetary financing account that records all cash flows to and from the Government resulting from restructuring foreign military loans. The amounts in this account are a means of financing and are not included in budget totals. It is an account established for the debt relief of certain countries as established by Public Law 103–87, Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Section 11, Special Debt Relief for the Poorest, Most Heavily Indebted Countries. The MDRF buys a portfolio of loans from the Foreign Military Loan Liquidating Account, thus transferring the loans from the Liquidating Account to the MDRF Account.

International Development Association

The International Development Association (IDA) is the arm of the World Bank Group that supports poverty reduction and economic development in the world's 78 poorest countries across a wide range of sectors. Because countries receiving IDA financing are too poor and lack creditworthiness to attract sufficient capital to support their significant development needs, they depend on concessional finance—low or no interest loans and grants. Over time, IDA's support helps countries finance their development needs through domestic revenues and borrowing at non-concessional rates, including through international markets. As of September 2025, the United States holds the largest percent of total votes in IDA at 9.8 percent.

Pursuant to the Office of Technical Assistance's (OTA) authorizing statute, OTA builds capacity of finance ministries and central banks to effectively manage their public finances, strengthen their financial sectors, and combat financial crime. OTA expert advisors support the implementation of policy, management, and administrative reforms in the areas of revenue, budget, government debt, banking and financial services, and countering anti-money laundering and countering the financing of terrorism in developing and transitional countries. OTA projects support U.S. foreign policy and national security objectives by promoting economic self-reliance, creating opportunities for U.S. businesses and investments abroad, and reducing vulnerability to malign actors. As a bilateral Treasury program, OTA maintains

flexibility to stand up new projects or pivot or curtail existing projects to advance Administration and Treasury priorities. Appropriations to this account fund full-time resident advisors, intermittent advisors, program-related administrative costs, and project monitoring and evaluation.

The Better Utilization of Investments Leading to Development Act of 2018 (The BUILD Act), signed into law on October 5, 2018, consolidated, modernized, and reformed the U.S. Government's development finance capabilities—primarily the Overseas Private Investment Corporation (OPIC) and the Development Credit Authority (DCA) of the U.S. Agency for International Development (USAID)—into a new agency: the United States International Development Finance Corporation (DFC), which launched on January 2, 2020. DFC continues to liquidate the last obligations in this account.

As required by the Federal Credit Reform Act of 1990, the Program Account records the subsidy costs associated with the direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

The DFC Modernization and Reauthorization Act of 2025, signed into law as part of the National Defense Authorization Act for Fiscal Year 2026 on December 18, 2025, establishes the Development Finance Equity Investment Account administered by the Corporation as a revolving account for equity investments.

The proposal seeks \$3 billion in mandatory funding to capitalize the revolving equity fund for DFC, allowing returns to be reinvested without new appropriations. The fund will rapidly expand DFC's equity program, recognize taxpayer risk upfront, and support U.S. foreign policy by directing early-stage capital to strategic regions while attracting private investment.

The President's Budget requests \$6.5 million for the DFC Office of Inspector General (OIG). This will allow the OIG to continue to independently oversee DFC through audits, investigations, and inspections that identify improvements to the management and execution of DFC's operation and programs.

Through its audits and investigations DFC OIG prevents, detects, and deters fraud, waste, and abuse involving DFC investments, projects, systems, employees, and contractors. The OIG also provides advice and assistance to agency management, the DFC Board of Directors, and Congress. DFC OIG's work strives to promote efficiency, effectiveness, and economy in DFC's programs and operations, which so far has identified more than \$100 million in cost avoidance, resulting in a positive return on America's investment in DFC OIG.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this account and are available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

The International Monetary Fund (IMF) is a shareholder institution with quotas as its primary source of resources for lending to members and for determining voting shares. The United States wields influence at the IMF and has a veto over major IMF decisions.

In December 2023, the IMF Board of Governors concluded the 16th General Review of Quotas to determine what changes to IMF resources and shareholding, if any, are necessary for the IMF to continue to effectively fulfill its role. IMF members approved a 50 percent increase in quota resources, to be allocated to all members in proportion to their quotas (i.e., an "equiproportional" quota increase), that would be fully offset by a reduction in the New Arrangements to Borrow (NAB) and the complete elimination of the Bilateral Borrowing Agreements (BBAs), all of which will keep the IMF's overall lending capacity constant. This outcome allocates the increase in quotas by keeping all member quota and voting shares constant, which fully protects the U.S. voting share and veto, while removing the BBAs, to which the United States does not contribute and has limited influence. The increase in the U.S. quota share is SDR 41 billion (about \$55 billion).

