*To cite the regulations in
this volume use title,
part and section num-
ber. Thus, 7 CFR 1520.1
refers to title 7, part
1520, section 1.*

Explanation

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas.

Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis approximately as follows:

Title 1 through Title 16.....	as of January 1
Title 17 through Title 27.....	as of April 1
Title 28 through Title 41.....	as of July 1
Title 42 through Title 50.....	as of October 1

The appropriate revision date is printed on the cover of each volume.

LEGAL STATUS

The contents of the Federal Register are required to be judicially noticed (44 U.S.C. 1507). The Code of Federal Regulations is prima facie evidence of the text of the original documents (44 U.S.C. 1510).

HOW TO USE THE CODE OF FEDERAL REGULATIONS

The Code of Federal Regulations is kept up to date by the individual issues of the Federal Register. These two publications must be used together to determine the latest version of any given rule.

To determine whether a Code volume has been amended since its revision date (in this case, January 1, 1997), consult the “List of CFR Sections Affected (LSA),” which is issued monthly, and the “Cumulative List of Parts Affected,” which appears in the Reader Aids section of the daily Federal Register. These two lists will identify the Federal Register page number of the latest amendment of any given rule.

EFFECTIVE AND EXPIRATION DATES

Each volume of the Code contains amendments published in the Federal Register since the last revision of that volume of the Code. Source citations for the regulations are referred to by volume number and page number of the Federal Register and date of publication. Publication dates and effective dates are usually not the same and care must be exercised by the user in determining the actual effective date. In instances where the effective date is beyond the cut-off date for the Code a note has been inserted to reflect the future effective date. In those instances where a regulation published in the Federal Register states a date certain for expiration, an appropriate note will be inserted following the text.

OMB CONTROL NUMBERS

The Paperwork Reduction Act of 1980 (Pub. L. 96-511) requires Federal agencies to display an OMB control number with their information collection request.

Many agencies have begun publishing numerous OMB control numbers as amendments to existing regulations in the CFR. These OMB numbers are placed as close as possible to the applicable recordkeeping or reporting requirements.

OBSOLETE PROVISIONS

Provisions that become obsolete before the revision date stated on the cover of each volume are not carried. Code users may find the text of provisions in effect on a given date in the past by using the appropriate numerical list of sections affected. For the period before January 1, 1986, consult either the List of CFR Sections Affected, 1949–1963, 1964–1972, or 1973–1985, published in seven separate volumes. For the period beginning January 1, 1986, a “List of CFR Sections Affected” is published at the end of each CFR volume.

INCORPORATION BY REFERENCE

What is incorporation by reference? Incorporation by reference was established by statute and allows Federal agencies to meet the requirement to publish regulations in the Federal Register by referring to materials already published elsewhere. For an incorporation to be valid, the Director of the Federal Register must approve it. The legal effect of incorporation by reference is that the material is treated as if it were published in full in the Federal Register (5 U.S.C. 552(a)). This material, like any other properly issued regulation, has the force of law.

What is a proper incorporation by reference? The Director of the Federal Register will approve an incorporation by reference only when the requirements of 1 CFR part 51 are met. Some of the elements on which approval is based are:

- (a) The incorporation will substantially reduce the volume of material published in the Federal Register.
- (b) The matter incorporated is in fact available to the extent necessary to afford fairness and uniformity in the administrative process.
- (c) The incorporating document is drafted and submitted for publication in accordance with 1 CFR part 51.

Properly approved incorporations by reference in this volume are listed in the Finding Aids at the end of this volume.

What if the material incorporated by reference cannot be found? If you have any problem locating or obtaining a copy of material listed in the Finding Aids of this volume as an approved incorporation by reference, please contact the agency that issued the regulation containing that incorporation. If, after contacting the agency, you find the material is not available, please notify the Director of the Federal Register, National Archives and Records Administration, Washington DC 20408, or call (202) 523–4534.

CFR INDEXES AND TABULAR GUIDES

A subject index to the Code of Federal Regulations is contained in a separate volume, revised annually as of January 1, entitled CFR INDEX AND FINDING AIDS. This volume contains the Parallel Table of Statutory Authorities and Agency Rules (Table I), and Acts Requiring Publication in the Federal Register (Table II). A list of CFR titles, chapters, and parts and an alphabetical list of agencies publishing in the CFR are also included in this volume.

An index to the text of “Title 3—The President” is carried within that volume.

The Federal Register Index is issued monthly in cumulative form. This index is based on a consolidation of the “Contents” entries in the daily Federal Register.

A List of CFR Sections Affected (LSA) is published monthly, keyed to the revision dates of the 50 CFR titles.

REPUBLICATION OF MATERIAL

There are no restrictions on the republication of material appearing in the Code of Federal Regulations.

INQUIRIES

For a legal interpretation or explanation of any regulation in this volume, contact the issuing agency. The issuing agency's name appears at the top of odd-numbered pages.

For inquiries concerning CFR reference assistance, call 202-523-5227 or write to the Director, Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408.

SALES

The Government Printing Office (GPO) processes all sales and distribution of the CFR. For payment by credit card, call 202-512-1800, M-F, 8 a.m. to 4 p.m. e.s.t. or fax your order to 202-512-2233, 24 hours a day. For payment by check, write to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. For GPO Customer Service call 202-512-1803.

RICHARD L. CLAYPOOLE,
Director,
Office of the Federal Register.

January 1, 1997.

THIS TITLE

Title 7—AGRICULTURE is composed of fifteen volumes. The parts in these volumes are arranged in the following order: parts 0–26, 27–52, 53–209, 210–299, 300–399, 400–699, 700–899, 900–999, 1000–1199, 1200–1499, 1500–1899, 1900–1939, 1940–1949, 1950–1999, and part 2000 to end. The contents of these volumes represent all current regulations codified under this title of the CFR as of January 1, 1997.

The Food and Consumer Service current regulations in the volume containing parts 210–299, include the Child Nutrition Programs and the Food Stamp Program. The regulations of the Federal Crop Insurance Corporation are found in the volume containing parts 400–699.

All marketing agreements and orders for fruits, vegetables and nuts appear in the one volume containing parts 900–999. All marketing agreements and orders for milk appear in the volume containing parts 1000–1199. Part 900—General Regulations is carried as a note in the volume containing parts 1000–1199, as a convenience to the user.

Redesignation tables appear in the Finding Aids section of the volumes containing parts 210–299 and parts 1500–1899.

For this volume, Cheryl E. Sirofchuck was Chief Editor. The Code of Federal Regulations publication program is under the direction of Frances D. McDonald, assisted by Alomha S. Morris.

PART 1520—AVAILABILITY OF INFORMATION TO THE PUBLIC

Subpart A—General

Sec.

1520.1 General statement.

1520.2 Organizational description.

Subpart B—Availability of Program Information Staff Manuals, and Related Material

1520.3 Public inspection and copying.

1520.4 Indexes.

Subpart C—Availability of Identifiable Records

1520.5 Request for records.

1520.6 Appeals.

AUTHORITY: 5 U.S.C. 552.

SOURCE: 40 FR 27008, June 26, 1975, unless otherwise noted.

Subpart A—General

§ 1520.1 General statement.

This part is issued in accordance with the regulations of the Secretary of Agriculture part 1, subpart A of subtitle A, of this title (7 CFR 1.1 to 1.16 and appendix A thereto), implementing the Freedom of Information Act (5 U.S.C. 552). The Secretary's Regulations, as implemented by the regulations in this part govern the availability of records of the Foreign Agricultural Service (FAS) to the public.

§ 1520.2 Organizational description.

The description of the organization of FAS is published as a notice in the FEDERAL REGISTER and may be revised from time to time in like manner. Such description contains a listing of FAS organizational units and their functions.

Subpart B—Availability of Program Information Staff Manuals, and Related Material

§ 1520.3 Public inspection and copying.

5 U.S.C. 552(a)(2) requires that certain materials be made available for public inspection and copying. Members of the public may request access to such materials through the Information Division, FAS, Room 5074, South

Building, Department of Agriculture, 14th Street and Independence Avenue, SW., Washington, DC 20250-1004. The office will be open from 8:30 a.m. to 5 p.m. Monday through Friday, except legal holidays.

[61 FR 2898, Jan. 30, 1996]

§ 1520.4 Indexes.

5 U.S.C. 552(a)(2) required that each agency publish or otherwise make available a current index of all materials required to be made available for public inspection and copying. Copies of the FAS Index may be obtained free of charge by telephoning (202) 720-7115 or writing to the Freedom of Information Officer, Information Division, FAS, Ag Box 1004, Department of Agriculture, 14th Street and Independence Avenue, SW., Washington, DC 20250-1004.

[61 FR 2898, Jan. 30, 1996]

Subpart C—Availability of Identifiable Records

§ 1520.5 Request for records.

(a) Requests for records under 5 U.S.C. 552(a)(3) shall be made in accordance with 7 CFR 1.3(a) and addressed to the Freedom of Information Officer, Information Division, Foreign Agricultural Service, Ag Box 1004, Department of Agriculture, 14th Street and Independence Avenue, SW., Washington, DC 20250-1004.

(b) Processing of a request for information can be facilitated if "FOIA REQUEST" is placed in capital letters on the front of the envelope and at the top of the letter. Additional information may be obtained by telephoning the FAS Information Division on (202) 720-7115.

[61 FR 2868, Jan. 30, 1996]

§ 1520.6 Appeals.

(a) Any person whose request under § 1520.5 is denied shall have the right to appeal such denial. This appeal shall be submitted in accordance with 7 CFR 1.3(e) and addressed to the Administrator, Foreign Agricultural Service, Department of Agriculture, 14th and Independence Avenue, SW., Washington, DC 20250-1001.

Pt. 1530

7 CFR Ch. XV (1–1–97 Edition)

(b) In the event the request is denied and the requestor wishes to appeal such decision, it will facilitate processing such appeal by placing the words “FOIA APPEAL” in capital letters on the front of the envelope and at the top of the appeal letter. Additional information may be obtained by telephoning the FAS Information Division on (202) 720–7115.

[40 FR 27008, June 26, 1975, as amended at 61 FR 2898, Jan. 30, 1996]

SOURCE: 55 FR 41489, Oct. 12, 1990, unless otherwise noted.

**Subpart A—Sugar To Be Re-
exported in Refined Form**

§ 1530.100 Definitions.

For purposes of this subpart, unless the context indicates otherwise, the following words and phrases have the meaning ascribed to them:

(a) *Additional U.S. note 3* means paragraph (c) of additional U.S. note 3 to chapter 17 of the HTS, unless otherwise described.

(b) *Agent* means a licensed custom-house broker, freight forwarder, or other person authorized to act on behalf of the licensee.

(c) *Date of entry* is the date when the U.S. Customs Service entry form is properly executed and deposited, together with any estimated duties and special import fees and any related documents required by law or regulation to be filed with such form at the time of entry with the appropriate customs official.

(d) *Date of export* means the on-board date of an ocean carrier bill of lading or an airway bill or on-board date of an intermodal bill of lading; if exported by rail or truck, the date of entry shown on an authenticated landing certificate

Foreign Agricultural Service, USDA

§1530.101

or similar document issued by an official of the government of the importing country; or the date of export established by such other proof of export as is acceptable to the Licensing Authority.

(e) *Date of Transfer* means the date of shipment of sugar transferred from a refiner to a manufacturer.

(f) *Department* means the United States Department of Agriculture.

(g) *Drawback* and *drawback entry* have the meanings ascribed to them in 19 CFR part 191.

(h) *Enter* or *entry*, with respect to sugar imported into the customs territory of the United States, refers to sugar that is entered or withdrawn from warehouse for consumption.

(i) *HTS* means the Harmonized Tariff Schedule of the United States.

(j) *License* means a license, issued by the Secretary through the Licensing Authority, which permits the entry, in accordance with the provisions of this subpart, of raw cane sugar described in subheading 1701.11.02 of the HTS for the purpose of being refined and re-exported in refined form or of being transferred to a manufacturer under the provisions of subpart B of this part.

(k) *Licensee* means a refiner to whom a license has been issued pursuant to the provisions of this subpart.

(l) *Licensing Authority* means the Team Leader, import Quota Programs, import Policies and Trade Analysis Division, Foreign Agricultural Service, U.S. Department of Agriculture, or the Team Leader's designee.

(m) *Manufacturer* means a person who is the recipient of a transfer of refined sugar from a refiner, who uses the sugar to produce a sugar containing product within the customs territory of the United States, and who exports or causes to be exported such product under a license issued under the provisions of subpart B of this part.

(n) *Notice of Transfer* means a document, in form and substance satisfactory to the Licensing Authority, that is signed by both the licensee and a manufacturer certifying delivery of a specified quantity of refined sugar, corresponding to sugar imported under the provisions of this subpart, from the licensee to the manufacturer.

(o) *Number 11 contract price* means the daily closing price per pound of raw sugar for the nearby Number 11 contract of the New York Coffee, Sugar and Cocoa Exchange.

(p) *Number 14 contract price* means the daily closing price per pound of raw sugar for the nearby Number 14 contract of the New York Coffee, Sugar and Cocoa Exchange.

(q) *Person* means any individual, partnership, corporation, association, estate, trust or any other business enterprise or legal entity.

(r) *Program* means the licensing program provided for in the regulations in this subpart and includes the requirements and limitations of HTS subheading 1701.11.02 and additional U.S. note 3.

(s) *Raw value* means, for a given quantity of sugar, the equivalent of that quantity of sugar in terms of ordinary commercial raw sugar testing 96 degrees by the polariscope as determined in accordance with regulations issued by the Secretary of the Treasury (19 CFR part 151, subpart B).

(t) *Refined sugar* means commercial refined sugar testing 99.7 degrees or above by the polariscope as determined in accordance with regulations issued by the Secretary of the Treasury.

(u) *Refiner* means any person in the United States who engages in the processing (refining) of raw sugar into refined sugar by substantially subjecting the raw sugar to the processes of affination or defecation, clarification, and further purification by absorption or crystallization.

(v) *Sugar containing product* means any product (other than articles described in subheadings 1701.11.01, 1701.11.02, 1701.11.03, 1701.12.01, 1701.12.02, 1701.91.21, 1701.91.22, 1701.99.01, 1701.99.02, 1702.90.31, 1702.90.32, 1806.10.41, 1806.10.42, 2106.90.11 and 2106.90.12 of the HTS) to which sugar has been added as an ingredient and which is to be exported without further processing.

§1530.101 Application for a license.

(a) An applicant for a license must apply in writing to the Licensing Authority. The letter of application shall contain at a minimum the following information:

§ 1530.102

(1) The name and address of the applicant and of the refinery or refineries at which the raw cane sugar entered under subheading 1701.11.02 will be processed (refined);

(2) The license amount requested, not to exceed the maximum license amount;

(3) A description of the kind and polarity of refined sugars to be exported or transferred;

(4) The name of the firm that will establish a performance bond in favor of the United States Government on behalf of the applicant; and

(5) A certification that the refiner shall:

(i) Refine a quantity of sugar equal to the quantity of sugar entered under the license;

(ii) Export or transfer such sugar or corresponding sugar within the applicable time limits; and

(iii) Shall not request credit on the refiner's license, if such license is issued, for the exportation or transfer of any refined sugar, or if such credit has been granted, shall promptly (within 5 business days of the filing of a drawback entry) notify the Licensing Authority and request that such credit be revoked, if the exportation of such refined sugar or any sugar containing product manufactured with the use of such transferred sugar has resulted in, or has been used as the basis of a claim by the licensee or any other person for, a refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS.

(b) A licensee shall promptly notify the Licensing Authority if any of the information described in paragraph (a) of this section has changed and shall submit an amended application upon the request of the Licensing Authority.

(c) The Licensing Authority may waive any provisions of this section for good cause if it is determined that such a waiver will not adversely affect the purposes of this program.

§ 1530.102 Issuance of a license.

(a) The Secretary of Agriculture, through the Licensing Authority, may issue a license to a refiner under which

7 CFR Ch. XV (1–1–97 Edition)

the refiner may import sugar described in HTS subheading 1701.11.02 in accordance with the provisions of this program. The license may contain such conditions, limitations or restrictions as the Licensing Authority determines to be appropriate for the purposes of this program. The Licensing Authority may add or modify such conditions, limitations or restrictions at such time and in such manner as the Licensing Authority, in his or her discretion, determines to be necessary or appropriate for the purposes of this program. A refiner may hold only one license at any given time.

(b) A quantity of refined sugar equivalent to the quantity of sugar, raw value, imported under a license, adjusted in accordance with § 1530.107 of this subpart, must be exported within 90 days of the date of entry of such sugar or must be transferred to a manufacturer within 90 days of the date of entry of such sugar.

(c) The maximum license amount is 50,000 metric tons of sugar, raw value. Quantities of sugar imported under the license will be charged to the license and quantities of refined sugar exported or transferred will be credited to the license as provided in § 1530.107. At no time may the outstanding balance of charges or credits exceed the maximum license amount except as a result of adjustments for polarization made pursuant to § 1530.107(c).

(d) The licensee shall reserve all rights, if any, to claim drawback refunds with respect to the exportation or transfer of refined sugar under this program. No credit on a license shall be made if any refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS is claimed or received on the basis, or as a result, of the exportation of such refined sugar or any sugar containing products manufactured with the use of such transferred sugar.

(e) If a licensee has made a full settlement of the balance on a license, the licensee may surrender the license on terms and conditions acceptable to the Licensing Authority. A licensee may,

Foreign Agricultural Service, USDA

§1530.104

with the written permission of the Licensing Authority, transfer a license to another refiner who does not hold a license, subject to such terms and conditions as the Licensing Authority may impose as he or she determines to be necessary or appropriate to carry out the purposes of this subpart.

(f) The licensee may utilize an agent to import, export or make transfers of sugar. The licensee must provide to the Licensing Authority a written authorization designating such person to act as an agent for the purpose of importing, exporting or transferring sugar. If the licensee uses an agent to export the refined sugar, the licensee shall notify the Licensing Authority in writing of the agent's identity, and the agent shall certify to the Licensing Authority in writing that the refined sugar has been exported from the customs territory of the United States.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30863, July 8, 1991]

§1530.103 Bond requirements.

(a) Unless the licensee has posted a performance bond with the U.S. Customs Service which is satisfactory to the Licensing Authority with respect to the requirements of this program, the licensee shall post a performance bond which meets the requirements of this section with the Licensing Authority. However, no bond will be required for the quantity of any sugar imported under license that corresponds to a quantity of sugar that has been exported or transferred prior to the importation of such sugar and credited to the license in accordance with §1530.107, provided that the Licensing Authority issues a written waiver of the bond requirement.

(b) A bond may cover entries made either during the period of time specified in the bond (term bond) or for a specified entry (single entry bond).

(c) Only the licensee who will process (refine) the sugar may be the principal on a bond to cover such sugar to be re-exported in refined form. The surety or sureties shall be among those listed by the Secretary of the Treasury as acceptable on Federal bonds.

(d) The obligation under the bond shall be made effective as of the date of entry of the imported sugar.

(e) The amount of the bond shall be equal to 20 cents per pound of sugar imported under the license.

(f) The appropriate customs official or the Licensing Authority, as appropriate, will release the obligation under the bond by 20 cents per pound for the quantity of sugar credited to the license in accordance with §1530.107.

(g) If the licensee fails to qualify for a credit to the license within 95 days of the date of export of corresponding sugar in an amount sufficient to offset the charge to the license for that corresponding sugar or if such a credit initially granted is subsequently revoked, payment will be made to the United States of America under the bond of a monetary amount equal to the difference between the Number 11 contract price and the Number 14 contract price, per pound of raw sugar, in effect on the last market day before the date of entry of the sugar or the last market day before the end of the period during which export was required, whichever difference is greater, times the quantity of refined sugar, converted to raw value, that should have been, but was not, exported in timely compliance with the requirements of this subpart. In the event no Number 11 contract price or Number 14 contract price is reported by the New York Coffee, Sugar and Cocoa Exchange, for the relevant market day, the Licensing Authority may estimate such price as he or she deems appropriate.

(h) Within 10 business days of the date of issuance of a license, the licensee shall submit to the Licensing Authority a copy of the performance bond.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30863, July 8, 1991]

§1530.104 Entry of sugar.

(a) The licensee shall be permitted to enter imported sugar under subheading 1701.11.02 of the HTS in conformity with the conditions, limitations and restrictions of the license, the provisions of this subpart and additional U.S. note 3, and any other procedures specified by the Licensing Authority.

(b) The licensee must present the license to the appropriate U.S. Customs Service official at the time of entry.

§ 1530.105

7 CFR Ch. XV (1–1–97 Edition)

Such customs official will mark on the license:

- (1) The quantity of sugar entered;
- (2) The date of entry; and
- (3) The customs entry number.

(c) The licensee shall submit to the Licensing Authority a copy of the license, as marked by the customs official, within 10 business days after each entry of sugar.

(d) The licensee shall submit to the Licensing Authority a statement, certified as true and accurate, of the polarization and weight of the imported sugar to be charged to the license. This statement must adequately identify the imported sugar and state the basis for the determination of the polarization of the sugar. The basis for such determination must be either the settlement polarization or some other means approved by the Licensing Authority.

§ 1530.105 Proof of export and notice of drawback claims.

(a) The licensee shall provide a written certification that he or she has exported a specified quantity of refined sugar. The certification shall include:

- (1) The licensee's name, address, and license number;
- (2) A description of the refined sugar exported, the polarity of such sugar, and its weight;
- (3) An identification of the imported sugar to which the exported sugar corresponds, including the quantity and polarization of the imported sugar;
- (4) The date of export, the port or point from which exported, the bill of lading number(s), and an identification of the vessel or other export carrier and any agent used in connection with the export;
- (5) The country of destination and foreign consignee;
- (6) The entry number of a claim, if any, by the licensee or any other person for a refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS on the basis, or as a result, of the exportation of the refined sugar and the amount of such refund; and
- (7) A statement that the sugar has been exported from the customs terri-

tory of the United States, that the licensee has reserved all rights to claim drawback refunds, and that no refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS has been or will be claimed or received on the basis, or as a result, of the exportation of the refined sugar.

(b) The certification must be submitted to the Licensing Authority within 95 days of the date of export. The Licensing Authority will not credit the license for sugar exported unless satisfactory and timely certification is received.

(c) Notice of drawback claims. Whenever the licensee knows or has reason to know that any claim has been made, by the licensee or any other person for a refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheading 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS on the basis, or as a result, of the exportation of refined sugar under this program or of sugar containing products produced from sugar transferred from the licensee to a manufacturer, under the provisions of subpart B of this part, the licensee shall within 5 business days provide a written notification to the Licensing Authority. This notification shall include the following information, if known or reasonably believed to be true by the licensee:

(1) The licensee's name, address, and license number;

(2) A description of the refined sugar or sugar containing products exported, and the weight of such refined sugar or sugar containing products;

(3) An identification of the imported sugar to which the exported sugar or sugar contained in the exported sugar containing products corresponds, including the quantity of the imported sugar;

(4) The date of export, the port or point from which exported, the bill of lading number(s), and an identification of the vessel or other export carrier and any agent used in connection with the export;

Foreign Agricultural Service, USDA

§1530.107

(5) The country of destination and foreign consignee;

(6) The entry number of the drawback claim and the amount of such refund of duties; and

(7) The identity of the person who filed such drawback entry.

(d) The Licensing Authority may waive any of the provisions of this section if compliance with the relevant provisions of HTS subheading 1701.11.02, additional U.S. note 3, and all other regulations in this subpart is otherwise established to the Licensing Authority's satisfaction.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30863, July 8, 1991]

§1530.106 Transfer of sugar.

(a) Transfers of sugar from a licensee to a manufacturer must conform with the conditions of the license, the provisions of this program and the program provided for in subpart B of this part, and any other procedures specified by the Licensing Authority.

(b) Refined sugar transferred under a license must be shipped by the licensee to the manufacturer within 90 days of the date of entry of the sugar entered under subheading 1701.11.02 of the HTS to which the refined sugar corresponds.

(c) The licensee shall submit to the Licensing Authority, within 10 business days of the transfer of sugar, a Notice of Transfer which must adequately identify the refined sugar transferred by the licensee, including the polarization and weight of the transferred sugar and the date of transfer.

(d) The licensee may make transfers of refined sugar to more than one manufacturer; however, the combined total of such transfers may not exceed the maximum license amount.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30863, July 8, 1991]

§1530.107 Charges and credits to licenses.

(a) Charges will be made to a license, effective as of the date of entry, for quantities of sugar (adjusted on the basis set forth in paragraph (c) of this section to determine raw value) entered under the license, when the licensee submits the information required by §1530.104 or when the Licens-

ing Authority otherwise determines that the licensee has made an entry under subheading 1701.11.02 of the HTS.

(b) At the request of the licensee and upon satisfactory and timely proof that the licensee has complied with all of the requirements of this program, the Licensing Authority will credit a license for:

(1) Quantities of refined sugar, adjusted pursuant to paragraph (c) of this section, for which proof of export has been submitted in accordance with the provisions of §1530.105 of this subpart, but such credit, if granted conditionally, will become final only when the Licensing Authority is satisfied that no refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS has been or will be claimed or received on the basis, or as a result, of the exportation of the refined sugar;

(2) Quantities of refined sugar, adjusted pursuant to paragraph (c) of this section, for which a Notice of Transfer has been submitted to the Licensing Authority in accordance with §1530.106 of this subpart; and

(3) Quantities of sugar charged to the license which the Licensing Authority determines have been destroyed, lost in processing the sugar, or otherwise disposed of so as to render the exportation or transfer of a corresponding quantity of sugar impossible or unnecessary.

(c) Adjustments of the quantities of imported sugar charged to the license and refined sugar exports credited to the license will be made as follows:

(1) To obtain the raw value for imported sugar with a polarization of 92 degrees or above, the adjustment will be made by multiplying the polarization times 0.0175, subtracting 0.68 from this product, and multiplying the difference by the weight. Expressed algebraically, this formula is: [(polarization X 0.0175) - 0.68] X weight.

(2) To obtain the raw value for imported sugar with a polarization of less than 92 degrees, the adjustment will be made by dividing the total sugar content by 0.972.

(3) To determine the quantity of refined sugar that must be exported to

§ 1530.108

7 CFR Ch. XV (1–1–97 Edition)

equal a corresponding quantity of imported sugar charged to a license, the adjustment will be made by dividing the quantity of sugar imported, expressed in raw value, by 1.07.

(d) The Licensing Authority may revoke any credit previously made to a license is the Licensing Authority determines, on the basis of evidence obtained after the credit was granted, that the licensee had not complied with all of the requirements of this subpart or if the exported sugar is re-exported or returned to the customs territory of the United States without having undergone a substantial transformation.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30863, July 8, 1991]

§ 1530.108 Replacement of sugars; substitution of sugars.

(a) The sugar exported or transferred does not have to be the same sugar that was entered under subheading 1701.11.02 of the HTS.

(b) Exportation or transfer of sugar for credit to the license may occur any time after the date on which the license was issued by the Licensing Authority. Any quantity of sugar exported or transferred after the date on which the license was issued, but prior to the entry of the corresponding sugar, will be treated as having been exported or transferred within the time limits of § 1530.102(b).

§ 1530.109 Records.

(a) Each licensee requesting credit in accordance with § 1530.107(b) shall keep records to establish for all refined sugar exported under the provisions of this program:

(1) The quantity and identity of the sugar, raw value, entered under subheading 1701.11.02 of the HTS;

(2) The date or inclusive dates of processing (refining);

(3) The quantity and description of the articles produced, and their polarities;

(4) The quantity of sugar, refined basis, exported under the provisions of this subpart;

(5) The quantity of sugar, refined basis, transferred to a manufacturer under the provisions of this subpart, and the identity of such manufacturer;

(6) The country of destination, foreign consignee, date of export, port, export carrier and any agent used in connection with the export and all documents relating to such exportation, including but not limited to an original, certified U.S. Customs Service Form 7512, an original bill of lading or copy of a U.S. Customs Service Form 7511, and any contract, invoice, bill of lading, dock receipt, ship's manifest, or copies thereof; and

(7) Any drawback entry, including all related documents, filed by the licensee or any other person for a refund, as drawback, of any customs duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.01, 1701.11.02, 1701.11.03, 1701.12.01, 1701.12.02, 1701.91.21, 1701.91.22, 1701.99.01, 1701.99.02, 1702.90.31, 1702.90.32, 1806.10.41, 1806.10.42, 2106.90.11 and 2106.90.12 of the HTS on the basis, or as a result, of the exportation of the refined sugar and the amount of any such refund paid.

(b) All records required by this section to be kept by a licensee shall be retained for at least 5 years after a license is credited for the exportation or transfer of the refined sugar.

(c) The licensee must, upon request, make the records covered by this section available for inspection and copying by the Licensing Authority or other appropriate official of the Federal Government.

(d) If, after inspection of the records, the Licensing Authority determines that such records are inadequate to establish that the imported sugar was refined by the licensee, sugar was lost or destroyed or otherwise disposed of to render exportation or transfer impossible or unnecessary, refined sugar was exported, drawback of duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS was not claimed or received on the basis, or as a result, of the exportation of the refined sugar, or any other requirement of this program was complied with, the Licensing Authority may revoke credits granted for the appropriate quantity of sugar.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30864, July 8, 1991]

Foreign Agricultural Service, USDA

§1530.112

§1530.110 Enforcement.

(a) If at any time after receiving the proof of export described in §1530.105 of this subpart, the Licensing Authority determines that the export of a quantity of refined sugar corresponding to the quantity of sugar entered under the license did not occur, and if the bond has been released under §1530.103, the Licensing Authority may hold the licensee liable for the difference between the Number 11 contract price and the Number 14 contract price, per pound of raw sugar, in effect on the last market day before the date of entry of the sugar or the last market day before the end of the period during which export was required, whichever difference is greater, times the quantity of refined sugar, converted to raw value, that should have been, but was not, exported. In the event no Number 11 contract price or Number 14 contract price is reported by the New York Coffee, Sugar and Cocoa Exchange, for the relevant market day, the Licensing Authority may estimate such price as he or she deems appropriate.

(b) If at any time after receiving the licensee's certification that no refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS has been or will be claimed or received on the basis, or as a result, of the exportation of any refined sugar, the Licensing Authority determines that a refund of such customs duties has been claimed or received by the licensee or any other person, and if the bond has been released under §1530.103, the Licensing Authority may hold the licensee liable for the difference between the Number 11 contract price and the Number 14 contract price, per pound of raw sugar, in effect on the last market day before the date of entry of the sugar or the last market day before the end of the period during which export was required, whichever difference is greater, times the quantity of sugar, converted to raw value, that should have been, but was not, exported. In the event no Number 11 contract price or Number 14 contract price is reported by the New York Coffee, Sugar and Cocoa Exchange, for the rel-

evant market day, the Licensing Authority may estimate such price as he or she deems appropriate.

(c) If at any time the Licensing Authority determines that a licensee has failed to comply with the requirements of this subpart, including the requirements of HTS subheading 1701.11.02 and of the relevant provisions of additional U.S. note 3, the Licensing Authority may, after notice to the licensee, suspend or revoke the license issued to the licensee under this program and may refuse to issue a license to that refiner. The Licensing Authority may suspend or revoke a license if claims are filed under 19 CFR part 191 for the refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS on the basis, or as a result, of the exportation of refined sugar under this program or if any claim under 19 CFR part 191 is denied on the basis that such refined sugar was not exported.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30864, July 8, 1991]

§1530.111 Appeals.

(a) Any action or determination of the Licensing Authority under this subpart may be appealed to the Director, Import Policies and Trade Analysis Division, Foreign Agricultural Service (FAS), within 30 days from the date of notification. The appeal must be presented in writing and must specifically state any reason as to why such determination should not stand. The Director, Import Policies and Trade Analysis Division, FAS, will provide such person with an opportunity for an informal hearing on such matter.

(b) A further appeal from the final decision of the Director, Import Policies and Trade Analysis Division, FAS, may be made to the Administrator, FAS, within five business days of the notification of the decision of the Director, Import Policies and Trade Analysis Division, FAS.

§1530.112 Waivers.

Upon written application of the licensee, the Licensing Authority may

§ 1530.113

extend the period for the export of refined sugar, may temporarily increase the maximum amount of the license, may extend the period for submitting proof of export, or may temporarily waive or modify any other requirement imposed by this subpart if such waiver or modification is necessary or appropriate under unusual, unforeseen or extraordinary circumstances and will not frustrate the purposes of this program and if compliance with the relevant provisions of HTS subheading 1702.11.02, additional U.S. note 3 is established to the Licensing Authority's satisfaction. The Licensing Authority may specify additional requirements or procedures in place of the requirements or procedures waived or modified.

§ 1530.113 Expiration of licenses.

(a) The licenses issued under this program shall expire upon written notice to the licensees by the Licensing Authority. The notice will state the date on which the licensees will expire and any other details applicable to the expiration of the licenses.

(b) If there have been no charges or credits on the License within 12 months of the date on which the license was issued, or any subsequent period of 18 months, the license may be deemed to have expired.

§ 1530.114 Paperwork Reduction Act assigned number.

The Office of Management and Budget has approved the information collection requirements contained in these regulations in accordance with 44 U.S.C. chapter 35 and OMB number 0551-0015 has been assigned.

§ 1530.115 Transitional provisions.

(a) All licenses issued to refiners prior to October 1, 1990, pursuant to the former provisions of 7 CFR 6.101, are canceled effective October 9, 1990.

(b) Any refiner who, on September 30, 1990, held a license which had a balance of charges and credits other than zero and which is canceled pursuant to paragraph (a) of this section may be issued a new license upon such refiner's agreement to:

(1) Fully settle the balance outstanding on such previous license, by bringing such balance to zero;

7 CFR Ch. XV (1-1-97 Edition)

(2) Comply with all the provisions of this subpart, subheading 1701.11.02 of the HTS, and additional U.S. note 3; and

(3) Comply with any terms, conditions and procedures imposed by the Licensing Authority in order to assure an orderly transition.

(c) During the transitional period between October 1, 1990, and the promulgation of a final rule to replace the interim rule issued on October 9, 1990, the Licensing Authority may modify or waive any requirement of this subpart, including the requirements that a refiner make a written application for a license prior to the issuance of the license and make a written application for a waiver under § 1530.111 of this subpart, if the Licensing Authority determines such modification or waiver is necessary or appropriate to assure an orderly transition and will not frustrate the purposes of this program.

Suppart B—Sugar To Be Re-exported in Sugar Containing Products

§ 1530.200 Definitions.

For purposes of this subpart, unless the context indicates otherwise, the following words and phrases have the meanings ascribed to them:

(a) *Additional U.S. note 3* means paragraph (c) of additional U.S. note 3 to chapter 17 of the HTS.

(b) *Agent* means customs house broker, freight forwarder, sugar refiner, or other person authorized to act on behalf of the licensee.

(c) *Corresponding sugar* means the identical sugar entered under subheading 1701.11.02 of the HTS, such sugar after having been refined, or other sugar substituted for, or in replacement of, such imported or refined sugar in accordance with §§ 1530.108 and 1530.207 of this part.

(d) *Date of entry* is the date when the U.S. Customs Service entry form is properly executed and deposited, together with any estimated duties and special import fees and any related documents required by law or regulation to be filed with such form at the time of entry with the appropriate customs official.

Foreign Agricultural Service, USDA

§1530.200

(e) *Date of export* means the on-board date of an ocean carrier bill of lading or an airway bill or on-board date of an intermodal bill of lading; if exported by rail or truck, the date of entry shown on an authenticated landing certificate or similar document issued by an official of the government of the importing country; or the date of export established by such other proof of export as is acceptable to the Licensing Authority.

(f) *Date of Transfer* means the date of shipment of sugar transferred from a refiner to a manufacturer.

(g) *Drawback* and drawback entry have the meanings ascribed to them in 19 CFR part 191.

(h) *Enter or entry*, with respect to sugar imported into the customs territory of the United States, refers to sugar that is entered or withdrawn from warehouse for consumption.

(i) *HTS* means the Harmonized Tariff Schedule of the United States.

(j) *License* means a license, issued by the Secretary through the Licensing Authority, which permits the transfer, in accordance with the provisions of this subpart, of refined sugar, corresponding to sugar imported under subpart A of this part, from a refiner to a manufacturer.

(k) *Licensee* means a manufacturer to whom a license has been issued pursuant to the provisions of this subpart.

(l) *Licensing Authority* means the Team Leader, Import Quota Programs, Import Policies and Trade Analysis Division, Foreign Agricultural Service, U.S. Department of Agriculture, or the Team Leader's designee.

(m) *Manufacturer* means a person who is the recipient of a transfer or refined sugar from a refiner, who uses the sugar to produce a sugar containing product within the customs territory of the United States, and who exports or causes to be exported such product.

(n) *Notice of Transfer* means a document, in form and substance satisfactory to the Licensing Authority, that is signed by both a refiner and the licensee certifying delivery of a specified quantity of refined sugar, corresponding to sugar imported under the provisions of subpart A of this part, from the refiner to the licensee.

(o) *Number 11 contract price* means the daily closing price per pound of raw sugar for the nearby Number 11 contract of the New York Coffee, Sugar and Cocoa Exchange.

(p) *Number 14 contract price* means the daily closing price per pound of raw sugar for the nearby Number 14 contract of the New York Coffee, Sugar and Cocoa Exchange.

(q) *Person* means any individual, partnership, corporation, association, estate, trust or any other business entity.

(r) *Program* means the licensing program provided for in the regulations in this subpart and includes the requirements and limitations of HTS subheading 1701.11.02 and additional U.S. note 3.

(s) *Raw value* means, for a given quantity of sugar, the equivalent of that quantity of sugar in terms of ordinary commercial raw sugar testing 96 degrees by the polariscope as determined in accordance with regulations issued by the Secretary of the Treasury.

(t) *Refiner* means any person in the United States who engages in the processing (refining) of raw sugar into refined sugar by substantially subjecting the raw sugar to the processes of (1) affination or defecation, (2) clarification, and (3) further purification by absorption or crystallization and who holds a license issued under the regulations in subpart A of this part.

(u) *Sugar* means commercial refined sugar testing 99.7 degrees or above by the polariscope as determined in accordance with regulations issued by the Secretary of the Treasury.

(v) *Sugar containing product* means any product (other than articles described in subheadings 1701.11.01, 1701.11.02, 1701.11.03, 1701.12.01, 1701.12.02, 1701.91.21, 1701.91.22, 1701.99.01, 1701.99.02, 1702.90.31, 1702.90.32, 1806.10.41, 1806.10.42, 2106.90.11 and 2106.90.12 of the HTS) to which sugar has been added as an ingredient and which is to be exported without further processing.

(w) *Valueless sugar* means sugar which has no commercial recovery value.

§ 1530.201

§ 1530.201 Application for a license.

(a) An applicant for a license must apply in writing to the Licensing Authority. The letter of application shall contain as a minimum the following information:

(1) The name and address of the applicant and of the facility or facilities at which transferred sugar will be used to manufacture the sugar containing product(s);

(2) The license amount requested, not to exceed the maximum license amount;

(3) A description of the kind and polarity of refined sugar to be received from a refiner(s);

(4) The name of the firm that will establish a performance bond in favor of the United States Government on behalf of the applicant;

(5) A description of the sugar containing product(s) to be exported and estimated sugar content of such product(s); and

(6) A certification that the manufacturer shall:

(i) Use a quantity of sugar equal to the quantity of sugar transferred under the license to manufacture sugar containing products;

(ii) Export such sugar containing products within the applicable time limits; and

(iii) Shall not request credit on the manufacturer's license, if such license is issued, for the exportation of any sugar containing products, or if such credit has been granted, shall promptly (within 5 business days of the filing of a drawback entry) notify the Licensing Authority and request that such credit be revoked, if the exportation of such sugar containing product manufactured with the use of such transferred sugar has resulted in, or has been used as the basis of a claim by the licensee or any other person for, a refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS.

(b) A licensee shall promptly notify the Licensing Authority if any of the information described in paragraph (a) of this section has changed and shall

7 CFR Ch. XV (1–1–97 Edition)

submit an amended application upon the request of the Licensing Authority.

(c) The Licensing Authority may waive any provisions of this section for good cause if it is determined that such a waiver will not adversely affect the purposes of this program.

§ 1530.202 Issuance of a license.

(a) The Secretary of Agriculture, through the Licensing Authority, may issue a license to a manufacturer under which the manufacturer, in accordance with the provisions of this program, may receive transfers of sugar from refiners for the purpose of manufacturing sugar containing products to be exported. The license may contain such conditions, limitations, or restrictions as the Licensing Authority determines to be appropriate for the purposes of this program. The Licensing Authority may add or modify such conditions, limitations or restrictions at such time and in such manner as the Licensing Authority, in his or her discretion, determines to be necessary or appropriate for the purposes of this program.

(b) A quantity of sugar equivalent to the quantity of sugar transferred under a license must be exported in a sugar containing product within 18 months of the date of transfer from the refiner. However, the Licensing Authority may credit a license for valueless sugar lost in normal product manufacture.

(c) The maximum license amount is 10,000 short tons (20 million pounds) of sugar. Quantities of sugar transferred under the license will be charged to the license and quantities of sugar contained in sugar containing products exported will be credited to the license as provided in § 1530.206. At no time may the outstanding balance of charges or credits exceed the maximum license amount.

(d) The licensee shall reserve all rights, if any, to claim drawback refunds with respect to the exportation of sugar containing products under this program. No credit on a license shall be made if any refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheading 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS is claimed or received on the basis, or as

Foreign Agricultural Service, USDA

§ 1530.204

a result, of the exportation of the sugar containing product.

(e) If a licensee has made a full settlement of the balance on a license, the licensee may surrender the license on terms and conditions acceptable to the Licensing Authority. A licensee may, with the written permission of the Licensing Authority, transfer a license to another manufacturer who does not hold a license, subject to such terms and conditions as the Licensing Authority may impose as he or she determines to be necessary or appropriate to carry out the purposes of this subpart.

(f) The licensee may utilize an agent for the transfer of refined sugar or the exportation of sugar containing products. The agent must, upon request, produce for inspection by the Licensing Authority written authorization designating such person to act as an agent for the purpose of receiving transferred sugar. If the licensee uses an agent to export sugar containing products, the licensee shall notify the Licensing Authority in writing of the agent's identity, and the agent shall certify to the Licensing Authority in writing that the sugar containing products have been exported from the customs territory of the United States.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30864, July 8, 1991]

§ 1530.203 Bond requirements.

(a) A licensee shall post a performance bond, which meets the requirements of this section, with the Licensing Authority. However, no bond will be required for the quantity of any sugar transferred under license that corresponds to a quantity of sugar that has been exported in sugar containing products prior to the transfer of such sugar and credited to the license in accordance with § 1530.206, provided that the Licensing Authority issues a written waiver of the bond requirement.

(b) A bond may cover transfers made either during the period of time specified in the bond (term bond) or for a specified transfer (single entry bond).

(c) Only the licensee who will use the sugar may be the principal on a bond to cover such sugar to be transferred. The surety or sureties shall be among those listed by the Secretary of the

Treasury as acceptable on Federal bonds.

(d) The obligation under the bond shall be made effective as of the date of transfer of the corresponding sugar.

(e) The amount of the bond shall be equal to 20 cents per pound of sugar transferred under the license.

(f) The Licensing Authority will release the obligation under the bond for transferred sugar by 20 cents per pound for the quantity of sugar credited to the license in accordance with § 1530.206, as determined by the Licensing Authority.

(g) If the licensee fails to qualify for a credit to the license within 95 days of the date of export of sugar containing products or the last date on which such products should have been exported, whichever occurs first, in an amount sufficient to offset the charge to the license for corresponding sugar, or if such a credit initially granted is subsequently revoked, payment will be made to the United States of America under the bond of a monetary amount equal to the difference between the Number 11 contract price and the Number 14 contract price, per pound of raw sugar, in effect on the last market day before the date of entry of the sugar or the last marketday before the end of the period during which export was required, whichever difference is greater, times the quantity of refined sugar, converted to raw value, that should have been, but was not, exported in the form of sugar containing products in timely compliance with the requirements of this subpart. In the event no Number 11 contract price or Number 14 contract price is reported by the New York Coffee, Sugar and Cocoa Exchange, for the relevant market day, the Licensing Authority may estimate such price as he or she deems appropriate.

(h) Within 10 business days of the date of issuance of a license, the licensee shall submit to the Licensing Authority a copy of the performance bond.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30865, July 8, 1991]

§ 1530.204 Transfer of sugar.

(a) Transfers of sugar from a refiner to a licensee must conform with the

§ 1530.205

7 CFR Ch. XV (1–1–97 Edition)

conditions of the license, the provisions of this program and the program provided for in subpart A of this part, and any other procedures specified by the Licensing Authority.

(b) Refined sugar transferred under a license must be shipped by the refiner to the licensee within 90 days of the date of entry of the sugar entered under subheading 1701.11.02 of the HTS to which the refined sugar corresponds.

(c) The licensee shall submit to the Licensing Authority, within 10 business days of the transfer of sugar, a Notice of Transfer which must adequately identify the refined sugar received from a refiner, including the weight of the transferred sugar and the date of transfer.

(d) The licensee may receive transfers of refined sugar from more than one refiner, as specified on the application for a license; however, the combined total of such transfers may not exceed the maximum license amount.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30865, July 8, 1991]

§ 1530.205 Proof of export and notice of drawback claims.

(a) The licensee shall provide a written certification that he or she has exported a specified quantity of sugar in sugar containing products. The certification shall include:

(1) The licensee's name, address, and license number;

(2) The product description, the percentage of sugar in such product, and the total weight of sugar contained in the sugar containing product exported;

(3) The percentage of valueless sugar lost in normal product manufacture and the quantity of valueless sugar actually lost in the manufacture of the product exported;

(4) The date of export, the port or point from which exported, the bill of lading number(s), and an identification of the vessel or other export carrier and any agent used in connection with the export;

(5) The country of destination and foreign consignee;

(6) An identification of the transferred sugar which corresponds to the sugar exported in the sugar containing product, including the quantity of the transferred sugar;

(7) The entry number of a claim, if any, by the licensee or any other person for a refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS on the basis, or as a result, of the exportation of the sugar containing product and the amount of such refund;

(8) A statement that the sugar containing products have been exported, that the licensee has reserved all rights to claim drawback refunds, and that no refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS has been or will be claimed or received on the basis, or as a result, of the exportation of the sugar containing product.

(b) The certification must be submitted to the Licensing Authority within 95 days of the date of export. The Licensing Authority will not credit the license for sugar exported in sugar containing products unless satisfactory and timely certification is received.

(c) Notice of drawback claims. Whenever the licensee knows or has reason to know that any claim has been made, by the licensee or any other person for a refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS on the basis, or as a result, of the exportation of sugar containing products produced from sugar transferred from a refiner to the licensee or corresponding sugars, under the provisions of § 1530.204 of this subpart, the licensee shall within 5 business days provide a written notification to the Licensing Authority. This notification shall include the following information, if known or reasonably believed to be true by the licensee:

(1) The licensee's name, address, and license number;

(2) A description of the sugar containing products exported, and the weight of such sugar containing products;

Foreign Agricultural Service, USDA

§1530.208

(3) An identification of the imported sugar to which the sugar contained in the exported sugar containing products corresponds, including the quantity of the imported sugar;

(4) The date of export, the port or point from which exported, the bill of lading number(s), and an identification of the vessel or other export carrier and any agent used in connection with the export;

(5) The country of destination and foreign consignee;

(6) The entry number of the drawback claim and the amount of such refund of duties; and

(7) The identity of the person who filed such drawback entry.

(d) The Licensing Authority may waive any of the provisions of this section if compliance with the relevant provisions of HTS subheading 1701.11.02, additional U.S. note 3, and all other regulations in this subpart is otherwise established to the Licensing Authority's satisfaction.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30865, July 8, 1991; 57 FR 175, Jan. 3, 1992]

§1530.206 Charges and credits to licenses.

(a) Charges will be made to a license for quantities of sugar transferred under the license, effective as of the date of transfer, when the licensee submits the information required by §1530.204 or when the Licensing Authority otherwise determines that a transfer has been made.

(b) At the request of the licensee and upon satisfactory and timely proof that the licensee has complied with all of the requirements of this program, the Licensing Authority will credit a license for:

(1) Quantities of sugar in the sugar containing products for which proof of export has been submitted in accordance with the provisions of §1530.205 of this subpart, but such credit, if granted conditionally, will become final only when the Licensing Authority is satisfied that no refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS has been or will be claimed or received on

the basis, or as a result, of the exportation of the sugar containing product; and

(2) Quantities of sugar charged to the license which the Licensing Authority determines have been destroyed, lost in the production process, or otherwise disposed of so as to render the use or exportation of a corresponding quantity of sugar in sugar containing products impossible or unnecessary.

(c) The Licensing Authority may revoke any credit previously made to a license if the Licensing Authority determines, on the basis of evidence obtained after the credit was granted, that the licensee had not complied with all of the requirements of this subpart or if the exported sugar containing products are re-exported or returned to the customs territory of the United States without having undergone a substantial transformation.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30865, July 8, 1991; 57 FR 175, Jan. 3, 1992]

§1530.207 Replacement of sugars; substitution of sugars.

(a) The sugar exported in sugar containing products does not have to be identical to the sugar transferred.

(b) Exportation of sugar in sugar containing products for credit to the license may occur any time after the date on which the license was issued by the Licensing Authority. Any quantity of sugar exported in sugar containing products after the date on which the license was issued, but prior to the transfer of the corresponding sugar, will be treated as having been exported within the time limits of §1530.202(b).

§1530.208 Records.

(a) Each licensee requesting credit in accordance with §1530.206(b) shall keep records to establish for all sugar containing products exported under the provisions of this program:

(1) The date or inclusive dates of manufacture;

(2) The quantity and identity of the sugar, refined basis, transferred to the licensee under the provisions of this subpart;

(3) The quantity and description of the articles manufactured;

§ 1530.209

7 CFR Ch. XV (1–1–97 Edition)

(4) The quantity of sugar, refined basis, contained in the sugar containing products exported;

(5) The country of destination, foreign consignee, date of export, port, export carrier and any agent used in connection with the export and all documents relating to such exportation, including but not limited to an original, certified U.S. Customs Service Form 7512, an original bill of lading or copy of a U.S. Customs Service Form 7511, and any contract, invoice, bill of lading, dock receipt, ship's manifest, or copies thereof; and

(6) Any drawback entry, including all related documents, filed by the licensee or any other person for a refund, as drawback, of any customs duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.01, 1701.11.02, 1701.11.03, 1701.12.01, 1701.12.02, 1701.91.21, 1701.91.22, 1701.99.01, 1701.99.02, 1702.90.31, 1702.90.32, 1806.10.41, 1806.10.42, 2106.90.11 and 2106.90.12 of the HTS on the basis, or as a result, of the exportation of the sugar containing product and the amount of any such refund paid.

(b) Each licensee requesting credit for valueless sugar lost in normal product manufacture, or destroyed or otherwise disposed of, shall also keep records to establish the quantity of valueless sugar lost, disposed of, or destroyed.

(c) All records required by this section to be kept by a licensee shall be retained for at least 5 years after a license is credited for the exportation of the sugar containing product.

(d) The licensee must, upon request, make the records covered by this section available for inspection and copying by the Licensing Authority or other appropriate official of the Federal Government.

(e) If, after inspection of the records, the Licensing Authority determines that such records are inadequate to establish that refined sugar was transferred, an appropriate sugar containing product was manufactured, valueless sugar was lost or destroyed, appropriate sugar containing products were exported, drawback of duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02,

1702.90.32, 1806.10.42, or 2106.90.12 of the HTS was not claimed or received on the basis, or as a result, of the exportation of the sugar containing product, or any other requirement of this program was complied with, the Licensing Authority may revoke credits granted for the appropriate quantity of sugar.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30865, July 8, 1991]

§ 1530.209 Enforcement.

(a) If at any time after receiving the proof of export described in § 1530.205 of this subpart, the Licensing Authority determines that the export of sugar in the form of sugar containing products corresponding to the quantity of sugar transferred under the license did not occur, and has not been otherwise disposed of or lost in the manufacturing process as valueless sugar, and if the bond has been released under § 1530.203, the Licensing Authority may hold the licensee liable for the difference between the Number 11 contract price and the Number 14 contract price, per pound of raw sugar, in effect on the last market day before the date of transfer of the sugar or the last market day before the end of the period during which export was required, whichever difference is greater, times the quantity of sugar, converted to raw value, that should have been, but was not, exported in sugar containing products. In the event no Number 11 contract price or Number 14 contract price is reported by the New York Coffee, Sugar and Cocoa Exchange, for the relevant market day, the Licensing Authority may estimate such price as he or she deems appropriate.

(b) If at any time after receiving the licensee's certification that no refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS has been or will be claimed or received on the basis, or as a result, of the exportation of any sugar containing product, the Licensing Authority determines that a refund of such customs duties has been claimed or received by the licensee or any other person, and if the bond has been released

Foreign Agricultural Service, USDA

§1530.213

under §1530.203, the Licensing Authority may hold the licensee liable for the difference between the Number 11 contract price and the Number 14 contract price, per pound of raw sugar, in effect on the last market day before the date of transfer of the sugar or the last market day before the end of the period during which export was required, whichever difference is greater, times the quantity of sugar, converted to raw value, that should have been, but was not, exported in sugar containing products. In the event no Number 11 contract price or Number 14 contract price is reported by the New York Coffee, Sugar and Cocoa Exchange, for the relevant market day, the Licensing Authority may estimate such price as he or she deems appropriate.

(c) If at any time the Licensing Authority determines that a licensee has failed to comply with the requirements of this subpart, including the requirements of HTS subheading 1701.11.02 and of the relevant provisions of additional U.S. note 3, the Licensing Authority may, after notice to the licensee, suspend or revoke the license issued to the licensee under this program and may refuse to issue a license to that manufacturer. The Licensing Authority may suspend or revoke a license if claims are filed under 19 CFR part 191 for the refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS on the basis, or as a result, of the exportation of a sugar containing product under this program or if any other claim under 19 CFR part 191 is denied on the basis that the sugar containing product was not exported.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30866, July 8, 1991]

§1530.210 Appeals.

(a) Any action or determination of the Licensing Authority under this subpart may be appealed to the Director, Import Policies and Trade Analysis Division, Foreign Agricultural Service (FAS), within 30 days from the date of notification. The appeal must be presented in writing and must specifically state any reason as to why such determination should not stand.

The Director, Import Policies and Trade Analysis Division, FAS, will provide such person with an opportunity for an informal hearing on such matter.

(b) A further appeal from the final decision of the Director, Import Policies and Trade Analysis Division, FAS, may be made to the Administrator, FAS, within five business days of the notification of the decision of the Director, Import Policies and Trade Analysis Division, FAS.

§1530.211 Waivers.

Upon written application of the licensee, the Licensing Authority may extend the period for the export of sugar containing products, may temporarily increase the maximum amount of the license, may extend the period for submitting proof of export, or may temporarily waive or modify any other requirement imposed by this subpart if such waiver or modification is necessary or appropriate under unusual, unforeseen or extraordinary circumstances and will not frustrate the purposes of this program and if compliance with the relevant provisions of HTS subheading 1701.11.02, additional U.S. note 3 is established to the Licensing Authority's satisfaction. The Licensing Authority may specify additional requirements or procedures in place of the requirements or procedures waived or modified.

§1530.212 Expiration of licenses.

(a) The licenses issued under this program shall expire upon written notice to the licensees by the Licensing Authority. The notice will state the date on which the licenses will expire and any other details applicable to the expiration of the licenses.

(b) If there have been no charges or credits on the license within 12 months of the date on which the license was issued, or any subsequent period of 18 months, the license may be deemed to have expired.

§1530.213 Paperwork Reduction Act assigned number.

The Office of Management and Budget has approved the information collection requirements contained in these regulations in accordance with 44

§ 1530.214

U.S.C. chapter 35 and OMB number 0551-0015 has been assigned.

§ 1530.214 Transitional provisions.

(a) All licenses issued to manufacturers prior to October 1, 1990, pursuant to the provisions of 7 CFR 1530.201, under the program for “Sugar to be Re-exported in Sugar Containing Products,” are canceled effective October 9, 1990.

(b) Any manufacturer who, on September 30, 1990, held a license which had a balance of charges and credits other than zero and which is canceled pursuant to paragraph (a) of this section may be issued a new license upon such manufacturer’s agreement to:

(1) Fully settle the balance outstanding on such previous license, by bringing such balance to zero;

(2) Comply with all the provisions of this subpart, subheading 1701.11.02 of the HTS, and additional U.S. note 3; and

(3) Comply with any terms, conditions and procedures imposed by the Licensing Authority in order to assure an orderly transition.

(c) During the transitional period between October 1, 1990, and the promulgation of a final rule to replace the interim rule issued on October 9, 1990, the Licensing Authority may modify or waive any requirement of this subpart, including the requirements that a manufacturer make a written application for a license prior to the issuance of the license and make a written application for a waiver under § 1530.210 of this subpart, if the Licensing Authority determines such modification or waiver is necessary or appropriate to assure an orderly transition and will not frustrate the purposes of this program.

Subpart C—Sugar for the Production of Polyhydric Alcohol

§ 1530.300 Definitions.

For purposes of this subpart, unless the context indicates otherwise, the following words and phrases have the meanings ascribed to them:

(a) *Additional U.S. note 3* means paragraph (c) of additional U.S. note 3 to chapter 17 of the HTS.

(b) *Agent* means a licensed customs house broker, freight forwarder, or

7 CFR Ch. XV (1–1–97 Edition)

other person authorized to act on behalf of the licensee.

(c) *Date of entry* is the date when the U.S. Customs Service entry form is properly executed and deposited, together with any estimated duties and special import fees and any related documents required by law or regulation to be filed with such form at the time of entry with the appropriate customs official.

(d) *Drawback* and *drawback entry* have the meanings ascribed to them in 19 CFR part 191.

(e) *Enter or entry*, with respect to sugar imported into customs territory of the United States, refers to sugar that is entered or withdrawn from warehouse for consumption.

(f) *HTS* means the Harmonized Tariff Schedule of the United States.

(g) *License* means a license, issued by the Secretary of Agriculture, through the Licensing Authority, which permits the entry, in accordance with the provisions of this subpart, of raw cane sugar described in subheading 1701.11.02 of the HTS for the sole purpose of producing (other than by distillation) polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption.

(h) *Licensee* means a manufacturer to whom a license has been issued pursuant to the provisions of this subpart.

(i) *Licensing Authority* means the Team Leader, Import Quota Programs, Import Policies and Trade Analysis Division, Foreign Agricultural Service, U.S. Department of Agriculture, or the Team Leader’s designee.

(j) *Manufacturer* means a person who is engaged in the production (other than by distillation) of polyhydric alcohols from sugar.

(k) *Number 11 contract price* means the daily closing price per pound of raw sugar for the nearby Number 11 contract of the New York Coffee, Sugar and Cocoa Exchange.

(l) *Number 14 contract price* means the daily closing price per pound of raw sugar for the nearby Number 14 contract of the New York Coffee, Sugar and Cocoa Exchange.

(m) *Person* means any individual, partnership, corporation, association, estate, trust or any other business enterprise or legal entity.

Foreign Agricultural Service, USDA

§ 1530.302

(n) *Program* means the licensing program provided for in the regulations in this subpart and includes the requirements and limitations of HTS subheading 1701.11.02 and additional U.S. note 3.

(o) *Sugar* means raw cane sugar described in subheading 1701.11.02 of the HTS.

§ 1530.301 Application for a license.

(a) An applicant for a license must apply in writing to the Licensing Authority. The letter of application shall contain as a minimum the following information:

(1) The name and address of the applicant and of the facility or facilities at which imported sugar will be used to produce polyhydric alcohols;

(2) The license amount requested, not to exceed the anticipated requirements of the manufacturer on an annual basis;

(3) The name of the person that will establish a performance bond in favor of the United States Government on behalf of the applicant;

(4) The anticipated requirements of the manufacturer for sugar to be used in the production (other than by distillation) of polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption, on an annual basis; and

(5) The total quantity of polyhydric alcohol produced (other than by distillation), except polyhydric alcohols for use as a substitute for sugar in human food consumption, by the manufacturer during the previous 12-month period, and the total quantity of polyhydric alcohol produced by the manufacturer during the previous 12-month period.

(b) An application for a license shall contain a certification that the manufacturer shall use the quantity of sugar entered under a license solely for the production (other than by distillation) of polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption, and that the manufacturer shall notify the Licensing Authority, within 95 days of the exportation of any polyhydric alcohols, if such exportation has resulted in, or has been used as the basis of a claim by the licensee

or any other person for, a refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.92, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS and the amount of such refund.

(c) A licensee shall promptly notify the Licensing Authority if any of the information described in paragraph (a) of this section has changed and shall submit an amended application upon the request of the Licensing Authority.

(d) The Licensing Authority may waive any provisions of this section for good cause if it is determined that such a waiver will not adversely affect the purposes of this program.

§ 1530.302 Issuance of a license.

(a) The Secretary of Agriculture, through the Licensing Authority, may issue a license to a manufacturer under which the manufacturer, in accordance with the provisions of this program, may enter raw cane sugar described in subheading 1701.11.02 of the HTS for the sole purpose of producing (other than by distillation) polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption. The license shall state the maximum amount of sugar which may be imported under the license. The license may contain such additional conditions, limitations or restrictions as the Licensing Authority determines to be appropriate for the purposes of this program. The Licensing Authority may add or modify such conditions, limitations or restrictions at such time and in such manner as the Licensing Authority, in his or her discretion, determines to be necessary or appropriate for the purposes of this program.

(b) The total quantity of sugar imported under a license must be used or the sole purpose of producing (other than by distillation) polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption, within 180 days of the date of entry of such sugar.

(c) The maximum amount of sugar which may be imported under the license will be the requirements of the manufacturer for sugar to be used in the production (other than by distillation) of polyhydric alcohols, except

§ 1530.303

polyhydric alcohols for use as a substitute for sugar in human food consumption, during the 12-month period following the effective date of the license, as determined by the Licensing Authority. Quantities of sugar imported under the license will be charged to the license and quantities of sugar used for the sole purpose of producing (other than by distillation) polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption, will be credited to the license as provided in §1530.306. At no time may the charges to the license exceed the maximum license amount specified in the license.

(d) The licensee shall reserve all rights, if any, to claim drawback refunds with respect to the exportation of polyhydric alcohols under this program. No credit on a license shall be made if any refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS is claimed or received on the basis, or as a result, of the exportation of such polyhydric alcohols.

(e) If a licensee has made a full settlement of the balance on a license, the licensee may surrender the license on terms and conditions acceptable to the Licensing Authority. A licensee may not transfer a license to any other person. Any attempt to transfer or assign a license shall be null and void and shall be grounds for the revocation of the license by the Licensing Authority.

(f) The licensee may utilize an agent to enter imported sugar. The licensee must provide to the Licensing Authority a copy of a written authorization designating such person to act as an agent for the purpose of entering sugar, and the agent shall produce such authorization for inspection by the appropriate U.S. Customs Service official at the time of entry. If the licensee uses an agent to export polyhydric alcohol, the licensee shall notify the Licensing Authority in writing of the agent's identity.

7 CFR Ch. XV (1–1–97 Edition)

§ 1530.303 Bond requirements.

(a) Unless the licensee has posted a performance bond with the U.S. Customs Service which is satisfactory to the Licensing Authority with respect to the requirements of this program, the licensee shall post a performance bond, which meets the requirements of this section, with the Licensing Authority.

(b) A bond may cover entries made either during the period of time specified in the bond (term bond) or for a specified entry (single entry bond).

(c) Only the licensee who will use the sugar may be the principal on a bond to cover such sugar to be imported. The surety or sureties shall be among those listed by the Secretary of the Treasury as acceptable on Federal bonds.

(d) The obligation under the bond shall be made effective as of the date of entry of the sugar.

(e) The amount of the bond shall be equal to 20 cents per pound of sugar imported under the license.

(f) The appropriate customs official or the Licensing Authority, as appropriate, will release the obligation under the bond by 20 cents per pound for the quantity of sugar used in the production of polyhydric alcohols and credited to the license in accordance with §1530.306, as determined by the Licensing Authority.

(g) If the licensee fails to qualify for a credit to the license within 95 days of the date of production of polyhydric alcohols in a quantity sufficient to offset the charge to the license for the imported sugar used for producing such polyhydric alcohols, or if such a credit initially granted is subsequently revoked, payment will be made to the United States of America under the bond of a monetary amount equal to the difference between the Number 11 contract price and the Number 14 contract price, per pound of raw sugar, in effect on the last market day before the date of entry of the sugar or the last market day before the end of the period during which production of polyhydric alcohol was required, whichever difference is greater, times the quantity of raw sugar that should have been, but was not, used in the production of polyhydric alcohol in timely

Foreign Agricultural Service, USDA

§ 1530.305

compliance with the requirements of this subpart. In the event no Number 11 contract price or Number 14 contract price is reported by the New York Coffee, Sugar and Cocoa Exchange, for the relevant market day, the Licensing Authority may estimate such price as he or she deems appropriate.

(h) Within 10 business days of the date of issuance of a license, the licensee shall submit to the Licensing Authority a copy of the performance bond.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30866, July 8, 1991]

§ 1530.304 Entry of sugar.

(a) The licensee shall be permitted to enter imported sugar under subheading 1701.11.02 of the HTS in conformity with the conditions, limitations and restrictions of the license, the provisions of this subpart and additional U.S. note 3, and any other procedures specified by the Licensing Authority.

(b) The licensee must present the license to the appropriate U.S. Customs Service official at the time of entry. Such customs official will mark on the license:

- (1) The quantity of sugar entered;
- (2) The date of entry; and
- (3) The customs entry number.

(c) The licensee shall submit to the Licensing Authority a copy of the license, as marked by the customs official, within 10 business days after each entry of sugar.

§ 1530.305 Proof of production of polyhydric alcohols.

(a) Certificate of use. Within 30 days of the date of production of polyhydric alcohols from sugar imported under a license, the licensee shall provide a written certification, signed by the licensee, to the Licensing Authority that he or she has used, within 180 days of the date of entry of sugar under the license, such sugar for the sole purpose of producing (other than by distillation) polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption. The certification shall include:

(1) The licensee's name, address, and license number;

(2) The customs entry number(s), date(s) of entry, and total weight of sugar used in the production of such polyhydric alcohols;

(3) The date(s) on which such polyhydric alcohols were produced; and

(4) The following certification, with all blank spaces appropriately filled in as indicated by the instructions placed in brackets:

The undersigned hereby certifies that between [insert date(s) of production of polyhydric alcohols] _____, 19____, and _____, 19____, the undersigned has used [insert total weight of imported sugar] _____ pounds of sugar, imported on [insert date of entry] _____, 19____, for the sole purpose of producing (other than by distillation) polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption. The undersigned further certifies that the quantity of sugar shown on this certificate of use does not include any sugar previously covered by another certificate of use.

(b) If polyhydric alcohols produced with sugar imported under the license are exported, the licensee shall provide an additional written certification, signed by the licensee, to the Licensing Authority, within 95 days of the date of exportation of the polyhydric alcohols. The certification shall include:

(1) The licensee's name, address, and license number;

(2) The customs entry number(s), date(s) of entry, and total weight of sugar used in the production of such polyhydric alcohols;

(3) The date(s) on which such polyhydric alcohols were produced;

(4) The date of export, the port or point from which exported, the bill of lading number(s), and an identification of the vessel or other export carrier and any agent used in connection with the export;

(5) The country of destination and foreign consignee;

(6) The entry number of a claim, if any, by the licensee or any other person for a refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheading 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS on the basis, or as a result, of the exportation of the polyhydric alcohol and the amount of such refund; and

§ 1530.306

7 CFR Ch. XV (1–1–97 Edition)

(7) A statement that the licensee has reserved all rights to claim drawback refunds with respect to the exportation of the polyhydric alcohol, and that no refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheading 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS has been or will be claimed or received on the basis, or as a result, of the exportation of the polyhydric alcohol.

(c) If polyhydric alcohols produced with sugar imported under the license are exported, the licensee shall provide to the Licensing Authority, within 95 days of the date of exportation of the polyhydric alcohols, the following documentation:

(1) An original, certified U.S. Customs Service Form 7512; and

(2) An original bill of lading or copy of a U.S. Customs Service Form 7511.

(d) Notice of drawback claims. Whenever the licensee knows or has reason to know that any claim has been made, by the licensee or any other person for a refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheading 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS on the basis, or as a result, of the exportation of polyhydric alcohol, whether or not such polyhydric alcohol was produced from sugar imported under the licensee's license, the licensee shall within 5 business days provide a written notification to the Licensing Authority. This notification shall include the following information, if known or reasonably believed to be true by the licensee:

(1) The licensee's name, address, and license number;

(2) A description, and the weight, of such polyhydric alcohol exported;

(3) An identification of the imported sugar which was used in the production of the polyhydric alcohol, including the quantity of the imported sugar;

(4) The date of export, the port or point from which exported, the bill of lading number(s), and an identification of the vessel or other export carrier and any agent used in connection with the export;

(5) The country of destination and foreign consignee;

(6) The entry number of the drawback claim and the amount of such refund of duties; and

(7) The identity of the person who filed such drawback entry.

(e) The Licensing Authority may waive any of the provisions of this section if compliance with the relevant provisions of HTS subheading 1701.11.02, additional U.S. note 3, and all other regulations in this subpart is otherwise established to the Licensing Authority's satisfaction.

§ 1530.306 Charges and credits to licenses.

(a) Charges will be made to a license, effective as of the date of entry, for quantities of sugar entered under the license, when the licensee submits the license as required by § 1530.304(c) or when the Licensing Authority otherwise determines that the licensee has made an entry under subheading 1701.11.02 of the HTS.

(b) At the request of the licensee and upon satisfactory and timely proof that the licensee has complied with all of the requirements of this program, the Licensing Authority will credit a license for quantities of sugar for which a Certificate of Use has been submitted in accordance with the provisions of § 1530.305 of this subpart, but such credit, if granted conditionally, will become final only when the Licensing Authority is satisfied that no refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS has been or will be claimed or received on the basis, or as a result, of the exportation of the polyhydric alcohol.

(c) The Licensing Authority may revoke any credit previously made to a license if the Licensing Authority determines, on the basis of evidence obtained after the credit was granted, that the licensee had not complied with all of the requirements of this subpart.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30866, July 8, 1991]

Foreign Agricultural Service, USDA

§ 1530.309

§ 1530.307 Replacement of sugars; substitution of sugars.

The sugar used in the production of polyhydric alcohols under this program need not be the identical sugar imported under the license. The licensee may substitute other sugar for sugar imported under the license or replace such imported sugar with other sugar.

[56 FR 30866, July 8, 1991]

§ 1530.308 Records.

(a) Each licensee requesting credit in accordance with § 1530.306(b) shall keep records to establish for all sugar imported, and for all polyhydric alcohol produced, under the provisions of this program:

(1) The quantity and identity of the sugar imported by the licensee under the provisions of this subpart, including the customs entry numbers;

(2) The quantity and description of the polyhydric alcohols manufactured and the date or inclusive dates of manufacture;

(3) The quantity of sugar actually used in the production (other than by distillation) of polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption; and

(4) If any polyhydric alcohols have been exported, the country of destination, foreign consignee, date of export, port, export carrier and any agent used in connection with the export and all documents relating to such exportation, including but not limited to any contract, invoice, bill of lading, dock receipt, ship's manifest, or copies thereof; and all drawback entries, if any, including all related documents, filed by the licensee or any other person for a refund, as drawback, of any customs duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.01, 1701.11.02, 1701.11.03, 1701.12.01, 1701.12.02, 1701.91.21, 1701.91.22, 1701.99.01, 1701.99.02, 1702.90.31, 1702.90.32, 1806.10.41, 1806.10.42, 2106.90.11, and 2106.90.12 of the HTS on the basis, or as a result, of the exportation of the polyhydric alcohol and the amount of any such refund paid.

(b) All records required by this section to be kept by a licensee shall be retained for at least 5 years after a li-

cense is credited for the production of the polyhydric alcohol.

(c) The licensee must, upon request, make the records covered by this section available for inspection and copying by the Licensing Authority or other appropriate official of the Federal Government.

(d) If, after inspection of the records, the Licensing Authority determines that such records are inadequate to establish that the sugar imported under the license was used for the sole purpose of producing (other than by distillation) polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption, or that drawback of duties on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS was not claimed or received on the basis, or as a result, of the exportation of the polyhydric alcohol, or that any other requirement of this program was complied with, the Licensing Authority may revoke credits granted for the appropriate quantity of sugar.

§ 1530.309 Enforcement.

(a) If at any time after receiving the proof of production of polyhydric alcohol described in § 1530.305 of this subpart, the Licensing Authority determines that the sugar entered under the license was not used for the sole purpose of producing (other than by distillation) polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption, and if the bond has been released under § 1530.303, the Licensing Authority may hold the licensee liable for the difference between the Number 11 contract price and the Number 14 contract price, per pound of raw sugar, in effect on the last market day before the date of entry of the sugar or the last market day before the end of the period during which production of polyhydric alcohol was required, whichever difference is greater, times the quantity of sugar that should have been, but was not, used in such production of such polyhydric alcohol. In the event no Number 11 contract price or Number 14 contract price is reported by

§ 1530.310

the New York Coffee, Sugar and Cocoa Exchange, for the relevant market day, the Licensing Authority may estimate such price as he or she deems appropriate.

(b) If at any time after receiving the licensee's certification that no refund, as drawback, of any duties paid on the importation of any sugars, syrups or molasses described in subheadings 1701.11.03, 1701.12.02, 1701.91.22, 1701.99.02, 1702.90.32, 1806.10.42, or 2106.90.12 of the HTS has been or will be claimed or received on the basis, or as a result, of the exportation of any polyhydric alcohol, the Licensing Authority determines that a refund of such customs duties has been claimed or received by the licensee or any other person, and if the bond has been released under § 1530.303, the Licensing Authority may hold the licensee liable for the difference between the Number 11 contract price and the Number 14 contract price, per pound of raw sugar, in effect on the last market day before the date of entry of the sugar or the last market day before the end of the period during which export was required, whichever difference is greater, times the quantity of sugar used in the production of such polyhydric alcohol. In the event no Number 11 contract price or Number 14 contract price is reported by the New York Coffee, Sugar and Cocoa Exchange for the relevant market day, the Licensing Authority may estimate such price as he or she deems appropriate.

(c) If at any time the Licensing Authority determines that a licensee has failed to comply with the requirements of this subpart, including the requirement of HTS subheading 1701.11.02 and of the relevant provisions of additional U.S. note 3, the Licensing Authority may, after notice to the licensee, suspend or revoke the license issued to the licensee under this program and may refuse to issue a license to that manufacturer.

[55 FR 41489, Oct. 12, 1990, as amended at 56 FR 30866, July 8, 1991]

§ 1530.310 Appeals.

(a) Any action or determination of the Licensing Authority under this subpart may be appealed to the Director, Import Policies and Trade Analysis

7 CFR Ch. XV (1–1–97 Edition)

Division, Foreign Agricultural Service (FAS), within 30 days from the date of notification. The appeal must be presented in writing and must specifically state any reason as to why such determination should not stand. The Director, Import Policies and Trade Analysis Division, FAS, will provide such person with an opportunity for an informal hearing on such matter.

(b) A further appeal from the final decision of the Director, Import Policies and Trade Analysis Division, FAS, may be made to the Administrator, FAS, within five business days of the notification of the decision of the Director, Import Policies and Trade Analysis Division, FAS.

§ 1530.311 Waivers.

Upon written application of the licensee, the Licensing Authority may extend the period for the production of polyhydric alcohols, may temporarily increase the maximum amount of the license, may extend the period for submitting proof of use, or may temporarily waive or modify any other requirement imposed by this subpart if such waiver or modification is necessary or appropriate under unusual, unforeseen or extraordinary circumstances and will not frustrate the purposes of this program and if compliance with the relevant provisions of HTS subheading 1701.11.02, additional U.S. note 3 is established to the Licensing Authority's satisfaction. the Licensing Authority may specify additional requirements or procedures in place of the requirements or procedures waived or modified.

§ 1530.312 Expiration of licenses.

(a) The licenses issued under this program shall expire upon written notice to the licensees by the Licensing Authority. The notice will state the date on which the licenses will expire and any other details applicable to the expiration of the licenses.

(b) If there have been no charges or credits on the license within 12 months of the date on which the license was issued, or any subsequent period of 18 months, the license may be deemed to have expired.

Foreign Agricultural Service, USDA

§ 1540.2

§ 1530.313 Paperwork Reduction Act assigned number.

The Office of Management and Budget has approved the information collection requirements in these regulations in accordance with 44 U.S.C. chapter 35 and OMB number 0551-0015 has been assigned.

§ 1530.314 Transitional provisions.

(a) All licenses issued to manufacturers prior to October 1, 1990, pursuant to the provisions of 7 CFR 1530.201, under the program for "Sugar for Production of Polyhydric Alcohol," are canceled effective October 9, 1990.

(b) Any manufacturer who, on September 30, 1990, held a license which had a balance of charges and credits other than zero and which is canceled pursuant to paragraph (a) of this section may be issued a new license upon such manufacturer's agreement to:

(1) Fully settle the balance outstanding on such previous license, by bringing such balance to zero;

(2) Comply with all the provisions of this subpart, subheading 1701.11.02 of the HTS, and additional U.S. note 3; and

(3) Comply with any terms, conditions and procedures imposed by the Licensing Authority in order to assure an orderly transition.

(c) During the transitional period between October 1, 1990, and the promulgation of a final rule to replace the interim rule issued on October 9, 1990, the Licensing Authority may modify or waive any requirement of this subpart, including the requirements that a manufacturer make a written application for a license prior to the issuance of the license and make a written application for a waiver under § 1530.210 of this subpart, if the Licensing Authority determines such modification or waiver is necessary or appropriate to assure an orderly transition and will not frustrate the purposes of this program.

Subpart A—Emergency Relief From Duty-Free Imports of Perishable Products

AUTHORITY: Sec. 213(f), Pub. L. 98-67, 97 Stat. 391 (19 U.S.C. 2703(f)); 5 U.S.C. 301.

SOURCE: 49 FR 22265, May 29, 1984, unless otherwise noted.

CROSS REFERENCE: For United States International Trade Commission regulations on investigations of import injury and the rules pertaining to the filing of a section 201 petition, see 19 CFR part 206.

§ 1540.1 Applicability of subpart.

This subpart applies to requests for emergency relief from duty-free imports of perishable products filed with the Department of Agriculture under section 213(f) of the Caribbean Basin Economic Recovery Act of 1983, title II of Pub. L. 98-67, 97 Stat. 384 (19 U.S.C. 2701 *et seq.*) (the Act).

§ 1540.2 Definitions.

(a) *Perishable product* means:

§ 1540.3

7 CFR Ch. XV (1–1–97 Edition)

(1) Live plants provided for in subpart A of part 6 of schedule 1 of the Tariff Schedules of the United States (TSUS);

(2) Fresh or chilled vegetables provided for in items 135.10 through 138.42 of the TSUS;

(3) Fresh mushrooms provided for in item 144.10 of the TSUS;

(4) Fresh fruit provided for in items 146.10, 146.20, 146.30, 146.50 through 146.62, 146.90, 146.91, 147.03 through 147.33, 147.50 through 149.21 and 149.50 of the TSUS;

(5) Fresh cut flowers provided for in items 192.17, 192.18, and 192.21 of the TSUS; and

(6) Concentrated citrus fruit juice provided for in items 165.25 and 165.35 of the TSUS.

(b) *Beneficiary country* means any country listed in section 212(b) of the Act with respect to which there is in effect a proclamation by the President designating such country as a beneficiary country for purposes of the Act.

§ 1540.3 Who may file request.

A request under this subpart may be filed by an entity, including a firm, or group or workers, trade association, or certified or recognized union which is representative of a domestic industry producing a perishable product like or directly competitive with a perishable product that such entity claims is being imported into the United States duty-free under the provisions of the Act from a beneficiary country(ies) in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to such domestic industry.

§ 1540.4 Contents of request.

A request for emergency action under section 213(f) of the Act shall be submitted in duplicate to the Administrator, Foreign Agricultural Service, United States Department of Agriculture, Washington, DC 20250. Such requests shall be supported by appropriate information and data and shall include to the extent possible:

(a) A description of the imported perishable product(s) allegedly causing, or threatening to cause, serious injury;

(b) The beneficiary country(ies) of origin of the allegedly injurious imports;

(c) Data showing that the perishable product allegedly causing, or threatening to cause, serious injury is being imported from the designated beneficiary country(ies) in increased quantities as compared with imports of the same product from the designated beneficiary country(ies) during a previous representative period of time (including a statement of why the period used should be considered to be representative);

(d) Evidence of serious injury or threat thereof to the domestic industry substantially caused by the increased quantities of imports of the product from the beneficiary country(ies); and

(e) A statement indicating why emergency action would be warranted under section 213(f) of the Act (including all available evidence that the injury caused by the increased quantities of imports from the beneficiary country(ies) would be relieved by the suspension of the duty-free treatment accorded under the Act).

A copy of the petition and the supporting evidence filed with the United States International Trade Commission under section 201 of the Trade Act of 1974, as amended, must be provided with the request for emergency action.

§ 1540.5 Submission of recommendations.

If the Secretary has reason to believe that the perishable product which is the subject of a petition under § 1540.4 of this subpart is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing a perishable product like or directly competitive with the imported perishable product and that emergency action is warranted, the Secretary, within 14 days after the filing of the petition under § 1540.4 of this subpart, shall recommend to the President that the President take emergency action. If the Secretary determines not to recommend the imposition of emergency action, the Secretary shall publish a notice of such determination and will so advise the petitioner within 14 days after the filing of the petition.

Foreign Agricultural Service, USDA

§ 1540.23

§ 1540.6 Information.

Persons desiring information from the Department of Agriculture regarding the Department's implementation of section 213(f) of the Act should address such inquiries to the Administrator, Foreign Agricultural Service, United States Department of Agriculture, Washington, DC 20250.

§ 1540.7 Paperwork Reduction Act assigned number.

The Office of Management and Budget has approved the information collection requirements contained in these regulations in accordance with 44 U.S.C. chapter 25, and OMB number 0551-0018 has been assigned.

Subpart B—Emergency Relief From Certain Perishable Products Imported From Israel

AUTHORITY: Sec. 404, Pub. L. 98-573, 98 Stat. 3016, as amended (19 U.S.C. 2112 note); 5 U.S.C. 301.

SOURCE: 50 FR 43692, Oct. 29, 1985, unless otherwise noted.

CROSS REFERENCE: For U.S. International Trade Commission regulations concerning investigations of import injury and the rules pertaining to the filing of a section 201 petition, see 19 CFR part 206.

§ 1540.20 Applicability of subpart.

This subpart applies to requests filed with the Department of Agriculture under section 404 of the Trade and Tariff Act of 1984, Pub. L. 98-573, for emergency relief from imports of certain perishable products from Israel entering the United States at a reduced rate of duty or duty-free pursuant to a trade agreement between the United States and Israel entered into under section 102(b)(1) of the Trade Act of 1974, as amended.

§ 1540.21 Definition.

Perishable product means:

(a) Live plants provided for in subpart A of part 6 of schedule 1 of the 1985 Tariff Schedules of the United States (the "TSUS");

(b) Fresh or chilled vegetables provided for in items 135.03 through 138.46 of the TSUS;

(c) Fresh mushrooms provided for in item 144.10 of the TSUS;

(d) Fresh fruits provided for in items 146.10, 146.20, 146.30, 146.50 through 146.62, 146.90, 146.91, 147.03 through 147.44, 147.50 through 149.21 and 149.50 of the TSUS;

(e) Fresh cut flowers provided for in items 192.17, 192.18, and 192.21 of the TSUS; and

(f) Concentrated citrus fruit juice provided for in items 165.25, 165.29 and 165.36 of the TSUS.

§ 1540.22 Who may file request.

A request under this subpart may be filed by an entity, including a firm, or group or workers, trade association, or certified or recognized union which is representative of a domestic industry producing a perishable product like or directly competitive with a perishable product that such entity claims is being imported from Israel into the United States at a reduced duty or duty-free under the provisions of a trade agreement between the United States and Israel entered into under section 102(b)(1) of the Trade Act of 1974, as amended, in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to such domestic industry.

§ 1540.23 Contents of request.

A request for emergency action under section 404 of the Trade and Tariff Act of 1984 shall be submitted in duplicate to the Administrator, Foreign Agricultural Service, United States Department of Agriculture, Washington, DC 20250. Such request shall be supported by appropriate information and data and shall include to the extent possible:

(a) A description of the imported perishable product(s) allegedly causing, or threatening to cause, serious injury;

(b) Data showing that the perishable product allegedly causing, or threatening to cause, serious injury is being imported from Israel in increased quantities as compared with imports of the same product from Israel during a previous representative period of time (including a statement of why the period selected by the petitioner should be considered to be representative);

(c) Evidence of serious injury or threat thereof to the domestic industry substantially caused by the increased

§ 1540.24

quantities of imports of the product from Israel; and

(d) A statement indicating why emergency action would be warranted under section 404 (including all available evidence that the injury caused by the increased quantities of imports from Israel would be relieved by the withdrawal of the reduction of the duty or elimination of the duty-free treatment provided to the product under the trade agreement). A copy of the petition and the supporting evidence filed with the United States International Trade Commission under section 201 of the Trade Act of 1974, as amended, must be provided with the request for emergency action.

§ 1540.24 Determination of the Secretary of Agriculture.

If the Secretary of Agriculture has reason to believe that the perishable product(s) which is the subject of a petition under this subpart is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing a perishable product like or directly competitive with the imported perishable product and that emergency action is warranted, the Secretary, within 14 days after the filing of the petition under § 1540.23 shall recommend to the President that the President take emergency action. If the Secretary determines not to recommend the imposition of emergency action, the Secretary, within 14 days after the filing of the petition, will publish in the FEDERAL REGISTER a notice of such determination and will so advise the petitioner.

§ 1540.25 Information.

Persons desiring information from the Department of Agriculture regarding the Department's implementation of section 404 of the Trade and Tariff Act of 1984 should address such inquiries to the Administrator, Foreign Agricultural Service, United States Department of Agriculture, Washington, DC 20250.

7 CFR Ch. XV (1–1–97 Edition)

§ 1540.26 Paperwork Reduction Act assigned number.

The Office of Management and Budget has approved the information collection requirements contained in these regulations in accordance with 44 U.S.C. chapter 25, and OMB number 0551–0023 has been assigned.

Subpart C—Emergency Relief From Duty-Free Imports of Perishable Products From Certain Andean Countries

AUTHORITY: Title II, sec. 204(e), Pub. L. 102–182, 105 Stat. 1239 (19 U.S.C. 3203(e)); 5 U.S.C. 301.

SOURCE: 58 FR 16104, Mar. 25, 1993, unless otherwise noted.

CROSS REFERENCE: For United States International Trade Commission regulations on investigations of import injury and the rules pertaining to the filing of a section 201 petition, see 19 CFR part 206.

§ 1540.40 Applicability of subpart.

This subpart applies to requests for emergency relief from duty-free imports of perishable products filed with the Department of Agriculture under section 204(e) of the Andean Trade Preference Act, title II of Public Law 102–182, 105 Stat. 1236 (19 U.S.C. 3201 *et seq.*) (the “Act”).

§ 1540.41 Definitions.

(a) *Perishable product* means:

(1) Live plants and fresh cut flowers provided for in chapter 6 of the Harmonized Tariff Schedule (HTS);

(2) Fresh or chilled vegetables provided in heading 0701 through 0709 (except subheading 0709.52.00) and heading 0714 of the HTS;

(3) Fresh fruit provided for in subheadings 0804.20 through 0810.90 (except citrons of subheadings 0805.90.00, tamarinds and kiwi fruit of subheading 0810.90.20, and cashew apples, mameyes colorados, sapodillas, soursops and sweetsops of subheading 0810.90.40) of the HTS; or

(4) Concentrated citrus fruit juice provided for in subheadings 2009.11.00, 2009.19.40, 2009.20.40, 2009.30.20, and 2009.30.60 of the HTS.

Foreign Agricultural Service, USDA

§ 1540.45

(b) *Beneficiary country* means any country listed in subsection 203(b)(1) of the Act with respect to which there is in effect a proclamation by the President designating such country as a beneficiary country for purposes of the Act.

§ 1540.42 Who may file request.

A request under this subpart may be filed by an entity, including a firm, or group of workers, trade association, or certified or recognized union which is representative of a domestic industry producing a perishable product like or directly competitive with a perishable product that such entity claims is being imported into the United States duty-free under the provisions of the Act from a beneficiary country(ies) in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to such domestic industry.

§ 1540.43 Contents of request.

(a) A request for emergency action under section 204(e) of the Act shall be submitted in duplicate to the Administrator, Foreign Agricultural Service, United States Department of Agriculture, Washington, DC 20250. Such request shall be supported by appropriate information and data and shall include to the extent possible:

(1) A description of the imported perishable product(s) allegedly causing, or threatening to cause, serious injury;

(2) The beneficiary country(ies) of origin of the allegedly injurious imports;

(3) Data showing that the perishable product allegedly causing, or threatening to cause, serious injury is being imported from the designated beneficiary country(ies) in increased quantities as compared with imports of the same product from the designated beneficiary country(ies) during a previous representative period of time (including a statement of why the period used should be considered to be representative);

(4) Evidence of serious injury or threat thereof to the domestic industry substantially caused by the increased quantities of imports of the product from the beneficiary country(ies); and

(5) A statement indicating why emergency action would be warranted under

section 204(e) of the Act (including all available evidence that the injury caused by the increased quantities of imports from the beneficiary country(ies) would be relieved by the suspension of duty-free treatment accorded under the Act).

(b) A copy of the petition and the supporting evidence filed with the United States International Trade Commission under Section 201 of the Trade Act of 1974, as amended, must be provided with the request for emergency action.

§ 1540.44 Submission of recommendations by the Secretary of Agriculture.

If the Secretary has reason to believe that the perishable product(s) which is the subject of a petition under § 1504.43 of this subpart is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing a perishable product like or directly competitive with the imported perishable product and that emergency action is warranted, the Secretary, within 14 days after the filing of the petition under § 1540.43 of this subpart, shall recommend to the President that the President take emergency action. If the Secretary determines not to recommend the imposition of emergency action, the Secretary within 14 days after the filing of the petition shall publish a notice of such determination and so advise the petitioner.

§ 1540.45 Information.

Persons desiring information from the Department of Agriculture regarding the Department's implementation of section 204(e) of the Act should address such inquiries to the Administrator, Foreign Agricultural Service, United States Department of Agriculture, Washington, DC 20250. Issued at Washington, DC this 19th day of March, 1993.

SOURCE: 54 FR 37784, Sept. 13, 1989, unless otherwise noted.

§ 1550.1 Purpose and scope.

(a) This part sets forth policies and requirements with respect to the conduct by the FAS of programs utilizing public or private entities in the United States to help develop foreign markets for United States agricultural commodities on a mutually benefiting basis. As far as practicable, FAS relies upon representatives of the private U.S. agricultural sector to carry out market development activities through cooperative agreements.

(b) These activities include entering into contracts pursuant to which FAS procures, for a stated consideration, property and services needed in developing markets for U.S. agricultural commodities.

§ 1550.2 Definitions.

(a) *Agricultural commodities* includes agricultural commodities and products thereof.

(b) *Affiliate or affiliated organization* means any partnership, association, company, corporation, trust, or any other legal entity in which the program participant has any investment other than an investment in any mutual fund.

(c) *Cooperator* means an entity entering into a Market Development Project Agreement.

(d) *Export Incentive Program Agreements* mean cooperative agreements between FAS and a private United States entity for the purpose of maintaining, expanding or creating foreign markets

7 CFR Ch. XV (1–1–97 Edition)

for United States agricultural commodities through the promotion of brand-identified agricultural commodities.

(e) *FAS* means the Foreign Agricultural Service of the United States Department of Agriculture.

(f) *Incentive payment* means FAS reimbursement for eligible promotion costs incurred under the terms of an Export Incentive Program Agreement.

(g) *Market Development Project Agreements* mean cooperative agreements between FAS and United States agricultural trade associations or associations of State Departments of Agriculture for the purpose of maximizing sales in foreign markets of U.S. agricultural commodities. Activities to be undertaken are intended to promote specific commodities on a generic or brand-identified basis, or through programs which include both elements.

(h) *Participant or program participant* means any entity entering into an agreement within the scope of this part 1550.

(i) *Project funds* are funds made available by FAS to program participants.

(j) *Sales teams* are teams engaged in activities intended to result in specific sales by team members.

(k) *Trade teams* are teams engaged in activities to promote the interests of the entire agricultural sector represented by the program participant.

§ 1550.3 Market Development Project Agreements.

(a) *Eligible Organizations.* In selecting trade and Agricultural groups as co-operators, representative nonprofit U.S. agricultural trade organizations will be used to the maximum extent possible. Organizations selected should represent the commodity being promoted on the broadest possible basis, with priority given to those which are industry-wide or nationwide in membership and scope. Cooperators must demonstrate an ability to provide U.S.-based staff capable of developing, supervising, and carrying out projects overseas, and be willing and able to contribute resources to a joint project.

(b) *Use of Third Parties.* A Cooperator that enters into a Market Development Project Agreement may undertake market development activities directly

Foreign Agricultural Service, USDA

§ 1550.5

or through a third party provided that such Cooperator remains responsible for the activities of the third party.

(c) *Contributions.* Cooperators are expected to contribute funds or make in-kind contributions towards completion of approved market development projects. Contributions by third parties will be accepted as partially satisfying the contribution obligation of the Cooperator.

(d) *Project Funds.* FAS will make funds available, up to the amount stated in the Market Development Project Agreement, to reimburse Cooperators for expenditures incurred in conducting activities authorized by the agreement and budgeted in a marketing plan approved in advance by FAS. Funds will be paid in United States dollars unless the Cooperator and FAS specifically agree that payment will be made in foreign currencies.

(e) *Consideration of Projects.* Market Development Project Agreements will be entered into by FAS only if it is determined that such agreements could contribute to the effective creation, expansion, or maintenance of foreign markets for U.S. agricultural commodities based on available supplies of those commodities for export and international market conditions. Marketing plans will be required from organizations selected to participate in Market Development Project Agreements and will serve as a basis for the expenditure of funds committed to Market Development Project Agreements. Marketing plans will be reviewed according to the following criteria:

(1) The market potential for the commodities covered in the markets identified for promotional effort and the identification of conditions affecting the level of U.S. exports which could be influenced by the projects proposed;

(2) The extent and complexity of activities proposed in relation to each Cooperator's prior export market development experience and U.S.-based staff resources;

(3) The likelihood of these activities influencing conditions affecting the level of U.S. exports.

§ 1550.4 Export Incentive Program Agreements.

(a) *Eligible Organizations.* Export Incentive Program (EIP) agreements will be entered into with private U.S. entities.

(b) *Use of Third Parties.* An entity that enters into an Export Incentive Program Agreement may undertake market development activities directly or through a third party provided such entity remains responsible for the activity.

(c) *Reimbursement.* After submission of a claim for an incentive payment, FAS will reimburse a percentage of eligible promotion costs defined in the Export Incentive Program Agreement, up to the amount stated in the Agreement, to carry out the purposes of the project. Such a claim will be submitted on a marketing year basis or at such other time as may be agreed by FAS. The amount of funds to be paid by FAS on each claim will be specified in the Agreement and will be based upon either a stated percentage of the promotional expenditures claimed, volume of exports over a stated period, or a combination of both. Funds will be paid in U.S. dollars only.

(d) *Consideration of Projects.* Export Incentive Program Agreements will be entered into by FAS only if it is determined that such agreements with private firms could contribute to the effective creation, expansion, or maintenance of foreign markets for the commodities concerned. Project proposals will be reviewed in relation to market conditions in the countries where activities are proposed, and in relation to the proposing firm's prior experience in exporting and in market promotion activities abroad, based upon the same criteria set forth in § 1550.3(e)(1)–(3).

§ 1550.5 Program participation and benefits.

(a) *Scope.* This section establishes requirements applicable only to participation in Market Development Project Agreements and any other agreement with FAS that specifically incorporates the provisions of this part.

(b) *General.* It is the policy of FAS to insure that the benefits generated by agreements are as broadly distributed throughout the relevant agricultural

§ 1550.6

7 CFR Ch. XV (1–1–97 Edition)

sector as feasible and, particularly, that no program participant derive an unfair advantage or benefit from activities conducted pursuant to the agreement, whether funded with project funds or industry contributions.

(c) *Industry Participation.* When required by FAS, program participants shall promptly furnish to FAS for approval its criteria for the selection of U.S. agricultural industry representatives to participate in activities conducted pursuant to the agreement such as trade teams, sales teams, and trade fairs, and its criteria for the selection of firms to participate in U.S. brand-identified promotions. Such criteria must ensure participation on an equitable basis by a representative cross section of the relevant U.S. agricultural industry. If FAS requests submission of criteria for approval, the program participant shall not use criteria disapproved by FAS after the program participant has been notified of FAS's disapproval.

(d) *Distribution of Information.* All program participants shall provide, on a timely basis, upon request of any entity in the United States, other than a representative of a foreign government, any and all data developed and produced with project funds or contributions. Any fee charged in connection therewith may not exceed the costs incurred in assembling, duplicating and distributing the requested material.

(e) *Export Activities and Related Services.* (1) Neither program participants nor their affiliated organizations shall, during the term of the agreement, make export sales of agricultural commodities of the kind which are promoted, in whole or in part, with project funds.

(2) Neither the program participants nor affiliated organizations may assess fees for services provided to exporters in facilitating an export sale if the promotional activities intended to directly result in that specific export sale are supported, in whole or in part, by project funds. This paragraph applies to activities such as those involving discussions with potential buyers or the solicitation of specific sales including activities performed by sales

teams and performed through trade fairs rather than activities of a more general promotional nature. This paragraph does not apply to checkoffs or membership dues based on commodity sales, when such assessments are a condition of membership in the participating organization.

(3) Participants in approved program activities shall not use the activities to promote private self-interests or conduct private business, except as members of sales teams or as part of a U.S. brand-identified promotion when such activities are specifically approved by FAS.

§ 1550.6 Compliance with program requirements.

(a) Within 30 days after the effective date of these regulations, program participants shall submit a written statement to the Administrator, FAS, that neither they, nor their affiliated organizations, will make export sales of agricultural commodities promoted, in whole or in part, with project funds during the term of any agreement between the program participant and FAS within the scope of § 1550.5. FAS may from time to time require program participants to submit certifications as to export sales for purposes of this part.

(b) In the event of noncompliance with any provision of these regulations, FAS may disallow a claim submitted under an agreement for expenses incurred after the effective date of these regulations or terminate the agreement in addition to any other remedy available to FAS.

§ 1550.7 Paperwork Reduction Act assigned number.

Information collection requirements contained in these regulations have been submitted to OMB for approval under control number 0551–0026. However, these requirements are not effective until final clearance is received from OMB.

PART 1560—PROCEDURES TO MONITOR CANADIAN FRESH FRUIT AND VEGETABLE IMPORTS

Sec.
1560.1 Scope.

Foreign Agricultural Service, USDA

§ 1560.2

1560.2 Definitions.

1560.3 Determination of fresh fruit or vegetable.

1560.4 Calculation of Data to Support Imposition of Temporary Duty.

1560.5 Calculation of Data to Support Removal of Temporary Duty.

AUTHORITY: Secs. 105 and 301(a) of the United States-Canada Free-Trade Agreement Implementation Act of 1988, Pub. L. 100-449 (102 Stat. 1855 and 1865-67).

SOURCE: 54 FR 1327, Jan. 13, 1989, unless otherwise noted.

§ 1560.1 Scope.

This part outlines the procedures that will be used by the Administrator of the Foreign Agricultural Service to monitor and inform the Secretary of Agriculture of data regarding the importation of fresh fruits and vegetables from Canada.

§ 1560.2 Definitions.

The following definitions shall be applicable to this part:

(a) *Administrator* means the Administrator of the Foreign Agricultural Service, United States Department of Agriculture.

(b) *Average Monthly Import Price* means the average unit value for all shipments of a particular Canadian fresh fruit or vegetable imported into the United States from Canada during a particular calendar month based on official data from the U.S. Customs Service and/or the Bureau of Census, and shall be calculated by dividing the total value of the fresh fruit or vegetable imported in that month by the total quantity of the fresh fruit or vegetable imported in that month.

(c) *Average Planted Acreage* means the average of the annual planted acreage in the U.S. for a particular fresh fruit or vegetable for the preceding five years excluding the years with the highest and lowest acreages based on available data from agencies within the United States Department of Agriculture and data from appropriate state agencies, as required.

(d) *Canadian fresh fruit or vegetable* means a fresh fruit or vegetable that is a product of Canada as determined in accordance with the rules of origin set forth in section 202 of the U.S.-Canada Free-Trade Agreement Implementation Act of 1988.

(e) *Corresponding Five-Year Average Monthly Import Price* for a particular day means the average import price of a Canadian fresh fruit or vegetable imported into the United States from Canada, for the calendar month in which that day occurs, for that month in each of the preceding 5 years, excluding the years with the highest and lowest monthly averages.

(f) *F.O.B. Point of Shipment Price in Canada* means the daily average of prices of a particular Canadian fresh fruit or vegetable imported into the United States from Canada that are reported to the U.S. Customs Service at the U.S. border as part of the official documentation accompanying such shipments less freight costs where applicable.

(g) *Fresh Fruit or Vegetable* means a fruit or vegetable determined in accordance with § 1560.3 within one of the HS headings.

(h) *HS heading* means any of the following tariff headings of the Harmonized System (HS) as modified by the description for each heading:

HS tariff heading	Description
07.01	Potatoes, fresh or chilled.
07.02	Tomatoes, fresh or chilled.
07.03	Onions, shallots, garlic, leeks, and other alliacious vegetables, fresh or chilled.
07.04	Cabbages, cauliflowers, kohlrabi, kale and similar edible brassicas, fresh or chilled.
07.05	Lettuce (<i>lactuca sativa</i>) and chicory (<i>cichorium spp.</i>), fresh or chilled.
07.06	Carrots, salad beets or beetroot, salsify, celeriac, radishes and similar edible roots (excluding turnips), fresh or chilled.
07.07	Cucumbers and gherkins, fresh or chilled.
07.08	Leguminous vegetables, shelled or unshelled, fresh or chilled.
07.09	Other vegetables (excluding truffles), fresh or chilled.
08.06.10	Grapes, fresh.
08.08.20	Pears and quinces, fresh.
08.09	Apricots, cherries, peaches (including nectarines), plums and sloes, fresh.
08.10	Other fruit (excluding cranberries and blueberries), fresh.

(i) *Import Price* means the unit value based on data available from the U.S. Customs Service of a particular Canadian fresh fruit or vegetable imported into the U.S. from Canada taking into account any other relevant data, as necessary.

(j) *Secretary* means the Secretary of Agriculture.

§ 1560.3

(k) *United States* means the United States Customs Territory which includes the fifty states, the District of Columbia and Puerto Rico.

(l) *Wine Grape* means grapes of *labrusca*, *vinifera* or hybrid *vinifera* varieties used for making wine.

(m) *Working Day* means a day which falls on a Monday through Friday, excluding holidays observed by the United States Government and days in which the U.S. Customs Service is not operating.

§ 1560.3 Determination of fresh fruit or vegetable.

The specific group of articles that will be monitored as a particular fresh fruit or vegetable will be determined based on the practicability of monitoring at the eight digit subheading level of the Harmonized Tariff Schedule of the United States. The determination of practicability will be made by the Administrator taking into account: (a) The availability of reliable volume and price data on imports from Canada and data on U.S. planted acreage, (b) market differentiation for the group of articles, and (c) such other factors as the Administrator determines to be appropriate.

§ 1560.4 Calculation of data to support imposition of temporary duty.

The Administrator will inform the Secretary when the following conditions are met with respect to a particular fresh fruit or vegetable imported into the United States from Canada:

(a) If for each of five consecutive working days the import price of the fresh fruit or vegetable is below ninety percent of the corresponding five-year average monthly import price for such fresh fruit or vegetable excluding the years with the highest and lowest corresponding monthly import price; and

(b) The planted acreage in the United States for such fresh fruit or vegetable based on the most recent data available is no higher than the average planted acreage over the preceding five years excluding the years with the highest and lowest planted acreages. For the purposes of calculating any planted acreage increase attributed directly to a reduction in wine grape

7 CFR Ch. XV (1–1–97 Edition)

planted acreage existing on October 4, 1987 shall be excluded.

§ 1560.5 Calculation of data to support removal of temporary duty.

During the time a temporary duty on a particular fresh fruit or vegetable is imposed pursuant to section 301(a) of the United States-Canada Free-Trade Agreement Implementation Act of 1988, the Administrator will inform the Secretary if the F.O.B. point of shipment price in Canada of such fresh fruit or vegetable exceeds, for five consecutive working days, ninety percent of the corresponding five-year average monthly import price excluding the years with the highest and lowest average corresponding monthly import price, adjusted to an F.O.B. point of shipment price, if necessary, for that fresh fruit or vegetable.

PART 1570—EXPORT BONUS PROGRAMS

Subpart A—Sunflowerseed Oil Assistance Program and Cottonseed Oil Assistance Program Criteria

Sec.

1570.10 General statement.

1570.20 Criteria.

Subpart B—SOAP and COAP Drawback Certification

1570.1100 Drawback certification.

SOURCE: 56 FR 42223, Aug. 27, 1991, unless otherwise noted.

Subpart A—Sunflowerseed Oil Assistance Program and Cottonseed Oil Assistance Program Criteria

AUTHORITY: 7 U.S.C. 5663.

§ 1570.10 General statement.

This subpart sets forth the criteria to be considered in evaluating and approving proposals for initiatives to facilitate export sales under the Sunflowerseed Oil Assistance Program (SOAP) and Cottonseed Oil Assistance Program (COAP) administered by the Foreign Agricultural Service (FAS). These criteria are interrelated and will

Foreign Agricultural Service, USDA

§ 1570.1100

be considered together in order to select eligible countries for SOAP and COAP initiatives which will best meet the programs' objective. The objective of the programs is to encourage the sale of additional quantities of sunflowerseed oil and cottonseed oil in world markets at competitive prices. Under the SOAP and the COAP, bonuses are made available by FAS to enable exporters to meet prevailing world prices for sunflowerseed oil and cottonseed oil in targeted destinations. In the operation of the SOAP and the COAP, FAS will make reasonable efforts to avoid the displacement of usual marketings of U.S. agricultural commodities.

§ 1570.20 Criteria.

The criteria considered by FAS in reviewing proposals for SOAP and COAP initiatives will include, but not be limited to, the following:

(a) The expected contribution which initiatives will make toward realizing U.S. agricultural export goals and, in particular, in developing, expanding, or maintaining markets for U.S. sunflowerseed and/or cottonseed oil;

(b) The subsidy requirements of proposed initiatives in relation to the sums made available to operate the programs in any given fiscal year; and

(c) The likelihood that sales facilitated by initiatives would have the unintended effect of displacing normal commercial sales of sunflowerseed and/or cottonseed oil.

Subpart B—SOAP and COAP Drawback Certification

AUTHORITY: 7 U.S.C. 5676.

§ 1570.1100 Drawback certification.

An offer submitted by an exporter to FAS for an export bonus under the SOAP or the COAP must contain, in addition to any other information required by FAS, a certification stating the following: "None of the eligible commodity (sunflowerseed oil and/or cottonseed oil) has been or will be used as the basis for a claim of a refund, as drawback, pursuant to section 313 of the Tariff Act of 1930 (19 U.S.C. 1313) of any duty, tax, or fee imposed under Federal law on an imported commodity or product." This certification must be signed by the exporter, if the exporter is an individual, or by a partner or officer of the exporter, if the exporter is a partnership or a corporation, respectively. FAS will reject any offer that does not contain the prescribed certification.

AUTHORITY: 7 U.S.C. 941 *et seq.*; Pub. L. 103-354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

SOURCE: 56 FR 49134, Sept. 27, 1991, unless otherwise noted.

Meetings of the Board of Directors of the Rural Telephone Bank

§ 1600.1 General.

The purpose of this part is to effectuate the provisions of the Government in the Sunshine Act. This part applies to the deliberations of a quorum of the Directors of the Bank required to take action on behalf of the Bank where such deliberations determine or result in the joint conduct or disposition of official Bank business. Any deliberation to which this part applies is hereinafter in this part referred to as a meeting of the Board of Directors.

§ 1600.2 Definitions.

As used in this part:

Board means Board of Directors of the Rural Telephone Bank (Bank).

Director means an individual who is a member of the Board.

Legal Counsel means the legal counsel of the Bank.

Meeting means the deliberations (including those conducted by conference telephone call or by any other method) among a quorum of the Directors, where such deliberations determine or result in joint conduct of official business of the Board. For purposes of this part, each item on the agenda of a meeting is considered a meeting or a portion of a meeting. To the extent that the discussions do not result in the beginning of deliberations or

achieve a consensus on a matter of official agency business or effectively predetermine official actions, the term *Meeting* does not include:

(1) Deliberations to determine whether a meeting or portions of a meeting will be open or closed or whether information pertaining to closed meetings will be disclosed;

(2) Calling a meeting at a date earlier than announced as provided in § 1600.5;

(3) Changing the subject matter of a publicly announced meeting as provided in § 1600.5;

(4) Disposition of Board business by circulation of materials to individual Board members;

(5) Staff briefings of Board members;

(6) Informal background discussions among Board members and staff which clarify issues and expose varying views; or

(7) Sessions with individuals from outside the Bank where Board members listen to a presentation and may elicit additional information.

Open to public observation means the right of any member of the public to attend and observe, but not participate or interfere in any way in an open meeting of the Board.

§ 1600.3 Open meetings.

(a) Except as provided for in § 1600.6 every portion of every meeting of the Board shall be open to public observation. Observation does not include participation or disruptive conduct by observers, and persons engaging in such conduct will be removed from the meeting. Documents being considered at meetings of the Board may be obtained subject to the exemptions set forth in § 1600.8.

(b) Board members shall not jointly conduct or dispose of official Board business other than in accordance with this part.

(c) The Secretary of the Board shall be responsible for assuring that ample space, sufficient visibility, and adequate acoustics are provided for public observation of meetings of the Board.

§ 1600.4 Scheduling of meetings.

A decision to hold a meeting of the Board should be made as provided in the bylaws of the Bank and at least ten days prior to the scheduled meeting

Rural Telephone Bank, USDA

§ 1600.6

date in order for the Secretary of the Bank to give the public notice required by § 1600.5. Special meetings of the Board may be held on less than ten days notice if a majority of the Board determines by a recorded vote that Bank business requires that the special meeting be held on less than ten days notice. After public announcement of a meeting of the Board under the provisions of § 1600.5, the subject matter thereof, or the determination to open or close a meeting, or portion thereof, may only be changed if a majority of the Directors determines by a recorded vote that business so requires and that no earlier announcement of the change is possible.

§ 1600.5 Public announcement of meetings.

(a) Except as otherwise provided in this section, public announcement of open meetings and meetings or portions thereof closed under § 1600.7 will be made at least seven days in advance of each meeting. Except to the extent that such information is determined to be exempt from disclosure under § 1600.6, each such public announcement will state the time, place, and subject matter of the meeting, whether it is to be open or closed to the public, and the name and telephone number of the official designated to respond to requests for information about the meeting. Each such announcement shall be submitted for publication in the FEDERAL REGISTER. Copies of the announcement shall also be mailed to holders of Class B and Class C Bank stock.

(b) If a meeting is closed, the Board may omit from the announcement information usually included, if and to the extent that it finds that disclosure would be likely to have any of the consequences listed in § 1600.6.

(c) Where a majority of the Board members determine by recorded vote that Bank business requires that a meeting be called on less than ten days notice, public announcement shall be made at the earliest practicable time. Such announcement will state the time, place, and the subject matter of the meeting, whether it is to be open or closed to the public, and the name and telephone number of the official des-

ignated to respond to requests for information about the meeting.

(d) The time or place of a meeting may be changed following the public announcement required by paragraph (a) of this section only if the Secretary publicly announces such change at the earliest practicable time. The subject matter of a meeting, or the determination of the Board to open or close a meeting, or portion of a meeting, to the public, may be changed following the public announcement required by this section only if:

(1) A majority of the Directors determines by a recorded vote that business so requires and that no earlier announcement of the change was possible; and

(2) The Secretary publicly announces such change and the vote of each Director upon such change at the earliest practicable time.

(e) The earliest practicable time, as used in this subsection, means as soon as possible, which should in few, if any, instances be later than the commencement of the meeting or portion in question.

(f) Each person interested in attending an open meeting of the Board should notify the Assistant Secretary of the Board at least one business day prior to the open meeting of their intention to attend the meeting. Any person who fails to do so may not be accommodated if there is insufficient space in the meeting room.

§ 1600.6 Bases for closing a meeting to the public.

(a) A portion or portions of a Board meeting may be closed to the public and any information pertaining to such meeting otherwise required by § 1600.3 to be disclosed to the public may be withheld, where the Board determines that public disclosure of information to be discussed at such meetings is likely to:

(1) Disclose matters that are:

(i) Specifically authorized under criteria established by an Executive Order to be kept secret in the interests of national defense or foreign policy; and

(ii) In fact properly classified pursuant to such Executive Order.

(2) Relate solely to the internal personnel rules and practices of the Bank;

§ 1600.7

7 CFR Ch. XVI (1–1–97 Edition)

(3) Disclose matters specifically exempted from disclosure by statute (other than the Freedom of Information Act, 5 U.S.C. 552), provided that such statute:

(i) Requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue; or

(ii) Establishes particular criteria for withholding or refers to particular types of matters to be withheld.

(4) Disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Involve accusing any person of a crime, or formally censuring any person;

(6) Disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;

(7) Disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would:

(i) Interfere with enforcement proceedings;

(ii) Deprive a person of a right to a fair trial or to an impartial adjudication;

(iii) Constitute an unwarranted invasion of personal privacy;

(iv) Disclose the identity of a confidential source, and, in the case of a record compiled by a criminal enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source;

(v) Disclose investigative techniques and procedures; or

(vi) Endanger the life or physical safety of law enforcement personnel.

(8) Disclose information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of the Bank or any other agency responsible for the regulation or supervision of financial institutions;

(9) Disclose information the premature disclosure of which would be likely to significantly frustrate imple-

mentation of a proposed action of the Board or of another agency, except that this shall not apply in any instance where the content or nature of the proposed action has already been disclosed to the public or where the Board is required by law to make such disclosure on its own initiative prior to taking final action on such proposal; or

(10) Specifically concern the Board's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the Board of a particular case of formal agency adjudication pursuant to the procedures in 5 U.S.C. 554 or otherwise involving a determination on the record after opportunity for a hearing.

(b) Any Board meeting or portion thereof, which may be closed, or any information which may be withheld under paragraph (a) of this section, will not be closed or withheld, respectively, in any case where the Board finds the public interest requires otherwise.

§ 1600.7 Procedures for closing a meeting to the public.

(a) A majority of all Directors may vote to close a meeting or withhold information pertaining to that meeting. A separate vote shall be taken with respect to any action under § 1600.6(a). A majority of the Board may act by taking a single vote with respect to a series of meetings, a portion or portions of which are proposed to be closed to the public, or with respect to any information concerning such series of meetings, so long as each meeting in such series involves the same particular subject matter and is scheduled to be held no more than thirty days after the initial meeting in such series. The vote of each Director participating in such vote shall be recorded and no proxy shall be allowed.

(b) Whenever any person whose interests may be directly affected by a portion of the Board's meeting requests that the Board close such portion to the public on the basis of exemptions in paragraph (a)(5), (a)(6), or (a)(7) of § 1600.6, the Board, upon request of any one of its members, will vote whether or not to close such portion of the

Rural Telephone Bank, USDA

§ 1600.8

meeting. The vote of each Director participating in such vote shall be recorded and no proxy shall be allowed.

(c) Before every Board meeting closed on the basis of one or more of the exemptions in § 1600.6(a), the Legal Counsel will publicly certify that, in Counsel's opinion, the meeting may be closed to the public and shall state each relevant exemption.

(d) Within one business day after any vote taken pursuant to paragraph (a), (b), or (c) of this section, the Board will make publicly available a written copy of the vote, reflecting the vote of each Board member. Except to the extent that such information is exempt from disclosure, if a meeting or portion of a meeting is to be closed to the public, the Board will make publicly available within one business day after the required vote a full written explanation of its action, together with a list of all persons expected to attend the meeting and their affiliation.

§ 1600.8 Transcript, recording or minutes; availability to the public.

(a) The Secretary of the Board will maintain the following records for each Board meeting, or portion thereof which is closed to the public pursuant to a vote under § 1600.7:

(1) A copy of the Legal Counsel's certification required by § 1600.7;

(2) A copy of a statement from the presiding officer which sets forth the time and place of the closed meeting or portion thereof and a list of persons present; and

(3) A complete verbatim transcript or electronic recording adequate to record fully the proceedings of each Board meeting or portion of a meeting, except that in the case of a meeting or portion of a meeting closed to the public on the basis of exemptions in paragraph (a)(8) or (a)(10) of § 1600.6, the Secretary of the Board will maintain either a transcript, electronic recording, or a complete set of minutes. Such minutes shall fully and clearly describe all matters discussed and shall provide a full and accurate summary of actions taken and the reasons therefor, including a description of each of the views expressed on any item and the record of all roll-call vote reflecting the vote of each member of the question. All

documents considered in connection with any action will be identified in such minutes.

(b) The retention period for the records required by paragraph (a) of this section will be for a period of at least two years after the particular Board meeting or until one year after the conclusion of any Board proceeding with respect to which the meeting or portion thereof was held, whichever occurs later.

(c) The Secretary of the Board will make promptly available to the public the transcript, electronic recording, transcription of the recording, or minutes of the discussion of any item on the agenda of a Board meeting, except for such item or items of such discussion as the Board determines to contain information which may be withheld on the basis of one or more of the exemptions in § 1600.6.

(d) Requests for public inspection of electronic recording, transcripts or minutes of Board meetings shall be made to the Assistant Secretary of the Board of Directors of the Rural Telephone Bank, room 4051-South Building, U.S. Department of Agriculture, 14th Street and Independence Avenue SW., Washington, DC 20250. Requests for inspection or copies of transcripts shall specify the date of the meeting, the name of the agenda and the agenda item number; this information will appear in the notice of the meeting.

(e) The transcripts, minutes, or transcriptions of electronic recordings of a Board meeting will disclose the identity of each speaker, and will be furnished to any person at the actual cost of transcription or duplication.

1610.9 Class B stock.

§ 1610.1

1610.10 Determination of interest rate on Bank loans.

1610.11 Prepayments.

AUTHORITY: 7 U.S.C. 941 *et seq.*; Pub. L. 103-354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

SOURCE: 38 FR 17184, June 29, 1973, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to this part appear at 59 FR 66439, Dec. 27, 1994.

§ 1610.1 General.

Loans made by the Governor of the Rural Telephone Bank (the "Bank") will be made in conformance with title IV of the Rural Electrification Act of 1936 (the "Act"), as amended (7 U.S.C. 941 *et seq.*), and this part 1610. Loans are made under section 408(a)(1) of the Act for purposes of section 201 of the Act. Loans are also made for purposes of section 408(a)(2) of the Act. The Bank will give preference to the use of loan funds for purposes set forth in section 408(a)(2) of the Act to the extent that it has completed applications for such loans.

[38 FR 17184, June 29, 1973, as amended at 58 FR 66252, Dec. 20, 1993]

§ 1610.2 Definitions.

As used in this part:

Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

Appropriated means funds appropriated based on subsidy.

Bank means the Rural Telephone Bank, an agency and instrumentality of the United States within the United States Department of Agriculture.

Borrower means any organization which has an outstanding telephone loan made by the Bank or RUS, or guaranteed by RUS, or which is seeking such financing.

Governor means the Governor of the Bank.

REA means the Rural Electrification Administration, formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Depart-

7 CFR Ch. XVI (1-1-97 Edition)

ment of Agriculture Reorganization Act of 1994 (Pub.L. 103-354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

RUS cost-of-money-loan means a loan made under section 305(d)(2) of the Act bearing an interest rate as determined under 7 CFR 1735.31(c). RUS cost-of-money loans are made concurrently with Bank loans.

TIER (Times Interest Earned Ratio) means the ratio of the borrower's net income (after taxes) plus interest expense, all divided by interest expense. For the purpose of this calculation, all amounts will be annual figures and interest expense will include only interest on debt with a maturity greater than one year.

[58 FR 66252, Dec. 20, 1993, as amended at 59 FR 66439, Dec. 27, 1994]

§ 1610.3 Loan authorizations.

The aggregate amount of loans made will not exceed the amount authorized by the Board of Directors (the "Board") of the Bank.

[38 FR 17184, June 29, 1973. Redesignated at 58 FR 66252, Dec. 20, 1993]

§ 1610.4 Loan applications.

No application for a loan will be considered for approval by the Bank until it has been reviewed by RUS and the Governor has determined, based on such review, the eligibility of the applicant for a Bank loan and the amount thereof. Loan application forms are available from RUS on request. No fees or charges are assessed for Bank loans.

[58 FR 66252, Dec. 20, 1993]

§ 1610.5 Minimum Bank loan.

A Bank loan will not be made unless the applicant qualifies for a Bank loan of at least \$50,000.

[38 FR 17184, June 29, 1973. Redesignated at 58 FR 66252, Dec. 20, 1993]

§ 1610.6 Concurrent Bank and RUS cost-of-money loans.

(a) The Bank makes loans, under section 408 of the Act, concurrently with RUS cost-of-money loans made under section 305(d)(2) of the Act. To qualify for concurrent Bank and RUS cost-of-

Rural Telephone Bank, USDA

§ 1610.10

money loans on or after November 1, 1993, a borrower must meet each of the following requirements:

(1) The average number of proposed subscribers per mile of line in the service area of the borrower is not more than 15, or the borrower has a projected TIER (including the proposed loans) of at least 1.0, but not greater than 5.0, as determined by the feasibility study prepared in connection with the loans, see 7 CFR part 1737, subpart H; and

(2) The Administrator of RUS has approved and the borrower is participating in a telecommunications modernization plan for the state, see 7 CFR part 1751, subpart B.

(b) The loan amounts from each program (Bank, including amounts for class B stock, and RUS cost-of-money) will be proportionate to the total amount of funds appropriated for the fiscal year for Bank loans and RUS cost-of-money loans. To determine the Bank portion, the total loan amount will be multiplied by the ratio of Bank funds appropriated for the fiscal year to the sum of RUS cost-of-money and Bank funds appropriated for the fiscal year in which the loan is approved. The same method would be used to calculate the RUS cost-of-money portion (see 7 CFR 1735.31(b)). If during the fiscal year the amount of funds appropriated changes, the ratio will be adjusted accordingly and applied only to those loans approved afterwards.

(c) The actual rate of interest on the Bank loan shall be determined as provided in §1610.10; the RUS cost-of-money loan shall bear interest at a rate equal to the current cost of money to the Federal Government, on the date of advance of funds to the borrower, for loans of similar maturity, but not more than 7 percent per year (see 7 CFR 1735.31(c)).

[58 FR 66252, Dec. 20, 1993]

§ 1610.7 Acquisition of certain exchange facilities.

In the interest of making optimum use of the Bank's loan funds, a Bank loan for the acquisition of exchange facilities under section 408(a)(2) of the Act (7 U.S.C. 948(a)(2)) will not be recommended by the Governor for approval by the Secretary of Agriculture unless the Governor determines that

the acquisition is reasonably necessary to improve the efficiency, effectiveness, or financial stability of the borrower's telephone system, that the location and character of the proposed acquisition are such that the acquisition is reasonably necessary to accomplish such improvement, and that the amount of the requested loan for such acquisition is reasonably justified by the nature and scope of the improvement which the acquisition would effect.

§ 1610.8 Adoption of applicable RUS policy.

The policies embodied in 7 CFR part 1610, in all parts of 7 CFR chapter XVII except those identified below, will be utilized by the Governor in carrying out the Bank's loan program to the extent that such policies are consistent with title IV of the Act (7 U.S.C. 941 *et seq.*) and to the extent that policies in 7 CFR chapter XVII are consistent with 7 CFR part 1610. The parts of 7 CFR chapter XVII applicable solely to the Electric Program and thus exceptions to this section are parts 1710 through 1734 inclusive.

[55 FR 39397, Sept. 27, 1990]

§ 1610.9 Class B stock.

Borrowers receiving loans from the Bank shall be required to invest in class B stock at 5 percent of the total amount of loan funds advanced. Borrowers may purchase class B stock by:

(1) Paying an amount (using their own general funds) equal to 5 percent of the amount, exclusive of the amount for class B stock, of each loan advance, at the time of such advance; or

(2) Requesting that funds for the purchase of class B stock be included in the loan. If funds for class B stock are included in a loan, the funds for class B stock shall be advanced in an amount equal to 5 percent of the amount, exclusive of the amount for class B stock, of each loan fund advance, at the time of such advance.

[56 FR 26596, June 10, 1991]

§ 1610.10 Determination of interest rate on Bank loans.

(a) All loan fund advances made on or after December 22, 1987 under Bank

§ 1610.10

7 CFR Ch. XVI (1–1–97 Edition)

loans approved on or after October 1, 1987, shall bear interest at the rate determined as established below, but not less than 5 percent per annum.

(b) The interest rate for the period beginning on the date the advance is made and ending at the close of the fiscal year in which the advance is made shall be the average yield on the date of advance on outstanding marketable obligations of the United States having a final maturity comparable to the final maturity of the advance. The interest rate shall be determined to the nearest 0.01 percent.

(1) For this determination, the Bank will use yields on actively traded Treasury issues adjusted to constant maturities obtained from the *Federal Reserve statistical release* (“Treasury rate”). In accordance with standard Treasury procedures, the rate in effect for any given day is the rate set at the close of business on the preceding day. The 30-year Treasury rate will be applied to all advances with a final maturity of at least 30 years from date of advance. A straight-line interpolation between other Treasury rates will be used to determine the rate applicable for advances with final maturities of less than 30 years.

(2) The Bank will notify the borrower in writing of the interest rate that applies to each advance.

(c) After the fiscal year in which the advance is made, the interest rate applied to the advance will be the sum of the calculations made in paragraphs (c) (1) through (5) of this section. This interest rate determination shall be made by the Governor within 30 days of the end of each fiscal year and shall be determined to the nearest 0.01 percent.

(1) The aggregate of all amounts received by the Bank during the fiscal year from the issuance of Class A stock, multiplied by the rate of return payable by the Bank during the fiscal year as specified in section 406(c) of the Act, which product is divided by the aggregate of the amounts advanced by the Bank during the fiscal year.

(2) The aggregate of all amounts received by the Bank during the fiscal year from the issuance of Class B stock, multiplied by the rate at which dividends are payable by the Bank during the fiscal year as specified in sec-

tion 406(d) of the Act, which product is divided by the aggregate of the amounts advanced by the Bank during the fiscal year. Section 406(d) provides that “No dividends shall be payable on Class B stock.” The “amounts received by the Bank during the fiscal year from the issuance of Class B stock” means the amount of cash received during the fiscal year for the purchase of Class B stock, plus the amount advanced to borrowers by the Bank during the fiscal year for such purchases, less any Class B stock that is rescinded during the fiscal year.

(3) The aggregate of all amounts received by the Bank during the fiscal year from the issuance of Class C stock, multiplied by the rate at which dividends are payable by the Bank during the fiscal year as specified in section 406(e) of the Act, which product is divided by the aggregate of the amounts advanced by the Bank during the fiscal year.

(4) The amounts received by the Bank during the fiscal year from each issue of telephone debentures and other obligations of the Bank, multiplied, respectively, by the rates at which interest is payable by the Bank during the fiscal year to holders of each issue, each of which product is divided, respectively, by the aggregate of the amounts advanced by the Bank during the fiscal year.

(5) The amount by which the aggregate of the amounts advanced by the Bank during the fiscal year exceeds the aggregate of the amount received by the Bank from the issuance of Class A stock, Class B stock, Class C stock, and telephone debentures and other obligations of the Bank during the fiscal year, multiplied by the historic cost of money rate as of the close of the immediately preceding fiscal year, which product is divided by the aggregate of the amounts advanced by the Bank during the fiscal year.

(6) As used in paragraph (c)(5) of this section, the term “historic cost of money rate as of the close of the immediately preceding fiscal year,” means the sums of the results of the following calculations: The amounts advanced by the Bank in each fiscal year during the period beginning with fiscal year 1974

Rural Telephone Bank, USDA**§ 1610.10**

and ending with the immediately preceding fiscal year, multiplied, respectively, by the cost of money rate for the fiscal year (as set forth in Table I for fiscal years 1974 through 1987, and as determined by the Governor in paragraphs (c) (1) through (5) of this section for fiscal years after fiscal year 1987), with each product then divided by the aggregate of the amounts advanced by the Bank from the beginning of fiscal year 1974 through the end of the fiscal year just ended.

TABLE I

For advances made in fiscal year:	The cost of money rate shall be:
1974	5.01 percent.
1975	5.85 percent.
1976	5.33 percent.
1977	5.00 percent.
1978	5.87 percent.
1979	5.93 percent.
1980	8.10 percent.
1981	9.46 percent.
1982	8.39 percent.
1983	6.99 percent.
1984	6.55 percent.
1985	5.00 percent.
1986	5.00 percent.
1987	5.00 percent.

In this table, "fiscal year" means the 12-month period ending on September 30 of the designated year.

(d) A borrower with a Bank loan approved on or after October 1, 1987, and before December 22, 1987, and with funds not fully advanced as of December 22, 1987, may until the next advance under the loan or March 21, 1988, whichever is later, elect to have the interest rate specified in the loan commitment apply to the unadvanced portion in lieu of the rate which would otherwise apply as set forth in § 1610.10(a). A borrower making such an election shall contact, in writing, the applicable Area Office of RUS. The Governor shall then adjust the interest rate that applies to the unadvanced portion of the loan accordingly.

(e) If the Bank, pursuant to section 407(b) of the Act, issues telephone debentures to refinance outstanding telephone debentures or other obligations, the Bank shall reduce the interest rate charged on each advance of Bank loan funds made during the fiscal year(s) in which the refinanced debentures or other obligations were originally issued. The reduction shall be for the period beginning on the issue date of the

refinancing debentures and ending on the date the advance matures or is completely prepaid, whichever is earlier. This reduction shall be in addition to any other interest rate reduction required by section 408(b)(3) of the Act. The interest rate shall be reduced by the amount which fully reflects that percentage of the funds saved by the Bank as a result of the refinancing which is equal to the percentage representation of the advance of all advances made during the fiscal year(s) involved. In no case, however, shall the interest rate be reduced to less than 5 percent per annum. The interest rate reduction for each advance shall be determined as follows:

(1) The funds saved by the Bank as a result of the refinancing shall be computed.

(2) The advance shall be divided by the total of all advances made during the fiscal year(s) involved, and stated to the nearest .01 percent.

(3) The percentage in paragraph (e)(2) of this section is multiplied by the amount in paragraph (e)(1) of this section to determine the savings for a particular advance. The interest rate on that advance is then reduced to fully reflect the savings over the remaining amortization period of the loan from which the advance was made.

(f) Within 60 days after the issue date described in paragraph (e) of this section, the Governor shall amend the loan documentation for each advance described in paragraph (e) of this section, as necessary, to reflect any interest rate reduction applicable to the advance by reason of paragraph (e) of this section, and shall notify each affected borrower of the reduction.

(g) Within 5 days of determining the cost of money rate for a fiscal year, the Governor shall:

(1) Cause the determination to be published in the FEDERAL REGISTER in accordance with section 552 of title 5, United States Code, and

(2) Furnish a copy of the determination to the Comptroller General of the United States.

(h) A borrower should not wait until the end of the fiscal year to submit a requisition for an advance of loan funds if it wants the advance made in that

§ 1610.11

fiscal year. Borrower requisitions submitted late in the fiscal year may not be processed in that fiscal year because of workload and other factors.

[53 FR 36783, Sept. 22, 1988; 53 FR 39014, Oct. 4, 1988]

§ 1610.11 Prepayments.

(a) Bank loans approved before November 1, 1993, may be prepaid in ac-

7 CFR Ch. XVI (1–1–97 Edition)

cordance with the terms thereof, including payment of the premium as provided therein.

(b) A borrower may prepay part or all of a Bank loan made on or after November 1, 1993, by paying the outstanding principal and any accrued interest without being required to pay a prepayment premium.

Subpart A—Organization and Functions

SOURCE: 57 FR 6285, Feb. 24, 1992, unless otherwise noted.

§ 1700.1 General.

(a) The Rural Electrification Administration (REA) was established by Executive Order No. 7037, signed by the President on May 11, 1935. Statutory authority was provided by the Rural Electrification Act of 1936 (RE Act) (49 Stat. 1363; 7 U.S.C. 901). The RE Act established REA as a lending agency with responsibility for developing a program for rural electrification.

(b) On October 28, 1949, an amendment to the RE Act authorized REA to make loans to improve and extend telephone service in rural areas. The Rural Telephone Bank (RTB or the Bank), an Agency of the United States, was established by another amendment to the RE Act, approved May 7, 1971. The Administrator of RUS serves as the Bank's chief executive with the title of Governor. On May 11, 1973, the RE Act was further amended to establish a revolving fund and to provide authority for REA to guarantee loans made by other legally organized lenders. The RE Act was amended further on December 21, 1987, to establish a Rural Economic Development Subaccount, and to authorize funds from this subaccount to provide zero-interest loans and grants to REA borrowers to promote rural economic development and job creation. The RE Act was also amended on November 5, 1990, to add a new section 314, which authorized REA to guarantee 90 percent of the principal and interest of loans made for electric and telephone facilities by legally organized lenders. It was further amended on November 28, 1990, to establish an Assistant Administrator for Economic Development and a rural development technical assistance unit; to expand the authorities and responsibilities of REA in rural economic development; and to establish a Rural Business Incubator Fund for making grants and reduced interest loans to electric and telephone borrowers to promote business incubator projects. At the same time, the Administrator was also granted authority for financial assistance for distance learning and medical link programs.

(c) The Secretary of Agriculture (Secretary) was required to establish the Rural Utilities Service (RUS) pursuant to section 232 of the Federal Crop

Rural Utilities Service, USDA

§ 1700.2

Insurance Reform and Department of Agriculture Reorganization Act of 1994, (Pub. L. 103-354, 108 Stat. 3178) (Reorganization Act). The Reorganization Act established RUS as successor to REA. On October 20, 1994, the Secretary abolished REA and established RUS. RUS was assigned responsibility for administering electric and telephone loan programs previously administered by REA, water and waste facility loans and grants previously administered by the Rural Development Administration, along with other functions as the Secretary determines appropriate. The rights, interests, obligations, duties, and contracts previously vested in REA are transferred to and vested in RUS. The Secretary designated the Administrator of RUS to serve as the Governor of RTB.

(d) The offices of RUS are located in the South Building of the United States Department of Agriculture at 14th and Independence Avenue, SW., Washington, DC 20250-1500. The Electric and Telephone Programs are administered by regional offices located at this same address. There is a Northern and a Southern Regional Office, along with a Power Supply Division, for the electric program, and an Eastern and a Western Regional Office for the telephone program. (See § 1700.4(b) and § 1700.5(b).)

[59 FR 66440, Dec. 27, 1994]

§ 1700.2 Office of the Administrator.

(a) The Administrator (who also serves as Governor of the RTB) is appointed by the President, with the advice and consent of the Senate, for a term of 10 years. The Administrator functions as the chief executive of the Agency under the general supervision and direction of the Under Secretary for Rural Economic and Community Development. The Administrator is aided directly by two Deputy Administrators and by Assistant Administrators for the Electric Program, the Telephone Program, for Economic Development and Technical Services, and for Management. The Financial Services Staff and the Equal Opportunity and Civil Rights Staff also report directly to the Administrator. The work of the Agency is carried out through the of-

fices and divisions described in this part.

(b) The Financial Services Staff performs the following functions:

(1) Evaluates financial conditions of financially troubled borrowers;

(2) Negotiates settlements and “work-outs” of financially troubled borrowers who have or may have delinquent loans in order to satisfy the government’s interests, keeping abreast of financial and legal factors that may affect the negotiations;

(3) Coordinates the Agency’s efforts to identify and develop strategies for potentially financially troubled borrowers;

(4) Develops techniques and criteria for evaluating the financial and operating performance of certain rural electric and telephone borrowers;

(5) Develops certain standards, policies, and procedures in connection with loan requirements and processing for the electric and telephone programs;

(6) Analyzes and evaluates certain loan requests and transactions to determine whether the documentation justifies the request;

(7) Serves as staff to the Senior Loan Committee;

(8) Keeps other government organizations advised concerning activities of the staff; and

(9) Serves as RUS liaison to the capital markets.

(c) The Equal Opportunity and Civil Rights Staff administers the program for equal opportunity in the delivery of services and benefits by RUS borrowers and in the employment practices in the Agency. The staff:

(1) Formulates and coordinates plans, policies and procedures for a nationwide program of nondiscrimination on the part of RUS borrowers in carrying out borrower programs subject to the provisions of title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000a–2000h–6); section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 701 *et seq.*); the Age Discrimination Act of 1975 (42 U.S.C. 6101–6107); the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*); and Executive Order 11246 (3 CFR, 1964–1965 Comp., p. 339), as amended by Executive Orders 11375 (3 CFR, 1966–1970 Comp., p. 684) and 12086 (3 CFR, 1978 Comp., p. 230).

§ 1700.3

7 CFR Ch. XVII (1–1–97 Edition)

(2) Develops and monitors plans, policies and programs designed to promote equal employment opportunity for RUS personnel under title VII of the Civil Rights Act of 1964; the Age Discrimination in Employment Act of 1967 (29 U.S.C. 621–634); the Equal Employment Opportunity Act of 1972 (42 U.S.C. 2000e *et seq.*); section 501 of the Rehabilitation Act of 1973; pertinent provisions of the Civil Service Reform Act of 1978 (5 U.S.C. 1101 *et seq.*); and applicable rules, regulations and other equal employment, nondiscrimination statutes.

§ 1700.3 Office of the Deputy Administrator—Program Operations.

The Deputy Administrator—Program Operations directs and coordinates the electric, telephone and rural economic development programs, technical services, and borrower accounting activities; reviews Agency policies in these areas and, as necessary, implement changes; and participates with the Administrator and other officials in planning and formulating the programs and activities of the Agency.

§ 1700.4 Rural electric program.

(a) The Assistant Administrator—Electric directs and coordinates the rural electrification program of the Agency, participating with the Administrator and Deputy Administrator—Program Operations and others in planning and formulating the programs and activities of the Agency.

(b) *Regional Offices.* (1) The two regional offices are the primary points of contact between RUS and electric distribution system borrowers. Each office administers the rural electric program for an assigned geographical area with assistance of field representatives located in areas assigned to them. The regional offices are composed of the following states and territories:

(i) *Northern Region.* Alaska, Connecticut, Delaware, Hawaii, Idaho, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, Washington, West Virginia, Wisconsin,

Wyoming, and present and former Pacific Trust Territories; and

(ii) *Southern Region.* Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Kansas, Louisiana, Mississippi, Missouri, Nebraska, Nevada, New Mexico, North Carolina, Oklahoma, Puerto Rico, South Carolina, Tennessee, Texas, Utah, and the Virgin Islands.

(2) The regional offices perform the following functions with respect to loan feasibility and security and accomplishment of the purposes of the RE Act:

(i) Administer the rural electrification program for distribution borrowers in the region, serving as the single point of contact for distribution borrowers;

(ii) Provide guidance to borrowers on Agency loan policies and procedures, and receives, evaluates, and processes insured and guaranteed loan applications and other requests for financing assistance;

(iii) If delegated the authority by the Administrator, Regional Directors may approve certain loans, lien accommodations and other actions;

(iv) Assure that distribution and transmission systems and facilities are designed and constructed in accordance with the terms of the loan and proper engineering practices and specifications;

(v) Maintain oversight of borrower rate actions;

(vi) Provide guidance to borrowers on supplemental power resources; load and energy management; and the environmental aspect of the design, construction and operation of their systems;

(vii) Maintain necessary oversight of borrowers' financial management and technical operations and practices to assure the security of the government's loans. Institute operations and management studies or other forms of corrective action as necessary;

(viii) Works to ensure accountability of loan and other financial transactions; and

(ix) Supplements efforts of the Equal Opportunity and Civil Rights Staff to ensure borrower compliance with civil rights requirements.

(c) *Power Supply Division.* The Division performs the following functions:

Rural Utilities Service, USDA

§ 1700.5

(1) Administers rural electrification program responsibilities that relate to power supply borrowers, and serves as the primary point of contact between RUS and all such borrowers;

(2) Receives, evaluates, and processes insured and guaranteed loan applications and other requests for financial assistance from power supply borrowers;

(3) Develops and administers engineering and construction functions related to planning, design, construction, operation, and maintenance for power supply borrowers;

(4) Maintains a continuing financial and management overview of power supply borrowers to ensure that their operations are consistent with sound fiscal policies and procedures, loan security, and with RUS loan contracts, mortgages and regulatory requirements. Initiates operations and management studies or other forms of corrective action as necessary;

(5) Provide guidance to borrowers on supplemental power resources; load and energy management; and the environmental aspects of the design, construction and operations of their systems;

(6) Works to ensure accountability of loan and other financial transactions; and

(7) Supplements efforts of the Equal Opportunity and Civil Rights Staff to ensure borrower compliance with civil rights requirements.

(d) *Electric Staff Division.* This division administers certain engineering and operating activities relating to the rural electric program. The division:

(1) Is responsible for engineering aspects of RUS's standards, specifications and other requirements with respect to design, construction, and technical operation and maintenance of power-plant, distribution, and transmission systems and facilities, including load management, energy conservation and communications;

(2) Develops engineering practices, policies, standards, and guidelines for the Agency relating to electric borrowers' systems; conducts analysis and provides guidance on matters relating to fuels for electric generating stations; analyzes the effects of environmental laws and regulations on RUS-financed electric systems; and develops

related policies and procedures for the Agency;

(3) Develops criteria, procedures and analyses for improvement of the operating performance of electric borrowers;

(4) Develops procedures, criteria and techniques for forecasting borrowers' power requirements; and develops and maintains expertise in matters relating to retail and wholesale rates;

(5) Develops policies and procedures for adherence to environmental laws and regulations, and reviews borrowers' environmental studies;

(6) Maintains and publishes a continuing updated list of materials compatible with current RUS standards;

(7) From time to time provides consultation with borrowers regarding engineering matters;

(8) Provides assistance to the other electric offices and, as appropriate, to borrowers; and

(9) Maintains liaison with other Government agencies, utilities, industry officials and professional organizations on the above matters.

§ 1700.5 Rural telephone program.

(a) The Assistant Administrator—Telephone directs and coordinates the rural telephone program of the Agency, participating with the Administrator and Deputy Administrator—Program Operations and other officials in planning and formulating the programs and activities of the Agency.

(b) *Regional Offices.* (1) The two regional offices are the primary points of contact between RUS and all telephone system borrowers. Each office administers the rural telephone program for an assigned geographical area with assistance of field representatives located in areas assigned to them.

(2) The regional offices are composed of the following states and territories:

(i) *Eastern Region.* Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, Virgin Islands, West Virginia, and Wisconsin; and

§ 1700.6

7 CFR Ch. XVII (1–1–97 Edition)

(ii) *Western Region.* Alaska, Arizona, Arkansas, California, Colorado, Hawaii, Idaho, Iowa, Kansas, Louisiana, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wyoming and present and former Pacific Trust Territories along with the Northern Mariana Islands and Guam.

(3) The regional offices have the following responsibilities with respect to loan feasibility and security and accomplishment of the purposes of the RE Act:

(i) Provide guidance to applicants and borrowers on Agency and Rural Telephone Bank loan policies and procedures, and make recommendations to the Administrator on applications for loans or guarantees. If delegated the authority by the Administrator, Area Directors may approve certain loans, lien accommodations and other actions;

(ii) Review and analyze borrowers' toll revenue settlements and local service rates for adequacy to meet loan service payments and other expenses;

(iii) Assure that telephone systems and facilities are designed and constructed in accordance with the terms of the loan and the Agency's regulations. They review, analyze and approve borrowers' engineering plans and specifications; engineering, equipment and construction contracts; and borrowers' payments to engineers and contractors. They work with the borrowers to assure that completed construction meets RUS standards for quality of service and loan security; and

(iv) Provide information to borrowers regarding management and technical operations and practices with respect to the feasibility and security of the Government's loans and achievement of RE Act purposes.

(c) *Telecommunications Standards Division.* This division administers engineering staff activities related to the design, construction, and technical operation and maintenance of rural telephone systems and facilities. The division:

(1) Develops Agency engineering practices, policies, guidelines and technical data relating to telephone borrowers' systems;

(2) Evaluates the application of new communications network technology to rural telephone systems;

(3) Develops standards, policies, and procedures in connection with construction activities financed by the rural telephone program;

(4) Provides advice and assistance to the regional offices and, as requested, to borrowers on the above functions and responsibilities; and

(5) Maintains liaison with other government agencies, utilities, industry officials, and professional organizations on the above matters.

(d) *Rural Telephone Bank Management Staff.* This staff performs the following functions:

(1) Prepares analyses and makes recommendations to the Assistant Governor of the RTB on RTB issues;

(2) Performs the calculations needed to determine the cost of money rate to RTB borrowers;

(3) Prepares the minutes of RTB board meetings;

(4) Develops practices and procedures for determining toll forecasts for the telephone regional offices, and develops the toll forecasts for borrowers with complicated settlement arrangements; and

(5) Maintains liaison with other government agencies, utilities, industry officials, and professional organizations on the above matters.

§ 1700.6 Economic development and technical services.

(a) The Assistant Administrator—Economic Development and Technical Services directs and coordinates the rural economic development and technical services programs of the Agency, participating with the Administrator and Deputy Administrator—Program Operations and other officials in planning and formulating the programs and activities of the Agency. Two staffs and one division report to this Assistant Administrator.

(b) *Rural Development Assistance Staff.* This staff performs the following functions:

(1) Administers the Agency's rural economic development and job creation programs;

Rural Utilities Service, USDA

§1700.7

(2) Formulates and develops regulations, procedures, directives, and bulletins concerning the execution of Agency rural economic development activities;

(3) In coordination with Agency personnel, provides guidance to borrowers on Agency rural economic development policies and procedures, and makes recommendations to the Administrator on borrowers' applications for rural economic development financial assistance;

(4) Provides economic and community development technical assistance to borrowers; and

(5) Advises Agency personnel on rural economic development matters.

(c) *Program Support Staff.* This staff has the following responsibilities:

(1) Prepares special and ongoing analyses regarding the operations of the Agency's loan, loan-guarantee, and grant programs, and supervises special projects as assigned;

(2) Develops and maintains Agency regulations and bulletins on pre-and post-loan policies and procedures, and provides advice and assistance to Agency staff and others regarding the achievement of program policies;

(3) Coordinates with corresponding program staffs regarding the implementation of program-wide policies;

(4) Coordinates joint program initiatives;

(5) Provides coordination and assistance on management development of RUS and borrower personnel, as assigned; and collaborates with borrowers' organizations and professional groups in management development;

(6) Develops and maintains a variety of loan fund control ledgers for electric and telephone program lending authorities; and

(7) Keeps abreast of external developments by state, local and Federal regulatory and legislative bodies relating to RUS programs.

(d) *Borrower Accounting Division.* This division ensures that accounting policies, systems and procedures with respect to borrowers' accounting operations meet regulatory, U.S. Department of Agriculture, General Accounting Office, Office of Management and Budget and Treasury Department requirements. The division:

(1) Provides recommendations and assistance in solving special program and administrative problems involving accounting interpretations and analysis, including the development and presentation of data to agency staff, regulatory bodies, and other agencies;

(2) Examines borrowers' records and operations and reviews expenditures of loan and other funds deposited in the RUS Construction Fund Account to determine that funds are expended in conformity with the RE Act. Reviews borrowers' plant accounting system and procedures to determine compliance with RUS regulations;

(3) Approves Certified Public Accountants to perform audits for borrowers and reviews their reports to determine conformance with acceptable accounting practices, procedures and standards;

(4) Develops proposed standards and procedures for Agency examination programs and evaluates adequacy and effectiveness of the review procedures; and

(5) Evaluates borrowers' accounting systems and procedures and recommends changes, as necessary, to provide for more complete and accurate reporting of borrowers' operations. Provides advice and assistance to borrowers concerning the installation and operation of accounting systems;

(e) *Area Offices.* The division is organized into four geographic area offices each of which has several field accountants located throughout the area.

§1700.7 Office of the Deputy Administrator—Management and Policy Support.

The Deputy Administrator—Management and Policy Support directs and coordinates the legislative, public information, administrative and budget activities of the Agency and participates with the Administrator and other officials in planning and formulating the programs, policies and other functions of the Agency. Activities are carried out by an Assistant Administrator—Management and others who report directly to the Deputy Administrator.

§ 1700.8

7 CFR Ch. XVII (1–1–97 Edition)

§ 1700.8 Office of Assistant Administrator—Management.

The Assistant Administrator—Management directs and coordinates the general administrative activities of the agency, participates with the Administrator and Deputy Administrators and other officials in planning and formulating the programs and activities of the agency. The Office of Budget and four other divisions are directed and coordinated by the Assistant Administrator—Management.

(a) The Office of Budget administers the budgetary and financial management program of the Agency. The office:

(1) Determines the annual funding needs for current and multi-year forecasts, participating with the Administrator in presenting and supporting the Agency's budget and program plans; and

(2) Administers budget execution, apportionment, allotment and use and control of all Agency funds.

(b) The Personnel Management Division administers the personnel program of the Agency, covering both headquarters and field personnel. The division:

(1) Administers the provisions of the Classification Act, to achieve uniform application of position classification principles and standards to all RUS positions; conducts organization studies and develops recommendations for changes; develops and administers the Agency's personnel management evaluation activities;

(2) Administers the employment program for the Agency, including staffing, recruitment, placement and separation; administers the Agency's merit promotion program; maintains liaison with the National Finance Center on personnel data processing activities including payroll;

(3) Administers Agency responsibilities for employee relations including: grievances and appeals, performance appraisals, performance recognition system, conflict of interest, awards, benefits, and leave;

(4) Directs, coordinates, and evaluates a program of employee training to achieve the maximum utilization of skills and abilities of personnel; conducts training sessions; plans and di-

rects conferences; prepares training budget; approves training requests; and coordinates an information program for foreign visitors;

(5) Provides advice and assistance to Agency officials and employees to ensure sound and effective administration of the Agency's personnel program;

(6) Maintains working relations and liaison on personnel management matters with the staff and other agencies of the Department and other government agencies; and

(7) Participates with the Administrator, in conjunction with the Equal Opportunity and Civil Rights Staff, in the implementation and enforcement of USDA equal employment opportunity programs (see § 1700.2(c) (2)); coordinates equal employment opportunity complaint system with the Department; develops and administers the Agency's Federal Equal Opportunity Recruitment Program.

(c) The Administrative Services Division administers a wide array of management services. The division administers:

(1) General services involving contracting and procurement, space management, property and supplies management, records management and communications;

(2) The Agency's rulemaking and regulatory review activities, coordinating with the Office of the Federal Register, the Office of the General Counsel, and the Office of Management and Budget; and

(3) The Agency's publications issuance system and the forms and report program.

(d) The Automated Information Systems Division analyzes the application of data processing to RUS program activities, including feasibility studies of the costs and benefits of automated data processing. The division:

(1) Establishes standards and procedures for developing, maintaining and using the Agency's major automated systems covering borrower information, loan accounting and special management programs; performs systems analyses, development, and programming; and ensures data security;

(2) Operates the data processing equipment of the Agency, including the

Rural Utilities Service, USDA

§ 1700.20

conversion of data from source documents and the preparation of statements, reports, analyses, and other information, and provides training and assistance to users; and

(3) Collects and analyzes financial, operating, and other statistical data obtained from borrowers and other sources, and prepares reports on the progress and status of the programs of RUS and the RTB.

(e) The Financial Operations Division administers the fiscal accounting program of the agency and the RTB. The division:

(1) Develops, recommends and implements accounting policies, systems, and procedures regarding the Agency's and RTB's operations;

(2) Maintains accounts to provide control over and accountability for all funds, assets, liabilities, income and expenses of the Agency and the RTB; and prepares reports required by RUS, RTB, the U.S. Department of Agriculture, and other government agencies;

(3) Examines and certifies for payment, vouchers and invoices covering administrative expenses and loan fund advances of the Agency and the RTB;

(4) Reviews, examines and processes monthly billings and debt service payments for RUS and RTB loans;

(5) Reviews, examines and processes loan fund advances, billings, debt service payments and all other accounting related activities connected with Federal Financial Bank loans to RUS borrowers; and

(6) Maintains custody of the original copies of notes and mortgages and certain loan collateral.

§ 1700.9 Information, legislation, policy and management analysis.

The Deputy Administrator—Management and Policy Support, directs two separate staffs of the Agency dealing with public information and legislation, and policy and management analysis.

(a) The Legislative and Public Affairs Staff performs the following functions:

(1) Analyzes the policy, programs and procedural implications of Federal and State legislation affecting RUS programs; prepares special reports for the Administrator on legislative affairs;

and responds to inquiries from Congress and others concerning RUS programs;

(2) Maintains liaison with the Department's legislative staff and with congressional offices;

(3) Manages the information activities of the Agency to provide borrowers and the public with timely information concerning the operations, status, progress and accomplishments of the rural electrification, rural telephone and rural development programs;

(4) Evaluates the public information activities of the Agency and advises on actions that will improve public understanding and acceptance of Agency functions; and

(5) Administers the public information provisions of 5 U.S.C. 551 *et seq.*, the Administrative Procedure Act.

(b) The Policy and Management Analysis Staff performs the following functions:

(1) Coordinates the development and monitors the implementation of the Agency's long-term program and management plans, ensuring that these plans are up to date at all times;

(2) Ensures that these long-term plans include quality-improvement, efficiency, and cost saving initiatives;

(3) Ensures that audit resolutions are incorporated in the Agency's strategic planning and other processes for establishing goals and objectives; and

(4) Initiates and coordinates management productivity programs of the Agency.

§§ 1700.10—1700.19 [Reserved]

Subpart B—Programs

§ 1700.20 Insured electric loans pursuant to section 305 of the Rural Electrification Act, as amended.

(a) *General.* These loans are made from the Rural Electrification and Telephone Revolving Fund for purposes authorized by section 4 of the RE Act. The standard interest rate on these loans is 5 percent, but a rate as low as 2 percent is authorized by section 305(b) of the RE Act if a borrower:

(1) Has experienced extreme financial hardship; or

§ 1700.21

(2) Cannot, in accordance with generally accepted management and accounting principles and without charging rates to its customers or subscribers so high as to create a substantial disparity between such rates and the rates charged for similar service in the same or nearby areas by other suppliers, provide service consistent with the objectives of the RE Act.

(b) These loans are made to finance the construction and operation of electric facilities and systems to provide initial and continued adequate electric service to persons in rural areas not receiving central station service at the time of the initial RUS loan. The loans, approval of which rests solely within the discretion of the Administrator, must be self-liquidating within a period not to exceed 35 years, and must be reasonably secured in the judgment of the Administrator. Under the RE Act, they may be made to persons, corporations, public bodies, and cooperative, non-profit, or limited dividend associations. Preference is given to public bodies and cooperative, non-profit, or limited dividend associations.

(c) *Loan applications.* Applications for these loans are made on forms prescribed by RUS and supported by a resolution of the applicant's board of directors. Copies of these standard forms are made available by RUS on request. Loan applicants are assisted, as necessary, in preparing the loan application and supporting data. If an application is acceptable after legal, engineering, economic, and financial studies, funds are obligated by a loan contract and the borrower gives a note, mortgage and, in some cases, other security.

(d) *Construction.* Under the loan agreements, RUS reserves the right to approve the design and construction of the facilities, and to require progress reports on construction and audits of the borrower's records relating to construction.

(e) *Advance of loan funds.* Loan funds are advanced on the basis of requisitions submitted by borrowers in accordance with the loan contract and RUS regulations.

7 CFR Ch. XVII (1-1-97 Edition)

§ 1700.21 Insured telephone loans pursuant to section 305 of the Rural Electrification Act, as amended.

(a) *General.* (1) These loans are made from the Rural Electrification and Telephone Revolving Fund for purposes authorized by section 201 of the RE Act. The standard interest rate on these loans is 5 percent, but a rate as low as 2 percent is authorized by section 305(b) of the RE Act under the same conditions as specified in § 1700.20(a) of this part.

(2) These loans are made for the purpose of improvement, expansion, construction, acquisition and operation of telephone lines, facilities, or systems to furnish or improve telephone service in rural areas. Borrowers may be required to provide a portion of the investment themselves. The loans, approval of which rests solely within the discretion of the Administrator, must be repaid within a period, not to exceed 35 years, that approximates the expected useful life of the facilities financed and must be reasonably secured in the judgment of the Administrator. The loans may be made to any type of commercial or nonprofit corporation now providing or who may hereafter provide telephone service in rural areas. Preference is given to persons already providing telephone service in rural areas and to cooperative, non-profit, limited dividend or mutual associations.

(b) *Loan applications.* Applications for these loans are made on forms prescribed by RUS, copies of which are available from RUS on request. Loan applicants are assisted, as necessary, in conducting area coverage surveys and in preparing loan applications. If an application is acceptable after legal, engineering, economic and financial studies, funds are obligated by a loan contract and the borrower gives a note, mortgage and, in some cases, other security.

(c) *Construction.* Under the loan agreements, RUS reserves the right to approve the design and construction of facilities and to require progress reports on construction and audits of the borrower's records relating to construction.

Rural Utilities Service, USDA

§ 1700.26

(d) *Advance of loan funds.* Loan funds are advanced on the basis of requisitions submitted by borrowers in accordance with the loan contract and 7 CFR part 1744.

[55 FR 39596, Sept. 28, 1990; 55 FR 42807, Oct. 23, 1990]

§ 1700.22 Rural Telephone Bank loans pursuant to section 408 of the Rural Electrification Act, as amended.

These loans are made for the purposes authorized by section 201 of the Act. The loans, approval of which rests solely within the discretion of the Governor, bear interest at a rate equal to the cost of funds to the Bank; must be repaid within a period, up to a maximum of 35 years, that approximates the expected useful life of the facilities financed; and must be reasonably secured in the judgement of the Administrator. These loans are administered by RUS staff as part of the rural telephone program pursuant to the policies and procedures set forth in 7 CFR part 1610.

§ 1700.23 Guaranteed loans pursuant to section 306 of the Rural Electrification Act, as amended.

These loans are made by any legally organized lending agency and guaranteed in the full amount thereof by the Administrator for purposes provided in the RE Act, including without limitation, distribution, sub-transmission, bulk transmission and generation facilities. The loans guaranteed under this section are serviced by the lender except that loans made by the Federal Financing Bank are serviced by RUS. The interest rate on these loans is as agreed upon by the borrower and the lender.

[56 FR 2671, Jan. 24, 1991]

§ 1700.24 Loans and grants pursuant to section 313 of the RE Act.

These zero-interest loans and grants are made to borrowers under the RE Act for the purpose of promoting rural economic development and rural job creation projects. Selection and approval of applications for zero-interest loans and grants rests solely within the

discretion of the Administrator. (See 7 CFR part 1703.)

[57 FR 6290, Feb. 24, 1992]

§ 1700.25 Other loan authorities.

(a) The Administrator has authority under section 314 of the RE Act to guarantee 90 percent of the principal and interest of loans made by qualified private lenders to finance electric and telephone facilities in rural areas. (See 7 CFR parts 1712 and 1739.) The Administrator also has authority under section 502 of the RE Act to make grants and reduced interest loans to promote business incubator programs or for the creation or operation of business incubators in rural areas. Authority is also granted to the Administrator by the Rural Economic Development Act of 1990 (7 U.S.C. 950aaa *et seq.*) to provide financial assistance for distance learning and medical link programs.

(b) The Administrator has authority under section 5 of the RE Act to make loans to electric borrowers for the purpose of financing the wiring of the premises of persons in rural areas and for the purchase and installation of electrical and plumbing appliances and equipment, including machinery. The Administrator also has authority under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 *et seq.*) to finance community antenna television (CATV) services and facilities. Funds have not been appropriated for these purposes since 1969 in the case of section 5 loans and not since 1981 in the case of CATV loans.

[57 FR 6290, Feb. 24, 1992]

§ 1700.26 Studies, investigations, and reports.

Pursuant to section 2 of the RE Act, the Agency may make, or cause to be made, studies, investigations, and reports concerning the condition and progress of electrification and telephony in rural areas in the several States and territories and may publish and disseminate information with respect thereto.

§ 1700.27

§ 1700.27 Loan security activities.

In carrying out its program, and in the interest of loan security, the Agency requires periodic reports of borrowers on operations, annual audits, etc., and provides specialized and technical accounting, engineering, and other managerial assistance to borrowers with respect to the construction and operation of their facilities, to help them establish efficient and economical service in rural areas.

§ 1700.28 Issuances implementing procedure.

There are available from RUS, upon request:

- (a) Basic forms of loan agreements; and
- (b) Rules and bulletins issued from time to time which implement the loan agreements and the Agency's policies and procedures.

§ 1700.29 [Reserved]

Subpart C—Public Information

§ 1700.30 Availability of Agency publications and other information, and collection of public comments to proposed rules.

(a) 5 U.S.C. 552(a)(2) requires that certain materials be made available for public inspection and copying.

(b) The Rural Utilities Service (RUS) issues from time to time notices and regulations in the FEDERAL REGISTER as well as bulletins, informational publications, and staff instructions in order to:

(1) Implement the provisions of the RE Act and the loan and security instruments;

(2) Establish Agency procedures; and

(3) Assist electric and telephone borrowers in the design, operation, and maintenance of their systems.

(c) Information about availability and costs of Agency publications and other Agency materials is available from Publications and Directives Management Branch, Administrative Services Division, Rural Utilities Service, Room 0180, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500.

(d) RUS will provide for the distribution of indexes of publications in con-

7 CFR Ch. XVII (1-1-97 Edition)

formance with the Freedom of Information Act, 5 U.S.C. 552(a)(2). Single copies of individual bulletins, informational publications, staff instructions, and forms, including forms of basic loan and security instruments, are available to borrowers and other members of the public either directly from RUS, from the Superintendent of Documents, U.S. Government Printing Office, Washington DC 20402, or from another source to be established by RUS. Costs for these publications are established in conformance with 7 CFR part 1. Initial copies of Bulletins directed to RUS borrowers are provided at no cost to those borrowers.

(e) RUS requires that all persons submitting comments to a proposed rule published by the Agency submit a signed original and three copies of their comments to the address shown in the preamble to the proposed rule. Copies of comments submitted are available to the public in conformance with 7 CFR part 1.

[56 FR 25349, June 4, 1991]

§ 1700.31 Indexes.

5 U.S.C. 552(a)(2) requires that each agency publish or otherwise make available a current index of all materials required to be made available for public inspection and copying. RUS will maintain and publish current indexes and quarterly supplements thereto, providing identifying information for all RUS Bulletins and for staff manuals and instructions made available pursuant to § 1700.30. Requests for copies should be addressed, in person or by mail, to the Office of the Director, Administrative Services Division, Room 0168—South Building, U.S. Department of Agriculture, Washington, DC 20250-1500.

§ 1700.32 Requests for records.