The use of U.S. quota resources at the IMF constitutes an exchange of monetary assets and does not result in budget outlays. When the United States transfers dollars or other reserve assets to the IMF under the U.S. quota subscription, the United States receives an equal, offsetting, and interest-bearing claim on the IMF, which is reflected as an increase in U.S. international monetary reserves. The U.S. reserve position in the IMF is readily available to meet a U.S. balance-of-payments financing need.

The IMF backstops its quota resources through the New Arrangements to Borrow (NAB), which is a standing arrangement among certain IMF members to supplement the IMF's quota resources when needed to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. The NAB became effective in 1998 and can be activated when quota resources fall below a certain threshold.

A total of 40 countries and institutions participate in the NAB for a total of SDR 361 billion (about \$515 billion), of which the current U.S. share is approximately SDR 56 billion (about \$80 billion). The reduction in the U.S. NAB share is SDR 9 billion (about \$12 billion) and would hold our

NAB share roughly constant at 15.5 percent. Activation of the NAB requires the approval of 85 percent of the NAB members based on shares, giving the United States a veto over its activation.

Similar to quota, NAB resources made available by the United States constitute an exchange of monetary assets and do not result in any budgetary outlays because such transactions result in an equivalent increase in U.S. international reserve assets in the form of an equal, offsetting, interest-bearing claim on the IMF. The U.S. reserve position in the IMF is readily available to meet a U.S. balance-of-payments financing need. (See the *Analytical Perspectives* for additional information.)

Contributions to IMF Facilities and Trust Funds

The International Monetary Fund (IMF) maintains several facilities, some in the form of trust funds, to provide assistance to the world's poorest and most vulnerable countries. The Poverty Reduction and Growth Trust (PRGT) is the IMF's concessional financing facility, and it provides subsidized loans to support the 70 eligible low-income countries (LICs). IMF programs through the PRGT generally support policy reforms to help address longstanding economic, governance, and debt issues that are resulting in balance of payments problems.

The Special Defense Acquisition Fund (SDAF) helps expedite the procurement of defense articles for provision to foreign nations. The 2027 request reflects \$900 million in new SDAF obligation authority, to be funded by a combination of offsetting collections and previous SDAF procurements, referred to as SDAF reimbursements. In 2027, offsetting collections will be derived from sales of stock through the Foreign Military Sales system, as well as other receipts consistent with section 51(b) of the Arms Export Control Act. The 2027 request will support advance purchases of high-demand equipment that has long procurement lead times, which is often the main limiting factor in the U.S. Government's ability to provide partners with critical equipment to make them operationally effective in a timely manner. Improving the mechanism for supporting U.S. partners is a high priority for both the Departments of State and War.

The National Culvert Removal, Replacement, and Restoration Grant Program (Culverts Grant Program) provides grants to States, local governments, and Tribes to address anadromous fish passage (e.g., aquatic organism passage), primarily through the replacement, removal, repair, or improvement of culverts or weirs. The competitive grant program also prioritizes projects that would have a meaningful impact on imperiled anadromous fish stocks. The Infrastructure Investment and Jobs Act (IIJA) provided advance appropriations funding for this account for fiscal years 2022–2026.

The Aviation Manufacturing Jobs Protection (AMJP) Program was created in March 2021, under the American Rescue Plan Act. The AMJP Program provided funding to eligible businesses, to pay up to half of their compensation costs for certain categories of employees, for up to six months. In return, businesses had to make several legal commitments, including a commitment not to conduct involuntarily layoffs, furloughs, or reductions in pay or benefits for the covered employees. The statute established a six-month timeframe for the Department of Transportation (DOT) to make awards. DOT finished active administration of the program by September 30, 2023, and closed out all remaining awards that had been successfully completed. The only remaining program activities involve recovering funds from a small number of recipients whose awards were terminated due to noncompliance. All remaining unobligated AMJP Program funds were rescinded.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104–264) authorized the collection of user fees for services provided by the Federal Aviation Administration (FAA) to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Act permanently appropriated the first \$50 million of such fees for the Essential Air Service (EAS) Program and rural airport improvements. In addition, the FAA Modernization and Reauthorization Act (P.L. 112–95) requires that, in any fiscal year, overflight fees collected in excess of \$50 million will be available to carry out the EAS Program. Recent cost growth in the EAS program is unsustainable. The average community EAS contract in the continental US is now \$5.8 million per year. The Budget reforms the EAS program by proposing to adjust eligibility to help address rural communities' air transportation needs in a more sustainable manner.