Requests for records under 5 U.S.C. 552(a)(3) shall be made in accordance with 7 CFR 1.6(a) and addressed to Office of the Director, Legislative and Public Affairs Staff, Rural Utilities Service, room 4043, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500. A request shall describe the records sought as set forth in 7 CFR 1.6(b). A charge may be made

Rural Utilities Service, USDA

to cover the costs of fulfilling the request. Requests may be submitted in person or by mail.

[55 FR 53487, Dec. 31, 1990]

§ 1700.33 Appeals.

Any person whose request under § 1700.32 is denied shall have the right to appeal such denial. This appeal shall be submitted in accordance with 7 CFR 1.3(e) and addressed to the Administrator, Rural Utilities Service, Room 4051, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500.

Subpart D—Delegations of Authority; General

SOURCE: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.40 Exercise of delegated authority.

(a) Unless specifically reserved, or otherwise delegated, the delegations of authority contained in subparts D through L of this part include the authority to take any action or execute any document deemed necessary and proper to the discharge of such responsibilities. In the exercise of authority delegated in subparts D through L of this part, all applicable RUS policies, regulations, and procedures should be followed. All delegations previously made are superseded.

(b) No delegation of authority by the Administrator or other person shall preclude the Administrator or other person from exercising any of the authority so delegated.

§ 1700.41 Persons serving in acting capacities.

Incumbents delegated authority in subparts D through L of this part are authorized to designate a person to act for them as necessary, except that a Regional Director or the Director, Power Supply Division may not redelegate authority to approve loans, loan guarantees or lien accommodations, and related actions as set forth in §§ 1700.124(a), 1700.127(a) and 1700.145(a). If an incumbent of a position to whom delegations are made in subparts D through L of this part is absent or is

§ 1700.43

unable to carry out such delegations, the person designated authority to act for the incumbent shall exercise the authority conferred by such delegations. Such designations shall be in accordance with any instruction issued by the incumbent's supervisor.

[59 FR 21624, Apr. 26, 1994, as amended at 59 FR 46723, Sept. 12, 1994]

§ 1700.42 Persons serving as acting Administrator.

The following persons are authorized, in descending order, to act for the Administrator only in his or her absence, sickness, resignation, or death: Deputy Administrator, Assistant Administrator—Electric, Assistant Administrator—Telephone, Assistant Administrator—Economic Development and Technical Services. That is, if the first person on the list is also absent, sick, has resigned, or is dead, the second person on the list is authorized to act for the Administrator and so on down the list. Persons on this list may not redelegate the authority to act for the Administrator. The Administrator may in his/her discretion in writing, on a case-by-case basis, delegate authority to act as Administrator in his/her absence outside of this specified order.

§ 1700.43 Persons serving as acting Assistant Administrator.

(a) *Electric and telephone programs.* The Deputy Assistant Administrator in each program is authorized to act for the respective Assistant Administrator in the absence, sickness, resignation or death of that Assistant Administrator. The Deputy Assistant Administrators may not redelegate this authority.

(b) *Assistant Administrator—Economic Development and Technical Services.* (1) The Directors of the Rural Development Assistance Staff, Borrower Accounting Division and the Program Support Staff are authorized to act for the Assistant Administrator—Economic Development and Technical Services in his or her absence according to the following schedule:

Director of	Months
Rural Development Assistance Staff.	January, April, July, October.
Borrowers Accounting Division.	February, May, August, November.

§ 1700.44

Director of	Months
Program Support Staff	March, June, September, December.

(2) If a particular Director is absent, sick, has resigned or is dead during a scheduled month, the delegation will revolve back to the preceding month. These Directors may not redelegate this authority.

§ 1700.44 Contracts approved on behalf of the Administrator.

(a) *Nonstandard contracts.* Prior to the approval or the execution of the following documents, the Office of the General Counsel (OGC) shall comment as to any legal matters concerning such nonstandard contracts:

(1) Contracts for engineering services, architectural services, construction, and power supply that include a substantive deviation from the standard form contract approved by OGC; and

(2) Other documents involving legal matters of concern to the approving official.

(b) *Signature.* All contract approvals shall be signed:

(Name and Title)
For the Administrator

§§ 1700.45—1700.59 [Reserved]

Subpart E—Delegations of Authority; Agency Issuances and Certain Correspondence

SOURCE: 59 FR 21625, Apr. 26, 1994, unless otherwise noted.

§ 1700.60 Agency issuances.

Except as may be specifically delegated from time to time to the Deputy Administrator, or others, all authority is reserved by the Administrator to approve and issue regulations and other information published in the FEDERAL REGISTER, bulletins, informational publications, staff instructions concerning Agency administrative matters and those affecting more than one program, and unnumbered memoranda (mailings to borrowers in more than one program and all RUS staff). Signature authority is also reserved by the

7 CFR Ch. XVII (1–1–97 Edition)

Administrator for written responses to Members of Congress, Governors, State Legislators, Federal Agency heads or Cabinet officials, as well as other controlled correspondence for Agency response. Additionally, signature authority is reserved by the Administrator for Agency mass mailings which include but are not limited to mailings to accountants, engineers, and consultants.

§ 1700.61 Agency publications control officer.

The Deputy Administrator is designated the Agency Publications Control Officer.

§§ 1700.62—1700.69 [Reserved]

Subpart F—Delegations; Authorities Reserved by the Administrator

SOURCE: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.70 General.

Authority for all matters not specifically delegated in subparts D through L of this part, or by other written delegation, is reserved to the Administrator, including, without limitation, the following authorities reserved in this subpart.

§ 1700.71 Rural economic development loan and grant and distance learning and medical link grant programs.

Approval of the following:

(a) Applications for loans or grants when all conditions for such approval have been met.

(b) All zero-interest loans and grants.

(c) Any modifications in the method of carrying out loan purposes, or in the amount of applications selected and loans or grants approved.

(d) Extension of principal and interest repayments for rural development purposes.

§ 1700.72 Electric program.

(a) Approval of the following loans, loan guarantees, lien accommodations or subordinations:

(1) All discretionary hardship loans.

Rural Utilities Service, USDA

§ 1700.73

(2) All insured loans, loan guarantees, and lien accommodations or subordinations to finance operating costs.

(3) All loans, loan guarantees, and lien accommodations or subordinations of more than \$15,000,000 for distribution and power supply borrowers.

(4) All loans, loan guarantees, and lien accommodations or subordinations for distribution borrowers that are members of a power supply borrower that is in default of its obligations to the Government or that is currently assigned to the Financial Services Staff, unless otherwise determined by the Administrator.

(5) All insured loans, loan guarantees, and lien accommodations or subordinations that require an Environmental Impact Statement.

(6) All certifications and findings required by the RE Act or other applicable laws and regulations, the placing and releasing of conditions precedent to the advance of funds, and all mortgages, loan contracts or other necessary documents relating to the authorities reserved in paragraph (a) of this section.

(b) And execution of all loan contracts, mortgages or other documents in connection with loans, loan guarantees and lien accommodations approved by the Administrator.

(c) Approval of the following for unpaid and outstanding loans and loan guarantees:

(1) Rescission of loans or termination of loan guarantee commitments when the amount of the rescission or termination is more than \$15,000,000.

(2) Requests to extend the time period for advancing loan funds if:

(i) The borrower is delinquent in payments on loans made or guaranteed by RUS or in litigation that may affect loan security; or

(ii) The request does not fully comply with the requirements specified in applicable RUS regulations.

(3) Extension of time of prepayment principal and interest pursuant to Section 12 of the RE Act, for borrowers in default or currently assigned to the Financial Services Staff.

(4) Agreements, plans, arrangements, recommendations to settle debt, or other actions affecting a borrower's financial or other obligations to the

Government through the Administrator of RUS for loans, loan guarantees, or other financial obligations except as may be specifically delegated to the Financial Services Staff.

(5) Loan budget adjustments (transfers or reclassifications) when approval is for:

(i) Changes in generation facilities that are subject to a power survey or certification by RUS;

(ii) Any proposed change of more than \$15,000,000;

(iii) Any proposed operating costs.

(d) Approval of the following for borrower facilities, organization, operations, or corporate status:

(1) Agreements for the merger or consolidation of borrowers.

(2) Power surveys or certifications by RUS involving changes in generation facilities.

(3) Contracts for the acquisition of plant-in-place of more than \$15,000,000 and related financial transactions.

(4) Approval, in amounts of \$25,000,000 or more, of:

(i) The use of general funds; or

(ii) Sales or transfers of property and related releases of lien.

(5) Equity development plans and amendments to equity development plans submitted by borrowers:

(i) As part of an application for any loan and loan guarantee that requires approval of the Administrator;

(ii) By any borrower whose equity as a percentage of total assets, is less than 10 percent at the time the plan is submitted, or whose equity is predicted to drop below 10 percent during the 10-year period of the plan.

(6) Assumptions of debt.

§ 1700.73 Telephone program.

(a) Approval of the following loans, loan guarantees, lien accommodations or subordinations:

(1) All loans, loan guarantees, and lien accommodations or subordinations to finance operating costs.

(2) All loans, loan guarantees, or lien accommodations or subordinations for more than \$15,000,000.

(3) Loans and loan guarantees with acquisition costs for more than \$5,000,000.

§ 1700.90

(4) Loans and loan guarantees containing funds to refinance outstanding debt amounts for more than \$5,000,000.

(b) All loan contracts, mortgages and other documents to be executed in connection with loans and loan guarantees approved by the Administrator.

(c) Approval of the following for unpaid and outstanding loans and loan guarantees:

(1) Extension of time for payment of principal and interest pursuant to Section 12 of the RE Act, for borrowers in default.

(2) Agreements, plans, arrangements, recommendations to settle debt, or other actions affecting a borrower's financial or other obligations to the Government acting through the Administrator of RUS for loans, loan guarantees or other financial obligations.

(3) Sales and transfers of property for more than \$5,000,000 and related releases of lien.

[59 FR 21624, Apr. 26, 1994, as amended at 59 FR 46724, Sept. 12, 1994]

§§ 1700.74—1700.89 [Reserved]

Subpart G—Delegations of Authority; Loan Review Committees

SOURCE: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.90 General.

To assist in carrying out the authorities which are reserved or delegated in subparts D through L of this part, the roles of the following committees in this subpart are recognized.

§ 1700.91 Senior loan review committee.

The Senior Loan Review Committee, appointed by the Administrator, shall review and make recommendations to the Administrator on all electric and telephone loans, loan guarantees, and lien accommodations or subordinations whose approval has been reserved by the Administrator. The committee shall be chaired by the Administrator and include the Assistant Administrator—Electric (AAE), Assistant Administrator—Telephone (AAT), and

7 CFR Ch. XVII (1–1–97 Edition)

such other members as the Administrator may appoint.

§ 1700.92 Assistant Administrator's loan committee.

Both the electric and telephone programs shall have Assistant Administrator's Loan Committees (AALC), consisting of the Regional Directors or Acting Regional Directors of the respective programs as well as additional members appointed by the appropriate Assistant Administrator. The AALC shall be chaired by either the appropriate Assistant Administrator or Deputy Assistant Administrator. The AALC shall meet as required to review, analyze, and concur in recommendations for actions to be taken for all loan application requests, loan guarantee applications, and lien accommodations or subordinations. The recommending official may not vote.

(a) Assistant Administrators and Regional Directors may approve loans, loan guarantees, or lien accommodations or subordinations under § 1700.124 or § 1700.146 only after the AALC has concurred with such actions.

(b) An Assistant Administrator may, in their sole discretion, forward a recommendation for a loan, loan guarantee or other financing action to the Senior Loan Committee for its consideration.

§ 1700.93 Rural economic development recommendation committee.

The Administrator may appoint a recommendation committee for the purpose of reviewing loan and grant recommendations.

§§ 1700.94—1700.99 [Reserved]

Subpart H—Delegations of Authority; Rural Economic Development, Program Support, and Borrower Accounting Activities

SOURCE: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.100 General.

The following delegations of authority in this subpart are made by the Administrator.

Rural Utilities Service, USDA

§1700.108

§1700.101 Deputy Administrator.

The Deputy Administrator in conformance with applicable regulations and RUS policy is hereby delegated authority to exercise all authorities conferred upon other persons in §1700.102.

§1700.102 Assistant Administrator—Economic Development and Technical Services.

The Assistant Administrator—Economic Development and Technical Services in conformance with applicable regulations and RUS policy is delegated authority to exercise all authorities conferred upon others in §§1700.103 through 1700.109, approval of staff instructions affecting only the Rural Development Program, and unnumbered memoranda (mailings to two or more borrowers) sent to rural development borrowers or grant recipients.

§1700.103 Director—Rural Development Assistance Staff.

The Director—Rural Development Assistance Staff in conformance with applicable regulations and RUS policy is delegated authority to approve for the Rural Economic Development Loan and Grant Programs and Distance Learning and Medical Link Grant Programs the following:

- (a) Releases of loan and grant funds including the approval of all agreements and documents between the RUS borrower and the ultimate recipient.
- (b) Cancellation of applications that have not been selected for approval by the Administrator.
- (c) Rescission of loan and grant funds.
- (d) Extension of the time period for the RUS borrower to meet the prerequisites to the advance of funds and the period to disburse the funds.
- (e) In addition, all authorities conferred upon other persons in §1700.104

§1700.104 Chief, Financing Branch—Rural Development Assistance Staff.

The Chief, Rural Development Assistance Staff—Financing Branch in conformance with applicable regulations and RUS policy is delegated authority to approve and execute for the Rural Economic Development Loan and Grant and Distance Learning and Medi-

cal Link Grant Programs the following:

- (a) Reports of vouchers released; and
- (b) Notice to Financial Operations Division (FOD) authorizing the advance or release of funds.

§1700.105 Director, Borrower Accounting Division.

The Director, Borrower Accounting Division in conformance with applicable regulations and RUS policy is delegated authority to:

- (a) Approve a certified public accountant (CPA) for borrower audits of its financial statements.
- (b) Take actions concerning the selection or change of a borrower's CPA (7 CFR 1773.4).
- (c) Serve as the RUS liaison within the Office of Inspector General (OIG) for all borrower irregularities.
- (d) In addition, execute all authorities conferred upon other persons in §§1700.106 through 1700.108.

§1700.106 Chief, Technical Accounting and Auditing Staff.

The Chief, Technical Accounting and Auditing Staff in conformance with Federal regulations and RUS policy is delegated authority to approve or execute:

- (a) Actions concerning accounting policies, procedures, standards, interpretations of Financial Accounting Standards Board (FASB) issuances or other technical accounting issues; and
- (b) Actions concerning the application of generally accepted auditing standards to borrowers' accounts.

§1700.107 Chiefs, Area Accounting Branches.

The Chiefs, Area Accounting Branches in conformance with Federal regulations and RUS policy are delegated authority to approve or execute:

- (a) Statement of condition of borrower's records; and
- (b) In addition, all authorities conferred upon other persons in §1700.108.

§1700.108 Field Accountants.

The Field Accountants in conformance with applicable regulations and RUS policy are delegated authority to approve or execute:

§ 1700.109

(a) Propriety of the disbursements of loan and equity funds as required by loan contract provisions and RUS policy.

(b) Adequacy of borrowers' accounting systems and related records.

§ 1700.109 Director—Program Support Staff.

The Director—Program Support Staff in conformance with applicable regulations and RUS policy is delegated authority to encumber loan funds for RUS and RTB loans.

§§ 1700.110—1700.119 [Reserved]

Subpart I—Delegations of Authority; Electric Program

SOURCE: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.120 General.

The following delegations of authority are made by the Administrator to the electric program.

§ 1700.121 Deputy Administrator.

The Deputy Administrator in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the electric program:

(a) Agreements or contracts for management or operations services between telephone and electric borrowers.

(b) FEDERAL REGISTER notices announcing the availability of final Environmental Impact Statements and the approval of RUS's final Environmental Impact Statements as well as Findings of No Significant Impact (FONSI).

(c) In addition, all authorities conferred upon other persons in § 1700.122.

§ 1700.122 Assistant Administrator—Electric.

The Assistant Administrator—Electric in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the electric program:

(a) Approval of the following loans and necessary documents, except for those approvals reserved for the Administrator in § 1700.72(a):

7 CFR Ch. XVII (1–1–97 Edition)

(1) Approval of loans of \$15,000,000 or less for entities not previously financed by RUS.

(2) Loans, loan guarantees, and lien accommodations or subordinations for distribution and power supply borrowers in amounts from \$10,000,000 to \$15,000,000.

(b) The following actions for unpaid and outstanding loans:

(1) Rescission of loans or termination of loan guarantee commitments when the amount of the rescission or termination is \$15,000,000 or less.

(2) Requests to extend the period for advancing loan funds in any amount except for:

(i) Requests from borrowers that are delinquent in their loan payments to RUS or in payments guaranteed by RUS or in litigation that may affect loan security.

(ii) Requests that do not comply with the requirements specified in applicable RUS regulations.

(iii) Cases where the Administrator has further reserved this authority.

(3) Extension of time for payment of principal and interest pursuant to section 12 of the RE Act for other than Energy Conservation Resources Loans, except for requests from borrowers in default or currently assigned to FSS.

(4) Loan budget adjustments (transfers or reclassifications) except when such adjustments would provide funds for:

(i) Changes in generation facilities that are subject to a power survey certification.

(ii) Any proposed change for more than \$15,000,000.

(iii) Any proposed operating costs.

(5) Imposition of and release of special controls on loan fund advances when the borrower is delinquent in payments on RUS loans or guarantees by RUS or the borrower is in litigation that may affect loan security.

(6) Questions arising from the interpretations or clarifications of the application of 7 CFR 1721.1 to individual borrower circumstances.

(c) The following changes in borrowers' facilities, organization or corporate status:

(1) Changes in transmission facilities not identified to RUS at the time of loan approval that are subject to a

Rural Utilities Service, USDA

§1700.124

power survey or certification by RUS involving the use of construction or general funds of \$15,000,000 or less.

(2) Power survey or certification by RUS involving changes in transmission facilities.

(3) Contracts for the acquisition of plant-in-place of \$15,000,000 or less and related financial transactions.

(4) Determination of the proper categorization of electric project proposals for the purpose of environmental review.

(5) Execution of documents relating to inter-borrower assumption of indebtedness.

(6) Approval in amounts of less than \$25,000,000 of:

- (i) The use of general funds; or
- (ii) Sales or transfers of property and related releases of lien.

(7) Approval or disapproval of the selection of a manager or attorney by an electric borrower.

(d) Memoranda to electric staff or to two or more electric borrowers.

(e) Approval of staff instructions affecting only the Electric Program.

(f) Waivers of borrower requirements pursuant to 7 CFR part 1710, Subpart E—Power Requirements Studies.

(g) All authorities conferred upon other persons in §1700.123.

§1700.123 Deputy Assistant Administrator—Electric.

The Deputy Assistant Administrator—Electric in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the electric program:

(a) Any contracts for the acquisition of plant-in-place for \$10,000,000 or less and related financial transactions.

(b) The following matters concerning borrowers' facilities, organization or corporate structure:

(1) Changes in borrowers' corporate status.

(2) Power supply contracts and agreements including wholesale power, fuel, interconnections and wheeling agreements, participation agreements, lease agreements for facilities or properties, power sales agreements with non-RE Act beneficiaries, and integrated transmission agreements between RUS borrowers and non-borrowers, any of

which require a construction expenditure of more than \$10,000,000.

(c) Approvals required under the mortgage to retire capital credits or make other cash distributions in the following cases: (1) Any distribution borrower that does not meet the following conditions:

(i) The retirement will not reduce total equity to less than 25 percent of total assets and other debits;

(ii) The oldest capital credits outstanding before the retirement are at least 10 years old where the retirement method is first-in, first-out, or the retirement is not more than 7 percent of all outstanding capital credits before the retirement where another method of retirement, authorized by the by-laws, is used; and

(iii) TIER and DSC ratios exceed mortgage minimum, i.e., the average of the highest two of the last 3 years exceeds 1.5 for TIER and 1.25 for DSC.

(2) Any power supply borrower.

(d) All authorities conferred upon other persons in §§1700.124 and 1700.131.

§1700.124 Regional Directors.

Regional Directors in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the electric program's distribution borrowers:

(a) The following loans, loan guarantees, lien accommodations, and documents:

(1) Insured loans, loan guarantees, and lien accommodations or subordinations in amounts of less than \$10,000,000, except for those approvals reserved for the Administrator in §1700.72(a), or those reserved for the Assistant Administrator—Electric under §1700.122(a).

(2) All certifications and findings required by the RE Act or other applicable laws and regulations, the imposing and releasing of conditions precedent to the advance of loan funds, and all mortgages, loan contracts or other documents relating to the delegations set forth in paragraph (a)(1) of this section.

(b) The following matters for unpaid and outstanding loans:

(1) Rescission of loans or termination of loan guarantee commitments when

§ 1700.124

the amount of the rescission or termination is \$10,000,000 or less, except for discretionary or operating loans.

(2) Requests to extend the period for advancing loan funds when the amount of unadvanced loan funds is \$10,000,000 or less, except for:

(i) Requests from borrowers that are delinquent in their loan payments to RUS or in loans guaranteed by RUS or in litigation that may affect loan security.

(ii) Requests that do not fully comply with the requirements specified in RUS regulations.

(iii) Cases where the Administrator has further reserved this authority.

(3) Basis date agreements for all approved requests to extend the period for advancing loan funds.

(4) Principal deferments under Section 12 of the RE Act for Energy Resource Conservation Loans and Rural Economic Development Investments.

(5) Loan budget adjustments (reclassifications or transfers) except when such adjustments would provide funds for:

(i) Changes in generation and transmission facilities that are subject to a power survey or certification by RUS.

(ii) Any change exceeding \$10,000,000.

(iii) Any operating costs.

(6) Advance of loan funds under “stop orders” and “special conditional agreements” when the conditions have been met, except when the borrower is delinquent in its loan payments to RUS, or its loans guaranteed by RUS, or when the borrower is in litigation which may affect loan security or the Office of the Administrator has reserved this authority.

(7) Imposition of special controls on the further advance of loan funds when it has been determined that loan feasibility may be jeopardized.

(8) Complete releases of lien and satisfaction in cases where a borrower has repaid its indebtedness in full.

(9) Approval of prepayments in accordance with 7 CFR part 1786 and all related documents.

(10) Cancellation or endorsement due to payment on borrowers’ notes which have been paid in full in connection with a prepayment made under the provisions of 7 CFR part 1786, subpart F.

7 CFR Ch. XVII (1–1–97 Edition)

(c) Matters concerning borrower facilities, organization, or corporate status:

(1) Agreements between electric borrowers for the operation of facilities.

(2) Management and operating agreements between electric borrowers and subsidiary organizations engaged in rural development activities.

(3) Sales and leases of borrowers’ capital assets involving transactions in amounts of \$5,000,000 or less and the related releases of lien.

(4) Use of general funds by a borrower for plant additions in the amount of \$5,000,000 or less, except for facilities subject to power supply surveys or certification by RUS.

(5) Annual review of loan security of borrowers.

(6) Action concerning certain retirements of patronage capital and other cash distributions which meet the following conditions:

(i) The retirement will not reduce total equity to less than 25 percent of total assets and other debits;

(ii) The oldest capital credits outstanding before the retirement are at least 10 years old where the retirement method is first-in, first-out, or the retirement is not more than 7 percent of all outstanding capital credits before the retirement where another method of retirement, authorized by the by-laws, is used; and

(iii) TIER and DSC ratios exceed mortgage minimum, i.e., the average of the highest two of the last 3 years exceeds 1.5 for TIER and 1.25 for DSC.

(7) Approval as a majority note holder of employment contracts between a borrower and its general manager.

(8) Waiver of specified defects in title to property obtained by borrowers.

(9) All equity development plans and amendments to equity development plans except those requiring approval of the Administrator.

(10) Any contracts for the acquisition of plant-in-place of \$5,000,000 or less and related financial transactions.

(d) Letters certifying borrowing eligibility for non-borrower electric cooperatives seeking financing from the Bank for Cooperatives.

Rural Utilities Service, USDA

§ 1700.126

(e) In addition, all authorities conferred upon other persons in §§ 1700.125, 1700.126 and 1700.130.

[59 FR 21624, Apr. 26, 1994, as amended at 59 FR 46724, Sept. 12, 1994]

§ 1700.125 Chiefs, Regional Engineering Branches.

The Chiefs, Regional Engineering Branches in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the electric program with respect to distribution and transmission facilities for distribution borrowers:

(a) The following matters concerning unpaid and outstanding loans and loan guarantees:

(1) Financial requirements and expenditure statements when all conditions precedent to the advance of loan funds have been met, no litigation is pending pertaining to the loan or loan guarantee, the borrower is not delinquent in its loan payments to RUS or in loans guaranteed by RUS, and the Office of the Administrator has not reserved this authority.

(2) Report of vouchers released.

(3) Concurrent loan fund requisitions.

(b) The following matters concerning technical specifications, and borrower facilities and organization, except for matters concerning generation facilities:

(1) Selection by a borrower of an architect; plans and specifications, work orders, and contracts for architectural services for the construction of headquarters, garage, and warehouse facilities requiring RUS approval, and final inventory documents and payments to contractors and architects.

(2) Selection by a borrower of an engineer and contracts for engineering services in cases requiring RUS approval.

(3) Contracts for construction and right-of-way clearing and for the purchase of substation sites and Headquarters facility sites with clear title and special types of equipment requiring RUS approval.

(4) Final inventory documents and payments to contractors and engineers.

(5) Use of nonstandard drawings, materials, and equipment.

(6) Technical engineering studies for transmission, load management,

microwave, Supervisory Control and Data Acquisition (SCADA) and other facilities requiring RUS approval.

(7) Borrowers' selection of a method of construction.

(8) Plans and specifications for construction, preliminary design data and plans, and profile sheets.

(9) Negotiation in lieu of competitive bidding of borrowers' contracts.

(10) Award of contracts for construction of purchase of material and equipment with fewer than three bids.

(11) Long-range engineering plans.

(12) Borrowers' environmental reports.

(13) Amendments to all types of power supply contracts or agreements including extensions of time to existing contracts and superseding contracts with no significant changes; the addition of new delivery points; and modification of existing delivery points between distribution borrowers and non-RUS borrower power suppliers, except where facilities are subject to a power survey or certification by RUS.

(14) Final statements of engineering fees requiring RUS approval, except for generation facilities.

(c) In addition, all other authorities of an engineering nature pertaining to distribution and transmission conferred upon other persons in § 1700.130.

§ 1700.126 Chiefs, Area Operations Branches.

The Chiefs, Area Operations Branches in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the electric program's distribution borrowers:

(a) The following matters with unpaid and outstanding distribution loans.

(1) Affidavits, certificates, filings, and confirmation statements with respect to the recording, filing or renewing of security instruments, including financing statements under the Uniform Commercial Code of the applicable state.

(2) Municipal and county franchises, licenses, ordinances, and permits to construct or operate facilities obtained by borrowers as required by its security instruments.

§ 1700.127

7 CFR Ch. XVII (1–1–97 Edition)

(3) Notice of clearance of RUS loan documents.

(b) Matters concerning borrower facilities, organization, or corporate status:

(1) Sales and leases of borrower's capital assets involving transactions in amounts of \$500,000 or less, except for facilities subject to power supply surveys or certification by RUS.

(2) Partial releases of lien, associated with sales of a borrower's capital assets, involving transactions in amounts of \$500,000 or less.

(3) Approval of large retail power contracts which have not been delegated to the General Field Representatives—Electric.

§ 1700.127 Director—Power Supply Division.

The Director—Power Supply Division in conformance with applicable Regulations and RUS policy is delegated authority to approve or execute for the electric program's power supply borrowers:

(a) Approval of the following loans, loan guarantees, and loan documents:

(1) Approval of insured loans, loan guarantees, and lien accommodations or subordinations in amounts of less than \$10,000,000 for power supply borrowers, except for those approvals reserved for the Administrator in § 1700.72(a).

(2) All certifications and findings required by the RE Act or other applicable laws and regulations, the placing and releasing of conditions precedent to the advance of funds, and all mortgages, loan contracts or other documents relating to the delegations set forth in paragraph (a)(1) of this section.

(b) The following matters for unpaid and outstanding loans:

(1) Rescission of loans or termination of loan guarantee commitments when the amount of the rescission or termination is \$10,000,000 or less, except for discretionary or operating loans.

(2) Requests to extend the period for advancing loan funds when the amount of unadvanced loan funds is \$10,000,000 or less, except for:

(i) Requests from borrowers that are delinquent in their loan payments to RUS, loans guaranteed by RUS or in

litigation that may affect loan security.

(ii) Requests that do not fully comply with the requirements specified in RUS regulations.

(iii) Cases where the Administrator has further reserved this authority.

(3) Execution of basis date agreements for all approved requests to extend the period for advancing loan funds.

(4) Loan budget adjustments (reclassifications or transfers) except when such adjustments would provide funds for:

(i) Changes in generation and transmission facilities that are subject to a power survey or certification by RUS.

(ii) Any proposed change for more than \$10,000,000.

(iii) Any proposed operating costs.

(5) Advance of loan funds under "stop orders" and "special conditional agreements" when the conditions have been met, except when the borrower is delinquent in its loan payments to RUS, loan guaranteed by RUS or when the borrower is in litigation which may affect loan security or the Administrator has reserved this authority.

(6) Imposition of special controls on the advance of loan funds when it has been determined that loan feasibility may be jeopardized.

(7) Approval of prepayments in accordance with 7 CFR part 1786 and all related documents.

(8) Complete releases of lien when a borrower has paid in full its indebtedness.

(9) Approval of mortgages for refinancing transactions, regardless of amount.

(10) Cancellation or endorsement due to payment on borrower's notes which have been paid in full in connection with a prepayment made under the provisions of 7 CFR part 1786, subpart F.

(c) Matters concerning borrower facilities, organization, or corporate status:

(1) Agreements between electric borrowers for operation of facilities.

(2) Management and operating agreements between electric borrowers and subsidiary organizations engaged in rural development activities.

(3) Sales and leases of borrowers' capital assets involving transactions in

Rural Utilities Service, USDA

§ 1700.129

amounts of \$10,000,000 or less and the related releases of lien.

(4) Use of general funds by a borrower for plant additions in the amount of \$10,000,000 or less, except for facilities subject to power supply surveys or certification by RUS.

(5) Annual review of loan security of power supply borrowers.

(6) Approval as a majority noteholder of employment contracts between a borrower and its general manager.

(7) Wholesale power electric rates in connection with power supply contracts.

(8) Waiver of specified defects in title to property obtained by power supply borrowers.

(9) Interconnection Agreements, Wheeling Agreements, non firm Power Sales or Purchase Agreements requiring a construction expenditure of \$10,000,000 or less.

(10) Firm Power Sale or Purchase Agreements with a duration of 3 years or less, which require a construction expenditure of \$10,000,000 or less.

(11) Participation agreements with other utilities on jointly owned facilities for new transmission, subtransmission or distribution facilities requiring an expenditure of \$10,000,000 or less.

(12) Participation agreements with other utilities on jointly owned facilities for generation modifications to existing plant requiring an expenditure of \$10,000,000 or less.

(13) Any contracts for the acquisition of plant-in-place of \$5,000,000 or less and related financial transactions.

(d) In addition, all authorities conferred upon other persons in §§ 1700.128 and 1700.129.

[59 FR 21624, Apr. 26, 1994, as amended at 59 FR 46724, Sept. 12, 1994]

§ 1700.128 Chief, Operations Branch, Power Supply Division.

The Chief, Operations Branch, Power Supply Division in conformance with applicable Regulations and RUS policy is delegated authority to approve or execute for the electric program:

(a) The following matters dealing with outstanding power supply loans.

(1) Affidavits, certificates, filings, and continuation statements with respect to the recording, filing or renew-

ing of mortgages and deeds of trust, including financing statements under the Uniform Commercial Code of the applicable state.

(2) Municipal and county franchises, licenses, ordinances, and permits to construct or operate facilities obtained by borrowers as required by the mortgage.

(3) Notice of Clearance of RUS loan documents.

(4) Approval of large retail power contracts.

(5) Sales, transfers, and partial releases of liens involving sales of borrowers' capital assets with a value of \$500,000 or less.

(b) The following matters concerning unpaid and outstanding loans:

(1) Financial requirements and expenditure statements when all conditions precedent to the advance of loan funds have been met, no litigation is pending pertaining to the loan, the borrower is not delinquent in its loan payments to RUS, loans guaranteed by RUS and the Administrator has not reserved this authority.

(2) Report of vouchers released.

(3) Concurrent loan fund requisitions.

§ 1700.129 Chiefs, Power Engineering Branches, Power Supply Division.

The Chiefs, Power Engineering Branches, Power Supply Division in conformance with applicable Regulations and RUS policy are delegated authority to approve or execute for the electric program for electric power supply borrowers:

(a) The following matters concerning technical specifications, and borrower facilities and organizational issues for power supply borrowers:

(1) Selection by a borrower of an engineer or architect; plans and specifications, work orders, preliminary design data, plans and profile sheets, and contracts for architectural and all engineering services for facilities requiring RUS approval, and final inventory documents and payments to contractors and architects.

(2) Borrowers' selection of method of construction.

(3) Final statements of engineering fees.

(4) Purchase of generating plant sites.

§ 1700.130

(5) Technical engineering studies for generation facilities.

(6) Contracts for the construction and purchase of materials and equipment for generation and transmission facilities.

(7) Use of nonstandard specifications, drawings, materials and equipment.

(8) Negotiation in lieu of competitive bidding of borrowers' contracts.

(9) Award of contracts for construction or purchase of materials and equipment with fewer than three bids.

(10) Amendments to power supply contracts or agreements including extensions of time to existing contracts; the addition of new delivery points; and modification of existing delivery points, except where facilities are subject to a power survey or certification by RUS.

(11) Contracts for construction and right-of-way clearing and for the purchase of substation sites with clear title and special types of equipment requiring RUS approval.

(12) Long-range engineering plans.

(13) Borrower environmental reports.

(14) Interchange agreements and similar agreements where no construction is required.

(15) Interconnection agreements where no construction is required.

(16) Construction Work Plan (CWP) approval for G&T borrowers

(b) The following matters pertaining to the generation facilities of distribution borrowers:

(1) Selection by a borrower of an engineer or architect; plans and specifications, work orders, preliminary design data, plans, and contracts for architectural and all engineering services for facilities requiring RUS approval, and final inventory documents and payments to contractors and architects.

(2) Borrowers' selection of method of construction.

(3) Final statements of engineering fees.

(4) Purchase of generating plant sites.

(5) Technical engineering studies for generation facilities.

(6) Contracts for the construction and purchase of materials and equipment for generation facilities.

(7) Use of nonstandard specifications, drawings, materials and equipment.

7 CFR Ch. XVII (1-1-97 Edition)

(8) Negotiation in lieu of competitive bidding of borrowers' contracts.

(9) Award of contracts for construction or purchase of materials and equipment with fewer than three bids.

(10) The borrower's generation portion of the CWP.

§ 1700.130 General Field Representatives—Electric.

The General Field Representatives—Electric in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the electric program:

(a) Cost estimates and facilities for distribution borrowers' large power applications.

(b) Use of armless or narrow profile construction for distribution in scenic areas or where right-of-way is restricted.

(c) Certificates of completion for distribution and transmission contract construction.

(d) Power requirements and irrigation studies for distribution borrowers:

(1) Without generation facilities;

(2) With an ownership or lease interest in RUS financed generation facilities of less than 40 MW nameplate rating as set forth in "RUS Financed Generating Plants," Information Publication (IP) 200-2, or its equivalent. This publication is available from Publications and Directives Management Branch, Administrative Services Division, Rural Utilities Service, room 0180, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500;

(3) With an ownership or lease interest in RUS financed generation facilities of 40 MW or more, provided the borrower has not received RUS financial assistance for generation capacity of 40 MW or more within 15 years of the borrower's request for RUS approval of its Power Requirements Study; or

(4) That are members of a power supply borrower when the member study is not prepared as part of the power supply borrower's Power Requirements Study.

(e) Amendments to or revisions of previously approved power requirements or irrigation studies for distribution borrowers which are members of a power supply borrower when the amendment or revision is for support of

Rural Utilities Service, USDA

§1700.143

a new loan application to be submitted by the member prior to RUS's approval of a new power-supply Power Requirements Study.

(f) Distribution facilities in construction work plans including amendments and voltage drop, sectionalizing and power factor studies solely for distribution borrowers.

(g) Long-range financial forecasts prepared for distribution borrowers.

(h) Approval, for distribution borrowers, of large retail power contracts for which the borrower's investment in plant facilities does not exceed 10 percent of total utility plant except for distribution borrowers which are members of an RUS financed power supply borrower which is in default under its loan repayments or whose debt has been restructured.

§1700.131 Director, Electric Staff Division.

The Director, Electric Staff Division in conformance with applicable regulations and RUS policy is delegated authority to approve the following:

(a) Power Requirements Studies for:

(1) All power supply borrowers.

(2) All members of a power supply borrower when the members' studies were prepared as part of the power supply borrower's Power Requirements Study.

(3) Distribution borrowers with an ownership or lease interest in generating facilities of 40 MW or more nameplate rating as set forth in RUS Financed Generating Plants (IP 200-2), or its equivalent, provided the borrower has received RUS financial assistance for generating capacity of 40 MW or more within 15 years of the borrower's request for RUS approval of its Power Requirements Study.

(b) Approval of Integrated Resource Plans for power supply and distribution systems and Demand Side Management plans for distribution systems.

§1700.132 Technical Standards Committees "A" and "B"—Electric.

The Technical Standards Committees "A" and "B"—Electric in conformance with applicable regulations and RUS policy are delegated authority to approve for the electric program:

(a) Technical Standards Committee "A"—Electric accepts or rejects all proposals of standard specifications, drawings, material and equipment submitted for acceptance for use in RUS financed electric systems.

(b) Technical Standards Committee "B"—Electric reviews and makes a final decision on cases referred to it by either Committee A or by appeal from a sponsor from an adverse decision made by Committee A.

§§1700.133—1700.139 [Reserved]

Subpart J—Delegations of Authority; Telephone Program

SOURCE: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§1700.140 General.

The delegations in this subpart relating to the RUS telephone program also apply to the Rural Telephone Bank (RTB).

§1700.141 General delegations.

The following delegations of authority for the telephone program in this subpart are made by the Administrator.

§1700.142 Deputy Administrator.

The Deputy Administrator in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the telephone program:

(a) Agreements or contracts covering management or operations services between telephone and electric borrowers.

(b) FEDERAL REGISTER notices announcing the availability of final Environmental Impact Statements and the approval of RUS's final Environmental Impact Statements as well as Findings of No Significant Impact (FONSI).

(c) In addition, all authorities conferred upon other persons in §1700.143.

§1700.143 Assistant Administrator—Telephone.

The Assistant Administrator—Telephone in conformance with applicable

§ 1700.144

regulations and RUS policy is delegated authority to approve or execute for the telephone program:

(a) Loans, loan guarantees and lien accommodations or subordinations of between \$7,500,000 and \$15,000,000 except for those reserved for the Administrator in § 1700.73(a).

(b) Loans and loan guarantees with acquisition costs between \$2,000,000 and \$5,000,000.

(c) Loans and loan guarantees with refinancing amounts between \$2,000,000 and \$5,000,000.

(d) Approval of the following matters concerning unpaid and outstanding loans:

(1) Basis date agreements or agreements for extension of advances and related recommendations;

(2) Budget adjustments for loans made by the Administrator and loan budget adjustments amounting to more than \$2,000,000.

(e) Approval of the following concerning borrower facilities, organization or corporate status:

(1) Field trial installations of telephone materials and equipment involving more than \$250,000;

(2) Approval of the purchase price of properties to be acquired by telephone borrowers when the purchase price exceeds RUS approved appraisal value;

(3) Contracts between \$2,000,000 and \$5,000,000 for acquisition by telephone borrowers of existing facilities in place;

(4) Approval of sales of property and related partial releases of lien in amounts greater than \$500,000 up to \$5,000,000;

(5) Approval of the investment in an affiliate which exceeds the allowable distribution level of more than \$50,000;

(6) Action concerning disapproval of the selection of a manager or an attorney by a telephone borrower;

(7) Agreements for the merger or consolidation of RUS telephone borrowers; and

(8) Waiver of mortgage provisions for payments of dividends or other cash distributions, where such excess payments or distributions exceed \$50,000 in any year.

(f) Memoranda to telephone staff or to two or more telephone borrowers.

7 CFR Ch. XVII (1–1–97 Edition)

(g) Reports and invoices for more than \$100,000 under contracts covering research services performed for RUS in connection with the telephone program.

(h) Approval of staff instructions affecting only the Telephone Program.

(i) All authorities conferred upon other persons in § 1700.144.

§ 1700.144 Deputy Assistant Administrator—Telephone.

The Deputy Assistant Administrator—Telephone in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the telephone program:

(a) Revisions of the borrower's capital structure by amendment to its charter or bylaws or by issuance of additional shares of stock.

(b) In addition, all authorities conferred upon other persons in §§ 1700.145 and 1700.149.

§ 1700.145 Regional Directors.

The Regional Directors in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the telephone program:

(a) The following loans, loan guarantees, and lien accommodations or subordinations except for those approvals reserved by the Administrator in § 1700.73(a):

(1) Loans, loan guarantees and lien accommodations or subordinations of \$7,500,000 or less.

(2) Loans and loan guarantees with acquisition costs of less than \$2,000,000.

(3) Loans and loan guarantees containing refinancing for less than \$2,000,000.

(b) The following loan documents and related actions:

(1) Interim financing requests.

(2) Special loan contract conditions, except for changes in such conditions for loans made by the Administrator or the Assistant Administrator.

(3) Waivers of contract conditions for release of funds.

(4) Loan designs.

(5) Characteristics letters to loan applicants setting forth loan requirements proposed for inclusion in pending loan recommendations.

Rural Utilities Service, USDA

§ 1700.146

(6) Loan contracts and security instruments, except for loans made by the Administrator.

(c) The following matters concerning outstanding loans:

(1) Telephone loan fund releases.

(2) Telephone loan rescissions.

(3) Loan budget adjustments, except for:

(i) Loans approved by the Administrator.

(ii) Adjustments greater than \$2,000,000.

(4) The placement of special controls on the advance of loan funds when it has been determined that loan security may be affected, except when the Administrator has further reserved this authority.

(5) Advance of loan funds under “special conditional agreements” and special controls when the conditions have been met, except when the Administrator has reserved this authority.

(6) Lien accommodations or subordinations granted to other parties by RUS or the RTB for amounts of less than \$7,500,000.

(7) Principal deferments under Section 12 of the RE Act for Rural Economic Development Investments.

(8) Complete releases of lien and satisfaction when a borrower has paid in full its indebtedness.

(d) The following matters concerning borrower facilities, organization, and corporate status:

(1) Increases in salaries and other compensations to be paid to borrowers’ officers, directors and managers when RUS approval is required under the mortgage.

(2) Borrowers’ requests to waive competitive bidding procedures.

(3) Award of contracts (bid approval) for construction and central office equipment.

(4) Selection by telephone borrowers of force account engineering and construction.

(5) Waiver of specified special defects in title and rights-of-way.

(6) Field trial installations of telephone materials and equipment involving \$250,000 or less, jointly with Director, Telecommunications Standards Division (TSD).

(7) Waiver of mortgage provisions relating to a borrower’s payment of divi-

dends or other cash distributions when such excess payments or distributions do not exceed \$50,000 in any year.

(8) Approval of the investment in an affiliate of general funds that is within the allowable distribution level.

(9) Approval of sales or transfers of property and related partial releases of lien of more than \$100,000 up to \$500,000.

(10) Contracts for acquisition by telephone borrowers of existing facilities in place of less than \$2,000,000.

(11) Approval of employment contracts with the borrower’s general manager.

(12) Use of materials, equipment, and specifications not yet accepted by RUS.

(13) Letters certifying borrowing eligibility for non-borrower telephone organizations seeking financing from the Bank for Cooperatives.

(14) In addition, all authorities conferred upon other persons in §§ 1700.146, 1700.147, 1700.148.

[59 FR 21624, Apr. 26, 1994, as amended at 59 FR 46724, Sept. 12, 1994]

§ 1700.146 Chiefs, Regional Engineering Branches—Telephone.

The Chiefs, Regional Engineering Branches—Telephone in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the telephone program:

(a) The following matters for unpaid and outstanding loans:

(1) Financial Requirement Statements, RUS Form 481; and

(2) Construction loan budget adjustments except those involving change of loan budget purposes or new or revised administrative findings.

(b) The following matters concerning technical specifications and borrower facilities and organization:

(1) The selection by a borrower of an engineer or an architect and contracts for engineering and architecture services;

(2) Final inventory documents and payments to contractors and engineers;

(3) Statements of final engineering fees;

(4) Borrowers’ proposals and cost estimates for force account engineering and construction;

§ 1700.147

(5) Plans and specifications for central office equipment, radio, and microwave equipment, garage and warehouse buildings and for non-standard central office equipment buildings;

(6) All major construction contracts. Major construction shall be defined as any project estimated to cost more than \$250,000 in total;

(7) Borrowers' proposals for purchase of additions and modifications to central office equipment;

(8) Borrowers' Environmental Reports; and

(9) Borrowers' Outside Plant Layouts.

(c) In addition, all authorities conferred upon other persons in § 1700.148 (a) and (b).

[59 FR 21624, Apr. 26, 1994, as amended at 59 FR 46724, Sept. 12, 1994]

§ 1700.147 Chiefs, Regional Operations Branches—Telephone.

The Chiefs, Regional Operations Branches—Telephone in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the telephone program:

(a) The following matters concerning unpaid and outstanding loans:

(1) Affidavits, certificates, filings, and continuation statements with respect to the recording, filing or renewing of mortgages and deeds of trust, including financing statements under the Uniform Commercial Code of the applicable state after clearance when necessary by OGC;

(2) Municipal and county franchises obtained by borrowers from the standpoint of acceptability for RUS loans;

(3) State regulatory body orders and approvals from the standpoint of acceptability for RUS loans;

(4) Special legal fees to be paid by borrowers from loan funds; and

(5) Non-construction loan budget adjustment items, except those involving legal or policy questions or new or revised administrative findings.

(b) The following matters concerning borrower organization or corporate or capital structure:

(1) Certificates regarding a borrower's incorporation and Articles of In-

7 CFR Ch. XVII (1–1–97 Edition)

corporation and Bylaws and changes in a borrower's corporate name;

(2) Forms of stock and equity certificates;

(3) Borrowers' cash sales of material and equipment, excluding property in place, when approval is required and releases of lien and all other documents relating to such sales;

(4) Borrowers' insurance and fidelity coverage;

(5) Borrowers' lease agreements;

(6) Approval, in amounts up to \$100,000 of sales of property and related partial releases of lien;

(7) Purchase or lease of real estate by borrowers; and

(8) Management and operating agreements. When the borrowers involved are in more than one region, both chiefs must approve.

(c) In addition, all authorities conferred upon other persons in § 1700.148(c).

[59 FR 21624, Apr. 26, 1994, as amended at 59 FR 46724, Sept. 12, 1994]

§ 1700.148 General Field Representatives—Telephone.

The General Field Representatives—Telephone in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the telephone program:

(a) Plans and specifications for RUS standard Form 772, central office buildings, or borrower specific standardized central office building plans and specifications, repeaters, standardized lightwave equipment, subscriber carrier and trunk carrier. Also, outside plant plans and specifications that conform to an approved design.

(b) Outside plant contracts up to \$250,000 and all other construction and equipment contracts less than \$100,000.

(c) Results of the Area Coverage Survey.

§ 1700.149 Director—Telecommunications Standards Division.

The Director—Telecommunications Standards Division in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the telephone program:

Rural Utilities Service, USDA

§ 1700.171

(a) Reports and invoices up to \$100,000 submitted under contracts covering research services performed for RUS in connection with the telephone program.

(b) Field trial installations of telephone materials and equipment involving \$250,000 or less, jointly with the appropriate regional director.

§ 1700.150 Technical Standards Committees “A” and “B”—Telephone.

The Technical Standards Committees “A” and “B”—Telephone in conformance with applicable regulations and RUS policy are delegated authority to approve for the telephone program:

(a) Technical Standards Committee “A”—Telephone accepts or rejects all proposals of standard specifications, drawings, material and equipment submitted for acceptance for use on RUS financed telephone systems.

(b) Technical Standards Committee “B”—Telephone reviews and makes a final decision on cases referred to it by Committee “A” or by appeal from a sponsor from an adverse decision of Committee “A”.

§§ 1700.151—1700.159 [Reserved]

Subpart K—Delegations of Authority; Financial Services

SOURCE: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.160 General.

The following delegations of authority in this subpart are made by the Administrator to the Financial Services Staff for assigned loan servicing projects.

§ 1700.161 Program Advisor, Financial Services Staff.

The Program Advisor, Financial Services Staff in conformance with applicable regulations and RUS policy is delegated authority to approve and execute for the Financial Services Staff (FSS):

(a) Approval in amounts of less than \$25,000,000 for:

- (1) The use of general funds; or
- (2) Sales and transfers of property and related releases of lien.

(b) Disapproval of the selection of a manager or attorney by a borrower.

(c) Power supply contracts and agreements including wholesale power, fuel, interconnections, wheeling, participation agreements, lease agreements for facilities or properties, and power sales agreements with non-RE Act beneficiaries.

(d) Wholesale power rates.

(e) Contracts for the construction and purchase of materials and equipment.

(f) Retail rate contracts between borrowers and others relating to large power installations.

(g) Additional authorities, as specifically delegated by the Administrator, necessary to effectively resolve troubled borrower situations.

(h) Authority to execute or testify, consistent with USDA Departmental Regulations, on behalf of RUS as follows:

(1) Affidavits and certificates concerning borrowers assigned to FSS.

(2) Testify on behalf of the Agency before regulatory bodies or courts on matters pertaining to borrowers assigned to the FSS.

§ 1700.162—1700.169 [Reserved]

Subpart L—Delegations of Authority; Financial Operations Activities

SOURCE: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.170 General.

The following delegations of authority in this subpart are made by the Administrator to the Financial Operations Division (FOD).

§ 1700.171 Deputy Administrator.

The Deputy Administrator in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for FOD all authorities conferred upon other persons in this subpart.

§ 1700.172

§ 1700.172 Director, Financial Operations Division.

The Director, Financial Operations Division in conformance with applicable regulations and RUS policy is delegated authority to approve and execute for FOD:

(a) Standard Form 1151, Nonexpendable Transfer Authorization, for the following activities related to loans made to the Administrator of RUS by the Secretary of Treasury under authority of section 3(a) and 304 of the RE Act:

(1) Advances of principal on notes executed by the Administrator; and

(2) Payment of principal on loans made by the Administrator.

(b) Letters to the Federal Financing Bank (FFB) granting RUS approval to requests from borrowers, which are concurred in by the applicable Regional Director in the Electric or Telephone program for:

(1) Extensions of short-term maturity dates of advances on the specified maturity date;

(2) Prepayment of short-term maturities, including prepayment for the purpose of extending to long-term prior to the scheduled maturity date; and 7

(3) Prepayments of long-term maturities.

(c) Endorsements or assignments on promissory notes or other collateral pledged by borrowers as security for loans, as may be necessary in connection with the return of such documents to borrowers, due to the payment of the obligations in full or in order that the borrowers may institute legal action thereon or in connection therewith and the transmittal to the borrowers of such promissory notes or other collateral pledged by the borrower.

(d) Cancellation or endorsement due to payment on the borrowers' notes which have been paid in full or which are to be returned to borrowers by reason of the cancellation of such notes resulting from the receipt of RUS of funding, renewal or substituted notes and transmittal to the borrower.

(e) Actions concerning borrower loan accounting, computations, procedures and policies.

7 CFR Ch. XVII (1–1–97 Edition)

(f) Liaison responsibility with the Federal Financing Bank, the Department of Treasury.

(g) Liaison responsibility with General Accounting Office (GAO).

(h) In addition, all authorities conferred upon other persons in § 1700.173.

§ 1700.173 Chief, Loans Receivable Branch.

The Chief, Loans Receivable Branch in conformance with applicable regulations and RUS policy is delegated authority to approve and execute for FOD:

(a) Preparation and forwarding of Energy Resource Conservation (ERC) loan documents to the Office of the General Counsel (OGC).

(b) Preparation and forwarding of basis date agreements to OGC.

Subpart A—[Reserved]

Subpart B—Rural Economic Development Loan and Grant Program

SOURCE: 57 FR 44317, Sept. 25, 1992, unless otherwise noted.

§ 1703.10 Purpose.

(a) This subpart sets forth RUS's policies and procedures for making zero-interest loans and grants to borrowers in accordance with the cushion

§ 1703.11

of credit payments program authorized in section 313 of the Act (7 U.S.C. 940c).

(b) The zero-interest loans and grants are provided for the purpose of promoting rural economic development and job creation projects.

§ 1703.11 Policy.

(a) It is RUS's policy that borrowers use the Rural Economic Development Loan and Grant Program to promote projects that will result in a sustainable increase in the productivity of economic resources in rural areas and thereby lead to a higher level of income for rural citizens.

(b) It is RUS's policy that borrowers promote economic development in rural areas and job creation projects that:

(1) Are based on sound economic and financial analyses; and

(2) Take a long-term perspective.

(c) It is RUS's policy to direct the funds under this program to projects which are located in, or will primarily benefit, those rural areas that are experiencing the greatest economic hardship.

(d) It is RUS's policy to encourage economic development in rural areas and job creation projects without regard to service area.

(e) It is RUS's policy to encourage borrowers to make cushion of credit payments.

(f) It is RUS's policy to maintain liaisons with officials of other Federal, state, regional and local rural development agencies to coordinate this program with other rural economic development programs.

§ 1703.12 Definitions.

Act—the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

Administrator—the Administrator of the Rural Utilities Service or the Administrator's designee.

Approved purpose—a purpose that the Administrator has specifically approved in the letter of agreement covering the use of the RUS zero-interest loan and/or grant funds provided to the borrower.

Borrower—an entity that has outstanding RUS and/or Rural Telephone Bank (RTB) loan(s) or loan guaran-

7 CFR Ch. XVII (1–1–97 Edition)

tee(s) for an electric or telephone purpose under the provisions of the Act.

Business incubator—a facility in which small businesses can share premises, support staff, computers, software or hardware, telecommunications terminal equipment, machinery, janitorial services, utilities, or other overhead expenses, and where such businesses can receive technical assistance, financial advice, business planning services or other support. The business incubator program, however, does not necessarily have to involve the sharing of premises.

Cushion of credit payment—a voluntary unscheduled payment made after October 1, 1987, on an RUS note, which is credited to the cushion of credit account of a borrower.

Demonstration Project—a project for which the owner agrees in writing to provide RUS, if requested, with detailed information on the steps it takes in organizing and operating the project, will permit RUS and RUS's guests to make reasonable visits to the project, and honor any other reasonable RUS request to disseminate information on the project. Examples of information include a description of incorporation procedures, types of financing obtained, permits required by governments, amount of time required for various stages of the project, sources of technical assistance from government programs, private foundations or trade organizations, any experiences or lessons that the owner wishes to share with the public and other information which will assist RUS in promoting similar projects. It will not require the disclosure of trade secrets or proprietary techniques.

Electric or telephone purpose—a purpose that:

(1) The Administrator or Governor of the RTB is authorized to finance under sections 2, 4, 5, 201, 305, and 408 of the Act; or

(2) Is characterized as furnishing, generating or transmitting electric energy or other activities involved in providing electricity, or is characterized as providing telephone service. It will include electric and telephone facilities and equipment used in connection with providing such a service. It will not include a relatively insignificant amount

Rural Utilities Service, USDA

§ 1703.12

of customer premises equipment, as determined by the Administrator.

Job creation—creation of jobs in rural areas. This includes the implementation of a project in close enough proximity to rural areas so that it is likely that the majority of the jobs created will be held by rural residents.

Letter of agreement—a legal document executed by the Administrator and the borrower that contains certain terms, conditions, requirements and understandings applicable to the zero-interest loan and/or grant, as determined by the Administrator.

Letter of credit—a commitment from a financial institution satisfactory to the Administrator to honor a draft drawn on the RUS borrower should the RUS borrower fail to pay on a zero-interest loan.

Pass-through-grant—a grant that the borrower makes to another entity that will own or undertake the project using the proceeds of the RUS grant.

Pass-through-loan—a loan that the borrower makes to another entity that will own or undertake the project using the proceeds of the RUS zero-interest loan.

Project—an undertaking that develops the economy of a rural area or results in job creation. As used in subpart B, the term “project” includes both direct undertakings by borrowers as well as those sponsored by other parties using the proceeds of pass-through-loans or pass-through-grants. It is the component or phase of the undertaking for which the borrower is requesting RUS funds, as determined by the Administrator.

Project feasibility studies—studies, analyses, designs, reports, manuals, guides, literature, or other forms of creating and/or disseminating information for use in evaluating or developing a proposed project. For example, it would include market research and environmental studies.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

Reasonable loan servicing charges—charges for expenses the borrower incurs to service a loan provided to an-

other entity unaffiliated with the borrower using the proceeds of the RUS zero-interest loan. The charges over the life of the loan for routine loan servicing expenses must not exceed an amount equal to the sum of one percent per year of the outstanding principal on the first day of each year on the borrower's RUS zero-interest loan. The charges for extraordinary expenses associated with collection of delinquent payments or other similar expenses must receive the prior approval of the Administrator.

Revolving loan program—a program established and operated by the Borrower, using grant funds, the Borrower's contribution and loan repayments to make loans to businesses or others for rural economic development and job creation purposes.

RTB—the Rural Telephone Bank, established as a body corporate and an instrumentality of the United States, to obtain supplemental funds from non-Federal sources and utilize them in making loans, for the purposes of financing, or refinancing, the construction, improvement, expansion, acquisition, and operation of telephone lines, facilities, or systems, for RUS Borrowers financed under sections 201 and 408 of the Act.

Rural area—a rural area as defined in section 13 of the Act.

Rural economic development—job creation or preservation or community facilities improvement projects that clearly demonstrate significant benefits to rural areas.

Rural economic development account—a federally insured account into which the borrower deposits any advances of zero-interest loan funds from RUS until the borrower disburses the funds.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

§ 1703.13

Scope of work—a detailed plan, which has been approved by the Administrator, covering the work to be performed by the loan and/or grant recipient using the loan and/or grant funds.

Significant stockholder—an owner or holder of five percent or more of the common stock (or shares) or five percent or more of the preferred stock (or shares) of the RUS borrower.

Subaccount—the rural economic development subaccount created by section 313 of the Act.

Technical assistance—analysis of facilities or processes, managerial, financial and operational consultation by independent qualified entities to assist project owners to identify and evaluate problems or potential problems and provide training to enable project owners to successfully implement, manage, operate and maintain viable projects.

Tribal government—The governing body or a governmental agency of any Indian tribe, band, nation, or other organized group or community (including any Native village as defined in 43 U.S.C. 1602) certified by the Secretary of the Interior as eligible for the special programs and services provided through the Bureau of Indian Affairs.

[57 FR 44317, Sept. 25, 1992, as amended at 59 FR 11706, Mar. 14, 1994; 59 FR 53930, Oct. 27, 1994; 59 FR 66440, Dec. 27, 1994]

§ 1703.13 Source of funds.

Funds provided under this program come from interest differential credits to the subaccount and appropriated amounts made available to the subaccount.

§ 1703.14 Disposition of funds in the subaccount.

Zero-interest loans and grants will be made during each fiscal year to the full extent of the amounts held in the subaccount subject only to limitations imposed by law. For administrative purposes, the Administrator will make a determination of the fiscal year-end amount held in the subaccount as of a date prior to, but as near as practicable to, the end of the fiscal year.

7 CFR Ch. XVII (1–1–97 Edition)

§ 1703.15 [Reserved]

§ 1703.16 Eligibility.

Zero-interest loans and grants may be made to any borrower that is not delinquent on any outstanding Federal debt or in bankruptcy proceedings. However, a zero-interest loan or grant will not be made to a borrower during any period in which the Administrator has determined that no additional financial assistance of any nature should be provided to the borrower pursuant to any provision of the Act. The determination to suspend eligibility for assistance under this subpart will be based on one or more of the following factors:

(a) The borrower's demonstrated unwillingness to exercise diligence in repaying RUS loans or loan guarantees that results in the Administrator being unable to find that a loan, or loan guaranteed by RUS, would be repaid within the time agreed;

(b) The borrower's demonstrated unwillingness to meet requirements in RUS's legal documents or regulations; or

(c) Other actions on the part of the borrower that thwart the achievement of the objectives of the RUS program.

§ 1703.17 Uses of zero-interest loans and grants.

(a) Zero-interest loans and grants must be used exclusively to promote rural economic development and/or job creation projects, including, but not limited to, project feasibility studies, start-up costs, business incubator projects, and other reasonable expenses for the purpose of fostering rural economic development.

(b) The Administrator will give preference to providing funds under this subpart for projects other than business incubator projects to the extent funds are available to borrowers for business incubator projects from a rural business incubator fund administered by the Administrator in accordance with section 502 of the Act (7 U.S.C. 950aa–1).

(c) Zero-interest loans and grants may be used for Projects that enhance

Rural Utilities Service, USDA

§ 1703.18

rural economic development by providing advanced telecommunications services and computer networks for medical and educational services, as follows: (1) For telecommunications end use and/or transmission facilities; and (2) Other portions of the project, such as modifications to buildings necessary to accommodate telecommunications equipment for medical care and other services, public or private education, and employment training.

(d) Zero-interest loans and grants may be used for community antenna television systems or facilities. The borrower will document that such facilities provide a tangible economic benefit to the proposed service area in accordance with § 1703.46 of this subpart. Notwithstanding this, the Administrator reserves the right to deny any proposal for community antenna television systems or facilities. Community antenna television systems or facilities will be considered for funding in accordance with § 1703.46 of this subpart and this section only when all of the following conditions exist:

(1) The proposed community antenna television system or facility is established in cooperation with a local educational and/or medical entity(ies) to provide educational and/or medical programming which addresses specific needs of rural residents;

(2) Services to be provided by the proposed community antenna television systems or facilities are not available in the area to be served, or services are not being provided by the existing television programming carrier at an affordable cost to residents; and

(3) Such community antenna systems or facilities will not present undue competition for existing television programming carriers in the area.

[57 FR 44317, Sept. 25, 1992, as amended at 59 FR 11706, Mar. 14, 1994; 59 FR 53930, Oct. 27, 1994]

§ 1703.18 Types of projects eligible for grant funding.

Grants may be made for the following purposes:

(a) The establishment and operation of a revolving loan program by Borrowers in accordance with § 1703.22;

(b) Project feasibility studies to assist for-profit and non-profit entities in

conjunction with a loan for an authorized project. Feasibility studies will include management assistance, consultation, and research for planning individual projects that the Borrower has determined will benefit the rural community. Feasibility studies which may be financed under this section must be performed by qualified entities subject to § 1703.19, General requirements for grant funding. Feasibility studies must address the important aspects of project assessment and planning to ensure, to the extent practicable, the success of projects. These include the market, technical, economic, financial, and managerial issues related to project feasibility. Feasibility studies may be funded in connection with viable projects as a reimbursement to the project owner for expenses incurred during the initial planning stages of the project prior to project funding by RUS;

(c) The acquisition of technical assistance in conjunction with projects funded with zero-interest loans to enable for-profit and non-profit entities to obtain analysis of facilities and processes, managerial, financial and operational consultation. Grant funds may also be used in conjunction with zero-interest loans to enable non-profit business incubators to provide technical assistance. Technical assistance will enable project owners to identify and evaluate problems or potential problems and provide training in order that they may ultimately implement, manage, operate and maintain viable projects which are financed with zero-interest loan funds. Technical assistance financed under this section must be performed by qualified entities which are independent of the project owner subject to § 1703.19, General requirements for grant funding;

(d) Business incubators established by non-profit organizations to assist in developing emerging enterprises. Business incubators funded in conjunction with zero-interest loans will include those facilities in which single or multiple businesses may use premises, support staff, computer software, hardware, telecommunications equipment, machinery, janitorial services, utilities, or other overhead facilities. Grant funding may also be provided to allow

§ 1703.19

business incubators to provide feasibility studies and technical assistance in accordance with paragraphs (b) and (c) of this section;

(e) Community development assistance to non-profit entities and public bodies for employment creation projects, or other projects which provide needed community facilities and services;

(f) Facilities and equipment to public, for-profit and non-profit entities to provide education and training to rural residents to facilitate economic development. Equipment and facilities may be funded to enable rural businesses to provide educational and job enhancement skills to employees;

(g) Facilities and equipment to public, for-profit and non-profit entities to provide medical care to rural residents. Equipment and facilities may be funded to enable eligible entities to provide medical training and related professional health care skills to rural health care providers;

(h) Projects which utilize advanced telecommunications and/or computer networks to facilitate medical or educational services or job training in accordance with paragraphs (f) and (g) of this section.

[59 FR 11706, Mar. 14, 1994, as amended at 59 FR 38341, July 28, 1994]

§ 1703.19 General requirements for grant funding.

(a) Grants made under § 1703.18(a), establishment and operation of a revolving loan program by Borrowers, will be limited to Borrowers and can be made without zero-interest loans. Grants made under § 1703.18 (b) through (h) will be made only in conjunction with zero-interest loans, and on a pass-through basis.

(b) Pass-through grant funding for projects under § 1703.18 (b), (c), (f), (g) and (h) will be available for non-profit and for-profit entities. Pass-through grant funding for projects under § 1703.18 (d) and (e) will be available only for non-profit entities.

(c) All projects funded with zero-interest loans and grants will require supplemental funding in accordance with § 1703.23. For grants made under § 1703.18(a), the portion eligible for RUS funding may be fully funded with grant

7 CFR Ch. XVII (1-1-97 Edition)

funds. For all other grants funded under § 1703.18, the portion of project costs eligible for RUS funding may be funded up to 20 percent with grant funds.

(d) Grant funding will be provided only to the extent necessary for a feasible project. A feasible project is a project which expects to generate sufficient income to pay operating expenses and debts and compensate for depreciation of equipment and facilities for the project which is to be funded by RUS. Depreciation must be based on allowable depreciation schedules as set forth by the United States Internal Revenue Service. Borrowers whose analyses of projects show feasibility without grant funds should not apply for grant funding. Borrowers requesting pass-through grant funds will base grant funding requests on borrower projected income and expense projections for the project, and documentation regarding depreciation of the equipment and facilities for the project. The Administrator will determine whether the Borrower's projections of income, expenses and depreciation are reasonable.

(e) For projects that project insufficient operating revenue the first two years to show feasibility, borrowers should first consider the deferral provisions set forth in § 1703.29(b) before determining the appropriate level of requested grant funding. Zero-interest loan and grant funding will be approved in accordance with paragraph (d) of this section based on the option which results in the lowest required grant percentage.

(f) The owner of the pass-through project that receives grant funds will be encouraged to commit that the project will be a demonstration project.

(g) Borrowers or project owners must demonstrate the availability and commitment of other sources of funding needed to complete a project in addition to RUS loan and/or grant funds, prior to the first advance of RUS funds.

(h) Feasibility studies and/or technical assistance funded with grants under § 1703.18 (b) and (c) must be performed by entities which are independent of the Borrower and qualified to provide such services. The project

Rural Utilities Service, USDA

§ 1703.20

owner, if deemed qualified in accordance with this paragraph, may furnish a feasibility study under §1703.18(b). Entities furnishing technical assistance under §1703.18(c), must be independent of the project owner. To be deemed qualified, entities providing feasibility studies and/or technical assistance must:

(1) Provide sufficient documentation evidencing their proven ability, background and experience to furnish such services; and

(2) Provide sufficient documentation evidencing their legal authority and capacity to furnish such services.

[59 FR 11706, Mar. 14, 1994]

§ 1703.20 Ineligible uses of zero-interest loans and grants.

(a) Zero-interest loans and grants must not be used:

(1) To fund or assist projects of which any director, officer, general manager or significant stockholder of the Borrower, or close relative thereof, is an owner, stockholder, partner or director, or which would, in the judgment of the Administrator, create a conflict of interest or the appearance of a conflict of interest. The Borrower must disclose to the Administrator information regarding any conflict of interest, potential conflict of interest or any appearance of a conflict of interest. The Administrator will determine whether there is a conflict of interest or whether any potential conflict of interest or appearance of a conflict of interest may adversely affect RUS's interests. A Borrower organized as, or consisting of a cooperative, widely held mutual corporation, tribal government, municipal power corporation, public power district, or a similar widely held organization would ordinarily be able to have an ownership interest in or manage a project operated on either a for-profit or non-profit basis. A Borrower organized as a closely held, for-profit corporation with more than 5 percent of its stock held by one legal person, its subsidiary or an affiliate, would ordinarily be able to own or manage a project operated on a non-profit basis only;

(2) For any costs incurred on the project: (i) Prior to receipt of the Borrower's completed application by RUS

during an application period unless the Administrator has specifically approved such usage in writing; or

(ii) For site development, the destruction or alteration of buildings, or other activities that would adversely affect the environment or limit the choice of reasonable alternatives prior to satisfying the requirements of §1703.32;

(3) By the Borrower to purchase or lease any real property, materials, equipment, or services from its subsidiary, an affiliate, or significant stockholders, officers, managers or directors of the Borrower, or close relatives thereof, where the purchase or lease has not been fully disclosed to the Administrator and received the Administrator's prior written approval;

(4) By the recipient of a pass-through-loan or pass-through-grant to purchase or lease any real property, materials, equipment, or services from the Borrower, its subsidiary, an affiliate of the Borrower, or significant stockholders, officers, managers or directors of the Borrower, or close relatives thereof, where the purchase or lease has not been fully disclosed to the Administrator and received the Administrator's prior written approval;

(5) To pay off or refinance existing indebtedness incurred prior to receipt of the Borrower's completed application by RUS or for refinancing or repaying a loan made under the Act or a program administered by the Administrator;

(6) For any electric or telephone purpose, as determined by the Administrator;

(7) For the Borrower's electric or telephone operations or for any operations affiliated with the Borrower unless the Administrator has specifically informed the Borrower in writing that the operations are part of the approved purposes;

(8) To pay the salaries of any employee or owner of the Borrower, its subsidiaries, or affiliates. This restriction does not prohibit the use of loan or grant funds for printing and similar costs for project feasibility studies it has prepared, commissioned or purchased if specifically approved by the Administrator. This restriction is subject to the operating expense allowance

§ 1703.21

for revolving loan funds set forth in § 1703.22 (a)(6);

(9) To fund feasibility studies and technical assistance as set forth in § 1703.18 independently of projects which are funded under the zero-interest loan and grant program;

(10) For community antenna television systems or facilities except as provided in § 1703.17(d) of this subpart;

(11) For proposed projects located in areas covered by the Coastal Barrier Resources Act (16 U.S.C. 3501 *et seq.*); or

(12) For anything other than an approved purpose.

(b) [Reserved]

[59 FR 11707, Mar. 14, 1994, as amended at 59 FR 53930, Oct. 27, 1994]

§ 1703.21 Limitations on the use of zero-interest loan and grant funds.

(a) A borrower may not charge interest for the use of the proceeds of the zero-interest loan provided under this program; however, it may charge reasonable loan servicing charges, reasonable legal fees involved in providing the RUS funds to the recipient, and the amount paid for an irrevocable letter of credit made payable to RUS and issued on behalf of the borrower that guarantees repayment of an RUS zero-interest loan, all as determined by the Administrator. A borrower may require the recipient of a pass-through-loan to provide and/or obtain adequate security for the zero-interest loan funds.

(b) A borrower must calculate any costs to charge in connection with the use of grant funds under this program for the project and must temporarily deposit the grant funds in accordance with 7 CFR parts 3015, Uniform Federal Assistance Regulations, and 3016, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments, as appropriate. Grant funds will be disbursed to the Borrower in accordance with § 1703.61(b).

(c) A borrower may not make a profit from any zero-interest loan or grant provided from the subaccount, with the exception of the \$500 interest income exclusion in paragraph (d) of this section.

(d) The Borrower may not requisition zero-interest loan funds unless those funds are deposited into the Borrower's

7 CFR Ch. XVII (1–1–97 Edition)

RUS construction fund trustee account. The Borrower will be required to set up a separate Federally insured account called the Rural Economic Development Account, if loan funds are not expected to be disbursed within two months after receipt from RUS. All interest earned on temporarily deposited zero-interest loan funds in excess of \$500 per 12-month period must be used for approved purposes or returned to RUS. Interest earned in excess of \$500 per 12 month period and returned to RUS will not be used to reduce the Borrower's principal indebtedness. Grant funds will be disbursed by RUS in accordance with 7 CFR parts 3015 and 3016, and § 1703.61 (b).

(e) The borrower may not condition the receipt of the proceeds of a zero-interest loan or grant under this subpart with the requirement that the recipient take electric or telephone service from the borrower.

[57 FR 44317, Sept. 25, 1992, as amended at 59 FR 11708, Mar. 14, 1994]

§ 1703.22 Revolving loan program.

Grant funds under this section will be provided only to RUS Borrowers on a non pass-through basis. RUS Borrowers will, in turn, provide loans to foster rural economic development in accordance with this subpart and the specific requirements of this section.

(a) *General.* Grant funds disbursed to RUS Borrowers to establish revolving loan programs under this section are subject to the following requirements:

(1) The uses, restrictions and limitations for zero-interest loans set forth in §§ 1703.17, 1703.20 and 1703.21 respectively;

(2) Loans made by RUS Borrowers initially lending grant funds disbursed by RUS are limited to types of projects specified in § 1703.18 (d), (e), (f), (g) and (h). Loans may also be made for feasibility studies and technical assistance in accordance with § 1703.18 (b) and (c), respectively, but only for those types of projects specified in this paragraph (a)(2). Loans made from repayments of the initial loans made by RUS Borrowers may be used for any rural economic development purpose in accordance with a prior agreement between the Borrower and RUS;

Rural Utilities Service, USDA

§ 1703.22

(3) All other requirements relevant to zero-interest pass-through loans and grants outlined in this subpart, except the minimum size of a zero-interest loan as specified in § 1703.28(f);

(4) The initial loans made from the revolving loan fund using the grant funds must carry an interest rate of zero percent; however, loans made from repayments of the initial loan may carry an interest rate in accordance with prior agreement with RUS. In either case, the Borrower may charge reasonable loan servicing fees;

(5) The Borrower will provide a board resolution certifying a commitment to provide and maintain additional funding to the revolving loan fund in an amount no less than 20 percent of the RUS grant approved. The Borrower will provide documentation that the additional funding has been deposited in the appropriate account in § 1703.22(h)(1) prior to grant disbursement. This requirement does not pertain to supplemental funding requirements for individual projects as set forth in § 1703.23. Additional funding required in this paragraph pertains only to borrowers establishing revolving loan funds, with the following provisions:

(i) Use of additional funding is subject to requirements set forth in paragraph (b) of this section and with RUS concurrence;

(ii) Individual projects funded under this section are subject to supplemental funds requirements set forth in § 1703.23;

(iii) At the Borrower's option with RUS concurrence, all or a portion of the additional funding may be used to assist project owners receiving funding from Federal grant funds under this section to meet their supplemental funding requirements set forth in § 1703.23 of this subpart. Such additional funding will be deemed as Federal funds and accounted for in accordance with paragraph (h)(1)(i)(A) of this section for electric borrowers or paragraph (h)(1)(ii)(A) of this section for telephone borrowers, as appropriate;

(iv) At the Borrower's option, all or a portion of the additional funding may be retained as non-Federal funds, for any rural economic development project(s), subject to paragraph (g) of

this section and RUS concurrence. Additional funding committed as non-Federal will be accounted for in accordance with paragraph (h)(1)(i)(E) of this section for electric borrowers or paragraph (h)(1)(ii)(E) of this section for telephone borrowers, as appropriate;

(6) Grant funds will only be provided to an RUS Borrower for a revolving loan program when a proposed budget submitted to RUS demonstrates and the Borrower agrees in writing that no more than 10 percent of grant funds received are used to cover operating expenses of the revolving loan program. Operating expenses include the costs of administering the revolving loan fund and the provision of technical assistance to project owners. All proceeds in excess of those needed to cover authorized expenses, as described above, must revert to the revolving fund and be available for re-lending for eligible projects. Budgets which reflect expenses incurred in operating the fund must be submitted to RUS annually;

(7) The Borrower may charge reasonable loan servicing charges. For purposes of this section, loan servicing charges must not exceed an amount equal to the sum of one percent per year of the outstanding principal on the first day of each year on each project owner's zero-interest loan which is made from the RUS grant proceeds;

(8) The Borrower will submit documentation indicating that potential projects which are eligible for funding have sufficiently progressed in the planning stage to allow grant funding approved for a revolving loan program to be requisitioned by the Borrower, disbursed by RUS, and loaned to recipients within 3 years of the date of grant approval by RUS. Grant funds that have not been requisitioned within 3 years will be cancelled, unless the Administrator has approved an extension in writing. Grant funds will be disbursed by RUS in accordance with paragraphs (d) and (g) of this section;

(9) If the revolving loan program is terminated, further disbursement of grant funds will be cancelled. Repayments of loans made using grant funds which have been disbursed will be used

§ 1703.22

7 CFR Ch. XVII (1–1–97 Edition)

in accordance with the Borrower's rural development plan;

(10) Payment of creditors which provide interim or construction financing to a viable project for eligible purposes as set forth in § 1703.18 of this subpart may be authorized. Refinancing for the sole purpose of replacing higher interest conventional financing with zero-interest revolving loan funds is not authorized.

(b) *The Borrower's rural development plan.* RUS requires that the revolving loan program be administered in accordance with a rural development plan, developed by the Borrower and approved by RUS. The plan must be of sufficient detail to provide RUS with a complete understanding of what the Borrower intends to accomplish by administering a revolving loan program. The rural development plan will provide the mechanics of how the revolving loan funds will be disbursed to the project owner. The rural development plan must outline the Borrower's plans for administering the revolving loan program, during the initial period when RUS grant funds are lent by the Borrower and after the revolving fund becomes non-Federal in accordance with paragraph (g) of this section. The plan must outline the following:

(1) Specific objectives for the revolving loan program, revolving loan operating procedures, lending parameters, maximum and minimum loan amount, and types of projects to be funded;

(2) Documentation of Borrower's coordination of lending activities with other local entities that provide financing for rural economic development projects. Such documentation will indicate that the Borrower will not compete with, but supplement other sources of legal financing;

(3) Eligibility criteria if other than outlined in this subpart;

(4) The application process and method of disposition of the funds to the project owner; and

(5) A procedure for monitoring the project owner's accomplishments and reporting requirements by the project owner's management.

(c) *The Borrower's scope of work.* Borrowers applying for grant funding under this section must submit a scope of work to RUS. Applications for

grants under this section will be evaluated for funding based on the Borrower's rural development plan in paragraph (b) of this section and the scope of work. The scope of work must contain the following items:

(1) Documented need for grant funds. The Borrower must identify a sufficient number of rural development projects of the type specified in § 1703.18 (d), (e), (f), (g), and (h) which are currently being planned requiring zero-interest loans equal to the amount of grant assistance requested from RUS. These projects may be supported with a community facilities plan, or other development plan, prepared by local community leaders in cooperation with the Borrower. For each project, the Borrower will submit information required under § 1703.34;

(2) Documented authority and ability of the Borrower to administer a revolving rural development loan program in accordance with the provisions of this subpart. The Borrower must provide a complete listing of all personnel responsible for administering this program along with a statement of their qualifications and experience;

(3) Documented ability of the Borrower to commit financial resources under the control of the Borrower to assist in the establishment of a rural development revolving loan program. This should include a statement of the sources of funding for the administration of the Borrower's operations, as well as financial and technical assistance for projects;

(4) Documentation that the Borrower has secured commitments of significant financial support from public agencies and/or private organizations for supplemental funding to support a rural development loan program;

(5) A list of proposed fees and other charges the Borrower will assess the projects it funds; and

(6) The Borrower's rural development policy for non-Federal funds in accordance with paragraphs (b) and (g) of this section.

(d) *Grant processing and approval.* Applications for grants to establish revolving loan funds will be reviewed in accordance with §§ 1703.45 and 1703.46, and with the Borrower's rural development plan and scope of work outlined

Rural Utilities Service, USDA

§ 1703.22

in paragraphs (b) and (c) of this section. Grants will be processed in accordance with §§ 1703.58 and 1703.59.

(e) *Disbursement of grant funds.* Borrowers are not authorized to commence projects to be funded under this section until those projects have been submitted for authorization in accordance with paragraph (c)(1) of this section, or the projects have been submitted for authorization subsequent to grant approval in accordance with paragraph (e)(2) of this section. RUS grant funds will be disbursed on a reimbursement basis. However, upon written justification by borrowers and approval by the Administrator, borrowers unable to fund projects under reimbursement provisions, for financial or other extraordinary reasons, may receive grant funds under the special disbursement method by submitting unpaid invoices from project owners, and grant funds will be disbursed to borrowers and passed directly to project owners. In either case, RUS grant funds will be disbursed in accordance with the provisions of 7 CFR Part 3015, Uniform Federal Assistance Regulations, the applicable requirements of this subpart, the administrative provisions outlined in paragraph (g) of this section, and the following requirements:

(1) Only projects authorized by RUS in accordance with paragraphs (c)(1) and (e)(2) of this section, for which adequate documentation is submitted, including receipts for expenditures under the reimbursement method or unpaid invoices under the special disbursement method, as applicable, and certification of approved purposes, will be considered for disbursement;

(2) A project which was not submitted prior to grant approval in accordance with paragraph (c)(1) of this section, may be authorized for funding subsequent to grant approval. A project which is authorized for funding under this paragraph will be considered for disbursement at the first allowable time period after project authorization in accordance with paragraphs (e)(3) and (e)(4) of this section. Project authorization after grant approval is subject to the following requirements:

(i) The project meets the specific objectives for the Borrower's revolving

loan program as outlined in paragraph (b)(1) of this section;

(ii) The Borrower presents evidence that the project requested for authorization can be funded prior to projects which were authorized prior to grant approval in accordance with paragraph (b)(1) of this section; and

(iii) RUS approves the project for funding in accordance with § 1703.34;

(3) Under the reimbursement method, grant funds requisitioned for individual projects in increments of less than \$100,000, or less than 25 percent of the amount approved for the revolving loan fund, whichever is less, may be disbursed semi-annually. Submission periods for requisitioning grant funds on a semi-annual disbursement basis will be 14 days commencing from the 6-month anniversary date of grant approval. Grant funds under the special disbursement method will be requisitioned in accordance with the applicable provision in paragraph (e)(4) of this section;

(4) For the reimbursement method, grant funds requisitioned for individual projects in increments of \$100,000 or greater, or at least 25 percent of the amount approved for the revolving loan fund, whichever is less, may be submitted for disbursement at any time. Under the special disbursement method, grant funds of less than \$100,000 may be requisitioned for disbursement at any time. However, the minimum requisition will be \$50,000, or the total grant award, whichever is less.

(f) *Reporting requirements.* (1) The Borrower must maintain financial management systems and retain financial records in accordance with 7 CFR part 3015, Uniform Federal Assistance Regulations.

(2) Borrower records must include an accurate accounting and source documentation to support each transaction involving the revolving loan fund. Records are subject to a rural economic loan review as set forth in § 1703.66(g).

(3) SF-269, "Financial Status Report," and a revolving loan program activity report will be required of all Borrowers on an annual basis. Reports will be submitted no later than 90 days after December 31 of each year. The program activity report will contain an aggregate list of projects funded, the

§ 1703.22

amount funded for each project, the project repayment schedule, a brief description of each project, the project objectives, whether or not the project has been completed, and the projected number of jobs created or saved by each project. Reports under this paragraph will be required until all grant funds have been disbursed and projects completed.

(4) A performance report will be required for each project funded on an annual basis. Performance reports will be due no later than 90 days after December 31 of each year. Performance reports will be submitted until one year after project completion. Project performance reports will contain the following:

(i) A comparison of actual accomplishments during the reporting period to the objectives established for the project and, if not attained, reasons why established objectives were not met;

(ii) Problems, delays, or adverse conditions which will materially affect attainment of planned project objectives, prevent the meeting of time schedules or objectives, or preclude the attainment of project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or contemplated to resolve the situation;

(iii) Projected accomplishments for the next reporting period, if applicable; and

(iv) Status of compliance with any special conditions for project funding, if applicable.

(5) Borrowers must report and remit interest earned on advances of grant funds deposited in interest accounts to RUS on a quarterly basis in accordance with 7 CFR part 3015, Uniform Federal Assistance Regulations.

(g) *Non-Federal funds.* Once all RUS-derived grant funds have been utilized by the Borrower to fund rural development projects according to the provisions of this section and the applicable provisions of this subpart, loans made by the Borrower thereafter from repayments to the revolving loan fund shall not be considered as being derived from Federal funds and the requirements of these regulations will not be imposed on the Borrower or project owners.

7 CFR Ch. XVII (1–1–97 Edition)

However, the Borrower will, as a condition for receiving a grant under this section, agree to the following conditions:

(1) To maintain a revolving loan account to promote rural economic development in accordance with the Borrower's rural development plan for non-Federal funds submitted in accordance with paragraph (b) of this section;

(2) To maintain the additional funding supplied by the Borrower in accordance with paragraph (a)(5) of this section and interest earnings within the revolving loan fund;

(3) Approval may be granted by the Administrator to terminate the revolving loan program, or modify the requirements set forth in paragraphs (g)(1) and (g)(2) of this section, upon written request and justification by the Borrower. Should the Borrower terminate the revolving loan program without obtaining approval by the RUS Administrator, the Borrower will return the amount of the original grant to RUS.

(h) *Administrative provisions.* The requirements of this paragraph set forth the procedures for accounting, requisitioning and disbursement of Federal funds, those funds initially disbursed for projects which may be funded in accordance with an approved rural development plan and scope of work submitted by the Borrower. Disbursement of grant funds will be approved on a reimbursement basis after the grant agreement is executed by RUS and the Borrower, the applicable provisions of this subpart are met, subject to disbursement restrictions in paragraph (e) of this section, and the requirements in paragraphs (h) (1) through (3) of this section.

(1) *Accounting requirements.* Accounting will be performed in accordance with 7 CFR part 1767, Accounting Requirements for RUS Electric Borrowers, or 7 CFR part 1770, Accounting Requirements for RUS Telephone Borrowers, as appropriate. The Borrower will maintain accounts for the revolving funds as follows:

(i) *RUS electric Borrowers.* (A) A general ledger Account 131.13, "Cash-General—Economic Development Grant Funds." The Borrower will debit this account in an amount equal to the

Rural Utilities Service, USDA

§ 1703.22

amount of the grant received from RUS, any additional funds deemed Federal from the Borrower as required by paragraph (a)(5)(iii) of this section, and all other funds advanced for the project, regardless of the source, if controlled by the Borrower. The Borrower will credit this account for all expenditures made with Federal funds on behalf of the rural development project.

(B) A general ledger Account 124.1, “Other Investments—Federal Economic Development Loans.” The Borrower will debit this account in the amount of Federal funds the Borrower advances to non-associated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in Account 131.13 in paragraph (h)(1)(i)(A) of this section. This account will be credited with repayments of loans made with Federal economic development grant funds.

(C) A general ledger Account 123.3, “Investment in Associated Companies—Federal Economic Development Loans.” The Borrower will debit this account in the amount of Federal funds the Borrower advances to associated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in Account 131.13 in paragraph (h)(1)(i)(A) of this section. This account will be credited with repayments of loans made with Federal economic development grant funds.

(D) Account 421, “Miscellaneous Non-operating Income.” The Borrower will credit this account in the amount of grant funds disbursed by RUS resulting from an approved requisition request in accordance with paragraph (h)(2) of this section.

(E) A general ledger Account 131.14, “Cash-General—Economic Development Non-Federal Revolving Funds.” The Borrower will debit this account with any additional funds deemed non-Federal from the borrower as required by paragraph (a)(5)(iv) of this section, cash received from the repayment of loans made from accounts in paragraphs (h)(1)(i)(B), (h)(1)(i)(C), (h)(1)(i)(F), and (h)(1)(i)(G) of this section. The Borrower will credit this account to reflect loans made for rural economic development projects from

non-Federal funds from accounts specified in paragraphs (h)(1)(i)(F) and (h)(1)(i)(G) of this section.

(F) A general ledger Account 124.2, “Other Investments—Non-Federal Economic Development Loans.” The Borrower will debit this account in the amount of non-Federal funds the Borrower advances to non-associated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in Account 131.14, in paragraph (h)(1)(i)(E) of this section. This account will be credited with repayments of loans made from non-Federal economic development funds.

(G) A general ledger Account 123.4, “Investment in Associated Companies—Non-Federal Economic Development Loans.” The Borrower will debit this account in the amount of non-Federal funds the Borrower advances to associated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in Account 131.14, in paragraph (h)(1)(i)(E) of this section. This account will be credited with repayments of loans made from non-Federal economic development funds.

(H) A general ledger Account 171 “Interest and Dividends Receivable.” The Borrower will debit this account with the amount of interest earned on the revolving loan fund. The Borrower will credit this account and debit the appropriate cash account when the cash is received.

(I) A general ledger Account 419, “Interest and Dividend Income.” The Borrower will credit this account with the amount of interest earned on the revolving loan fund.

(ii) *RUS telephone Borrowers.* (A) A general ledger Account 1130.4, “Cash—General Fund—Economic Development Grant Funds (Class A Companies)”, or Account 1120.14, “Cash-General Fund—Economic Development Grant Funds (Class B Companies).” The Borrower will debit the appropriate account in an amount equal to the amount of the grant received from RUS, any additional funds deemed Federal from the Borrower required by paragraph (a)(5)(iii) of this section, and all other

§ 1703.22

funds advanced for the project, regardless of the source, if controlled by the Borrower. The Borrower will credit the appropriate account for all expenditures made with Federal funds on behalf of the rural development project.

(B) A general ledger Account 1402.4, “Other Investments in Nonaffiliated Companies—Federal Economic Development Grant Loans.” The Borrower will debit this account in the amount of Federal funds the Borrower advances to nonaffiliated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in the appropriate account in paragraph (h)(1)(ii)(A) of this section. This account will be credited with repayments of loans made from Federal economic development grant funds.

(C) A general ledger Account 1401.1, “Other Investments in Affiliated Companies—Federal Economic Development Grant Loans.” The Borrower will debit this account in the amount of Federal funds the Borrower advances to affiliated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in the appropriate account in paragraph (h)(1)(ii)(A) of this section. This account will be credited with repayments of loans made from Federal economic development grant funds.

(D) Account 7360, “Other Non-operating Income (Class A Companies)”, or Account 7300, Non-operating Income and Expense (Class B Companies), as appropriate. The Borrower will credit these accounts, as appropriate, in the amount of grant funds disbursed by RUS resulting from an approved requisition request in accordance with paragraph (h)(2) of this section.

(E) A general ledger Account 1130.5, “Cash—General Fund—Economic Development Non-Federal Revolving Funds (Class A Companies)”, or Account 1120.15, “Cash—General Fund—Economic Development Non-Federal Revolving Funds (Class B Companies)”, as appropriate. The Borrower will debit the appropriate account with any additional funds deemed non-Federal from the Borrower as required by paragraph (a)(5) of this section, cash received from the repayment of loans made

7 CFR Ch. XVII (1–1–97 Edition)

from accounts in paragraphs (h)(1)(ii)(B), (h)(1)(ii)(C), (h)(1)(ii)(F), and (h)(1)(ii)(G) of this section. The Borrower will credit the appropriate account to reflect loans made for rural economic development projects from non-Federal funds from accounts specified in paragraphs (h)(1)(ii)(F) and (h)(1)(ii)(G) of this section.

(F) A general ledger Account 1402.5, “Other Investments in Nonaffiliated Companies—Non-Federal Economic Development Grant Loans.” The Borrower will debit this account in the amount of non-Federal funds the Borrower advances to nonaffiliated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in the appropriate account in paragraph (h)(1)(ii)(E) of this section. This account will be credited with repayments of loans made from non-Federal economic development funds.

(G) A general ledger Account 1401.2, “Other Investments in Affiliated Companies—Non-Federal Economic Development Grant Loans.” The Borrower will debit this account in the amount of non-Federal funds the Borrower advances to affiliated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in the appropriate account in paragraph (h)(1)(ii)(E) of this section. This account will be credited with repayments of loans made from non-Federal economic development funds.

(H) A general ledger Account 1210, “Interest and Dividends Receivable.” The Borrower will debit this account with the amount of interest earned on the revolving fund loan. The borrower will credit this account and debit the appropriate cash account when the cash is received.

(I) A general ledger Account 7320, “Interest Income (Class A Companies)”, or Account 7300.2, “Interest Income (Class B Companies)”, as appropriate. The Borrower will credit this account with the amount of interest earned on the revolving fund loans.

(2) *Requisition requirements.* Grant funds may be requisitioned by RUS Borrowers in accordance with disbursement requirements in paragraph (e) of

Rural Utilities Service, USDA

§ 1703.28

this section. Borrowers will be fully reimbursed for funds expended for approved projects funded. For each completed project, the Borrower will submit the following for reimbursement:

(i) Standard Form 270, "Request for Advance of Reimbursement";

(ii) Copies of cancelled checks and other verifiable source records supporting the transactions; and

(iii) Certification and evidence that the project costs to be reimbursed are for a project which has been authorized by RUS and are authorized costs for that project.

(3) *RUS review.* Requisition requests will be evaluated for compliance with loan purposes previously submitted by the Borrower for project authorization in accordance with paragraphs (c)(1) or (e)(2) of this section, compliance with the Borrower's rural development plan, accounting documentation submitted in paragraph (h)(1) of this section, and the cancelled checks and source records submitted.

[59 FR 11708, Mar. 14, 1994, as amended at 59 FR 38341, July 28, 1994; 59 FR 53931, Oct. 27, 1994]

§ 1703.23 Supplemental funds requirements for zero-interest loans and grants.

The Administrator will not select an application unless the project will receive supplemental funds in an amount at least equal to 20 percent of the RUS zero-interest loan and grant to be provided to the project, as determined by the Administrator. Supplemental funds as used in this section may come from the project owner in the form of equity funds, private sources, state and local government sources, other Federal Government sources, the borrower or other sources. Only supplemental funds that will be provided to the project after the date RUS receives the borrower's completed application may be used to satisfy this requirement. Supplemental financing must be verified and committed to the project in form and substance satisfactory to the Administrator before RUS will advance any funds.

§ 1703.24 [Reserved]

§ 1703.25 Significance of RUS financing to the total project cost.

Selection of applications will be based on a preference for applications requesting RUS financing which will be at least equal to 5 percent of the total project costs, as determined by the Administrator. Projects costs will be based on the amount that would be spent over the first 2 years after the first advance of RUS funds for the component or phase of the undertaking for which the borrower is requesting RUS funds, as determined by the Administrator. The Administrator may determine that a component or phase, especially actions necessary to initiate a larger project, constitute a distinct project for the purposes of this section.

§ 1703.26 [Reserved]

§ 1703.27 Owner's equity in the project.

The Administrator may require, as a condition to RUS financing, that the owner(s) of the project invest equity capital if determined to be financially necessary, based on an RUS financial analysis and sound lending practices.

§ 1703.28 Maximum and minimum sizes of a zero-interest loan or grant application.

(a) The maximum size of an application that will be considered for funding under this subpart during a fiscal year will be 3 percent of the projected total amount available for the zero-interest loans or grants under section 313 of the Act during that fiscal year, rounded to the nearest \$10,000. This determination will be made by the Administrator for each fiscal year.

(b) Regardless of the projected total amount that will be available, the maximum size may not be lower than \$200,000.

(c) The projected total amount available during a particular fiscal year is calculated as the sum of the projected amount that will be credited to the subaccount during a particular fiscal year from the interest differential calculation based on the RUS borrowers' cushion of credit levels at the time the

§ 1703.29

Administrator makes the determination and any amounts appropriated for that fiscal year for zero-interest loans or grants made under section 313 of the Act.

(d) After the Administrator has determined the maximum size for a fiscal year, a notice of the calculation and amount will be published promptly in the FEDERAL REGISTER. Thereafter, the maximum size will remain in effect until the Administrator has published the maximum size for the next fiscal year.

(e) All unselected applications on file at RUS, including both loan and grant applications, from the same borrower for the same project will be considered to be one application in determining that the maximum size of the application is in accordance with this section.

(f) The minimum size of an application for assistance under this subpart that will be considered for funding is \$10,000.

[57 FR 44317, Sept. 25, 1992, as amended at 59 FR 11711, Mar. 14, 1994]

§ 1703.29 Terms of zero-interest loan repayment.

(a) The Administrator will determine the terms and repayment schedule of the zero-interest loan to the borrower based on the nature of the project and approved purposes. Ordinarily, the total term of the zero-interest loan, including any principal deferment period, will not exceed 10 years. The repayment terms the borrower sets on a pass-through-loan must equal the terms of the loan provided to the borrower unless a written request from the borrower to provide a longer deferment period, shorter total term of the loan, or other benefits is approved by the Administrator.

(b) The Administrator has the discretion to defer the repayment of principal up to two years, based on an analysis of the feasibility of the project. Ordinarily, if the Administrator considers the project to be a business expansion or going concern, the first repayment of principal will not begin until one year after the date of the RUS note. Ordinarily, if the Administrator considers the project to be a start-up project, the first repayment of principal will not begin until 2 years

7 CFR Ch. XVII (1–1–97 Edition)

after the date of the RUS note. Loans must be repaid under terms set forth in RUS's legal documents.

(c) Unless the Administrator has specifically approved otherwise, the borrower will be required to repay the RUS zero-interest loan in full at such time as a pass-through-loan has been fully repaid to the borrower. If the borrower uses the proceeds of the RUS zero-interest loan to provide pass-through-loans to more than one entity, this requirement will only apply to that portion of the zero-interest loan associated with the loan that has been fully repaid to the borrower.

(d) If the Administrator determines that, as a result of state law, court rulings, or regulatory commission decisions, it is necessary to ensure that the borrower will repay the RUS zero-interest loan, the borrower may be required to provide an irrevocable letter of credit, or another form of guarantee satisfactory to the Administrator. The letter of credit or other guarantee is to be made payable to RUS. The letter of credit or other guarantee may not be secured by any assets under a RUS and/or Rural Telephone Bank mortgage and must be in form and substance satisfactory to the Administrator. RUS must receive the letter of credit or other guarantee prior to the advance of any zero-interest loan funds.

§ 1703.30 Approval of agreements.

(a) The Administrator must approve any agreements between the borrower and the owner(s) of the project, those undertaking the project, or any intermediary that will re-lend or transfer the proceeds of the RUS funds, that the Administrator deems necessary.

(b) Borrowers must obtain the Administrator's approval of any loan, grant or security agreement, mortgage or note between the borrower and the owner(s) of the project, those undertaking the project or any intermediary that will re-lend or transfer the proceeds of the RUS funds, prior to the advance of RUS zero-interest loan or grant funds to the borrower. The borrower must receive the Administrator's approval of the final draft version of the documents prior to their execution.

(c) Borrowers must obtain the Administrator's written approval prior to

Rural Utilities Service, USDA

§ 1703.33

revising or amending any loan, grant or security agreement, mortgage or note that has been reviewed and approved by the Administrator pursuant to paragraph (b) of this section. Additionally, the borrower must obtain the Administrator's written approval prior to executing, revising or amending any other agreement, in connection with the project, between the borrower and the owner(s) of the project, those undertaking the project or any intermediary that will re-lend or transfer the proceeds of the RUS funds.

(d) The borrower and the owner(s) of the project, or those undertaking the project, should make agreements and prepare documents in accordance with all applicable laws.

(Approved by the Office of Management and Budget under control number 0572-0090)

[57 FR 44317, Sept. 25, 1992, as amended at 59 FR 11711, Mar. 14, 1994; 59 FR 38341, July 28, 1994]

§ 1703.31 Transfer of employment or business.

The project must not result primarily in the transfer of any existing employment or business activity from one area to another.

§ 1703.32 Environmental requirements.

(a) Prospective recipients of zero-interest loans or grants should consider the potential environmental impact of their proposed projects at the earliest planning stage and plan development in a manner that reduces, to the extent practicable, the potential to affect the quality of the human environment adversely.

(b) *Application for zero-interest loans or grants for project feasibility studies.* For a proposal to fund a project feasibility study, the only environmental information normally required is whether or not the proposed project being studied or analyzed will be located within an area protected under the Coastal Barrier Resources Act (16 U.S.C. 3501 *et seq.*) Generally, the use of Federal funds to promote development on coastal barriers is strictly limited by the Coastal Barriers Resources Act.

(c) *Application for zero-interest loans or grants for a project that is not considered project feasibility studies.* (1) The Administrator will review support materials

in the application and initiate an environmental review process pursuant to 7 CFR part 1794. This process will focus on any environmental concerns or problems that are associated with the project.

(2) The level and scope of the environmental review will be determined in accordance with the National Environmental Policy Act of 1969 (NEPA), as amended, (42 U.S.C. 4321 *et seq.*), the Council on Environmental Policy for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500—1508), RUS's environmental policies and procedures (7 CFR part 1794) and other relevant Federal environmental laws, regulations and Executive Orders.

(3) Activity related to the project that will adversely affect the environment or limit the choice of reasonable alternatives must not be undertaken prior to completion of RUS's environmental review process.

§ 1703.33 Other considerations.

(a) *Equal opportunity and non-discrimination requirements.* All zero-interest loans and grants made under this subpart are subject to the non-discrimination provisions of title VI of the Civil Rights Act of 1964, as amended, (42 U.S.C. 1971 *et seq.*, 1975a *et seq.*, 2000a *et seq.*; 7 CFR part 15); section 504 of the Rehabilitation Act of 1973, as amended, (29 U.S.C. 701 *et seq.*; 7 CFR part 15b); the Age Discrimination Act of 1975, as amended, (42 U.S.C. 6101 *et seq.*; 45 CFR part 90); and Executive Order 11246, Equal Employment Opportunity, (3 CFR, 1964—1965 Comp., p. 339) as amended by Executive Order 11375, Amending Executive Order 11246, Relating to Equal Employment Opportunity (3 CFR, 1966—1970 Comp., p. 684).

(b) *Architectural barriers.* All facilities financed with RUS zero-interest loans or grants that are open to the public or in which physically handicapped persons may be employed or reside must be designed, constructed, and/or altered to be readily accessible to, and usable by handicapped persons. Standards for these facilities must comply with the Architectural Barriers Act of 1968, as amended, (42 U.S.C. 4151 *et seq.*) and with the Uniform Federal Accessibility Standards (UFAS), (Appendix A to 41 CFR part 101.19, subpart 101-19.6).

§ 1703.34

(c) *Flood hazard area precautions.* In accordance with 7 CFR part 1788, if the project is in an area subject to flooding, flood insurance must be provided to the extent available and required under the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4001 *et seq.*). The insurance must cover, in addition to the buildings, any machinery, equipment, fixtures and furnishings contained in the buildings. RUS will comply with Executive Order 11988, Floodplain Management (3 CFR, 1977 Comp., p. 117), and § 1794.41 of this chapter, in considering the application for the project. As set forth in § 1794.41 of this chapter, public notice is required if a project will be located in a floodplain.

(d) *Uniform relocation assistance.* Relocations in connection with this program are subject to 49 CFR part 24 as referenced by 7 CFR Part 21, Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs except that the provisions in Title III, Uniform Real Property Acquisition Policy, of the Uniform Relocation Assistance and Real Property Acquisition Act of 1970, as amended, (42 U.S.C. 4601–4655) (the “Uniform Act”) do not apply to this program.

(e) *Drug-free workplace.* Grants made under this program are subject to the requirements set forth in 7 CFR part 3017, subpart F, Drug-Free Workplace Requirements, which implements the Drug-Free Workplace Act of 1988 (41 U.S.C. 701 *et seq.*). A borrower requesting a grant will be required to certify that it will establish and make a good faith effort to maintain a drug-free workplace program.

(f) *Debarment and suspension.* The requirements of Executive Order 12549, Debarment and Suspension (3 CFR, 1986 Comp., p. 189), and 7 CFR part 3017, subparts A through E, Governmentwide Debarment and Suspension (Non-procurement), regarding debarment and suspension are applicable to this program.

(g) *Intergovernmental review of Federal programs.* (1) This program is subject to the requirements of Executive Order 12372, Intergovernmental Review of Federal Programs (3 CFR, 1982 Comp., p. 197) and 7 CFR part 3015, subpart V,

7 CFR Ch. XVII (1–1–97 Edition)

Intergovernmental Review of Department of Agriculture Programs and Activities, which implements Executive Order 12372.

(2) With the exception of zero-interest loans and grants for project feasibility studies, proposed projects are subject to the state and local government review process set forth in 7 CFR part 3015. Under the review process, state and local governments have 60 days to comment on the proposed project.

(3) The Administrator will not give final approval to an application until the requirements of 7 CFR part 3015, subpart V, regarding state and local government review have been satisfied.

(h) *Restrictions on lobbying.* (1) The restrictions and requirements imposed by 31 U.S.C. 1352, entitled “Limitation on Use of Appropriated Funds to Influence Certain Federal Contracting and Financial Transactions” and the implementing regulation, 7 CFR part 3018, New Restrictions on Lobbying, are applicable to this program. ca 7v15.018

(2) The regulation that implements this statute requires applicants for a zero-interest loan in excess of \$150,000 and applicants for a grant in excess of \$100,000 to file a certification statement regarding the use of Federal appropriated funds to lobby the Executive and Legislative branches of the Federal Government, and to file a disclosure form if engaged in these activities using unappropriated funds.

(3) In addition, persons that receive contracts or subcontracts in excess of \$150,000 under a zero-interest loan and persons that receive subgrants, contracts or subcontracts in excess of \$100,000 under a grant are required to file certification statements regarding lobbying the Executive and Legislative branches and, if engaged in these activities, to file disclosure forms.

§ 1703.34 Applications.

(a) Borrowers may file an application on any official workday during the first 14 days of every month. A borrower must send a copy of the application, except for an application that requests a zero-interest loan or grant for project feasibility studies, to the state single point of contact for state and local governments at the same time it

Rural Utilities Service, USDA

§ 1703.34

submits the application to RUS. As discussed in §1703.33(g), state and local governments have 60 days to review a borrower's proposal before the Administrator gives final approval to an application, except a proposal for project feasibility studies. The Administrator may establish a special application period if determined necessary.

(b) A completed application will consist of an original and two copies of:

(1) *An application form.* The application must include a completed application form, "Application for Federal Assistance," Standard Form 424;

(2) *A board resolution.* The application must include a board resolution that:

(i) Requests a zero-interest loan and/or grant, including the amount of the zero-interest loan and/or the amount of the grant rounded to the nearest 1,000 dollars;

(ii) Includes the total combined deferment and repayment period requested for a zero-interest loan if less than 10 years;

(iii) Includes the board's endorsement of the proposed rural economic development project as described in the application;

(iv) States the proposed project does not violate §§1703.20 and 1703.21; and discloses any information regarding a conflict of interest, potential conflict of interest, or appearance of a conflict of interest that would allow the Administrator to make an informed decision;

(v) Authorizes an official of the borrower to requisition zero-interest loan or grant funds under this program;

(vi) For an application for a grant only, authorizes the chief executive officer of the borrower to execute and deliver on behalf of the borrower the certification Form AD-1049 regarding a drug-free workplace program as required in part 3017, subpart F of this title; and

(vii) Any other matters deemed necessary by the Administrator;

(3) *Miscellaneous Federal forms.* The application must include the following completed forms:

(i) Form AD-1047, "Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions," as required in

part 3015, subparts A through E of this title; and

(ii) Assurance statement or certification statement required under the Uniform Act as set forth in §1703.33(d). For pass-through-loans and pass-through-grants, the ultimate recipient of the proceeds of the RUS zero-interest loan or grant must sign the assurance statement that it will comply with the applicable provisions of the Uniform Act or sign a certification that the provisions of the Uniform Act will not apply to the rural development project which will be partially financed with the proceeds of RUS funds. If the borrower will not provide a pass-through-loan or pass-through-grant to another entity, the borrower must submit a completed assurance statement or certification regarding the applicable provisions of the Uniform Act, or have such an assurance statement on file at RUS;

(4) *Contingent certifications and disclosures.* As determined by the type and amount of requested funds, the application must include the following completed forms:

(i) For an application for a zero-interest loan in excess of \$150,000 or for an application for a grant in excess of \$100,000, a certification statement, "Certification Regarding Lobbying," and, if the borrower is engaged in lobbying activities described under §1703.33(h), a completed disclosure form, "Disclosure of Lobbying Activities"; and

(ii) For an application for a grant only, a completed certification form, "Certification Regarding Drug-Free Workplace Requirements (Grants)," Form AD-1049 as required in part 3017, subpart F of this title;

(5) *Other requirements.* The following:

(i) A section entitled "Selection Factors" as set forth in §1703.35;

(ii) A section entitled "Project Description" as set forth in §1703.36;

(iii) Except for applications for project feasibility studies, a section entitled "Environmental Impact of the Project" as set forth in §1703.37;

(iv) Monitoring plan. For a pass-through loan and/or grant, a copy of the Borrower's plan to monitor the loan and/or grant and ensure that the

§ 1703.35

7 CFR Ch. XVII (1–1–97 Edition)

requirements of this subpart are met; and

(v) Scope of work. For an application for a loan and/or grant, a proposed scope of work for the project.

(c) The Administrator may request additional information it considers relevant from the borrower.

(d) During the application review process, the borrower may change the amount of the zero-interest loan or grant funds requested or other portions of its application, only if approved by the Administrator. A borrower that changes its request from a grant to a zero-interest loan must submit information necessary for the Administrator to evaluate a loan proposal as set forth in this subsection, and submit a new board resolution requesting the loan.

(The information collection requirements contained in paragraph (b) of this section were approved by the Office of Management and Budget under control number 0572-0090)

[57 FR 44317, Sept. 25, 1992, as amended at 59 FR 11711, Mar. 14, 1994; 59 FR 38341, July 28, 1994]

§ 1703.35 Section of the application covering the selection factors.

The application must contain a section addressing the “selection factors” consisting of the following:

(a) “Nature of the project” (§1703.46(g)(1)), which includes any information considered appropriate including aspects of the project that may not be obvious to an outside observer;

(b) “Job creation project” (§1703.46(g)(2)), which includes any information that is not readily apparent concerning whether the project would directly create jobs in rural areas. The number of the jobs and the basis for the job projection should be included under “Number of long-term jobs”;

(c) “Long-term improvements in economic development” (§1703.46(g)(3)), which addresses the extent to which the project will improve the productive potential of the labor force, industrial plant, infrastructure, natural resources and institutions by employing advanced technology, creating higher-skilled occupations, adding higher value to natural resources, creating jobs with higher-career potential, or is

considered part of a knowledge intensive industry;

(d) “Diversifying the rural economy or alleviating underemployment” (§1703.46(g)(4)), which includes any information the borrower desires the Administrator to consider;

(e) “Supplemental funds” (§1703.46(h)(1)), which includes the name of each source and the respective amount of supplemental funds that was provided to the project within 6 months of submitting the application to RUS, and the amount that will be provided within two years of receiving RUS funds. Also indicate the nature and strength of the commitments to make these supplemental funds available, when these funds are expected to be disbursed, any special terms and conditions associated with the commitments, copies of the commitments, and, if established, the interest rate, term and deferment period on any loan for the project;

(f) “Economic conditions and job creation” (§1703.46(h)(2)), which includes:

(1) “Unemployment rates” (§1703.46(h)(2)(i)). List the county or counties in which the project will be located. It is not necessary to include the county, state or national unemployment rates. RUS obtains these rates from other Federal agencies;

(2) “Per capita personal income” (§1703.46(h)(2)(ii)). As with “Unemployment rates,” it is not necessary to include the county, state or national per capita personal income levels;

(3) “Change in population” (§1703.46(h)(2)(iii)). It is not necessary to include the county population levels;

(4) “Number of long-term jobs” (§1703.46(h)(2)(iv)). Include the number of long-term jobs that the project will directly create in rural areas and the total project cost;

(5) “Community-based economic development program” (§1703.46(h)(2)(v)). Explain if the project is part of a community-based economic development program; and

(6) “Plan for improving the marketable skills of people in rural areas” (§1703.46(h)(2)(vi)). Include information on any written plan for the project to provide opportunities or incentives to improve the marketable skills of rural

Rural Utilities Service, USDA

§ 1703.36

residents through training and/or education. For projects that consist of providing training or education, indicate how it will benefit rural residents;

(g) “Location” (§ 1703.46(h)(3)), which indicates whether or not the project will be located in a town and, if so, the name of the town;

(h) “Support for the program—cushion of credit payments” (§ 1703.46(h)(4)), which mentions any cushion of credits payments made recently in accounts at RUS;

(i) “Demonstration project” (§ 1703.46(h)(5)), which includes a discussion of any commitments from the owner(s) of the project to be a demonstration project and a copy of the written commitment;

(j) “Probability of success” (§ 1703.46(h)(6)), which includes:

(1) “Owners and management of the project” (§ 1703.46(h)(6)(i)) that discusses how the knowledge, experience, education and training of the proposed owners and management of the project increases the likelihood of long-term success; and

(2) “Ultimate recipient’s business plan” (§ 1703.46(h)(6)(ii)), that references an attached copy of the business plan.

(i) The plan should include:

(A) A description of the project;

(B) A description of the business, if applicable, its products and the prospects of the industry;

(C) What will be produced or accomplished;

(D) The area to be served;

(E) Any market research or marketing plan;

(F) Any operating plan;

(G) Total project costs and projected use of funds by purpose or category;

(H) A financial plan, including a feasibility study with projected balance sheets, income statements and cash flow statements;

(I) The source of supplemental funds, the nature and strength of commitments from other sources of financing, and the equity contribution;

(J) The proposed ownership and management of the project;

(K) A description of any coordination with a local, regional or state development organization; and

(L) Other relevant information.

(ii) The scope of the plan should reflect the amount requested in the application, the risks involved with developing and operating the project, and the overall cost of the project. The plan should describe any coordination with a local, regional or state development organization.

§ 1703.36 Section of the application covering the project description.

In general, this section should be more detailed the larger the project for which the borrower is requesting funding. The section of the application on the “project description” must include:

(a) A description of the proposed project including the nature of the project, the location of the project, organizations that will be involved in the project and the primary beneficiaries of the project. Also include in this subsection a statement describing whether the borrower has or will have a direct or indirect (through a subsidiary or affiliated organization) ownership or similar beneficial interest in the facilities to be constructed or in the entity that will occupy or utilize these facilities. In addition, explain whether it seems likely that the proposed project will be undertaken or completed in the absence of an RUS zero-interest loan or grant;

(b) A separate paragraph entitled “Uses of RUS Funds and Total Project Costs”, that includes a breakdown of the specific uses of RUS funds and a breakdown of the specific uses of all funds necessary to ensure completion of the project. Project costs should be limited to the amount to be spent over the 2-year period after receiving RUS funds;

(c) For a project that involves the establishment of a new venture, such as a rural business incubator or a similar start-up venture, a discussion of how the costs of establishing, organizing and arranging financing for the venture will be paid, how start-up costs incurred after the venture has been established will be paid, the expected sources of revenue necessary to sustain the project and revenue and expense projections for the first 3 years of the project;

(d) If the borrower will provide a pass-through-loan or pass-through-

§ 1703.37

7 CFR Ch. XVII (1–1–97 Edition)

grant to another entity, outline the terms and conditions that the borrower intends to place on the recipient of the RUS funds including the security arrangements and collateral on a zero-interest loan. The discussion of proposed security arrangements and collateral should reflect the amount requested in the application, the risks involved with developing and operating the project, and the overall cost of the project;

(e) For pass-through-loans and pass-through-grants, a description of the ultimate recipient, including the form of organization and ownership (i.e., corporation, nonprofit corporation, cooperative, partnership, sole proprietor), the owner(s) and the chief officers;

(f) If the project involves construction, a brief description of the construction necessary to make the project operational and the organization involved with the project that will be responsible for building the project facilities or having them built;

(g) A discussion of the manner in which the borrower intends to monitor the zero-interest loan and/or grant proceeds to ensure that they are used only for approved purposes; and

(h) If applicable, a discussion on any potential conflict of interest or the appearance of a conflict of interest, a clarification of any aspect of the project with respect to the restriction that it must not result primarily in the transfer of any existing employment or business activity from one area to another or a clarification of any aspect of the project with respect to limitations in §§ 1703.20 and 1703.21.

§ 1703.37 Section of the application covering the environmental impact of the project.

(a) For a proposed project that only involves internal modifications or equipment additions to buildings or other structures (for example; relocating interior walls or adding computer facilities) and/or external changes or additions to existing buildings, structures or facilities requiring physical disturbance of less than 0.4 hectare (0.99 acre), the environmental information normally required is:

(1) A copy of a flood hazard zone map from the Federal Emergency Manage-

ment Agency with the location of the project site marked;

(2) A statement of whether or not the proposed project will be located within an area protected under the Coastal Barrier Resources Act (16 U.S.C. 3501 *et seq.*);

(3) A description of the internal modifications or equipment additions, and the external changes or additions to existing buildings, structures or facilities being proposed, the size of the site in hectares, and the general nature of the proposed use of the facilities once the project is completed, including any hazardous materials to be used, created or discharged, any substantial amount of air emissions, wastewater discharge, or solid waste that will be generated; and

(4) A statement of whether the project site contains or is near a property listed or eligible for listing in the National Register of Historic Places (16 U.S.C. 470).

(b) For all other proposed projects include:

(1) A copy of a flood hazard zone map from the Federal Emergency Management Agency with the location of the project site marked (42 U.S.C. 4001 *et seq.*);

(2) A diagram showing the general layout of the proposed facilities on the project site;

(3) The size of the project site in hectares;

(4) A map (preferably a U.S. Geological Survey map) of the project area indicating the boundaries of the project;

(5) A statement of whether or not the project will be located within an area protected under the Coastal Barrier Resources Act;

(6) The amount of property to be cleared, excavated, fenced or otherwise disturbed by the project;

(7) The current land use and zoning of the project site and any vegetation on the project site;

(8) A description of buildings or other major structures, including dimensions, to be constructed or modified;

(9) A statement of whether the presence of wetlands or existing agricultural operations are present at the project site (7 CFR part 1794); whether properties listed or eligible for listing in the National Register of Historic

Rural Utilities Service, USDA

§ 1703.46

Places are on or near the project site; whether threatened or endangered species or critical habitat are on or near the project site (16 U.S.C. 1531 *et seq.*);

(10) The general nature of the proposed use of the facilities once the project is completed, including any hazardous materials to be used, created or discharged, any substantial amount of air emissions, wastewater discharge, or solid waste that will be generated (7 CFR part 1794); and

(11) A copy of any environmental review, study, assessment, report or other document that has been prepared in connection with obtaining permits, approvals or other financing for the proposed project from state, local or other Federal agencies. Such material, to the extent relevant, may be used to fulfill the requirements of this section.

(c) The Administrator may request additional environmental information in specific cases to satisfy § 1703.32.

§§ 1703.38—1703.44 [Reserved]

§ 1703.45 Review and analysis of applications.

Completed applications received at RUS by the 14th day of the month will be considered at the first selection date which occurs at least 40 days after the application was received. Completed applications received at RUS after the 14th day of a month will be either be held for the next application period or returned to the borrower, at the borrower's option. The review period of at least 40 days should allow sufficient time for state and local governments to review the proposed projects under the intergovernmental review process, as set forth in 7 CFR part 3015, and to provide sufficient time for the Administrator to fully review and analyze these applications. In the event state and local government review has not been completed, the Administrator's approval may be contingent upon the review being satisfactorily documented. The Administrator reserves the discretion to consider applications outside the normal selection period.

§ 1703.46 Documenting the evaluation and selection of applications for zero-interest loans and grants.

(a) The Administrator will only consider for selection applications that re-

quest funds for purposes as set forth in §§ 1703.17 and 1703.18 and are not ineligible under § 1703.20, as determined by the Administrator. The Administrator will not consider applications that do not conform with all of the provisions of this subpart, as determined by the Administrator. The Administrator will make the determination of all numbers, dollars, levels and rates, as well as the nature, costs, location and other characteristics of the proposed project, to calculate the number of points assigned to an application for each selection factor. Applications for zero-interest loans and grants will be ranked separately. In addition, applications requesting less than 5 percent of the total project costs as provided in § 1703.25 will be ranked separately, subject to § 1703.46(j). The Administrator will select applications that receive the greatest number of total points under paragraphs (f) and (g) of this section, subject to available funds and the provisions of §§ 1703.25, 1703.46(i), and 1703.46(j).

(b) After reviewing an application, the Administrator may decline to select an application:

(1) That would result in a conflict of interest or the appearance of a conflict of interest;

(2) Based on the management and financial situation of the borrower applying for the zero-interest loan or grant. In determining the borrower's financial situation, the Administrator will consider, among other things, the borrower's existing and projected cash flows, equity to asset ratios, times interest earned ratios, debt service coverage ratios, the level of its investments, the level of its cash and other liquid assets, its working capital and repayment of its debts;

(3) Based on a determination that limitations under state laws will lessen the likelihood of repayment of the RUS zero-interest loan in the event that the borrower does not receive funds from the project necessary to cover the RUS zero-interest loan payments;

(4) Based on the unwillingness of the borrower applying for the zero-interest loan or grant to exercise diligence in repaying RUS loans or loan guarantees, and comply with RUS's legal documents and regulations;

§ 1703.46

7 CFR Ch. XVII (1–1–97 Edition)

(5) For an otherwise eligible project when any of the revenues of the project are derived from a legalized gambling activity; or

(6) For any illegal activity.

(c)(1) The Administrator will first evaluate the application and the project with respect to the three factors in this paragraph. The Administrator will not select applications requesting funds for projects that in the Administrator's best judgment have a low probability of:

(i) Being a viable business or operation;

(ii) Being successful as measured by long-term job creation or retention; and

(iii) Producing long-term economic development in rural areas.

(2) The Administrator's determination in paragraph (c) of this section will be based on the ultimate recipient's feasibility studies, income statements, cash flow statements, existing and projected balance sheets, market research, job creation potential, industry trends, and current economic conditions given the nature of the project. Long-term job creation and economic development in rural areas as used for this factor will mean jobs or economic development that would generally be expected to last at least five years.

(d) The Administrator will not award points under the selection factors in paragraphs (f) and (g) of this section for applications that:

(1) Involve the purchase land that will not be developed or used as a site for a project structure during the current phase of the project, as determined by the Administrator;

(2) Will be used for residential purposes or entertainment purposes at the residential level, such as residential dwellings and land sites, facilities to provide entertainment television, or personal, non-business related vehicle(s); however, nursing homes providing medical care, as determined by the Administrator, will not be considered to be residential dwellings;

(3) Will be used primarily to finance the purchase of an established business or operation rather than for economic development in rural areas or job creation purposes; or

(4) Will be used primarily to transfer property or real estate between owners without making any improvements or additions that will promote economic development in rural areas or job creation.

(e) After the above determinations, the Administrator will evaluate the applications and assign points with respect to the factors in paragraph (f) of this section. Applications evaluated under paragraph (f) of this section that do not receive at least 35 points or are not within the top 75 percent when all applications being assigned points are ranked from high to low by total number of points will not be evaluated with respect to the factors in paragraph (g) of this section. The only exception to this evaluation process would be the Administrator's determination that additional applications must be selected in accordance with § 1703.14. After such a determination, the remaining applications evaluated in paragraph (f) of this section will be also evaluated under the factors in paragraph (g) of this section.

(f) *Selection factors pertaining to the type of project.* The number of points assigned for each selection factor will be determined as follows:

(1) *Nature of the project.* The extent to which the nature of the project will promote economic development in rural areas and/or job creation—up to 50 points. The determination for this factor will be based on whether the project:

(i) Is considered a start-up, expansion, or enhancement of a business, a business incubator, an industrial building or park, infrastructure necessary to connect these types of projects to existing infrastructure, necessary for the development and operation of these types of projects, or, in the Administrator's determination, basic infrastructure necessary for successful businesses in the rural economy;

(ii) Will provide technical assistance to rural businesses or rural residents, train or educate rural residents, promote economic development in rural areas on a non-profit basis, or provide medical care to rural residents; and

(iii) Will succeed as envisioned in the application, and the possibility that

Rural Utilities Service, USDA

§ 1703.46

the owners or operators may become delinquent on their loan payments.

(2) *Job creation project.* The extent to which the project will directly lead to job creation given the size of the project and the amount of RUS funds requested or the project is necessary for job creation—up to 25 points. As part of the determination, the Administrator will consider whether the project will provide long-term employment for rural residents. For industrial parks, industrial buildings, and similar projects, the Administrator will consider whether the application includes information on businesses or tenants that will occupy the building(s) and the nature and extent of the commitments to use the buildings in determining the number of points to award. The Administrator will also consider the probability that the project will not result in job creation as envisioned in the application in terms of both the number of jobs and the duration of the jobs.

(3) *Long-term improvements in economic development.* Projects that lead directly to an increase in long-term productivity and per capita income in rural areas—up to 25 points. The Administrator's determination will be based on the extent to which the project will improve the productive potential of the labor force, industrial plant, natural resources, institutions, and infrastructure necessary for economic development and job creation by utilizing advanced technology, creating higher skilled occupations, creating jobs with higher career potential or jobs that are considered part to be of a knowledge intensive industry, or adding higher value to natural resources. In considering infrastructure projects, the Administrator will award points only for the facilities, such as water and sewer facilities, that will serve and are necessary for commercial activities described under this factor.

(4) *Diversifying the rural economy or alleviating underemployment.* Projects that in the judgement of the Administrator will diversify the rural economic base or assist in alleviating chronic underemployment for rural residents—10 points. The Administrator will assign points only to the extent the application contains convincing evidence pertaining to this factor.

(g) *Other selection factors.* The number of points assigned for each selection factor will be determined as follows:

(1) *Supplemental funds.* (i) A determination of the amount of supplemental funds provided or to be provided to the project from the project owner in the form of equity funds, private sources, state and local government sources, other Federal Government sources, the borrower or other sources of funds. The supplemental funds used in this calculation must be disbursed to the project during the period covering six months prior to the receipt of the application by RUS and two years after the first advance of RUS funds for the project. Supplemental funds must be committed to the project before RUS will advance its funds. RUS loan or grant funds from the borrower or RUS loan or grant funds from any other organization will not be included in the calculations. The Administrator will determine what constitutes expenditures on the project. If supplemental funds as a percentage of the RUS zero-interest loan and/or grant to be provided to the project is:

(A) Equal to 20%—10 points, the minimum number of points;

(B) Equal to 100%—20 points;

(C) Equal to 500%—30 points, the maximum number of points.

(ii) Ratios of supplemental funds to RUS funds falling between these levels will be assigned points based on a straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1.

(2) *Economic conditions and job creation.* (i) A comparison will be made of the unemployment rate in the county where the project will be located to the state and national unemployment rates.

(A) If the unemployment rate in the county where the project will be located exceeds the National unemployment rate by 30 percent or more—10 points, the maximum number of points awarded.

(B) If the unemployment rate in the county where the project will be located is equal to the National unemployment rate—5 points.

§ 1703.46

7 CFR Ch. XVII (1–1–97 Edition)

(C) If the unemployment rate in the county where the project will be located is equal to or less than 75 percent of the National unemployment rate—0 points.

(D) If the unemployment rate in the county where the project will be located exceeds the state unemployment rate by 30 percent or more—8 points, the maximum number of points awarded.

(E) If the unemployment rate in the county where the project will be located is equal to the state unemployment rate—4 points.

(F) If the unemployment rate in the county where the project will be located is equal to or less than 75 percent of the state unemployment rate—0 points.

(G) For both the state and national unemployment rate calculations, rates falling between the levels will be assigned points based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1. If the project will be located in several counties, the Administrator will use a simple average (mean) of the counties for the comparison. The Administrator will use the average of the most recent twelve months of unemployment rates it has obtained from the Bureau of Labor Statistics, U.S. Department of Labor or other government sources and processed into a suitable format.

(ii) A comparison will be made of the per capita personal income in the county where the project will be located to the state and national per capita personal income levels.

(A) If the per capita personal income level in the county where the project will be located is less than or equal to 90 percent of the National per capita personal income level—10 points, the maximum number of points awarded.

(B) If the per capita personal income level in the county where the project will be located is equal to the National per capita personal income level—5 points.

(C) If the per capita personal income level in the county where the project will be located exceeds the National per capita personal income level by 15 percent or more—0 points.

(D) If the per capita personal income level in the county where the project will be located is less than or equal to 90 percent of the state per capita personal income level—8 points, the maximum number of points awarded.

(E) If the per capita personal income level in the county where the project will be located is equal to the state per capita personal income level—4 points.

(F) If the per capita personal income level in the county where the project will be located exceeds the state per capita personal income level by 15 percent or more—0 points.

(G) For both the state and national per capita personal income calculations, incomes falling between the levels will be assigned points based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1. If the project will be located in several counties, the Administrator will use a simple average (mean) of the counties for the comparison. The Administrator will use the most recent annual per capita personal income levels it has obtained from the Bureau of Economic Analysis, U.S. Department of Commerce or other government sources and processed into a suitable format.

(iii) A calculation will be made of the change in total population over the most recent two-year period in the county where the project will be located. The population change will be based on the total percentage change over the two-year period calculated as follows: the population for the most recent year less the population as of two years prior to that year with the difference being divided by the population as of two years prior to the most recent year.

(A) If the percentage growth over the two-year period is negative 2.00 percent or higher negative amount (a population decline)—8 points, the maximum number of points.

(B) If the percentage growth over the two-year period is equal to zero or is positive (population increase)—0 points.

Rural Utilities Service, USDA

§ 1703.46

(C) Population growth percentages falling between these levels will be assigned points based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1. If the project will be located in several counties, the Administrator will use a simple average (mean) of the counties for the comparison. The Administrator will use the most recent population data for all counties it has obtained from the Bureau of Economic Analysis, U.S. Department of Commerce or other government sources and processed into a suitable format. The data provide one population figure for the year.

(iv) The number of long-term jobs that the project will directly create in rural areas.

(A) For five or more direct long-term jobs per \$100,000 of total project costs—15 points, the maximum number of points awarded.

(B) For two direct long-term jobs per \$100,000 of total project costs—8 points.

(C) For no direct long-term jobs—0 points.

(D) Direct, long-term jobs under this factor are jobs that would generally be expected to last at least five years. Long-term jobs that would provide 6 months per year of equivalent full-time employment will be counted under this factor. Long-term jobs that would provide fewer months of employment would be given points based on the ratio of the number of months per year of employment to 12 months. Jobs of at least 20 hours per week will be counted under this factor. For construction of an industrial building, extension of water and/or sewer lines to a building, or a similar project, the Administrator will require a reasonable analysis of the number of jobs that will be created before awarding points for this factor. The Administrator reserves the right to adjust the number based on its analysis of the project, the explanation in the application of the businesses that will locate in the building(s), and any commitments from businesses to locate in the building(s). This factor will not count indirect job creation that results from an overall increase in the local economy once the project is completed. If total project costs per job

falls between these levels, points will be assigned based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1.

(v) Projects that are part of a local, community-based rural economic development program that would improve the local economy and enhance the well-being of rural residents—10 points. The determination will be based on information submitted by the borrower in its application and other information the Administrator considers appropriate.

(vi) Projects that have a written plan to provide opportunities or incentives to improve marketable skills for rural residents through training and/or education, or projects which consist of providing this training and/or education—5 points.

(3) *Location.* Projects that will be physically in a rural area—20 points.

(4) *Support for program—cushion of credit payments.* (i) Applications submitted by borrowers that have made cushion of credit payments as set forth in section 313 of the Act based on the following:

(A) If the borrower has \$300,000 or three percent of total assets, whichever is less, in cushion of credit payments—15 points;

(B) If the borrower has \$100,000 or one percent of total assets, whichever is less, in cushion of credit payments—10 points;

(C) If the borrower has at least \$5,000 or 0.5 percent of total assets, whichever is less, in cushion of credit payments—5 points.

(ii) The amount of cushion of credit payments will be based on the amount at the time the Administrator evaluates the project. The calculation of a borrower's total assets will be based on RUS's most recently published Statistical Report, Rural Electric Borrowers (RUS Informational Publication 201-1) or Statistical Report, Rural Telephone Borrowers (RUS Informational Publication 300-4). These publications are available from the Rural Utilities Service, Administrative Services Division, Washington, DC 20250. If the amount of cushion of credits payments falls between these levels, points will

be based on a straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1.

(5) *Demonstration project.* If the application contains a written commitment from the owner(s) of the project that the project will be a demonstration project—5 points.

(6) *Probability of Success.* (i) The knowledge, experience, education and training of the proposed owners and management of the project—up to 10 points.

(ii) The ultimate recipient's business plan and indications that the project will successfully result in economic development in rural areas and/or job creation—up to 40 points. The Administrator's evaluation of the success of the project will be based on indications in the application and RUS's analysis that the project will be a viable business or operation, be successful in creating or retaining long-term jobs, and be successful in producing economic development that will result in long-term benefits to rural areas. The plan should include:

- (A) A description of the project;
- (B) A description of the business, if applicable, its products and the prospects of the industry;
- (C) What will be produced or accomplished;
- (D) The area to be served;
- (E) Any market research or marketing plan;
- (F) Any operating plan;
- (G) Total project costs and projected use of funds by purpose or category;
- (H) A financial plan, including a feasibility study with projected balance sheets, income statements and cash flow statements;
- (I) The source of supplemental funds, the nature and strength of commitments from other sources of financing, and the equity contribution;
- (J) The proposed ownership and management of the project;
- (K) A description of any coordination with a local, regional or state development organization; and
- (L) Other relevant information.

(iii) The Administrator expects the ultimate recipient's business plan referenced in paragraph (g)(6)(ii) of this

section to be comparable to a plan normally submitted to a bank for long-term financing. In evaluating an application for this selection factor, the Administrator will consider the probability that the project will result in long-term economic development in rural areas and/or job creation as envisioned in the application.

(iv) Quality and completeness of borrower's initial application submitted to RUS—up to 10 points. The Administrator's determination will be based on the completeness and quality of the application as measured by the additional information required from the borrower to complete the analysis. For a pass-through loan and grant, the quality of the Borrower's plan to monitor the loan and grant and assure that the requirements of this subpart and 7 CFR parts 3015 and 3016 are met will also be considered.

(7) *Special economic status.* The Administrator has the discretion to designate special economic status (up to 25 points) to applications submitted by borrowers that have documented one or more of the following four conditions in one or more county(ies) to be served by the proposed project:

- (i) A designation of disaster area by the President of the United States which has been so designated within three years prior to applying to RUS;
- (ii) The loss, removal, or closing of a major source or sources of employment in the last 3 years which causes an increase of 2 percentage points or more in the area's most recent unemployment rate compared with the period immediately before the dislocation;
- (iii) Chronic or long-term economic deterioration, documented by one or both of the following conditions:

(A) An unemployment level equal to or greater than 1.5 times the National average unemployment percentage from 4 out of the last 5 years, starting with the most current statistics available. The applicant, when calculating recent years' unemployment percentages, should compare county statistics with the National Average unemployment for the corresponding year. Statistics on unemployment will be based on figures provided by the U.S. Bureau of Labor Statistics. However, the Administrator may, at his discretion, also

Rural Utilities Service, USDA

§ 1703.46

consider verifiable, published State statistical data provided by the applicant in situations where county-wide statistical data is not representative of local conditions. Such statistical data must be part of a recognized database which reflects information for other areas within the State;

(B) A 15% loss of population due to out-migration over the most recent 10-year decennial census, based on the U.S. Bureau of the Census decennial data;

(iv) A designation as a Rural Empowerment Zone or Rural Enterprise Community by the Empowerment Zone Program authorized by Section 13301 of the Omnibus Reconciliation Act of 1993, Public Law 103-66 (107 Stat. 312), 26 U.S.C. 1391-1393.

(h) *Outline of selection factors.* The selection factors contained in §§ 1703.46(f) and 1703.46(g) and the maximum number of points that may be assigned to each is listed below:

- (1) *Nature of the project*—50 points;
- (2) *Job creation project*—25 points;
- (3) *Long-term improvements in economic development*—25 points;
- (4) *Diversifying the rural economy or alleviating underemployment*—10 points;
- (5) *Supplemental funds*—30 points;
- (6) *Economic conditions and job creation*:
 - (i) *Unemployment rates*—18 points;
 - (ii) *Per capita personal income*—18 points;
 - (iii) *Change in population*—8 points;
 - (iv) *Number of long-term jobs*—15 points;
- (v) *Community-based economic development program*—10 points;
- (vi) *Plan for improving the marketable skills of people in rural areas*—5 points;
- (7) *Location*—20 points;
- (8) *Support for program*—cushion of credit payments—15 points;
- (9) *Demonstration project*—5 points;
- (10) *Probability of success*:
 - (i) *Owners and management of the project*—10 points;
 - (ii) *Ultimate recipient's business plan*—40 points; and
 - (iii) *Completeness of borrower's initial application*—10 points;
- (11) *Special economic status*—25 points.
 - (i) Regardless of the number of points assigned to a borrower's application, the Administrator may:

- (1) Limit the number of applications selected in any one state during any fiscal year to the ratio of borrowers in that state to the total number of borrowers multiplied by three, or ten percent of the total number selections that have been made during the current fiscal year, or ten, whichever is greatest. The number of borrowers will be determined as of the latest published RUS statistical reports (Statistical Report, Rural Electric Borrowers, RUS Informational Publication 201-1 and Statistical Report, Rural Telephone Borrowers, RUS Informational Publication 300-4. These publications are available from the Rural Utilities Service, Administrative Services Division, Washington, DC 20250);

- (2) Limit a borrower to one selected application during any selection period;

- (3) Limit the number of applications selected for a particular project;

- (4) Allocate available funds between applications from electric and telephone borrowers;

- (5) Select an application receiving fewer points than another application if there are insufficient funds during a particular budget period to select the higher ranked application; except that the Administrator may ask the borrower that submitted the higher ranked application if it desires to reduce the amount of its application to the amount of funds available. The reduction may require additional supplemental funds to ensure a successful project. Based on information the borrower provides, the Administrator will re-analyze the project to ensure that the project will still be feasible with reduced funding; or

- (6) Select the highest ranking applications for funds to finance projects that the Administrator classifies as project feasibility studies.

- (j) During each selection period, the highest ranking application from among the applications requesting less than 5 percent of the total project costs as provided in § 1703.25 will be considered with the applications requesting 5 percent or more of total project costs.

- (k) The Administrator reserves the right to use the region or data it considers most appropriate if "county"

§ 1703.58

data are unavailable for a particular area.

[57 FR 44317, Sept. 25, 1992, as amended at 59 FR 11711, Mar. 14, 1994; 59 FR 38341, July 28, 1994; 59 FR 53931, Oct. 27, 1994]

§§ 1703.47—1703.57 [Reserved]

§ 1703.58 Post selection period.

(a) RUS will inform a borrower whether the Administrator has selected its application. The advance of RUS funds after the selection has occurred is contingent upon the borrower meeting any terms and conditions the Administrator determines are necessary. A borrower that submitted an application which was not selected will be asked to inform RUS whether it desires to be reconsidered at a later date. The borrower may modify the application after it has been considered without resubmitting all the required material in an application, except if it changes the request from a grant to a zero-interest loan it must submit information necessary for the Administrator to evaluate a loan proposal as set forth in §§ 1703.35 and 1703.36 and submit a new board resolution requesting a loan. If the borrower so desires, the Administrator will consider an application for up to one year after the date RUS originally received the application. A borrower may submit new applications as often as it desires.

(b) During the period between the selection of the application and the execution of RUS's legal documents, the borrower must inform the Administrator if the project is no longer viable or the borrower no longer desires a zero-interest loan or grant for the project. Upon a determination by the Administrator to that effect, the selected application will be considered cancelled.

(c) If an application has been selected and the nature of the project changes, as determined by the Administrator, the borrower may be required to submit a new application to RUS for consideration. The selection may not be transferred to another project, as determined by the Administrator. At any time after the selection of an application, the Administrator may, upon a request from the borrower and receipt of any documentation the Adminis-

7 CFR Ch. XVII (1–1–97 Edition)

trator considers necessary, approve changes in the method of carrying out the purpose of the project as long as the overall purpose of the project remains the same, revise the amount of the zero-interest loan and/or grant, revise the loan maturity date and principal deferment period and make other adjustments. The Administrator may reduce the amount of the RUS loan or grant to reflect reductions in the amount of supplemental funds to be provided to the project. For substantial reductions in amount of supplemental funds to be provided to the project, the Administrator may require the borrower to re-apply for the RUS loan or grant funds.

(d) If state or local governments raise objections to a proposed project under the intergovernmental review process that are not resolved within three months of the Administrator's selection of the application, the Administrator may consider the selection of the application cancelled.

§ 1703.59 Final application processing and legal documents.

(a) After a borrower has submitted all information the Administrator determines is necessary for the selected application, RUS will send the necessary legal documents to the borrower to execute and return to RUS. The legal documents will include a letter of agreement and any legal documents the Administrator deems appropriate, including any loan agreements, notes, security instruments, certifications or legal opinions. The letter of agreement will, among other things, constitute the Administrator's approval of funds for the project subject to certain terms and conditions as determined by the Administrator, and include a project description, approved purposes of the zero-interest loan and/or grant, the maximum amount of zero-interest loan and/or grant, supplemental funds to be provided to the project and certain agreements or commitments the borrower proposed in its application.

(b) The Administrator has the discretion to include as an approved purpose the reimbursement of short-term financing and expenditures that were used for costs incurred on the project in accordance with § 1703.20(a)(2).

Rural Utilities Service, USDA

§ 1703.66

(c) If the borrower fails to submit within one month from the date of the Administrator's selection of an application all of the information that the Administrator determines to be necessary for RUS to prepare legal documents, the Administrator may consider the selection of the application cancelled.

§ 1703.60 [Reserved]

§ 1703.61 Disbursement of zero-interest loan and grant funds.

(a) RUS will disburse zero-interest loan funds to the borrower which must disburse zero-interest loan proceeds to the project for approved purposes in accordance with the legal documents executed by the Administrator and the borrower and applicable RUS regulations. The borrower must make payments on a zero-interest loan as set forth in the legal documents executed by the Administrator and the borrower. The Borrower or project owner's share in the cost of the project must be utilized in advance of RUS zero-interest loan funds, or upon RUS approval, on a pro-rata distribution basis with loan funds during the disbursement period. The Borrower or project owner will not be permitted to provide its contribution at the end of the loan disbursement period.

(b) RUS will disburse grant funds to the borrower which must disburse grant proceeds to the project for approved purposes in accordance with the provisions of 7 CFR part 3015 and 7 CFR part 3016, as appropriate, the legal documents executed by the Administrator and the borrower, and applicable RUS regulations. Prior to the disbursement of grant funds under this subpart, the Borrower will provide evidence of fidelity bond coverage as required by 7 CFR 3015.17. The grant portion of a pass-through zero-interest loan and grant will be disbursed to the Borrower on a reimbursement basis after all other project funds have been utilized and evidence is provided that the project has been completed. Grants to Borrowers for establishment of revolving loan funds will be disbursed in accordance with § 1703.22 of this subpart.

(c) If the borrower fails to satisfy all conditions, requirements, and terms

prerequisite to the advance of zero-interest loan and/or grant funds as set forth in the letter of agreement or other RUS legal documents within 120 days from the date the borrower signs the letter of agreement agreeing and accepting the conditions, requirements, and terms of the RUS zero-interest loan and/or grant, or such later date as the Administrator may approve, the Administrator may rescind the zero-interest loan and/or grant commitment.

(d) During the period between the execution of RUS's legal documents and the disbursement of funds, the borrower must provide the Administrator written notification if the project is no longer viable or the borrower no longer desires a zero-interest loan or grant for the project. After RUS has received the borrower's notification, the Administrator will rescind the commitment.

(e) The borrower must return to RUS all proceeds of the zero-interest loan and/or grant, including any interest earned on the funds being returned, which have not been lent or disbursed by the borrower for approved purposes during the six months following the advance of the loan or grant funds from RUS to the borrower, or such later date as the Administrator may approve. If the project is under the control of the borrower, all proceeds of the zero-interest loan and/or grant must be returned to RUS, including any interest earned on the funds being returned, which have not been expended by the borrower for approved purposes before the first anniversary of the date of the advance of the loan or grant funds from RUS to the borrower, or such later date as the Administrator may approve. Authorization of any extension rests solely within the discretion of the Administrator.

[57 FR 44317, Sept. 25, 1992, as amended at 59 FR 11712, Mar. 14, 1994]

§§ 1703.62—1703.65 [Reserved]

§ 1703.66 Review and other requirements.

(a) RUS will review borrowers receiving zero-interest loans or grants, as necessary, to ensure that funds are expended for approved purposes. Borrowers receiving zero-interest loans or

grants must monitor the project to the extent necessary to ensure that the project is in compliance with all applicable regulations, including ensuring that funds are expended for approved purposes. The borrower is responsible for ensuring that disbursements and expenditures of funds are properly supported with certifications, invoices, contracts, bills of sale, or any other forms of evidence determined appropriate by the Administrator and that such supporting material is available, at the borrower's premises, for review by the RUS field accountant, borrower's certified public accountant, the Office of Inspector General, the General Accounting Office and any other accountant conducting an audit of the borrower's financial statements or this rural economic development program. Borrowers will be required to permit RUS to inspect and copy its records and documents that pertain to the project.

(b) The Borrower must require the recipient of a pass-through loan and grant to provide an itemized list to the Borrower that shows the expenditures made on the project for approved purposes, including a certification to that effect. The Borrower will also require the recipient to attach invoices, receipts, bills of sale, and other evidence representing the items on the list of expenditures that at least total the amount of the RUS zero-interest loan and grant. In addition, the Borrower will also require the recipient to furnish a record of itemized receipts showing total project costs in such detail that will permit auditors to establish the RUS funding percentage. RUS's legal agreements will include the terms and conditions that the Borrower must require in its agreement with the recipient of a pass-through loan and grant covering the use and intended schedule of expenditures of the loan funds.

(c) RUS's legal documents may require the borrower to include in its legal documents with the recipient of a pass-through loan or a pass-through grant the requirement to expend the funds for approved purposes by a certain date specified in RUS's legal documents or return to the borrower all funds that have not been expended by

such date. The borrower must promptly return to RUS all unexpended funds that the recipient returns to the borrower under the terms set forth in the legal documents executed between the Administrator and the borrower. The borrower may request an extension due to delays in the project. Authorization of any extension rests solely within the discretion of the Administrator.

(d) The legal documents executed between the Borrower and the Administrator in connection with a zero-interest loan and/or grant must contain certain provisions giving the Administrator discretionary rights and remedies in the event a Borrower fails to comply with this subpart, other Federal regulations and statutes, or the terms, conditions and requirements of the executed legal documents. Regardless of any right or remedy the Administrator chooses to assert, if the Borrower uses any zero-interest loan and/or grant funds other than for approved purposes, the Borrower will be required to return to RUS the amount used for unapproved purposes. An unauthorized zero-interest loan amount which is returned will be considered a prepayment on the RUS note.

(e) Borrowers receiving zero-interest loans and/or grants will be subject to a rural economic development review of zero-interest loan and grant funds.

(f) The borrower must promptly notify the Administrator in writing if another entity is in default on a pass-through-loan between the borrower and the entity.

(g) Grants provided under this program will be administered in accordance with 7 CFR part 3015 and 7 CFR part 3016, as appropriate. Copies of these USDA Uniform Assistance regulations can be obtained by contacting RUS in Washington, DC. A Borrower that receives a grant for the establishment of a revolving loan fund, or project owner that receives a pass-through loan and grant, will be subject to requirements under these regulations which cover, among other things, financial reporting, accounting records, budget controls, record retention and audit requirements. For pass-through loans and grants, RUS Borrowers will be required to include in their legal documents the requirement for

Rural Utilities Service, USDA

§ 1703.68

project owners to provide sufficient financial, accounting and budget information and other records deemed necessary to facilitate audits in accordance with 7 CFR part 3015 and 7 CFR part 3016 for non-profit entities, and RUS rural economic development loan reviews for projects in a for-profit status.

(h) For pass-through loans and grants awarded under this subpart, the Borrower must diligently monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, and other performance objectives are being achieved. The Borrower must submit an original and one copy of each report to RUS on an annual basis. The project performance reports shall include, but not be limited to, the following:

(1) A comparison of actual accomplishments to the objectives established for that period;

(2) Reasons why any established objectives were not met;

(3) A description of any problems, delays, or adverse conditions which have occurred, or are anticipated, and which may affect the attainment of overall project objectives, prevent meeting of time schedules or objectives, or preclude the attainment of particular project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or planned to resolve the situation; and

(4) Objectives and timetable established for the next reporting period.

(i) For pass-through loans and grants, a final project performance report will be required with the last SF 269, "Financial Status Report," available from RUS in Washington, DC. The final report also must provide an evaluation of the success of the project in meeting the objectives of the program. The final report may serve as the last annual report.

(j) Monitoring requirements for Borrowers receiving grants for revolving loan funds are specified in § 1703.22.

[57 FR 44317, Sept. 25, 1992, as amended at 59 FR 11712, Mar. 14, 1994]

§ 1703.67 Changes in project objective or scope.

For loans and grants awarded under this subpart, the Borrower must obtain prior approval for any material change to the scope or objectives of the approved project, including changes to the scope of work or budget. Failure to obtain prior approval of changes can result in suspension or termination of grant funds.

[59 FR 11712, Mar. 14, 1994]

§ 1703.68 Loan and grant termination provisions.

(a) *Termination for cause.* The Administrator may terminate any loan and/or grant in whole, or in part, at any time before the date of completion of loan and/or grant disbursement, whenever the Borrower has failed to comply with the conditions of the loan and/or grant. The Administrator will promptly notify the Borrower in writing of the termination and the reasons for the termination, together with the effective date. The termination date will be no less than 30 days following receipt of the termination notice. The Borrower will have such time to cure the default, or to state why it feels the loan and/or grant should not be terminated. The Administrator will stay the termination upon the curing of the default, and may delay termination if, sufficient cause has been given by the Borrower.

(b) *Termination for convenience.* The Administrator or the Borrower may terminate a loan and/or grant in whole, or in part, when both parties agree that the continuation of the project would not produce beneficial results commensurate with further expenditure of funds. The two parties will agree upon termination conditions, including the effective date, and in the case of partial terminations, the portion to be terminated. The Borrower will not incur new obligations for the terminated portion after the effective date, and will cancel as many outstanding obligations as possible. The Administrator will allow full credit to the Borrower for the Federal share of unfulfilled contractual obligations which were incurred in good faith by

§ 1703.100

the Borrower prior to grant termination.

[59 FR 11712, Mar. 14, 1994]

§§ 1703.69—1703.79 [Reserved]

Subpart C—Rural Business Incubator Program [Reserved]

§§ 1703.80—1703.99 [Reserved]

Subpart D—Distance Learning and Telemedicine Grant Program

SOURCE: 61 FR 33626, June 27, 1996, unless otherwise noted.

§ 1703.100 Purpose.

The grants provided under this subpart D are to encourage, improve, and make affordable the use of advanced telecommunications, computer networks, and related advanced technologies to provide educational and medical benefits through distance learning and telemedicine projects to people living in rural areas and to improve rural opportunities.

§ 1703.101 Policy.

(a) RUS recognizes that the transmission of communications and information is a vital component of the infrastructure of rural areas and is necessary to promote rural development. Enhancing communication and information transmission by making affordable advanced telecommunications, computer networks, and related advanced technologies more widely available in rural areas will improve rural opportunities, promote rural economic growth, and enhance the quality of life of rural residents. To further this objective, RUS will award grants under this subpart to distance learning and telemedicine projects that will improve the access of people residing in rural areas to improved educational, training, and medical services, and to opportunities that rely on advanced communication and information technologies to provide such services.

(b) In providing assistance under this subpart, RUS will give priority to rural areas that it believes have the greatest need of enhanced communications. RUS believes that generally the need is

7 CFR Ch. XVII (1–1–97 Edition)

greatest: in the most sparsely populated rural areas; and in rural areas that are experiencing economic hardship. RUS will take into consideration the community's involvement in the project and the applicant's ability to leverage grant funds based on its access to capital.

(c) RUS believes that the residents of rural areas and their local institutions which service them can best determine what are the most appropriate communications or information systems for use in their respective communities. Therefore, in administering this subpart, RUS will not favor or mandate the use of one particular technology over another. RUS does believe that it is generally desirable to use technology that would incidentally allow other providers or developers to purchase the elemental functions or access so other users, in addition to educational and medical users, may benefit from any transmission facilities receiving funding under this subpart. In addition, RUS believes it is generally desirable for the project to use products and technologies that are considered open systems. Further, RUS believes that it is desirable to use products and technologies that employ or adhere to nationally recognized standards that will permit equipment from various companies to be connected to the system, and permit the system to be connected to other systems or networks.

(d) Applicants, if they are to be successful in obtaining grant funds must:

(1) Explain the problem that the applicant is intending to solve using grant funds;

(2) Explain how the applicant will use the grant as well as other funds to solve the problem and why this is the best solution;

(3) Explain why RUS grant funds are needed for the project to be successful;

(4) Explain how the grant will be leveraged using funds from the applicant, and local and non-Federal sources;

(5) Show that rural areas are the primary beneficiaries; and,

(6) Show that the project will be sustainable without additional grant funds.

(e) RUS electric and telecommunications borrowers are encouraged to

Rural Utilities Service, USDA

§1703.102

cooperate with each other and with applicants and end users in promoting the program being implemented under this subpart.

(f) RUS staff will make diligent efforts to inform potential applicants in rural areas of the program being implemented under this subpart.

(g) The applicant must check with the Rural Development State Director, U.S. Department of Agriculture, before submitting the application to RUS in order to explore any funding sources that may be available at the state or local level. Evidence of this consultation is a requirement of the grant application.

§1703.102 Definitions.

Act means Title XXIII, subtitle D, chapter 1, of the Rural Economic Development Act of 1990 (7 U.S.C. 950aaa through 950aaa-4).

Administrator means the Administrator of the Rural Utilities Service or his or her designee.

Applicant means an eligible organization which applies for a grant under this subpart.

Approved purpose means a purpose that RUS has specifically approved in the letter of agreement and scope of work covering the use of RUS grant funds provided to the grantee.

Borrower means any organization which has an outstanding loan made by RUS or RTB, or guaranteed by RUS, or which is seeking such financing.

Communication satellite ground station complex means transmitters, receivers, and communications antennas at the earth station site together with the interconnecting terrestrial transmission facilities (cables, line, or microwave facilities) and modulating and demodulating equipment necessary for processing traffic received from the terrestrial distribution system prior to transmission via satellite and the traffic received from the satellite prior to transfer to terrestrial distribution systems.

Comprehensive rural telecommunications plan means the plan submitted by an applicant in accordance with §1703.107(a).

Computer networks means computer hardware and software, terminals, signal conversion equipment including

both modulators and demodulators, or related devices, used to communicate with other computers to process and exchange data through a telecommunication network in which signals are generated, modified, or prepared for transmission, or received, via telecommunications terminal equipment and telecommunications transmission facilities.

Consortium means a combination or group of eligible entities formed to undertake the purpose of which the distance learning and telemedicine grant is provided. Each consortium shall be composed of the following:

(1) A tertiary care facility, rural referral center, medical teaching institution, or educational institution accredited by the State;

(2) Any number of institutions that provide health care services or educational services; and,

(3) Not less than three rural hospitals, clinics, community health centers, migrant health centers, local health departments, or similar facilities, or not less than three educational institutions accredited by the State.

Construct means to construct, acquire, install, improve, or extend a facility or system.

Data terminal equipment means equipment that converts user information into data signals for transmission, or reconverts the received data signals into user information, and is normally found on the terminal of a circuit and on the premises of the end user.

Distance learning means a telecommunications link to an end user through the use of eligible equipment to:

(1) Provide educational programs, instruction, or information originating in nonrural areas to students and teachers who are located in rural areas; or

(2) Connect teachers and/or students, located in one rural area with teachers and/or students that are located in a different rural area.

Eligible equipment means a communication satellite ground station complex, computer networks, data terminal equipment, fiber-optic cable, interactive video equipment, microwave transmission equipment, telecommunications transmission facilities, and

§ 1703.102

telecommunications terminal equipment.

Eligible organization means an incorporated entity that meets the requirements of § 1703.103.

End user means either or both of the following:

(1) Rural elementary or secondary schools or other educational institutions, such as institutions of higher education, county extension services, vocational and adult training and education centers, and teacher training centers, and students, teachers and instructors using such rural educational facilities, that participate in a rural distance learning telecommunications program through a project funded under this subpart;

(2) Rural hospitals, primary care centers or facilities, such as medical centers and clinics, and physicians and staff using such rural medical facilities, that participate in a telemedicine telecommunications program through a project funded under this subpart.

End user site means a facility located in a rural area that is part of a network or telecommunications system that is utilized by end users.

ERS means the Economic Research Service, an agency of the United States Department of Agriculture.

Grantee means a recipient of a grant from RUS to carry out the purposes of this subpart.

Hub means originating source of a network or telecommunications system.

Instructional programming means educational programming, including computer software, which would be used for tutorial purposes in connection with eligible equipment.

Interactive video equipment means equipment used to produce and prepare for transmission audio and visual signals from at least two distant locations such that individuals at such locations can verbally and visually communicate with each other. Such equipment includes monitors, other display devices, cameras or other recording devices, audio pickup devices, and other related equipment.

Letter of agreement means a legal document executed by RUS and the grantee that contains specific terms, condi-

7 CFR Ch. XVII (1–1–97 Edition)

tions, requirements, and understandings applicable to a particular grant.

Local exchange carrier means a commercial, cooperative or mutual-type association, or public body that provides telecommunications service, through a local central switching office, to the subscribers within its designated service area, and between the local subscribers and the toll network.

Project means an undertaking to provide or improve distance learning or telemedicine by using financial assistance from RUS under this subpart.

Project service area means the area in which at least 90 percent of the persons to be served by the project are likely to reside.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

REA means the Rural Electrification Administration, formerly an agency of the United States Department of Agriculture, and predecessor agency to RUS with respect to administering certain electric and telecommunications loan programs.

Rural means any area of the country that meets the determining criteria in § 1703.109.

Rural community facilities means facilities such as schools, libraries, hospitals, medical centers, or similar facilities, located in rural areas, or primarily used by residents of rural areas, that will use a telecommunications, computer network, or related advanced technology system to provide educational and/or medical benefits primarily to residents of rural areas.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Public Law 103–354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telecommunications programs. See 7 CFR 1700.1.

Scope of work means a detailed plan of work that has been approved by the Administrator and that will be performed by the applicant using funds provided under the grant.

Secretary means the Secretary of Agriculture.

Rural Utilities Service, USDA

§1703.104

Technical assistance means

(1) Assistance in learning to operate equipment or systems; and

(2) Studies, analyses, designs, reports, manuals, guides, literature, or other forms of creating, acquiring, and/or disseminating information.

Telecommunications terminal equipment means the assembly of telecommunications equipment at the end of a circuit or path of a signal, including but not limited to over the air broadcast, satellite, and microwave, normally located on the premises of the end user, that interfaces with telecommunications transmission facilities, and that is used to modify, convert, encode, or otherwise prepare signals to be transmitted via such telecommunications facilities, or that is used to modify, reconvert, or carry signals received from such facilities, the purpose of which is to accomplish the goal for which the circuit or signal was established.

Telecommunications transmission facilities means facilities that transmit, receive, or carry data between the telecommunications terminal equipment at each end of the telecommunications circuit or path. Such facilities include microwave antennae, relay stations and towers, other telecommunications antennae, fiber-optic cables and repeaters, coaxial cables, communication satellite ground station complexes, copper cable electronic equipment associated with telecommunications transmissions, and similar items.

Telemedicine means a telecommunications link to an end user through the use of eligible equipment which electronically links medical professionals at separate sites in order to exchange medical information in audio, video, graphic, or other format for the purpose of providing improved health care services primarily to residents of rural areas.

§1703.103 Applicant eligibility.

(a) To be eligible to receive a grant under this subpart, the applicant must be organized in one of the following corporate structures:

(1) An incorporated organization, partnership, Indian tribes and tribal organizations as defined in 25 U.S.C. 450b (b) and (c), or other legal entity

which operates, or will operate, a school, college, vocational training facility, or other educational institution, including a regional educational laboratory, library, hospital, medical center, medical clinic or other rural community facility. A state government, other than a state government entity that operates a rural community facility, is not considered an eligible applicant. The applicant may be a private or municipal corporation organized on a for-profit or not-for-profit basis, or

(2) A consortium, as defined in §1703.102. A consortium which includes a state government entity is only eligible if the state government entity operates a rural community facility.

(3) An incorporated organization, partnership, or other legal entity which is providing or proposes to provide telemedicine service or distance learning service to other legal entities or consortia at rates calculated to ensure that the economic value and other benefits of the distance learning or telemedicine grant is passed through to such other legal entities or consortia.

(b) At least one of the entities of a partnership or consortium must be eligible individually, and the partnership or consortium must provide written evidence of its legal capacity to contract with RUS. If a partnership or consortium lacks the capacity to contract, each individual entity must contract with RUS on its own behalf.

§1703.104 Allowable grant funding percentage, grant purposes, and in-kind matching provisions.

(a) Grants may be used by eligible organizations for distance learning and telemedicine projects to finance up to 70 percent of the cost of allowable grant purposes outlined in paragraph (b) of this section. The applicant will, therefore, provide matching funding in an amount no less than 42.85 percent of the RUS grant. (If the grant covers 70 percent of total project costs, the applicant provides the other 30 percent of the project costs. Thirty percent of the project costs is 42.85 percent of the 70 percent, i.e., the minimum amount of the match.)

(b) Grants for purposes outlined in paragraphs (b)(2) through (b)(6) of this

§ 1703.105

7 CFR Ch. XVII (1–1–97 Edition)

section shall be limited to costs associated with initial capital expenses for establishing the project. The following are allowable grant purposes:

(1) Acquiring, by lease or purchase, eligible equipment as defined in § 1703.102;

(2) Acquiring, by lease or purchase, software to operate eligible equipment, including any related software;

(3) Acquiring or developing instructional programming;

(4) Providing technical assistance and instruction for using eligible equipment, including any related software;

(5) Engineering or environmental studies relating to the establishment or expansion of the phase of the project that is being financed with the RUS grant; and

(6) Facilities, equipment, or activities and non-recurring service charges that are described in a comprehensive rural telecommunications plan which has been approved by the Administrator.

(c) In kind matching—the applicant's minimum 30 percent funding contribution for allowable grant purposes, i.e., 42.85 percent matching of the RUS grant, generally is required in the form of cash. However, certain in-kind contributions may be substituted for cash as follows:

(1) Equipment, activities and facilities as set forth in § 1703.104(b);

(2) Improvements made to real property necessary to accommodate eligible equipment;

(3) Facilities constructed to accommodate eligible equipment, such as buildings in which terminal equipment and/or transmission facilities would be located;

(4) Real property purchased or acquired for the sole purpose of accommodating distance learning and telemedicine facilities; or

(5) The present value of long term leases of eligible equipment, with duration according to recognized industry standards and compatible with the type of equipment leased.

(d) In kind items furnished in paragraph (c)(1) of this section must be non-depreciated or new assets with established monetary value by industry standards. The value of improvements

or construction in paragraphs (c)(2) and (c)(3) of this section must be established by a qualified independent real property appraiser based on the actual cost of those improvements. The value of land in paragraph (c)(4) of this section must be established by a qualified independent real property appraiser based on a market value appraisal.

(e) In kind contributions can be an integral component of an approved comprehensive rural telecommunications plan as set forth in § 1703.107(a).

(f) In kind contributions shall not consist of eligible equipment which has been subject to depreciation (used equipment), or for equipment, services and labor not eligible for grant funding as set forth in § 1703.105.

(g) Funding may be provided for end user sites. Funding may also be provided for hubs located in rural and non-rural areas, if they are necessary to provide distance learning and/or telemedicine services to rural residents at end user sites. However, funding will not be provided for sites proposed as hubs if it is not demonstrated that they are an integral part of the proposed network and are necessary to transmit distance learning and/or telemedicine services to end users.

[61 FR 33626, June 27, 1996; 61 FR 37961, July 22, 1996]

§ 1703.105 Ineligible grant purposes.

(a) Grants must not be used;

(1) To fund more than 70 percent of the eligible costs of a project under this subpart;

(2) To cover the costs of installing or constructing telecommunications transmission facilities, except as provided in paragraph (c) of this section;

(3) To pay for medical equipment except medical equipment primarily used for encoding and decoding data, such as images, for transmission over a telecommunications or computer network;

(4) To pay salaries, wages, or employee benefits to medical or educational personnel;

(5) To pay for the salaries or administrative expenses of the applicant;

(6) To purchase equipment that will be owned by the local exchange carrier or another telecommunications service provider;

Rural Utilities Service, USDA

§1703.107

(7) To duplicate services in place on the date the completed application is received by RUS, or to reimburse the applicant or others for costs incurred prior to RUS's receipt of the completed application;

(8) To pay costs of preparing the application package for funding under this program;

(9) To refinance indebtedness incurred prior to receipt of the completed application by RUS;

(10) For projects whose sole objective is to provide links between teachers and students or medical professionals who are located at the same facility;

(11) For site development, the destruction or alteration of buildings, or other activities that might adversely affect the environment or limit the choice of reasonable alternatives unless and until the requirements of §1703.107(j) have been satisfied;

(12) For projects located in areas covered by the Coastal Barrier Resources Act (16 U.S.C. 3501 *et seq.*); or

(13) For any purpose that the Administrator has not specifically approved.

(b) Except as otherwise provided in §1703.140, funds shall not be used to finance a project in part when success of the project is dependent upon the receipt of additional funding under this subpart D or is dependent upon the receipt of other funding that is not assured.

(c) Grants must not be used to cover the costs of telecommunications transmission facilities if the local exchange carrier for the project area will install such facilities through the use of the expedited telecommunications loans made under the RE Act or through other financing procedures within a reasonable time period and at a cost that does not destroy the feasibility of the project, as determined by the Administrator.

(d) Except for leases provided in §1703.104(b) (1) and (2), grants must not be used to pay the cost of recurring or operating expenses for the project.

[61 FR 33626, June 27, 1996; 61 FR 37961, July 22, 1996]

§1703.106 Maximum and minimum sizes of a grant.

Applications for grants to be considered under this subpart will be subject

to limitations on the proposed amount of funding. The maximum grant amount that will be awarded for any one project in any given fiscal year will not exceed 10 percent of the appropriated funds available for all grants during the fiscal year in which the application for such project is selected. The Administrator may publish notice of the annual maximum grant amount in the FEDERAL REGISTER. An applicant submitting an application which exceeds the maximum will be notified to that effect by RUS and given the opportunity to revise the application. The minimum size of a grant is \$50,000.

§1703.107 The grant application.

The following items comprise the required material that must be submitted to RUS in support of the grant request:

(a) *Comprehensive Rural Telecommunications Plan.* A Comprehensive Rural Telecommunications Plan, consisting of the following is required *only* when the applicant is requesting grant funds for telecommunications transmission facilities:

(1) A detailed explanation of the proposed rural telecommunications system, how such system is to be funded, and a description of the intended uses for a grant received under this subpart.

(2) The capabilities of the telecommunications transmission facilities, including bandwidth, networking topology, switching, multiplexing, standards and protocols for intra-networking and open systems architecture (the ability to effectively communicate with other networks). In addition, the applicant must explain the manner in which the transmission facilities will deliver the proposed services. For example, for medical diagnostics, the applicant might indicate whether or not a guest or other diagnosticians can join the network from locations off the network. For educational services, indicate whether or not all hub and end-user sites are able to simultaneously hear in real-time and see each other or the instructional material in real-time. The applicant must include detailed cost estimates

§ 1703.107

7 CFR Ch. XVII (1–1–97 Edition)

for operating and maintaining the network, and include evidence that alternative delivery methods and systems were evaluated.

(3) The capabilities of the telecommunications terminal equipment, including a description of the specific equipment which will be used to deliver the proposed service. The applicant must document discussions with various technical sources which could include consultants, engineers, product vendors, or internal technical experts, provide detailed cost estimates for operating and maintaining the end user equipment and provide evidence that alternative equipment and technologies were evaluated.

(4) A listing of the proposed purchases or leases of telecommunications terminal equipment, telecommunications transmission facilities, data terminal equipment, interactive video equipment, computer hardware and software systems, and components that process data for transmission via telecommunications, computer network components, communication satellite ground station equipment, or any other elements of the telecommunications system designed to further the purposes of this subpart, that the applicant intends to build or fund using the grant funds.

(5) An explanation of the special financial or other needs of the affected rural communities and of the applicant for such grant assistance.

(6) An analysis of the relative costs and benefits of proposals for leasing or purchasing of facilities, equipment, components, hardware and software, or other items.

(7) A description of the consultations with the appropriate local exchange carrier or carriers and with a wide variety of additional telecommunications service providers (including other interexchange carriers, cable television operators, enhanced service providers, providers of satellite services and telecommunications equipment manufacturers and distributors) and the anticipated role of such providers in the proposed telecommunications system.

(b) *Proposed scope of work of the project.* The proposed scope of work of the project which includes, at a minimum:

(1) The specific activities to be performed under the project;

(2) Who will carry out the activities;

(3) The time-frames for accomplishing the project objectives and activities;

(4) A budget for capital expenditures reflecting the line item costs for both the grant funds and other sources of funds for the project;

(5) Information indicating the ability of the applicant to reduce the size or scope of the project in the event RUS funding, or other projected sources of funding, were reduced or delayed. The applicant must indicate the respective components of the project that would receive the highest priority of funding; and

(6) Information about the potential of the proposed network to expand its size or scope if additional funding was available.

(c) *Executive summary for the project.* The applicant must provide RUS a general project overview, verification of compliance with the general requirements of this subpart, and documentation of eligibility. The executive summary should not exceed eight one-sided double spaced pages, size 8.5" x 11", with a minimum font size of 12 points. The executive summary shall contain the following 10 categories:

(1) A description of the applicant, documenting eligibility with § 1703.103.

(2) An explanation of:

(i) The problem the applicant is intending to solve;

(ii) How the applicant will use the grant funds to solve the problem;

(iii) The amount of RUS grant funds required and why such grant funds are needed; and

(iv) How the RUS grant funds will be leveraged, including both amount and source of these additional funds.

(3) A brief economic and demographic description of the proposed service area, the types of educational and/or medical services to be offered by the project, and the benefits to the rural residents.

(4) A physical description of the project service area. The applicant should include information regarding topography and available transportation and telecommunications infrastructure.

Rural Utilities Service, USDA

§1703.107

(5) A description of the project as distance learning or telemedicine facility as defined in §1703.102. If the project provides both distance learning and telemedicine services, the applicant must identify the predominant use of the system.

(6) A list of expected outcomes, benefits or services to be provided by the project. Some examples include, but are not limited to:

(i) Improved education opportunities for a specified number of students;

(ii) Travel time and money saved by telemedicine diagnosis;

(iii) Number of doctors retained in rural areas;

(iv) Number of additional students electing to attend higher education institutions,

(v) Lives saved due to prompt medical diagnosis and treatment;

(vi) New education courses offered, including college level courses; and

(vii) Expanded use of educational facilities such as night training.

(7) A general overview of the telecommunications system to be developed, including the types of equipment, technologies, and facilities used.

(8) A description of the participating hubs and end user sites and the number of rural residents which will be served by the proposed project at each end user site.

(9) A brief narrative describing the project service area to allow a determination of rural eligibility in accordance with §1703.109. The applicant must list all counties located in the proposed service area, and the Economic Research Service's Rural—Urban Continuum Category for each county. These categories may be obtained from RUS, any USDA Rural Development state office or from State Land Grant University Cooperative Extension Offices.

(10) The applicant must indicate whether or not it is willing to have its grant application forwarded to other agencies within USDA for consideration in the event the application is not selected for funding under this subpart.

(d) *A section on compliance with scoring criteria.* The applicant must provide a justification for the number of points the proposed project will obtain for

each of the criteria for scoring applications set forth in §1703.117.

(e) *Financial information.* The applicant must provide financial information to support the need for the grant funds for the project, show its financial capacity to carry out the proposed work, and show project feasibility. The financial information must include the following:

(1) A current balance sheet from the applicant reflecting its financial condition. When the applicant is a partnership, company, corporation or other entity, current balance sheets are needed from each of the entities that has at least a 20 percent interest in such partnership, company, corporation or other entity. When the applicant is a consortium, a current balance sheet is needed from each member of the consortium and from each of the entities that has at least a 20 percent interest in such member of the consortium. While not required, an audit report is preferable and must be for a period which ended no earlier than 12 months preceding the date of the application; and

(2) A pro-forma income and expense statement for each participating hub and end user site for the project covered by the application. The pro-forma statements must cover a minimum of 5 years after completion of the project and reflect that the project is feasible and sustainable in order to be considered for grant funds by showing sufficient income to pay cash operating expenses including telecommunications access and/or toll charges, system maintenance, salaries, training, and any other general operating expenses; and provide for replacement of depreciable items. Depreciation shall be based on Internal Revenue Service depreciation rules, or other recognized telecommunications industry guidelines. The applicant shall provide sufficient documentation to substantiate any depreciation projections.

(3) For each hub and end user site, the applicant must identify and provide reasonable evidence of each source of revenue. If the projection relies on cost sharing arrangements among hub and end user sites, the applicant must provide evidence of agreements made among project participants.

(4) For applicants eligible under § 1703.103(a)(3), and explanation of the economic analysis justifying the rate structure to ensure that the benefit of the financial assistance is passed through to the other persons receiving telemedicine or distance learning services.

(5) *Exception.* An exception is granted for K to 12 school systems in meeting the requirements of paragraphs (e)(1) through (e)(4) of this section. In lieu of submitting the financial data required in paragraphs (e)(1) through (e)(4) of this section, RUS will accept the current financial statements in a form currently acceptable to the applicant school system's county or State authority.

(f) *A statement of experience.* The applicant must provide a written narrative (not exceeding three single spaced pages) describing its demonstrated capability and experience, if any, in operating an education or health care endeavor and any project similar to the proposed project. Experience in a similar project is desirable but not required.

(g) *Funding commitment from other sources.* The applicant must provide evidence of the commitment of funds for the project in addition to the funds requested under this subpart. Evidence should be from an authorized representative of the source organization that the funds are available and will be used for the proposed project.

(h) *Proposed evaluation methodology.* The applicant must provide a proposed method of evaluating the success of the project in meeting the objectives of the program as set forth in §§ 1703.100 and 1703.101 and the proposed scope of work.

(i) *Compliance with other Federal statutes and regulations.* The applicant is required to submit evidence that it is in compliance with other Federal statutes and regulations, as detailed in § 1703.33 as follows:

- (1) Equal opportunity and non-discrimination requirements;
- (2) Architectural barriers;
- (3) Flood hazard area precautions;
- (4) Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs;
- (5) Drug-free workplace;

(6) "Certification Regarding Debarment, Suspension and Other Responsibility Matters—Primary Covered Transaction (See 7 CFR 3017.510);

(7) Intergovernmental review of Federal programs; and

(8) *Restrictions on lobbying.* For an application for a grant in excess of \$100,000, a certification statement, "Certification Regarding Lobbying:" is required. If the applicant is engaged in lobbying activities, the applicant must submit a completed disclosure form, "Disclosure of Lobbying Activities" (see 7 CFR part 3018).

(j) *Environmental impact and historic preservation.* The applicant must provide details of the project's impact on the environment and historic preservation. Grants made under this part are subject to part 1794 of this chapter which contains the policies and procedures of RUS for implementing a variety of Federal statutes, regulations and executive orders generally pertaining to protection of the quality of the human environment that are listed in § 1794.1 of this chapter. The application shall contain a separate section entitled "Environmental Impact of the Project."

(1) *Environmental information.* An "Environmental Questionnaire," appendix B to this subpart, may be used by applicants to assist in complying with the requirements of this section. Copies of the Environmental Questionnaire are available from RUS.

(2) *Grants for technical assistance projects.* For a proposal to fund a technical assistance project, the only environmental information normally required is whether or not the proposed project being studied or analyzed will be located within an area protected under the Coastal Barrier Resources Act (16 U.S.C. 3501 *et seq.*). Generally, the use of Federal funds to promote development on coastal barriers is strictly limited by the Coastal Barrier Resources Act.

(3) *Grants for all other projects.* Applications for a grant to fund a project that is not subject to paragraph (j)(2) of this section must be accompanied by the information described in this paragraph. The Administrator will review supporting materials in the application and initiate an environmental review

process pursuant to part 1794 of this chapter. This process will focus on any environmental concerns or problems that are associated with the project. The level and scope of the environmental review will be determined in accordance with the National Environmental Policy Act of 1969 (NEPA), as amended, (42 U.S.C. 4321 *et seq.*), the Council on Environmental Policy for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500 through 1508), RUS's Environmental Policies and Procedures (part 1794 of this chapter) and other relevant Federal environmental laws, regulations and Executive orders. Activity related to the project that may adversely affect the environment or limit the choice of reasonable alternatives shall not be undertaken prior to completion of RUS's environmental review process.

(4) For a proposed project that only involves internal modifications or equipment additions to buildings or other structures (for example, relocating interior walls or adding computer facilities) and/or external changes or additions to existing buildings, structures or facilities requiring physical disturbance of less than 0.4 hectare (0.99 acre) the environmental information normally required is: a description of the internal modifications or equipment additions, and the external changes or additions to existing buildings, structures or facilities being proposed, the size of the site in hectares, and the general nature of the proposed use of the facilities once the project is completed, including any hazardous materials to be used, created or discharged, any substantial amount of air emissions, wastewater discharge, or solid waste that will be generated.

(k) A completed Standard Form 424 "Application for Federal Assistance," along with a board of directors resolution authorizing the grant request.

(l) Evidence of the applicant's legal existence and authority to enter into a grant agreement with RUS and perform activities proposed under the grant application.

(m) Evidence that the applicant is not delinquent on any obligation owed to the Federal government (7 CFR parts 3015 and 3016).

(n) Evidence that the applicant has consulted with the USDA State Director, Rural Development, concerning the availability of other sources of funding available at the state or local level.

(o) *Supplemental information.* The applicant should provide any additional information it considers relevant to the project and likely to be helpful in determining the extent to which the proposed project would further the purposes of this subpart.

(p) *Additional information requested by RUS.* The applicant must provide any additional information the Administrator may consider relevant to the application and necessary to adequately evaluate the application and make grant decisions. The Administrator may also request modifications or changes, including changes in the amount of funds requested, in any proposal described in a grant application submitted under this part.

[61 FR 33626, June 27, 1996; 61 FR 37814, 37961, July 22, 1996; 61 FR 42462, Aug. 15, 1996]

§1703.108 Conflict of interest.

At any time prior to the disbursement of a grant awarded under this subpart, the Administrator may disqualify an otherwise eligible project whenever, in the judgment of the Administrator, the project would create a conflict of interest or the appearance of a conflict of interest. The Administrator will notify the applicant in writing of his/her intention to disqualify the project under this section and set forth the basis for his/her determination that a conflict of interest or appearance exists. Thereafter, the applicant will have 30 days from the date of such notice to file a written response with the Administrator. If the Administrator receives the applicant's response within the 30-day period, the Administrator will consider the information contained therein before making a final determination whether to disqualify the project. The Administrator will promptly notify the applicant of the final determination whether a conflict of interest or appearance of a conflict exists. If the determination is affirmative, the notice will also advise the applicant whether the project is disqualified or conditionally

§ 1703.109

7 CFR Ch. XVII (1–1–97 Edition)

disqualified. If the project is conditionally disqualified, the notice will state under what circumstances the project may continue to be eligible for assistance under this subpart. The Administrator's decision under this section will be final.

§ 1703.109 Determining what is rural.

The RUS Administrator shall determine whether a project service area possesses sufficient characteristics to be considered a rural area for purposes of this subpart. The Administrator shall make such determination on the following basis:

(a) The project service area is located within nonmetropolitan counties included in one of the lowest four categories (6–9) of the ERS Rural–Urban Continuum Scale (rural–urban continuum) as set forth in appendix A to this subpart. Those categories are as follows:

(1) Aggregate urban population (sum of cities, towns, villages or other incorporated communities of 2,500 or more) of less than 20,000, adjacent to a metropolitan area (category 6);

(2) Urban population of less than 20,000, not adjacent to a metropolitan area (category 7);

(3) Completely rural (no cities, towns, villages or other incorporated areas of 2,500 or greater) adjacent to a metropolitan area (category 8);

(4) Completely rural, not adjacent to a metropolitan area (category 9).

(b) In the case of project service areas not categorized as rural areas under paragraph (a) of this section, consideration will be given to the degree of rurality the area possesses taking into account such factors as:

(1) Whether the project service area is located within the boundaries of an incorporated community of 2,500 persons or more as determined by the U.S. Census Bureau;

(2) Where the county or counties in which the project service area is located rank on the rural–urban continuum;

(3) Whether natural geographic barriers or an absence of roads may impede access from the project service area to metropolitan areas;

(4) Whether the county is a spatially large county and the project service

area is not within the commuting area of an urbanized area; and

(5) Whether the economy of the project service area centers on natural resource-based activities such as farming, ranching, mining, or timber production, or is highly specialized.

(c) In the case of a project that will serve end users located in more than one county, at least one of which is not categorized as rural under paragraph (a) of this section, RUS will determine the rurality of the project service area case-by-case using factors such as those identified in paragraph (b) of this section. To the extent practicable, in the case of a project that is expected to benefit residents of urban areas as well as residents of rural areas, instead of rejecting an application because it benefits areas they are not rural, RUS may allocate the grant accordingly to assure that grant funds primarily benefit only residents of rural areas.

(d) If a determination made under this section results in the denial of an application, the applicant may appeal such determination to the Administrator in writing setting forth the reasons why it disagrees. Thereafter, the Administrator will review the determination and decide in writing whether to sustain, reverse or modify the original determination. The Administrator's determination will be final. A copy of the Administrator's decision will be furnished promptly to the applicant.

§§ 1703.110–1703.112 [Reserved]

§ 1703.113 Application filing dates, location, processing, and public notification.

(a) Applications for funding under this subpart shall be submitted to the Administrator, Rural Utilities Service, U.S. Department of Agriculture, 14th and Independence Avenue, SW., Washington, DC 20250–1500. Applications should be marked “Attention: Assistant Administrator, Telecommunications Program”.

(b) Applications will be reviewed for eligibility and considered for funding on a quarterly or annual basis. The Administrator will publish a notice in the FEDERAL REGISTER indicating the deadline(s) for application submissions and the amount of available grant funds.

Rural Utilities Service, USDA

§1703.117

(c) RUS will review each application for completeness in accordance with §1703.107, and notify the applicant, within 15 working days of the receipt of the application, of the results of this review, citing any information which is incomplete. To be considered, the applicant must submit the remaining information postmarked no later than the application filing deadline set forth in paragraph (b) of this section, or 15 working days from the receipt of RUS's letter, whichever is the later date. If the applicant fails to submit such information to complete the application in accordance with §1703.107, the application shall be denied and returned to the applicant.

(d) After receipt of all completed applications, the Administrator will publish notice in the FEDERAL REGISTER of all completed applications received for funding under this subpart. The Administrator will also make those applications available for public inspection at the U.S. Department of Agriculture, 14th and Independence Avenue, SW., Washington, DC. For purposes of this paragraph, applications include any information not protected by the Privacy Act of 1974, 5 U.S.C. 552a, and any other information that has not been designated as proprietary information by the applicant.

(e) For instances where multiple applicants are necessary to carry out a project due to project feasibility or applicant authorities, multiple applications may be submitted jointly by the applicants. The applicants must clearly mark or otherwise identify any information in the application it deems proprietary.

(f) The applicant must submit an original and three copies of a completed application. The applicant must also submit a copy of the application to the State government point of contact at the same time it submits an application to RUS. All applications must include the information described in §1703.107.

§§1703.114—1703.116 [Reserved]

§1703.117 Criteria for scoring applications.

(a) *Criteria.* The criteria in this section will be used by the Administrator

to score applications that have been determined to be in compliance with the requirements of this subpart. There are six general criteria for scoring applications:

- (1) The financial need of the community and the project;
- (2) The financial composition of the project;
- (3) The comparative rurality of the proposed project service area;
- (4) The documented need for services;
- (5) Connectivity with outside networks; and
- (6) The cost effectiveness of the design.

(b) *Selection.* Applications will be selected for funding based on scores, availability of funds, and the provisions of §1703.118. The Administrator will make determinations regarding the reasonableness of all numbers; dollar levels; rates; the nature of the project; cost; location; and other characteristics of the application and the proposed project to determine the number of points assigned to an application for all selection criteria. Joint applications submitted by multiple applicants as set forth in §1703.113 will be rated as a single application.

(c) *Financial need of community and project.* A comparison of the per capita personal income in the county or counties where the project of the beneficiaries are located to the national per capita personal income levels—up to 80 points.

(1) If the per capita personal income level in the county where the grant beneficiaries will be located:

(i) Is less than or equal to 80 percent of the national per capita personal income level, 80 points, the maximum number of points;

(ii) Is greater than 80 percent and less than or equal to 90 percent of the national per capita personal income level—60 points;

(iii) Is greater than 90 percent and less than or equal to 100 percent of the national per capita personal income level—30 points;

(iv) Is greater than 100 percent and less than or equal to 110 percent of the national per capita personal income level—5 points;

§ 1703.117

7 CFR Ch. XVII (1–1–97 Edition)

(v) Exceeds 110 percent of the national per capita personal income level—0 points.

(2) If the project will serve grant beneficiaries in several counties, the Administrator will use an unweighted mean of the counties for the comparison.

(3) RUS will use the most recent annual per capita personal income levels it has obtained from the Bureau of Economic Analysis, U.S. Department of Commerce, or other government sources and processed into a suitable format.

(d) *Financial composition of project.* A comparison of the ability of the applicant to contribute financially to the project, and to secure other non-Federal sources of funding. Criteria include:

(1) Evidence of additional financial support for the project from non-Federal sources above the applicant's required 42.85 percent matching of the RUS grant as set forth in §1703.104; the applicant must include evidence from authorized representatives of the sources that the funds are available and will be used for the proposed project—up to 60 points.

(i) Matching for allowable grant purposes less than or equal to 50 percent of the RUS grant—0 points;

(ii) Matching for allowable grant purposes greater than 50 percent, but less than or equal to 100 percent of the RUS grant—10 points;

(iii) Matching for allowable grant purposes greater than 100 percent, but less than or equal to 150 percent of the RUS grant—20 points;

(iv) Matching for allowable grant purposes greater than 150 percent, but less than or equal to 200 percent of the RUS grant—30 points;

(v) Matching for allowable grant purposes greater than 200 percent, but less than or equal to 250 percent of the RUS grant—40 points;

(vi) Matching for allowable grant purposes greater than 250 percent, but less than or equal to 300 percent of the RUS grant—50 points;

(vii) Matching for allowable grant purposes greater than 300 percent of the RUS grant—60 points;

(2) *Bonus points for community involvement.* In addition to the points allo-

cated under §1703.117(d)(1), bonus points will be scored for funding supplied by local sources. Criteria include:

(i) Proportion of non-Federal sources of funding supplied by local sources above the applicant's required 42.85 percent matching of the RUS grant. For purposes of this paragraph, local funding sources shall constitute any for-profit or non-profit entity or entities which derive income from the area to be served by the proposed project, and any village, town, county, regional, or other local governmental or public entity whose jurisdiction includes at least part of the proposed project service area. A local funding source shall not include a state or Federal governmental entity. The applicant shall provide evidence from authorized local representatives that the funds are available and will be used for the proposed project—up to 20 points.

(A) Less than or equal to 50 percent to the RUS grant supplied by local funding sources—0 points;

(B) Greater than 50 percent, but less than or equal to 100 percent of the RUS grant supplied by local funding sources—5 points;

(C) Greater than 100 percent, but less than or equal to 150 percent of the RUS grant supplied by local funding sources—10 points;

(D) Greater than 150 percent, but less than or equal to 200 percent of the RUS grant supplied by local funding sources—15 points;

(E) Greater than 200 percent of the RUS grant supplied by local funding sources—20 points, the maximum number of points;

(ii) [Reserved]

(e) *The comparative rurality of the proposed project service area.* (1) This criterion is used after a project service area has been determined eligible in accordance with §1703.109. The methodology contained in the section is used to evaluate the relative rurality (i.e., population and isolation) of service areas for various projects. Under this system, the end user sites and hubs (as defined in §1703.102) contained within the proposed project service area are identified. Then, that service area is given a score according to the characteristics for the county(ies) in which the end user sites are located.

Rural Utilities Service, USDA

§1703.117

Evaluation is based on the population of the county or counties, and the location of the county or counties relative to metropolitan statistical areas. This system incorporates a framework based on the classification of nonmetropolitan counties by urbanization and proximity to metropolitan areas, developed by analysts and demographers at the USDA Economic Research Service (ERS), as set forth in appendix A to this subpart.

(2) The following definitions are used in the evaluation of rurality:

(i) Metropolitan statistical area (MSA)—as defined by the Office of Management and Budget (OMB), an MSA includes core counties containing a city of 50,000 or greater population or containing several smaller cities totaling 50,000 or greater population and a total population of at least 100,000. Additional contiguous counties are included in the MSA if they are economically and socially integrated with the core county.

(ii) Metropolitan county—as defined by OMB, a metropolitan county is part of an MSA and contains a place, or two adjoining places, totaling at least 50,000 in population, and has residents who are economically and socially integrated with a metropolitan core.

(iii) Adjacency to metropolitan area—the proximity of a county to an MSA measured by a shared boundary with an MSA, and having at least 2 percent of employed county residents commuting to MSA's for employment.

(3) If the end user site(s) for the project are located in a nonmetropolitan county or counties (ERS Rural—Urban Continuum Scale categories 4–9 as set forth in Appendix A to this subpart), the applicant will receive points as follows:

(i) With an ERS category of 9–60 points, the maximum number of points;

(ii) With an ERS category of 8–55 points;

(iii) With an ERS category of 7–40 points;

(iv) With an ERS category of 6–35 points;

(v) With an ERS category of 5–20 points;

(vi) With an ERS category of 4–15 points; or

(vii) With an ERS category of 0 through 3 (metropolitan counties)—0 points.

(4) Applicants having proposed end users sites located in a nonmetropolitan county or counties which are adjacent to a metropolitan area, may receive an adjustment of up to 5 additional points, as determined by the Administrator. Applicants must document that the end users are isolated from urban centers by virtue of available mass transportation, highway infrastructure, or geography.

(5) Applicants having proposed user sites located in a metropolitan county or counties (ERS categories 0–3) may receive 10 points if the population density of the county or counties is no greater than 110 percent of the adjoining nonmetropolitan county with the lowest population density.

(6) If all the end user sites in a proposed network or system are located in a single county or in multiple counties which have the same characteristics, a score will be assigned directly from one of the categories set forth in §1703.117(e)(3).

(7) If end user sites are located in multiple counties with different characteristics, a weighted average will be calculated using the following:

(i) The total number of end user sites located in rural areas will be determined and be assigned a uniform percentage to be used in a weighted average formula (e.g., with 5 sites, each site would be weighted 20%). A hub will not be counted in a weighted average unless the hub is also utilized as an end user site. For purposes of ranking, if a hub also is utilized as an end user site, the hub will be considered as an end user site.

(ii) The counties which contain end user sites will be identified.

(iii) Each end user site will be assigned a number of points according to the classification system for the county in which it is located.

(iv) The percentage value for each site determined in step 1 will be multiplied by the number of points scored from the site's county classification.

(v) The total points for each end user site, obtained from the calculations in step 4, will be added to reach a final weighted average for the project.

§ 1703.117

7 CFR Ch. XVII (1–1–97 Edition)

(8) The following example illustrates the provision of paragraph (e)(7) of this section.

Example Calculation. Greenbriar Valley Development Authority has submitted an application for an interactive classroom network which includes a hub in a metropolitan area and 3 end user sites, located in 3 rural counties. The hub is located in a large city and is not utilized as an end user site, so the hub will not be considered part of the network or system.

The first end user site is located in the town of Midway, in Greenbriar County, less than 20,000 adjacent to a metropolitan area. Thus, it has a category of 6 on the ERS Rural—Urban Continuum Scale.

The second end user site is in Lewistown, in Lewis County, which has an aggregate urban population of less than 20,000, not adjacent to a metropolitan area. Thus, it has a category of 7 on the ERS Rural—Urban Continuum Scale.

The third end user site is in the town of Rocky Creek, in Fayette County, which has an aggregate urban population of 20,000 or more, but not adjacent to a metropolitan area. Thus, it has a category of 5 on the ERS Rural—Urban Continuum Scale.

Step (1) The total number of end user sites = 3; thus each end user site receives 33% weight in the formula.

Step (2) The counties identified are Greenbriar, Lewis and Fayette.

Step (3) Greenbriar County, ERS Rural—Urban Continuum Scale category 6=35 points;

Lewis County, ERS Rural—Urban Continuum Scale category 7=40 points;

Fayette County, ERS Rural—Urban Continuum Scale category 5=20 points.

Step (4) Midway site-35 points $\times 33\%$ = 11.6 points.

Lewistown site-40 points $\times 33\%$ = 13.2 points.

Rocky Creek site-20 points $\times 33\%$ = 6.6 points.

Step (5) $11.6 + 13.2 + 6.6 = 31.4$ total weighted average score.

(f) *Documented need for services.* (1) This criterion will be used by the Administrator to score applications based on the documentation submitted in the support of the grant application that reflects the need for the services proposed by the project. The applicant should indicate whether or not the proposed services could be provided if RUS grant funds were not available. Up to 60 points can be assigned to this criterion.

(2) The Administrator will consider the extent to which the need for improved educational or medical services in the proposed rural area compares to

other regions. RUS will also consider any support by recognized experts in the related educational or medical field, and documentation substantiating the educationally and/or medically underserved nature of the applicant's proposed service area. The Administrator will consider the extent of the applicant's documentation showing:

(i) The justification for specific educational and/or medical services which are needed and will provide direct benefits to rural residents;

(ii) That rural residents, desire the educational and/or medical services to be provided by the project (a strong indication of need is the willingness of local end users or institutions to pay, to the extent possible, for proposed services);

(iii) The applicant's inability to pay for the proposed project without grant funds, given the financial strength of the applicant, its partners, or subsidiaries, as described in § 1703.107(e)(1);

(iv) The project's development and support based on input from the local residents and institutions.

(v) The extent to which the application is consistent with the State strategic plan prepared by the Rural Development State Director of the United States Department of Agriculture.

(3) Examples of the need for medical services could include rural physicians and medical professionals inability to access support functions, such as consulting with others on a diagnosis or access to the latest recommendations in treatment procedures and techniques, up-to-date health-care research, or continuing medical studies. Other medical needs could be to retain more patients at the local hospital or medical facility in order to prevent the closure of the rural hospital or medical facility.

(g) *Connectivity with outside networks.* (1) This criterion will be used by the Administrator to score applications based on the documentation submitted in support of the grant application that reflects the connectivity of the proposed projects with other educational and/or medical networks. Up to 25 points can be assigned to this criterion.

(2) Consideration will be given to the extent that the proposed project will

interconnect with other existing networks at the regional, statewide or national levels. RUS believes that to the extent possible, educational and medical networks should be designed to connect to the widest practicable number of other networks that expand the capabilities of the proposed project, thereby affording rural residents opportunities that may not be available at the local level.

(3) Consideration will also be given to the extent that facilities constructed with federal financial assistance, particularly financial assistance under this chapter provided to entities other than the applicant, will be utilized to extend or enhance the benefits of the proposed project.

(h) *Cost effective design.* (1) This criterion will be used by the Administrator to score applications based on the documentation submitted in the support of the grant application that reflects the cost efficiency of the project design. Up to 15 points can be assigned to this criterion.

(2) Consideration will be given to the extent that the proposed technology or technologies for delivering the proposed educational and/or medical services for the project service area are the most cost effective for the type of project proposed, including utilizing the transmission facilities of the local telecommunications provider. The Administrator will consider the applicant's documentation comparing various systems and technologies, and the choice of the applicant's system as being the most cost-effective system. The Administrator will also consider the applicant's documentation relating to buying or leasing options for specific equipment. The application must contain information necessary for the Administrator to use accepted analytical and financial methodologies to determine whether the applicant is proposing the most cost-effective option.

[61 FR 33626, June 27, 1996; 61 FR 37814, 37961, July 22, 1996]

§1703.118 Other application selection and appeal provisions.

(a) Regardless of the number of points an application receives in accordance with §1703.117, the Administrator may, based on his/her review of

the applications in accordance with the requirements of this part:

(1) Limit the number of applications selected for projects located in any one state during a fiscal year;

(2) Limit the number of selected applications for a particular project; and

(3) Select an application receiving fewer points than another higher scoring application if there are insufficient funds during a particular funding period to select the higher scoring application; provided, however, the Administrator may ask the applicant of the higher scoring application if it desires to reduce the amount of its application to the amount of funds available if, notwithstanding the lower grant amount, the Administrator determines the project is financially feasible in accordance with §1703.107(e) at the lower amount.

(b) The Administrator will not approve a grant application if he/she determines that:

(1) The applicant's proposal does not indicate financial feasibility or is not sustainable in accordance with the requirements of §1703.107(e) (1) and (2);

(2) The applicant's proposal indicates technical flaws, which, in the opinion of the Administrator, would prevent successful implementation, operation, or sustainability of the proposed project; or

(3) Any other aspect of the applicant's proposal fails to adequately address any requirements of this subpart or contains inadequacies which would, in the opinion of the Administrator, undermine the ability of the project to meet the general purpose of this part or comply with policies of the Distance Learning and Telemedicine Grant Program set forth in §1703.101.

(c) The Administrator may reduce the amount of the applicant's grant award based on insufficient program funding for the fiscal year in which the project is reviewed if the Administrator determines that, notwithstanding a lower grant award, the project will show financial feasibility in accordance with §1703.107(e), and the program purposes set forth in §1703.100 can be met. RUS will discuss its findings informally with the applicant and make every effort to reach a mutually

§ 1703.122

acceptable agreement with the applicant. Any discussions with the applicant and agreements made with regard to a reduced grant amount will be confirmed in writing, and these actions shall be deemed to have met the notification requirements set forth in paragraph (d) of this section.

(d) The Administrator will provide the applicant an explanation of any terminations made with regard to paragraphs (b)(1) through (b)(3) of this section prior to making final project funding selections for the year. The applicant will be provided 15 days from the date of the Administrator's letter to respond, provide clarification, or make any adjustments or corrections to the project. If, in the opinion of the Administrator, the applicant fails to adequately respond to any determinations or other findings made by the Administrator, the project will not be funded, and the applicant will be notified of this determination.

(e) For Fiscal Year 1996 grant applications, RUS will notify all grant applicants of the numerical scoring each complete grant application received and the cutoff points needed to receive funding for Fiscal Year 1996. If the grant application numerical scoring is below the score necessary to obtain funding, the applicant may appeal the numerical scoring to the Secretary in writing not later than 10 days after the applicant is notified of the scoring level. The applicant must state the reason it is appealing the numerical scoring and submit the reasons the application should be reconsidered. RUS will allow 14 days after the close of the appeal period to make the final grant selections for Fiscal Year 1996.

(f) RUS reserves the right to use other data it considers most appropriate if "county" data is unavailable for a particular area. In those cases, the Administrator will use data compiled on a basis of the equivalent of a county in the state, such as a parish, or on another basis that most approximates "county" level data.

[61 FR 33626, June 27, 1996; 61 FR 37814, July 22, 1996]

7 CFR Ch. XVII (1-1-97 Edition)

§§ 1703.119—1703.121 [Reserved]

§ 1703.122 Further processing of selected applications.

(a) During the period between the selection of the application and the execution of implementing documents, the applicant must inform the Administrator if the project is no longer viable or the applicant no longer desires a grant for the project. If the applicant so informs the Administrator, the selection will be rescinded and written notice to that effect shall be sent promptly to the applicant.

(b) If an application has been selected and the nature of the project changes, the applicant may be required to submit a new application to the Administrator for consideration depending on the degree of change. A new application will be subject to review in accordance with this subpart. The selection may not be transferred to another project.

(c) If state or local governments raise objections to a proposed project under the intergovernmental review process that are not resolved within 3 months of the Administrator's selection of the application, the Administrator may rescind the selection and written notice to that effect will be sent promptly to the applicant.

(d) Recipients of grants will be required to submit RUS Form 479-A, "Distance Learning and Telemedicine Technical Questionnaire."

(e) After an applicant has submitted such additional information, if any, the Administrator determines is necessary for completing the grant documents, the Administrator will send the documents to the applicant to execute and return to RUS.

(1) The grant documents will include a letter of agreement and any other legal documents the Administrator deems appropriate, including suggested forms of certifications and legal opinions.

(2) The letter of agreement will, among other things, constitute the Administrator's approval of funds for the project subject to certain terms and conditions and include at a minimum, a project description, approved purposes of the grant, the maximum amount of the grant, supplemental

Rural Utilities Service, USDA

§ 1703.128

funds to be provided to the project and certain agreements or commitments the applicant may have proposed in its application.

(f) Until the letter of agreement has been executed and delivered by RUS and by the applicant, the Administrator reserves the right to require any changes in the project or legal documents covering the project to protect the integrity of the program and the interests of the United States Government.

(g) If the applicant fails to submit, within 120 calendar days from the date of the Administrator's selection of an application, all of the information that the Administrator determines to be necessary to prepare legal documents and satisfy other requirements of this subpart, the Administrator may rescind the selection of the application and written notice to that effect will be sent promptly to the applicant.

§§ 1703.123—1703.125 [Reserved]

§ 1703.126 Disbursement of grant funds.

(a) For grants of \$100,000 or greater, prior to the disbursement of funds, the grantee, if it is not a unit of government, will provide evidence of fidelity bond coverage as required by § 3015.17 of this title.

(b) Grant funds will be disbursed to grantees on a reimbursement basis, or with unpaid invoices for the eligible purposes set forth in this subpart, by the following process:

(1) An SF 270, "Request for Advance or Reimbursement," will be completed by the applicant and submitted to RUS not more frequently than once a month; and

(2) After receipt of a properly completed SF 270, payment will ordinarily be made within 30 days.

(c) The grantee's share in the cost of the project will be disbursed in advance of grant funds, or if the grantee agrees, on a pro rata distribution basis with grant funds during the disbursement period. Grantee will not be permitted to provide its contribution at the end of the project.

[61 FR 33626, June 27, 1996; 61 FR 37961, July 22, 1996]

§ 1703.127 Reporting and oversight requirements.

(a) A project performance activity report will be required of all grantees on a semi-annual basis.

(b) A final project performance report will be required. It must provide an evaluation of the success of the project in meeting the objectives of the program. The final report may serve as the last semi-annual report.

(c) RUS will monitor grant recipients as necessary to assure that projects are completed in accordance with the approved scope of work and that funds are expended for approved purposes. Grants made under this part will be administered under, and are subject to parts 3015 through 3018 of this title.

(d) Grantees shall diligently monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, and other performance objectives are being achieved. Grantees are to submit an original and one copy of each report to RUS. The project performance reports shall include, but not be limited to, the following:

(1) A comparison of actual accomplishments to the objectives established for that period;

(2) Reasons why established objectives were not met;

(3) A description of any problems, delays, or adverse conditions which have occurred, or are anticipated, and which may affect the attainment of overall project objectives, prevent the meeting of time schedules or objectives, or preclude the attainment of particular project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or planned to resolve the situation; and

(4) Objectives and timetable established for the next reporting period.

§ 1703.128 Audit requirements.

The grantee will provide an audit report in accordance with part 3015, subpart I, of this title. The audit requirements only apply to the year(s) in which grant funds are received. Audits must be prepared in accordance with

§ 1703.135

generally accepted government auditing standards (GAGAS) using publication, “Standards for Audit of Governmental Organization, Programs, Activities and Functions.”

[61 FR 33626, June 27, 1996; 61 FR 37961, July 22, 1996]

§§ 1703.129—1703.134 [Reserved]

§ 1703.135 Grant administration.

(a) The Administrator will review grantees, as necessary, to determine whether funds were expended for approved purposes. The grantee is responsible for ensuring that the project complies with all applicable regulations, and that the grant funds are expended only for approved purposes. The grantee is responsible for ensuring that disbursements and expenditures of funds are properly supported by invoices, contracts, bills of sale, canceled checks, or other appropriate forms of evidence, and that such supporting material is provided to the Administrator, upon request, and is otherwise made available, at the grantee’s premises, for review by the RUS representatives, grantee’s certified public accountant, the Office of Inspector General, U.S. Department of Agriculture, the General Accounting Office and any other officials conducting an audit of the grantee’s financial statements or records, and program performance under the grant awarded under this subpart. Grantees will be required to permit RUS to inspect and copy any records and documents that pertain to the project.

(b) Grants provided under this program will be administered under, and are subject to parts 3015 and 3016 of this title, as appropriate. Parts 3015 and 3016 of this title subject grantees to a number of requirements which cover, among other things, financial reporting, accounting records, budget controls, record retention and audits, bonding and insurance, cash depositories for grant funds, grant related income, use and disposition of real property and/or equipment purchased with grant funds, procurement standards, allowable costs for grant related activities, and grant close-out procedures.

7 CFR Ch. XVII (1–1–97 Edition)

§ 1703.136 Changes in project objectives or scope.

The grantee will obtain prior approval for any material change to the scope or objectives of the approved project, including changes to the scope of work or budget. Failure to obtain prior approval of changes can result in suspension or termination of grant funds.

§ 1703.137 Grant termination provisions.

(a) *Termination for cause.* The Administrator may terminate any grant in whole, or in part, at any time before the date of completion of grant disbursement, whenever it is determined that the grantee has failed to comply with the conditions of the grant. The Administrator will promptly notify the grantee in writing of the determination and the reasons for the termination, together with the effective date.

(b) *Termination for convenience.* The Administrator or the grantee may terminate a grant in whole, or in part, when both parties agree that the continuation of the project would not produce beneficial results commensurate with further expenditure of funds. The two parties will agree upon termination conditions, including the effective date, and in the case of partial terminations, the portion to be terminated. The grantee will not incur new obligations for the terminated portion after the effective date, and will cancel as many outstanding obligations as possible. The Administrator will allow full credit to the grantee for the Federal share of the noncancelable obligations, properly incurred by the grantee prior to termination.

§§ 1703.138—1703.139 [Reserved]

§ 1703.140 Expedited telecommunications loans

(a) *General.* (1) The Administrator will afford expedited consideration and determination to an application for a loan or a request for advance of funds submitted by a local exchange carrier pursuant to section 2334(h) of the Act (7 U.S.C. 950aaa *et seq.*).

(2) Funds obtained through the expedited procedures established by this

Rural Utilities Service, USDA

section must be used primarily to provide advanced telecommunications services in rural areas using a telecommunications project that the Administrator has approved under this subpart.

(3) Only those elements of a telecommunications project that have not been funded in whole, or in part, with a grant made under this subpart are eligible for expedited consideration or determination under this section.

(b) *Expedited loan applications.* (1) In order to qualify for expedited consideration or determination under paragraph(a)(1) of this section, the loan application must:

(i) Be from a local exchange carrier that will use the requested funds for the purpose set forth in paragraph(a)(2) of this section;

(ii) Be a completed one that complies with the requirements of part 1737, subpart C, of this chapter; and

(iii) Be received concurrently with the related grant application or within 14 days of the date notice of such application is published in the FEDERAL REGISTER as set forth in §1703.113(d).

(2) Expedited consideration and determination of a qualifying application for a loan under this section means that within 45 days of receipt or 45 days of selection of the related grant application, whichever occurs later, the Administrator will:

(i) Issue a characteristics letter, as set forth in part 1737, subpart I, of this chapter, to the loan applicant; or

(ii) Inform the loan applicant that its application for a loan has been denied.

(c) *Expedited advances.* (1) In order to qualify for expedited consideration or determination under paragraph(a)(1) of this section, the request for advance of funds must:

(i) Be from a local exchange carrier that will use the funds for the purpose set forth in paragraph(a)(2) of this section;

(ii) Be for all or part of a loan which has received release approval pursuant to part 1737, subpart K, of this chapter; and

(iii) Be in compliance with the requirements of part 1744 of this chapter.

(2) Expedited consideration and determination of a qualifying request for advance of loan funds under this sec-

Pt. 1703, Subpt. D, App. A

tion means that the Administrator will advance funds to the borrower within 45 days of receiving a request which complies with the provision of this section.

[61 FR 33626, June 27, 1996; 61 FR 37961, July 22, 1996]

APPENDIX A TO SUBPART D OF PART 1703—ERS RURAL—URBAN CONTINUUM SCALE

ERS Rural—Urban Continuum Codes:

Metropolitan Counties:

0—Central counties of metropolitan areas of 1 million population or more.

1—Fringe counties of metropolitan areas of 1 million population or more.

2—Counties in metropolitan areas of 250 thousand to 1 million population.

3—Counties in metropolitan areas of less than 250 thousand population.

Nonmetropolitan Counties:

4—Aggregate urban population (sum of cities, towns, villages or other incorporated communities of 2,500 or more) of 20,000 or more, adjacent to metropolitan area.

5—Aggregate urban population of 20,000 or more, not adjacent to a metropolitan area.

6—Aggregate urban population of 2,500 to 19,999, adjacent to a metropolitan area.

7—Aggregate urban population of 2,500 to 19,999, not adjacent to a metropolitan area.

8—Completely rural (no cities, towns, villages or other incorporated areas of 2,500 or greater) adjacent to a metropolitan area.

9—Completely rural, not adjacent to a metropolitan area.

NOTES: Metropolitan status is that announced by the Office of Management and Budget in June 1993, when the current population criteria were first applied to results of the 1990 Census. Adjacency was determined by physical boundary adjacency and a finding that at least 2 percent of the employed labor force in the nonmetropolitan county commuted to metropolitan central counties.

Codes prepared in Rural Economy Division, Economic Research Service, USDA. A listing of counties and corresponding codes are available from ERS at the following address:

Room 337, 1301 New York Avenue, NW, Washington, DC 20005-4788, Phone: (202) 219-0534 or through the Internet via the ERS Home Page or directly at the following Internet address:

APPENDIX B TO SUBPART D OF PART
1703—ENVIRONMENTAL QUESTIONNAIRE

NOTE: It is extremely important to respond to *all* questions completely to ensure expeditious processing of the Distance Learning and Telemedicine grant. The information herein is required by Federal law.

Important: *Any activity related to the project that may adversely affect the environment or limit the choice of reasonable development alternatives shall not be undertaken prior to the completion of Rural Utilities Service's environmental review process.*

Legal Name of Applicant _____
Signature _____
(Type/Sign/Date) _____

The applicant's representative certifies, to the best of his/her knowledge and belief, that the information contained herein is accurate. Any false information may result in disqualification for consideration of the grant or rescission of the grant.

I. Project Description—Detailing construction, including, but not limited to, internal or external modifications of existing structures, new building construction, and/or installation of telecommunications transmission facilities (defined in 7 CFR 1703.102), including satellite uplinks or downlinks, microwave transmission towers, and cabling.

1. Describe the portion of the project, and site locations (including legal ownership of real property), involving internal modifications, or equipment additions to buildings or other structures (e.g., relocating interior walls or adding computer facilities) for *each* site.

2. Describe the portion of the project, and site locations (including legal ownership or real property) involving external changes or additions to existing buildings, structures or facilities requiring physical disturbance of less than .99 acres. List the size of *each* individual site in acres and *attach a diagram showing the general layout of the proposed facilities for each* site.

3. Describe the portion of the project, and site locations (including legal ownership or real property), involving construction of transmission facilities, including cabling, microwave towers, satellite dishes; or, new construction of buildings; or, disturbance of property of .99 acres or greater for *each* project site.

4. Describe the nature of the proposed use of the facilities, and whether any hazardous materials, air emissions, wastewater discharge or solid waste will result.

5. State whether or not any project site(s) contain or are near properties listed or eligible for listing in the National Register of Historic Places, and identify any historic properties (The grantee must supply evidence that the State Historic Preservation Officer (SHPO) has cleared development regarding any historical properties).

6. Provide information whether or not any facility(ies) or site(s) are located in a 100-year floodplain. A National Flood Insurance Map should be included reflecting the location of the project site(s).

II. For projects which involve construction of transmission facilities, including cabling, microwave towers, satellite dishes, new construction of buildings, or physical disturbance of real property of .99 acres or greater, the following information *must* be submitted (7 CFR 1703.107(j)(3))

1. A map (preferably a U.S. Geological Survey map) of the area for each site affected by construction (include as an attachment).

2. A description of the amount of property to be cleared, excavated, fenced or otherwise disturbed by the project and a description of the current land use and zoning and any vegetation for each project site affected by construction.

3. A description of buildings or other structures (i.e., transmission facilities), including dimensions, to be constructed or modified.

4. A description of the presence of wetlands or existing agricultural operations and/or threatened or endangered species or critical habitats on or near the project site(s) affected by construction.

5. Describe any actions taken to mitigate any environmental impacts resulting from the proposed project (use attachment if necessary).

NOTE: The applicant may submit a copy of any environmental review, study, assessment, report or other document that has been prepared in connection with obtaining permits, approvals or other financing for the proposed project from State, local or other Federal bodies. Such material, to the extent relevant, may be used to meet the requirements herein.

Subpart E—Deferments of RUS Loan Payments for Rural Development Projects

SOURCE: 58 FR 21639, Apr. 23, 1993, unless otherwise noted.

§ 1703.300 Purpose.

This subpart E sets forth RUS's policies and procedures for making loan deferments of principal and interest payments on direct loans or insured loans made for electric or telephone purposes, but not for loans made for rural economic development purposes, in accordance with subsection (b) of section 12 of the RE Act. Loan deferments are provided for the purpose of promoting rural development opportunities.

§1703.301 Policy.

It is RUS's policy to encourage borrowers to invest in and promote rural development and rural job creation projects that are based on sound economic and financial analyses. Borrowers are encouraged to use this program to promote economic, business and community development projects that will benefit rural areas.

§1703.302 Definitions and rules of construction.

(a) *Definitions.* For the purpose of this subpart, the following terms will have the following meanings:¹

Administrator means the Administrator of RUS.

Borrower means any organization which has an outstanding direct loan or insured loan made by RUS for the provision of electric or telephone service.

Cushion of credit payment means a voluntary unscheduled payment on an RUS note made after October 1, 1987, credited to the cushion of credit account of a borrower.

Deferment means a re-amortization of a payment of principal and/or interest on an RUS direct loan or insured loan for over either a 5- or 10 year period, with the first payment beginning on the date of the deferment.

Direct loan means a loan that is made by the Administrator pursuant to section 4 or section 201 of the RE Act (7 U.S.C. 901 *et seq.*) for the provision of electric or telephone service in rural areas and does not include a loan made to promote economic development in rural areas.

Financially distressed borrower means an RUS-financed borrower determined by the Administrator to be either:

- (i) In default or near default on interest or principal payments due on loans made or guaranteed under the RE Act;
- (ii) A borrower that was in default or near default, but is currently participating in a workout or debt restructuring plan with RUS; or
- (iii) Experiencing a financial hardship.

Insured loan means a loan that is made, held, and serviced by the Administrator, and sold and insured by the Administrator, pursuant to Section 305 of the RE Act (7 U.S.C. 901 *et seq.*) for

the provision of electric or telephone service in rural areas and does not include a loan made to promote economic development in rural areas.

Job creation means the creation of jobs in rural areas, or in close enough proximity to rural areas so that it is likely that the majority of the jobs created will be held by residents of rural areas.

Project means a rural development project that a borrower proposes and the Administrator approves as qualifying under this subpart.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RTB means the Rural Telephone Bank (telephone bank), a body corporate and an instrumentality of the United States, that obtains supplemental funds from non-Federal sources and utilizes them in making loans, operating on a self-sustaining basis to the extent practicable (section 401, RE Act).

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

Technical assistance means market research, product or service improvement, feasibility studies, environmental studies, and similar activities that benefit rural development or rural job creation projects.

(b) *Rules of construction.* Unless the context otherwise indicates; "includes" and "including" are not limiting, and "or" is not exclusive. The terms defined in §1703.302(a) include both the plural and the singular.

[58 FR 21639, Apr. 23, 1993, as amended at 59 FR 66440, Dec. 27, 1994]

§ 1703.303

7 CFR Ch. XVII (1–1–97 Edition)

§ 1703.303 Eligibility criteria for deferment of loan payments.

The deferment of loan payments may be granted to any borrower that is not financially distressed, delinquent on any Federal debt, or in bankruptcy proceedings. However, the deferment of loan payments will not be granted to a borrower during any period in which the Administrator has determined that no additional financial assistance of any nature should be provided to the borrower pursuant to any provision of the RE Act. The determination to suspend eligibility for the deferment of loan payments under this subpart will be based on:

(a) The borrower's demonstrated unwillingness to exercise diligence in repaying loans made by RUS or RTB or guaranteed by RUS that results in the Administrator being unable to find that such loans, would be repaid within the time agreed; or

(b) The borrower's demonstrated unwillingness to meet the requirements in RUS's or RTB's legal documents or regulations.

§ 1703.304 Restrictions on the deferment of loan payments.

(a) The deferment must not impair the security of any loans made RUS or RTB, or guaranteed by RUS, pursuant to the RE Act.

(b) At no point in time may the amount of the debt service payments deferred exceed 50 percent of the total cost of a community, business, or economic development project for which a deferment is provided.

(c) A borrower may defer debt service payments only in an amount equal to the investment made by such borrower in a rural development project. The investment must not be made from:

(1) Proceeds of loans made or guaranteed pursuant to the RE Act, or grants made pursuant to the RE Act or section 2331 through section 2335A of the Rural Economic Development Act of 1990 (7 U.S.C. 950aaa *et seq.*);

(2) Funds necessary to make timely payments of principal and interest on loans made, guaranteed or lien accommodated pursuant to the RE Act;

(3) Insurance proceeds from mortgaged property;

(4) Damage awards and sale proceeds resulting from eminent domain and similar proceedings involving mortgaged property;

(5) Sale proceeds from mortgaged property sales requiring specific Administrator approval; and

(6) Funds which are restricted by RUS or RTB loan instruments to be held in trust for the Government or to be held for any other specific purpose.

(d) Any investment made in a rural development project prior to the date of the application for a deferment based on such project cannot be used to satisfy the requirements of this section.

§ 1703.305 Requirements for deferment of loan payments.

(a) Except as otherwise provided in paragraph (b) of this section, the borrower must make a cushion of credit payment equal to the amount of the payment deferred and subject to the following rules:

(1) Cushion of credit payments made prior to the date that an application for deferral has been approved by RUS cannot be used to satisfy the requirements of this section;

(2) Once a cushion of credit payment has been made to satisfy the requirements of paragraph (a) of this section, it must remain on deposit in the cushion of credit account on the date of the deferral or the deferral will not take place; and

(3) The cushion of credit payment must be received by RUS on the date the payment being deferred is due, or within 30 days prior to this date.

(b) A borrower may elect to consolidate in one application filed pursuant to § 1703.311, all of the related deferrals it wishes to receive in a twelve month period following application approval. In such a case, the requirement contained in paragraph (a)(1) of this section may alternatively be satisfied by depositing an amount equal to the aggregate deferrals covered by such application into the cushion of credit account at the time the first cushion of credit payment is due under paragraph (a)(1) of this section.

Rural Utilities Service, USDA

§1703.310

§1703.306 Limitation on funds derived from the deferment of loan payments.

Funds derived from the deferment of loan payments will not be used:

(a) To fund or assist projects which would, in the judgement of the Administrator, create a conflict of interest or the appearance of a conflict of interest. The borrower must disclose to the Administrator information regarding any potential conflict of interest or appearance of a conflict of interest;

(b) For any purpose not reasonably related to the project as determined by the Administrator;

(c) To transfer existing employment or business activities from one area to another; or

(d) For the borrower's electric or telephone operations, nor for any operations affiliated with the borrower unless the Administrator has specifically informed the borrower in writing that the affiliated operations are part of the approved purposes.

§1703.307 Uses of the deferments of loan payments.

The deferment of loan payments will be made to enable the borrower to provide funding and assistance for rural development and job creation projects. This includes, but is not limited to, the borrower providing financing to local businesses, community development assistance, technical assistance to businesses, and other community, business, or economic development projects that will benefit rural areas.

§1703.308 Amount of deferment funds available.

(a) The total amount of deferments made available for each fiscal year under this program will not exceed 3 percent of the total payments due during fiscal year 1993 from all borrowers on direct loans and insured loans made under the RE Act. For each subsequent fiscal year after 1993, the total amount of deferments will not exceed 5 percent of the total payments due for the year from all borrowers on direct loans and insured loans.

(b) The total amount of annual deferments are subject to limitations established by appropriations Acts.

§1703.309 Terms of repayment of deferred loan payments.

(a) Deferments made to enable the borrower to provide financing to local businesses will be repaid over a period of 60 months, in equal installments, with payments beginning on the date of the deferment, and continuing in such a manner until the total amount of the deferment is repaid. The deferment payments will be made on either a monthly or quarterly basis depending on the existing repayment terms of the direct loan or insured loan being deferred. The deferment will not accrue interest.

(b) In the case of deferments made to enable the borrower to provide community development assistance, technical assistance to businesses, and for other community, business, or economic development projects not included in paragraph (a) of this section, the deferment will be repaid over a period of 120 months, in equal installments, with payments beginning on the date of the deferment and continuing in such a manner until the total amount of the deferment is repaid. The deferment payments will be made on either a monthly or quarterly basis depending on the existing repayment terms of the direct loan or insured loan being deferred. The deferment will not accrue interest.

(c) The maturity date of a loan may not be extended as a result of a deferment.

(d) If the required payment is not made by the borrower or received by the Administrator when due, the Administrator will reduce the borrower's cushion of credit account established under this subpart in an amount equal to the deferment payment required.

(e) The balance in a borrower's cushion of credit account shall not be reduced by the borrower below the level of the unpaid balance of the payment deferred.

§1703.310 Environmental considerations.

Prospective recipients of funds received from the deferment of loan payments are encouraged to consider the potential environmental impact of their proposed projects at the earliest planning stage and plan development

§ 1703.311

in a manner that reduces, to the extent practicable, the potential to affect the quality of the human environment adversely.

§ 1703.311 Application procedures for deferment of loan payments.

(a) A borrower applying for a deferment must:

(1) Submit a certified board resolution to the Administrator requesting a deferment of principal and interest. The resolution must:

(i) Be signed by the president or vice president of the borrower;

(ii) Contain information on the total amount of deferment requested for each specific project;

(iii) Contain information on the type of project and the length of deferment requested as defined in § 1703.309; and

(iv) Specify which officer of the borrower has been given the authority to certify to those matters required in this section;

(2) Submit certification by the appropriate officer to the Administrator that the proposed project will not violate the limitations set forth in § 1703.306 and disclose all information regarding any potential conflict of interest or appearance of a conflict of interest that would allow the Administrator to make an informed decision;

(3) Submit certification by the appropriate officer to the Administrator that an investment in the rural development project will be made by the borrower in an amount equal to the deferred debt service payment;

(4) Submit certification by the appropriate officer to the Administrator that the amount of the deferment will not exceed 50 percent of the total cost of the project for which the deferment is provided;

(5) Submit certification by the appropriate officer to the Administrator that it will make a cushion of credit payment necessary to satisfy the requirement of § 1703.305(a);

(6) Submit certification by the appropriate officer to the Administrator that it will comply with § 1703.313 and provide documentation showing that its total investments, including the proposed investment, will not exceed the investment limitations specified in 7 CFR part 1717, Subpart N, Invest-

7 CFR Ch. XVII (1–1–97 Edition)

ments, Loans and Guarantees by Electric Borrowers, or 7 CFR Part 1744, Post Loan Policies and Procedures Common to Guaranteed and Insured Loans. The documentation must provide a list of each rural development project the borrower has invested in to date, including the investment amounts;

(7) Submit to the Administrator written identification of the direct loan(s) and/or insured loan(s) for which payments are to be deferred;

(8) Submit to the Administrator a written narrative which contains information regarding the proposed rural development or job creation project such as the manner in which the project will promote community, business, or economic development in rural areas, the nature of the project, its location, the primary beneficiaries, and, if applicable, the number and type of jobs to be created; and

(9) Submit to the Administrator a letter of approval from the state regulatory authority, if applicable, granting its approval for the borrower to defer direct loan payment(s) and/or insured loan payment(s) and invest the amount in a rural development project.

(b) The Administrator reserves the right to determine that special circumstances require additional data from borrowers before acting on a deferment. The Administrator also reserves the right to require, as a condition of approving a loan payment deferment pursuant to this subpart, that the borrower execute and deliver any amendments or supplements to its loan documents that may be necessary or appropriate to achieve the purposes outlined in § 1703.300.

(c) The Administrator will decide whether the borrower is eligible for the deferment and will notify the borrower of the decision.

§ 1703.312 RUS review requirements.

Borrowers shall ensure that funds are invested in the rural development project as approved by RUS. The Administrator reserves the right to review the books and copy records of borrowers receiving loan payment deferments as necessary to ensure that the investments in the rural development project are in accordance with

Rural Utilities Service, USDA

Pt. 1710

this subpart and the representations and purposes stated in the borrower's completed application. If an audit discloses that the amount deferred was not used for the purposes stated in the completed application, the borrower shall be required to promptly repay the amount deferred and the benefits of the deferment to the borrower will be recaptured by RUS. The borrower is responsible for ensuring that disbursements and expenditures of funds covering the investment in the rural development project are properly supported with certifications, invoices, contracts, bills of sale, cancelled checks, or any other forms of evidence determined appropriate by the Administrator and that such supporting material is available at the borrower's premises for review by the RUS field accountant, borrower's certified public accountant, the Office of Inspector General, the General Accounting Office and any other accountant conducting an audit of the borrower's financial statements for this rural development program.

§ 1703.313 Compliance with other regulations.

(a) Investments in a rural economic development project made by an electric borrower under this subpart are subject to the provisions of 7 CFR part 1717, Subpart N, Investments, Loans and Guarantees by Electric Borrowers.

(b) Investments in a rural economic development project made by a telephone borrower under this subpart are subject to the provisions of 7 CFR Part 1744, Post Loan Policies and Procedures Common to Guaranteed and Insured Loans.

SOURCE: 57 FR 1053, Jan. 9, 1992, unless otherwise noted.

Subpart A—General

§ 1710.1 General statement.

(a) This part establishes general and pre-loan policies and requirements that apply to both insured and guaranteed loans to finance the construction and improvement of electric facilities in rural areas, including generation, transmission, and distribution facilities.

(b) Additional pre-loan policies, procedures, and requirements that apply specifically to guaranteed and/or insured loans are set forth elsewhere:

(1) For guaranteed loans in 7 CFR part 1712 and RUS Bulletins 20–22, 60–10, 86–3, 105–5, and 111–3, or the successors to these bulletins; and

(2) For insured loans in 7 CFR part 1714 and in RUS Bulletins 60–10, 86–3, 105–5, and 111–3, or the successors to these bulletins.

(c) This part supersedes those portions of the following RUS Bulletins and supplements that are in conflict.

- 20–5 Extensions of Payments of Principal and Interest
- 20–20 Deferment of Principal Repayments for Investment in Supplemental Lending Institutions
- 20–22 Guarantee of Loans for Bulk Power Supply Facilities
- 20–23 Section 12 Extensions for Energy Resources Conservation Loans
- 60–10 Construction Work Plans, Electric Distribution Systems
- 86–3 Headquarters Facilities for Electric Borrowers
- 105–5 Financial Forecast-Electric Distribution Systems
- 111–3 Power Supply Surveys
- 120–1 Development, Approval, and Use of Power Requirements Studies

(d) When parts 1710, 1712, and 1714 are published in final form, the bulletins cited in paragraph (b) of this section will be rescinded, in whole or in part, or revised.

[57 FR 1053, Jan. 9, 1992, as amended at 58 FR 66262, Dec. 20, 1993]

Rural Utilities Service, USDA

§ 1710.2

§ 1710.2 Definitions and rules of construction.

(a) *Definitions.* For the purpose of this part, the following terms shall have the following meanings:

Administrator means the Administrator of RUS or his or her designee.

APRR means Average Adjusted Plant Revenue Ratio calculated as a simple average of the adjusted plant revenue ratios for 1978, 1979 and 1980 as follows:

$$APRR = \frac{A + B}{C - D}$$

where:

A=Distribution (plant), which equals Part E, Line 14(e) of RUS Form 7;

B=General Plant, which equals Part E, Line 24(e) of RUS Form 7;

C=Operating Revenue and Patronage Capital, which equals Part A, Line 1 of RUS Form 7; and

D=Cost of Power, which equals the sum of Part A, Lines 2, 3, and 4 of RUS Form 7.

Area Coverage means the provision of adequate electric service to the widest practical number of rural users in the borrower's service area during the life of the loan.

Borrower means any organization that has an outstanding loan made or guaranteed by RUS for rural electrification, or that is seeking such financing.

Bulk Transmission Facilities means the transmission facilities connecting power supply facilities to the subtransmission facilities, including both the high and low voltage sides of the transformer used to connect to the subtransmission facilities, as well as related supervisory control and data acquisition systems.

Call provision has the same meaning as "prepayment option".

Consolidation means the combination of 2 or more borrower or nonborrower organizations, pursuant to state law, into a new successor organization that takes over the assets and assumes the liabilities of those organizations.

Consumer means a retail customer of electricity, as reported on RUS Form 7, Part R, Lines 1-7.

Demand side management (DSM) means the deliberate planning and/or

implementation of activities to influence consumer use of electricity provided by a distribution borrower to produce beneficial modifications to the system load profile. Beneficial modifications to the system load profile ordinarily improve load factor or otherwise help in utilizing electric system resources to best advantage consistent with acceptable standards of service and lowest system cost. Load profile modifications are characterized as peak clipping, valley filling, load shifting, strategic conservation, strategic load growth, and flexible load profile. (See, for example, publications of the Electric Power Research Institute (EPRI), 3412 Hillview Avenue, Palo Alto, CA 94304, especially "Demand-Side Management Glossary" EPRI TR-101158, Project 1940-25, Final Report, October 1992.) DSM includes energy conservation programs. It does not include sources of electrical energy such as renewable energy systems, fuel cells, or traditionally fueled generation, such as fossil or nuclear fueled generators.

Distribution Borrower means a borrower that sells or intends to sell electric power and energy at retail in rural areas.

Distribution Facilities means all electrical lines and related facilities beginning at the consumer's meter base, and continuing back to and including the distribution substation.

DSC means Debt Service Coverage of the borrower calculated as:

$$DSC = \frac{A + B + C}{D}$$

Where:

All amounts are for the same calendar year and are based on the RUS system of accounts and RUS Forms 7 and 12. References to line numbers in the RUS Forms 7 and 12 refer to the June 1994 version of RUS Form 7 and the December 1993 version of RUS Form 12, and will apply to corresponding information in future versions of the forms;

A=Depreciation and Amortization Expense of the borrower, which equals Part A, Line 12 of RUS Form 7 (distribution borrowers) or Section A, Line 20 of RUS Form 12a (power supply borrowers);

B=Interest expense on total long-term debt of the borrower, which equals Part A, Line 15 of RUS Form 7 or Section A, Line 22 of RUS Form 12a, except that interest expense shall be increased by $\frac{1}{3}$ of the amount, if any, by

§ 1710.2

7 CFR Ch. XVII (1–1–97 Edition)

which restricted rentals of the borrower (Part M, Line 3 of RUS Form 7 or Section K, Line 4 of RUS Form 12h) exceed 2 percent of the borrower's equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets] or RUS Form 12a, Section B, Line 38 [Total Margins & Equities] less Line 28 [Regulatory Assets]);

C=Patronage Capital or Margins of the borrower, which equals Part A, Line 28 of RUS Form 7 or Section A, Line 35 of RUS Form 12a; and

D=Debt Service Billed (RUS + other), which equals the sum of all payments of principal and interest required to be made on account of total long-term debt of the borrower during the calendar year, plus $\frac{1}{3}$ of the amount, if any, by which restricted rentals of the borrower (Part M, Line 3 of RUS Form 7 or Section K, Line 4 of RUS Form 12h) exceed 2 percent of the borrower's equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets] or RUS Form 12a, Section B, Line 38 [Total Margins & Equities] less Line 28 [Regulatory Assets]);

DSM activities means activities of the type referred to in § 1710.354(f).

DSM plan means a plan that describes the implementation at the distribution level of the DSM activities identified in the integrated resource plan as having positive net benefits. See § 1710.357.

Electric system means all of the borrower's interests in all electric production, transmission, distribution, conservation, load management, general plant and other related facilities, equipment or property and in any mine, well, pipeline, plant, structure or other facility for the development, production, manufacture, storage, fabrication or processing of fossil, nuclear, or other fuel or in any facility or rights with respect to the supply of water, in each case for use, in whole or in major part, in any of the borrower's generating plants, including any interest or participation of the borrower in any such facilities or any rights to the output or capacity thereof, together with all lands, easements, rights-of-way, other works, property, structures, contract rights and other tangible and intangible assets of the borrower in each case used or useful in such electric system.

Equity means total margins and equities, which equals Part C, Line 33 of RUS Form 7 (distribution borrowers) or

Section B, Line 34 of RUS Form 12a (power supply borrowers).

Final maturity means the final date on which all outstanding principal and accrued interest on an electric loan is due and payable.

Five percent hardship rate means an interest rate of 5 percent applicable to a hardship rate loan.

Fund advance period means the period of time during which the Government may advance loan funds to the borrower. See 7 CFR 1714.56.

Generation Facilities means the generating plant and related facilities, including the building containing the plant, all fuel handling facilities, and the stepup substation used to convert the generator voltage to transmission voltage, as well as related energy management (dispatching) systems.

Hardship rate loan means a loan made at the 5 percent hardship rate pursuant to 7 CFR 1714.8.

Insured Loan means a loan made pursuant to Section 305 of the RE Act, and may include a direct loan made under Section 4 of the RE Act.

Integrated Resources Plan (IRP) means a plan resulting from the planning and selection process for new energy resources that evaluates the benefits and costs of the full range of alternatives, including new generating capacity, power purchases, DSM programs, system operating efficiency, and renewable energy systems.

Interest rate cap means a maximum interest rate of 7 percent applicable to certain municipal rate loans as set forth in § 1710.7.

Interest rate term means a period of time selected by the borrower for the purpose of determining the interest rate on an advance of funds. See 7 CFR 1714.6.

Loan means any loan made or guaranteed by RUS.

Loan Contract means the agreement, as amended, supplemented, or restated from time to time, between a borrower and RUS providing for loans made or guaranteed pursuant to the RE Act.

Loan Feasibility means that the borrower has the capability of repaying the loan in full as scheduled, in accordance with the terms of the mortgage, note, and loan contract.

Rural Utilities Service, USDA

§ 1710.2

Loan Guarantee means a loan guarantee made by RUS pursuant to the RE Act.

Loan period means the period of time during which the facilities included in a loan application will be constructed. It commences with the date shown on page 1, in the block headed "Cost Estimates as of," of RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers, which is the same as the date on the Financial and Statistical Report submitted with the loan application. The loan period may be up to 4 years for distribution borrowers and, except in the case of a loan for new generating and associated transmission facilities, up to 4 years for the transmission facilities and improvements or replacements of generation facilities for power supply borrowers. The loan period for new generating facilities is determined on a case by case basis.

Merger means the combining, pursuant to state law, of borrower or nonborrower organizations into an existing survivor organization that takes over the assets and assumes the liabilities of the merged organizations.

Mortgage means any and all instruments creating a lien on or security interest in the borrower's assets in connection with loans or guarantees under the RE Act.

Municipal rate loan means a loan made at a municipal interest rate pursuant to 7 CFR 1714.5.

ODSC means Operating Debt Service Coverage of the electric system calculated as:

$$\text{ODSC} = \frac{A+B+C}{D}$$

Where:

All amounts are for the same calendar year and are based on the RUS system of accounts and RUS Form 7. References to line numbers in the RUS Form 7 refer to the June 1994 version of the form, and will apply to corresponding information in future versions of the form;

A=Depreciation and Amortization Expense of the electric system, which usually equals Part A, Line 12 of RUS Form 7;

B=Interest expense on total long-term debt of the electric system, which usually equals Part A, Line 15 of RUS Form 7, except that such interest expense shall be increased by $\frac{1}{3}$ of the amount, if any, by which restricted

rentals of the electric system (usually Part M, Line 3 of RUS Form 7) exceed 2 percent of the borrower's equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets]);

C=Patronage Capital & Operating Margins of the electric system, which usually equals Part A, Line 20 of RUS Form 7, plus cash received from the retirement of patronage capital by suppliers of electric power and by lenders for credit extended for the Electric System; and

D=Debt Service Billed (RUS + other), which equals the sum of all payments of principal and interest required to be made on account of total long-term debt of the electric system during the calendar year, plus $\frac{1}{3}$ of the amount, if any, by which restricted rentals of the Electric System (usually Part M, Line 3 of RUS Form 7) exceed 2 percent of the borrower's equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets]).

Off-grid renewable energy system means an energy source which is not electrically attached to the grid. Off-grid systems are operated as an island and will have no direct impact on a utility system's physical operations. An off-grid system need not meet electric utility power quality standards.

On-grid renewable energy system means an energy source electrically attached to an existing grid. It can be attached on either side of a consumer's meter. On-grid systems are operated as part of the overall utility system and have a direct impact on a utility system's operations. An on-grid system must meet electric utility power quality and safety standards.

Ordinary Replacement means replacing one or more units of plant, called "retirement units", with similar units when made necessary by normal wear and tear, damage beyond repair, or obsolescence of the facilities.

OTIER means Operating Times Interest Earned Ratio of the electric system calculated as:

$$\text{OTIER} = \frac{A+B}{A}$$

Where:

All amounts are for the same calendar year and are based on the RUS system of accounts and RUS Form 7. References to line numbers in the RUS Form 7 refer to the June 1994 version of the form, and will apply to corresponding information in future versions of the form;

§ 1710.2

7 CFR Ch. XVII (1–1–97 Edition)

A=Interest expense on total long-term debt of the electric system, which usually equals Part A, Line 15 of RUS Form 7, except that such interest expense shall be increased by $\frac{1}{3}$ of the amount, if any, by which restricted rentals of the electric system (usually Part M, Line 3 of RUS Form 7) exceed 2 percent of the borrower's equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets]); and

B=Patronage Capital & Operating Margins of the electric system, which usually equals Part A, Line 20 of RUS Form 7, plus cash received from the retirement of patronage capital by suppliers of electric power and by lenders for credit extended for the Electric System.

Power Requirements Study (PRS) means the thorough study of a borrower's electric loads and the factors that affect those loads in order to determine, as accurately as practicable, the borrower's future requirements for energy and capacity.

Power Supply Borrower means a borrower that sells or intends to sell electric power at wholesale to distribution or power supply borrowers pursuant to RUS wholesale power contracts.

Prepayment option means a provision included in the loan documents to allow the borrower to prepay all or a portion of an advance on a municipal rate loan on a date other than a rollover maturity date. See 7 CFR 1714.9.

PRR means Plant Revenue Ratio calculated as:

$$PRR = \frac{A}{B - C}$$

where:

A = Total Utility Plant, which equals Part C, Line 3 of RUS Form 7;

B = Operating Revenue and Patronage Capital, which equals Part A, Line 1 of RUS Form 7; and

C = Cost of Power, which equals the sum of Part A, Lines 2, 3, and 4 of RUS Form 7.

PRS Work Plan means the plan that sets forth the resources, methods, schedules, and milestones to be used in the preparation and maintenance of a power requirements study.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

RE Act beneficiary means a person, business, or other entity that is located in a rural area.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

Renewable energy system means a source of energy (kWh) used to meet borrower electric load that is fueled by any of the following technologies: Hydropower, geothermal, biomass, municipal waste, solar thermal, photovoltaic, wind, fuel cells not fueled by fossil fuels. See, for example, "Renewable Resources in U.S. Electricity Supply," February 1993, Publication number DOE/EIA 0561, published by the Department of Energy, Energy Information Administration, Forrestal Building, EI-231, Washington, DC 20585.

Retirement Unit means a substantial unit of property, which when retired, with or without being replaced, is accounted for by removing its book cost from the plant account.

Rollover maturity date means the last day of an interest rate term.

Rural area means any area of the United States, its territories and insular possessions (including any area within the Federated States of Micronesia, the Marshall Islands, and the Republic of Palau) not included within the boundaries of any urban area, as defined by the Bureau of the Census. For purposes of the "rural area" definition, the character of an area is determined at the time of the initial loan to furnish or improve service in the area.

(i) For initial RUS loans made prior to November 1, 1993, the RE Act defined "rural area" to mean any area of the United States not included within the boundaries of any city, village, or borough having a population exceeding 1500. An area determined to be a "rural area" for the purposes of an initial loan made prior to November 1, 1993, shall continue to be considered a "rural area."

(ii) For initial RUS loans made on or after November 1, 1993, this definition shall apply. In determining the character of the area, RUS will rely on the Bureau of the Census designation.

Rural Utilities Service, USDA

§ 1710.3

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

Subtransmission Facilities means the transmission facilities that connect the high voltage side of the distribution substation to the low voltage side of the bulk transmission or generating facilities, as well as related supervisory control and data acquisition facilities.

System Improvement means the change or addition to electric plant facilities to improve the quality of electric service or to increase the quantity of electric power available to RE Act beneficiaries.

TIER means Times Interest Earned Ratio of the borrower calculated as:

$$\text{TIER} = \frac{A + B}{A}$$

Where:

All amounts are for the same calendar year and are based on the RUS system of accounts and RUS Forms 7 and 12. References to line numbers in the RUS Forms 7 and 12 refer to the June 1994 version of RUS Form 7 and the December 1993 version of RUS Form 12, and will apply to corresponding information in future versions of the forms;

A=Interest expense on total long-term debt of the borrower, which equals Part A, Line 15 of RUS Form 7 or Section A, Line 22 of RUS Form 12a, except that interest expense shall be increased by $\frac{1}{3}$ of the amount, if any, by which restricted rentals of the borrower (Part M, Line 3 of RUS Form 7 or Section K, Line 4 of RUS Form 12h) exceed 2 percent of the borrower's equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets] or RUS Form 12a, Section B, Line 38 [Total Margins & Equities] less Line 28 [Regulatory Assets]); and

B=Patronage Capital or Margins of the borrower, which equals Part A, Line 28 of RUS Form 7 or Section A, Line 35 of RUS Form 12a.

Total Assets means Part C, Line 26 of RUS Form 7 (distribution borrowers) or Section B, Line 27 of RUS Form 12a (power supply borrowers).

Total Utility Plant means Part C, Line 3 of RUS Form 7 (distribution borrow-

ers) or Section B, Line 27 of RUS Form 12a (power supply borrowers).

Transmission Facilities means all electrical lines and related facilities, including certain substations, used to connect the distribution facilities to generation facilities. They include bulk transmission and subtransmission facilities.

Urban area is defined by the Bureau of the Census as an area comprising all territory, population, and housing units in urbanized areas and in places of 2500 or more persons outside urbanized areas. More specifically, "urban" consists of territory, persons, and housing units in:

(i) Places of 2500 or more persons incorporated as cities, villages, boroughs (except in Alaska and New York), and towns (except in the six New England States, New York, and Wisconsin), but excluding the rural portions of "extended cities."

(ii) Census designated places of 2500 or more persons.

(iii) Other territory, incorporated or unincorporated, included in urbanized areas.

Urbanized area means an urbanized area as defined by the Bureau of the Census in notices published periodically in the FEDERAL REGISTER. Generally an urbanized area is characterized as an area that comprises a place and the adjacent densely settled territory that together have a minimum population of 50,000 people.

(b) *Rules of Construction*. Unless the context otherwise indicates, "includes" and "including" are not limiting, and "or" is not exclusive. The terms defined in paragraph (a) of this part include the plural as well as the singular, and the singular as well as the plural.

[57 FR 1053, Jan. 9, 1992; 57 FR 4513, Feb. 5, 1992, as amended at 58 FR 66263, Dec. 20, 1993; 59 FR 495, Jan. 4, 1994; 59 FR 66440, Dec. 27, 1994; 60 FR 3730, Jan. 19, 1995; 60 FR 67400, Dec. 29, 1995]

§ 1710.3 Form and bulletin revisions.

References in this part to RUS or REA forms or line numbers in RUS or REA forms are based on RUS or REA Form 7 and Form 12 dated December 1992, unless otherwise indicated. These references will apply to corresponding information in future versions of the

§ 1710.4

forms. The terms “RUS form”, “RUS standard form”, “RUS specification”, and “RUS bulletin” have the same meanings as the terms “REA form”, “REA standard form”, “REA specification”, and “REA bulletin”, respectively, unless otherwise indicated.

[59 FR 66440, Dec. 27, 1994]

§ 1710.4 Exception authority.

Consistent with the RE Act and other applicable laws, the Administrator may waive or reduce any requirement imposed by this part or other RUS regulations on an electric borrower, or a lender whose loan is guaranteed by RUS, if the Administrator determines that imposition of the requirement would adversely affect the Government's financial interest.

§ 1710.5 Availability of forms.

Information about the availability of RUS forms and publications cited in this part is available from Administrative Services Division, Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250-1500. These RUS forms and publications may be reproduced.

§ 1710.6 Applicability of certain provisions to completed loan applications.

(a) Certain new or revised policies and requirements set forth in this part, which are listed in this paragraph, shall not apply to a pending loan application that has been determined by RUS to be complete as of January 9, 1992, the date of publication of such policies and requirements in the FEDERAL REGISTER. This exception does not apply to loan applications received after said date, nor to incomplete applications pending as of said date. This exception applies only to the following provisions:

(1) Paragraph 1710.115(b)—with respect to limiting loan maturities to the expected useful life of the facilities financed;

(2) Section 1710.116—with respect to the requirement to develop and follow an equity development plan;

(3) Paragraph 1710.151(f)—with respect to the borrower providing satisfactory evidence that a state regulatory authority will allow the facili-

7 CFR Ch. XVII (1-1-97 Edition)

ties to be included in the rate base or otherwise allow sufficient revenues to repay the loan;

(4) Paragraphs 1710.250(b), 1710.251(a), and 1710.252(a)—with respect to the requirement that improvements, replacements, and retirements of generation plant be included in a Construction Work Plan; and

(5) Paragraph 1710.300(d)(5)—with respect to the requirement that a borrower's financial forecast include a sensitivity analysis of a reasonable range of assumptions for each of the major variables in the forecast.

(b) Certain provisions of this part apply only to loans made on or after February 10, 1992. These provisions are identified in the individual sections of this part.

[57 FR 1053, Jan. 9, 1992; 57 FR 4513, Feb. 5, 1992, as amended at 58 FR 66263, Dec. 20, 1993]

§ 1710.7 Exemptions of RUS operational controls under section 306E of the RE Act.

(a) *General policy.* (1) Section 306E of the RE Act directs the Administrator to issue interim final regulations to minimize approval rights, requirements, restrictions, and prohibitions imposed on the operations of electric borrowers whose net worth exceeds 110 percent of the outstanding loans made or guaranteed to the borrower by RUS. The section also directs the Administrator, when requested by a private lender providing financing for capital investments by such borrowers, to offer, without delay, to share the government's lien on the borrowers' systems or subordinate the government's lien on the property financed by the private lender.

(2) In issuing the regulations, the Administrator is authorized to establish requirements, guided by the practices of private lenders with respect to similar credit risks, to ensure that the security, including the assurance of repayment, for loans made or guaranteed by RUS will remain reasonably adequate. If the regulations are not issued within 180 days of enactment of section 306E, the Administrator may not, until the regulations are issued, require prior approval of, or establish any requirement, restriction, or prohibition, with respect to the operations of any

electric borrower that meets the 110 percent ratio.

(3) Nothing in section 306E limits the authority of the Administrator to establish terms and conditions on the use of funds from loans made or guaranteed by RUS, to establish loan feasibility criteria and other requirements for the approval of RUS loans or loan guarantees, such as those set forth in this part, or to take any other action specifically authorized by law.

(4) This section addresses the application of section 306E of the RE Act to RUS operational controls and other requirements that apply in general to RUS borrowers. The application of section 306E to lien accommodations and subordinations is set forth in 7 CFR 1717.860 and 1717.904.

(5) The exemptions granted by this section, 7 CFR 1717.860, and 7 CFR 1717.904 apply only to RUS controls and approval rights. They do not affect the controls and approval rights of other co-mortgagees under the RUS mortgage.

(6) For purposes of this section, the terms “default,” “financed or funded by RUS,” “interchange agreement,” “interconnection agreement,” “loan documents,” “pooling agreement,” “power supply contract,” and “wheeling agreement” have the meanings as set forth in 7 CFR 1717.602.

(b) *Determination of ratio.* The following principles and procedures will apply to the calculation of net worth as a ratio, expressed as a percent, to the outstanding balance of all loans made or guaranteed to the borrower by RUS, hereinafter called the borrower’s “net worth to RUS debt ratio”, or simply “the ratio”:

(1) For purposes of determining whether a borrower is exempt from approvals, requirements, restrictions, or prohibitions imposed by RUS with respect to borrower operations, i.e., “operational controls,” the ratio normally will be based on data as of December 31. Net worth will be based on the year-end financial and statistical reports submitted by borrowers to RUS, and outstanding loans made or guaranteed by RUS will be based on RUS’s records. The financial and statistical reports (Form 7 for distribution borrowers and Form 12a for power sup-

ply borrowers) are subject to RUS review and revision, and they must comply with RUS’s system of accounts and accounting principles set forth in 7 CFR part 1767. Since sinking fund depreciation is not approved under 7 CFR part 1767, net worth for borrowers using sinking fund depreciation will be calculated as if the borrower had been using straight line depreciation;

(2) Net worth will be calculated by taking total margins and equities (from Part C of RUS Form 7 for distribution borrowers, or Section B of RUS Form 12a for power supply borrowers) and subtracting assets properly recordable in account 182.2, Unrecovered Plant and Regulatory Study Costs, and account 182.3, Other Regulatory Assets, as defined in 7 CFR part 1767; and

(3) By no later than May 1 of each year, RUS will notify each borrower in writing of its ratio as of December 31 of the preceding year. If a borrower’s net worth to RUS debt ratio exceeds 110 percent based on the year-end data, the borrower will be exempt from the operational controls exempted under paragraph (c) of this section until subsequently notified in writing by RUS that it is no longer exempt.

(c) *Borrower operations exempted from RUS controls.* Borrowers who are notified by RUS in writing that their net worth to RUS debt ratio exceeds 110 percent are exempted from the operational controls of the RUS mortgage and loan contract listed in this paragraph. These controls, which are implemented through RUS regulations and other documents, are as follows:

(1) *RUS approval of extensions and additions.* RUS approval of extensions and additions to borrowers’ electric systems, except for the following:

(i) Extensions and additions financed by RUS;

(ii) Construction, procurement, or leasing of generating facilities, regardless of the source of funding, if the combined capacity of the facilities to be built, procured, or leased, including any future facilities included in the planned project, will exceed 25 megawatts in the case of power supply borrowers, or the lesser of 5 megawatts or 30 percent of the borrower’s equity in the case of distribution borrowers;

(iii) Acquisition or leasing of existing electric facilities or systems in service, regardless of the source of funding, whose purchase price, or capitalized value in the case of a lease, exceeds 10 percent of the borrower's net utility plant; and

(iv) Construction, procurement, or leasing of electric facilities, regardless of the source of funding, to serve a customer whose annual kWh purchases or maximum annual kW demand in the foreseeable future is projected to exceed 25 percent of the borrower's total kWh sales or maximum kW demand in the year immediately preceding the acquisition or start of construction;

(2) *Long-range engineering plans and construction work plans.* RUS approval of long-range engineering plans and CWP's if the borrower does not intend to seek RUS financing for any of the facilities, equipment or other purposes included in those plans. However, if requested by RUS, a borrower must provide an informational copy of such plans to RUS;

(3) *Plans and specifications.* RUS approval of plans and specifications for construction not financed by RUS;

(4) *Standard forms of construction contracts, and engineering and architectural services contracts.* RUS requirements to use standard forms of contracts for construction, procurement, engineering services, and architectural services, if the construction, procurement or services are not financed by RUS. To be eligible for this waiver the contracts used must not contain any provisions that prohibit or restrict the assignment of the contracts to the government upon the exercise by RUS of its remedies under security instruments securing loans made or guaranteed by RUS;

(5) *Contract bidding requirements.* RUS requirements regarding the competitive bidding of construction contracts, if the construction is not financed by RUS;

(6) *RUS approval of contracts.* (i) Construction contracts and architectural and engineering contracts. RUS approval of contracts for construction and procurement and for architectural and engineering services, if such construction, procurement or services are not financed by RUS.

(ii) *Large retail power contracts.* RUS approval of contracts to sell electric power to retail customers except when the contract is for longer than 2 years and the kWh sales or kW demand for any year covered by the contract exceeds 25 percent of the borrower's total kWh sales or maximum kW demand for the year immediately preceding execution of the contract. This exemption applies regardless of the source of funding of any plant extensions, additions or improvements that may be involved in connection with the contract.

(iii) *Power supply arrangements.* (A) RUS approval of power supply contracts (including but not limited to economy energy sales and emergency power and energy sales), interconnection agreements, interchange agreements, wheeling agreements, pooling agreements, and any other similar power supply arrangements subject to approval by RUS, if they have a term of 2 years or less. Amendments to said power supply arrangements are also exempted from RUS approval provided that the amendment does not extend the term of the arrangement for more than 2 years beyond the date of the amendment.

(B) Any amendment to a schedule or exhibit contained in any power supply arrangement subject to RUS approval that merely has the effect of either altering a list of interconnection or delivery points or changing the value of a variable term (but not the formula itself) contained in a formula rate or charge.

(C) The exemptions under this paragraph (c)(6)(iii) apply regardless of whether the borrower is a seller or purchaser of the services furnished by the contracts or arrangements, and regardless of whether or not a Federal power marketing agency is a party to any of them.

(iv) *System management and maintenance contracts.* RUS approval of contracts for the management and operation of a borrower's electric system or for the maintenance of the electric system, if such contracts do not cover all or substantially all of the electric system.

(v) *Other contracts.* [Reserved];

Rural Utilities Service, USDA

§ 1710.7

(7) *RUS approval of general manager.* RUS approval of the selection of a borrower's manager and employment contract, provided that the borrower is not in default under its loan documents or any other agreement with RUS. Nothing herein shall limit the right of RUS under the loan documents to request termination of the employment of a manager in the event of a default by the borrower;

(8) *Board of directors.* RUS approval of compensation of a borrower's board of directors;

(9) *Certain expenditures.* (i) RUS approval of expenditures for legal, accounting, and supervisory services by a borrower. However, while expenditures for accounting do not require RUS approval, the selection of a certified public accountant by the borrower to prepare audited reports required by RUS remains subject to RUS approval.

(ii) RUS approval of expenditures for engineering services by a borrower, if such engineering services will not be financed by RUS;

(10) *Banks.* RUS approval of banks or other depositories used by a borrower. However, without the prior written approval of RUS, a borrower shall not deposit funds from loans made or guaranteed by RUS in any bank or other depository that is not insured by the Federal Deposit Insurance Corporation or other Federal agency acceptable to RUS, or in any account not so insured.

(11) *Certain equipment.* RUS approval of the purchase of data processing equipment and system control equipment by a borrower, if the equipment is not financed by RUS;

(12) *Notification of rate changes.* Requirement that distribution borrowers notify RUS in writing of proposed changes in electric rates 90 days prior to the effective date of such rates. Instead, the required notification period shall be 30 days, and such notification shall be required only if requested by RUS;

(13) *Consolidations and mergers.* RUS approval of mergers and consolidations, and conveyances or transfers of the mortgaged property substantially as an entirety, if the following conditions are met:

(i) Such consolidation, merger, conveyance or transfer shall be on such

terms as shall fully preserve the lien and security of the mortgage and the rights and powers of the mortgagees;

(ii) The entity formed by such consolidation or with which the borrower is merged or the corporation which acquires by conveyance or transfer the mortgaged property substantially as an entirety shall execute and deliver to the mortgagees a mortgage supplemental in recordable form and containing an assumption by such successor entity of the due and punctual payment of the principal of and interest on all of the outstanding notes and the performance and observance of every covenant and condition of the mortgage;

(iii) Immediately after giving effect to such transaction, no default under the mortgage shall have occurred and be continuing;

(iv) The borrower shall have delivered to the mortgagees a certificate of its general manager or other officer, in form and substance satisfactory to each of the mortgagees, which shall state that such consolidation, merger, conveyance or transfer and such supplemental mortgage comply with this section and that all conditions precedent herein provided for relating to such transaction have been complied with;

(v) The borrower shall have delivered to the mortgagees an opinion of counsel in form and substance satisfactory to each of the mortgagees; and

(vi) The entity formed by such consolidation or with which the borrower is merged or the corporation which acquires by conveyance or transfer the mortgaged property substantially as an entirety shall be an entity:

(A) Having equity equal to at least 27% of its total assets on a pro forma basis after giving effect to such transaction;

(B) Having a pro forma TIER of not less than 1.50 and a pro forma DSC of not less than 1.25 for each of the two preceding calendar years; and

(C) Having net utility plant equal to or greater than 1.0 times its total long-term debt on a pro forma basis;

(14) *Sale, lease, or transfer of capital assets.* RUS approval for a distribution

§ 1710.7

7 CFR Ch. XVII (1–1–97 Edition)

borrower to sell, lease, or transfer capital assets, if the following conditions are met:

- (i) The borrower is not in default;
- (ii) In the most recent year for which data are available, the borrower achieved a TIER of at least 1.5, DSC of at least 1.25, OTIER of at least 1.1, and ODSC of at least 1.1, in each case based on the average or the best 2 out of the 3 most recent years;
- (iii) The sale, lease, or transfer of assets will not reduce the borrower's existing or future requirements for energy or capacity being furnished to the borrower under any wholesale power contract which has been pledged as security to the government;
- (iv) Fair market value is obtained for the assets;
- (v) The aggregate value of assets sold, leased, or transferred in any 12-month period is less than 10 percent of the borrower's net utility plant prior to the transaction;
- (vi) The proceeds of such sale, lease, or transfer, less ordinary and reasonable expenses incident to such transaction, are immediately:
 - (A) Applied as a prepayment of all notes secured under the mortgage equally and ratably;
 - (B) In the case of dispositions of equipment, materials or scrap, applied to the purchase of other property useful in the borrower's utility business; or
 - (C) Applied to the acquisition of construction of utility plant; and
- (vii) If the borrower has an RUS-approved wholesale power contract with a power supply borrower (seller), the circumstances of the sale, lease or transfer of capital assets conform with the conditions in such contract under which the seller may not withhold its consent to the sale, lease or transfer;

(15) *Limitations on distributions.* RUS approval for a borrower to declare or pay dividends, pay or determine to pay patronage refunds, retire patronage capital, or make any other cash distributions, if the following conditions are met:

- (i) After giving effect to the distribution, the borrower's equity will be greater than or equal to 30 percent of its total assets;

- (ii) The borrower is current on all payments due on all notes secured under the mortgage;

- (iii) The borrower is not otherwise in default under its loan documents; and

- (iv) After giving effect to the distribution, the borrower's current and accrued assets will be not less than its current and accrued liabilities.

(d) *RUS requirements and operational controls not exempted.* All requirements and operational controls contained in the RUS mortgage and loan contract, or otherwise imposed on borrowers pursuant to statute or regulation, that are not specifically listed in paragraph (c) of this section are not exempted and shall continue to apply according to their terms. Examples of such requirements and controls not exempted are listed in this paragraph for the convenience of the public. This list is not exhaustive, and the absence of a requirement or control from this list in no way means that the requirement or control has been exempted:

(1) Requirements and operational controls contained in the RUS mortgage or loan contract that are necessary to ensure that the security for loans made or guaranteed by RUS is reasonably adequate and that the loans will be repaid, or to accomplish other fundamental purposes of the RE Act. Some of these also represent terms and conditions with respect to the use by borrowers of the proceeds of loans made or guaranteed by RUS. Together, these controls include, but are not limited to, the following:

- (i) Area coverage requirements set forth in the loan contract and in § 1710.103;

- (ii) Requirement that certain borrowers maintain, on an ongoing basis, a power requirements study and a power requirements study work plan, as set forth in §§ 1710.201 and 1710.202;

- (iii) Requirement that borrowers follow RUS construction standards and use RUS accepted materials, as set forth in § 1710.41, § 1710.45, and 7 CFR part 1728;

- (iv) Requirement that borrowers maintain, on an ongoing basis, a long-range engineering plan and a construction work plan, as set forth in § 1710.250(b);

Rural Utilities Service, USDA

§ 1710.51

(v) Requirement that borrowers set rates for electric service sufficient to maintain certain coverage ratios, as set forth in § 1710.114;

(vi) Certain RUS approvals of retirements of capital credits in excess of amounts specifically authorized in the mortgage;

(vii) RUS approval of borrower investments, loans, guarantees, and other obligations under 7 CFR part 1717, subpart N;

(viii) RUS requirements on accounting, auditing, irregularities, financial reporting, and access to books and records;

(ix) Requirement that borrowers record the mortgage and mortgage amendments;

(x) Requirement that the mortgagor maintain and preserve the priority lien of the mortgage and defend title to the mortgaged property;

(xi) Requirements on maintenance and repair of the mortgaged property;

(xii) Requirements on insurance of the mortgaged property; and

(xiii) Certain RUS approvals of borrower mergers and consolidations; and

(2) Requirements imposed on borrowers pursuant to statute or regulation and not specifically exempted by paragraph (c) of this section. See, for example, §§ 1710.122 through 1710.127.

(e) *Rescission of exemptions if borrower defaults.* If a borrower is in default with respect to any requirement of its mortgage, loan contract with RUS, or any other agreement with RUS that has not been exempted pursuant to paragraph (c) of this section or other RUS regulations, upon written notice to the borrower RUS may rescind all or any part of the exemptions granted pursuant to paragraph (c) of this section or other RUS regulations. The reinstated requirements and controls will remain in effect until RUS determines that they are no longer needed to help ensure that the security, including the assurance of repayment, for loans made or guaranteed by RUS will remain reasonably adequate.

(f) *Reinstated controls.* If RUS controls are reinstated because the borrower defaults or its net worth falls below 110 percent of RUS debt, such controls and approval rights will apply to all applicable subsequent actions of the bor-

rower, including without limitation the amendment of contracts that the borrower entered into while eligible for an exemption under this section.

[60 FR 67401, Dec. 29, 1995]

§§ 1710.8—1710.49 [Reserved]

Subpart B—Types of Loans and Loan Guarantees

§ 1710.50 Insured loans.

RUS makes insured loans under section 305 of the RE Act.

(a) *Municipal rate loans.* The standard interest rate on an insured loan made on or after November 1, 1993, is the municipal rate, which is the rate determined by the Administrator to be equal to the current market yield on outstanding municipal obligations with remaining periods to maturity, up to 35 years, similar to the interest rate term selected by the borrower. In certain cases, an interest rate cap of 7 percent may apply. The interest rate term and rollover maturity date for a municipal rate loan will be determined pursuant to 7 CFR part 1714, and the borrower may elect to include in the loan documents a prepayment option (call provision).

(b) *Hardship rate loans.* RUS makes hardship rate loans at the 5 percent hardship rate to qualified borrowers meeting the criteria set forth in 7 CFR 1714.8

[58 FR 66263, Dec. 20, 1993]

§ 1710.51 Loan guarantees.

RUS provides financing through 100 percent loan guarantees made under sections 306 and 306A of the RE Act. RUS also provides 90 percent loan guarantees under section 311 of the RE Act to enable borrowers to secure financing from certain private lenders. The loan guarantees are made for a term of up to 35 years, and the interest rate is established at a rate agreed to by the borrower and the lender, with RUS concurrence. The guarantee applies to the repayment of both principal and interest.

[58 FR 66264, Dec. 20, 1993]

§ 1710.100

7 CFR Ch. XVII (1–1–97 Edition)

§§ 1710.52–1710.99 [Reserved]

Subpart C—Loan Purposes and Basic Policies

§ 1710.100 General.

RUS makes loans and loan guarantees to finance the construction of electric distribution, transmission and generation facilities, including system improvements and replacements required to furnish and improve electric service in rural areas, and for demand side management, energy conservation programs, and on grid and off grid renewable energy systems. In some circumstances, RUS may finance selected operating expenses of its borrowers. Loans made or guaranteed by the Administrator of RUS will be made in conformance with the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*), and 7 CFR chapter XVII. RUS provides certain technical assistance to borrowers when necessary to aid the development of rural electric service and to protect loan security.

[58 FR 66264, Dec. 20, 1993]

§ 1710.101 Types of eligible borrowers.

(a) RUS makes loans to corporations, states, territories, and subdivisions and agencies thereof; municipalities; people's utility districts; and cooperative, nonprofit, limited-dividend, or mutual associations that provide or propose to provide:

(1) The retail electric service needs of rural areas, or

(2) The power supply needs of distribution borrowers under the terms of power supply arrangements satisfactory to RUS.

(b) In making loans, RUS gives preference to states, territories, and subdivisions and agencies thereof; municipalities; people's utility districts; and cooperative, nonprofit, or limited-dividend associations. RUS does not make loans to individual consumers.

(c) For the purpose of determining eligibility of a distribution borrower not in default on the repayment of a loan made or guaranteed under the RE Act for a loan, loan guarantee, or lien accommodation, a default by a borrower from which a distribution bor-

rower purchases wholesale power shall not:

(1) Be considered a default by the distribution borrower;

(2) Reduce the eligibility of the distribution borrower for assistance under the RE Act; or

(3) Be the cause, directly or indirectly, of imposing any requirement or restriction on the borrower as a condition of the assistance, except such requirements or restrictions as are necessary to implement a debt restructuring agreed on by the power supply borrower and RUS.

(d) For the purpose of determining the eligibility of a distribution borrower, RUS will consider whether the distribution borrower is current on its obligations to its wholesale power supplier under the RUS wholesale power contract.

(e) Nothing in paragraph (c) of this section relieves any distribution borrower that is a member of a power supply borrower in default on its obligations to RUS or operating under a debt restructuring agreement, of requirements set forth in RUS regulations, including, without limitation, § 1710.112(b)(6), or of any terms and conditions that the Administrator may otherwise impose on any borrower as a condition of obtaining a loan or loan guarantee (including, in appropriate cases, member guarantees).

(f) Except as provided in paragraph (g) of this section, former borrowers that have paid off all outstanding loans may reapply for a loan to serve RE Act beneficiary loads accruing from the time the former borrower's complete loan application is received by RUS. The determination of whether an area is rural will be based on the Census designation of the area at the time of the reapplication for a loan, if the area is not served by electric facilities financed by RUS. If the area is served by electric facilities financed by RUS, it will continue to be considered rural.

(g) Former borrowers that have prepaid all, or portions of outstanding insured and direct loans in accordance with RUS regulations must comply with the provisions of 7 CFR part 1786

Rural Utilities Service, USDA

§1710.104

before being considered eligible to borrow additional funds from RUS.

[57 FR 1053, Jan. 9, 1992; 57 FR 4513, Feb. 5, 1992. Revised and redesignated at 58 FR 66264, Dec. 20, 1993]

§1710.102 Borrower eligibility for different types of loans.

(a) *Insured loans under section 305.* Insured loans are normally reserved for the financing of distribution and subtransmission facilities of both distribution and power supply borrowers, including, under certain circumstances, the implementation of demand side management, energy conservation programs, and on grid and off grid renewable energy systems. In accordance with §1710.110, the Administrator may require the borrower to obtain no more than 30 percent of the total debt financing required for a proposed project by means of a supplemental loan from another lender without an RUS guarantee.

(b) *One hundred percent loan guarantees under section 306.* Both distribution and power supply borrowers are eligible for 100 percent loan guarantees under section 306 of the RE Act for any or all of the purposes set forth in §1710.106, including, under certain circumstances, the implementation of demand side management, energy conservation programs, and on grid and off grid renewable energy systems. (See 7 CFR part 1712). These guarantees are normally used to finance bulk transmission and generation facilities, but they may also be used to finance distribution and subtransmission facilities. If a borrower applies for a section 306 loan guarantee to finance all or a portion of distribution and subtransmission facilities, such request will not affect the borrower's eligibility for an insured loan to finance any remaining portion of said facilities or for any future insured loan to finance other distribution or subtransmission facilities. A section 306 loan guarantee, however, may not be used to guarantee a supplemental loan required by §1710.110.

(c) *One hundred percent loan guarantees under section 306A.* Under section 306A of the RE Act, both distribution and power supply borrowers are eligible under certain conditions to use an existing section 306 guarantee to refi-

nance advances made on or before July 2, 1986 from a loan made by the Federal Financing Bank. (See 7 CFR part 1786.)

(d) [Reserved]

(e) *Ninety percent guarantees of private-sector loans under section 311.* Under section 311 of the RE Act, both distribution and power supply borrowers in the state of Alaska are eligible under certain conditions to obtain from RUS a 90 percent guarantee of a private-sector loan to refinance their Federal Financing Bank loans. (See 7 CFR part 1786.)

[57 FR 2832, Jan. 24, 1992, as amended at 58 FR 66264, Dec. 20, 1993]

§1710.103 Area coverage.

(a) Borrowers shall make a diligent effort to extend electric service to all unserved persons within their service area who:

(1) Desire electric service; and

(2) Meet all reasonable requirements established by the borrower as a condition of service.

(b) If economically feasible and reasonable considering the cost of providing such service and/or the effects on all consumers' rates, such service shall be provided, to the maximum extent practicable, at the rates and minimum charges established in the borrower's rate schedules, without the payment by such persons, other than seasonal or temporary consumers, of a contribution in aid of construction. A seasonal consumer is one that demands electric service only during certain seasons of the year. A temporary consumer is a seasonal or year-round consumer that demands electric service over a period of less than five years.

(c) Borrowers may assess contributions in aid of construction provided such assessments are consistent with the policy set forth in this section.

[57 FR 1053, Jan. 9, 1992, as amended at 60 FR 67404, Dec. 29, 1995]

§1710.104 Service to non-RE Act beneficiaries.

(a) To the greatest extent practical, loans are limited to providing and improving electric facilities to serve consumers that are RE Act beneficiaries. When it is determined by the Administrator to be necessary in order to furnish or improve electric service in

§ 1710.105

rural areas, loans may, under certain circumstances, be made to finance electric facilities to serve consumers that are not RE Act beneficiaries.

(b) Loan funds may be approved for facilities to serve non-RE Act beneficiaries only if:

(1) The primary purpose of the loan is to furnish or improve service for RE Act beneficiaries; and

(2) The use of loan funds to serve non-RE Act beneficiaries is necessary and incidental to the primary purpose of the loan.

[57 FR 1053, Jan. 9, 1992; 57 FR 4513, Feb. 5, 1992, as amended at 58 FR 66264, Dec. 20, 1993]

§ 1710.105 State regulatory approvals.

(a) In States where a borrower is required to obtain approval of a project or its financing from a state regulatory authority, RUS may require that such approvals be obtained, if feasible for the borrower to do so, before the following types of loans are approved by RUS:

(1) Loans requiring an Environmental Impact Statement;

(2) Loans to finance generation and transmission facilities, when the loan request for such facilities is \$25 million or more; and

(3) Loans for the purpose of assisting borrowers to implement demand side management and energy conservation programs and on and off grid renewable energy systems.

(b) At minimum, in the case of all loans in states where state regulatory approval is required of the project or its financing, such state approvals will be required before loan funds are advanced.

(c) In cases where state regulatory authority approval has been obtained, but the borrower has failed to proceed with the project in a timely manner according to the schedule contained in the borrower's project design manual, or if there are cost overruns or other developments that threaten loan feasibility or security, RUS may require the borrower to obtain a reaffirmation of the project and its financing from the state authority before any additional loan funds are advanced.

[57 FR 1053, Jan. 9, 1992; 57 FR 4513, Feb. 5, 1992, as amended at 58 FR 66265, Dec. 20, 1993]

7 CFR Ch. XVII (1–1–97 Edition)

§ 1710.106 Uses of loan funds.

(a) Funds from loans made or guaranteed by RUS may be used to finance:

(1) *Distribution facilities.* (i) The construction of new distribution facilities or systems and the cost of system improvements and removals, less salvage value, needed to meet load growth requirements or improve the quality of service.

(ii) The purchase, rehabilitation and integration of existing distribution facilities and associated service territory when the acquisition is an incidental and necessary means of providing or improving service to persons in rural areas who are not receiving adequate central station service, and the borrower is unable to finance the acquisition from other sources. See § 1710.107.

(2) *Transmission and generation facilities.* (i) The construction of new transmission and generation facilities or systems and the cost of system improvements and removals, less salvage value, needed to meet load growth and improve the quality of service.

(ii) The purchase of an ownership interest in new or existing transmission or generation facilities to serve RE Act beneficiaries.

(3) *Ordinary plant replacements.* The excess of the total cost of ordinary replacements over the original cost of the facilities being replaced, unless financing of the total cost is specifically authorized by the Administrator.

(4) *Warehouse and garage facilities.* The purchase, remodeling, or construction of warehouse and garage facilities required for the operation of a borrower's system. See paragraph (b) of this section.

(5) *Interest.* The payment of interest on indebtedness incurred by a borrower to finance the construction of generation and transmission facilities during the period preceding the date such facilities are placed into service, if requested by the borrower and found necessary by RUS.

(6) Certain costs incurred in demand side management, energy conservation programs and on and off grid renewable energy systems.

(b) In cases of financial hardship, as determined by the Administrator, loans may also be made to finance the following items:

Rural Utilities Service, USDA

§1710.107

(1) The headquarters office and other headquarters facilities in addition to those cited in paragraph (a)(4) of this section;

(2) General plant equipment, including furniture, office, transportation, data processing and other work equipment; and

(3) Working capital required for the initial operation of a new system.

(c) RUS will not make loans to finance the following:

(1) Electric facilities, equipment, appliances, or wiring located inside the premises of the consumer, except qualifying items included in a loan for demand side management or energy resource conservation programs, or on or off grid renewable energy systems;

(2) Facilities to serve consumers who are not RE Act beneficiaries unless those facilities are necessary and incidental to providing or improving electric service in rural areas (See §1710.104);

(3) Any facilities or other purposes that a state regulatory authority having jurisdiction will not approve for inclusion in the borrower's rate base, or will not otherwise allow rates sufficient to repay with interest the debt incurred for the facilities or other purposes; and

(4) Any facilities or other specific purposes that were included in a loan made or guaranteed by RUS that the borrower has prepaid or that has been rescinded.

(d) A distribution borrower may request a loan period of up to 4 years. Except in the case of loans for new generating and associated transmission facilities, a power supply borrower may request a loan period of not more than 4 years for transmission and substation facilities and improvements or replacements of generation facilities. The loan period for new generating facilities is determined on a case by case basis. The loan period for DSM activities will be determined in accordance with §1710.355. The Administrator may approve a loan period shorter than the period requested by the borrower, if in the Administrator's sole discretion, a loan made for the longer period would fail to meet RUS requirements for loan feasibility and loan security set forth in §§1710.112 and 1710.113, respectively.

(e) To make optimal use of available loan funds in furthering the purposes of the RE Act, the amount lent to any one borrower in a given year may be limited to less than the total amount eligible for RUS financing, taking into consideration the amount of loan funds available and the size of RUS's loan application inventory. Such limitation will not be imposed unless the amount authorized for lending in a given year is substantially less, as determined by the Administrator, than the amount of eligible loan funds requested. Such reductions will be made on an equal proportion basis for all applicants based on the amount of funds for which an applicant is eligible. The portion of a request for which a borrower is eligible that is not loaned in one year will be eligible for a loan in subsequent years, provided that a resolution is submitted to RUS by the borrower's board of directors certifying that the funds are still needed to complete purposes contained in the original loan application.

(f)(1) For borrowers having one or more loans approved on or after October 1, 1991, advances of funds will be made only for the primary budget purposes included in the loan as shown on RUS Form 740c as amended and approved by RUS, or on a construction work plan or a construction work plan amendment approved by RUS. Each advance will be charged to the oldest outstanding note(s) having unadvanced funds for the primary budget purpose for which the request for advances was made, regardless of whether such notes are associated with loans approved before or after October 1, 1991, unless any conditions on advances under any of these notes have not been met by the borrower.

(2) For borrowers whose most recent loan was approved before October 1, 1991, advances will be made on the oldest outstanding note having unadvanced funds, unless any conditions on advances under such note have not been met by the borrower.

[57 FR 1053, Jan. 9, 1992, as amended at 58 FR 66265, Dec. 20, 1993; 60 FR 3730, Jan. 19, 1995]

§1710.107 Amount lent for acquisitions.

The maximum amount that will be lent for an acquisition is limited to the

§ 1710.108

value of the property, as determined by RUS. If the acquisition price exceeds this amount, the borrower shall provide the remainder without RUS financial assistance.

§ 1710.108 Mergers and consolidations.

(a) RUS encourages its borrowers to consider merging or consolidating with another electric borrower when such action will contribute to greater operating efficiency and financial soundness.

(b) After a merger or consolidation, RUS will give priority consideration per § 1710.119 to the processing of loans for the surviving system to finance the integration and rehabilitation of electric facilities, if necessary, and the improvement or extension of electric service in rural areas. Such priority consideration will also be given in the case of a borrower that has merged or consolidated with an electric system that has not previously received RUS financial assistance, if such system was serving primarily rural residents at the time of the merger or consolidation and such rural residents will continue to be served by the merged or consolidated system. RUS does not make loans for costs incurred in effectuating mergers or consolidations, such as legal expenses or feasibility study costs.

§ 1710.109 Reimbursement of general funds and interim financing.

(a) Borrowers may request that a loan include funds to reimburse general funds and/or replace interim financing used to finance equipment and facilities that were included in an RUS-approved construction work plan, work plan amendment or other RUS-approved plan, and for which loan funds have not been provided by RUS. Such reimbursement and/or replacement of interim financing may include the direct costs of procurement and construction, as well as the related cost of engineering, architectural, environmental and other studies and plans needed to support the project, when such cost is capitalized as part of the cost of the facilities.

(b) If procurement and/or construction of the equipment and facilities was completed prior to the current

7 CFR Ch. XVII (1–1–97 Edition)

loan period, reimbursement, including replacement of interim financing, will be limited, except in cases of extreme financial hardship as determined by the Administrator, to the cost of procurement and construction completed during the period immediately preceding the current loan period, as specified in paragraph (c) of this section. As defined in § 1710.2, the loan period begins on the date shown on page 1 of RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers.

(c)(1) The period immediately preceding the current loan period for which reimbursement and replacement of interim financing is authorized under paragraph (b) of this section is as follows:

(i) The number of months agreed to by RUS and the borrower for complete loan applications received by RUS before February 10, 1992;

(ii) 36 months for complete loan applications received from February 10, 1992 through February 10, 1993; or

(iii) 24 months for complete loan applications received after February 10, 1993.

(2) Policies for reimbursement of general funds and interim financing following certain mergers, consolidations, and transfers of systems substantially in their entirety are set forth in 7 CFR 1717.154.

(d) If the reimbursement of general funds and/or replacement of interim financing is for approved expenditures for equipment and facilities whose procurement and/or construction is completed during the current loan period, the time limits of paragraph (c) of this section do not apply.

[57 FR 1053, Jan. 9, 1992, as amended at 58 FR 66265, Dec. 20, 1993; 61 FR 66870, Dec. 19, 1996]

EFFECTIVE DATE NOTE: At 61 FR 66870, Dec. 19, 1996, § 1710.109 was amended by redesignating paragraphs (c) introductory text, (c)(1), (c)(2), and (c)(3) as paragraphs (c)(1) introductory text, (c)(1)(i), (c)(1)(ii), and (c)(1)(iii), respectively, and by adding a new paragraph (c)(2), effective Jan. 21, 1997.

§ 1710.110 Supplemental financing.

(a) Except in the case of financial hardship as determined by the Administrator, and following certain mergers, consolidations, and transfers of systems substantially in their entirety as

Rural Utilities Service, USDA

§1710.110

set forth in 7 CFR 1717.154, applicants for a municipal rate loan will be required to obtain a portion of their loan funds from a supplemental source without an RUS guarantee, in the amounts set forth in paragraph (c) of this section. RUS will normally grant a lien accommodation to the supplemental lender. RUS does not require supplemental financing in conjunction with an RUS guaranteed loan. However, if a borrower elects to obtain supplemental financing in conjunction with a guaranteed loan, the granting of RUS's loan guarantee may be conditioned on the borrower's obtaining supplemental financing.

(b) The terms and conditions of supplemental financing and any security offered to the supplemental lender are subject to RUS approval. Generally, supplemental loans must have the same final maturity and be amortized in the same manner as RUS loans made concurrently. Borrowers may elect to repay the loans either in substantially equal periodic installments covering interest and principal, or in periodic installments that include interest and level amortization of principal.

(c) *Supplemental financing required for municipal rate loans*—(1) *Distribution borrowers.*

(i) Distribution borrowers that had, as of December 31, 1980, an average consumer density of 2 or fewer consumers per mile or an average adjusted plant revenue ratio (APRR), as defined in §1710.2, of over 9.0 shall obtain supplemental financing equal to 10 percent of their loan request.

(ii) All other distribution borrowers must obtain supplemental financing according to their plant revenue ratio (PRR), as defined in §1710.2, based on the most recent year-end data available on the date of loan approval, as follows:

PRR	Supplemental loan percentage
9.00 and above	10
8.01–8.99	20
8.00 and below	30

(iii) If a distribution borrower enters into a merger, consolidation, or transfer of system substantially in its entirety, and the provisions of 7 CFR 1717.154(b) do not apply, required sup-

plemental financing will be determined as follows for loans approved by RUS after December 19, 1996. If one of the merging parties met the criteria in paragraph (c)(1)(i) of this section prior to the effective date of the merger consolidation or transfer, the borrower will be required to obtain supplemental financing equal to 10 percent of any loan funds requested for facilities to serve consumers located in the territory formerly served by the “paragraph (c)(1)(i)” borrower. The required amount of supplemental financing for the rest of the loan will be determined according to the provisions of paragraph (c)(1)(ii) of this section.

(2) *Power supply borrowers.* The supplemental loan proportion required of a power supply borrower is based on the simple arithmetic mean of the supplemental loan proportions required of the borrower's distribution members.

(3) *Subsequent loans.* (i) If more than 5 percent of an insured loan made prior to November 1, 1993, or of a municipal rate loan is terminated or rescinded, the amount of supplemental financing required in the borrower's next loan after the rescission for which supplemental financing is required, pursuant to paragraph (a) of this section, will be adjusted to average the actual supplemental financing portion on the terminated or rescinded loan with the supplemental financing portion that would have been required on the new loan according to paragraphs (c)(1) and (2) of this section, in accordance with the formulas set forth in paragraphs (c)(3)(ii) and (iii) of this section.

(ii) If a borrower's supplemental financing requirement as set forth in paragraphs (a), (c)(1), and (c)(2) of this section has not changed between the most recent loan and the loan being considered, then the amount of supplemental financing required for the new loan will be computed as follows:

Supplemental financing amount, new loan = $[(A + B) \times C] - D$

where:

A = The total funds (\$) actually advanced from the first loan, including both RUS loan funds and funds from the supplemental loan, plus any unadvanced funds still available to the borrower after the rescission.

§ 1710.111

7 CFR Ch. XVII (1–1–97 Edition)

B = The total amount (\$) for facilities of the new loan request, including both RUS loan funds and funds from supplemental loans.

C = The proportion (%) of supplemental financing required on the loans according to paragraphs (a), (c)(1) and (c)(2) of this section.

D = The amount (\$) of supplemental funds actually advanced on the first loan, plus any unadvanced supplemental funds still available to the borrower after the rescission.

(iii) If a borrower's supplemental financing requirement as set forth in paragraphs (a), (c)(1), and (c)(2) of this section has changed between the most recent loan and the loan being considered, then the amount of supplemental financing required for the new loan will be the weighted average of the portions otherwise applicable on the two loans and will be computed as follows:

Supplemental financing amount, new loan = $(A \times C_1) + (B \times C_2) - D$

where:

A = The total funds (\$) actually advanced from the first loan, including both RUS loan funds and funds from the supplemental loan, plus any unadvanced funds still available to the borrower after the rescission.

B = The total amount (\$) for facilities of the new loan request, including both RUS funds and funds from supplemental loans.

C₁ = The proportion (%) of supplemental financing required on the old loan according to paragraphs (a), (c)(1) and (c)(2) of this section.

C₂ = The proportion (%) of supplemental financing required on the new loan according to paragraphs (a), (c)(1) and (c)(2) of this section.

D = The amount (\$) of supplemental funds actually advanced on the first loan, plus any unadvanced supplemental funds still available to the borrower after the rescission.

(d) Supplemental financing will not be required in connection with hardship rate loans. Borrowers that qualify for hardship rate loans but elect to take municipal rate loans instead, will be required to obtain supplemental financing pursuant to this section, un-

less at the time of loan approval, there are no funds remaining available for hardship loans, in which case supplemental financing will not be required.

[57 FR 1053, Jan. 9, 1992, as amended at 58 FR 66265, Dec. 20, 1993; 60 FR 3730, Jan. 19, 1995; 61 FR 66870, Dec. 19, 1996]

EFFECTIVE DATE NOTE: At 61 FR 66870, Dec. 19, 1996, § 1710.110 was amended by revising the first sentence of paragraph (a) and adding a new paragraph (c)(1)(iii), effective Jan. 21, 1997. For the convenience of the user, the superseded text is set forth as follows:

§ 1710.110 Supplemental financing.

(a) Except in the case of financial hardship as determined by the Administrator, applicants for a municipal rate loan will be required to obtain a portion of their loan funds from a supplemental source without an RUS guarantee, in the amounts set forth in paragraph (c) of this section.

* * * * *

§ 1710.111 Refinancing.

(a) RUS makes loans or loan guarantees to refinance the outstanding indebtedness of borrowers in the following cases:

(1) Loans or loan guarantees to refinance long-term debt owed by borrowers to the Tennessee Valley Authority for credit extended under the terms of the Tennessee Valley Authority Act of 1933, as amended.

(2) Loan guarantees made in accordance with the provisions of section 306A of the RE Act to prepay a loan (or any loan advance thereunder) made by the Federal Financing Bank.

(b) In certain circumstances, RUS may make a loan to replace interim financing obtained for the construction of facilities (See § 1710.109).

§ 1710.112 Loan feasibility.

(a) RUS will make a loan only if there is reasonable assurance that the loan, together with all outstanding loans and other obligations of the borrower, will be repaid in full as scheduled, in accordance with the mortgage, notes, and loan contracts. The borrower must provide evidence satisfactory to the Administrator that the loan will be repaid in full as scheduled, and that all other obligations of the borrower will be met.

Rural Utilities Service, USDA

§1710.113

(b) Based on evidence submitted by the borrower and other information, RUS will use the following criteria to evaluate loan feasibility:

(1) Projections of power requirements, rates, revenues, expenses, margins, and other factors for the present system and proposed additions are based on reasonable assumptions and adequate supporting data and analysis, including analysis of a range of assumptions for the significant variables, when required by §1710.300(d)(5).

(2) Projected revenues from the rates proposed by the borrower are adequate to meet the required TIER and DSC ratios based on the borrower's total costs, including the projected maximum debt service cost of the new loan.

(3) The economics of the borrower's operations and service area are such that consumers can reasonably be expected to pay the proposed rates required to cover all expenses and meet RUS TIER and DSC requirements, and the borrower can reasonably compete with other utilities and other energy sources to prevent substantial load loss while providing satisfactory service to its consumers.

(4) Risks of possible loss of substantial loads from large consumers or from load concentrations in particular industries will not substantially impair loan feasibility.

(5) Risks of loss of portions of the borrower's service territory from annexation or other causes will not substantially impair loan feasibility. If there appears to be a substantial risk, RUS may require additional information from the borrower, such as a summary and analysis of the risk by the borrower; state, county or local planning reports having information on projected growth or expansion plans of local communities; annexation plans of the municipalities in question; and any other relevant information.

(6) In states where rates or investment decisions are subject to approval by state regulatory authorities, there is reasonable expectation that such approvals will be forthcoming to enable repayment of the loan in full according to its terms.

(7) The experience and performance of the system's management is acceptable.

(8) In the case of joint ventures, the borrower has sufficient management control or other contractual safeguards with respect to the construction and operation of the jointly owned facility to ensure that the borrower's interests are protected and the credit risk is minimized.

(9) The borrower has implemented adequate financial and management controls and there are and have been no significant financial or other irregularities.

(10) The borrower's projected capitalization, measured by its equity as a percentage of total assets, is adequate to enable the borrower to meet its financial needs and to provide service consistent with the RE Act. Among the factors to be considered in reviewing the borrower's projected capitalization are the economic strength of the borrower's service territory, the inherent cost of providing service to the territory, the disparity in rates between the borrower and neighboring utilities, the intensity of competition faced by the borrower from neighboring utilities and other power sources, and the relative amount of new capital investment required to serve existing or new loads.

[57 FR 1053, Jan. 9, 1992; 57 FR 4513, Feb. 5, 1992, as amended at 60 FR 3731, Jan. 19, 1995]

§1710.113 Loan security.

(a) RUS makes loans only if, in the judgment of the Administrator, the security therefor is reasonably adequate and the loan will be repaid according to its terms within the time agreed.

(b) RUS generally requires that borrowers provide it with a first lien on all of the borrower's real and personal property, including intangible personal property and any property acquired after the date of the loan. This lien shall be in the form of a mortgage by the borrower to the Government or a deed of trust between the borrower and a trustee satisfactory to the Administrator, together with such security documents as RUS may deem necessary in a particular case.

(c) When a borrower is unable by reason of preexisting encumbrances, or otherwise, to furnish a first mortgage

§ 1710.114

7 CFR Ch. XVII (1–1–97 Edition)

lien on its entire system the Administrator may accept other forms of security, such as a pledge of revenues, if he or she determines such security is reasonably adequate and the form and nature thereof is otherwise acceptable.

(d) In the case of loans that include the financing of electric facilities that are operated as an integral component of a non-RUS financed system (such as generation and transmission facilities co-owned with other electric utilities), the borrower shall, in addition to the mortgage lien on all of the borrower's electric facilities, furnish adequate assurance, in the form of contractual or other security arrangements, that the system will be operated on an efficient and continuous basis. Satisfactory evidence must also be provided that the non-RUS financed system is financially sound and under capable management. Examples of such evidence include financial reports, annual reports, Security and Exchange Commission 10K reports if the system is required to file them, credit reports from Standard and Poor's, Moodys or other recognized sources, reports to state regulatory authorities and the Federal Energy Regulatory Commission, and evidence of a successful track record in related construction projects.

(e) Additional controls on the borrower's financial, investment and managerial activities appear in the loan contract and mortgage required by RUS.

§ 1710.114 TIER, DSC, OTIER and ODSC requirements.

(a) *General.* Requirements for coverage ratios are set forth in the borrower's mortgage, loan contract, or other contractual agreements with RUS. The requirements set forth in this section apply to borrowers that receive a loan approved by RUS on or after February 10, 1992. Nothing in this section, however, shall reduce the coverage ratio requirements of a borrower that has contractually agreed with RUS to a higher requirement.

(b) *Coverage ratios.* (1) Distribution borrowers. The minimum coverage ratios required of distribution borrowers, whether applied on an annual or average basis, are a TIER of 1.50, DSC of 1.25, OTIER of 1.1, and ODSC of 1.1.

OTIER and ODSC shall apply to distribution borrowers that receive a loan approved by RUS on or after January 29, 1996.

(2) The minimum coverage ratios required of power supply borrowers, whether applied on an annual or average basis, are a TIER of 1.05 and DSC of 1.00.

(3) When new loan contracts are executed, the Administrator may, case by case, increase the coverage ratios of distribution and power supply borrowers above the levels cited in paragraphs (b)(1) and (b)(2), respectively, of this section if the Administrator determines that the higher ratios are required to ensure reasonable security for and/or the repayment of loans made or guaranteed by RUS. Also, the Administrator may, case by case, reduce said coverage ratios if the Administrator determines that the lower ratios are required to ensure reasonable security for and/or the repayment of loans made or guaranteed by RUS. Policies for coverage ratios following certain mergers, consolidations, and transfers of systems substantially in their entirety are in 7 CFR 1717.155.

(4) If a distribution borrower has in service or under construction a substantial amount of generation and associated transmission plant financed at a cost of capital substantially higher than the cost of funds under section 305 of the RE Act, then the Administrator may establish, in his or her sole discretion, blended levels for TIER, DSC, OTIER, and ODSC based on the respective shares of total utility plant represented by said generation and associated transmission plant and by distribution and other transmission plant.

(c) *Requirements for loan feasibility.* To be eligible for a loan, borrowers must demonstrate to RUS that they will, on a pro forma basis, earn the coverage ratios required by paragraph (b) of this section in each of the years included in the borrower's long-range financial forecast prepared in support of its loan application, as set forth in subpart G of this part.

(d) *Requirements for maintenance of coverage ratios—(1) Prospective requirement.* Borrowers must design and implement rates for utility service to provide sufficient revenue (along with

other revenue available to the borrower in the case of TIER and DSC) to pay all fixed and variable expenses, to provide and maintain reasonable working capital and to maintain on an annual basis the coverage ratios required by paragraph (b) of this section. Rates must be designed and implemented to produce at least enough revenue to meet the requirements of this paragraph under the assumption that average weather conditions in the borrower's service territory will prevail in the future, including average system damage and outages due to weather and the related costs. Failure to design and implement rates pursuant to the requirements of this paragraph shall be an event of default upon notice provided in accordance with the terms of the borrower's mortgage or loan contract.

(2) *Retrospective requirement.* The average coverage ratios achieved by a borrower in the 2 best years out of the 3 most recent calendar years must meet the levels required by paragraph (b) of this section. If a borrower fails to achieve these average levels, it must promptly notify RUS in writing. Within 30 days of such notification or of the borrower being notified in writing by RUS, whichever is earlier, the borrower, in consultation with RUS, must provide a written plan satisfactory to RUS setting forth the actions that will be taken to achieve the required coverage ratios on a timely basis. Failure to develop and implement a plan satisfactory to RUS shall be an event of default upon notice provided in accordance with the terms of the borrower's mortgage or loan contract.

(3) *Fixed and variable expenses,* as used in this section, include but are not limited to: all taxes, depreciation, maintenance expenses, and the cost of electric power and energy and other operating expenses of the electric system, including all obligations under the wholesale power contract, all lease payments when due, and all principal and interest payments on outstanding indebtedness when due.

(e) *Requirements for advance of funds.* (1) If a borrower applying for a loan has failed to achieve the coverage ratios required by paragraph (b) of this section during the latest 12 month period immediately preceding approval of the

loan, or if any of the borrower's average coverage ratios for the 2 best years out of the most recent 3 calendar years were below the levels required in paragraph (b) of this section, RUS may withhold the advance of loan funds until the borrower has adopted an annual financial plan and operating budget satisfactory to RUS and taken such other action as RUS may require to demonstrate that the required coverage ratios will be maintained in the future and that the loan will be repaid with interest within the time agreed. Such other action may include, for example, increasing system operating efficiency and reducing costs or adopting a rate design that will achieve the required coverage ratios, and either placing such rates into effect or taking action to obtain regulatory authority approval of such rates. If failure to achieve the coverage ratios is due to unusual events beyond the control of the borrower, such as unusual weather, system outage due to a storm or regulatory delay in approving rate increases, then the Administrator may waive the requirement that the borrower take the remedial actions set forth in this paragraph, provided that such waiver will not threaten loan feasibility.

(2) With respect to any outstanding loan approved by RUS on or after February 10, 1992, if, based on actual or projected financial performance of the borrower, RUS determines that the borrower may not achieve its required coverage ratios in the current or future years, RUS may withhold the advance of loan funds until the borrower has taken remedial action satisfactory to RUS.

[60 FR 67404, Dec. 29, 1995, as amended at 61 FR 66871, Dec. 19, 1996]

EFFECTIVE DATE NOTE: At 61 FR 66871, Dec. 19, 1996, § 1710.114 was amended by adding a sentence at the end of paragraph (b)(3), effective Jan. 21, 1997.

§ 1710.115 Final maturity.

(a) RUS is authorized to make loans and loan guarantees with a final maturity of up to 35 years. The borrower may elect a repayment period for a loan not longer than the expected useful life of the facilities, not to exceed 35 years. Most of the electric facilities

§ 1710.117

financed by RUS have a long useful life, often approximating 35 years. Some facilities, such as load management equipment and Supervisory Control and Data Acquisition equipment, have a much shorter useful life due, in part, to obsolescence. Operating loans to finance working capital required for the initial operation of a new system are a separate class of loans and usually have a final maturity of less than 10 years.

(b) Loans made or guaranteed by RUS for facilities owned by the borrower generally must be repaid with interest within a period, up to 35 years, that approximates the expected useful life of the facilities financed. The expected useful life shall be based on the weighted average of the useful lives that the borrower proposes for the facilities financed by the loan, provided that the proposed useful lives are deemed appropriate by RUS. RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers, submitted as part of the loan application must include, as a note, either a statement certifying that at least 90 percent of the loan funds are for facilities that have a useful life of 33 years or longer, or a schedule showing the costs and useful life of those facilities with a useful life of less than 33 years. The useful lives proposed by the borrower for the facilities financed must be consistent with the borrower's proposed depreciation rates for these facilities. In states where the borrower must obtain state regulatory authority approval of depreciation rates for rate making purposes, the depreciation rates used for the purposes of this paragraph shall be the rates currently approved by the state authority or rates for which the borrower plans to seek state authority approval, provided that these rates are deemed appropriate by RUS. In other states, if the rates proposed by the borrower are not deemed appropriate by RUS, RUS will base expected useful life on the depreciation rates listed in Bulletin 183-1, or its successor, revising such rates as necessary to reflect current industry practice (for availability of bulletins, see § 1710.5.). Final maturities for loans for the implementation of programs for demand side management and energy resource conservation

7 CFR Ch. XVII (1-1-97 Edition)

and on and off grid renewable energy sources not owned by the borrower will be determined by RUS. Due to the uncertainty of predictions over an extended period of time, RUS may add up to 2 years to the composite average useful life of the facilities in order to determine final maturity.

(c) [Reserved]

(d) The Administrator may approve a repayment period longer than the expected useful life of the facilities financed, up to 35 years, if a longer final maturity is required to ensure repayment of the loan and loan security is adequate.

(e) The final maturity of a loan established pursuant to the provisions of this section shall not be extended as a result of extending loan payments under section 12(a) of the RE Act.

[58 FR 66265, Dec. 20, 1993, as amended at 60 FR 3731, Jan. 19, 1995]

§ 1710.116 [Reserved]

§ 1710.117 Environmental considerations.

Borrowers are required to comply with 7 CFR part 1794, which sets forth applicable requirements of the National Environmental Policy Act (NEPA), as amended (42 U.S.C. 4321 *et seq.*); the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500-1508); and certain other statutes, regulations and orders. Borrowers must also comply with any other applicable Federal or state environmental laws and regulations.

§ 1710.118 [Reserved]

§ 1710.119 Loan processing priorities.

(a) Generally loans are processed in chronological order based on the date the complete application is received in the Regional office.

(b) The Administrator may give priority to processing loans that are required to meet the following needs:

(1) To restore electric service following a major storm or other catastrophe;

(2) To bring existing electric facilities into compliance with any environmental requirements imposed by Federal or state law that were not in effect

Rural Utilities Service, USDA

§ 1710.127

at the time the facilities were originally constructed;

(3) To finance the capital needs of borrowers that are the result of a merger, consolidation, or a transfer of a system substantially in its entirety, provided that the merger, consolidation, or transfer has either been approved by RUS or does not need RUS approval pursuant to the borrower's loan documents (See 7 CFR 1717.154); or

(4) To correct serious safety problems, other than those resulting from borrower mismanagement or negligence.

(c) The Administrator may also change the normal order of processing loan applications when it is necessary to ensure that all loan authority for the fiscal year is utilized.

[57 FR 1053, Jan. 9, 1992, as amended at 61 FR 66871, Dec. 19, 1996]

EFFECTIVE DATE NOTE: At 61 FR 66871, Dec. 19, 1996, § 1710.119 was amended by revising paragraph (b)(3), effective Jan. 21, 1997. For the convenience of the user, the superseded text is set forth as follows:

§ 1710.119 Loan processing priorities.

* * * * *

(b) * * *

(3) To finance the capital needs of borrowers that have merged or consolidated after the effective date of this regulation, provided that the merger or consolidation has been approved by RUS and determined to enhance the repayment or security of RUS loans. Such priority will be considered for a period up to 5 years after RUS approval of the merger or consolidation; or

* * * * *

§ 1710.120 Construction standards and contracting.

Borrowers shall follow all RUS requirements regarding construction work plans, construction standards, approved materials, construction and related contracts, inspection procedures, and bidding procedures.

§ 1710.121 Insurance requirements.

Borrowers are required to comply with certain requirements with respect to insurance and fidelity coverage as set forth in 7 CFR part 1788.

§ 1710.122 Equal opportunity and non-discrimination.

Borrowers are required to comply with certain regulations on non-discrimination in program services and benefits and on equal employment opportunity as set forth in RUS Bulletins 20-15 and 20-19 or their successors; 7 CFR parts 15 and 15b; and 45 CFR part 90.

§ 1710.123 Debarment and suspension.

Borrowers are required to comply with certain requirements on debarment and suspension as set forth in 7 CFR part 3017.

§ 1710.124 Uniform Relocation Act.

Borrowers are required to comply with applicable provisions of 49 CFR part 24, which sets forth the requirements of the Uniform Relocation Assistance and Real Property Acquisition Policy Act of 1970 (Pub. L. 91-646; 84 Stat. 1894), as amended by the Uniform Relocation Act Amendments of 1987 (Pub. L. 100-17; 101 Stat. 246-256) and the Intermodal Surface Transportation Efficiency Act of 1991.

§ 1710.125 Restrictions on lobbying.

Borrowers are required to comply with certain requirements with respect to restrictions on lobbying activities. See 7 CFR part 3018.

§ 1710.126 Federal debt delinquency.

(a) Prior to approval of a loan or advance of funds, a borrower must report to RUS whether or not it is delinquent on any Federal debt, such as Federal income tax obligations or a loan or loan guarantee from another Federal agency. If delinquent, the reasons for the delinquency must be explained, and RUS will take such explanation into consideration in deciding whether to approve the loan or advance of funds.

(b) Applicants for a loan or loan guarantee must also certify that they have been informed of the collection options the Federal government may use to collect delinquent debt.

§ 1710.127 Drug free workplace.

Borrowers are required to comply with the Drug Free Workplace Act of 1988 (Pub. L. 100-690, title V, subtitle D)

§ 1710.150

and the Act's implementing regulations (7 CFR part 3017) when a borrower receives a Federal grant or enters into a procurement contract awarded pursuant to the provisions of the Federal Acquisition Regulation (title 48 CFR) to sell to a Federal agency property or services having a value of \$25,000 or more.

§§ 1710.128—1710.149 [Reserved]

Subpart D—Basic Requirements for Loan Approval

§ 1710.150 General.

The RE Act and prudent lending practice require that the Administrator make certain findings before approving an electric loan or loan guarantee. The borrower shall provide the evidence determined by the Administrator to be necessary to make these findings.

§ 1710.151 Required findings for all loans.

(a) *Area coverage.* Adequate electric service will be made available to the widest practical number of rural users in the borrower's service area during the life of the loan. See § 1710.103.

(b) *Feasibility.* The loan is feasible and it will be repaid on time according to the terms of the mortgage, note, and loan contract. At any time after the original determination of feasibility, the Administrator may require the borrower to demonstrate that the loan remains feasible if there have been, or are anticipated to be, material changes in the borrower's costs, loads, rates, rate disparity, revenues, or other relevant factors from the time that feasibility was originally determined. See § 1710.112 and subpart G of this part.

(c) *Security.* RUS will have a first lien on the borrower's total system or other adequate security, and adequate financial and managerial controls will be included in loan documents. See § 1710.113.

(d) *Interim financing.* For loans that include funds to replace interim financing, there is satisfactory evidence that the interim financing was used for purposes approved by RUS and that the loan meets all applicable requirements of this part.

7 CFR Ch. XVII (1–1–97 Edition)

(e) *Facilities for nonrural areas.* Whenever a borrower proposes to use loan funds for the improvement, expansion, construction, or acquisition of electric facilities for non-RE Act beneficiaries, there is satisfactory evidence that such funds are necessary and incidental to furnishing or improving electric service for RE Act beneficiaries. See § 1710.104.

(f) *Facilities to be included in rate base.* In states having jurisdiction, the borrower has provided satisfactory evidence based on the information available, such as an opinion of counsel, that the state regulatory authority will not exclude from the borrower's rate base any of the facilities included in the loan request, or otherwise prevent the borrower from charging rates sufficient to repay with interest the debt incurred for the facilities. Such evidence may be based on, but not necessarily limited to, the provisions of applicable state laws; the rules and policies of the state authority; precedents in other similar cases; statements made by the state authority; any assurances given to the borrower by the state authority; and other relevant information and experience.

§ 1710.152 Primary support documents.

The following primary support documents and studies must be prepared by the borrower for approval by RUS in order to support a loan application:

(a) *Power requirements study (PRS).* This study provides the borrower and RUS with an understanding of the borrower's system loads, the factors influencing those loads, and valid estimates of future loads. It provides a basis for projecting annual kWh sales and revenues, and for engineering estimates of plant additions required to accommodate the forecasted loads. The requirements for a PRS and the circumstances under which one must be submitted to RUS are set forth in subpart E of this part.

(b) *Construction work plan (CWP).* The CWP shall specify and document the capital investments required to serve a borrower's planned new loads, improve service reliability and quality, and service the changing needs of existing loads. The requirements for a CWP are set forth in subpart F of this part.

(c) *Long-range financial forecasts.* RUS encourages borrowers to maintain on a current basis a long-range financial forecast, which should be used by a borrower's board of directors and manager to guide the system toward its financial goals. The forecast submitted in support of a loan application shall show the projected results of future actions planned by the board of directors. The requirements for a long-range financial forecast are set forth in subpart G of this part.

(d) *Borrower's environmental report (BER).* This document is used to determine what effect the construction of the facilities included in the construction work plan will have on the environment. In developing a BER a borrower shall follow the policy and procedural requirements set forth in 7 CFR part 1794. After reviewing the BER, RUS will determine whether additional environmental studies will be required.

§ 1710.153 Additional requirements and procedures.

Additional requirements and procedures for obtaining RUS financial assistance are set forth in 7 CFR part 1712 for loan guarantees, and in 7 CFR part 1714 for insured loans.

§§ 1710.154—1710.199 [Reserved]

Subpart E—Power Requirements Studies

§ 1710.200 Purpose.

This subpart sets forth the policies, procedures and criteria for the preparation, approval and use of power requirements studies (PRSs) and PRS work plans. A PRS is a thorough study of a borrower's electric loads and the factors that affect those loads in order to determine, as accurately as practicable, the borrower's future requirements for energy and capacity. The PRS of a power supply borrower includes and integrates the PRSs of its member systems.

§ 1710.201 Requirement to prepare a PRS—power supply borrowers.

(a) A power supply borrower having total assets of \$300 million or more shall:

(1) Meet one of the following two requirements:

(i) Prepare and obtain RUS approval of a new PRS not less frequently than every 3 years, which shall include new or revised equations and models, and annually update the PRS in the intervening years based on new data and assumptions, but not necessarily new or revised equations and models, and file the annual updates with RUS; or

(ii) Prepare and obtain RUS approval of a new PRS not less frequently than every 2 years, which shall include new or revised equations and models;

(2) Maintain a current PRS work plan approved by RUS which shall set forth the resources, methods, schedules and milestones required for the preparation and maintenance of the PRS; and

(3) Provide a current PRS approved by RUS in support of any request for RUS financial assistance or for RUS approval of long-term power contracts or other actions as appropriate.

(b) A power supply borrower with total assets of less than \$300 million is not required to have a current, RUS-approved PRS on an ongoing basis but is required to provide a current, RUS-approved PRS in support of:

(1) An application for an RUS loan or loan guarantee if said loan or guarantee exceeds \$25 million or 10 percent of the borrower's total utility plant, whichever is smaller; and

(2) Requests for RUS approval of long-term power contracts or other actions, as may be required by RUS on a case by case basis.

(c) A power supply borrower that is a member of another power supply borrower that has total assets of \$300 million or more is subject to the requirements of § 1710.201(a), except that such member is not required to have a separate PRS work plan. The distribution members of such a power supply borrower are also subject to the requirements of § 1710.201(a), except that such members are not required to have separate PRS work plans.

(d) At the borrower's request, RUS may extend for up to 3 months the time frames set forth in § 1710.201(a)(1) if RUS determines the borrower is in substantial compliance with its RUS-approved work plan and significant

§ 1710.202

7 CFR Ch. XVII (1–1–97 Edition)

changes in existing PRS models and assumptions are not required.

(e) For purposes of paragraphs (a)(3) and (b) of this section, the determination of whether a borrower's PRS is current will be made by RUS at the time financial assistance or other RUS action is requested. The borrower may be required to update the PRS to incorporate the most recently available operating data and other information.

§ 1710.202 Requirement to prepare a PRS—distribution borrowers.

(a) If a distribution borrower is a member of a power supply borrower that has total assets of \$300 million or more, it must meet the requirements of § 1710.201(a), except for the requirement to prepare a work plan, which is the responsibility of the power supply borrower. Certain other distribution borrowers, as set forth in § 1710.201(c), are also subject to provisions of § 1710.201(a).

(b) All other distribution borrowers, including unaffiliated distribution systems as well as members of power supply borrowers with total assets of less than \$300 million, must either:

(1) Meet the requirements of § 1710.201(a), if the distribution borrower owns generation and bulk transmission plant valued at \$300 million or more, or

(2) Meet the requirements of § 1710.201(b), except that the loan threshold set forth in paragraph (b)(1) in the case of these distribution borrowers shall be \$3 million and 10 percent of total utility plant.

§ 1710.203 Basic policies and requirements for a PRS.

(a) A PRS or PRS update must be completed and submitted to RUS on a timely basis to enable prompt review by RUS.

(b) A PRS completed more than 12 months prior to submission will not be considered by RUS.

(c) Adequate coordination is required between power supply borrowers and their members in the preparation of their respective PRSs or PRS updates.

(d) To facilitate RUS review of the PRS work plan and the PRS, the borrower shall make available to RUS appropriate staff for consultation, and all

essential documentation, data, and other relevant information, in formats acceptable to RUS, that support the PRS work plan and the PRS.

(e) Notwithstanding any other provisions of this subpart, any power supply or distribution borrower may be required to prepare a new or updated PRS, or to maintain a current PRS on an ongoing basis, if required for RUS to determine loan feasibility, to ensure loan security, or to consider requests submitted for approval under a borrower's loan contract or mortgage.

(f) All PRSs shall include the following information, using a format approved by RUS, unless such information has already been provided to RUS in the PRS work plan or other submissions:

(1) A discussion of the scope of the PRS, including the proposed uses of the information developed for planning load management and energy efficiency programs, plant investments, and financial requirements;

(2) A discussion of the borrower personnel, consultants, data, and other resources used in the preparation of the PRS;

(3) A discussion of the procedures used to collect, validate, process, and update the data used in the study;

(4) Documentation of the analysis and modeling of the borrower's electric system loads and other pertinent information used in the PRS. All relevant data, primary sensitivity analyses and other substantive procedures used to test significant assumptions and to generate the load estimates and related factors must be included in the PRS or otherwise made available to RUS, and clearly identified, sourced and dated;

(5) An analysis of the borrower's past, existing, and future electric system loads of RE Act beneficiaries and others, including explanation and documentation of all substantive assumptions, primary sensitivity analyses and other substantive considerations used to prepare the estimates. Areas of analysis shall normally include, but are not limited to: developing land use patterns; potential losses of load due to annexation or other causes; prospective residential and commercial development; probable rate levels; the effects

of rates and competition from neighboring utilities on loads; existing and anticipated patterns of energy usage and appliance saturation; and availability of alternative energy sources. Load management, conservation, and power marketing considerations must also be included;

(6) A discussion and analysis of alternative scenarios, which shall be required for all PRSs submitted to RUS for approval after January 1, 1993. Normally, unless waived by RUS under § 1710.206, the borrower shall provide a discussion and analysis of the following five scenarios:

- (i) Most-probable economic assumptions, with normal weather;
- (ii) Most-probable economic assumptions, with severe weather causing higher loads;
- (iii) Most-probable economic assumptions, with mild weather causing lower loads;
- (iv) Normal weather with more pessimistic macroeconomic assumptions causing lower loads; and
- (v) Normal weather with more optimistic macroeconomic assumptions causing higher loads;

(7) Completed RUS Forms 341 and 345 and 10 years data from RUS Form 7 part R. Computer-generated facsimiles may be used if acceptable in form to RUS. Graphs, tables, spreadsheets or other exhibits shall be included as appropriate;

(8) A discussion and documentation of the coordination activities between a power supply borrower and its RUS-borrower members, as applicable, and between the borrower and RUS. If a power supply borrower and any member disagree on an issue or estimate, RUS will provide assistance, if requested, in attempting to resolve the disagreement;

(9) The borrower's general manager's recommendation to the board of directors on adoption of the PRS; and

(10) Approval of the PRS by the borrower's board of directors.

(g) A PRS and its essential supporting data and analysis shall be retained in the borrower's records until the next new PRS is approved by RUS.

(h) Completed PRSs submitted to RUS for approval prior to the effective date of this part, as well as PRSs pre-

pared under work plans approved by RUS prior to the effective date of this part, may meet the requirements of paragraph (f) of this section or corresponding requirements of RUS Bulletin 120-1, at the option of the borrower. All other PRSs must meet the requirements of paragraph (f) of this section.

§ 1710.204 PRS work plan requirements.

(a) All borrowers required to prepare and maintain a PRS on an ongoing basis are required to prepare and obtain RUS approval of a PRS work plan, except for those borrowers that are members of a power supply borrower that is required to prepare a PRS work plan. The PRS work plan shall establish the resources, methods, schedules, and milestones to be used in the preparation and maintenance of the PRS.

(b) A power supply borrower's work plan shall include the member inputs and coordination mechanisms required for the preparation of its PRS as well as the PRSs of the system's members. Member concurrences in the work plan are required before the plan is submitted to RUS for approval. The member systems, as well as the power supply borrower, are required to follow the work plan in preparing their respective PRS.

(c) A PRS work plan must be approved by the borrower's board of directors.

(d) A borrower may amend its work plan subject to RUS approval. A new or revised work plan may be required by RUS if RUS concludes the existing plan will not result in a satisfactory PRS on a timely basis.

(e) In addition, a PRS work plan shall:

- (1) Identify the borrower and, as applicable, member personnel that will serve as project leaders or liaisons with the authority to make decisions and commit resources within the scope of the work plan;

(2) Provide for residential consumer surveys at least every 3 years to obtain data on appliance and equipment saturation and electricity demand, when residential demand is 50 percent or more of total kWh sales. In the case of a power supply borrower, such surveys

§ 1710.205

shall be coordinated with the borrower's members. They may be based on the aggregation of member-based samples or on a system-wide sample, provided that the latter provides for relevant regional breakdowns as appropriate;

(3) Provide for all other data collection and verification, analyses, modeling, and documentation required in § 1710.203; and

(4) Provide for an ongoing RUS review of the PRS.

(f) Generally, a work plan shall cover a period of 1 to 3 years.

[57 FR 1053, Jan. 9, 1992; 57 FR 4513, Feb. 5, 1992]

§ 1710.205 Basic criteria for RUS approval of a PRS.

RUS will use the following basic criteria in deciding whether to approve a PRS:

(a) The borrower objectively analyzed all relevant factors that influence the consumption of electricity and the requirements for generation and transmission capacity;

(b) The borrower accurately analyzed power requirements stemming from RE Act beneficiaries and non-RE Act beneficiaries;

(c) The borrower developed adequate supporting data, used valid assumptions, analyzed a reasonable range of relevant alternative assumptions and scenarios, and used valid and verifiable analytical techniques and models;

(d) The borrower provided RUS with adequate documentation and assistance to allow for a thorough and independent review;

(e) In the case of a power supply borrower, the preparation of the work plan and PRS was adequately coordinated with its members; and

(f) The PRS was recommended for approval by the borrower's general manager and has been approved by the borrower's board of directors.

§ 1710.206 Waiver of borrower requirements.

For good cause shown by the borrower, the Administrator may waive any of the requirements applicable to borrowers in this subpart if the Administrator determines that waiving the requirement will not significantly af-

7 CFR Ch. XVII (1–1–97 Edition)

fect accomplishment of the objectives of this subpart and if the requirement imposes a substantial burden on the borrower. The waiver must be requested in writing by the borrower's general manager.

(Approved by the Office of Management and Budget under control number 0572–0032)

§§ 1710.207—1710.249 [Reserved]

Subpart F—Construction Work Plans and Related Studies

§ 1710.250 General.

(a) An ongoing, integrated planning system is needed by borrowers to determine their short-term and long-term needs for plant additions, improvements, replacements, and retirements. The primary components of the system consist of long-range engineering plans, construction work plans (CWPs), CWP amendments, and special engineering and cost studies. Long range engineering plans identify plant investments required over a period of 10 years or more. CWPs specify and document plant requirements for the short-term, usually 2 to 3 years, and special engineering and cost studies are used to support CWPs and to identify and document requirements for specific items or purposes, such as load management equipment, System Control and Data Acquisition equipment, sectionalizing investments, and additions of generation capacity and associated transmission plant.

(b) Generally, all borrowers are required to maintain up-to-date long range engineering plans approved by their boards of directors. Current CWPs approved by the borrower's board must also be developed and maintained for distribution and transmission facilities and for improvements and replacements of generation facilities. All such distribution, transmission or generation facilities must be included in the respective CWPs regardless of the source of financing.

(c) A long range engineering plan specifies and supports the major system additions, improvements, replacements, and retirements needed for an orderly transition from the existing system to the system required 10 or more years in the future. The planned

future system should be based on the most technically and economically sound means of serving the borrower's long-range loads in a reliable and environmentally acceptable manner, and it should ensure that planned facilities will not become obsolete prematurely.

(d) A CWP shall include investment cost estimates and supporting engineering and cost studies to demonstrate the need for each proposed facility or activity and the reasonableness of the investment projections and the engineering assumptions used in sizing the facilities. The CWP must be consistent with the borrower's long range engineering plan and both documents must be consistent with the borrower's RUS-approved power requirements study.

(e) Applications for a loan or loan guarantee from RUS (new loans or budget reclassifications) must be supported by a current CWP approved by both the borrower's board of directors and RUS. RUS approval of these plans relates only to the facilities, equipment, and other purposes to be financed by RUS, and means that the plans provide an adequate basis from a planning and engineering standpoint to support RUS financing. RUS approval of the plans does not mean that RUS approves of the facilities, equipment, or other purposes for which the borrower is not seeking RUS financing. If RUS disagrees with a borrower's estimate of the cost of one or more facilities for which RUS financing is sought, RUS may adjust the estimate after consulting with the borrower and explaining the reasons for the adjustment.

(f) Except as provided in paragraph (g) of this section, to be eligible for RUS financing, the facilities, including equipment and other items, included in a CWP must be approved by RUS before the start of construction. This requirement also applies to any amendments to a CWP required to add facilities to a CWP or to make significant physical changes in the facilities already included in a CWP.

(g) In the case of damage caused by storms and other natural catastrophes, a borrower may proceed with emergency repair work before a CWP or CWP amendment is prepared by the

borrower and approved by RUS, without losing eligibility for RUS financing of the repairs. The borrower must notify the RUS regional office in writing, not later than 45 days after the natural catastrophe, of its preliminary estimates of damages and repair costs. Not later than 120 days after the natural catastrophe, the borrower must submit to RUS for approval, a CWP or CWP amendment detailing the repairs.

(h) A CWP may be amended or augmented when the borrower can demonstrate the need for the changes.

(i) A borrower's CWP or special engineering studies must be supported by a Borrower's Environmental Report, and when necessary by an Environmental Analysis or Environmental Impact Statement, as set forth in 7 CFR 1794 or required by other Federal or state regulations or laws.

(j) All engineering activities required by this subpart must be performed by qualified engineers, who may be staff employees of the borrower or outside consultants.

(k) Upon written request from a borrower, RUS may waive in writing certain requirements with respect to long-range engineering plans and CWPs if RUS determines that such requirements impose a substantial burden on the borrower and that waiving the requirements will not significantly affect the accomplishment of the objectives of this subpart. For example, if a borrower's load is forecast to remain constant or decline during the planning period, RUS may waive those portions of the plans that relate to load growth.

[57 FR 1053, Jan. 9, 1992; 57 FR 4513, Feb. 5, 1992, as amended at 60 FR 67405, Dec. 29, 1995]

§ 1710.251 Construction work plans—distribution borrowers.

(a) All distribution borrowers must maintain a current CWP approved by their board of directors covering all new construction, improvements, replacements, and retirements of distribution and transmission plant, and improvements replacements, and retirements of any generation plant. Construction of new generation capacity need not be included in a CWP but must be specified and supported by specific engineering and cost studies. (See § 1710.253.)

§ 1710.252

7 CFR Ch. XVII (1–1–97 Edition)

(b) A distribution borrower's CWP shall cover a construction period of between 2 and 4 years, and include all facilities to be constructed which are eligible for RUS financing, whether or not RUS financial assistance will be sought or be available for certain facilities. Any RUS financing provided for the facilities will be limited to a 4 year loan period. The construction period covered by a CWP in support of a loan application shall not be shorter than the loan period requested for financing of the facilities.

(c) The facilities, equipment and other items included in a distribution borrower's CWP may include:

(1) Line extensions required to connect consumers, improve service reliability or improve voltage conditions;

(2) Distribution tie lines to improve reliability of service and voltage regulation;

(3) Line conversions and changes required to improve existing services or provide additional capacity for new consumers;

(4) New substation facilities or additions to existing substations;

(5) Transmission and substation facilities required to support the distribution system;

(6) Distribution equipment required to serve new consumers or to provide adequate and dependable service to existing consumers, including replacement of existing plant facilities;

(7) Residential security lights;

(8) Communications equipment and meters;

(9) Headquarters facilities;

(10) Improvements, replacements, and retirements of generation facilities;

(11) Load management equipment, automatic sectionalizing facilities, and centralized System Control and Data Acquisition equipment. Load management equipment eligible for financing, including the related costs of installation, is limited to capital equipment designed to influence the time and manner of consumer use of electricity, which includes peak clipping and load shifting. To be eligible for financing, such equipment must be owned by the borrower, although it may be located inside or outside a consumer's premises; and

(12) The cost of engineering, architectural, environmental and other studies and plans needed to support the construction of facilities, when such cost is capitalized as part of the cost of the facilities.

[57 FR 1053, Jan. 9, 1992; 57 FR 4513, Feb. 5, 1992, as amended at 60 FR 3731, Jan. 19, 1995; 60 FR 67405, Dec. 29, 1995]

**§ 1710.252 Construction work plans—
power supply borrowers.**

(a) All power supply borrowers must maintain a current CWP approved by the borrower's board of directors covering all new construction, improvements, replacements, and retirements of distribution and transmission plant, and improvements, replacements, and retirements of generation plant. Applications for RUS financial assistance for such facilities must be supported by a current, RUS-approved CWP. Construction of new generation capacity need not be included in a CWP but must be specified and supported by specific engineering and cost studies.

(b) Normally a power supply borrower's CWP shall cover a period of 3 to 4 years. While comprehensive CWP's are desired, if there are extenuating circumstances RUS may accept a single-purpose transmission or generation CWP in support of a loan application or budget reclassification. The construction period covered by a CWP in support of a loan application shall not be shorter than the loan period requested for financing of the facilities.

(c) Facilities, equipment, and other items included in a power supply borrower's CWP may include:

(1) Distribution and related facilities as set forth in § 1710.251(c);

(2) Transmission facilities required to deliver the power needed to serve the existing and planned new loads of the borrower and its members, and to improve service reliability, including tie lines for improved reliability of service, line conversions, improvements and replacements, new substations and substation improvements and replacements, and Systems Control and Data Acquisition equipment, including communications, dispatching and sectionalizing equipment, and load management equipment;

(3) The borrower's proportionate share of transmission facilities required to tie together the operating systems of supporting power pools and to connect with adjacent power suppliers;

(4) Improvements and replacements of generation facilities; and

(5) The cost of engineering, architectural, environmental and other studies and plans needed to support the construction of facilities, when such cost is capitalized as part of the cost of the facilities.

(d) A CWP for transmission facilities shall normally include studies of load flows, voltage regulation, and stability characteristics to demonstrate system performance and needs.

[57 FR 1053, Jan. 9, 1992, as amended at 60 FR 3731, Jan. 19, 1995; 60 FR 67405, Dec. 29, 1995]

§ 1710.253 Engineering and cost studies—addition of generation capacity.

(a) The construction or purchase of additional generation capacity and associated transmission facilities by a power supply or distribution borrower, including the replacement of existing capacity, shall be supported by comprehensive project-specific engineering and cost studies as specified by RUS. The studies shall cover a period from the beginning of the project to at least 10 years after the start of commercial operation of the facilities.

(b) The studies must include comprehensive economic present-value analyses of the costs and revenues of the available self-generation, load management, energy conservation, and purchased-power options, including assessments of service reliability and financing requirements and risks. Requirements for analyzing purchased-power options are set forth in § 1710.254.

(c) Generally, studies of self-generation, load management, and energy conservation options shall include, as appropriate, analyses of:

- (1) Capital and operating costs;
- (2) Financing requirements and risks;
- (3) System reliability;
- (4) Alternative unit sizes;
- (5) Alternative types of generation;
- (6) Fuel alternatives;
- (7) System stability;
- (8) Load flows; and

(9) System dispatching.

(d) At the request of a borrower, RUS, in its sole discretion, may waive specific requirements of this section if such requirements imposed a substantial burden on the borrower and if such waiver will not significantly affect the accomplishment of the objectives of this subpart.

§ 1710.254 Alternative sources of power.

(a) General. (1) RUS will make loans to finance the construction of generation facilities by distribution or power supply borrowers and transmission facilities by power supply borrowers only under the following conditions if said borrowers do not already own and operate such types of facilities:

(i) Where no adequate and dependable source of power is available to meet the consumers' needs; or

(ii) Where the rates offered by other power sources would result in a higher cost of power to the consumers than the cost from facilities financed by RUS, and the amount of the power cost savings that would result from the RUS-financed facilities bears a significant relationship to the amount of the proposed loan.

(2) If a borrower already owns and operates the types of facilities included in a loan request, then a loan for the purposes set forth in paragraph (a)(1) of this section, as well as for the construction of transmission facilities by a distribution borrower, will be considered and evaluated by RUS in terms of whether the proposed facilities constitute the most effective and economical means of meeting the power requirements of the consumers.