Through 1997, the Essential Air Service (EAS) Program was funded from the Airport and Airway Trust Fund. Starting in 1998, the Federal Aviation

Administration reauthorization funded the program as a mandatory program supported by overflight fees under the EAS and Rural Airport Improvement Fund. In addition to mandatory funding supported by overflight fees, direct appropriations from the Airport and Airway Trust Fund to Payments to Air Carriers have been enacted every year beginning in 2002 to meet the needs of the Essential Air Service Program. Recent cost growth in the EAS program is unsustainable. The average community EAS contract in the continental U.S. is now \$5.8 million per year. The Budget reforms the EAS program by proposing to adjust eligibility to help address rural communities' air transportation needs in a more sustainable manner.

The Infrastructure Investment and Jobs Act (IIJA) (P.L. 117–58) appropriated \$5.0 billion for Facilities & Equipment in annual installments of \$1.0 billion from 2022 to 2026. This funding supports the improvement of existing and construction of new air traffic control infrastructure. Enacted in 2022, IIJA enables the Federal Aviation Administration (FAA) to address significant construction projects and other air traffic control tower needs. The agency has initiated a significant effort on new construction of these facilities. The schedule above shows the remaining activity associated with the program. In addition, the Working Families Tax Cut Act (P.L. 119–21) appropriated \$12.5 billion in 2025 to jumpstart the modernization of the FAA's air traffic control system by replacing aging infrastructure and obsolete technologies. The FAA is utilizing this funding to upgrade critical radar systems, telecommunications infrastructure, and runway safety systems. This investment will also modernize terminal radar approach (TRACON) facilities, air traffic control towers, and begin consolidating air route traffic control centers (ARTCC) to improve efficiency and reduce long-term costs. Collectively, these actions advance the delivery of the Brand New Air Traffic Control System to make flying safer, faster, and more reliable.

The 2027 Budget does not request this supplemental funding. Previous annual appropriations acts provided supplemental funding for the Grants-in-Aid for Airports account. Funds were appropriated from the General Fund of the U.S. Treasury. Discretionary grants, including those for Community Project Funding/Congressionally Directed Spending, are being awarded to qualified airports. The FAA applies up to 0.5 percent of the funds provided to the administrative costs of awarding grants under the program.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104–264) authorized the collection of user fees for air traffic control and related services provided by the Federal Aviation Administration to aircraft that neither take off nor land in the United States. These user fees are commonly known as overflight fees. The 2027 Budget Request estimates that \$174 million in overflight fees will be collected in 2027.

The Aviation Insurance Revolving Fund provides direct support for the aviation insurance program (49 U.S.C. 44302a and 44305). The Federal Aviation Administration (FAA) Aviation Insurance Program provides products that address the insurance needs of the U.S. domestic air transportation industry not adequately met by the commercial insurance market. The FAA may temporarily provide war risk insurance for a premium for no more than one period, up to 90 days, in the event of a unilateral cancellation of a commercial policy by an air carriers commercial insurer. Permanent authority to provide temporary insurance for a premium was authorized in the Consolidated Appropriations Act of 2023 (P.L. 117–328). In addition, the agency may provide insurance without premium at the request of the Secretary of Defense, or the head of a department, agency, or instrumentality designated by the President, when the Secretary of Defense, or the designated head, agrees to indemnify the Secretary of Transportation against all losses covered by the insurance. The non-premium aviation insurance program was authorized through September 30, 2028, in the FAA Reauthorization Act of 2024, Part II (P.L. 118–63).

The 2027 Budget requests \$4.0 billion for the Federal Aviation Administration (FAA) Grants-in-Aid for Airports account. The Airport Improvement Program (AIP) provides grants to local and state airport authorities to help ensure the safety, capacity, and efficiency of U.S. airports. Through the AIP, the agency funds a range of activities to assist in airport development, including preservation and development of transportation infrastructure. In addition to airport grants, this account funds airport research programs and the administrative costs of the FAA's Office of Airports.