(b) Loan requests for addition of generation capacity, including replacement of existing capacity, will be accepted by RUS only when the applicant has satisfactorily completed the investigations of possible alternative sources of power as set forth in this section. The investigations must be coordinated in advance with RUS. The capacity in question may be owned solely by the borrower or owned on an undivided ownership basis with other utilities.

§ 1710.300

7 CFR Ch. XVII (1–1–97 Edition)

(c) The applicant is required to search out and attempt to utilize capacity available from RUS borrowers and other organizations before developing plans for additional generation capacity. The applicant shall:

(1) Solicit power and energy purchase proposals from all reasonable potential sources of power, such as other electric cooperatives, investor-owned utilities, municipal utility organizations, and Federal and state power authorities.

(2) Except as herein exempted, solicit proposals from independent power producers, including co-generators, to determine the terms and conditions under which these producers can supply the additional power and energy needs of the applicant, without RUS financial assistance. Such solicitations shall be placed in at least three national newspapers or trade publications, and they shall meet all planning, coordination or other requirements imposed by state authorities, as well as RUS's environmental requirements. The following projects are exempted from this requirement to solicit proposals:

(i) Additions to or replacements of generation capacity of less than 10 megawatts.

(ii) Modifications of existing generation units if any resulting increase in generation capacity does not exceed 10 percent of the capacity of the existing unit.

(d) The applicant will evaluate all alternative proposals on an economic, present-value basis, giving consideration to cost-effectiveness, reliability of service, the short- and long-term financial viability of the supplier, and the financial risk to the borrower and its creditors. The applicant will keep RUS fully informed on these evaluations and provide supporting information and analysis as requested by RUS.

(e) After evaluation of all proposals and having informed RUS of the results, the applicant will be expected to negotiate final proposals with the entities submitting the best acceptable offers, if any, keeping RUS fully informed. All contracts entered into shall either be approved in advance by the Administrator or contain language to the effect that the contract is not valid until approved in writing by the

Administrator. The Administrator will approve such contracts in a timely manner provided that the borrower has met all applicable requirements, including RUS's environmental requirements, and provided adequate evidence that the alternative selected is the most economical and effective alternative.

(f) RUS may make independent inquiries with potential power suppliers as to the availability of power to meet borrowers' needs. Information developed by RUS will be shared with borrowers at their request.

(g) Further details of RUS requirements for financing of generation and bulk transmission facilities are set forth in 7 CFR part 1712.

(h) At the request of a borrower, RUS, in its sole discretion, may waive specific requirements of paragraphs (b) through (e) of this section if such waiver is required to prevent unreasonable delays in obtaining generation capacity that could result in system reliability problems.

(Approved by the Office of Management and Budget under control number 0572–0032)

§§ 1710.255—1710.299 [Reserved]

Subpart G—Long-Range Financial Forecasts

§ 1710.300 General.

(a) RUS encourages borrowers to maintain a current long-range financial forecast. The forecast should be used by the board of directors and the manager to guide the system towards its financial goals.

(b) A borrower must prepare, for RUS review and approval, a long-range financial forecast, approved by its board of directors, in support of its loan application. The forecast must demonstrate that the borrower's system is economically viable and that the proposed loan is financially feasible. Loan feasibility will be assessed based on the criteria set forth in § 1710.112.

(c) The financial forecast and related projections submitted in support of a loan application shall include:

(1) The projected results of future actions planned by the borrower's board of directors;

Rural Utilities Service, USDA

§1710.301

(2) The financial goals established for margins, TIER, DSC, equity, and levels of general funds to be invested in plant;

(3) A pro forma balance sheet, statement of operations, and general funds summary projected for each year during the forecast period;

(4) A full explanation of the assumptions, supporting data, and analysis used in the forecast, including the methodology used to project loads, rates, revenue, power costs, operating expenses, plant additions, and other factors having a material effect on the balance sheet and on financial ratios such as equity, TIER, and DSC;

(5) Current and projected cash flows;

(6) Projections of future borrowings and the associated interest and principal expenses required to meet the projected investment requirements of the system;

(7) Current and projected kW and kWh energy sales;

(8) Current and projected unit prices of significant variables such as retail and wholesale power prices, average labor costs, and interest;

(9) Current and projected system operating costs, including, but not limited to, wholesale power costs, depreciation expenses, labor costs, and debt service costs;

(10) Current and projected revenues from sales of electric power and energy;

(11) Current and projected non-operating income and expense;

(12) A discussion of the historical experience of the borrower, and in the case of a power supply borrower its member systems as appropriate, with respect to the borrower's market competitiveness as it relates to the rates charged for electricity, competition from other fuels, and other factors. Additional data and analysis may be required by RUS on a case by case basis to assess the probable future competitiveness of those borrowers that have a history of serious competitive problems; and

(13) An analysis of the effects of major factors, such as projected increases in rates charged for electricity, on the ability of the borrower, and in the case of a power supply borrower its member systems, to compete with

neighboring utilities and other energy sources.

(d) The following plans, studies and assumptions shall be used in developing the financial forecast:

(1) The RUS-approved CWP;

(2) RUS-approved power requirements data;

(3) The current rate schedules or new rates already approved by the board of directors;

(4) Future plant additions and operating expenses projected at anticipated future cost levels rather than in constant dollars, with the annual rate of inflation for major items specified; and

(5) A reasonable range of assumptions for each of the major variables to test the sensitivity of the results to changes in assumptions, if the financial forecast is used in support of a loan or loan guarantee that exceeds the smaller of 10 percent of the borrower's total utility plant or the following dollar amount: \$25 million for power supply borrowers, or \$3 million for distribution borrowers.

(e) The financial forecast shall use the accrual method, as approved by RUS, for analyzing costs and revenues, and, as applicable, compare the economic results of the various alternatives on a present value basis.

(f) RUS will obtain and review commercially available credit reports on applicants for a loan or loan guarantee to verify income, assets, and credit history, and to determine whether there are any outstanding delinquent Federal or other debts. Such reports will also be reviewed for parties that are or propose to be joint owners of a project with a borrower.

§1710.301 Financial forecasts—distribution borrowers.

(a) Financial forecasts prepared by distribution borrowers shall cover at least a ten-year period, unless a shorter period is authorized by other RUS regulations.

(b) In addition to the requirements set forth in §1710.300 of this part, financial forecasts prepared by distribution borrowers in support of a loan application shall:

(1) Include expenditures for any maintenance determined to be needed in the current system's operation and

§ 1710.302

7 CFR Ch. XVII (1–1–97 Edition)

maintenance review and evaluation in order to comply with mortgage covenants and prudent utility practice;

(2) Fully explain the basis for the power cost projections used. Generally, the power supplier's most recent forecasted rates shall be used; and

(3) Use RUS Form 325 or computer-generated equivalent reports.

§ 1710.302 Financial forecasts—power supply borrowers.

(a) The requirements of this section apply only to financial forecasts submitted by power supply borrowers in support of a loan from RUS. The financial forecast prepared by power supply borrowers shall demonstrate the effects that the addition of generation, transmission and any distribution facilities will have on the power supply borrower's sales, costs, and revenues, and on the cost of power to the member distribution systems.

(b) The financial forecast shall cover a period beginning with the present and extending at least 10 years beyond the projected in-service date of proposed generation and transmission facilities.

(c) Financial forecasts prepared in support of loan applications to finance additional generation capacity shall include a power cost study as set forth in § 1710.303.

(d) In addition to the requirements set forth in § 1710.300, financial forecasts prepared by power supply borrowers shall:

(1) Identify all plans for generation and transmission capital additions and system operating expenses on a year-by-year basis, beginning with the present and running for a minimum of 10 years after initial commercial operation of the facilities. RUS may request projections for a longer period of time if deemed necessary;

(2) Integrate projections of operation and maintenance expenses associated with existing plant with those of new proposed facilities to determine total costs of system operation as well as the costs of new generation and generation-related facilities;

(3) Provide an in-depth analysis of the regional markets for power if loan feasibility depends to any degree on a borrower's ability to sell surplus power

while its system loads grow to meet the planned capacity of a proposed plant;

(4) If not previously submitted, furnish RUS with all material information on operating agreements, ownership agreements, fuel contracts and any other special agreements that affect annual cost projections, as may be required by RUS on a case by case basis; and

(5) Include sensitivity analysis as required by § 1710.300(d)(5). Examples of sensitivity analysis that might be used are:

(i) Effects of a 100 to 200 basis point increase in the financing interest rate;

(ii) Effects of a 50 percent reduction in the rate of projected RE Act beneficiary load growth;

(iii) Effects of a 10 to 20 percent increase in the projections for fuel costs;

(iv) Effects of a 20 percent or more increase in construction costs; and

(v) Effects of a 20 percent or more increase in maintenance, retrofit and decommissioning costs of nuclear power plants.

(e) The projections shall be coordinated in advance with RUS so that agreement can be reached on major aspects of the economic studies. These include, but are not limited to, projections of future kW and kWh requirements, RE Act beneficiary loads, electricity prices, revenues from system and off-system power sales, the cost of prospective plant additions, interest and depreciation rates, fuel costs, cost escalation factors, the discount rate, and other factors.

(f) The projections, analysis, and supporting information must be included in a report that will provide RUS with the information needed to:

(1) Understand and compare various power supply plans;

(2) Determine that the facilities to be financed will perform satisfactorily; and

(3) Determine that the overall system is economically viable and the loan is financially feasible and secure.

§ 1710.303 Power cost studies—power supply borrowers.

(a) All applications for financing of additional generation capacity and the associated bulk transmission facilities

Rural Utilities Service, USDA

§ 1710.353

shall be supported by a power cost study to demonstrate that the proposed generation and associated transmission facilities are the most economical and effective means of meeting the borrower's power requirements. This study usually is a separate study but it may be integrated with the financial forecast required by § 1710.302.

(b) A power cost study shall include the following basic elements:

(1) A study of all reasonably available self-generation, purchased-power, load management, and energy conservation alternatives as set forth in §§ 1710.253 and 1710.254;

(2) A present-value analysis of the costs of the alternatives and their effects on total power costs, covering a period of at least 10 years beyond the projected in-service date of the facilities;

(3) A description of proposed new power-purchase contracts or revisions to existing contracts, and an analysis of the effects on power costs;

(4) Use of sensitivity analyses to determine the vulnerability of the alternatives to a reasonable range of assumptions about fuel costs, failure to achieve projected load growth, changes in operating and financing costs, and other major factors, if the financial forecast is used in support of a loan or loan guarantee that exceeds the smaller of \$25 million or 10 percent of the borrower's total utility plant. Individual sensitivity analyses need not be duplicated if they have been included in other materials submitted to RUS; and

(5) Assessment of the financial risks of the various alternatives, especially as between capital-intensive and non-capital-intensive alternatives, under the range of assumptions set forth in paragraph (b)(4) of this section.

(c) Power cost studies must use current, RUS-approved power requirements data, and all major assumptions are subject to RUS approval. Alternative assumptions about projected power requirements may be used, however, in conjunction with the sensitivity analyses required by paragraph (b)(4) of this section.

(Approved by the Office of Management and Budget under control number 0572-0032)

§§ 1710.304—1710.349 [Reserved]

Subpart H—Demand Side Management and Renewable Energy Systems

SOURCE: 59 FR 496, Jan. 4, 1994, unless otherwise noted.

§ 1710.350 Purpose.

This subpart sets forth RUS policies and procedures with regard to loans and loan guarantees to RUS borrowers for the purpose of implementing their demand side management (DSM) plans, energy conservation programs, and on-grid and off-grid renewable energy systems. The Administrator reserves the right to determine if loans for purposes under this subpart will be made to a borrower in default under its mortgage and loan contract. As is the case with all other RUS loans, loans for purposes under this subpart will not be made to individuals.

§ 1710.351 General policy; renewable energy systems.

(a) Off-grid renewable energy systems will be considered the same as DSM activities and will qualify for either insured loans or loan guarantees pursuant to § 1710.102.

(b) On-grid renewable energy systems will be treated as a generation resource and will be eligible only for loan guarantees pursuant to § 1710.102. Existing RUS policy with respect to generation resources shall generally apply.

(c) RUS loans for renewable energy systems will be made only for systems utilizing technologies that are proven and commercially available.

§ 1710.352 General policy; energy resource conservation programs.

This subpart does not replace the energy resource conservation program financed by deferments of loan principal.

§ 1710.353 General policy; demand side management.

(a) RUS will make loans for the purpose of assisting electric borrowers to implement RUS approved demand side management plans. For the purposes of this regulation energy conservation

§ 1710.354

programs are included as a DSM activity.

(b) RUS will treat demand-side and supply-side resources on an equal basis. All requirements applicable to loans for traditional electric facilities will apply to loans for DSM. In addition the requirements set forth in this subpart will apply.

(c) DSM will be considered a distribution loan purpose, eligible for either insured loans or loan guarantees pursuant to § 1710.102.

(d) RUS will conduct its own evaluation, as specified in this subpart, of a borrower's DSM activities before making a determination on the disposition of a borrower's loan application.

(e) RUS loans for DSM activities will be made only for systems utilizing technologies that are proven and commercially available.

(f) In general, RUS will require pilot project testing of DSM activities new to the borrower.

(g) If the borrower's IRP, DSM plan, project construction and/or financing, and/or rate recovery is subject to the approval of state authorities, the borrower must obtain such approvals before RUS will approve a loan for any purpose for which an RUS approved DSM plan or IRP is required under this subpart.

§ 1710.354 Eligible DSM activities.

DSM activities that are projected to result in more efficient use of electric system resources and which are consistent with an RUS approved Integrated Resource Plan (IRP) and DSM plan may be eligible for financing. Examples of such DSM activities, which are not mutually exclusive, are as follows:

(a) General information and education;

(b) Purchase and installation of borrower owned or consumer owned equipment or materials, including:

(1) Heating, ventilation, air conditioning;

(2) Building envelope;

(3) Appliances;

(4) Load control;

(5) Lighting and lighting control;

(6) Thermal storage; and

(7) Efficient motors and drives;

(c) Rebates for DSM equipment and facilities;

(d) Fuel switching for dual fuel applications where one of the energy sources is electricity; and

(e) Pilot DSM projects.

§ 1710.355 DSM loan applications.

(a) Any loan application which includes funds for DSM must include all loan support documents required for a loan for electric facilities, and must demonstrate that requirements for need, loan feasibility and loan security are satisfied. In addition, the application must be supported by an RUS approved IRP, except as provided in § 1710.356(a)(1), and an RUS approved DSM plan.

(b) DSM loans will be made to provide financing for DSM activities planned to be implemented within a two year period.

§ 1710.356 Integrated resource plans.

(a)(1) An RUS approved IRP is required for all loans that include funds for DSM activities, unless the cumulative total of all previous DSM loans and the loan under consideration for that applicant is less than 1 percent of the applicant's total utility plant.

(2) An RUS approved IRP is required for all loans that include funds for on-grid renewable energy systems.

(3) An RUS approved IRP is required for all loans that include funds for off-grid renewable energy systems unless the Administrator determines that an IRP is not needed to determine that the loan is both feasible and secure pursuant to §§ 1710.112 and 1710.113, respectively.

(b)(1) When an IRP is required, a distribution borrower that is a member of a power supply borrower must use the IRP prepared by the power supply borrower for its overall system. This IRP must have been coordinated with all of the member systems and it must have been approved by the board of directors of the power supply borrower. Because of the relationship between the power supply borrower and its members under which the loans incurred by the power supply borrower are primarily to construct, improve or acquire facilities that benefit all members directly or indirectly, the security of loans to all

7 CFR Ch. XVII (1-1-97 Edition)

parties is interlinked. Consequently, DSM activities and renewable energy activities must be coordinated among all parties to insure that the activities of one member do not jeopardize the financial integrity or loan security of any other member or that of the power supply borrower.

(2) A distribution system that is not a member of an RUS financed power supply borrower shall prepare its own IRP. An IRP developed by a distribution borrower that is not a member of a power supply borrower need only address its own system, but shall include an analysis of the effects of its DSM activities on its wholesale power costs.

(c) The IRP shall identify supply side and demand side options and analyze their benefits and costs in order to provide adequate and reliable electric service to consumers at the lowest cost for the system as a whole.

(d) The IRP shall include necessary features for system operation, such as diversity, reliability, dispatchability, and other factors of risk; and it shall take into account the ability to verify energy and cost savings achieved through DSM, energy conservation, and renewable energy systems, and the projected durability of such savings measured over time.

(e) The following elements also included in a DSM plan, pursuant to §§ 1710.357 and 1710.358, shall be included except where RUS determines that they are not necessary:

- (1) Load shape objectives;
- (2) Wholesale power pricing policy and costs, and their relationship to the proposed DSM activities;
- (3) Ownership and costs of DSM related hardware;
- (4) Incentive and marketing costs;
- (5) Communication and control costs; and
- (6) Monitoring methods and costs.

(f) The IRP shall analyze the DSM effects set forth in § 1710.359.

§ 1710.357 DSM plans.

(a) A DSM plan approved by the borrower's board of directors is required in support of a loan that includes funds for DSM activities or for off-grid renewable energy systems. The DSM plan shall address the borrower's existing and proposed activities for the same

period covered by the Long-Range Financial Forecast submitted in support of the loan application.

(b)(1) A DSM plan prepared by a member of a power supply borrower must be consistent with the IRP prepared by the power supply borrower.

(2) A DSM plan prepared by a distribution borrower that is not a member of an RUS financed power supply borrower must be consistent with the borrower's own IRP.

(c) The level of detail required in the DSM plan is dependent on several factors, for example:

- (1) Size and term of loan;
- (2) Financial impact of loan on the borrower;
- (3) Probability of realization of the estimated impacts;
- (4) Magnitude of the estimated effects; and
- (5) Potential effects, if any, on other distribution members of a power supply borrower.

(d) RUS will consider effects of proposed and existing DSM plans on government loan security, rates, revenue requirements, competitiveness, other distribution borrowers, power supply borrowers or other industry recognized tests as applicable.

§ 1710.358 Requirements for a DSM plan.

A DSM plan shall include:

(a) A list of the DSM activities to be financed by the loan including details on implementation such as beginning and completion dates and estimated draw downs of loan funds;

(b) An analysis of the borrower's existing and proposed DSM activities, including sources of financing and projections of the effects of those activities as set forth in § 1710.359;

(c) System specific load research and DSM pilot projects as required by § 1710.353(f);

(d) A benefit/cost and net present value cash flow analysis of each DSM activity included in the plan. Benefits and costs must be expressed in the same units where possible. Short term and long term impacts must be addressed. Who benefits and who pays must be clearly identified. Objectives of a DSM plan shall be stated in terms

§ 1710.359

of load profile adjustments by customer rate class and/or market segment. The benefit/cost analysis shall include the following steps:

(1) Identification of objectives, alternatives, and effects;

(2) Simulation of impacts on the system and its consumers, and the probable costs and benefits, including sensitivity/probability and scenario analysis; and

(3) Selection of DSM activities;

(e) An outline of monitoring and reporting procedures to evaluate the performance of the implemented DSM plan;

(f) A narrative discussing the following:

(1) Scope of the DSM plan;

(2) Resources used to develop the DSM plan;

(3) Internal and external data collection and analysis;

(4) Analysis method used to screen and evaluate the projected programs;

(5) Analysis of existing and projected plans; and

(6) Coordination activities with power supplier.

§ 1710.359 DSM effects.

The IRP and the DSM plan shall consider and discuss the expected effects of the borrower's DSM activities. The expected effects to be considered and discussed includes, but are not limited to, the following:

(a) Effects on the utility (supply side effects):

(1) Operations;

(2) Maintenance;

(3) Environmental compliance;

(4) Capacity planning, including deferment of capacity and reliability of capacity;

(5) DSM equipment including purchase, operation and maintenance considerations;

(6) Transmission and distribution effects;

(7) Administrative costs, including administrative and general costs, program costs, DSM planning costs, integration of supply and DSM planning, marketing costs, incentive costs, infrastructure support, monitoring and evaluation costs, bidding costs; and

(8) Revenues and rates;

7 CFR Ch. XVII (1–1–97 Edition)

(b) Effects on consumers (demand side effects):

(1) Equipment purchases;

(2) Operation costs;

(3) Maintenance costs;

(4) Supply voltage quality;

(5) Availability of service and reliability (outages);

(6) Change in benefits received from appliances and housing;

(7) Convenience (availability of equipment, appliances and services);

(8) Change in comfort and air quality levels of buildings; and

(9) Rates, billing level and elasticity;

(c) Effects on competitiveness;

(d) Effects on other member distribution systems of the power supply borrower; and

(e) Effects on power supply borrower.

§ 1710.360 Submittal of alternate documentation.

(a) The borrower may have performed analysis and prepared comparable documentation for other purposes, such as for a state regulatory commission. This information may be acceptable to RUS as an IRP or a DSM plan if the borrower demonstrates that the alternative information meets the goals and objectives of this subpart.

(b) The borrower shall advise RUS of all material information provided to other lenders or other governmental authorities relating to their DSM plans. This information shall be provided to RUS as requested.

§ 1710.361 Type and term of loans.

(a) The final maturity of loans for purposes under this subpart shall be determined by RUS based on the expected life of needed capital improvements, expected cost recovery periods, the expected life of program benefits, the certainty of these benefits, and matching costs and benefits.

(b) RUS will normally consider final maturities for DSM loans of up to 5 years. Longer loan terms, not to exceed 10 years, for loans for these purposes will be considered if the borrower can satisfactorily demonstrate to the Administrator an acceptable basis for doing so and can demonstrate that the loan will be feasible and secure pursuant to §§1710.112 and 1710.113, respectively, for the longer period. As used in

Rural Utilities Service, USDA

§ 1710.400

this paragraph, renewable energy resource equipment and facilities are not considered a DSM purpose. Maturities for such loans will be limited to the expected useful life of the equipment and facilities.

§ 1710.362 Loan approval.

The amount and scope of loans approved by RUS under this subpart are subject to the discretion of RUS. Applications will be evaluated on the merits of the proposals as outlined in the plans specified in this subpart. RUS approval of a loan for purposes under this subpart and/or RUS approval of IRPs and DSM plans does not relieve a borrower of its responsibilities under this subpart or constitute a representation or warranty by RUS to the borrower or any person that its IRP or DSM plan will work as described therein.

§ 1710.363 Advance and documentation of use of loan funds.

(a) Loan funds for on-grid renewable energy systems will be advanced using the same procedure as loans for other electric system facilities.

(b) Loan funds for DSM activities.

(1) Funds for these purposes shall be advanced and used only for the specific projects and purposes detailed in the loan application and supporting documents. Generally funds shall be drawn down on a reimbursement basis. The borrower shall certify completion of work according to the DSM plan.

(2) The borrower shall maintain accounting and plant records sufficient to document the cost and location of DSM activities and to support loan fund advances and disbursements.

(3) All cost associated with DSM projects related to construction, operations or maintenance, shall be accumulated using the borrower's work order procedure. An individual work order or work orders shall be used to record and control the costs of each DSM project. Daily time and material reports referenced to the DSM activity shall be kept to record labor and materials used as the activity(ies) is completed.

(4) All other disbursements for DSM activities must be properly supported by invoices, contracts, or other forms of evidence required by RUS regula-

tions. All such supporting material shall be available at the borrower's premises for review by the RUS Field Accountant, borrower's certified public accountant and other authorized parties as applicable. Costs of DSM activities related to operations and maintenance should be charged to expense in the month incurred. Departures from this prescribed accounting must be approved by RUS subject to the provisions of 7 CFR 1767.13.

(c) Requirements on advance of funds for all insured electric loans are in 7 CFR part 1721, subpart B.

§ 1710.364 Loan limits.

Cumulative loans DSM activities at the time of loan approval for, including energy conservation programs and off-grid renewable energy systems, shall not exceed the lesser of:

(a) Twenty percent of the borrower's equity at the time of the loan or any time during amortization of the loan; or

(b) An amount approved for such purposes in a final non-appealable order by the applicable regulatory body for inclusion in the borrower's rate base.

Subpart I—Application Requirements and Procedures for Insured and Guaranteed Loans

SOURCE: 60 FR 3731, Jan. 19, 1995, unless otherwise noted.

§ 1710.400 Initial contact.

(a) Loan applicants that do not have outstanding loans from RUS should write to the Rural Utilities Service Administration, United States Department of Agriculture, Washington, DC 20250-1500. A field or headquarters staff representative may be assigned by RUS to visit the applicant and discuss its financial needs and eligibility. Borrowers that have outstanding loans should contact their assigned RUS general field representative (GFR) or, in the case of a power supply borrower, the Director, Power Supply Division. Borrowers may consult with RUS field representatives and headquarters staff, as necessary.

(b) Before submitting an application for an insured loan the borrower shall

§ 1710.401

7 CFR Ch. XVII (1–1–97 Edition)

ascertain from RUS the amount of supplemental financing required, as set forth in § 1710.110. If the borrower is applying for either a municipal rate loan subject to the interest rate cap or a hardship rate loan, the application must provide a preliminary breakdown of residential consumers either by county or by census tract. Final data must be included with the application. See § 1710.401(a)(8).

§ 1710.401 Loan application documents.

(a) *All borrowers.* All applications for electric loans shall include the documents listed in this paragraph. The first page of the application shall be a list of the documents included in the application. The borrower may use RUS Form 726, Checklist for Electric Loan Application, or a computer generated equivalent as this list.

(1) Transmittal letter. A letter signed by the borrower's manager indicating the actual corporate name and taxpayer identification number of the borrower and addressing the following items:

- (i) The need for flood hazard insurance;
- (ii) Breakdown of requested loan funds by state;
- (iii) A listing of the counties served by the borrower;
- (iv) A listing of threatened actions by third parties that could adversely affect the borrower's financial condition, including annexations or other actions affecting service territory, loads, or rates; and
- (v) A listing of pending regulatory proceedings pertaining to the borrower.

(2) Board resolution. This document is the formal request by the borrower's board of directors for a loan from RUS. The board resolution shall include:

- (i) The requested loan amount, loan term, final maturity, and method of amortization (§ 1710.110(b));
- (ii) The sources and amounts of any supplemental or other financing;
- (iii) Authorization for RUS to release appropriate information to supplemental or other lender(s), and authorization for these lenders to release appropriate information to RUS; and
- (iv) For an insured loan, a statement of whether the application is for a mu-

nicipal rate loan, with or without the interest rate cap, or a hardship loan. If the application is for a municipal rate loan, the board resolution must indicate whether the borrower intends to elect the prepayment option. See 7 CFR 1714.4(c).

(3) RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers. This form together with its attachments lists the construction, equipment, facilities and other cost estimates from the construction work plan or engineering and cost studies, and the sources of financing for each component. The date on page 1 of the form is the beginning date of the loan period and shall be the same as the date on the Financial and Statistical Report submitted with the application (paragraph (a)(5) of this section). Form 740c also includes the following information, exhibits, and attachments:

(i) *Description of funds and materials.* This description details the availability of materials and equipment, any unadvanced funds from prior loans, and any general funds the borrower designates, to determine the amount of such materials and funds to be applied against the capital requirements estimated for the loan period.

(ii) *Useful life of facilities financed by the loan.* Form 740c must include, as a note, either a statement certifying that at least 90 percent of the loan funds are for facilities that have a useful life of 33 years or longer, or a schedule showing the costs and useful life of those facilities with a useful life of less than 33 years. This statement or schedule will be used to determine the final maturity of the loan. See § 1710.115.

(iii) *Reimbursement schedule.* This schedule lists the date, amount, and identification number of each inventory of work orders and special equipment summary that form the basis for the borrower's request for reimbursement of general funds on the RUS Form 740c. See § 1710.109. If the borrower is not requesting reimbursement, this schedule need not be submitted.

(iv) *Location of consumers.* If the application is for a municipal rate loan subject to the interest rate cap, or for a loan at the hardship rate, and the average number of consumers per mile of the total electric system exceeds 17,

Rural Utilities Service, USDA

§1710.401

Form 740c must include, as a note, a breakdown of funds included in the proposed loan to furnish or improve service to consumers located in an urban area. See 7 CFR 1714.7(c) and 1714.8(d). This breakdown must indicate the method used by the borrower for allocating loan funds between urban and non urban consumers.

(4) RUS Form 740g, Application for Headquarters Facilities. This form lists the individual cost estimates from the construction work plan or other engineering study that support the need for RUS financing for any warehouse and service type facilities included, and funding requested for such facilities shown on RUS Form 740c. If no loan funds are requested for headquarters facilities, Form 740g need not be submitted.

(5) Financial and statistical report. Distribution borrowers shall submit these data on RUS Form 7; power supply borrowers shall use RUS Form 12. The form shall contain the most recent data available, which shall not be more than 60 days old when received by RUS.

(6) Pending litigation statement. A statement from the borrower's counsel listing any pending litigation, including levels of related insurance coverage and the potential effect on the borrower. This statement and the statements from counsel required by paragraphs (a)(7) and (15) of this section may be combined into a single document.

(7) Mortgage information. A new mortgage will be required if this is a borrower's first application for a loan under the RE Act. A restated mortgage, or a mortgage supplement will be required if there has been a material change to the real property owned by the borrower since the most recent RUS loan, loan guarantee, or lien accommodation, if the requested loan would cause the borrower to exceed its previously authorized debt limit, or if RUS otherwise determines it necessary. If there has been no material change to the real property owned by the borrower since the most recent RUS loan or loan guarantee, the borrower must submit an opinion of its counsel to that effect. If a new or restated mortgage or a mortgage supplement

is required, the borrower must provide the following:

(i) *Property schedule.* For a new or restated mortgage or for a mortgage supplement, the following information shall be submitted in a form satisfactory to RUS:

(A) A listing of the counties where the borrower's existing electric facilities and new facilities are or will be located;

(B) A listing and description of all real property owned by the borrower; and

(C) An opinion of the borrower's counsel certifying that the property schedule is complete and adequate for inclusion in a security instrument to be executed by the borrower to secure an RUS loan.

(ii) *Maximum debt limit.* For a new mortgage, or if the proposed loan would result in the borrower's existing mortgage debt limit being exceeded, a resolution of the borrower's board of directors, and any other authorizations or certifications required by State law, certifying that a new debt limit has been legally established that is adequate to accommodate existing indebtedness and the proposed new financing, including any concurrent loans.

(8) Rate disparity and consumer income data. If the borrower is applying under the rate disparity and consumer income tests for either a municipal rate loan subject to the interest rate cap or a hardship rate loan, the application must provide a breakdown of residential consumers either by county or by census tract. In addition, if the borrower serves in 2 or more states, the application must include a breakdown of all ultimate consumers by state. This breakdown may be a copy of Form EIA 861 submitted by the Borrower to the Department of Energy or in a similar form. See 7 CFR 1714.7(b) and 1714.8(a). To expedite the processing of loan applications, RUS strongly encourages distribution borrowers to provide this information to the GFR prior to submitting the application.

(9) Standard Form 100—Equal Employment Opportunity Employer Report EEO—1. This form, required by the Department of Labor, sets forth employment data for borrowers with 100 or more employees. A copy of this

§ 1710.401

7 CFR Ch. XVII (1–1–97 Edition)

form, as submitted to the Department of Labor, is to be included in the application for an insured loan if the borrower has more than 100 employees. See § 1710.122.

(10) Form AD-1047, Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions. This statement certifies that the borrower will comply with certain regulations on debarment and suspension required by Executive Order 12549, Debarment and Suspension (3 CFR, 1986 Comp., p. 189). See 7 CFR part 3017 and § 1710.123.

(11) Uniform Relocation Act assurance statement. This assurance, which need not be resubmitted if previously submitted, provides that the borrower shall comply with 49 CFR part 24, which implements the Uniform Relocation Assistance and Real Property Acquisition Policy Act of 1970, as amended by the Uniform Relocation Act Amendments of 1987 and 1991. See § 1710.124.

(12) Lobbying. The following information on lobbying is required pursuant to 7 CFR part 3018 and § 1710.125. Borrowers applying for both insured and guaranteed financing should consult RUS before submitting this information.

(i) *Certification regarding lobbying.* This statement certifies that the borrower shall comply with certain requirements with respect to restrictions on lobbying activities.

(ii) *Standard Form LLL—Disclosure of Lobbying Activities.* This disclosure form is required from those borrowers engaged in lobbying activities.

(13) Federal debt delinquency requirements. See 1710.126. The following documents are required:

(i) *Report on Federal debt delinquency.* This report indicates whether or not a borrower is delinquent on any Federal debt.

(ii) *Certification Regarding Federal Government Collection Options.* This statement certifies that a borrower has been informed of the collection options the Federal Government may use to collect delinquent debt. The Federal Government is authorized by law to take any or all of the following actions in the event that a borrower's loan

payments become delinquent or the borrower defaults on its loans:

(A) Report the borrower's delinquent account to a credit bureau;

(B) Assess additional interest and penalty charges for the period of time that payment is not made;

(C) Assess charges to cover additional administrative costs incurred by the Government to service the borrower's account;

(D) Offset amounts owed directly or indirectly to the borrower under other Federal programs;

(E) Refer the borrower's debt to the Internal Revenue Service for offset against any amount owed to the borrower as an income tax refund;

(F) Refer the borrower's account to a private collection agency to collect the amount due; and

(G) Refer the borrower's account to the Department of Justice for collection.

(14) Articles of incorporation and bylaws. The following are required if either document has been amended since the last loan application was submitted to RUS, or if this is a borrower's first application for a loan under the RE Act:

(i) The borrower's articles of incorporation currently in effect, as filed with the appropriate state office, setting forth the borrower's corporate purpose; and

(ii) The bylaws currently in effect, as adopted by the borrower's board of directors, setting forth the manner by which the borrower's organization will be governed and regulated.

(15) State regulatory approvals. In states in which regulatory authorities have jurisdiction over the borrower's rates, the borrower must provide satisfactory evidence, pursuant to §§ 1710.105 and 1710.151(f), based on the information available, such as an opinion of counsel or of another qualified source, that the state regulatory authority will not exclude from the borrower's rate base any of the facilities included in the loan request, or otherwise prevent the borrower from charging rates sufficient to repay with interest the debt incurred for the facilities.

(16) Seismic safety certifications. This certification shall be included, if required under 7 CFR part 1792.

(17) Rates. (i) A distribution borrower shall explain any recent or planned changes in retail rates, the status of any pending rate cases before a state regulatory authority, or other pertinent rate information.

(ii) A power supply borrower shall submit a schedule of its wholesale rates currently in effect. Any changes in this schedule are subject to RUS approval.

(18) Additional supporting data. Additional supporting data may be required by RUS depending on the individual application or conditions. Examples of such additional supporting data include information about acquisitions, headquarters facilities, generation or transmission facilities, large power loads or special loads.

(b) *Distribution borrowers.* In addition to the items in paragraph (a) of this section, applications for loans submitted by distribution borrowers shall include the borrower's area coverage and line extension policies. If there have been any amendments to area coverage or line extension policies since the last loan application submitted to RUS, or if this is a borrower's first application for a loan under the RE Act, the borrower shall submit the board of directors' approved policies on area coverage and line extensions. See §§1710.103 and 1710.151(a).

(c) *Primary support documents.* In addition to the loan application, consisting of the documents required by paragraphs (a) and (b) of this section, all borrowers must also provide RUS with the following primary support documents pursuant to §1710.152:

(1) Along with the loan application, the borrower shall submit to RUS a Long-Range Financial Forecast (LRFF), that meets the requirements of subpart G of this part. The forecast shall include any sensitivity analysis or analysis of alternative scenarios required by subpart G of this part, and shall be accompanied by a certified board resolution adopting, and indicating the board of directors' approval of, the LRFF, and directing management to take whatever steps may be necessary, including the filing for rate increases, to achieve the TIER goals set forth in the LRFF.

(2) Prior to RUS's acceptance of the loan application, the borrower shall submit to RUS and receive approval of:

(i) Power Requirements Study (PRS) that meets the requirements of subpart E of this part, and is accompanied by a certified board resolution adopting, and indicating the board of directors' approval of, the PRS.

(ii) Construction Work Plan (CWP) and/or related engineering and cost studies that meets the requirements of subpart F of this part, and is accompanied by a certified board resolution adopting, and indicating the board of directors' approval of, the CWP and/or engineering and cost studies.

(iii) Borrower's Environmental Report (BER), or other environmental information as required by 7 CFR part 1794.

(iv) Demand Side Management Plan and/or Integrated Resource Plan, if required by subpart H of this part.

(d) *Submission of documents.* (1) Generally, all information required by paragraphs (a), (b), and (c)(1) of this section is submitted to RUS in a single application package. The information required by paragraph (c)(2) of this section is generally submitted to, and approved by RUS before the application is submitted.

(2) To facilitate loan review, RUS urges borrowers to ensure that their applications contain all of the information required by this section before submitting the application to RUS. Borrowers may consult with RUS field representatives and headquarters staff as necessary for assistance in preparing loan applications.

(3) RUS may, in its discretion, return an application to the borrower if the application is not materially complete to the satisfaction of RUS within 10 months of receipt of any of the items listed in paragraph (a) or (b) of this section. RUS will generally advise the borrower in writing at least 2 months prior to returning the application as to the elements of the application that are not complete.

(4) If an application is returned, an application for the same loan purposes will be accepted by RUS if satisfactory evidence is provided that all of the information required by this section will

§ 1710.404

be submitted to RUS within a reasonable time. An application for loan purposes included in an application previously returned to the borrower will be treated as an entirely new application.

(e) *Complete applications.* An application is complete when all information required by RUS to approve a loan is materially complete in form and substance satisfactory to RUS.

(f) *Change in borrower circumstances.* A borrower shall, after submitting a loan application, promptly notify RUS of any changes in its circumstances that materially affect the information contained in the loan application or in the primary support documents.

(g) *Interest rate category.* For pending loans, RUS will promptly notify the borrower if its eligibility for an interest rate category changes pursuant to new information from the Department of Energy or the Bureau of the Census. See 7 CFR part 1714.

(Approved by the Office of Management and Budget under control numbers 0572-0017, 0572-0032 and 0572-1013.)

§§ 1710.402—1710.403 [Reserved]

§ 1710.404 Additional requirements.

Additional requirements for insured electric loans are set forth in 7 CFR part 1714.

§ 1710.405 Supplemental financing documents.

(a) The borrower is responsible for ensuring that the loan documents required for supplemental financing pursuant to § 1710.110 are executed in a timely fashion. These documents are subject to RUS approval.

(b) Security. Any security offered by the borrower to a supplemental lender is subject to RUS approval.

§ 1710.406 Loan approval.

(a) A loan is approved when the Administrator signs the administrative findings.

(b) If the loan is not approved, RUS will notify the borrower of the reason.

§ 1710.407 Loan documents.

Following approval of a loan, RUS will forward the loan documents to the

7 CFR Ch. XVII (1-1-97 Edition)

borrower for execution, delivery, recording, and filing, as directed by RUS.

SOURCE: 58 FR 66260, Dec. 20, 1993, unless otherwise noted.

Subpart A—General

§ 1714.1 [Reserved]

§ 1714.2 Definitions.

The definitions set forth in 7 CFR 1710.2 are applicable to this part, unless otherwise stated. References to specific RUS forms and other RUS documents, and to specific sections of such forms and documents, shall include the corresponding forms, documents, sections and lines in any subsequent revisions of these forms and documents.

§ 1714.3 Applicability of provisions.

(a) *Insured electric loans approved on or after November 1, 1993.* On November 1, 1993, the Rural Electrification Loan Restructuring Act, Pub. L. 103-129, 107 Stat. 1356, (RELRA) amended the Rural Electrification Act of 1936, 7 U.S.C. 901 *et seq.*, (RE Act) to establish a new interest rate structure for insured electric loans. Insured electric loans approved on or after this date, are either

Rural Utilities Service, USDA

§ 1714.6

municipal rate loans or hardship rate loans. Borrowers meeting the criteria set forth in § 1714.8 are eligible for 5 percent hardship rate loans. The interest rate on loans to other borrowers is the municipal interest rate, and borrowers meeting the criteria set forth in § 1714.7 are eligible for the interest rate cap on their municipal rate loans. Interest rates for the initial interest rate term and rollover terms (§ 1714.6) will be determined pursuant to § 1714.4. Provisions for prepayment are set forth in § 1714.9. The provisions of this subpart apply to loans approved on or after November 1, 1993, unless otherwise stated.

(b) *Insured electric loans approved prior to November 1, 1993.* These loans have a single interest rate applicable to the entire loan. The rate is generally 5 percent, but, in some cases, may be as low as 2 percent. These loans have a single interest rate term and may be prepaid at face value at any time. Provisions for discounted prepayment of these loans are set forth in 7 CFR part 1786.

§ 1714.4 Interest rates.

(a) *Municipal rate loans.* Each advance of funds on a municipal rate loan shall bear interest at a single rate for each interest rate term. All interest rates applicable to municipal rate loans will be increased by one eighth of one percent (0.125 percent), if the borrower elects to include in the loan agreement a prepayment option (call provision), allowing the borrower to prepay all or a portion of an advance on a date other than a rollover maturity date. However, no interest rate for any advances of a loan to a borrower who qualifies for the interest rate cap may exceed 7 percent.

(b) *Hardship rate loans.* All advances of funds on hardship rate loans shall bear interest at a rate of 5 percent.

(c) *Application procedure.* The borrower's board resolution submitted with the loan application must indicate whether the application is for a municipal rate loan, with or without the interest rate cap, or a hardship rate loan. If the application is for a municipal rate loan, the board resolution must also indicate whether the borrower intends to elect the prepayment option.

§ 1714.5 Determination of interest rates on municipal rate loans.

(a) RUS will publish a schedule of interest rates for municipal rate loans in the FEDERAL REGISTER at the beginning of each calendar quarter. The schedule will show the year of maturity and the applicable interest rates in effect for all funds advanced on municipal rate loans during the calendar quarter and all interest rate terms beginning in the quarter. All interest rates will be adjusted to the nearest one eighth of one percent (0.125 percent).

(b) The rate for interest rate terms of 20 years or longer will be the average of the 20 year rates published in the Bond Buyer in the 4 weeks specified in paragraph (d) of this section for the "11-Bond GO Index" of Aa rated general obligation municipal bonds, or the successor to this index.

(c) The rate for terms of less than 20 years will be the average of the rates published in the Bond Buyer in the 4 weeks specified in paragraph (d) of this section in the table of "Municipal Market Data—General Obligation Yields" for Aa rated bonds, or the successor to this table, for obligations maturing in the same year as the interest rate term selected by the borrower.

(d) The interest rates on municipal rate loans shall not exceed the interest rate determined under section 307(a)(3)(A) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1927(a)(3)(A)) for Water and Waste Disposal loans. The method used to determine this rate is set forth in the regulations of the Farmers Home Administration (FmHA) at 7 CFR 1942.17(f) (1) and (4). Pursuant to the FmHA rule, the interest rates are set using as guidance the average of the Bond Buyer Index for the four weeks prior to the first Friday of the last month before the beginning of the quarter. Information about the Bond Buyer is available by writing Bond Buyer, One State Street Plaza, New York, NY 10004-1549, or by calling 1-800-982-0633.

§ 1714.6 Interest rate term.

(a) *Municipal rate loans.* Selection of interest rate terms shall be made by the borrower for each advance of funds. The minimum interest rate term shall

§ 1714.7

be one year. RUS will send the borrower written confirmation of each rollover maturity date and the applicable interest rate.

(1) The initial interest rate term will begin on the date of the advance. All rollover interest rate terms will begin on the first day of a month, and except for the last interest rate term to final maturity, shall end on the last day of a month. All terms except for the initial interest rate term on an advance, and the last term to final maturity shall be in yearly increments.

(2) The following limits apply to the number of advances of funds that may be made to the borrower on any municipal rate loan:

(i) If the loan period is 2 years or less, not more than 6 advances;

(ii) If the loan period is more than 2 years, not more than 8 advances.

(3) For the initial interest rate term of an advance, a letter from an authorized official of the borrower indicating the selection of the term shall accompany the request for the advance.

(4) At the end of any interest rate term, the borrower shall pay all accrued interest and principal balance then due, and either prepay the remaining principal of the advance at face value, or roll over the remaining principal for a new term, provided that no interest rate term may end later than the date of the final maturity.

(i) If the borrower elects to prepay all or part of the remaining principal of the advance at face value, it must notify the Director of the appropriate Regional Division or the Power Supply Division in writing not later than 20 days before the rollover maturity date.

(ii) If the borrower wishes to elect a new interest rate term that is different from the term previously selected, it must notify RUS in writing of the new term not later than 20 days before the end of the current term. The election of the new term shall be addressed to the Director, Financial Operations Division, Rural Utilities Service, Washington, DC 20250-1500.

(iii) If the borrower fails to notify RUS within the timeframes set out in this paragraph of its intention to prepay or elect a different interest rate term, RUS will automatically roll over the remaining principal for the shorter

7 CFR Ch. XVII (1-1-97 Edition)

of, and at the interest rate applicable to:

(A) A period equal in length to the term that is expiring; or

(B) The remaining period to final maturity.

(b) *Hardship rate loans.* Loans made at the 5 percent hardship rate are made for a single term that cannot exceed the final maturity as set forth in 7 CFR 1710.115. The hardship interest rate applies to the entire amount of the loan.

[58 FR 66260, Dec. 20, 1993, as amended at 60 FR 3734, Jan. 19, 1995]

§ 1714.7 Interest rate cap.

Except as provided in paragraph (c) of this section, the municipal interest rate may not exceed 7 percent on a loan advance to a borrower primarily engaged in providing retail electric service if the borrower meets, at the time of loan approval, either the consumer density test set forth in paragraph (a) of this section, or both the rate disparity test for the interest rate cap and the consumer income test set forth in paragraph (b) of this section.

(a) *Low consumer density test.* The borrower meets this test if the average number of consumers per mile of line of its total electric system, based on the most recent data available at the time of loan approval is less than 5.50.

(b) (1) *Rate disparity test for the interest rate cap.* The borrower meets this test if its average revenue per kWh sold is more than the average revenue per kWh sold by all electric utilities in the state in which the borrower provides service. To determine whether a borrower meets this test, RUS will compare the borrower's average total revenue with statewide data in the table of Average Revenue per Kilowatthour for Electric Utilities by Sector, Census Division and State, in the Electric Power Annual issued by the Energy Information Administration of the Department of Energy (DOE), or the successor to this table. The test will be based on the most recent calendar year for which full year DOE data are available at the time of loan approval and borrower data for the same year.

(2) *Consumer income test.* The borrower meets this test if either the average per capita income of the residents

Rural Utilities Service, USDA

§ 1714.8

receiving electric service from the borrower is less than the average per capita income of residents of the state in which the borrower provides service or the median household income of the households receiving electric service from the borrower is less than the median household income of the households in the state.

(i) To qualify under the consumer income test, the borrower must include in its loan application information about the location of its residential consumers. The borrower must provide to RUS, based on the most recent data available at the time of loan application, either the number of consumers in each county it serves or the number of consumers in each census tract it serves. Using the most recently published decennial census data on income from the Bureau of the Census, RUS will compare, on a weighted average basis, the average per capita and median household income of the counties or census tracts served by the borrower with state figures.

(ii) In cases where conditions have substantially changed so that the decennial census data no longer accurately describes the economic conditions of the borrower's consumers, the borrower may provide RUS with more current income data from a reliable source such as a State agency. The Administrator has the sole discretion to determine whether such data submitted by the borrower is sufficient to determine whether the borrower qualifies under the consumer income test.

(3) *Borrowers serving 2 or more states.* If a borrower serves consumers in 2 or more states, the rate disparity test and the consumer income test will be determined on a weighted average based on the percentage of the borrower's total consumers that are served in each state.

(c) *High density test.* If the average number of consumers per mile of the borrower's total electric system exceeds 17, the interest rate cap will not apply to funds used for the purpose of furnishing or improving electric service to consumers located in an area that is an urban area at the time of loan approval, notwithstanding that the area must have been deemed a rural area for the purpose of qualifying

for a loan under this part. (See the definition of "rural area" in 7 CFR 1710.2.) If the average number of consumers per mile of line of the borrower's total electric system exceeds 17, the borrower must include, as a note on RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers, submitted as part of the loan application for a loan subject to the interest rate cap, a breakdown of funds included in the proposed loan to furnish or improve service to consumers located in such urban areas. For such borrowers only funds for those facilities serving consumers located outside an urban area are eligible for the interest rate cap.

§ 1714.8 Hardship rate loans.

Except as provided in paragraph (d) of this section, the Administrator shall make an insured electric loan for eligible purposes at the 5 percent hardship rate to a borrower primarily engaged in providing retail electric service if the borrower meets, at the time of loan approval, both the rate disparity test for hardship and the consumer income test described in paragraph (a) of this section; or the extremely high rates test set forth in paragraph (b) of this section. A loan at the 5 percent hardship rate may also be made to any borrower pursuant to paragraph (c) of this section who, in the sole discretion of the Administrator, has experienced a severe hardship. The Administrator may not require a loan from a supplemental source in connection with a hardship rate loan.

(a) (1) *Rate disparity test for hardship.* The borrower meets this test if its average revenue per kWh sold is not less than 120 percent of the average revenue per kWh sold by all electric utilities in the state in which the borrower provides service, and its average residential revenue per kWh is not less than 120 percent of the average residential revenue per kWh sold by all electric utilities in the state in which the borrower provides service. To determine whether a borrower meets this test, RUS will compare the borrower's average total revenue and average residential revenue with statewide data in the table of Average Revenue per Kilowatthour for Electric Utilities by Sector, Census Division and State, in

the Electric Power Annual issued by the Energy Information Administration of the Department of Energy (DOE), or the successor to this table. The test will be based on the most recent calendar year for which full year DOE data are available at the time of loan approval and borrower data for the same year.

(2) *Consumer income test.* The borrower meets this test if either the average per capita income of the residents receiving electric service from the borrower is less than the average per capita income of the residents of the state in which the borrower provides service or the median household income of the residents receiving electric service from the borrower is less than the median household income of the households in the state. RUS will determine whether the borrower qualifies under this test according to the procedure set forth in § 1714.7(b)(2).

(3) *Borrowers serving 2 or more states.* If a borrower serves consumers in 2 or more states, the rate disparity test and the consumer income tests will be determined on a weighted average based on the percentage of the borrower's total consumers that are served in each state.

(b) *Extremely high rates test.* Except as provided in this paragraph, the Administrator shall make an insured electric loan at the 5 percent hardship rate to any borrower whose residential revenue exceeds 15.0 cents per kWh sold. Residential revenue shall be calculated for the most recent full calendar year for which data are available and shall include sales to both seasonal and non-seasonal consumers. If, at the time of loan approval, the area to be served is an urbanized area (notwithstanding that the area must be deemed a rural area to qualify for a loan under this part (See the definition of “rural area” in 7 CFR 1710.2)), then the borrower must satisfy the provisions of paragraphs (a) and (d) of this section to qualify to the 5 percent hardship interest rate. If at the time of loan approval, such area is outside an urbanized area, the loan shall not be subject to the conditions and limitations set forth in paragraphs (a) and (d) of this section.

(c) *Administrator's discretion.* The Administrator may make a hardship rate loan if, in the sole discretion of the Administrator, the borrower has experienced a severe hardship. The Administrator shall consider, among other matters, whether factors beyond the control or substantial influence of the borrower have had severe adverse effect on the borrower's ability to provide service consistent with the purposes of the RE Act, and which prudent management could not reasonably anticipate and either prevent or insure against. Among the factors that may be considered are system damage due to unusual weather or other natural disasters or Acts of God, loss of substantial loads, extreme rate disparity compared to a contiguous utility, and other factors that cause severe financial hardship. The Administrator will also consider whether a hardship rate loan will provide significant relief to the borrower in dealing with the severe hardship.

(d) *High density test.* Except as provided in paragraph (b) of this section, if the average number of consumers per mile of the borrower's total electric system exceeds 17, the 5 percent hardship rate will not apply to funds used for the purpose of furnishing or improving electric service to consumers located in an area that is an urban area at the time of loan approval, notwithstanding that the area must have been deemed a rural area for the purpose of qualifying for a loan under this part. (See the definition of “rural area” in 7 CFR 1710.2.) If the average number of consumers per mile of line of the borrower's total electric system exceeds 17, the borrower must include, as a note on RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers, submitted as part of the loan application for a loan at the 5 percent hardship rate, a breakdown of funds included in the proposed loan to furnish or improve service to consumers located in urban areas. For such borrowers only funds for those facilities serving consumers located outside an urban area are eligible for the 5 percent hardship rate.

(Approved by the Office of Management and Budget under control number 0572–1013.)

§ 1714.9 Prepayment of insured loans.

This section sets out provisions for prepayment of insured electric loans at face value. Provisions for discounted prepayment of RUS loans are set out in 7 CFR part 1786.

(a) *Municipal rate loans.* Loan documents for municipal rate loans shall provide for the following:

(1) *Prepayment on a rollover maturity date.* All, or a portion of, the outstanding balance on any advance from a municipal rate loan may be prepaid on any rollover maturity date pursuant to § 1714.6(a)(4).

(2) *Prepayment on a date other than a rollover maturity date.* A borrower may elect at the time of loan approval to include a prepayment option (call provision) that will allow the borrower to prepay all, or a portion of, the outstanding balance on any advance on a date other than a rollover maturity date. Interest rates on advances from loans with a prepayment provision will be increased as set forth in § 1714.4(a).

(b) *Hardship rate loans.* Loan documents for hardship loans shall provide that the loan may be prepaid at face value at any time without penalty.

§§ 1714.10—1714.49 [Reserved]**Subpart B—Terms of Insured Loans**

SOURCE: 60 FR 3734, Jan. 19, 1995, unless otherwise noted.

§§ 1714.50—1714.54 [Reserved]**§ 1714.55 Advance of funds from insured loans.**

The borrower shall request advances of funds as needed. Advances are subject to RUS approval and must be requested in writing on RUS Form 595 or an RUS approved equivalent. Funds will not be advanced until the Administrator has received satisfactory evidence that the borrower has met all applicable conditions precedent to the advance of funds, including evidence that the supplemental financing required under 7 CFR part 1710 and any concurrent loan guaranteed by RUS are available to the borrower under terms and conditions satisfactory to RUS.

§ 1714.56 Fund advance period.

(a) For loans approved on or after February 21, 1995, the fund advance period begins on the date of the loan note and is one year longer than the loan period, but not less than 4 years. For example, the fund advance period for a loan with a 2-year loan period terminates automatically 4 years after the date of the loan note; a loan with a 4-year loan period terminates automatically 5 years after the date of the loan note. The Administrator may extend the fund advance period on any loan if the borrower meets the requirements of paragraph (c) of this section. As defined in 7 CFR 1710.2, the loan period begins on the date shown on page 1 of RUS Form 740c submitted with the loan application.

(b) For loans approved on or after June 1, 1984, and before February 21, 1995, the fund advance period begins on the date of the loan contract, or the most recent amendment thereto, and terminates automatically 4 years from the date of the loan contract, or the most recent amendment thereto, except as provided in paragraph (c) of this section.

(c) The Administrator may agree to an extension of the fund advance period for loans approved on or after June 1, 1984, if the borrower demonstrates to the satisfaction of the Administrator that the loan funds continue to be needed for approved loan purposes (i.e., facilities included in an RUS approved construction work plan). Policies for extension of the fund advance period following certain mergers, consolidations, and transfers of systems substantially in their entirety are set forth in 7 CFR 1717.156.

(1) To apply for an extension, the borrower must send to RUS, at least 120 days before the automatic termination date, the following:

(i) A certified copy of a board resolution requesting an extension of the Government's obligation to advance loan funds;

(ii) Evidence that the unadvanced loan funds continue to be needed for approved loan purposes; and

(iii) Notice of the estimated date for completion of construction.

(2) In the case of financial hardship, as determined by the Administrator,

§ 1714.57

RUS may agree to an extension of the fund advance period even though the borrower has failed to meet the 120-day requirement of paragraph (c)(1) of this section.

(3) If the Administrator approves a request for an extension, RUS will notify the borrower in writing of the extension and the terms and conditions thereof. An extension will be effective only if it is obtained in writing prior to the automatic termination date.

(d) Advances of funds from loans approved before June 1, 1984, are generally made during the first 6 years of the note.

(e) RUS will rescind the balance of any loan funds not advanced to a borrower as of the final date approved for advancing funds.

[60 FR 3734, Jan. 19, 1995, as amended at 61 FR 66871, Dec. 19, 1996]

EFFECTIVE DATE NOTE: At 61 FR 66871, Dec. 19, 1996, § 1714.56 was amended by revising the introductory text of paragraph (c), effective Jan. 21, 1997. For the convenience of the user, the superseded text is set forth as follows:

§ 1714.56 Fund advance period.

* * * * *

(c) The Administrator may agree to an extension of the fund advance period for loans approved on or after June 1, 1984, if the borrower demonstrates to the satisfaction of the Administrator that the loan funds continue to be needed for approved loan purposes (i.e., facilities included in an RUS-approved construction work plan).

* * * * *

§ 1714.57 Sequence of advances.

(a) Except as set forth in paragraph (b) of this section, concurrent loan funds will be advanced in the following order:

(1) 50 percent of the RUS insured loan funds;

(2) 100 percent of the supplemental loan funds;

(3) The remaining amount of the RUS insured loan funds.

(b) At the borrower's request and with RUS approval, all or part of the supplemental loan funds may be advanced before funds in paragraph (a)(1) of this section.

7 CFR Ch. XVII (1–1–97 Edition)

§ 1714.58 Amortization of principal.

(a) For insured loans approved on or after February 21, 1995:

(1) Amortization of funds advanced during the first 2 years after the date of the note shall begin no later than 2 years from the date of the note. Except as set forth in paragraph (a)(2) of this section, amortization of funds advanced 2 years or more after the date of the note shall begin with the scheduled loan payment billed in the month following the month of the advance.

(2) For advances made 2 years or more after the date of the note, the Administrator may authorize deferral of amortization of principal for a period of up to 2 years from the date of the advance if the Administrator determines that failure to authorize such deferral would adversely affect either the Government's financial interest or the achievement of the purposes of the RE Act.

(b) For insured loans approved before February 21, 1995, amortization of principal shall begin 2 years after the date of the note for advances made during the first and second years of the loan, and 4 years after the date of the note for advances made during the third and fourth years.

§ 1714.59 Rescission of loans.

(a) A borrower may request rescission of a loan with respect to any funds unadvanced by submitting a certified copy of a resolution by the borrower's board of directors.

(b) RUS may rescind loans pursuant to § 1714.56.

(c) Borrowers who prepay RUS loans at a discounted present value pursuant to 7 CFR part 1786, subpart F, are required to rescind the unadvanced balance of all outstanding electric notes pursuant to 7 CFR 1786.158(j).

Subparts A—C [Reserved]

Subpart D—Mergers and Consolidations of Electric Borrowers

SOURCE: 61 FR 66871, Dec. 19, 1996, unless otherwise noted.

EFFECTIVE DATE NOTE: At 61 FR 66871, Dec. 19, 1996, subpart D, consisting of §§ 1717.150–1717.161, was added to part 1717, effective Jan. 21, 1997.

§ 1717.150 General.

(a) This subpart establishes RUS policies and procedures for mergers of electric borrowers. These policies and procedures are intended to provide borrowers with the flexibility to negotiate and enter into mergers that offer advantages to the borrowers and to rural communities, and adequately protect the integrity and credit quality of RUS loans and loan guarantees.

(b) Consistent with prudent lending practices, the maintenance of adequate security for RUS loans and loan guarantees, and the objectives of the Rural

7 CFR Ch. XVII (1–1–97 Edition)

Electrification Act of 1936, as amended, (7 U.S.C. 901 *et seq.*) (RE Act), RUS encourages electric borrowers to consider mergers when such action is likely to contribute, in the long-term, to greater operating efficiency and financial soundness. Borrowers are specifically encouraged to explore mergers that are likely to enhance the ability of the successor to provide reliable electric service at reasonable cost to RE Act beneficiaries.

(c) Pursuant to the loan documents and RUS regulations, certain mergers are subject to RUS approval. See § 1717.615.

(d) Since RUS must take action in order to advance funds and otherwise conduct business with a successor, RUS encourages borrowers to consult RUS early in the process regardless of whether RUS approval of the merger is required. RUS will provide technical assistance and guidance to borrowers to help expedite the processing of their requests and to help resolve potential problems early in the process.

§ 1717.151 Definitions.

The definitions set forth in 7 CFR 1710.2 are applicable to this subpart unless otherwise stated. In addition, for the purpose of this subpart, the following terms shall have the following meanings:

Active borrower means an electric borrower that has, on the effective date, an outstanding insured or guaranteed loan from RUS for rural electrification, and whose eligibility for future RUS financing is not restricted pursuant to 7 CFR part 1786.

Active distribution borrower means an electric distribution borrower that has, on the effective date, an outstanding insured or guaranteed loan from RUS for rural electrification, and whose eligibility for future RUS financing is not restricted pursuant to 7 CFR part 1786.

Consolidation. see *Merger*.

Coverage ratios means collectively TIER, OTIER, DSC and ODSC, as these terms are defined in 7 CFR 1710.2.

Effective date means the date a merger is effective pursuant to applicable state law.

Former distribution borrower means any organization that

Rural Utilities Service, USDA

§1717.152

(1) Sells or intends to sell electric power and energy at retail;

(2) At one time had an outstanding loan made or guaranteed by RUS, or its predecessor the Rural Electrification Administration (REA) for rural electrification; and

(3) Either repaid such loans at face value or prepaid pursuant to 7 CFR part 1786.

Loan documents means the mortgage (or other security instrument acceptable to RUS), the loan contract, and the promissory note(s) entered into between the borrower and RUS.

Merger means: (1) A consolidation where two or more companies are extinguished and a new successor is created, acquiring the assets, liabilities, franchises and powers of those passing out of existence;

(2) A merger where one company is absorbed by another, the former ceasing to exist as a separate business entity, and the latter retaining its own identity and acquiring the assets, liabilities, franchises and powers of the former; or

(3) A transfer of mortgaged property by one company to another where the transferee acquires substantially as an entirety the assets, liabilities, franchises, and powers of the transferor.

New loan means a loan to a successor approved by RUS on or after the effective date.

Preexisting loan means a loan to a borrower approved by RUS prior to, and outstanding on the effective date.

Successor means the entity that continues as the surviving business entity as of the effective date, and acquires all the assets, liabilities, franchises, and powers of the entity or entities ceasing to exist as of the effective date.

Transitional assistance means financial relief provided to borrowers by RUS during a limited period of time following a merger.

§1717.152 Required documentation for all mergers.

In order for RUS to advance funds, send bills, and otherwise conduct business with a successor, the documents listed in this section must be submitted to RUS regardless of the need for RUS approval of the merger. Borrowers are responsible for ensuring that these

documents are received by RUS in timely fashion. In cases of mergers that require RUS approval, or cases where borrowers must submit requests for transitional assistance, the documents listed in this section may be combined with the documents required by §§1717.157 and/or 1717.160 where appropriate.

(a) Prior to the effective date, borrowers must submit:

(1) A transmittal letter on corporate letterhead signed by the manager of each active borrower that is a party to the proposed merger indicating the borrower's intention to merge and tentative timeframes, including the proposed effective date;

(2) An original certified board resolution from each party to the proposed merger affirming the board's support of the merger;

(3) All documents necessary to evidence the merger pursuant to applicable law. Examples include plan of merger, articles of merger, amended articles of incorporation, bylaws, and notices and filings required by law. These documents may be copies of documents filed elsewhere, unless otherwise specified by RUS; and

(4) A letter addressed to the Administrator from the counsel of at least one of the active borrowers briefly describing the merger and indicating the relevant statutes under which the merger will be consummated.

(b) On or after the effective date, borrowers must submit:

(1) An opinion of counsel from the successor addressing, among other things, any pending litigation, proper authorization and consummation of the merger, proper filing and perfection of RUS' security interest, and all approvals required by law. RUS will provide the form of the opinion of counsel to the successor;

(2) A letter signed by the manager of the successor advising RUS of the effective date of the merger; the corporate name, address, and phone number; the names of the officers of the successor; and the taxpayer identification number; and

(3) Evidence of proper filing and perfection of RUS' security interest, as instructed by RUS, and an executed loan contract.

§ 1717.153 Transitional assistance.

RUS recognizes that short-term financial stresses can follow even the most beneficial mergers. To help stabilize electric rates, enhance the credit quality of outstanding loans made or guaranteed by the Government, and otherwise ease the transition period before the long-term efficiencies and economies of a merger can be realized, RUS may approve one or more types of transitional assistance to a successor under the conditions set forth in this part.

§ 1717.154 Transitional assistance in connection with new loans.

Requests for transitional assistance in connection with new loans may be submitted to RUS no later than the loan application.

(a) *Loan processing priority.* (1) RUS loans are generally processed in chronological order based on the date the complete application is received in the regional or division office. At the borrower's request, RUS will offer loan processing priority for the first loan to a successor, provided that the loan is approved by RUS not later than 5 years after the effective date of the merger. For any subsequent loans approved during those 5 years, RUS may offer loan processing priority. In reviewing requests for loan processing priority on subsequent loans, RUS will consider the loan authority for the fiscal year, the borrower's projected cash flows, its electric rates and rate disparity, and the likely mitigating effects of priority loan processing. See 7 CFR 1710.108 and 1710.119.

(2) Loan processing priority is available following any merger where at least one of the merging parties is an active borrower.

(b) *Supplemental financing.* (1) RUS generally requires that an applicant for a municipal rate loan obtain a portion of its debt financing from a supplemental source without an RUS guarantee. See 7 CFR 1710.110. RUS will, at the borrower's request, waive the requirement to obtain supplemental financing for the first RUS loan approved after the effective date if that first loan is a municipal rate loan whose loan period does not exceed 2 years, and the loan is approved by RUS

not later than 5 years after the effective date. For any subsequent loans approved during these 5 years, or if the borrower requests a loan period longer than 2 years, RUS may, subject to the availability of loan funds, waive or reduce the amount of supplemental financing required. In reviewing requests to reduce or waive supplemental financing on subsequent loans or on loans with a loan period longer than 2 years, RUS will consider the differences in interest rates between RUS and supplemental loans and the impacts of this difference on the borrower's projected cash flows and its electric rates and rate disparity. If significant differences would result, the waiver will be granted.

(2) Waiver of supplemental financing may be available if:

(i) All parties to the merger are active distribution borrowers, or

(ii) At least one of the merging parties is an active distribution borrower, all merging parties are either active distribution borrowers or former distribution borrowers, and the merger is effective after December 19, 1996.

(c) *Reimbursement of general funds and interim financing.* (1) Borrowers may request RUS loan funds to reimburse general funds and/or interim financing used to finance equipment and facilities included in a RUS approved construction work plan or amendment if the construction was completed immediately preceding the current loan period. This reimbursement period is generally limited to 24 months. See 7 CFR 1710.109. RUS may, in connection with the first RUS loan approved after the effective date, approve a reimbursement period of up to 48 months prior to the current loan period if the loan is approved not later than 5 years after the effective date. In reviewing requests for this longer reimbursement period, RUS will consider the stresses that the transaction and other costs of entering into the merger places on the borrower's rates and cash flows, and the mitigating effects of more generous reimbursement.

(2) A longer reimbursement period may be available if:

(i) All parties to the merger are active distribution borrowers, or

Rural Utilities Service, USDA

§1717.157

(ii) At least one of the merging parties is an active distribution borrower, all merging parties are either active distribution borrowers of former distribution borrowers, *and* the merger is effective after December 19, 1996.

§1717.155 Transitional assistance affecting new and preexisting loans.

Requests for transitional assistance affecting new and preexisting loans must be received by RUS no later than 2 years after the effective date.

(a) *Section 12 deferments.* (1) Section 12 of the RE Act (7 U.S.C. 912) allows RUS to extend the time of payment of interest or principal of RUS loans. Section 12 deferments do not extend the final maturity of the loan; lower payments during the deferment period result in higher payments later. Therefore, RUS may approve a Section 12 deferment of loan payments of up to 5 years only if such deferments will help to avoid substantial increases in retail electric rates during the transition period, without placing borrowers in financial stress after the deferment period.

(2) Section 12 deferment may be available following any merger where at least one of the merging parties is an active borrower.

(b) *Coverage ratios.* Required levels for coverage ratios are set forth in 7 CFR 1710.114 and in the loan documents. RUS may approve a plan, on a case by case basis, that provides for a phase-in period for these coverage ratios of up to 5 years from the effective date. Under such a plan the successor would be permitted to project and achieve lower levels for one or more of these coverage ratios during the phase-in period.

(1) A phase-in plan for coverage ratios must provide a pro forma level for each ratio during each year of the phase-in period and be supported by a financial forecast covering a period of not less than 10 years from the effective date of the merger. The plan must demonstrate that a minimum TIER level of 1.00 will be achieved in each year, that trends will be generally favorable, that the borrower will achieve the levels required in its loan documents and RUS regulations by the end of the phase-in period, and that these

levels will be maintained in subsequent years.

(2) In reviewing phase-in plans for coverage ratios, RUS will review rates, rate disparity, and likely mitigating effects of the proposed phase-in plan.

(3) The borrower is responsible for obtaining approvals of supplemental lenders.

(4) Upon RUS approval of a phase-in plan, the levels in that plan will be substituted for the levels required in the borrower's preexisting loan documents and will be incorporated in any new loan or security documents.

(5) A phase in plan for coverage ratios may be available if:

(i) All parties to the merger are active distribution borrowers, *or*

(ii) At least one of the merging parties is an active distribution borrower, all merging parties are either active distribution borrowers or former distribution borrowers, and the merger is effective after December 19, 1996.

§1717.156 Transitional assistance affecting preexisting loans.

The fund advance period for an insured loan, which is the period during which RUS may advance loan funds to a borrower, terminates automatically after a specific period of time. See 7 CFR 1714.56. If, on the effective date the original fund advance period or the fund advance period as extended pursuant to 7 CFR 1714.56(c), on any preexisting RUS loan to any of the active borrowers involved in a merger has not terminated, such fund advance period shall be automatically lengthened by 2 years. On the borrower's request RUS will prepare documents necessary for the advance of loan funds. RUS will prepare documents for the borrower's execution that will reflect this extension and will provide the legal authority for RUS to advance funds to the successor.

§1717.157 Requests for transitional assistance.

(a) If the merger requires RUS approval, the borrower should, where possible, indicate that it desires transitional assistance at the time it requests approval of the merger. The formal request for transitional assistance must be received by RUS as specified in

§ 1717.158

§§ 1717.155 and 171.156. Documents listed in this section may be combined with the documents required by §§ 1717.152 and/or 1717.160 where appropriate. If the request for transitional assistance is submitted at the same time as a loan application, documents listed in this section may be combined with the loan application documents where appropriate. See 7 CFR part 1710, subpart I. A request for transitional assistance must include:

(1) Transmittal letter(s) formally listing the types of transitional assistance requested. If the request is submitted before the effective date, a transmittal letter must be signed by the manager of each party to the transaction. If the request is submitted on or after the effective date, a transmittal letter must be signed by the manager of the successor. Transmittal letter(s) must be signed originals on corporate letterhead stationery;

(2) Board resolution(s). If the request is submitted before the effective date, a separate board resolution must be submitted from each entity involved in the merger. If the request is submitted on or after the effective date, a board resolution from the successor must be submitted. Each board resolution must be a certified original;

(3) A merger plan, financial forecasts, and any available studies such as net present value analyses showing the anticipated costs and benefits of the merger and likely timeframes for the merger. The merger plan must clearly identify those benefits that cannot be achieved without a merger, and those benefits that can be achieved through other means;

(4) If the transitional assistance requires RUS approval, the type and extent of the mitigation that the transitional assistance is expected to provide; and

(5) Other information that may be relevant.

(b) Borrowers are responsible for ensuring that requests for transitional assistance are complete and sound in form and substance when they are submitted to RUS. After submitting a request, borrowers shall promptly notify RUS of any changes or events that materially affect the request or any information in the request.

7 CFR Ch. XVII (1–1–97 Edition)

(c) In considering whether to approve requests for transitional assistance, RUS will evaluate the costs and benefits of the merger; the type and extent of the likely transitional stress; whether the transitional assistance requested is likely to materially mitigate such stress; and the likely impacts on electric rates and on the security of RUS loans. Review factors applicable to each type of transitional assistance are set forth in §§ 1717.154–1717.156.

§ 1717.158 Mergers with borrowers who prepaid RUS loans.

In some cases, an active distribution borrower may merge with a borrower that has prepaid RUS debt at a discount pursuant to 7 CFR part 1786, and whose eligibility for future RUS financing is thereby restricted. During the period when the restrictions on future financing are in effect, the successor will be eligible for RUS loans to finance facilities to serve consumers located in the territory that was served by the active distribution borrower immediately prior to the effective date, provided that other requirements for loan eligibility are met.

§ 1717.159 Applications for RUS approvals of mergers.

If a proposed merger requires RUS approval according to RUS regulations and/or the loan documents executed by any of the active borrowers involved, the application must be submitted to RUS not later than 90 days prior to the effective date of the proposed borrower action. A distribution borrower should consult with its assigned RUS general field representative, and a power supply borrower with the Director, Power Supply Division for general information prior to submitting the request.

§ 1717.160 Application contents.

An application for RUS approval of a merger must include the documents listed in this section. Documents listed in this section may be combined with the documents required by §§ 1717.152 and/or 1717.157 where appropriate.

(a) *Transmittal letters* signed by the managers of all borrowers and non-borrowers who are parties to the proposed merger. These letters must include the actual corporate name, address, and

Rural Utilities Service, USDA

§ 1717.161

taxpayer identification number of all parties to the proposed merger. The transmittal letters must be signed originals on corporate letterhead stationery.

(b) *Resolutions from the boards of directors* of all borrowers and non-borrowers who are parties to the proposed merger. This document is the formal request by each entity for RUS approval of the proposed merger. The board resolution must include a description of the proposed merger, including timeframes, and authorization for RUS to release appropriate information to supplemental or other lenders, and for these lenders to release appropriate information to RUS. Each board resolution must be a certified original.

(c) *Evidence* that the proposed merger will result in a viable entity, and that the security of outstanding RUS loans will not be adversely affected by the action. This evidence shall include financial forecasts, and any available studies such as net present value analyses covering a period of not less than 10 years from the effective date of the merger, as well as information about any threatened actions by other parties that could adversely affect the financial condition of any of the parties to the proposed merger, or of the successor. Such threatened actions may include annexations or other actions affecting service territory, loads, rates or other such matters.

(d) *Regulatory information* about pending federal or state proceedings pertaining to any of the parties that could have material effects on the successor.

(e) *Rate information.* Distribution and power supply borrowers shall submit schedules of proposed rates after the merger, including the effects of the proposed action on rates and the status of any pending rate cases before a state regulatory authority. The rates of power supply borrowers are subject to RUS approval. If rates are not projected to change after the merger, a statement to that effect will suffice.

(f) *Area coverage and line extension policies:* If any distribution systems are parties to the proposed merger, a state-

ment of proposed area coverage and line extension policies for the successor.

§ 1717.161 Application process.

(a) Borrowers are responsible for ensuring that their applications for RUS approval of a merger are complete and sound in form and substance when they are submitted to RUS. After submitting an application, borrowers shall promptly notify RUS of any changes or events that materially affect the application or any information in the application.

(b) In reviewing borrower requests for approval of mergers, RUS will consider the likely effects of the action on the ability of the successor to provide reliable electric service at reasonable cost to RE Act beneficiaries and on the security of outstanding RUS loans. Among the factors RUS will consider are whether the proposed merger is likely to:

(1) Contribute to greater operating efficiency and financial soundness;

(2) Mitigate high electric rates and or rate disparity;

(3) Help borrowers to diversify their loads or otherwise hedge risks;

(4) Have beneficial effects on rural economic development in the community served by the borrower, such as diversifying the economic base or alleviating unemployment; and

(5) Provide other benefits consistent with the purposes of the RE Act.

(c) RUS will not approve a merger if, in the sole judgment of the Administrator, such action is likely to have an adverse effect on the credit quality of outstanding loans made or guaranteed by the Government. RUS will thoroughly review each request for approval of such action, including review of the feasibility and security of outstanding Government loans according to the standards in 7 CFR 1710.112 and 1710.113, respectively, and in other RUS regulations.

(d) RUS will keep the borrowers apprised of the progress of their applications.

Subparts E—F [Reserved]**Subpart G—Federal Pre-emption
in Rate Making in Connection
With Power Supply Borrowers****§ 1717.300 Purpose.**

This subpart contains regulations of the Rural Utilities Service (RUS) implementing provisions of Section 4 of the RE Act (7 U.S.C. 904) which authorize the Administrator to establish terms and conditions of loans and implementing provisions of the RUS wholesale power contracts and other RUS documents which provide for the establishment of rates to be charged by power supply borrowers for the sale of electric power and energy. This subpart contains the general regulations of RUS for the pre-emption, under certain circumstances, which are not exclusive, of the regulation of a power supply borrower's rates by a state regulatory authority under state law and for the exercise of exclusive jurisdiction over rates by RUS pursuant to the RUS documents.

§ 1717.301 Policy.

(a) RUS makes and guarantees loans to borrowers to bring electric service to persons in rural areas. RUS requires, as a condition to making or guaranteeing any loans to power supply borrowers, that the borrower enter into RUS wholesale power contracts with its several members and assign and pledge such contracts as security for the repayment of loans made or guaranteed by RUS and for other loans which, pursuant to the RE Act, RUS has permitted to be secured pursuant to the RUS mortgage. The RUS wholesale power contract requires, among other matters, that the rates charged for power and energy sold thereunder produce revenues sufficient to enable the power supply borrower to make payments on account of all indebtedness of the power supply borrower. The Administrator relies upon the RUS wholesale power contracts together with other RUS documents to find and certify, as required in section 4 of the RE Act (7 U.S.C. 904), that the security for the loan is reasonably adequate and

the loan will be repaid within the time agreed.

(b) RUS requires power supply borrowers to take such actions as may be necessary to charge rates for the sale of electric power and energy which are sufficient to pay the principal and interest on loans made or guaranteed by RUS in a timely manner and to meet the requirements of the RUS wholesale power contract and other RUS documents.

(c) With respect to power supply borrowers which are not subject to rate regulation by a state regulatory authority, RUS requires that such borrowers establish rates and obtain RUS approval of such rates as required by the terms of the RUS wholesale power contract and other RUS documents.

(d) With respect to power supply borrowers which are subject to regulation by a state regulatory authority, RUS does not make or guarantee a loan for the construction, operation or enlargement of any generating plant or transmission facility unless the consent of the state regulatory authority having jurisdiction in the premises is first obtained.

(e) Pursuant to applicable provisions of state law state regulatory authorities regulate many aspects of a power supply borrowers business activities, including such matters as the setting of wholesale electric rates, the borrowing of money, and the mortgaging of property. A state regulatory authority's jurisdiction over the rates charged by a power supply borrower shall be pre-empted where the Administrator has determined that such jurisdiction has compromised Federal interests, including without limitation, the ability of the borrower to repay its secured loans in accordance with the terms of the RUS documents. Thereupon, RUS shall, pursuant to the RUS documents, exercise exclusive jurisdiction over the rates charged by a power supply borrower.

[55 FR 38646, Sept. 19, 1990; 55 FR 53100, Dec. 26, 1990]

§ 1717.302 Definitions and rules of construction.

(a) *Definitions.* For the purpose of this subpart, the following terms shall have the following meanings:

Rural Utilities Service, USDA

§1717.303

Administrator means the Administrator of RUS.

Borrower means any organization which has an outstanding loan made or guaranteed by RUS for rural electrification. Unless otherwise stated in the text, “borrower” shall mean power supply borrower.

Loan contract means the agreement, as amended, supplemented, or restated from time to time, between a borrower and RUS providing for loans made or guaranteed pursuant to the RE Act.

Power supply borrower means any borrower engaged in the wholesale sale of electric power and energy to distribution members either directly or through other power supply borrowers pursuant to RUS wholesale power contracts.

RE Act means Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

RUS documents means the loan contract, mortgage and RUS wholesale power contract of a power supply borrower.

RUS mortgage means the mortgage and security agreement, as from time to time supplemented, amended and restated, made by and among the borrower, RUS, and, if a party thereto, third party lenders, or any other form of mortgage or security instrument or indenture of mortgage and deed of trust, securing the payment of outstanding loans made or guaranteed by RUS and other lenders.

RUS wholesale power contract means the contract for the wholesale sale of electric power and energy between a power supply borrower and its member as approved by RUS.

Secured loans shall mean outstanding loans secured pursuant to the RUS mortgage.

State regulatory authority means any state board or local governing body having jurisdiction under state law to regulate, or in any way, approve the electric rates charged by a power supply borrower or electric distribution member of a power supply borrower.

(b) *Rules of Construction.* Unless the context shall otherwise indicate, the terms defined in §1717.302(a) hereof include the plural as well as the singular, and the singular as well as the plural. The words “herein,” and “hereunder,” and words of similar import, refer to this subpart as a whole. “Includes” and “including” are not limiting and “or” is not exclusive.

[55 FR 38646, Sept. 19, 1990, as amended at 59 FR 66440, Dec. 27, 1994]

§1717.303 Requirements of RUS documents.

(a) Pursuant to the terms of the RUS documents each power supply borrower shall establish and adjust rates for the sale of electric power and energy in such a manner as to assure that the borrower will be able to make required payments on secured loans.

(b) Pursuant to the terms of the RUS wholesale power contract, the Board of Directors or Board of Trustees of the power supply borrower shall review rates not less frequently than once each calendar year and revise its rates as therein set forth.¹ The RUS wholesale power contract further provides

¹The Wholesale Power Contract, with minor modifications which are approved by RUS on a case by case basis, provides that the rate charged for electric power and energy, shall produce revenues which shall be sufficient, but only sufficient, with the revenues of the Seller from all other sources, to meet the cost of the operation and maintenance (including without limitation, replacements, insurance, taxes and administrative and general overhead expenses) of the generating plant transmission system and related facilities of the Seller, the cost of any power and energy purchased for resale hereunder by the Seller, the cost of transmission service, make payments on account of principal and interest on all indebtedness of the Seller, and to provide for the establishment and maintenance of reasonable reserves. (Section

Continued

§ 1717.304

that the borrower shall notify the Administrator not less than 30 nor more than 45 days prior to the effective date of any adjustment and shall set forth the basis upon which the rate is to be adjusted and established. The RUS wholesale power contract provides that no final revision in rates shall be effective unless approved in writing by the Administrator.

(c) Pursuant to the terms of the RUS mortgage, each power supply borrower must design its rates as therein set forth and must give 90 days prior notice to RUS of any proposed change in its general rate structure.

(Approved by the Office of Management and Budget under control number 0572-0089)

§ 1717.304 State regulatory authority rate jurisdiction.

(a) In the event that rate revisions required by the terms of the RUS wholesale power contract or other RUS documents may be subject to the approval of a state regulatory authority, the power supply borrower shall seek such required approval in a timely manner.

(b) RUS recognizes the need of state regulatory authorities for documents, information and records for use in connection with an application for rate approval and will consider any reasonable request by a borrower or a state regulatory authority for such documents, information and records. The failure of RUS to provide requested documents, information or records shall not limit any rights of RUS including the right with respect to pre-emption of the state regulatory authority as provided in this subpart.

(c) In the event that the state regulatory authority shall fail to act favorably upon the borrower's application for rate increases required by terms of the RUS wholesale power contract or other RUS documents, the borrower shall pursue such legal and administrative appeals as may be available to it, unless RUS shall approve otherwise in writing.

4. Rates (b), RUS Form 444, "Wholesale Power Contract—Federated Cooperative"; Rev. 6-60.)

7 CFR Ch. XVII (1-1-97 Edition)

§ 1717.305 Pre-emption.

(a) *Inadequate rates.* State regulatory authority jurisdiction over a power supply borrower's rates shall be pre-empted by the RE Act if the Administrator shall have determined that the borrower's rates approved by the state regulatory authority are, after taking into account the borrower's costs and expenses, inadequate to produce revenues sufficient to permit the borrower to make required payments on its secured loans and the borrower has failed to make required payments on its secured loans.

(b) *Public notice.* The Administrator shall:

(1) Notify the borrower and the state regulatory authority in writing of the determination, indicating the jurisdiction of the state regulatory authority over the rates of the borrower has been pre-empted pursuant to this part and the borrower shall henceforth establish its rates in accordance with the term of the RUS documents.

(2) publish a notice in the FEDERAL REGISTER informing the public of the action.

[55 FR 38646, Sept. 19, 1990; 55 FR 53100, Dec. 26, 1990]

§ 1717.306 RUS required rates.

(a) Upon the publication in the FEDERAL REGISTER of the notice of pre-emption of state regulatory authority as provided in this subpart, RUS will exercise exclusive jurisdiction over the rates of the borrower pursuant to the terms of the RUS documents. The borrower shall immediately establish rates with the approval of RUS that are sufficient to satisfy the requirements of the RUS wholesale power contract and other RUS documents described in § 1717.303 of this subpart. The borrower shall establish such rates notwithstanding provisions of state law, and rules, orders or other actions of state regulatory authorities, and notwithstanding any provision of the RUS documents referring to such laws, rules, orders or actions.

(b) So long as the state regulatory authority shall be pre-empted hereunder, RUS shall be considered the governmental regulatory body with jurisdiction over rates for the purposes of

Rural Utilities Service, USDA

§ 1717.350

the RUS documents and for the purposes of section 1129(a)(6) of the Bankruptcy Code of 1978, as amended (11 U.S.C. 1129(a)(6)).

(c) If a borrower, which is subject to exclusive RUS rate jurisdiction, shall fail to establish rates in accordance with terms of the RUS wholesale power contract and other RUS documents in a timely fashion, RUS may proceed to exercise any and all rights and remedies available pursuant under the RUS documents or otherwise.

(d) The jurisdiction of the state regulatory authority over the rates of the borrower shall continue to be pre-empted hereunder until the Administrator shall in writing approve the resumption of jurisdiction by the state regulatory authority and publish in the FEDERAL REGISTER a notice to such effect. The Administrator shall approve resumption only after determining that such jurisdiction shall be exercised in a manner consistent with Federal interests.

[55 FR 38646, Sept. 19, 1990; 55 FR 53100, Dec. 26, 1990]

§ 1717.307 Distribution members' rates.

A state regulatory authority which has been pre-empted as provided in this subpart may continue to exercise jurisdiction, pursuant to applicable provisions of state law, over all other business affairs of the power supply borrower and over the rates of its distribution members: Provided, however, that the state regulatory authority shall treat any RUS approved rate for the power supply borrower as fair and reasonable and shall not in any manner, directly or indirectly, prevent or impede the distribution member from recovering the costs of paying the RUS approved rates to the power supply borrower.

§ 1717.308 RUS approval of nonconforming rates.

Borrowers may request and RUS may approve rates which do not conform with the requirements of the RUS wholesale power contract and other RUS documents if RUS determines, in its sole discretion, that such approval is in the interests of RUS. If RUS approval is granted prior to pre-emption hereunder, and if the state regulatory

authority shall have approved such rates, then, so long as RUS's approval of the nonconforming rates remains in effect, the jurisdiction of the state regulatory authority over the rates of the borrower shall not be pre-empted hereunder.

§ 1717.309 Additional statutory pre-emption.

This subpart addresses pre-emption of state law and state regulatory authority in only those specific circumstances herein described. Nothing in this subpart waives, limits, or otherwise affects the explicit pre-emption or pre-emption, which is implicit and shall occur pursuant to the RE Act as a matter of law, of state law or action of a state regulatory authority where such state law or such action compromises Federal interests, including the ability of any borrower, including power supply borrowers, to repay loans made or guaranteed by RUS.

§§ 1717.310—1717.349 [Reserved]

Subpart H—Federal Pre-emption in Rate Making in Connection With RUS Electric Borrowers in Bankruptcy

SOURCE: 55 FR 38653, Sept. 19, 1990, unless otherwise noted.

§ 1717.350 Purpose.

This subpart contains regulations of the Rural Utilities Service (RUS) implementing provisions of section 4 of the RE Act (7 U.S.C. 904) which authorizes the Administrator to establish terms and conditions of loans, and provisions of the RUS documents which provide for the establishment of rates for electric service to be charged by RUS electric borrowers. This subpart contains the general regulations of RUS for the pre-emption of the regulation by a State Regulatory Authority under State law of an RUS borrower's rates and for the exercise by RUS, pursuant to the RUS documents, of exclusive jurisdiction over rates of a borrower by or against whom a case under the Bankruptcy Code of 1978, as amended, has commenced.

§ 1717.351

7 CFR Ch. XVII (1–1–97 Edition)

§ 1717.351 Policy.

(a) RUS makes and guarantees loans to borrowers to bring electric service to persons in rural areas. To accomplish this objective, RUS normally requires, as a condition to making or guaranteeing any loans to an electric borrower, that the borrower execute and deliver the RUS documents in the form prescribed by RUS. The RUS mortgage secures repayment of the loans made or guaranteed by RUS and other loans which, pursuant to the RE Act, RUS has permitted to be secured pursuant to the RUS mortgage. The Administrator relies upon the RUS mortgage together with other RUS documents to find and certify, as required by section 4 of the RE Act (7 U.S.C. 904), that the security for the loan is reasonably adequate and the loan will be repaid within the time agreed.

(b) RUS requires borrowers to take such actions as may be necessary to establish rates for electric service which are sufficient to pay the principal of and interest on the loans made or guaranteed by RUS in a timely manner and to meet the requirements of the RUS documents.

(c) With respect to borrowers whose rates are not regulated by a State Regulatory Authority, RUS requires that such borrowers establish rates and to obtain RUS approval of such rates as required by the RUS documents.

(d) To protect Federal interests, including without limitation the ability of the borrower to repay RUS loans, RUS's policy is to exercise, pursuant to the RUS documents, exclusive jurisdiction over the rates for electric service charged by a borrower by or against whom a case under the Bankruptcy Code of 1978, as amended, has commenced.

§ 1717.352 Definitions and rules of construction.

(a) *Definitions.* For the purpose of this subpart, the following terms shall have the following meanings:

Administrator means the Administrator of RUS.

Bankruptcy code of 1978, as amended, means the Bankruptcy Reform Act of 1978, as amended (11 U.S.C. 101 *et seq.*).

Borrower means any organization which has an outstanding loan made or guaranteed by RUS for rural electrification.

RE Act means Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

RUS documents means the RUS loan contract, RUS mortgage and, if the Borrower is engaged in the wholesale sale of electric power and energy to members pursuant to RUS Wholesale Power Contracts, the RUS Wholesale Power Contract.

RUS loan contract means the agreement, as amended, supplemented, or restated from time to time, between a borrower and RUS providing for loans made or guaranteed pursuant to the RE Act.

RUS mortgage means the mortgage and security agreement, as from time to time supplemented, amended and restated, made by and among the borrower, RUS, and, if a party thereto, third party lenders, or any other form of mortgage or security instrument or indenture of mortgage and deed of trust, securing the payment of outstanding loans made or guaranteed by RUS and other lenders.

RUS wholesale power contract means the contract for the wholesale sale of electric power and energy between a power supply borrower and its member as approved by RUS.

Secured loans shall mean outstanding loans secured pursuant to the RUS mortgage.

State regulatory authority means any state board or local governing body having jurisdiction under state law to

Rural Utilities Service, USDA

§1717.600

regulate, or in any way, approve the electric rates charged by a borrower.

(b) *Rules of construction.*

Unless the context shall otherwise indicate, the terms defined in §1717.352(a) hereof include the plural as well as the singular, and the singular as well as the plural. The words “herein,” and “hereunder”, and words of similar import, refer to this subpart as a whole. “Includes” and “including” are not limiting and “or” is not exclusive.

[55 FR 38653, Sept. 19, 1990, as amended at 59 FR 66440, Dec. 27, 1994]

§1717.353 Requirements of RUS documents.

Each borrower shall establish and adjust rates for electric service as set forth in the RUS documents to assure that the borrower will be able to make required payments on secured loans and to otherwise meet the terms of the RUS documents.

§1717.354 Pre-emption.

State Regulatory Authority jurisdiction over an RUS borrower's rates shall be pre-empted by the RE Act and RUS shall have exclusive jurisdiction over the borrower's rates:

(a) On October 19, 1990, with respect to any borrower by or against whom a case under the Bankruptcy Code of 1978, as amended, was commenced prior to and remains outstanding on October 19, 1990; and

(b) With respect to all other borrowers, upon the filing of a petition by or against the borrower commencing a case under the Bankruptcy Code of 1978, as amended.

§1717.355 RUS required rates.

(a) Upon the pre-emption of State Regulatory Authority as provided in this subpart, RUS will exercise exclusive jurisdiction over the rates of the borrower pursuant to the terms of the RUS documents.

(b) So long as the State Regulatory Authority shall be pre-empted hereunder, RUS shall be considered the governmental regulatory body with jurisdiction over rates for all purposes, including for the purposes of the RUS documents and for the purposes of section 1129(a)(6) of the Bankruptcy Code

of 1978, as amended (11 U.S.C. 1129(a)(6)).

(c) RUS shall, pursuant to the terms of the RUS documents, exercise exclusive jurisdiction over the rates of the borrower until the Administrator shall in writing approve the resumption of jurisdiction by the State Regulatory Authority. The Administrator shall approve resumption only after determining that such jurisdiction shall be exercised in a manner consistent with Federal interests.

§1717.356 Additional statutory pre-emption.

This subpart addresses pre-emption of State law and State Regulatory Authority upon the filing of a petition by or against the borrower commencing a case under the Bankruptcy Code of 1978, as amended. Nothing in this subpart waives, limits, or otherwise affects the explicit pre-emption or pre-emption, which is implicit and shall occur pursuant to the RE Act as a matter of law, of State law or action of a State Regulatory Authority where such State law or such action compromises Federal interests, including the ability of any borrower to repay loans made or guaranteed by RUS.

Subparts I—L [Reserved]

Subpart M—Operational Controls

SOURCE: 60 FR 67405, Dec. 29, 1995, unless otherwise noted.

§1717.600 General.

(a) *General.* The loan contract and mortgage between the Rural Utilities Service (RUS) and electric borrowers imposes certain restrictions and controls on the borrowers and gives RUS (and other co-mortgagees in the case of the mortgage) the right to approve or disapprove certain actions contemplated by the borrowers. Certain of these controls and approval rights are referred to informally as “operational controls” because they pertain to decisions or actions with respect to the operation of the borrowers' electric systems. The approval authority granted to RUS by the loan contract or mortgage regarding each decision or action subject to controls is often stated in

§ 1717.601

broad, unlimited terms. This subpart lists the main operational controls affecting borrowers and establishes for each area of control the circumstances under which RUS approval of a decision or action by a borrower is either required or not required. In some cases, only the general principles or general circumstances pertaining to RUS approval or control are presented in this subpart, while the details regarding the circumstances and requirements of RUS approval or control are set forth in other RUS regulations. Since this subpart addresses only the main operational controls, failure to address a control or approval right in this subpart in no way invalidates such controls or rights established by the loan contract, mortgage, other agreements between a borrower and RUS, and RUS regulations.

(b) *Case by case amendments.* Upon written notice to a borrower, RUS may amend or annul the approvals and exceptions to controls set forth in this subpart or other RUS regulations if the borrower is in violation of any provision of its loan documents or any other agreement with RUS, or if RUS determines that loan security and/or repayment is threatened. Such amendment or annulment will apply to decisions and actions of the borrower after said written notice has been provided by RUS.

(c) *Generic notices.* By written notice to all borrowers or a group of borrowers, RUS may grant or waive approval of decisions and actions by the borrowers that are controlled under the loan documents and RUS regulations. RUS may also by written notice withdraw or cut back its grant or waiver of approval of said decisions and actions made by previous written notice, but may not by such notice extend its authority to approve decisions and actions by borrowers beyond the authority granted by the loan documents and RUS regulations.

§ 1717.601 Applicability.

(a) The approvals and exceptions to controls conveyed by this subpart apply only to controls and approval rights normally included in RUS loan documents dated prior to January 29, 1996. They do not apply to special con-

7 CFR Ch. XVII (1–1–97 Edition)

trols and approval requirements included in loan documents or other agreements executed between a borrower and RUS that relate to individual problems or circumstances specific to an individual borrower.

(b) The approvals and exceptions to controls granted by RUS in this subpart shall not in any way affect the rights of other co-mortgagees under the mortgage or their loan contracts.

§ 1717.602 Definitions.

Terms used in this subpart that are not defined in this section have the meanings set forth in 7 CFR part 1710. In addition, for the purposes of this subpart:

Default means an event of default as defined in the borrower's loan documents or other agreement with RUS, and furthermore includes any event that has occurred and is continuing which, with notice or lapse of time and notice, would become an event of default.

Equity means the borrower's total margins and equities computed pursuant to RUS accounting requirements but excluding any regulatory created assets.

Financed or funded by RUS means financed or funded wholly or in part by a loan made or guaranteed by RUS, including concurrent supplemental loans required by 7 CFR 1710.110, loans to reimburse funds already expended by the borrower, and loans to replace interim financing.

Interchange agreement means a contractual arrangement that can include a variety of services utilities provide each other to increase reliability and efficiency, and to avoid duplicating expenses. Some examples are: transmission service (the use of transmission lines to move power and energy from one area to another); emergency service (an agreement by one utility to furnish another with power and energy to protect it in times of emergency, such as power plant outages); reserve sharing (contributions to a common pool of generating plant reserves so that each individual utility's reserves can be reduced); and economic exchanges (swapping power and energy from different plants to avoid running the most expensive units).

Interconnection agreement means a contract governing the terms for establishing or using one or more electrical connections between two or more electric systems permitting a flow of power and energy among the systems.

Loan documents means the mortgage (or other security instrument acceptable to RUS), the loan contract, and the promissory note entered into between the borrower and RUS.

Net utility plant means the amount constituting the total utility plant of the borrower, less depreciation, computed in accordance with RUS accounting requirements.

Pooling agreement means a contract among two or more interconnected electric systems to operate on a coordinated basis to achieve economies and/or enhance reliability in supplying their respective loads.

Power supply contract means any contract entered into by a borrower for the sale or purchase, at wholesale, of electric energy.

Regulatory created assets means the sum of any amounts properly recordable as unrecovered plant and regulatory study costs or as other regulatory assets, computed pursuant to RUS accounting requirements.

RUS accounting requirements means the system of accounts prescribed for electric borrowers by RUS regulations as such RUS accounting requirements exist at the date of applicability thereof.

RUS regulations mean regulations of general applicability published by RUS from time to time as they exist at the date of applicability thereof, and shall also include any regulations of other federal entities which RUS is required by law to implement.

Total assets means an amount constituting the total assets of the borrower as computed pursuant to RUS accounting requirements, but excluding any regulatory created assets.

Wheeling agreement means a contract providing for the use of the electric transmission facilities of one electric utility to transmit power and energy of another electric utility or other entity to a third party. Such transmission may be accomplished directly or by displacement.

§ 1717.603 RUS approval of extensions and additions.

(a) *Distribution borrowers.* Prior written approval by RUS is required for a distribution borrower to extend or add to its electric system if the extension or addition will be financed by RUS. For extensions and additions that will not be financed by RUS, approval is hereby given to distribution borrowers to make such extensions and additions to their electric systems, including the use of (or commitment to use) general funds of the borrower, except for the following:

(1) Construction, procurement, or leasing of generating facilities if the combined capacity of the facilities to be built, procured, or leased, including any future facilities included in the planned project, will exceed the lesser of 5 megawatts or 30 percent of the borrower's equity;

(2) Acquisition or leasing of existing electric facilities or systems in service whose purchase price, or capitalized value in the case of a lease, exceeds 10 percent of the borrower's net utility plant; and

(3) Construction, procurement, or leasing of electric facilities to serve a customer whose annual kWh purchases or maximum annual kW demand in the foreseeable future is projected to exceed 25 percent of the borrower's total kWh sales or maximum kW demand in the year immediately preceding the acquisition or start of construction.

(b) *Power supply borrowers.* Prior written approval by RUS is required for a power supply borrower to extend or add to its electric system if the extension or addition will be financed by RUS. Requirements for RUS approval of extensions and additions that will not be financed by RUS are set forth in other RUS regulations.

(c) *Additional details.* Additional details relating to RUS approval of extensions and additions of a borrower's electric system financed by RUS are set forth in other RUS regulations, e.g., in 7 CFR parts 1710 and 1726.

§ 1717.604 Long-range engineering plans and construction work plans.

(a) All borrowers are required to maintain up-to-date long-range engineering plans and construction work

§ 1717.605

plans (CWPs) in form and substance as set forth in 7 CFR part 1710, subpart F.

(b) Applications for financing from RUS must be supported by a long-range engineering plan and CWP approved by RUS.

(c) RUS approval is not required for long-range engineering plans and CWPs if the borrower does not intend to seek RUS financing for any of the facilities, equipment or other purposes included in those plans. However, if requested by RUS, a borrower must provide an informational copy of such plans to RUS.

§ 1717.605 Design standards, plans and specifications, construction standards, and RUS accepted materials.

All borrowers, regardless of the source of funding, are required to comply with applicable RUS requirements with respect to system design, construction standards, and the use of RUS accepted materials. Borrowers must comply with applicable RUS requirements with respect to plans and specifications only if the construction or procurement will be financed by RUS. These requirements are set forth in other RUS regulations, especially in 7 CFR parts 1724 and 1728.

§ 1717.606 Standard forms of construction contracts, and engineering and architectural services contracts.

All borrowers are encouraged to use the standard forms of contracts promulgated by RUS for construction, materials, equipment, engineering services, and architectural services, regardless of the source of funding for such construction and services. Borrowers are required to use these standard forms of contracts only if the construction, procurement or services are financed by RUS, and only to the extent required by RUS regulations. RUS requirements with respect to such standard forms of contract are set forth in 7 CFR part 1724 for architectural and engineering services, and in 7 CFR part 1726 for construction, materials, and equipment.

§ 1717.607 Contract bidding requirements.

Borrowers must follow RUS requirements regarding bidding for contracts for construction, materials, and equip-

ment only if financing of the construction or procurement will be provided by RUS. These requirements are set forth in 7 CFR part 1726.

§ 1717.608 RUS approval of contracts.

(a) *Construction contracts and architectural and engineering contracts.* RUS approval of contracts for construction and procurement and for architectural and engineering services is required only when such construction, procurement or services are financed by RUS. Detailed requirements regarding RUS approval of such contracts are set forth in 7 CFR part 1724 for architectural and engineering services, and in 7 CFR part 1726 for construction and procurement.

(b) *Large retail power contracts.* RUS approval of contracts to sell electric power to retail customers is required only if the contract is for longer than 2 years and the kWh sales or kW demand for any year covered by the contract exceeds 25 percent of the borrower's total kWh sales or maximum kW demand for the year immediately preceding execution of the contract. This requirement applies regardless of the source of funding of any plant extensions, additions or improvements that may be involved in connection with the contract.

(c) *Power supply arrangements.* (1) Power supply contracts (including but not limited to economy energy sales and emergency power and energy sales), interconnection agreements, interchange agreements, wheeling agreements, pooling agreements, and any other similar power supply arrangements subject to approval by RUS are deemed approved if they have a term of 2 years or less. Amendments to said power supply arrangements are also deemed approved provided that the amendment does not extend the term of the arrangement for more than 2 years beyond the date of the amendment.

(2) Any amendment to a schedule or exhibit contained in any power supply arrangement subject to RUS approval, which merely has the effect of either altering a list of interconnection or delivery points or changing the value of a variable term (but not the formula itself) contained in a formula rate or charge is deemed approved.

Rural Utilities Service, USDA

§1717.615

(3) The provisions of this paragraph (c) apply regardless of whether the borrower is a seller or purchaser of the services furnished by the contracts or arrangements, and regardless of whether or not a Federal power marketing agency is a party to any of them.

(d) *System management and maintenance contracts.* RUS approval of contracts for the management and operation of a borrower's electric system or for the maintenance of the electric system is required only if such contracts cover all or substantially all of the electric system.

(e) *Other contracts.* [Reserved]

§1717.609 RUS approval of general manager.

(a) If a borrower's mortgage or loan contract grants RUS the unconditioned right to approve the employment and/or the employment contract of the general manager of the borrower's system, such approval is hereby granted provided that the borrower is in compliance with all provisions of its loan documents and any other agreements with RUS.

(b) If a borrower is in default with respect to any provision of its loan documents or any other agreement with RUS:

(1) Such borrower, if directed in writing by RUS, shall replace its general manager within 30 days after the date of such written notice; and

(2) Such borrower shall not hire a general manager without prior written approval by RUS.

§1717.610 RUS approval of compensation of the board of directors.

If a borrower's mortgage or loan contract requires the borrower to obtain approval from RUS for compensation provided to members of the borrower's board of directors, such requirement is hereby waived.

§1717.611 RUS approval of expenditures for legal, accounting, engineering, and supervisory services.

(a) If a borrower's mortgage or loan contract requires the borrower to obtain approval from RUS before incurring expenses for legal, accounting, supervisory (other than for the management and operation of the borrower's

electric system, see §1717.608(d)), or other similar services, such approval is hereby granted. However, while expenditures for accounting do not require RUS approval, the selection of a certified public accountant by the borrower to prepare audited reports required by RUS remains subject to RUS approval.

(b) If a borrower's mortgage or loan contract requires the borrower to obtain approval from RUS before incurring expenses for engineering services, such approval is hereby granted if such services will not be financed by RUS. Approval requirements with respect to engineering services financed by RUS are set forth in other RUS regulations.

§1717.612 RUS approval of borrower's bank or other depository.

If a borrower's mortgage or loan contract gives RUS the authority to approve the bank or other depositories used by the borrower, such approval is hereby granted. However, without the prior written approval of RUS, a borrower shall not deposit funds from loans made or guaranteed by RUS in any bank or other depository that is not insured by the Federal Deposit Insurance Corporation or other Federal agency acceptable to RUS, or in any account not so insured.

§1717.613 RUS approval of data processing and system control equipment.

If a borrower's mortgage or loan contract requires the borrower to obtain approval from RUS before purchasing data processing equipment or system control equipment, such approval is hereby granted if the equipment will not be financed by RUS.

§1717.614 Notification of rate changes.

If a distribution borrower is required by its loan documents to notify RUS in writing of proposed changes in electric rates more than 30 days prior to the effective date of such rates, the required notification period shall be 30 days. Moreover, such notification shall be required only upon the request of RUS.

§1717.615 Consolidations and mergers.

A distribution or power supply borrower may without the prior approval

§ 1717.616

of RUS, consolidate or merge with any other corporation or convey or transfer the mortgaged property substantially as an entirety if the following conditions are met:

(a) Such consolidation, merger, conveyance or transfer shall be on such terms as shall fully preserve the lien and security of the RUS mortgage and the rights and powers of the mortgagees;

(b) The entity formed by such consolidation or with which the borrower is merged or the corporation which acquires by conveyance or transfer the mortgaged property substantially as an entirety shall execute and deliver to the mortgagees a mortgage supplemental in recordable form and containing an assumption by such successor entity of the due and punctual payment of the principal of and interest on all of the outstanding notes and the performance and observance of every covenant and condition of the mortgage;

(c) Immediately after giving effect to such transaction, no default under the mortgage shall have occurred and be continuing;

(d) The borrower shall have delivered to the mortgagees a certificate of its general manager or other officer, in form and substance satisfactory to each of the mortgagees, which shall state that such consolidation, merger, conveyance or transfer and such supplemental mortgage comply with this section and that all conditions precedent herein provided for relating to such transaction have been complied with;

(e) The borrower shall have delivered to the mortgagees an opinion of counsel in form and substance satisfactory to each of the mortgagees; and

(f) The entity formed by such consolidation or with which the borrower is merged or the corporation which acquires by conveyance or transfer the mortgaged property substantially as an entirety shall be an entity having:

(1) Equity equal to at least 27% of its total assets on a pro forma basis after giving effect to such transaction;

(2) A pro forma TIER of not less than 1.50 and a pro forma DSC of not less than 1.25 for each of the two preceding calendar years; and

7 CFR Ch. XVII (1-1-97 Edition)

(3) Net utility plant equal to or greater than 1.0 times its total long-term debt on a pro forma basis.

§ 1717.616 Sale, lease, or transfer of capital assets.

A distribution borrower may without the prior approval of RUS sell, lease, or transfer any capital asset if the following conditions are met:

(a) The borrower is not in default;

(b) In the most recent year for which data are available, the borrower achieved a TIER of at least 1.5, DSC of at least 1.25, OTIER of at least 1.1, and ODSC of at least 1.1, in each case based on the average or the best 2 out of the 3 most recent years;

(c) The sale, lease, or transfer of assets will not reduce the borrower's existing or future requirements for energy or capacity being furnished to the borrower under any wholesale power contract which has been pledged as security to the government;

(d) Fair market value is obtained for the assets;

(e) The aggregate value of assets sold, leased, or transferred in any 12-month period is less than 10 percent of the borrower's net utility plant prior to the transaction;

(f) The proceeds of such sale, lease, or transfer, less ordinary and reasonable expenses incident to such transaction, are immediately:

(1) Applied as a prepayment of all notes secured under the mortgage equally and ratably;

(2) In the case of dispositions of equipment, materials or scrap, applied to the purchase of other property useful in the borrower's utility business; or

(3) Applied to the acquisition of construction of utility plant.

§ 1717.617 Limitations on distributions.

If a distribution or power supply borrower is required by its loan documents to obtain prior approval from RUS before declaring or paying any dividends, paying or determining to pay any patronage refunds, or retiring any patronage capital, or making any other cash distributions, such approval is hereby given if the following conditions are met:

Rural Utilities Service, USDA

§ 1717.652

(a) After giving effect to the distribution, the borrower's equity will be greater than or equal to 30 percent of its total assets;

(b) The borrower is current on all payments due on all notes secured under the mortgage;

(c) The borrower is not otherwise in default under its loan documents; and

(d) After giving effect to the distribution, the borrower's current and accrued assets will be not less than its current and accrued liabilities.

Subpart N—Investments, Loans, and Guarantees by Electric Borrowers

AUTHORITY: 7 U.S.C. 901–950b; Pub.L. 103–354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*); Title I, Subtitle D, Pub.L. 100–203, 101 Stat. 1330.

SOURCE: 60 FR 48877, Sept. 21, 1995, unless otherwise noted.

§ 1717.650 Purpose.

This subpart sets forth general regulations for implementing and interpreting provisions of the RUS mortgage and loan contract regarding investments, loans, and guarantees made by electric borrowers, as well as the provisions of the Rural Electrification Act of 1936, as amended, including section 312 (7 U.S.C. 901 *et seq.*) (RE Act), permitting, in certain circumstances, that electric borrowers under the RE Act may, without restriction or prior approval of the Administrator of the Rural Utilities Service (RUS), invest their own funds and make loans or guarantees.

§ 1717.651 General.

(a) *Policy.* RUS electric borrowers are encouraged to utilize their own funds to participate in the economic development of rural areas, provided that such activity does not in any way put government funds at risk or impair a borrower's ability to repay its indebtedness to RUS and other lenders. In considering whether to make loans, investments, or guarantees, borrowers are expected to act in accordance with prudent business practices and in conformity with the laws of the jurisdictions in which they serve. RUS assumes that borrowers will use the latitude afforded

them by section 312 of the RE Act primarily to make needed investments in rural community infrastructure projects (such as water and waste systems, garbage collection services, etc.) and in job creation activities (such as providing technical, financial, and managerial assistance) and other activities to promote business development and economic diversification in rural communities. Nonetheless, RUS believes that borrowers should continue to give primary consideration to safety and liquidity in the management of their funds.

(b) *Applicability of this subpart.* This subpart applies to all distribution and power supply borrowers regardless of when their loan contract or mortgage was executed.

§ 1717.652 Definitions.

As used in this subpart:

Borrower means any organization that has an outstanding loan made or guaranteed by RUS for rural electrification.

Cash-construction fund-trustee account means the account described in the Uniform System of Accounts as one to which funds are deposited for financing the construction or purchase of electric facilities.

Distribution borrower means a Distribution Borrower as defined in 7 CFR 1710.2.

Electric system means all of the borrower's interests in all electric production, transmission, distribution, conservation, load management, general plant and other related facilities, equipment or property and in any mine, well, pipeline, plant, structure or other facility for the development, production, manufacture, storage, fabrication or processing of fossil, nuclear, or other fuel or in any facility or rights with respect to the supply of water, in each case for use, in whole or in major part, in any of the borrower's generating plants, including any interest or participation of the borrower in any such facilities or any rights to the output or capacity thereof, together with all lands, easements, rights-of-way, other works, property, structures, contract rights and other tangible and intangible assets of the borrower in each

case used or useful in such electric system.

Equity means the Margins and Equities of the borrower as defined in the Uniform System of Accounts, less regulatory created assets.

Guarantee means to undertake collaterally to answer for the payment of another's debt or the performance of another's duty, liability, or obligation, including, without limitation, the obligations of subsidiaries. Some examples of such guarantees include guarantees of payment or collection on a note or other debt instrument (assuring returns on investments); issuing performance bonds or completion bonds; or co-signing leases or other obligations of third parties.

Invest means to commit money in order to earn a financial return on assets, including, without limitation, all investments properly recorded on the borrower's books and records in investment accounts as those accounts are used in the Uniform System of Accounts for RUS Borrowers. Borrowers may submit any proposed transaction to RUS for an interpretation of whether the action is an investment for the purposes of this definition.

Make loans means to lend out money for temporary use on condition of repayment, usually with interest.

Mortgaged property means any asset of the borrower which is pledged in the RUS mortgage.

Natural gas distribution system means any system of community infrastructure that distributes natural gas and whose services are available by design to all or a substantial portion of the members of the community.

Operating DSC means Operating Debt Service Coverage (ODSC) of the borrower's electric system calculated as:

$$\text{ODSC} = \frac{A+B+C}{D}$$

where:

All amounts are for the same year and are based on the RUS system of accounts;

A=Depreciation and Amortization Expense of the electric system;

B=Interest on Long-term Debt of the electric system, except that Interest on Long-term Debt shall be increased by $\frac{1}{3}$ of the amount, if any, by which the rentals of Restricted Property of the electric system exceed 2 percent of Total Margins and Equities;

C=Patronage Capital & Operating Margins of the electric system (distribution borrowers) or Operating Margins of the electric system (power supply borrowers); and

D=Debt Service Billed (RUS + other) which equals all interest and principal billed or billable during the calendar year for long-term debt of the electric system plus $\frac{1}{3}$ of the amount, if any, by which the rentals of Restricted Property of the electric system exceed 2 percent of Total Margins and Equities. Unless otherwise indicated, all terms used in defining ODSC and OTIER are as defined in RUS Bulletin 1717B-2 Instructions for the Preparation of the Financial and Statistical Report for Electric Distribution Borrowers, and RUS Bulletin 1717B-3 Instructions for the Preparation of the Operating Report for Power Supply Borrowers and for Distribution Borrowers with Generating Facilities, or the successors to these bulletins.

Operating TIER means Operating Times Interest Earned Ratio (OTIER) of the borrower's electric system calculated as:

$$\text{OTIER} = \frac{A+B}{A}$$

where:

All amounts are for the same year and are based on the RUS system of accounts;

A=Interest on Long-term Debt of the electric system, except that Interest on Long-term Debt shall be increased by $\frac{1}{3}$ of the amount, if any, by which the rentals of Restricted Property of the electric system exceed 2 percent of Total Margins and Equities; and

B=Patronage Capital & Operating Margins of the electric system (distribution borrowers) or Operating Margins of the electric system (power supply borrowers).

Own funds means money belonging to the borrower other than funds on deposit in the cash-construction fund-trustee account.

Power supply borrower means a Power Supply Borrower as defined in 7 CFR 1710.2.

Regulatory created assets means the sum of the amounts properly recordable in Account 182.2 Unrecovered Plant and Regulatory Study Costs, and

Rural Utilities Service, USDA

§1717.654

Account 182.3 Other Regulatory Assets of the Uniform System of Accounts.

RUS means the Rural Utilities Service, an agency of the U.S. Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178, 7 U.S.C. 6941 et seq.) and, for purposes of this subpart, includes its predecessor, the Rural Electrification Administration.

RUS loan contract means the loan contract between the borrower and RUS.

RUS mortgage means any and all instruments creating a lien on or security interest in the borrower's assets in connection with loans or guarantees under the RE Act.

Solid waste disposal system means any system of community infrastructure that provides collection and/or disposal of solid waste and whose services are available by design to all or a substantial portion of the members of the community.

Subsidiary means a company which is controlled by the borrower through ownership of voting stock, and is further defined in 7 CFR 1767.10.

Supplemental lender means a lender that has provided a supplemental source of financing that is secured by the RUS mortgage.

Telecommunication and other electronic communication system means any community infrastructure that provides telecommunication or other electronic communication services and whose services are available by design to all or a substantial portion of the members of the community.

Total assets means the total assets of the borrower as calculated according to the Uniform System of Accounts, less regulatory created assets.

Total utility plant means the sum of the borrower's Electric Plant Accounts and Construction Work in Progress—Electric Accounts, as such terms are used in the Uniform System of Accounts.

Uniform System of Accounts means the system of accounts prescribed for RUS borrowers in 7 CFR part 1767.

Water and waste disposal system means any system of community infrastructure that supplies water and/or collects

and treats waste water and whose services are available by design to all or a substantial portion of the members of the community.

§1717.653 Borrowers in default.

Any borrower not in compliance with all provisions of its mortgage, loan contract, or any other agreements with RUS must, unless the borrower's mortgage, loan contract, or other agreement with RUS specifically provides otherwise with respect to such a borrower:

(a) Obtain prior written approval from the Administrator to invest its own funds or to make loans or guarantees regardless of the aggregate amount of such investments, loans, or guarantees; and

(b) If requested by the Administrator, restructure or reduce the amount of its investments, loans, and guarantees to a level determined by the Administrator, in his or her sole discretion, to be in the financial interest of the government with respect to loan security and/or repayment. If the borrower does not so restructure or reduce its portfolio within a reasonable period of time determined by the Administrator, which shall not exceed 12 months from the date the borrower was notified of the required action, then, upon written notice from RUS, the borrower shall be in default of its RUS loan contract and mortgage.

§1717.654 Transactions below the 15 percent level.

(a) A borrower in compliance with all provisions of its RUS mortgage, RUS loan contract, and any other agreements with RUS may, without prior written approval of the Administrator, invest its own funds or make loans or guarantees not in excess of 15 percent of its total utility plant without regard to any provision contained in any RUS mortgage or RUS loan contract to the effect that the borrower must obtain prior approval from RUS, provided, however, that the borrower may not, without the prior written approval of the Administrator, make such investments, loans, and guarantees to extend, add to, or modify its electric system. Moreover, funds necessary to make timely payments of principal and

§ 1717.655

interest on loans secured by the RUS mortgage remain subject to RUS controls on borrower investments, loans and guarantees.

(b) RUS will not consider requests from borrowers to exclude investments, loans, or guarantees made below the 15 percent level. (Categorical exclusions are set forth in § 1717.655.)

§ 1717.655 Exclusion of certain investments, loans, and guarantees.

(a) In calculating the amount of investments, loans and guarantees permitted under this subpart, there is excluded from the computation any investment, loan or guarantee of the type which by the terms of the borrower's RUS mortgage or RUS loan contract the borrower may make in unlimited amounts without RUS approval.

(b) Furthermore, the borrower may make unlimited investments, without prior approval of the Administrator, in:

(1) Securities or deposits issued, guaranteed or fully insured as to payment by the United States Government or any agency thereof;

(2) Capital term certificates, bank stock, or other similar securities of the supplemental lender which have been purchased as a condition of membership in the supplemental lender, or as a condition of receiving financial assistance from such lender, as well as any other investment made in, or loans made to, the National Rural Utilities Cooperative Finance Corporation, the Saint Paul Bank for Cooperatives, and CoBank, ACB;

(3) Patronage capital allocated from an electric power supply cooperative of which the borrower is a member; and

(4) Patronage capital allocated from an electric distribution cooperative to a power supply borrower.

(c) Without prior approval of the Administrator, the borrower may also:

(1) Invest or lend funds derived directly from:

(i) Grants which the borrower is not obligated to repay, regardless of the source or purpose of the grant; and

(ii) Loans received from or guaranteed by any Federal, State or local government program designed to promote rural economic development, provided that the borrower uses the loan proceeds for such purpose;

(2) Make loans guaranteed by an agency of USDA, up to the amount of principal whose repayment, with interest, is fully guaranteed; and

(3) (i) Make unlimited investments in and unlimited loans to finance the following community infrastructure that serves primarily consumers located in rural areas as defined in 7 CFR 1710.2, and guarantee debt issued for the construction or acquisition of such infrastructure, up to an aggregate amount of such guarantees not to exceed 20 percent of the borrower's equity:

(A) Water and waste disposal systems;

(B) Solid waste disposal systems;

(C) Telecommunication and other electronic communication systems; and

(D) Natural gas distribution systems.

(ii) In each of the four cases in paragraph (c)(3)(i) of this section, if the system is a component of a larger organization other than the borrower itself (e.g., if it is a component of a subsidiary of the borrower or a corporation independent of the borrower), to be eligible for the exemption the borrower must certify annually that a majority of the gross revenues of the larger organization during the most recent fiscal year came from customers of said system who were located in a rural area.

(d) Also excluded from the calculation of investments, loans and guarantees made by the borrower are:

(1) Amounts properly recordable in Account 142 Customer Accounts Receivable, and Account 143 Other Accounts Receivable;

(2) Any investment, loan, or guarantee that the borrower is required to make by an agency of USDA, for example, as a condition of obtaining financial assistance for itself or any other person or organization;

(3) Investments included in an irrevocable trust for the purpose of funding post-retirement benefits of the borrower's employees;

(4) Reserves required by a reserve bond agreement or other agreement legally binding on the borrower, that are dedicated to making required payments on debt secured under the RUS mortgage, not to exceed the amount of

7 CFR Ch. XVII (1–1–97 Edition)

reserves specifically required by such agreements; and

(5) Investments included in an irrevocable trust approved by RUS and dedicated to the payment of decommissioning costs of nuclear facilities of the borrower.

(e) Grandfathered exclusions. All amounts of individual investments, loans, and guarantees excluded by RUS as of February 16, 1995 shall remain excluded. Such exclusions must have been based on the RUS mortgage, RUS loan contract, regulations, bulletins, memoranda, or other written notice from RUS. Profits, interest, and other returns earned (regardless of whether or not they are reinvested) on such investments, loans and guarantees after February 16, 1995 shall be excluded only if they are eligible for exclusion under paragraphs (a) through (d) of this section. Any new commitments of money to such investments, loans and guarantees shall likewise be excluded only if they are eligible under paragraphs (a) through (d) of this section.

(f) Any investment, loan or guarantee made by a borrower that is not excluded under this section or under §1717.657(d) shall be included in the aggregate amount of investments, loans and guarantees made by the borrower, regardless of whether RUS has specifically approved the investment, loan or guarantee under §1717.657(c), or has approved a related transaction (e.g., a lien accommodation).

§1717.656 Exemption of certain borrowers from controls.

(a) Any distribution or power supply borrower that meets all of the following criteria is exempted from the provisions of the RUS mortgage and loan contract that require RUS approval of investments, loans, and guarantees, except investments, loans, and guarantees made to extend, add to, or modify the borrower's electric system:

(1) The borrower is in compliance with all provisions of its RUS mortgage, RUS loan contract, and any other agreements with RUS;

(2) The average revenue per kWh for residential service received by the borrower during the two most recent calendar years does not exceed 130 percent of the average revenue per kWh for res-

idential service during the same period for all residential consumers located in the state or states served by the borrower. This criterion applies only to distribution borrowers and does not apply to power supply borrowers. If a borrower serves customers in more than one state, the state average revenue per kWh will be based on a weighted average using the kWh sales by the borrower in each state as the weight. The calculation will be based on the two most recent calendar years for which both borrower and state-wide data are available. If a borrower fails to qualify for an exemption based solely on its failure to meet this criterion on rate disparity, at the borrower's request the Administrator may, at his or her sole discretion, exempt the borrower if he or she finds that the borrower's strengths with respect to the other criteria are sufficient to offset any weakness due to rate disparity;

(3) In the most recent calendar year for which data are available, the borrower achieved an operating TIER of at least 1.0 and an operating DSC of at least 1.0, in each case based on the average of the two highest ratios achieved in the three most recent calendar years;

(4) The borrower's ratio of net utility plant to long-term debt is at least 1.1, based on year-end data for the most recent calendar year for which data are available; and

(5) The borrower's equity is equal to at least 27 percent of its total assets, based on year-end data for the most recent calendar year for which data are available.

(b) While borrowers meeting the criteria in paragraph (a) of this section are exempt from RUS approval of investments, loans and guarantees, they are nevertheless subject to the record-keeping, reporting, and other requirements of §1717.658.

(c) Any borrower exempt under paragraph (a) of this section that ceases to meet the criteria for exemption shall, upon written notice from RUS, no longer be exempt and shall be subject to the provisions of this subpart applicable to non-exempt borrowers. A borrower may regain its exemption if it subsequently meets the criteria in

§ 1717.657

paragraph (a) of this section, and is so notified in writing by RUS.

(d)(1) A borrower that loses its exemption and is not in compliance with all provisions of its mortgage, loan contract, or any other agreement with RUS may be required to restructure or reduce its portfolio of investments, loans and guarantees as provided in § 1717.653(b). If the borrower's portfolio exceeds the 15 percent level, the borrower will be required to restructure or reduce its portfolio to the 15 percent level or below. For example, if the borrower's mortgage or loan contract has an approval threshold, the borrower may be required to reduce its portfolio to that level, which in many cases is 3 percent of total utility plant.

(2) A borrower that loses its exemption but is in compliance with all provisions of its mortgage, loan contract, and any other agreements with RUS will be required, if its investments, loans and guarantees exceed the 15 percent level, to restructure or reduce its portfolio to the 15 percent level, unless the Administrator, in his or her sole discretion, determines that such action would not be in the financial interest of the government with respect to loan security and/or repayment. (Such borrower is eligible to ask RUS to exclude a portion of its investments under the conditions set forth in § 1717.657(d).)

(3) If a borrower required to reduce or restructure its portfolio does not fully comply within a reasonable period of time determined by the Administrator, which shall not exceed 12 months from the date the borrower was notified of its loss of exemption, then, upon written notice from RUS, the borrower shall be in default of its RUS loan contract and/or RUS mortgage.

(e) By no later than July 1 of each year, RUS will provide written notice to any borrowers whose exemption status has changed as a result of more recent data being available for the qualification criteria set forth in paragraph (a) of this section, or as a result of other reasons, such as corrections in the available data. An explanation of the reasons for any changes in exemption status will also be provided to the borrowers affected.

7 CFR Ch. XVII (1–1–97 Edition)

§ 1717.657 Investments above the 15 percent level by certain borrowers not exempt under § 1717.656(a).

(a) *General.* (1) This section applies only to borrowers that are in compliance with all provisions of their mortgage, loan contract, and any other agreements with RUS and that do not qualify for an exemption from RUS investment controls under § 1717.656(a).

(2) Nothing in this section shall in any way affect the Administrator's authority to exercise approval rights over investments, loans, and guarantees made by a borrower that is not in compliance with all provisions of its mortgage, loan contract and any other agreements with RUS.

(b) *Distribution borrowers.* Distribution borrowers not exempt from RUS investment controls under § 1717.656(a) may not make investments, loans and guarantees in an aggregate amount in excess of 15 percent of total utility plant. Above the 15 percent level, such borrowers will be restricted to excluded investments, loans and guarantees as defined in § 1717.655. (However, they are eligible to ask RUS to exclude a portion of their investments under the conditions set forth in paragraph (d) of this section.)

(c) *Power supply borrowers.* (1) Power supply borrowers not exempt from RUS investment controls under § 1717.656(a) may request approval to exceed the 15 percent level if all of the following criteria are met:

(i) Satisfactory evidence has been provided that the borrower is in compliance with all provisions of its RUS mortgage, RUS loan contract, and any other agreements with RUS;

(ii) The borrower is not in financial workout and has not had its government debt restructured;

(iii) The borrower has equity equal to at least 5 percent of its total assets; and

(iv) After approval of the investment, loan or guarantee, the aggregate of the borrower's investments, loans and guarantees will not exceed 20 percent of the borrower's total utility plant.

(2) Borrower requests for approval to exceed the 15 percent level will be considered on a case by case basis. The requests must be made in writing.

(3) In considering borrower requests, the Administrator will take the following factors into consideration:

(i) The repayment of all loans secured under the RUS mortgage will continue to be assured, and loan security must continue to be reasonably adequate, even if the entire investment or loan is lost or the borrower is required to perform for the entire amount of the guarantee. These risks will be considered along with all other risks facing the borrower, whether or not related to the investment, loan or guarantee;

(ii) In the case of investments, the investment must be made in an entity separate from the borrower, such as a subsidiary, whereby the borrower is protected from any liabilities incurred by the separate entity, unless the borrower demonstrates to the satisfaction of the Administrator that making the investment directly rather than through a separate entity will present no substantial risk to the borrower in addition to the possibility of losing all or part of the original investment;

(iii) The borrower must be economically and financially sound as indicated by its costs of operation, competitiveness, operating TIER and operating DSC, physical condition of the plant, ratio of equity to total assets, ratio of net utility plant to long-term debt, and other factors; and

(iv) Other factors affecting the security and repayment of government debt, as determined by the Administrator on a case by case basis.

(4) If the Administrator approves an investment, loan or guarantee, such investment, loan or guarantee will continue to be included when calculating the borrower's ratio of aggregate investments, loans and guarantees to total utility plant.

(d) *Distribution and power supply borrowers.* If the aggregate of the investments, loans and guarantees of a distribution or power supply borrower exceeds 15 percent of the borrower's total utility plant as a result of the cumulative profits or margins, net of losses, earned on said transactions over the past 10 calendar years (i.e., the sum of all profits earned during the 10 years on all transactions—including interest earned on cash accounts, loans, and

similar transactions—less the sum of all losses experienced on all transactions during the 10 years) then:

(1) The borrower will not be in default of the RUS loan contract or RUS mortgage with respect to required approval of investments, loans and guarantees, provided that the borrower had not made additional net investments, loans or guarantees without approval after reaching the 15 percent level; and

(2) At the request of the borrower, the Administrator in his or her sole discretion may decide to exclude up to the amount of net profits or margins earned on the borrower's investments, loans and guarantees during the past 10 calendar years, if the Administrator determines that such exclusion will not increase loan security risks. The borrower must provide documentation satisfactory to the Administrator as to the current status of its investments, loans and guarantees and the net profits earned during the past 10 years. Any exclusion approved by the Administrator may or may not reduce the level of investments, loans and guarantees to or below the 15 percent level. If such exclusion does not reduce the level to or below the 15 percent level, RUS will notify the borrower in writing that it must reduce or restructure its investments, loans and guarantees to a level of not more than 15 percent of total utility plant. If the borrower does not come within the 15 percent level within a reasonable period of time determined by the Administrator, which shall not exceed 12 months from the date the borrower was notified of the required action, then, upon written notice from RUS, the borrower shall be in default of its RUS loan contract and mortgage.

§1717.658 Records, reports and audits.

(a) Every borrower shall maintain accurate records concerning all investments, loans and guarantees made by it. Such records shall be kept in a manner that will enable RUS to readily determine:

(1) The nature and source of all income, expenses and losses generated from the borrower's loans, guarantees and investments;

§ 1717.659

7 CFR Ch. XVII (1–1–97 Edition)

(2) The location, identity and lien priority of any loan collateral resulting from activities permitted by this subpart; and

(3) The effects, if any, which such activities may have on the feasibility of loans made, guaranteed or lien accommodated by RUS.

(b) In determining the aggregate amount of investments, loans and guarantees made by a borrower, the borrower shall use the recorded value of each investment, loan or guarantee as reflected on its books and records for the next preceding end-of-month, except for the end-of-year report which shall be based on December 31 information. Every borrower shall also report annually to RUS, in the manner and on the form specified by the Administrator, the current status of each investment, outstanding loan and outstanding guarantee which it has made pursuant to this subpart.

(c) The records of borrowers shall be subject to the auditing procedures prescribed in part 1773 of this chapter. RUS reserves the right to review the financial records of any subsidiaries of the borrower to determine if the borrower is in compliance with this subpart, and to ascertain if the debts, guarantees (as defined in this subpart), or other obligations of the subsidiaries could adversely affect the ability of the borrower to repay its debts to the Government.

(d) RUS will monitor borrower compliance with this subpart based primarily on the annual financial and statistical report submitted by the borrower to RUS and the annual auditor's report on the borrower's operations. However, RUS may inspect the borrower's records at any time during the year to determine borrower compliance. If a borrower's most recent annual financial and statistical report shows the aggregate of the borrower's investments, loans and guarantees to be below the 15 percent level, that in no way relieves the borrower of its obligation to comply with its RUS mortgage, RUS loan contract, and this sub-

part with respect to Administrator approval of any additional investment, loan or guarantee that would cause the aggregate to exceed the 15 percent level.

§ 1717.659 Effect of this subpart on RUS loan contract and mortgage.

(a) Nothing in this subpart shall affect any provision, covenant, or requirement in the RUS mortgage, RUS loan contract, or any other agreement between a borrower and RUS with respect to any matter other than the prior approval by RUS of investments, loans, and guarantees by the borrower, such matters including, without limitation, extensions, additions, and modifications of the borrower's electric system. Also, nothing in this subpart shall affect any rights which supplemental lenders have under the RUS mortgage, or under their loan contracts or other agreements with their borrowers, to limit investments, loans and guarantees by their borrowers to levels below 15 percent of total utility plant.

(b) RUS will require that any electric loan made or guaranteed by RUS after October 23, 1995 shall be subject to a provision in the loan contract or mortgage restricting investments, loans and guarantees by the borrower substantially as follows: The borrower shall not make any loan or advance to, or make any investment in, or purchase or make any commitment to purchase any stock, bonds, notes or other securities of, or guaranty, assume or otherwise become obligated or liable with respect to the obligations of, any other person, firm or corporation, except as permitted by the RE Act and RUS regulations.

(c) RUS reserves the right to change the provisions of the RUS mortgage and loan contract relating to RUS approval of investments, loans and guarantees made by the borrower, on a case-by-case basis, in connection with providing additional financial assistance to a borrower after October 23, 1995.

Rural Utilities Service, USDA

§1717.850

Subpart O—[Reserved]

§§ 1717.700—1717.749 [Reserved]

Subpart P—[Reserved]

§§ 1717.750—1717.799 [Reserved]

Subpart Q—[Reserved]

§§ 1717.800—1717.849 [Reserved]

**Subpart R—Lien Accommodations
and Subordinations for 100
Percent Private Financing**

SOURCE: 58 FR 53843, Oct. 19, 1993, unless otherwise noted.

§1717.850 General.

(a) *Scope and applicability.* (1) This subpart R establishes policies and procedures for the accommodation, subordination or release of the Government's lien on borrower assets, including approvals of supporting documents and related loan security documents, in connection with 100 percent private sector financing of facilities and other purposes. Policies and procedures regarding lien accommodations for concurrent supplemental financing required in connection with an RUS insured loan are set forth in subpart S of this part.

(2) This subpart and subpart S of this part apply only to debt to be secured under the mortgage, the issuance of which is subject to the approval of the Rural Utilities Service (RUS) by the terms of the borrower's mortgage with respect to the issuance of additional debt or the refinancing or refunding of debt. If RUS approval is not required under such terms of the mortgage itself, a lien accommodation is not required. If the loan contract or other agreement between the borrower and RUS requires RUS approval with respect to the issuance of debt or making additions to or extensions of the borrower's system, such required approvals do not by themselves result in the need for a lien accommodation.

(b) *Overall policy.* (1) Consistent with prudent lending practices, the maintenance of adequate security for RUS's loans, and the objectives of the Rural Electrification Act (RE Act), it is the

policy of RUS to provide effective and timely assistance to borrowers in obtaining financing from other lenders by sharing RUS's lien on a borrower's assets in order to finance electric facilities, equipment and systems, and certain other types of community infrastructure. In certain circumstances, RUS may facilitate the financing of such assets by subordinating its lien on specific assets financed by other lenders.

(2) It is also the policy of RUS to provide effective and timely assistance to borrowers in promoting rural development by subordinating RUS's lien for financially sound rural development investments under the conditions set forth in §1717.858.

(c) *Decision factors.* In determining whether to accommodate, subordinate, or release its lien on property pledged by the borrower under the RUS mortgage, RUS will consider the effects of such action on the achievement of the purposes of the RE Act, the repayment and security of RUS loans secured by the mortgage, and other factors set forth in this subpart. The following factors will be considered in assessing the effects on the repayment and security of RUS loans:

(1) The value of the added assets compared with the amount of new debt to be secured;

(2) The value of the assets already pledged under the mortgage, and any effects of the proposed transaction on the value of those assets;

(3) The ratio of the total outstanding debt secured under the mortgage to the value of all assets pledged as security under the mortgage;

(4) The borrower's ability to repay debt owed to the Government, as indicated by the following factors:

(i) Revenues, costs (including interest, lease payments and other debt service costs), margins, Times Interest Earned Ratio (TIER), Debt Service Coverage (DSC), and other case-specific economic and financial factors;

(ii) The variability and uncertainty of future revenues, costs, margins, TIER, DSC, and other case-specific economic and financial factors;

(iii) Future capital needs and the ability of the borrower to meet those needs at reasonable cost;

§ 1717.850

7 CFR Ch. XVII (1–1–97 Edition)

(iv) The ability of the borrower's management to manage and control its system effectively and plan for future needs; and

(5) Other factors that may be relevant in individual cases, as determined by RUS.

(d) *Environmental considerations.* Under certain circumstances, such as when the project does not qualify for a categorical exclusion, the environmental requirements of 7 CFR part 1794 may apply to applications for lien accommodations, subordinations, and releases.

(e) *Co-mortgagees.* Other mortgagees under existing mortgages shared with RUS may have the right to approve requests for lien accommodations, subordinations and releases. In those cases, borrowers would have to obtain the approval of such mortgagees in order for the lien of the mortgage to be accommodated, subordinated or released. Any reference in this subpart to waiving by RUS of any of its rights under the mortgage shall apply only to the rights of RUS and shall not apply to the rights of any other co-mortgagee.

(f) *Safety and performance standards.* (1) To be eligible for a lien accommodation or subordination from RUS, a borrower must comply with RUS standards regarding facility and system planning and design, construction, procurement, and the use of materials accepted by RUS, as required by the borrower's mortgage, loan contract, or other agreement with RUS, and as further specified in RUS regulations.

(2) RUS "Buy American" requirements shall not apply.

(g) *Advance of funds.* (1) The advance of funds from 100 percent private loans lien accommodated or subordinated by RUS will not be subject to RUS approval. It is the private lender's responsibility to adopt reasonable measures to ensure that such loan funds are used for the purposes for which the loan was made and the lien accommodation or subordination granted. RUS encourages lenders to adopt the following measures:

(i) Remit loan advances to a separate subaccount of the Cash-Construction Fund-Trustee Account;

(ii) Obtain a certification from a registered professional engineer, for each

year during which funds from the separate subaccount are utilized by the borrower, that all materials and equipment purchased and facilities constructed during the year from said funds comply with RUS safety and performance standards, as required by paragraph (f) of this section, and are included in an CWP or CWP amendment approved by the borrower's board of directors;

(iii) Obtain an auditor's certification from a Certified Public Accountant, for each year during which funds are advanced to or remitted from the separate subaccount, certifying:

(A) The amount of loan funds advanced to and remitted from the separate subaccount during the period of review;

(B) That based on the auditor's review of construction work orders and other records, all moneys disbursed from the separate subaccount during the period of review were used for purposes contemplated in the loan agreement and the lien accommodation; and

(iv) Immediately notify RUS in writing if the lender is unable to obtain the certifications cited in paragraphs (g)(1)(ii) and (g)(1)(iii) of this section.

(2) The measures listed in paragraph (g)(1) of this section will normally be sufficient to meet the lender's responsibility provided that additional measures are not reasonably required based on the particular circumstances of an individual case. Should a lender fail to carry out its responsibility in the manner described in this paragraph (g) or in another manner acceptable to RUS, RUS may disqualify such lender from participation in advance approval under §§ 1717.854 and 1717.857 and condition the lender's receipt of a lien accommodation or subordination upon the lender providing satisfactory evidence that it will fulfill its responsibility under this paragraph (g).

(h) *Contracting and procurement procedures.* (1) Facilities financed with debt obtained entirely from non-RUS sources, without an RUS loan guarantee, are not subject to RUS post-loan requirements regarding contracting, procurement and bidding procedures;

Rural Utilities Service, USDA

§1717.851

contract close-out procedures pertaining to project completion, final payment of contractor, and related matters; and standard forms of construction and procurement contracts listed in 7 CFR 1726.300.

(2) To the extent that provisions in a borrower's loan contract or mortgage in favor of RUS may be inconsistent with paragraphs (g)(1) and (h)(1) of this section, paragraphs (g)(1) and (h)(1) of this section are intended to constitute an approval or waiver under the terms of such instruments, and in any regulations implementing such instruments, with respect to facilities financed with debt obtained entirely from non-RUS sources without an RUS guarantee.

(i) *Access of handicapped to buildings and seismic safety.* A borrower must meet the following requirements to be eligible for a lien accommodation or subordination for 100 percent private financing of the construction of buildings:

(1) The borrower must provide RUS with a certification by the project architect that the buildings will be designed and constructed in compliance with Section 504 of the Rehabilitation Act of 1973 as amended (29 U.S.C. 794), as applicable under that Act, and that the facilities will be readily accessible to and usable by persons with handicaps in accordance with the Uniform Federal Accessibility Standards (UFAS), (Appendix A to 41 CFR part 101.19, subpart 101-19.6). The certification must be included in the borrower's application for a lien accommodation or subordination. In addition to these requirements, building construction may also be subject to requirements of The Americans with Disabilities Act (42 U.S.C. 12101 *et seq.*); and

(2) The borrower must comply with RUS's seismic safety requirements set forth in 7 CFR part 1792, subpart C.

(j) *Breach of warranty.* Any breach of any warranty or agreement or any material inaccuracy in any representation, warranty, certificate, document, or opinion submitted pursuant to this subpart, including, without limitation, any agreement or representation regarding the use of funds from loans lien accommodated or subordinated pursuant to this subpart, shall constitute a

default by the borrower under the terms of its loan agreement with RUS.

(k) *Guaranteed loans.* The provisions of this subpart do not apply to lien accommodations or subordinations sought for loans guaranteed by RUS. Such lien accommodations and subordinations are governed by RUS regulations on guaranteed loans.

(l) *Release of lien.* To avoid repetition, release of lien is not mentioned in every instance where it may be an acceptable alternative to subordination of RUS's lien. Generally, lien subordination is favored over release of lien, and any decision to release RUS's lien is at the sole discretion of RUS.

(m) *Waiver authority.* Consistent with the RE Act and other applicable laws, any requirement, condition, or restriction imposed by this subpart, or subpart S of this part, on a borrower, private lender, or application for a lien accommodation or subordination may be waived or reduced by the Administrator, if the Administrator determines that said action is in the Government's financial interest with respect to ensuring repayment and reasonably adequate security for loans made or guaranteed by RUS.

(n) *Liability.* It is the intent of this subpart that any failure on the part of RUS to comply with any provisions hereof, including without limitation, those provisions setting forth specified timeframes for action by RUS on applications for lien accommodations or lien subordinations, shall not give rise to liability of any kind on the part of the Government or any employees of the Government including, without limitation, liability for damages, fees, expenses or costs incurred by or on behalf of a borrower, private lender or any other party.

[58 FR 53843, Oct. 19, 1993, as amended at 60 FR 67408, Dec. 29, 1995]

§1717.851 Definitions.

Terms used in this subpart have the meanings set forth in 7 CFR 1710.2. References to specific RUS forms and other RUS documents, and to specific sections or lines of such forms and documents, shall include the corresponding forms, documents, sections and lines in any subsequent revisions of these forms and documents. In addition

§ 1717.851

to the terms defined in 7 CFR 1710.2, the following terms have the following meanings for the purposes of this subpart:

Borrower's financial and statistical report means RUS Form 7, Parts A through D, for distribution borrowers, and RUS Form 12a for power supply borrowers.

Calendar day means any day of the year, except a Federal holiday that falls on a work day.

Capital investment. For the purposes of § 1717.860, capital investment means an original investment in an asset that is intended for long-term continued use or possession and, for accounting purposes, is normally depreciated or depleted as it is used. For example, such assets may include land, facilities, equipment, buildings, mineral deposits, patents, trademarks, and franchises. Original investments do not include refinancings or refundings.

Current refunding means any refunding of debt where the proceeds of the new debt are applied to refund the old debt within 90 days of the issuance of the new debt.

Default under the RUS mortgage, loan contract, restructuring agreement, or any other agreement between the borrower and RUS means any event of default or any event which, with the giving of notice or lapse of time or both, would become an event of default.

Equity, less deferred expenses, means Line 33 of Part C of RUS Form 7 less assets properly recordable in Account 182.2, Unrecovered Plant and Regulatory Study Costs, and Account 182.3, Other Regulatory Assets.

Front-end costs means the reasonable cost of engineering, architectural, environmental and other studies and plans needed to support the construction of facilities and other investments eligible for a lien accommodation or subordination under this subpart.

Lien accommodation means the sharing of the Government's (RUS's) lien on property, usually all property, covered by the lien of the RUS mortgage.

Lien subordination means allowing another lender to take a first mortgage lien on certain property covered by the lien of the RUS mortgage, and the Gov-

7 CFR Ch. XVII (1-1-97 Edition)

ernment (RUS) taking a second lien on such property.

Natural gas distribution system means any system of community infrastructure whose primary function is the distribution of natural gas and whose services are available by design to all or a substantial portion of the members of the community.

Net utility plant means Part C, Line 5 of RUS Form 7 (distribution borrowers) or Section B, Line 5 of RUS Form 12a (power supply borrowers).

Power cost study means the study defined in 7 CFR 1710.303.

Solid waste disposal system means any system of community infrastructure whose primary function is the collection and/or disposal of solid waste and whose services are available by design to all or a substantial portion of the members of the community.

Telecommunication and other electronic communication system means any system of community infrastructure whose primary function is the provision of telecommunication or other electronic communication services and whose services are available by design to all or a substantial portion of the members of the community.

Total assets, less deferred expenses means Line 26 of Part C of RUS Form 7 less assets properly recordable in Account 182.2, Unrecovered Plant and Regulatory Study Costs, and Account 182.3, Other Regulatory Assets.

Total outstanding long-term debt means Part C, Line 38 of RUS Form 7.

Transaction costs means the reasonable cost of legal advice, accounting fees, filing fees, recording fees, call premiums and prepayment penalties, financing costs (including, for example, underwriting commissions, letter of credit fees and bond insurance), and printing associated with borrower financing.

Water and waste disposal system means any system of community infrastructure whose primary function is the supplying of water and/or the collection and treatment of waste water and whose services are available by design to all or a substantial portion of the members of the community.

Weighted average life of the loan means the average life of the loan based on

Rural Utilities Service, USDA

§1717.852

the proportion of original loan principal paid during each year of the loan. It shall be determined by calculating the sum of all loan principal payments, expressed as a fraction of the original loan principal amount, times the number of years and fractions of years elapsed at the time of each payment since issuance of the loan. For example, given a \$5 million loan, with a maturity of 5 years and equal principal payments of \$1 million due on the anniversary date of the loan, the weighted average life would be: $(.2)(1 \text{ year}) + (.2)(2 \text{ years}) + (.2)(3 \text{ years}) + (.2)(4 \text{ years}) + (.2)(5 \text{ years}) = .2 \text{ years} + .4 \text{ years} + .6 \text{ years} + .8 \text{ years} + 1.0 \text{ years} = 3.0 \text{ years}$. If instead the loan had a balloon payment of \$5 million at the end of 5 years, the weighted average life would be: $(\$5 \text{ million}/\$5 \text{ million})(5 \text{ years}) = 5 \text{ years}$.

[58 FR 53843, Oct. 19, 1993, as amended at 59 FR 3986, Jan. 28, 1994; 60 FR 67409, Dec. 29, 1995]

§1717.852 Financing purposes.

(a) *Purposes eligible*. The following financing purposes, except as excluded in paragraph (b) of this section, are eligible for a lien accommodation from RUS, or in certain circumstances a subordination of RUS's lien on specific assets, provided that all applicable provisions of this subpart are met:

(1) The acquisition, construction, improvement, modification, and replacement (less salvage value) of systems, equipment, and facilities, including real property, used to supply electric and/or steam power to:

(i) RE Act beneficiaries; and/or

(ii) End-user customers of the borrower who are not beneficiaries of the RE Act. Such systems, equipment, and facilities include those listed in 7 CFR 1710.251(c) and 1710.252(c), as well as others that are determined by RUS to be an integral component of the borrower's system of supplying electric and/or steam power to consumers, such as, for example, coal mines, coal handling facilities, railroads and other transportation systems that supply fuel for generation, programs of demand side management and energy conservation, and on-grid and off-grid renewable energy systems;

(2) The purchase, rehabilitation and integration of existing distribution fa-

cilities, equipment and systems, and associated service territory;

(3) The following types of community infrastructure substantially located within the electric service territory of the borrower: water and waste disposal systems, solid waste disposal systems, telecommunication and other electronic communications systems, and natural gas distribution systems;

(4) Front-end costs, when and as the borrower has obtained a binding commitment from the non-RUS lender for the financing required to complete the procurement or construction of the facilities;

(5) Transaction costs included as part of the cost of financing assets or refinancing existing debt, provided, however, that the amount of transaction costs eligible for lien accommodation or subordination normally shall not exceed 5 percent of the principal amount of financing or refinancing provided, net of all transaction costs;

(6) The refinancing of existing debt secured under the mortgage;

(7) Interest during construction of generation and transmission facilities if approved by RUS, case by case, depending on the financial condition of the borrower, the terms of the financing, the nature of the construction, the treatment of these costs by regulatory authorities having jurisdiction, and such other factors deemed appropriate by RUS; and

(8) Lien subordinations for certain rural development investments, as provided in §1717.858.

(b) *Purposes ineligible*. The following financing purposes are not eligible for a lien accommodation or subordination from RUS:

(1) Working capital, including operating funds, unless in the judgment of RUS the working capital is required to ensure the repayment of RUS loans and/or other loans secured under the mortgage;

(2) Facilities, equipment, appliances, or wiring located inside the premises of the consumer, except:

(i) Certain load-management equipment (see 7 CFR 1710.251(c));

(ii) Renewable energy systems and RUS-approved programs of demand side management and energy conservation; and

§ 1717.853

7 CFR Ch. XVII (1–1–97 Edition)

(iii) As determined by RUS on a case by case basis, facilities included as part of certain cogeneration projects to furnish electric and/or steam power to end-user customers of the borrower;

(3) Investments in a lender required of the borrower as a condition for obtaining financing; and

(4) Debt incurred by a distribution or power supply borrower to finance facilities, equipment or other assets that are not part of the borrower's electric system or one of the four community infrastructure systems cited in paragraph (a)(3) of this section, except for certain rural development investments eligible for a lien subordination under § 1717.858.

(c) *Lien subordination for electric utility investments.* RUS will consider subordinating its lien on specific electric utility assets financed by the lender, when the assets can be split off without materially reducing the stability, safety, reliability, operational efficiency, or liquidation value of the rest of the system.

[58 FR 53843, Oct. 19, 1993, as amended at 59 FR 3986, Jan. 28, 1994; 60 FR 67409, Dec. 29, 1995]

§ 1717.853 Loan terms and conditions.

(a) *Terms and conditions.* A loan, bond or other financing instrument, for which a lien accommodation or subordination is requested from RUS, must comply with the following terms and conditions:

(1) The maturity of the loan or bond used to finance facilities or other capital assets must not exceed the weighted average of the expected remaining useful lives of the assets being financed;

(2) The loan or bond must have a maturity of not less than 5 years, except for loans or bonds used to refinance debt that has a remaining maturity of less than 5 years;

(3) The principal of the loan or bond must be amortized at a rate that will yield a weighted average life not greater than the weighted average life that would result from level payments of principal and interest; and

(4) The loan, or any portion of the loan, may bear either a variable (set annually or more frequently) or a fixed interest rate.

(b) *RUS approval.* Loan terms and conditions and the loan agreement between the borrower and the lender are subject to RUS approval. However, RUS will usually waive its right of approval for distribution borrowers that meet the conditions for advance approval of a lien accommodation or subordination set forth in § 1717.854. RUS may also waive its right of approval in other cases. RUS's decision to waive its right of approval will depend on the adequacy of security for RUS's loans, the current and projected financial strength of the borrower and its ability to meet its financial obligations, RUS's familiarity with the lender and its lending practices, whether the transaction is ordinary or unusual, and the uncertainty and credit risks involved in the transaction.

§ 1717.854 Advance approval—100 percent private financing of distribution, subtransmission and headquarters facilities, and certain other community infrastructure.

(a) *Policy.* Requests for a lien accommodation or subordination from distribution borrowers for 100 percent private financing of distribution, subtransmission and headquarters facilities, and for community infrastructure listed in § 1717.852(a)(3), qualify for advance approval by RUS if they meet the conditions of this section and all other applicable provisions of this subpart. Advance approval means RUS will approve these requests once RUS is satisfied that the conditions of this section and all other applicable provisions of this subpart have been met.

(b) *Eligible purposes.* Lien accommodations or subordinations for the financing of distribution, subtransmission, and headquarters facilities and community infrastructure listed in § 1717.852(a)(3) are eligible for advance approval, except those that involve the purchase of existing facilities and associated service territory.

(c) *Qualification criteria.* To qualify for advance approval, the following requirements, as well as all other applicable requirements of this subpart, must be met:

(1) The borrower has achieved a TIER of at least 1.5 and a DSC of at least 1.25 for each of 2 calendar years immediately preceding, or any 2 consecutive

Rural Utilities Service, USDA

§1717.855

12 month periods ending within 180 days immediately preceding, the issuance of the debt;

(2) The ratio of the borrower's equity, less deferred expenses, to total assets, less deferred expenses, is not less than 27 percent, after adding the principal amount of the proposed loan to the total assets of the borrower;

(3) The borrower's net utility plant as a ratio to its total outstanding long-term debt is not less than 1.0, after adding the principal amount of the proposed loan to the existing outstanding long-term debt of the borrower;

(4) There are no actions or proceedings against the borrower, pending or overtly threatened in writing before any court, governmental agency, or arbitrator that would materially adversely affect the borrower's operations and/or financial condition;

(5) The borrower is current on all debt payments and all other financial obligations, and is not in default under the RUS mortgage, the RUS loan contract, the borrower's wholesale power contract, any debt restructuring agreement, or any other agreement with RUS;

(6) The borrower has:

(i) Submitted the annual auditor's report, report on compliance, report on internal controls, and management letter in accordance with 7 CFR part 1773;

(ii) Received an unqualified opinion in the most recent auditor's report;

(iii) Resolved all material findings and recommendations made in the most recent Loan Fund and Accounting Review;

(iv) Resolved all material findings and recommendations made in the most recent financial statement audit, including those material findings and recommendations made in the report on internal control, report on compliance, and management letter;

(v) Resolved all outstanding material accounting issues with RUS; and

(vi) Resolved any significant irregularities to RUS's satisfaction; and

(7) If the borrower has a power supply contract with a power supply borrower, the power supply borrower is current on all debt payments and all other financial obligations, and is not in default under the RUS mortgage, the loan contract, any debt restructuring

agreement, or any other agreement with RUS.

(d) *Right of normal review reserved.* RUS reserves the right to review any request for lien accommodation or subordination under its normal review process rather than under advance approval procedures if RUS, in its sole discretion, determines there is reasonable doubt as to whether the requirements of paragraphs (b) and (c) of this section have been or will be met, or whether the borrower will be able to meet all of its present and future financial obligations.

[58 FR 53843, Oct. 19, 1993, as amended at 60 FR 67410, Dec. 29, 1995]

§1717.855 Application contents: Advance approval—100 percent private financing of distribution, sub-transmission and headquarters facilities, and certain other community infrastructure.

Applications for a lien accommodation or subordination that meet the requirements of §1717.854 must include the following information and documents:

(a) A certification by an authorized official of the borrower that the borrower and, as applicable, the loan are in compliance with all conditions set forth in §1717.854(c) and all applicable provisions of §§1717.852 and 1717.853;

(b) A resolution of the borrower's board of directors requesting the lien accommodation or subordination and including the amount and maturity of the proposed loan, a general description of the facilities or other purposes to be financed, the name and address of the lender, and an attached term sheet summarizing the terms and conditions of the proposed loan;

(c) The borrower's financial and statistical report, the data in which shall not be more than 60 days old when the complete application is received by RUS;

(d) Draft copy of any new mortgage or mortgage amendment (supplement) required by RUS or the lender, unless RUS has notified the borrower that it wishes to prepare these documents itself;

(e) A copy of the loan agreement, loan note, bond or other financing instrument, unless RUS has notified the

§ 1717.856

7 CFR Ch. XVII (1–1–97 Edition)

borrower that these documents need not be submitted;

(f) Borrower's environmental report and/or other environmental documentation, if required by 7 CFR part 1794;

(g) RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers, and RUS Form 740g, Application for Headquarters Buildings;

(h) A CWP or CWP amendment covering the proposed project, in accordance with 7 CFR part 1710, subpart F, and subject to RUS approval, and a resolution of the borrower's board of directors adopting the CWP;

(i) The certification by the project architect for any buildings to be constructed, as required by § 1717.850(i);

(j) A certification by an authorized official of the borrower that flood hazard insurance will be obtained for the full value of any buildings, or other facilities susceptible to damage if flooded, that will be located in a flood hazard area;

(k) Form AD-1047, Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions, as required by 7 CFR part 3017;

(l) A report by the borrower stating whether or not it is delinquent on any Federal debt, and if delinquent, the amount and age of the delinquency and the reasons therefor; and a certification, if not previously provided, that the borrower has been informed of the Government's collection options;

(m) The written acknowledgement from a registered engineer or architect regarding compliance with seismic provisions of applicable model codes for any buildings to be constructed, as required by 7 CFR 1792.104; and

(n) Other information that RUS may require to determine whether all of the applicable provisions of this subpart have been met.

[58 FR 53843, Oct. 19, 1993, as amended at 60 FR 67410, Dec. 29, 1995]

§ 1717.856 Application contents: Normal review—100 percent private financing.

Applications for a lien accommodation or subordination for 100 percent private financing for eligible purposes that do not meet the requirements of

§ 1717.854 must include the following information and documents:

(a) A certification by an authorized official of the borrower that:

(1) The borrower and, as applicable, the loan are in compliance with all applicable provisions of §§ 1717.852 and 1717.853; and

(2) There are no actions or proceedings against the borrower, pending or overtly threatened in writing before any court, governmental agency, or arbitrator that would materially adversely affect the borrower's operations and/or financial condition. If this certification cannot be made, the application must include:

(i) An opinion of borrower's counsel regarding any actions or proceedings against the borrower, pending or overtly threatened in writing before any court, governmental agency, or arbitrator that would materially adversely affect the borrower's operations and/or financial condition. The opinion shall address the merits of the claims asserted in the actions or proceedings, and include, if appropriate, an estimate of the amount or range of any potential loss; and

(ii) A certification by an authorized official of the borrower as to the amount of any insurance coverage applicable to any loss that may result from the actions and proceedings addressed in the opinion of borrower's counsel;

(b) The information and documents set forth in § 1717.855 (b) through (n);

(c) A long-range financial forecast providing financial projections for at least 10 years, which demonstrates that the borrower's system is economically viable and that the proposed loan is financially feasible, and a resolution of the borrower's board of directors adopting the long-range financial forecast. The financial forecast must comply with the requirements of 7 CFR part 1710 subpart G. RUS may, in its sole discretion, waive the requirement of this paragraph that a long range financial forecast be provided, if:

(1) The borrower is current on all of its financial obligations and is in compliance with all requirements of its mortgage and loan agreement with RUS;

(2) In RUS's judgment, granting a lien accommodation or subordination for the proposed loan will not adversely affect the repayment and security of outstanding debt of the borrower owed to or guaranteed by RUS;

(3) The borrower has achieved the TIER and DSC and any other coverage ratios required by its mortgage or loan contract in each of the two most recent calendar years; and

(4) The amount of the proposed loan does not exceed the lesser of \$10 million or 10 percent of the borrower's current net utility plant;

(d) [Reserved]

(e) As applicable to the type of facilities being financed, a CWP, related engineering and cost studies, a power cost study, and a resolution of the borrower's board of directors adopting these documents. These documents must meet the requirements of 7 CFR part 1710, subpart F and, as applicable, subpart G;

(f) Unless the requirement has been waived in writing by RUS, a current, RUS-approved power requirements study, which must meet the requirements of 7 CFR part 1710, subpart E, to the same extent as if the loan were being made by RUS, and a resolution of the borrower's board of directors adopting the study; and

(g) A discussion of the borrower's compliance with RUS requirements on accounting, financial reporting, record keeping, and irregularities (see § 1717.854(c)(5)). RUS will review the case and determine the effect of any noncompliance on the feasibility and security of RUS's loans, and whether the requested lien accommodation or subordination can be approved.

[58 FR 53843, Oct. 19, 1993, as amended at 60 FR 3735, Jan. 19, 1995; 60 FR 67410, Dec. 29, 1995]

§ 1717.857 Refinancing of existing secured debt—distribution and power supply borrowers.

(a) *Advance approval.* All applications for a lien accommodation or subordination for the refinancing of existing secured debt that meet the qualification criteria of this paragraph, except applications from borrowers in default under their mortgage or loan contract with RUS, are eligible for advance ap-

proval. Such lien accommodations and subordinations are deemed to be in the Government's interest, and RUS will approve them once RUS is satisfied that the requirements of this paragraph and paragraph (c) of this section have been met. The qualification criteria are as follows:

(1) The refinancing is a current re-funding and does not involve interest rate swaps, forward delivery contracts, or similar features;

(2) The principal amount of the refinancing loan does not exceed the sum of the outstanding principal amount of the debt being refinanced plus the amount of transactions costs included in the refinancing loan that are eligible for lien accommodation or subordination under § 1717.852(a)(4);

(3) The weighted average life of the refinancing loan is not greater than the weighted average remaining life of the loan being refinanced; and

(4) The present value of the cost of the refinancing loan, including all transaction costs and any required investments in the lender, is less than the present value of the cost of the loan being refinanced, as determined by a method acceptable to RUS. The discount rate used in the present value analysis shall be equal to either:

(i) The current rate on Treasury securities having a maturity equal to the weighted average life of the refunding loan, plus one-eighth percent, or

(ii) A rate approved by RUS based on documentation provided by the borrower as to its marginal long-term borrowing cost.

(b) *Other applications.* Applications for a lien accommodation or subordination for refinancing that do not meet the requirements of paragraph (a) of this section will be reviewed by RUS under normal review procedures for these applications. In the case of either advance approval or normal review, a lien subordination would be authorized only if the lien of the mortgage was subordinated with respect to the assets securing the loan being refinanced.