In 2025, the agency accomplished its performance metric of ensuring that runway pavement is kept in a safe and serviceable condition. The FAA has exceeded this goal for several years, with over 97% of eligible paved runways maintained in excellent, good, or fair condition.

This account provides funding for the deployment of communications, navigation, surveillance, automation, weather systems, and related capabilities within the National Airspace System (NAS). The funding request supports the Federal Aviation Administration's comprehensive plan to deliver the Brand New Air Traffic Control System and sustain legacy systems and facility infrastructure.

In 2025, the agency achieved 96.9% of the critical acquisition milestones by their scheduled due dates. Achievement of this target indicates the FAA's forward-thinking ability to manage programs that allow for a timely transition of new technologies. The transition involves acquiring numerous systems to support precision satellite navigation, digital, networked communications, integrated weather information, layered adaptive security, and more.

ADMINISTRATIVE PROVISIONS—FEDERAL AVIATION ADMINISTRATION

SEC. 110. The Administrator of the Federal Aviation Administration may reimburse amounts made available to satisfy section 41742(a)(1) of title 49, United States Code, from fees credited under section 45303 of title 49, United States Code, and any amount remaining in such account at the close of any fiscal year may be made available to satisfy section 41742(a)(1) of title 49, United States Code, for the subsequent fiscal year.

SEC. 111. None of the funds made available by this Act shall be available for paying premium pay under section 5546(a) of title 5, United States Code, to any Federal Aviation Administration employee unless such employee actually performed work during the time corresponding to such premium pay.

SEC. 112. None of the funds made available by this Act may be obligated or expended for an employee of the Federal Aviation Administration to purchase a store gift card or gift certificate through use of a Government-issued credit card.

SEC. 113. Notwithstanding any other provision in this Act, not to exceed 10 percent of any appropriation made available for the current fiscal year for the Federal Aviation Administration by this or prior appropriations Acts may be transferred between such appropriations, but no such transfer shall increase any appropriation by more than 10 percent, except as otherwise specifically provided: Provided, That funds transferred under this section shall be treated as a reprogramming of funds under section 404 of this Act and shall not be available for obligation through a reprogramming of funds unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer: Provided further, That any transfer from an amount made available for obligation as discretionary grants-in-aid for airports pursuant to section 47117(f) of title 49, United States Code, shall be deemed as obligated for grants-in-aid for airports under

part B of subtitle VII of title 49, United States Code, for the purposes of complying with the limitation on incurring obligations in this and prior appropriations Acts under the heading "Federal Aviation Administration—Grants in-Aid for Airports".

SEC. 114. (b) Notwithstanding paragraph (7) of section 404, activities creating, reorganizing, or restructuring an organizational unit of the Federal Aviation Administration are not subject to the requirements of section 404 unless those requirements would change the organization chart provided as an exhibit to section 1 of the President's Budget justification.

SEC. 115. None of the funds appropriated or otherwise made available to the FAA may be used to carry out the FAA's obligations under section 44502(e) of title 49, United States Code, unless the eligible air traffic system or equipment to be transferred to the FAA under section 44502(e) of title 49, United States Code—

(B) is identified in subparagraph (D) of section 44502(e)(3) of such title 49; and

(C) was purchased with assistance from a Government airport aid program, airport development aid program, or airport improvement project grant; or

This account includes discretionary resources appropriated from the General Fund for the Federal Highway Administration's Emergency Relief (ER) program, as authorized under 23 U.S.C. 125. These appropriations supplement the \$100 million authorized annually out of the Highway Trust Fund under 23 U.S.C. 125 for the ER program and included in the Federal-Aid Highways account. The ER program provides financial assistance to repair or reconstruct Federal-aid highways seriously damaged by a natural disaster or catastrophic failure from an external cause.

No further appropriations are requested for this account in 2027.

STATE INFRASTRUCTURE BANKS

In 1997, FHWA received an appropriation from the General Fund for the State Infrastructure Banks (SIBs) program.

All of the funds have been provided to the States to capitalize the infrastructure banks. Because the funding was provided as grants, and not loans, FHWA will not receive reimbursements of amounts expended for the SIBs program. No new budgetary resources are requested in 2027.