(c) *Application contents—advance approval of refinancing.* Applications for a lien accommodation or subordination for refinancing of existing secured debt that meet the qualification criteria for

§ 1717.858

7 CFR Ch. XVII (1–1–97 Edition)

advance approval set forth in paragraph (a) of this section, must include the following information and documents:

(1) A certification by an authorized official of the borrower that the application meets the requirements of paragraph (a) of this section and all applicable provisions of §§ 1717.852 and 1717.853;

(2) Documentation and analysis demonstrating that the application meets the qualification criteria set forth in paragraph (a) of this section;

(3) A resolution of the borrower's board of directors requesting the lien accommodation or subordination and including the amount and maturity of the proposed loan, a general description of the debt to be refinanced, the name and address of the lender, and an attached term sheet summarizing the terms and conditions of the proposed loan;

(4) The borrower's financial and statistical report, the data in which shall not be more than 60 days old when the complete application is received by RUS;

(5) Draft copy of any new mortgage or mortgage amendment (supplement) required by RUS or the lender, unless RUS has notified the borrower that it wishes to prepare these documents itself;

(6) A copy of the loan agreement, loan note, bond or other financing instrument, unless RUS has notified the borrower that these documents need not be submitted;

(7) Form AD-1047, Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions, as required by 7 CFR part 3017;

(8) A report by the borrower stating whether or not it is delinquent on any Federal debt, and if delinquent, the amount and age of the delinquency and the reasons therefor; and a certification, if not previously provided, that the borrower has been informed of the Government's collection options; and

(9) Other information, documents and opinions that RUS may require to determine whether all of the applicable provisions of this subpart have been met.

(d) *Application contents—normal review of refinancing.* Applications for a lien accommodation or subordination for refinancing of existing secured debt that do not meet the requirements for advance approval set forth in paragraph (a) of this section, must include the following information and documents:

(1) The information and documents set forth in paragraphs (c)(3) through (9) of this section;

(2) A complete description of the refinancing loan and the outstanding debt to be refinanced;

(3) An analysis comparing the refinancing loan with the loan being refinanced as to the weighted average life and the net present value of the costs of the two loans; and

(4) If the present value of the cost of the refinancing loan is greater than the present value of the cost of the debt being refinanced, financial forecasts for at least 5 years comparing the borrower's debt service and other costs, revenues, margins, cash flows, TIER, and DSC, with and without the proposed refinancing.

(e) *Application process and timeframes.* The application process and timeframes for RUS review and action for refinancings are set forth in § 1717.859(d).

(f) *Prepayments of concurrent RUS insured loans.* If the loan being refinanced was made concurrently as supplemental financing required by RUS in connection with an RUS insured loan, the refinancing will not be considered a prepayment under the RUS mortgage, and no proportional prepayment of the concurrent RUS insured loan will be required, provided that the principal amount of the refinancing loan is not less than the amount of loan principal being refinanced, and the weighted average life of the refinancing loan is materially equal to the weighted average remaining life of the loan being refinanced. The refinancing loan shall be considered a concurrent loan.

[58 FR 53843, Oct. 19, 1993, as amended at 60 FR 67410, Dec. 29, 1995]

§ 1717.858 Lien subordination for rural development investments.

(a) *Policy.* RUS encourages borrowers to consider investing in financially

sound projects that are likely to have a positive effect on economic development and employment in rural areas. In addition to the guidance set forth in §1717.651, RUS recommends that such investments be made through a subsidiary of the borrower in order to clearly separate the financial risks and the revenues and costs of the rural development enterprise from those of the borrower's electric utility business. This should reduce credit risks to the borrower's primary business, and minimize the possibility of undisclosed cross subsidization of the rural development enterprise by electric rate payers.

(b) *Lien subordination.* RUS will consider subordinating or releasing its lien on the stock held by a borrower in a subsidiary whose primary business directly contributes to or supports economic development and employment in rural areas, as defined in section 13 of the RE Act, when requested by a lender to the subsidiary, other than the borrower. To be eligible for said lien subordination or release:

(1) The borrower must be current on all of its financial obligations and be in compliance with all provisions of its mortgage and loan agreement with RUS; and

(2) In the judgment of RUS, the borrower must be able to repay all of its outstanding debt, and the security for all outstanding loans made to the borrower by RUS, including loans guaranteed by RUS, must be adequate, after taking into account the proposed subordination or release of lien.

(c) *Application contents.* Applications for a lien subordination or release of lien for rural development investments must include the following information and documents:

(1) A resolution of the borrower's board of directors requesting the lien subordination or release of lien;

(2) A certification by an authorized official of the borrower that the borrower is current on all of its financial obligations and is in compliance with all provisions of its mortgage and loan agreement with RUS;

(3) A description of the facilities or other purposes to be financed and the projected effects on economic development and employment in rural areas;

(4) The borrower's financial and statistical report, the data in which shall not be more than 60 days old when the complete application is received by RUS;

(5) If requested by RUS, a long-range financial forecast providing financial projections for at least 10 years, in form and substance satisfactory to RUS, which demonstrates that the borrower's system is economically viable and that the borrower will be able to repay all of its outstanding debt and meet all other financial obligations;

(6) A discussion of the borrower's compliance with RUS requirements on accounting, financial reporting, record keeping, and irregularities (see §1717.854(c)(5)). RUS will review the case and determine the effect of any noncompliance on the feasibility and security of RUS's loans, and whether the requested lien subordination or release of lien can be approved;

(7) If any buildings are to be constructed with the proceeds of the loan to be made to the subsidiary:

(i) A certification by the project architect that the buildings will be designed and constructed in compliance with Section 504 of the Rehabilitation Act of 1973 as amended (29 U.S.C. 794), as applicable under that Act, and that the facilities will be readily accessible to and usable by persons with handicaps in accordance with the Uniform Federal Accessibility Standards; and

(ii) A written acknowledgement from a registered engineer or architect regarding compliance with seismic provisions of applicable model codes, as required by 7 CFR 1792.104;

(8) A certification by an authorized official of the borrower that flood hazard insurance will be obtained for the full value of any buildings, or other facilities susceptible to damage if flooded, that will be located in a flood hazard area;

(9) Form AD-1047, Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions, as required by 7 CFR part 3017;

(10) A report by the borrower stating whether or not it is delinquent on any Federal debt, and if delinquent, the amount and age of the delinquency and

the reasons therefor; and a certification, if not previously provided, that the borrower has been informed of the Government's collection options; and

(11) Other information that RUS may require to determine whether all of the applicable provisions of this subpart have been met.

§ 1717.859 Application process and timeframes.

(a) *General.* (1) Borrowers are responsible for ensuring that their applications for a lien accommodation or subordination are complete and sound as to substance and form before they are submitted to RUS. RUS will not accept any application that, on its face, is incomplete or inadequate as to the substantive information required by this subpart. RUS will notify borrowers in writing when their applications are complete and in form and substance satisfactory to RUS. A copy of all notifications of borrowers cited in this section will also be sent to the private lender.

(2) It is recommended that borrowers consult with RUS staff before submitting their applications to determine whether they will likely qualify for advance approval or normal review, and to obtain answers to any questions about the information and documents required for the application.

(3) A borrower shall, after submitting an application, promptly notify RUS of any changes that materially affect the information contained in its application.

(4) After submitting an application and having been notified by RUS of additional information and documents and other changes needed to complete the application, if the required information and documents are not supplied to RUS within 30 calendar days of the borrower's receipt of the notice, RUS may return the application to the borrower. The borrower may resubmit the application when the required additional information and documents are available.

(5) Timeframes. The timeframes for review of applications set forth in this section are based on the following conditions:

(i) The types of lien accommodations or subordinations requested are of the

"standard" types that RUS has approved previously, i.e., the so-called Type I, II and III lien accommodations. Future revisions of the RUS mortgage may result in other "standard" types of lien accommodations and lien subordinations acceptable to RUS. Requests for lien accommodations or subordinations that are substantially different than the "standard" types previously approved by RUS may require additional time for review and action;

(ii) The requested lien accommodation or subordination does not require the preparation of an environmental assessment or an Environmental Impact Statement. Preparation of these documents often will require additional time beyond the timeframes cited in this section; and

(iii) The timeframes set forth in this section, except for paragraph (b)(4) of this section, which deals only with approval of a new mortgage or mortgage amendment, include RUS review and/or approval of a loan contract, if required as part of the application, and required supporting documents, such as a CWP.

(b) *Advance approval—100 percent private financing of distribution, subtransmission, and headquarters facilities.* (1) Applications that qualify under § 1717.854 for advance approval of a lien accommodation or subordination for 100 percent private financing of distribution, subtransmission, and headquarters facilities are submitted to the general field representative (GFR). The GFR will work with the borrower to ensure that all components of the application are assembled. Once the application is satisfactory to the GFR, it will be sent promptly to the Washington office for further review and action. If a new mortgage or mortgage amendment is required, a draft of these documents must be included in the application, unless the borrower has been notified that RUS wishes to prepare the documents itself.

(2) If no additional or amended information is needed for RUS to complete its review of the application once it is received in the Washington Office, RUS will, within 45 calendar days of receiving the application in the Washington Office, either:

(i) Approve the lien accommodation or subordination if the borrower has

demonstrated satisfactorily to RUS that all requirements of this subpart applicable to advance approval have been met, and send written notice to the borrower. RUS's approval, in this case and all other cases, will be conditioned upon execution and delivery by the borrower of a satisfactory security instrument, if required, and such additional information, documents, and opinions of counsel as RUS may require;

(ii) If all requirements have not been met, so notify the borrower in writing. The application will be returned to the borrower unless the borrower requests that it be reconsidered under the requirements and procedures for normal review set forth in paragraph (c) of this section and in § 1717.856; or

(iii) Send written notice to the borrower explaining why a decision cannot be made at that time and giving the estimated date when a decision is expected.

(3) If additional or amended information is needed after the application is received in the Washington Office, RUS will so notify the borrower in writing within 15 calendar days of receiving the application in the Washington Office. If RUS subsequently becomes aware of other deficiencies in the application, additional written notice will be sent to the borrower. Within 30 calendar days of receiving all of the information required by RUS to complete its review, RUS will act on the application as described in paragraphs (b)(2)(i) through (b)(2)(iii) of this section.

(4) If a new mortgage or mortgage amendment is required, within 30 days of receiving such documents satisfactory to RUS, including required execution counterparts, RUS will execute the documents and send them to the borrower, along with instructions pertaining to recording of the mortgage, an opinion of borrower's counsel, and other matters. RUS will promptly notify the borrower upon receiving satisfactory evidence that the borrower has complied with said instructions.

(c) *Normal review—100 percent private financing of distribution, transmission, and/or generation facilities—(1) Distribution borrowers.* (i) Applications from distribution borrowers for a lien accommodation or subordination for 100

percent private financing of distribution, transmission, and/or generation facilities (including other eligible electric utility purposes) that do not meet the criteria for advance approval, are also submitted to the GFR. Procedures at this stage are the same as in paragraph (b)(1) of this section.

(ii) If no additional or amended information is needed for RUS to complete its review of the application once it is received in the Washington office, RUS will, within 90 calendar days of receiving the application in the Washington office, send written notice to the borrower either approving the request, disapproving the request, or explaining why a decision cannot be made at that time and giving the estimated date when a decision is expected.

(iii) If additional or amended information is needed after the application is received in the Washington Office, RUS will so notify the borrower in writing within 15 calendar days of receiving the application in the Washington Office. If RUS subsequently becomes aware of other deficiencies in the application, additional written notice will be sent to the borrower. Within 90 calendar days of receiving all of the information required by RUS to complete its review, RUS will act on the application as described in paragraph (c)(1)(ii) of this section.

(iv) If a new mortgage or mortgage amendment is required, the procedures and timeframes of paragraph (b)(4) of this section will apply.

(2) *Power supply borrowers.* (i) Applications from power supply borrowers for a lien accommodation or subordination for 100 percent private financing of distribution, transmission, and/or generation facilities, and other eligible electric utility purposes, are submitted to the RUS Power Supply Division, or its successor, in Washington, DC.

(ii) Within 30 calendar days of receiving the borrower's application containing the information and documents required by § 1717.856, RUS will send written notice to the borrower of any deficiencies in its application as to completeness and acceptable form and substance. Additional written notices may be sent to the borrower if RUS subsequently becomes aware of other deficiencies in the borrower's application.

(iii) Within 90 calendar days of receiving all of the information required by RUS to complete its review, RUS will act on the application as described in paragraph (c)(1)(ii) of this section.

(iv) If a new mortgage or mortgage amendment is required, these documents will be reviewed and executed pursuant to the procedures and timeframes of paragraph (b)(4) of this section.

(d) *Refinancing of existing debt.* All requests for a lien accommodation or subordination for refinancing are sent directly to the Washington office.

(1) *Advance approval.* (i) Within 15 calendar days of receiving the borrower's application containing the information and documents required by § 1717.857(c), RUS will send written notice to the borrower of any deficiencies in its application as to completeness and acceptable form and substance. Additional written notices may be sent to the borrower if RUS subsequently becomes aware of other deficiencies in the borrower's application.

(ii) Within 15 calendar days of receiving all of the required information and documents, in form and substance satisfactory to RUS, RUS will either:

(A) Approve the lien accommodation or subordination if the borrower has demonstrated satisfactorily to RUS that all requirements of § 1717.857(a) and (c) have been met, and send written notice to the borrower;

(B) If all requirements have not been met, so notify the borrower in writing. The application will be returned to the borrower unless the borrower requests that it be reconsidered under the requirements and procedures for normal review set forth in paragraph (d)(2) of this section and in § 1717.857; or

(C) Send written notice to the borrower explaining why a decision cannot be made at that time and giving the estimated date when a decision is expected.

(iii) If a new mortgage or mortgage amendment is required, these documents will be reviewed and executed pursuant to the procedures and timeframes of paragraph (b)(4) of this section.

(2) *Normal review.* (i) Within 20 calendar days of receiving the borrower's application containing the information

and documents required by § 1717.857(d), RUS will send written notice to the borrower of any deficiencies in its application as to completeness and acceptable form and substance. Additional written notices may be sent to the borrower if RUS subsequently becomes aware of other deficiencies in the borrower's application.

(ii) Within 30 calendar days of receiving all of the required information and documents, in form and substance satisfactory to RUS, RUS will notify the borrower in writing either approving the request, disapproving the request, or explaining why a decision cannot be made at that time and giving the estimated date when a decision is expected. If the proposed refinancing involves complicated transactions such as interest rate swaps or forward delivery contracts, additional time may be required for RUS review and final action.

(iii) If a new mortgage or mortgage amendment is required, these documents will be reviewed and executed pursuant to the procedures and timeframes of paragraph (b)(4) of this section.

(e) *Rural development investments.* (1) Applications for a lien subordination for rural development investments are submitted by distribution borrowers to the GFR and by power supply borrowers to the RUS Power Supply Division, or its successor, in Washington, DC.

(2) The GFR will work with the borrower to ensure that all components of the application are assembled. Once the application is satisfactory to the GFR, it will be sent promptly to the Washington Office for further review and action. After the application is received in the Washington Office, if additional or amended information is needed for RUS to complete its review, RUS will so notify the borrower in writing within 15 calendar days of receiving the application.

(3) Applications from power supply borrowers containing the information and documents required by § 1717.858(c) will be reviewed in the Washington office and the borrower given written notice within 30 calendar days of receiving the application of any deficiencies as to completeness and acceptable form

and substance. Additional written notices may be sent to the borrower if RUS subsequently becomes aware of other deficiencies in the borrower's application.

(4) Within 60 calendar days of receiving in the Washington office all of the required information and documents, in form and substance satisfactory to RUS, RUS will give written notice to the borrower either approving the request, disapproving the request, or explaining why a decision cannot be made at that time and giving the estimated date when a decision is expected.

(5) If a new mortgage or mortgage amendment is required, these documents will be reviewed and executed pursuant to the procedures and timeframes of paragraph (b)(4) of this section.

§1717.860 Lien accommodations and subordinations under section 306E of the RE Act.

(a) *General.* Under section 306E of the RE Act, when requested by a private lender providing financing for capital investments by a borrower whose net worth exceeds 110 percent of the outstanding principal balance of all loans made or guaranteed to the borrower by RUS, the Administrator will, without delay, offer to share the government's lien on the borrower's system or subordinate the government's lien on the property financed by the private lender, provided that the security, including the assurance of repayment, for loans made or guaranteed by RUS will remain reasonably adequate. To qualify for a lien accommodation or subordination under this section, the investment must be an original capital investment, i.e., not a refinancing or re-funding. (See §1717.851 for the definition of capital investment.)

(b) *Determination of net worth to RUS debt ratio.* (1) In the case of applications for a lien accommodation, a borrower's net worth will be based on the borrower's most recent financial and statistical report, the data in which shall not be more than 60 days old at the time the application is received by RUS, and the outstanding debt owed to or guaranteed by RUS will be based on latest RUS records available. The fi-

nancial and statistical reports (Form 7 for distribution borrowers and Form 12a for power supply borrowers) are subject to RUS review and revision, and they must comply with RUS's system of accounts and accounting principles set forth in 7 CFR part 1767. Since sinking fund depreciation is not approved under part 1767, net worth for borrowers using sinking fund depreciation will be calculated as if the borrower had been using straight line depreciation.

(2) Net worth shall be calculated by taking total margins and equities (Line 33 of Part C of RUS Form 7 for distribution borrowers, or Line 34 of Section B of RUS Form 12a for power supply borrowers) and subtracting assets properly recordable in account 182.2, Unrecovered Plant and Regulatory Study Costs, and account 182.3, Other Regulatory Assets, as defined in 7 CFR part 1767.

(c) *Application requirements and process.* (1) If a borrower's net worth to RUS debt ratio exceeds 110 percent, as determined by RUS, and the borrower is in compliance with all requirements of its mortgage, loan agreement with RUS, and any other agreement with RUS that have not been exempted in writing by RUS, if requested RUS will expeditiously approve a lien accommodation or subordination for 100 percent private financing of capital investments, provided that the security, including the assurance of repayment, for loans made or guaranteed by RUS will remain reasonably adequate. RUS's approval will be conditioned upon execution and delivery by the borrower of a security instrument satisfactory to RUS, if required, and such additional information, documents, and opinions of counsel as RUS may require.

(2) The application must include the following:

(i) A resolution of the borrower's board of directors requesting the lien accommodation and including the amount and maturity of the proposed loan, a general description of the facilities or other purposes to be financed, the name and address of the lender, and an attached term sheet summarizing the terms and conditions of the proposed loan;

(ii) A certification by an authorized official of the borrower that the borrower is in compliance with all requirements of its mortgage, loan agreement with RUS, and any other agreement with RUS that have not been exempted in writing by RUS;

(iii) The borrower's financial and statistical report, the data in which shall not be more than 60 days old when the complete application is received by RUS;

(iv) Draft copy of any new mortgage or mortgage amendment (supplement) required by RUS or the lender, unless RUS has notified the borrower that it wishes to prepare these documents itself;

(v) A copy of the loan agreement, loan note, bond or other financing instrument, unless RUS has notified the borrower that these documents need not be submitted. These documents will not be subject to RUS approval, but may be reviewed to determine whether they contain any provisions that would result in the security, including assurance of repayment, for loans made or guaranteed by RUS no longer being reasonably adequate;

(vi) The following certifications and reports required by law:

(A) The certification by the project architect for any buildings to be constructed, as required by 7 CFR 1717.850(i);

(B) A certification by an authorized official of the borrower that flood hazard insurance will be obtained for the full value of any buildings, or other facilities susceptible to damage if flooded, that will be located in a flood hazard area;

(C) Form AD-1047, Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions, as required by 7 CFR part 3017;

(D) A report by the borrower stating whether or not it is delinquent on any Federal debt, and if delinquent, the amount and age of the delinquency and the reasons therefor; and a certification, if not previously provided, that the borrower has been informed of the Government's collection options; and

(E) The written acknowledgement from a registered engineer or architect regarding compliance with seismic pro-

visions of applicable model codes for any buildings to be constructed, as required by 7 CFR 1792.104. All other elements of an application listed in § 1717.855, § 1717.856, and § 1717.858(c) not listed in this paragraph (c) are exempted.

(3) Applications from distribution borrowers are submitted to the general field representative (GFR), while applications from power supply borrowers are submitted to the RUS Power Supply Division, or its successor, in Washington, DC. When an application is satisfactory to the GFR, it will be sent promptly to the Washington office. If Washington office staff determine that an application is incomplete, the borrower will be promptly notified in writing about the deficiencies. When the application is complete, and if the security, including assurance of repayment, of loans made or guaranteed by RUS will remain reasonably adequate after granting the lien accommodation or subordination, the borrower and the lender will be promptly notified in writing that the lien accommodation or subordination has been approved, subject to the conditions cited in paragraph (c)(1) of this section.

(d) *Rural development and other non-electric utility investments.* Although RUS recommends the use of separate subsidiaries as set forth in § 1717.858, if requested by a borrower that meets the 110 percent equity test and all other applicable requirements of this section, RUS will provide a lien subordination on the specific assets financed in the case of loans made directly to the borrower for rural development and other non-electric utility purposes, provided that the outstanding balance of all such loans lien subordinated under this paragraph (d), after taking into consideration the effect of the new loan, does not exceed 15 percent of the borrower's net worth and the security, including assurance of repayment, of loans made or guaranteed by RUS will remain reasonably adequate after granting the lien subordination. Investments lien subordinated under this paragraph shall be included among those investments subject to the 15 percent of total utility plant limitation set forth in 7 CFR 1717.654(b)(1), and granting of the lien subordination will not constitute

approval of the investment under 7 CFR part 1717, subpart N.

(e) *Requirements and controls not exempted.* All requirements and limitations imposed with respect to lien accommodations and subordinations by this subpart R that are not specifically exempted by this section are not exempted and shall continue to apply according to their terms.

[59 FR 3986, Jan. 28, 1994, as amended at 60 FR 3735, Jan. 19, 1995; 60 FR 67410, Dec. 29, 1995]

§§ 1717.861—1717.899 [Reserved]

Subpart S—Lien Accommodations for Supplemental Financing Required by 7 CFR 1710.110

SOURCE: 58 FR 53851, Oct. 19, 1993, unless otherwise noted.

§ 1717.900 Qualification requirements.

Applications for a lien accommodation for supplemental financing required by 7 CFR 1710.110 must meet the same requirements as an RUS insured loan. The justification and documentation materials submitted as part of the borrower's application for an insured loan also serve as the justification and documentation of the request for a lien accommodation for the required supplemental loan. Unless early approval under § 1717.901 is requested by a borrower, these applications will be processed during the same time as RUS's review of the borrower's application for the concurrent insured loan.

§ 1717.901 Early approval.

(a) *Conditions.* If requested by a borrower in writing, RUS will review the application for a lien accommodation for required supplemental financing early in the process, before funding is available for the concurrent RUS insured loan, and approve the lien accommodation if the following conditions are met:

(1) The required supplemental loan meets the requirements for an insured loan, as set forth in 7 CFR part 1710, subparts A through G, and other RUS regulations pertaining to required supplemental loans;

(2) The borrower has demonstrated the ability to obtain the funds that

would be needed to complete other portions of the project, if the portion to be constructed with private loan funds could not be used productively without completion of such other portions, in the event concurrent RUS insured loan funds are not forthcoming. Such evidence may include financial records demonstrating the availability of general funds, and/or a written commitment from the private lender to provide a loan for the remaining amount of financing required, with such commitment being conditioned upon the availability of a lien accommodation from RUS; and

(3) An authorized official of the borrower has requested early approval of the lien accommodation and explained the reasons therefor, and has certified that the funds are needed and will be drawn down before funds from the concurrent insured loan are expected to be available, assuming that the insured loan is approved.

(b) *Timeframe for RUS action.* (1) RUS will either approve or disapprove the lien accommodation within 90 days of receiving the borrower's request for early approval and the complete application for the concurrent RUS loan and required supplemental financing, in form and substance satisfactory to RUS, or notify the borrower in writing of the estimated date when a decision is expected. If an environmental assessment or an Environmental Impact Statement is required, additional time beyond the 90 days may be required to prepare these documents. RUS's approval of the lien accommodation will be conditioned upon execution and delivery by the borrower of a satisfactory security instrument, if required, and such additional information, documents, and opinions of counsel as RUS may require.

(2) If a mortgage or mortgage amendment is required, RUS will consult with the other mortgagees as to who will prepare the documents. Within 30 days of obtaining the documents satisfactory to RUS, including required execution counterparts, RUS will execute the documents and send them to the borrower, along with instructions pertaining to recording of the mortgage, an opinion of borrower's counsel, and

§ 1717.902

other matters. RUS will promptly notify the borrower upon receiving satisfactory evidence that the borrower has complied with said instructions.

(c) *Approval of concurrent insured loan.* Early approval of a lien accommodation for a required supplemental loan does not ensure that the concurrent RUS insured loan will be approved. The request for the concurrent insured loan will be reviewed when funds are available to make the loan. The borrower may be requested to update certain supporting information in the loan application if substantial time has elapsed since the lien accommodation or subordination was approved.

§ 1717.902 Other RUS requirements.

Supplemental loans required by 7 CFR 1710.110 are subject to the same post-loan requirements as insured RUS loans regarding accepted materials, construction standards, contracting and procurement procedures, standard forms of contracts, RUS approval of the advance of loan funds, and other matters.

§ 1717.903 Liability.

It is the intent of this subpart that any failure on the part of RUS to comply with any provisions of this subpart, including without limitation, those provisions setting forth specified timeframes for action by RUS on applications for lien accommodations or lien subordinations, shall not give rise to liability of any kind on the part of the Government or any employees of the Government including, without limitation, liability for damages, fees, expenses or costs incurred by or on behalf of a borrower, private lender or any other party.

§ 1717.904 Exemptions pursuant to section 306E of the RE Act.

(a) *General policy.* If a borrower's net worth to RUS debt ratio exceeds 110 percent, as determined by RUS, and the borrower is in compliance with all requirements of its mortgage, loan agreement with RUS, and any other agreement with RUS that have not been exempted in writing by RUS, RUS will expeditiously approve a lien accommodation for a concurrent supplemental loan if requested in writing by

7 CFR Ch. XVII (1–1–97 Edition)

the borrower, provided that the security, including assurance of repayment, of loans made or guaranteed by RUS will remain reasonably adequate. RUS's approval will be conditioned upon execution and delivery by the borrower of a security instrument satisfactory to RUS, if required, and such additional information, documents, and opinions of counsel as RUS may require.

(b) *Determination of net worth to RUS debt ratio.* A borrower's ratio of net worth to RUS debt will be determined as set forth in § 1717.860(b).

(c) *Requirements and controls exempted.* The applicable requirements and controls exempted by 7 CFR 1710.7(c) are also exempted with respect to concurrent supplemental loans.

(d) *Requirements and controls not exempted.* All requirements and controls applicable to concurrent supplemental financing set forth in this subpart and other RUS regulations that are not specifically exempted by 7 CFR 1710.7(c) are not exempted and shall continue to apply according to their terms. These include, but are not limited to:

(1) The applicable requirements listed in 7 CFR 1710.7(d); and

(2) The requirements set forth in § 1717.901(a) when a borrower requests early approval of a lien accommodation.

(e) *Procedures.* If a borrower meets the requirements of this section, upon receipt of a complete application RUS will promptly notify the borrower and lender in writing that the lien accommodation has been approved subject to the conditions set forth in paragraph (a) of this section.

MODEL FORM OF LOAN CONTRACT FOR
ELECTRIC DISTRIBUTION BORROWERS

AUTHORITY: 7 U.S.C. 901–950b; Pub. L. 103–
354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

Subpart A—General

§§ 1718.1—1718.49 [Reserved]

Subpart B—Mortgage for Distribution Borrowers

SOURCE: 60 FR 36888, July 18, 1995, unless
otherwise noted.

§ 1718.50 Definitions.

Unless otherwise indicated, terms
used in this subpart are defined as set
forth in 7 CFR 1710.2.

§ 1718.51 Policy.

(a) Adequate loan security must be
provided for loans made or guaranteed
by RUS. The loans are required to be
secured by a first mortgage lien on
most of the borrower's assets substan-
tially in the form set forth in appendix
A of this subpart. At the discretion of
RUS, this model form of mortgage may
be adapted to satisfy different legal re-
quirements among the states and indi-
vidual differences in lending cir-
cumstances, provided that such adapta-
tions are consistent with the policies
set forth in this subpart.

(b) Some borrowers, such as certain
public power districts, may not be able
to provide security in the form of a
first mortgage lien on their assets. In

these cases RUS will consider accept-
ing other forms of security, such as
resolutions and pledges of revenues.

(c) RUS may require supplemental
and amending mortgages to protect its
security, or in connection with addi-
tional loans.

(d) RUS may also require such other
security instruments (such as loan con-
tracts, security agreements, financing
statements, guarantees, and pledges) as
it deems appropriate.

(e) All distribution borrowers that re-
ceive a loan or loan guarantee from
RUS on or after August 17, 1995 will be
required to enter into a mortgage with
RUS that meets the requirements of
this subpart. The concurrence of any
other lenders secured under the bor-
rower's existing mortgage may be re-
quired before the borrower can enter
into a new mortgage.

§ 1718.52 Existing mortgages.

Nothing contained in this subpart
amends, invalidates, terminates or re-
scinds any existing mortgage entered
into between the borrower and RUS
and any other mortgagees.

§ 1718.53 Rights of other mortgagees.

Nothing contained in this subpart is
intended to alter or affect any other
mortgagee's rights under an existing
mortgage.

**§ 1718.54 Availability of model mort-
gage.**

Single copies of the model mortgage
(RUS Informational Publication 1718 B)
are available from the Administrative
Services Division, Rural Utilities Ser-
vice, United States Department of Agri-
culture, Washington, DC 20250–1500.
This document may be reproduced.

RESTATED MORTGAGE AND SECURITY
AGREEMENT, dated as of _____ 19____,

Rural Utilities Service, USDA

Pt. 1718, Subpt. B, App. A

(hereinafter sometimes called this "Mortgage") is made by and between

(hereinafter called the "Mortgagor"), a corporation existing under the laws of the State of _____, and the UNITED STATES OF AMERICA acting by and through the Administrator of the Rural Utilities Service (hereinafter called the "Government"), _____ {Supplemental Lender}, (hereinafter called "_____") a _____ existing under the laws of _____, and is intended to confer rights and benefits on both the Government and _____ as well as any and all other lenders pursuant to Article II of this Mortgage that enter into a supplemental mortgage in accordance with Section [2.04] of Article II hereof (the Government and any such other lenders being herein sometimes collectively referred to as the "Mortgagees").

RECITALS

WHEREAS, the Mortgagor, the Government and _____ are parties to that certain _____ Mortgage and Security Agreement dated as of _____, 19____, as supplemented, amended or restated (the "Original Mortgage" identified in Schedule "A" of this Mortgage) originally entered into between the Mortgagor, the Government acting by and through the Administrator of the Rural Electrification Administration, the predecessor of RUS, and _____;

WHEREAS, the Mortgagor deems it necessary to borrow money for its corporate purposes and to issue its promissory notes and other debt obligations therefor from time to time in one or more series, and to mortgage and pledge its property hereinafter described or mentioned to secure the payment of the same;

WHEREAS, the Mortgagor desires to enter into this Mortgage pursuant to which all secured debt of the Mortgagor hereunder shall be secured on parity;

WHEREAS, this Mortgage restates and consolidates the Original Mortgage while preserving the priority of the Lien under the Original Mortgage securing the payment of Mortgagor's outstanding obligations secured under the Original Mortgage, which indebtedness is described more particularly by listing the Original Notes in Schedule "A" hereto; and

WHEREAS, all acts necessary to make this Mortgage a valid and binding legal instrument for the security of such notes and obligations, subject to the terms of this Mortgage, have been in all respects duly authorized;

NOW, THEREFORE, THIS MORTGAGE WITNESSETH: That to secure the payment of the principal of (and premium, if any) and interest on the Original Notes and all Notes issued hereunder according to their tenor and effect, and the performance of all provisions therein and herein contained, and in

consideration of the covenants herein contained and the purchase or guarantee of Notes by the guarantors or holders thereof, the Mortgagor has mortgaged, pledged and granted a continuing security interest in, and by these presents does hereby grant, bargain, sell, alienate, remise, release, convey, assign, transfer, hypothecate, pledge, set over and confirm, pledge, and grant a continuing security interest and lien in for the purposes hereinafter expressed [other language may be required under various state laws], unto the Mortgagees all property, rights, privileges and franchises of the Mortgagor of every kind and description, real, personal or mixed, tangible and intangible, of the kind or nature specifically mentioned herein OR ANY OTHER KIND OR NATURE, except any Excepted Property, now owned or hereafter acquired by the Mortgagor (by purchase, consolidation, merger, donation, construction, erection or in any other way) wherever located, including (without limitation) all and singular the following:

GRANTING CLAUSE FIRST

A. all of those fee and leasehold interests in real property set forth in Schedule "B" hereto, subject in each case to those matters set forth in such Schedule;

B. all of the Mortgagor's interest in fixtures, easements, permits, licenses and rights-of-way comprising real property, and all other interests in real property, comprising any portion of the Utility System (as herein defined) located in the Counties listed in Schedule "B" hereto;

C. all right, title and interest of the Mortgagor in and to those contracts of the Mortgagor (i) relating to the ownership, operation or maintenance of any generation, transmission or distribution facility owned, whether solely or jointly, by the Mortgagor, (ii) for the purchase of electric power and energy by the Mortgagor and having an original term in excess of 3 years, (iii) for the sale of electric power and energy by the Mortgagor and having an original term in excess of 3 years, and (iv) for the transmission of electric power and energy by or on behalf of the Mortgagor and having an original term in excess of 3 years, including in respect of any of the foregoing, any amendments, supplements and replacements thereto;

D. all the property, rights, privileges, allowances and franchises particularly described in the annexed Schedule "B" are hereby made a part of, and deemed to be described in, this Granting Clause as fully as if set forth in this Granting Clause at length; and

ALSO ALL OTHER PROPERTY, real estate, lands, easements, servitudes, licenses, permits, allowances, consents, franchises, privileges, rights of way and other rights in or relating to real estate or the occupancy of the same; all power sites, storage rights,

Pt. 1718, Subpt. B, App. A

water rights, water locations, water appropriations, ditches, flumes, reservoirs, reservoir sites, canals, raceways, waterways, dams, dam sites, aqueducts, and all other rights or means for appropriating, conveying, storing and supplying water; all rights of way and roads; all plants for the generation of electric and other forms of energy (whether now known or hereafter developed) by steam, water, sunlight, chemical processes and/or (without limitation) all other sources of power (whether now known or hereafter developed); all power houses, gas plants, street lighting systems, standards and other equipment incidental thereto; all telephone, radio, television and other communications, image and data transmission systems, air conditioning systems and equipment incidental thereto, water wheels, waterworks, water systems, steam and hot water plants, substations, lines, service and supply systems, bridges, culverts, tracks, ice or refrigeration plants and equipment, offices, buildings and other structures and the equipment thereto all machinery, engines, boilers, dynamos, turbines, electric, gas and other machines, prime movers, regulators, meters, transformers, generators (including, but not limited to, engine-driven generators and turbogenerator units), motors, electrical, gas and mechanical appliances, conduits, cables, water, steam, gas or other pipes, gas mains and pipes, service pipes, fittings, valves and connections, pole and transmission lines, towers, overhead conductors and devices, underground conduits, underground conductors and devices, wires, cables, tools, implements, apparatus, storage battery equipment, and all other fixtures and personalty; all municipal and other franchises, consents, certificates or permits; all emissions allowances; all lines for the transmission and distribution of electric current and other forms of energy, gas, steam, water or communications, images and data for any purpose including towers, poles, wires, cables, pipes, conduits, ducts and all apparatus for use in connection therewith, and (except as hereinbefore or hereinafter expressly excepted) all the right, title and interest of the Mortgagor in and to all other property of any kind or nature appertaining to and/or used and/or occupied and/or employed in connection with any property hereinbefore described, but in all circumstances excluding Excepted Property;

GRANTING CLAUSE SECOND

All other property, real, personal or mixed, of whatever kind and description and wheresoever situated, including without limitation goods, accounts, money held in a trust account pursuant hereto or to a Loan Agreement, and general intangibles now owned or which may be hereafter acquired by the Mortgagor, but excluding Excepted Prop-

7 CFR Ch. XVII (1-1-97 Edition)

erty, now owned or which may be hereafter acquired by the Mortgagor, it being the intention hereof that all property, rights, privileges, allowances and franchisees now owned by the Mortgagor or acquired by the Mortgagor after the date hereof (other than Excepted Property) shall be as fully embraced within and subjected to the lien hereof as if such property were specifically described herein.

GRANTING CLAUSE THIRD

Also any Excepted Property that may, from time to time hereafter, by delivery or by writing of any kind, be subjected to the lien hereof by the Mortgagor or by anyone in its behalf; and any Mortgagee is hereby authorized to receive the same at any time as additional security hereunder for the benefit of all the Mortgagees. Such subjection to the lien hereof of any Excepted Property as additional security may be made subject to any reservations, limitations or conditions which shall be set forth in a written instrument executed by the Mortgagor or the person so acting in its behalf or by such Mortgagee respecting the use and disposition of such property or the proceeds thereof.

GRANTING CLAUSE FOURTH

Together with (subject to the rights of the Mortgagor set forth on Section [5.01]) all and singular the tenements, hereditaments and appurtenances belonging or in anywise appertaining to the aforesaid property or any part thereof, with the reversion and reversions, remainder and remainders and all the tolls, earnings, rents, issues, profits, revenues and other income, products and proceeds of the property subjected or required to be subjected to the lien of this Mortgage, and all other property of any nature appertaining to any of the plants, systems, business or operations of the Mortgagor, whether or not affixed to the realty, used in the operation of any of the premises or plants or the System, or otherwise, which are now owned or acquired by the Mortgagor, and all the estate, right, title and interest of every nature whatsoever, at law as well as in equity, of the Mortgagor in and to the same and every part thereof (other than Excepted Property with respect to any of the foregoing).

EXCEPTED PROPERTY

There is, however, expressly excepted and excluded from the lien and operation of this Mortgage the following described property of the Mortgagor, now owned or hereafter acquired (herein sometimes referred to as "Excepted Property"):

A. all shares of stock, securities or other interests of the Mortgagor in the National Rural Utilities Cooperative Finance Corporation, the National Bank for Cooperatives and the St. Paul Bank for Cooperatives other

Rural Utilities Service, USDA

Pt. 1718, Subpt. B, App. A

than any stock, securities or other interests that are specifically described in Subclause D of Granting Clause First as being subjected to the lien hereof;

B. all rolling stock (except mobile substations), automobiles, buses, trucks, truck cranes, tractors, trailers and similar vehicles and movable equipment, and all tools, accessories and supplies used in connection with any of the foregoing;

C. all vessels, boats, ships, barges and other marine equipment, all airplanes, airplane engines and other flight equipment, and all tools, accessories and supplies used in connection with any of the foregoing;

D. all office furniture, equipment and supplies that is not data processing, accounting or other computer equipment or software;

E. all leasehold interests for office purposes;

F. all leasehold interests of the Mortgagor under leases for an original term (including any period for which the Mortgagor shall have a right of renewal) of less than five (5) years;

G. all timber and crops (both growing and harvested) and all coal, ore, gas, oil and other minerals (both in place or severed);

H. the last day of the term of each leasehold estate (oral or written) and any agreement therefor, now or hereafter enjoyed by the Mortgagor and whether falling within a general or specific description of property herein: PROVIDED, HOWEVER, that the Mortgagor covenants and agrees that it will hold each such last day in trust for the use and benefit of all of the Mortgagees and Noteholders and that it will dispose of each such last day from time to time in accordance with such written order as the Mortgagee in its discretion may give;

I. all permits, licenses, franchises, contracts, agreements, contract rights and other rights not specifically subjected or required to be subjected to the lien hereof by the express provisions of this Mortgage, whether now owned or hereafter acquired by the Mortgagor, which by their terms or by reason of applicable law would become void or voidable if mortgaged or pledged hereunder by the Mortgagor, or which cannot be granted, conveyed, mortgaged, transferred or assigned by this Mortgage without the consent of other parties whose consent has been withheld, or without subjecting any Mortgagee to a liability not otherwise contemplated by the provisions of this Mortgage, or which otherwise may not be, hereby lawfully and effectively granted, conveyed, mortgaged, transferred and assigned by the Mortgagor; and

J. the property identified in Schedule "C" hereto.

PROVIDED, HOWEVER, that (i) if, upon the occurrence of an Event of Default, any Mortgagee, or any receiver appointed pursuant to statutory provision or order of court,

shall have entered into possession of all or substantially all of the Mortgaged Property, all the Excepted Property described or referred to in the foregoing Subdivisions A through H, inclusive, then owned or thereafter acquired by the Mortgagor shall immediately, and, in the case of any Excepted Property described or referred to in Subdivisions I through J, inclusive, upon demand of any Mortgagee or such receiver, become subject to the lien hereof to the extent permitted by law, and any Mortgagee or such receiver may, to the extent permitted by law, at the same time likewise take possession thereof, and (ii) whenever all Events of Default shall have been cured and the possession of all or substantially all of the Mortgaged Property shall have been restored to the Mortgagor, such Excepted Property shall again be excepted and excluded from the lien hereof to the extent and otherwise as hereinabove set forth.

However, pursuant to Granting Clause Third, the Mortgagor may subject to the lien of this Mortgage any Excepted Property, whereupon the same shall cease to be Excepted Property.

HABENDUM

TO HAVE AND TO HOLD all said property, rights, privileges and franchises of every kind and description, real, personal or mixed, hereby and hereafter (by supplemental mortgage or otherwise) granted, bargained, sold, aliened, remised, released, conveyed, assigned, transferred, mortgaged, encumbered, hypothecated, pledged, setover, confirmed, or subjected to a continuing security interest and lien as aforesaid, together with all the appurtenances thereto appertaining (said properties, rights, privileges and franchises, including any cash and securities hereafter deposited with any Mortgagee ((other than any such cash, if any, which is specifically stated herein not to be deemed part of the Mortgaged Property)), being herein collectively called the "Mortgaged Property") unto the Mortgagees and the respective assigns of the Mortgagees forever, to secure equally and ratably the payment of the principal of (and premium, if any) and interest on the Notes, according to their terms, without preference, priority or distinction as to interest or principal (except as otherwise specifically provided herein) or as to lien or otherwise of any Note over any other Note by reason of the priority in time of the execution, delivery or maturity thereof or of the assignment or negotiation thereof, or otherwise, and to secure the due performance of all of the covenants, agreements and provisions herein and in the Loan Agreements contained, and for the uses and purposes and upon the terms, conditions, provisos and agreements hereinafter expressed and declared.

SUBJECT, HOWEVER, to Permitted Encumbrances (as defined in Section 1.01).

ARTICLE I

DEFINITIONS & OTHER PROVISIONS OF GENERAL APPLICATION

Section 1.01. *Definitions.* In addition to the terms defined elsewhere in this Mortgage, the terms defined in this Article I shall have the meanings specified herein and under the UCC, unless the context clearly requires otherwise. The terms defined herein include the plural as well as the singular and the singular as well as the plural.

Accounting Requirements shall mean the requirements of any system of accounts prescribed by RUS so long as the Government is the holder, insurer or guarantor of any Notes, or, in the absence thereof, the requirements of generally accepted accounting principles applicable to businesses similar to that of the Mortgagor.

Additional Notes shall mean any Notes issued by the Mortgagor to the Government or any other lender pursuant to Article II of this Mortgage including any refunding, renewal, or substitute Notes which may from time to time be executed and delivered by the Mortgagor pursuant to the terms of Article II.

Board shall mean either the Board of Directors or the Board of Trustees, as the case may be, of the Mortgagor.

Business Day shall mean any day that the Government is open for business.

Debt Service Coverage Ratio ("DSC") shall mean the ratio determined as follows: for each calendar year add (i) Patronage Capital or Margins of the Mortgagor, (ii) Interest Expense on Total Long Term Debt of the Mortgagor (as computed in accordance with the principles set forth in the definition of TIER) and (iii) Depreciation and Amortization Expense of the Mortgagor, and divide the total so obtained by an amount equal to the sum of all payments of principal and interest required to be made on account of Total Long-Term Debt during such calendar year increasing said sum by any addition to interest expense on account of Restricted Rentals as computed with respect to the Times Interest Earned Ratio herein.

Depreciation and Amortization Expense shall mean an amount constituting the depreciation and amortization of the Mortgagor as computed pursuant to Accounting Requirements.

Electric System shall mean, and shall be broadly construed to encompass and include, all of the Mortgagor's interests in all electric production, transmission, distribution, conservation, load management, general plant and other related facilities, equipment or property and in any mine, well, pipeline, plant, structure or other facility for the development, production, manufacture, stor-

age, fabrication or processing of fossil, nuclear or other fuel of any kind or in any facility or rights with respect to the supply of water, in each case for use, in whole or in major part, in any of the Mortgagor's generating plants, now existing or hereafter acquired by lease, contract, purchase or otherwise or constructed by the Mortgagor, including any interest or participation of the Mortgagor in any such facilities or any rights to the output or capacity thereof, together with all additions, betterments, extensions and improvements to such Electric System or any part thereof hereafter made and together with all lands, easements and rights-of-way of the Mortgagor and all other works, property or structures of the Mortgagor and contract rights and other tangible and intangible assets of the Mortgagor used or useful in connection with or related to such Electric System, including without limitation a contract right or other contractual arrangement referred to in Granting Clause First, Subclause [(C)] but excluding any excepted property.

Environmental Law and Environmental Laws shall mean all federal, state, and local laws, regulations, and requirements related to protection of human health or the environment, including but not limited to the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (42 U.S.C. 9601 *et seq.*), the Resource Conservation and Recovery Act (42 U.S.C. 6901 *et seq.*), the Clean Water Act (33 U.S.C. 1251 *et seq.*) and the Clean Air Act (42 U.S.C. 7401 *et seq.*), and any amendments and implementing regulations of such acts.

Equity shall mean the total margins and equities and margins computed pursuant to Accounting Requirements, but excluding any Regulatory Created Assets.

Event of Default shall have the meaning specified in Section [4.01] hereof.

Excepted Property shall have the meaning stated in the Granting Clauses.

Government shall mean the United States of America acting by and through the Administrator of RUS and shall include its successors and assigns.

Government Notes shall mean the Original Notes, and any Additional Notes, issued by the Mortgagor to the Government, or guaranteed or insured as to payment by the Government.

Independent shall mean when used with respect to any specified person or entity means such a person or entity who (1) is in fact independent, (2) does not have any direct financial interest or any material indirect financial interest in the Mortgagor or in any affiliate of the Mortgagor and (3) is not connected with the Mortgagor as an officer, employee, promoter, underwriter, trustee, partner, director or person performing similar functions.

Rural Utilities Service, USDA

Pt. 1718, Subpt. B, App. A

Interest Expense shall mean an amount constituting the interest expense of the Mortgagor as computed pursuant to Accounting Requirements.

Lien shall mean any statutory or common law consensual or non-consensual mortgage, pledge, security interest, encumbrance, lien, right of set off, claim or charge of any kind, including, without limitation, any conditional sale or other title retention transaction, any lease transaction in the nature thereof and any secured transaction under the UCC.

Loan Agreement shall mean any agreement executed by and between the Mortgagor and the Government or any other lender in connection with the execution and delivery of any Notes secured hereby.

Long-Term Debt shall mean any amount included in Total Long-Term Debt pursuant to Accounting Requirements.

Long-Term Lease shall mean a lease having an unexpired term (taking into account terms of renewal at the option of the lessor, whether or not such lease has previously been renewed) of more than 12 months.

Margins shall mean the sum of amounts recorded as operating margins and non-operating margins as computed in accordance with Accounting Requirements.

Maximum Debt Limit, if any, shall mean the amount more particularly described in Schedule "A" hereof.

Mortgage shall mean this Restated Mortgage and Security Agreement, including any amendments or supplements thereto from time to time.

Mortgaged Property shall have the meaning specified as stated in the Habendum to the Granting Clauses.

MORTGAGEE or MORTGAGEES shall mean the Government, _____ {the supplemental lender}, _____ their successors and assigns as well as any and all other lenders pursuant to Article II of this Mortgage that enter into a supplemental mortgage in accordance with Section [2.04] of Article II hereof, their successors and assigns.

Net Utility Plant shall mean the amount constituting the total utility plant of the Mortgagor less depreciation computed in accordance with Accounting Requirements.

Note or Notes shall mean one or more of the Government Notes, and any other Notes which may, from time to time, be secured under this Mortgage.

Noteholder or Noteholders shall mean one or more of the holders of Notes secured by this Mortgage; PROVIDED, however, that in the case of any Notes that have been guaranteed or insured as to payment by RUS, as to such Notes Noteholder or Noteholders shall mean RUS, exclusively, regardless of whether such notes are in the possession of RUS.

Original Mortgage means the instrument(s) identified as such in Schedule "A" hereof.

Original Notes shall mean the Notes listed on Schedule "A" hereto as such, such Notes being instruments evidencing outstanding indebtedness of the Mortgagor (i) to the Government (including indebtedness which has been issued by the Mortgagor to a third party and guaranteed or insured as to payment by the Government) and (ii) to each other Mortgagee on the date of this Mortgage.

Outstanding Notes shall mean as of the date of determination, (i) all Notes theretofore issued, executed and delivered to any Mortgagee and (ii) any Notes guaranteed or insured as to payment by the Government, *except* (a) Notes referred to in clause (i) or (ii) for which the principal and interest have been fully paid and which have been canceled by the Noteholder, and (b) Notes the payment for which has been provided for pursuant to Section [5.03].

Permitted Debt shall have the meaning specified in Section [3.08].

Permitted Encumbrances shall mean:

(1) as to the property specifically described in Granting Clause First, the restrictions, exceptions, reservations, conditions, limitations, interests and other matters which are set forth or referred to in such descriptions and each of which fits one or more of the clauses of this definition, PROVIDED, such matters do not in the aggregate materially detract from the value of the Mortgaged Property taken as a whole and do not materially impair the use of such property for the purposes for which it is held by the Mortgagor;

(2) liens for taxes, assessments and other governmental charges which are not delinquent;

(3) liens for taxes, assessments and other governmental charges already delinquent which are currently being contested in good faith by appropriate proceedings; PROVIDED the Mortgagor shall have set aside on its books adequate reserves with respect thereto;

(4) mechanics', workmen's, repairmen's, materialmen's, warehousemen's and carriers' liens and other similar liens arising in the ordinary course of business for charges which are not delinquent, or which are being contested in good faith and have not proceeded to judgment; PROVIDED the Mortgagor shall have set aside on its books adequate reserves with respect thereto;

(5) liens in respect of judgments or awards with respect to which the Mortgagor shall in good faith currently be prosecuting an appeal or proceedings for review and with respect to which the Mortgagor shall have secured a stay of execution pending such appeal or proceedings for review; PROVIDED the Mortgagor shall have set aside on its books adequate reserves with respect thereto;

(6) easements and similar rights granted by the Mortgagor over or in respect of any Mortgaged Property, PROVIDED that in the opinion of the Board or a duly authorized officer of the Mortgagor such grant will not impair the usefulness of such property in the conduct of the Mortgagor's business and will not be prejudicial to the interests of the Mortgagees, and similar rights granted by any predecessor in title of the Mortgagor;

(7) easements, leases, reservations or other rights of others in any property of the Mortgagor for streets, roads, bridges, pipes, pipe lines, railroads, electric transmission and distribution lines, telegraph and telephone lines, the removal of oil, gas, coal or other minerals and other similar purposes, flood rights, river control and development rights, sewage and drainage rights, restrictions against pollution and zoning laws and minor defects and irregularities in the record evidence of title, PROVIDED that such easements, leases, reservations, rights, restrictions, laws, defects and irregularities do not materially affect the marketability of title to such property and do not in the aggregate materially impair the use of the Mortgaged Property taken as a whole for the purposes for which it is held by the Mortgagor;

(8) liens upon lands over which easements or rights of way are acquired by the Mortgagor for any of the purposes specified in Clause [(7)] of this definition, securing indebtedness neither created, assumed nor guaranteed by the Mortgagor nor on account of which it customarily pays interest, which liens do not materially impair the use of such easements or rights of way for the purposes for which they are held by the Mortgagor;

(9) leases existing at the date of this instrument affecting property owned by the Mortgagor at said date which have been previously disclosed to the Mortgagees in writing and leases for a term of not more than two years (including any extensions or renewals) affecting property acquired by the Mortgagor after said date;

(10) terminable or short term leases or permits for occupancy, which leases or permits expressly grant to the Mortgagor the right to terminate them at any time on not more than six months' notice and which occupancy does not interfere with the operation of the business of the Mortgagor;

(11) any lien or privilege vested in any lessor, licensor or permittor for rent to become due or for other obligations or acts to be performed, the payment of which rent or performance of which other obligations or acts is required under leases, subleases, licenses or permits, so long as the payment of such rent or the performance of such other obligations or acts is not delinquent;

(12) liens or privileges of any employees of the Mortgagor for salary or wages earned but not yet payable;

(13) the burdens of any law or governmental regulation or permit requiring the Mortgagor to maintain certain facilities or perform certain acts as a condition of its occupancy of or interference with any public lands or any river or stream or navigable waters;

(14) any irregularities in or deficiencies of title to any rights-of-way for pipe lines, telephone lines, telegraph lines, power lines or appurtenances thereto, or other improvements thereon, and to any real estate used or to be used primarily for right-of-way purposes, PROVIDED that in the opinion of counsel for the Mortgagor, the Mortgagor shall have obtained from the apparent owner of the lands or estates therein covered by any such right-of-way a sufficient right, by the terms of the instrument granting such right-of-way, to the use thereof for the construction, operation or maintenance of the lines, appurtenances or improvements for which the same are used or are to be used, or PROVIDED that in the opinion of counsel for the Mortgagor, the Mortgagor has power under eminent domain, or similar statutes, to remove such irregularities or deficiencies;

(15) rights reserved to, or vested in, any municipality or governmental or other public authority to control or regulate any property of the Mortgagor, or to use such property in any manner, which rights do not materially impair the use of such property, for the purposes for which it is held by the Mortgagor;

(16) any obligations or duties, affecting the property of the Mortgagor, to any municipality or governmental or other public authority with respect to any franchise, grant, license or permit;

(17) any right which any municipal or governmental authority may have by virtue of any franchise, license, contract or statute to purchase, or designate a purchaser of or order the sale of, any property of the Mortgagor upon payment of cash or reasonable compensation therefor or to terminate any franchise, license or other rights or to regulate the property and business of the Mortgagor; PROVIDED, HOWEVER, that nothing in this clause 17 is intended to waive any claim or rights that the Government may otherwise have under Federal laws;

(18) as to properties of other operating electric companies acquired after the date of this Mortgage by the Mortgagor as permitted by Section [3.10] hereof, reservations and other matters as to which such properties may be subject as more fully set forth in such Section;

(19) any lien required by law or governmental regulations as a condition to the transaction of any business or the exercise of any privilege or license, or to enable the Mortgagor to maintain self-insurance or to participate in any fund established to cover any insurance risks or in connection with

Rural Utilities Service, USDA

workmen's compensation, unemployment insurance, old age pensions or other social security, or to share in the privileges or benefits required for companies participating in such arrangements; PROVIDED, HOWEVER, that nothing in this clause 19 is intended to waive any claim or rights that the Government may otherwise have under Federal laws;

(20) liens arising out of any defeased mortgage or indenture of the Mortgagor;

(21) the undivided interest of other owners, and liens on such undivided interests, in property owned jointly with the Mortgagor as well as the rights of such owners to such property pursuant to the ownership contracts;

(22) any lien or privilege vested in any lessor, licensor or permittor for rent to become due or for other obligations or acts to be performed, the payment of which rent or the performance of which other obligations or acts is required under leases, subleases, licenses or permits, so long as the payment of such rent or the performance of such other obligations or acts is not delinquent;

(23) purchase money mortgages permitted by Section [3.08]; and

(24) the Original Mortgage.

Property Additions shall mean Utility System property as to which the Mortgagor shall provide Title Evidence and which shall be (or, if retired, shall have been) subject to the lien of this Mortgage, which shall be properly chargeable to the Mortgagor's utility plant accounts under Accounting Requirements (including property constructed or acquired to replace retired property credited to such accounts) and which shall be:

(1) acquired (including acquisition by merger, consolidation, conveyance or transfer) or constructed by the Mortgagor after the date hereof, including property in the process of construction, insofar as not reflected on the books of the Mortgagor with respect to periods on or prior to the date hereof, and

(2) used or useful in the utility business of the Mortgagor conducted with the properties described in the Granting Clauses of this Mortgage, even though separate from and not physically connected with such properties.

"Property Additions" shall also include:

(3) easements and rights-of-way that are useful for the conduct of the utility business of the Mortgagor, and

(4) property located or constructed on, over or under public highways, rivers or other public property if the Mortgagor has the lawful right under permits, licenses or franchises granted by a governmental body having jurisdiction in the premises or by the law of the State in which such property is located to maintain and operate such property for an unlimited, indeterminate or indefinite period or for the period, if any, specified in

Pt. 1718, Subpt. B, App. A

such permit, license or franchise or law and to remove such property at the expiration of the period covered by such permit, license or franchise or law, or if the terms of such permit, license, franchise or law require any public authority having the right to take over such property to pay fair consideration therefor.

"Property Additions" shall NOT include:

(a) good will, going concern value, contracts, agreements, franchises, licenses or permits, whether acquired as such, separate and distinct from the property operated in connection therewith, or acquired as an incident thereto, or

(b) any shares of stock or indebtedness or certificates or evidences of interest therein or other securities, or

(c) any plant or system or other property in which the Mortgagor shall acquire only a leasehold interest, or any betterments, extensions, improvements or additions (other than movable physical personal property which the Mortgagor has the right to remove), of, upon or to any plant or system or other property in which the Mortgagor shall own only a leasehold interest unless (i) the term of the leasehold interest in the property to which such betterment, extension, improvement or addition relates shall extend for at least 75% of the useful life of such betterment, extension, improvement or addition and (ii) the lessor shall have agreed to give the Mortgagee reasonable notice and opportunity to cure any default by the Mortgagor under such lease and not to disturb any Mortgagee's possession of such leasehold estate in the event any Mortgagee succeeds to the Mortgagor's interest in such lease upon any Mortgagee's exercise of any remedies under this Mortgage so long as there is no default in the performance of the tenant's covenants contained therein, or

(d) any property of the Mortgagor subject to the Permitted Encumbrance described in clause [(23)] of the definition thereof.

Prudent Utility Practice shall mean any of the practices, methods and acts which, in the exercise of reasonable judgment, in light of the facts, including, but not limited to, the practices, methods and acts engaged in or approved by a significant portion of the electric utility industry prior thereto, known at the time the decision was made, would have been expected to accomplish the desired result consistent with cost-effectiveness, reliability, safety and expedition. It is recognized that Prudent Utility Practice is not intended to be limited to optimum practice, method or act to the exclusion of all others, but rather is a spectrum of possible practices, methods or acts which could have been expected to accomplish the desired result at the lowest reasonable cost consistent with cost-effectiveness, reliability, safety and expedition.

REA shall mean the Rural Electrification Administration of the United States Department of Agriculture, the predecessor of RUS.

Regulatory Created Assets shall mean the sum of any amounts properly recordable as unrecovered plant and regulatory study costs or as other regulatory assets, pursuant to Accounting Requirements.

Restricted Rentals shall mean all rentals required to be paid under finance leases and charged to income, exclusive of any amounts paid under any such lease (whether or not designated therein as rental or additional rental) for maintenance or repairs, insurance, taxes, assessments, water rates or similar charges. For the purpose of this definition the term “finance lease” shall mean any lease having a rental term (including the term for which such lease may be renewed or extended at the option of the lessee) in excess of 3 years and covering property having an initial cost in excess of \$250,000 other than aircraft, ships, barges, automobiles, trucks, trailers, rolling stock and vehicles; office, garage and warehouse space; office equipment and computers.

RUS shall mean the Rural Utilities Service, an agency of the United States Department of Agriculture, or if at any time after the execution of this Mortgage RUS is not existing and performing the duties of administering a program of rural electrification as currently assigned to it, then the entity performing such duties at such time.

Security Interest shall mean any assignment, transfer, mortgage, hypothecation or pledge.

Subordinated Indebtedness shall mean secured indebtedness of the Mortgagor, payment of which shall be subordinated to the prior payment of the Notes in accordance with the provisions of Section [3.08] hereof by subordination agreement in form and substance satisfactory to each Mortgagee which approval will not be unreasonably withheld.

Supplemental Mortgage shall mean an instrument of the type described in Section [2.04].

Times Interest Earned Ratio (“TIER”) shall mean the ratio determined as follows: for each calendar year: add (i) patronage capital or margins of the Mortgagor and (ii) Interest Expense on Total Long-Term Debt of the Mortgagor and divide the total so obtained by Interest Expense on Total Long-Term Debt of the Mortgagor, *provided, however*, that in computing Interest Expense on Total Long-Term Debt, there shall be added, to the extent not otherwise included, an amount equal to 33-1/3% of the excess of Restricted Rentals paid by the Mortgagor over 2% of the Mortgagor's Equity.

Title Evidence shall mean with respect to any real property:

(1) an opinion of counsel to the effect that the Mortgagor has title, whether fairly deducible of record or based upon prescriptive

rights (or, as to personal property, based on such evidence as counsel shall determine to be sufficient), as in the opinion of counsel is satisfactory for the use thereof in connection with the operations of the Mortgagor, and counsel in giving such opinion may disregard any irregularity or deficiency in the record evidence of title which, in the opinion of such counsel, can be cured by proceedings within the power of the Mortgagor or does not substantially impair the usefulness of such property for the purpose of the Mortgagor and may base such opinion upon counsel's own investigation or upon affidavits, certificates, abstracts of title, statements or investigations made by persons in whom such counsel has confidence or upon examination of a certificate or guaranty of title or policy of title insurance in which counsel has confidence; or

(2) a mortgagee's policy of title insurance in the amount of the cost to the Mortgagor of the land included in Property Additions, as such cost is determined by the Mortgagor in accordance with the Accounting Requirements, issued in favor of the Mortgagees by an entity authorized to insure title in the states where the subject property is located, showing the Mortgagor as the owner of the subject property and insuring the lien of this Mortgage; and with respect to any *personal property* a certificate of the general manager or other duly authorized officer that the Mortgagor lawfully owns and is possessed of such property.

Total Assets shall mean an amount constituting total assets of the Mortgagor as computed pursuant to Accounting Requirements, but excluding any Regulatory Created Assets.

Total Long-Term Debt shall mean the total outstanding long-term debt of the Mortgagor as computed pursuant to Accounting Requirements.

Total Utility Plant shall mean the total of all property properly recorded in the utility plant accounts of the Mortgagor, pursuant to Accounting Requirements.

Uniform Commercial Code or UCC shall mean the UCC of the state referred to in Section [1.04], and if Mortgaged Property is located in a state other than that state, then as to such Mortgaged Property UCC refers to the UCC in effect in the state where such property is located.

Utility System shall mean the Electric System and all of the Mortgagor's interest in community infrastructure located substantially within its electric service territory, namely water and waste systems, solid waste disposal facilities, telecommunications and other electronic communications systems, and natural gas distribution systems.

SECTION 1.02. *General Rules of Construction:*

a. Accounting terms not referred to above are used in this Mortgage in their ordinary

Rural Utilities Service, USDA

Pt. 1718, Subpt. B, App. A

sense and any computations relating to such terms shall be computed in accordance with the Accounting Requirements.

b. Any reference to “directors” or “board of directors” shall be deemed to mean “trustees” or “board of trustees,” as the case may be.

SECTION 1.03. *Special Rules of Construction if RUS is a Mortgagee:* During any period that RUS is a Mortgagee, the following additional provisions shall apply:

a. In the case of any Notes that have been guaranteed or insured as to payment by RUS, as to such Notes RUS shall be considered to be the Noteholder, exclusively, regardless of whether such Notes are in the possession of RUS.

b. In the case of any prior approval rights conferred upon RUS by Federal statutes, including (without limitation) Section 7 of the Rural Electrification Act of 1936, as amended, with respect to the sale or disposition of property, rights, or franchises of the Mortgagor, all such statutory rights are reserved except to the extent that they are expressly modified or waived in this Mortgage.

SECTION 1.04. *Governing Law:* This Mortgage shall be construed in and governed by Federal law to the extent applicable, and otherwise by the laws of the State of _____.

SECTION 1.05 *Notices:* All demands, notices, reports, approvals, designations, or directions required or permitted to be given hereunder shall be in writing and shall be deemed to be properly given if sent by registered or certified mail, postage prepaid, or delivered by hand, or sent by facsimile transmission, receipt confirmed, addressed to the proper party or parties at the following address:

As to the Mortgagor:

As to the Mortgagee:

Rural Utilities Service,
United States Department of Agriculture,
Washington, DC 20250-1500

and as to any other person, firm, corporation or governmental body or agency having an interest herein by reason of being a Mortgagee, at the last address designated by such person, firm, corporation, governmental body or agency to the Mortgagor and the other Mortgagees. Any such party may from time to time designate to each other a new address to which demands, notices, reports, approvals, designations or directions may be addressed, and from and after any such designation the address designated shall be deemed to be the address of such party in lieu of the address given above.

ARTICLE II

ADDITIONAL NOTES

SECTION 2.01. *Additional Notes:* (a) Without the prior consent of any Mortgagee or any Noteholder, the Mortgagor may issue Additional Notes to the Government or to another lender or lenders for the purpose of acquiring, procuring or constructing new or replacement Eligible Property Additions which Notes will thereupon be secured equally and ratably with the Notes if each of the following requirements are satisfied:

(1) As evidenced by a certificate of an Independent certified public accountant sent to each Mortgagee on or before the first advance of proceeds from such Additional Notes:

(i) The Mortgagor shall have achieved for each of the two calendar years immediately preceding the issuance of such Additional Notes, a TIER of not less than 1.5 and a DSC of not less than 1.25;

(ii) After taking into account the effect of such Additional Notes on the Total Long Term Debt of the Mortgagor, the ratio of the Mortgagor's Net Utility Plant to its Total Long Term Debt shall be greater than or equal to 1.0 on a pro forma basis;

(iii) After taking into account the effect of such Additional Notes on the Total Assets of such Mortgagor, the Mortgagor shall have Equity greater than or equal to 27 percent of Total Assets on a pro forma basis; and

(iv) The sum of the aggregate principal amount of such Additional Notes (if any) that are not related to the Electric System if added to the aggregate outstanding principal amount of all the existing Notes (if any) that are not related to the Electric System will not exceed 30% of the Mortgagor's Equity on a pro forma basis.

(2) No Event of Default has occurred and is continuing hereunder, or any event which with the giving of notice or lapse of time or both would become an Event of Default has occurred and is continuing.

(3) The Eligible Property Additions being constructed, acquired, procured or replaced are part of the Mortgagor's Utility System.

(4) The Borrower's general manager or other duly authorized officer shall send to each of the Mortgagees a certificate in substantially the form attached hereto as [Exhibit A] on or before the date of the first advance of proceeds from such Additional Notes.

(b) For purposes of this section:

(1) “Eligible Property Additions” shall mean Property Additions acquired or whose construction was completed not more than 5 years prior to the issuance of the Additional Notes and Property Additions acquired or whose construction is started and/or completed not more than 4 years after issuance of the Additional Notes, but shall exclude any Property Additions financed by any

other debt secured under the Mortgage at the time additional Notes are issued;

(2) Notes are considered to be “issued” on, and the date of “issuance” shall be, the date on which they are executed by the Mortgagor; and

(3) For purposes of calculating the pro forma ratios in subparagraphs (a)(1)(ii) and (iii), the values for Total Long Term Debt and Total Assets before debt issuance and the values for Equity and Net Utility Plant shall be the most recently available end-of-month figures preceding the issuance of the Additional Notes, but in no case for a month ending more than 180 days preceding such issuance.

SECTION 2.02. *Refunding or Refinancing Notes:* The Mortgagor shall also have the right without the consent of any Mortgagee or any Noteholder to issue Additional Notes for the purpose of refunding or refinancing any Notes so long as the total amount of outstanding indebtedness evidenced by such Additional Note or Notes is not greater than 105% of the then outstanding principal balance of the Note or Notes being refunded or refinanced. PROVIDED, HOWEVER, that the Mortgagor may not exercise its rights under this Section if an Event of Default has occurred and is continuing, or any event which with the giving of notice or lapse of time or both would become an Event of Default has occurred and is continuing. On or before the first advance of proceeds from Notes issued under this section, the Mortgagor shall notify each Mortgagee of the refunding or refinancing. Additional Notes issued pursuant to this Section [2.02] will thereupon be secured equally and ratably with the Notes.

SECTION 2.03. *Other Additional Notes.* With the prior written consent of each Mortgagee, the Mortgagor may issue Additional Notes to the Government or any lender or lenders, which Notes will thereupon be secured equally and ratably with Notes without regard to whether any of the requirements of Sections [2.01] or [2.02] are satisfied.

SECTION 2.04. *Additional Lenders Entitled to the Benefits of This Mortgage:* Without the prior consent of any Mortgagee or any Noteholder, each new lender designated as a payee in any Additional Notes issued by the Mortgagor pursuant to Section [2.01] or [2.02] of this Mortgage shall become a Mortgagee hereunder upon the execution and delivery by the Mortgagor and such lender of a supplemental mortgage hereto designating such lender as a Mortgagee hereunder. Such new lender shall be entitled to the benefits of this Mortgage without further act or deed. Each Mortgagee and each person or entity that becomes a lender pursuant to Section [2.01] or [2.02] of this Mortgage shall, upon the request of the Mortgagor to do so, execute and deliver a supplement to this Mortgage in substantially the form set forth in Section [2.05] to evidence the addition of such new

lender as an additional Mortgagee entitled to the benefits of this Mortgage. The failure of any existing Mortgagee to enter into such supplemental mortgage shall not deprive the new lender of its rights under this Mortgage; provided that such additional indebtedness otherwise conforms in all respects with the requirements for issuing Additional Notes under this Mortgage.

SECTION 2.05. *Form of Supplemental Mortgage:* (a) The form of supplemental mortgage referred to in Section [2.04] is attached to this Mortgage as Exhibit B and hereby incorporated by reference as if set forth in full at this point.

(b) In the event that the Mortgagor subsequently issues Additional Notes pursuant to Sections [2.01] or [2.02] to any existing Mortgagee and that Mortgagee desires further assurance that such Additional Notes will be secured by the lien of the Mortgage, an instrument substantially in the form of the supplemental mortgage attached as Exhibit B may be used.

(c) In the event that the Mortgagor issues Additional Notes pursuant to Section [2.03] to either an existing Mortgagee or a new lender, in either case with the prior written consent of each Mortgagee, then an instrument substantially in the form of the supplemental mortgage attached as Exhibit B may also be used.

ARTICLE III—PARTICULAR COVENANTS OF THE MORTGAGOR

SECTION 3.01. *Payment of Debt Service on Notes:* The Mortgagor will duly and punctually pay the principal, premium, if any, and interest on the Notes in accordance with the terms of the Notes, the Loan Contracts, this Mortgage and any Supplemental Mortgage authorizing such Notes.

SECTION 3.02. *Warranty of Title:* (a) At the time of the execution and delivery of this instrument, the Mortgagor has good and marketable title in fee simple to the real property specifically described in Granting Clause First as owned in fee and good and marketable title to the interests in real property specifically described in Granting Clause [First], subject to no mortgage, lien, charge or encumbrance except as stated therein, and has full power and lawful authority to grant, bargain, sell, alien, remise, release, convey, assign, transfer, encumber, mortgage, pledge, set over and confirm said real property and interests in real property in the manner and form aforesaid.

(b) At the time of the execution and delivery of this instrument, the Mortgagor lawfully owns and is possessed of the personal property specifically described in Granting Clauses [First and Second], subject to no mortgage, lien, charge or encumbrance except as stated therein, and has full power and lawful authority to mortgage, assign,

Rural Utilities Service, USDA

Pt. 1718, Subpt. B, App. A

transfer, deliver, pledge and grant a continuing security interest in said property and, including any proceeds thereof, in the manner and form aforesaid.

(c) The Mortgagor hereby does and will forever warrant and defend the title to the property specifically described in Granting Clause First against the claims and demands of all persons whomsoever, except Permitted Encumbrances.

SECTION 3.03. *After-Acquired Property; Further Assurances; Recording:* (a) All property of every kind, other than Excepted Property, acquired by the Mortgagor after the date hereof, shall, immediately upon the acquisition thereof by the Mortgagor, and without any further mortgage, conveyance or assignment, become subject to the lien of this Mortgage; SUBJECT, HOWEVER, to Permitted Encumbrances and the exceptions, if any, to which all of the Mortgagees consent. Nevertheless, the Mortgagor will do, execute, acknowledge and deliver all and every such further acts, conveyances, mortgages, financing statements and assurances as any Mortgagee shall require for accomplishing the purposes of this Mortgage.

(b) The Mortgagor will cause this Mortgage and all Supplemental Mortgages and other instruments of further assurance, including all financing statements covering security interests in personal property, to be promptly recorded, registered and filed, and will execute and file such financing statements and cause to be issued and filed such continuation statements, all in such manner and in such places as may be required by law fully to preserve and protect the rights of all of the Mortgagees and Noteholders hereunder to all property comprising the Mortgaged Property. The Mortgagor will furnish to each Mortgagee:

(1) promptly after the execution and delivery of this instrument and of each Supplemental Mortgage or other instrument of further assurance, an Opinion of Counsel stating that, in the opinion of such Counsel, this instrument and all such Supplemental Mortgages and other instruments of further assurance have been properly recorded, registered and filed to the extent necessary to make effective the lien intended to be created by this Mortgage, and reciting the details of such action or referring to prior Opinions of Counsel in which such details are given, and stating that all financing statements and continuation statements have been executed and filed that are necessary fully to preserve and protect the rights of all of the Mortgagees and Noteholders hereunder, or stating that, in the opinion of such Counsel, no such action is necessary to make the lien effective; and

(2) within 30 days after _____ in each year beginning with the year ____, an Opinion of Counsel, dated as of such date, either stating that, in the opinion of such Counsel,

such action has been taken with respect to the recording, registering, filing, re-recording, re-registering and re-filing of this instrument and of all Supplemental Mortgages, financing statements, continuation statements or other instruments of further assurances as is necessary to maintain the lien of this Mortgage (including the lien on any property acquired by the Mortgagor after the execution and delivery of this instrument and owned by the Mortgagor at the end of preceding calendar year) and reciting the details of such action or referring to prior Opinions of Counsel in which such details are given, and stating that all financing statements and continuation statements have been executed and filed that are necessary to fully preserve and protect the rights of all of the Mortgagees and Noteholders hereunder, or stating that, in the opinion of such Counsel, no such action is necessary to maintain such lien.

SECTION 3.04. *Environmental Requirements and Indemnity:* (a) The Mortgagor shall, with respect to all facilities which may be part of the Mortgaged Property, comply with all Environmental Laws.

(b) The Mortgagor shall defend, indemnify, and hold harmless each Mortgagee, its successors and assigns, from and against any and all liabilities, losses, damages, costs, expenses (including but not limited to reasonable attorneys' fees and expenses), causes of actions, administrative proceedings, suits, claims, demands, or judgments of any nature arising out of or in connection with any matter related to the Mortgage Property and any Environmental Law, including but not limited to:

(1) the past, present, or future presence of any hazardous substance, contaminant, pollutant, or hazardous waste on or related to the Mortgaged Property;

(2) any failure at any time by the undersigned to comply with the terms of any order related to the Mortgaged Property and issued by any federal, state, or municipal department or agency (other than RUS) exercising its authority to enforce any Environmental Law; and

(3) any lien or claim imposed under any Environmental Law related to clause (1).

(c) Within 10 (ten) business days after receiving knowledge of any liability, losses, damages, costs, expenses (including but not limited to reasonable attorneys' fees and expenses), cause of action, administrative proceeding, suit, claim, demand, judgment, lien, reportable event including but not limited to the release of a hazardous substance, or potential or actual violation or non-compliance arising out of or in connection with the Mortgaged Property and any Environmental Law, the Mortgagor shall provide each Mortgagee with written notice of such matter. With respect to any matter upon which it has provided such notice, the Mortgagor

shall immediately take any and all appropriate actions to remedy, cure, defend, or otherwise affirmatively respond to the matter.

SECTION 3.05. *Payment of Taxes:* The Mortgagor will pay or cause to be paid as they become due and payable all taxes, assessments and other governmental charges lawfully levied or assessed or imposed upon the Mortgaged Property or any part thereof or upon any income therefrom, and also (to the extent that such payment will not be contrary to any applicable laws) all taxes, assessments and other governmental charges lawfully levied, assessed or imposed upon the lien or interest of the Noteholders or of the Mortgagees in the Mortgaged Property, so that (to the extent aforesaid) the lien of this Mortgage shall at all times be wholly preserved at the cost of the Mortgagor and without expense to the Mortgagees or the Noteholders; PROVIDED, HOWEVER, that the Mortgagor shall not be required to pay and discharge or cause to be paid and discharged any such tax, assessment or governmental charge to the extent that the amount, applicability or validity thereof shall currently be contested in good faith by appropriate proceedings and the Mortgagor shall have established and shall maintain adequate reserves on its books for the payment of the same.

SECTION 3.06. *Authority to Execute and Deliver Notes, Loan Agreements and Mortgage; All Action Taken; Enforceable Obligations:* The Mortgagor is authorized under its articles of incorporation and bylaws [or code of regulations] and all applicable laws and by corporate action to execute and deliver the Notes, any Additional Notes, the Loan Agreements and this Mortgage. The Notes, the Loan Agreements and this Mortgage are, and any Additional Notes and Loan Agreements when executed and delivered will be, the valid and enforceable obligations of the Mortgagor in accordance with their respective terms.

SECTION 3.07. *Restrictions on Further Encumbrances on Property:* Except to secure Additional Notes, the Mortgagor will not, without the prior written consent of each Mortgagee, create or incur or suffer or permit to be created or incurred or to exist any Lien, charge, assignment, pledge, mortgage on any of the Mortgaged Property inferior to, prior to, or on a parity with the Lien of this Mortgage except for the Permitted Encumbrances. Subject to the provisions of Section [3.08], or unless approved by each of the Mortgagees, the Mortgagor will purchase all materials, equipment and replacements to be incorporated in or used in connection with the Mortgaged Property outright and not subject to any conditional sales agreement, chattel mortgage, bailment, lease or other agreement reserving to the seller any right, title or Lien.

SECTION 3.08. *Restrictions On Additional Permitted Debt:* The Mortgagor shall not incur, assume, guarantee or otherwise become liable in respect of any debt for borrowed money and Restricted Rentals (including Subordinated Debt) other than the following: (“Permitted Debt”)

(1) Additional Notes issued in compliance with Article II hereof;

(2) Purchase money indebtedness in non-Utility System property, in an amount not exceeding 10% of Net Utility Plant;

(3) Restricted Rentals in an amount not to exceed 5% of Equity during any 12 consecutive calendar month period;

(4) Unsecured lease obligations incurred in the ordinary course of business except Restricted Rentals;

(5) Debt represented by dividends declared but not paid; and

(6) Subordinated Indebtedness approved by each Mortgagee.

PROVIDED, However, that the Mortgagor may incur Permitted Debt without the consent of the Mortgagee only so long as there exists no Event of Default hereunder and there has been no continuing occurrence which with the passage of time and giving of notice could become an Event of Default hereunder.

PROVIDED, FURTHER, by executing this Mortgage any consent of RUS that the Mortgagor would otherwise be required to obtain under this Section is hereby deemed to be given or waived by RUS by operation of law to the extent, but only to the extent, that to impose such a requirement of RUS consent would clearly violate existing federal laws or government regulations.

SECTION 3.09. *Preservation of Corporate Existence and Franchises:* The Mortgagor will, so long as any Outstanding Notes exist, take or cause to be taken all such action as from time to time may be necessary to preserve its corporate existence and to preserve and renew all franchises, rights of way, easements, permits, and licenses now or hereafter to be granted or upon it conferred the loss of which would have a material adverse affect on the Mortgagor's financial condition or business. The Mortgagor will comply with all laws, ordinances, regulations, orders, decrees and other legal requirements applicable to it or its property the violation of which could have a material adverse affect on the Mortgagor's financial condition or business.

SECTION 3.10. *Limitations on Consolidations and Mergers:* The Mortgagor shall not, without the prior written approval of each Mortgagee, consolidate or merge with any other corporation or convey or transfer the Mortgaged Property substantially as an entirety unless: (1) such consolidation, merger, conveyance or transfer shall be on such terms as shall fully preserve the lien and security hereof and the rights and powers of the

Rural Utilities Service, USDA

Pt. 1718, Subpt. B, App. A

Mortgagees hereunder; (2) the entity formed by such consolidation or with which the Mortgagor is merged or the corporation which acquires by conveyance or transfer the Mortgaged Property substantially as an entirety shall execute and deliver to the Mortgagees a mortgage supplemental hereto in recordable form and containing an assumption by such successor entity of the due and punctual payment of the principal of and interest on all of the Outstanding Notes and the performance and observance of every covenant and condition of this Mortgage; (3) immediately after giving effect to such transaction, no default hereunder shall have occurred and be continuing; (4) the Mortgagor shall have delivered to the Mortgagees a certificate of its general manager or other officer, in form and substance satisfactory to each of the Mortgagees, which shall state that such consolidation, merger, conveyance or transfer and such supplemental mortgage comply with this subsection and that all conditions precedent herein provided for relating to such transaction have been complied with; (5) the Mortgagor shall have delivered to the Mortgagees an opinion of counsel in form and substance satisfactory to each of the Mortgagees; and (6) the entity formed by such consolidation or with which the Mortgagor is merged or the corporation which acquires by conveyance or transfer the Mortgaged Property substantially as an entirety shall be an entity—(A) having Equity equal to at least 27% of its Total Assets on a pro forma basis after giving effect to such transaction, (B) having a pro forma TIER of not less than 1.50 and a pro forma DSC of not less than 1.25 for each of the two preceding calendar years, and (C) having Net Utility Plant equal to or greater than 1.0 times its Total Long-Term Debt on a pro forma basis. Upon any consolidation or merger or any conveyance or transfer of the Mortgaged Property substantially as an entirety in accordance with this subsection, the successor entity formed by such consolidation or with which the Mortgagor is merged or to which such conveyance or transfer is made shall succeed to, and be substituted for, and may exercise every right and power of, the Mortgagor under this Mortgage with the same effect as if such successor entity had been named as the Mortgagor herein.

SECTION 3.11. *Limitations on Transfers of Property:* The Mortgagor may not, except as provided in [Section 3.10] above, without the prior written approval of each Mortgagee, sell, lease or transfer any Mortgaged Property to any other person or entity (including any subsidiary or affiliate of the Mortgagor), unless (1) there exists no Event of Default or occurrence which with the passing of time and the giving of notice would be an Event of Default, (2) fair market value is obtained for such property, (3) the aggregate value of assets so sold, leased or transferred in any 12-

month period is less than 10% of Net Utility Plant, and (4) the proceeds of such sale, lease or transfer, less ordinary and reasonable expenses incident to such transaction, are immediately (i) applied as a prepayment of all Notes equally and ratably, (ii) in the case of dispositions of equipment, materials or scrap, applied to the purchase of other property useful in the Mortgagor's utility business, not necessarily of the same kind as the property disposed of, which shall forthwith become subject to the Lien of the Mortgage, or (iii) applied to the acquisition or construction of utility plant.

SECTION 3.12. *Maintenance of Mortgaged Property:* (a) So long as the Mortgagor holds title to the Mortgaged Property, the Mortgagor will at all times maintain and preserve the Mortgaged Property which is used or useful in the Mortgagor's business and each and every part and parcel thereof in good repair, working order and condition, ordinary wear and tear and acts of God excepted, and in compliance with Prudent Utility Practice and in compliance with all applicable laws, regulations and orders, and will from time to time make all needed and proper repairs, renewals and replacements, and useful and proper alterations, additions, betterments and improvements, and will, subject to contingencies beyond its reasonable control, at all times use all reasonable diligence to furnish the consumers served by it through the Mortgaged Property, or any part thereof, with an adequate supply of electric power and energy. If any substantial part of the Mortgaged Property is leased by the Mortgagor to any other party, the lease agreement between the Mortgagor and the lessee shall obligate the lessee to comply with the provisions of subsections (a) and (b) of this Section in respect of the leased facilities and to permit the Mortgagor to operate the leased facilities in the event of any failure by the lessee to so comply.

(b) If in the sole judgement of any Mortgagee, the Mortgaged Property is not being maintained and repaired in accordance with paragraph (a) of this section, such Mortgagee may send to the Mortgagor a written report of needed improvements and the Mortgagor will upon receipt of such written report promptly undertake to accomplish such improvements.

(c) The Mortgagor further agrees that upon reasonable written request of any Mortgagee, which request together with the requests of any other Mortgagees shall be made no more frequently than once every three years, the Mortgagor will supply promptly to each Mortgagee a certification (hereinafter called the "Engineer's Certification"), in form satisfactory to the requestor, prepared by a professional engineer, who shall be satisfactory to the Mortgagees, as to the condition of the Mortgaged Property. If in the sole judgment of any Mortgagee the

Engineer's Certification discloses the need for improvements to the condition of the Mortgaged Property or any other operations of the Mortgagor, such Mortgagee may send to the Mortgagor a written report of such improvements and the Mortgagor will upon receipt of such written report promptly undertake to accomplish such of these improvements as are required by such Mortgagee.

SECTION 3.13. *Insurance; Restoration of Damaged Mortgaged Property:* (a) The Mortgagor will take out, as the respective risks are incurred, and maintain the classes and amounts of insurance in conformance with generally accepted utility industry standards for such classes and amounts of coverages of utilities of the size and character of the Mortgagor and consistent with Prudent Utility Practice.

(b) The foregoing insurance coverage shall be obtained by means of bond and policy forms approved by regulatory authorities having jurisdiction, and, with respect to insurance upon any part of the Mortgaged Property, shall provide that the insurance shall be payable to the Mortgagees as their interests may appear by means of the standard mortgagee clause without contribution. Each policy or other contract for such insurance shall contain an agreement by the insurer that, notwithstanding any right of cancellation reserved to such insurer, such policy or contract shall continue in force for at least 30 days after written notice to each Mortgagee of cancellation.

(c) In the event of damage to or the destruction or loss of any portion of the Mortgaged Property which is used or useful in the Mortgagor's business and which shall be covered by insurance, unless each Mortgagee shall otherwise agree, the Mortgagor shall replace or restore such damaged, destroyed or lost portion so that such Mortgaged Property shall be in substantially the same condition as it was in prior to such damage, destruction or loss, and shall apply the proceeds of the insurance for that purpose. The Mortgagor shall replace the lost portion of such Mortgaged Property or shall commence such restoration promptly after such damage, destruction or loss shall have occurred and shall complete such replacement or restoration as expeditiously as practicable, and shall pay or cause to be paid out of the proceeds of such insurance all costs and expenses in connection therewith.

(d) Sums recovered under any policy or fidelity bond by the Mortgagor for a loss of funds advanced under the Notes or recovered by any Mortgagee or any Noteholder for any loss under such policy or bond shall, unless applied as provided in the preceding paragraph, be used to finance construction of utility plant secured or to be secured by this Mortgage, or unless otherwise directed by the Mortgagees, be applied to the prepay-

ment of the Notes *pro rata* according to the unpaid principal amounts thereof (such prepayments to be applied to such Notes and installments thereof as may be designated by the respective Mortgagee at the time of any such prepayment), or be used to construct or acquire utility plant which will become part of the Mortgaged Property. At the request of any Mortgagee, the Mortgagor shall exercise such rights and remedies which they may have under such policy or fidelity bond and which may be designated by such Mortgagee, and the Mortgagor hereby irrevocably appoints each Mortgagee as its agent to exercise such rights and remedies under such policy or bond as such Mortgagee may choose, and the Mortgagor shall pay all costs and reasonable expenses incurred by the Mortgagee in connection with such exercise.

SECTION 3.14. *Mortgagee Right to Expend Money to Protect Mortgaged Property:* The Mortgagor agrees that any Mortgagee from time to time hereunder may, in its sole discretion, after having given 5 Business days prior written notice to Mortgagor, but shall not be obligated to, advance funds on behalf of Mortgagor, in order to insure the Mortgagor's compliance with any covenant, warranty, representation or agreement of the Mortgagor made in or pursuant to this Mortgage or any of the Loan Agreements, to preserve or protect any right or interest of the Mortgagees in the Mortgaged Property or under or pursuant to this Mortgage or any of the Loan Agreements, including without limitation, the payment of any insurance premiums or taxes and the satisfaction or discharge of any judgment or any Lien upon the Mortgaged Property or other property or assets of Mortgagor; *provided, however*, that the making of any such advance by or through any Mortgagee shall not constitute a waiver by any Mortgagee of any Event of Default with respect to which such advance is made nor relieve the Mortgagor of any such Event of Default. The Mortgagor shall pay to a Mortgagee upon demand all such advances made by such Mortgagee with interest thereon at a rate equal to that on the Note having the highest interest rate but in no event shall such rate be in excess of the maximum rate permitted by applicable law. All such advances shall be included in the obligations and secured by the security interest granted hereunder.

SECTION 3.15. *Time Extensions for Payment of Notes:* Any Mortgagee may, at any time or times in succession without notice to or the consent of the Mortgagor, or any other Mortgagee, and upon such terms as such Mortgagee may prescribe, grant to any person, firm or corporation who shall have become obligated to pay all or any part of the principal of (and premium, if any) or interest on any Note held by or indebtedness owed to such Mortgagee or who may be affected by the lien hereby created, an extension of the time

Rural Utilities Service, USDA

Pt. 1718, Subpt. B, App. A

for the payment of such principal, (and premium, if any) or interest, and after any such extension the Mortgagor will remain liable for the payment of such Note or indebtedness to the same extent as though it had at the time of such extension consented thereto in writing.

SECTION 3.16. *Application of Proceeds from Condemnation:* (a) In the event that the Mortgaged Property or any part thereof, shall be taken under the power of eminent domain, all proceeds and avails therefrom may be used to finance construction of utility plant secured or to be secured by this Mortgage. Any proceeds not so used shall forthwith be applied by the Mortgagor: first, to the ratable payment of any indebtedness secured by this Mortgage other than principal of or interest on the Notes; second, to the ratable payment of interest which shall have accrued on the Notes and be unpaid; third, to the ratable payment of or on account of the unpaid principal of the Notes, to such installments thereof as may be designated by the respective Mortgagee at the time of any such payment; and fourth, the balance shall be paid to whomsoever shall be entitled thereto.

(b) If any part of the Mortgaged Property shall be taken by eminent domain, each Mortgagee shall release the property so taken from the Mortgaged Property and shall be fully protected in so doing upon being furnished with:

(1) A certificate of a duly authorized officer of the Mortgagor requesting such release, describing the property to be released and stating that such property has been taken by eminent domain and that all conditions precedent herein provided or relating to such release have been complied with; and

(2) an opinion of counsel to the effect that such property has been lawfully taken by exercise of the right of eminent domain, that the award for such property so taken has become final and that all conditions precedent herein provided for relating to such release have been complied with.

SECTION 3.17. *Compliance with Loan Agreements; Notice of Amendments to and Defaults under Loan Agreements:* The Mortgagor will observe and perform all of the material covenants, agreements, terms and conditions contained in any Loan Agreement entered into in connection with the issuance of any of the Notes, as from time to time amended. The Mortgagor will send promptly to each Mortgagee notice of any default by the Mortgagor under any Loan Agreement and notice of any amendment to any Loan Agreement. Upon request of any Mortgagee, the Mortgagor will furnish to such Mortgagee single copies of such Loan Agreements and amendments thereto as such Mortgagee may request.

SECTION 3.18. *Rights of Way, etc., Necessary in Business:* The Mortgagor will use its best

efforts to obtain all such rights of way, easements from landowners and releases from lienors as shall be necessary or advisable in the conduct of its business, and, if requested by any Mortgagee, deliver to such Mortgagee evidence satisfactory to such Mortgagee of the obtaining of such rights of way, easements or releases.

SECTION 3.19. *Limitations on Providing Free Electric Services.* The Mortgagor will not furnish or supply or cause to be furnished or supplied any electric power, energy or capacity free of charge to any person, firm or corporation, public or private, and the Mortgagor will enforce the payment of any and all amounts owing to the Mortgagor by reason of the ownership and operation of the Utility System by discontinuing such use, output, capacity, or service, or by filing suit therefor within 90 days after any such accounts are due, or by both such discontinuance and by filing suit.

SECTION 3.20. *Keeping Books; Inspection by Mortgagee:* The Mortgagor will keep proper books, records and accounts, in which full and correct entries shall be made of all dealings or transactions of or in relation to the Notes and the Utility Systems, properties, business and affairs of the Mortgagor in accordance with the Accounting Requirements. The Mortgagor will at any and all times, upon the written request of any Mortgagee and at the expense of the Mortgagor, permit such Mortgagee by its representatives to inspect the Utility Systems and properties and properties, books of account, records, reports and other papers of the Mortgagor and to take copies and extracts therefrom, and will afford and procure a reasonable opportunity to make any such inspection, and the Mortgagor will furnish to each Mortgagee any and all such information as such Mortgagee may request, with respect to the performance by the Mortgagor of its covenants under this Mortgage, the Notes and the Loan Agreements.

ARTICLE IV

EVENTS OF DEFAULT AND REMEDIES

SECTION 4.01. *Events of Default:* Each of the following shall be an "Event of Default" under this Mortgage:

(a) default shall be made in the payment of any installment of or on account of interest on or principal of (or premium, if any associated with) any Note or Notes for more than five (5) Business Days after the same shall be required to be made;

(b) default shall be made in the due observance or performance of any other of the covenants, conditions or agreements on the part of the Mortgagor, in any of the Notes, Loan Agreements or in this Mortgage, and such default shall continue for a period of thirty (30) days after written notice specifying such

default and requiring the same to be remedied and stating that such notice is a “Notice of Default” hereunder shall have been given to the Mortgagor by any Mortgagee; PROVIDED, HOWEVER that in the case of a default on the terms of a Note or Loan Agreement of a particular Mortgagee, the “Notice of Default” required under this paragraph may only be given by that Mortgagee;

(c) the Mortgagor shall file a petition in bankruptcy or be adjudicated a bankrupt or insolvent, or shall make an assignment for the benefit of its creditors, or shall consent to the appointment of a receiver of itself or of its property, or shall institute proceedings for its reorganization or proceedings instituted by others for its reorganization shall not be dismissed within sixty (60) days after the institution thereof;

(d) a receiver or liquidator of the Mortgagor or of any substantial portion of its property shall be appointed and the order appointing such receiver or liquidator shall not be vacated within sixty (60) days after the entry thereof;

(e) the Mortgagor shall forfeit or otherwise be deprived of its corporate charter or franchises, permits, easements, or licenses required to carry on any material portion of its business;

(f) a final judgment for an amount of more than \$_____ shall be entered against the Mortgagor and shall remain unsatisfied or without a stay in respect thereof for a period of sixty (60) days; or,

(g) any material representation or warranty made by the Mortgagor herein, in the Loan Agreements or in any certificate or financial statement delivered hereunder or thereunder shall prove to be false or misleading in any material respect at the time made.

SECTION 4.02. Acceleration of Maturity; Rescission and Annulment:

(a) If an Event of Default described in Section [4.01(a)] has occurred and is continuing, any Mortgagee upon which such default has occurred may declare the principal of all its Notes secured hereunder to be due and payable immediately by a notice in writing to the Mortgagor and to the other Mortgagees (failure to provide said notice to any other Mortgagee shall not affect the validity of any acceleration of the Note or Notes by such Mortgagee), and upon such declaration, all unpaid principal (and premium, if any) and accrued interest so declared shall become due and payable immediately, anything contained herein or in any Note or Notes to the contrary notwithstanding.

(b) If any other Event of Default shall have occurred and be continuing, any Mortgagee may declare the principal of all its Notes secured hereunder to be due and payable immediately by a notice in writing to the Mortgagor and to the other Mortgagees (failure to provide said notice to any other Mortgagee

shall not affect the validity of any acceleration of the Note or Notes by such Mortgagee), and upon such declaration, all unpaid principal (and premium, if any) and accrued interest so declared shall become due and payable immediately, anything contained herein or in any Note or Notes to the contrary notwithstanding.

(c) Upon receipt of actual knowledge of or any notice of acceleration by any Mortgagee, any other Mortgagee may declare the principal of all of its Notes to be due and payable immediately by a notice in writing to the Mortgagor and upon such declaration, all unpaid principal (and premium, if any) and accrued interest so declared shall become due and payable immediately, anything contained herein or in any Note or Notes or Loan Agreements to the contrary notwithstanding.

(d) If after the unpaid principal of (and premium, if any) and accrued interest on any of the Notes shall have been so declared to be due and payable, all payments in respect of principal and interest which shall have become due and payable by the terms of such Note or Notes (other than amounts due as a result of the acceleration of the Notes) shall be paid to the respective Mortgagees, and (i) all other defaults under the Loan Agreements, the Notes and this Mortgage shall have been made good or cured to the satisfaction of the Mortgagees representing at least 80% of the aggregate unpaid principal balance of all of the Notes then Outstanding, (ii) proceedings to foreclose the lien of this Mortgage have not been commenced, and (iii) all reasonable expenses paid or incurred by the Mortgagees in connection with the acceleration shall have been paid to the respective Mortgagees, then in every such case such Mortgagees representing at least 80% of the aggregate unpaid principal balance of all of the Notes then Outstanding may by written notice to the Mortgagor, for purposes of this Mortgage, annul such declaration and waive such default and the consequences thereof, but no such waiver shall extend to or affect any subsequent default or impair any right consequent thereon.

SECTION 4.03. Remedies of Mortgagees: If one or more of the Events of Default shall occur and be continuing, any Mortgagee personally or by attorney, in its or their discretion, may, in so far as not prohibited by law:

(a) take immediate possession of the Mortgaged Property, collect and receive all credits, outstanding accounts and bills receivable of the Mortgagor and all rents, income, revenues, proceeds and profits pertaining to or arising from the Mortgaged Property, or any part thereof, whether then past due or accruing thereafter, and issue binding receipts therefor; and manage, control and operate the Mortgaged Property as fully as the Mortgagor might do if in possession thereof, including, without limitation, the making of

Rural Utilities Service, USDA

Pt. 1718, Subpt. B, App. A

all repairs or replacements deemed necessary or advisable by such Mortgagee in possession;

(b) proceed to protect and enforce the rights of all of the Mortgagees by suits or actions in equity or at law in any court or courts of competent jurisdiction, whether for specific performance of any covenant or any agreement contained herein or in aid of the execution of any power herein granted or for the foreclosure hereof or hereunder or for the sale of the Mortgaged Property, or any part thereof, or to collect the debts hereby secured or for the enforcement of such other or additional appropriate legal or equitable remedies as may be deemed necessary or advisable to protect and enforce the rights and remedies herein granted or conferred, and in the event of the institution of any such action or suit the Mortgagee instituting such action or suit shall have the right to have appointed a receiver of the Mortgaged Property and of all proceeds, rents, income, revenues and profits pertaining thereto or arising therefrom, whether then past due or accruing after the appointment of such receiver, derived, received or had from the time of the commencement of such suit or action, and such receiver shall have all the usual powers and duties of receivers in like and similar cases, to the fullest extent permitted by law, and if application shall be made for the appointment of a receiver the Mortgagor hereby expressly consents that the court to which such application shall be made may make said appointment; and

(c) sell or cause to be sold all and singular the Mortgaged Property or any part thereof, and all right, title, interest, claim and demand of the Mortgagor therein or thereto, at public auction at such place in any county (or its equivalent locality) in which the property to be sold, or any part thereof, is located, at such time and upon such terms as may be specified in a notice of sale, which shall state the time when and the place where the sale is to be held, shall contain a brief general description of the property to be sold, and shall be given by mailing a copy thereof to the Mortgagor at least fifteen (15) days prior to the date fixed for such sale and by publishing the same once in each week for two successive calendar weeks prior to the date of such sale in a newspaper of general circulation published in said locality or, if no such newspaper is published in such locality, in a newspaper of general circulation in such locality, the first such publication to be not less than fifteen (15) days nor more than thirty (30) days prior to the date fixed for such sale. Any sale to be made under this subparagraph (c) of this Section [4.03] may be adjourned from time to time by announcement at the time and place appointed for such sale or for such adjourned sale or sales, and without further notice or publication the sale may be had at the time and place to

which the same shall be adjourned; *provided, however*, that in the event another or different notice of sale or another or different manner of conducting the same shall be required by law the notice of sale shall be given or the sale be conducted, as the case may be, in accordance with the applicable provisions of law. The expense incurred by any Mortgagee (including, but not limited to, receiver's fees, counsel fees, cost of advertisement and agents' compensation) in the exercise of any of the remedies provided in this Mortgage shall be secured by this Mortgage.

(d) In the event that a Mortgagee proceeds to enforce remedies under this Section, any other Mortgagee may join in such proceedings. In the event that the Mortgagees are not in agreement with the method or manner of enforcement chosen by any other Mortgagee, the Mortgagees representing a majority of the aggregate unpaid principal balance on the then Outstanding Notes may direct the method and manner in which remedial action will proceed.

SECTION 4.04. *Application of Proceeds from Remedial Actions:* Any proceeds or funds arising from the exercise of any rights or the enforcement of any remedies herein provided after the payment or provision for the payment of any and all costs and expenses in connection with the exercise of such rights or the enforcement of such remedies shall be applied first, to the ratable payment of indebtedness hereby secured other than the principal of or interest on the Notes; second, to the ratable payment of interest which shall have accrued on the Notes and which shall be unpaid; third, to the ratable payment of or on account of the unpaid principal of the Notes; and the balance, if any, shall be paid to whomsoever shall be entitled thereto.

SECTION 4.05. *Remedies Cumulative; No Election:* Every right or remedy herein conferred upon or reserved to the Mortgagees or to the Noteholders shall be cumulative and shall be in addition to every other right and remedy given hereunder or now or hereafter existing at law, or in equity, or by statute. The pursuit of any right or remedy shall not be construed as an election.

SECTION 4.06. *Waiver of Appraisal Rights; Marshaling of Assets Not Required:* The Mortgagor, for itself and all who may claim through or under it, covenants that it will not at any time insist upon or plead, or in any manner whatever claim, or take the benefit or advantage of, any appraisal, valuation, stay, extension or redemption laws now or hereafter in force in any locality where any of the Mortgaged Property may be situated, in order to prevent, delay or hinder the enforcement or foreclosure of this Mortgage, or the absolute sale of the Mortgaged Property, or any part thereof, or the final and absolute putting into possession thereof,

immediately after such sale, of the purchaser or purchasers thereat, and the Mortgagor, for itself and all who may claim through or under it, hereby waives the benefit of all such laws unless such waiver shall be forbidden by law. Under no circumstances shall there be any marshalling of assets upon any foreclosure or to other enforcement of this Mortgage.

SECTION 4.07. *Notice of Default:* The Mortgagor covenants that it will give immediate written notice to each Mortgagee of the occurrence of any Event of Default or in the event that any right or remedy described in Sections [4.02] and [4.03] hereof is exercised or enforced or any action is taken to exercise or enforce any such right or remedy.

ARTICLE V—POSSESSION UNTIL DEFAULT-DEFEASANCE CLAUSE

SECTION 5.01. *Possession Until Default:* Until some one or more of the Events of Default shall have happened, the Mortgagor shall be suffered and permitted to retain actual possession of the Mortgaged Property, and to manage, operate and use the same and any part thereof, with the rights and franchises appertaining thereto, and to collect, receive, take, use and enjoy the rents, revenues, issues, earnings, income, proceeds, products and profits thereof or therefrom, subject to the provisions of this Mortgage.

SECTION 5.02. *Defeasance:* If the Mortgagor shall pay or cause to be paid the whole amount of the principal of (and premium, if any) and interest on the Notes at the times and in the manner therein provided, and shall also pay or cause to be paid all other sums payable by the Mortgagor hereunder or under any Loan Agreement and shall keep and perform, all covenants herein required to be kept and performed by it, then and in that case, all property, rights and interest hereby conveyed or assigned or pledged shall revert to the Mortgagor and the estate, right, title and interest of the Mortgagee so paid shall thereupon cease, determine and become void and such Mortgagee, in such case, on written demand of the Mortgagor but at the Mortgagor's cost and expense, shall enter satisfaction of the Mortgage upon the record. In any event, each Mortgagee, upon payment in full to such Mortgagee by the Mortgagor of all principal of (and premium, if any) and interest on any Note held by such Mortgagee and the payment and discharge by the Mortgagor of all charges due to such Mortgagee hereunder or under any Loan Agreement, shall execute and deliver to the Mortgagor such instrument of satisfaction, discharge or release as shall be required by law in the circumstances.

SECTION 5.03. *Special Defeasance:* Other than any Notes excluded by the foregoing Sections 5.01 and 5.02 and Notes which have become due and payable, the Mortgagor may cause the Lien of this Mortgage to be

defeased with respect to any Note for which it has deposited or caused to be deposited in trust solely for the purpose an amount sufficient to pay and discharge the entire indebtedness on such Note for principal (and premium, if any) and interest to the date of maturity thereof; PROVIDED, HOWEVER, that depository serving as trustee for such trust must first be accepted as such by the Mortgagee whose Notes are being defeased under this section. In such event, such a Note will no longer be considered to be an Outstanding Note for purposes of this Mortgage and the Mortgagee shall execute and deliver to the Mortgagor such instrument of satisfaction, discharge or release as shall be required by law in the circumstances.

ARTICLE VI MISCELLANEOUS

SECTION 6.01. *Property Deemed Real Property:* It is hereby declared to be the intention of the Mortgagor that any electric generating plant or plants and facilities and all electric transmission and distribution lines, or other Electric System or Utility System facilities, embraced in the Mortgaged Property, including (without limitation) all rights of way and easements granted or given to the Mortgagor or obtained by it to use real property in connection with the construction, operation or maintenance of such plant, lines, facilities or systems, and all other property physically attached to any of the foregoing, shall be deemed to be real property.

SECTION 6.02. *Mortgage to Bind and Benefit Successors and Assigns:* All of the covenants, stipulations, promises, undertakings and agreements herein contained by or on behalf of the Mortgagor shall bind its successors and assigns, whether so specified or not, and all titles, rights and remedies hereby granted to or conferred upon the Mortgagees shall pass to and inure to the benefit of the successors and assigns of the Mortgagees and shall be deemed to be granted or conferred for the ratable benefit and security of all who shall from time to time be a Mortgagee. The Mortgagor hereby agrees to execute such consents, acknowledgements and other instruments as may be reasonably requested by any Mortgagee in connection with the assignment, transfer, mortgage, hypothecation or pledge of the rights or interests of such Mortgagee hereunder or under the Notes or in and to any of the Mortgaged Property.

SECTION 6.03. *Headings:* The descriptive headings of the various articles and sections of this Mortgage and also the table of contents were formulated and inserted for convenience only and shall not be deemed to affect the meaning or construction of any of the provisions hereof.

SECTION 6.04. *Severability Clause:* In case any provision of this Mortgage or in the

Rural Utilities Service, USDA

Pt. 1718, Subpt. B, App. A

Notes or in the Loan Agreements shall be invalid or unenforceable, the validity, legality and enforceability of the remaining provisions thereof shall not in any way be affected or impaired, nor shall any invalidity or unenforceability as to any Mortgagee hereunder affect or impair the rights hereunder of any other Mortgagee.

SECTION 6.05. *Mortgage Deemed Security Agreement:* To the extent that any of the property described or referred to in this Mortgage is governed by the provisions of the UCC this Mortgage is hereby deemed a "security agreement" under the UCC, and, if so elected by any Mortgagee, a "financing statement" under the UCC for said security agreement. The mailing addresses of the Mortgagor as debtor, and the Mortgagees as secured parties are as set forth in Section [1.05] hereof. If any Mortgagee so directs the Mortgagor to do so, the Mortgagor shall file as a financing statement under the UCC for said security agreement and for the benefit of all of the Mortgagees, an instrument other than this Mortgage. In such case, the instrument to be filed shall be in a form customarily accepted by the filing office as a financing statement. PROCEEDS OF COLLATERAL ARE COVERED HEREBY.

SECTION 6.06. *Indemnification by Mortgagor of Mortgagees:* The Mortgagor agrees to indemnify and save harmless each Mortgagee against any liability or damages which any of them may incur or sustain in the exercise and performance of their rightful powers and duties hereunder. For such reimbursement and indemnity, each Mortgagee shall be secured under this Mortgage in the same manner as the Notes and all such reimbursements for expense or damage shall be paid to the Mortgagee incurring or suffering the same with interest at the rate specified in Section [3.14] hereof. The Mortgagor's obligation to indemnify the Mortgagees under this section and under Section [3.04] shall survive the satisfaction of the Notes, the reconveyance or foreclosure of this Mortgage, the acceptance of a deed in lieu of foreclosure, or any transfer or abandonment of the Mortgaged Property.

IN WITNESS WHEREOF, _____ as Mortgagor, has caused this Restated Mortgage and Security Agreement to be signed in its name and its corporate seal to be hereunto affixed and attested by its officers thereunto duly authorized, and UNITED STATES OF AMERICA, as Mortgagee, and as Mortgagee, has caused this Restated Mortgage and Security Agreement to be signed in its name by duly authorized persons, all as of the day and year first above written.

Exhibit A—Manager’s Certificate

Manager’s Certificate Required Under Mortgage Section 2.01 for Additional Notes

On behalf on _____ [Name of Borrower] (the “Borrower”), I _____ hereby certify as follows:

1. I am the Manager of the Borrower and have been duly authorized to deliver this certificate in connection with the Additional Note or Notes to be issued on or about _____ [Date Note or Notes are to be Signed] pursuant to Section [2.01] of the Mortgage dated _____.

2. No Event of Default has occurred and is continuing under the Mortgage, or any event which with the giving of notice or lapse of

time or both would become an Event of Default has occurred and is continuing.

3. The Additional Notes described in paragraph 1 are for the purpose of funding Property Additions being constructed, acquired, procured or replaced that are or will become part of the Borrower’s Utility System.

4. The Property Additions referred to in paragraph 3 are Eligible Property Additions, i.e. Property Additions acquired or whose construction was completed not more than 5 years prior to the issuance of additional Notes and Property Additions acquired or whose construction is started and/or completed not more than 4 years after issuance of the additional Notes, but shall exclude any Property Additions financed by any other debt secured under the Mortgage at the time additional Notes are issued.

5. I have reviewed the certificate of the Independent certified public accountant also being delivered to each of the Mortgagees pursuant to Section [2.01] in connection with the aforesaid Additional Note or Notes and concur with the conclusions expressed therein.

6. Capitalized terms that are used in this certificate but are not defined herein have the meanings defined in the Mortgage.

[Signed] _____

[Dated] _____

[Name] _____

[Title] _____

[Name and Address of Borrower] _____

Exhibit B—Form of Supplemental Mortgage

Supplemental Mortgage and Security Agreement, dated as of _____, _____, (hereinafter sometimes called this “Supplemental Mortgage”) is made by and between _____ (hereinafter called the “Mortgagor”), a corporation existing under the laws of the State of _____, and the UNITED STATES OF AMERICA acting by and through the Administrator of the Rural Utilities Service (hereinafter called the “Government”), _____ (Supplemental Lender) (hereinafter called _____), a _____ existing under the laws of _____, and intended to confer rights and benefits on both the Government and _____ and _____ in accordance with this Supplemental Mortgage and the Original Mortgage (hereinafter defined) (the Government and the Supplemental Lenders being herein sometimes collectively referred to as the “Mortgagees”).

Recitals

Whereas, the Mortgagor, the Government and _____ are parties to that certain Restated Mortgage and Security Agreement, as supplemented, amended or restated (the

Rural Utilities Service, USDA

Pt. 1718, Subpt. B, App. A

“Original Mortgage” identified in Schedule “A” of this Mortgage) originally entered into between the Mortgagor, the Government acting by and through the Administrator of the Rural Utilities Service (hereinafter called “RUS”), and _____; and

Whereas, the Mortgagor deems it necessary to borrow money for its corporate purposes and to issue its promissory notes and other debt obligations therefor, and to mortgage and pledge its property hereinafter described or mentioned to secure the payment of the same, and to enter into this Supplemental Mortgage pursuant to which all secured debt of the Mortgagor hereunder shall be secured on parity, and to add _____ as a secured party hereunder and under the Original Mortgage (the Supplemental Mortgage and the Original Mortgage, as it may have been previously amended or supplemented, hereinafter may be called collectively the “RUS Mortgage”); and

Whereas, the RUS Mortgage, as supplemented hereby, preserves the priority of the Original Mortgage for the pro rata benefit of all the Mortgagees and secures the payment of all of the Mortgagor’s outstanding indebtedness as listed in the Instruments Recital of Schedule “A”; and

Whereas, all acts necessary to make this Supplemental Mortgage a valid and binding legal instrument for the security of such notes and obligations, subject to the terms of the RUS Mortgage, have been in all respects duly authorized:

Now, Therefore, This Supplemental Mortgage Witnesseth: That to secure the payment of the principal of (and premium, if any) and interest on all Notes issued hereunder according to their tenor and effect, and the performance of all provisions therein and herein contained, and in consideration of the covenants herein contained and the purchase or guarantee of Notes by the guarantors or holders thereof, the Mortgagor has mortgaged, pledged and granted a continuing security interest in, and by these presents does hereby grant, bargain, sell, alienate, remise, release, convey, assign, transfer, hypothecate, pledge, set over and confirm, pledge and grant a continuing security interest in for the purposes hereinafter expressed [other language may be required under various state laws], unto the Mortgagees all property, rights, privileges and franchises of the Mortgagor of every kind and description, real, personal or mixed, tangible and intangible, of the kind or nature specifically mentioned herein or any other kind or nature, except any Excepted Property set forth on Schedule “C” hereof owned or hereafter acquired by the Mortgagor (by purchase, consolidation, merger, donation, construction, erection or in any other way) wherever located, including (without limitation) all and singular the following:

A. All of those fee and leasehold interests in real property set forth in Schedule “B” hereto, subject in each case to those matters set forth in such Schedule; and

B. All of those fee and leasehold interests in real property set forth in Schedule “B” of the Original Mortgage or in any restatement, amendment or supplement thereto, subject in each case to those matters set forth in such Schedule; and

C. All of the kinds, types or items of property, now owned or hereafter acquired, described as Mortgaged Property in the Original Mortgage or in any restatement, amendment to supplement thereto as Mortgaged Property.

It is Further Agreed and Covenanted That the Original Mortgage, as previously restated, amended or supplemented, and this Supplement shall constitute one agreement and the parties hereto shall be bound by all of the terms thereof and, without limiting the foregoing.

1. All capitalized terms not defined herein shall have the meaning given in Article I of the Original Mortgage.

2. This Supplemental Mortgage is one of the Supplemental Mortgages contemplated by Article II of the Original Mortgage.

In Witness Whereof, _____ as Mortgagor.

Supplemental Mortgage Schedule C— Excepted Property

[60 FR 36888, July 18, 1995, as amended at 60 FR 67410, Dec. 29, 1995]

Subpart C—Loan Contracts With Distribution Borrowers

SOURCE: 60 FR 67410, Dec. 29, 1995, unless otherwise noted.

§ 1718.100

7 CFR Ch. XVII (1–1–97 Edition)

§ 1718.100 General.

(a) *Purpose.* The purpose of this subpart is to set forth the policies, requirements, and procedures governing loan contracts entered into between the Rural Utilities Service (RUS) and distribution borrowers or, in some cases, other electric borrowers.

(b) *Flexibility for individual circumstances.* The intent of this subpart is to provide the flexibility to address the different needs and different credit risks of individual borrowers, and other special circumstances of individual lending situations. The model loan contract contained in Appendix A of this subpart provides an example of what a loan contract with an “average” or “typical” distribution borrower may look like under “average” or “typical” circumstances. Depending on the credit risks and other circumstances of individual loans, RUS may execute loan contracts with provisions that are substantially different than those set forth in the model. RUS may develop alternative model loan contract provisions. If it does, such provisions will be made available to the public.

(c) *Resolution of any differences in contractual provisions.* If any provision of the loan contract appears to be in conflict with provisions of the mortgage, the loan contract shall have precedence with respect to the contractual relationship between the borrower and RUS with respect to such provision. If either document is silent on a matter addressed in the other document, the other document shall have precedence with respect to the contractual relationship between the borrower and RUS with respect to such matter.

(d) *Certain loan contract provisions subject to subsequent rulemaking.* If a loan contract provision imposes an obligation or limitation on the borrower whose interpretation or specification is subject to RUS regulations or the discretion of the Administrator or RUS, such interpretation or specification shall be subject to subsequent rulemaking. Such interpretation or specification of the borrower’s obligations or limitations may not exceed the authority granted to the Administrator or RUS in the loan contract provision.

§ 1718.101 Applicability.

(a) *Distribution borrowers.* The provisions of this subpart apply to all distribution borrowers that obtain a loan or loan guarantee from RUS approved on or after January 29, 1996. Distribution borrowers that obtain a lien accommodation or any other form of financial assistance from RUS after January 29, 1996, may be required to execute a new loan contract and new mortgage. Moreover, any distribution borrower may submit a request to RUS that a new loan contract and new mortgage be executed. Within the constraints of time and staff resources, RUS will attempt to honor such requests. Borrowers must first obtain the concurrence of any other mortgagees on their existing mortgage before a new mortgage can be executed.

(b) *Other borrowers.* Borrowers other than distribution borrowers may also submit requests for execution of a new loan contract pursuant to this subpart and a new mortgage pursuant to subpart B of this part. RUS may approve such requests if it determines that such approval is in the government’s financial interest. If other mortgagees are on the borrower’s existing mortgage, their concurrence would be required before a new mortgage could be executed.

§ 1718.102 Definitions.

For the purposes of this subpart:

Borrower means any organization that has an outstanding loan made or guaranteed by the Rural Utilities Service (RUS) or its predecessor, the Rural Electrification Administration, for rural electrification, or that is seeking such financing.

Distribution borrower means a borrower that sells or intends to sell electric power and energy at retail in rural areas, the latter being defined in 7 CFR 1710.2.

Loan documents means the mortgage (or other security instrument acceptable to RUS), the loan contract, and the promissory note entered into between the borrower and RUS.

§1718.103 Loan contract provisions.

Loan contracts executed pursuant to this subpart shall contain such provisions as RUS determines are appropriate to further the purposes of the RE Act and to ensure that the security for the loan will be reasonably adequate and that the loan will be repaid according to the terms of the promissory note. Such loan contracts will contain provisions addressing, but not necessarily limited to, the following matters:

- (a) Description of the purpose of the loan;
- (b) Specification of the interest to be charged on the loan, including the method for determining the interest rate if it is not fixed for the entire term of the loan;
- (c) Specification of the method for repaying the loan principal, including the final maturity of the loan;
- (d) The conditions under which the loan may be prepaid before its maturity date, including but not limited to requirements regarding the prepayment of loans made concurrently by RUS and another secured lender;
- (e) The method for making scheduled payments on the loan;
- (f) Accounting principles and system of accounts, and RUS authority to approve the accountant used by the borrower;
- (g) The method and time period for advancing loan funds and the conditions precedent to the advance of funds;
- (h) Representations and warranties by the borrower as a condition of obtaining the loan, including but not limited to: the legal authority of the borrower to enter into the loan contract and operate its system; that the loan documents will be a legal, valid and binding obligation of the borrower enforceable according to their terms; compliance of the borrower in all material respects with all federal, state, and local laws, regulations, codes, and orders; existence of any pending or threatened legal actions that could have a material adverse effect on the borrower's ability to perform its obligations under the loan documents; the accuracy and completeness of all information provided by the borrower in the loan application and with respect to

the loan contract, and the existence of any material adverse change since the information was provided; and the existence of any material defaults under other agreements of the borrower;

(i) Representations, warranties, and covenants with respect to environmental matters;

(j) Reports and notices required to be submitted to RUS, including but not limited to: annual financial statements; notice of defaults; notice of litigation; notice of orders or other directives received by the borrower from regulatory authorities; notice of any matter that has resulted in or may result in a material adverse change in the condition or operations of the borrower; and such other information regarding the condition or operations of the borrower as RUS may reasonably require;

(k) Annual written certification that the borrower is in compliance with its loan contract, note, mortgage, and any other agreement with RUS, or if there has been a default in the fulfillment of any obligation under said agreements, specifying each such default and the nature and status thereof;

(l) Requirement that the borrower design and implement rates for utility services to meet certain minimum coverage of interest expense and/or debt service obligations;

(m) Requirement that the borrower maintain and preserve its mortgaged property in compliance with prudent utility practice and all applicable laws, which may include certain specific actions and certifications set forth in the borrower's loan contract or mortgage;

(n) Requirement that the borrower plan, design and construct its electric system according to standards and other requirements established by RUS, and if directed by the Administrator, that the borrower follow RUS planning, design and construction standards and requirements for other utility systems constructed by the borrower;

(o) Limitations on extensions and additions to the borrower's electric system without approval by RUS;

(p) Limitations on contracts and contract amendments that the borrower may enter into without approval by RUS;

§ 1718.104

(q) Limitations of the transfer of mortgaged property by the borrower;

(r) Limitations on dividends, patronage refunds, and cash distributions paid by the borrower;

(s) Limitations on investments, loans, and guarantees made by the borrower;

(t) Authority of RUS to approve a new general manager and to require that an existing general manager be replaced if the borrower is in default under its mortgage, loan contract, or any other agreements with RUS;

(u) Description of events of default under the loan contract and the remedies available to RUS;

(v) Applicability of state and federal laws;

(w) Severability of the individual provisions of the loan documents;

(x) Matters relating to the assignment of the loan contract;

(y) Requirements relating to federal laws and regulations, including but not limited to the following matters: area coverage for electric service; civil rights and equal employment opportunity; access to buildings and other matters relating to the handicapped; design and construction standards relating to earthquakes; the National Environmental Policy Act of 1969 and other environmental laws and regulations; flood hazard insurance; debarment and suspension from federal assistance programs; and delinquency on federal debt; and

(z) Special requirements applicable to individual loans, and such other provisions as RUS may require to ensure loan repayment and reasonably adequate loan security.

§ 1718.104 Availability of model loan contract.

Single copies of the model loan contract (RUS Informational Publication 1718 C) are available from the Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250-1533. This document may be reproduced.

LOAN CONTRACT

AGREEMENT, dated _____, 199____, between _____ ("Borrower"), a corporation organized and existing under the laws of the State of _____ (the "State") and the UNITED STATES OF AMERICA acting by and through the Administrator of the Rural Utilities Service ("RUS").

RECITALS

The Borrower has applied to RUS for a loan for the purpose(s) set forth in Schedule 1 hereto.

RUS is willing to make such a loan to the Borrower pursuant to the Rural Electrification Act of 1936, as amended, on the terms and conditions stated herein.

Pt. 1718, Subpt. C, App. A

THEREFORE, for and in consideration of the premises and the mutual covenants hereinafter contained, the parties hereto agree and bind themselves as follows:

ARTICLE I—DEFINITIONS

Capitalized terms that are not defined herein shall have the meanings as set forth in the Mortgage. The terms defined herein include the plural as well as the singular and the singular as well as the plural.

"Act" shall mean the Rural Electrification Act of 1936, as amended.

"Advance" or "Advances" shall mean advances by RUS to Borrower pursuant to the terms and conditions of this Agreement.

"Agreement" shall mean this Loan Contract together with all schedules and exhibits and also any subsequent supplements or amendments.

"Business Day" shall mean any day that RUS is open for business.

"Contemporaneous Loan" shall mean any loan which the Borrower has used to satisfy RUS Regulations or loan conditions requiring that supplemental financing be obtained in order to obtain a loan from RUS. Any loan used to refinance or refund a Contemporaneous Loan is also considered to be a Contemporaneous Loan.

"Coverage Ratios" shall mean, collectively, the following financial ratios: (i) TIER of 1.5; (ii) Operating TIER of 1.1; (iii) DSC of 1.25; and Operating DSC of 1.1.

"Debt Service Coverage Ratio" ("DSC") shall have the meaning provided in the Mortgage.

"Distributions" shall mean for the Borrower to, in any calendar year, declare or pay any dividends, or pay or determine to pay any patronage refunds, or retire any patronage capital or make any other Cash Distributions, to its members, stockholders or consumers; provided, however, that for the purposes of this Agreement a "Cash Distribution" shall be deemed to include any general cancellation or abatement of charges for electric energy or services furnished by the Borrower, but not the repayment of a membership fee upon termination of a membership or the rebate of an abatement of wholesale power costs previously incurred pursuant to an order of a state regulatory authority or a wholesale power cost adjustment clause or similar power pricing agreement between the Borrower and a power supplier.

"Electric System" shall have the meaning as defined in the Mortgage.

"Equity" shall mean the Borrower's total margins and equities computed pursuant to RUS Accounting Requirements but excluding any Regulatory Created Assets.

"Event of Default" shall have the meaning as defined in Section [7.1].

"Independent" when used with respect to any specified person or entity means such a

Pt. 1718, Subpt. C, App. A

7 CFR Ch. XVII (1–1–97 Edition)

person or entity who (1) is in fact independent, (2) does not have any direct financial interest or any material indirect financial interest in the Borrower or in any affiliate of the Borrower and (3) is not connected with the Borrower as an officer, employee, promoter, underwriter, trustee, partner, director or person performing similar functions.

“Interest Expense” shall mean the interest expense of the Borrower computed pursuant to RUS Accounting Requirements.

“Loan” shall mean the loan described in Article III which is being made pursuant to the RUS Commitment in furtherance of the objectives of the Act.

“Loan Documents” shall mean, collectively, this Agreement, the Mortgage and the Note.

“Long-Term Debt” shall mean the total of all amounts included in the long-term debt of the Borrower pursuant to RUS Accounting Requirements.

“Maturity Date” shall have the meaning as defined in the Note.

“Monthly Payment Date” shall have the meaning as defined in the Note.

“Mortgage” shall have the meaning as described in Schedule 1 hereto.

“Mortgaged Property” shall have the meaning as defined in the Mortgage.

“Net Utility Plant” shall mean the amount constituting the Total Utility Plant of the Borrower, less depreciation, computed in accordance with RUS Accounting Requirements.

“Note” shall mean a promissory note executed by the Borrower in the form of exhibit A hereto, and any note executed and delivered to RUS to refund, or in substitution for such a note.

“Operating DSC” or “ODSC” shall mean Operating Debt Service Coverage calculated as:

$$\text{ODSC} = \frac{A+B+C}{D}$$

Where:

All amounts are for the same calendar year and are computed pursuant to RUS Accounting Requirements and RUS form 7;

A=Depreciation and Amortization Expense of the Electric System;

B=Interest Expense on Total Long-Term Debt of the Electric System, except that such Interest Expense shall be increased by $\frac{1}{3}$ of the amount, if any, by which the Restricted Rentals of the Electric System exceed 2 percent of the Mortgagor's Equity;

C=Patronage capital & operating margins of the Electric System, (which equals operating revenue and patronage capital of Electric System operations, less total cost of electric service, including Interest Expense on Total Long-Term Debt of the Electric System) plus cash received from the retirement of patron-

age capital by suppliers of electric power and by lenders for credit extended for the Electric System; and

D=Debt service billed which equals the sum of all payments of principal and interest required to be made on account of Total Long-Term Debt of the Electric System during the calendar year, plus $\frac{1}{3}$ of the amount, if any, by which Restricted Rentals of the Electric System exceed 2 percent of the Mortgagor's Equity.

“Operating TIER” or “OTIER” shall mean Operating Times Interest Earned Ratio calculated as:

$$\text{OTIER} = \frac{A+B}{A}$$

Where:

All amounts are for the same calendar year and are computed pursuant to RUS Accounting Requirements and RUS form 7;

A=Interest Expense on Total Long-Term Debt of the Electric System, except that such Interest Expense shall be increased by $\frac{1}{3}$ of the amount, if any, by which Restricted Rentals of the Electric System exceed 2 percent of the Mortgagor's Equity; and

B=Patronage capital & operating margins of the Electric System, (which equals operating revenue and patronage capital of Electric System operations, less total cost of electric service, including Interest Expense on Total Long-Term Debt of the Electric System) plus cash received from the retirement of patronage capital by suppliers of electric power and by lenders for credit extended for the Electric System.

“Payment Notice” shall mean a notice furnished by RUS to Borrower that indicates the precise amount of each payment of principal and interest and the total amount of each payment.

“Permitted Debt” shall have the meaning as defined in section [6.13].

“Prior Loan Contracts” shall have the meaning as defined in section 9.15.

“Regulatory Created Assets” shall mean the sum of any amounts properly recordable as unrecovered plant and regulatory study costs or as other regulatory assets, computed pursuant to RUS Accounting Requirements.

“RUS Accounting Requirements” shall mean any system of accounts prescribed by RUS Regulations as such RUS Accounting Requirements exist at the date of applicability thereof.

“RUS Commitment” shall have the meaning as defined in schedule 1 hereto.

“RUS Regulations” shall mean regulations of general applicability published by RUS from time to time as they exist at the date

Rural Utilities Service, USDA

Pt. 1718, Subpt. C, App. A

of applicability thereof, and shall also include any regulations of other Federal entities which RUS is required by law to implement.

“Special Construction Account” shall have the meaning as defined in section 5.21.

“Subsidiary” shall mean a corporation that is a subsidiary of the Borrower and subject to the Borrower’s control, as defined by RUS Accounting Requirements.

“Termination Date” shall have the meaning as defined in the Note.

“Times Interest Earned Ratio” (“TIER”) shall have the meaning provided in the Mortgage.

“Total Assets” shall mean an amount constituting the total assets of the Borrower as computed pursuant to RUS Accounting Requirements, but excluding any Regulatory Created Assets.

“Total Utility Plant” shall mean the amount constituting the total utility plant of the Borrower computed in accordance with RUS Accounting Requirements.

“Utility System” shall have the meaning as defined in the Mortgage.

ARTICLE II—REPRESENTATIONS AND WARRANTIES

Section 2.1. Representations and Warranties.

To induce RUS to make the Loan, and recognizing that RUS is relying hereon, the Borrower represents and warrants as follows:

(a) *Organization; Power, Etc.* The Borrower: (i) is duly organized, validly existing, and in good standing under the laws of its state of incorporation; (ii) is duly qualified to do business and is in good standing in each jurisdiction in which the transaction of its business makes such qualification necessary; (iii) has all requisite corporate and legal power to own and operate its assets and to carry on its business and to enter into and perform the Loan Documents; (iv) has duly and lawfully obtained and maintained all licenses, certificates, permits, authorizations, approvals, and the like which are material to the conduct of its business or which may be otherwise required by law; and (v) is eligible to borrow from RUS.

(b) *Authority.* The execution, delivery and performance by the Borrower of this Agreement and the other Loan Documents and the performance of the transactions contemplated thereby have been duly authorized by all necessary corporate action and shall not violate any provision of law or of the Articles of Incorporation or By-Laws of the Borrower or result in a breach of, or constitute a default under, any agreement, indenture or other instrument to which the Borrower is a party or by which it may be bound.

(c) *Consents.* No consent, permission, authorization, order, or license of any governmental authority is necessary in connection

with the execution, delivery, performance, or enforcement of the Loan Documents, except (i) such as have been obtained and are in full force and effect and (ii) such as have been disclosed on Schedule 1 hereto.

(d) *Binding Agreement.* Each of the Loan Documents is, or when executed and delivered shall be, the legal, valid, and binding obligation of the Borrower, enforceable in accordance with its terms, subject only to limitations on enforceability imposed by applicable bankruptcy, insolvency, reorganization, moratorium, or similar laws affecting creditors’ rights generally.

(e) *Compliance With Laws.* The Borrower is in compliance in all material respects with all federal, state, and local laws, rules, regulations, ordinances, codes, and orders (collectively, “Laws”), the failure to comply with which could have a material adverse effect on the condition, financial or otherwise, operations, properties, or business of the Borrower, or on the ability of the Borrower to perform its obligations under the Loan Documents, except as the Borrower has disclosed on Schedule 1 attached hereto.

(f) *Litigation.* There are no pending legal, arbitration, or governmental actions or proceedings to which the Borrower is a party or to which any of its property is subject which, if adversely determined, could have a material adverse effect on the condition, financial or otherwise, operations, properties, profits or business of the Borrower, or on the ability of the Borrower to perform its obligations under the Loan Documents, and to the best of the Borrower’s knowledge, no such actions or proceedings are threatened or contemplated, except as the Borrower has disclosed to RUS in writing.

(g) *Title to Property.* As to property which is presently included in the description of Mortgaged Property, the Borrower holds good and marketable title to all of its real property and owns all of its personal property free and clear of any Lien except the Liens specifically identified on Schedule 2 attached hereto (the “Existing Liens”), and Permitted Encumbrances or Liens permitted under the Mortgage.

(h) *Financial Statements; No Material Adverse Change; Etc.* All financial statements submitted to RUS in connection with the application for the Loan or in connection with this Agreement fairly and fully present the financial condition of the Borrower and the results of the Borrower’s operations for the periods covered thereby and are prepared in accordance with RUS Accounting Requirements consistently applied. Since the dates thereof, there has been no material adverse change in the financial condition or operations of the Borrower. All budgets, projections, feasibility studies, and other documentation submitted by the Borrower to RUS are based upon assumptions that are reasonable and realistic, and as of the date

hereof, no fact has come to light, and no event or transaction has occurred, which would cause any assumption made therein not to be reasonable or realistic.

(i) *Principal Place of Business; Records.* The principal place of business and chief executive office of the Borrower is at the address of the Borrower shown on Schedule 1 attached hereto.

(j) *Location of Properties.* All property owned by the Borrower is located in the counties identified in Schedule 1 hereto.

(k) *Subsidiaries.* The Borrower has no subsidiary, except as the Borrower has disclosed to RUS in writing.

(l) *Defaults Under Other Agreements.* The Borrower is not in default under any agreement or instrument to which it is a party or under which any of its properties are subject that is material to its financial condition, operations, properties, profits, or business.

(m) *Survival.* All representations and warranties made by the Borrower herein or made in any certificate delivered pursuant hereto shall survive the making of the Advances and the execution and delivery to RUS of the Note.

ARTICLE III—LOAN

Section 3.1. Advances

RUS agrees to make, and the Borrower agrees to request, on the terms and conditions of this Agreement, Advances from time to time in an aggregate principal amount not to exceed the RUS Commitment. On the Termination Date, RUS may stop advancing funds and limit the RUS Commitment to the amount advanced prior to such date. The obligation of the Borrower to repay the Advances shall be evidenced by the Note in the principal amount of the unpaid principal amount of the Advances from time to time outstanding. The Borrower shall give RUS written notice of the date on which each Advance is to be made.

Section 3.2. Interest Rate and Payment

The Note shall be payable and bear interest as follows:

(a) *Payments and Amortization.* Principal shall be amortized in accordance with the method stated in Schedule 1 hereto and more fully described in the form of Note attached hereto as Exhibit A.

(b) *Application of Payments.* All payments which the Borrower sends to RUS on any outstanding obligation owed to RUS shall be applied in the manner provided in the Borrower's loan documents to which such payments relate and in a manner consistent with RUS policies, practices, and procedures for obligations that have been similarly classified by RUS.

(c) *Electronic Funds Transfer.* Except as otherwise prescribed by RUS, the Borrower shall make all payments on the Note utilizing

electronic funds transfer procedures as specified by RUS.

(d) *Fixed or Variable Rate.* The Note shall bear interest at either a fixed or variable rate in accordance with the method stated in Schedule 1 hereto and as more particularly described in the form of Note attached hereto as Exhibit A.

Section 3.3. Prepayment

The Borrower has no right to prepay the Note in whole or in part except such rights, if any, as are expressly provided for in the Note. However, prepayment of the Note (and any penalties) shall be mandatory under Section [5.3] hereof if the Borrower has used a Contemporaneous Loan in order to qualify for the RUS Commitment, and later prepays the Contemporaneous Loan.

ARTICLE IV—CONDITIONS OF LENDING

Section 4.1. General Conditions

The obligation of RUS to make any Advance hereunder is subject to satisfaction of each of the following conditions precedent on or before the date of such Advance:

(a) *Legal Matters.* All legal matters incident to the consummation of the transactions hereby contemplated shall be satisfactory to counsel for RUS.

(b) *Loan Documents.* That RUS receive duly executed originals of this Agreement and the other Loan Documents.

(c) *Authorization.* That RUS receive evidence satisfactory to it that all corporate documents and proceedings of the Borrower necessary for duly authorizing the execution, delivery and performance of the Loan Documents have been obtained and are in full force and effect.

(d) *Approvals.* That RUS receive evidence satisfactory to it that all consents and approvals (including without limitation the consents referred to in Section [2.1(c)] of this Agreement) which are necessary for, or required as a condition of, the validity and enforceability of each of the Loan Documents have been obtained and are in full force and effect.

(e) *Event of Default.* That no Event of Default specified in Article VII and no event which, with the lapse of time or the notice and lapse of time specified in Article VII would become such an Event of Default, shall have occurred and be continuing, or shall have occurred after giving effect to the Advance on the books of the Borrower.

(f) *Continuing Representations and Warranties.* That the representations and warranties of the Borrower contained in this Agreement be true and correct on and as of the date of such Advance as though made on and as of such date.

(g) *Opinion of Counsel.* That RUS receive an opinion of counsel for the Borrower (who

Rural Utilities Service, USDA

Pt. 1718, Subpt. C, App. A

shall be acceptable to RUS) in form and content acceptable to RUS.

(h) *Mortgage Filing.* The Mortgage shall have been duly recorded as a mortgage on real property, including after-acquired real property, and duly filed, recorded or indexed as a security interest in personal property, including after acquired personal property, wherever RUS shall have requested, all in accordance with applicable law, and the Borrower shall have caused satisfactory evidence thereof to be furnished to RUS.

(i) *Wholesale Power Contract.* That the Borrower shall not be in default under the terms of, or contesting the validity of, any contract for sales for resale that has been pledged by any entity to RUS as security for the repayment of any loan made or guaranteed by RUS under the Act.

(j) *Material Adverse Change.* That there has occurred no material adverse change in the business or condition, financial or otherwise, of the Borrower and nothing has occurred which in the opinion of RUS materially and adversely affects the Borrower's ability to meet its obligations hereunder.

(k) *Requisitions.* That the Borrower shall requisition all Advances by submitting its requisition to RUS in form and substance satisfactory to RUS. Requisitions shall be made only for the purpose(s) set forth herein. The Borrower agrees to apply the proceeds of the Advances in accordance with its loan application with such modifications as may be mutually agreed.

(l) *Flood Insurance.* That for any Advance used in whole or in part to finance the construction or acquisition of any building in any area identified by the Secretary of Housing and Urban Development pursuant to the Flood Disaster Protection Act of 1973 (the "Flood Insurance Act") or any rules, regulations or orders issued to implement the Flood Insurance Act ("Rules") as any area having special flood hazards, or to finance any facilities or materials to be located in any such building, or in any building owned or occupied by the Borrower and located in such a flood hazard area, the Borrower has submitted evidence, in form and substance satisfactory to RUS, or RUS has otherwise determined, that (i) the community in which such area is located is then participating in the national flood insurance program, as required by the Flood Insurance Act and any Rules, and (ii) the Borrower has obtained flood insurance coverage with respect to such building and contents as may then be required pursuant to the Flood Insurance Act and any Rules.

(m) *Compliance With Loan Contract and Mortgage.* That the Borrower is in material compliance with all provisions of this Agreement and the Mortgage.

Section 4.2. Special Conditions

The obligation of RUS to make any Advance hereunder is also subject to satisfaction, on or before the date of such Advance, of each of the special conditions, if any, listed in Schedule 1 hereto.

ARTICLE V—AFFIRMATIVE COVENANTS

Section 5.1. Generally

Unless otherwise agreed to in writing by RUS, while this Agreement is in effect, whether or not any Advance is outstanding, the Borrower agrees to duly observe each of the affirmative covenants contained in this Article:

Section 5.2. Annual Certificates

(a) *Performance Under Loan Documents.* The Borrower shall duly observe and perform all of its obligations under each of the Loan Documents.

(b) *Annual Certification.* Within ninety (90) days after the close of each calendar year, commencing with the year following the year in which the initial Advance hereunder shall have been made, the Borrower shall deliver to RUS a written statement signed by its General Manager, stating that during such year the Borrower has fulfilled all of its obligations under the Loan Documents throughout such year in all material respects or, if there has been a default in the fulfillment of any such obligations, specifying each such default known to said person and the nature and status thereof.

Section 5.3. Simultaneous Prepayment of Contemporaneous Loans

If the Borrower shall at any time prepay in whole or in part the Contemporaneous Loan described on Schedule 1, the Borrower shall prepay the RUS Note correspondingly in order to maintain the ratio that the Contemporaneous Loan bears to the RUS Commitment. If the RUS Note calls for a prepayment penalty or premium, such amount shall be paid but shall not be used in computing the amount needed to be paid to RUS under this section to maintain such ratio. In the case of Contemporaneous Loans and RUS Notes existing prior to the date of this Agreement under previous agreements, prepayments shall be treated as if governed by this section. Provided, however, in all cases prepayments associated with refinancing or refunding a Contemporaneous Loan pursuant to Article II of the Mortgage are not considered to be prepayments for purposes of this Agreement if they satisfy each of the following requirements:

(a) *Principal.* The principal amount of such refinancing or refunding loan is not less than the amount of loan principal being refinanced; and

Pt. 1718, Subpt. C, App. A

(b) *Weighted Average Life.* The weighted average life of the refinancing or refunding loan is materially equal to the weighted average remaining life of the loan being refinanced.

Section 5.4 Rates to Provide Revenue Sufficient to Meet Coverage Ratios Requirements

(a) *Prospective Requirement.* The Borrower shall design and implement rates for utility service furnished by it to provide sufficient revenue (along with other revenue available to the Borrower in the case of TIER and DSC) (i) to pay all fixed and variable expenses when and as due, (ii) to provide and maintain reasonable working capital, and (iii) to maintain, on an annual basis, the Coverage Ratios. In designing and implementing rates under this paragraph, such rates should be capable of producing at least enough revenue to meet the requirements of this paragraph under the assumption that average weather conditions in the Borrower's service territory shall prevail in the future, including average Utility System damage and outages due to weather and the related costs.

(b) *Retrospective Requirement.* The average Coverage Ratios achieved by the Borrower in the 2 best years out of the 3 most recent calendar years must be not less than any of the following:

TIER=1.5
DSC=1.25
OTIER=1.1
ODSC=1.1

(c) *Prospective Notice of Change in Rates.* The Borrower shall give thirty (30) days prior written notice of any proposed change in its general rate structure to RUS if RUS has requested in writing that it be notified in advance of such changes.

(d) *Routine Reporting of Coverage Ratios.* Promptly following the end of each calendar year, the Borrower shall report, in writing, to RUS the TIER, Operating TIER, DSC and Operating DSC levels which were achieved during that calendar year.

(e) *Reporting Non-achievement of Retrospective Requirement.* If the Borrower fails to achieve the average levels required by paragraph (b) of this section, it must promptly notify RUS in writing to that effect.

(f) *Corrective Plans.* Within 30 days of sending a notice to RUS under paragraph (e) of this section, or of being notified by RUS, whichever is earlier, the Borrower in consultation with RUS, shall provide a written plan satisfactory to RUS setting forth the actions that shall be taken to achieve the required Coverage Ratios on a timely basis.

(g) *Noncompliance.* Failure to design and implement rates pursuant to paragraph (a) of this section and failure to develop and implement the plan called for in paragraph (f) of this section shall constitute an Event of De-

7 CFR Ch. XVII (1-1-97 Edition)

fault under this Agreement in the event that REA so notifies the Borrower to that effect under section [7.1(d)] of this Agreement.

Section 5.5. Depreciation Rates

The Borrower shall adopt as its depreciation rates only those which have been previously approved for the Borrower by RUS.

Section 5.6. Property Maintenance

The Borrower shall maintain and preserve its Utility System in compliance in all material respects with the provisions of the Mortgage, RUS Regulations and all applicable laws.

Section 5.7. Financial Books

The Borrower shall at all times keep, and safely preserve, proper books, records and accounts in which full and true entries shall be made of all of the dealings, business and affairs of the Borrower and its Subsidiaries, in accordance with any applicable RUS Accounting Requirements.

Section 5.8. Rights of Inspection

The Borrower shall afford RUS, through its representatives, reasonable opportunity, at all times during business hours and upon prior notice, to have access to and the right to inspect the Utility System, any other property encumbered by the Mortgage, and any or all books, records, accounts, invoices, contracts, leases, payrolls, canceled checks, statements and other documents and papers of every kind belonging to or in the possession of the Borrower or in anyway pertaining to its property or business, including its Subsidiaries, if any, and to make copies or extracts therefrom.

Section 5.9. Area Coverage

(a) The Borrower shall make diligent effort to extend electric service to all unserved persons within the service area of the Borrower who (i) desire such service and (ii) meet all reasonable requirements established by the Borrower as a condition of such service.

(b) If economically feasible and reasonable considering the cost of providing such service and/or the effects on consumers' rates, such service shall be provided, to the maximum extent practicable, at the rates and minimum

Rural Utilities Service, USDA

Pt. 1718, Subpt. C, App. A

charges established in the Borrower's rate schedules, without the payment of such persons, other than seasonal or temporary consumers, of a contribution in aid of construction. A seasonal consumer is one that demands electric service only during certain seasons of the year. A temporary consumer is a seasonal or year-round consumer that demands electric service over a period of less than five years.

(c) The Borrower may assess contributions in aid of construction provided such assessments are consistent with this section.

Section 5.10. Real Property Acquisition

In acquiring real property, the Borrower shall comply in all material respects with the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (the "Uniform Act"), as amended by the Uniform Relocation Act Amendments of 1987, and 49 CFR part 24, referenced by 7 CFR part 21, to the extent the Uniform Act is applicable to such acquisition.

Section 5.11. "Buy American" Requirements

The Borrower shall use or cause to be used in connection with the expenditures of funds advanced on account of the Loan only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States or any eligible country, and only such manufactured articles, materials, and supplies as have been manufactured in the United States or any eligible country substantially all from articles, materials, and supplies mined, produced or manufactured, as the case may be, in the United States or any eligible country, except to the extent RUS shall determine that such use shall be impracticable or that the cost thereof shall be unreasonable. For purposes of this section, an "eligible country" is any country that applies with respect to the United States an agreement ensuring reciprocal access for United States products and services and United States suppliers to the markets of that country, as determined by the United States Trade Representative.

Section 5.12. Power Requirements Studies

The Borrower shall prepare and use power requirements studies of its electric loads and future energy and capacity requirements in conformance with RUS Regulations.

Section 5.13. Long Range Engineering Plans and Construction Work Plans

The Borrower shall develop, maintain and use up-to-date long-range engineering plans and construction work plans in conformance with RUS Regulations.

Section 5.14. Design Standards, Construction Standards, and List of Materials

The Borrower shall use design standards, construction standards, and lists of acceptable materials in conformance with RUS Regulations.

Section 5.15. Plans and Specifications

The Borrower shall submit plans and specifications for construction to RUS for review and approval, in conformance with RUS Regulations, if the construction will be financed in whole or in part by a loan made or guaranteed by RUS.

Section 5.16. Standard Forms of Construction Contracts, and Engineering and Architectural Services Contracts

The Borrower shall use the standard forms of contracts promulgated by RUS for construction, procurement, engineering services and architectural services in conformance with RUS Regulations, if the construction, procurement, or services are being financed in whole or in part by a loan being made or guaranteed by RUS.

Section 5.17. Contract Bidding Requirements

The Borrower shall follow RUS contract bidding procedures in conformance with RUS Regulations when contracting for construction or procurement financed in whole or in part by a loan made or guaranteed by RUS.

Section 5.18. Nondiscrimination

(a) *Equal Opportunity Provisions in Construction Contracts.* The Borrower shall incorporate or cause to be incorporated into any construction contract, as defined in Executive Order 11246 of September 24, 1965 and implementing regulations, which is paid for in whole or in part with funds obtained from RUS or borrowed on the credit of the United States pursuant to a grant, contract, loan, insurance or guarantee, or undertaken pursuant to any RUS program involving such grant, contract, loan, insurance or guarantee, the equal opportunity provisions set

forth in Exhibit B hereto entitled Equal Opportunity Contract Provisions.

(b) *Equal Opportunity Contract Provisions Also Bind the Borrower.* The Borrower further agrees that it shall be bound by such equal opportunity clause in any federally assisted construction work which it performs itself other than through the permanent work force directly employed by an agency of government.

(c) *Sanctions and Penalties.* The Borrower agrees that it shall cooperate actively with RUS and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations and relevant orders of the Secretary of Labor, that it shall furnish RUS and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it shall otherwise assist the administering agency in the discharge of RUS's primary responsibility for securing compliance. The Borrower further agrees that it shall refrain from entering into any contract or contract modification subject to Executive Order 11246 with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to Part II, Subpart D of Executive Order 11246 and shall carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by RUS or the Secretary of Labor pursuant to Part II, Subpart D of Executive Order 11246. In addition, the Borrower agrees that if it fails or refuses to comply with these undertakings RUS may cancel, terminate or suspend in whole or in part this contract, may refrain from extending any further assistance under any of its programs subject to Executive Order 11246 until satisfactory assurance of future compliance has been received from such Borrower, or may refer the case to the Department of Justice for appropriate legal proceedings.

Section 5.19. Financial Reports

The Borrower shall cause to be prepared and furnished to RUS a full and complete annual report of its financial condition and of its operations in form and substance satisfactory to RUS, audited and certified by Independent certified public accountants satisfactory to RUS and accompanied by a report of such audit in form and substance satisfactory to RUS. The Borrower shall also furnish to RUS from time to time such other reports concerning the financial condition or operations of the Borrower, including its Subsidiaries, as RUS may reasonably request or RUS Regulations require.

Section 5.20. Miscellaneous Reports and Notices

The Borrower shall furnish to RUS:

(a) *Notice of Default.* Promptly after becoming aware thereof, notice of: (i) the occurrence of any default; and (ii) the receipt of any notice given pursuant to the Mortgage with respect to the occurrence of any event which with the giving of notice or the passage of time, or both, could become an "Event of Default" under the Mortgage.

(b) *Notice of Non-Environmental Litigation.* Promptly after the commencement thereof, notice of the commencement of all actions, suits or proceedings before any court, arbitrator, or governmental department, commission, board, bureau, agency, or instrumentality affecting the Borrower which, if adversely determined, could have a material adverse effect on the condition, financial or otherwise, operations, properties or business of the Borrower, or on the ability of the Borrower to perform its obligations under the Loan Documents.

(c) *Notice of Environmental Litigation.* Without limiting the provisions of Section [5.20(b)] above, promptly after receipt thereof, notice of the receipt of all pleadings, orders, complaints, indictments, or other communications alleging a condition that may require the Borrower to undertake or to contribute to a cleanup or other response under laws relating to environmental protection, or which seek penalties, damages, injunctive relief, or criminal sanctions related to alleged violations of such laws, or which claim personal injury or property damage to any person as a result of environmental factors or conditions for which the Borrower is not fully covered by insurance, or which, if adversely determined, could have a material adverse effect on the condition, financial or otherwise, operations, properties or business of the Borrower, or on the ability of the Borrower to perform its obligations under the Loan Documents.

(d) *Notice of Change of Place of Business.* Promptly in writing, notice of any change in location of its principal place of business or the office where its records concerning accounts and contract rights are kept.

(e) *Regulatory and Other Notices.* Promptly after receipt thereof, copies of any notices or other communications received from any governmental authority with respect to any matter or proceeding which could have a material adverse effect on the condition, financial or otherwise, operations, properties, or business of the Borrower, or on the ability of the Borrower to perform its obligations under the Loan Documents.

(f) *Material Adverse Change.* Promptly, notice of any matter which has resulted or may result in a material adverse change in the condition, financial or otherwise, operations, properties, or business of the Borrower, or

Rural Utilities Service, USDA

Pt. 1718, Subpt. C, App. A

the ability of the Borrower to perform its obligations under the Loan Documents.

(g) *Other Information.* Such other information regarding the condition, financial or otherwise, or operations of the Borrower as RUS may, from time to time, reasonably request.

Section 5.21. Special Construction Account

The Borrower shall hold all moneys advanced to it by RUS hereunder in trust for RUS and shall deposit such moneys promptly after the receipt thereof in a bank or banks which meet the requirements of Section [6.7] of this Agreement. Any account (hereinafter called "Special Construction Account") in which any such moneys shall be deposited shall be insured by the Federal Deposit Insurance Corporation or other federal agency acceptable to RUS and shall be designated by the corporate name of the Borrower followed by the words "Trustee, Special Construction Account." Moneys in any Special Construction Account shall be used solely for the construction and operation of the Utility System and may be withdrawn only upon checks, drafts, or orders signed on behalf of the Borrower and countersigned by an executive officer thereof.

Section 5.22. Additional Affirmative Covenants

The Borrower also agrees to comply with any additional affirmative covenant(s) identified in Schedule 1 hereto.

ARTICLE VI—NEGATIVE COVENANTS

Section 6.1. General

Unless otherwise agreed to in writing by RUS, while this Agreement is in effect, whether or not any Advance is outstanding hereunder, the Borrower shall duly observe each of the negative covenants set forth in this Article.

Section 6.2. Limitations on System Extensions and Additions

(a) The Borrower shall not extend or add to its Electric System either by construction or acquisition without the prior written approval of RUS if the construction or acquisition is financed or will be financed, in whole or in part, by a RUS loan or loan guarantee.

(b) The Borrower shall not extend or add to its Electric System with funds from other sources without prior written approval of RUS in the case of:

(1) Generating facilities if the combined capacity of the facilities to be built, procured, or leased, including any future facilities included in the planned project, will exceed the lesser of 5 Megawatts or 30 percent of the Borrower's Equity;

(2) Existing electric facilities or systems in service whose purchase price, or capitalized

value in the case of a lease, exceeds ten percent of the Borrower's Net Utility Plant; and

(3) Any project to serve a customer whose annual Kwh purchases or maximum annual Kw demand is projected to exceed 25 percent of the Borrower's total Kwh sales or maximum Kw demand in the year immediately preceding the acquisition or start of construction of facilities.

Section 6.3. Limitations on Changing Principal Place of Business

The Borrower shall not change its principal place of business or keep property in a county not shown on a schedule to the Mortgage if the change would cause the lien in favor of RUS to become unperfected or fail to become perfected, as the case may be, unless, prior thereto, the Borrower shall have taken all steps required by law in order to assure that the lien in favor of RUS remains or becomes perfected, as the case may be, and, in either event, such lien has the priority accorded by the Mortgage.

Section 6.4. Limitations on Employment and Retention of Manager

At any time any Event of Default, or any occurrence which with the passage of time or giving of notice would be an Event of Default, occurs and is continuing the Borrower shall not employ any general manager of the Utility System or the Electric System or any person exercising comparable authority to such a manager unless such employment shall first have been approved by RUS. If any Event of Default, or any occurrence which with the passage of time or giving of notice would be an Event of Default, occurs and is continuing and RUS requests the Borrower to terminate the employment of any such manager or person exercising comparable authority, or RUS requests the Borrower to terminate any contract for operating the Utility System or the Electric System, the Borrower shall do so within thirty (30) days after the date of such notice. All contracts in respect of the employment of any such manager or person exercising comparable authority, or for the operation of the Utility System or the Electric System, shall contain provisions to permit compliance with the foregoing covenants.

Section 6.5. Limitations on Certain Types of Contracts

Without the prior approval of RUS in writing, the Borrower shall not enter into any of the following contracts:

(a) *Construction Contracts.* Any contract for construction or procurement or for architectural and engineering services in connection with its Electric System if the project is financed or will be financed, in whole or in part, by a RUS loan or loan guarantee;

(b) *Large retail power contracts.* Any contract to sell electric power and energy for periods exceeding two (2) years if the kWh sales or kW demand for any year covered by such contract shall exceed 25 percent of the Borrower's total kWh sales or maximum kW demand for the year immediately preceding the execution of such contract;

(c) *Wholesale power contracts.* Any contract to sell electric power or energy for resale and any contract to purchase electric power or energy that, in either case, has a term exceeding two (2) years;

(d) *Power supply arrangements.* Any interconnection agreement, interchange agreement, wheeling agreement, pooling agreement or similar power supply arrangement that has a term exceeding two (2) years;

(e) *System management and maintenance contracts.* Any contract for the management and operation of all or substantially all of its Electric System; or

(f) *Other contracts.* Any contracts of the type described on Schedule 3.

Section 6.6. Limitations on Mergers and Sale, Lease or Transfer of Capital Assets

(a) The Borrower shall not consolidate with, or merge, or sell all or substantially all of its business or assets, to another entity or person except to the extent it is permitted to do so under the Mortgage. The exception contained in this paragraph (a) is subject to the additional limitation set forth in paragraph (b) of this section.

(b) The Borrower shall not, without the written approval of the Administrator, voluntarily or involuntarily sell, convey or dispose of any portion of its business or assets (including, without limitation, any portion of its franchise or service territory) to another entity or person if such sale, conveyance or disposition could reasonably be expected to reduce the Borrower's existing or future requirements for energy or capacity being furnished to the Borrower under any wholesale power contract which has been pledged as security to RUS.

Section 6.7. Limitations on Using non-FDIC Insured Depositories

Without the prior written approval of RUS, the Borrower shall not place the proceeds of the Loan or any loan which has been made or guaranteed by RUS in the custody of any bank or other depository that is not insured by the Federal Deposit Insurance Corporation or other federal agency acceptable to RUS.

Section 6.8. Limitation on Distributions

Without the prior written approval of RUS, the Borrower shall not in any calendar year make any Distributions (exclusive of any Distributions to the estates of deceased nat-

ural patrons) to its members, stockholders or consumers except as follows:

(a) Equity above 30%. If, after giving effect to any such Distribution, the Equity of the Borrower shall be greater than or equal to 30% of its Total Assets; or

(b) Equity above 20%. If, after giving effect to any such Distribution, the aggregate of all Distributions made during the calendar year when added to such Distribution shall be less than or equal to 25% of the prior year's margins.

Provided however, that in no event shall the Borrower make any Distributions if there is unpaid when due any installment of principal of (premium, if any) or interest on its Notes, if the Borrower is otherwise in default hereunder or if, after giving effect to any such Distribution, the Borrower's current and accrued assets would be less than its current and accrued liabilities.

Section 6.9. Limitations on Loans, Investments and Other Obligations

The Borrower shall not make any loan or advance to, or make any investment in, or purchase or make any commitment to purchase any stock, bonds, notes or other securities of, or guaranty, assume or otherwise become obligated or liable with respect to the obligations of, any other person, firm or corporation, except as permitted by the Act and RUS Regulations.

Section 6.10. Depreciation Rates

The Borrower shall not file with or submit for approval of regulatory bodies any proposed depreciation rates which are inconsistent with RUS Regulations.

Section 6.11. Historic Preservation

The Borrower shall not, without approval in writing by RUS, use any Advance to construct any facilities which shall involve any district, site, building, structure or object which is included in, or eligible for inclusion in, the National Register of Historic Places maintained by the Secretary of the Interior pursuant to the Historic Sites Act of 1935 and the National Historic Preservation Act of 1966.

Section 6.12. Rate Reductions

Without the prior written approval of RUS, the Borrower shall not decrease its rates if it has failed to achieve all of the Coverage Ratios for the calendar year prior to such reduction.

Section 6.13. Limitations on Additional Indebtedness

Except as expressly permitted by Article II of the Mortgage and subject to the further limitations expressed in the next section, the Borrower shall not incur, assume, guarantee or otherwise become liable in respect of any

Rural Utilities Service, USDA

Pt. 1718, Subpt. C, App. A

debt for borrowed money and Restricted Rentals (including Subordinated Indebtedness) other than the following: ("Permitted Debt")

(a) Additional Notes issued in compliance with Article II of the Mortgage;

(b) Purchase money indebtedness in non-Utility System property, in an amount not exceeding 10% of Net Utility Plant;

(c) Restricted Rentals in an amount not to exceed 5% of Equity during any 12 consecutive calendar month period;

(d) Unsecured lease obligations incurred in the ordinary course of business except Restricted Rentals;

(e) Unsecured indebtedness for borrowed money, except when the aggregate amount of such indebtedness exceeds 15% of Net Utility Plant and after giving effect to such unsecured indebtedness the Borrower's Equity is less than 30% of its Total Assets;

(f) Debt represented by dividends declared but not paid; and

(g) Subordinated Indebtedness approved by RUS.

PROVIDED, However, that the Borrower may incur Permitted Debt without the consent of RUS only so long as there exists no Event of Default hereunder and there has been no continuing occurrence which with the passage of time and giving of notice could become an Event of Default hereunder.

PROVIDED, FURTHER, by executing this Agreement any consent of RUS that the Borrower would otherwise be required to obtain under this Section is hereby deemed to be given or waived by RUS by operation of law to the extent, but only to the extent, that to impose such a requirement of RUS consent would clearly violate federal laws or RUS Regulations.

Section 6.14. Limitations on Issuing Additional Indebtedness Secured Under the Mortgage

(a) The Borrower shall not issue any Additional Notes under the Mortgage to finance Eligible Property Additions without the prior written consent of RUS unless the following additional requirements are met in addition to the requirements set forth in the Mortgage for issuing Additional Notes:

(1) The weighted average life of the loan evidenced by such Notes does not exceed the weighted average of the expected remaining useful lives of the assets being financed;

(2) The principal of the loan evidenced by such Notes is amortized at a rate that shall yield a weighted average life that is not greater than the weighted average life that would result from level payments of principal and interest; and

(3) The principal of the loan being evidenced by such Notes has a maturity of not less than 5 years.

(b) The Borrower shall not issue any Additional Notes under the Mortgage to refund or refinance Notes without the prior written

consent of RUS unless, in addition to the requirements set forth in the Mortgage for issuing Refunding or Refinancing Notes, the weighted average life of any such Refunding or Refinancing Notes is not greater than the weighted average remaining life of the Notes being refinanced.

(c) Any request for consent from RUS under this section, shall be accompanied by a certificate of the Borrower's manager substantially in the form attached to this Agreement as Exhibit C-1 in the case of Notes being issued under Section [2.01] of the Mortgage and C-2 in the case of Notes being issued under Section [2.02] of the Mortgage.

Section 6.15. Impairment of Contracts Pledged to RUS

The Borrower shall not materially breach any obligation to be paid or performed by the Borrower on any contract, or take any action which is likely to materially impair the value of any contract, which has been pledged as security to RUS by the Borrower or any other entity.

Section 6.16. Additional Negative Covenants

The Borrower also agrees to comply with any additional negative covenant(s) identified in Schedule 1 hereto.

ARTICLE VII—DEFAULT

Section 7.1. Events of Default

The following shall be Events of Default under this Agreement:

(a) *Representations and Warranties.* Any representation or warranty made by the Borrower in Article II hereof or any certificate furnished to RUS hereunder or under the Mortgage shall prove to have been incorrect in any material respect at the time made and shall at the time in question be untrue or incorrect in any material respect and remain uncured;

(b) *Payment.* Default shall be made in the payment of or on account of interest on or principal of the Note when and as the same shall be due and payable, whether by acceleration or otherwise, which shall remain unsatisfied for five (5) Business Days;

(c) *Borrowing Under the Mortgage in Violation of the Loan Contract.* Default by the Borrower in the observance or performance of any covenant or agreement contained in Section 6.14 of this Agreement.