The 2027 Budget requests \$770 million in this account for the Nationally Significant Freight and Highway Projects grant program, commonly referred to as the Infrastructure for Rebuilding America (INFRA) Program. The 2027 Budget requests \$713.65 million in this account for the Bridge Replacement, Rehabilitation, Preservation, Protection, and Construction Program, commonly referred to as the Bridge Formula Program. In addition, the Infrastructure Investment and Jobs Act (IIJA) provided \$9.5 billion annually for 2022 through 2026 to this account for bridge and highway programs. The remaining balances from IIJA funding are also included in this account. The 2027 Budget proposes to cancel unobligated balances provided by IIJA for the National Electric Vehicle Formula Program.

The Federal-Aid Highway Act of 1968 authorized the establishment of a right-of-way revolving fund. This fund was used to make cash advances

to States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs. The purchase of right-of-way is an eligible expense of the Federal-Aid Highway program.

This program was terminated by the Transportation Equity Act for the 21st Century of 1998, but will continue to be shown for reporting purposes as loan balances remain outstanding. No new budgetary resources are requested in 2027.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General Fund to the Highway Trust Fund of revenue from the motor fuel tax, and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs as specified by law. Per the Cash Management Improvement Act of 1990, this account reflects the net of State interest liability and adjusted Federal interest liability payments to or from States.

The following is the status of Highway Trust Fund.

Cash balances.—The Status of Funds table begins with the unexpended balance on a "cash basis" at the start of the year. The table shows the amount of cash invested in Federal securities at par value and the amount of cash on hand (i.e., uninvested balance). Next, the table provides the amounts of cash income and cash outlays during each year to show the cash balance at the end of each year.

Revenues.—The Budget presentation includes estimated receipts from existing Highway Trust Fund excise taxes.

General Fund transfers.—In 2022, the Infrastructure Investment and Jobs Act transferred from the General Fund \$90 billion to the Highway Account of the Highway Trust Fund and \$28 billion to the Mass Transit Account of the Highway Trust Fund.

The Federal-aid Highways (FAH) program is designed to aid in the development, operations, and management of an intermodal transportation system. All programs included within the FAH program are financed from the Highway Account of the Highway Trust Fund, and most are distributed via apportionments and allocations to States. Liquidating cash appropriations provide the authority for outlays resulting from obligations of contract authority. The 2027 Budget requests \$64.0 billion in obligation limitation for the FAH program. The 2027 Budget proposes to cancel unobligated balances from prior years from the Charging and Fueling Infrastructure Grants program.

(IV) Section 11509 of the Infrastructure Investment and Jobs Act (Public Law 117–58).

(e) REDISTRIBUTION OF CERTAIN AUTHORIZED FUNDS.—

(1) **IN GENERAL.**—Not later than 30 days after the date of distribution of obligation limitation under subsection (a), the Secretary shall distribute to the States any funds (excluding funds authorized for the program under section 202 of title 23, United States Code) that—

(A) are authorized to be appropriated for such fiscal year for Federal-aid highway programs; and

(B) the Secretary determines will not be allocated to the States (or will not be apportioned to the States under section 204 of title 23, United States Code), and will not be available for obligation, for such fiscal year because of the imposition of any obligation limitation for such fiscal year.

(2) **RATIO.**—Funds shall be distributed under paragraph (1) in the same proportion as the distribution of obligation authority under subsection (a)(5).

(3) **AVAILABILITY.**—Funds distributed to each State under paragraph (1) shall be available for any purpose described in section 133(b) of title 23, United States Code.

SEC. 121. Notwithstanding 31 U.S.C. 3302, funds received by the Bureau of Transportation Statistics from the sale of data products, for necessary expenses incurred pursuant to chapter 63 of title 49, United States Code, may be credited to the Federal-aid highways account for the purpose of reimbursing the Bureau for such expenses.

SEC. 122. Not less than 15 days prior to waiving, under his or her statutory authority, any Buy America requirement for Federal-aid highways projects, the Secretary of Transportation shall make an informal public notice and comment opportunity on the intent to issue such waiver and the reasons therefor: Provided, That the Secretary shall post on a website any waivers granted under the Buy America requirements.

SEC. 123. None of the funds made available in this Act may be used to make a grant for a project under section 117 of title 23, United States Code, unless the Secretary, at least 60 days before making a grant under that section, provides written notification to the House and Senate Committees on Appropriations of the proposed grant, including an evaluation and justification for the project and the amount of the proposed grant award.

SEC. 124. (a) A State or territory, as defined in section 165 of title 23, United States Code, may use for any project eligible under section 133(b) of title 23 or section 165 of title 23 and located within the boundary of the State or territory any earmarked amount, and any associated obligation limitation: Provided, That the Department of Transportation for the State or territory for which the earmarked amount was originally designated or directed notifies the Secretary of its intent to use its authority under this section and submits an annual report to the Secretary identifying the projects to which the funding would be applied. Notwithstanding the original period of availability of funds to be obligated under this section, such funds and associated obligation limitation shall remain available for obligation for a period of 3 fiscal years after the fiscal year in which the Secretary is notified. The Federal share of the cost of a project carried out with funds made available under this section shall be the same as associated with the earmark.

(b) In this section, the term "earmarked amount" means—

(1) congressionally directed spending, as defined in rule XLIV of the Standing Rules of the Senate, identified in a prior law, report, or joint explanatory statement, which was authorized to be appropriated or appropriated more than 10 fiscal years prior to the current fiscal year, and administered by the Federal Highway Administration; or

(2) a congressional earmark, as defined in rule XXI of the Rules of the House of Representatives, identified in a prior law, report, or joint explanatory statement, which was authorized to be appropriated or appropriated more than 10 fiscal years prior to the current fiscal year, and administered by the Federal Highway Administration.

(c) The authority under subsection (a) may be exercised only for those projects or activities that have obligated less than 10 percent of the amount made available for obligation as of October 1 of the current fiscal year, and shall be applied to projects within the same general geographic area within 25 miles for which the funding was designated, except that a State or territory may apply such authority to unexpended balances of funds from projects or activities the State or territory certifies have been closed and for which payments have been made under a final voucher.

(d) The Secretary shall submit consolidated reports of the information provided by the States and territories annually to the House and Senate Committees on Appropriations.

FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION

The Federal Motor Carrier Safety Administration (FMCSA) was established within the Department of Transportation by the Motor Carrier Safety Improvement Act of 1999 (P.L. 106–159). Prior to this legislation, motor carrier safety responsibilities were under the jurisdiction of the Federal Highway Administration.

FMCSA's mission is to promote safe commercial motor vehicle operation, and reduce truck and bus crashes. The Agency accomplishes this mission by reducing fatalities and property losses associated with commercial motor vehicles through education, regulation, enforcement, research, and innovative technology, thereby achieving a safer and more secure transportation

environment. FMCSA is also responsible for enforcing Federal motor carrier safety and hazardous materials regulations for all commercial vehicles entering the United States along its southern and northern borders.

Motor Carrier Safety Grants provide funding to eligible States so they may conduct compliance reviews, identify and apprehend traffic violators, conduct roadside inspections, and support safety audits on new entrant carriers. The Federal Motor Carrier Safety Administration (FMCSA) also supports States by conducting training for State agency personnel to accomplish motor carrier safety objectives. In addition, FMCSA reviews State commercial driver's license (CDL) oversight activities to prevent unqualified drivers from being issued CDLs, and actively engages with industry and other stakeholders through Innovative Technology programs to improve the safety and productivity of commercial vehicles and drivers. The schedule above shows the remaining activities associated with these funds. No new funds are requested in 2027.

The Operations and Research account supports Vehicle Safety programs and activities that reduce highway fatalities, prevent injuries, and reduce their associated economic toll by developing, setting, and enforcing Federal Motor Vehicle Safety Standards (FMVSS). This accounts supports activities to root out safety-related defects in motor vehicles and motor vehicle equipment. These programs also set and enforce fuel economy standards for motor vehicles. NHTSA conducts research for cutting-edge technologies, including complex safety-critical electronic control systems; vehicle cyber-security; and new emerging Automated Driving System technologies. Additional research areas include biomechanics; heavy vehicles safety technologies. Finally, NHTSA leverages this funding to collect and analyze crash data to identify safety trends and develop safety countermeasures.

The Highway Safety Research and Development programs support research, demonstrations, evaluation, technical assistance, and national leadership activities for behavioral safety programs conducted by State and local governments, as well as various safety associations and organizations. These programs are designed to provide our State and local partners with the latest tools to combat impaired, distracted, and unsafe driving while encouraging occupant protection, pedestrian and bicycle safety, and development of best practices for emergency medical and trauma care systems as part of a comprehensive highway and traffic safety system. This funding supports the National Driver Register's Problem Driver Pointer System, which helps to identify drivers who have been suspended for or convicted of serious traffic offenses, such as driving under the influence of alcohol or other drugs. Finally, this funding will allow NHTSA to improve its vital data collection and analysis, which drives all of the agency's safety activities.