(d) *Other Covenants.* Default by the Borrower in the observance or performance of any other covenant or agreement contained in any of the Loan Documents, which shall remain unremedied for 30 calendar days after written notice thereof shall have been given to the Borrower by RUS;

(e) *Corporate Existence.* The Borrower shall forfeit or otherwise be deprived of its corporate charter, franchises, permits, easements, consents or licenses required to carry on any material portion of its business;

(f) *Other Obligations.* Default by the Borrower in the payment of any obligation, whether direct or contingent, for borrowed money or in the performance or observance of the terms of any instrument pursuant to which such obligation was created or securing such obligation;

(g) *Bankruptcy.* A court having jurisdiction in the premises shall enter a decree or order for relief in respect of the Borrower in an involuntary case under any applicable bankruptcy, insolvency or other similar law now or hereafter in effect, or appointing a receiver, liquidator, assignee, custodian, trustee, sequestrator or similar official, or ordering the winding up or liquidation of its affairs, and such decree or order shall remain unstayed and in effect for a period of ninety (90) consecutive days or the Borrower shall commence a voluntary case under any applicable bankruptcy, insolvency or other similar law now or hereafter in effect, or under any such law, or consent to the appointment or taking possession by a receiver, liquidator, assignee, custodian or trustee, of a substantial part of its property, or make any general assignment for the benefit of creditors; and

(h) *Dissolution or Liquidation.* Other than as provided in the immediately preceding subsection, the dissolution or liquidation of the Borrower, or failure by the Borrower promptly to forestall or remove any execution, garnishment or attachment of such consequence as shall impair its ability to continue its business or fulfill its obligations and such execution, garnishment or attachment shall not be vacated within 30 days. The term “dissolution or liquidation of the Borrower”, as used in this subsection, shall not be construed to include the cessation of the corporate existence of the Borrower resulting either from a merger or consolidation of the Borrower into or with another corporation following a transfer of all or substantially all its assets as an entirety, under the conditions permitting such actions.

ARTICLE VIII—REMEDIES

Section 8.1. Generally

Upon the occurrence of an Event of Default, then RUS may pursue all rights and remedies available to RUS that are contemplated by this Agreement or the Mortgage in the manner, upon the conditions, and with the effect provided in this Agreement or the Mortgage, including, but not limited to, a suit for specific performance, injunctive relief or damages. Nothing herein shall limit the right of RUS to pursue all rights and remedies available to a creditor following

the occurrence of an Event of Default listed in Article VII hereof. Each right, power and remedy of RUS shall be cumulative and concurrent, and recourse to one or more rights or remedies shall not constitute a waiver of any other right, power or remedy.

Section 8.2. Suspension of Advances

In addition to the rights, powers and remedies referred to in the immediately preceding section, RUS may, in its absolute discretion, suspend making Advances hereunder if (i) any Event of Default, or any occurrence which with the passage of time or giving of notice would be an Event of Default, occurs and is continuing; (ii) there has occurred a change in the business or condition, financial or otherwise, of the Borrower which in the opinion of RUS materially and adversely affects the Borrower's ability to meet its obligations under the Loan Documents, or (iii) RUS is authorized to do so under RUS Regulations.

ARTICLE IX—MISCELLANEOUS

Section 9.1. Notices

All notices, requests and other communications provided for herein including, without limitation, any modifications of, or waivers, requests or consents under, this Agreement shall be given or made in writing (including, without limitation, by telecopy) and delivered to the intended recipient at the “Address for Notices” specified below; or, as to any party, at such other address as shall be designated by such party in a notice to each other party. Except as otherwise provided in this Agreement, all such communications shall be deemed to have been duly given when transmitted by telecopy or personally delivered or, in the case of a mailed notice, upon receipt, in each case given or addressed as provided for herein. The Address for Notices of the respective parties are as follows:

Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250–1500

Fax: (202) xxx-xxxx

Attention: [Administrator]

The Borrower:

The address set forth in Schedule 1 hereto

Section 9.2. Expenses

To the extent allowed by law, the Borrower shall pay all costs and expenses of RUS, including reasonable fees of counsel, incurred in connection with the enforcement of the Loan Documents or with the preparation for such enforcement if RUS has reasonable grounds to believe that such enforcement may be necessary.

Rural Utilities Service, USDA

Pt. 1718, Subpt. C, App. A

Section 9.3. Late Payments

If payment of any amount due hereunder is not received at the United States Treasury in Washington, DC, or such other location as RUS may designate to the Borrower within five (5) Business Days after the due date thereof or such other time period as RUS may prescribe from time to time in its policies of general application in connection with any late payment charge (such unpaid amount being herein called the “delinquent amount”, and the period beginning after such due date until payment of the delinquent amount being herein called the “late-payment period”), the Borrower shall pay to RUS, in addition to all other amounts due under the terms of the Note, the Mortgage and this Agreement, any late-payment charge as may be fixed by RUS Regulations from time to time on the delinquent amount for the late-payment period.

Section 9.4. Filing Fees

To the extent permitted by law, the Borrower agrees to pay all expenses of RUS (including the fees and expenses of its counsel) in connection with the filing or recordation of all financing statements and instruments as may be required by RUS in connection with this Agreement, including, without limitation, all documentary stamps, recordation and transfer taxes and other costs and taxes incident to recordation of any document or instrument in connection herewith. Borrower agrees to save harmless and indemnify RUS from and against any liability resulting from the failure to pay any required documentary stamps, recordation and transfer taxes, recording costs, or any other expenses incurred by RUS in connection with this Agreement. The provisions of this subsection shall survive the execution and delivery of this Agreement and the payment of all other amounts due hereunder or due on the Note.

Section 9.5. No Waiver

No failure on the part of RUS to exercise, and no delay in exercising, any right hereunder shall operate as a waiver thereof nor shall any single or partial exercise by RUS of any right hereunder preclude any other or further exercise thereof or the exercise of any other right.

Section 9.6. Governing Law

EXCEPT TO THE EXTENT GOVERNED BY APPLICABLE FEDERAL LAW, THE LOAN DOCUMENTS SHALL BE DEEMED TO BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE [IN WHICH THE BORROWER IS INCORPORATED].

Section 9.7. Holiday Payments

If any payment to be made by the Borrower hereunder shall become due on a day which is not a Business Day, such payment shall be made on the next succeeding Business Day and such extension of time shall be included in computing any interest in respect of such payment.

Section 9.8. Rescission

The Borrower may elect not to borrow the RUS Commitment in which event RUS shall release the Borrower from its obligations hereunder, provided the Borrower complies with such terms and conditions as RUS may impose for such release and provided also that if the Borrower has any remaining obligations to RUS for loans made or guaranteed by RUS under any Prior Loan Contracts, RUS may, under Section [9.15] of this Loan Contract, withhold such release until all such obligations have been satisfied and discharged.

Section 9.9. Successors and Assigns

This Agreement shall be binding upon and inure to the benefit of the Borrower and RUS and their respective successors and assigns, except that the Borrower may not assign or transfer its rights or obligations hereunder without the prior written consent of RUS.

Section 9.10. Complete Agreement; Amendments

Subject to RUS Regulations, this Agreement and the other Loan Documents are intended by the parties to be a complete and final expression of their agreement. However, RUS reserves the right to waive its rights to compliance with any provision of this Agreement and the other Loan Documents. No amendment, modification, or waiver of any provision hereof or thereof, and no consent to any departure of the Borrower herefrom or therefrom, shall be effective unless approved in writing by RUS in the form of either a RUS Regulation or other writing signed by or on behalf of RUS, and then such waiver or consent shall be effective only in the specific instance and for the specific purpose for which given.

Section 9.11. Headings

The headings and sub-headings contained in the titling of this Agreement are intended to be used for convenience only and do not constitute part of this Agreement.

Section 9.12. Severability

If any term, provision or condition, or any part thereof, of this Agreement or the Mortgage shall for any reason be found or held invalid or unenforceable by any governmental agency or court of competent jurisdiction, such invalidity or unenforceability shall not affect the remainder of such term, provision

or condition nor any other term, provision or condition, and this Agreement, the Note, and the Mortgage shall survive and be construed as if such invalid or unenforceable term, provision or condition had not been contained therein.

Section 9.13. Right of Setoff

Upon the occurrence and during the continuance of any Event of Default, RUS is hereby authorized at any time and from time to time, without prior notice to the Borrower, to exercise rights of setoff or recoupment and apply any and all amounts held or hereafter held, by RUS or owed to the Borrower or for the credit or account of the Borrower against any and all of the obligations of the Borrower now or hereafter existing hereunder or under the Note. RUS agrees to notify the Borrower promptly after any such setoff or recoupment and the application thereof, provided that the failure to give such notice shall not affect the validity of such setoff, recoupment or application. The rights of RUS under this section are in addition to any other rights and remedies (including other rights of setoff or recoupment) which RUS may have. Borrower waives all rights of setoff, deduction, recoupment or counterclaim.

Section 9.14. Schedules and Exhibits

Each Schedule and Exhibit attached hereto and referred to herein is each an integral part of this Agreement.

Section 9.15. Prior Loan Contracts

It is understood and agreed that with respect to all loan agreements previously entered into by and between RUS and the Borrower (hereinafter being referred to as "Prior Loan Contracts") the Borrower shall be required, after the date hereof, to meet affirmative and negative covenants as set forth in this Agreement rather than those set forth in the Prior Loan Contracts. In addition, any remaining obligation of RUS to make additional advances on promissory notes of the Borrower that have been previously delivered to RUS under Prior Loan Contracts shall, after the date hereof, be subject to the conditions set forth in this Agreement. In the event of any conflict between any provision set forth in a Prior Loan Contract and any provision in this Agreement, the requirements as set forth in this Agreement shall apply. Nothing in this section shall, however, eliminate or modify any special condition, special affirmative covenant or special negative covenant, if any, unless specifically agreed to in writing by RUS.

Section 9.16. Authority of Representatives of RUS

In the case of any consent, approval or waiver from RUS that is required under this

Agreement or any other Loan Document, such consent, approval or waiver must be in writing and signed by an authorized RUS representative to be effective. As used in this section, "authorized RUS representative" means the Administrator of RUS, and also means a person to whom the Administrator has officially delegated specific or general authority to take the action in question.

Section 9.17. Term

This Agreement shall remain in effect until one of the following two events has occurred:

- (a) The Borrower and RUS replace this Agreement with another written agreement; or
- (b) All of the Borrower's obligations under the prior loan contracts and this Agreement have been discharged and paid.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed as of the day and year first above written.

SCHEDULE 1

[citations subject to change]

1. The purpose of this loan is _____ and such other purposes that RUS may agree to in writing in order to carry out the purposes of the Rural Electrification Act.

2. The Mortgage shall mean the Restated Mortgage and Security Agreement, dated as of _____, between the Borrower and RUS, as it may have been or shall be supplemented, amended, consolidated, or restated from time to time.

3. The governmental authority referred to in Section [2.1(c)] is _____.

4. The exception being taken to the representations in Section [2.1(e)] concerning material compliance with laws is as follows: _____.

5. The litigation referred to in Section [2.1(f)] is described as follows: _____.

6. The date of the Borrower's financial information referred to in Section [2.1(h)] is _____.

7. The principal place of business of the Borrower referred to in Section [2.1(i)] is _____.

Rural Utilities Service, USDA

Pt. 1718, Subpt. C, App. A

8. All of the property of the Borrower is located in the counties of _____.

9. The subsidiary (or subsidiaries) referred to in Section [2.1(k)] is (are): _____.

10. The Contemporaneous Loan referred to in Section [5.3] is described as follows: _____.

Lender: _____

Amount: _____

Year of Final Maturity: _____

11. The RUS Commitment referred to in the definitions means a loan in the principal amount of \$ _____ which is being made by RUS to the Borrower at the _____ Hardship Rate _____ Municipal Rate (CHECK ONE) pursuant to the Rural Electrification Act and RUS Regulations.

12. Amortization of Advance shall be based upon the method indicated below:

_____ level principal

_____ level debt service

_____ other

13. The SPECIAL condition(s) referred to in Section [4.2] is (are): _____.

14. The additional AFFIRMATIVE covenant(s) referred to in Section [5.22] is (are) as follows: _____. 15. The additional NEGATIVE covenant(s) referred to in Section [6.16] is (are) as follows: _____.

16. The address of the Borrower referred to in Section [9.1]. is _____.

SCHEDULE 2—EXISTING LIENS

The Existing Liens referred to in Section [2.1(g)] are as follows:

[INSERT DESCRIPTION OF EXISTING LIENS, IF ANY, HERE]

SCHEDULE 3—ADDITIONAL CONTRACTS

The additional contracts referred to in Section [6.5(f)] are described as follows:

[INSERT LIST OF ANY ADDITIONAL CONTRACTS HERE]

EXHIBIT A—FORM OF PROMISSORY NOTE

[INSERT EITHER MUNICIPAL or HARD-SHIP RATE PROMISSORY NOTE FORM HERE]

EXHIBIT B—EQUAL OPPORTUNITY CONTRACT PROVISIONS

During the performance of this contract, the contractor agrees as follows:

(a) The contractor shall not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The contractor shall take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to

their race, color, religion, sex or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion or transfer, recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(b) The contractor shall, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants shall receive consideration for employment without regard to race, color, religion, sex or national origin.

(c) The contractor shall send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(d) The contractor shall comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations and relevant orders of the Secretary of Labor.

(e) The contractor shall furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by the rules, regulations and orders of the Secretary of Labor, or pursuant thereto, and shall permit access to his books, records and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliances with such rules, regulations and orders.

(f) In the event of the contractor's non-compliance with the non-discrimination clauses of this contract or with any of the said rules, regulations or orders, this contract may be cancelled, terminated or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in said Executive Order or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.

(g) The contractor shall include the provisions of paragraphs (a) through (g) in every subcontract or purchase order unless exempted by rules, regulations or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246, dated September 24, 1965, so that such provisions shall be binding upon each subcontractor or vendor. The contractor shall take such action

§ 1721.1

with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

EXHIBIT C-1—MANAGER'S CERTIFICATE REQUIRED UNDER LOAN CONTRACT SECTION 6.14 FOR ADDITIONAL NOTES

On behalf on _____ [Name of Borrower] _____ I hereby certify that the Additional Note or Notes to be issued under Section [2.01] of the Mortgage on or about _____ [Date Note or Notes are to be Signed] _____ meet all of the requirements of Section [6.14] of the Loan Contract, namely:

(a) The weighted average life of the loan evidenced by such Notes (_____ years) does not exceed the weighted average of the expected remaining useful lives of the assets being financed (_____ years) as evidenced by the attached calculation of said weighted average lives.

(b) The principal of the loan evidenced by such Notes shall either be [check one and provide evidence in the second case]:

_____ (1) repaid based on level payments of principal and interest throughout the life of the loan, or

_____ (2) amortized at a rate that shall yield a weighted average life that is not greater than the weighted average life that would result from level payments of principal and interest throughout the life of the loan as evidenced by the attached analysis of said weighted average lives.

(c) The principal of the loan evidenced by such Notes has a maturity of not less than 5 years.

PART 1721—POST-LOAN POLICIES AND PROCEDURES FOR INSURED ELECTRIC LOANS

AUTHORITY: 7 U.S.C. 901 *et seq.*; 7 U.S.C. 1921 *et seq.*; Pub. L. 103-354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

EDITORIAL NOTE: Nomenclature changes to part 1721 appear at 55 FR 39397, Sept. 27, 1990.

Subpart A—Advance of Funds

§ 1721.1 Advances.

(a) *Purpose and amount.* With the exception of minor construction, insured loan funds will be advanced only for projects which are included in an RUS approved Borrower's construction workplan or approved amendment and in an approved loan, as amended. Loan fund advances can be requested in an amount representing actual costs incurred but not to exceed 130 percent of the project cost estimate on the approved RUS Form 740c, "Costs Estimates and Loan Budget for Electric Borrowers,"¹ as amended. Minor construction is defined as a project costing \$25,000 or less. Such projects qualify for advance of loan funds even though they may not have been included in an RUS-approved Borrower's construction workplan, amendment to such workplan or approved loan. Total advances requested shall not exceed the total loan amount. All projects for which loan fund advances are requested must be constructed to achieve purposes permitted by terms of the loan

¹A copy of these forms and publications may be obtained by writing the Rural Utilities Service, Washington, DC 20250.

Rural Utilities Service, USDA

§ 1721.1

contract between the Borrower and RUS.

(b) *Certification.* Pursuant to the applicable provisions of the RUS loan contract, Borrowers shall certify with each request for funds to be approved for advance that such funds are for projects in compliance with this section and shall also provide for those that cost in excess of \$25,000 a contract or work order number as applicable and a workplan cross-reference identification.

For a minor project not included in an RUS approved Borrower's construction workplan, the Borrower shall describe the project and do one of the following to satisfy RUS's environmental requirements (see 7 CFR part 1794).

(1) If applicable, state that the project is a categorical exclusion of a type described in 7 CFR 1794.31(b) which normally does not require preparation of a Borrower's Environmental Report (BER); or

(2) If applicable, state that the project is a categorical exclusion of a type that normally requires a BER and then:

(i) Submit the BER with the request for funds to be approved for advance, or

(ii) If applicable, certify that it has analyzed the minor project with respect to a comprehensive service area environmental map and data base collected and used in preparing the BER for its RUS-approved Borrower's construction workplan, and that on the basis of that information the minor project will not be located in an environmentally sensitive area or location.

(c) *Noncompliance.* Where insured loan funds are found to have been advanced in noncompliance with this rule, Borrowers will be required to return the appropriate amount of the over advance together with any accrued and unpaid interest to RUS. The Administrator will require Borrowers, in order to remedy such noncompliance, to pay

an additional amount equal to the interest on the funds over advanced for the period such funds were outstanding, calculated at a rate equal to the difference between the RUS loan interest rate and the most recent rate at which RUS sold Certificates of Beneficial Ownership (CBO's). While RUS will generally permit the amount of over advance returned to be requested subsequently by the Borrower for RUS approved projects, nothing herein contained shall be construed to preclude RUS from exercising any rights or remedies which RUS may have pursuant to the loan contract.

1724.45 Permitted deviations from RUS construction standards.

AUTHORITY: 7 U.S.C. 901 *et seq.*; 7 U.S.C. 1921 *et seq.*; Pub. L. 103-354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

EDITORIAL NOTE: Nomenclature change to part 1724 appears at 55 FR 39397, Sept. 27, 1990.

§ 1724.41

7 CFR Ch. XVII (1–1–97 Edition)

Subpart A—General [Reserved]

**Subpart B—Architectural Services
[Reserved]**

**Subpart C—Engineering Services
[Reserved]**

**Subpart D—Electric System
Planning [Reserved]**

Subpart E—Electric System Design

**§ 1724.41 Compliance with National
Electrical Safety Code.**

(a) All borrowers' new lines and substations shall be constructed and operated in accordance with the requirements of the National Electrical Safety Code (NESC). The applicable edition of the NESC to be followed shall be the latest edition which is effective in accordance with the provisions of that edition. Where local regulations or other RUS requirements are more stringent, those requirements shall govern.

(b) The Administrator of RUS will consider specific requests to approve construction which is not in accordance with the NESC if the borrower provides evidence satisfactory to the Administrator that an exception is necessary or desirable and in the interests of the Government and the borrower.

(c) Overhead distribution circuits shall be constructed with not less than the Grade C strength requirements as described in section 26, Strength Requirements, of the NESC when subjected to the loads specified in NESC section 25, Loadings for Grades B, C, and D. Overhead transmission circuits shall be constructed with not less than the Grade B strength requirements as described in NESC section 26.

[49 FR 11620, Mar. 27, 1984. Redesignated at 55 FR 39395, Sept. 27, 1990]

§§ 1724.42—1724.44 [Reserved]

**§ 1724.45 Permitted deviations from
RUS construction standards.**

(a) *Structures for raptor protection.* Standard distribution line structures may not have the extra measure of protection needed in areas frequented by

eagles and other large birds (raptors) to protect such birds from electric shock due to physical contact with energized wires. Borrowers are allowed to deviate from RUS construction standards to provide for raptor protection in the design of overhead line structures in those cases where such protection is required by (1) RUS or (2) a Federal, state or local authority with permit or license authority over the proposed construction. Structures which are designed for raptor protection shall be in accordance with *Suggested Practices for Raptor Protection on Powerlines—The State of the Art in 1981*, published by the Raptor Research Foundation, Inc., provided, however, that such structures shall be in accordance with the National Electrical Safety Code unless a specific waiver has been granted by the RUS Administrator. Copies of this publication may be purchased from the Raptor Research Foundation, Inc., c/o Department of Veterinary Biology, University of Minnesota, St. Paul, Minnesota 55101. It is also available for inspection at the Office of the Federal Register Information Center, 800 North Capitol Street, NW., suite 700, Washington, DC. This incorporation by reference has been approved by the Director of the Office of the Federal Register. Any deviation from the RUS construction standards for the purpose of raptor protection, which is not in accordance with the above report, must be approved by RUS prior to construction.

(b) *Transformer neutral connections.* Where it is necessary to separate the primary and secondary neutrals to provide the required electric service to a consumer, the RUS standard transformer connections may be modified in accordance with Rule 97D2 of the National Electrical Safety Code.

[49 FR 11620, Mar. 27, 1984. Redesignated at 55 FR 39395, Sept. 27, 1990, and amended at 55 FR 53487, Dec. 31, 1990]

Subpart A—General

§§ 1726.1—1726.9 [Reserved]

§ 1726.10 Introduction.

The policies, procedures and requirements included in this part are intended to implement provisions of the standard form of loan documents between the Rural Utilities Service (RUS) and its electric borrowers. Unless prior written approval is received from RUS, borrowers are required to comply with RUS policies and procedures as a condition to RUS providing loans, loan guarantees, or reimbursement of general funds for the construction and improvement of electric facilities. Requirements relating to RUS approval of plans and specifications, duties and responsibilities of the engineer and architect, and engineering and ar-

7 CFR Ch. XVII (1–1–97 Edition)

chitectural services contracts, are contained in other RUS regulations. The terms “RUS form”, “RUS standard form”, “RUS specification”, “and RUS bulletin” have the same meanings as the terms “REA form”, “REA standard form”, “REA specification”, “and REA bulletin”, respectively, unless otherwise noted.

§ 1726.11 Purpose.

Each borrower is responsible for the planning, design, construction, operation and maintenance of its electric system. RUS, as a secured lender, has a legitimate interest in accomplishing RUS’s programmatic objectives, and in assuring that the costs of construction, materials, and equipment are reasonable and economical and that the property securing the loans is constructed adequately to serve the purposes for which it is intended.

§ 1726.12 Applicability.

The requirements of this part apply to the procurement of materials and equipment for use by electric borrowers in their electric systems and to the construction of their electric systems if such materials, equipment, and construction are financed, in whole or in part, with loans made or guaranteed by RUS, including reimbursable projects. In order for general fund expenditures for procurement or construction to be eligible for reimbursement from loan funds, the borrower must comply with the procedures required by this part. In the case of jointly owned projects, RUS will determine on a case by case basis the applicability of the requirements of this part.

§ 1726.13 Waivers.

The Administrator may waive, for good cause on a case by case basis, certain requirements and procedures of this part. RUS reserves the right, as a condition of providing loans, loan guarantees, or other assistance, to require any borrower to make any specification, contract, or contract amendment subject to the approval of the Administrator.

§ 1726.14 Definitions.

Terms used in this part have the meanings set forth in 7 CFR 1710.2. References to specific RUS forms and other RUS documents, and to specific sections or lines of such forms and documents, shall include the corresponding forms, documents, sections and lines in any subsequent revisions of these forms and documents. In addition to the terms defined in 7 CFR 1710.2, the following terms have the following meanings for the purposes of this part:

Approval of proposed construction means RUS approval of a construction work plan or other appropriate engineering study and RUS approval, for purposes of system financing, of the completion of all appropriate requirements of part 1794 of this chapter.

Architect means a registered or licensed person employed by the borrower to provide architectural services for a project and duly authorized assistants and representatives.

Bona fide bid means a bid which is submitted by a contractor on the borrower's list of qualified bidders for the specific contract, prior to bid opening.

"Buy American" certificate means a certification that the contractor has complied with the "Buy American" requirement (see § 1726.15).

Competitive procurement means procurement of goods or services based on lowest evaluated bid for similar products or services when three or more bids are received.

Construction unit means a specifically defined portion of a construction project containing materials, labor, or both, for purposes of bidding and payment.

Contracting committee means the committee consisting of three to five members representing the borrower's management and board of directors and the engineer. The contracting committee represents the borrower during contract clarifying discussions or negotiations under informal competitive bidding or multiparty negotiation, respectively.

Encumbrance means the process of approval for advance of loans funds by RUS.

Engineer means a registered or licensed person, who may be a staff employee or an outside consultant, to provide

engineering services and duly authorized assistants and representatives.

Equipment means a major component of an electric system, e.g., a substation transformer, heat exchanger or a transmission structure.

Force account construction means construction performed by the borrower's employees.

Formal competitive bidding means the competitive procurement procedure wherein bidders submit sealed proposals for furnishing the goods or services stipulated in the specification. Bids are publicly opened and read at a predetermined time and place. If a contract is awarded, it must be to the lowest evaluated responsive bidder (see § 1726.201).

Goods or services means materials, equipment, or construction, or any combination thereof.

Informal competitive bidding means the competitive procurement procedure which provides for private opening of bids and allows clarifying discussions between the contracting committee and the bidders. During the clarifying discussions any exceptions to the bid documents must be eliminated, or the bid rejected, so that the contract is awarded to the lowest evaluated responsive bidder (see § 1726.202).

Material means miscellaneous hardware which is combined with equipment to form an electric system, e.g., poles, insulators, or conductors.

Minor error or irregularity means a defect or variation in a bid that is a matter of form and not of substance. Errors or irregularities are "minor" if they can be corrected or waived without being prejudicial to other bidders and when they do not affect the price, quantity, quality, or timeliness of construction. A minor error or irregularity is not an exception for purposes of determining whether a bid is responsive.

Minor modification or improvement means a project where the cost is less than \$50,000, exclusive of the cost of owner furnished materials.

Multiparty lump sum quotations means the procurement of goods or services on a lump sum basis, based on the lowest evaluated offering, when three or more offers are received. (See § 1726.205).

§ 1726.15

Multiparty negotiation means the procurement procedure where three or more bids are received and provides for negotiations between the contracting committee and each bidder to determine the bid which is in the borrower's best interest (see § 1726.203).

Multiparty unit price quotations means the procurement of goods or services on a unit price basis, based on the lowest evaluated offering, when three or more offers are received (See § 1726.204).

Net utility plant (NUP) means Part C, Line 5 of RUS Form 7 for distribution borrowers or Section B, Line 5 of RUS Form 12a for power supply borrowers for the immediately preceding calendar year.

Procurement method means a procedure, including, but not limited to, those in subpart G of this part, that a borrower uses to obtain goods and services.

Owner furnished materials means materials or equipment or both supplied by the borrower for installation by the contractor.

Responsive bid means a bid with no exceptions or non-minor errors or irregularities on any technical requirement or in the contract terms and conditions.

RUS approval means written approval by the Administrator or a representative with delegated authority. RUS approval must be in writing, except in emergency situations where RUS approval may be given over the telephone followed by a confirming letter.

Unit prices means individual prices for specific construction units defined in accordance with RUS approved units specified in RUS standard contract forms.

§ 1726.15 "Buy American".

The borrower must ensure that all materials and equipment financed with loans made or guaranteed by RUS complies with the "Buy American" provisions of the Rural Electrification Act of 1938 (7 U.S.C. 903 note), as amended by the North American Free Trade Agreement Implementation Act (107 Stat 2129). When a "Buy American" certificate is required by this part, this must be on RUS Form 213.

7 CFR Ch. XVII (1–1–97 Edition)

§ 1726.16 Debarment and suspension.

Borrowers are required to comply with certain requirements on debarment and suspension in connection with procurement activities as set forth in part 3017 of this title, particularly with respect to lower tier transactions, e.g., procurement contracts for goods or services.

§ 1726.17 Restrictions on lobbying.

Borrowers are required to comply with certain restrictions and requirements in connection with procurement activities as set forth in part 3018 of this title.

§ 1726.18 Preloan contracting.

Borrowers must consult with RUS prior to entering into any contract for material, equipment, or construction if a construction work plan, general funds, loan or loan guarantee for the proposed work has not been approved. While the RUS staff will work with the borrower in such circumstances, nothing contained in this part is to be construed as authorizing borrowers to enter into any contract before the availability of funds has been ascertained by the borrower and all the requirements of part 1794 of this chapter, Environmental Policies and Procedures for Electric and Telephone Borrowers, have been fulfilled.

§ 1726.19 Use of competitive procurement.

RUS borrowers' procurement is not subject to the provisions of the Federal Acquisition Regulation (48 CFR chapter 1); however, since borrowers receive the benefit of Federal financial assistance borrowers must use competitive procurement to the greatest extent practical. The borrower must use competitive procurement for obtaining all goods or services when a RUS loan or loan guarantee is involved except:

- (a) As specifically provided for in subparts B through F of this part; or
- (b) A waiver is granted.

§ 1726.20 Standards and specifications.

All materials, equipment, and construction must meet the minimum requirements of all applicable RUS standards and specifications. (See Part

Rural Utilities Service, USDA

§ 1726.24

1728, Electric Standards and Specifications for Materials and Construction, of this chapter, which is applicable regardless of the source of funding.)

§ 1726.21 New materials.

The borrower shall purchase only new materials and equipment unless otherwise approved by RUS, on a case by case basis, prior to the purchase.

§ 1726.22 Methods of construction.

The borrower is generally responsible for determining whether construction will be by contract or force account. If construction is by contract, the borrower must determine whether materials will be supplied by the contractor or will be furnished by the borrower. RUS reserves the right to require contract construction in lieu of force account construction on a case by case basis.

§ 1726.23 Qualification of bidders.

(a) *Qualified bidder list (QBL).* The borrower shall (acting through its engineer, if applicable) review the qualifications of prospective bidders for contract construction and for material and equipment procurement, and select firms qualified for inclusion on the borrower's list of qualified bidders for each contract. (See also § 1726.16 and § 1726.17.) A bid may not be solicited from a prospective bidder or opened by the borrower unless that bidder has been determined to be a qualified bidder for the contract. When preparing the QBL, in addition to the actual experience of the borrower, if any, in dealing with a prospective bidder, the borrower may solicit information from that bidder or from other parties with firsthand experience regarding the firm's capabilities and experience. It is also important to consider the firm's performance record, safety record, and similar factors in determining whether to include that firm on the QBL, since the borrower may not evaluate these factors when evaluating a bid from a qualified and invited bidder.

(b) *Conflict of interest.* If there is a relationship between the borrower or engineer and a prospective bidder which might cause the borrower or engineer to have or appear to have a conflict of interest, that prospective bidder shall

not be included on the QBL unless the engineer discloses the nature of the relationship to the borrower. In the case of the borrower, if its employees or directors have a relationship with a prospective bidder, the prospective bidder shall not be included on the qualified bidders list unless the nature of the relationship is disclosed to the board of directors, and the board of directors specifically approves the inclusion of that bidder in light of the potential for a conflict of interest.

§ 1726.24 Written contracts.

(a) *General.* Procurement of goods or services must be by written contract or written purchase order. The borrower shall use a RUS Approved Form of Contract for such contracts where required by subparts B through F of this part.

(b) *Amendments to contracts—(1) Contract forms.* The borrower must use RUS Form 180, Construction Contract Amendment, for any change or addition in a distribution line construction contract. The borrower must use RUS Form 238, Construction or Equipment Contract Amendment, for any change or addition in any other contract for construction, or for materials or equipment.

(2) *Special considerations.* Each time an amendment to a construction contract is executed, the borrower must ensure that contractor's bond is adequate, that all necessary licenses and permits have been obtained, and that any environmental requirements associated with the proposed construction have been met.

(3) *Amendment approval requirements.* (i) If a RUS approved form of contract is required by this part, an amendment must not alter the terms and conditions of the RUS approved form of contract without prior RUS approval.

(ii) The borrower must make a contract amendment subject to RUS approval if the underlying contract was made subject to RUS approval and the total amended contract price exceeds 120 percent of the original contract price (excluding any escalation provision contained in the contract).

(iii) Contract amendments, except as provided in paragraph (b)(3)(ii) of this section, are not subject to RUS approval and need not be submitted to

§ 1726.25

RUS unless specifically requested by RUS on a case by case basis.

§ 1726.25 Subcontracts.

The contractor or supplier may use RUS Form 282, Subcontract, for subcontracts on construction, material or equipment contracts. Subcontracts are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

§§ 1726.26—1726.34 [Reserved]

§ 1726.35 Submission of documents to RUS.

(a) *Where to send documents.* Documents required to be submitted to RUS under this part are to be sent to the office of the borrower's respective RUS Regional Director, the Power Supply Division Director, or such other office of RUS as designated by RUS (see part 1700 of this chapter.)

(b) *Borrower certification.* When a borrower certification is required by this part, it must be made by the borrower's manager unless the board of directors specifically authorizes another person to make the required certification. In such case, a certified copy of the specific authorizing resolution must accompany the document or be on file with RUS.

(c) *Contracts requiring RUS approval.* The borrower shall submit to RUS three copies of each contract that is subject to RUS approval under subparts B through F of this part. At least one copy of each contract must be an original signed in ink (i.e., no facsimile signature). Each contract submittal must be accompanied by:

(1) A bid tabulation and evaluation and, if applicable, a written recommendation of the architect or engineer.

(2) For awards made under the informal competitive bidding procedure or the multiparty negotiation procedure, a written recommendation of the contracting committee (See §§ 1726.202 and 1726.203).

(3) Three copies of an executed contractor's bond on RUS approved bond forms as required in the contract form (at least one copy of which must be an original signed in ink) and one copy of

7 CFR Ch. XVII (1–1–97 Edition)

the bid bond or facsimile of the certified check.

(4) A certification by the borrower or chairperson of the contracting committee, as applicable, that the appropriate bidding procedures were followed as required by this part.

(5) A certified copy of the board resolution awarding the contract.

(6) Evidence of clear title to the site for substations and headquarters construction contracts, if not previously submitted.

(7) Documentation that all reasonable measures were taken to assure competition if fewer than three bids were received.

(d) *Contract amendments requiring RUS approval.* The borrower must submit to RUS three copies of each contract amendment (at least one copy of which must be an original signed in ink) which is subject to RUS approval under § 1726.24(b). Each contract amendment submittal to RUS must be accompanied by:

(1) A certified copy of the board resolution approving the amendment; and

(2) A bond extension, where necessary.

(e) *Encumbrance of loan or loan guarantee funds.* (1) For contracts subject to RUS approval, the submittals required under paragraph (c) of this section will initiate RUS action to encumber loan or loan guarantee funds for such contracts.

(2) For contracts not subject to RUS approval (except for generation projects), loan or loan guarantee funds will normally be encumbered using RUS Form 219, Inventory of Work Orders, after closeout of the contracts. In cases where the borrower can show good cause for a need for immediate cash, the borrower may request encumbrance of loan or loan guarantee funds based on submittal of a copy of the executed contract, provided it meets all applicable RUS requirements.

(3) For generation project contracts not subject to RUS approval, the borrower must submit to RUS the following documentation:

(i) A brief description of the scope of the contract, including contract identification (name, number, etc.);

(ii) Contract date;

(iii) Contractor's name;

Rural Utilities Service, USDA

§ 1726.50

- (iv) Contract amount;
- (v) Bidding procedure used;
- (vi) Borrower certification that:

(A) The board of directors approved the contract;

(B) The bidding procedures and contract award for each contract were in conformance with the requirements of Part 1726, Electric System Construction Policies and Procedures;

(C) If a RUS approved form of contract is required by this part, the terms and conditions of the RUS approved form of contract have not been altered;

(D) If RUS has approved plans and specifications for the contract, the contract was awarded on the basis of those plans and specifications; and

(E) No restriction has been placed on the borrower's right to assign the contract to RUS or its successors.

(4) *Contract amendments.* (i) For amendments subject to RUS approval, the submittals required under paragraph (c) of this section will initiate RUS action to encumber loan or loan guarantee funds for contract amendments requiring RUS approval.

(ii) For amendments not subject to RUS approval (except generation projects), loan or loan guarantee funds will normally be encumbered using RUS Form 219, Inventory of Work Orders, after closeout of the contracts. In cases where the borrower can justify a need for immediate cash, the borrower may request encumbrance of loan or loan guarantee funds based on submittal of a copy of the executed amendment, providing it meets all applicable RUS requirements.

(iii) For each generation project contract amendment not subject to RUS approval, the borrower must submit to RUS the following information and documentation:

- (A) The contract name and number;
- (B) The amendment number;
- (C) The amendment date;
- (D) The dollar amount of the increase or the decrease of the amendment;
- (E) Borrower certification that:

(1) The amendment was approved in accordance with the policy of the board of directors (the borrower must ensure that RUS has a certified copy of the board resolution establishing such policy);

(2) If a RUS approved form of contract is required by this part, the terms and conditions of the RUS approved form of contract has not been altered; and

(3) No restriction has been placed on the borrower's right to assign the contract to RUS or its successors.

§ 1726.36 Documents subject to RUS approval.

Unless otherwise indicated, the borrower shall make all contracts and amendments that are subject to RUS approval effective only upon RUS approval.

§ 1726.37 OMB control number.

The collection of information requirements in this part have been approved by the Office of Management and Budget and assigned OMB control number 0572-0107.

§§ 1726.38—1726.49 [Reserved]

Subpart B—Distribution Facilities

§ 1726.50 Distribution line materials and equipment.

(a) *Contract forms.* (1) The borrower shall use RUS Form 198, Equipment Contract, for purchases of equipment where the total cost of the contract is \$500,000 or more.

(2) The borrower may, in its discretion, use RUS Form 173, Materials Contract, RUS Form 198, Equipment Contract, or a written purchase order for purchases of equipment of less than \$500,000 and for all materials.

(b) *Standards and specifications.* Distribution line materials and equipment must meet the minimum requirements of RUS standards as determined in accordance with the provisions of part 1728 of this chapter, Electric Standards and Specifications for Materials and Construction. The borrower must obtain RUS approval prior to purchasing any unlisted distribution line material or equipment of the types listed in accordance with the provisions of part 1728 of this chapter.

(c) *Procurement procedures.* It is the responsibility of each borrower to determine the procurement method that best meets its needs for the purchase of

§ 1726.51

material and equipment to be used in distribution line construction.

(d) *Contract approval.* Contracts for purchases of distribution line materials and equipment are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

§ 1726.51 Distribution line construction.

(a) *Contract forms.* The borrower must use RUS Form 201, 790, 792, or 830, as outlined in this paragraph (a), for distribution line construction, except for minor modifications or improvements.

(1) The borrower may use RUS Form 790, Distribution Line Extension Construction Contract (Labor and Materials), or RUS Form 792, Distribution Line Extension Construction Contract (Labor only) under the following circumstances:

(i) For contracts for which the borrower supplies all materials and equipment; or

(ii) For non-site specific construction contracts accounted for under the work order procedure; or

(iii) If neither paragraph (a)(1)(i) or (a)(1)(ii) of this section are applicable, the borrower may use RUS Form 790 or 792 for contracts, up to a cumulative total of \$250,000 or one percent of NUP, whichever is greater, per calendar year of distribution line construction, exclusive of the cost of owner furnished materials and equipment

(2) The borrower must use RUS Form 830, Electric System Construction Contract (Labor and Materials), for all other distribution line construction. Where distribution lines are being constructed incidental to transmission line construction, the borrower must use RUS Form 831, Electric Transmission Construction Contract.

(3) The borrower must use RUS Form 201, Right-of-Way Clearing Contract, for new distribution line construction right-of-way clearing when done separately from work performed under RUS Form 830.

(b) *Procurement procedures.* (1) It is the responsibility of each borrower to determine the procurement method that best meets its needs to award contracts in amounts of up to a cumulative total of \$250,000 or one percent of

7 CFR Ch. XVII (1–1–97 Edition)

NUP, whichever is greater, per calendar year of distribution line construction (including minor modifications or improvements), exclusive of the cost of owner furnished materials and equipment.

(2) In addition to the cumulative total stipulated in paragraph (b)(1) of this section, a borrower may use Multiparty Unit Price Quotations to award contracts in amounts of up to a cumulative total of \$350,000 or 1.5 percent of NUP, whichever is greater, per calendar year of distribution line construction (including minor modifications or improvements), exclusive of the cost of owner furnished materials and equipment.

(3) The borrower shall use formal competitive bidding for all other distribution line contract construction. The amount of contracts bid using the formal competitive bidding procedure do not apply to the cumulative total stipulated in paragraph (b)(1) of this section.

(4) An amendment which increases the scope of the contract by adding a project is not considered competitively bid, therefore, the amount of that amendment does apply to the cumulative total stipulated in paragraph (b)(1) of this section.

(c) *Contract approval.* Contracts for distribution line construction are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

§§ 1726.52–1726.74 [Reserved]

Subpart C—Substation and Transmission Facilities

§ 1726.75 General.

As used in this part, “substations” includes substations, switching stations, metering points, and similar facilities.

§ 1726.76 Substation and transmission line materials and equipment.

(a) *Contract forms.* (1) The borrower must use RUS Form 198, Equipment Contract, for purchases of equipment where the total cost of the contract is \$500,000 or more.

(2) The borrower may, in its discretion, use RUS Form 173, Materials Contract, RUS Form 198, Equipment Contract, or a written purchase order for purchases of equipment of less than \$500,000 and for all materials.

(b) *Standards and specifications.* Substation and transmission line materials and equipment must meet the minimum requirements of RUS standards as determined in accordance with the provisions of part 1728 of this chapter, Electric Standards and Specifications for Materials and Construction. The borrower must obtain RUS approval prior to purchasing of any unlisted substation or transmission line material or equipment of the types listed in accordance with the provisions of part 1728 of this chapter.

(c) *Procurement procedures.* It is the responsibility of each borrower to determine the procurement method that best meets its needs for purchase of material and equipment to be used in substation and transmission line construction.

(d) *Contract approval.* Contracts for purchases of substation and transmission line materials and equipment are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

§ 1726.77 Substation and transmission line construction.

(a) *Contract forms.* (1) The borrower must use RUS Form 764, Substation Erection Contract, for construction of substations, except for minor modifications or improvements. The borrower must use RUS Form 831, Electric Transmission Construction Contract for projects where substations are incidental to transmission line construction and are to be constructed under the same contract.

(2) The borrower must use RUS Form 831, Electric Transmission Construction Contract, for construction of transmission lines (except for minor modifications or improvements).

(3) The borrower must use RUS Form 203, Transmission System Right-of-Way Clearing Contract, for new transmission line construction right-of-way clearing when right-of-way clearing is

performed separately from work performed under RUS Form 831.

(b) *Procurement procedures.* (1) It is the responsibility of each borrower to determine the procurement method that best meets its needs to award contracts not requiring RUS approval in amounts of up to a cumulative total of \$250,000 or one percent of NUP (not to exceed \$2,000,000), whichever is greater, per calendar year of substation and transmission line construction (including minor modifications or improvements), exclusive of the cost of owner furnished materials and equipment.

(2) The borrower shall use formal competitive bidding for all other contract construction, including all contracts requiring RUS approval. The amount of contracts bid using the formal competitive bidding procedure do not apply to the cumulative total stipulated in paragraph (b)(1) of this section.

(3) An amendment which increases the scope of the contract by adding a project is not considered competitively bid, therefore, the amount of that amendment does apply to the cumulative total stipulated in paragraph (b)(1) of this section.

(c) *Contract approval.* Individual contracts in amounts of \$250,000 or more or one percent of NUP (not to exceed \$500,000 for distribution borrowers or \$1,500,000 for power supply borrowers), whichever is greater, exclusive of the cost of owner furnished materials and equipment, are subject to RUS approval.

§§ 1726.78—1726.124 [Reserved]

Subpart D—Generation Facilities

§ 1726.125 Generating plant facilities.

This section covers the construction of all portions of a generating plant, including plant buildings and the generator step-up transformer. Generally, the transmission switchyard will be covered under this section during initial construction of the plant. Subpart C of this part covers subsequent modifications to transmission switchyards. Warehouses and equipment service type buildings are covered under subpart E of this part.

(a) *Contract forms.* (1) The borrower must use RUS Form 198, Equipment Contract, for the purchase of generating plant equipment in the amount of \$1,500,000 or more and for any generating plant equipment contract requiring RUS approval.

(2) The borrower must use RUS Form 200, Construction Contract—Generating, for generating project construction contracts in the amount of \$1,500,000 or more and for any generating project construction contract requiring RUS approval.

(3) The borrower may, in its discretion, use other contract or written purchase order forms for those contracts in amounts of less than \$1,500,000 and that do not require RUS approval.

(b) *Plans and specifications.* The borrower shall obtain RUS approval of the plans and specifications for generating plant equipment prior to issuing invitations to bid for any contract subject to RUS approval as determined under this subpart and for any contract for generating plant equipment or construction which will cost \$1,500,000 or more. Plans and specifications for other equipment and construction contracts do not require RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

(c) *Procurement procedures.* (1) It is the responsibility of each borrower to determine the procurement method that best meets its needs to award contracts in amounts of less than \$1,500,000 each.

(2) If the amount of the contract is \$1,500,000 or more or if the contract requires RUS approval, the borrower must use formal or informal competitive bidding to award the contract.

(3) Where formal or informal competitive bidding is not applicable, or does not result in a responsive bid, multiparty negotiation may be used only after RUS approval is obtained.

(d) *Contract approval.* During the early stages of generating plant design or project design, RUS will, in consultation with the borrower and its consulting engineer, identify the specific contracts which require RUS approval based on information supplied in the plant design manual. The following are typical contracts for each type of

generating project which will require RUS approval. Although engineering services are not covered by this part, they are listed in this paragraph (d) to emphasize that RUS approval is required for all major generating station engineering service contracts in accordance with applicable RUS rules. For types of projects not shown, such as nuclear and alternate energy projects, RUS will identify the specific contracts which will require RUS approval on a case by case basis.

(1) *Fossil generating stations.* Engineering services, steam generator, turbine generator, flue gas desulfurization system, particulate removal system, electric wiring and control systems, mechanical equipment installation (including turbine installation and plant piping), power plant building (foundation and superstructure), site preparation, coal unloading and handling facilities, main step-up substation, cooling towers, and dams or reservoirs.

(2) *Diesel and combustion turbine plants.* Engineering services, prime mover and generator, building (foundation and superstructure), and electrical control systems.

(3) *Hydro installations.* Engineering services, turbine/generator, civil works and powerhouse construction, electrical control system, and mechanical installation.

§§ 1726.126—1726.149 [Reserved]

Subpart E—Buildings

§ 1726.150 Headquarters buildings.

This section includes headquarters buildings such as warehouses and equipment service type buildings. Generating plant buildings are covered under subpart D of this part.

(a) *Contract forms.* The borrower must use RUS Form 257, Contract to Construct Buildings, for all contracts for construction of new headquarters facilities, and additions to, or modifications of existing headquarters facilities (except for minor modifications or improvements).

(b) *Procurement procedures.* A borrower may use Multiparty Lump Sum Quotations to award contracts in amounts of up to a cumulative total of \$250,000 or one percent of NUP (not to

Rural Utilities Service, USDA

§ 1726.200

exceed \$1,000,000), whichever is greater, per calendar year of headquarters construction (including minor modifications or improvements.) The borrower must use formal competitive bidding for all other headquarters contract construction.

(c) *Contract approval.* Contracts for headquarters construction are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

§§ 1726.151—1726.174 [Reserved]

Subpart F—General Plant

§ 1726.175 General plant materials.

This section covers items such as office furniture and equipment; transportation equipment and accessories, including mobile radio systems, stores and shop equipment, laboratory equipment, tools and test equipment.

(a) *Contract forms.* The borrower may, in its discretion, use RUS Form 173, Material Contract, RUS Form 198, Equipment Contract, or a written purchase order.

(b) *Procurement procedures.* It is the responsibility of each borrower to determine the procurement method that best meets its needs for purchase of general plant material and equipment.

(c) *Contract approval.* Contracts for the purchase of general plant items are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

§ 1726.176 Communications and control facilities.

This section covers the purchase of microwave and power line carrier communications systems, load control, and supervisory control and data acquisition (SCADA) systems. Mobile radio systems are covered as general plant materials in § 1726.175.

(a) *Power line carrier systems.* Power line carrier equipment will frequently be purchased as part of a substation and will be included in the complete substation plans and specifications. When purchased in this manner, the requirements of subpart C of this part, Substation and Transmission Facili-

ties, will apply. If obtained under a contract for only a power line carrier system, the requirements of paragraph (b) of this section apply.

(b) *Load control systems, communications systems, and SCADA systems—*(1) *Contract forms.* The borrower must use RUS Form 786, Electric System Communication and Control Equipment Contract. This form may be modified to be a “purchase only” contract form.

(2) *Procurement procedures.* (i) It is the responsibility of each borrower to determine the procurement method that best meets its needs to award contracts not requiring RUS approval in amounts of up to a cumulative total of \$250,000 or one percent of NUP (not to exceed \$2,000,000), whichever is greater, per calendar year of communications and control facilities construction (including minor modifications or improvements.), exclusive of the cost of owner furnished materials and equipment.

(ii) The borrower must use multiparty negotiation for all other communications and control facilities contract construction, including all contracts requiring RUS approval. The amount of contracts bid using the multiparty negotiation procedure do not apply to the cumulative total stipulated in paragraph (b)(2)(i) of this section.

(iii) An amendment which increases the scope by adding a project is not considered competitively bid, therefore, the amount of that amendment does apply to the cumulative total stipulated in paragraph (b)(2)(i) of this section.

(3) *Contract approval.* Individual contracts in amounts of \$250,000 or more or one percent of NUP (not to exceed \$500,000 for distribution borrowers or \$1,500,000 for power supply borrowers), whichever is greater, exclusive of the cost of owner furnished materials and equipment, are subject to RUS approval.

§§ 1726.177—1726.199 [Reserved]

Subpart G—Procurement Procedures

§ 1726.200 General requirements.

The borrower must use the procedures described in this subpart where

§ 1726.201

such procedures are required under subparts B through F of this part. The borrower must ensure that arrangements prior to announcement of the award of the contract are such that all bidders are treated fairly and no bidder is given an unfair advantage over other bidders.

§ 1726.201 Formal competitive bidding.

Formal competitive bidding is used for distribution, transmission, and headquarters facilities, and may be used for generation facilities. The borrower must use the following procedure for formal competitive bidding:

(a) *Selection of qualified bidders.* The borrower (acting through its engineer, if applicable) will compile a list of qualified bidders for each proposed contract. The borrower will send invitations to bid only to persons or organizations on its QBL for the specific project (see § 1726.23).

(b) *Invitations to bid.* The borrower (acting through its engineer, if applicable) is responsible for sending out invitations to prospective bidders, informing them of scheduled bid openings and taking any other action necessary to procure full, free and competitive bidding. The borrower should send out a sufficient number of invitations in order to assure adequate competition and so that at least three bids will be received. Subject to the foregoing criteria, the determination of how many and which bidders will be permitted to bid will be the responsibility of the borrower.

(c) *Evaluation basis.* Any factors, other than lowest dollar amount of the bid, which are to be considered in evaluating the proposals of qualified bidders (e.g., power consumption, losses, etc.) must be stated in the "Notice and Instructions to Bidders." The borrower will not evaluate a bidder's performance record, safety record, and similar factors when evaluating a bid from a qualified and invited bidder. Such factors are to be considered when determining whether to include a particular bidder on the qualified bidders list.

(d) *Handling of bids received.* The borrower or the engineer, as applicable, will indicate, in writing, the date and time of receipt by the borrower or the engineer on the outside envelope of

7 CFR Ch. XVII (1–1–97 Edition)

each bid and all letters and other transmittals amending or modifying the bids. Any bid received at the designated location after the time specified must be returned to the bidder unopened.

(e) *Bid openings.* Bid openings are generally conducted by the engineer in the presence of bidders and a representative of the borrower and the borrower's attorney. Each bona fide bid must be opened publicly and reviewed for any irregularities, errors, or exceptions. It must be verified that any addendum or supplement to the specification has been acknowledged by the bidder. The adequacy of bid bonds or certified checks must be verified at this time.

(f) *Conditions affecting acceptability of bids.* The borrower must take the following specified action if any of the following exist:

(1) *Fewer than three bona fide bids received.* If fewer than three bona fide bids are received for the contract project, the borrower must determine that all reasonable measures have been taken to assure competition prior to awarding the contract. This determination must be documented and such documentation submitted to RUS where required by subpart A of this part. The borrower may, however, elect to reject all bids, make changes in the specification or the qualified bidders list or both and invite new bids.

(2) *Significant error or ambiguity in the specification.* If a significant error or ambiguity in the specification is found which could result in the bidders having varying interpretations of the requirements of the bid, the borrower must either issue an addendum to each prospective bidder correcting the error or ambiguity before bids are received, or reject all bids and correct the specification. If a significant error or ambiguity in the specification is discovered after the bids are opened, the borrower must reject all bids, correct the specification and invite new bids.

(3) *Minor errors or omissions in the specification.* If minor errors or omissions in the specification are found, the borrower must issue an addendum to each prospective bidder correcting the error or omission prior to opening any bids. After bid opening, the error or

Rural Utilities Service, USDA

§ 1726.202

omission must be corrected in the executed contract.

(4) *Minor errors or irregularities in bid.* The borrower may waive minor errors or irregularities in any bid, if the borrower determines that such minor errors or irregularities were made through inadvertence. Any such minor errors or irregularities so waived must be corrected on the bid in which they occur prior to the acceptance thereof by the borrower.

(5) *Non-minor error or irregularity in bid.* If a bid contains a non-minor error or irregularity, the bid must be rejected and the bid price must not be disclosed.

(6) *Unbalanced bid.* If a bid contains disproportionate prices between labor and materials or between various construction units, the borrower may reject the bid.

(7) *No acceptable price quoted.* If none of the bidders quote an acceptable price, the borrower may reject all bids.

(g) *Evaluating bids.* The borrower (acting through the engineer, if applicable) must conduct the evaluation of bids on the basis of the criteria set out in the "Notice and Instructions to Bidders." The contract, if awarded, must be awarded to the bidder with the lowest evaluated responsive bid.

(h) *Announcement of bids.* If possible, the borrower will announce bids at the bid opening. However, where extensive evaluation is required, the borrower may elect to adjourn and make formal written announcement to all bidders at a later time. Any discrepancy in a rejected bid must be indicated in the bid announcement.

(i) *Award of contract.* Upon completion of the bid evaluations and based upon the findings and recommendations of the borrower's management and engineer, the borrower's board of directors will either:

(1) Resolve to award the contract to the lowest evaluated responsive bidder; or

(2) Reject all bids.

(j) *Certification by the borrower and its engineer.* The borrower shall certify and the engineer shall certify as follows: "The procedures for formal competitive bidding, as described in 7 CFR 1726.201, were followed in awarding this contract." The certification executed

by and on behalf of the borrower and its engineer shall be submitted to RUS in writing where required by subpart A of this part.

§ 1726.202 Informal competitive bidding.

Informal competitive bidding may be used for equipment purchases and generation construction. The borrower must use the following procedure for informal competitive bidding:

(a) *Selection of qualified bidders.* The borrower (acting through its engineer, if applicable) will compile a list of qualified bidders for each proposed contract. The borrower will send invitations to bid only to persons or organizations on its qualified bidder list for the specific project (see § 1726.23).

(b) *Invitations to bid.* The borrower (acting through its engineer, if applicable) is responsible for sending out invitations to prospective bidders, informing them of scheduled bid openings and any other action necessary to procure full, free and competitive bidding. In any event, however, sufficient invitations need to be sent out to assure competition and that at least three bids will be received. Subject to the criteria in the preceding sentence, the determination of how many and which bidders will be permitted to bid will be the responsibility of the borrower.

(c) *Notice and instructions to bidders.* The borrower must indicate in the "Notice and Instructions to Bidders" section of the bid documents that bids will be opened privately. The borrower may elect to conduct clarifying discussions with the bidders. If such clarifying discussions are held, at least the three apparent low evaluated bidders must be given an equal opportunity to resolve any questions related to the substance of the bidder's proposal and to arrive at a final price for a responsive bid.

(d) *Evaluation basis.* Any factors, other than lowest dollar amount of the bid, which are to be considered in evaluating the proposals of qualified bidders (e.g., power consumption, losses, etc.) must be stated in the "Notice and Instructions to Bidders." The borrower will not evaluate a bidder's performance record, safety record, and similar factors when evaluating a bid from a

qualified and invited bidder. Such factors are to be considered when determining whether to include a particular bidder on the qualified bidders list.

(e) *Handling of bids received.* The borrower or the engineer, as applicable, will indicate, in writing, the date and time of receipt by the borrower or the engineer on the outside envelope of each bid and all letters and other transmittals amending or modifying the bids. Any bid received at the designated location after the time specified must be returned to the bidder unopened.

(f) *Bid opening.* The contracting committee will conduct the bid opening in private. The contracting committee will open each bona fide bid which has been received prior to the deadline, and review it for any irregularities, errors, or exceptions. It must be verified that any addendum to the specification has been acknowledged by each bidder. The adequacy of bid bonds or certified checks must also be verified.

(g) *Conditions affecting acceptability of bids.* The borrower must take the following specified action if any of the following exist:

(1) *Fewer than three bona fide bids received.* If fewer than three bona fide bids are received for the contract project, the borrower must determine that all reasonable measures have been taken to assure competition prior to awarding the contract. This determination must be documented and such documentation submitted to RUS where required by subpart A of this part. The borrower may, however, elect to reject all bids, make changes in the specification or the qualified bidders list or both and invite new bids.

(2) *Significant error or ambiguity in the specification.* If a significant error or ambiguity in the specification is found which could result in the bidders having varying interpretations of the requirements of the bid, the borrower must either issue an addendum to each prospective bidder correcting the error or ambiguity before bids are received, or reject all bids and correct the specification. If a significant error or ambiguity in the specification is discovered after the bids are opened, the borrower must reject all bids, correct the specification and invite new bids.

(h) *Clarification of proposals.* The contracting committee may elect not to hold any clarifying discussions and recommend awarding the contract to the low responsive bidder. Otherwise, the contracting committee must give at least each of the three apparent lowest evaluated bidders an equal opportunity to participate in discussions for the purpose of resolving questions regarding the specification and contract terms and to arrive at a final price. Neither prices of other bids nor relative ranking of any bidder are to be revealed under any circumstances. Such discussions may be held by telephone or similar means provided at least each of the three apparent lowest evaluated bidders have an equal opportunity to participate. Upon completion of the clarifying discussions, the contracting committee will determine the lowest evaluated responsive bid. If no bids are responsive after the contracting committee has completed clarifying discussions, no contract award can be made under the informal bidding procedure.

(i) *Award of the contract.* Upon completion of the bid evaluations, the contracting committee will promptly report all findings and recommendations to the borrower's board of directors. The board will either:

(1) Resolve to award the contract to the lowest evaluated responsive bidder; or

(2) Reject all bids.

(j) *Certifications by the contracting committee.* The chairperson of the contracting committee shall certify as follows: "The procedures for informal competitive bidding as described in 7 CFR 1726.202 were followed in awarding this contract." The certification executed by the chairperson of the contracting committee shall be submitted to RUS in writing where required by subpart A of this part.

§ 1726.203 Multiparty negotiation.

Multiparty negotiation may only be used where permitted under subpart F of this part or where prior RUS approval has been obtained. The borrower must use the following procedure for multiparty negotiation:

(a) *Selection of qualified bidders.* The borrower (acting through its engineer,

if applicable) will compile a list of qualified bidders for each proposed contract. The borrower will send invitations to bid only to persons or organizations on its qualified bidder list for the specific project (see § 1726.23).

(b) *Invitations to bid.* The borrower (acting through its engineer, if applicable) is responsible for sending out invitations to prospective bidders, informing them of scheduled bid openings and any other action necessary to procure full, free and competitive bidding. In any event, however, sufficient invitations need to be sent out to assure competition and so that at least three bids will be received. Subject to the criteria in the preceding sentence, the determination of how many and which bidders will be permitted to bid will be the responsibility of the borrower.

(c) *Notice and instructions to bidders.* The borrower must indicate in the "Notice and Instructions to Bidders" section of the bid documents that bids will be opened privately. The borrower may elect to conduct negotiations with the bidders. If such negotiations are held, at least the three apparent low evaluated bidders must be given an equal opportunity to resolve any questions related to the substance of the bidder's proposal and to arrive at a final price.

(d) *Evaluation basis.* Any factors, other than lowest dollar amount of the bid, which are to be considered in evaluating the proposals of qualified bidders (e.g., power consumption, losses, etc.) must be stated in the "Notice and Instructions to Bidders." The borrower will not evaluate a bidder's performance record, safety record, and similar factors when evaluating a bid from a qualified and invited bidder. Such factors are to be considered when determining whether to include a particular bidder on the qualified bidders list.

(e) *Handling of bids received.* The borrower or the engineer, as applicable, will indicate, in writing, the date and time of receipt by the borrower or the engineer on the outside envelope of each bid and all letters and other transmittals amending or modifying the bids. Any bid received at the designated location after the time specified must be returned to the bidder unopened.

(f) *Bid opening.* The contracting committee will conduct the bid opening in private. The contracting committee will open each bona fide bid which has been received prior to the deadline, and review it for any irregularities, errors, or exceptions. It must be verified that any addendum to the specification has been acknowledged by each bidder. The adequacy of bid bonds or certified checks must also be verified.

(g) *Conditions affecting acceptability of bids.* The borrower must take the following specified action if any of the following exist:

(1) *Fewer than three bona fide bids received.* If fewer than three bona fide bids are received for the contract project, the borrower must determine that all reasonable measures have been taken to assure competition prior to awarding the contract. This determination must be documented and such documentation submitted to RUS where required by subpart A of this part. The borrower may, however, elect to reject all bids, make changes in the specification or the qualified bidders list or both and invite new bids.

(2) *Significant error or ambiguity in the specification.* If a significant error or ambiguity in the specification is found which could result in the bidders having varying interpretations of the requirements of the bid, the borrower must either issue an addendum to each prospective bidder correcting the error or ambiguity before bids are received, or reject all bids and correct the specification. If a significant error or ambiguity in the specification is discovered after the bids are opened, the borrower must reject all bids, correct the specification and invite new bids.

(h) *Negotiations.* The contracting committee may elect not to hold any negotiations and recommend award of the contract. Otherwise, the contracting committee must give at least each of the three apparent lowest evaluated bidders an equal opportunity to participate in negotiations for the purpose of resolving questions regarding the specification and contract terms and to arrive at a final price. Neither prices of other bids nor relative ranking of any bidder are to be revealed under any circumstances. Such discussions may be held by telephone or similar means

§ 1726.204

provided at least each of the three apparent lowest evaluated bidders have an equal opportunity to participate. Upon completion of the negotiations, the contracting committee will determine the bid that is in the borrower's best interest.

(i) *Award of the contract.* Upon completion of the bid evaluations, the contracting committee will promptly report all findings and recommendations to the borrower's board of directors. The board will either:

(1) Resolve to award the contract to the selected bidder; or

(2) Reject all bids.

(j) *Certifications by the contracting committee.* The chairperson of the contracting committee shall certify as follows: "The procedures for multiparty negotiation as described in 7 CFR 1726.203 were followed in awarding this contract." The certification executed by the chairperson of the contracting committee shall be submitted to RUS in writing where required by subpart A of this part.

§ 1726.204 Multiparty unit price quotations.

The borrower or its engineer must contact a sufficient number of suppliers or contractors to assure competition and so that at least three bids will be received. On the basis of written unit price quotations, the borrower will select the supplier or contractor based on the lowest evaluated cost.

§ 1726.205 Multiparty lump sum quotations.

The borrower or its engineer must contact a sufficient number of suppliers or contractors to assure competition and so that at least three bids will be received. On the basis of written lump sum quotations, the borrower will select the supplier or contractor based on the lowest evaluated cost.

§§ 1726.206—1726.249 [Reserved]

Subpart H—Modifications to RUS Standard Contract Forms

§ 1726.250 General.

RUS provides standard contract forms for procurement of materials, equipment, and construction, for con-

7 CFR Ch. XVII (1–1–97 Edition)

tract amendments and subcontracts, and various related forms for use by RUS borrowers. See § 1726.300 for a listing of these forms and how to obtain them. The standard contract forms shall be used by the borrowers in accordance with the provisions of this part. RUS will give prior approval to certain modifications to these forms without changing the applicable requirements for RUS approval. Such approved modifications are set forth in this subpart. These are the only modifications given prior RUS approval.

§ 1726.251 Prior approved contract modification related to price escalation on transmission equipment, generation equipment, and generation construction contracts.

(a) *General.* Where the borrower encounters reluctance among manufacturers, suppliers, and contractors to bid a firm price on transmission equipment or generation equipment, materials or construction, modifications may be made in the RUS standard form of contracts. These modifications, if applicable, may include, as an alternative to the standard form, provisions for adjusting a base price either upward or downward as determined by changes in specified indexes between the time of the bid and the time the work is performed or materials are procured by the contractor for such work. A large number of labor and materials indexes are published monthly by the Bureau of Labor Statistics (BLS). The borrower (acting through its engineer, if applicable) will select the indexes for the particular item to be used in the price adjustment clause. Suppliers' corporate indexes may not be used. Labor and materials indexes are reported in the BLS's monthly publications entitled "Employment and Earnings" and "Producer Prices and Price Indexes." These publications may be ordered through the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or any of the BLS regional offices.

(b) *Material and equipment contracts.* The approved provisions needed to reflect the modifications to provide for price escalation in the material or equipment contract forms for generation facilities are as follows:

Rural Utilities Service, USDA

§1726.251

(1) Insert new paragraphs in the Notice and Instructions to Bidders as follows:

“Proposals are invited on the basis of firm prices (or prices with a stated maximum percentage escalation) or on the basis of nonfirm prices to be adjusted as provided for below or on both bases. The owner may award the contract on either basis.

Nonfirm prices. The prices are subject to adjustment upward or downward based on change in the Bureau of Labor Statistics labor and material indexes.

A proportion of ____ percent [the borrower will enter the appropriate percentage amount] of the contract price shall be deemed to represent labor cost and shall be adjusted based on changes in the Bureau of Labor Statistics, Average Hourly Earnings Rate ____ [the borrower will enter the appropriate BLS index] from the month in which the bids are opened to the month in which the labor is incorporated in the equipment or materials. The adjustment for labor costs shall be obtained by applying the percentage of increase or decrease in such index, calculated to the nearest one-tenth of one percent, to the percentage of the contract prices deemed to represent labor costs. A portion of ____ percent [the borrower will enter the appropriate percentage amount] of the contract price shall be deemed to represent material costs and shall be adjusted based on changes in the Bureau of Labor Statistics, material index ____ [the borrower will enter the appropriate BLS index] for the period and in a manner similar to the labor cost adjustment.”

(2) Insert the following in the contract documents under the “Proposal” section:

“Firm Price \$_____
Nonfirm Price \$_____”

(3) For equipment that uses a large quantity of insulating oil, the borrower may insert the following in the contract documents under the “Proposal” section:

“The price for insulating oil shall be adjusted upward or downward based on the change in the Bureau of Labor Statistics Refined Petroleum Rate (057) from the month in which the bids are opened to the month in which the oil is purchased by the equipment supplier. Contracts shall be evaluated based on an estimated cost of ____ cents per gallon [the borrower will enter the appropriate cost] for oil. Such adjustment, if any, shall not change the contract amount for purpose of applying any other adjustments to the contract prices.”

(c) *Construction contracts.* The approved provisions needed to reflect the modifications to provide for price escalation in the construction contract forms for generation facilities are as follows:

(1) Insert new paragraphs in the “Notice and Instructions” to Bidders as follows:

“Proposals are invited on the basis of firm prices (or prices with a stated maximum percentage escalation) or on the basis of nonfirm prices to be adjusted as provided for below or on both bases. The owner may award the contract on either basis.

Nonfirm Prices.—The prices are subject to adjustment upward or downward based on changes in the Bureau of Labor Statistics labor and material indexes.

A proportion of ____ percent [the borrower will enter the appropriate percentage amount] of the contract price shall be deemed to represent shop labor costs and shall be adjusted based on changes in the Bureau of Labor Statistics, Average Hourly Earnings Rate ____ [the borrower will enter the appropriate BLS index] from the month in which bids are opened to the month in which the work is accomplished. The adjustment for shop labor costs shall be obtained by applying the percentage increase or decrease in such index, to the percentage of each partial payment deemed to represent shop labor costs. A portion of ____ percent [the borrower will enter the appropriate percentage amount] of the contract prices shall be deemed to represent material costs and shall be adjusted based on changes in the Bureau of Labor Statistics, Producer Price Index, ____ [the borrower will enter the appropriate BLS index] for the period and in a manner similar to the shop labor costs adjustment. A portion of ____ percent [the borrower will enter the appropriate percentage amount] of the contract price shall be deemed to represent field labor costs and shall be adjusted based on changes in the Bureau of Labor Statistics, Average Hourly Earnings Rate ____ [the borrower will enter the appropriate BLS index], for the period and in a manner similar to the shop labor costs adjustment.”

(2) Insert the following in the contract documents under the “Proposal” section:

“Firm Price \$_____
Nonfirm Price \$_____”

§ 1726.252

§ 1726.252 Prior approved contract modification related to liability for special and consequential damages.

This section applies only to transmission equipment purchases and generation contracts. Where the borrower anticipates difficulty in obtaining responsive bids on RUS standard contract forms due to a lack of limitation with respect to special and consequential damages, and where the borrower believes that such a modification will encourage competition through the receipt of an alternative bid which limits the bidder's liability for special and consequential damages, the borrower may make the following approved phrase modifications in the RUS standard contract form on which the borrower solicits bids:

(a) Insert new paragraphs in the "Notice and Instructions to Bidders" as follows:

"Proposals are invited on the basis of alternative Liability Clauses Numbers 1 and 2. The Owner will determine on which Liability Clause basis the award will be made. Any other liability clauses in the proposal or any other modifications will be considered not responsive and unacceptable. These Liability Clauses are defined as follows:

Liability Clause Number 1. This will include unmodified all of the standard terms and conditions of the form of contract furnished by the Owner and attached hereto.

Liability Clause Number 2. This will include the following paragraph, in addition to all of the standard terms and conditions, otherwise unmodified, of the form of contract furnished by the Owner and attached hereto:

"Except for the Seller's willful delay or refusal to perform the contract in accordance with its terms, the Seller's liability to the Owner for special or consequential damages on account of breach of this contract shall not exceed in total an amount equal to ____ percent [the borrower will insert an appropriate percentage between 0 and 100 percent, inclusive] of the contract price."

(b) Insert the following in the contract documents under the "Proposal" section:

"Price \$(Based on Liability Clause 1)_____
Price \$(Based on Liability Clause 2)_____"

(c) Insert the following in the acceptance section of the standard contract form:

"This contract is based on Liability Clause Number_____."

7 CFR Ch. XVII (1-1-97 Edition)

(d) In RUS Form 200, the word "Bidder" would replace the word "Seller" in the Liability Clause in paragraph (a) of this section.

§ 1726.253 Prior approved contract modification related to alternative bid provision for payment to contractor for bulk purchase of materials.

When construction is to be performed over an extended period of time, but large quantities of material are to be purchased by the contractor at the beginning of the project (e.g., cable for URD installations), the borrower may allow alternative bids providing for payment to the contractor of 90 percent of the cost of such materials within 30 days of delivery of those materials at the job site. The borrower will retain the right to award the contract with or without the alternative payment provision, however, the contract still must be awarded on the basis of the lowest evaluated responsive bid for the alternative accepted.

§ 1726.254 Prior approved contract modifications related to RUS approval of contracts and amendments and modified bidding requirements.

It will be necessary for borrowers to make certain modifications to various RUS contract forms to implement the provisions of this part. If a RUS approved form of contract is required to be used by this part and private bid opening is permitted by this part, the "Notice and Instructions to Bidders" of the contract form may be modified accordingly. Other modifications are needed to indicate that certain provisions related to RUS approval are not applicable under specified circumstances. These modifications are as follows:

(a) *RUS Form 173 Materials Contract.* No modifications.

(b) *RUS Form 180 Construction Contract Amendment.* No modifications.

(c) *RUS Form 198 Equipment Contract.* For contracts NOT requiring approval of the Administrator (in accordance with subparts B through F of this part) the applicable modifications are as follows:

(1) Change Section 5(e) of the "Equipment Contract" to read as follows:

“(e) Each and all of the covenants and agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto provided, however, the Seller shall not assign this contract or any part hereof without approval in writing of the Purchaser, and further the Seller shall not enter into any contract with any person, firm or corporation for the performance of the Seller’s obligations hereunder, or any part thereof, without the approval in writing of the Purchaser.”

(2) Delete Section 5(f) of the “Equipment Contract.”

(d) *RUS Form 200 Construction Contract—Generating*. For contracts Not requiring approval of the Administrator (in accordance with subparts B through F of this part) the applicable modifications are as follows:

(1) *Contractor’s Proposal, Article II, Section 3(a), Sentence 2*. Delete the words “and the Administrator.”

(2) *Contractor’s Proposal, Article II, Section 3(d), Sentence 2*. Delete the words “and approved by the Administrator¹” and the associated footnote.

(3) *Contractor’s Proposal, Article VI, Section 7*. Change to read as follows:

“Nonassignment of Contract. Except as provided in Section 8 of this Article, the Bidder will not assign this Contract, or any interest in any funds that may become due hereunder, or enter into any contract with any person, firm or corporation, for the performance of the Bidder’s obligations hereunder, or any part hereof without the approval in writing of the Owner and the Surety or Sureties, if any.”

(4) *Contractor’s Proposal, Article VI*. Delete Section 10.

(5) *Acceptance*. Delete the words “Subject to the approval of the Administrator.”

(e) *RUS Form 201 Right-of-Way Clearing Contract*. No modifications.

(f) *RUS Form 203 Transmission System Right-of-Way Clearing Contract*. For contracts Not requiring approval of the Administrator (in accordance with subparts B through F of this part) the applicable modifications are as follows.

(1) *Notice and Instructions to Bidders, Section 8*. Delete the words “and such acceptance has been approved by the Administrator.”

(2) *Contractor’s Proposal, Article II, Section 1(a)*. Replace the word “Administrator” with the word “Owner” in two places in the referenced section.

(3) *Contractor’s Proposal, Article II, Section 3(d), Sentence 1*. Delete the words “and with the approval of the Administrator¹” and the associated footnote.

(4) *Contractor’s Proposal, Article II, Section 3(d), Sentence 3*. Delete the words “and approved by the Administrator²” and the associated footnote.

(5) *Contractor’s Proposal, Article III, Section 1*. Delete the words “and the Administrator” in five places in the referenced section.

(6) *Contractor’s Proposal, Article III, Section 1(b)*. Replace the word “Administrator” with the word “Owner.”

(7) *Contractor’s Proposal, Article III, Section 1(e)*. Replace the word “Administrator” with the word “Owner.”

(8) *Contractor’s Proposal, Article VI, Section 1(d)*. Delete the words “and the Administrator.”

(9) *Contractor’s Proposal, Article VI*. Delete Section 10.

(10) *Acceptance*. Delete the words “Subject to the approval of the Administrator.”

(g) *RUS Form 238 Construction or Equipment Contract Amendment*. If the contract amendment does not require RUS approval, in accordance with §1726.24(b), the borrower may delete from RUS Form 238 the following sentence:

“(The Administrator of RUS is hereby authorized to approve this amendment either in whole or in part and to delete such items as do not meet his approval.)”

(h) *RUS Form 257 Contract to Construct Buildings*. No modifications.

(i) *RUS Form 282 Subcontracts*. The applicable modifications are as follows:

(1) *Section 6, line 3*. Delete the words “and the Administrator of the Rural Utilities Service (hereinafter called the Administrator).”

(2) *Section 7, line 2*. Change Section 7, line 2 to read as follows:

“approved in writing by the Owner and the Surety, if any; provided, * * *”

(3) *Section 7, line 3*. Delete the words “and the Administrator.”

(j) *RUS Form 764 Substation and Switching Station Erection Contract*. For contracts NOT requiring approval of the Administrator (in accordance with subparts B through F of this part) the applicable modifications are as follows:

§ 1726.255

7 CFR Ch. XVII (1–1–97 Edition)

(1) *Notice and Instructions to Bidders, Section 10.* Delete the words “and such acceptance has been approved by the Administrator.”

(2) *Contractor’s Proposal, Article II, Section 1.a.* Replace the word “Administrator” with the word “Owner” in two places in the referenced section.

(3) *Contractor’s Proposal, Article II, Section 1.d, Sentence 1.* Delete the words “and with the approval of the Administrator¹” and the associated footnote.

(4) *Contractor’s Proposal, Article II, Section 1.d, Sentence 2.* Delete the words “and approved by the Administrator²” and the associated footnote.

(5) *Contractor’s Proposal, Article III, Section 1.* Delete the words “and the Administrator” in five places in the referenced section.

(6) *Contractor’s Proposal, Article III, Section 1.b.* Replace the word “Administrator” with the word “Owner.”

(7) *Contractor’s Proposal, Article III, Section 1.e.* Replace the word “Administrator” with the word “Owner.”

(8) *Contractor’s Proposal, Article VI, Section 1.e.* Delete the words “and the Administrator.”

(9) *Contractor’s Proposal, Article VI.* Delete Section 10.

(10) *Acceptance.* Delete the words “Subject to the approval of the Administrator.”

(k) *RUS Form 786 Electric System Communications and Control Equipment Contract (including installation).* For contracts NOT requiring approval of the Administrator (in accordance with subparts B through F of this part) the applicable modifications are as follows:

(1) *Article I, Section 2.* Delete the words “subject to the approval of the Administrator¹” and “and approved by the Administrator²” and the associated footnotes.

(2) *Article II, Section 1, Sentence 2.* Replace the word “Administrator” with “Purchaser.”

(3) *Article II, Section 5.* Delete the words “subject to the approval of the Administrator³” and “subject to the approval of the Administrator⁴” and the associated footnotes.

(4) *Article III, Section 2, Sentence 3.* Replace the words “if the Administrator shall so approve” with the words “if the Purchaser shall so approve.”

(5) *Article VI.* Delete Section 7.

(6) *Acceptance.* Delete the words “Subject to the approval of the Administrator.”

(l) *RUS Form 790 Distribution Line Extension Construction Contract (Labor and Materials).* No modifications.

(m) *RUS Form 792 Distribution Line Extension Construction Contract (Labor Only).* No modifications.

(n) *RUS Form 830 Electric System Construction Contract.* No modifications.

(o) *RUS Form 831 Electric Transmission Construction Contract.* For contracts NOT requiring approval of the Administrator (in accordance with subparts B through F of this part) the applicable modifications are as follows:

(1) *Notice and Instructions to Bidders, Section 10.* Delete the words “and such acceptance has been approved by the Administrator.”

(2) *Contractor’s Proposal, Article II, Section 1.d.* Delete the words “with the approval of the Administrator¹” and “and approved by the Administrator²” and the associated footnotes.

(3) *Contractor’s Proposal, Article II, Section 4.a.* Delete the words “and approved by the Administrator³” and the associated footnote.

(4) *Contractor’s Proposal, Article III, Section 1.a, Sentence 4.* Delete the words “and the Administrator.”

(5) *Contractor’s Proposal, Article III, Section 1.b.* Replace the word “Administrator” with the word “Owner.”

(6) *Contractor’s Proposal, Article III, Section 1.c.* Delete the words “and the Administrator” in four places in the referenced section.

(7) *Contractor’s Proposal, Article III, Section 1.e.* Replace the word “Administrator” with the word “Owner.”

(8) *Contractor’s Proposal, Article VI, Section 1.e.* Delete the words “and the Administrator.”

(9) *Contractor’s Proposal, Article VI.* Delete Section 11.

(10) *Acceptance.* Delete the words “Subject to the approval of the Administrator.”

§ 1726.255 Prior approved contract modifications related to indemnification.

(a) As an alternative to the indemnification provision required in RUS standard construction contract forms in those jurisdictions requiring specific

Rural Utilities Service, USDA

§ 1726.300

language concerning the requirement that the indemnitor indemnify the indemnitee for the indemnitee's own negligence, the borrower may add the words "otherwise this provision shall apply to any alleged negligence or condition caused by the Owner" so that the first paragraph reads as follows:

"i. To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner, otherwise this provision shall apply to any negligence or condition caused by the Owner."

(b) As an alternative to the indemnification provision required in RUS standard construction contract forms in those jurisdictions that have a legal prohibition against one party indem-

nifying another for the other's negligence, the borrower may replace the words "defend, indemnify, and hold harmless" with the words "shall pay on behalf of" so that the first paragraph reads as follows:

"i. To the maximum extent permitted by law, Bidder shall pay on behalf of Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner, otherwise this provision shall apply to any negligence or condition caused by the Owner."

(c) If the alternative indemnification provision in paragraph (a) or (b) of this section is chosen by the borrower, the language of paragraph (a) or (b) of this section would be inserted in lieu of subsection (i) of the section indicated in the RUS standard construction contract forms as follows:

RUS form No.	Title	Designated section
200	Construction Contract—Generating	Article IV, Section 1(c).
201	Right-of-Way Clearing Contract	Article IV, Section 1(e).
203	Transmission System Right-of-Way Clearing Contract	Article IV, Section 1(f).
257	Contract to Construct Buildings	Article IV, Section 1(b).
764	Substation and Switching Station Erection Contract	Article IV, Section 1(f).
786	Electric System Communications and Control Equipment Line ...	Article IV, Section 1(c).
790	Distribution Line Extension Construction Contract (labor & materials).	Article IV, Section 1(f).
792	Distribution Line Extension Construction Contract (labor only) ...	Article IV, Section 1(f).
830	Electric System Construction Contract (labor & material)	Article IV, Section 1(f).
831	Electric Transmission Construction Contract (labor & material) ...	Article IV, Section 1(f).

(d) In RUS Forms 201, 790, and 792, the word "Contractor" would replace the word "Bidder" in the alternative indemnification clause in paragraph (a) or (b) of this section.

(e) In RUS Form 786, the word "Seller" would replace the word "Bidder" and the word "Purchaser" would replace the word "Owner" in the alternative indemnification clause in paragraph (a) or (b) of this section.

§§ 1726.256—1726.299 [Reserved]

Subpart I—RUS Standard Forms

§ 1726.300 List of RUS standard contracting forms for electric systems.

The following is a list of the current RUS standard contracting forms that RUS has prepared for use by electric borrowers when purchasing materials

§ 1726.300

7 CFR Ch. XVII (1-1-97 Edition)

and equipment and constructing facilities with a RUS loan or loan guarantee. Copies of the contract forms are available from the sources indicated in

the listing. A notice of any change in these contract forms will be published in the FEDERAL REGISTER.

RUS ELECTRIC PROGRAM STANDARD CONTRACT FORMS

RUS form No.	Issue date	Title	Purpose	Source of copies ¹
168b	2-95	Contractor's bond	Used in RUS Forms 200, 201, 203, 257, 764, 786, 790, 792, 830 & 831	In respective contract form.
168c	2-95	Contractor's bond (less than \$1 million)	In lieu of RUS Form 168b, used when contractor's surety has accepted a Small Business.	RUS.
172	9-58	Certificate of Inspection Contract Construction ..	Administration guarantee—Used to notify RUS that construction is ready for inspection.	RUS.
173	3-55	Materials contract	Used for distribution, transmission, and general plant material purchases	RUS.
180	2-95	Construction Contract Amendment	Used to amend distribution line construction contracts	RUS.
181	2-95	Certificate of Completion Contract Construction for Buildings.	Used for the closeout of RUS Form 257	RUS.
187	2-95	Certificate of Completion Contract Construction	Used in RUS Forms 200, 203, 764, 786, 830, and 831	In respective contract form.
198	2-95	Equipment Contract Construction Contract—Generating.	Used for equipment purchases	RUS.
200	2-95	Construction Contract Generating	Used for generating plant construction or for the furnishing and installation of major items of equipment.	RUS.
201	2-95	Right-of-Way Clearing Contract	Used for distribution right-of-way clearing work which is to be performed separate from line construction.	RUS.
203	2-95	Transmission System Right-of-Way Clearing Contract.	Used for transmission line right-of-way clearing work which is to be performed separate from line construction.	RUS.
213	2-95	Certificate ("Buy American")	Used to document compliance with the "Buy American" requirement	RUS.
219	10-88	Inventory of Work Orders	Used to encumber funds	RUS.
224	2-95	Waiver and Release of Lien	Used in RUS Forms 200, 203, 764, 786, 830, and 831	In respective contract form.
231	2-95	Certificate of Contractor	Used in RUS Forms 200, 203, 764, 786, 830, and 831	In respective contract form.
238	2-95	Construction or Equipment Contract Amendment.	Used to amend contracts except for distribution line construction contracts.	RUS.
251	2-95	Material Receipt	Used in RUS Forms 764, 830, and 831	In respective contract form.
254	2-95	Construction Inventory	Used with the closeout of RUS Forms 203, 764, 830, and 831	RUS.
257	2-95	Contract to Construct Buildings	Used to construct headquarters buildings and other structure construction.	GPO. ²
270	7-70	Equal Opportunity Addendum	Addendum to contracts not having current equal opportunity provisions	RUS
274	6-81	Bidder's Qualifications	Used to document Bidder's Qualifications	RUS.
282	11-53	Subcontract	Used for subcontracting	RUS.
307	2-95	Bid Bond	Used in RUS Forms 200, 203, 257, 764, 830 and 831	In respective contract form.
458	3-55	Material Contract	Used to obtain generating plant material and equipment purchases over \$10,000, not requiring acceptance tests at the project site.	RUS.
764	2-95	Substation and Switching Station Erection Contract.	Used to construct substations and switching stations	RUS.
786	2-95	Electric System Communications and Control Equipment Contract.	Used for delivery and installation of equipment for system communications.	RUS.

RUS ELECTRIC PROGRAM STANDARD CONTRACT FORMS—Continued

RUS form No.	Issue date	Title	Purpose	Source of copies ¹
790	2–95	Distribution Line Extension Construction Contract (labor & materials).	Used for limited distribution construction accounted for under work order procedure.	GPO. ²
792	2–95	Distribution Line Extension Construction Contract (labor only).	Used for limited distribution construction accounted for under work order procedure.	GPO. ²
792b	2–95	Certificate of Construction and Indemnity Agreement.	Used in RUS Forms 201, 790, and 792	In respective contract form.
792c	2–95	Supplemental Contract for Additional Project	Used in RUS Forms 201, 790, and 792	In respective contract form.
830	2–95	Electric System Construction Contract (labor & material).	Used for distribution and/or transmission project construction	GPO. ²
831	2–95	Electric Transmission Construction Contract (labor & material).	Used for transmission project construction	GPO. ²

Notes:

¹ A single copy of the form will be furnished by RUS upon request. Additional copies may be duplicated or reproduced. Requests for copies should be sent to: Director, Administrative Services Division, U.S. Department of Agriculture, Rural Utilities Service, Washington, DC 20250.

² Requests for copies should be submitted to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Telephone orders may also be placed, using Mastercard or Visa, by calling (202) 512–1800.

Rural Utilities Service, USDA

§1726.310

§1726.301 Use of printed forms.

If a RUS contract form is required by this part, the borrower shall use the form in the format available from RUS or GPO (photocopying or other exact reproduction is acceptable.) The contract forms are not to be retyped, changed, modified or altered in any manner not specifically authorized in this part or approved by RUS in writing. Any modifications approved by RUS must be clearly shown so to indicate that such are different from the standard form. Electronic reproduction is acceptable for RUS Forms 251 and 254 only.

§1726.302 RUS approved forms of contract.

If a specific RUS contract form is required by a particular section of this part, the borrower shall use that form without changes or modifications or alterations unless, prior to issuing the bid package to bidders, RUS has specifically approved any such changes to that form for that borrower, nor shall any change be made to the form by amendment of an executed contract without prior RUS approval. Any proposed changes shall not relieve the contractor or the borrower of the basic responsibilities required by the standard RUS contract form, and, shall not alter any terms and conditions required by law. Changes permitted or required by subpart H of this part or by part 1788, RUS Fidelity and Insurance Requirements for Electric and Telephone Borrowers, of this chapter are approved by RUS under the circumstances indicated.

§1726.303 Interest on overdue accounts.

Certain RUS contract forms contain a provision concerning payment of interest on overdue accounts. Prior to issuing the invitation to bidders, the borrower must insert an interest rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued. If no prime rate is published on that date, the last such rate published prior to that date must be used. The rate must not, however, exceed the maximum rate allowed by any applicable state law.

§§1726.304—1726.309 [Reserved]

§1726.310 Contractor's bond, RUS Form 168b.

The bond form in this section shall be used when a Contractor's Bond is required by RUS Forms 200, 201, 203, 257, 764, 786, 790, 792, 830, or 831 unless the contractor's surety has accepted a Small Business Administration guarantee and the contract is for one million dollars or less.

CONTRACTOR'S BOND

1. Know all men that we, _____, as Principal, and _____, as Surety, are held and firmly bound unto _____ (hereinafter called the "Owner") and unto the United States of America (hereinafter called the "Government") and unto all persons, firms and corporations who or which may furnish materials for or perform labor on a Rural Utilities Service Project known as Project _____ and to their successors and assigns, in the penal sum of _____ dollars (\$_____), as hereinafter set forth and for the payment of which sum well and truly to be made we bind ourselves, our executors, administrators, successors and assigns jointly and severally by these presents. Said Project is described in a certain construction contract (hereinafter called the "Construction Contract") between the Owner and the Principal, dated _____, 19____, pursuant and subject to a certain loan contract (hereinafter called the "Loan Contract") between the Owner and the Government, acting through the Administrator of the Rural Utilities Service (hereinafter called the "Administrator").

2. The condition of this obligation is such that if the Principal shall well and truly perform and fulfill all the undertakings, covenants, terms, conditions and agreements of the Construction Contract and any amendments thereto, whether such amendments are for additions, decreases, or changes in materials, their quantity, kind or price, labor costs, mileage, routing or any other purpose whatsoever, and whether such amendments are made with or without notice to the Surety, and shall fully indemnify and save harmless the Owner and the Government from all costs and damages which they, or either of them, shall suffer or incur by reason of any failure so to do, and shall fully reimburse and repay the Owner and the Government for all outlay and expense which they, or either of them shall incur in making good any such failure of performance on the part of the Principal, and shall promptly make payment to all persons working on or supplying labor or materials for use in the construction of the Project contemplated in

§ 1726.311**7 CFR Ch. XVII (1-1-97 Edition)**

the Construction Contract and any amendments thereto, in respect of such labor or materials furnished and used therein, to the full extent thereof, and in respect of such labor or materials furnished but not so used, to the extent of the quantities estimated in the Construction Contract and any amendments thereto to be required for the construction of the Project, and shall well and truly reimburse the Owner and the Government, as their respective interests may appear, for any excess in cost of construction of said Project over the cost of such construction as provided in the Construction Contract and any amendments thereto, occasioned by any default of the Principal under the Construction Contract and any amendments thereto, then this obligation shall be null and void, but otherwise shall remain in full force and effect.

3. It is expressly agreed that this bond shall be deemed amended automatically and immediately, without formal and separate amendments hereto, upon any amendment to the Construction Contract, so as to bind the Principal and the Surety to the full and faithful performance of the Construction Contract as so amended, provided only that the total amount of all increases in the cost of construction shall not exceed 20 percent of the amount of the maximum price set forth in the Construction Contract. The term "Amendment," wherever used in this bond, and whether referring to this bond, the Construction Contract or the Loan Contract shall include any alteration, addition, extension, modification, amendment, rescission, waiver, release or annulment, of any character whatsoever.

4. It is expressly agreed that any amendment which may be made by agreement or otherwise between the Principal and the Owner in the terms, provisions, covenants and conditions of the Construction Contract, or in the terms, provisions, covenants and conditions of the Loan Contract (including, without limitation, the granting by the Administrator to the Owner of any extension of time for the performance of the obligations of the Owner under the Loan Contract or the granting by the Administrator or the Owner to the Principal of any extension of time for the performance of the obligations of the Principal under the Construction Contract, or the failure or refusal of the Administrator or the Owner to take any action, proceeding or step to enforce any remedy or exercise any right under either the Construction Contract or the Loan Contract, or the taking of any action, proceeding or step by the Administrator or the Owner, acting in good faith upon the belief that the same is permitted by the provisions of the Construction Contract or the Loan Contract) shall not in any way release the Principal and the Surety, or either of them or their respective executors, administrators, successors or assigns, from

liability hereunder. The Surety hereby acknowledges receipt of notice of any amendment, indulgence or forbearance, made, granted or permitted.

5. This bond is made for the benefit of all persons, firms and corporations who or which may furnish any materials or perform any labor for or on account of the construction to be performed under the Construction Contract and any amendments thereto, and they, and each of them, are hereby made obligees hereunder with the same force and effect as if their names were written herein as such, and they and each of them may sue hereon.

In witness whereof, the undersigned have caused this instrument to be executed and their respective corporate seals to be affixed and attested by their duly authorized representatives this _____ day of _____, 19____.

Principal _____ (Seal)

Signatures: The Contractor's Bond must be signed with the full name of the Contractor. If the Contractor is a partnership the Contractor's Bond must be signed in the partnership name by a partner. If the Contractor is a corporation the Contractor's Bond must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the corporation. A typewritten copy of all such names and signatures shall be appended.

Power of Attorney: The Contractor's Bond must be accompanied by a power of attorney authorizing execution on behalf of the Surety and, in jurisdictions so requiring should be countersigned by a duly authorized resident agent of the Surety.

[End of clause]

§ 1726.311 Contractor's bond, RUS Form 168c.

The bond form in this section shall be used when a Contractor's Bond is required by RUS Form 200, 201, 203, 257, 764, 786, 790, 792, 830, or 831 and the contractor's surety has accepted a Small Business Administration guarantee and the contract is for one million dollars or less.

CONTRACTOR'S BOND

(Use only when contract is less than \$1 million and Surety has accepted an SBA (Small Business Administration) Guarantee)

Rural Utilities Service, USDA

§1726.311

1. Know all men that we, _____, as Principal, and _____, as Surety, are held and firmly bound unto _____ (hereinafter called the "Owner") and unto the United States of America (hereinafter called the "Government") and unto all persons, firms and corporations who or which may furnish materials for or perform labor on a Rural Utilities Service Project known as Project _____ and to their successors and assigns, in the penal sum of _____ dollars (\$_____), as hereinafter set forth and for the payment of which sum well and truly to be made we bind ourselves, our executors, administrators, successors and assigns jointly and severally by these presents. Said Project is described in a certain construction contract (hereinafter called the "Construction Contract") between the Owner and the Principal, dated _____, 19____, pursuant and subject to a certain loan contract (hereinafter called the "Loan Contract") between the Owner and the Government, acting through the Administrator of the Rural Utilities Service (hereinafter called the "Administrator").

2. The condition of this obligation is such that if the Principal shall well and truly perform and fulfill all the undertakings, covenants, terms, conditions and agreements of the Construction Contract and any amendments thereto, whether such amendments are for additions, decreases, or changes in materials, their quantity, kind or price, labor costs, mileage, routing or any other purpose whatsoever, and whether such amendments are made with or without notice to the Surety, and shall fully indemnify and save harmless the Owner and the Government from all costs and damages which they, or either of them, shall suffer or incur by reason of any failure so to do, and shall fully reimburse and repay the Owner and the Government for all outlay and expense which they, or either of them shall incur in making good any such failure of performance on the part of the Principal, and shall promptly make payment to all persons working on or supplying labor or materials for use in the construction of the Project contemplated in the Construction Contract and any amendments thereto, in respect of such labor or materials furnished and used therein, to the full extent thereof, and in respect of such labor or materials furnished but not so used, to the extent of the quantities estimated in the Construction Contract and any amendments thereto to be required for the construction of the Project, and shall well and truly reimburse the Owner and the Government, as their respective interests may appear, for any excess in cost of construction of said Project over the cost of such construction as provided in the Construction Contract and any amendments thereto, occasioned by any default of the Principal under the Construction Contract and any amend-

ments thereto, then this obligation shall be null and void, but otherwise shall remain in full force and effect.

3. Provided, that the liability of the Principal and Surety hereunder to the Government shall be subject to the same limitations and defenses as may be available to them against a claim hereunder by the Owner, provided, however, that the Government may, at its option, perform any obligations of the Owner required by the contract.

4. It is expressly agreed that this bond shall be deemed amended automatically and immediately, without formal and separate amendments hereto, upon any amendment to the Construction Contract, so as to bind the Principal and the Surety to the full and faithful performance of the Construction Contract as so amended, provided only that the total amount of all increases in the cost of construction shall not exceed 20 percent of the amount of the maximum price set forth in the Construction Contract. The term "Amendment," wherever used in this bond, and whether referring to this bond, the Construction Contract or the Loan Contract shall include any alteration, addition, extension, modification, amendment, rescission, waiver, release or annulment, of any character whatsoever.

5. It is expressly agreed that any amendment which may be made by agreement or otherwise between the Principal and the Owner in the terms, provisions, covenants and conditions of the Construction Contract, or in the terms, provisions, covenants and conditions of the Loan Contract (including, without limitation, the granting by the Administrator to the Owner of any extension of time for the performance of the obligations of the Owner under the Loan Contract or the granting by the Administrator or the Owner to the Principal of any extension of time for the performance of the obligations of the Principal under the Construction Contract, or the failure or refusal of the Administrator or the Owner to take any action, proceeding or step to enforce any remedy or exercise any right under either the Construction Contract or the Loan Contract, or the taking of any action, proceeding or step by the Administrator or the Owner, acting in good faith upon the belief that the same is permitted by the provisions of the Construction Contract or the Loan Contract) shall not in any way release the Principal and the Surety, or either of them or their respective executors, administrators, successors or assigns, from liability hereunder. The Surety hereby acknowledges receipt of notice of any amendment, indulgence or forbearance, made, granted or permitted.

6. This bond is made for the benefit of all persons, firms and corporations who or which may furnish any materials or perform any labor for or on account of the construction to be performed under the Construction

§ 1726.312

Contract and any amendments thereto. Provided, that beneficiaries or claimants hereunder shall be limited to the subcontractors, and persons, firms and corporations having a direct contract with the Principal or its subcontractors.

7. Provided, further, that no suit or action shall be commenced hereunder by any person, firm, or corporation who performed work or labor or who furnished materials for the project: (a) Unless such person, firm, or corporation, other one having a direct contract with the Principal (or with the Government in the event the Government is performing the obligation of the Owner), shall have given detailed written notice of claim to: The Principal, and the Owner, within ninety (90) days after such person, firm, or corporation did or performed the last of the work or labor, or furnished the last of the materials for which such claim is made. (b) After the expiration of one (1) year following the date on which Principal ceased work on said contract, it being understood, however, that if any limitation embodied in the Bond is prohibited by any law controlling the construction hereof, such limitation shall be deemed to be amended so as to equal to the minimum period of limitation permitted by such law.

In witness whereof, the undersigned have caused this instrument to be executed and their respective corporate seals to be affixed and attested by their duly authorized representatives this _____ day of _____, 19____.

I, the undersigned Engineer of the above-designated Rural Utilities Service Project do hereby certify that:

1. The construction provided for pursuant to Construction Contract No. _____ dated

Rural Utilities Service, USDA

§1726.315

_____ 19____ including all approved amendments, (hereinafter called the "Project") between _____ ("Owner") and _____ ("Contractor") has been completed as of _____ 19____, and is in all respects in strict compliance with the provisions of the Loan Contract and the Construction Contract, including all Plans, specifications, maps, and drawings and all modifications thereto.

2. Payment in full has been made to all persons who have furnished labor for the Project.

3. The Contractor has obtained valid releases of lien from all persons, firms and/or corporations furnishing materials, supplies, and appliances which were employed by the Contractor in the performance of the Construction Contract, and that such releases have been delivered by the Contractor to the Owner.

4. If applicable, the Final Inventory attached hereto and made a part hereof is a complete and accurate summary of all units of construction in the Project and of all work performed in accordance with the Construction Contract.

5. If applicable, the staking sheets and tabulation of staking sheets upon which the Final Inventory is based show the accurate location, number, and kind of all units of construction of the project and show all work performed in accordance with the Construction Contract.

6. All defects in workmanship and materials reported during the period of construction of the Project have been corrected.

7. The total cost of the Project as completed is _____ dollars (\$_____). The Project consists of facilities shown on the Statement of Construction which is true and correct and which is attached hereto and made a part hereof.

Dated this _____ day of _____, 19____.

[End of clause]

§1726.315 Equipment contract, RUS Form 198.

The contract form in this section shall be used when required by this part.

EQUIPMENT CONTRACT

Notice and Instructions to Bidders

1. Sealed proposals for the furnishing and delivery f.o.b. _____ of equipment for the _____ (hereinafter called the "Owner") which is to be part of the project known as _____ will be received by the Owner on or before _____ o'clock, _____ M., _____ 19____, at _____ at which time and place the proposals will be publicly opened and read. Any proposal received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. The Plans and Specifications, together with all necessary forms and other documents for bidders may be obtained from the Owner or from the Engineer, _____ at the latter's office at _____. The Plans and Specifications may be examined at the office of the Owner or at the office of the Engineer. A copy of the loan contract (if the Project is to be financed in whole or in part, pursuant to a loan contract) between the Owner and the United States of America acting through the Administrator of the Rural Utilities Service (hereinafter called the "Administrator") and of the loan contract between the Owner and any other lender, may be examined at the office of the Owner.

3. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewriter. No alterations or interlineations will be permitted, unless made before submission and initialed and dated.

4. Prior to the submission of the Proposal, the Bidder shall make and shall be deemed to have made a careful examination of the Plans and Specifications and forms of Equipment Contract on file with the Secretary of the Owner and with the Engineer, and all

§ 1726.315

7 CFR Ch. XVII (1-1-97 Edition)

other matters, including transportation facilities, that may affect the cost and the time of completion of the work.

5. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

6. In estimating the lowest cost to the Owner as one of the factors in deciding the award of the Contract, the Owner will consider, in addition to the price quoted in the Proposals, the following: _____.

7. The Contract, when executed, shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modification thereof resulting from any representation or promise made at any time by any officer, agent, or employee of the Owner or by any other person.

8. The Owner reserves the right to waive minor irregularities or minor errors in any Proposal if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal in which they occur prior to the execution of any contract which may be awarded thereon.

9. The Owner reserves the right to reject any or all Proposals.

Owner

By _____

Date

Proposal

To: _____ (hereinafter called the "Owner".)

1. The undersigned (hereinafter called the "Bidder") hereby proposes to furnish and deliver the equipment (hereinafter called the "Equipment") described in the Plans and Specifications attached hereto and made a part hereof for the following prices: Item _____.

2. The prices of Equipment set forth herein shall include the cost of delivery to _____. Such delivery shall be made within _____ days after the receipt of the written order of the Owner.

3. This Proposal is made pursuant to the provisions of the Notice and Instructions to Bidders, if any shall be attached hereto, and the Bidder agrees to the terms and conditions thereof.

4. The Bidder warrants the accuracy of all statements contained in the Bidder's Qualifications, if any shall be submitted, and agrees that the Owner shall rely upon such accuracy as a condition of the Contract in the event that this Proposal is accepted.

5. The Bidder warrants that this Proposal is made in good faith and without collusion or connection with any other person or persons bidding for the same work.

6. The Bidder agrees that, in the event this Proposal is accepted, it will execute a Contract in the form attached hereto.

7. The Bidder warrants that the Equipment will conform to the performance data and guarantees which are attached hereto and by this reference made a part hereof.

8. If, in submitting this Proposal, the Bidder has made any change in the form of Proposal or Contract furnished by the Owner, the Bidder understands that the Owner and the Administrator may evaluate the effect of such change as they see fit or they may exclude the Proposal from consideration in determining the award of the Contract.

9. The Bidder represents that:

It has _____, does not have _____, 100 or more employees, and if it has, that it has _____, has not _____, furnished the Equal Employment Opportunity-Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Bidder agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

The Bidder agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this contract will amount to more than \$10,000, the Bidder will file such report, as required by law, and notify the Owner in writing of such filing prior to the Owner's acceptance of this Proposal.

10. The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will

Rural Utilities Service, USDA

§1726.315

obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Equipment Contract

Agreement made ____ 19____, between ____ (hereinafter called the "Purchaser") and ____ (hereinafter called the "Seller"), a corporation organized and existing under the laws of the State of ____.

Whereas, the Purchaser desires to purchase and the Seller desires to sell the equipment described herein for the project financed in part or whole by a loan to the Purchaser from the United States of America, acting through the Administrator of the Rural Utilities Service (hereinafter called the "Administrator") which project is designated ____.

Now therefore, in consideration of the mutual undertakings herein contained, the parties hereto agree as follows:

Section 1—Acceptance of Proposal

(a) The Purchaser accepts the Proposal which is attached hereto and by this reference made a part hereof, and the parties hereto agree that the Seller shall sell and deliver to the Purchaser and the Purchaser shall purchase and receive from the Seller the equipment (hereinafter called the "Equipment") described in the Proposal upon the terms and conditions herein stated.

(b) The prices set forth in the Proposal include the cost of delivery to ____.

(c) The prices set forth in the Proposal do not include any sums which are or may be payable by the Seller on account of taxes imposed by any taxing authority upon the sale, purchase or use of the Equipment. If any such tax is applicable to the sale, purchase or use of the Equipment hereunder, the amount thereof shall be added to the purchase price and paid by the Purchaser.

Section 2—Delivery

The Seller shall deliver the Equipment within ____ days after receipt of the written order or orders of the Purchaser. The time for delivery shall be extended for the period of any reasonable delay due exclusively to causes beyond the control and without the fault of the Seller, including, but not limited to, acts of God, fires, strikes, and floods.

Section 3—Payment

Upon the shipment of any Equipment hereunder, the Seller shall submit to the Purchaser a detailed statement of the Equipment shipped. The Purchaser shall, upon receipt of the Equipment, pay the Seller ninety percent (90%) of the contract price of the Equipment. When the Equipment has been installed, placed in satisfactory operation, tested and accepted by the Purchaser, the Purchaser shall make final payments therefor to the Seller; provided, however, such final payment shall be made not later than one-hundred eighty (180) days after delivery of the Equipment, unless such acceptance by the Purchaser shall be withheld because of the fault of the Seller.

Section 4—Defective Material and Workmanship

(a) All Equipment furnished hereunder shall be subject to the inspection, tests, and approval of the Purchaser and the Administrator and the Seller shall furnish all information required concerning the nature of source of any Equipment and provide adequate facilities for testing and inspecting the Equipment at the plant of the Seller.

(b) The Equipment furnished hereunder shall become the property of the Purchaser upon delivery, provided, however, that the Purchaser or the Administrator, within one year after delivery or within the period for which the Equipment is guaranteed, whichever is longer, may reject any Equipment which does not comply with the Specifications attached hereto and made a part hereof or with the guarantees, if any, of the Seller and the manufacturer. Upon any such rejection, the Seller shall repair or replace such defective Equipment within a reasonable time after notice in writing from the Purchaser and in the event of failure by the Seller so to do, the Purchaser may make such replacement and the cost and expense thereof shall be paid by and recoverable from the Seller.

Section 5—Miscellaneous

(a) All manufacturers' guarantees of Equipment, if any, shall be transferred and assigned to the Purchaser upon delivery of any Equipment and before final payment is made for such Equipment. Such guarantees shall be in addition to those required of the Seller by other provisions of this Contract.

(b) The Seller shall hold harmless and indemnify the Purchaser from any and all claims, suits, and proceedings for infringement of any patent or patents covering Equipment purchased hereunder.

(c) In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such

manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Seller agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

(d) During the performance of this contract, the Seller agrees as follows:

(1) The Seller will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Seller will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Seller agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) The Seller will, in all solicitations or advertisements for employees placed by or on behalf of the Seller, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The Seller will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representative of the Seller's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Seller will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Seller will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records and accounts by the administering agency and the Secretary of Labor for purposes of investigation to as-

certain compliance with such rules, regulations and orders.

(6) In the event of the Seller's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations or orders, this contract may be cancelled, terminated or suspended in whole or in part and the Seller may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in the said Executive Order or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.

(7) The Seller will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Seller will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event a Seller becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Seller may request the United States to enter into such litigation to protect the interest of the United States.

(e) Each and all of the covenants and agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto provided, however, that the Seller shall not assign this contract or any part hereof without approval in writing of the Purchaser and the Administrator, and further that the Seller shall not enter into any contract with any person, firm or corporation for the performance of the Seller's obligations hereunder, or any part thereof, without the approval in writing of the Purchaser.

(f) This contract shall become effective only upon approval by the Administrator. Neither this contract nor any provision thereof shall be modified, amended, rescinded, waived, or terminated without the approval in writing of the Administrator. Amendments executed on RUS Form 238 are not subject to approval of the Administrator, except that when a contract amendment along with all previous amendments to this contract cause the total amended contract price to exceed 120 percent of the original contract price, as stated in the Seller's proposal and accepted by the Owner, that amendment and all subsequent amendments

Rural Utilities Service, USDA

§1726.320

to this contract shall be made subject to the approval of the Administrator.

§§ 1726.316—1726.319 [Reserved]

§1726.320 Construction contract, generating, RUS Form 200.

The contract form in this section shall be used when required by this part.

CONSTRUCTION CONTRACT—GENERATING

Notice and Instructions to Bidders

1. Sealed proposals for the furnishing, delivery and installation of equipment and materials for the electric generating plant of _____ (hereinafter called the "Owner") which is to be part of the system known as _____ will be received by the Owner on or before ____ o'clock __M., __, 19__, at __, at which time and place the proposals will be publicly opened and read. Any proposal received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. Obtaining Documents. The Plans and Specifications together with all necessary forms and other documents for bidders may be obtained from the Owner or from the Engineer, _____, at the latter's office at _____.

¹When Seller is a corporation this section of agreement to be used.

²When Seller is an individual or partnership this section of agreement to be used. If a partnership—all partners shall sign.

_____ upon the payment of \$_____, all of which will be refunded to each bona fide bidder within ten days after the bid opening. The Plans and Specifications may be examined at the office of the Owner or at the office of the Engineer. A copy of the Loan Contract (if the Project is to be financed, in whole or in part, pursuant to a loan contract) between the Owner and the United States of America acting through The Administrator of the Rural Utilities Service (hereinafter called the "Administrator"), and of the Loan Contract between the Owner and any other lender may be examined at the office of the Owner. Each set of documents will have a serial number, given by the Engineer, and the number of each set with the name of the purchaser will be recorded by the Engineers. Bids will be accepted only from the original purchasers.

3. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number, if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations of interlineations will be permitted, unless made before submission and initiated and dated.

4. Familiarity with Conditions. Prior to the submission of the Proposal, the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Plans and Specifications, Construction Drawings and forms of Contractor's Proposal and Acceptance, and Contractor's Bond on file with the Owner and with the Engineer, and shall become informed as to the location and nature of the proposed construction, the ecological and environmental criteria to be followed, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project, general local conditions and all other matters that may affect the cost and the time of completion of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors, and the so-called "Kick-Back" Statute (48 Stat. 948) and regulations issued pursuant thereto.

5. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

6. The Time for Completion of the Project shall be as specified by the Engineer in the Proposal.

7. Bid Bond. Each Proposal must be accompanied by a Bid Bond in the form attached or a certified check on a bank that is a member

§ 1726.320

7 CFR Ch. XVII (1–1–97 Edition)

of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder agrees, provided its Proposal is one of the three low Proposals, that, by filing its Proposal together with such Bid Bond or check in consideration of the Owner's receiving and considering such Proposal, said Proposal shall be firm and binding upon each such Bidder and such Bid Bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor's Bond is furnished (where required) by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinbefore set for the opening of Proposals, whichever period shall be the shorter. If such Proposal is not one of the three low Proposals, the Bid Bond or check will be returned in each instance within a period of ten (10) days to the Bidder furnishing same.

8. Contractor's Bond. The successful Bidder will be required to execute two additional counterparts of the Proposal and, for a Contract in excess of \$100,000, to furnish a Contractor's Bond in triplicate in the form attached hereto with sureties listed by the United States Treasury Department as Acceptable Sureties in a penal sum not less than the Contract price.

9. Failure to Furnish Contractor's Bond. Should the successful Bidder fail or refuse to execute such counterparts of the Proposal or to furnish a Contractor's Bond (where required) within ten (10) days after written notification of the acceptance of the Proposal by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled (a) to enforce the Bid Bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check the difference (not exceeding the amount of the certified check) between the amount of the Proposal and such larger amount for which the Owner may in good faith contract with another party to construct the Project. The term "successful Bidder" shall be deemed to include any Bidder whose proposal is accepted after another Bidder has previously refused or has been unable to execute the counterparts of the proposal or to furnish a satisfactory Contractor's Bond (where required.)

10. Factors in Deciding the Award of the Contract. In estimating the lowest cost to the Owner as one of the factors in deciding the award of the Contract, the Owner will consider, in addition to the prices quoted in the Proposals, the following: _____.

11. Contract is Entire Agreement. The Contract to be effected by the acceptance of the Proposal shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modifica-

tion thereof resulting from any representation or promise made at any time by any officer, agent or employee of the Owner or by any other person.

12. Minor Irregularities. The Owner reserves the right to waive minor irregularities or minor errors in any Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal prior to the acceptance thereof by the Owner.

13. Bid Rejection. The Owner reserves the right to reject any or all Proposals.

14. Definition of Terms. The terms "Administrator", "Engineer", "Supervisor", "Project", "Completion of Construction" and "Completion of the Project," as used throughout this Contract, shall be as defined in Article VI, Section 1 of the Contractor's Proposal.

15. The Owner Represents:

(a) If by provisions of the Contractor's Proposal the Owner shall have undertaken to furnish any materials for the construction of the Project, such materials are on hand at locations specified or if such materials are not on hand they will be made available to the successful Bidder at the locations specified before the time such materials are required for construction.

(b) All funds necessary for prompt payment for the construction of the Project will be available. If the Owner shall fail to comply with any of the undertakings contained in the foregoing representations or if any of such representations shall be incorrect, the Bidder will be entitled to an extension of time of completion for a period equal to the delay, if any, caused by the failure of the Owner to comply with such undertakings or by any such incorrect representations, provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion, and provided, further, that such extension, if any, of the time of the completion shall be the sole remedy of the Bidder for the Owner's failure, because of conditions beyond the control and without the fault of the Owner, to furnish materials in accordance with subparagraph a, hereof.

_____, Owner

By _____

_____, 19____

Contractor's Proposal

To Furnish, Deliver and Install Equipment and Materials

To: _____ (hereinafter called the "Owner")

Article I—General

Section 1. Offer to Furnish, Deliver and Install. The undersigned (hereinafter called the "Bidder") hereby proposes to furnish, deliver

Rural Utilities Service, USDA

§1726.320

and install the materials, supplies and equipment (hereinafter called the "Project") described in the plans, specifications and drawings (hereinafter called the "Specifications") attached hereto and made a part hereof, financed in part or whole by a loan to the Owner by the United States of America, acting through the Administrator of the Rural Utilities Service (hereinafter called the "Administrator") and designated _____.

Section 2. Familiarity with Conditions. The Bidder has made a careful examination of the site of the Project and of the Plans and Specifications, Construction Drawings, and form of Contractor's Bond attached hereto, and has become informed as to the location and nature of the proposed construction, the transportation facilities and the kind of facilities required before and during the construction of the Project, and has become acquainted with the labor conditions, the ecological and environmental criteria to be followed, state and local laws and regulations which would affect work on the proposed construction.

Section 3. License. The Bidder warrants that a Contractor's License is _____, is not _____, required, and if required, it possesses Contractor's License No. _____ of the State of _____, in which the Project is located and said license expires on _____, 19____.

Section 4. The Bidder warrants that this Proposal is made in good faith and without collusion or connection with any person or persons bidding for the same work.

Section 5. The Bidder warrants that it possesses adequate financial resources and agrees that in the event this Proposal is accepted and a Contractor's Bond is required, it will furnish a Contractor's Bond in the form attached hereto, in a penal sum not less than the maximum Contract Price, with a surety or sureties listed by the United States Treasury Department as Acceptable Sureties.

In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contract or on any bond or bonds delivered in substitution thereof or in addition thereto shall at any time become unsatisfactory to the Owner or the Administrator, the Bidder agrees to deliver to the Owner another or an additional bond.

The Bidder understands, that, if in submitting this Proposal, the Bidder has made any change in the form of Proposal furnished by the Owner, that the Owner and the Administrator may evaluate the effect of such change as they see fit or they may exclude the Proposal from consideration in determining the award of the contract.

Article II—Construction

Section 1. Bid Price. The Bidder will construct the Project for the following sum:

Base Bid _____ Dollars (\$_____)
Alternate No. 1 _____ Dollars (\$_____)
Alternate No. 2 _____ Dollars (\$_____)

Section 2. Taxes. The price quoted herein includes all amounts which the Bidder estimates will be payable by the Bidder or the Owner on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies or equipment or services or labor of installation to be incorporated in the Project. The Bidder will pay all such taxes and will furnish to appropriate taxing authorities any required information and reports pertaining thereto.

Section 3. Time and Manner of Construction.

(a) The time of Completion of Construction of the Project is of the essence of this Contract. The Bidder will commence the work within _____ calendar days after the Owner shall have given the Bidder written notice to commence construction, will prosecute diligently and complete such construction to the satisfaction of the Owner and the Administrator within _____ calendar days after giving of such notice.

(b) The time of Completion of Construction shall be extended for the period of any reasonable delay due exclusively to causes beyond the control and without fault of the Bidder, including Acts of God, fires, strikes, floods, inability to obtain materials, changes in the Specifications as herein provided and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided, however, that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefor in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

(c) In the sequence of construction, the Owner, acting through the Engineer, shall have the right to direct the Bidder to perform any part or parts of the work which is to be performed at the site of the Project before any other part or parts, of such work and the Bidder agrees to comply with all such directions. The Bidder shall comply with all other reasonable directions of the Owner.

(d) The Owner, acting through the Engineer, may from time to time during the progress of the construction of the Project make such changes, additions to or subtractions from the Plans and Specifications and sequence of construction provided for in the previous paragraph which are part of the Contractor's Proposal as conditions may warrant: Provided, however, that if any

change in the construction to be done shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefor to the Owner within ten (10) days after any such change is made. If the cost of the Project to the Bidder to make the change shall be increased or decreased, the contract price shall be amended by an amount equal to the reasonable cost hereof in accordance with a construction amendment signed by the Owner and the Bidder and approved by the Administrator¹, but no claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition. The reasonable cost of any increase or decrease in the contract price covered by contract amendment as outlined above, in the absence of other mutual agreement, shall be computed on the basis of the direct cost of materials, f.o.b. the site of the Project, plus the direct cost of labor necessary to incorporate such materials into the Project (including actual cost of payroll taxes and insurance), plus ____ percent of the direct cost of materials and labor. Labor costs shall be limited to the direct costs for workmen and foremen. Costs for profit and overhead for subcontractors, if any, Bidder's main office overhead, job office overhead and superintendence shall not be included.

Section 4. The Bidder agrees that in the event this Proposal is accepted it will make available for use in connection with the proposed construction all necessary tools and equipment and qualified superintendents and foremen.

Section 5. Supervision and Inspection.

a. The Bidder will give sufficient supervision to the work, using its best skill and attention. The Bidder will carefully study and compare all drawings, specifications and other instructions and will at once report to the Owner any error, inconsistency or omission which it may discover. The Bidder shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the "Superintendent") who shall be present at all times during working hours where con-

struction is being carried on. The Bidder shall also employ, in connection with the construction of the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Bidder.

b. The Owner reserves the right to require the removal from the Project of any employee of the Bidder if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner or the Supervisor, if any, shall have the right to require the Bidder to increase the number of its employees and to increase or change the amount or kinds of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner or Supervisor; but the failure of the Owner or Supervisor to give any such directions shall not relieve the Bidder of its obligations to complete the work within the time and in the manner specified in this Proposal.

c. The manner of construction of the Project, and all materials and equipment used therein, shall be subject to the inspection, tests and approval of the Owner and the Administrator, and the Bidder shall furnish all information required by the Owner or by the Administrator concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner and the Administrator shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Bidder and of any subcontractor, relevant to the construction of the Project. The Bidder shall provide all reasonable facilities necessary for such inspection and tests and shall maintain an office at the site of the Project, with telephone service where obtainable and at least one office employee to whom directions and instructions of the Owner may be delivered. Delivery of such directions or instructions in writing to the employee of the Bidder at such office shall constitute delivery to the Bidder. The Bidder shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the Owner, when any other inspection is made.

d. In the event that the Owner through its Engineer, or the Administrator, shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Bidder and the Bidder's Surety or Sureties, if any, to have an inspection made by an engineer approved by the Owner and the Administrator for the purpose of determining the exact nature, extent and location of such defects.

e. The Engineer may recommend to the Owner that the Bidder suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions

¹As long as the total price of this contract including all amendments is less than 120 percent of the original contract price as stated in the acceptance hereto, amendments executed on RUS Form 238 are not subject to the approval of the Administrator. Whenever an amendment to this contract causes the total amended contract to exceed 120 percent of the original contract price, that amendment and all subsequent amendments to this contract shall be made subject to the approval of the Administrator.

Rural Utilities Service, USDA

§ 1726.320

as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Bidder to comply with any of the provisions of the Contract: Provided, however, that the Bidder shall not suspend work pursuant to this provision without written authority from the Owner to do so. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Bidder to comply with any of the provisions of this Contract. In the event that work is suspended by the Bidder with the consent of the Owner, the Bidder before resuming work shall give the Owner at least twenty-four (24) hours notice thereof in writing.

Section 6. Defective Materials and Workmanship.

a. The acceptance of any materials, equipment or any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such materials, equipment, or workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, including the installation and removal thereof, by and at the expense of the Bidder. Any such condemned material or equipment shall be immediately removed from the site of the Project by the Bidder at the Bidder's expense. The Bidder shall not be entitled to any payment hereunder so long as any defective materials, equipment, or workmanship in respect to the Project, of which the Bidder shall have had notice, shall not have been replaced or remedied, as the case may be.

b. Notwithstanding the acceptance of workmanship, materials, supplies or equipment, or the giving of any certificate with respect to the completion of the work, if during the construction or within one year after such completion, or within such longer period as the Project or any part thereof may be guaranteed by other provisions of the Contract or the Specifications, the workmanship, materials, supplies or equipment shall be found to be defective or not in conformity with the requirements of the Specifications, the Bidder shall replace such defective materials or equipment or remedy any such defective workmanship within thirty (30) days after notice of the existence thereof shall have been given to the Bidder by the Owner. In event of failure by the Bidder to do so, the Owner may replace such defective materials or equipment or remedy such defective workmanship, as the case may be, and in such event the Bidder shall pay to the Owner the cost and expense thereof.

Article III—Payments and Release of Liens

Section 1. Payments to Bidder.

a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Bidder for construction accomplished during the preceding calendar month on the basis of estimates thereof certified to by the Bidder, and approved by the Engineer and by the Owner solely for the purpose of payment: Provided, however, that such approval shall not be deemed approval of the workmanship or materials; and provided further, that in estimating the amount of construction accomplished, consideration shall be given only to equipment and materials incorporated into the Project and equipment and materials delivered to the site in accordance with approved shipping schedule. Only ninety percent (90%) of each such estimate approved during the construction of the Project shall be paid by the Owner to the Bidder prior to Completion of the Project. Upon completion by the Bidder of the construction of the Project, the Engineer shall inspect the work performed hereunder and if he shall find the work acceptable and all provisions hereunder fully performed, he shall so certify to the Owner and shall certify the balance found to be due the Bidder.

The Certificate of Completion, Contract Construction, RUS Form 187, a copy of which is attached hereto, after it has been signed by the Engineer and certified to by the Owner and the Bidder shall thereupon be submitted to the Administrator for his approval and when such approval has been given, the Owner shall make payment to the Bidder of all unpaid amounts to which the Bidder shall be entitled hereunder unless withheld because of the fault of the Bidder.

b. Interest at the rate of ____ percent² (____%) per annum shall be paid by the Owner to the Bidder on all unpaid balances due the Bidder commencing fifteen (15) days after the due date: Provided that the delay in payment beyond the due date is not caused by any condition within the control of the Bidder. The due date for purposes of such monthly payment shall be the fifteenth day of each calendar month provided (1) the Bidder on or before the fifth day of such month shall have submitted its certification of construction completed during the preceding month, and (2) the Owner on or before the fifteenth day of such month shall have approved such certification. If, for any reasons not due to the Bidder's fault, such approval shall not have been given on or before the fifteenth day of such month, the due date for purposes of this subsection "b" shall be

²The Owner shall insert a rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued.

the fifteenth day of such month notwithstanding the absence of the approval of the certification.

c. No payments shall be due while the Bidder is in default in respect of any of the provisions of this Proposal and the Owner may withhold from the Bidder the amount of any claim by a third party against either the Bidder or the Owner based upon an alleged failure of the Bidder to perform the work hereunder in accordance with the provisions of this Proposal.

Section 2. Release of Liens and Certificate of Contractor. (See Sample RUS Form 224, Waiver and Release of Lien, and sample RUS Form 231, Certificate of Contractor.) Upon the completion by the Bidder of the construction of the Project but prior to the payment to the Bidder of any amount in excess of ninety percent (90%) of the total cost of construction, the Bidder shall deliver to the Owner, in duplicate, releases of all liens and of rights to claim any lien, in the form attached hereto, from all manufacturers, materialmen, and subcontractors furnishing services or materials for the Project and a certificate in the form attached hereto to the effect that all labor used on or for the project has been paid and that all such releases have been submitted to the Owner for approval.

Section 3. Payments to Materialmen and Subcontractors. The Bidder shall pay each materialman, and each subcontractor, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Bidder for and on account of materials furnished or construction performed by each materialman or each subcontractor.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property. The Bidder shall at all times exercise reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State and Municipal safety laws and building and construction codes. All machinery and equipment and other physical hazards shall be guarded in accordance with the “Manual of Accident Prevention in Construction” of the Associated General Contractors of America, unless such instructions are incompatible with Federal, State or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

(a) The Bidder shall at all times keep the premises free from accumulations of waste materials or rubbish caused by his employees or work, and at the completion of the work he shall remove all rubbish from and about the Project and all his tools, scaffolding and surplus materials and shall leave his work “broom clean”. The Bidder shall dispose of waste material by burying it on the work

site or in a manner approved by local authorities, but shall not dispose of any waste materials or rubbish by open burning. The Bidder shall provide chemical sanitary facilities which may be required in compliance with applicable local, State and Federal laws or regulations.

(b) The Bidder will perform the work in such a manner as to maximize preservation of aesthetics and conservation of natural resources, and minimize marring and scarring of the landscape, erosion of soils and oil spillage. There will be no depositing of trash in streams or waterways. Herbicides, other chemicals or their containers will not be deposited in or near streams or waterways.

(c) The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control, in whole or in part as hereinafter provided, shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection therewith and the materials, supplies and equipment to be used therein shall be borne by the Bidder, except risk of loss or of damage to materials or equipment furnished for or used in connection with the Project by the Owner, Bidder or any subcontractor, caused by fire, lightning, wind damage, explosion, riot or civil commotion, aircraft and other vehicles, and smoke damage (against which perils the Owner will maintain insurance, hereinafter called “Builder’s Risk Insurance”). The Bidder will make good and fully repair all injuries and damages to the Project, or any portion thereof under the control of the Bidder by reason of any act of God, or any other casualty or cause whether or not the same shall have occurred by reason of the Bidder’s negligence, except damage covered by the Owner’s Builder’s Risk Insurance.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner’s directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney’s fees) for personal loss, injury, or death to persons (including but not limited to Bidder’s employees) and loss, damage to or destruction of Owner’s property or the property of any other person or entity (including but not limited to Bidder’s property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner’s directors, officers, and employees from all liens and claims

filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Bidder, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Bidder.

(iii) Bidder shall provide to Owner's satisfaction evidence of Bidder's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

(d) The Bidder shall submit to the Owner monthly reports in duplicate of all accidents giving such data as may be prescribed by the Engineer.

(e) Upon violation by the Bidder of any of the provisions of this section, after written notice of such violation given to the Bidder by the Engineer or the Owner, the Bidder shall immediately correct such violation. Upon failure of the Bidder so to do the Owner may correct such violation at the Bidder's expense; Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder's expense without such prior notice to the Bidder.

Section 2. Insurance. The Bidder shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage of not less than \$1 million each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required in-

surance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than \$1 million per person and \$1 million per occurrence, and property damage limits of \$1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsections "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Assignment of Guarantees. All guarantees of materials and workmanship running in favor of the Bidder shall be transferred and assigned to the Owner prior to the time the Bidder receives final payment.

Section 4. Delivery of Possession and Control to Owner. Upon written request of the Owner, the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risks and obligations of the Bidder as set forth in Article IV, Section 1 c hereof with respect to such portion so delivered to the Owner shall be terminated; Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials and workmanship as contained in Article II, Section 6 hereof.

Article V—Remedies

Section 1. Completion on Bidder's Default. If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the Surety or Sureties, if any, upon the Contractor's Bond

or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Bidder such default shall be corrected or arrangements for the correction thereof satisfactory to both the Owner and the Administrator shall be made by the Bidder or its Surety or Sureties, if any, the Owner may take over the construction of the Project and prosecute the same to completion by Contract or otherwise for the account and at the expense of the Bidder, and the Bidder and its Surety or Sureties, if any, shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and plant belonging to the Bidder or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Bidder may have against third parties in connection with this Contract and for such purpose the Bidder does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

Section 2. Enforcement of Remedies by Administrator. The Administrator may on behalf of the Owner exercise any right or enforce any remedy which the Owner may exercise hereunder.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner or the Administrator shall be cumulative and shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election.

Article VI—Miscellaneous

Section 1. Definitions.

a. The term “Administrator” shall mean the Administrator of the Rural Utilities Service of the United States of America and his duly authorized representatives or any other person in whom or authority in which may be vested the duties and functions which the Administrator is now authorized by law to perform.

b. The term “Engineer” shall mean the engineer employed by the Owner, with the approval of the Administrator, to provide engineering services for the Project, and said Engineer’s duly authorized assistants and representatives.

c. The term “Supervisor” shall mean the person, if any, appointed by the Administrator as the representative of the Government under the provisions of the Loan Contract providing for such appointment in special cases. The term is limited to such special representative of the Government, if

any, who is responsible exclusively to the Administrator and does not refer to the Manager or any other person employed by the Owner and responsible to it.

d. The term “Completion of Construction” shall mean full performance by the Bidder of the Bidder’s obligations under the Contract and all amendments and revisions thereof except the Bidder’s obligations in respect of Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof. The term “Completion of the Project” shall mean full performance by the Bidder of the Bidder’s obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion, signed by the Engineer and approved in writing by the Owner and the Administrator, shall be the sole and conclusive evidence as to the date of Completion of Construction and as to the fact of Completion of the Project.

Section 2. Purchase of Materials. The Bidder shall purchase all materials, supplies, and equipment outright and not subject to any conditional sales agreements, bailment lease or other agreement reserving unto the seller any right, title or interest therein. All materials, supplies and equipment shall be new and shall become the property of the Owner when erected in place, or when the Owner shall have made any payment to the Bidder in respect of such materials; whichever shall occur first.

Section 3. Materials and Supplies. In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Bidder agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

Section 4. Patent Infringement. The Bidder shall save harmless and indemnify the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 5. Compliance with Statutes and Regulations. The Bidder shall comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Bidder acknowledges that it is familiar with the

Rural Utilities Service, USDA

§ 1726.320

Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. Section 287 and 1001, as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental Agencies having jurisdiction in the premises.

Section 6. Equal Opportunity Provisions.

(a) Bidder's Representations.

The Bidder represents that:

It has _____, does not have _____, 100 or more employees, and if it has, that it has _____, has not _____ furnished the Equal Employment Opportunity-Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Bidder agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

The Bidder agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than \$10,000, the Bidder will file such report, as required by law, and notify the owner in writing of such filing prior to the Owner's acceptance of this Proposal.

(b) Equal Opportunity Clause. During the performance of this Contract, the Bidder agrees as follows:

(1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotions or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection of training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Bidder will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a

notice to be provided advising the said labor union or workers' representative of the Bidder's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Bidder's noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be canceled, terminated, or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Bidder will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance; Provided, however, that in the event Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

(c) Certificate of Nonsegregated Facilities. The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform

§ 1726.321

their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 7. Nonassignment of Contract. Except as provided in Section 8 of this Article, the Bidder will not assign this Contract, or any interest in any funds that may become due hereunder, or enter into any contract with any person, firm or corporation, for the performance of the Bidder's obligations hereunder, or any part hereof without the approval in writing of the Owner, the Surety or Sureties, if any, and the Administrator.

Section 8. Subcontracts. The Bidder shall not enter into any subcontract or subcontracts with any person, firm or corporation for the performance of the Bidder's obligation hereunder in any aggregate amount in excess of 40% of The Bidder's obligations (to be calculated on the basis of the total contract price) nor shall the Bidder enter into any subcontract in excess of \$20,000, without the approval in writing of the Owner and of the Surety or Sureties, if any, on any bond furnished by the Bidder for the faithful performance of the Bidder's obligations hereunder. If the Bidder shall enter into a subcontract with any subcontractor for the performance of any part of this Contract, the Bidder shall be as fully responsible to the Owner and the Administrator for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it.

Section 9. Contractor. Upon acceptance of this Proposal, the successful Bidder shall be the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

Section 10. Approval of the Administrator. The acceptance of this Proposal by the Owner shall not create a contract unless

7 CFR Ch. XVII (1-1-97 Edition)

such acceptance shall be approved in writing by the Administrator within sixty (60) days after the date set for the opening of proposals.

[End of clause]

§ 1726.321 Right-of-way clearing contract, RUS Form 201.

The contract form in this section shall be used when required by this part. This form refers to guide drawings, which do not contain requirements, and, hence, are not included in this part. The guide drawings are included in the printed form available from RUS (see § 1726.300.).

RIGHT-OF-WAY CLEARING CONTRACT

Contractor's Proposal

(Proposal shall be submitted in ink or type-written)

To: _____ (Hereinafter called the "Owner")

Article I—General

Section 1. Offer to Clear. The undersigned (hereinafter called the "Contractor") hereby proposes to furnish all materials, equipment, machinery, tools, labor, transportation and other means required to clear rights-of-way for the rural electric system bearing the RUS Designation _____ in strict accordance with the Specifications and Drawings

Rural Utilities Service, USDA

§ 1726.321

therefor, attached hereto and made a part hereof, for the prices hereinafter stated.

Section 2. Description of Project. The Project will consist of approximately _____ miles of right-of-way clearing. The Project is located in _____ counties in the State of _____.

Section 3. Description of Contract. The Description of Units, Specifications, Drawings and Plans attached hereto and made a part hereof, together with the Proposal and Acceptance constitute the Contract. The Plans consisting of maps and plan and profile sheets if transmission clearing is included, showing the number and types of right-of-way units that are to be cleared, along with other special drawings are identified as follows:

Section 4. Familiarity with Conditions. The Contractor warrants that it has made careful examination of the site of the Project and of the Specifications, Drawings, and form of Contractors' Bond attached hereto, and has become informed as to the location and nature of the proposed work, the transportation facilities, the kind and character of soil and terrain to be encountered, and the kind of facilities required for undertaking and completing the Project, and has become acquainted with the labor conditions, state and local laws and regulations which would affect the proposed work.

Section 5. License. The Contractor warrants that a Contractor's License is _____, is not _____, required, and if required, it possesses Contractor's license number _____ for the State of _____ in which the Project is located and said license expires on _____, 19____.

Section 6. Contractor's Bond. If the estimated cost of the clearing of a Section shall exceed \$100,000, the Contractor agrees to furnish, prior to the commencement of work on such Section, a bond in the penal sum of not less than the estimated cost of the Section in the form attached hereto with a Surety or Sureties listed by the United States Treasury Department as acceptable sureties. In the event that the Surety or Sureties on the performance bond delivered to the Owner shall at any time become unsatisfactory to the Owner, the Contractor agrees to deliver to the Owner another or an additional bond.

Section 7. Taxes. The unit prices for Right-of-Way Clearing Units in this Proposal include any sums which are or may be payable by the Contractor on account of taxes imposed by any taxing authority on payments for materials furnished or services performed by the Contractor under the terms of this Contract.

Article II—Construction

Section 1. Time and Manner of Work.

(a) The Contractor agrees to commence work on the Project on a date (hereinafter called the "Commencement Date") which

shall be determined by the Owner after its acceptance of this Proposal, but in no event will the Commencement Date be later than _____ calendar days after date of acceptance of this Proposal. The Contractor further agrees to prosecute diligently and to complete clearing in strict accordance with the Specifications and Drawings within _____ (____) calendar days (excluding Sundays) after Commencement Date.

(b) The time for Completion of Clearing shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Contractor, including acts of God, fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided, however, that no such extension of time for completion shall be granted the Contractor unless within ten (10) days after the happening of any event relied upon by the Contractor for such an extension of time the Contractor shall have made a request therefor in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

(c) The sequence of construction shall be as set forth below, the numbers or names being the designations of extensions or areas (hereinafter called the "Sections") corresponding to the numbers or names shown on the maps attached hereto, or if no Sections are set forth below, the sequence of construction shall be as determined by the Contractor subject to the approval of the Owner.

(d) The Owner may from time to time during the progress of the work on the Project make such changes in, additions to or subtractions from the Specifications, Drawings and sequence of work provided for in the previous paragraph which are part of the Contractor's Proposal as conditions may warrant: Provided, however, that if any change in the work to be done shall require an extension of time, a reasonable extension will be granted if the Contractor shall make a written request therefor to the Owner within ten (10) days after any such change is made. And provided further, that if the cost to the Contractor of completion of the Project shall be materially increased by any such change or addition, the Owner shall pay the Contractor for the reasonable cost thereof in accordance with a Contract Amendment signed by the Owner and the Contractor, but no claim for additional compensation for any such change or addition will be considered unless the Contractor shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition.

(e) The Contractor will not perform any work hereunder on Sundays unless there is urgent need for such Sunday work and the Owner consents thereto in writing. The time for completion specified in subsection (a) of this Section 1 shall not be affected in any way by inclusion of this subsection by the Owner's consent or lack of consent to Sunday work hereunder.

Section 2. Environmental Protection. The Contractor shall perform work in such a manner as to maximize preservation of beauty, conservation of natural resources, and minimize marring and scarring of the landscape and silting of streams. The Contractor shall not deposit trash in streams or waterways, and shall not deposit herbicides or other chemicals or their containers in or near streams, waterways or pastures. The Contractor shall follow, under the general direction of the Engineer, the criteria relating to environmental protection as specified herein by the Engineer.

Section 3. Supervision and Inspection.

(a) The Contractor shall cause the work on the Project to receive constant supervision by a competent superintendent (hereinafter called the "Superintendent") who shall be present at all times during working hours where work is being carried on. The Contractor shall also employ in connection with the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Contractor.

(b) The Owner reserves the right to require the removal from the Project of any employee of the Contractor if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner shall have the right to require the Contractor to increase the number of its employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner; but the failure of the Owner to give any such directions shall not relieve the Contractor of its obligations to complete the work within the time and in the manner specified in this Proposal.

(c) The manner of performance of the work, and all equipment used therein, shall be subject to the inspection and approval of the Owner. The Owner shall have the right to inspect all payrolls and other data and records of the Contractor relevant to the work. The Contractor will provide all reasonable facilities necessary for such inspection. The Contractor shall have an authorized agent accompany the inspector when final inspection is made and, if requested by the Owner, when any other inspection is made.

(d) In the event that the Owner shall determine that the work contains or may contain numerous defects, it shall be the duty of the

Contractor and the Contractor's Surety or Sureties to have an inspection made by an engineer approved by the Owner for the purpose of determining the exact nature, extent and location of such defects.

(e) The Engineer may recommend to the Owner that the Contractor suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Contractor to comply with any of the provisions of the Contract: Provided, however, that the Contractor shall not suspend work pursuant to this provision without written authority from the Owner so to do. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Contractor to comply with any of the provisions of this Contract. In the event that work is suspended by the Contractor with the consent of the Owner, the Contractor before resuming work shall give the Owner at least twenty-four (24) hours' notice thereof in writing.

Section 4. Unsuitable Workmanship. The acceptance of any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such workmanship shall be found to be unsuitable. Workmanship found unsuitable before final acceptance of the work shall be remedied, by and at the expense of the Contractor. The Contractor shall not be entitled to any payment hereunder so long as any unsuitable workmanship in respect to the Project, of which the Contractor shall have had notice, shall not have been remedied.

Article III—Payment

Section 1. Payments to Contractor.

(a) Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Contractor for work accomplished during the preceding calendar month on the basis of a statement of completed clearing units furnished and certified to by the Contractor and approved by the Owner solely for the purposes of payment: Provided, however, that such approval by the Owner shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such statement approved during the clearing of a Section shall be paid by the Owner to the Contractor prior to completion of the Section. Upon completion by the Contractor of the clearing of a Section, the Contractor shall prepare a Final Inventory of the Section showing the total number and character of clearing units and shall deliver to the Owner a Certificate of Contractor and Indemnity Agreement in the form attached hereto, showing the total cost of the work performed and stating (1) that

Rural Utilities Service, USDA

§1726.321

all persons who have furnished labor in connection with the Project and subcontractors who have furnished services for the Project have been paid in full and (2) that the Contractor shall hold the Owner harmless against any liens arising out of the Contractor's performance hereunder which may have been or may be filed against the Owner. Upon the approval of such certificate, the Owner shall make payment to the Contractor of all amounts to which the Contractor shall be entitled thereunder which shall not have been paid.

(b) The Contractor shall be paid on the basis of the number of clearing units actually completed at the direction of the Owner shown by the Final Inventory: Provided, however, that the total cost shall not exceed the total contract price for the Project as set forth in the Acceptance, unless such excess shall have been approved in writing by the Owner.

(c) No payment shall be due while the Contractor is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Contractor the amount of any claim by a third party against either the Contractor or the Owner based upon an alleged failure of the Contractor to perform the work hereunder in accordance with the provisions of the Contract.

(d) If no Sections are designated in Article II, Section 1 (c) the term "Section" shall mean for purposes of this subsection (a) and Article IV, Section 3 (b) only, a part of the Project as designated by the Owner which represents at least twenty-five percent (25%) of the total contract price as stated in the Acceptance.

(e) Interest at the rate of ____ percent¹ (____%) per annum shall be paid by the Owner to the Contractor on all unpaid balances due on monthly statements, commencing fifteen (15) days after the due date; provided the delay in payment beyond the due date is not caused by any condition within the control of the Contractor. The due date for purposes of such monthly payment shall be the fifteenth day of each calendar month provided (1) the Contractor on or before the fifth day of such month shall have submitted its certification of right-of-way clearing units completed during the preceding month and (2) the Owner on or before the fifteenth day of such month shall have approved such certification. If for reasons not due to the Contractor's fault, such approval shall not have been given on or before the fifteenth day of such month, the due date for purposes of this subsection (e) shall be the fifteenth

day of such month notwithstanding the absence of the approval of the certification.

(f) Interest at the rate of ____ percent² (____%) per annum shall be paid by the Owner to the Contractor on the final payment for the Project or any completed Section thereof, commencing fifteen (15) days after the due date. The due date for purposes of such final payment shall be the date of approval by the Owner of the Final Inventory and receipt of the Certificate of Contractor and Indemnity Agreement as conditions precedent to the making of final payment.

Section 2. Payments to Subcontractors. The Contractor shall pay each subcontractor, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Contractor for and on account of services performed by each subcontractor.

Article IV—Particular Undertakings of the Contractor

Section 1. Protection to Persons and Property. The Contractor shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, state, and municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America unless such instructions are incompatible with Federal, state, or municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

(a) The Contractor shall so conduct work on the Project as to cause the least possible obstruction of public highways.

(b) The Contractor shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances, and regulations or by local conditions.

(c) The Contractor shall do all things necessary or expedient to properly protect any and all parallel, converging, and intersecting lines, joint line poles, highways, and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways, or other property are damaged in the course of work on the Project the Contractor shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

(d) Where the right-of-way of the Project traverses cultivated lands, the Contractor shall limit the movement of his crews and equipment so as to cause as little damage as

¹The Owner shall insert a rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued.

²See Footnote 1.

possible to crops, orchards, or property and shall endeavor to avoid marring the lands. All fences which are necessarily opened or moved during work on the project shall be replaced in as good condition as they were found and precautions shall be taken to prevent the escape of livestock. The Contractor shall not be responsible for loss of or damage to crops, orchards, or property (other than livestock) on the right-of-way necessarily incident to work on the Project and not caused by negligence or inefficient operation of the Contractor. The Contractor shall be responsible for all other loss of or damage to crops, orchards, or property, whether on or off the right-of-way, and for all loss of or damage to livestock caused by work on the Project. The right-of-way for purposes of this said section shall consist of an area extending ____ feet on both sides of the center line of the poles along the route of the Project lines, plus such area reasonably required by the Contractor for access to the route of the Project lines from public roads to carry on the work.

(e) The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided, shall be under the charge and control of the Contractor and during such period of control by the Contractor all risks in connection with the work on the Project and the materials to be used therein shall be borne by the Contractor. The Contractor shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Contractor by reason of an act of God or other casualty or cause whether or not the same shall have occurred by reason of the Contractor's negligence.

(i) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Contractor's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Contractor's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Contractor, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Contractor liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's

property or facilities, for services performed or materials or equipment furnished by Contractor, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Contractor shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Contractor does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Contractor.

(iii) Contractor shall provide to Owner's satisfaction evidence of Contractor's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

(f) Any and all excess earth, rock, debris, underbrush, and other useless material shall be removed by the Contractor from the site of the Project as rapidly as practicable as the work progresses. The Contractor shall not deposit trash in streams or waterways, and shall not deposit herbicides or other chemicals or their containers in or near streams, waterways or pastures.

(g) Upon violation by the Contractor of any provisions of this section, after written notice of such violation given to the Contractor by the Owner, the Contractor shall immediately correct such violation. Upon failure of the Contractor so to do the Owner may correct such violation at the Contractor's expense.

(h) The Contractor shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

(i) The Contractor shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the Owner that proper authorization has been received from the owner of the property and the Contractor shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on his land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

Section 2. Insurance. The Contractor shall take out and maintain throughout the period of this Agreement the following minimum amounts of insurance:

(a) Worker's compensation and employer's liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to workers'

compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage of not less than \$1 million each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than \$1 million per person and \$1 million each occurrence, and property damage limits of \$1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Delivery of Possession and Control to the Owner.

(a) Upon written request of the Owner, the Contractor shall deliver to the Owner full possession and control of any portion of the Project provided the Contractor shall have been paid at least ninety percent (90%) of the cost of the work of such portion. Upon such delivery of possession and control to the Owner, the risks and obligations of the Contractor as set forth in Section 1(e) of this Article IV with respect to such portion so delivered to the Owner, shall be terminated: Provided, however, that nothing herein contained shall relieve the Contractor of any liability with respect to unsuitable workmanship as specified in Article II, Section 4.

(b) Where the construction of a Section as hereinbefore defined in Article II, Section 1 (c) and Article III, Section 1 (d) shall have been completed by the Contractor, the Owner agrees, after receipt of a written request from the Contractor, to accept delivery of possession and control of such Section upon having inspected the Section and having found the work acceptable. Upon such delivery of the possession and control of any such Section to the Owner, the risk and obligations of the Contractor as set forth in Article IV, Section 1 (e) hereof with respect to such Section so delivered to the Owner shall be terminated: Provided, however, that nothing herein contained shall relieve the Contractor of any liability with respect to unsuitable workmanship as specified in Article II, Section 4 hereof.

Section 4. Assignment of Guarantees. All guarantees of materials and workmanship running in favor of the Contractor shall be transferred and assigned to the Owner prior to the time the Contractor receives final payment for any Section.

Article V—Remedies

Section 1. Completion on Contractor's Default. If default shall be made by the Contractor or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Contractor and the Surety, if any, a written notice requiring the Contractor to cause such default to be corrected forthwith.

Unless within twenty (20) days after the service of such notice upon the Contractor and the Surety, if any, such default shall be corrected or arrangements for the correction thereof satisfactory to the Owner shall be made, the Owner may take over the work on the Project and prosecute the same to completion by contract or otherwise for the account and at the expense of the Contractor, and the Contractor shall be liable to the Owner for any cost or expense in excess of the contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the Project, any materials, tools, supplies, equipment, appliance, and plant belonging to the Contractor or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims, or demands which the Contractor may have against third persons in connection with this Proposal and for such purpose the Contractor does hereby assign, transfer, and set over unto the Owner all such rights, claims, and demands.

Section 2. Liquidated Damages. The time of the Completion of Clearing is of the essence of the Contract. Should the Contractor neglect, refuse or fail to complete the clearing within the time herein agreed upon, after

giving effect to extensions of time, if any, herein provided, then, in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall have the right to deduct from and retain out of such monies which may be then due, or which may become due and payable to the Contractor the sum of ____ dollars (____) per day for each and every day that such work is delayed in its completion beyond the specified time, as liquidated damages and not as a penalty; if the amount due and to become due from the Owner to the Contractor is insufficient to pay in full any such liquidated damages, the Contractor shall pay to the Owner the amount necessary to effect such payment in full: Provided, however, that the Owner shall promptly notify the Contractor in writing of the manner in which the amount retained, deducted or claimed as liquidated damages was computed.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election: Provided, however, that the provision of Section 2 of this Article shall be the exclusive measure of damages for failure by the Contractor to complete the clearing within the time herein agreed upon.

Article VI—Miscellaneous

Section 1. Definitions.

(a) The term "Engineer" shall mean the engineer employed by the Owner to provide engineering services for the Project and said Engineer's duly authorized assistants and representatives. The term "Engineer" will mean "Owner" if no engineer is employed by the Owner to provide engineering services.

(b) The term "Completion of Clearing" shall mean full performance by the Contractor of the Contractor's obligations under the Contract and all amendments and revisions thereof except the Contractor's obligations in respect of furnishing (1) the "Certificate of Contractor and Indemnity Agreement" and (2) the Final Inventory both referred to in Article III, Section 1 hereof.

(c) The term "Completion" shall mean full performance by the Contractor of the Contractor's obligations under the Contract and all amendments and revisions thereof relating to any Section of the Project or to the Project.

Section 2. Patent Infringement. The Contractor shall save harmless and indemnify the owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 3. Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Contractor.

Section 4. Compliance with Statutes and Regulations. The Contractor will comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Contractor acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. §§286, 287, 1001, as amended. The Contractor understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of governmental agencies having jurisdiction in the premises.

Section 5. Equal Opportunity Provisions.

(a) Contractor's Representations.

The Contractor represents that:

It has __, does not have __, 100 or more employees, and if it has, that it has __, has not __, furnished the Equal Employment Opportunity—Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Contractor agrees that it will obtain, prior to the award of any subcontractor for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100. The Contractor agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than \$10,000, the Contractor will file such report, as required by law, and notify, the Owner in writing of such filing prior to the Owner's acceptance of this Proposal.

(b) Equal Opportunity Clause. During the performance of this Contract, the Contractor agrees as follows:

(1) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to

Rural Utilities Service, USDA

§1726.321

post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The Contractor will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or worker's representatives of the Contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations and orders.

(6) In the event of the Contractor's non-compliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations or orders, this Contract may be cancelled, terminated or suspended in whole or in part and the Contractor may be declared ineligible for further Government contracts or federally-assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in the said Executive Order or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.

(7) The Contractor will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by rules, regulations or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event a Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such

direction by the administering agency, the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

(c) Certificate of Nonsegregated Facilities. The Contractor certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Contractor certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Contractor agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Contractor agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 6. Franchises and Rights-of-way. The Contractor will be under no obligation to obtain or assist in obtaining any franchises, authorizations, permits, or approvals required to be obtained by the Owner from Federal, state, county, municipal or other authority; any rights-of-way over private lands; or any agreements between the Owner and third parties with respect to the construction and operation of the Project.

Section 7. Nonassignment of Contract. The Contractor shall not assign the Contract effected by an acceptance of this Proposal or any part thereof or enter into any contract with any person, firm or corporation for the performance of the Contractor's obligations thereunder, or any part thereof, without the approval in writing of the Owner.

Section 8. Extension to Successors and Assigns. Each and all of the covenants and agreements contained in the Contract effected by the acceptance of the Proposal shall extend to and be binding upon the successors and assigns of the parties thereto.

§ 1726.321

7 CFR Ch. XVII (1–1–97 Edition)

____ (Contractor)
By ____ (President)
____ (Address)
Attest: ____ (Secretary)
Date of Proposal ____

This Proposal must be signed with the full name of the Contractor. If the Contractor is a partnership, the Proposal must be signed in the partnership name by a partner. If the Contractor is a corporation, the Proposal must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

Description of Units

Right-of-Way Clearing Units:

R1–10. The unit is 1,000 feet in length and 10 feet in width (to be measured on one side of the pole line) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed ____ in height, shall be clear from the ground up of the width specified on one side of the line of poles carrying primary conductors. This unit does not include clearing or trimming associated with secondaries or services which is included with conductor units. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between stakes and across the maximum dimension of foliage cleared projected to the ground line. All trees and underbrush across the width of the right-of-way, as designated by the Engineer shall be considered to be grouped together as a single length in measuring the total length of clearing. Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All length thus arrived at, added together and divided by 1,000, shall give the number of 1,000-foot R1–10 units of clearing. This unit includes the removal or topping, at the option of the Contractor; of danger trees outside of the right-of-way when so designated by the Engineer. (Danger trees are defined as dead or leaning trees which, in falling, will affect the operation of the line.) The Contractor shall not remove or trim shade, fruit or ornamental trees unless so directed by the Engineer.

R1–20. This unit is identical with R1–10 except that width is 20 feet (to be measured 10 feet on each side of the pole line).

R1–30. This unit is identical with R1–10 except that width is 30 feet (to be measured 15 feet on each side of the pole line).

R1–40. This unit is identical with R1–10 except that width is 40 feet (to be measured 20 feet on each side of the pole line).

RC1–10, RC1–20, RC1–30, RC1–40. These units are identical to the respective R1 units except that chemical treatment of stumps is

required in addition to the clearing of underbrush, tree removal and tree trimming.

TM–12. The unit is 1,000 feet in length and ____ (____) feet in width (to be measured ____ (____) feet on one side of pole line or centerline of structures) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed ____ in height, shall be clear from the ground up on one side of the line poles carrying conductors. (See Detail A, Drawing TM–12–2A). The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM–12–2A). All trees and underbrush across the width of the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM–12–2A). Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All length thus arrived at, added together and divided by 1,000 shall give the number of TM–12 units of clearing. The Contractor shall not remove or trim shade, fruit or ornamental trees unless so directed by the Engineer in writing.

TM–12 (1). This unit is identical with TM–12, except the full width of the right-of-way to be cleared shall be ____ (____) feet wide (to be measured ____ (____) feet on each side of the pole line or centerline of structures) (See Detail D, Drawing TM–12–2A.)

TMC–12, TMC–12(1). These units are identical to the respective TM units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

TM–13. The unit, for purpose of quoting, is 1,000 feet in length of clearing off the right-of-way. The Engineer will select those trees of the right-of-way that he deems to be a hazard to the line and will designate them to the Contractor in writing as danger trees. When so designated, the Contractor shall remove or top such trees at his option except that the Contractor shall trim and not remove shade, fruit or ornamental trees unless otherwise directed by the Engineer in writing (See Drawings TM–12–2A and TM–13 for examples of danger trees).

The measurement of length of right-of-way to be cleared shall be considered as a straight line parallel to the horizontal line between poles or centerline of structures, such measurement of length to be based on maximum dimension of foliage (not trunk) projected to the ground line (See Details E, F, G, and H, Drawing TM–12–2A). Dead trees having no foliage shall be measured across the maximum dimension and multiplied by

Rural Utilities Service, USDA

§1726.321

two. (See Detail F, Drawing TM-12-2A). Each tree so removed shall be added together to determine the total length of clearing. All length thus arrived at, added together and divided by 1,000 shall give the number of TM-13 units (Example: Details E, F, G, and H, Drawing TM-12-2A, total .1 of a TM-13 unit).

TM-14. The unit is 1,000 feet in length and ____ (____) feet in width (to be measured ____ (____) feet on one side of right-of-way center line) of actual clearing of right-of-way. Trees and underbrush should be cleared from the ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide "undulating" boundaries. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the access road. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or center line of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM-12-2A). All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A). Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM-14 (1). This unit is identical with TM-14 except the full width of the right-of-way to be cleared shall be ____ (____) feet wide (See Detail D, Drawing TM-12-2A).

TM-15. The unit is 1,000 feet in length and ____ (____) feet in width (to be measured ____ (____) feet on one side of the right-of-way center line) of actual clearing of the right-of-way. Trees and underbrush should be cleared from ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide a "feathered" appearance in the right-of-way. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the access road.

The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or center line of structures and across the maximum dimension of foliage cleared projected to ground line. (See Detail B, Drawing TM-12-2A). All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A). Spaces along the right-of-way, in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM-15 (1). This unit is identical to TM-15 except the full width of the right-of-way to

be cleared shall be ____ (____) feet wide (See Detail D, Drawing TM-12-2A).

Additional Requirements. (When specifying units denote type of disposal A or B).

A. Trees, brush, branches and refuse shall, without delay be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used).

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (Describe)

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Engineer but in no case shall it be required to be less than ____ (____) feet. Brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used).

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (Describe)

Specifications

In preparing the right-of-way, trees shall be removed, underbrush cleared, and trees trimmed so that the right-of-way shall be clear from the ground up or as specified. Trees fronting each side of the right-of-way shall be trimmed symmetrically unless otherwise directed by the Engineer. Dead trees beyond the right-of-way which would strike the line in falling shall be removed. Leaning trees beyond the right-of-way which would strike the line in falling and which would require topping if not removed may be removed or topped at the direction of the Engineer.

Where RC or TMC units are specified, the right-of-way shall be cleared in accordance with the instructions in the preceding paragraph and in addition, all stumps one-half inch in diameter and larger shall be sprayed as specified by the Engineer.

§ 1726.322 Transmission system right-of-way clearing contract, RUS Form 203.

The contract form in this section shall be used when required by this part. This form refers to guide drawings, which do not contain requirements, and, hence, are not included in this part. The guide drawings are included in the printed form available from RUS (See § 1726.300.).

**TRANSMISSION SYSTEM RIGHT-OF-WAY
CLEARING CONTRACT**

Notice and Instructions to Bidders

1. Sealed proposals for the clearing of underbrush and trees from right-of-way, including the supply of necessary labor and equipment, of a rural electric system of _____ (hereinafter called the "Owner") bearing the RUS Designation _____ will be received by the Owner on or before _____ o'clock _____ M., _____ 19____, at its office at _____ at which time and place the proposals will be publicly opened and read. Any proposal received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. Description of Project. The Project will consist of approximately: _____ miles of right-of-way clearing. The Project is located in _____ Counties in the State of _____.

3. Obtaining Documents. All necessary forms and other documents for bidders may be obtained from the Owner, or from the Engineer _____ at the latter's office at _____. A copy of the Loan Contract (if the Project is to be financed in whole or in part, pursuant to a Loan Contract) between the Owner and the United States of America acting through the Administrator of the Rural Utilities

Service (hereinafter called the Administrator), and any other lender's contract may be examined at the office of the Owner. Each set of documents will have a serial number, given by the Engineer, and the number of each set with the name of the recipient will be recorded by the Engineer. Bids will be accepted only from the original recipient.

4. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations or interlineations will be permitted, unless made before submission, and initialed and dated.

5. Familiarity with Conditions. Prior to the submission of the Proposal the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Specifications, Drawings, and forms of Contractor's Proposal and Contractor's Bond on file with the Secretary of the Owner and with the Engineer, and shall become informed as to the location and nature of the proposed work, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors, and the so-called "Kick-back Statute" (48 Stat. 948) and regulations issued pursuant thereto.

6. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

7. The time for Completion of the Project shall be as specified by the Engineer in the Proposal.

8. Bid Bond. Each Proposal must be accompanied by a bid bond in the form attached or a certified check on a bank that is a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder agrees, provided its Proposal is one of the three low Proposals, that, by filing its Proposal together with such bid bond or check in consideration of the Owner's receiving and considering such Proposals, said Proposal shall be firm and binding upon each such Bidder and such bid bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor's Bond is furnished (where required) by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinbefore set

Rural Utilities Service, USDA

§1726.322

for the opening of Proposals, whichever period shall be the shorter. If such Proposals is not one of the three low Proposals, the bid bond or check will be returned in each instance within a period of ten (10) days to the Bidder furnishing same.

9. Contractor's Bond. The successful Bidder will be required to execute two additional counterparts of the Proposal and, for a Contract in excess of \$100,000, to furnish a Contractor's Bond in triplicate in the form attached hereto with sureties listed by the United States Treasury Department as Acceptable Sureties, in a penal sum not less than the contract price.

10. Failure to Furnish Contractor's Bond. Should the successful Bidder fail or refuse to execute such counterparts or to furnish a Contractor's Bond (where required) within ten (10) days after written notification of the acceptance of the Proposal by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled (a) to enforce the bid bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check, the difference (not exceeding the amount of the certified check) between the amount of the Proposal and such larger amount for which the Owner may in good faith contract with another party to construct the Project. The term "successful Bidder" shall be deemed to include any Bidder whose Proposal is accepted after another Bidder has previously refused or has been unable to execute the counterparts or to furnish a satisfactory Contractor's Bond (where required.)

11. Contract is Entire Agreement. The Contract to be effected by the acceptance of the Proposal shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modification thereof resulting from any representation or promise made at any time by any officer, agent or employee of the Owner or by any other person.

12. Minor Irregularities. The Owner reserves the right to waive minor irregularities or minor errors in any Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal in which they occur prior to the acceptance thereof by the Owner.

13. Bid Rejection. The Owner reserves the right to reject any or all Proposals.

14. Definition of Terms. The terms "Administrator," "Engineer," "Supervisor," "Project," "Completion of Construction" and "Completion of the Project" as used throughout this Contract shall be as defined in Article VI, Section 1, of the Contractor's Proposal.

15. The Owner represents:

a. All easements and rights-of-way, except as shown on maps included in the Specifications, have been obtained from the Owners of the properties across which the project is to be carried out (including tenants who may reasonably be expected to object to such clearing). The remaining easements and rights-of-way, if any, will be obtained as required to avoid delay in construction.

b. Prompt payment for the work to be done will be made with funds pursuant to the Loan Contract, or with funds otherwise available to the Owner.

If the Owner shall fail to comply with any of the undertakings contained in the foregoing representations or if any such representations shall be incorrect, the Bidder will be entitled to extension of time of completion for a period equal to the delay, if any, caused by the failure of the Owner to comply with such undertakings or by any such incorrect representation; provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion in accordance with the foregoing.

Contractor's Proposal

(Proposal shall be submitted in ink or type-written)

To: _____ (Hereinafter called the "Owner")

Article I—General

Section 1. Offer to Clear. The undersigned (hereinafter called the "Bidder") hereby proposes to furnish all materials, equipment, machinery, tools, labor, transportation and other means required to clear rights-of-way for rural electric system bearing the RUS Designation ____ in strict accordance with the Specifications and Drawings therefore, attached hereto and made a part hereof, for the prices hereinafter stated.

Section 2. Description of Contract. The Notice and Instructions to Bidders and Specifications attached hereto and made a part hereof, together with the Proposal and Acceptance constitute the contract. The Specifications consisting of maps, plan and profile sheets showing the number and types of right-of-way units that are to be cleared for each parcel, along with other special drawings are identified as follows: ____.

Section 3. Familiarity with Conditions. The Bidder has made a careful examination of the site of the Project and of the Specifications, Drawings, and form of Contractor's Bond attached hereto, and has become informed as to the location and nature of the proposed work, the transportation facilities, the kind and character of soil and terrain to be encountered, and the kind of facilities required for undertaking and completing the Project, and has become acquainted with the

labor conditions, state and local laws and regulations which would affect the proposed work.

Section 4. License. The Bidder warrants that a Contractor's License is _____, is not _____, required, and if required, it possesses Contractor's license number _____ for the State of _____ in which the Project is located and said license expires on _____, 19____.

Section 5. The Bidder warrants that this Proposal is made in good faith and without collusion or connection with any person or persons bidding for the same work.

Section 6. The Bidder warrants that it possesses adequate financial resources and agrees that in the event this Proposal is accepted and a Contractor's Bond is required, it will furnish a Contractor's Bond in the form attached hereto, in a penal sum not less than the maximum Contractor price, with a surety or sureties listed by the United States Treasury Department as Acceptable Sureties.

In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contract or on any bond or bonds delivered in substitution therefore or in addition thereto shall at any time become unsatisfactory to the Owner or the Administrator, the Bidder agrees to deliver to the Owner another or an additional bond.

Article II—Construction

Section 1. Time and Manner of Work.

(a) Bidder agrees to commence work on the Project on a date (hereinafter called the "Commencement Date") which shall be determined by the Engineer after notice in writing of approval of the Contract by the Administrator, but in no event will the Commencement Date be later than _____ calendar days after date of approval of the Contract by the Administrator. The Bidder further agrees to prosecute diligently and to complete construction in strict accordance with the Specifications and Drawings within _____ (_____) calendar days (excluding Sundays) after Commencement Date.

(b) The time for Completion of Clearing shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Bidder, including Acts of God, fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided however, that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefore in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work

which results from any of the above causes except acts or omission of the Owner, shall result in any liability on the part of the Owner.

(c) The sequence of construction shall be as set forth below, the numbers or names being the designations of extensions or areas (hereinafter called the "Sections") corresponding to the numbers or names shown on the maps attached hereto, or if no Sections are set forth below, the sequence of construction shall be as determined by the Bidder, subject to the approval of the Engineer _____.

(d) The Owner, acting through the Engineer and with the approval of the Administrator¹, may from time to time during the progress of the work on the Project make such changes in additions to or subtractions from the Specifications, Drawings, and sequence of construction provided for in the previous paragraph which are part of the Contractor's Proposal as conditions may warrant: Provided, however, that if any change in the construction to be done shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefore to the Owner within ten (10) days after any such change is made. And provided further, that if the cost to the Bidder of construction of the Project shall be materially increase by any such change or addition, the Owner shall pay the Bidder for the reasonable cost thereof in accordance with a Contract Amendment signed by the Owner and the Bidder and approved by the Administrator², but no claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefore to the Owner prior to the commencement of work in connection with such change or addition.

(e) The Bidder will not perform any work hereunder on Sundays unless there is urgent need for such Sunday work and the Owner consents thereto in writing. The time for completion specified in subsection (a) of this Section 1 shall not be affected in any way by inclusion of this subsection nor by the Owner's consent or lack of consent to Sunday work hereunder.

¹As long as the total price of this contract including all amendments is less than 120 percent of the original contract price as stated in the acceptance hereto, amendments executed on RUS Form 238 are not subject to the approval of the Administrator. Whenever an amendment to this contract causes the total amended contract to exceed 120 percent of the original contract price, that amendment and all subsequent amendments to this contract shall be made subject to the approval of the Administrator.

²See Footnote 1.

Section 2. Environmental Protection. The Bidder shall perform work in such a manner as to maximize preservation of beauty, conservation of natural resources, and minimize marring and scarring of the landscape and silting of streams. There should be no deposition of trash in streams or waterways. Herbicides, other chemicals or their containers should not be deposited in or near streams, waterways or pastures. The Bidder will be required to follow, under the general direction of the engineer, the criteria relating to environmental protection as specified herein by the engineer.

Section 3. Supervision and Inspection.

(a) The Bidder shall cause the work on the Project to receive constant supervision by a competent superintendent (hereinafter called the "Superintendent") who shall be present at all times during working hours where work is being carried on. The Bidder shall also employ in connection with the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Bidder.

(b) The Owner reserves the right to require the removal from the Project of any employee of the Bidder if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner or the Supervisor, if any, shall have the right to require the Bidder to increase the number of its employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner or Supervisor; but the failure of the Owner or Supervisor to give any such directions shall not relieve the Bidder of its obligations to complete the work within the time and in the manner specified in this proposal.

(c) The manner of carrying out the Project, and all materials and equipment used therein, shall be subject to the inspection, tests and approval of the Owner and the Administrator, and the Bidder shall furnish all information required by the Owner or by the Administrator concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner and the Administrator shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Bidder and of any subcontractor, relevant to the Project. The Bidder shall provide all reasonable facilities necessary for such inspection and tests and shall maintain an office at the site of the Project, with telephone service where obtainable and at least one office employee to whom directions and instructions of the Owner may be delivered. Delivery of such directions or instructions in writing to the employee of the Bidder at such office shall con-

stitute delivery to the Bidder. The Bidder shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the Owner, when any other inspection is made.

(d) In the event that the Owner, or the Administrator, shall determine that the work contains or may contain numerous defects, it shall be the duty of the Bidder and the Bidder's Surety or Sureties, if any, to have an inspection made by an engineer approved by the Owner and the Administrator for the purpose of determining the exact nature, extent and location of such defects.

(e) The Engineer may recommend to the Owner that the Bidder suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Bidder to comply with any of the provisions of the Contract: Provided, however, that the Bidder shall not suspend work pursuant to this provision without written authority from the Owner to do so. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Bidder to comply with any of the provisions of this Contract. In the event that work is suspended by the Bidder with the consent of the Owner, the Bidder before resuming work shall give the Owner at least twenty-four (24) hours notice thereof in writing.

Section 4. Unsuitable Workmanship. The acceptance of any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such workmanship shall be found to be unsuitable. Workmanship found unsuitable before final acceptance of the work shall be remedied, by and at the expense of the Bidder. The Bidder shall not be entitled to any payment hereunder so long as any unsuitable workmanship in respect to the Project, of which the Bidder shall have had notice, shall not have been remedied.

Article III—Payments and Release of Liens

Section 1. Payments to Bidder.

(a) Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Bidder for work accomplished during the preceding calendar month on the basis of completed rights-of-way clearing units furnished and certified to by the Bidder, recommended by the Engineer and approved by the Owner solely for the purposes of payment: Provided, however, that such approval shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate shall be paid by the Owner to the Bidder prior to Completion of the Project: Provided, however, that at any time after work,

which, in the sole determination of the Engineer, amounts to fifty percent (50%) of the maximum contract price has been completed, the Owner may elect, in lieu of paying ninety percent (90%) of each such subsequent estimate, to pay each such subsequent estimate in full. Upon completion by the Bidder of the Project, the Engineer will prepare a Final Inventory of the Project showing the total number and character of rights-of-way clearing units and, after checking such inventory with the Bidder, will certify it to the Owner, together with a certificate of the total cost of the construction performed. Upon the approval of such certificates by the Owner and the Administrator, the Owner shall make payment to the Bidder of all amounts to which the Bidder shall be entitled thereunder which shall not have been paid: Provided, however, that such final payments shall be made not later than ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, unless withheld because of the fault of the Bidder.

(b) The Bidder shall be paid on the basis of the number of rights-of-way clearing units actually completed at the direction of the Owner shown by the inventory based on the staking sheets or structure lists; Provided, however, that the total cost shall not exceed the maximum contract price for the construction of the Project as set forth in the Acceptance, unless such excess shall have been approved in writing by the Administrator.

(c) Notwithstanding the provisions of Section 1 (a) above, the Bidder may, by giving written notice thereof to the Owner elect to receive payment in full for any Section of the Project upon:

(1) completion of such Section as certified by the Engineer and approved by the Owner and the Administrator;

(2) submission to the Owner and the Administrator of the releases of lien and the certificate referred to in Section 2 hereof;

(3) approval by the Owner and the Administrator of the inventory in respect of such Section; and

(4) submission to the Owner and the Administrator of the consent in writing by the Surety or Sureties, if any, on the Contractor's Bond to payment in full for such Section prior to Completion of Project.

If no Sections are designated in Article II, Section 1 (c), the term "Section" shall mean for purposes of this subsection (a) and Article IV, Section 3 (b) only, a part of the Project as designated by the Owner which represents at least twenty-five percent (25%) of the maximum Contract price as stated in Article III, Section 1.

(d) Interest at the rate of ____ percent³ (____%) per annum shall be paid by the Owner to the Bidder on all unpaid balances due on monthly estimates, commencing fifteen (15) days after the due date; provided the delay in payment beyond the due date is not caused by any condition within the control of the Bidder. The due date for purposes of such monthly payment shall be the fifteenth day of each calendar month provided (1) the Bidder on or before the fifth day of such month shall have submitted its certification of rights-of-way clearing units completed during the preceding month and (2) the Owner on or before the fifteenth day of such month shall have approved such certification. If, for reasons not due to the Bidder's fault, such approval shall not have been given on or before the fifteenth day of such month, the due date for purposes of this subsection (d) shall be the fifteenth day of such month notwithstanding the absence of the approval of the certification.

(e) Interest at the rate of ____ percent⁴ (____%) per annum shall be paid by the Owner to the Bidder on the final payment for the Project or any completed Section thereof, commencing fifteen (15) days after the due date. The due date for purposes of such final payment shall be the date of approval by the Administrator of all of the documents requiring such approval, as a condition precedent to the making of final payment, or ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, whichever date is earlier.

(f) No payment shall be due while the Bidder is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Bidder the amount of any claim by a third party against either the Bidder or the Owner based upon an alleged failure of the Bidder to perform the work hereunder in accordance with the provisions of this Contract.

Section 2. Release of Liens and Certificate of Contractor. (See sample RUS Form 224, Waiver and Release of Lien and sample RUS Form 231, Certificate of Contractor.) Upon the Completion of Clearing by the Bidder (or any Section thereof if the Bidder shall elect to receive payment in full for any section when completed as provided above) but prior to final payment to the Bidder the Bidder shall deliver to the Owner, in duplicate, releases of all liens and of rights to claim any lien, in the form attached hereto from all manufacturers, materialmen, and subcontractors furnishing services or materials

³The Owner shall insert a rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued.

⁴See Footnote 3.

for the Project or such Section and a certificate in the form attached hereto to the effect that all labor used on or for the Project or such Section has been paid and that all such releases have been submitted to the Owner for approval.

Section 3. Payments to Subcontractors. The Bidder shall pay each subcontractor, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Bidder for and on account of work performed by each subcontractor.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property. The Bidder shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

(a) The Bidder shall at no time and under no circumstances cause or permit any employee of the Bidder to perform any work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in the Notice and Instructions to Bidders.

(b) The Bidder shall so conduct the construction of the Project as to cause the least possible obstruction of Public highways.

(c) The Bidder shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances and regulations or by local conditions.

(d) The Bidder shall do all things necessary or expedient to properly protect any and all parallel, converging and intersecting lines, joint line poles, highways and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways or other property are damaged in the course of the construction of the Project, the Bidder shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

(e) Where the right-of-way of the Project traverses cultivated lands, the Bidder shall limit the movement of its crews and equipment so as to cause as little damage as possible to crops, orchards or property and shall endeavor to avoid marring the lands. All fences which are necessarily opened or moved during the construction of the Project shall be replaced in as good condition as they

were found and precautions shall be taken to prevent the escape of livestock. The Bidder shall not be responsible for loss of or damage to crops, orchards or property (other than livestock) on the right-of-way necessarily incident to the construction of the Project and not caused by negligence or inefficient operation of the Bidder. The Bidder shall be responsible for all other loss of or damage to crops, orchards, or property, whether on or off the right-of-way, and for all loss of or damage to livestock caused by the construction of the Project. The right-of-way for purposes of this said section shall consist of area extending _____ feet on both sides of the center line of the poles along the route of the Project lines, plus such area reasonably required by the Bidder for access to the route of the Project lines from Public roads to carry on construction activities.

(f) The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control in whole or in part as hereinafter provided shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Bidder. The Bidder shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Bidder by reason of any Act of God or other casualty or cause whether or not the same shall have occurred by reason of the Bidder's negligence.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Bidder, its subcontractors and suppliers of any tier, and

from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Bidder.

(iii) Bidder shall provide to Owner's satisfaction evidence of Bidder's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

(g) Any and all excess earth, rock, debris, underbrush and other useless material shall be removed by the Bidder from the site of the Project as rapidly as practicable as the work progresses. There should no disposition of trash in streams or waterways. Herbicides, other chemicals or their containers should not be deposited in or near streams, waterways or pastures.

(h) Upon violation by the Bidder of any of the provisions of this section, after written notice of such violation given to the Bidder by the Engineer or the Owner, the Bidder shall immediately correct such violation. Upon failure of the Bidder so to do the Owner may correct such violation at the Bidder's expense: Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder's expense without such prior notice to the Bidder.

(i) The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

(j) The Bidder shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the Owner that proper authorization has been received from the owner of the property, and the Bidder shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on its land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

Section 2. Insurance. The Bidder shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any em-

ployer or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage of not less than \$1 million each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than \$1 million per person and \$1 million per occurrence, and property damage limits of \$1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Delivery of Possession and Control to Owner.

(a) Upon written request of the Owner the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1(f) hereof with respect to such portion of the Project so delivered to the Owner shall be terminated: Provided, however, that nothing herein contained shall

Rural Utilities Service, USDA

§ 1726.322

relieve the Bidder of any liability with respect to defective materials and workmanship as contained in Article II, Section 4 hereof.

(b) Where the construction of a Section as hereinbefore defined in Article II, Section 1 (c) and Article III, Section 1(c) shall have been completed by the Bidder, the Owner agrees, after receipt of a written request from the Bidder, to accept delivery of possession and control of such Section upon the issuance by the Engineer of a written statement that the Section has been inspected and found acceptable by the Engineer. Upon such delivery of the possession and control of any such Section to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1(f) hereof with respect to such Section so delivered to the Owner shall be terminated; Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials or workmanship as contained in Article II, Section 4 hereof. Section 4. Assignment of Guarantees. All guarantees of materials and workmanship running in favor of the Bidder shall be transferred and assigned to the Owner prior to the time the Bidder receives final payment.

Article V—Remedies

Section 1. Completion of Bidder's Default. If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the Surety or Sureties, if any, upon the Contractor's Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Bidder such default shall be corrected or arrangements for the correction thereof satisfactory to both the Owner and the Administrator shall be made by the Bidder or its Surety or Sureties if any, the Owner may take over the Project and prosecute the same to completion by contract or otherwise for the account and at the expense of the Bidder, and the Bidder and its Surety or Sureties if any, shall be liable to the Owner for any cost or expense in excess of the contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and plant belonging to the Bidder or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Bidder may have against third persons in connection with this contract and for such purpose the Bidder does hereby assign, trans-

fer and set over unto the Owner all such rights, claims and demands.

Section 2. Liquidated Damages. The time of the Completion of the Project is of the essence of the Contract. Should the Bidder neglect, refuse or fail to complete the Project within the time herein agreed upon, after giving effect to extensions of time, if any, herein provided, then, in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall have the right to deduct from and retain out of such moneys which may be then due, or which may become due and payable to the Bidder the sum of _____ dollars (_____) per day for each and every day that such construction is delayed in its completion beyond the specified time, as liquidated damages and not as a penalty; if the amount due and to become due from the Owner to the Bidder is insufficient to pay in full any such liquidated damages, the Bidder shall pay to the Owner the amount necessary to effect such payment in full; Provided, however, that the Owner shall promptly notify the Bidder in writing of the manner in which the amount retained, deducted or claimed as liquidated damages was computed.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner or the Government or the Administrator shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election: Provided, however, that the provision of Section 2 of this Article shall be the exclusive measure of damages for failure by the Bidder to complete the Project within the time herein agreed upon.

Article VI—Miscellaneous

Section 1. Definitions.

(a) The term "Administrator" shall mean the Administrator of the Rural Utilities Service of the United States of America and his duly authorized representatives or any other person in whom or authority in which may be vested the duties and functions which the Administrator is now authorized by law to perform.

(b) The term "Engineer" shall mean the engineer employed by the Owner with the approval of the Administrator, to provide engineering services for the Project and said Engineer's duly authorized assistants and representatives.

(c) The term "Supervisor" shall mean the person, if any, appointed by the Administrator as the representative of the Government under the provisions of the Loan Contract providing for such appointment in special cases. The term is limited to such special representative of the Government, if any, who is responsible exclusively to the

Administrator and does not refer to the Manager or any other person employed by the Owner and responsible to it.

(d) The term "Completion of Clearing" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof except the Bidder's obligations in respect of (1) Releases of liens and Certificate of Contractor under Article III, Section 2 hereof, (2) the inventory referred to in Article III, Section 1 hereof, and (3) other final documents. The term "Completion of the Project" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion signed by the Engineer and approved in writing by the Owner and the Administrator, shall be the sole and conclusive evidence as to the date of Completion of Clearing.

Section 2. Patent Infringement. The Bidder shall save harmless and indemnify the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 3. Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Bidder.

Section 4. Compliance with Statutes and Regulations. The Bidder shall comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Bidder acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. Sections 286, 287 and 1001 as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental Agencies leaving jurisdiction in the premises.

Section 5. Equal Opportunity Provisions.

(a) Bidder's Representations.

The Bidder represents that:

It has _____, does not have _____, 100 or more employees, and if it has, that it has _____, has not _____, furnished the Equal Employment Opportunity-Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Bidder agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Form 100. The Bidder agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100

for the current reporting year and that if this contract will amount to more than \$10,000, the Bidder will file such report, as required by law, and notify the Owner in writing of such filing prior to the Owner's acceptance of this Proposal.

(b) Equal Opportunity Clause. During the performance of this contract, the Bidder agrees as follows:

(1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotions or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The Bidder will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or worker's representatives of the Bidder's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Bidder's noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be cancelled, terminated, or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts of federally assisted construction contracts in accordance with procedures authorized in

Rural Utilities Service, USDA

§ 1726.322

Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Bidder will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions including sanctions for noncompliance; Provided, however, that in the event a Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

(c) Certificate of Nonsegregated Facilities. The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 6. Franchises and Rights-of-Way. The Bidder shall be under no obligation to obtain or assist in obtaining: Any franchises,

authorizations, permits or approvals required to be obtained by the Owner from Federal, State, County, Municipal or other authorities; any rights-of-way over private lands; or any agreements between the Owner and third parties with respect to the construction and operation of the Project.

Section 7. Nonassignment of Contract. The Bidder shall perform directly and without subcontracting not less than twenty-five per centum (25%) of the construction of the Project, to be calculated on the basis of the total contract price. The Bidder shall not assign the contract effected by an acceptance of this proposal or any interest in any funds that may be due or become due hereunder or enter into contract with any person, firm or corporation for the performance of the Bidder's obligations hereunder or any part thereof, without the approval in writing of the Owner and of the Surety or Sureties, if any, on any bond furnished by the Bidder for the faithful performance of the Bidder's obligation hereunder. If the Bidder, with the consent of the Owner and any Surety or Sureties, if any, on the Contractor's Bond or Bonds, shall enter into a subcontract with any subcontractor for the performance of any part of this contract, the Bidder shall be as fully responsible to the Owner and the Government for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it.

Section 8. Extension to Successors and Assigns. Each and all of the covenants and Agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto.

Section 9. Contractor. Upon acceptance of this Proposal, the successful Bidder shall be the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

Section 10. Approval by the Administrator. No acceptance of this Proposal shall become effective until approval in writing of the Administrator; Provided, however that no obligations shall arise hereunder unless such approval is given within sixty (60) days from the date of acceptance by the Owner.

____ (Bidder)
By ____ (President)
____ (Address)
Attest: ____ (Secretary)
Date ____

The Proposal must be signed with the full name of the Bidder. If the Bidder is a partnership, the Proposal must be signed in the partnership name by a partner. If the Bidder is a corporation, the Proposal must be signed in the Corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

§ 1726.322**7 CFR Ch. XVII (1-1-97 Edition)***Description of Units*

TM-12. The unit is 1,000 feet in length and _____ (_____) feet in width (to be measured _____ (_____) feet on one side of pole line or centerline of structures) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed _____ in height, shall be clear from the ground up on one side of the line of poles carrying conductors (See Detail A, Drawing TM-12-2A.) The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush across the width of the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All lengths thus arrived at, added together and divided by 1,000 shall give the number of TM-12 units of clearing. The Bidder shall not remove or trim shade, fruit, or ornamental trees unless so directed by the Engineer in writing.

TM-12 (1). This unit is identical with TM-12, except the full width of the right-of-way to be cleared shall be _____ feet wide (to be measured _____ (_____) feet on each side of the pole line or centerline of structures) (See Detail D, Drawing TM-12-2A.)

TM-13. The unit, for purpose of quoting, is 1,000 feet in length of clearing off the right-of-way. The Engineer will select those trees off the right-of-way that he deems to be a hazard to the line and will designate them to the Bidder in writing as danger trees. When so designated, the Bidder shall remove or top such trees at his option except that the Bidder shall trim and not remove shade, fruit or ornamental trees unless otherwise directed by the Engineer in writing (See Drawings TM-12-2A and TM-13 for examples of danger trees.)

The measurement of length of right-of-way to be cleared shall be considered as a straight line parallel to the horizontal line between poles or centerline of structures, such measurement of length to be based on maximum dimension of foliage (not trunk) projected to the ground line (See Details E, F, G and H, Drawing TM-12-2A.) Dead trees having no foliage shall be measured across the maximum dimension and multiplied by two. (See Detail F, Drawing TM-12-2A.) Each tree so removed shall be added together to determine the total length of clearing. All lengths thus arrived at, added together and divided by 1,000 shall give the number of TM-

13 units (Example: Details E, F, G and H, Drawing TM-12-2A, total 0.10 of a TM-13 unit.)

TMC-12, TMC-12 (1). These units are identical to the respective TM units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

TM-14. The unit is 1,000 feet in length and _____ (_____) feet in width (to be measured _____ (_____) feet on one side of right-of-way center line) of actual clearing of right-of-way. Trees and underbrush should be cleared from the ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide "undulating" boundaries. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the service road. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or center line of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM-14 (1). This unit is identical with TM-14 except the full width of the right-of-way to be cleared shall be _____ (_____) feet wide (See Detail D, Drawing TM-12-2A.)

TM-15. The unit is 1,000 feet in length and _____ (_____) feet in width (to be measured _____ (_____) feet on one side of the right-of-way center line) of actual clearing of the right-of-way. Trees and underbrush should be cleared from ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide a "feathered" appearance in the right-of-way. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the service road.

The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or center line of structures and across the maximum dimension of foliage cleared projected to ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

Rural Utilities Service, USDA

§ 1726.324

TM-15 (1). This unit is identical to TM-15 except the full width of the right-of-way to be cleared shall be _____ (_____) feet wide (See Detail D, Drawing TM-12-2A).

Additional Requirements. (When Specifying TM units denote type of disposal A or B).

A. Trees, brush, branches and refuse shall, without delay, be disposed of by such of the following methods as an Engineer will direct (Engineer to strike out methods not to be used).

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (Describe) _____

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Engineer but in no case shall it be required to be less than _____ (_____) feet. Brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used).

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (Describe) _____

Acceptance

Subject to the approval of the Administrator, the Owner hereby accepts the foregoing Proposal of the Bidder, _____ for the construction of the following:

The total contract price is \$ _____

_____ Owner

By _____ President

_____ Secretary

_____ Date of Contract

Specifications

In preparing the right-of-way, trees shall be removed, underbrush cleared, and trees trimmed so that the right-of-way shall be clear from the ground up as specified in the Proposal. Trees fronting each side of the right-of-way shall be trimmed symmetrically unless otherwise directed by the Engineer. Dead trees beyond the right-of-way which would strike the line in falling shall be removed. Leaning trees beyond the right-of-way which would strike the line in falling and which would require topping if not re-

moved may be removed or topped at the direction of the Engineer.

Where TMC-12, TMC-12-(1) units are specified, the right-of-way shall be cleared in accordance with the instructions in the preceding paragraph and in addition, all stumps one-half inch in diameter and larger shall be sprayed as specified by the Engineer.

[End of clause]

§ 1726.323 Certificate (Buy America), RUS Form 213.

The closeout form in this section shall be used when required by this part.

CERTIFICATE

With respect to compliance with the second paragraph of the Rural Electrification Act of 1938, being Title IV of the Work Relief and Public Works Appropriation Act of 1938 (Public Resolution No. 122, 75th Congress, approved June 21, 1938).

Rural Utilities Service Project _____.

The undersigned, being, the _____¹, in a certain contract No. _____ dated _____, 19 __, between the undersigned and _____², does hereby certify that in the performance of the said contract there have been used or furnished no unmanufactured articles, materials or supplies which have not been mined or produced in the United States, Mexico, or Canada and no manufactured articles, materials or supplies which have not been manufactured in the United States, Mexico, or Canada substantially all from articles, materials or supplies mined, produced or manufactured, as the case may be in the United States, Mexico, or Canada, except to the extent that compliance with the second paragraph of the Rural Electrification Act of 1938, being Title IV of the Work Relief and Public Works Appropriation Act of 1938 (Public Resolution No. 122, 75th Congress, approved June 22, 1938) has been waived by the Administrator of the Rural Utilities Service.

Instructions

(See RUS Bulletin 1767B-3, Preparation and Use of RUS Form 254, for additional instructions.)

The Engineer will prepare 5 copies of RUS Form 254 and 254a, also 5 copies of Forms 254b and 254c when applicable. Original and 1 copy to be forwarded to RUS, 1 copy to Contractor, 1 copy to Owner, and 1 copy to be retained by Engineer.

Calculation of amount payable to Contractor will employ data taken from Nos. 1 through 25, RUS Forms 254, 254a, 254b, 254c. The amounts to be inserted opposite Items A, B, C, D, and E on RUS Form 254 are indicated in the texts of those items.

Nos. 1 through 17, Forms 254a and 254b: (Form 254b is required only when "I" removal units are included in the Contract.)

No.—Source of Information

- 1 and 2—From tabulation of staking sheets.¹
- 3 and 4—From Contract.
- 5—No. 3 plus No. 4.
- 6—No. 1 multiplied by No. 5.
- 7—No. 1 multiplied by No. 3 (for "I" units only).
- 8—From Table C of Contract.
- 9—No. 1 multiplied by No. 8 for "I" removal units only. (Table C relates solely to "I" units.)
- 10, 11, and 12—From Engineer's and Owner's records.
- 13—From Table D in Contract.
- 14—No. 12 multiplied by No. 13.
- 15—From Engineer's records. (Quantities shall be listed opposite the appropriate material items described in No. 11.)
- 16—From individual stock record card for each material item listed.
- 17—No. 15 multiplied by No. 16.

Data shown on Form 254c to be presented under the following headings, as appropriate:

Part I Material Items Included in Lists Set Forth in Construction Contract

Part II Other Material Items Furnished by Owner

Nos. 18 through 25: (Form 254c is required only when there are owner-furnished materials.)

¹Standard units will be listed first, followed by new units and conversion units, in that order, with all "I" removal units being listed last.

7 CFR Ch. XVII (1-1-97 Edition)

No.—Source of Information

- 18 and 19—From Contract and Material Receipts.
- 20—From charge-out and credit tickets covering materials issued to and returned by the Contractor.²
- 21—From average unit costs on charge-out and credit tickets relating to this construction, such costs in turn being taken from the average unit costs reflected by the stock record cards for the applicable period.
- 22—No. 20 multiplied by No. 21.
- 23—For Part I, from the unit prices specified in the Contract in the "List of Owner's Materials on Hand" or the "List of Materials Ordered by Owner But Not Delivered."
- For Part II, from the actual unit costs to Owner—the same as used in No. 21.
- 24—No. 20 multiplied by No. 23.
- 25—No. 24 minus No. 22. (if a minus quantity, enter in parentheses.)

See 7 CFR 1726, Electric System Construction Policies and Procedures, for instructions regarding distribution of the completed form.

Reference should be made to RUS Bulletin 1767B-3, Preparation and Use of RUS Form 254, for instruction in accounting for all contract costs, including the retirement of units removed by the Contractor and the unitization by record units of costs of construction assemblies installed by the Contractor.

**§1726.329 Contract to construction
buildings, RUS Form 257.**

The contract form in this section
shall be used when required by this
part.

CONTRACT TO CONSTRUCT BUILDINGS*Notice and Instructions to Bidders*

1. Proposals: Sealed proposals for the construction, including the furnishing of all materials, machinery, labor and equipment, water, heat, utilities, transportation, and other means necessary for construction of the building(s) listed below (hereinafter called the "Project") to be financed _____ not to be financed _____ pursuant to a loan contract between _____ (hereinafter called the "Owner") and the United States of America, by the Administrator of the Rural Utilities Service (hereinafter called the "Administrator") and designated as Project _____ will be received by the Owner on or before _____ o'clock ____ M _____ Time, _____, 19____, at its office located at _____ at which time and place the proposals will be publicly opened and read. The Rural Telephone Bank may also be a party to the loan contract.

Name or Kind of Building _____
Location _____

2. Obtaining Documents: The Plans and Specifications together with all other necessary forms and documents for bidders may be secured from _____ at _____ upon payment of _____ Dollars (\$_____) which payment will be refunded to each bona fide bidder within ten (10) days after the bid opening. Additional sets of Plans and Specifications may be obtained upon payment of _____ Dollars (\$_____) which payment will not be subject to refund. The Plans and Specifications may be examined at the office of _____. A copy of the loan contract may also be examined at the office of the Owner.

3. Manner of Submitting Proposals: Proposals and all supporting documents required to be attached thereto must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope, addressed to the Owner. The name and address of the Bidder, its license number, if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations or interlineations will be permitted, unless made before submission, and initialed and dated.

4. Familiarity with Conditions: Prior to the submission of the Proposal, the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Plans and Specifications, forms of Construction Proposal and Acceptance, and Contractor's Bond on file with Secretary of the Owner and shall become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of the soil

and terrain to be encountered, the kind of facilities required before and during the construction of the Project, general local conditions, and all other matters that may affect the cost and the time of completion of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors and the so called “Kick-Back” Statute (48 Stat. 948) and regulations issued pursuant thereto.

5. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

6. Time of Completion of Construction: The time of completion of construction of the Project shall be as specified by the Architect in the Proposal.

7. Bid Bond: Each proposal must be accompanied by a bid bond in the form attached or a certified check on a bank that is a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder shall agree, provided its proposal is one of the three low proposals, that by filing its proposal together with such bid bond or check in consideration of the Owner's receiving and considering such proposal, said proposal shall be firm and binding upon each such Bidder and such bid bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor's Bond (or Builder's Risk Policy) is furnished by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinbefore set for the opening of proposals, whichever period shall be the shorter. If such proposal is not one of the three low proposals, the bid bond or check will be returned in each instance within a period of ten (10) days to the respective Bidder.

8. Contractor's Bond or Builder's Risk Policy: The successful Bidder will be required to execute two additional counterparts of the Proposal and to furnish.

(a) For contracts in amounts in excess of \$100,000, a Contractor's Bond in the form attached to the Proposal with sureties listed by the United States Treasury Department as Acceptable Sureties, in a penal sum not less than the contract price.

(b) For contracts in amounts of \$100,000 or less, either a Contractor's Bond or a Builder's Risk Policy, whichever the Owner has specified below: (Check One)

_____ Contractor's Bond
_____ Builder's Risk Policy

9. Failure to Furnish Contractor's Bond or Builders Risk Policy: Should the successful Bidder fail or refuse to furnish a Contractor's Bond (or Builder's Risk Policy) satisfactory to the Owner within fifteen (15) days after written notification of the acceptance

of the Proposal by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled: (a) To enforce the Bid Bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check the difference between the amount of the Proposal and such larger amounts for which the Owner may in good faith contract with another party to construct the Project. The term “successful Bidder” shall be deemed to include any Bidder whose proposal is accepted after another Bidder has previously refused or has failed to furnish a satisfactory Contractor's Bond (or Builder's Risk Policy).

10. Contract is Entire Agreement: The contract, effected by acceptance of the Proposal, shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modification thereof resulting from any representation or promise made at any time by any officer, agent or employee of the Owner or by any other person.

11. Minor Irregularities: The Owner reserves the right to waive minor irregularities or minor errors in the Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence.

Any such irregularities or errors so waived must be corrected on the Proposal prior to its acceptance by the Owner.

12. Rejection of Proposals: The Owner reserves the right to reject any or all proposals.

13. Discrepancies: Where a discrepancy appears between the sum of the Base Bids of each building and the Total Base Bid, the correct addition of the Base Bid price for each building shall control.

14. The Owner Represents:

(a) If by provisions of the Proposal, the Owner shall have undertaken to furnish any materials for the construction of the Project, such materials are on hand at locations which may be determined by the bidders' inquiry of the Architect, or if such materials are not on hand, they will be made available by the Owner to the successful Bidder before the time such materials are required for incorporation into the Project.

(b) Title to the property on which the Project is to be constructed has been obtained.

(c) All funds necessary for prompt payment of the construction of the Project will be available. If the owner should fail to comply with any of the undertakings contained in the foregoing representations or if any such representations shall be incorrect, the Bidder will be entitled to an extension of the time of completion of Construction for a period equal to the delay, if any, caused by the

Rural Utilities Service, USDA

§ 1726.329

failure of the Owner to comply with such undertakings or by any such incorrect representations; provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion in accordance with the foregoing, and provided further that such extension, if any, of the time of completion shall be the sole remedy of the Bidder for the Owner's failure to comply with any of the foregoing representations.

____ Owner
By _____
Dated _____

Proposal

To: _____ (hereinafter called the "Owner"). The undersigned (hereinafter called the "Bidder") proposes to construct the buildings(s) listed in Section 1 of Article I (hereinafter called the "Project"), financed _____, not to be financed _____, in whole or in part by a loan to the Owner by the United States of America, by the Administrator of the Rural Utilities Service (hereinafter called the "Administrator"), or by loans to the Owner by the United States of America and by the Rural Telephone Bank, designated _____ and to receive and install such materials and equipment as may hereinafter be specified to be furnished by the Owner, and to furnish all other materials, machinery, and equipment, water, heat, utilities, transportation and other means required to construct the Project in accordance with the plans and specifications (hereinafter called the "Plans and Specifications"), prepared by _____ (hereinafter called the "Architect") and dated _____, 19____, and approved by the Rural Utilities Service on _____, 19____, and by this reference made a part hereof. The Bidder has made a careful examination of the site(s) on which the Project to be constructed, has become informed as to the kind of facilities required before and during the construction of the Project and has become acquainted with the labor conditions which would affect the work.

The Bidder agrees that if his bid is accepted, the following terms shall govern.

Article I—Amount of Proposal

Section 1. Bid Price: The Bidder will construct the Project for the following sum:

Name or Kind and Location of Building _____

Base Bid _____

Total of Bid \$ _____

Alternate Bid No. 1 (add) (deduct) \$ _____

Alternate Bid No. 2 (add) (deduct) \$ _____

Alternate Bid No. 3 (add) (deduct) \$ _____

Alternate Bid No. 4 (add) (deduct) \$ _____

Section 2. Taxes: The price quoted herein includes all amounts which the Bidder estimates will be payable by the Bidder or the

Owner on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies or equipment or services or labor of installation to be incorporated in the Project.

The Bidder will pay all such taxes and will furnish to appropriate taxing authorities any required information and reports pertaining thereto.

Article II—Construction

Section 1. Time of Construction:

(a) The Bidder, after notification in writing of approval of the Construction Contract by the Administrator, if approval of the Administrator is required, will commence construction of the Project within _____ (_____) calendar days after the Owner shall have given the Bidder written notice to commence construction which notice shall be given:

(1) Not later than _____ (_____) calendar days after approval of the Construction Contract by the Administrator, if approval of the Administrator is required.

(2) On a date to be determined by the Owner.

(The Architect will cross out the inapplicable statement (1) or (2) above before requesting bids.)

(b) The Bidder will prosecute diligently and complete construction of the Project in strict accordance with the Plans and Specifications and directions of the Architect within _____ (_____) calendar days after the expiration of the time specified to commence construction.

(c) The time for Completion of Construction herein set forth shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Bidder, including acts of God, fires, floods, direction by the Architect to cease construction during periods when in the judgment of the Architect it is impractical to perform any operation of construction and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible, provided, however, that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefor in writing to the Owner and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes or from any changes in construction which may be made pursuant to Subsection (d) of this Section shall result in any liability on the part of the Owner.

(d) The Owner, acting through the Architect and with the approval of the Administrator, if approval of the Administrator is required, may from time to time during the progress of construction make revisions in

the Project. If the revision is such as to require an extension in the time of construction, a reasonable extension shall be granted if the Bidder shall make a written request therefor to the Owner prior to the commencement of work in connection with such revision. If the cost of the Project to the Bidder to make revision shall be increased or decreased, the contract price shall be amended by an amount equivalent to the reasonable cost thereof by a Construction Contract Amendment signed by the Owner and the Bidder, and approved by the Administrator, if approval of the Administrator is required; but no claim for additional compensation for any revision will be considered unless the Bidder shall have made a written request therefore to the Owner prior to the commencement of work in connection with such revision. The reasonable cost of any increase or decrease in the contract amendment as outlined above, in the absence of any other mutual agreement, shall be computed on the basis of the direct cost of materials, F.O.B. the site of the Project, plus the direct cost of labor necessary to incorporate such materials into the Project (including actual cost of payroll taxes and insurance) plus twenty-five percent (25%) of the direct cost of materials and labor. Labor cost shall be limited to the direct costs for workmen and foremen. Costs for Bidder's main office overhead, job office overhead and superintendence shall not be included.

Section 2. Supervision: The Bidder will give sufficient supervision to the work, using his best skill and attention. He will carefully study and compare all drawings, specifications and other instructions, and report at once to the architect any error, inconsistency or omission which he may discover. The Bidder will make available during construction a competent superintendent and any necessary assistants, all satisfactory to the architect. The superintendent shall not be changed except with the consent of the Architect unless the superintendent proves to be unsatisfactory to the Bidder and ceases to be his employ. The superintendent shall represent the Bidder in his absence and all directions given to him shall be as binding as if given to the Bidder. When requested, such directions shall be confirmed in writing.

Section 3. Shop Drawings: The Bidder, after reviewing, will submit to the Architect, with such promptness as to cause no delay in the work two copies of all shop or setting drawings and schedules required for the work of the various trades, and the Architect shall pass on them with reasonable promptness, requesting corrections required thereto to be made. The Bidder will make any corrections required and file with the Architect three corrected copies and furnish such other copies as may be needed. The Architect's approval of such drawings or schedules shall not relieve the Bidder of responsibility for

deviations from the Plans and Specifications. The Bidder will keep one copy of the contract documents on the site, in good order, available to the Architect. All drawings and specifications will be returned to the Architect upon completion of construction.

Section 4. Samples: The Bidder will furnish for approval, all samples as directed by the Architect, and will perform the work in accordance with such approved samples.

Section 5. Inspection and Tests: The manner of construction of the Project and all materials and equipment used or to be used therein shall be subject to the inspection, tests and approval of the Architect and the Administrator, and the Bidder will furnish all information required by the Architect or the Administrator concerning the nature or source of materials. The Owner and the Administrator shall have the right to inspect all records of the Bidder and of any subcontractor relevant to the work. The Bidder will make available at the site of the Project, telephone service where obtainable, the payroll, invoices of material and other data and records of the Bidder relevant to the work. The Bidder will provide all reasonable facilities necessary for such inspection and tests. If the specifications, the Architect's instructions, laws, ordinances or any public authorities require any work to be specially tested or approved, the Bidder will give the Architect timely notice of its readiness for observation by the Architect or inspection by an authority other than the Architect, and if the inspection is by such other authority, of the date fixed for such inspection, testing or approval. The Bidder will bear all costs of such inspections, tests and approvals unless otherwise provided, obtain required certificates and deliver them to the Architect. Observations by the Architect shall be promptly made, and where practicable at the source of supply. If any work should be covered without approval or consent of the Architect, it must, if required by the Architect, be uncovered for examination at the Bidder's expense.

Re-examination of questioned work may be ordered by the Architect and if so ordered the work must be uncovered by the Bidder. If such work be found in accordance with the contract documents the Owner shall pay the cost of re-examination and replacement. If such work be found not in accordance with the contract documents the Bidder will pay such cost.

Section 6. Employees: The Bidder will at all times enforce strict discipline and good order among his employees and shall not employ any unfit person or anyone not skilled in the task assigned him. The Architect and the Owner shall have the right to require the removal from the Project of any employee of

the Bidder or subcontractor if in their judgment such removal shall be necessary to protect the interest of the Owner.

Section 7. Defective Workmanship and Materials: Notwithstanding the acceptance of workmanship, materials (except owner-furnished materials) or equipment or the giving of any certificate with respect to the Completion of Construction, if during the construction or within one year after such completion, or within such longer period as the Project or any part thereof may be guaranteed by other provisions of this Proposal, the workmanship, materials or equipment shall be found to be defective or not in conformity with the requirements of the Plans and Specifications, the Bidder will remedy or replace such workmanship, materials or equipment within thirty (30) days after written notice of the failure of the Bidder to conform with the applicable provisions of the contract documents shall have been given to the Bidder by the Owner.

Article III—Payment and Releases of Liens

Section 1. Payments to Bidder:

(a) On or before the fifth (5) day of each Calendar Month, the Bidder will make application for payment, and the Owner, on or before the fifteenth (15) day of such month, shall make partial payment to the Bidder for construction accomplished during the preceding Calendar Month and partial payment for materials not incorporated in the Project. The payment shall be made on the basis of a schedule of values and receipts or other vouchers, submitted by the Bidder to, and approved by, the Architect, showing payments for labor and materials, payments to subcontractors, and such other evidence of the Bidder's right to payment for construction accomplished, and bills of sale or such other procedure as will establish the Owner's title to materials not incorporated in the Project but delivered and suitably stored on the site or at any other location agreed upon in writing by the Owner. Approval by the Architect of the application for payment is solely for the purposes of payment and shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate of the cost for construction accomplished and approved and fifty percent (50%) of the cost of materials not incorporated in the Project shall be paid by the Owner to the Bidder prior to Completion of Construction.

The Bidder will, before the first application, submit to the Architect, a schedule of values of the various parts of the work, including quantities, aggregating the total contract price, divided so as to assist in determining the accuracy of payments to subcontractors and of the applications for payment.

(b) Upon Completion of Construction, the Architect shall inspect the Project, and if he

shall find the work acceptable and all provisions hereunder fully performed, he shall furnish the Owner two copies of a Certificate of Completion, on forms satisfactory to the Administrator, and shall certify thereon the final Contract Price. The Certificate of Completion shall show thereon the Acceptance of the Contractor. Upon acceptance of the Certificate of Completion by the Owner, the Owner shall make final payment to the Bidder of all unpaid amounts to which the Bidder shall be entitled hereunder, except that, for contracts requiring approval of the Administrator, the Owner shall submit one copy of the Certificate of Completion to the Administrator for approval. Upon notice of approval by the Administrator, the Owner shall make final payment to the Bidder.

(c) Interest at the rate of ____ percent¹ (____%) per annum shall be paid by the Owner to the Bidder on all unpaid balances due on monthly estimates, commencing fifteen (15) days after the due date, provided the delay in payment beyond the due date is not caused by any condition within control of the Bidder. The due date for purposes of such monthly payment shall be the fifteenth (15th) day of each Calendar Month provided (1) The Bidder on or before the fifth (5th) day of such month shall have submitted its certified estimate of construction completed during the preceding month and (2) the Architect on or before the fifteenth (15th) day of such month shall have approved such certification. If, for reasons not due to the Bidder's fault, such approval of the Architect shall not have been given on or before the fifteenth (15th) day of such month, the due date for purposes of this Subsection shall be the fifteenth (15th) day of such month notwithstanding the absence of the Architect's approval of the certification.

(d) Interest at the rate of ____ percent² (____%) shall be paid by the Owner to the Bidder on the final payment commencing fifteen (15) days after the due date. The due date for the purposes of such final payment shall be sixty (60) days after the date of certification by the Architect in the Certificate of Completion or the date of approval by the Administrator of the Certificate of Completion when approval thereof is required by the Administrator.

(e) No payments shall be due while the Bidder is in default in respect of any of the provisions of this Proposal, and the Owner may withhold from the Bidder the amount of any claim by a third party against either the Bidder or the Owner based upon an alleged failure of the Bidder to perform the work

¹The Owner shall insert a rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued.

²See footnote 1.

hereunder in accordance with the provisions of this Proposal.

Section 2. Release of Liens: Upon Completion of Construction of the Project, but prior to the payment to the Bidder of any amount withheld in accordance with Section 1, (a) of Article III, the Bidder shall furnish the Owner, on forms satisfactory to the Administrator releases of all liens, and of all rights to claim any lien from manufacturers, materialmen and subcontractors who have furnished materials or services for the construction of the Project, and a Certificate of Contractor on a form satisfactory to the Administrator, to the effect that all labor used on or for the Project has been paid and that all such releases have been submitted to the Owner.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property: The Bidder will, at all times, take all reasonable precautions for the safety of employees on the Project, and of the public and all other persons who may be affected thereby, and will comply with all applicable provisions of Federal, State and Municipal safety laws and building and construction codes.

The Bidder will protect from loss or damage all materials and equipment to be incorporated in the Project, whether in storage on or off the site, and other property at the site or adjacent thereto, including trees, shrubs, lawns, walks, paved surfaces, structures and utilities not designated for removal, relocation or replacement in the course of construction. The Bidder will provide and maintain guard lights, watchman or other protection for persons and property, and physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America, unless such instructions are incompatible with or less strict than those of any public authority having jurisdiction thereon, or instructions of the Architect.

The following provisions shall not limit the generality of the above requirements:

(a) The Bidder will at all times, keep the premises free from accumulation of waste material or rubbish caused by his employees or work, and at the completion of construction he will remove all rubbish from and about the Project, and all his tools, scaffolding and surplus materials and will leave his work "broom clean."

(b) The Project from its commencement to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided, will be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection therewith and the materials to be used therein will be borne by the Bidder. The Bid-

der will make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Bidder, by reason of any act of God or other casualty or cause, whether or not the same shall have occurred by reason of the Bidder's negligence.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Bidder, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Bidder.

(iii) Bidder shall provide to Owner's satisfaction evidence of Bidder's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

(c) The Bidder will confine his apparatus, the storage of materials and the operations of his workmen to limits indicated by law, ordinances, permits, or directions of the Architect, and shall not unreasonably encumber the premises with his materials.

(d) The Bidder will not load or permit any of the structure to be loaded with a weight that will endanger its safety.

(e) The Bidder will submit to the Owner, monthly reports in duplicate of all accidents giving such data as may be prescribed by the Architect.

(f) Upon violation by the Bidder of any of the provisions of this section, the Bidder will, after written notice of such violation given to the Bidder by the Architect or the Owner, immediately correct such violation. Upon failure of the Bidder so to do, the Owner may correct such violation at the Bidder's expense; provided, however, that the Owner may, if it deems necessary or advisable, correct such violation at the Bidder's expense without such prior notices to the Bidder.

(g) The Bidder will be responsible for all construction means, methods, techniques, sequences, and procedures and for coordinating all portions of the construction of the Project.

Section 2. Insurance. The Bidder shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage of not less than \$1 million each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than \$1 million per person and \$1 million per occurrence, and property damage limits of \$1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable

solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Purchase of Materials: The Bidder will purchase all materials (except owner-furnished materials) and supplies outright and not subject to any conditional sales agreements, bailment lease or other agreement reserving unto the seller any right, title or interest therein. All materials and supplies shall become the property of the Owner when erected in place or at such earlier time as the parties may agree pursuant to Section 1(a) of Article III. Unless otherwise specified, all materials shall be new.

Section 4. Assignment of Guarantees: The Bidder will obtain from manufacturers, materialmen, and subcontractors and furnish to the Owner all guarantees and will transfer or assign to the Owner such guarantees as run in favor of the Bidder, prior to the time the Bidder receives final payment. The guarantees shall be in addition to and not limited by any other provisions of the contract documents, guarantee or remedy required by law.

Section 5. Royalties and Patent Infringement: The Bidder will pay all royalties and license fees, and will hold harmless and indemnify the Owner from any and all claims, suits, and proceedings for the infringement of any patent or patents covering any equipment, materials, supplies or construction methods used in the work.

Section 6. Compliance with Statutes and Regulations: The Bidder will comply with all applicable statutes, ordinances, rules and regulations pertaining to the work. The Bidder acknowledges that it is familiar with The Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statute (48 Stat. 948), and all regulations issued pursuant thereto, and 18 U.S.C. §§287, 1001 as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental agencies having jurisdiction in the premises.

Section 7. Delivery of Possession and Control to Owner: Upon written request of the Owner, the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least 90 percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of such portion of the Project to the Owner, the

risks and obligations of the Bidder as set forth in Section 1(b), Article IV hereof with respect to such portion so delivered to the Owner shall be terminated; provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective workmanship or materials as provided in Section 7, Article II.

Section 8. Occupancy Before Completion: Exception as provided in Section 7, the Owner shall not occupy any portion of the Project prior to the time of completion without the written approval of the Bidder. It is agreed that such occupancy of any such portion of the Project will not constitute acceptance of workmanship or materials used in construction of the Project as provided in Section 7, Article II, and that such occupancy will not relieve the Bidder from his obligation to complete any part of the Project in compliance with the contract. The Owner agrees to permit the Bidder to fulfill the requirements of the contract in accordance with instructions issued to the Bidder by the Architect upon occupancy by the Owner.

Article V—Remedies

Section 1. Liquidated Damages: The time of Completion of Construction of the Project is of the essence of this Contract. Should the Bidder neglect, refuse or fail to complete construction within the time herein agreed upon, after giving effect to extensions of time, if any herein provided for, then, in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall have the right to deduct from and retain out of such moneys which may be then due or which may become due and payable to the Bidder, the sum of _____ Dollars (\$_____) per day of each and every day that such construction is delayed in its completion beyond the specified time, as liquidated damages and not as a penalty. If the amount due and to become due from the Owner to the Bidder is insufficient to pay in full any such liquidated damages, the Bidder shall pay to the Owner the amount necessary to effect such payment in full; provided, however, that the Owner shall promptly notify the Bidder in writing of the manner in which the amount retained, deducted or claimed as liquidated damages was computed.

Section 2. Completion on Bidder's Default: If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the surety or sureties upon the Contractor's Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within twenty (20) days after

the service of such notice upon the Bidder, such default shall be corrected or arrangements for the correction thereof, satisfactory to both the Owner and the Administrator, shall be made by the Bidder or its Surety or Sureties, the Owner may take over the construction of the Project and prosecute the same to completion by contract or otherwise for the account and at the expense of the Bidder and the Bidder and its Surety or Sureties shall be liable to the Owner for any cost or expense in excess of the contract price occasioned thereby. Sureties shall be liable to the Owner for any cost or expense in excess of the contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and plant belonging to the Bidder or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Bidder may have against third persons in connection with this Proposal and for such purpose the Bidder does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

Section 3. Cumulative Remedies: Every right or remedy herein conferred upon or reserved to the Owner or the Government or the Administrator shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election; provided, however, that the provisions of Section 1 of this Article V shall be the exclusive measure of damages for failure by the Bidder to complete the construction of the Project within the time herein agreed upon.

Article VI—Miscellaneous

Section 1. Definitions: (a) The term "Administrator" shall mean the Administrator of the Rural Utilities Service of the United States of America and his duly authorized representatives or any other person in whom or authority in which may be vested in the duties and functions which the Administrator is now authorized by law to perform.

(b) The term "Architect" shall mean the person or organization employed by the Owner to provide architectural services for the Project, and the Architect's duly authorized assistants and representatives. If an Architect is not employed, the term shall apply to the duly authorized agent of the Owner.

(c) The term "Completion of Construction" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof except the Bidder's obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof, and

(2) other final documents. The term "Completion of the Project" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof. The date of signature by the Architect of the Certificate of Completion shall be the sole and conclusive evidence as to the date of Completion of Construction and as to the fact of Completion of the Project.

Section 2. Materials and Supplies. In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Bidder agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

Section 3. Bond or Builder's Risk Policy: (a) The Bidder will furnish to the Owner, for a contract in an amount in excess of \$100,000, a bond in a penal sum not less than the Total Contract Price and in the form attached hereto and with a Surety or Sureties listed by the United States Treasury Department as Acceptable Sureties.

(b) The Bidder will furnish to the Owner for a contract in an amount of \$100,000 or less, a Builder's Risk Policy or a bond like that required in the preceding paragraph, whichever the Owner has specified under Paragraph 8 of the Notice and Instructions to Bidders. The Builder's Risk Policy shall be on a completed value form, effective from the date equipment or materials is first delivered to the building site, and shall name both the Owner and the Contractor as insureds. The policy shall insure against loss by fire or lightning and the named perils in the extended coverage endorsement. The amount of coverage shall not be less than the replacement value of the property constructed, including all materials to be used in the construction and stored at the site or at any other location whether furnished by the Owner or the Contractor. When directed, the Bidder shall furnish evidence of compliance with these requirements. The evidence shall be in the form of a certificate of insurance by the insurance company and shall include a provision that no change in or cancellation of the policy shall be made without

prior written notice to the Owner and the Administrator.

Section 4. Subcontracts and Nonassignment: (a) Within ten (10) days after acceptance of the Proposal by the Owner and before awarding any subcontracts, the Bidder will notify the Architect, Owner and Surety in writing, of the names of the subcontractors proposed for the principal parts of the work, and will not enter into any subcontract for such work if written objection thereto is received from the Architect, Owner, Surety or Sureties within fifteen (15) days after receipt of such notice. The Bidder will be as fully responsible to the Owner and the Administrator for the acts and omissions of each subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it. The Bidder will not subcontract on aggregate amount in excess of sixty-five percent (65%) of its obligations, (to be calculated on the basis of the Total Contract Price) without approval of the Architect, Owner, and Surety or Sureties on any bond furnished by the Bidder for the faithful performance of the Bidder's obligations hereunder. Nothing contained in the Construction Contract shall create any contractual relation between any subcontractor and the Owner.

(b) The Bidder will not assign the contract effected by the acceptance of this Proposal or any part thereof without approval in writing of the Owner, Surety or Sureties, and the Administrator if the Construction Contract was approved by the Administrator.

Section 5. Equal Opportunity Provisions: (a) Bidder's Representations.

The Bidder represents that:

It has ____, does not have ____, 100 or more employees, and if it has, that it has ____, has not ____, furnished the Equal Employment Opportunity-Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Bidder agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

The Bidder agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than \$10,000, the Bidder will file such report, as required by law, and notify the Owner in writing of such filing prior to the Owner's acceptance of this Proposal.

(b) Equal Opportunity Clause. During the performance of this Contract, the Bidder agrees as follows: (1) The Bidder will not discriminate against any employee or applicant

for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such actions shall include, but not be limited to, the following: Employment, upgrading, demotions or transfer; recruitment or recruitment advertising, layoff or termination; rates of pay or other forms of compensation; and selection of training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Bidder will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or worker's representative of the Bidder's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Bidder's noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be cancelled, terminated, or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulations, or order of the Secretary of Labor, or as provided by law.

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Exec-

utive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontract or vendor. The Bidder will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance. Provided, however, that in the event Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

(c) Certificate of Nonsegregated Facilities. The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms, and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 6. License: The Bidder warrants that a Contractor's License is ____, is not ____, required, and if required, it possesses Contractor's License No. ____ for the State of ____ in which the Project is located, and said license expires on ____, 19__.

Section 7. Extension to Successors and Assigns: Each and all of the covenants and agreements contained in the contract effected by the Acceptance of this Proposal shall extend to and be binding upon the successors and assigns of the parties thereto.

Section 8. Description of Contract: The Notice and Instructions to Bidders, the Proposal, the Acceptance, the Contractor's Bond

Rural Utilities Service, USDA**§1726.340**

or Builder's Risk Policy, the Plans and Specifications and all amendments or revisions thereto constitute the Construction Contract.

Section 9. Contractor: Upon acceptance of this Proposal the successful Bidder shall be the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

Section 10. Approval by the Administrator: No acceptance of a Proposal for a contract upon which approval of the Administrator is required shall become effective until the contract has been approved by the Administrator; provided that no obligation shall arise hereunder unless such approval is given within sixty (60) days after the date set for the opening of the proposals. The acceptance of a Proposal for a contract upon which approval of the Administrator is not required shall become effective the date of acceptance by the Owner.

BID BOND

1. KNOW ALL MEN that we, ____, as Principal, and ____, as Surety, are held and firmly bound unto ____ (hereafter called the "Owner") in the penal sum of ten percent (10%) of the amount of the bid referred to in paragraph 2 below, but not to exceed ____ dollars (\$ ____), as hereinafter set forth and for the payment of which sum well and truly to be made we bind ourselves, our executors, administrators, successors and assigns, jointly and severally, by these presents;

2. WHEREAS, the Principal has submitted a bid to the Owner for the construction of the Rural Utilities Service Project known as Project ____.

3. NOW, THEREFORE, the condition of this obligation is such that if the Owner shall accept the bid of the Principal, and

(a) The Principal shall execute such contract documents, if any, as may be required by the terms of the bid and give such Contractor's Bond or Bonds for the performance of the contract and for the prompt payment of labor and material furnished for the Project as may be specified in the bid, or

(b) In the event of the failure of the Principal to execute such contract documents, if any, and give such Contractor's Bond or Bonds, if the Principal shall pay to the Owner the difference, not to exceed the penal sum hereof, between the amount specified in the bid and such larger amount for which the Owner may in good faith contract with another party to construct the Project, then this obligation shall be void, otherwise to remain in full force and effect.

SUBSTATION AND SWITCHING STATION
ERECTION CONTRACT

Notice and Instructions to Bidders

1. Sealed proposals for the construction, including the supply of necessary labor, materials and equipment, of a rural electric project of _____ (hereinafter called the "Owner") to be known as Project _____ will be received by the Owner on or before _____ o'clock ____ M., 19____, at its office at _____ at which time and place the proposals will be publicly opened and read. Any proposal received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. Description of Project: The Project will consist of the following Substations and other Major Facilities:

Name _____ KVA _____ Voltage _____
Name _____ KVA _____ Voltage _____
Name _____ KVA _____ Voltage _____

The Project is located in _____ Counties, in the State of _____ all as more fully described in the Plans, Specifications for Construction, Construction Drawings and Contractor's Proposal therefore hereinafter referred to.

3. Owner Furnished Materials. The unit prices in the Contractor's Proposal should include provisions for Owner Furnished Materials since as stated in Article I, Section 3 of the Contractor's Proposal, the value of the Owner Furnished Materials, if any, will be deducted from payments to the Bidder for completed Construction Units.

4. Obtaining Documents. The Plans, Specifications for Construction and Construction Drawings together with all necessary forms and other documents for bidders may be obtained from the Owner, or from the Engineer _____ at the latter's office at _____ upon payment of \$_____, which payment will not be subject to refund. The Plans, Specifications for Construction and Construction Drawings may be examined at the office of the Owner or at the office of the Engineer. A copy of the Loan Contract (if the Project is to be financed in whole or in part, pursuant to a Loan Contract) between the Owner and the United States of America acting through the Administrator of the Rural Utilities Service (hereinafter called the "Administrator") and of the loan contract between the Owner and any other lender may be examined at the office of the Owner. Each set of Plans, Specifications for Construction and Construction Drawings will have a serial number, given by the Engineer, and the number of each set with the name of the Purchaser will be recorded by the Engineer. Bids will be accepted only from the original purchasers.

5. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the

Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations or interlineations will be permitted, unless made before submission, and initialed and dated.

6. Familiarity with Conditions. Prior to the submission of the Proposal the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Plans, Specifications for Construction, Construction Drawings, and forms of Contractor's Proposal and Contractor's Bond on file with the Secretary of the Owner and with the Engineer, and shall become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project, general local conditions and all other matters that may affect the cost and the time of completion of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors, and the so-called "Kick-back Statute" (48 Stat. 948) and regulations issued pursuant thereto.

7. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

8. Alternate Designs. The Owner reserves the right to confine its consideration of the several bids to one type of design regardless of alternate types of design which may be specified in the Plans and Specifications for Construction and offered in the Proposals.

9. The time for Completion of Construction of the Project shall be as specified by the Engineer in the Proposal.

10. Bid Bond. Each Proposal must be accompanied by a Bid Bond in the form attached or a certified check on a bank that is a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder agrees, provided its Proposal is one of the three low Proposals, that, by filing its Proposal together with such Bid Bond or check in consideration of the Owner's receiving and considering such Proposal, said Proposal shall be firm and binding upon each such Bidder and such Bid Bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor's Bond is furnished (where required) by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinbefore set for the opening of Proposals, whichever period shall be the shorter. If such

Rural Utilities Service, USDA

§ 1726.340

Proposal is not one of the three low Proposals, the Bid Bond or check will be returned in each instance within a period of ten (10) days to the Bidder furnishing same.

11. Contractor's Bond. The successful Bidder will be required to execute two additional counterparts of the Proposal and, for a Contract in excess of \$100,000, to furnish a Contractor's Bond in triplicate in the form attached hereto with sureties listed by the United States Treasury Department as Acceptable Sureties, in a penal sum not less than the contract price.

12. Failure to Furnish Contractor's Bond. Should the successful Bidder fail or refuse to execute such counterparts or to furnish a Contractor's Bond (where required) within ten (10) days after written notification of the acceptance of the Proposal by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled (a) to enforce the bid bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check the difference (not exceeding the amount of the certified check) between the amount of the Proposal and such larger amount for which the Owner may in good faith contract with another party to construct the Project. The term "successful Bidder" shall be deemed to include any Bidder whose Proposal is accepted after another Bidder has previously refused or has been unable to execute the counterparts or to furnish a satisfactory Contractor's Bond (where required.)

13. Contract is Entire Agreement. The Contract to be effected by the acceptance of the Proposal shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modification thereof resulting from any representation or promise made at any time by any officer, agent or employee of the Owner or by any other person.

14. Minor Irregularities. The Owner reserves the right to waive minor irregularities or minor errors in any Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal in which they occur prior to the acceptance thereof by the Owner.

15. Rejection of Bids. The Owner reserves the right to reject any or all Proposals. The attention of Bidders is specially called to the desirability of a proper balance between prices for labor and materials and between the total prices for the respective Construction Units. Lack of such balance may be considered as a reason for rejecting a Proposal.

16. Discrepancy in Unit Prices. Where the unit prices in the Contractor's Proposal are separated into three columns designated as "Labor," "Materials" and "Labor and Mate-

rials," and where a discrepancy appears between the sum shown in the "Labor and Materials" column and the correct addition of the sums appearing in the "Labor" column and the "Materials" column, the correct addition of the sums appearing in the "Labor" column and the "Materials" column shall control.

17. Bidding and Acceptance. If the Project includes more than one substation, bidders may bid on one or more substations. The Owner may award (1) a contract for all of the substations on the basis of the low total bid or, (2) separate contracts for one or more substations based on the low bids for the respective substations.

18. Definition of Terms. The terms "Administrator," "Engineer," "Supervisor," "Project," "Completion of Construction" and "Completion of the Project" as used throughout this Contract shall be as defined in Article VI, Section 1, of the Contractor's Proposal.

19. The Owner represents:

a. If by provisions of the Contractor's Proposal the Owner shall have undertaken to furnish any materials for the construction of the Project, such materials are on hand at locations specified or if such materials are not on hand they will be made available by the Owner to the successful Bidder at the locations specified before the time such materials are required for construction.

b. Title to the property on which the Project is to be constructed has been obtained.

c. All funds necessary for prompt payment for the construction of the Project will be available.

If the Owner shall fail to comply with any of the undertakings contained in the foregoing representations or if any of such representations shall be incorrect, the Bidder will be entitled to an extension of time of completion for a period equal to the delay, if any, caused by the failure of the Owner to comply with such undertakings or by any such incorrect representation; provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion in accordance with the foregoing, and provided further that such extension, if any, of the time of completion shall be the sole remedy of the Bidder for the Owner's failure, because of conditions beyond the control and without the fault of the Owner, to furnish materials in accordance with subparagraph a. hereof.

____ Owner

By _____
_____, 19____

Contractor's Proposal

(Proposal shall be submitted in ink or typewritten)

§ 1726.340

7 CFR Ch. XVII (1–1–97 Edition)

To: _____ (Hereinafter called the “Owner”)

Article I—General

Section 1. Offer to Construct. The undersigned (hereinafter called the “Bidder”) hereby proposes to receive and install such materials and equipment as may hereinafter be specified to be furnished by the Owner, and to furnish all other materials and equipment, all machinery, tools, labor transportation and other means required to construct the rural electric project _____ in strict accordance with the Plans, Specifications for Construction and Construction Drawings for the prices hereinafter stated.

Section 2. Materials and Equipment. The Bidder agrees to furnish and use in the construction of the Project under this Proposal, in the event the Proposal is accepted, only such materials and equipment as are included in the current “List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers,” including revisions adopted prior to the Bid Opening.

Section 3. Owner-Furnished Materials. The Bidder understands and agrees that, if this Proposal is accepted, the Owner will furnish to the Bidder the material set forth in the attached “List of Owner’s Materials on Hand” (see page 10) and the Bidder will give a receipt (see page 12) therefore in writing to the Owner. The Bidder, further, will on behalf of the Owner accept delivery of such of the materials set forth in the attached “List of Materials Ordered by Owner but Not Delivered” (see page 11) as may be subsequently delivered and will promptly forward to the Owner for payment the supplier’s invoice, together with the Bidder’s receipt in writing for such materials. The materials referred to are on hand at, or will be delivered to, the locations specified in the Lists and the Bidder will use such materials in constructing the Project.

The value of the completed Construction Units certified by the Bidder each month pursuant to Article III, Section 1.a of this Proposal shall be reduced by an amount equal to the value of the materials installed by the Bidder during the preceding month which have been furnished by the Owner or the delivery of which has been accepted by the Bidder on behalf of the Owner. Only ninety percent (90%) of the remainder shall be paid prior to the Completion of the Project. The value of such materials shall be computed on the basis of the unit prices stated in the Lists. Materials, if any, not required for the Project, which have been furnished to the Bidder by the Owner or delivery of which has been accepted by the Bidder on behalf of the Owner, shall be returned to the Owner by the Bidder upon Completion of Construction of the Project. The value of all materials not installed in the Project nor returned to the

Owner shall be deducted from the final payment to the Bidder.

The Owner shall not be obligated to furnish materials in excess of the quantities, size, kind and type set forth in the attached Lists. If the Owner furnishes, and the Bidder accepts, materials in excess thereof, the values of such excess materials shall be their actual cost as stated by the Owner.

Information on the shipping schedules of materials on the “List of Materials Ordered by Owner But Not Delivered” will be furnished to the Bidder as necessary during progress of the work.

Upon delivery the Bidder shall promptly receive, unload, transport and handle all materials and equipment on the “List of Materials Ordered by Owner But Not Delivered” at its expense and shall be responsible for demurrage, if any.

Section 4. Purchase of Materials Not Furnished by Owner. The Bidder will purchase all materials and equipment (other than owner-furnished materials) outright and not subject to any conditional sales agreements, bailment, lease or other agreement reserving unto the seller any right, title or interest therein. All such materials and equipment shall become the property of the Owner when erected in place.

Section 5. Proposal on Unit Basis. The Bidder understands and agrees that the various Construction Units on which bids are made are defined by symbols and descriptions in this Proposal, that all said bids are on a unit basis, and that the Owner may specify any number or combination of Construction Units that the Owner may deem necessary for the construction of the Project. Separate Construction Units are designated for each different arrangement which may be used in the construction of the Project. This Proposal is based on a consideration of each unit in place and includes only the materials listed on the corresponding Construction Drawings or description of unit where no drawing exists.

Section 6. Familiarity with Conditions. The Bidder has made a careful examination of the site of the Project to be constructed and of the Plans, Specifications for Construction, Construction Drawings, and form of Contractor’s Bond attached hereto, and has become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, and the kind of facilities required before and during the construction of the Project, and has become acquainted with the labor conditions, state and local laws and regulations which would affect work on the proposed construction.

Section 7. License. The Bidder warrants that a Contractor’s License is _____, is not _____, required, and if required, it possesses Contractor’s License No. _____ for the

Rural Utilities Service, USDA**§ 1726.340**

State of _____ in which the Project is located and said license expires on _____, 19____.

Section 8. The Bidder warrants that this Proposal is made in good faith and without collusion or connection with any person or persons bidding for the same work.

Section 9. The Bidder warrants that it possesses adequate financial resources and agrees that in the event this Proposal is accepted and a Contractor's Bond is required, it will furnish a Contractor's Bond in the form attached hereto, in a penal sum not less than the maximum Contract price, with a surety or sureties listed by the United States Treasury Department as Acceptable Sureties.

In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contractor on any bond or bonds delivered in substitution therefor or in addition thereto shall at any time become unsatisfactory to the Owner or the Administrator, the Bidder agrees to deliver to the Owner another or an additional bond.

Section 10. Taxes. The unit prices for Construction Units in this Proposal include provisions for the payment of all monies which will be payable by the Bidder or the Owner in connection with the construction of the Project on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies and equipment, or

services or labor of installation thereof, to be incorporated in the Project as part of such Construction Units. The Bidder agrees to pay all such taxes, except taxes upon the sale, purchase or use of owner-furnished materials and it is understood that, as to owner-furnished materials, the values stated in the attached "List of Owner's Materials on Hand" and "List of Materials Ordered by Owner But Not Delivered" include taxes upon the sale, purchase or use of owner-furnished materials, if applicable. The Bidder will furnish to the appropriate taxing authorities all required information and reports pertaining to the Project, except as to the owner-furnished materials.

Section 11. Changes in Quantities. The Bidder understands and agrees that the quantities called for in this Proposal are approximate, and that the total number of units upon which payment shall be made shall be as set forth in the inventory. If the Owner changes the quantity of any unit or units specified in this Proposal by more than 15%, and the materials cost to the Bidder is increased thereby to an extent which would not be adequately compensated by application of the unit prices in this Proposal to the revised quantity of such unit or units, such change, to the extent of the quantities of such units in excess of such 15%, shall be regarded as a change in the construction within the meaning of Article II, Section 1(d) of this Proposal.

LIST OF OWNER'S MATERIALS ON HAND

Item ¹	Description of material	Catalog No.	Quantity	Unit price	Extended price
Total. Above Materials are Located at:					

¹ Item corresponds with item in list of materials in construction drawings. Under Article I, Section 3, the value of these materials will be deducted from payments to the Bidder for completed Construction Units.

LIST OF MATERIALS ORDERED BY OWNER BUT NOT DELIVERED

Item ¹	Supplier name and address	Scheduled delivery date	Description of material	Catalog No.	Quantity	Unit price	Extended price
Total. Above Material to be Delivered to:							

¹ Item corresponds with item in list of materials in construction drawings. Under Article I, Section 3, the value of these materials will be deducted from payments to the Bidder for completed Construction Units.

Article II—Construction

Section 1. Time and Manner of Construction.

a. The Bidder agrees to commence construction of the Project on a date (hereinafter called the "Commencement Date") which shall be determined by the Engineer after notice in writing of approval of the Contract by the Administrator and notice in

writing from the Bidder that the Bidder has sufficient materials to warrant commencement and continuation of construction, but in no event will the Commencement Date be later than _____ calendar days after date of approval of the Contract by the Administrator. The Bidder further agrees to prosecute diligently and to complete construction in strict accordance with the Plans,

§ 1726.340

7 CFR Ch. XVII (1–1–97 Edition)

Specifications for Construction and Construction Drawings within _____ (_____) calendar days (excluding Sundays) after Commencement Date: Provided, however, that the Bidder will not be required to perform any construction on such days when in the judgment of the Engineer snow, rain, or wind, or the results of snow, rain, or frost make it impracticable to perform any operation of construction and to the extent of the time lost due to the conditions described herein and approved in writing by the Engineer, the time of completion set out above will be extended if the Bidder makes a written request therefor to the Owner as provided in subsection b of this Section 1.

b. The time for Completion of Construction shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Bidder, including acts of God, fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided, however, that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefore in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes, except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

c. The sequence of construction shall be as set forth below, the numbers or names being the designations of substations or other major facilities (hereinafter called the "Stations") corresponding to the numbers or names shown on the maps attached hereto, or if no Stations are set forth below, the sequence of construction shall be as determined by the Bidder, subject to the approval of the Engineer. _____

d. The Owner, acting through the Engineer and with the approval of the Administrator,¹ may from time to time during the progress of the construction of the Project make such changes, additions to or subtractions from the Plans, Specifications for Construction,

Construction Drawings, List of Materials and sequence of construction provided for in the previous paragraph which are part of the Contractor's Proposal as conditions may warrant: Provided, however, that if any change in the construction to be done shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefor to the Owner within ten (10) days after any such change is made. And provided further, that if the cost to the Bidder of construction of the Project shall be materially increased by any such change or addition, the Owner shall pay the Bidder for the reasonable cost thereof in accordance with a Construction Contract Amendment signed by the Owner and the Bidder and approved by the Administrator,² but no claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition.

e. The Bidder will not perform any work hereunder on Sundays unless there is urgent need for such Sunday work and the Owner consents thereto in writing. The time for completion specified in subsection a of this Section 1 shall not be affected in any way by inclusion of this subsection nor by the Owner's consent or lack of consent to Sunday work hereunder.

Section 2. Environmental Protection. The Bidder shall perform work in such a manner as to maximize preservation beauty, conservation of natural resources and minimize marring and scarring of the landscape and silting of streams. The Bidder shall not deposit trash in streams or waterways, and shall not deposit herbicides or other chemicals or their containers in or near streams, waterways or pastures. The Bidder shall follow, under the general direction of the Engineer, the criteria relating to environmental protection as specified herein by the Engineer.

Section 3. The Bidder agrees that in the event this Proposal is accepted it will make available for use in connection with the proposed construction all necessary tools and equipment and qualified superintendents and foremen.

Section 4. Changes in Construction. The Bidder agrees to make changes in construction previously installed in the Project by the Bidder as required by the Owner. The compensation for such changes shall be as agreed upon in writing by the Bidder and the Owner prior to commencement of work in connection with such changes.

No payment shall be made to the Bidder for materials or labor involved in correcting errors or omissions on the part of the Bidder

¹As long as the total price of this contract including all amendments is less than 120 percent of the original contract price as stated in the acceptance hereto, amendments executed on RUS Form 238 are not subject to the approval of the Administrator. Whenever an amendment to this contract causes the total amended contract to exceed 120 percent of the original contract price, that amendment and all subsequent amendments to this contract shall be made subject to the approval of the Administrator.

² See Footnote 1.

which result in construction not in accordance with the Plans and Specifications for Construction.

Section 5. Construction Not in Proposal. The Bidder also agrees that when it is necessary to construct units not shown in the Proposal it will construct such units for a price arrived at as follows:

a. The cost of materials shall be determined by the invoices.

b. The cost of labor shall be the reasonable cost thereof, as agreed upon by the Owner and Bidder prior to the commencement of work.

Section 6. Supervision and Inspection.

a. The Bidder shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the "Superintendent") who shall be present at all times during working hours where construction is being carried on. The Bidder shall also employ, in connection with the construction of the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Bidder.

b. The Owner reserves the right to require the removal from the Project of any employee of the Bidder if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner or the Supervisor, if any, shall have the right to require the Bidder to increase the number of its employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner or Supervisor; but the failure of the Owner or Supervisor to give any such directions shall not relieve the Bidder of its obligations to complete the work within the time and in the manner specified in this Proposal.

c. The manner of construction of the Project, and all materials and equipment used therein, shall be subject to the inspection, tests and approval of the Owner and the Administrator, and the Bidder shall furnish all information required by the Owner or by the Administrator concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner and the Administrator shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Bidder and of any subcontractor, relevant to the construction of the Project. The Bidder shall provide all reasonable facilities necessary for such inspection and tests. The Bidder shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the owner, when any other inspection is made.

d. In the event that the Owner, or the Administrator, shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Bidder and the Bidder's Surety or Sureties, if any, to have an inspection made by an engineer approved by the Owner and the Administrator for the purpose of determining the exact nature, extent and location of such defects.

e. The Engineer may recommend to the Owner that the Bidder suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Bidder to comply with any of the provisions of the Contract: Provided, however, that the Bidder shall not suspend work pursuant to this provision without written authority from the Owner so to do. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Bidder to comply with any of the provisions of this Contract. In the event that work is suspended by the Bidder with the consent of the Owner, the Bidder before resuming work shall give the Owner at least twenty-four (24) hours notice thereof in writing.

Section 7. Defective Materials and Workmanship.

a. The acceptance of any materials, equipment (except owner-furnished materials) or any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such materials, equipment, or workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, by and at the expense of the Bidder. Any such condemned material or equipment shall be immediately removed from the site of the Project by the Bidder at the Bidder's expense. The Bidder shall not be entitled to any payment hereunder so long as any defective materials, equipment or workmanship in respect to the Project, of which the Bidder shall have had notice, shall not have been replaced or remedied, as the case may be.

b. Notwithstanding any certificate which may have been given by the Owner or the Engineer, if any materials, equipment (except owner-furnished materials) or any workmanship which does not comply with the requirements of this Contract shall be discovered within one (1) year after Completion of Construction of the Project, the Bidder shall replace such defective materials or equipment or remedy any such defective workmanship within thirty (30) days after notice in writing of the existence thereof shall have been given by the Owner. If the

Bidder shall be called upon to replace any defective materials or equipment or to remedy defective workmanship as herein provided, the Owner, if so requested by the Bidder shall deenergize that portion of the Project involved in such work. In the event of failure by the Bidder so to do, the Owner may replace such defective materials or equipment or remedy such defective workmanship, as the case maybe, and in such event the Bidder shall pay to the Owner the cost and expense thereof.

Article III—Payments and Release of Liens

Section 1. Payments to Bidder.

a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Bidder for construction accomplished during the preceding calendar month on the basis of completed Construction Units furnished and certified to by the Bidder, recommended by the Engineer, and approved by the Owner solely for the purposes of payment: Provided, however, that such approval shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate approved during the construction of the Project shall be paid by the Owner to the Bidder prior to Completion of the Project: Provided, however, that at any time after work, which, in the sole determination of the Engineer, amounts to fifty percent (50%) of the maximum Contract price has been completed, the Owner may elect, in lieu of paying ninety percent (90%) of each such subsequent estimate, to pay each such subsequent estimate in full. Upon completion by the Bidder of the construction of the Project, the Engineer will prepare an inventory of the Project showing the total number and character of Construction Units and, after checking such inventory with the Bidder, will certify it to the Owner together with a certificate of the total cost of the construction performed. Upon the approval of such certificates by the Owner and the Administrator, the Owner shall make payment to the Bidder of all amounts to which the Bidder shall be entitled thereunder which shall not have been paid, provided, however, that such final payment shall be made not later than ninety (90) days after the date of Completion of Construction of the Project as specified in the Certificate of Completion, unless withheld because of the fault of the Bidder.

b. The Bidder shall be paid on the basis of the number of Construction Units actually installed at the direction of the Owner shown by the inventory: Provided, however, that the total cost shall not exceed the maximum Contract price for the construction of the Project as set forth in the Acceptance, unless such excess shall have been approved in writing by the Administrator.

c. Notwithstanding the provisions of Section 1a above, the Bidder may, by giving

written notice thereof to the Owner, elect to receive payment in full for any Station of the Project upon:

(1) completion of construction of such Station as certified by the Engineer and approved by the Owner and the Administrator;

(2) submission to the Owner and the Administrator of the releases of lien and the certificate referred to in Section 2 hereof;

(3) approval by the Owner and the Administrator of the inventory in respect of such Station; and

(4) submission to the Owner and the Administrator of the consent in writing by the Surety or Sureties, if any, on the Contractor's Bond to payment in full for such Station prior to Completion of the Project.

d. Interest at the rate of _____ percent³ (_____%) per annum shall be paid by the Owner to the Bidder on all unpaid balances due on monthly estimates, commencing fifteen (15) days after the due date; provided the delay in payment beyond the due date is not caused by any condition within the control of the Bidder. The due date for purposes of such monthly payment shall be the fifteenth day of each calendar month provided (1) the Bidder on or before the fifth day of such month shall have submitted its certification of Construction Units completed during the preceding month and (2) the Owner on or before the fifteenth day of such month shall have approved such certification. If, for reasons not due to the Bidder's fault, such approval shall not have been given on or before the fifteenth day of such month, the due date for purposes of this subsection d shall be the fifteenth day of such month notwithstanding the absence of the approval of the certification.

e. Interest at the rate of _____ percent⁴ (_____%) per annum shall be paid by the Owner to the Bidder on the final payment for the Project or any completed Station thereof, commencing fifteen (15) days after the due date. The due date for purposes of such final payment shall be the date of approval by the Administrator of all of the documents requiring such approval, as a condition precedent to the making of final payment, or ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, whichever date is earlier.

f. No payment shall be due while the Bidder is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Bidder the amount of any claim by a third party against either the Bidder or the Owner based upon an alleged

³The Owner shall insert a rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued.

⁴See Footnote 3.

failure of the Bidder to perform the work hereunder in accordance with the provisions of this Contract.

Section 2. Release of Liens and Certificate of Contractor. (See sample RUS Form 224, Waiver and Release of Lien and sample RUS Form 231, Certificate of Contractor.) Upon the completion by the Bidder of the construction of the Project (or any Station thereof if the Bidder shall elect to receive payment in full for any Station when completed as provided above) but prior to final payment to the Bidder, the Bidder shall deliver to the Owner, in duplicate, releases of all liens and of rights to claim any lien, in the form attached hereto from all manufacturers, materialmen, and subcontractors furnishing services or materials for the Project or such Station and a certificate in the form attached hereto to the effect that all labor used on or for the Project or such Station has been paid and that all such releases have been submitted to the Owner for approval.

Section 3. Payments to Materialmen and Subcontractors. The Bidder shall pay each materialman and each subcontractor, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Bidder for and on account of materials furnished or construction performed by each materialman or each subcontractor.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property. The Bidder shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

a. The Bidder shall at no time and under no circumstances cause or permit any employee of the Bidder to perform any work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in the Notice and Instructions to Bidders.

b. The Bidder shall so conduct the construction of the Project as to cause the least possible obstruction of public highways.

c. The Bidder shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances and regulations or by local conditions.

d. Temporary water, light, power and other utility service shall be arranged for by the

Bidder for construction purposes at its own expense.

e. The Bidder shall do all things necessary or expedient to properly protect any and all adjacent lines, highways and any and all property of others from damage, and in the event that any such lines, highways or other property are damaged in the course of construction of the Project, the Bidder shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

f. The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Bidder. The Bidder shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Bidder by reason of any act of God or other casualty or cause whether or not the same shall have occurred by reason of the Bidder's negligence.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Bidder, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be

§ 1726.340

7 CFR Ch. XVII (1–1–97 Edition)

obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Bidder.

(iii) Bidder shall provide to Owner's satisfaction evidence of Bidder's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

g. Any and all excess earth, rock, debris, underbrush and other useless material shall be removed by the Bidder from the site of the Project as rapidly as practicable as the work progresses.

h. Upon violation by the Bidder of any of the provisions of this Section, after written notice of such violation given to the Bidder by the Engineer or the Owner, the Bidder shall immediately correct such violation. Upon failure of the Bidder so to do the Owner may correct such violation at the Bidder's expense; Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder's expense without such prior notice to the Bidder.

i. The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

Section 2. Insurance. The Bidder shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage of not less than \$1 million each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than \$1 million per person and \$1 million per occurrence, and property

damage limits of \$1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Delivery of Possession and Control to Owner.

a. Upon written request of the Owner the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1f hereof with respect to such portion of the Project so delivered to the Owner shall be terminated: Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials and workmanship as contained in Article II, Section 6 hereof.

b. Where the construction of a Station as hereinbefore defined in Article II, Section 1c and Article III, Section 1c shall have been completed by the Bidder, the Owner agrees, after receipt of a written request from the Bidder, to accept delivery of possession and control of such Station upon the issuance by the Engineer of a written statement that the Station has been inspected and found acceptable by the Engineer. Upon such delivery of the possession and control of any such Station to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1f hereof with respect to such Station so delivered to the Owner shall be terminated: Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials or workmanship as contained in Article II, Section 6 hereof.

Section 4. Assignment of Guarantees. All guarantees of materials and workmanship

Rural Utilities Service, USDA

§1726.340

running in favor of the Bidder shall be transferred and assigned to the Owner prior to the time the Bidder receives final payment.

Article V—Remedies

Section 1. Completion on Bidder's Default. If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the Surety or Sureties, if any, upon the Contractor's Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Bidder such default shall be corrected or arrangements for the correction thereof satisfactory, to both the Owner and the Administrator shall be made by the Bidder or its Surety or Sureties, if any, the Owner may take over the construction of the Project and prosecute the same to completion by Contract or otherwise for the account and at the expense of the Bidder, and the Bidder and its Surety or Sureties, if any, shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and plant belonging to the Bidder or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Bidder may have against third persons in connection with this Contract and for such purpose the Bidder does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

Section 2. Liquidated Damages. The time of the Completion of Construction of the Project is of the essence of the Contract. Should the bidder neglect, refuse or fail to complete the construction within the time herein agreed upon, after giving effect to extensions of time, if any, herein provided, then, in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall have the right to deduct from and retain out of such moneys which may be then due, or which may become due and payable to the Bidder the sum of _____ dollars (_____) per day for each and every day that such construction is delayed on its completion beyond the specified time, as liquidated damages and not as a penalty; if the amount due and to become due from the Owner to the Bidder is insufficient to pay in full any such liquidated damages, the Bidder, shall pay to the Owner the amount necessary to effect such payment in full: Provided, however,

that the owner shall promptly notify the Bidder in writing of the manner in which the amount retained, deducted or claimed as liquidated damages was computed.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner or the Government or the Administrator shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election: Provided, however, that the provisions of Section 2 of this Article shall be the exclusive measure of damages for failure by the Bidder to complete the construction of the Project within the time herein agreed upon.

Article VI—Miscellaneous

Section 1. Definitions.

a. The term "Administrator" shall mean the Administrator of the Rural Utilities Service of the United States of America and his duly authorized representatives or any other person in whom or authority in which may be vested the duties and functions which the Administrator is now authorized by law to perform.

b. The term "Engineer" shall mean the engineer employed by the Owner, with the approval of the Administrator, to provide engineering services for the Project, and said Engineer's duly authorized assistants and representatives.

c. The term "Supervisor" shall mean the person, if any, appointed by the Administrator as the representative of the Government under the provisions of the Loan Contract providing for such appointment in special cases. The term is limited to such special representative of the Government, if any, who is responsible exclusively to the Administrator and does not refer to the Manager or any other person employed by the Owner and responsible to it.

d. The term "Project" shall mean the substations or other major facilities described in the Plans, Specifications for Construction, and Construction Drawings.

e. The term "Completion of Construction" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof except the Bidder's obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof, (2) the inventory referred to in Article III, Section I hereof, and (3) other final documents. The term "Completion of the Project" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion, signed by the Engineer and approved in writing by the Owner and the Administrator, shall be the sole and

§ 1726.340

7 CFR Ch. XVII (1-1-97 Edition)

conclusive evidence as to the date of Completion of Construction and as to the fact of Completion of the Project.

Section 2. Materials and Supplies. In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Seller agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

Section 3. Patent Infringement. The Bidder shall save harmless and indemnify the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 4. Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Bidder.

Section 5. Compliance with Statutes and Regulations. The Bidder shall comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Bidder acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. §§287, 1001, as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental Agencies having jurisdiction in the premises.

Section 6. Equal Opportunity Provisions.

a. Bidder's Representations.

The Bidder represents that:

It has ____, does not have ____, 100 or more employees, and if it has, that it has ____, has not ____, furnished the Equal Employment Opportunity-Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Bidder agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that

the proposed subcontractor has filed a current report on Standard Form 100.

The Bidder agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than \$10,000, the Bidder will file such report, as required by law, and notify the Owner in writing of such filing prior to the Owner's acceptance of this Proposal.

b. Equal Opportunity Clause. During the performance of this Contract, the Bidder agrees as follows:

(1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Bidder will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the Bidder's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations and orders.

(6) In the event of the Bidder's noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations or orders, this Contract may be cancelled, terminated or suspended in whole

Rural Utilities Service, USDA

§1726.340

or in part and the Bidder may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Bidder will take such action with respect to any subcontractor purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, That in the event a Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

c. Certificate of Nonsegregated Facilities. The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting room, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Oppor-

tunity Clause, and that it will retain such certifications in its files.

Section 7. Franchises. The Bidder shall be under no obligation to obtain or assist in obtaining: Any franchises, authorizations, permits or approvals required to be obtained by the Owner from Federal, State, County, Municipal or other authorities; or any agreements between the Owner and third parties with respect to any matters incident to the construction and operation of the Project.

Section 8. Nonassignment of Contract. The Bidder shall perform directly and without subcontracting not less than twenty-five per centum (25%) of the construction of the Project, to be calculated on the basis of the total Contract price. The Bidder shall not assign the Contract effected by an acceptance of this Proposal or any interest in any funds that may be due or become due hereunder or enter into any contract with any person, firm or corporation for the performance of the Bidder's obligations hereunder or any part thereof, without the approval in writing of the Owner and of the Surety and Sureties, if any, on any bond furnished by the Bidder for the faithful performance of the Bidder's obligations hereunder. If the Bidder, with the consent of the Owner and any Surety or Sureties on the Contractor's Bond or Bonds, shall enter into a subcontract with any subcontractor for the performance of any part of this Contract, the Bidder shall be as fully responsible to the Owner and the Government for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it.

Section 9. Extension to Successors and Assigns. Each and all of the covenants and agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto.

Section 10. Contractor. Upon acceptance of this Proposal, the successful Bidder shall be the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

Section 11. Approval by the Administrator. No acceptance of this Proposal shall become effective until approved in writing by the Administrator: Provided, however, that no obligations shall arise hereunder unless such approval is given within forty-five (45) days from the date of acceptance by the Owner.

____ (Bidder)
By ____ (President)
____ (Address)
Attest: ____ (Secretary)
Date ____

The Proposal must be signed with the full name of the Bidder. If the Bidder is a partnership, the Proposal must be signed in the partnership name by a partner. If the Bidder is a corporation, the Proposal must be signed

in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

Specifications for Construction

Section 1. Scope of Work. The work covered by this Proposal embraces the complete construction of one or more substations or other major facilities as specified in the Acceptance, any omissions or discrepancies notwithstanding. All material furnished by the Bidder shall be new and in conformance with the Specifications for Construction. All construction work shall be done in a thorough and workmanlike manner in accordance with the Plans, Specifications for Construction and Construction Drawings. Deviations from the Plans, Specifications for Construction, and Construction Drawings shall not be permitted except upon the written permission of the Owner given with the approval of the Administrator.

This contract does not include _____ which is to be done by others.

Section 2. Materials. It is the intent of these specifications that insofar as materials required are included in the Rural Utilities Service "List of Materials Acceptable for use on Systems of RUS Electrification Borrowers," such materials only shall be used. In the event that any materials are required beyond the scope of the "List of Materials Acceptable for use on Systems of RUS Electrification Borrowers," specifications for such materials will be included on the drawings or in a supplement to these specifications.

Section 3. Drawings. The Drawings and Specifications collectively, show the specifications of the material and equipment shown thereon, and include schedules of conduit, cable and other items not readily ascertained from the picture drawings. Such schedules show the quantities, sizes, types and other pertinent information; method of installation, and construction details are indicated clearly. The drawings and specifications in the attached List of Drawings are made a part of these contract Specifications.

Section 4. Description of Construction Units. Each Construction Unit consists of a complete installation of the designated portion of a substation or switching station as specified on the drawings, together with connections to associated equipment. Each Construction Unit represents all labor and material including necessary accessories completely installed and tested in satisfactory operation. Full identification of each Construction Unit and all necessary specifications of the installation shall be shown on the drawings. Items of material in each Construction Unit shall be of the designated size, rating, type, voltage, or other specification in accordance With the drawings. The bill of material drawing for each station should contain adequate identification of the

Construction Units under which the material is to be installed and should show what items of material may be partly or entirely found in the lists of owner-furnished materials. All items of equipment, unless otherwise specified, are mounted on a structure which shall be a Construction Unit of Group A.

Each Construction Unit shall be designated by the letter of the Group to which it belongs and an identifying number. The same item of equipment shall carry the same Construction Unit designation in all the stations. Items of equipment designated by the same Construction Unit in one station shall be of only one kind as to voltage, type and other specifications. The bid sheet for each station shall be prepared separately from other stations and shall contain all unit prices for Construction Units contained in the station. It is intended that in all cases the "Name and Description of Construction Unit" column of the Bid Sheets shall contain sufficient information to identify the Construction Unit.

Additional description to one or more of the Groups may be provided by the Engineer if deemed necessary to clarify the intent of these Specifications for Construction.

Group A. Structures. A Construction Unit consists of a structure, or structures, with bus supports including insulators and fittings, buses, conductors and overhead ground wires to adjacent structures within the station, grounding material to connect equipment with the ground bus, and associated material including mounting brackets, supports for equipment, clamps and connectors, all as specified in the drawings.

Group B. Three-Pole Group Operated Air Break Switches. A Construction Unit consists of one 3-pole group operated air break switch with all accessories and operating mechanisms as specified in the drawings.

Group C. Lightning Arresters. A Construction Unit consists of one single-phase lightning arrester.

Group D. Single Pole Disconnecting Switches. A Construction Unit consists of one single pole disconnecting or by-pass switch as specified in the drawings. If a fuse disconnect switch is specified, the fuse is included with the switch.

Group E. Oil Circuit Breakers. A Construction Unit consists of one complete three-phase power circuit breaker complete with supporting frame and control cabinet, unless shown otherwise in the drawings, mounted as specified in the drawings.

Group F. Oil Circuit Reclosers. A Construction Unit consists of a complete single-phase or three-phase oil circuit recloser as specified in the drawings.

Group G. Meters, Relays and Instrument Transformers. A Construction Unit consists of one meter, relay, potential transformer or current transformer.

Rural Utilities Service, USDA

§1726.341

Group H. Transformers. A Construction Unit consists of one power transformer or one station service transformer either single-phase or three-phase as specified in the drawings.

Group I. Voltage Regulators. A Construction Unit consists of one single-phase or three-phase voltage regulator as specified in the drawings.

Group J. Communications and Supervisory Control Equipment. A Construction Unit consists of carrier current equipment, microwave, or other types of communications and supervisory control equipment as specified in the drawings.

Group K. Conduit and Cable. A Construction Unit consists of the wire, cable, conduit and accessories necessary to complete the installation of equipment in accordance with the specifications and drawings, where such installation has not been included in other Groups.

Group L. Foundations. A Construction Unit consists of concrete footings and foundations except for the fence, as specified in the drawings.

Group M. Site Preparation. A Construction Unit consists of clearing, grading, drainage work, and surfacing, as specified in the drawings.

Group N. Fence. A Construction Unit consists of the complete installation of the fence, gates, etc., as specified in the drawings.

Group O. Station Grounding. A Construction Unit consists of the complete ground bus including ground rods, grounding mats or platforms, except as otherwise provided in other Groups, with connections to structures, equipment, and fence as specified in the drawings.

Group P. Building. A Construction Unit consists of a control building or cabinet, on a foundation of Group L and the facilities and equipment installed therein as specified in the drawings, except as otherwise provided in other Groups.

Other Groups. The Engineer shall specify such additional Groups as may be necessary for the completion of the Project. Description of these Groups shall be provided by an addition to this Section of the Specifications for Construction.

§1726.341 Electric system communications and control equipment contract, RUS Form 786.

The contract form in this section shall be used when required by this part.

ELECTRIC SYSTEM COMMUNICATIONS AND CONTROL EQUIPMENT CONTRACT (INCLUDING INSTALLATION)

Proposal to Furnish, Deliver, and Install Equipment and Materials

To: _____ (hereinafter called the "Purchaser")

The undersigned (hereinafter called the "Seller") hereby proposes to furnish, deliver, install, align and test the equipment and materials, (hereinafter called the "Equipment") described in the plans, specifications and drawings (hereinafter called the "Specifications") attached hereto identified as _____ and made a part hereof, and other Attachments identified as _____ and made a part hereof, for the electric system designated _____, financed in whole or in part by a loan to the Purchaser by the United States of America, acting through the Administrator of the Rural Utilities Service (hereinafter called the "Administrator").

The Seller has become informed as to the location and characteristics of the proposed Equipment and the facilities over which the Equipment is to perform, has become informed as to the kind of facilities required before and during the delivery and installation of the Equipment and has become acquainted with the labor conditions which would affect the work as well as the ecological and environmental criteria to be followed. The Seller agrees that if its Proposal is accepted the following terms and conditions shall govern.

If, in submitting this Proposal, the Seller has made any change in the form of Proposal furnished by the Purchaser, the Seller understands that the Purchaser and the Administrator may evaluate the effect of such change as they see fit or they may exclude the Proposal from consideration.

Article I

Section 1. Proposal Price. The Seller will furnish, deliver, install, align and test the Equipment described in the Specifications for the following sum:

Total Contract Price \$ _____
 Delivery time is _____ calendar days.
 Completion time is _____ calendar days.

A detailed price breakdown by locations, showing equipment pricing and installation pricing, is given in the Attachment identified as _____ and made a part hereof.

Section 2. Changes. The Purchaser, subject to the approval of the Administrator,¹ may from time to time during the performance of the work make such changes, additions to or subtractions from the Specification's which are part of the Proposal as conditions may warrant; provided, however, that, if any change in the work shall require an extension of time, a reasonable extension will be granted if the Seller shall make a written request therefor to the purchaser within ten (10) days after any such change is made and, provided further, that, if the cost to the Seller shall be increased or decreased by any such change or addition, the contract price shall be increased or decreased by the reasonable cost thereof, in accordance with a contract amendment signed by the Purchaser and the Seller and approved by the Administrator,² but no claim for additional compensation for any such change or addition will be considered unless the Seller shall have made a written request therefor to the Purchaser prior to the commencement of work in connection with such change or addition.

Section 3. Taxes. The prices herein set forth do not include any sums which are or may be payable by the Seller or the Purchaser on account of taxes imposed by any taxing authority upon the sale, purchase or use of the Equipment or labor of installation. If any such tax is applicable, the amount thereof shall be stated separately and added to the Proposal price and paid by the Purchaser.

¹As long as the total price of this contract including all amendments is less than 120 percent of the original contract price as stated in the acceptance hereto, amendments executed on RUS Form 238 are not subject to the approval of the Administrator. Whenever an amendment to this contract causes the total amended contract to exceed 120 percent of the original contract price, that amendment and all subsequent amendments to this contract shall be made subject to the approval of the Administrator.

²See Footnote 1.

Article II—Delivery and Installation

Section 1. Time of Completion. The time of delivery of the Equipment and of completion of the work is of the essence of this Contract. The seller will deliver the Equipment within the number of calendar days specified in Article I, Section 1, after the Administrator shall have approved this contract in writing and will prosecute diligently and complete the work within the number of calendar days specified in Article I, Section 1, after such approval. The time for such delivery and completion shall be extended for the period of any reasonable delay due exclusively to causes beyond the control and without the fault of the Seller, including, but not limited to, acts of God, fires, strikes, floods, changes in the Specifications as herein provided, and acts or omissions of the Purchaser with respect to matters for which the Purchaser is solely responsible; provided, however, that no delay in such time for delivery or completion of the work or in the progress of the work shall result in any liability on the part of the Purchaser, and provided further that any claim for extension of time shall be adjusted at the time any such delay occurs or any such change is made.

Section 2. Supervision and Inspection. The Seller will give adequate supervision to the work. He will carefully study and compare all drawings, specifications, and other instructions and will at once report to the Purchaser any error, inconsistency or omission which he may discover. The Seller will keep on his work during its progress a competent superintendent and any necessary assistants, all satisfactory to the Purchaser. The Superintendent shall represent the Seller in his absence and all directions given to him shall be as binding as if given to the Seller. When requested, such directions shall be confirmed in writing.

Section 3. The Purchaser will make available during installation a competent representative to coordinate installation activities with the Seller.

Section 4. Alignment, Inspection and Tests. The Seller shall adjust and align the Equipment to perform in accordance with the Specifications and furnish in writing to the Purchaser data to show the state of adjustment of the Equipment. Immediately upon completion of the installation and alignment of the Equipment the Seller shall provide the necessary test equipment and perform the inspections and tests specified in the Specifications under the direct supervision of the Purchaser or its Engineer. A competent representative of the Purchaser or his Engineer will be available to supervise and witness these tests immediately upon completion of installation and alignment by the Seller and to determine for the purchaser that the performance of the equipment

meets the Specifications. Such determination, however, shall not preclude subsequent rejection pursuant to Section 7 of this Article II. The Seller shall furnish in writing to the Purchaser the results of all tests. All Equipment furnished hereunder shall be subject to the inspection, tests, and approval of the Purchaser and the Administrator. The Purchaser and the Administrator shall have the right to inspect all records of the Seller and of any subcontractor relevant to the installation work. The Seller shall provide all reasonable facilities necessary for such inspection and tests.

Section 5. If as a result of the tests and measurements set forth in Section 4 above, the Performance Specifications of the Equipment cannot be met due to inaccuracies, or inadequacies in the system data provided in the Specifications, the Purchaser and Seller shall determine what corrective measures are necessary and whether these corrections shall be made by the Purchaser or the Seller.

If it is determined that the Seller shall make the corrections, the Purchaser will reimburse the Seller pursuant to a contract amendment, subject to the approval of the Administrator,³ for such reasonable additional expenses for the corrections, realignment and retesting the Seller is required to perform pursuant to this amendment.

Where it is determined that the Purchaser will make the corrections, the Purchaser will reimburse the Seller pursuant to a contract amendment, subject to the approval of the Administrator,⁴ for such reasonable additional expenses for realignment and retesting the Seller is required to perform pursuant to this amendment, including, if necessary, the added expense of returning to the project, where necessary, for reperforming alignment and testing.

Section 6. Employees. The Purchaser shall have the right to require the removal from the work of any employee of the Seller if in the judgment of the Purchaser such removal shall be necessary in order to protect the interest of the Purchaser.

Section 7. Defective Workmanship and Materials. Notwithstanding the acceptance of workmanship, materials or equipment or the giving of any certificate with respect to the Completion of the Work, if during performance hereunder or within one year after completion or within such longer period as the Equipment or any part thereof may be guaranteed by the Seller and Manufacturer, the workmanship, materials or equipment, except as may be otherwise provided in the Specifications, shall be found to be defective or not in conformity with the Specifications, the Seller shall remedy or replace at its expense such workmanship, materials or equip-

ment within thirty (30) days after notice of the existence thereof shall have been given to the Seller by the Purchaser.

Article III—Payments and Releases of Liens

Section 1. Payment to Seller.

(a) The Purchaser shall pay the Seller upon the basis of estimates by the Seller recommended by the supervising engineer, if any, and approved by the Purchaser of the work completed, the following percentages of the price of the equipment for each location set forth in Article I, Section 1, as and if revised: 45% when 50% of the equipment for each location has been delivered at the site of the Project; 90% when all the equipment for each location has been delivered at the site of the Project.

(b) Upon completion of installation of the equipment for each location, the Purchaser shall pay the Seller 90% of the Total price for such location.

(c) Upon Completion of the Installation of the Equipment, but prior to the payment to the Seller of any amount in excess of ninety percent (90%) of the Total Contract Price, the supervising engineer, if any, of the Purchaser or the Purchaser shall inspect the work performed hereunder and if the work shall be found acceptable and all provisions hereunder fully performed, the supervising engineer, if any, of the Purchaser shall certify as to that fact and as to the amount of the balance found to be due to the Seller. Upon acceptance by the Purchaser, the Purchaser shall pay to the Seller all unpaid amounts to which the Seller shall be entitled hereunder; provided, however, such final payments shall be made not later than 120 days after completion of the work, unless such acceptance by the Purchaser shall be withheld because of the fault of the Seller.

Section 2. Release of Liens. Upon the Completion of the Installation of the Equipment by the Seller, but prior to the payment to the Seller of any amount in excess of ninety percent (90%) of the Total Contract Price, the Seller will deliver to the Purchaser, in duplicate, releases of all liens and of rights to claim any lien from manufacturers, materialmen and subcontractors who have furnished materials or services for the work and a certificate by the Seller in a form approved by the Administrator, to the effect that all labor has been paid and that all such releases have been submitted to the Purchaser for approval.

In lieu of releases of liens, and if the Administrator shall so approve, the Seller may deliver to the Purchaser, in duplicate, (1) a certificate, in a form approved by the Administrator, that all manufacturers, materialmen and subcontractors who have furnished materials or services for the Project have been paid in full, and (2) an agreement to hold the Purchaser harmless against any liens arising out of the Seller's

³ See Footnote 1.

⁴ See Footnote 1.

performance hereunder which may have been or may be filed against the Purchaser.

Article IV—Particular Undertakings of the Seller

Section 1. Protection to Persons and Property. At all times when Equipment is being delivered and installed the Seller will exercise reasonable precautions for the safety of employees on the work and of the public, and will comply with all applicable provisions of Federal, State and Municipal safety laws and building and construction codes. All machine and equipment and other physical hazards shall be guarded in accordance with the “Manual of Accident Prevention in Construction” of the Associated General Contractors of America, unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

(a) The Seller will at all times keep the premises free from accumulations of waste material or rubbish caused by his employees or work, and at the completion of the work he will remove all rubbish and all his tools, scaffolding and surplus materials and will leave his work “broom clean.”

(b) The Seller will perform work in such manner as to maximize preservation of aesthetics and conservation of natural resources, and minimize marring and scarring of the landscape and silting of streams. There will be no depositing of trash in streams or waterways. Herbicides, other chemicals or their containers will not be deposited in or near streams, waterways or pastures. The Seller will follow, under the general direction of the Purchaser, the criteria relating to environmental protection as specified herein by the Purchaser.

(c) The work, from its commencement to completion, or to such earlier date or dates when the Purchaser may take possession and control, shall be under the charge and control of the Seller and during such period of control by the Seller all risks in connection therewith and the materials to be used therein, whether owned by the Seller or Purchaser, shall be borne by the Seller. The Seller will make good and fully repair all injuries and damages to the work or any portion thereof under the control of the Seller by reasons of any act of God, or any other casualty or cause whether or not the same shall have occurred by reason of the Seller's negligence.

(i) To the maximum extent permitted by law, Seller shall defend, indemnify, and hold harmless Purchaser and Purchaser's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Seller's employees) and loss, damage to or destruction

of Purchaser's property or the property of any other person or entity (including but not limited to Seller's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Seller, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Seller liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Purchaser.

(ii) To the maximum extent permitted by law, Seller shall defend, indemnify, and hold harmless Purchaser and Purchaser's directors, officers, and employees from all liens and claims filed or asserted against Purchaser, its directors, officers, and employees, or Purchaser's property or facilities, for services performed or materials or equipment furnished by Seller, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Seller shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Purchaser promptly when it has done so. If Seller does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Purchaser shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Seller.

(iii) Seller shall provide to Purchaser's satisfaction evidence of Seller's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

(d) Monthly reports of all accidents will be promptly submitted by the Seller, giving such data as may be prescribed by the Purchaser.

Section 2. Delivery of Possession and Control to Purchaser. Upon written request of the Purchaser, the Seller shall deliver to the Purchaser full possession and control of any completed location included in the work, provided the Seller shall have been paid at least 90% of such Total Location Price. Upon such delivery of the possession and control of any such location to the Purchaser, the risks and obligations of the Seller, as set forth in Article IV, Section 1(b) hereof, with respect to such location shall be terminated; provided however, that nothing herein contained shall relieve the Seller of any liability with respect to defective workmanship or materials as specified in Article II, Section 7, hereof.

Section 3. Insurance. The Seller shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage of not less than \$1 million each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than \$1 million per person and \$1 million per occurrence, and property damage limits of \$1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Purchaser shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Purchaser shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Purchaser. The Seller shall furnish the Purchaser a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Purchaser of any cancellation or material change in the insurance.

Section 4. Purchase of Materials. The Seller shall purchase all materials and supplies outright and not subject to any conditional sales agreements, bailment lease or other agreement reserving unto the Seller any right, title or interest therein. Materials and Supplies shall become the property of the Purchaser as the Purchaser makes payments therefor to the Seller in accordance with Ar-

ticle III, Section 1(a). Unless otherwise specified, all materials shall be new.

Section 5. Assignment of Guarantees. All guaranties of materials and workmanship running in favor of the Seller shall be transferred and assigned to the Purchaser on completion of the work and at such time as the Seller receives final payment.

Section 6. Patent Infringement. The Seller shall hold harmless and indemnify the Purchaser from any and all claims, suits, and proceedings for the infringement of any patent or patents covering any, equipment, materials, supplies, or installation methods used in the work. The Seller shall, at its own cost (and Purchaser agrees to permit Seller to do so) defend any suits which may be instituted by any, party against the Seller for alleged infringement of patents relating to the Seller's performance hereunder.

Section 7. Compliance with Statutes and Regulations. The Seller shall comply with all applicable statutes, ordinances, rules and regulations pertaining to the work. The Seller acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statutes (48 Stat. 948), and all regulations issued pursuant thereto, and 18 U.S.C. §§287,1001 as amended and the Seller agrees to comply with the provisions of all of such statutes and regulations.

Article V—Remedies

Section 1. Completion on Seller's Default. If default shall be made by the Seller or by any subcontractor in the performance of any of the work hereunder, the Purchaser, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Seller and the surety or sureties upon the Seller's Bond or Bonds, if any, a written notice requiring the Seller to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Seller such default shall be corrected or arrangements for the correction thereof, satisfactory to both the Purchaser and the Administrator, shall be made by the Seller or its surety or sureties, the Purchaser may take over the performance of the Seller's obligations hereunder and prosecute the same to completion by contract or otherwise for the account and at the expense of the Seller, and the Seller and its surety or sureties shall be liable to the Purchaser for any cost or expense in excess of the contract price occasioned thereby. In such event, the purchaser may take possession of and utilize, in completing the work, any tools, supplies, equipment, appliances and plant belonging to the Seller which may be situated at the site of the installation work. The Purchaser, in such contingency, may exercise any rights, claims or demands which the Seller may have against third persons in connection herewith and for such

§ 1726.341

purpose the Seller does hereby assign, transfer and set over unto the Purchaser all such rights, claims and demands.

Section 2. Enforcement of Remedies by Administrator. The Administrator may on behalf of the Purchaser exercise any right or enforce any remedy which the Purchaser may exercise or enforce hereunder.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Purchaser or the Administrator shall be cumulative and shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election.

Article VI—Miscellaneous

Section 1. Definitions. (a) The contract documents shall consist of the Proposal and Acceptance, the Contractor's Bond and the Specifications.

(b) The term "Completion of Installation" shall mean full performance by the Seller of the Seller's obligations under the Contract and all amendments and revisions thereof, except that it shall not include the final acceptance tests nor performance of the Seller's obligations in respect of (i) releases of liens and Certificate of Seller under Article III, Section 2 hereof, (ii) other final documents. The term "Completion of the Work" shall mean full performance by the Seller of the Seller's obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion signed by the supervising engineer and approved by the Purchaser or signed by the Purchaser, if the Purchaser shall not employ an Engineer, and approved in writing by the Administrator within a reasonable time after completion shall be conclusive evidence as to the fact of completion and the date thereof.

Section 2. Materials and Supplies. In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Seller agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

7 CFR Ch. XVII (1–1–97 Edition)

Section 3. Equal Opportunity Provisions.
(a) Seller's Representations.

The Seller represents that:

It has ____, does not have ____, 100 or more employees, and if it has, that it has ____, has not ____, furnished the Equal Employment Opportunity—Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Seller agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

The Seller agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than \$10,000 the Seller will file such report, as required by law, and notify the Purchaser in writing of such filing prior to the Purchaser's acceptance of this Proposal.

(b) Equal Opportunity Clause. During the performance of this Contract, the Seller agrees as follows:

(1) The Seller will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Seller will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited, to the following: Employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination, rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Seller agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Seller will, in all solicitations or advertisements for employees placed by or on behalf of the Seller, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Seller will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representative of the Seller's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Seller will comply with all provisions of Executive Order 11246 of September

Rural Utilities Service, USDA

§1726.341

24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Seller will furnish all information and reports required by Executive Order 11246 of September 21, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Seller's noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations or orders, this Contract may be cancelled, terminated or suspended in whole or in part, and the Seller may be declared ineligible for further Government contracts or federally-assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.

(7) The Seller will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Seller will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, That in the event a Seller becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Seller may request the United States to enter into such litigation to protect the interests of the United States.

(c) Certificate of Nonsegregated Facilities. The Seller certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Seller certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Seller agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting room, work areas, restrooms and washrooms, restaurants and other eating

areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Seller agrees that (except where it has obtained identical certificates from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 4. Bond. The Seller will furnish to the Purchaser, for a contract in excess of \$100,000 a bond in a penal sum not less than the Proposal price and in the form attached hereto and with a Surety or Sureties listed by the United States Treasury Department as acceptable Sureties.

Section 5. License. The Seller shall comply with all applicable construction codes.

(a) The Seller warrants that he possesses contractor's license number _____ issued to him by the State of _____ in which the work is located, and said license expires on _____, 19____.

(b) The Seller warrants that no license is required in the State in which the work is located.

(Cross out that subsection which does not apply.)

Section 6. Nonassignment of Contract. The Seller will not assign the Contract effected by acceptance of this Proposal, or any part thereof, or enter into any contract with any person, firm or corporation, for the performance of the Seller's obligations hereunder or any part hereof, without the approval in writing of the Purchaser and the Surety or Sureties on the Contractor's Bond or Bonds, if any; provided, however, the Seller may subcontract the whole or any part of the installation work to be performed at the installation site (as distinguished from furnishing and delivery of equipment and materials). If the Seller, with the consent of the Purchaser and the Surety or Sureties on the Contractor's Bond or Bonds, if any, shall enter into any subcontract with any subcontractor for the Performance of any part of the installation work to be performed at the installation site, the Seller shall be as fully responsible to the Purchaser and the United States of America for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Seller would be for its own acts and omissions and those of persons directly employed by it.

§ 1726.342

7 CFR Ch. XVII (1-1-97 Edition)

Section 7. Approval of the Administrator. The acceptance of this Proposal by the Purchaser shall not create a contract unless such acceptance shall be approved in writing by the Administrator within ninety (90) days after the date of the Proposal.

§ 1726.342 Distribution line extension construction contract (labor and materials), RUS Form 790.

The contract form in this section shall be used when required by this part.

DISTRIBUTION LINE EXTENSION CONSTRUCTION CONTRACT (LABOR AND MATERIALS)

Proposal

To: _____ (hereinafter called the "Owner").

Article I—General

Section 1—Offer to Construct. The undersigned (hereinafter called the "Contractor") hereby proposes to furnish labor, materials, and equipment for, and construct for the prices hereinafter stated, the rural electric project _____—19____ Line Extensions (hereinafter called "Project") in strict accordance with the Plans, Specifications, and Construction Drawings hereinafter referred to. The Contractor understands and agrees that the Project will consist of line extensions and additions and line changes or similar work usually associated with overhead or underground distribution system improvement or extension work all located within the area served or ultimately to be served by the Owner and that the exact location and scope

of individual sections of the Project (hereinafter called "Sections") will be made known to the Contractor from time to time as provided in Article II, Section 1 hereof; and provided, however, that the Contractor shall not be obligated to start construction of any Section unless the cost of construction of the Section computed on the unit prices of this Proposal shall amount to at least _____ dollars (\$____) and provided further that the Owner shall be obligated to release to the Contractor for construction at least one Section pursuant to the provisions of this Proposal.

Section 2—Additional Projects. From time to time the owner and the Contractor may enter into negotiations for the performance of work at prices which may differ from those in the Proposal (such work being hereinafter called "Additional Projects"). Except as may otherwise be agreed upon in writing by the Owner and the Contractor at the time the supplemental contract for the Additional Project is negotiated, the provisions of the Contract for the Project shall apply.

Section 3—Proposal on Unit Basis. The Contractor understands and agrees that the various Construction Units considered in this Proposal are defined by symbols and descriptions in this Proposal, that the Proposal is made on a unit basis, and that the Owner may specify, as provided in Article II, Section 1 hereof, any number or combination of Construction Units which the Owner, may deem necessary for the construction of the Project. If kinds of Construction Units for which prices are not established in this Proposal are necessary for the construction of the Project, the prices of such additional Units shall be as agreed upon in writing by the Owner and the Contractor prior to the time of installation. The unit labor prices herein set forth are applicable to work performed on unenergized lines. Such unit labor prices shall be increased by _____ (____) percent for all units installed on energized lines in accordance with instructions of the Owner, as provided in Article II, Section 1g.

Section 4—Description of Contract. The Specifications and Construction Drawings set forth in: RUS Form 804, Specifications and Drawings for 7.2/12.5 kV Line Construction; RUS Form 803, Specifications and Drawings for 14.4/24.9 kV Line Construction; RUS Form 806, Specifications and Drawings for Underground Electric Distribution; as applicable, which by this reference are incorporated herein, together with the Plans, Proposal and Acceptance constitute the Contract. The Plans, consisting of maps and special drawings, and approved modifications in standard specifications are attached hereto and identified as follows: _____.

Section 5—Familiarity with Conditions. The Contractor acknowledges that it has made a careful examination of the site of the Project and of the Plans, Specifications and

Rural Utilities Service, USDA

§1726.342

Construction Drawings, and has become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of equipment, tools, and other facilities required before and during the construction of the Project and has become acquainted with the availability status of materials and with the labor conditions which would effect work on the Project.

Section 6—License. The Contractor warrants that a Contractor's license is ____ is not ____ required, and if required, it possesses Contractor's License No. ____ for the State of ____ in which the Project is located, and said license expires on ____, 19____.

Section 7—Contractor's Resources. The Contractor warrants that it possesses adequate financial resources for the performance of the work covered by this Proposal and that it will provide necessary tools and equipment and a qualified superintendent and other employees.

Section 8—Changes in Construction. The Contractor agrees to make such changes in construction previously installed in the Project by the Contractor as required by the Owner on the following basis: The cost of labor shall be the reasonable cost thereof as agreed upon by the Contractor and the Owner but in no event shall it exceed two (2) times the labor price quoted in the Proposal for the installation of the unit to be changed. Such compensation shall be in lieu of any other payment for the installation and removal of the original unit but shall not include the cost of the installation, if any, of a new or replacing unit, payment for which shall be made at the unit price as quoted in the Proposal.

No payment shall be made to the contractor for correcting errors or omissions on the part of the Contractor which result in construction not in accordance with the Plans and Specifications.

Section 9—Materials and Equipment. The Contractor agrees to furnish and use in the construction of the Project under this Proposal, only such materials and equipment as are included on the current "List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers," including revisions adopted prior to construction.

The Contractor further agrees to furnish and use guy wire with ASTM Class ____ (Owner to insert A or B) zinc coating.

All leads on equipment such as transformers, reclosers, etc., shall be of #6 minimum copper conductivity using ____ (Owner to insert stranded soft drawn copper or aluminum alloy) conductor. All conductor ties on insulators shall be of the materials and methods shown in the following Type Guide Drawings: ____ (Owner to insert appropriate drawing numbers.)

Ground rods and butt-type grounding plates shall be ____.(Owner to insert galvanized steel or copper.)

Underground primary cables shall have ____ coated copper neutral (Owner to insert round or flat.)

The Contractor further agrees to furnish poles, crossarms, and other timber products, of which the physical characteristics, method of treatment, type of preservative, instructions on inspection and general procedure shall be in accordance with RUS standards and requirements.

Crossarms shall be ____ (Owner to insert Douglas Fir or Southern Yellow Pine), treated with ____ (Owner to insert type of preservative.)

The Contractor agrees that the prices for poles, crossarms, and other timber products set forth herein shall include the cost of preservative treatment and inspection or insured warranty. The Contractor further agrees to obtain from the supplier inspection and treatment reports or insured warranties, for checking against the delivery timber, and to submit such reports or warranties to the Owner as one of the prerequisites to monthly and final payments.

Section 10—Owner-Furnished Materials. a. The Contractor understands and agrees that the Owner may, with approval of the Contractor, furnish to the Contractor some of the materials and equipment required for construction of the Project, (hereinafter called "Owner-Furnished Materials"). The quantity, type, and value of Owner-Furnished Materials for each Section shall be as agreed upon by the Contractor and Owner prior to the start of construction of each Section of the Project. The Owner shall make such materials and equipment available to the Contractor as provided in Article II, Section 1, b, and the Contractor will give to the Owner a receipt in such form as the Owner shall approve.

b. The value of the completed Construction Units certified to by the Contractor each month pursuant to Article III, Section 1, a, of this Proposal shall be reduced by an amount equal to the value of the Owner-Furnished Materials installed by the Contractor during the preceding month. Only ninety percent (90%) of the remainder shall be paid prior to the Completion of the Section. Owner-Furnished Materials, if any, not required for the Section, shall be returned to the Owner by the Contractor upon Completion of Construction of the Section. The value of all Owner-Furnished Materials not installed in the Section of the Project or returned to the Owner shall be deducted from the final payment to the Contractor for the Section.

Section 11—References to Materials. The references in this Proposal to "Materials",

except in Article IV, Section 1.f, shall be understood to mean only materials to be furnished by the Contractor.

Section 12—Taxes. The unit prices for Construction Units in this Proposal include provisions for the payment of all monies which will be payable by the Contractor or the Owner in connection with construction of the Project on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies or equipment to be incorporated in the Project as part of such Construction Units. The Contractor agrees to pay all such taxes except on Owner-Furnished Materials and it is understood that, as to Owner-Furnished Materials, the values as agreed to by the Owner and Contractor for such materials include such taxes, if applicable. The Contractor will furnish to the appropriate taxing authorities all required information and reports pertaining to materials used on construction of the Project except as to Owner-Furnished Materials.

Article II—Construction

Section 1—Time and Manner of Work. The Contractor agrees to be prepared to commence the construction of the Project within fifteen (15) calendar days after written notice by the Owner of the acceptance of the Proposal. The Contractor agrees to commence construction of a Section within ____ (____) days after receipt in writing from the Owner of the following:

a. Location and number of the various Construction Units required for construction of the Section (hereinafter called the “Staking Sheets”).

b. Itemized list including appropriate Unit prices, of the Owner-Furnished Materials to be used in the construction of the Section and an authorization by the Owner for the Contractor to obtain such materials from the Owner’s warehouse located at ____.

c. A schedule showing the rate at which construction of the Section shall proceed and the total number of calendar days (excluding Sundays) to be allowed for completion; provided, however, that the required completion time for any Section shall not be less than ____ (____) days or ____ (____) days per mile of line, whichever is the greater, which days shall be calendar days (excluding Sundays). The time of the completion of the Section is of the essence of the contract to be effected by acceptance of this Proposal.

d. A statement that all required easements and rights-of-way have been obtained from the owners of the properties across which the Section is to be constructed (including tenants who may reasonably be expected to object to such construction).

e. A statement that all necessary staking has been completed.

f. A statement that all necessary funds for prompt payment for the construction of the Section will be available.

g. Specific instruction as to location and extent of work to be performed on energized lines, if any. The Contractor will not be required to dig holes, set poles, install anchors, install underground conduit, perform any plowing for the installation of underground cable, or dig trenches if there are more than six (6) inches of frost in the ground nor to perform any construction on such days when in the judgment of the Owner snow, rain, or wind, or the results of snow, rain, or frost make it impracticable to perform any operation of construction; provided further that the Contractor will not perform any plowing for the installation of underground cable on public roads or highways if there are more than two (2) inches of frost in the ground. To the extent of the time lost due to the conditions described herein and approved in writing by the Owner, the time of completion set out above will be extended. The time for completion shall be extended for a period of any reasonable delay (other than a delay resulting from the failure of the Contractor to secure sufficient labor) which is due exclusively to causes beyond the control and without the fault of the Contractor including acts of God, fires, floods, inability to obtain materials, direction of the Owner to cease construction as herein provided, and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible; Provided, however, that no such extension of time for completion shall be granted the Contractor unless within ten (10) days after the happening of any event relied upon by the Contractor for such an extension of time the Contractor shall have made a request therefor in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

Section 2—Changes in Plans, Specifications and Drawings. The Owner may, from time to time during the progress of the construction of the Project, make such changes in, additions to, or subtractions from the Plans, Specifications, and Construction Drawings as conditions may warrant; Provided, however, that if the cost to the Contractor shall be materially increased by any such change or addition, the Owner shall pay the Contractor for the reasonable cost thereof in accordance with a construction contract amendment signed by the Owner and the Contractor, but no claim for additional compensation for any such change or addition will be considered unless the Contractor shall have made a written request therefor to the Owner prior to the commencement of

work in connection with such change or addition.

Section 3—Supervision and Inspection. a. The Contractor shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the “Superintendent”) who shall be present at all times during working hours where construction is being carried on. The Contractor shall also employ, in connection with the construction of the Project, capable, experienced, and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent by the Owner shall be binding upon the Contractor.

b. The Owner reserves the right to require the removal from the Project of any employee of the Contractor if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner shall have the right to require the Contractor to increase the number of his employees and to increase or change the amount or kinds of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner; but the failure of the Owner to give any such directions shall not relieve the Contractor of his obligations to complete the work within the time and in the manner specified in this Proposal.

c. The manner of construction of the Project and all materials and equipment used therein, shall be subject to the inspection, tests, and approval of the Owner. The Owner shall have the right to inspect all payrolls and other data and records of the Contractor relevant to the work. The Contractor will provide all reasonable facilities necessary for such inspection and tests. The Contractor shall have an authorized agent accompany the inspector when final inspection is made and, if requested by the Owner, when any other inspection is made.

d. In the event that the Owner shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Contractor, if requested by the Owner, to have an inspection made by an engineer approved by the Owner for the purpose of determining the exact nature, extent, and location of such defects.

Section 4—Defective Materials and Workmanship. a. The acceptance of any materials, equipment (except owner-furnished materials) or any workmanship by the Owner shall not preclude the subsequent rejection thereof if such materials, equipment, or workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, by and at the expense of the Contractor. Any such condemned material or

equipment shall be immediately removed from the site of the Project by the Contractor at the Contractor’s expense. The Contractor shall not be entitled to any payment hereunder so long as any defective materials, equipment or workmanship in respect to the Project, of which the Contractor shall have had notice, shall not have been replaced or remedied, as the case may be.

b. Notwithstanding any certificate which may have been given by the Owner, if any materials, equipment (except owner-furnished materials) or any workmanship which does not comply with the requirements of this Contract shall be discovered within one (1) year after Completion of Construction of the Project, the Contractor shall replace such defective materials or equipment or remedy any such defective workmanship within thirty (30) days after notice in writing of the existence thereof shall have been given by the Owner. If the Contractor shall be called upon to replace any defective materials or equipment or to remedy defective workmanship as herein provided, the Owner, if so requested by the Contractor shall deenergize that section of the Project involved in such work. In the event of failure by the Contractor to do so, the Owner may replace such defective materials or equipment or remedy such defective workmanship, as the case may be, and in such event the Contractor shall pay to the Owner the cost and expense thereof.

Section 5—Materials Removed. The Contractor will return to the Owner or reuse in the construction of other assembly units all materials removed from the lines under Section H—Conversion Assembly Units and Section I—Removal Assembly Units. Upon completion of each Section of the Project the Contractor will return to the Owner all materials, including usable materials as well as scrap, furnished by the Owner in excess of those required for the construction of the Section as determined from the Final Inventory approved by the Owner. The Contractor will reimburse the Owner at the current invoice cost to the Owner for loss and for breakage through Contractor’s negligence of materials furnished by the Owner to the Contractor and for materials removed from the lines by the Contractor.

Section 6—Term of Contract. It is understood and agreed that, notwithstanding any other provisions of this Contract, the Contractor will not be required to commence any construction after the expiration of one year ____, two years ____ following acceptance of this Proposal by the Owner.

Article III—Payment

Section 1—Payments to Contractor. a. Within the first fifteen (15), days of each calendar month, the Owner shall make partial payment to the Contractor for construction accomplished during the preceding calendar

month on the basis of completed Construction Units furnished and certified to by the Contractor and approved by the Owner solely for the purpose of payment: Provided, however, that such approval by the Owner shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate approved during the construction of a Section shall be paid by the Owner to the Contractor prior to completion of the Section. Upon completion by the Contractor of the construction of a Section, the Contractor will prepare a Final Inventory of the Section showing the total number and character of Construction Units and, will certify it to the Owner together with a certificate of the total cost of the construction performed. Upon the approval of such certificates, the Owner shall make payment to the Contractor of all amounts to which the Contractor shall be entitled thereunder which shall not have been paid.

b. The Contractor shall be paid on the basis of the number of Construction Units actually installed at the direction of the Owner, as shown by the Inventory based on the Staking Sheets: Provided, however, that the total cost shall not exceed the maximum Contract price for the construction of the Project, unless such excess shall have been approved in writing by the Owner. It is understood and agreed that this maximum Contract price is _____ dollars (\$_____). It is also agreed that the Contractor shall not be entitled to any claim for damages on account of any reasonable additions to or subtractions from the Project, or of any delay occasioned thereby, or of any changes in the routing of the lines.

c. No payment shall be due while the Contractor is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Contractor the amount of any claim by a third party against either the Contractor the Owner based upon an alleged failure of the Contractor to perform the work hereunder in accordance with the provisions of this Contract.

Section 2—Certificate of Contractor and Indemnity Agreement—Line Extensions. Upon the completion of Construction of any Section of the Project but prior to payment to the Contractor of any amount in excess of 90 percent (90%) of the total cost of all Construction Units comprising the completed Section, the Contractor shall deliver to the Owner in the form attached hereto, (1) a certificate that all persons who have furnished labor in connection with the Project and all manufacturers, materialmen, and subcontractors who have furnished materials or services for the Project have been paid in full, and (2) an agreement to hold the Owner harmless against any liens arising out of the Contractor's performance hereunder which may have been or may be filed against the Owner.

Article IV—Particular Undertakings of the Contractor

Section 1—Protection to Persons and Property. The Contractor shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

a. The Contractor shall at no time and under no circumstances cause or permit any employee of the Contractor to perform any work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in accordance with Article II, Section 1, subsection g.

b. The Contractor shall so conduct the construction of the Project as to cause the least possible obstruction of public highways.

c. The Contractor shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances, and regulations or by local conditions.

d. The Contractor shall do all things necessary or expedient to protect properly any and all parallel, converging, and intersecting lines, joint line poles, highways, and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways, or other property are damaged in the course of the construction of the Project, the Contractor shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

e. Where the right-of-way of the Project traverses cultivated lands, the Contractor shall limit the movement of his crews and equipment so as to cause as little damage as possible to crops, orchards, or property and shall endeavor to avoid marring the lands. All fences which are necessarily opened or moved during the construction of the Project shall be replaced in as good condition as they were found and precautions shall be taken to prevent the escape of livestock. Except as otherwise provided in the descriptions of underground plowing and trenching assembly units, the Contractor shall not be responsible for loss of or damage to crops, orchards, or property (other than livestock) on the right-of-way necessarily incident to the construction of the Project and not caused by negligence or inefficient operation of the

Contractor. The Contractor shall be responsible for all other loss of or damage to crops, orchards, or property, whether on or off the right-of-way, and for all loss of or damage to livestock caused by the construction of the Project.

f. The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control of the Contractor and during such period of control by the Contractor all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Contractor. The Contractor shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Contractor by reason of any Act of God or other casualty or cause whether or not the same shall have occurred by reason of the Contractor's negligence.

(i) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Contractor's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Contractor's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Contractor, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Contractor liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Contractor, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Contractor shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Contractor does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Contractor.

(iii) Contractor shall provide to Owner's satisfaction evidence of Contractor's ability

to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

g. Any and all excess earth, rock, debris, underbrush, and other useless material shall be removed by the Contractor from the site of the Project as rapidly as practicable as the work progresses.

h. Upon violation by the Contractor of any provisions of this section, after written notice of such violation given to the Contractor by the Owner, the Contractor shall immediately correct such violation. Upon failure of the Contractor to do so the Owner may correct such violation at the Contractor's expense.

i. The Contractor shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

j. The Contractor shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the Owner that proper authorization has been received from the owner of the property, and the Contractor shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on his land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

Section 2—Insurance. The Bidder shall take out and maintain throughout the period of this Agreement the following types and minimum amounts of insurance:

a. Workers' compensation and employer's liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employee or employee is not subject to workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

b. Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage of not less than \$1 million each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

c. Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or

§ 1726.342

death of not less than \$1 million each occurrence, and property damage limits of \$1 million for each occurrence. This required insurance may be in a policy of policies of insurance, primary and excess including the umbrella or catastrophe form. The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection “b” and “c” of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections “b” and “c” of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3—Bond. If the estimated cost of the construction of a Section shall exceed \$100,000, the Contractor agrees to furnish prior to the commencement of such construction, a bond in the penal sum not less than the estimated cost of such section in the form attached hereto with a Surety or Sureties listed by the United States Treasury Department as acceptable sureties. In the event that the Surety or Sureties on the performance bond delivered to the Owner shall at any time become unsatisfactory to the Owner, the Contractor agrees to deliver to the Owner another or an additional bond.

Section 4—Delivery of Possession and Control to the Owner. Upon written request of the Owner, the Contractor will deliver to the Owner full possession and control of any portion of the Project provided the Contractor shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of possession and control to the Owner, the risks and obligations of the Contractor as set forth in Section 1f of this Article IV with respect to such portion so delivered to the Owner, shall be terminated; Provided, however, that nothing herein contained shall relieve the Contractor of any liability with respect to defective workmanship as specified in Article II, Section 4.

Section 5—Purchase of Materials. The Contractor shall purchase all materials and supplies outright and not subject to any conditional sales agreement, bailment lease, or other agreement reserving to the seller any right, title, or interest therein. All materials and supplies shall become the property of the Owner when erected in place.

Section 6—Assignment of Guarantees. All guarantees of materials and workmanship

7 CFR Ch. XVII (1–1–97 Edition)

running in favor of the Contractor shall be transferred and assigned to the Owner on Completion of Construction and at such times as the Contractor receives final payment.

Article V—Remedies

Section 1—Completion on Contractor’s Default. If default shall be made by the Contractor or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Contractor and the Surety, if any, a written notice requiring the Contractor to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Contractor and the Surety, if any, such default shall be corrected or arrangements for the correction thereof satisfactory to the Owner shall be made, the Owner may take over the construction of the Project and prosecute the same to completion by contract or otherwise for the account and at the expense of the Contractor, and the Contractor shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliance, and plant belonging to the Contractor or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims, or demands which the Contractor may have against third persons in connection with this Proposal and for such purpose the Contractor does hereby assign, transfer, and set over unto the Owner all such rights, claims, and demands.

Article VI—Miscellaneous

Section 1—Patent Infringement. The Contractor will save harmless and indemnify the Owner from any and all claims, suits, and proceedings for the infringement of any patent or patents covering any equipment used in the work.

Section 2—Materials and Supplies. In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize

Rural Utilities Service, USDA

§1726.342

such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Contractor agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

Section 3—Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Contractor.

Section 4—Compliance with Statutes and Regulations. The Contractor will comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Contractor acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called “Kick-Back” Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. §§287, 1001, as amended. The Contractor understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental agencies having jurisdiction in the premises.

Section 5—Equal Opportunity Provisions. a. Contractor's Representations.

The Contractor represents that:

It has ____, does not have ____, 100 or more employees, and if it has, that it has ____, has not ____, furnished the Equal Employment Opportunity—Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964. The Contractor agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

The Contractor agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than \$10,000, the Contractor will file such report, as required by law, and notify the Owner in writing of such filing prior to the Owner's acceptance of this Proposal.

b. Equal Opportunity Clause. During the performance of this Contract, the Contractor agrees as follows: (1) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following:

Employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The Contractor will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the Contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Contractor's non-compliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be cancelled, terminated, or suspended in whole or in part, and the Contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Contractor will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any

§ 1726.342

subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event a Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

c. **Certificate of Nonsegregated Facilities.** The Contractor certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Contractor certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Contractor agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Contractor agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 6—Franchises and Rights-of-way. The Contractor will be under no obligation to obtain or assist in obtaining any franchises, authorizations, permits, or approvals required to be obtained by the Owner from Federal, State, County, municipal or other authority; any rights-of-way over private lands or any agreements between the Owner and third parties with respect to the joint use of poles, crossings or any other matter incident to the construction and operation of the Project.

Section 7—Nonassignment of Contract. The Contractor will not assign the Contract effected by an acceptance of this Proposal or any part thereof or enter into any contract with any person, firm or corporation for the

7 CFR Ch. XVII (1–1–97 Edition)

performance of the Contractor's obligations thereunder, or any part thereof, without the approval in writing of the Owner.

Section 8—Definitions. a. The term "Owner" shall also include an engineer employed by the Owner, or a firm or engineer retained by the Owner, and designated by the Owner to act in that capacity. The Contractor will be notified in writing by the Owner of those designated to act for the Owner at the time of acceptance of this Proposal.

b. The term "Completion of Construction" shall mean full performance by the Contractor of the Contractor's obligations under the contract and all amendments and revisions thereof relating to any Section of the Project or to the Project except the Contractor's obligations in respect of (i) Certificate of Contractor and Indemnity Agreement—Line Extensions under Article III, Section 2 hereof and (ii) the Final Inventory referred to in Article III, Section 1a hereof.

c. The term "Completion" shall mean full performance by the Contractor of the Contractor's obligations under the Contract and all amendments and revisions thereof relating to any Section of the Project or to the Project.

Section 9—Extension to Successors and Assigns. Each and all of the covenants and agreements contained in the Contract effected by the acceptance of the Proposal shall extend to and be binding upon the successors and assigns of the parties thereto.

____ (Contractor)
By ____ (President)
____ (Address)
Attest: ____ (Secretary)
____ Date of Proposal

This Proposal must be signed with the full name of the Contractor. If the Contractor is a partnership, the Proposal must be signed in the partnership name by a partner. If the Contractor is a corporation, the Proposal must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

Construction Units—New Construction

Section 1—Pole Units

A pole unit consists of one pole in place. It does not include pole-top assembly unit or other parts attached to the pole. The first two digits indicate the length of the pole; the third digit shows the classification per A.S.A. (Example: 25-6 means a pole 25 feet long, class 6.)

Section A—Single Phase Pole Top Assembly Units

Section B—V Phase Pole Top Assembly Units

A pole top assembly unit consists of the hardware, crossarms, and their appurtenances, insulators, etc., except tie wire, required to support the primary conductors. It does not include the pole. Crossarm pins include 2x2x1/8 inch washer, nut, and locknut.

Unit No.	Unit price		
	Labor	Materials	Labor & mate- rials
A			
B			

Section C—Three Phase Pole Top Assembly Units

A pole top assembly unit consists of the hardware, crossarms, and their appurtenances, insulators, etc., except tie wire, required to support the primary conductors. It does not include the pole. Crossarm pins include 2x2x1/8 inch washer, nut, and locknut.

Unit No.	Unit price		
	Labor	Materials	Labor & mate- rials
C			

Section D—Conductor Assembly Units

A conductor assembly unit consists of 1,000 feet of conductor or cable for primaries, secondaries or services, and includes tie wires, sleeves for splicing, connectors, and armor rods with clips or armor wire where necessary. Tree trimming necessary for installing services and secondaries on poles not carrying primary line is included with the conductor assembly unit and shall be performed in accordance with the directions of the Owner. The service shall be connected to the secondary or transformer and 2 feet of conductor or cable shall be left for connect-

ing to the consumer's service entrance. In computing the compensation to the Contractor for conductor assembly units only the horizontal distance between conductor supports or pole stakes shall be used. The conductor or cable sizes and types listed are the manufacturer's designation.

Unit No.	Unit price		
	Labor	Materials	Labor & mate- rials
D			

Section E—Guy Assembly Units

A guy assembly unit consists of the hardware and wire, and guy insulator where necessary. An overhead guy assembly consists of an overhead guy, a pole, and a down guy, each of which is listed separately. Guy guards are designated separately.

Unit No.	Unit price		
	Labor	Materials	Labor & mate- rials
E			

Section F—Anchor Assembly Units

An anchor assembly unit consists of the anchor with rod complete, ready for attaching the guy wire.

Unit No.	Unit price		
	Labor	Materials	Labor & materials
F			

Section G—Transformer Assembly Units

A transformer assembly unit consists of the transformer, its protective equipment, and its hardware and leads with their connectors and supporting insulators and pins. This unit does not include the pole top, secondary, service, or grounding assemblies.

Unit No.	Unit price		
	Labor	Materials	Labor & materials
G			

Section J—Secondary Assembly Units

A secondary assembly unit consists of the hardware, insulators, etc., to support the secondary conductors or cable. It does not include the secondary conductor or cable, or any hardware, insulators, etc., required to support service conductors or cable.

§ 1726.342

Unit No.	Unit price

J			

Section K—Service Assembly Units

A service assembly unit consists of the hardware, insulators, etc., required to support the service conductors or cable. It does not include the service conductor or cable, or any hardware, insulators, etc., required to support secondary conductors or cable.

Unit No.	Unit price		
	Labor	Materials	Labor & materials
K			

Section M—Miscellaneous Assembly Units

A miscellaneous assembly unit consists of an additional unit needed in the Project for new line construction but not otherwise listed in the Proposal. This section includes grounding assemblies consisting of the conductor, ground rod, grounding plate, connectors and clamps as shown on the respective drawings for the various types. It also includes fuse cutouts, reclosers, sectionalizers, switches, capacitors, regulators, metering and other assembly units.

Unit No.	Unit price		
	Labor	Materials	Labor & materials
M			

Section R—Right-of-Way Clearing Units

R1-10. The unit is 1,000 feet in length and 10 feet in width (to be measured on one side of the pole line) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed ____ in height, shall be clear from the ground up on one side of the line of poles carrying primary conductors of the width specified. This unit does not include clearing or trimming associated with secondaries or services which is included with conductor units. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between stakes and across the maximum dimension of foliage cleared projected to the ground line. All trees and underbrush across the width of the right-of-way, as designated by the Owner, shall be considered to be grouped together as a single length in measuring the total length of clearing. Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total

7 CFR Ch. XVII (1-1-97 Edition)

measurement. All length thus arrived at, added together and divided by 1,000, shall give the number of 1,000-foot R1-10 units of clearing. This unit includes the removal or topping, at the option of the Contractor, of danger trees outside of the right-of-way when so designated by the Owner. (Danger trees are defined as dead or leaning trees which, in falling, will affect the operation of the line.)

The Contractor shall not remove or trim shade, fruit, or ornamental trees unless so directed by the Owner.

R1-20. This unit is identical with R1-10 except that width is 20 feet (to be measured 10 feet on each side of the pole line).

R1-30. This unit is identical with R1-10 except that width is 30 feet (to be measured 15 feet on each side of the pole line).

R1-40. This unit is identical with R1-10 except that width is 40 feet (to be measured 20 feet on each side of the pole line).

RC1-10, RC1-20, RC1-30, RC1-40. These units are identical to the respective R1 units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

Additional Requirements (When specifying R1 units denote type of disposal (A or B).)

A. Trees, brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Owner will direct (Owner to strike out methods not to be used):

1. Burned.
2. Piled on one side of right-of-way.
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) ____.

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Owner but in no case shall it be required to be less than ____ (____) feet. Brush, branches, and refuse shall, without delay, be disposed of by such of the following methods as the Owner will direct (Owner to strike out methods not to be used):

1. Burned.
2. Piled on one side of right-of-way.
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) ____.

R			

Rural Utilities Service, USDA**§ 1726.342****Section S—Substation Assembly Units**

A substation assembly unit consists of the complete substation ready for connection of the line conductors, as shown on the substation drawings attached.

Unit No.	Unit price		
	Labor	Materials	Labor & materials
S			

Section UD—Underground Cable Assembly Units

An underground cable assembly unit consists of 1,000 feet of cable for underground primaries, secondaries or services. It does not include the conduit, plowing, trenching and backfilling, or the termination of the primary cable which are provided for in other assembly units. It includes the termination, connection and sealing of secondary and service cables and conductors as shown in the specifications and construction drawings, and all primary, secondary and service cable splices (buried cable may be spliced only when and where permitted by the Owner).^{1,2} In computing the compensation to the Contractor for underground cable assembly units, only the distance between stakes, paralleling the cable shall be used. The number of units so computed will include all cable installed in place in all specified trenches, risers, conduits, crossings, man-holes, transformers, terminal housings and meter boxes.³) The conductor or cables listed are the manufacturer's designation of types, size, voltage rating and material. The Contractor and the Owner shall jointly perform cable acceptance tests on installed cable in accordance with the specifications using test equipment furnished by the _____. (Owner to insert Owner or Contractor.)

Unit No.	Unit price		
	Labor	Materials	Labor & materials
UD			

Section UG—Underground Transformer Assembly Units

An underground transformer assembly unit consists of the transformer, its housing,

¹ ____ Owner check here if primary splices are permitted;

² ____ Owner check here if secondary and service splices are permitted.

³ ____ Owner check here if 12 feet of service conductor is to be left as a coil three feet from the building with ends capped instead of connection to meter box.

⁴ ____ Owner check here if drainable material is specified.

warning sign, switches, over-current protective devices, grounding loop, and hardware and leads with their connectors and supporting insulators installed in place. This unit includes the cable terminations but does not include lightning arresters, fault indicators, ground rods or trenching. For submersible transformers, it includes the cable terminations, the enclosure and cover, drainable material (when specified⁴), and the excavation when required. For pad-mount transformers, it does not include the pad, site preparation, drainable material, backfilling or compaction which are included in the pad assembly units.

Unit No.	Unit price		
	Labor	Materials	Labor & materials
UG			

Section UK—Underground Secondary and Service Assembly Units

An underground secondary and service assembly unit consists of secondary or service cable terminal housing mounted in place. It includes the power pedestal, stake (when required), mounting hardware, warning sign, directional marker, housing identification marking, and the cable identification tags. It does not include the cable terminations, ground rod, or pad, when required.

Unit No.	Unit price		
	Labor	Materials	Labor & materials
UK			

Section UM—Miscellaneous Underground Assembly Units

A miscellaneous underground assembly unit consists of an additional unit needed in the Project for new construction but not otherwise listed in the Proposal. This section includes the miscellaneous assembly units as shown on the respective underground construction drawings. Where miscellaneous units consist of or include a primary cable termination, the unit includes the preparation of the cable to accommodate the termination, the stress cone and the connection of the cable to the terminal equipment. Pad assembly units are in this section and include the site preparation, bedding, drainable material when specified, cable slot, backfilling, tamping and the pad in place.

² ____ Owner check here if secondary and service splices are permitted.

UM			

**Section UR—Underground Excavation
Assembly Units**

UR1-S (D) Plowing Assembly Unit, Soil—Consists of one (1) lineal foot of plowing in soil, measured parallel to the surface of the ground, to a specified depth (D), in inches, including the compacting, except as specifically provided for in other units. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermain, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged during the plowing of the cable, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the slot.

NOTE: Where in the judgment of the Owner greater than normal difficulty will be involved in plowing because of the presence of underground facilities of other utilities, this unit will be suffixed by the letter “T”. This will be applicable only in those areas predesignated by the Owner on the detail maps herein. All plowing outside of the predesignated area on the map, regardless of the difficulty in placement actually experienced, will be inventoried as the regular UR1-S (D) units. If field conditions show the existence of rock to prevent the placing of the cable in soil to the depth required in the specifications the Owner may specify UR2-R units. Where more than one cable is to be installed in the slot, the UR1-S unit designation should be modified by a suffix corresponding to the number of cables installed. For example, UR1-S (D)3c for 3 cables plowed at one time.

UR2-S (D&W) Trenching Assembly Unit, Soil—Consists of one (1) lineal foot of trenching in soil, measured parallel to the surface of the ground, to a specified depth (D) and width (W), in inches, including the excavation, and backfilling and compacting. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermain, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the trench or cable bedding assembly units, when required.

NOTE: Where in the judgment of the Owner greater than normal difficulty will be involved in trenching because of the presence of underground facilities of other utilities, this unit will be suffixed by the letter “T”. This will be applicable only in those areas predesignated by the Owner on the detail maps herein. Where more than one cable is to be installed in the trench, the regular UR2-S unit designation should be modified by a suffix corresponding to the construction drawing for the type of cable placement desired.

UR2-R (D&W) Trenching Assembly Unit, Rock—Consists of one (1) lineal foot of trenching in rock, measured parallel to the surface of the ground, to specified depth (D) and width (W), in inches, including the excavation, and backfilling and compacting to place cable to the depth specified in the Specifications. This unit will be specified by the Owner only when field conditions at the site show the existence of rock at a depth preventing the placing of the cable in soil to the depths required in the Specifications. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermain, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the trench or cable bedding assembly units, when required.

UR-3 Cable Bedding Assembly Unit—Consists of one (1) lineal foot of a two-inch bed of clean sand or soil placed in the trench under the cable and a four-inch layer of clean sand or soil backfill over the cable to the width of the trench.

NOTE: The exact location and number of units shall be determined by the Owner after the trenches are open in those areas where rock or other conditions make special bedding necessary.

UR-4a Pavement Assembly Unit, Asphalt—Consists of the labor and material necessary to remove and restore one (1) lineal foot of asphalt pavement, measured along the route of the cable, including any trenching necessary to place the cable at the required depth. All work shall be performed in accordance with the requirements of state or local authorities.

UR-4c Pavement Assembly Unit, Concrete—Consists of the labor and material necessary to remove and restore one (1) lineal foot of concrete pavement, measured along the route of the cable, including any trenching necessary to place the cable at the required depth. All work shall be performed in accordance with the requirements of state or local authorities.

Rural Utilities Service, USDA

§1726.342

UR-5 () Underground Pipe Crossing Assembly Unit—Consists of one (1) lineal foot of steel pipe, of the inside diameter, in inches, specified in the last digit of the assembly unit designation, installed in place. This unit includes the pushing of pipe and any excavation, backfilling and tamping necessary for the installation of the pipe. The pipe will be installed at the depth specified by the Owner. Underground cable installed in the pipe is not included in this unit.

UR-6 Underground Nonpipe Crossing Assembly Unit—Consists of the labor in providing a hole in soil one (1) foot in length of a diameter sufficient to accommodate the cable to be installed therein. The depth of the hole below the surface of the ground shall be specified by the Owner. This unit includes any excavation, backfilling and tamping necessary for the installation. This unit may be used where the permanent installation of a steel pipe under the UR-5 unit is not required. Underground cable installed in the hole is not included in this unit.

Unit No.	Unit price		
	Labor	Materials	Labor & materials
UR			

Construction Units—Line Changes

The general heading of Line Changes applies to the changing of existing lines or portions thereof from their existing phasing, wire size, and type to new phasing, wire size, and type and the removal of existing lines or portions thereof and replacing with new lines in close proximity thereto. In general line changes involve three types of assembly units as follows:

Section H—Conversion assembly units;

Section I—Removal assembly units;

Section N—New construction assembly units on existing lines or in replacing lines.

The assembly units that are included in Sections H, I, and N are defined by symbols and descriptions which follow together with the applicable descriptions included under New Construction. Where the descriptions are not correct or sufficiently explicit, or when special units are not covered by Construction Drawings, descriptions have been provided by the Owner in the respective sections.

Work included in these sections shall be performed under a schedule of deenergization and operating procedures as set forth by the Owner at the time of release of any Section involving work on existing lines. The Contractor will so plan and perform its work that it will be possible to safely reenergize all lines involved at the expiration of the time limits set up in the schedule to resume service to all consumers being served prior to deenergization. Prior to commencement

of work each day on lines to be deenergized, and upon completion of work each day on such lines, the Contractor will notify the Owner thereof in writing or in such other manner as the circumstances permit.

Section H—Conversion Assembly Units

Conversion assembly units are pole-top assemblies and cover the furnishing of all labor and additional materials for changing an existing assembly unit to a new assembly unit, utilizing certain items of materials of the existing assembly unit on poles to be left in place. Any materials removed from the existing assembly units which are not required in the construction of the conversion assembly unit are to be reused by the Contractor in the construction of other assembly units, or returned to Owner's warehouse, as directed by the Owner.

Conversion assembly units are specified by the prefix H with the new construction assembly unit designation shown first and the existing assembly unit designation shown last. For example, an H B1-A1 signifies the conversion of an existing A1 assembly unit to a B1 assembly unit (as was defined in the description of construction assembly units). In this instance the Contractor utilizes the existing pin-type insulator, single upset bolt and neutral spool and furnishes the additional crossarm, crossarm pins, braces, machine bolt, carriage bolts, lag screw, and insulator required for the new unit. The Contractor transports the pole-top pin and two machine bolts to the warehouse or uses them on the Project as directed by the Owner.

The Conversion assembly units also include the furnishing of all labor and materials in the transferring, resagging and retying of conductors from one position on the pole to a different position on the pole where such transfers are required. Where replacement of conductor is required, the existing conductor will be removed under Section I and the new conductor installed under Section N.

Where replacement of a pole is required, the existing pole and pole-top assembly will be removed under Section I and the new pole and pole-top assembly will be installed according to Section N and no H units will be involved.

Conversion assemblies are listed in three subsections for converting pole-top assemblies from single to V phase, single to three phase, and V to three phase. The following descriptions apply to only those conversion units not sufficiently explicit:

Subsection H (C–B)—V Phase to 3 Phase

Unit No.	Unit price		
	Labor	Materials	Labor & materials
H			

Section I—Removal Assembly Units

Removal assembly units cover the furnishing of all labor for the removal of existing units of construction from existing lines, disassembling into material items, and all labor and transportation for the returning of all materials to the warehouse of the Owner in an orderly manner or transporting elsewhere to the site of the Project for reuse in the prosecution of this Contract as directed by the Owner. All materials removed remain the property of the Owner. The provisions for Owner-Furnished materials in the Proposal shall apply if such materials are reused for construction of the Project.

The unit removal prices shall include all materials and labor required to reinstall in accordance with specifications any conductors temporarily detached. The Contractor will reinstall at his own expense any other units removed by him for his own convenience.

The removal units are specified by the prefix I and followed by the assembly unit designation of existing assembly unit to be removed. For example, an I-A1 signifies the removal of an A1 assembly unit. The following special notes apply to specific removal units:

a. Poles. All poles of the same height, regardless of pole class, are designated by the same unit. Thus an I-30-foot pole signifies the removal of a 30-foot pole of any class. The Contractor is not required under this unit to remove from the pole any ground wire or pole numbering attached to the pole. This unit includes the refilling and tamping of holes in a workmanlike manner unless they are to be reused.

b. Pole-top Assemblies. The unit of removal of pole-top assemblies includes, in addition to the removal of the assembly itself, any necessary handling, resagging, and

retying of conductors in those cases where an existing pole-top assembly will be removed and replaced by a new pole-top assembly and where any existing conductor is to be reused.

The unit of removal of pole-top assemblies also includes any holding or handling of mainline or tap conductors at tap lines, angles, and deadends where such is involved, and the reinstalling of such conductor in accordance with the specifications; for example, an I-A5-4 will include the disconnection of the tap conductors, snubbing off the tap line at the nearest practical point and the reconnection and resagging of these tap conductors if necessary to the new tap assembly when installed. The new unit of construction, however, will be specified separately in Section N.

c. Conductor. The conductor removal unit covers the removal of 1,000 feet of conductor or cable and reeling or coiling it in a workmanlike manner in such a way that it can be reused by the Contractor or the Owner. The Owner will furnish to the Contractor reels if it is to be returned to the Owner's warehouse on reels. The removal unit for each size of conductor or cable is shown by the prefix I followed by D and the conductor or cable type; thus an I-D 6ACWC signifies the removal unit for 1,000 feet of 6 A Copperweld-copper conductor.

d. Guys. All guys regardless of length, type of attachment, or size of guy strand are specified by the same unit; thus an I-E signifies the removal of any guy.

e. Anchors. Only anchor rods are to be removed by the Contractor in anchor removal units. The anchors will be left in the ground; thus an I-F signifies the removal of any anchor rod. If the rod cannot be unscrewed, the end of the rod shall either be cut off or bent down so that the rod will be at least 18 inches below ground.

f. Transformers. The unit for removal of transformer assembly units is divided into two sections, (1) Conventional Transformer Assembly, and (2) Self-protected Transformer Assembly. Only one unit is specified for each type, and all sizes of transformers from 1 to 15 kVA within each group will be covered by the same unit. "Self-protected" refers to transformers where all protective equipment is mounted on or within the transformer. "Conventional" refers to transformers where protective equipment is mounted separately from the transformer. The unit is designated by the prefix I followed by the description of the unit to be removed; thus I-G Conventional signifies the removal of a conventional transformer assembly for any size transformer from 1 to 15 kVA.

g. Secondary Units. The unit for removal of secondary assemblies includes, in addition to the removal of the assembly itself, all

Rural Utilities Service, USDA

§1726.343

necessary handling such as untying, resagging, and retying of secondary conductor or cables where existing secondary conductor or cable is to be reused. In addition, the unit for removal of the secondary assembly includes the handling or holding of any conductor at tap lines where such is involved, and the re-installing of such tap conductor in accordance with the specifications.

h. Service Unit. The unit for removal of service assemblies includes, in addition to the removal of the assembly itself, all necessary handling such as untying, resagging, and retying of service conductor or cable where existing service conductor or cable is to be reused.

The following descriptions apply only to those removal units not sufficiently explicit:

Unit	Description
Unit No.	Unit labor price
I	

Section N—New Assembly Units

The purpose of this section is to list complete new units of construction where such units are to be added to existing lines or installed in replacing lines.

The units as covered by this section are the same as the units described in Construction Units—New Construction, except that these units are prefixed by the letter N.

For example, an N40-6 unit covers the furnishing of all material and labor for the installation of a 40-6 pole either in an existing distribution line being operated by the Owner or in a new line being constructed to replace an existing distribution line being operated by the Owner.

The following descriptions apply only to those new units not sufficiently explicit:

Unit	Description		
Unit No.	Unit price		
	Labor	Materials	Labor & materials

Acceptance

The undersigned hereby accepts the foregoing Proposal of _____, dated _____, to construct the rural electric Project _____ 19____ Line Extensions.

_____(Owner)

By _____ (President)

_____(Secretary)

_____(Date of Contract)

[End of clause]

§1726.343 Distribution line extension construction contract (labor only), RUS Form 792.

The contract form in this section shall be used when required by this part.

DISTRIBUTION LINE EXTENSION CONSTRUCTION CONTRACT (LABOR ONLY)

Proposal

To: _____ (hereinafter called the "Owner").

Article I—General

Section 1—Offer to Construct. The undersigned (hereinafter called the "Contractor") hereby proposes to construct for the prices hereinafter stated, with materials furnished by the Owner, the rural electric project _____, 19____ Line Extensions (hereinafter called "Project") in strict accordance with the Plans, Specifications, and Construction Drawings hereinafter referred to. The Contractor understands and agrees that the Project will consist of line extensions and additions and line changes or similar work usually associated with overhead or underground distribution system improvement or extension work all located within the area served or ultimately to be served by the Owner and that the exact location and scope of individual sections of the Project (hereinafter called "Sections") will be made known to the Contractor from time to time as provided in Article II, Section 1 hereof; and provided, however, that the Contractor shall not be obligated to start construction of any Section unless the cost of construction of the Section computed on the unit prices of this Proposal shall amount to at least _____ dollars (\$_____) and provided further that the Owner shall be obligated to release to the Contractor for construction at least one Section pursuant to the provisions of this Proposal.

Section 2—Additional Projects. From time to time the Owner and the Contractor may enter into negotiations for the performance of work at labor prices which may differ from those in the Proposal (such work being hereinafter called "Additional Projects"). Except as may otherwise be agreed upon in writing by the Owner and the Contractor at the time the supplemental contract for the Additional Project is negotiated, the provisions of the Contract for the Project shall apply.

Section 3—Proposal on Unit Basis. The Contractor understands and agrees that the various Construction Units considered in this Proposal are defined by symbols and descriptions in this Proposal, that the Proposal is made on a unit basis, and that the Owner

may specify, as provided in Article II, Section 1 hereof, any number or combination of Construction Units which the Owner, may deem necessary for the construction of the Project. If kinds of Construction Units for which prices are not established in this Proposal are necessary for the construction of the Project, the prices of such additional Units shall be as agreed upon in writing by the Owner and the Contractor prior to the time of installation. The unit prices herein set forth are applicable to work performed on unenergized lines. Such unit prices shall be increased by _____ (_____) percent for all units installed on energized lines in accordance with instructions of the Owner, as provided in Article II, Section 1g.

Section 4—Description of Contract. The Specifications and Construction Drawings set forth in: RUS Form 804, Specifications and Drawings for 7.2/12.5 kV Line Construction; RUS Form 803, Specifications and Drawings for 14.4/24.9 kV Line Construction; RUS Form 806, Specifications and Drawings for Underground Electric Distribution; as applicable, which by this reference are incorporated herein, together with the Plans, Proposal and Acceptance constitute the Contract. The Plans, consisting of maps and special drawings, and approved modifications in standard specifications are attached hereto and identified as follows: _____

Section 5—Familiarity with Conditions. The Contractor acknowledges that it has made a careful examination of the site of the Project and of the Plans, Specifications and Construction Drawings, and has become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of equipment, tools, and other facilities required before and during the construction of the Project and has become acquainted with the availability status of materials to be furnished by the Owner and with the labor conditions which would affect work on the Project.

Section 6—License. The Contractor warrants that a Contractor's license is _____ is not _____ required, and if required, it possesses Contractor's License No. _____ for the State of _____ in which the Project is located, and said license expires on _____, 19____.

Section 7—Contractor's Resources. The Contractor warrants that it possesses adequate financial resources for the performance of the work covered by this Proposal and that it will provide necessary tools and equipment and a qualified superintendent and other employees.

Section 8—Changes in Construction. The Contractor agrees to make such changes in construction previously installed in the Project by the Contractor as required by the Owner on the following basis: The cost of

labor shall be the reasonable cost thereof as agreed upon by the Contractor and the Owner but in no event shall it exceed two (2) times the labor price quoted in the Proposal for the installation of the unit to be changed. Such compensation shall be in lieu of any other payment for the installation and removal of the original unit but shall not include the cost of the installation, if any, of a new or replacing unit, payment for which shall be made at the unit price as quoted in the Proposal. No payment shall be made to the Contractor for correcting errors or omissions on the part of the Contractor which result in construction not in accordance with the Plans and Specifications.