NHTSA provides grants to States for activities related to highway traffic safety. NHTSA's grants program supports multi-faceted State highway safety programs designed to reduce traffic crashes and the resulting deaths, injuries, and property damage. Dedicated funds from the program support high visibility enforcement campaigns that promote the use of seat belts and the reduction of impaired and distracted driving. The Agency also makes grant awards to States to address national priorities, such as impaired driving, occupant protection, distracted driving, and non-motorized safety, among others. The Agency implements performance measures and data-driven targets as a condition of approval in these programs and to ensure efficient and effective use of funds.

ADMINISTRATIVE PROVISIONS

SEC. 140. The limitations on obligations for the programs of the National Highway Traffic Safety Administration set in this Act shall not apply to obligations for which obligation authority was made available in previous public laws but only to the extent that the obligation authority has not lapsed or been used.

FEDERAL RAILROAD ADMINISTRATION

The Federal Railroad Administration's (FRA) mission is to enable the safe, reliable, and efficient movement of people and goods for a strong America, now and in the future. FRA executes its dual railroad safety and development mission by establishing and enforcing minimum safety standards, modernizing regulations to enable technological advances that promote safety, investing in rail services and infrastructure, and researching and developing innovations and advanced technology solutions. FRA's safety oversight and grant programs enable the agency to address safety concerns across the railroad network and empower the railroad industry to

effectively innovate and respond to emerging safety and operational challenges to ensure the continued growth of the U.S. economy.

Federal Funds

SAFETY AND OPERATIONS

For necessary expenses of the Federal Railroad Administration, not otherwise provided for, \$271,000,000, of which \$25,000,000 shall remain available until expended.

Funding requested in the Railroad Research and Development Program is focused on improving railroad safety. Research provides the scientific and engineering support for the Federal Railroad Administration's railroad safety oversight mission. It also identifies and develops emerging technologies for the rail industry to adopt voluntarily. The outcomes of the research and development reduce accidents and incidents. In addition to improving safety, the program contributes towards activities to achieve and maintain a state of good repair and promote job creation and economic growth.

The program focuses on the following areas of research:

Track Program.—Reducing derailments due to track related causes.

RAILROAD RESEARCH AND DEVELOPMENT—Continued

Rolling Stock Program.—Reducing derailments due to equipment failures, to minimize the consequences of derailments, and to minimize hazardous material releases.

Train Control and Communication.—Reducing train to train collisions and train collisions with objects on the line and at grade crossings.

Human Factors Program.—Reducing accidents caused by human error.

Railroad System Issues Program.—Prioritizing Research and Development projects on the basis of relevance to safety risk reduction and other DOT goals.

Funds for the National Network Grants to the National Railroad Passenger Corporation account provide capital, operating, and debt service funding for Amtrak activities related to the National Network, which includes Amtrak's State-Supported services, Long Distance services, and other Amtrak costs not allocated to the Northeast Corridor. Amtrak began receiving its annual appropriations from Congress under this account structure in 2017.

The Public Transportation Emergency Relief Program helps transit agencies restore needed transportation services immediately following disaster events. Both capital and operating costs are eligible for funding following an emergency; however, this program does not replace the Federal Emergency Management Agency's capital assistance program. FTA administers the \$10.9 billion supplemental appropriation (adjusted to \$10.2 billion after sequestration and the transfer of funds to the Office of Inspector General and the Federal Railroad Administration) provided by the Disaster Relief Appropriations Act, 2013 (Public Law 113–2) following Hurricane Sandy through this account. The Bipartisan Budget Act of 2018 (Public Law 115–123) also provided \$330 million for eligible capital and operating costs for areas affected by Hurricanes Harvey, Irma, and Maria. The Additional Supplemental Appropriations for Disaster Relief Act, 2019 (Public Law 116–20) also provided \$10.5 million for transit systems affected by major declared disasters occurring in calendar year 2018. The Consolidated Appropriations Act, 2023 (Public Law 117–328) provided \$214 million for transit systems affected by major declared disasters occurring in calendar years 2017, 2020, 2021, and 2022.