Article II—Construction

Section 1—Time and Manner of Work. The Contractor agrees to be prepared to commence the construction of the Project within fifteen (15) calendar days after written notice by the Owner of acceptance of the Proposal. The Contractor agrees to commence construction of a Section within _____ (_____) days after receipt in writing from the Owner of the following:

a. Location and number of the various Construction Units required for construction of the Section (hereinafter called the "Staking Sheets").

b. Itemized list of the materials required for the construction of the Section and an authorization by the Owner for the Contractor to obtain such materials from the Owner's warehouse located at _____.

c. A schedule showing the rate at which construction of the Section shall proceed and the total number of calendar days (excluding Sundays) to be allowed for completion; provided, however, that the required completion time for any Section shall not be less than _____ (_____) days or _____ (_____) days per mile of line, whichever is the greater, which days shall be calendar days (excluding Sundays). The time of the completion of the Section is of the essence of the contract to be effected by acceptance of this Proposal.

d. A statement that all required easements and rights-of-way have been obtained from the owners of the properties across which the Section is to be constructed (including tenants who may reasonably be expected to object to such construction).

e. A statement that all necessary staking has been completed.

f. A statement that all necessary funds for prompt payment for the construction of the Section will be available.

g. Specific instruction as to location and extent of work to be performed on energized lines, if any. The Contractor will not be required to dig holes, set poles, install anchors, install underground conduit, perform any plowing for the installation of underground cable, or dig trenches if there are more than

six (6) inches of frost in the ground nor to perform any construction on such days when in the judgment of the Owner snow, rain, or wind or the results of snow, rain, or frost make it impracticable to perform any operations of construction; provided further that the contractor will not perform any plowing for the installation of underground cable on public roads or highways if there are more than two (2) inches of frost in the ground. To the extent of the time lost due to the conditions described herein and approved in writing by the Owner, the time of completion set out above will be extended. The time for completion shall be extended for a period of any reasonable delay (other than a delay resulting from the failure of the Contractor to secure sufficient labor) which is due exclusively to causes beyond the control and without the fault of the Contractor including acts of God, fires, floods, inability to obtain materials, direction of the Owner to cease construction as herein provided, and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided, however, that no such extension of time for completion shall be granted the Contractor unless within ten (10) days after the happening of any event relied upon by the Contractor for such an extension of time the Contractor shall have made a written request therefor in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes, except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

Section 2—Changes in Plans, Specifications and Drawings. The Owner may, from time to time during the progress of the construction of the Project, make such changes in, additions to, or subtractions from the Plans, Specifications, and Construction Drawings as conditions may warrant: Provided, however, that if the cost to the Contractor shall be materially increased by any such change or addition, the Owner shall pay the Contractor for the reasonable cost thereof in accordance with a construction contract amendment signed by the Owner and the Contractor, but no claim for additional compensation for any such change or addition will be considered unless the Contractor shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition.

Section 3—Supervision and Inspection. a. The Contractor shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the "Superintendent") who shall be present at all times during working hours where construction is being carried on. The Contractor shall also employ, in connection with the construction of

the Project, capable, experienced, and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent by the Owner shall be binding upon the Contractor.

b. The Owner reserves the right to require the removal from the Project of any employee of the Contractor if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner shall have the right to require the Contractor to increase the number of his employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner; but the failure of the Owner to give any such directions shall not relieve the Contractor of his obligations to complete the work within the time and in the manner specified in this Proposal.

c. The manner of performance of the work, and all equipment used therein, shall be subject to the inspection, tests, and approval of the Owner. The Owner shall have the right to inspect all payrolls and other data and records of the Contractor relevant to the work. The Contractor will provide all reasonable facilities necessary for such inspection and tests. The Contractor shall have an authorized agent accompany the inspector when final inspection is made and, if requested by the Owner, when any other inspection is made.

d. In the event that the Owner shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Contractor, if requested by the Owner, to have an inspection made by an engineer approved by the Owner for the purpose of determining the exact nature, extent, and location of such defects.

Section 4—Defective Workmanship. The acceptance of any workmanship by the Owner shall not preclude the subsequent rejection thereof if such workmanship shall be found to be defective after installation, and any such workmanship found defective before final acceptance of the work or within one (1) year after completion shall be remedied or replaced, as the case may be, by and at the expense of the Contractor. In the event of failure by the Contractor so to do, the Owner may remedy such defective workmanship and in such event the Contractor shall pay to the Owner the cost and expense thereof. The Contractor shall not be entitled to any payment hereunder so long as any defective workmanship, in respect of the Project, of which the Contractor shall have had notice, shall not have been remedied or replaced, as the case may be.

Section 5—Materials. At or prior to the commencement of construction of each Section, the Owner shall make available to the Contractor all materials for such Section

which the Owner has on hand, and from time to time as such additional deliveries of materials, if any, are received by the Owner, the Owner shall make such materials available to the Contractor: Provided, however, that the Contractor or his authorized representative will give to the Owner a receipt in such form as the Owner shall approve for all materials furnished by the Owner to the Contractor. The Contractor will return to the Owner or reuse in the construction of other assembly units all materials removed from the lines under Section H—Conversion Assembly Units and Section I—Removal Assembly Units. Upon completion of each Section of the Project the Contractor will return to the Owner all materials, including usable materials as well as scrap, furnished by the Owner in excess of those required for the construction of the Section as determined from the Final Inventory approved by the Owner. The Contractor will reimburse the Owner at the current invoice cost to the Owner for loss and for breakage through Contractor's negligence of materials furnished by the Owner to the Contractor and for materials removed from the lines by the Contractor.

Section 6—Term of Contract. It is understood and agreed that, notwithstanding any other provisions of this Contract, the Contractor will not be required to commence any construction after the expiration of 1 year _____, 2 years _____ following acceptance of this Proposal by the Owner.

Article III—Payment

Section 1—Payments to Contractor. a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Contractor for construction accomplished during the preceding calendar month on the basis of completed Construction Units furnished and certified to by the Contractor and approved by the Owner solely for the purpose of payment: Provided, however, that such approval by the Owner shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate approved during the construction of a Section shall be paid by the Owner to the Contractor prior to completion of the Section. Upon completion by the Contractor of the construction of a Section, the Contractor will prepare a Final Inventory of the Section showing the total number and character of Construction Units and, will certify it to the Owner together with a certificate of the total cost of the construction performed. Upon the approval of such certificates, the Owner shall make payment to the Contractor of all amounts to which the Contractor shall be entitled thereunder which shall not have been paid.

b. The Contractor shall be paid on the basis of the number of Completed Units

actually installed at the direction of the Owner, as shown by the Inventory based on the Staking Sheets: Provided, however, that the total cost shall not exceed the maximum Contract price for the construction of the Project, unless such excess shall have been approved in writing by the Owner. It is understood and agreed that this maximum Contract price is _____ dollars (\$_____). It is also agreed that the Contractor shall not be entitled to any claim for damages on account of any reasonable additions to or subtractions from the Project, or of any delay occasioned thereby, or of any changes in the routing of the lines.

c. No payment shall be due while the Contractor is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Contractor the amount of any claim by a third party against either the Contractor or the Owner based upon an alleged failure of the Contractor to perform the work hereunder in accordance with the provisions of this Contract.

Section 2—Certificate of Contractor and Indemnity Agreement—Line Extensions. Upon the Completion of Construction of any Section of the Project but prior to payment to the Contractor of any amount in excess of ninety percent (90%) of the total cost of all Construction Units comprising the completed Section, the Contractor shall deliver to the Owner in the form attached hereto, (1) a certificate that all persons who have furnished labor in connection with the Project and subcontractors who have furnished services for the Project have been paid in full, and (2) an agreement to hold the Owner harmless against any liens arising out of the Contractor's performance hereunder which may have been or may be filed against the Owner.

Article IV—Particular Undertakings of the Contractor

Section 1—Protection to Persons and Property. The Contractor shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

a. The Contractor shall at no time and under no circumstances cause or permit any employee of the Contractor to perform any

work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in accordance with Article II, Section 1, subsection g.

b. The Contractor shall so conduct the construction of the Project as to cause the least possible obstruction of public highways.

c. The Contractor shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances, and regulations or by local conditions.

d. The Contractor shall do all things necessary or expedient to protect properly any and all parallel, converging, and intersecting lines, joint line poles, highways, and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways, or other property are damaged in the course of the construction of the Project the Contractor shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

e. Where the right-of-way of the Project traverses cultivated lands, the Contractor shall limit the movement of his crews and equipment so as to cause as little damage as possible to crops, orchards, or property and shall endeavor to avoid marring the lands. All fences which are necessarily opened or moved during the construction of the Project shall be replaced in as good condition as they were found and precautions shall be taken to prevent the escape of livestock. Except as otherwise provided in the descriptions of underground plowing and trenching assembly units, the Contractor shall not be responsible for loss of or damage to crops, orchards, or property (other than livestock) on the right-of-way necessarily incident to the construction of the Project and not caused by negligence or inefficient operation of the Contractor. The Contractor shall be responsible for all other loss of or damage to crops, orchards, or property, whether on or off the right-of-way, and for all loss of or damage to livestock caused by the construction of the Project.

f. The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control of the Contractor and during such period of control by the Contractor all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Contractor. The Contractor shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Contractor by reason of any act of God or other casualty or cause whether or not the same shall have occurred by reason of the Contractor's negligence.

(i) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Contractor's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Contractor's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Contractor, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Contractor liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Contractor, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Contractor shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Contractor does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Contractor.

(iii) Contractor shall provide to Owner's satisfaction evidence of Contractor's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

g. Any and all excess earth, rock, debris, underbrush, and other useless material shall be removed by the Contractor from the site of the Project as rapidly as practicable as the work progresses.

h. Upon violation by the Contractor of any provisions of this section, after written notice of such violation given to the Contractor by the Owner, the Contractor shall immediately correct such violation. Upon failure of the Contractor so to do the Owner may correct such violation at the Contractor's expense.

i. The Contractor shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

j. The Contractor shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the Owner that proper authorization has been received from the owner of the property, and the Contractor shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on his land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

Section 2—Insurance. The Bidder shall take out and maintain throughout the period of this Agreement the following types and minimum amounts of insurance:

a. Workers' compensation and employer's liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

b. Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage of not less than \$1 million each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

c. Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than \$1 million each occurrence, and property damage limits of \$1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form. The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days

prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3—Bond. If the estimated cost of the construction of a Section shall exceed \$100,000, the Contractor agrees to furnish prior to the commencement of such construction, a bond in the penal sum not less than the estimated cost of such Section in the form attached hereto with a Surety or Sureties listed by the United States Treasury Department as acceptable sureties. In the event that the Surety or Sureties on the performance bond delivered to the Owner shall at any time become unsatisfactory to the Owner, the Contractor agrees to deliver to the Owner another or an additional bond.

Section 4—Delivery of Possession and Control to the Owner. Upon written request of the Owner, the Contractor will deliver to the Owner full possession and control of any portion of the Project provided the Contractor shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of possession and control to the Owner, the risks and obligations of the Contractor as set forth in Section 1f of this Article IV with respect to such portion so delivered to the Owner, shall be terminated; Provided, however, that nothing herein contained shall relieve the Contractor of any liability with respect to defective workmanship as specified in Article 11, Section 4.

Article V—Remedies

Section 1—Completion on Contractor's Default. If default shall be made by the Contractor or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Contractor and the Surety, if any, a written notice requiring the Contractor to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Contractor and the Surety, If any, such default shall be corrected or arrangements for the correction thereof satisfactory to the Owner shall be made, the Owner may take over the construction of the Project and prosecute the same to completion by contract or otherwise for the account and at the expense of the Contractor, and the Contractor shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliance, and plant belonging to the Contractor or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims,

Rural Utilities Service, USDA

§1726.343

or demands which the Contractor may have against third persons in connection with this Proposal and for such purpose the Contractor does hereby assign, transfer, and set over unto the Owner all such rights, claims, and demands.

Article VI—Miscellaneous

Section 1—Patent Infringement. The Contractor will save harmless and indemnify the Owner from any and all claims, suits, and proceedings for the infringement of any patent or patents covering any equipment used in the work.

Section 2—Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Contractor.

Section 3—Compliance with Statutes and Regulations. The Contractor will comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Contractor acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called “Kick-Back” Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. §§287,1001, as amended. The Contractor understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental agencies having jurisdiction in the premises.

Section 4—Equal Opportunity Provisions. a. Contractor’s Representations.

The Contractor represents that:

It has ____, does not have ____, 100 or more employees, and if it has, that it has ____, has not ____, furnished the Equal Employment Opportunity—Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Contractor agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100. The Contractor agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than \$10,000, the Contractor will file such report, as required by law, and notify the Owner in writing of such filing prior to the Owner’s acceptance of this Proposal.

b. Equal Opportunity Clause. During the performance of this Contract, the Contractor agrees as follows:

(1) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will

take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The Contractor will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers’ representatives of the Contractor’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Contractor’s non-compliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be cancelled, terminated, or suspended in whole or in part, and the Contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Contractor will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of

§ 1726.343

Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, That in the event a Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

c. Certificate of Nonsegregated Facilities. The Contractor certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Contractor certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Contractor agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Contractor agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 5—Franchises and Rights-of-way. The Contractor will be under no obligation to obtain or assist in obtaining any franchises, authorizations, permits, or approvals required to be obtained by the Owner from Federal, State, County, Municipal or other authority; any rights-of-way over private lands or any agreements between the Owner and third parties with respect to the joint use of poles, crossing or any other matter incident to the construction and operation of the Project.

7 CFR Ch. XVII (1–1–97 Edition)

Section 6—Nonassignment of Contract. The Contractor will not assign the Contract effected by an acceptance of this Proposal or any part thereof or enter into any contract with any person, firm or corporation for the performance of the Contractor's obligations thereunder, or any part thereof, without the approval in writing of the Owner.

Section 7—Definitions.

a. The term "Owner" shall also include an engineer employed by the Owner, or a firm or engineer retained by the Owner, and designated by the Owner to act in that capacity. The Contractor will be notified in writing by the Owner of those designated to act for the Owner at the time of acceptance of this Proposal.

b. The term "Completion of Construction" shall mean full performance by the Contractor of the Contractor's obligations under the contract and all amendments and revisions thereof relating to any Section of the Project or to the Project except the Contractor's obligations in respect of (i) Certificate of Contractor and Indemnity Agreement—Line Extensions under Article III, Section 2 hereof and (ii) the Final Inventory referred to in Article III, Section 1a hereof.

c. The term "Completion" shall mean full performance by the Contractor of the Contractor's obligations under the Contract and all amendments and revisions thereof relating to any Section of the Project or to the Project.

Section 8—Extension to Successors and Assigns. Each and all of the covenants and agreements contained in the Contract effected by the acceptance of the Proposal shall extend to and be binding upon the successors and assigns of the parties thereto.

____ (Contractor)
By ____ (President)
____ (Address)
Attest: ____ (Secretary)
____ Date of Proposal

This Proposal must be signed with the full name of the Contractor. If the Contractor is a partnership, the Proposal must be signed in the partnership name by a partner. If the Contractor is a corporation, the Proposal must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

Construction Units—New Construction

Section 1—Pole Units

A pole unit consists of the installation of one pole. The first two digits indicate the length of the pole; the third digit shows the classification per A.S.A. (Example: 25-6 means a pole 25 feet long, class 6.)

Rural Utilities Service, USDA**§1726.343**

Unit No.	Unit labor price

Pole Top Assembly Units

A pole top assembly unit consists of the installation of the hardware, crossarms and their appurtenances, insulators, etc., except tie wire, required to support the primary conductors.

Section A—1 Phase

Unit No.	Unit labor price

Section B—V Phase

Unit No.	Unit labor price

Section C—3 Phase

Unit No.	Unit labor price

Section D—Conductor

A conductor assembly unit consists of the installation of 1,000 feet of conductor or cable for primaries, secondaries or services. Tree trimming necessary for installing services and secondaries on poles not carrying primary line is included with the conductor assembly unit and shall be performed in accordance with the directions of the Owner. The service shall be connected to the secondary or transformer and 2 feet of conductor or cable shall be left for connecting to the consumer's service entrance. In computing the compensation to the Contractor for conductor assembly units only the horizontal distance between conductor supports or pole stales shall be used. The conductor or cable sizes and types listed are the manufacturer's designation.

Unit No.	Unit labor price

Section E—Guy Assembly Units

A guy assembly unit consists of the installation of the hardware and wire, and guy insulator where necessary. An overhead guy assembly unit does not include the associated pole and down guy, each of which is listed separately. Guy guards are designated separately.

Unit No.	Unit labor price

Section F—Anchor Assembly Units

An anchor assembly unit consists of the installation of an anchor with rod complete, ready for attaching the guy wire.

Unit No.	Unit labor price

Section G—Transformer Assembly Units

A transformer assembly unit consists of the installation of the transformer, its protective equipment and its hardware and leads with their connectors and supporting insulators and pins. This unit does not include the installation of the pole top, secondary, service, or grounding assemblies.

Unit No.	Unit labor price

Section J—Secondary Assembly Units

A secondary assembly unit consists of the installation of the hardware, insulators, etc., to support the secondary conductor or cable. It does not include the installation of the secondary conductor or cable, or of any hardware, insulators, etc., required to support service conductors or cable.

Unit No.	Unit labor price

Section K—Service Assembly Units

A service assembly unit consists of the installation of the hardware, insulators, etc. to support the service conductors or cable. It does not include the installation of the service conductor or cable, or of any hardware, insulators etc. required to support secondary conductors or cable.

Unit No.	Unit labor price

Section M—Miscellaneous Assembly Units

A miscellaneous assembly unit consists of the installation of an additional unit needed in the Project for new line construction but not otherwise listed in the Proposal. This section includes the installation of grounding assemblies, fuse cutouts, reclosers, sectionalizers, switches, capacitors, regulators, metering and other assembly units.

Unit No.	Unit labor price

Section R—Right-of-Way Clearing Units

R1–10. The unit is 1,000 feet in length and 10 feet in width (to be measured on one side of

§ 1726.343

the pole line) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed ____ in height, shall be clear from the ground up on one side of the line of poles carrying primary conductors.

This unit does not include clearing or trimming associated with secondaries or services which is included with conductor units. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between stakes and across the maximum dimension of foliage cleared projected to the ground line. All trees and underbrush across the width of the right-of-ways as designated by the Owner shall be considered to be grouped together as a single length in measuring the total length of clearing. Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All length thus arrived at, added together and divided by 1,000, shall give the number of 1,000-foot R1-10 units of clearing. This unit includes the removal or topping, at the option of the Contractor, of danger trees outside of the right-of-way when so designated by the Owner. (Danger trees are defined as dead or leaning trees which, in falling, will affect the operation of the line.)

The Contractor shall not remove or trim shade, fruit, or ornamental trees unless so directed by the Owner.

R1-20. This unit is identical with R1-10 except that width is 20 feet (to be measured 10 feet on each side of the pole line).

R1-30. This unit is identical with R1-10 except that width is 30 feet (to be measured 15 feet on each side of the pole line).

R1-40. This unit is identical with R1-10 except that width is 40 feet (to be measured 20 feet on each side of the pole line).

RC1-10, RC1-20, RC1-30, RC1-40. These units are identical to the respective R1 units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

Additional Requirements (When specifying R1 units denote type of disposal (A or B).)

A. Trees, brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Owner will direct (Owner to strike out methods not to be used):

1. Burned.
2. Piled on one side of right-of-way.
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) ____.

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the

7 CFR Ch. XVII (1-1-97 Edition)

length designated by the Owner but in no case shall it be required to be less than ____ (____) feet. Brush, branches, and refuse shall, without delay, be disposed of by such of the following methods as the Owner will direct (Owner to strike out methods not to be used):

1. Burned.
2. Piled on one side of right-of-way.
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) ____.

Unit No.	Unit labor price

Section S—Substation Assembly Units

A substation assembly unit consists of the complete substation ready for connection of the line conductors, as shown on the substation drawings attached.

Unit No.	Unit labor price

Section UD—Underground Cable Assembly Units

An underground cable assembly unit consists of the installation of 1,000 feet of cable for underground primaries, secondaries or services. It does not include the plowing, trenching and backfilling, or the termination of the primary cable which are provided for in other assembly units. It includes the labor for the termination, connection and sealing of secondary and service cables and conductors as shown in the specifications and construction drawings, and the labor for making all primary, secondary and service cable splices (buried cable may be spliced only when and where permitted by the Owner^{1,2}.) In computing the compensation to the Contractor for underground cable assembly units, only the distance between stakes, paralleling the cable shall be used. The number of units so computed includes all installation of cable in all specified trenches, risers, conduits, crossings, manholes, transformers, terminal housings and meter boxes³. The conductor or cables listed are the manufacturer's designation of types, size, voltage rating and material. The Contractor and the Owner shall jointly perform cable acceptance tests on installed cable in

¹ ____ Owner check here if primary splices are permitted.

² ____ Owner check here if secondary and service splices are permitted.

³ ____ Owner check here if 12 feet of service conductor is to be left as a coil 3 feet from the building with ends capped instead of connection to meter box.

Rural Utilities Service, USDA

§1726.343

accordance with the specifications using test equipment furnished by the ____ (Owner to insert Owner or Contractor).

Unit No.	Unit labor price

Section UG—Underground Transformer Assembly Units

An underground transformer assembly unit consists of the installation of the transformer, its housing, warning sign, switches, over-current protective devices, grounding loop, and its hardware and leads with their connectors and supporting insulators. This unit also includes the installation of primary cable terminations but not of lightning arresters, fault indicators or ground rods, nor does it include any trenching. For pad-mount transformers, it does not include installation of the pad, drainable material, backfilling, compaction, or site preparation which are included in the pad assembly units. For submersible transformers it includes the installation of cable terminations, of the enclosure and cover, of drainable material (when specified⁴) and the excavation.

Unit No.	Unit labor price

Section UK—Underground Secondary and Service Assembly Units

An underground secondary and service assembly unit consists of the installation of the secondary or service cable terminal housing. It includes the installation of the power pedestal, stake (when required), mounting hardware, warning sign, directional marker, housing identification marking, and the cable identification tags. It does not include the installation of the cable terminations, ground rod, or pad, when required.

Unit No.	Unit labor price

Section UM—Miscellaneous Underground Assembly Units

A miscellaneous underground assembly unit consists of the installation of an additional unit needed in the Project for new construction, but not otherwise listed in the Proposal. This section includes the installation of the miscellaneous assembly units as shown on the respective underground construction drawings. Where miscellaneous units consist of or include the installation of a primary cable termination, the unit in-

cludes the preparation of the cable to accommodate the termination, the installation of the stress cone, and the connection of the cable to the terminal equipment. Pad assembly units are in this section and include the installation of the bedding, drainable material (when specified), cable slot, and site preparation, backfilling and tamping.

Unit No.	Unit labor price

Section UR—Underground Excavation Assembly Units

UR1-S (D) Plowing Assembly Unit, Soil—Consists of one (1) lineal foot of plowing in soil, measured parallel to the surface of the ground, to a specified depth (D), in inches, including the compacting, except as specifically provided for in other units. This unit includes all labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermain, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged during the plowing of the cable, except as specifically provided for in other units.

NOTE: Where in the judgment of the Owner greater than normal difficulty will be involved in plowing because of the presence of underground facilities of other utilities, this unit will be suffixed by the letter “T”. This will be applicable only in those areas predesignated by the Owner on the detail maps herein. All plowing outside of the predesignated area on the map, regardless of the difficulty in placement actually experienced, will be inventoried as the regular UR1-S (D) units. If field conditions show the existence of rock to prevent the placing of the cable in soil to the depth required in the specifications the Owner may specify UR2-R units. Where more than one cable is to be installed in the slot, the UR1-S unit designation should be modified by a suffix corresponding to the number of cables installed. For example, UR1-S (D) 3c for 3 cables plowed at one time.

UR2-S (D&W) Trenching Assembly Unit, Soil—Consists of one (1) lineal foot of trenching in soil, measured parallel to the surface of the ground, to a specified depth (D) and width (W), in inches, including the excavation, and backfilling and compacting. This unit includes all labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermain, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units.

⁴ ____ Owner check here if drainable material is specified.

§ 1726.343

NOTE: Where in the judgment of the Owner greater than normal difficulty will be involved in trenching because of the presence of underground facilities of other utilities, this unit will be suffixed by the letter "T". This will be applicable only in those areas predesignated by the Owner on the detail maps herein. Where more than one cable is to be installed in the trench, the regular UR2-S unit designation should be modified by a suffix corresponding to the construction drawing for the type of cable placement desired.

UR2-R (D&W) Trenching Assembly Unit, Rock—Consists of one (1) lineal foot of trenching in rock, measured parallel to the surface of the ground, to specified depth (D) and width (W), in inches, including the excavation, and backfilling and compacting to place cable to the depth specified in the Specifications. This unit will be specified by the Owner only when field conditions at the site show the existence of rock at a depth preventing the placing of the cable in soil to the depths required in the Specifications. This unit includes all labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermains, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the trench or cable bedding assembly units, when required.

UR-3 Cable Bedding Assembly Unit—Consists of the installation of one (1) lineal foot of a 2-inch bed of clean sand or soil placed in the trench under the cable and a 4-inch layer of clean sand or soil backfill over the cable to the width of the trench.

NOTE: The exact location and number of units shall be determined by the Owner after the trenches are open in those areas where rock or other conditions make special bedding necessary.

UR-4a Pavement Assembly Unit, Asphalt—Consists of the labor necessary to remove and restore one (1) lineal foot of asphalt pavement, measured along the route of the cable, including any trenching necessary to place the cable at the required depth. All work shall be performed in accordance with the requirements of State or local authorities.

UR-4c Pavement Assembly Unit, Concrete—Consists of the labor necessary to remove and restore one (1) lineal foot of concrete pavement, measured along the route of the cable, including any trenching necessary to place the cable at the required depth. All work shall be performed in accordance with the requirements of State or local authorities.

7 CFR Ch. XVII (1-1-97 Edition)

UR-5 () Underground Pipe Crossing Assembly Unit—Consists of the installation of one (1) lineal foot of steel pipe, of the inside diameter, in inches, specified in the last digit of the assembly unit designation, installed in place. This unit includes the pushing of pipe and any excavation, backfilling and tamping necessary for the installation of the pipe. The pipe will be installed at the depth specified by the Owner. The installation of underground cable in the pipe is not included in this unit.

UR6 Underground Nonpipe Crossing Assembly Unit—Consists of the labor in providing a hole in soil one (1) foot in length of a diameter sufficient to accommodate the cable to be installed therein. The depth of the hole below the surface of the ground shall be specified by the Owner. This unit includes any excavation, backfilling and tamping necessary for the installation. This unit may be used where the permanent installation of a steel pipe under the UR-5 unit is not required. The installation of underground cable in the pipe is not included in this unit.

Unit No.	Unit labor price

Construction Units—Line Changes

The general heading of Line Changes applies to the changing of existing lines or portions thereof from their existing phasing, wire size, and type to new phasing, wire size, and type and the removal of existing lines or portions thereof and replacing with new lines in close proximity thereto. In general line changes involve three types of assembly units as follows:

Section H—Conversion assembly units;

Section I—Removal assembly units;

Section N—New construction assembly units on existing lines or in replacing lines.

The assembly units that are included in Sections H, I, and N are defined by symbols and descriptions which follow together with the applicable descriptions included under New Construction. Where the descriptions are not correct or sufficiently explicit, or when special units are not covered by Construction Drawings, descriptions have been provided by the Owner in the respective sections.

Work included in these sections shall be performed under a schedule of deenergization and operating procedures as set forth by the Owner at the time of release of any Section involving work on existing lines.

The Contractor will so plan and perform its work that it will be possible to safely reenergize all lines involved at the expiration of the time limits set up in the schedule to resume service to all consumers being served

Rural Utilities Service, USDA

§1726.343

prior to deenergization. Prior to commencement of work each day on lines to be deenergized, and upon completion of work each day on such lines, the Contractor will notify the Owner thereof in writing or in such other manner as the circumstances permit.

Section H—Conversion Assembly Units

Conversion assembly units are pole-top assemblies and cover the furnishing of all labor for changing an existing assembly unit to a new assembly unit, utilizing certain items of materials of the existing assembly unit on poles to be left in place. Any materials removed from the existing assembly units which are not required in the construction of the conversion assembly unit are to be reused by the Contractor in the construction of other assembly units, or returned to Owner's warehouse, as directed by the Owner. Conversion assembly units are specified by the prefix H with the new construction assembly unit designation shown first and the existing assembly unit designation shown last. For example, an H B1-A1 signifies the conversion of an existing A1 assembly unit to a B1 assembly unit (as was defined in the description of construction assembly units). In this instance the Contractor utilizes the existing pin-type insulator, single upset bolt and neutral spool and installs the additional crossarm, crossarm pins, braces, machine bolt, carriage bolts, lag screw, and insulator supplied by the Owner required for the new unit. The Contractor transports the pole-top pin and two machine bolts to the warehouse or uses them on the Project as directed by the Owner.

The Conversion assembly units also include the furnishing of all labor in the transferring, resagging and retying of conductors from one position on the pole to a different position on the pole where such transfers are required. Where replacement of conductor is required, the existing conductor will be removed under Section I and the new conductor installed under Section N.

Where replacement of a pole is required, the existing pole and pole-top assembly will be removed under Section I and the new pole and pole-top assembly will be installed according to Section N and no H units will be involved.

Conversion assemblies are listed in three subsections for converting pole-top assemblies from single to V phase, single to three phase, and V to three phase. The following descriptions apply to only those conversion units not sufficiently explicit:

Unit	Description

Subsection H (B-A)—1 Phase to V Phase

Unit No.	Unit labor price

Subsection H (C-A)—1 Phase to 3 Phase

Unit No.	Unit labor price

Subsection H (C-B)—V Phase to 3 Phase

Unit No.	Unit labor price

Section I—Removal Assembly Units

Removal assembly units cover the furnishing of all labor for the removal of existing units of construction from existing lines, disassembling into material items, and all labor and transportation for the returning of all materials to the warehouse of the Owner in an orderly manner or transporting elsewhere to the site of the Project for reuse in the prosecution of this Contract as directed by the Owner.

The unit removal prices shall include all labor required to reinstall in accordance with specifications any conductors temporarily detached. The Contractor will reinstall at his own expense any other units removed by him for his own convenience.

The removal units are specified by the prefix I and followed by the assembly unit designation of existing assembly unit to be removed. For example, an I-A1 signifies the removal of an A1 assembly unit. The following special notes apply to specific removal units:

a. Poles. All poles of the same height, regardless of pole class, are designated by the same unit. Thus an I-30-foot pole signifies the removal of a 30-foot pole of any class. The Contractor is not required under this unit to remove from the pole any ground wire or pole numbering attached to the pole. This unit includes the refilling and tamping of holes in a workmanlike manner unless they are to be reused.

b. Pole-top Assemblies. The unit of removal of pole-top assemblies includes, in addition to the removal of the assembly itself, any necessary handling, resagging, and retying of conductors in those cases where an existing pole-top assembly will be removed and replaced by a new pole-top assembly and where any existing conductor is to be reused.

The unit of removal of pole-top assemblies also includes any holding or handling of mainline or tap conductors at tap lines, angles, and deadends where such is involved, and the reinstalling of such conductor in accordance with the Specifications; for example, an I-A5-4 will include the disconnection

§ 1726.345

of the tap conductors, snubbing off the tap line at the nearest practical point and the reconnection and resagging of these tap conductors if necessary to the new tap assembly when installed. The new unit of construction, however, will be specified separately in Section N.

c. Conductor. The conductor removal unit covers the removal of 1,000 feet of conductor or cable and reeling or coiling it in a workmanlike manner in such a way that it can be reused by the Contractor or the Owner. The Owner will furnish to the Contractor reels if it is to be returned to the Owner's warehouse on reels. The removal unit for each size of conductor or cable is shown by the prefix I followed by D and the conductor or cable type; thus an I-D 6ACWC signifies the removal unit for 1,000 feet of 6 A Copperweld-copper conductor.

d. Guys. All guys regardless of length, type of attachment, or size of guy strand are specified by the same unit; thus an I-E signifies the removal of any guy.

e. Anchors. Only anchor rods are to be removed by the Contractor in anchor removal units. The anchors will be left in the ground; thus an I-F signifies the removal of any anchor rod. If the rod cannot be unscrewed, the end of the rod shall either be cut off or bent down so that the rod will be at least 18 inches below ground.

f. Transformers. The unit for removal of transformer assembly units is divided into two sections, (1) Conventional Transformer Assembly, and (2) Self-protected Transformer Assembly. Only one unit is specified for each type, and all sizes of transformers from 1 to 15 kVA within each group will be covered by the same unit. "Self-protected" refers to transformers where all protective equipment is mounted on or within the transformer. "Conventional" refers to transformers where protective equipment is mounted separately from the transformer. The unit is designated by the prefix I followed by the description of the unit to be removed; thus, I-G Conventional signifies the removal of a conventional transformer assembly for any size transformer from 1 to 15 kVA.

g. Secondary Units. The unit for removal of secondary assemblies includes, in addition to the removal of the assembly itself, all necessary handling such as untying, resagging, and retying of secondary conductor or cables where existing secondary conductor or cable is to be reused.

In addition, the unit for removal of the secondary assembly includes the handling or holding of any conductor at tap lines where such is involved, and the reinstalling of such tap conductor in accordance with the Specifications.

h. Service Unit. The unit for removal of service assemblies includes, in addition to the removal of the assembly itself, all nec-

7 CFR Ch. XVII (1-1-97 Edition)

essary handling such as untying, resagging, and retying of service conductor or cable where existing service conductor or cable is to be reused.

The following descriptions apply only to those removal units not sufficiently explicit:

Unit	Description
Unit No.	Unit labor price

Section N—New Assembly Units

The purpose of this section is to list complete new units of construction where such units are to be added to existing lines or installed in replacing lines.

The units as covered by this section are the same as the units described in Construction Units—New Construction, except that these units are prefixed by the letter N.

For example, an N40-6 unit covers the furnishing of all labor for the installation of a 40-6 pole either in an existing distribution line being operated by the Owner or in a new line being constructed to replace an existing distribution line being operated by the Owner.

The following descriptions apply only to those new units not sufficiently explicit:

Unit	Description
Unit No.	Unit labor price

Acceptance

The undersigned hereby accepts the foregoing Proposal of ____, dated ____, to construct the rural electric Project ____19____ Line Extensions.

____ (Owner)
By ____ President
____ Secretary
____ Date of Contract

[End of clause]

§ 1726.344 [Reserved]

§ 1726.345 Certificate of contractor and indemnity agreement (line extensions), RUS Form 792b.

The closeout form in this section shall be used when required by this part.

Rural Utilities Service, USDA

§1726.351

CERTIFICATE OF CONTRACTOR AND INDEMNITY AGREEMENT (LINE EXTENSIONS)

____, certifies that he is the ____ (title or designation), of ____ (name of contractor), the Contractor, in a contract dated ____ 19____ entered into between the Contractor and ____ (name of RUS Borrower) ____, the Owner, for the construction of a rural electric Project (hereinafter referred to as Project), which bears the Project Designation ____ 19____ Line Extensions, and that he is authorized to and does make this Certificate and Indemnity Agreement on behalf of said Contractor in order to induce the Owner to make payment to the Contractor, in accordance with the provisions of the said contract.

Undersigned further says that all persons who have furnished labor in connection with the Section of the Project represented by the Final Inventory dated ____, in the amount of \$____, have been paid in full; that all manufacturers, materialmen and subcontractors which furnished any materials or services, or both, for the said Section of the Project have been paid in full; that no lien has been filed against the Project and no person has any right to claim any lien against the Project.

Undersigned further says that if the Owner pays the Contractor the contract price for the said Section of the Project the Contractor will indemnify and hold harmless and does hereby undertake and agree to indemnify and hold harmless the Owner from any claim or lien arising out of the negligence or other fault of the Contractor in respect of the performance of the contract which may have been or may be filed against the Owner.

____ Signature of Contractor (President, Vice-President, Partner or Owner, or, if signed by other than one of foregoing, Power of Attorney signed by one of the foregoing should be attached. Indicate applicable designation.)

[End of clause]

§1726.346 Supplemental contract for additional project, RUS Form 792c.

The form in this section shall be used when required by RUS Form 201, 790, or 792.

SUPPLEMENTAL CONTRACT FOR ADDITIONAL PROJECT

Date ____

To: ____ Contractor

Pursuant to Article I, Section 2 of the Contractor's Proposal dated ____, for the rural electric Project ____, we request that you construct Additional Project No. ____, consisting of approximately the following system improvement and line extension work: ____.

The Additional Project is to be constructed in accordance with all of the provisions of the Contractor's Proposal, except:

1. The time for completion of the Additional Project shall be ____

2. The prices for Construction Units for the Additional Project are attached.

Please indicate your acceptance of the foregoing by signing below, return two signed copies and retain one copy.

Sincerely,

____ Owner

By ____ President, Vice President (strike out inapplicable designation.)

Acceptance:

____ Contractor

By ____ President, Vice President, Partner (strike out inapplicable designation.)

Date ____

[End of clause]

§§ 1726.347—1726.350 [Reserved]

§1726.351 Electric system construction contract (labor and materials), RUS Form 830.

The contract form in this section shall be used when required by this part. This form refers to guide drawings, which do not contain requirements, and, hence, are not included in this part. The guide drawings are included in the printed form available from GPO (See §1726.300.).

ELECTRIC SYSTEM CONSTRUCTION CONTRACT (LABOR AND MATERIALS)

Notice And Instructions To Bidders

1. Sealed proposals for the construction, including the supply of necessary labor, materials and equipment, of a rural electric project of ____ (hereinafter called the "Owner") to be known as ____ Project will be received by the Owner on or before ____ o'clock ____ M., ____ 19____, at its office at ____ at which time and place the proposals will be publicly opened and read. Any proposals received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. Description of Project: The Project will consist of approximately:

Overhead Distribution Line Construction

____ miles of ____ kV Single Phase Lines

____ miles of ____ kV V-Phase Lines

____ miles of ____ kV Three-Phase Lines

____ miles of secondary on secondary poles

____ miles of services for ____ consumers

Underground Distribution Facilities

___ miles of ___ kV Single-Phase Construction
 ___ miles of ___ kV V-Phase Construction
 ___ miles of ___ kV Three-Phase Construction
 ___ miles of ___ Volt Secondary and Service Construction for ___ Consumers.

Distribution Line Changes, Conversion, and Removal

___ miles of ___

Transmission Line Construction

___ miles ___ kV; ___ miles ___ kV
 ___ miles ___ kV underbuild

Substations and Other Major Facilities

___ kVA ___ Voltage ___ Name

This Project is located in ___ Counties, in the State(s) of ___ all as more fully described in the Plans, Specifications, Construction Drawings, and Contractor's Proposal therefore hereinafter referred to.

3. Work on Energized Lines. Unless stated below all construction work including attachments to existing poles and line changes, is to be done with the line deenergized. The hours during which existing lines will be deenergized are shown in the Contractor's Proposal. Approximately ___ miles of the line changes are to be made with the lines energized and such lines are in the following locations or areas: ___ and are more fully described in the Plans, Specifications, and Contractor's Proposal. For work in these locations the Bidder must provide personnel capable of working on energized lines. All such work shall be performed to meet at least the safety rules and regulations prescribed by the Owner for its own employees including the use of rubber gloves, hot sticks and associated protective equipment, a copy of which rules and regulations may be examined at the office of the Owner.

4. Owner-Furnished Materials. The unit prices in the Contractor's Proposal should include provisions for Owner-Furnished Materials since as stated in Article I, Section 3 of the Contractor's Proposal, the value of the Owner-Furnished Materials, if any, will be deducted from payments to the Bidder for completed Construction Units.

5. Obtaining Documents. The Plans, Specifications and Construction Drawings, together with all necessary forms and other documents for bidders may be obtained from the Owner, or from the Engineer ___ at the latter's office at ___ upon the payment of \$___, which payment will not be subject to refund. The Plans, Specifications, and Construction Drawings may be examined at the office of the Owner or at the office of the Engineer. A copy of the Loan Contract (if the Project is to be financed, in whole or in part,

pursuant to a loan contract) between the Owner and the United States of America acting through the Administrator of the Rural Utilities Service and of the loan contract between the Owner and any other lender may be examined at the office of the Owner. Each set of Plans, Specifications and Construction Drawings will have a serial number, given by the Engineer, and the number of each set with the name of the purchaser will be recorded by the Engineer. Bids will be accepted only from the original purchaser.

6. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations or interlineations will be permitted, unless made before submission, and initialed and dated.

7. Familiarity with Conditions. Prior to the submission of the Proposal the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Plans, Specifications, Construction Drawings, and forms of Contractor's Proposal and Contractor's Bond on file with the Secretary of the Owner and with the Engineer, and shall become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project, general local conditions and all other matters that may affect the cost and time of completion of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors, and the so-called "Kick-Back Statute" (48 State. 948) and regulations issued pursuant thereto.

8. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

9. Alternate Designs. The Owner reserves the right to confine its consideration of the several bids to one type of design regardless of alternate types of design which may be specified in the Plans and Specifications and offered in the Proposals.

10. Proposals for Distribution and Transmission Facilities. If the Project includes both distribution and transmission facilities, bidders shall bid on both of the facilities and the Owner will evaluate the Proposals on the basis of low total bid for both facilities.

11. The Time for Completion of Construction of the Project shall be as specified by the Engineer in the Proposal.

12. Bid Bond. Each Proposal must be accompanied by a Bid Bond in the form attached or a certified check on a bank that is a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder agrees, provided its Proposal is one of the three low Proposals, that, by filing its Proposal together with such Bid Bond or check in consideration of the Owner's receiving and considering such Proposals, said Proposal shall be firm and binding upon each such Bidder and such Bid Bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor's Bond is furnished (where required) by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinbefore set for the opening of Proposals, whichever period shall be the shorter. If such Proposal is not one of the three low Proposals, the Bid Bond or check will be returned in each instance within a period of ten (10) days to the Bidder furnishing same.

13. Contractor's Bond. The successful Bidder will be required to execute two additional counterparts of the Proposal and, for a Contract in excess of \$100,000, to furnish a Contractor's Bond in triplicate in the form attached hereto with sureties listed by the United States Treasury Department as Acceptable Sureties, in a penal sum not less than the contract price.

14. Failure to Furnish Contractor's Bond. Should the successful Bidder fail or refuse to execute such counterparts or to furnish a Contractor's Bond (where required) within ten (10) days after written notification of the acceptance of the Proposal by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled (a) to enforce the Bid Bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check, the difference (not exceeding the amount of the certified check) between the amount of the Proposal and such larger amount for which the Owner may in good faith contract with another party to construct the Project. The term "Successful Bidder" shall be deemed to include any Bidder whose Proposal is accepted after another Bidder has previously refused or has been unable to execute the counterparts or to furnish a satisfactory Contractor's Bond (where required.)

15. Contract is Entire Agreement. The Contract to be effected by the acceptance of the Proposal shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modifications thereof resulting from any representation or promise made at any time by any of-

ficer, agent or employee of the Owner or by any other person.

16. Minor Irregularities. The Owner reserves the right to waive minor irregularities or minor errors in any Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal in which they occur prior to the acceptance thereof by the Owner.

17. Balanced Bid. The Owner reserves the right to reject any or all Proposals. The attention of Bidders is specially called to the desirability of a proper balance between prices for labor and materials and between the total prices for the respective Construction Units. Lack of such balance may be considered as a reason for rejecting a Proposal.

18. Discrepancy in Unit Prices. Where the unit prices in the Contractor's Proposal are separated into three columns designated as "Labor," "Materials," and "Labor and Materials," and where a discrepancy appears between the sum shown in the "Labor and Materials" column and the correct addition of the sums appearing in the "Labor" column and the "Materials" column, the correct addition of the sums appearing in the "Labor" column and the "Materials" column shall control.

19. Definition of Terms. The terms "Administrator," "Engineer," "Supervisor," "Project," "Completion of Construction," and "Completion of the Project" as used throughout this Contract shall be as defined in Article VI, Section 1, of the Contractor's Proposal.

20. The Owner Represents: a. If by provisions of the Contractor's Proposal the Owner shall have undertaken to furnish any materials for the construction of the Project, such materials are on hand at locations specified or if such materials are not on hand they will be made available by the Owner to the successful Bidder at the locations specified before the time such materials are required for construction.

b. All easements and rights-of-way, except as shown on maps included in the Plans and Specifications, have been obtained from the owners of the properties across which the Project is to be constructed (including tenants who may reasonably be expected to object to such construction). The remaining easements and rights-of-way, if any, will be obtained as required to avoid delay in construction.

c. All staking, except as shown on the maps included in the Plans and Specifications, has been completed and sufficient staking crews will be available to maintain stakes at all times in advance of construction.

d. Where underground distribution construction is required, permission has been obtained from state and local highway and

road authorities to install underground distribution power facilities and set pedestals, if any, on the highway and road right-of-way in the Project area. Notwithstanding such permission granted to the Owner, each Bidder is responsible for ascertaining that the equipment, methods of construction, and repair proposed to be used on the Project will meet all requirements of public authorities having jurisdiction over highway and road right-of-way. The successful Bidder will be required to furnish proof satisfactory to the Owner of compliance with this requirement. If required by highway or road authorities, the successful Bidder will furnish to such authorities a bond or meet other guaranty requirements to assure the prompt repair of all damages to highways and roads and their associated rights-of-way caused by the Bidder during construction of the Project. This requirement is in addition to and independent of the Contractor's Bond required under this Contract. The acceptance of a bid from any Bidder is not to be construed as approval of the Bidder's equipment or proposed construction methods by or on behalf of the highway and road authorities. Bidders may obtain information concerning the requirements of highway and road authorities by communicating with the following ____.

e. All funds necessary for prompt payment for the construction of the Project will be available. If the Owner shall fail to comply with any of the undertakings contained in the foregoing representation or if any of such representations shall be incorrect, the Bidder will be entitled to an extension of time of completion for a period equal to the delay, if any, caused by the failure of the Owner to comply with such undertakings or by any such incorrect representation; provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion in accordance with the foregoing; provided, however, that such extension, if any, of the time of completion shall be the sole remedy of the Bidder for the Owner's failure, because of conditions beyond the control and without the fault of the Owner, to furnish materials in accordance with subparagraph a. above.

Owner ____
By ____
____, 19 ____

Contractor's Proposal

(Proposal shall be submitted in ink or type-written)

To: ____ (hereinafter called the "Owner")

Article I—General

Section 1. Offer to Construct. The undersigned (hereinafter called the "Bidder") hereby proposes to receive and install such materials and equipment as may hereinafter be specified to be furnished by the Owner,

and to furnish all other materials and equipment, all machinery, tools, labor, transportation and other means required to construct the rural electric project ____ in strict accordance with the Plans, Specifications and Construction Drawings for the prices hereinafter stated.

The total length of the project lines shall be determined by taking the sum of all straight horizontal span distances between pole stakes or from center to center of poles, or centerline of structures, carrying conductors, plus the length of service drops, if any, measured horizontally from center of last pole to the point of attachment to the consumer's building.

Section 2. Materials and Equipment. The Bidder agrees to furnish and use in the construction of the Project under this Proposal, in the event the Proposal is accepted, only such "fully listed" and "conditionally listed" materials and equipment as are included in the current "List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers," including revisions adopted prior to the Bid Opening. The use of "conditionally listed" materials and equipment requires prior consent by the Owner or Engineer. For distribution lines, the Bidder further agrees to furnish and use guy wire with ASTM Class ____ (Engineer to insert A or B) zinc coating.

All leads on equipment such as transformers, reclosers, etc., shall be of #6 minimum copper conductivity using ____ (Engineer to insert standard soft drawn copper or aluminum alloy) conductor. All conductor ties on insulators shall be of the materials and methods shown in the following Tying Guide Drawings: ____ (Engineer to insert appropriate drawing numbers).

Ground rods and butt-type pole grounding plates shall be ____ (Engineer to insert galvanized steel or copper).

Underground primary cable shall have ____ coated copper neutral (Engineer to insert round or flat).

For transmission lines, the Bidder further agrees to furnish and use guy wire, overhead ground wire, and pole ground wire with ASTM Class ____ (Engineer to insert A, B, or C) zinc coating. Guy wire shall be the same size and grade as the overhead ground wire. Where overhead ground wire is not specified, the guy wire shall be ____ size, ____ grade.

The Bidder further agrees to furnish and use poles, crossarms, and other timber products, of which the physical characteristics, method of treatment, type of preservative, instructions on inspection and general procedure shall be in accordance with RUS standards and requirements.

Crossarms shall be ____ (Engineer to insert Douglas fir or Southern Yellow Pine), treated with ____ (Engineer to insert type of preservative.)

The Bidder agrees that the prices for poles, crossarms, and other timber products set forth herein shall include the cost of preservative treatment and inspection, insured warranty, or quality assurance. The Bidder further agrees to obtain from the supplier inspection and treatment reports or insured warranties, for checking against the delivered timber, and to submit such reports or warranties to the Owner as one of the prerequisites to monthly and final payments.

Section 3. Owner-Furnished Materials. The Bidder understands and agrees that, if this Proposal is accepted, the Owner will furnish to the Bidder the material set forth in the attached "List of Owner's Materials on Hand" (see page ____) and the Bidder will give a receipt (see page ____) therefore in writing to the Owner. The Bidder, further, will on behalf of the Owner accept delivery of such of the materials set forth in the attached "List of Materials Ordered by Owner but Not Delivered" (see page ____) as may be subsequently delivered and will promptly forward to the Owner for payment the supplier's invoice, together with the Bidder's receipt in writing for such materials. The materials referred to are on hand at, or will be delivered to, the locations specified in the List and the Bidder will use such materials in constructing the Project.

The value of the completed Construction Units certified by the Bidder each month pursuant to Article III, Section 1.a of the Proposal shall be reduced by an amount equal to the value of the materials installed by the Bidder during the preceding month which have been furnished by the Owner or the delivery of which has been accepted by the Bidder on behalf of the Owner. Only ninety percent (90%) of the remainder shall be paid prior to the Completion of the Project. The value of such materials shall be computed on the basis of the unit prices stated in the Lists. Materials, if any, not required for the Project, which have been furnished to the Bidder by the Owner or delivery of which has been accepted by the Bidder on behalf of the Owner, shall be returned to the Owner by the Bidder upon completion of construction of the Project. The value of all materials not installed in the Project nor returned to the Owner shall be deducted from the final payment to the Bidder.

The Owner shall not be obligated to furnish materials in excess of the quantities, size, kind and type set forth in the attached Lists. If the Owner furnishes, and the Bidder accepts, materials in excess thereof, the values of such excess materials shall be their actual cost as stated by the Owner.

Information on the shipping schedules of materials on the "List of Materials Ordered by Owner But Not Delivered" will be furnished to the Bidder as necessary during progress of the work. Upon delivery the Bidder shall promptly receive, unload, transport

and handle all materials and equipment on the "List of Materials Ordered by Owner But Not Delivered" at its expense and shall be responsible for demurrage, if any.

Section 4. Purchase of Materials Not Furnished By Owner. The Bidder will purchase all materials and equipment (other than Owner-furnished materials) outright and not subject to any conditional sales agreements, bailment, lease or other agreement reserving unto the seller any right, title or interest therein.

Section 5. Proposal on Unit Basis. The Bidder understands and agrees that the various Construction Units on which bids are made are defined by symbols and descriptions in this Proposal, that all said bids are on a unit basis, and that the Owner may specify any number or combination of Construction Units that the Owner may deem necessary for the construction of the Project. Separate Construction Units are designated for each different arrangement which may be used in the construction of the Project. This Proposal is based on a consideration of each unit in place and includes only the materials listed on the corresponding Construction Drawings or description of unit where no drawing exists.

Section 6. Description of Contract. The Notice and Instructions to Bidders and Plans attached hereto and made a part hereof, and the Specifications and Construction Drawings set forth in:

RUS Bulletin 50-3, Specifications and Drawings for 12.5/7.2 kV Line Construction;

RUS Form 803, Specifications and Drawings for 14.4/24.9 kV Line Construction;

RUS Form 806, Specifications and Drawings for Underground Electric Distribution;

RUS Bulletin 50-2, RUS Specifications T-805A, Electric Transmission Specifications and Drawings, 34.5 kV through 69 kV;

RUS Bulletin 50-1, RUS Specification T-805B, Electric Transmission Specifications and Drawings for 115 kV through 230 kV; as applicable, which by this reference are incorporated herein, together with the Proposal and Acceptance constitute the Contract. The Plans, consisting of maps and special drawings, and approved modifications in standard specifications are attached hereto and identified as follows: _____.

Section 7. Familiarity with Conditions. The Bidder has made a careful examination of the site of the Project to be constructed and of the Plans, Specifications, Construction Drawings, and form of Contractor's Bond attached hereto, and has become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, and the kind of facilities required before and during the construction of the Project, and has become acquainted with the labor conditions, state and

§ 1726.351

7 CFR Ch. XVII (1–1–97 Edition)

local laws, and regulations which would affect work on the proposed construction.

Section 8. License. The Bidder warrants that a Contractor's License is ____ is not ____ required, and if required it possesses Contractor's License No. ____ for the State of ____ in which the Project is located and said license expires on ____, 19____.

Section 9. Warranty of Good Faith. The Bidder warrants that this Proposal is made in good faith and without collusion or connection with any person or persons bidding for the same work.

Section 10. Warranty of Financial Resources. The Bidder warrants that it possesses adequate financial resources and agrees that in the event this Proposal is accepted and a Contractor's Bond is required, it will furnish a Contractor's Bond in the form attached hereto, in a penal sum not less than the maximum Contract price, with a surety or sureties listed by the United States Department of Treasury as Acceptance Sureties.

In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contract or on any bond or bonds delivered in substitution thereof or in addition thereto shall at any time become unsatisfactory to the Owner or the Administrator, the Bidder agrees to deliver to the Owner another or an additional bond.

Section 11. Taxes. The unit prices for Construction Units in this Proposal include provisions for the payment of all monies which will be payable by the Bidder or the Owner in connection with the construction of the

Project on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies and equipment, or services or labor of installation thereof, to be incorporated in the Project as part of such Construction Units. The Bidder agrees to pay all such taxes, except taxes upon the sale, purchase or use of owner-furnished materials and it is understood that, as to owner-furnished materials, the values stated in the attached "List of Owner's Materials on Hand" and "List of Materials Ordered by Owner But Not Delivered" include taxes upon the sale, purchase or use of owner-furnished materials, if applicable. The Bidder will furnish to the appropriate taxing authorities all required information and reports pertaining to the Project, except as to the Owner-furnished materials.

Section 12. Changes in Quantities. The Bidder understands and agrees that the quantities called for in this Proposal are approximate, and that the total number of units upon which payment shall be made shall be as set forth in the inventory. If the Owner changes the quantity of any unit or units specified in this Proposal by more than fifteen percent (15%) and the materials cost to the Bidder is increased thereby to an extent which would not be adequately compensated by application of the unit prices in this Proposal to the revised quantity of such unit or units, such change, to the extent of the quantities of such units in excess of such fifteen percent (15%) shall be regarded as a change in the construction within the meaning of Article II, Section 1(d) of this proposal.

LIST OF OWNER'S MATERIALS ON HAND

Item ¹	Description of material	Catalog No.	Quantity	Unit price	Extended price
Total: Above Materials are Located at:					

Notes: 1. Item corresponds with item in list of materials in construction drawings. Under Article I, Section 3, the value of these materials will be deducted from payments to the Bidder for completed Construction Units.

LIST OF MATERIALS ORDERED BY OWNER BUT NOT DELIVERED

Item ¹	Supplier name and address	Scheduled delivery date	Description of material	Catalog No.	Quantity	Unit price	Extended price
Total: Above Material to be Delivered to:							

Notes: 1. Item corresponds with item in list of materials in construction drawings. Under Article I, Section 3, the value of these materials will be deducted from payments to the Bidder for completed Construction Units.

Article II—Construction

Section 1. Time and Manner of Construction.

a. The Bidder agrees to commence construction of the Project on a date (hereinafter called the "Commencement Date") which shall be determined by the Engineer

Rural Utilities Service, USDA

§ 1726.351

after notice in writing from the Bidder that the Bidder has sufficient materials to warrant commencement and continuation of construction, but in no event will the Commencement Date be later than _____ calendar days after date of approval of the Contract by the Administrator. The Bidder further agrees to prosecute diligently and to complete construction in strict accordance with the Plans, Specifications and Construction Drawings within _____ (_____) calendar days (excluding Sundays) after Commencement Date: Provided, however, that the Bidder will not be required to dig holes, set poles, install anchors, install underground conduit, perform any plowing for the installation of underground cable, or dig trenches if there are more than six (6) inches of frost on the ground nor to perform any construction on such days when in the judgment of the Engineer snow, rain, or wind, or the results of snow, rain, or frost make it impracticable to perform any operation of construction; provided further that the Bidder will not be required to perform any plowing for the installation of underground cable on public roads or highways if there are more than two (2) inches of frost in the ground. To the extent of the time lost due to the conditions described herein and approved in writing by the Engineer, the time of completion set out above will be extended if the Bidder makes a written request therefore to the Owner as provided in subsection b of this Section 1.

b. The time for Completion of Construction shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Bidder, including Acts of God, fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided, however that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefore in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

c. The sequence of construction shall be as set forth below, the number or names being the designations of extensions or areas (hereinafter called the "Sections") corresponding to the numbers or names shown on the maps attached hereto, or if no Sections are set forth below, the sequence of construction shall be as determined by the Bidder, subject to the approval of the Engineer. _____

d. The Owner, acting through the Engineer may from time to time during the progress

of the construction of the Project make such changes, additions or subtractions from the Plans, Specifications, Construction Drawings, List of Materials and sequence of construction provided for in the previous paragraph which are part of the Contractor's Proposal as conditions may warrant: Provided, however, that if any change in the construction to be done shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefore to the Owner within (10) days after any such change is made. And provided further, that if the cost to the Bidder of construction of the project shall be materially increased by any such change or addition, the Owner shall pay the Bidder for the reasonable cost thereof in accordance with a Construction Contract Amendment signed by the Owner and the Bidder, but no claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefore to the Owner prior to the commencement of work in connection with such change or addition.

e. The Bidder will not perform any work hereunder on Sundays unless there is urgent need for such Sunday work and the Owner consents thereto in writing. The time for completion specified in subsection a of this Section 1 shall not be affected in any way by inclusion of this subsection nor by the Owner's consent or lack of consent to Sunday work hereunder.

Section 2. Environmental Protection. The Bidder shall perform work in such a manner as to maximize preservation of beauty, consideration of natural resources and minimize marring and scarring of the landscape and silting of streams. The Bidder shall not deposit trash in streams or waterways, and shall not deposit herbicides or other chemicals or their containers in or near streams, waterways or pastures. The Bidder shall follow the criteria relating to environmental protection as specified herein by the Engineer.

Section 3. Tools, Equipment, and Qualified Personnel. The Bidder agrees that in the event this Proposal is accepted it will make available for use in connection with the proposed construction all necessary tools and equipment and qualified superintendents and foremen.

Section 4. Changes in Construction. The Bidder agrees to make such changes in construction previously erected in the Project by the Bidder as required by the Owner for prices arrived at as follows:

a. For substations and other units where only a portion of the complete unit is affected by the change, the compensation for such change shall be as agreed upon in writing by the Bidder and the Owner prior to the commencement of work in connection with such change.

b. For all other units, the compensation for such change shall be the reasonable cost thereof as agreed upon by the Bidder and the Owner, but in no event shall it exceed two (2) times the labor price quoted in the Proposal for the installation of the unit to be changed. Such compensation shall be in lieu of any other payment for the installation and removal of the original unit. (If a new or replacing unit is installed, payment for such new or replacing unit shall be made as shown in the final inventory.)

No payment shall be made to the Bidder for materials or labor involved in correcting errors or omissions on the part of the Bidder which result in construction not in accordance with the Plans and Specifications.

Section 5. Construction Not in Proposal. The Bidder also agrees that when it is necessary to construct units not shown in the Proposal it will construct such units for a price arrived at as follows:

a. The cost of materials shall be determined by the invoices.

b. The cost of labor shall be the reasonable cost thereof, but in no event shall it exceed an amount determined by calculating the ratio of the total labor costs to the total material costs in the section of the Proposal involved, and multiplying the cost of materials for the unit in question by this ratio: Provided, however, that in respect of sections H, M, and N, the ratio shall be calculated for only those units of the section which are similar to the new unit for which a price is to be determined.

Section 6. Supervision and Inspection.

a. The Bidder shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the "Superintendent") who shall be present at all times during working hours where construction is being carried on. The Bidder shall also employ, in connection with the construction of the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Bidder.

b. The Owner reserves the right to require the removal from the Project of any employee of the Bidder if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner or the Supervisor, if any, shall have the right to require the Bidder to increase the number of its employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner or Supervisor; but the failure of the Owner or Supervisor to give any such directions shall not relieve the Bidder of its obligations to complete the work within the

time and in the manner specified in this Proposal.

c. The construction of the Project and all materials and equipment used therein, shall be subject to the inspection, tests, and acceptance by the Owner and the Administrator and the Bidder shall furnish all information required by the Owner or by the Administrator concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner and the Administrator shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Bidder and of any subcontractor, relevant to the construction of the Project. The Bidder shall provide all reasonable facilities necessary for such inspection and tests and shall maintain an office at the site of the Project, with telephone service where obtainable and at least one office employee to whom directions and instructions of the Owner may be delivered. Delivery of such directions or instructions in writing to the employee of the Bidder at such office shall constitute delivery to the Bidder. The Bidder shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the Owner, when any other inspection is made.

d. In the event that the Owner, or the Administrator, shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Bidder and the Bidder's Surety or Sureties, if any, to have an inspection made by an engineer approved by the Owner for the purpose of determining the exact nature, extent and location of such defects.

e. The Engineer may recommend to the Owner that the Bidder suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions as are considered unfavorable for satisfactory prosecution of the work or because of the failure of the Bidder to comply with any of the provisions of the Contract: Provided, however, that the Bidder shall not suspend work pursuant to this provision without written authority from the Owner so to do. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Bidder to comply with any of the provisions of this Contract. In the event that work is suspended by the Bidder with the consent of the Owner, the Bidder before resuming work shall give the Owner at least twenty-four (24) hours notice thereof in writing.

Section 7. Defective Materials and Workmanship.

a. The acceptance of any materials, equipment (except Owner-furnished materials) or any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such materials, equipment, or

workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, by and at the expense of the Bidder. Any such condemned material or equipment shall be immediately removed from the site of the Project by the Bidder at the Bidder's expense. The Bidder shall not be entitled to any payment hereunder so long as any defective materials, equipment or workmanship in respect to the Project, of which the Bidder shall have had notice, shall not have been replaced or remedied, as the case may be.

b. Notwithstanding any certificate which may have been given by the Owner or the Engineer, if any materials, equipment (except Owner-furnished materials) or any workmanship which does not comply with the requirements of this Contract shall be discovered within one (1) year after Completion of Construction of the Project, the Bidder shall replace such defective materials or equipment or remedy any such defective workmanship within thirty (30) days after notice in writing of the existence thereof shall have been given by the Owner. If the Bidder shall be called upon to replace any defective materials or equipment or to remedy defective workmanship as herein provided, the Owner, if so requested by the Bidder shall deenergize that section of the Project involved in such work. In the event of failure by the Bidder so to do, the Owner may replace such defective materials or equipment or remedy such defective workmanship, as the case may be, and in such event the Bidder shall pay to the Owner the cost and expense thereof.

Article III—Payments and Release of Liens

Section 1. Payments to Bidder

a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Bidder for construction accomplished during the preceding calendar month on the basis of completed Construction Units furnished and certified to by the Bidder, recommended by the Engineer and approved by the Owner solely for the purposes of payment: Provided, however, that such approval shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate approved during the construction of the Project shall be paid by the Owner to the Bidder prior to Completion of the Project: Provided, however, that at any time after work, which, in the sole determination of the Engineer, amounts to fifty percent (50%) of the maximum Contract price has been completed, the Owner may elect, in lieu of paying ninety percent (90%) of each such subsequent estimate, to pay each subsequent

estimate in full. Upon completion by the Bidder of the construction of the Project, the Engineer will prepare an inventory of the Project showing the total number and character of Construction Units and, after checking such inventory with the Bidder, will certify it to the Owner. Upon the approval by the Owner and the Administrator of a Certificate of Completion—Contract Construction, RUS Form 187, showing the total cost of the construction performed, the Owner shall make payment to the Bidder of all amounts to which the Bidder shall be entitled thereunder which shall not have been paid: Provided, however, that such final payment shall be made not later than ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, unless withheld because of the fault of the Bidder.

b. The Bidder shall be paid on the basis of the number of Construction Units actually installed at the direction of the Owner shown by the inventory based on the staking sheets or structure lists; Provided, however, that the total cost shall not exceed the maximum Contract price for the construction of the Project as set forth in the Acceptance plus the costs of any additional change orders, unless such excess shall have been approved in writing by the Owner.

c. Notwithstanding the provisions of Section 1.a above, the Bidder may, by giving written notice thereof to the Owner, elect to receive payment in full for any Section of the Project upon:

(1) completion of such Section as certified by the Engineer and approved by the Owner;

(2) submission to the Owner of the releases of lien and the certificate referred to in Section 2 hereof;

(3) approval by the Owner of the inventory in respect of such Section; and

(4) submission to the Owner and the Administrator of the consent in writing by the Surety or Sureties, if any, on the Contractor's Bond to payment in full for such Section prior to Completion of the Project. If no Sections are designated in Article II, Section 1c, the term "Section" shall mean for purposes of this subsection c and Article IV, Section 3b only, a part of the Project as designated by the Owner which represents at least twenty-five percent (25%) of the maximum Contract price as stated in Article III, Section 1, and which is capable of being energized and operated by the Owner.

d. Interest at the rate of ____ percent¹ (____%) per annum shall be paid by the Owner to the Bidder on all unpaid balances

¹The Owner shall insert a rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued.

§ 1726.351

due on monthly estimates, commencing fifteen (15) days after the due date; provided the delay in payment beyond the due date is not caused by any condition within the control of the Bidder. The due date for purposes of such monthly payment or interest on all unpaid balances shall be the fifteenth (15) day of each calendar month provided (1) the Bidder on or before the fifth (5) day of such month shall have submitted its certification of Construction Units completed during the preceding month and (2) the Owner on or before the fifteenth (15) day of such month shall have approved such certification. If, for reasons not due to the Bidder's fault, such approval shall not have been given on or before the fifteenth (15) day of such month, the due date for purposes of this subsection d shall be the fifteenth (15) day of such month notwithstanding the absence of the approval of the certification.

e. Interest at the rate of ____ percent² (____%) per annum shall be paid by the Owner to the Bidder on the final payment for the Project or any completed Section thereof, commencing fifteen (15) days after the due date. The due date for purposes of such final payment or interest on all unpaid balances shall be the date of approval by the Owner of all of the documents requiring such approval, as a condition precedent to the making of final payment, or ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, whichever date is earlier.

f. No payment shall be due while the Bidder is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Bidder the amount of any claim by a third party against either the Bidder or the Owner based upon an alleged failure of the Bidder to perform the work hereunder in accordance with the provisions of this Contract.

Section 2. Release of Liens and Certificate of Contractor. (See RUS Form 224, Waiver and Release of Lien and RUS Form 231, Certificate of Contractor). Upon the completion by the Bidder of the construction of the Project (or any Section thereof if the Bidder shall elect to receive payment in full for any Section when completed as provided above) but prior to final payment to the Bidder, the Bidder shall deliver to the Owner, in duplicate, releases of all liens and of rights to claim any lien, in the form attached hereto from all manufacturers, material suppliers, and subcontractors furnishing services or materials for the Project or such Section and a certificate in the form attached hereto to the effect that all labor used on or for the Project or such Section has been paid and that all such releases have been submitted to the Owner.

² See Footnote 1.

7 CFR Ch. XVII (1-1-97 Edition)

Section 3. Payments to Material Suppliers and Subcontractors. The Bidder shall pay each material supplier, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Bidder for and on account of materials furnished or construction performed by each material supplier or each subcontractor.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property. The Bidder shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

a. The Bidder shall at no time and under no circumstances cause or permit any employee of the Bidder to perform any work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in the Notice and Instructions to Bidders.

b. The Bidder shall so conduct the construction of the Project as to cause the least possible obstruction of public highways.

c. The Bidder shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances and regulations or by local conditions.

d. The Bidder shall do all things necessary or expedient to properly protect any and all parallel, converging and intersecting lines, joint line poles, highways and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways or other property are damaged in the course of the construction of the Project the Bidder shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

e. Where the right-of-way of the Project traverses cultivated lands, the Bidder shall limit the movement of its crews and equipment so as to cause as little damage as possible to crops, orchards or property and shall endeavor to avoid marring the lands. All fences which are necessarily opened or moved during the construction of the Project shall be replaced in as good condition as they were found and precautions shall be taken to prevent the escape of livestock. Except as otherwise provided in the descriptions of underground plowing and trenching assembly

units, the Bidder shall not be responsible for loss of or damage to crops, orchards or property (other than livestock) on the right-of-way necessarily incident to the construction of the Project and not caused by negligence or inefficient operation of the Bidder. The Bidder shall be responsible for all other loss of or damage to crops, orchards, or property, whether on or off the right-of-way, and for all loss of or damage to livestock caused by the construction of the Project. The right-of-way for purposes of this said section shall consist of an area extending ____ feet on both sides of the center line of the poles along the route of the Project lines, plus such area reasonably required by the Bidder for access to the route of the Project lines from Public roads to carry on construction activities.

f. The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Bidder. The Bidder shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Bidder by reason of any act of God or other casualty or cause whether or not the same shall have occurred by reason of the Bidder's negligence.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Bidder, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment,

or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Bidder.

(iii) Bidder shall provide to Owner's satisfaction evidence of Bidder's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

g. Any and all excess earth, rock, debris, underbrush and other useless materials shall be removed by the Bidder from the site of the Project as rapidly as practicable as the work progresses.

h. Upon violation by the Bidder of any of the provisions of this section, after written notice of such violation given to the Bidder by the Engineer or the Owner, the Bidder shall immediately correct such violation. Upon failure of the Bidder so to do the Owner may correct such violation at the Bidder's expense: Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder's expense without such prior notice to the Bidder.

i. The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

j. The Bidder shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the Owner that proper authorization has been received from the owner of the property, and the Bidder shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on its land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

k. The Bidder will furnish, prior to the commencement of underground distribution construction, proof, satisfactory to the Owner, of compliance with requirements of highway and road authorities having jurisdiction, including without limitation, the furnishing of a bond or other guaranty, and approval by such authorities of the equipment and methods of construction and repair to be used by the Bidder.

Section 2. Insurance. The Bidder shall take out and maintain throughout the period of this Agreement the following types and minimum amounts of insurance:

a. Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of

§ 1726.351

the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

b. Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage of not less than \$1 million each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

c. Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than \$1 million per person and \$1 million each occurrence, and property damage limits of \$1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Delivery of Possession and Control to Owner.

a. Upon written request of the Owner the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1f hereof with respect to such portion of the Project so delivered to the Owner shall be terminated; Provided, however, that nothing herein contained shall

7 CFR Ch. XVII (1-1-97 Edition)

relieve the Bidder of any liability with respect to defective materials and workmanship as contained in Article II, Section 6 hereof.

b. Where the construction of a Section as hereinbefore defined in Article II, Section 1c and Article III, Section 1c shall have been completed by the Bidder, the Owner agrees, after receipt of a written request from the Bidder, to accept delivery of possession and control of such Section upon the issuance by the Engineer of a written statement that the Section has been inspected and found acceptable by the Engineer. Upon such delivery of the possession and control of any such Section to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1f hereof with respect to such Section so delivered to the Owner shall be terminated; Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials or workmanship as contained in Article II, Section 6 hereof.

Section 4. Energizing the Project.

a. Prior to Completion of the Project the Owner, upon written notice to the Bidder, may test the construction thereof by temporarily energizing any portion or portions thereof. During the period of such test the portion or portions of the Project so energized shall be considered as within the possession and control of the Owner and governed by the provisions of Section 3 of this Article. Upon written notice to the Bidder by the Owner of the completion of such test and upon deenergizing the lines involved therein said portion or portions of the Project shall be considered as returned to the possession and control of the Bidder unless the Owner shall elect to continue possession and control in the manner provided in Section 3 of this Article.

b. The Owner shall have the right to energize permanently any portion or portions of the Project delivered to its possession and control pursuant to the provisions of Section 3 of this Article.

Section 5. Assignment of Guarantees. All guarantees of materials and workmanship running in favor of the Bidder shall be transferred and assigned to the Owner prior to the time the Bidder receives final payment.

Article V—Remedies

Section 1. Completion on Bidder's Default. If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the Surety or Sureties, if any, upon the Contractor's Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within twenty (20) days

after the service of such notice upon the Bidder such default shall be corrected or arrangements for the correction thereof satisfactory to both the Owner and the Administrator shall be made by the Bidder or its Surety or Sureties, if any, the Owner may take over the construction of the Project and prosecute the same to completion by Contract or otherwise for the account and at the expense of the Bidder, and the Bidder and its Surety or Sureties, if any, shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and plant belonging to the Bidder or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Bidder may have against third persons in connection with this Contract and for such purpose the Bidder does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

Section 2. Liquidated Damages. The time of the Completion of Construction of the Project is of the essence of the Contract. Should the Bidder neglect, refuse or fail to complete the construction within the time herein agreed upon, after giving effect to extensions of time if any, herein provided, then, in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall have the right to deduct from and retain out of such moneys which may be then due, or which may become due and payable to the Bidder the sum of _____ dollars (_____) per day for each and every day that such construction is delayed in its completion beyond the specified time, as liquidated damages and not as a penalty; if the amount due and to become due from the Owner to the Bidder is insufficient to pay in full any such liquidated damages, the Bidder shall pay to the Owner the amount necessary to effect such payment in full: Provided, however, that the Owner shall promptly notify the Bidder in writing of the manner in which the amount retained, deducted or claimed as liquidated damages was computed.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner or the Government or the Administrator shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election: Provided, however, that the provisions of Section 2 of this Article shall be the exclusive measure of damages for failure by the Bidder to complete the construction of the Project within the time herein agreed upon.

Article VI—Miscellaneous

Section 1. Definitions.

a. The term “Administrator” shall mean the Administrator of the Rural Utilities Service of the United States of America and his duly authorized representative or any other person in whom or authority in which may be vested the duties and functions which the Administrator is now authorized by law to perform.

b. The term “Engineer” shall mean the Engineer employed by the Owner, to provide engineering services for the Project and said Engineer’s duly authorized assistants and representatives.

c. The term “Supervisor” shall mean the person, if any, appointed by the Administrator as the representative of the Government under the provisions of the Loan Contract providing for such appointment in special cases. The term is limited to such special representative of the Government, if any, who is responsible exclusively to the Administrator and does not refer to the Manager or any other person employed by the Owner and responsible to it.

d. The term “Project” shall mean the rural electric system, or portion thereof, described in the Plans and Specifications, Construction Drawings.

e. The term “Completion of Construction” shall mean full performance by the Bidder’s obligations under the Contract and all amendments and revisions thereof except the Bidder’s obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof, (2) the inventory referred to in Article III, Section 1 hereof, and (3) other final documents. The term “Completion of the Project” shall mean full performance by the Bidder of the Bidder’s obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion, signed by the Engineer and approved in writing by the Owner, shall be the sole and conclusive evidence as to the date of Completion of Construction and as to the fact of Completion of the Project.

Section 2. Materials and Supplies. In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title

§ 1726.351

IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Seller agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

Section 3. Patent Infringement. The Bidder shall hold harmless and indemnify the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 4. Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Bidder.

Section 5. Compliance with Statutes and Regulations. The Bidder shall comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Bidder acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. §§287, 1001, as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental Agencies having jurisdiction in the premises.

Section 6. Equal Opportunity Provisions.

(a) Bidder's Representations.

The Bidder represents that:

It has _____, does not have _____, 100 or more employees, and if it has, that it has _____, has not _____ furnished the Equal Employment Opportunity-Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Bidder agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

The Bidder agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than \$10,000, the Bidder will file such report, as required by law, and notify the owner in writing of such filing prior to the Owner's acceptance of this Proposal.

(b) Equal Opportunity Clause. During the performance of this Contract, the Bidder agrees as follows:

(1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to

7 CFR Ch. XVII (1-1-97 Edition)

their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotions or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection of training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Bidder will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representative of the Bidder's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Bidder's noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be canceled, terminated, or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Bidder will take such action with respect to any

Rural Utilities Service, USDA

§ 1726.351

subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance; Provided, however, that in the event Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

(c) Certificate of Nonsegregated Facilities. The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 7. Franchises and Rights-of-Way. The Bidder shall be under no obligation to obtain or assist in obtaining: Any franchises, authorizations, permits or approvals required to be obtained by the Owner from Federal, State, County, Municipal or other authorities; any rights-of-way over private lands; or any agreements between the Owner and third parties with respect to the joint use of poles, crossings, or other matter incident to the construction and operation of the Project.

Section 8. Nonassignment of Contract. The Bidder shall perform directly and without subcontracting not less than twenty-five percent (25%) of the construction of the Project, to be calculated on the basis of the total Contract price. The Bidder shall not assign

the Contract effected by an acceptance of this Proposal or any interest in any funds that may be due or become due hereunder or enter into any contract with any person, firm or corporation for the performance of the Bidder's obligations hereunder or any part thereof, without the approval in writing of the Owner and of the Surety or Sureties, if any, on any bond furnished by the Bidder for the faithful performance of the Bidder's obligations hereunder. If the Bidder, with the consent of the Owner and any Surety or Sureties on the Contractor's Bond or Bonds, shall enter into a subcontract with any subcontractor for the performance of any part of this Contract, the Bidder shall be as fully responsible to the Owner and the Government for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it.

Section 9. Extension to Successors and Assigns. Each and all of the covenants and agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto.

Section 10. Contractor. Upon acceptance of this Proposal, the successful Bidder shall be the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

____ (Bidder)
By ____ (President)
____ (Address)
Attest: ____ (Secretary)
Date ____

The Proposal must be signed with the full name of the Bidder. If the Bidder is a partnership, the Proposal must be signed in the partnership name by a partner. If the Bidder is a corporation, the Proposal must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

Distribution Construction Units—New Construction

Section 1—Pole Units

A pole unit consists of one pole in place. It does not include pole-top assembly unit or other parts attached to the pole. The first two digits indicate the length of the pole; the third digit shows the classification per ANSI (Example: 35-5 means a pole 35 feet long, class 5.)

Total, Section C—_____

Section D—Conductor Assembly Units

A conductor assembly unit consists of 1,000
feet of conductor or cable for primaries,
secondaries or services, and includes tie
wires, sleeves for splicing, connectors, and

armor rods with clips or armor wire where
necessary.

Tree trimming necessary for installing
services and secondaries on poles not carry-
ing primary line is included with the conduc-
tor assembly unit and shall be performed in
accordance with the directions of the Engi-
neer. The service shall be connected to the

Rural Utilities Service, USDA**§ 1726.351**

secondary or transformer and 2 feet of conductor or cable shall be left for connecting to the consumer's service entrance. In computing the compensation to the Bidder for conductor assembly units only the horizontal

distance between conductor supports or pole stakes shall be used. The conductor or cable sizes and types listed are the manufacturer's designation.

M					

Total, Section M—

Section R—Right-of-Way Clearing Units

R1–10. The unit is 1,000 feet in length and 10 feet in width (to be measured on one side of the pole line) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed _____ in height, shall be clear from the ground up on one side of the line of poles carrying primary conductors of the width specified. This unit does not include clearing or trimming associated with secondaries or services which is included with conductor units. The segmental length of actual clearing shall be measured in a straight line parallel to the transmission centerline using the maximum dimension of foliage cleared and projected to the ground line. All trees and underbrush across this width of the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing. Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All length thus arrived at, added together and divided by 1,000, shall give the number of 1,000-foot R1–10 units of clearing. This unit includes the removal or topping, at the option of the Bidder, of danger trees outside of the right-of-way when so designated by the Engineer. (Danger trees are defined as dead or leaning trees which, in falling, will affect the operation of the line.) The Bidder shall not re-

move or trim shade, fruit, or ornamental trees unless so directed by the Engineer.

R1–20. This unit is identical with R1–10 except that the width is 20 feet (to be measured 10 feet on each side of the pole line).

R1–30. This unit is identical with R1–10 except that the width is 30 feet (to be measured 15 feet on each side of the pole line).

R1–40. This unit is identical with R1–10 except that width is 40 feet (to be measured 20 feet on each side of the pole line).

RC1–10, RC1–20, RC1–30, RC1–40. These units are identical to the respective R1 units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

Additional Requirements (When specifying R1 units denote type of disposal (A or B).)

A. Trees, brush, branches and refuse shall, without delay, be disposed of by one of the following methods as the Engineer will direct (Engineer to strike out methods not to be used):

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) _____

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Engineer but in no case shall it be required to be less than _____ (____) feet. Brush, branches, and refuse shall, without delay, be disposed of by such of the

Rural Utilities Service, USDA**§ 1726.351**

following methods as the Engineer will direct (Engineer to strike out methods not to be used):

1. Burned
2. Piled on one side of right-of-way

3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.

4. Other (describe) _____

		Labor	Materials	Labor & materials	
R					

Total, Section R—_____

Section UD—Underground Cable Assembly Units

An underground cable assembly unit consists of 1,000 feet of cable for underground primaries, secondaries or services. It does not include the conduit, plowing, trenching and backfilling, or the termination of the primary cable which are provided for in other assembly units. It includes the termination, connection and sealing of secondary and service cables and conductors as shown in the specifications and construction drawings, and all primary, secondary and service cable splices (buried cable may be spliced only when and where permitted by the

Owner^{3,4}.) In computing the compensation to the Bidder for underground cable assembly units, only the distance between stakes, paralleling the cable shall be used. The number of units so computed will include all cable installed in place in all specified trenches, risers, conduits, crossings, manholes, transformers, terminal housings and meter boxes.⁵ The conductor or cables listed are the manufacturer's designation of types, size, voltage rating and material. The Bidder and the Owner shall jointly perform cable acceptance tests on installed cable in accordance with the specifications using test equipment furnished by the _____. (Engineer to insert Owner or Bidder).

Unit No.	No. of units	Unit price			Extended price— labor & materials
		Labor	Materials	Labor & materials	
UD					

Total, Section UD_____

Section UG—Underground Transformer Assembly Units

An underground transformer assembly unit consists of the transformer, its housing, warning sign, switches, over-current protective devices, grounding loop, and hardware and leads with their connectors and supporting insulators installed in place. This unit

includes the cable terminations but does not include lightning arresters, fault indicators, ground rods or trenching. For submersible transformers, it includes the cable terminations, the enclosure and cover, drainable material (when specified⁶), and the excavation when required. For pad-mount transformers, it does not include the pad, site preparation, drainable material, backfilling or compaction which are included in the pad assembly units.

UK					

Total, Section UK _____

Section UM—Miscellaneous Underground Assembly Units

A miscellaneous underground assembly unit consists of an additional unit needed in the Project for new construction but not otherwise listed in the Proposal. This section includes the miscellaneous assembly units as shown on the respective underground con-

struction drawings. Where miscellaneous units consist of or include a primary cable termination, the unit includes the preparation of the cable to accommodate the termination, the stress cone and the connection of the cable to the terminal equipment. Pad assembly units are in this section and include the site preparation, bedding, drainable material when specified, cable slot, backfilling, tamping and the pad in place.

Unit No.	No. of units	Unit price			Extended price—labor & materials
		Labor	Materials	Labor & materials	
UM					

Total, Section UM—_____

Section UR—Underground Excavation Assembly Units

UR 1-S(d) Plowing Assembly Unit, Soil—Consists of one (1) lineal foot of plowing in soil, measured parallel to the surface of the ground, to a specified depth (D), in inches, including the compacting, except as specifically provided for in other units. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermain, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged during the plowing of the cable, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the slot.

NOTE: Where in the judgment of the Owner greater than normal difficulty will be involved in plowing because of the presence of underground facilities of other utilities, this unit will be suffixed by the letter “T”. This will be applicable only in those areas pre-designated by the Owner on the detail maps herein. All plowing outside of the pre-designated area on the map, regardless of the difficulty in placement actually experienced, will be inventoried as the regular UR

1-S(D) units. If field conditions show the existence of rock to prevent the placing of the cable in soil to the depth required in the specifications, the Owner may specify UR 2-R units. Where more than one cable is to be installed in the slot, the UR1-S unit designation should be modified by a suffix corresponding to the number of cables installed. Example: UR1-S(D) 3c for 3 cables plowed at one time.

UR 2-S(D&W) Trenching Assembly Unit, Soil—Consists of one (1) lineal foot of trenching in soil, measured parallel to the surface of the ground, to a specified depth (D) and width (W), in inches, including the excavation, and backfilling and compacting. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermain, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the trench or cable bedding assembly units, when required.

NOTE: Where in the judgment of the Owner greater than normal difficulty will be involved in trenching because of the presence of underground facilities of other utilities,

Rural Utilities Service, USDA

§1726.351

this unit will be suffixed by the letter "T". This will be applicable only in those areas predesignated by the Owner on the detail maps herein. Where more than one cable is to be installed in the trench, the regular UR 2-S unit designation should be modified by a suffix corresponding to the construction drawing for the type of cable placement desired.

UR 2-R (D&W) Trenching Assembly Unit, Rock—Consists of one (1) lineal foot of trenching in rock, measured parallel to the surface of the ground, to specified depth (D) and width(W), in inches, including the excavation, and backfilling and compacting to place cable to the depth specified in the Specifications. This unit will be specified by the Owner only when field conditions at the site show the existence of rock at a depth preventing the placing of the cable in soil to the depths required in the Specifications. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermains, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the trench or cable bedding assembly units, when required.

UR-3 Cable Bedding Assembly Unit—Consists of one (1) lineal foot of a 2-inch bed of clean sand or soil placed in the trench under the cable and a 4-inch layer of clean sand or soil backfill over the cable to the width of the trench.

NOTE: The exact location and number of units shall be determined by the Owner after the trenches are open in those areas where

rock or other conditions make special bedding necessary.

UR-4a Pavement Assembly Unit, Asphalt—Consists of the labor and material necessary to remove and restore one (1) lineal foot of asphalt pavement, measured along the route of the cable. All work shall be performed in accordance with the requirements of state or local authorities. Any trenching which may be necessary is included in this unit.

UR-4c Pavement Assembly Unit, Concrete—Consists of the labor and material necessary to remove and restore one (1) lineal foot of concrete pavement, measured along the route of the cable. All work shall be performed in accordance with the requirements of state or local authorities. Any trenching which may be necessary is included in this unit.

UR-5() Underground Pipe Crossing Assembly Unit—Consists of one (1) lineal foot of steel pipe, of the inside diameter, in inches, specified in the last digit of the assembly unit designation, installed in place. This unit includes the pushing of pipe and any excavation, backfilling and tamping necessary for the installation of the pipe. The pipe will be installed at the depth specified by the Owner. Underground cable installed in the pipe is not included in this unit.

UR-6 Underground Nonpipe Crossing Assembly Unit—Consists of the labor in providing a hole in soil one (1) foot in length of a diameter sufficient to accommodate the cable to be installed therein. The depth of the hole below the surface of the ground shall be specified by the Owner. This unit includes any excavation, backfilling and tamping necessary for the installation. This unit may be used where the permanent installation of a steel pipe under the UR-5 unit is not required. Underground cable installed in the hole is not included in this unit.

Unit No.	No. of units	Unit price			Extended price—labor & materials

UR					

Total, Section UR—

Distribution Construction Units—Line Changes

The general heading of Line Changes applies to the changing of existing lines or portion thereof from their existing phasing, wire size, and type to new phasing, wire size, and type and the removal of existing lines or portion thereof and replacing with new lines in close proximity thereto. In general line changes involve three types of assembly units as follows:

Section H—Conversion assembly units;
Section I—Removal assembly units;

Section N—New construction assembly units on existing lines or in replacing lines.

The assembly units that are included in Section H, I, and N are defined by symbols and descriptions which follow together with the applicable descriptions included under New construction. Where the descriptions are not correct or sufficiently explicit, or when special units are not covered by Construction Drawings, descriptions have been provided by the Engineer in the respective sections.

§ 1726.351

Work included in these sections shall be performed under the schedule as set forth below: _____.

SCHEDULE OF DEENERGIZATION OF EXISTING DISTRIBUTION LINES UNDER WHICH WORK UNDER SECTIONS H, I, AND N SHALL BE PERFORMED

Line section (To be designated by point to point description on detail map)	Hours and days of week when lines will be deenergized to permit line changes

The Bidder will so plan and perform its work on the above lines that it will be possible for the Owner to safely reenergize all lines involved at the expiration of the time limits set up in the above schedule to resume service to all consumers being served prior to deenergization. Prior to commencement of work each day on lines to be deenergized, the Bidder will notify the Owner in writing thereof, designating the lines to be deenergized and upon receipt of such notice, the Owner will deenergize such lines. Upon completion of work each day on such deenergized lines, the Bidder will notify the Owner thereof in writing or in such other manner as the circumstances permit designating the lines to be reenergized and stating that such lines may be safely reenergized and upon receipt of such notice, the Owner will reenergize such lines.

Section H—Conversion Assembly Units

Conversion assembly units are pole-top assemblies and cover the furnishing of all labor and additional materials for changing an existing assembly unit to a new assembly unit, utilizing certain items of materials of the existing assembly unit on poles to be left in place. The unit prices for materials should include only additional material that is required to complete the new unit, less suitable allowance for material removed. Any materials removed from the existing assembly units which are not required in the construction of the conversion assembly unit become the property of the Bidder and may, with the permission of the Engineer, be reused by the Bidder in the construction of

7 CFR Ch. XVII (1–1–97 Edition)

other assembly units called for in the Construction Contract. Conversion assembly units are specified by the prefix H with the new construction assembly unit designation shown first and the existing assembly unit designation shown last. For example, a H B1–A1 signifies the conversion of an existing A1 assembly unit to a B1 assembly unit (as was defined in the description of construction assembly units). In this instance the Bidder utilizes the existing pin-type insulator, single upset bolt and neutral spool in the construction of the new assembly unit. The Bidder furnishes the additional crossarm, crossarm pins, braces, machine bolt, carriage bolts, lag screw, and insulator required for the new unit. The Bidder takes possession of the pole-top pin and two machine bolts and with the permission of the Engineer may reuse these elsewhere in the construction of the Project. The Bidder will not be held accountable to the Owner for the materials he so acquires.

The Conversion assembly units also include the furnishing of all labor and materials in the transferring, resagging and retying of conductors from one position on the pole to a different position on the pole where such transfers are required. Where replacement of conductor is required, the existing conductor will be removed under Section I and the new conductor installed under Section N.

Where replacement of a pole is required, the existing pole and pole-top assembly will be removed under Section I and the new pole and pole-top assembly will be installed according to Section N and no H units will be involved.

Conversion assemblies are listed in three subsections for converting pole-top assemblies from single to V phase, single to three phase, and V to three phase. The following descriptions apply to only those units not sufficiently explicit.

Section I—Removal Assembly Units

Removal assembly units cover the furnishing of all labor for the removal of existing units of construction from existing lines, disassembling into material items, and all labor and transportation for the returning of all materials to the warehouse of the Owner in an orderly manner or transporting elsewhere to the site of the Project for reuse in the prosecution of this Contract as approved by the Engineer.

The Bidder will be charged by the Owner for the full value of all materials removed under this section at the value shown in Table C. Such charges will be placed against the Bidder as units are removed and the value will be deducted from the total value of installed assembly units for determination of the work accomplished for purposes of monthly progress payments to the Bidder.

Of the materials listed in Table C to be removed from existing lines, certain materials will be reused in the construction of the Project. Such materials to be reused are listed in Table C-1. Materials other than those listed in Table C-1 shall, if not damaged in handling, be returned to the Owner for full credit at the values shown in Table D. The Bidder will be allowed full credit for all material items, other than those listed in Table C-1, returned to the Owner which, in the opinion of the Engineer, were not damaged by the Bidder in removal and handling even though the materials may not be reusable for reasons of obsolescence or deterioration. Such credits shall be allowed the Bidder as materials are returned to the Owner's warehouse and shall be added to the total value of installed assembly units for determination

of the work accomplished for purposes of monthly progress payments to the Bidder.

The unit removal prices shall include all material and labor required to reinstall in accordance with specifications any conductors temporarily detached. The Bidder will reinstall at his own expense any other units removed by him for his own convenience.

The removal units are specified by the prefix I and followed by the assembly unit designation of existing assembly unit to be removed. For example, an I-A1 signifies the removal of an A1 assembly unit. The following special notes apply to specific removal units:

a. Poles. All poles of the same height, regardless of pole class, are designated by the same unit. Thus an I-30-foot pole signifies the removal of a 30-foot pole of any class. The Bidder is not required under this unit to remove from the pole any ground wire or pole numbering attached to the pole. This unit includes the refilling and tamping of holes in a workmanlike manner unless they are to be reused.

b. Pole-Top Assemblies. The unit of removal of pole-top assemblies includes, in addition to the removal of the assembly itself, any necessary handling, resagging, and retying of conductors in those cases where an existing pole-top assembly will be removed and replaced by a new pole-top assembly and where any existing conductor is to be reused.

The unit of removal of pole-top assemblies also includes any holding or handling of mainline or tap conductors at tap lines, angles, and deadends where such is involved, and reinstalling of such conductor in accordance with the specifications; for example, an I-A5-4 will include the disconnection of the tap conductors, snubbing off the tap line at the nearest practical point and the reconnection and resagging of these tap conductors if

§ 1726.351

necessary to the new tap assembly when installed. The new unit of construction, however, will be specified separately in Section N.

c. Conductor. The conductor removal unit covers the removal of 1,000 feet of conductor or cable and reeling or coiling it in a workmanlike manner in such a way that it can be reused by the Bidder or the Owner. The Owner will furnish to the Bidder reels if it is to be returned to the Owner's warehouse on reels. The Bidder will retain possession of all jumpers, tie wire, armor rods, connectors, and other conductor accessories removed. These items will not be returned to the Owner. The removal unit for each size of conductor or cable is shown by the prefix I followed by D and the conductor or cable type; thus an I-D-6ACWC signifies the removal unit for 1,000 feet of 6A Copperweld-copper conductor.

d. Guys. All guys regardless of length, type of attachment, or size of guy strand are specified by the same unit; thus an I-E signifies the removal of any guy.

e. Anchors. Only anchor rods are to be removed by the Bidder in anchor removal units. The anchor will be left in the ground; thus an I-F signifies the removal of any anchor rod. If the rod cannot be unscrewed, the end of the rod shall either be cut off or bent down so that the rod will be at least 18 inches below ground.

f. Transformers. The unit for removal of transformer assembly units is divided into two sections, (1) Conventional Transformer Assembly, and (2) Self-Protected Transformer Assembly. Only one unit is specified for each type, and all sizes of transformers from 1 to 25 kVA within each group will be covered by the same unit. "Self-protected" refers to transformers where all protective equipment is mounted on or within the transformer. "Conventional" refers to transformers where protective equipment is mounted separately from the transformer. The unit is designated by the prefix I followed by the description of the unit to be removed; thus IG Conventional signifies the removal of a conventional transformer assembly for any size transformer from 1 to 25 kVA.

g. Secondary Units. The unit for removal of secondary assemblies includes, in addition to the removal of the assembly itself, all necessary handling such as untying, resagging, and retying of secondary conductor or cables where existing secondary conductor or cable is to be reused.

In addition, the unit for removal of the secondary assembly includes the handling or holding of any conductor at tap lines where such is involved, and the reinstalling of such tap conductor in accordance with the specifications.

h. Service Unit. The unit for removal of service assemblies includes, in addition to

7 CFR Ch. XVII (1-1-97 Edition)

the removal of the assembly itself, all necessary handling such as untying, resagging, and retying of service conductor or cable where existing service conductor or cable is to be reused.

The following descriptions apply only to those removal units not sufficiently explicit:

Notes: 1. See "List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers".

Section N—New Assembly Units

The purpose of this section is to list complete new units of construction where such units are to be added to existing lines or installed in replacing lines.

The units as covered by this section are the same as the units described in Distribution Construction Units—New Construction, except that these units are prefixed by the letter N.

For example, an N40-6 unit covers the furnishing of all material and labor for the installation of a 40-6 pole either in an existing distribution line being operated by the Owner or in a new line being constructed to replace an existing distribution line being operated by the Owner.

The following descriptions apply only to those new units not sufficiently explicit:

		Labor	Materials	Labor and materials	
TP TS TSS TSZ Total, Section 2—					

Section 3—Conductor Assembly Units

A conductor assembly unit consists of 1,000 feet of a single conductor or overhead ground wire, and includes tie wire, sleeves for splicing, and armor rods with clips or armor wire where necessary. The length of conductor or

overhead ground wire shall be determined by taking the sum of all straight horizontal span distances between pole stakes or from center to center of the poles carrying the conductors. The conductor sizes and types listed are the manufacturer's designation.

Unit No.	No. of units	Unit price			Extended price— labor & materials
		Labor	Materials	Labor and materials	
Total, Section 3—					

As provided for in the specifications, prior to beginning of work the Bidder will furnish the Engineer the following data on tension equipment:

Diameter Bull Wheel _____ in.
Diameter Groove _____ in.
Conductor Bending Radius _____ in.
Thickness of Neoprene at Bottom of Groove _____ in.

Stringing Sheave Diameter; Tangent _____ in., Large Angle _____ in.

Section 4—Guy Assembly Units (TG Units)

A guy assembly unit consists of the hardware and wire. Guy guards are designated separately.

Unit No.	No. of units	Unit price			Extended price— labor & materials

Section 6—Miscellaneous Assembly Units

A miscellaneous assembly unit consists of an additional unit needed in the Project for

line construction but not otherwise listed in the Proposal.

Unit No.	No. of units	Unit price			Extended price— labor & materials
		Labor	Materials	Labor and materials	
TM					
Total, Section 6—					

Section 7—Right-of-Way Clearing Units

TM-12. The unit is 1,000 feet in length and _____ (_____) feet in width (to be measured _____ (_____) feet on one side of pole line or centerline of structures) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed _____ in height, shall be clear from the ground up on one side of the line of poles carrying conductors. (See Detail A, Drawing TM-12-2A.) The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to the ground line. (See Detail B, Drawing TM-12-2A.) All trees and underbrush across the width of the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing. (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All length thus arrived at, added together and divided by 1,000 shall give the number of 1,000-foot TM-12 units of clearing. The Bidder shall not remove or trim shade, fruit, or ornamental trees unless so directed by the Engineer in writing.

TM-12 (1). This unit is identical with TM-12, except the full width of the right-of-way to be cleared shall be _____ (_____) feet wide (to be measured _____ (_____) feet on each side of the pole line or centerline of structures). (See Detail D, Drawing TM-12-2A.) TMC-12, TMC-12 (1). These units are identical to the respective TM units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

TM-13. The unit, for purpose of quoting, is 1,000 feet in length of clearing off the right-of-way. The Engineer will select those trees off the right-of-way that he deems to be a hazard to the line and will designate them to the Bidder in writing as danger trees. When so designated, the Bidder shall remove or top such trees at his option except that the Bidder shall trim and not remove shade, fruit, or ornamental trees unless otherwise di-

rected by the Engineer in writing. (See Drawings TM-12-2A and TM-13 for examples of danger trees.)

The measurement of the length of clearing off the right-of-way shall be considered as a straight line parallel to the horizontal line between poles or centerline of structures, such measurement of length to be based on maximum dimension of foliage (not trunk) projected to the ground line. (See Details E, F, G, and H, Drawing TM-12-2A.) Dead trees having no foliage shall be measured across the maximum dimension and multiplied by two. (See Detail F, Drawing TM-12-2A.) Each tree so removed shall be added together to determine the total length of clearing. All length thus arrived at, added together and divided by 1,000, shall give the number of TM-13 units. (Example: Details E, F, G, and H, Drawing TM-12-2A, total .1 of a TM-13 unit.)

TM-14. The unit is 1,000 feet in length and _____ (_____) feet in width (to be measured _____ (_____) feet on one side of right-of-way centerline) of actual clearing of right-of-way. Trees and underbrush should be cleared from the ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide “undulating” boundaries. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the access road. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM-14 (1). This unit is identical with TM-14 except the full width of the right-of-way to be cleared shall be _____ (_____) feet in width (to be measured _____ (_____) feet wide (See Detail D, Drawing TM-12-2A.)

§ 1726.351

7 CFR Ch. XVII (1–1–97 Edition)

TM-15. The unit is 1,000 feet in length and _____ (_____) feet in width (to be measured _____ (_____) feet on one side of the right-of-way centerline) of actual clearing of the right-of-way. Trees and underbrush should be cleared from ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide a “feathered” appearance in the right-of-way. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the access road.

The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to ground line (See Detail B, Drawing TM-12-2A). All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A). Spaces along the right-of-way which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM-15 (1). This unit is identical to TM-15 except the full width of the right-of-way to be cleared shall be _____ (_____) feet wide (See Detail D, Drawing TM-12-2A).

Additional Requirements (When specifying TM units denote type of disposal (A or B).)

A. Trees, brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used):

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) _____

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Engineer but in no case shall it be required to be less than _____ (_____) feet. Brush, branches, and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used):

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) _____

Section 8—Substation Assembly Units

Description of Construction Units. Each Construction Unit consists of a complete installation of the designated portion of a substation as specified on the drawings, together with connections to associated equipment. Each Construction Unit represents all labor and material including necessary accessories completely installed and tested in satisfactory operation. Full identification of each Construction Unit and all necessary specifications of the installation is shown on the drawings.

Items of material in each Construction Unit shall be of the designated size, rating, type, voltage, or other specification in accordance with the drawings. The bill of material drawing for each substation shows the identification of the Construction Units under which the material is to be installed and shows which items of material may be partly or entirely found on the lists of Owner-furnished materials. All items of equipment, unless otherwise specified, are mounted on a structure which shall be a Construction Unit of Group A.

Each Construction Unit is designated by the letter of the Group to which it belongs and an identifying number. The same item of equipment carries the same Construction Unit designation in all the substations. Items of equipment designated by the same Construction Unit in one substation are of only one kind as to voltage, type and other specifications. The tabulation of Construction units for each substation is separate and contains all units necessary for construction of that substation.

Rural Utilities Service, USDA

§1726.351

Group A. Structures. A Construction Unit consists of a structure, or structures, with bus supports including insulators and fittings, buses, conductors and overhead ground wires to adjacent structures within the substation, grounding material to connect equipment with the ground bus, and associated material including mounting brackets, supports for equipment, clamps and connectors, all as specified in the drawings.

Group B. Three-Pole Group Operated Air Break Switches. A Construction Unit consists of one 3-pole group operated air break switch with all accessories and operating mechanisms as specified in the drawings.

Group C. Lightning Arresters. A Construction Unit consists of one single arrester.

Group D. Single Pole Disconnecting Switches. A Construction Unit consists of one single pole disconnecting or by-pass switch as specified in the drawings. If a fuse disconnect switch is specified, the fuse is included with the switch.

Group E. Oil Circuit Breakers. A Construction Unit consists of one complete three-phase power circuit breaker complete with supporting frame and control cabinet, unless shown otherwise in the drawings, mounted as specified in the drawings.

Group F. Oil Circuit Reclosers. A Construction Unit consists of a complete single-phase or three phase oil circuit recloser as specified in the drawings.

Group G. Meters, Relays and Instrument Transformers. A Construction Unit consists of one meter, relay potential transformer or current transformer.

Group H. Transformers. A Construction Unit consists of one power transformer or one station service transformer either single-phase or three-phase as specified in the drawings.

Group I. Voltage Regulators. A Construction Unit consists of one single-phase or three-phase voltage regulator as specified in the drawings.

Group J. Communications and Supervisory Control Equipment. A Construction Unit consists of carrier current equipment, microwave, or other types of communications and supervisory control equipment as specified in the drawings.

Group K. Conduit and Cable. A Construction Unit consists of the wire, cable, conduit and accessories necessary to complete the installation of equipment in accordance with the specifications and drawings, where such installation has not been included in other Groups.

Group L. Foundations. A Construction Unit consists of concrete footings and foundations except for the fence, as specified in the drawings.

Group M. Site Preparation. A Construction Unit consists of clearing, grading, drainage work, and surfacing, as specified in the drawings.

Group N. Fence. A Construction Unit consists of the complete installation of the fence, gates, etc., as specified in the drawings.

Group O. Station Grounding. A Construction Unit consists of the complete ground bus including ground rods, grounding mats or platforms, except as otherwise provided in other Groups, with connections to structures, equipment, and fence as specified in the drawings.

Group P. Building. A Construction Unit consists of a control building or cabinet, on a foundation of Group L and the facilities and equipment installed therein as specified in the drawings, except as otherwise provided in other Groups.

Other Groups. The Engineer shall specify such additional Groups as may be necessary for the completion of the Project. Description of these Groups shall be provided by an addition to this Section of the Specifications for Construction.

§ 1726.352 Electric transmission construction contract (labor and materials), RUS Form 831.

The contract form in this section shall be used when required by this part. This form refers to guide drawings, which do not contain requirements, and, hence, are not included in this part. The guide drawings are included in the printed form available from GPO (See § 1726.300.).

**ELECTRIC TRANSMISSION CONSTRUCTION
CONTRACT (LABOR AND MATERIALS)**

Notice and Instructions to Bidders

1. Sealed proposals for the construction, including the supply of necessary labor, materials and equipment, of a rural electric project of _____ (hereinafter called the "Owner") to be known as Project will be received by the Owner on or before _____ o'clock _____ M., _____, 19____ at its office at _____ at which time and place the proposals will be publicly opened and read. Any proposal received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. Description of Project: The Project will consist of approximately:

Transmission Line Construction

_____ miles _____ kV; _____ miles
_____ kV
_____ miles _____ kV underbuild

Substations and Other Major Facilities

_____ kVA _____ Voltage _____ Name

The Project is located in _____ Counties, in the State of _____ all as more fully described in the Plans, Specifications, Construction Drawings and Contractor's Proposal therefore hereinafter referred to.

3. Owner Furnished Materials. The unit prices in the Contractor's Proposal shall include provisions for Owner Furnished Materials since as stated in Article 1, Section 3 of the Contractor's Proposal, the value of the Owner Furnished Materials, if any, will be deducted from payments to the Bidder for completed Construction Units.

4. Obtaining Documents. The Plans, Specifications and Construction Drawings together with all necessary forms and other documents for bidders may be obtained from the Owner, or from the Engineer, _____ at the latter's office at _____ upon the payment of \$_____, which payment will not be subject to refund. The Plans, Specifications and Construction Drawings may be examined

at the office of the Owner or at the office of the Engineer. A copy of the Loan Contract (if the Project is to be financed, in whole or in part, pursuant to a loan contract) between the Owner and the United States of America acting through the Administrator of the Rural Utilities Service (hereinafter called the Administrator) and of the loan contract between the Owner and any other lender may be examined at the office of the Owner. Each set of Plans, Specifications and Construction Drawings will have a serial number, given by the Engineer, and the number of each set with the name of the Purchaser will be recorded by the Engineer. Bids will be accepted only from the original purchaser.

5. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations or interlineations will be permitted, unless made before submission, and initialed and dated.

6. Familiarity with Conditions. Prior to the submission of the Proposal the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Plans, Specifications, Construction Drawings, and forms of Contractor's Proposal and Contractor's Bond on file with the Secretary of the Owner and with the Engineer, and shall become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project, general local conditions and all other matters that may affect the cost and the time of completion of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors, and the so-called "Kick-back Statute" (48 Stat. 948) and regulations issued pursuant thereto.

7. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

8. Alternate Designs. The Owner reserves the right to confine its consideration of the several bids to one type of design regardless of alternate types of design which may be specified in the Plans and Specifications and offered in the Proposals.

9. The Time for Completion of Construction of the Project shall be as specified by the Engineer in the Proposal.

10. Bid Bond. Each Proposal must be accompanied by a Bid Bond in the form attached or a certified check on a bank that is

a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder agrees, provided its Proposal is one of the three low Proposals, that, by filing its Proposal together with such Bid Bond or check in consideration of the owner's receiving and considering such Proposals, said Proposal shall be firm and binding upon each such Bidder and such Bid Bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor's Bond is furnished (where required) by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinbefore set for the opening of Proposals, whichever period shall be the shorter. If such Proposal is not one of the three low Proposals, the Bid Bond or check will be returned in each instance within a period of ten (10) days to the Bidder furnishing same.

11. Contractor's Bond. The successful Bidder will be required to execute two additional counterparts of the Proposal and, for a Contract in excess of \$100,000, to furnish a Contractor's Bond in triplicate in the form attached hereto with sureties listed by the United States Treasury Department as Acceptable Sureties, in a penal sum not less than the contract price.

12. Failure to Furnish Contractor's Bond. Should the successful Bidder fail or refuse to execute such counterparts or to furnish a Contractor's Bond (where required) within ten (10) days after written notification of the acceptance of the Proposal by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled (a) To enforce the Bid Bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check, the difference (not exceeding the amount of the certified check) between the amount of the Proposal and such larger amount for which the Owner may in good faith contract with another party to construct the Project. The term "Successful Bidder" shall be deemed to include any Bidder whose Proposal is accepted after another Bidder has previously refused or has been unable to execute the counterparts or to furnish a satisfactory Contractor's Bond (where required.)

13. Contract is Entire Agreement. The Contract to be effected by the acceptance of the Proposal shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modification thereof resulting from any representation or promise made at any time by any officer, agent or employee of the Owner or by any other person.

14. Minor Irregularities. The Owner reserves the right to waive minor irregular-

ities or minor errors in any Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal in which they occur prior to the acceptance thereof by the Owner.

15. Balanced Bid. The Owner reserves the right to reject any or all Proposals. The attention of Bidders is specially called to the desirability of a proper balance between prices for labor and materials and between the total prices for the respective Construction Units. Lack of such balance may be considered as a reason for rejecting a Proposal.

16. Discrepancy in Unit Prices. Where the unit prices in the Contractor's Proposal are separated into three columns designated as "Labor," "Materials" and "Labor and Materials," and where a discrepancy appears between the sum shown in the "Labor and Materials" column and the correct addition of the sums appearing in the "Labor" column and the "Materials" column, the correct addition of the sums appearing in the "Labor" column and the "Materials" column shall control.

17. Definition of Terms. The terms "Administrator," "Engineer," "Supervisor," "Project," "Completion of Construction" and "Completion of the Project" as used throughout this Contract shall be as defined in Article VI, Section 1, of the Contractor's Proposal.

18. The Owner Represents:

a. If by provisions of the Contractor's Proposal the Owner shall have undertaken to furnish any materials for the construction of the Project, such materials are on hand at locations specified or if such materials are not on hand they will be made available by the Owner to the successful Bidder at the locations specified before the time such materials are required for construction.

b. All easements and rights-of-way, except as shown on maps included in the Plans and Specifications, have been obtained from the owners of the properties across which the Project is to be constructed (including tenants who may reasonably be expected to object to such construction). The remaining easements and rights-of-way, if any, will be obtained as required to avoid delay in construction.

c. All staking, except as shown on the maps included in the Plans and Specifications, has been completed and sufficient staking crews will be available to maintain stakes at all times in advance of construction.

d. Prompt payment for the construction of the Project will be made with funds pursuant to the Loan Contract, or with funds otherwise available to the Owner.

§ 1726.352

7 CFR Ch. XVII (1–1–97 Edition)

If the Owner shall fail to comply with any of the undertakings contained in the foregoing representations or if any of such representations shall be incorrect, the Bidder will be entitled to an extension of time of completion for a period equal to the delay, if any, caused by the failure of the Owner to comply with such undertakings or by any such incorrect representation; provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion in accordance with the foregoing; provided, however, that such extension, if any, of the time and completion shall be the sole remedy of the Bidder for the Owner's failure, because of conditions beyond the control and without the fault of the Owner, to furnish materials in accordance with subparagraph a hereof.

____ Owner
By _____
____, 19____

Contractor's Proposal

(Proposal shall be submitted in ink or type-written)

To: _____ (Hereinafter called the "Owner")

Article I—General

Section 1. Offer to Construct. The undersigned (hereinafter called the "Bidder") hereby proposes to receive and install such materials and equipment as may hereinafter be specified to be furnished by the Owner, and to furnish all other materials and equipment, all machinery, tools, labor, transportation and other means required to construct the rural electric project _____ in strict accordance with the Plans, Specifications and Construction Drawings therefor, attached hereto and made a part hereof, for the prices hereinafter stated. The total length of the project lines shall be determined by taking the sum of all straight horizontal span distances between pole stakes or from center to center of poles, or centerline of structures, carrying conductors.

Section 2. Materials and Equipment. The Bidder agrees to furnish and use in the construction of the Project under this Proposal, in the event the Proposal is accepted, only such materials and equipment as are included in the current "List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers," including revisions adopted prior to the Bid Opening.

The Bidder further agrees to furnish:

	Type	Size	Galvanizing class
Overhead ground wire			
Guy wire			
Structure ground wire			

(Engineer to insert Type, Size and Galvanizing Class as appropriate)

The Bidder further agrees to furnish and use poles, crossarms, and other timber products, of which the physical characteristics, method of treatment, type of preservative, instructions on inspection and general procedure shall be in accordance with RUS standards and requirements.

Crossarms shall be _____ (Engineer to insert Douglas Fir or Southern Yellow Pine), treated with _____
(Engineer to insert type of preservative.)

Section 3. Owner-Furnished Materials. The Bidder understands and agrees that, if this Proposal is accepted, the Owner will furnish to the Bidder the material set forth in the attached "List of Owner's Materials on Hand" (see page ____) and the Bidder will give a receipt (see page ____) therefor in writing to the Owner. The Bidder, further, will on behalf of the Owner accept delivery of such of the materials set forth in the attached "List of Materials Ordered by Owner but Not Delivered" (see page ____) as may be subsequently delivered and will promptly forward to the Owner for payment the supplier's invoice, together with the Bidder's receipt in writing for such materials. The materials referred to are on hand at, or will be delivered to, the locations specified in the Lists and the Bidder will use such materials in constructing the Project.

The value of the completed Construction Units certified by the Bidder each month pursuant to Article III, Section 1(a) of this Proposal shall be reduced by an amount equal to the value of the materials installed by the Bidder during the preceding month which have been furnished by the Owner or the delivery of which has been accepted by the Bidder on behalf of the Owner. Only ninety percent (90%) of the remainder shall be paid prior to the Completion of the Project. The value of such materials shall be computed on the basis of the unit prices stated in the Lists, Materials, if any, not required for the Project, which have been furnished to the Bidder by the Owner or delivery of which has been accepted by the Bidder on behalf of the Owner, shall be returned to the Owner by the Bidder upon completion of construction of the Project. The value of all materials not installed in the Project nor returned to the Owner shall be deducted from the final payment to the Bidder.

The Owner shall not be obligated to furnish materials in excess of the quantities, size, kind and type set forth in the attached Lists. If the Owner furnished, and the Bidder accepts, materials in excess therefor, the values of such excess materials shall be their actual cost as stated by the Owner.

Information on the shipping schedules of materials on the "List of Materials Ordered by Owner But Not Delivered" will be furnished to the Bidder as necessary during progress of the work.

Rural Utilities Service, USDA

§ 1726.352

Upon delivery the Bidder shall promptly receive, unload, transport and handle all materials and equipment on the "List of Materials Ordered by Owner But Not Delivered" at its expense and shall be responsible for demurrage, if any.

Section 4. Purchase of Materials Not Furnished by Owner. The Bidder will purchase all materials and equipment (other than owner-furnished materials) outright and not subject to any conditional sales agreements, bailment, lease or other agreement reserving unto the seller any right, title or interest therein. All such materials and equipment shall become the property of the Owner when erected in place.

Section 5. Proposal on Unit Basis. The Bidder understands and agrees that the various Construction Units on which bids are made are defined by symbols and descriptions in this Proposal, that all said bids are on a unit basis, and that the Owner may specify any number or combination of Construction Units that the Owner may deem necessary for the construction of the Project. Separate Construction Units are designated for each different arrangement which may be used in the construction of the Project. This Proposal is based on a consideration of each unit in place and includes only the materials listed on the corresponding Construction Drawings or description of unit where no drawing exists.

Section 6. Description of Contract. The Notice and Instructions to Bidders and Plans attached hereto and made a part hereof, and the Specifications and Construction Drawings set forth in the Electric Transmission Specifications & Drawings, RUS Form 805, as applicable, together with the Proposal and Acceptance constitute the Contract. The plans, consisting of maps and special drawings, are identified as follows: _____.

Section 7. Familiarity with Conditions. The Bidder has made a careful examination of the site of the Project to be constructed and of the Plans, Specifications, Construction Drawings, and form of Contractor's Bond attached hereto, and has become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, and the kind of facilities required before and during the construction of the Project, and has become acquainted with the labor conditions, state and local laws and regulations which would affect work on the proposed construction.

Section 8. License. The Bidder warrants that a Contractor's License is _____ is not _____ required, and if required it possesses Contractor's License No. _____ for the State of _____ in which the Project is located and said license expires on _____, 19____.

Section 9. The Bidder warrants that this Proposal is made in good faith and without

collusion or connection with any person or persons bidding for the same work.

Section 10. The Bidder warrants that it possesses adequate financial resources and agrees that in the event this Proposal is accepted and a Contractor's Bond is required, it will furnish a Contractor's Bond in the form attached hereto, in a penal sum not less than the maximum Contractor price, with a surety or sureties listed by the United States Treasury Department as Acceptance Sureties.

In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contract or on any bond or bonds delivered in substitution therefor or in addition thereto shall at any time become unsatisfactory to the Owner or the Administrator, the Bidder agrees to deliver to the Owner another or an additional bond.

Section 11. Taxes. The unit prices for Construction Units in this Proposal include provisions for the payment of all monies which will be payable by the Bidder or the Owner in connection with the construction of the Project on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies and equipment, or services or labor of installation thereof, to be incorporated in the Project as part of such Construction Units. The Bidder agrees to pay all such taxes, except taxes upon the sale, purchase or use of owner-furnished materials and it is understood that, as to owner-furnished materials, the values stated in the attached "List of Owner's Materials on Hand" and "List of Materials Ordered by Owner But Not Delivered" include taxes upon the sale, purchase or use of owner-furnished materials, if applicable. The Bidder will furnish to the appropriate taxing authorities all required information and reports pertaining to the Project, except as to the owner-furnished materials.

Section 12. Changes in Quantities. The Bidder understands and agrees that the quantities called for in this Proposal are approximate, and that the total number of units upon which payment shall be made shall be as set forth in the Inventory. If the Owner changes the quantity of any Assembly Unit or Assembly Units specified in this Proposal by more than 15%, and the materials cost to the Bidder is increased thereby to an extent which would not be adequately compensated by application of the unit prices in this Proposal to the revised quantity of such unit or units, such change, to the extent of the quantities of such units in excess of such 15%, shall be regarded as a change in the construction within the meaning of Article II, Section 1(d) of this proposal.

Section 13. Description of Contract. The Notice and Instructions to Bidders, Plans, Specifications for Construction and Construction Drawings, all attached hereto and

§ 1726.352

7 CFR Ch. XVII (1–1–97 Edition)

made a part hereof together with the Proposal and Acceptance constitute the contract. The Plans and Construction Drawings are identified as follows: _____

LIST OF OWNER'S MATERIALS ON HAND

Item ¹	Description of material	Catalog No.	Quantity	Unit price	Extended price
Total Above materials are located at:					

Notes: 1. Item corresponds with item in list of materials in construction drawings. Under Article I, Section 3, the value of these materials will be deducted from payments to the Bidder for completed Construction Units.

LIST OF MATERIALS ORDERED BY OWNER BUT NOT DELIVERED

Item ²	Supplier name and address	Scheduled delivery date	Description of material	Catalog No.	Quantity	Unit price	Extended price
Total Above material to be delivered to:							

Notes: 2. Item corresponds with item in list of materials in construction drawings. Under Article I, Section 3, the value of these materials will be deducted from payments to the Bidder for completed Construction Units.

Article II—Construction

Section 1. Time and Manner of Construction

a. The Bidder agrees to commence construction of the Project on a date (hereinafter called the "Commencement Date") which shall be determined by the Engineer after notice in writing of approval of the Contract by the Administrator and notice in writing from the Bidder that the Bidder has sufficient materials to warrant commencement and continuation of construction, but in no event will the Commencement Date be later than ____ calendar days after date of approval of the Contract by the Administrator. The Bidder further agrees to prosecute diligently and to complete construction in strict accordance with the Plans, Specifications and Construction Drawings within ____ (____) calendar days (excluding Sundays) after Commencement Date: Provided, however, that the Bidder will not be required to dig holes, set poles or install anchors if there are more than six (6) inches of frost in the ground nor to perform any construction on such days when in the judgment of the Engineer snow, rain, or wind, or the results of snow, rain, or frost make it impracticable to perform any operation of construction and to the extent of the time lost due to the conditions described herein and approved in writing by the Engineer, the time of completion set out above will be extended if the Bidder makes a written request therefor to the Owner as provided in subsection b of this Section 1.

b. The time for Completion of Construction shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Bidder, including Acts of God,

fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: *Provided, however*, that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefor in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

c. The sequence of construction shall be as set forth below, the numbers or names being the designations of extensions or areas (hereinafter called the "Sections") corresponding to the numbers or names shown on the maps attached hereto, or if no Sections are set forth below, the sequence of construction shall be as determined by the Bidder, subject to the approval of the Engineer. _____

d. The Owner, acting through the Engineer and with the approval of the Administrator,¹ may from time to time during the progress

¹As long as the total price of this contract including all amendments is less than 120 percent of the original contract price as stated in the acceptance hereto, amendments executed on RUS Form 238 are not subject to the approval of the Administrator. Whenever an amendment to this contract causes the total amended contract to exceed 120 percent of the original contract price, that amendment and all subsequent amendments to this contract shall be made subject to the approval of the Administrator.

of the construction of the Project make such changes in, additions to or subtractions from the Plans, Specifications, Construction Drawings, List of Materials and sequence of construction provided for in the previous paragraph which are part of the Contractor's Proposal as conditions may warrant: Provided, however, that if any change in the construction to be done shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefor to the Owner within ten (10) days after any such change is made. And provided further, that if the cost to the Bidder of construction of the Project shall be materially increased by any such change or addition, the Owner shall pay the Bidder for the reasonable cost thereof in accordance with a Construction Contract Amendment signed by the Owner and the Bidder and approved by the Administrator,² but no claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition.

e. The Bidder will not perform any work hereunder on Sundays unless there is urgent need for such Sunday work and the Owner consents thereto in writing. The time for completion specified in subsection a of this Section 1 shall not be affected in any way by inclusion of this subsection nor by the Owner's consent or lack of consent to Sunday work hereunder.

Section 2. Environmental Protection. The Bidder shall perform work in such a manner as to maximize preservation of beauty, conservation of natural resources and minimize marring and scarring of the landscape and silting of streams. The Bidder shall not deposit trash in streams or waterways, and shall not deposit herbicides or other chemicals or their containers in or near streams, waterways or pastures. The Bidder shall follow, under the general direction of the Engineer, the criteria relating to environmental protection as specified herein by the Engineer.

Section 3. The Bidder agrees that in the event this Proposal is accepted it will make available for use in connection with the proposed construction all necessary tools and equipment and qualified superintendents and foremen.

Section 4. Changes in Construction. The Bidder agrees to make such changes in construction previously installed in the Project by the Bidder as required by the Owner for prices arrived at as follows:

a. For substations and other units where only a portion of the complete unit is affected by the change, the compensation for

such change shall be as agreed upon in writing by the Bidder and the Owner and approved by the Administrator³ prior to the commencement of work in connection with such change.

b. For all other units, the compensation for such change shall be the reasonable cost thereof as agreed upon in writing by the Bidder and the Owner prior to the commencement of work in connection with such change, but in no event shall it exceed two (2) times the labor price quoted in the Proposal for the installation of the unit to be changed. Such compensation shall be in lieu of any other payment for the installation and removal of the original unit. (If a new or replacing unit is installed, payment for such new or replacing unit shall be made as shown in the final inventory.)

No payment shall be made to the Bidder for materials or labor involved in correcting errors or omissions on the part of the Bidder which result in construction not in accordance with the Plans and Specifications.

Section 5. Construction Not in Proposal. The Bidder also agrees that when it is necessary to construct units not shown in the Proposal it will construct such units for a price arrived at as follows:

a. The cost of materials shall be determined by the invoices.

b. The cost of labor shall be the reasonable cost thereof, but in no event shall it exceed an amount determined by calculating the ratio of the total labor costs to the total material costs in the section of the Proposal involved, and multiplying the cost of materials for the unit in question by this ratio.

Section 6. Supervision and Inspection.

a. The Bidder shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the "Superintendent") who shall be present at all times during working hours where construction is being carried on. The Bidder shall also employ, in connection with the construction of the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Bidder.

b. The Owner reserves the right to require the removal from the Project of any employee of the Bidder if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner or the Supervisor, if any, shall have the right to require the Bidder to increase the number of its employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory

² See Footnote 1.

³ See Footnote 1.

to the Owner or Supervisor; but the failure of the Owner or Supervisor to give any such directions shall not relieve the Bidder of its obligations to complete the work within the time and in the manner specified in this Proposal.

c. The manner of construction of the Project, and all materials and equipment used therein, shall be subject to the inspection, tests and approval of the Owner and the Administrator, and the Bidder shall furnish all information required by the Owner or by the Administrator concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner and the Administrator shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Bidder and of any subcontractor, relevant to the construction of the Project. The Bidder shall provide all reasonable facilities necessary for such inspection and tests and shall maintain an office at the site of the Project, with telephone service where obtainable and at least one office employee to whom directions and instructions of the Owner may be delivered. Delivery of such directions or instructions in writing to the employee of the Bidder at such office shall constitute delivery to the Bidder. The Bidder shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the Owner, when any other inspection is made.

d. In the event that the Owner, or the Administrator, shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Bidder and the Bidder's Surety or Sureties, if any, to have an inspection made by an engineer approved by the Owner and the Administrator for the purpose of determining the exact nature, extent and location of such defects.

e. The Engineer may recommend to the Owner that the Bidder suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Bidder to comply with any of the provisions of the Contract: Provided, however, that the Bidder shall not suspend work pursuant to this provision without written authority from the Owner so to do. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Bidder to comply with any of the provisions of this Contract. In the event that work is suspended by the Bidder with the consent of the Owner, the Bidder before resuming work shall give the Owner at least twenty-four (24) hours notice thereof in writing.

Section 7. Defective Materials and Workmanship.

a. The acceptance of any materials, equipment (except owner furnished materials) or any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such materials, equipment, or workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, by and at the expense of the Bidder. Any such condemned material or equipment shall be immediately removed from the site of the Project by the Bidder at the Bidder's expense. The Bidder shall not be entitled to any payment hereunder so long as any defective materials, equipment or workmanship in respect to the Project, of which the Bidder shall have had notice, shall not have been replaced or remedied, as the case may be.

b. Notwithstanding any certificate which may have been given by the Owner or the Engineer, if any materials, equipment (except owner-furnished materials) or any workmanship which does not comply with the requirements of this Contract shall be discovered within one (1) year after Completion of Construction of the Project, the Bidder shall replace such defective materials or equipment or remedy any such defective workmanship within thirty (30) days after notice in writing of the existence thereof shall have been given by the Owner. If the Bidder shall be called upon to replace any defective materials or equipment or to remedy defective workmanship as herein provided, the Owner, if so requested by the Bidder shall deenergize that section of the Project involved in such work. In the event of failure by the Bidder so to do, the Owner may replace such defective materials or equipment or remedy such defective workmanship, as the case may be, and in such event the Bidder shall pay to the Owner the cost and expense thereof.

Article III—Payments and Release of Liens

Section 1. Payments to Bidder.

a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Bidder for construction accomplished during the preceding calendar month on the basis of completed Assembly Units furnished and certified to by the Bidder, recommended by the Engineer and approved by the Owner solely for the purposes of payment: Provided, however, that such approval shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate approved during the construction of the Project shall be paid by the Owner to the Bidder prior to Completion of the Project: Provided, however, that at any time after work, which, in the sole determination of the Engineer,

Rural Utilities Service, USDA

§ 1726.352

amounts to fifty percent (50%) of the Maximum Contract Price has been completed, the Owner may elect, in lieu of paying ninety percent (90%) of each such subsequent estimate, to pay each such subsequent estimate in full. Upon completion by the Bidder of the construction of the Project, the Engineer will prepare a Final Inventory of the Project showing the total number and character of Assembly Units and, after checking such Inventory with the Bidder, will certify it to the Owner, together with a certificate of the total cost of the construction performed. Upon the approval of such certificates by the Owner and the Administrator, the Owner shall make payment to the Bidder of all amounts to which the Bidder shall be entitled thereunder which shall not have been paid: Provided, however, that such final payment shall be made not later than ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, unless withheld because of the fault of the Bidder.

b. The Bidder shall be paid on the basis of the number of Construction Units actually installed at the direction of the Owner shown by the inventory based on the staking sheets or structure lists; Provided, however, that the total cost shall not exceed the maximum Contract price for the construction of the Project as set forth in the Acceptance, unless such excess shall have been approved in writing by the Administrator⁴.

c. Notwithstanding the provisions of Section 1a above, the Bidder may, by giving written notice thereof to the Owner, elect to receive payment in full for any Section of the Project upon:

- (1) completion of construction of such Section as certified by the Engineer and approved by the Owner and the Administrator;
- (2) submission to the Owner and the Administrator of the releases of lien and the certificate referred to in Section 2 hereof;
- (3) approval by the Owner and the Administrator of the inventory in respect of such Section; and
- (4) submission to the Owner and the Administrator of the consent in writing by the Surety or Sureties, if any, on the Contractor's Bond to payment in full for such Section prior to Completion of the Project.

If no Sections are designated in Article II, Section 1c, the term "Section" shall mean for purposes of this subsection c and Article IV, Section 3b only, a part of the Project as designated by the Owner which represents at least twenty-five percent (25%) of the maximum Contract price as stated in Article III, Section 1, and which is capable of being energized and operated by the Owner.

d. Interest at the rate of ____ percent⁵ (____%) per annum shall be paid by the Owner to the Bidder on all unpaid balances due on monthly estimates, commencing fifteen (15) days after the due date; provided the delay in payment beyond the due date is not caused by any condition within the control of the Bidder. The due date for purposes of such monthly payment shall be the fifteenth day of each calendar month provided (1) the Bidder on or before the fifth day of such month shall have submitted its certification of Construction Units completed during the preceding month and (2) the Owner on or before the fifteenth day of such month shall have approved such certification. If, for reasons not due to the Bidder's fault, such approval shall not have been given on or before the fifteenth day of such month, the due date for purposes of this subsection d shall be the fifteenth day of such month notwithstanding the absence of the approval of the certification.

e. Interest at the rate of ____ percent⁶ (____%) per annum shall be paid by the Owner to the Bidder on the final payment for the Project or any completed Section thereof, commencing fifteen (15) days after the due date. The due date for purposes of such final payment shall be the date of approval by the Administrator of all of the documents requiring such approval, as a condition precedent to the making of final payment, or ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, whichever date is earlier.

f. No payment shall be due while the Bidder is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Bidder the amount of any claim by a third party against either the Bidder or the Owner based upon an alleged failure of the Bidder to perform the work hereunder in accordance with the provisions of this Contract.

Section 2. Release of Liens and Certificate of Contractor. (See sample RUS Form 224, Waiver and Release of Lien and sample RUS Form 231, Certificate of Contractor.) Upon the completion by the Bidder of the Project (or any Section thereof if the Bidder shall elect to receive payment in full for any Section when completed as provided above) but prior to final payment to the Bidder, the Bidder shall deliver to the Owner, in duplicate, releases of all liens and of rights to claim any lien, in the form attached hereto from all manufacturers, materialmen, and

⁵The Owner shall insert a rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued.

⁶See Footnote 5.

⁴See Footnote 1.

§ 1726.352

subcontractors furnishing services or materials for the Project or such Section and a certificate in the form attached hereto to the effect that all labor used on or for the Project or such Section has been paid and that all such releases have been submitted to the Owner for approval.

Section 3. Payments to Materialmen and Subcontractors. The Bidder shall pay each materialman, and each subcontractor, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Bidder for and on account of materials furnished or construction performed by each materialman or each subcontractor.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property. The Bidder shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements.

a. The Bidder shall at no time and under no circumstances cause or permit any employee of the Bidder to perform any work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in the Notice and Instructions to Bidders.

b. The Bidder shall so conduct the construction of the Project as to cause the least possible obstruction of public highways.

c. The Bidder shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances and regulations or by local conditions.

d. The Bidder shall do all things necessary or expedient to properly protect any and all parallel, converging and intersecting lines, joint line poles, highways and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways or other property are damaged in the course of the construction of the Project the Bidder shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

e. Where the right-of-way of the Project traverses cultivated lands, the Bidder shall limit the movement of its crews and equipment so as to cause as little damage as possible to crops, orchards or property and shall endeavor to avoid marring the lands. All

7 CFR Ch. XVII (1-1-97 Edition)

fences which are necessarily opened or moved during the construction of the Project shall be replaced in as good condition as they were found and precautions shall be taken to prevent the escape of livestock. The Bidder shall not be responsible for loss of or damage to crops, orchards or property (other than livestock) on the right-of-way necessarily incident to the construction of the Project and not caused by negligence or inefficient operation of the Bidder. The Bidder shall be responsible for all other loss of or damage to crops, orchards, or property, whether on or off the right-of-way, and for all loss of or damage to livestock caused by the construction of the Project. The right-of-way for purposes of this said section shall consist of an area extending ____ feet on both sides of the center line of the poles along the route of the Project lines, plus such area reasonably required by the Bidder for access to the route of the Project lines from Public roads to carry on construction activities.

f. The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Bidder. The Bidder shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Bidder by reason of any Act of God or other casualty or cause whether or not the same shall have occurred by reason of the Bidder's negligence.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Bidder, its

Rural Utilities Service, USDA

§ 1726.352

subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Bidder.

(iii) Bidder shall provide to Owner's satisfaction evidence of Bidder's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

g. Any and all excess earth, rock, debris, underbrush and other useless material shall be removed by the Bidder from the site of the Project as rapidly as practicable as the work progresses.

h. Upon violation by the Bidder of any of the provisions of this Section, after written notice of such violation given to the Bidder by the Engineer or the Owner, the Bidder shall immediately correct such violation. Upon failure of the Bidder so to do the Owner may correct such violation at the Bidder's expense; Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder's expense without such prior notice to the Bidder.

i. The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

j. The Bidder shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the owner that proper authorization has been received from the owner of the property, and the Bidder shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on its land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

Section 2. Insurance. The Bidder shall take out and maintain throughout the period of this Agreement the following types and minimum amounts of insurance:

a. Workers' compensation and employers' liability insurance as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained vol-

untarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

b. Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage of not less than \$1 million for each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including umbrella or catastrophe form.

c. Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than \$1 million per person and \$1 million for each occurrence, and property damage limits of \$1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Delivery of Possession and Control to Owner.

a. Upon written request of the Owner the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1f hereof with respect to such portion of the Project so delivered to the Owner shall be terminated; Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials and workmanship as contained in Article II, Section 6 hereof.

b. Where the construction of a Section as hereinbefore defined in Article II, Section 1c and Article III, Section 1c shall have been completed by the Bidder, the Owner agrees, after receipt of a written request from the Bidder, to accept delivery of possession and control of such Section upon the issuance by the Engineer of a written statement that the Section has been inspected and found acceptable by the Engineer. Upon such delivery of the possession and control of any such Section to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1f hereof with respect to such Section so delivered to the Owner shall be terminated: Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials or workmanship as contained in Article II, Section 6 hereof.

Section 4. Energizing the Project.

a. Prior to Completion of the Project the Owner, upon written notice to the Bidder, may test the construction thereof by temporarily energizing any portion or portions thereof. During the period of such test the portion or portions of the Project so energized shall be considered as within the possession and control of the Owner and governed by the provisions of Section 3 of this Article. Upon written notice to the Bidder by the Owner of the completion of such test and upon deenergizing the lines involved therein said portion, or portions of the Project shall be considered as returned to the possession and control of the Bidder unless the Owner shall elect to continue possession and control in the manner provided in Section 3 of this Article.

b. The Owner shall have the right to energize permanently any portion or portions of the Project delivered to its possession and control pursuant to the provisions of Section 3 of this Article.

Section 5. Assignment of Guarantees. All guarantees of materials and workmanship running in favor of the Bidder shall be transferred and assigned to the Owner prior to the time the Bidder receives final payment.

Article V—Remedies

Section 1. Completion on Bidder's Default. If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the Surety or Sureties, if any, upon the Contractor's Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Bidder such default shall be corrected or arrangements for the correction thereof satisfactory to both the Owner and the Administrator shall be made by the Bidder or its

Surety or Sureties, if any, the Owner may take over the construction of the Project and prosecute the same to completion by Contract or otherwise for the account and at the expense of the Bidder, and the Bidder and its Surety or Sureties, if any, shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and plant belonging to the Bidder or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Bidder may have against third persons in connection with this Contract and for such purpose the Bidder does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

Section 2. Liquidated Damages. The time of the Completion of Construction of the Project is of the essence of the Contract. Should the Bidder neglect, refuse or fail to complete the construction within the time herein agreed upon, after giving effect to extensions of time, if any, herein provided, then, in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall have the right to deduct from and retain out of such moneys which may be then due, or which may become due and payable to the Bidder the sum of ____ dollars (____) per day for each and every day that such construction is delayed in its completion beyond the specified time, as liquidated damages and not as a penalty; if the amount due and to become due from the Owner to the Bidder is insufficient to pay in full any such liquidated damages, the Bidder shall pay to the Owner the amount necessary to effect such payment in full; Provided, however, that the Owner shall promptly notify the Bidder in writing of the manner in which the amount retained, deducted or claimed as liquidated damages was computed.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner or the Government or the Administrator shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election: Provided, however, that the provisions of Section 2 of this Article shall be the exclusive measure of damages for failure by the Bidder to complete the construction of the Project within the time herein agreed upon.

Article VI—Miscellaneous

Section 1. Definitions.

a. The term "Administrator" shall mean the Administrator of the Rural Utilities

Rural Utilities Service, USDA

§ 1726.352

Service of the United States of America and his duly authorized representatives or any other person in whom or authority in which may be vested the duties and functions which the Administrator is now authorized by law to perform.

b. The term "Engineer" shall mean the engineer employed by the Owner, with the approval of the Administrator, to provide engineering services for the Project and said Engineer's duly authorized assistants and representatives.

c. The term "Supervisor" shall mean the person, if any, appointed by the Administrator as the representative of the Government under the provisions of the Loan Contract providing for such appointment in special cases. The term is limited to such special representative of the Government, if any, who is responsible exclusively to the Administrator and does not refer to the Manager or any other person employed by the Owner and responsible to it.

d. The term "Project" shall mean the rural electric system, or portion thereof, described in the Plans and Specifications, Construction Drawings and maps attached hereto.

e. The term "Completion of Construction" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof except the Bidder's obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof, (2) the inventory referred to in Article III, Section 1 hereof, and (3) other final documents. The term "Completion of the Project" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion, signed by the Engineer and approved in writing by the Owner and the Administrator, shall be the sole and conclusive evidence as to the date of Completion of Construction and as to the fact of Completion of the Project.

Section 2. Materials and Supplies. In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Seller agrees to submit to the Purchaser such certificates with respect to compliance with the

foregoing provision as the Administrator from time to time may require.

Section 3. Patent Infringement. The Bidder shall save harmless and indemnify the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 4. Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Bidder.

Section 5. Compliance with Statutes and Regulations. The Bidder shall comply with all applicable statutes, ordinances, rules and regulations pertaining to the work. The Bidder acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statute thereto, and 18 U.S.C. §§287, 1001, as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental Agencies having jurisdiction in the premises.

Section 6. Equal Opportunity Provisions.

a. Bidder's Representations.

The Bidder represents that:

It has ____, does not have ____, 100 or more employees, and if it has, that it has ____, has not ____, furnished the Equal Employment Opportunity-Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Bidder agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

The Bidder agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than \$10,000, the Bidder will file such report, as required by law, and notify the owner in writing of such filing prior to the Owner's acceptance of this Proposal.

b. Equal Opportunity Clause. During the performance of this Contract, the Bidder agrees as follows:

(1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotions or transfer; recruitment

or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection of training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Bidder will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representative of the Bidder's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Bidder's noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be canceled, terminated, or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Bidder will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance; Provided, however, that in the event Bidder becomes involved in, or

is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

c. Certificate of Nonsegregated Facilities. The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 7. Franchises and Rights-of-Way. The Bidder shall be under no obligation to obtain or assist in obtaining: Any franchises, authorizations, permits or approvals required to be obtained by the Owner from Federal, State, County, Municipal or other authorities; any rights-of-way over private lands; or any agreements between the Owner and third parties with respect to the joint use of poles, crossings, or other matter incident to the construction and operation of the Project.

Section 8. Nonassignment of Contract. The Bidder shall perform directly and without subcontracting not less than twenty-five percentum (25%) of the construction of the Project, to be calculated on the basis of the total Contract price. The Bidder shall not assign the Contract effected by an acceptance of this Proposal or any interest in any funds that may be due or become due hereunder or enter into any contract with any person, firm or corporation for the performance of

Rural Utilities Service, USDA**§ 1726.352**

the Bidder's obligations hereunder or any part thereof, without the approval in writing of the Owner and of the Surety or Sureties, if any, on any bond furnished by the Bidder for the faithful performance of the Bidder's obligations hereunder. If the Bidder, with the consent of the Owner and any Surety or Sureties on the Contractor's Bond or Bonds, shall enter into a subcontract with any subcontractor for the performance of any part of this Contract, the Bidder shall be as fully responsible to the Owner and the Government for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it.

Section 9. Extension to Successors and Assigns. Each and all of the covenants and agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto.

Section 10. Contractor. Upon acceptance of this Proposal, the successful Bidder shall be the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

Section 11. Approval by the Administrator. No acceptance of this Proposal shall become effective until approval in writing of the Administrator: Provided, however, that no obligations shall arise hereunder unless such approval is given within forty-five (45) days from the date of acceptance by the Owner.

____ (Bidder)
By ____ (President)
____ (Address)

Attest: ____ (Secretary)
Date ____

The Proposal must be signed with the full name of the Bidder. If the Bidder is a partnership, the Proposal must be signed in the partnership name by a partner. If the Bidder is a corporation, the Proposal must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

*Transmission Construction Units***Section 1—Pole Units**

A pole unit consists of one pole in place. It does not include pole-top assembly unit or other parts attached to the pole. The first two digits indicate the length of the pole; the third digit shows the classification per A.S.A. (Example: 45-3 means a pole 45 feet long, class 3.)

Species of Timber: ____

Kind of Preservative: (Check one)

1. Creosote ____; 2. Pentachlorophenol ____; 3. Copper Naphthenate ____; 4. Waterborne preservative—CCA ____ ACZA ____

TM					

Total, Section 6— _____

Section 7—Right-of-Way Clearing Units

TM-12. The unit is 1,000 feet in length and _____ (_____) feet in width (to be measured _____ (_____) feet on one side of pole line or centerline of structures) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed _____ in height, shall be clear from the ground up on one side of the line of poles carrying conductors (See Detail A, Drawing TM-12-2A.) The length of actual clearing shall be measured in a straight line, parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush across the width of the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All lengths thus arrived at, added together and divided by 1,000 shall give the number of TM-12 units of clearing. The Bidder shall not remove or trim shade, fruit, or ornamental trees unless so directed by the Engineer in writing.

TM-12 (1). This unit is identical with TM-12, except the full width of the right-of-way to be cleared shall be _____ (_____) feet wide (to be measured _____ (_____) feet on each side of the pole line or centerline of structures) (See Detail D, Drawing TM-12-2A.)

TM-13. The unit, for purpose of quoting, is 1,000 feet in length of clearing off the right-of-way. The Engineer will select those trees off the right-of-way that he deems to be a hazard to the line and will designate them to the Bidder in writing as danger trees. When so designated, the Bidder shall remove or top such trees at his option except that the Bidder shall trim and not remove shade, fruit or ornamental trees unless otherwise directed by the Engineer in writing (See Drawings TM-12-2A and TM-13 for examples of danger trees.)

The measurement of length of right-of-way to be cleared shall be considered as a straight line parallel to the horizontal line between poles or centerline of structures, such measurement of length to be based on maximum dimension of foliage (not trunk) projected to the ground line (See Details E, F, G and H, Drawing TM-12-2A.) Dead trees having no foliage shall be measured across the maximum dimension and multiplied by two. (See Detail F, Drawing TM-12-2A.) Each tree so removed shall be added together to determine the total length of clearing. All

lengths thus arrived at, added together and divided by 1,000 shall give the number of TM-13 units (Example: Details E, F, G and H, Drawing TM-12-2A, total 0.10 of a TM-13 unit.)

TMC-12, TMC-12 (1). These units are identical to the respective TM units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming. TM-14. The unit is 1,000 feet in length and _____ (_____) feet in width (to be measured feet on one side of right-of-way center line) of actual clearing of right-of-way. Trees and underbrush should be cleared from the ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide "undulating" boundaries. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the service road. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or center line of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM-14 (1). This unit is identical with TM-14 except the full width of the right-of-way to be cleared shall be _____ (_____) feet wide (See Detail D, Drawing TM-12-2A.)

TM-15. The unit is 1,000 feet in length and _____ feet in width (to be measured _____ (_____) feet on one side of the right-of-way center line) of actual clearing of the right-of-way. Trees and underbrush should be cleared from ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide a "feathered" appearance in the right-of-way. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the service road.

The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or center line of structures and across the maximum dimension of foliage cleared projected to ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared

§ 1726.352

7 CFR Ch. XVII (1–1–97 Edition)

shall be omitted from the total measurement.

TM-15 (1). This unit is identical to TM-15 except the full width of the right-of-way, to be cleared shall be _____ (_____) feet wide (See Detail D, Drawing TM-12-2A).

Additional Requirements. (When specifying TM units denote type of disposal A or B).

A. Trees, brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used)

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (Describe)_____

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Engineer but in no case shall it be required to be less than _____ (_____) feet. Brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used).

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (Describe)_____

Total Section 7—_____

Section 8—Substation Assembly Units

Description of Construction Units. Each Construction Unit consists of a complete installation of the designated portion of a substation as specified on the drawings, together with connections to associated equipment. Each Construction Unit represents all labor and material including necessary accessories completely installed and tested in satisfactory operation. Full identification of each Construction Unit and all necessary specifications of the installation is shown on the drawings.

Items of material in each Construction Unit shall be of the designated size, rating, type, voltage, or other specification in accordance with the drawings. The bill of material drawing for each substation shows the identification of the Construction Units under which the material is to be installed and shows which items of material may be partly or entirely found in the lists of owner-furnished materials. All items of equipment, unless otherwise specified, are mounted on a structure which shall be a Construction Unit of Group A.

Each Construction Unit is designated by the letter of the Group to which it belongs and an identifying number. The same item of equipment carries the same Construction Unit designation in all the substations. Items of equipment designated by the same Construction Unit in one substation are of only one kind as to voltage, type and other specifications. The tabulation of construction units for each substation is separate and

contains all units necessary for construction of that substation.

Group A. Structures. A Construction Unit consists of a structure, or structures, with bus supports including insulators and fittings, buses, conductors and overhead ground wires to adjacent structures within the substation, grounding material to connect equipment with the ground bus, and associated material including mounting brackets, supports for equipment, clamps and connectors, all as specified in the drawings.

Group B. Three-Pole Group Operated Air Break Switches. A Construction Unit consists of one 3-pole group operated air break switch with all accessories and operating mechanisms as specified in the drawings.

Group C. Lightning Arresters. A Construction Unit consists of one single-phase lightning arrester.

Group D. Single Pole Disconnecting Switches. A Construction Unit consists of one single pole disconnecting or by-pass switch as specified in the drawings. If a fuse disconnect switch is specified, the fuse is included with the switch.

Group E. Oil Circuit Breakers. A Construction Unit consists of one complete three-phase power circuit breaker complete with supporting frame and control cabinet, unless shown otherwise in the drawings, mounted as specified in the drawings.

Group F. Oil Circuit Reclosers. A Construction Unit consists of a complete single-phase or three-phase oil circuit recloser as specified in the drawings.

Group G. Meters, Relays and Instrument Transformers. A Construction Unit consists

Rural Utilities Service, USDA

§ 1726.401

of one meter, relay, potential transformer or current transformer.

Group H. Transformers. A Construction Unit consists of one power transformer or one station service transformer either single-phase or three-phase as specified in the drawings.

Group I. Voltage Regulators. A Construction Unit consists of one single-phase or three-phase voltage regulator as specified in the drawings.

Group J. Communications and Supervisory Control Equipment. A Construction Unit consists of carrier current equipment, microwave, or other types of communications and supervisory control equipment as specified in the drawings.

Group K. Conduit and Cable. A Construction Unit consists of the wire, cable, conduit and accessories necessary to complete the installation of equipment in accordance with the specifications and drawings, where such installation has not been included in other Groups.

Group L. Foundations. A Construction Unit consists of concrete footings and foundations except for the fence, as specified in the drawings.

Group M. Site Preparation. A Construction Unit consists of clearing, grading, drainage work, and surfacing, as specified in the drawings.

Group N. Fence. A Construction Unit consists of the complete installation of the fence, gates, etc., as specified in the drawings.

Group O. Station Grounding. A Construction Unit consists of the complete ground bus including ground rods, grounding mats or platforms, except as otherwise provided in other Groups, with connections to structures, equipment, and fence as specified in the drawings.

Group P. Building. A Construction Unit consists of a control building or cabinet, on a foundation of Group L and the facilities and equipment installed therein as specified in the drawings, except as otherwise provided in other Groups.

Other Groups. The Engineer shall specify such additional Groups as may be necessary for the completion of the Project. Description of these Groups shall be provided by an addition to this Section of the Specifications for Construction.

§§ 1726.353—1726.399 [Reserved]

Subpart J—Contract Closeout

§ 1726.400 Final contract amendment.

As needed, a final contract amendment will be prepared and processed in accordance with § 1726.24(b) prior to or in conjunction with the closeout of the contract.

§ 1726.401 Material contract closeout.

This section is applicable to contracts executed on RUS Form 173.

(a) *Delivery inspection.* The borrower (acting through its engineer, if applicable) will verify that all materials are delivered in proper quantities, in good condition, and in compliance with applicable specifications.

(b) *Closeout documents.* The borrower (acting through its engineer, if applicable) will obtain from the supplier a “Buy American” certificate, RUS Form 213, any manufacturer’s guarantee(s) and, if applicable, a copy of RUS Form 224, Waiver and Release of Lien. Closeout documents for materials contracts need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

(c) *Final payment.* Upon completion of the actions required under paragraphs (a) and (b) of this section, the borrower

§ 1726.402

shall make final payment to the supplier in accordance with the provisions of the material contract or written purchase order.

§ 1726.402 Equipment contract closeout.

This section is applicable to contracts executed on RUS Form 198.

(a) *Final inspection and testing of equipment.* The borrower (acting through its engineer, if applicable) will perform the final inspection and testing of equipment as appropriate for the specific equipment. The borrower (acting through its engineer, if applicable) will schedule such inspection and testing at a time mutually agreeable to the borrower, engineer, and the supplier or manufacturer. Within thirty (30) days after completion of the inspection and testing, the borrower (acting through its engineer, if applicable) will prepare a report of the inspection and testing, obtain a copy of the report from the engineer, and submit a copy to the supplier or manufacturer. This report must include a detailed description of the methods of conducting the test(s), observed data, comparison of guaranteed and actual performance, and recommendations concerning acceptance. The borrower will obtain from the engineer a written certification stating that the equipment has been installed, placed in satisfactory operation and tested, and meets the contract requirements. Where more than one-hundred and eighty (180) days have elapsed since the delivery of the equipment and the equipment has not been installed or tested, the contract may be closed out upon certification by the engineer that the equipment has been inspected and appears to be in accordance with the contract requirements.

(b) *Closeout documents.* (1) The borrower (acting through its engineer, if applicable) will obtain the following executed documents:

(i) Certification by the project engineer in accordance with paragraph (a) of this section.

(ii) All guarantees or warranties.

(iii) A "Buy American" certificate, RUS Form 213, from the supplier or manufacturer.

(2) Closeout documents for materials contracts need not be submitted to

7 CFR Ch. XVII (1–1–97 Edition)

RUS unless specifically requested by RUS.

(c) *Final payment.* Upon completion of the actions required under paragraphs (a) and (b) of this section, the borrower will make final payment to the supplier or manufacturer in accordance with the provisions of the equipment contract.

§ 1726.403 Project construction contract closeout.

This section is applicable to contracts executed on RUS Forms 200, 203, 257, 764, 786, 830, and 831.

(a) *Final test of equipment supplied under a construction contract.* If equipment is supplied under a construction contract, the borrower (acting through its architect or engineer, if applicable) will perform the final inspection and testing of equipment as appropriate for the specific equipment. The borrower (acting through its architect or engineer, if applicable) will schedule such inspection and testing at a time mutually agreeable to the borrower, architect or engineer, and the contractor. Within thirty (30) days after completion of the inspection and testing, the borrower (acting through its architect or engineer, if applicable) will prepare a report of the inspection and testing, obtain a copy of the report from its architect or engineer, and submit a copy to the contractor. This report must include a detailed description of the methods of conducting the test(s), observed data, comparison of guaranteed and actual performance, and recommendations concerning acceptance. The borrower will obtain from its architect or engineer a written certification stating that the equipment has been installed, placed in satisfactory operation and tested, and meets the contract requirements. Where more than one-hundred and eighty (180) days have elapsed since the delivery of the equipment and the equipment has not been installed or tested, the contract may be closed out upon certification by its architect or engineer that the equipment has been inspected and appears to be in accordance with the contract requirements.

(b) *Final inspection of construction.* The borrower will require the contractor to notify the architect or engineer

when construction is complete. The borrower (acting through the architect or engineer, if applicable) will schedule such final inspection at a time mutually agreeable to the borrower, architect or engineer, contractor, and the respective RUS General Field Representative (GFR), if the GFR has notified the borrower or its architect or engineer of a desire to observe the final inspection. The borrower (acting through its architect or engineer, if applicable) will perform a final inspection of the construction and notify the contractor of any required changes or corrections.

(c) *Closeout documents.* (1) Upon satisfactory completion of construction (including all changes and corrections by the contractor), the borrower (acting through its architect or engineer, if applicable) will obtain executed copies of the following documents:

(i) RUS Form 181, Certificate of Completion, Contract Construction for Buildings (for contracts executed on RUS Form 257), or RUS Form 187, Certificate of Completion, Contract Construction (for contracts executed on all other forms under this section).

(ii) RUS Form 213, "Buy American" certificate.

(iii) RUS Form 224, Waiver and Release of Lien, from each manufacturer, supplier, and contractor which has furnished material or services or both in connection with the construction.

(iv) RUS Form 231, Certificate of Contractor.

(v) RUS Form 254, Construction Inventory, including all supporting documents, such as RUS Forms 254a-c, construction change orders, and amendments for contracts executed on RUS Forms 203, 764, 830 or 831.

(vi) Certification by the project architect or engineer in accordance with §1726.403(a), if applicable.

(vii) Final design documents, as outlined in part 1724 of this chapter.

(2) *Distribution of closeout documents.*

(i) The borrower will retain one copy of each of the documents identified in paragraph (c)(1) of this section in accordance with applicable RUS requirements regarding retention of records.

(ii) For contracts subject to RUS approval, the borrower will submit the following closeout documents for RUS

approval (through the GFR except for generation projects):

(A) RUS Form 181, Certificate of Completion, Contract Construction for Buildings (for contracts executed on RUS Form 257), or RUS Form 187, Certificate of Completion, Contract Construction (for contracts executed on all other forms under this section).

(B) RUS Form 231, Certificate of Contractor.

(C) RUS Form 254, Construction Inventory, including all supporting documents, such as RUS Forms 254a-c and construction change orders, for contracts executed on RUS Forms 203, 764, or 831.

(iii) For contracts not subject to RUS approval, the closeout is not subject to RUS approval. The borrower will send one copy of RUS Form 181 or RUS Form 187 (as applicable) to RUS for information prior to or in conjunction with the applicable RUS Form 219, Inventory of Work Orders. The remaining closeout documents need not be sent to RUS unless specifically requested by RUS.

(d) *Final payment.* (1) The borrower will make final payment to the contractor upon completion of approval of all closeout documents by the parties to the contract, in accordance with the terms of the construction contract.

(2)(i) Upon receipt of final payment by the contractor, the borrower will obtain from the contractor a certification of receipt of final payment in the following form:

"The undersigned acknowledges receipt of the final contract payment of \$____ as satisfaction in full of all claims of the undersigned under the construction contract between the undersigned and ____ (borrower), dated as amended, and as complete performance by the latter of all obligations to be performed by it pursuant thereto. The total amount received under this contract is shown above."

(ii) The certification in paragraph (d)(2)(i) of this section is to be executed for the contractor by: the sole owner, a partner, or an officer of the corporation. Where this certification is executed for the corporation by a person other than the president, a certified copy of the authorization from the corporate board must be included with the

§ 1726.404

certification. This certification is not a replacement for itemized invoices.

§ 1726.404 Non-site specific construction contract closeout.

This section is applicable to contracts executed on RUS Forms 201, 790, and 792.

(a) *Final test of equipment supplied under a construction contract.* If equipment is supplied under a construction contract, the borrower (acting through its engineer, if applicable) will perform the final inspection and testing of equipment as appropriate for the specific equipment. The borrower (acting through its engineer, if applicable) will schedule such inspection and testing at a time mutually agreeable to the borrower, its engineer, and the contractor. Within thirty (30) days after completion of the inspection and testing, the borrower (acting through its engineer, if applicable) will prepare a report of the inspection and testing, obtain a copy of the report from its engineer, and submit a copy to the contractor. This report must include a detailed description of the methods of conducting the test(s), observed data, comparison of guaranteed and actual performance, and recommendations concerning acceptance. The borrower will obtain from the engineer a written certification stating that the equipment has been installed, placed in satisfactory operation and tested, and meets the contract requirements. Where more than one-hundred and eighty (180) days have elapsed since the delivery of the equipment and the equipment has not been installed or tested, the contract may be closed out upon certification by the engineer that the equipment has been inspected and appears to be in accordance with the contract requirements.

(b) *Final inspection of construction.* The borrower will require the contractor to notify its engineer when construction of a section of the project is complete. The borrower (acting through its engineer, if applicable) will schedule such final inspection at a time mutually agreeable to the borrower, its engineer, contractor, and the respective GFR, if the GFR has notified the borrower or its engineer of a desire to observe the final inspection.

7 CFR Ch. XVII (1–1–97 Edition)

The borrower (acting through its engineer, if applicable) will perform a final inspection of the construction of that section of the project and notify the contractor of any required changes or corrections.

(c) *Closeout documents.* (1) Upon satisfactory completion of construction of a section of the project (including all changes and corrections by the contractor), the borrower (acting through its engineer, if applicable) will obtain executed copies of the following documents:

(i) RUS Form 792b, Certificate of Contractor and Indemnity Agreement

(ii) RUS Form 213, “Buy American” certificate.

(iii) Certification by the project engineer in accordance with paragraph (a) of this section, if applicable.

(iv) Final design documents, as outlined in part 1724 of this chapter.

(2) *Distribution of closeout documents.*

(i) The borrower will retain one copy of each of the documents identified in paragraph (c)(1) of this section in accordance with applicable RUS requirements regarding retention of records.

(ii) For contracts not subject to RUS approval, the closeout is not subject to RUS approval and the closeout documents need not be sent to RUS unless specifically requested by RUS.

§ 1726.405 Inventory of work orders (RUS Form 219).

Upon completion of the contract closeout, the borrower shall complete RUS Form 219, Inventory of Work Orders, in accordance with part 1717, Post-Loan Policies and Procedures Common to Insured and Guaranteed Electric Loans, of this chapter.

EDITORIAL NOTE: Nomenclature changes to part 1728 appear at 55 FR 39397, Sept. 27, 1990.

§ 1728.10 General purpose and scope.

(a) The requirements of this part are based on contractual provisions between RUS and the organizations which receive financial assistance from RUS.

(b) RUS will establish certain specifications and standards for materials, equipment, and construction units that will be acceptable for RUS financial assistance for the electric program. Materials and equipment purchased by the electric borrowers or accepted as contractor-furnished material must conform to RUS standards and specifications where they have been established and, if included in RUS Bulletin 43-5, "List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers" (List of Materials), must be selected from that list or must have received technical acceptance from RUS. RUS, through its Technical Standards Committees, will evaluate certain materials, equipment and construction units, and will determine acceptance.

[50 FR 47710, Nov. 20, 1985. Redesignated at 55 FR 39395, Sept. 27, 1990]

§ 1728.20 Establishment of standards and specifications.

(a) *National and other standards.* RUS will utilize standards of national standardizing groups, such as the American National Standards Institute (ANSI), American Wood Preservers' Association (AWPA), the various national engineering societies and the National Electrical Safety Code (NESC), to the greatest extent practical. When there are no national standards or when RUS determines that the existing national standards are not adequate for rural

electric systems, RUS will prepare standards for material and equipment to be used on systems of electric borrowers. RUS standards and specifications will be codified or listed in § 1728.97, Incorporation by Reference of Electric Standards and Specifications. RUS will also prepare specifications for materials and equipment when it determines that such specifications will result in reduced costs, improved materials and equipment, or in the more effective use of engineering services.

(b) *Deviations from Standards.* No member of the RUS staff will be permitted to authorize deviations from the standard specifications, or to establish or change the technical standards, or to authorize the use of items that have not received acceptance by the Technical Standards Committees, except as provided for under § 1728.70, or by authorization and/or delegation of authority by the Administrator of RUS.

(c) *Category of Items.* Items appearing in the List of Materials are listed by categories of generic items which are used in RUS construction standards incorporated by reference in § 1728.97. RUS will establish and define these categories and will establish all criteria for acceptability within these categories.

[50 FR 47710, Nov. 20, 1985. Redesignated at 55 FR 39395, Sept. 27, 1990, and amended at 55 FR 53487, Dec. 31, 1990]

§ 1728.30 Inclusion of an item for listing or technical acceptance.

(a) *Scope.* RUS, through its Technical Standards Committees "A" and "B" will determine the acceptability of certain standards, standard specifications, standard drawings, and items of materials and equipment to be used in transmission, distribution and general plant (excluding office equipment, tools, and work equipment, and consumer-owned electric wiring facilities).

(b) *Addresses of Committees.* The address of Technical Standards Committee "A" is: Chairman, Technical Standards Committee "A" (Electric), Rural Utilities Service, U.S. Department of Agriculture, Washington, DC 20250-1500. The address of Technical Standards

§ 1728.30

7 CFR Ch. XVII (1–1–97 Edition)

Committee “B” is: Chairman, Technical Standards Committee “B” (Electric), Rural Utilities Service, U.S. Department of Agriculture, Washington, DC 20250–1500.

(c) *Review by Technical Standards Committee “A”.* All proposals for listing a product in the List of Materials must be addressed to Technical Standards Committee “A.” This committee will consider all proposals made by sponsors of specifications, drawings, materials, or equipment in categories for which RUS has established criteria for acceptability. A sponsor may be a manufacturer, supplier, contractor or any other person or organization which has made an application for listing or has requested an action by the committee. Committee “A” will consider all relevant information presented in determining whether an item should be accepted by Technical Standards Committee “A.” Formal rules of evidence and procedure shall not apply to proceedings before this committee.

(d) *Action by Technical Standards Committee “A”.* (1) Committee “A” may take one of the following actions:

(i) Accept an item for listing without conditions (domestic items only),

(ii) Reject an item (domestic or nondomestic),¹

(iii) Accept an item for listing with conditions (domestic items only),

(iv) Table an item for a time period sufficient to allow the sponsor to be notified and furnish additional information (domestic or nondomestic),

(v) Grant technical acceptance with or without conditions for a period of one year from the date of notification by RUS (nondomestic items only).
